	Trash Management	Program Task RWQCB Letter	Continue to promote litter reduction as a key pollution prevention element. Provide local education on what the public can do to reduce and eliminate litter. This includes outreach through articles and ads in newsletters, and presentations at local schools events. (Also see Control Program for Trash for additional outreach tasks.)	Sunnyvale's litter reduction and public awareness outreach promotes litter as a key source of water pollution. The focus of the program is to raise litter awareness through education and community events. Resources for our public education campaign include community newsletters, employee newsletters, theater billboard advertising, bus back ads, clean up events, as well as demonstrations in school classrooms and at community events. The message identifies litter as a key water pollution element, and provides education on what the public can do to reduce and eliminate litter. • See Attachment G Table 1 - Detailed Descriptions PIP Activities and Self-Evaluation Matrix for FY 08-09	Ongoing Report 09/09	Jackie Besoyan, Environmental Outreach Coordinator

Table 1. Detailed Description of FY 08- 09 PI/P Activities and Self Evaluation Matrix

PI/P Activity[1]	Type of Outreach [2]	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Community			
Health & Resources Fair - Thermometer Exchange	Event – Targeted	A bi-annual event sponsored by the City of Sunnyvale Community Services Department and is held at the Sunnyvale Senior Center. The focus is to connect the senior community with resources that can be of a benefit to them and to provide information on optimizing their health and well being. September 08	During this event, outreach staff hosted a thermometer exchange where 198 mercury-containing thermometers were collected for proper disposal.
Health & Resources Fair – Pharmaceutical Disposal Talk	Event – Targeted	A bi-annual event sponsored by the City of Sunnyvale Community Services Department and is held at the Sunnyvale Senior Center. The focus is to connect the senior community with resources that can be of a benefit to them and to provide information on optimizing their health and well being. September 08	Along with the above activity, outreach staff presented a talk on the correct way to dispose of pharmaceuticals. Approximately 25 individuals attended this discussion and Q & A session.
Coastal Clean Up	Event – Targeted	Sunnyvale participated in this annual event which focuses on cleaning up California's coasts and waterways. September 08	The event in Sunnyvale had 43 volunteers that collected approximately 1875 pounds of litter and 60 pounds of mostly plastic recyclable materials from Sunnyvale West Channel and approximately one mile of the bank along the Guadalupe Slough.
State of the City Event	Event – General	This is an annual one-day event sponsored by the City. The event features activities and exhibits providing community information for residents. September 08	The Outreach booth featured water pollution prevention information. Literature distributed included IPM information, less-toxic options for pest control, and proper disposal information on both pesticides and mercury. Approximately 100 individuals stopped by the booth to ask questions and/or receive information.

[2] General, Targeted, Educational, or Citizen Participation types of outreach activities

PI/P Activity	Type of Outreach	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Community (cont.)			
Sunnyvale Pancake Breakfast	Event – Targeted	This event features a community breakfast, activities for kids, and exhibit booths providing public service information to the community. October 08	This event offers a venue for Outreach to focus on one of our short term goals - to inform individuals that indoor/outdoor daily activities impact the health of our watershed. Approx. 60 children/parents stopped by the booth for literature, information and/or to complete an art project on beneficial bugs for gardens.
Muslim Green Team Event	Event – General	This was the first time this event was held. The organization that hosted it extended an invitation to attend to SCVURPPP and Sunnyvale staff was able to fulfill the need. This event consisted of a variety of "green" exhibits and exhibitors. October 08	The Outreach exhibit highlighted the difference between sanitary sewers and storm drains, leading to information about water pollution prevention. This is primarily done through discussion, literature distribution, and presentations featuring the Enviroscape, which focuses on preventing water pollution from sources such as pesticides, fertilizers, dog waste, automotive fluids and car wash. Approx. 80 children/parents stopped by the booth for literature, information and/or to view an Enviroscape presentation.
Tarp Giveaway at the Landfill	Event - Targeted	This event was held in cooperation with the Silicon Valley Anti-Litter campaign, a collaborative effort for litter control in Santa Clara County. The event was conducted at the SMaRT Station in Sunnyvale November 08	A fact sheet, a free tarp and a brief reminder about litter prevention was given to drivers of vehicles arriving at the SMaRT Station with uncovered loads. At this event, 40 free tarps were given away.
Santa Clara County Creeks & Watershed Conference	Event – Targeted	This event was held by the Santa Clara County Creeks & Watershed Council and consisted of various booths and exhibits on related to county creeks, watershed issues and/or concerns and local government. November 08	This event offered a venue for Outreach to focus on how indoor/outdoor daily activities impact the health of our watershed. We used the exhibit that showed the difference between sanitary sewers and storm drains and handed out information on pollution prevention. During this event, we spoke to approximately 25 individuals.

PI/P Activity	Type of Outreach	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Community (cont.)			
SNAIL Neighborhood Association Meeting	Event – Targeted	Outreach staff was invited to speak at the monthly SNAIL Neighborhood Association meeting. March 09	Staff gave a presentation on the upcoming neighborhood litter clean up volunteer event and pollution prevention. Various brochures related to stormwater pollution prevention were distributed. Approximately 20 residents were in attendance.
Leadership Sunnyvale	Event – General	Leadership Sunnyvale is a community education program that provides it members with training on the fundamentals of leadership and classes in community awareness. The intention is to broaden participant awareness of complex community issues, strengthen leadership skills, and increase effectiveness in the community. During this annual event Public Works hosts an Environmental Awareness Day. April 09	This event presents a key opportunity to provide awareness to potential community leaders about watershed issues. Topics included wastewater treatment overview, a tour of the WPCP, and discussion on public outreach and education efforts regarding water pollution and its prevention. For this reporting year, 28 individuals participated in the event.
Earth Day Event – Thermometer Exchange	Event – Targeted	Sunnyvale hosted a week-long series of community events in celebration of Earth Day this year. Outreach staff participated in three events, which started on April 18 at the Farmers Market and concluded on April 25 with the Great American Litter Pick Up event. April 09	During the event at the Farmers Market, outreach staff hosted a Thermometer Exchange where 98 mercury containing thermometers were collected for proper disposal.
Great American Litter Pick Up	Event - Targeted	A county-wide event that focuses on cleaning up litter throughout Santa Clara County. This event wrapped up Sunnyvale's week on celebrating Earth Day. April 09	Nearly 60 volunteers participated and collected litter from neighborhoods within a one-mile radius of three different locations in Sunnyvale. Almost three cubic yards of trash and more than one-half cubic yard of recyclables were collected.
Columbia Health and Safety Fair	Event – General	Although the main emphasis is on fun, the city teams up once a year with local organizations to inform and educate area residents about health, safety, and community services. The event is held at the Columbia Neighborhood Center and provides opportunities for residents to educate and inform themselves about issues affecting their daily lives. May 09	The outreach exhibit highlighted the difference between sanitary sewers and storm drains. Literature about water pollution prevention was distributed and five Enviroscape demonstrations were presented during the event. Approximately 143 individuals (adults, students and children) visited the exhibit for information, literature and to view the presentations.

PI/P Activity	Type of Outreach	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Community (cont.)			
National River Clean Up Day	Event – Targeted	Sunnyvale participated in this annual event which focuses on cleaning up California's creeks and waterways. May 09	The event in Sunnyvale had 46 volunteers that cleaned 2.5 miles of Sunnyvale's East Channel and part of Calabazas Creek. Approximately 338 pounds of trash and 34 pounds of recyclables were collected in three hours.
Orchard Gardens Neighborhood Association Meeting	Event – Targeted	Outreach staff was invited to speak at the monthly Orchard Gardens Neighborhood Association meeting. June 09	Staff gave a half-hour presentation covering sustainable landscaping, including water conservation and IPM. Along with the presentation, various brochures and toilet tank leak detector tablets were distributed. Seventeen residents attended.
Compost workshops	Event - Targeted	Registrants learn that at-home composting turns organic material into valuable product for gardens and landscaping. Applying compost to gardens and landscaping reduces the need to apply fertilizer resulting in healthier plants, thus reducing the need for pesticide applications Ongoing	Workshops are held once per month, 10 times during the year. Attendance is sporadic, depending on the season. Generally, anywhere between 12 and 40 individuals attend each new workshop session.
Sunnyvale Farmers Market	Event - Targeted	The Sunnyvale Farmers Market is held every Saturday all year round. The Environmental Outreach exhibit promotes pesticide reduction through IPM practices during the Spring and Summer months, and highlights the difference between sanitary sewers and storm drains and pollution prevention during the Fall and Winter. Literature and fact sheets on less-toxic pest control are distributed. Other water pollution prevention literature is available, including the HHW mercury brochure and surplus utility bill inserts that target water pollution concerns. July – November 2008, February, March, and June 2009	The market draws 2-3000 people each Saturday and provides an effective way to interface with shoppers in a venue that promotes healthy food and pesticide free gardening. Everyone visiting the booth is in search of information about less-toxic pest control and/or water pollution prevention. For this reporting year, we spoke to approximately 253 individuals.

PI/P Activity	Type of Outreach	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Community (cont.)			
Plant Tours	Event – Educational	Plant Tours are conducted year round. Treatment stages and processes are discussed, and attendees learn the function and importance of the wastewater treatment plant and its role of preventing water pollution from wastewater discharge. Both stormwater and wastewater pollution issues are discussed. Ongoing	The Plant conducted 7 adult tours in FY 08-09, reaching 91 individuals. Discussions about water pollution and issues impacting the watershed and the environment help tour attendees gain a better understanding of the problem. At the completion of the tour, attendees are given educational materials that promote environmentally responsible behaviors. Section for *Schools and Youth* lists additional outreach information. By the end of the tour, all participants know the difference between sanitary sewers and storm sewers.
Theater Billboards	Media – Targeted	Sunnyvale produced water pollution prevention advertising for on-screen viewing at the Mercado 20 and Cupertino 16 Theaters. Pollution prevention messages are selected according to priority and season. The advertisement for this FY focused on IPM and pesticides. April – May 2009	These 15-second animated/audio ads are viewed by movie audiences two times during a 15-minute timeframe prior to every movie shown in the theaters on a total of 36 screens. This is a beneficial method, albeit extremely expensive way to reach large groups of people with targeted pollution prevention messages.
Bus Back Ads	Media – Targeted	Sunnyvale produced water pollution prevention advertising for ads that were placed on the tail of a minimum of 50 VTA buses that have routes that are in Sunnyvale. The advertisement focused on the importance of keeping litter out of storm drains and was titled: *"If it flows down the street … it ends up in the creek".* May – June 2009	Sunnyvale received several positive comments on the ads from residents and others. The ads are viewed by many and encompassed most of the bus routes in Sunnyvale and Mountain View, along with areas in Santa Clara, Cupertino, Stanford, Los Altos and Loyola. Like theater ads, this is a beneficial yet expensive way to reach large groups with targeted messages.
Utility Bill Inserts	Media - General	Four pollution prevention advertisements were utilized as a bill inserts this reporting year. *How to Recycle Yard Trimmings (Sept-Oct 08)* *Have Fluorescent Bulbs or E-waste to Get Rid Of (Jan-Feb 09)* *Protect Our Waterways – Please Don't Litter (Mar-Apr 09)* *Keeping Our Creeks & Bay Clean (May-June 09)*	Stuffing utility bills with advertising inserts reaches approximately 30,000 account customers for each two-month mailing. This is an ongoing outreach effort, and we will continue to use this venue as a cost effective way to reach a large number of people.

PI/P Activity	Type of Outreach	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Community (cont.)			
Sunnyvale ReNews	Media – General	The Sunnyvale ReNews Newsletter is focused on reduce, reuse, recycle messages with a heavy focus on HHW. Articles and informational pieces relating to pollution prevention through proper disposal were published in the newsletter. *Household Hazardous Waste (Summer 08)* *Compost Workshop (Summer & Fall 08)* *Recycling Drop-Off Center (Summer 08)* *Thermometer Exchange (Fall 08)* *P2 Week Calendar Listing (Fall 08)* *Recycling at the SMaRT Station (Spring 09)* *Earth Day Events (Spring 09)* *Choice Collect (Spring 09)* *New! Med Drop Program (Spring 09)*	This newsletter is mailed quarterly to approximately 29,000 single family residents and 24,000 residents living in multi-family units. Copies are also available in key locations throughout the city. Considering the reach, we will continue to use this newsletter for outreach as it serves a productive method to continually remind the community about proper disposal of HHW products.
Quarterly Report Articles	Media - General	Pollution prevention articles targeting priority pollutants of concern and other messages were published in the city's quarterly community newsletter. *Compost Workshops (Summer 08)* *Plant Tours (Fall 08)* *Pollution Prevention Week (Fall 08)* *No Drugs Down the Drain (Fall 08)* *Did You Know ...(Fall 08)* *Trash & Recycling (Winter 09)* *Old Batteries Taking Over Your House? (Winter 09)* *Leaves, Leaves – Love Those Leaves (Winter 09)* *Plant Tours (under ongoing events) (Winter 09)* *Sunnyvale Celebrates Earth Day (Spring 09)* *We Must All Pitch in to Conserve Water (Spring 09)* *National River Cleanup Day (Spring 09)* *Thermometer Exchange Ad (Spring 09)* *Pilot Storm Drain Retrofit Project (Spring 09)*	The Quarterly Report is mailed to approx. 60,000 residents and businesses in Sunnyvale each every three months. In addition, 2000 copies of the report are distributed to reception and outreach areas around Sunnyvale. The Quarterly Report as it has proven to be a cost effective way to reach people who live, work and/or go to school in Sunnyvale with information on water pollution prevention.
Yahoo! Groups	Media – Targeted	Sunnyvale Cool City is group of Sunnyvale, California, residents and friends organized to act to reduce the emissions of greenhouse gases in their community.	This site calendared and promoted several of our events this year: Mercury Thermometer Exchange, Earth Week and Great American Litter Pickup.

PI/P Activity	Type of Outreach	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Community (cont)			
City of Sunnyvale Community e-News List	Media – General	Emails promoting the following events were sent out to a list of individuals interested in upcoming activities/events and City news: *Pollution Prevention Week (Aug 08)* *Mercury Thermometer Exchange (Aug 08)* *Coastal Cleanup Day (Aug-Sept 08)* *What Do You Do with Expired Meds (Jan 09)* *SV Urges Reduction in Water Use (Mar 09)* *Mercury Thermometer Exchange (Mar-Apr 09)* *Great American Litter Pick-up (Mar-Apr 09)* *National River Cleanup Event (Apr –May 09)*	These emails were sent to approximately 220 community members.
KSUN Community Cable TV	Media - General	Messages promoting certain events are developed and advertised on KSUN community cable TV. The following were ran during this FY: *Pollution Prevention Week Tips (Sept 08)* • *Tip #1 – Pesticides* • *Tip #2 – Auto Fluids* • *Tip #3 – Fluorescent Bulbs / Batteries* • *Tip #4 – Yard Waste* • *Tip #5 – Car Washes* *Mercury Thermometer Exchange (Sept 08)* *No Drugs Down the Drain (Oct 08)* *Mercury Thermometer Exchange (Apr 09)*	KSUN reaches approximately 20,000 Sunnyvale residents with cable TV of whom 20% watch KSUN at least once a month.
Flyers and Posters	Media - General	Posters were placed at various key locations throughout the city promoting the following events: *Coastal Cleanup Event (Sept 08)* *Mercury Thermometer Exchange (Sept 08)* *P2 Week Posters (Sept 08)* *No Drugs Down the Drain (Oct 08)* *Mercury Thermometer Exchange (Mar-Apr 09)* *Great American Litter Pick-up (Mar-Apr 09)* *Earth Week Activities (Apr 09)* *National River Cleanup (Apr-May 09)*	Any person living, working, going to school in Sunnyvale who used the library, community center, senior center or city hall could view the posters.

PI/P Activity	Type of Outreach	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Community (cont)			
Website	Media - General	Sunnyvale provides pollution prevention messaging on three different web sites in the City as well as on green.insunnyvale.com. - The Solid Waste and Recycling website provides HHW information regarding proper disposal of pesticides, fertilizers, and mercury containing products. - The Water Pollution Control Plant Pretreatment section includes specific business related BMPs for painting, concrete, facility, equipment, cleaning, and vehicle maintenance. The Water Pollution Control Plant web site has been revised and includes extensive water pollution prevention information and upcoming event information.	The City's website does not have the ability to count number of hits.
Press Releases – City of Sunnyvale	Media – General	Sunnyvale provided the following press releases on pollution prevention: *- Mercury Thermometer Exchange (Sept 08)* *- SV Fire Stations Provide Safe Disposal for Old Meds (Jan 09)* *- Earth Week Activities (Apr 09)*	All press releases are listed on the City's web site and may be picked up and run by other media agencies as well.
Sunnyvale Sun	Media – General & Targeted	Sunnyvale ran the following ads, articles and/or calendar listings in the Sunnyvale Sun during the last fiscal year: *Mercury Thermometer Exchange Print Ad & Calendar listing (Sept 08 & Apr 09)* *Watch Out for Toxic Pesticides (Sept 08 & Mar, Apr & June 09)Topics: Weeds, Roses, Snails & Yellowjackets* *Watch Out for Mercury Pollution (Sept & Nov 08)* *Litter is Water Pollution (Dec 08 & Jan-Feb 09)* *Fire Stations Will Collect Medicines (Jan 09)* *Earth Week Calendar of Activities/ Article (Apr 09)* *Reduce Water Usage Article (Apr 09)* *Compost Print Ad (Apr 09)* *National River Cleanup Day (May 09)*	The Sunnyvale Sun has a readership of approximately 36,824 and a circulation of 17,963. Several people who took part in the thermometer exchange event(s) brought a copy of the ad with them, indicating that was the source of their information about the event..

PI/P Activity	Type of Outreach	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Community (cont)			
San Jose Mercury News	Media – General & Targeted	The following ads and/or calendar listings(paper and/or zVents calendar) ran during FY 08/09: *Mercury Thermometer Exchange - print ad (BAPPG AD) & zVents listing (Sept 08)* *Coastal Cleanup (Sept 08) – countywide ad* *No Drugs Down the Drain (Oct 08) – BAPPG Ad* *Mercury Thermometer Exchange - zVents listing (Mar-Apr 09)* *Great American Litter Pickup - zVents listing (Mar-Apr 09)* *National River Cleanup Day - zVents listing (Mar-May 09)* *National River Cleanup Day – Sunnyvale site mentioned in article on event (May 09)*	An evaluation of media mentions is not feasible due to difficulties gathering data from widespread advertising.
San Francisco Chronicle	Media – Targeted	The following ads were developed by BAPPG and ran during FY 08/09: *Mercury Thermometer Exchange (Sept 08)* *No Drugs Down the Drain (Oct 08)*	An evaluation of media mentions is not feasible due to difficulties gathering data from widespread advertising.
Broadcast News Community Announcement	Media – Targeted	Thermometer Exchange –The morning show on KTVU (channel 2) announced the event and explained the dangers of mercury thermometers (Sept 08)	An evaluation of media mentions is not feasible due to difficulties gathering data from widespread advertising.
Employees			
Flyers & Posters	Media – General & Targeted	The following flyers & posted were posted in employee break rooms and/or building this FY: *Coastal Cleanup Event (Sept 08)* *Mercury Thermometer Exchange (Sept – Oct 08)* *P2 Week (Sept 08)* *No Drugs Down the Drain (Oct 08)* *Mercury Thermometer Exchange (Mar – Apr 09)* *Great American Litter Pick-Up (Mar – Apr 09)* *National River Clean-Up Event (Apr – May 09)*	Posters are distributed to city offices and displayed for employee viewing in the lunchrooms at city hall, library, corporation yard and community center. Reach cannot be determined.

PI/P Activity	Type of Outreach	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Employees (cont)			
The Harbinger	Media – General	The Harbinger is the newsletter for employees of the city of Sunnyvale. The following water pollution prevention articles were published in reporting year 08/09: *Helping the Community to Protect the Environment (Jul-Aug 08)* *Coastal Cleanup (Sept-Oct 08)* *The Ants Come Marching In (Jan-Feb 09)* *Great American Litter Pick-up – calendar listing (Mar-Apr 09)* *National River Cleanup Day - Save the Date (Mar-Apr 09)* *Upcoming Events: National River Cleanup (May-Jun 09)* *Spring Cleaning (May-Jun 09)* *Tour the WPCP (May-Jun 09)*	Articles and information contained in the Harbinger reach approx. 900 municipal employees. This effort will be ongoing, as publishing in this newsletter provides a cost effective way to reach all employees with specific water pollution information and suggestions for behavioral change that could be useful both on the job and at home.
Poop Scoop	Media – General	Several articles targeting both general pollutants and specific pollutants of concern were published in this employee newsletter. *Pollution Prevention Week (Sept 08)* *Pilot Storm Drain Retrofit (Sept 08)* *As Rains Hit, Pollution Gets Swept Through Bay Area (June 09)*	Approximately 65 employees at the Water Pollution Control Plant read the Poop Scoop, the employee newsletter published periodically.
Water Conservation for Staff	Training – Targeted	An hour and a half workshop for employees on what actions one can take both at work and at home to conserve water. Sponsored through the citywide training program and presented by various city employees. Apr 09	Approximately 30 employees attended this training.
Environmental Procurement Policy for Staff	Training - Targeted	A 15 minute Power Point presentation is given at staff meetings throughout the city. Three presentations were held this year. Topics covered include purchasing recycled material, the City's IPM policy, and identification/proper disposal of mercury-containing products. May – June 09	Approximately 30 employees have received training in FY 08-09, with additional sessions planned for FY 09-10, pending staff meeting schedules. This is an effective way to provide 1:1 training and address staff questions about proper selection of materials, the IPM policy, and handling of wastes.

PI/P Activity	Type of Outreach	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Business and Industry			
Sunnyvale Rotary Club	Event – General	Outreach staff was invited to speak at the Rotary Club's morning meeting during P2 Week. Sept 08	Staff spoke on the difference between and a sanitary sewer and a storm drain, the importance of pollution prevention and talked abut the Santa Clara Valley Green Gardener training program to approximately 10 members.
Life and Wellness Fairs Health and Safety Fairs	Event – General	Exhibitor booths offered free information to company employees that focused on helping them live a safer and healthier lifestyle. Business events attended this reporting year include: *Quicklogic Corporation (Aug 08)* *Lockheed (Sept 08)* *Aruba Networks (Apr 09)* *Network Appliances (Apr 09)* *Northrup Gruman (Apr 09)*	Staff attended Health and Safety Fairs at five Sunnyvale businesses this reporting year. The exhibit portrays the difference between sanitary sewer and storm drains and general water pollution prevention literature about mercury, pesticides, car wash, FOG, automotive fluids, etc is available. Approximately 600 company employees received water pollution prevention information at the events held this fiscal year.
Business E-Mail Blasts	Media - General	The following opportunities for community action/involvement was sent this FY: *Great American Litter Pickup (Apr 09)* *National River Cleanup Day (May 09)*	This e-mail blast goes out to businesses in Sunnyvale that have opted to receive messages from the Recycling division.
Schools and Youth			
Creek Education Program	Event – Targeted and Educational	Water and Structures of Life. After studying the course in class, students take a creek education trip to McClellan Ranch Park as a supplement to their water studies course. This program is produced in partnership with the Cupertino School District. School year 08-09	This reporting year, Sunnyvale provided funding to cover the transportation cost of (4) buses, reaching approximately 381 students.
Classroom Presentations	Event – Targeted and Educational	In this water pollution education program, staff provides and presentation and demonstration on water pollution and prevention. Students learn the forms of water, the water cycle, what a watershed is, how water pollution happens, how to prevent water pollution, and how to conserve water. School year 08-09	Outreach conducted 38 classroom presentations this school year, reaching approx. 886 children. These numbers reflect an increase of 130% in the number of students reached and an increase of 140% in the number of classrooms participating. Feedback from teachers indicated the information greatly improved student understanding of storm drains and water pollution caused by human activities. Teachers felt the program reinforced and supplemented their own curriculum.

PI/P Activity	Type of Outreach	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Schools and Youth			
Plant Tours School Groups and Boy/Girl Scouts	Event – Educational	Students / scouts learn the stages of treatment by viewing the various processes, equipment, and tanks. Taking a tour of the plant helps students gain a better understanding of how human actions impact water in the sanitary sewer. School year 08-09	Outreach conducts student tours of the Water Pollution Control Plant to educate youth about how the treatment plant functions and the importance of providing wastewater treatment. Youth also learn the different between sanitary and storm drain collection systems. The plant hosted 19 youth tours this reporting year, reaching over 378 students/scouts.
Sunnyvale Farmers Market	Event - Targeted	At the market, staff from Environmental Outreach passed out water conservation stickers to children accompanied with a verbal reminder about how they should be careful not to waste water.	Approximately 200 children received the stickers with a brief, verbal water conservation message during this reporting year.
Community Kidz Workshop	Event – Targeted and Educational	Sponsored by the City twice a year during Winter and Spring school breaks. Through fun games and activities, camp participants learn about living a healthy lifestyle and how they can contribute to the welfare of the community they live in. Feb & Apr 09	This was the first year for outreach staff to participate in this program. Presentations focused on the difference between sanitary sewers and storm drains, leading to information about water pollution prevention. This was primarily done through discussion, student participation in an "Environmental Jeopardy" game, and a demonstration using the Enviroscape. In cooperation with Solid Waste staff who presented recycling information, Earth Care Kidz cards were given to participants. February's session had 28 children attending and April's had 50. We have been asked to participate in future workshops scheduled in FY 09-10.
Library Presentation	Event – General	A joint venture between Solid Waste and WPCP staff. This presentation was held during Earth Week, was titled Pollution Solutions and focused on water pollution prevention and recycling. The ages for the attendees were 3-5 years. Apr 09	This was a first time event. Presentations focused on the difference between sanitary sewers and storm drains, leading to information about water pollution prevention. This was primarily done through discussion and a presentation featuring the Enviroscape. Thee event was attended by 27 people (15 children and 12 adults). A presentation at another joint venture is planned for the Summer of 2009.

PI/P Activity	Type of Outreach	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Regional (Events that Sunnyvale helped Staff)			
Spring Garden Market – Santa Clara County Master Gardeners event	Event - Targeted	A weekend event in San Jose related to gardening and sponsoring exhibits that educate the public on how to protect the environment using sustainable gardening practices. Various vendors participate, selling plants and offering gardening tips. Apr 09	Sunnyvale supported Program efforts by helping to staff the exhibit at this event. See SCVURPPP section for additional information.
Mission College Eco / Earth Day Fair	Event - Targeted	Inaugural event at Mission College in Santa Clara that featured Green community organizations, eco friendly vendors, interactive activities and demonstrations. Apr 09	Sunnyvale supported Program efforts by helping to staff the exhibit at this event. The goal of the outreach was to inform the public on watersheds and water pollution prevention.
Festival in the Park	Event – Targeted	A weekend event in San Jose related to health and wellness, sponsoring exhibits that educate the public on how to protect the environment. Various vendors participate, promoting health, wellness and sustainable environment practices June 09	Sunnyvale supported Program efforts by helping to staff the exhibit at this event. The goal of the outreach was to inform the public through interaction and providing literature and "fly swatter" give-aways to promote IPM practices. Outreach was provided on the Santa Clara Valley Green Gardener program for landscape maintenance needs for the public.
Ad Hoc Task Group Mercury	Targeted	SCVURPPP work plan activities include developing a mercury virtual elimination policy for the City, educating employees, public outreach to residents and commercial businesses on fluorescent light recycling and other mercury containing products, and working with the County Household Hazardous Waste Program.	Sunnyvale is a participating and contributing member of the Ad Hoc Task Group for Mercury, and will continue to work with co-permittees, SCVURPPP staff, and the consultant to approve region-wide campaign action plans, implement strategies and activities, and to develop promotional materials.
Ad Hoc Task Group Pesticides	Targeted	Sunnyvale is a participating and contributing partner in the IPM Pesticide Outreach Work Group.	The goal of the campaign is to educate residents of Santa Clara County about watershed protection through water pollution prevention awareness and appreciation, to promote public involvement in watershed stewardship through behavioral changes, and to change behaviors that negatively impact the watershed.

PI/P Activity	Type of Outreach	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Regional (cont)			
Watershed Education and Outreach Workgroup Participation	Targeted	The goal of regional workgroup participation is to share information and discuss watershed education with co-permittees.	Several times a year, Sunnyvale attends meetings with regional co-permittees to discuss watershed issues and determine current workgroup issues. In an ongoing effort, Sunnyvale is a participating member of the following workgroups sponsored by SCVURPPP Alviso Ed Center, Schools Group and update of Public Participation list.
Our Water Our World	Targeted	Sunnyvale has been active in the OWOW campaign by writing and publishing articles in newsletters, editing and producing PSAs, organizing local events, participating in regional events and presenting classroom programs.	Outreach activities at local community and regional events promote less toxic alternatives to common pesticides. Outreach staff met with Management at Home Depot located at 690 Kifer Road in Sunnyvale in June to discuss and welcome them to the campaign.
Retail Stores Program	Targeted	Sunnyvale worked with the co-permittees to ensure that retail nurseries/hardware stores in Sunnyvale continue their participation in the IPM campaign at the point of sale.	The program works with retail hardware and nursery stores in a partnership effort to educate customers about the danger of pesticides, to offer, promote less toxic options for pest control and an agreement to display IPM literature. See the Program's section of this report for a region-wide evaluation of the program's effectiveness.

Pollution Prevention Week

What Can you Do to Protect Your Bay Today?

This year, Sunnyvale will team up with state and federal agencies, businesses and communities nationwide to promote the benefits of pollution prevention during National Pollution Prevention Week, starting September 15. The Bay is closer than you think, since our City storm drains connect to outfalls in creeks and channels that flow directly to San Francisco Bay. Practicing pollution prevention in the garden or during indoor and outdoor chores can be easy. By simply adopting some of the alternative practices listed below you too can protect your bay today.

Gardening Tips

Various techniques can be used in your garden that will contribute to a cleaner, safer and pollution-free environment:

- Do not fertilize or apply pesticides when rain is forecast within 24 hours. Runoff from rain or over-watering can carry fertilizer and pesticide residues into the storm drain system, degrading water quality in local creeks and the Bay.
- To rid your garden of uninvited pests, consider including plants that attract beneficial insects and introduce "good bugs," such as ladybugs, that will consume insect pests. Visit *www.mywatershedwatch.org* and click on the *Got Bugs* tab for more information.
- Do not blow or rake leaves or lawn clippings into the street, or place yard waste in gutters. Use a broom or rake, not a hose, to clean up leaves, lawn and garden clippings and place them in your green yard waste container for recycling. This will protect storm drains from clogging and reduce the amount of pesticides and fertilizers that may be present on green waste from entering our creeks and the Bay.

Green Gardener Program

Is your gardener a Green Gardener? Started in spring 2008, the Santa Clara Valley Green Gardener training program offers education and training to landscape maintenance professionals in the key principles of ecological landscaping. In the 10-week, 20-hour series of classes, individuals are taught to conserve water through good irrigation practices, protect and nourish the soil, and to reduce the need for pesticide use through integrated pest management practices. For information on classes being offered or to find a trained Green Gardener visit *www.mywatershedwatch.org* and click on the Green Gardener logo.

Around the House

- Chores and activities around the house can cause water pollution. For a cleaner Bay and environment, try incorporating the following tips:
- Avoid using toxic chemicals to clear a drain. Instead, clear your drains by pouring 1/4 cup baking soda into the drain, followed by 1/4 cup vinegar. Later, flush the drain with boiling water.
- Repair leaking vehicles promptly to help keep auto fluids off the street. Soak up spills with an absorbent such as kitty litter or sand. If you change your own oil or antifreeze, recycle it. Never dump oil or any automotive fluid on the dirt or in the storm drain.
- House repairs? Keep all construction debris, materials, and dirt piles covered and away from the street, gutter and storm drain. If a dumpster is used, be sure it is securely covered with a lid or tarp when not in use.
- Encourage family and friends to try some of the above suggestions. Working together and incorporating pollution prevention techniques, we can protect our shared environments and the Bay.

DID YOU KNOW?

The City offers composting workshops to its residents so they can learn how to use their own yard trimmings to make compost at home.

The workshops are led by experienced gardeners and master composter volunteers. The events are held one Saturday per month from 10 a.m. to noon at the City's Orchard Heritage Center, next to the Sunnyvale Community Center at 550 E. Remington Drive. The next workshop is scheduled for October 18.

Registration is requested. Sign up online at *CompostWorkshop.InSunnyvale.com* or by phone at (408) 730-7262, TDD (408) 730-7501.

TAKE A TOUR OF THE PLANT

Want to learn what happens to the water after it's sent down the drain? Take a free tour of Sunnyvale's Water Pollution Control Plant. Tours are fun for kids and adults, and provide environmental education to help better understand the water we so often take for granted. During the 90-minute tour, visitors will learn the various stages of treatment, how the plant uses alternative fuel sources to conserve energy and how Sunnyvale conserves by using recycled water on the landscaping at corporate business parks and City facilities.

Tours can be adapted to meet specific curriculum needs and are conducted Monday through Friday between 9 a.m. and 3 p.m. Call (408) 730-7738, TDD (408) 730-7501, to make a reservation. For more information about the Water Pollution Control Plant, visit *wpcp.sunnyvale.ca.gov.*

FOR ALL CITY SERVICES, TDD ACCESS (408) 730-7501

City Of Sunnyvale Awarded Urban Forestry Management Grant

Volunteers Needed

Street trees are an important part of the character of our City. The state Department of Forestry and Fire Protection (CAL FIRE) has awarded a $33,000 grant to assist the City of Sunnyvale in developing an Urban Forestry Management Plan. The plan will include a community participation and education program, encouraging collaboration between City council, City staff, businesses and residents, as well as assistance from state and federal agencies to help manage our urban forest.

Sunnyvale is looking for volunteers to participate in this process. Community volunteers will evaluate the condition of our street trees and their impact on neighborhoods, as well as giving input to staff on the components of the proposed plan. Even if you think you know little about trees but are interested in our community trees, you are invited to participate.

For more information, or to volunteer, contact Leonard Dunn, Street Tree Services Manager, at *ldunn@ci.sunnyvale.ca.us* or call (408) 730-7505, TDD (408) 730-7501.

Old Batteries Taking Over Your House?

Don't put them in the trash. Recycle them.

Batteries from toys, games and other household cordless products contain hazardous materials that do not belong in the landfill.

If batteries are disposed of in the garbage, they end up in the landfill where the hazardous materials can eventually leak into and pollute our groundwater.

Here are some options for proper disposal:

- Residents with curbside collection service may put household batteries in a clear plastic bag and place it on top of the recycling cart on collection day.
- Recycle the rechargeable batteries that power most common household cordless products at your local Radio Shack, Orchard Supply Hardware or the SMaRT® Recycling Center Station.
- Bring batteries to a scheduled HHW drop-off event: the third Saturday of every month (except December), at 164 Carl Road, from 8 a.m. to 1 p.m.

For more information, contact the City of Sunnyvale Recycling Program (408) 730-7262, TDD (408) 730-7501 or visit *Recycling.inSunnyvale.com*.

SUNNYVALE CELEBRATES EARTH DAY

The community is invited to join Sunnyvale in celebrating Earth Day with community events and activities starting Saturday, April 18. Events planned for Earth Day week include:

- April 18 – Sunnyvale Farmers Market: exchange your old mercury thermometer, get bicycle and transit maps, and see how Sunnyvale is growing greener
- April 18 – Composting Workshop
- April 20 – Children's activities about water and recycling at the Library
- April 22 – The Future is Here! Featured Earth Day workshop on current and emerging green technologies developing right here in the Sunnyvale area
- April 25 – Citywide Garage Sale
- April 25 – Great American Litter Pick-up

For a complete list of Earth Week activities visit *Green.inSunnyvale.com* or call (408) 730-2783, TDD (408) 730-7501.

042942

Helping the community to protect the environment

Although community groups often use car washes to raise money, they can have a tremendous impact on water pollution and can negatively effect the environment. Washing cars on a paved surface can send pollution such as oil, grease, exhaust fume residue, rust, benzene and chromium through the storm drain system to our local creeks and Bay. That's why Sunnyvale's Environmental Services loans Sudsafe Car Wash kits to non-profit organizations. The kits prevent soapy, contaminated car wash water that can harm fish and other wildlife from entering the storm drain system and polluting our water.

If you receive a call from a member of the public looking for information on car wash events, refer the caller to Environmental Services at the Water Pollution Control Plant at (408) 730-7260. As you travel around the community on City business, be on the lookout for car wash events or other activities causing storm water pollution. To report incidents of water pollution, call (408) 730-7270 during normal business hours and an inspector will be dispatched to speak to the individual about water pollution prevention.

042943

Mark Your Calendar

24th Annual California Coastal Clean-up Day

Mark your calendar for September 20 and take part in California Coastal Cleanup Day. Join together with others and take action in an effort to clean-up the environment. The best part is you don't have to travel to the coast to participate! Although events will take place at beaches and local waterways around the state, our local clean-up event will focus on Sunnyvale's West Channel waterway and a part of the Guadalupe Slough. Activities begin at 9 a.m. and the clean-up will continue until noon. Gloves, pick-up sticks, safety vests, trash and recycling bags will be distributed.

This event offers a great opportunity to support clean and healthy waterways in Sunnyvale by removing the debris that can threaten the marine environment in San Francisco Bay. For more details or to sign up to participate in Sunnyvale's California Coastal Cleanup Day, call Environmental Outreach at (408) 730-7717.

042944

The Ants Come Marching In

Has the local ant colony invaded your office or break room this winter demanding food and shelter? Before you reach for that can of household pesticide to combat the armies of unwanted pests, remember the City of Sunnyvale has an Integrated Pest Management Policy for all City employees. The policy asks us to use less-toxic pest control methods and to leave the use of applying pesticides to specially trained city staff or contractors. A copy of this policy can be found at *http://jasmine/ipm-policy.pdf.*

To prevent ant invasions:

- Store food only in tightly sealed containers or in the refrigerator.
- Keep areas clean of food debris and wiped dry. Crumbs and open food or water containers are an invitation to these pests.

Quick fixes for ant invasions:

- Find out what the ants want and where they are entering into your space. Mark their entry area.

- Don't remove the food or water source they want until you have started the ant clean-up process. If you do, they will scatter and then become more difficult to clean up.
- Use a vacuum to clean up lines of ants or spray ants with soapy water and wipe them up with a sponge. Using soapy water has the advantage of washing away the chemical trail that other ants will follow.

- If possible, temporarily block their entryway using a smear of petroleum jelly or a piece of tape.
- If you can't find the exact entry point, clean up the ants the best you can to the area where you think they are coming from and one that is away from your immediate work area.

- If ants are nesting in a potted plant, move it outdoors. Water the pot thoroughly and place it in a bucket filled with water to an inch below the rim of the pot. Lean a stick or pencil from the edge of the pot and the rim of the bucket (like a drawbridge over the moat) so ants have an exit pathway without getting into the water. Ants will soon begin evacuating the pot, carrying their white-colored eggs to safety. When ants stop emerging, drain the pot and return it to your office.

If you continue to have ant or other insect or rodent problems, contact Facilities Management at ext. 7761 to arrange for a pest control contractor to apply the appropriate control measures.

Spring Cleaning

Litter in our creeks is not only unsightly – it also impacts water quality and harms local wildlife. You can join other City staff to participating in National River Cleanup Day 2009, Saturday, May 16, from 9 a.m. – noon.

National River Cleanup Day is sponsored by the Creek Connections Action Group, a consortium of public agencies and nonprofit organizations that share a common goal of protecting Santa Clara County's waterways. This year's event in will focus on picking up litter and debris from the Sunnyvale East Channel and areas around Baylands Park.

This event is open to everyone, but may not be suitable for young children. Youth under the age of 18 must have parental approval, and anyone age 16 and under must be accompanied by an adult. To find parental approval forms, visit *www.cleanacreek.org.*

Gloves, pickup sticks, safety vests and trash and recycling bags will be provided. Volunteers are encouraged to wear long pants, sturdy shoes, hats and lots of sunscreen. To register or receive further information, call the Environmental Outreach division at ext. 7717, or e-mail *wpcp@ci.sunnyvale.ca.us.* Registered participants will receive additional instruction on the morning of the event.

VOLUME 8 ISSUE 12 THE POOP SCOOP

ENVIRONMENTAL OUTREACH

National Pollution Prevention Week
September 15-21

National Pollution Prevention Week originated in California in 1992, and as the name suggests, the goal of the program is to promote pollution prevention through public awareness.

This year, the theme for National Pollution Prevention Week is

Protect Your Bay – Today!

During this week especially, an opportunity exists for everyone to be more aware of their own habits and actions that may impact the environment in a negative way.

Did you know that in past studies the U.S. EPA determined that contaminants in urban runoff are the main reason that approximately ***40 percent*** of surveyed rivers, lakes, and estuaries in the U.S. are not clean enough for fishing or swimming?

Some of these contaminants include: garden and lawn chemicals, automobile fluids, pet waste, yard waste and litter. The Bay is closer than you think. By simply adopting some of the alternative practices listed below you can ***Protect Your Bay—Today!***

- Do not fertilize or apply pesticides when rain is forecast within 24 hours. Runoff from rain or over-watering can carry fertilizer and pesticide residues into the storm drain system, degrading water quality in local creeks and the Bay.

- Avoid using toxic chemicals to clear a drain. Instead, clear your drains by pouring ¼ cup baking soda into the drain, followed by ¼ cup vinegar. Later, flush the drain with boiling water.

- Repair leaking vehicles promptly to help keep auto fluids off the street. Soak up spills with an absorbent such as kitty litter or sand. If you change your own oil or antifreeze, recycle it. Never dump oil or any auto fluid on the dirt or in the storm drain.

Working together and incorporating pollution prevention techniques, we can protect our shared environments and the Bay.

If you'd like more information on water pollution prevention and solutions, please see Jackie.

042947

Page 4 **Environmental Outreach** Volume 9, Issue 13

As Rains Hit, Pollution Gets Swept Through Bay Area Watersheds

The rains of the season have hit the Bay Area, bringing more than just gloomy skies and traffic problems. Heavy rains also bring an upsurge in water pollution as trash and other pollutants that build up during the dry season are picked up from Bay Area watersheds and washed into storm drains and waterways.

As parking lots and houses increasingly replace vegetation and open space in the Bay Area, fast moving runoff from these water-resistant surfaces carries everything in its path into local storm drains, which flow directly to local waterways. During heavy storms, trash, organic matter, and automotive pollutants end up in creeks and the Bay, threatening water quality, recreation, and wildlife in our local watersheds.

Storms flush large amounts of pollutants from Bay Area watersheds down into creeks, destroying habitat, depleting oxygen levels, and poisoning fish. Even leaves and grass clippings carried into creeks with rainy weather can disrupt the ecological health of our waterways.

You can help protect the watershed by doing any or all of the following things:

-Set an example for others by not littering. If you do see litter, pick it up and put it in a trash can or recycling bin.

-Carry a litterbag in your car or on your bicycle.

-Keep trash containers covered securely to prevent wind or animals from spreading litter.

-Keep leaves and yard clippings picked up around your home and recycle as green waste.

-Regularly maintain your vehicle to avoid auto fluid leaks that build-up on roadway surfaces.

-Use non-toxic or less toxic methods of pest control in your yard and garden, and use only amounts recommended on the label.

If you'd like more information on how you can help prevent water pollution, please see Jackie.

Pollution Prevention Tip:

It's against the law to throw flourescent bulbs or batteries in the trash. Dispose of them properly at the Sunnyvale SMaRT Station or at a Household Hazardous Waste drop-off event.

Mercury Fever Thermometer Exchange

Bring us your glass mercury fever thermometer and exchange it for a digital thermometer.* **FREE**

One easy way to prevent pollution!

Mercury is toxic and can cause damage to the nervous system, brain, kidneys, liver, and immune systems in humans and animals. One broken thermometer can pollute up to 5 million gallons of water.

Friday, September 19th at the Sunnyvale Senior Center's - Health & Resources Fair from 9:30 a.m. – 3:30 p.m.

For further info call 408-730-7738

FY 08 - 09 Annual Report

Attachment H

Pesticide Management Activities

P.S. Id.	Activity	CI Item Source	FY 08-09 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
	Control Program for Pesticides					
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Continue to track OP pesticide usage and other pesticides identified as creating potential water quality problems on City-owned property. Report types and quantities used in Annual Report for the previous calendar year. Track quantities of the top five pesticides by the City. Report quantities of active ingredients and locations used.	• All pesticides applied by City staff, including OP (Organophosphate Pesticides) to City-owned property are tracked via the monthly Summary Pesticide Use Report (Form PR-ENF-060) that are submitted to the County Agriculture Commissioner • The data from these forms as well as data provided by any contractors who apply pesticides to city-owned property are tracked in Excel tables • Reports on the top-five (greatest quantities of active ingredient) applied for both solid and liquid formulations are included in Appendix 1 of this Attachment.	Annually Report 09/09	Kristy McCumby Env. Spec.
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Hold an annual meeting for Department /Division staff involved in implementing the City's IPM Policy to identify issues and suggestions for enhancements to the current IPM practices.	Discussed possible changes to the City's current IPM policy, in light of potential MRP requirements. No changes in the current policy were identified for this time and once the MRP is adopted, the current policy will be reviewed and revised per the MRP requirements.	Report 09/09	Kristy McCumby Env. Spec. & Scott Morton, Parks Supervisor.
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Hold annual training for Parks Division to educate staff regarding pesticide and turf product applications, Integrated Pest Management Policy, and irrigation water run off	Annual Training was held on November 19, 2008 and on March 26, 2009 for Parks Division Staff. See Attachment M for details.	Annually Report 09-09	Scott Morton, Parks Supervisor
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Train other staff (e.g., Public Works) who apply pesticides as a regular part of their job duties as to the requirements of the Plan and Policy. Provide information and training on the contents of the plan to all City employees	Annual training for PW staff (Boulevard Landscaping was held on February 26, 2009. See Attachment M for details.	Annually Report 09/09	Kristy McCumby Env. Spec.

Control Program for Pesticides (cont.)						
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Modify Pest Control Vendor's contracts as they come up for renewal, to include requirements that they 1) Follow the City's IPM Plan/Policy, BMPs and SOPs. 2) Provide evidence of current IPM training for contractor employees working on City property. 3) Contractors to annually provide copies of State of California Monthly Summary Pesticide Use Report (Form PR-ENF-060 Rev. 4/92) or the equivalent to Environmental Division staff	• Standard language is included in contracts for firms providing pest control services to the city, requiring that they follow the city's IPM Policy and that they provide information as to the types, quantities and locations of the pesticide applications and any control measures that were needed. • This information is included in Appendix 1 of Attachment. This information is tracked in an Excel table based on Invoice Service slips provided by the contractors. • The City's structural pest control contractor provided copies of certifications for hours of training this FY, including training received on IPM practices. These are kept on file in the Environmental Division.	Annually Report 09/09	Kristy McCumby Env. Spec. and City Finance Manager (TBD)
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Inform new leaseholders of the City's IPM policy	The city's contractor for property management annually includes a flyer on the city's IPM policy that is mailed to the leaseholders.	Annually Report 09/09	Kristy McCumby, & Mike Chan, City Pro. Mgr.
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Document training city staff that applies pesticides to ensure compliance with training requirements established by the County Agriculture Commissioner and the State Dept. of Pesticide Regulation. Provide annual training to staff who apply pesticides on the City's Pest Management Plan, IPM Policy, SOPs, BMPs, and IPM techniques appropriate to the pests	• All city staff who apply pesticides as a regular part of their job duties hold all appropriate certifications from DPR. • Records of training and certification status are kept by the departments that those staff work in • Staff is provided annual training on the City's IPM Policy as part of their Pesticide Safety and Use Annual Training (See Attachment M for details).	Annually Report 09/09	Lead: Kristy McCumby Env. Spec. Support: Mike Eccles, Sr. PW Leader and Scott Morton, Parks Supervisor

Control Program for Pesticides (cont.)						
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Work with SCVURPPP IPM Pesticide Outreach Work Group to coordinate with regional efforts to provide training to small businesses that perform landscape maintenance to residences and commercial entities.	Staff continues to work with IPM Pesticide Outreach ad hoc work group of SCVURPPP. Staff continues to be significantly involved with the implementation of and teaching IPM topics for the Santa Clara Valley Green Gardener program, sponsored by SCVURPPP. Various outreach efforts were coordinated with SCVURPPP as well as providing information about the SV GG training program at events in Sunnyvale, encouraging residents to hire trained Green Gardeners. See the Program's section of the Annual Report for Details about the Green Gardener Training Program.	Annually Report 09/09	McCumby Env. Spec. and Jackie Besoyan, Environmental Outreach Coord.
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Document education provided on the City's IPM Plan/Policy for staff who do not apply pesticides and on the prohibition for use of over-the-counter pesticides by untrained staff in and around the workplace (consistent with the City's IPM Plan/Policy). Report on activities/ numbers reached in Annual Report.	• Information about the City's IPM Policy is available on the City's intranet Website, Jasmine, as well as published in the Administrative Policy Manual • The need for annual staff training has become less essential over the past 6 years, since the policy was first enacted. Employees have learned at part of their job, to utilize the City's Pest Control Contractor who follows the City's IPM Policy, to deal with pest issues that may arise in their work areas, rather than purchasing over-the-counter products for pest control and applying pesticides themselves. • An article was published In the Jan /Feb 09 issue of the employee newsletter, the Harbinger. The article, entitled *The Ants Come Marching In* reminded employees about the prohibition for use of over the counter pesticides , the Cities IPM policy and how coached employees on how to	Annually Report 09/09	Kristy McCumby Env. Spec. Support: Jackie Besoyan, Environmental Outreach Coord.

				use IPM and less toxic options for pest control in and around ones work area. See Attachment G, Table 1 for numbers reached through the Harbinger.		
Control Program for Pesticides (cont.)						
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Evaluate effectiveness of training. Report on progress in Annual Report.	The effectiveness of the training and information sharing on IPM practices as well as the City's policy can be shown by the positive changes in the continuing use of less toxic options for dealing with pest problems, significant reductions in the use of OP pesticides (rarely any used in the last 4 years), and the overall good management practices (e.g. proper irrigation and mulching) that help reduce the need for pesticide or herbicide use on city property. Also, the contractor for structural applications has also moved toward using reduced risk chemicals and baits versus more toxic options used in the past.	Annually Report 09/09	Kristy McCumby Env. Spec.
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Conduct annual citywide search of chemical storage areas for pesticides that are no longer legal for application per EPA, State, and/or local requirements. Properly dispose of any such pesticides pursuant to appropriate waste disposal regulations.	Public Works, Boulevard Landscaping inventoried the Public Works Chemical Storage Room in February 2009. No OP pesticides or other older "illegal" were found. There were some product found that are no longer used by the City and they will be disposed of by a hazardous waste contractor as funds become available. Parks Division staff inspected their chemical storage area and found no OP pesticides or other older "illegal" pesticides – completed on 5/1/09	Annually Report 09/09	(Report) Kristy McCumby, Env. Spec. (Support) Mike Eccles, PW, Scott Morton, Parks Supervisor

Control Program for Pesticides (cont.)						
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Continue to assist with local implementation of the Watershed Education and Outreach (WE&O) Campaign. Distribute literature and other outreach materials at sponsored events; disperse articles and ads about less-toxic pest control and proper disposal techniques to media venues such as newsletters, utility bills, and movie ads. Support Program events in coordination with Watershed Watch.	Sunnyvale has been active both in the local implementation of the WE&O Campaign and is a participating member of the Pesticides Ad Hoc task group. Outreach activities include distribution of literature at sponsored events, and classroom Enviroscape demonstrations explaining water pollution from pesticide and fertilizer runoff. Media sources for outreach include theater ads, newsletter articles, newspaper ads, community cable TV ads, and information provided to the public via the website. Subjects covered include prevention of water pollution from pesticides and fertilizers, integrated pest management, proper disposal of pesticide products, and sources of additional information. See Attachment G Table 1 – Detailed Descriptions PI/P Activities and Self-Evaluation Matrix for FY 08-09.	Annually Report 09/09	Jackie Besoyan, Environmental Outreach Coordinator
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Continue to help business and community members to say current with the City's IPM Policy by editing the document posted on the web page as updates become available. Include updates to IPM techniques for pests.	Information regarding the City's IPM Plan and Policy, general IPM techniques, and links to IPM fact sheets is posted for public review on the Water Pollution Control Plant web page and is reviewed and updated on an as needed basis.	Annually Report 09/09	Jackie Besoyan, Environmental Outreach Coordinator
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Continue to provide at least one story on IPM practices/ successes and/or the City's Pest Management Plan and IPM Policy to local newspapers and/or citywide newsletters.	Articles and/or ads regarding IPM, pesticide reduction and proper disposal of pesticides were published in a variety of newsletters and the local community paper. See Attachment G Table 1 – Detailed Descriptions PI/P Activities and Self-Evaluation Matrix for FY 08-09.	Ongoing Report 09/08	Jackie Besoyan, Environmental Outreach Coordinator

Control Program for Pesticides (cont.)						
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	1) Continue to assist with the local components of a "Pesticide User Outreach" as proposed by the program. Target residential and commercial users. 2) Based on recommendations from the Program's research reports and surveys of business pesticide usage, develop and implement education that will target specific businesses.	The City of Sunnyvale continues to assist the Program by implementing pesticide user outreach components targeting residential and commercial users, by participating in business events, and by providing literature to retail stores and nurseries. • Sunnyvale's Pretreatment Program has pesticide BMP brochures which are regularly distributed during inspections to landscaping facilities, nurseries and home retail stores. • See Attachment G Table 1 – Detailed Descriptions PI/P Activities and Self-Evaluation Matrix for FY 08-09. • To target commercial pesticide use, Sunnyvale continues to participate in the Santa Clara Valley Green Gardener Training program to provide landscape maintenance workers and professionals with training to learn practices that conserve water, protect the soil, and reduce the need to use pesticides. See the Program's section of the annual report for a description of the class activities and Sunnyvale's participation.	Annually Report 09/09	Jackie Besoyan, Environmental Outreach Coordinator
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Continue work with the Program to provide information on less toxic pest control (e.g., IPM techniques, municipal IPM policies, model contract language, and training opportunities) to neighboring special districts (e.g., open space districts, vector control districts, and school districts) as appropriate.	Promotion to special districts in Sunnyvale (school districts) was conducted by the Program in FY04-05 and has not been repeated to date. The City Parks Division has maintenance agreements for outside grounds with some schools within the City's jurisdiction. All pertinent laws are followed regarding posting and public notification.	Annually Report 09/09	Jackie Besoyan, Environmental Outreach Coordinator

Control Program for Pesticides (cont.)						
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Track and/or estimate the numbers of Sunnyvale residents and staff reached through outreach efforts (including advertising) regarding the City's IPM policy, pesticide use reduction, and related topics.	Estimated numbers of Sunnyvale residents and staff reached through outreach efforts are recorded on Attachment G Table 1 – Detailed Descriptions PI/P Activities and Self-Evaluation Matrix for FY08-09 and Attachment H, Appendix 1, Table 2.	Annually Report 09/09	John Pilger, Com Officer & Jackie Besoyan, Environmental Outreach Coordinator

Response to Regional Water Quality Control Board Comments on ICD Activities Section to FY 07-08 Annual Report:
No comments were received from RWQCB2 on this section.

City of Sunnyvale

Table 1 a-v: Top Five Quantities of Pesticides Applied to City Property 2001 – 2008 and Discussion

Table 2: PI/P Pesticide Management Activities – Numbers Reached

The tables below show the top five pesticides applied on City property from calendar year 2001 through 2008.

Table 1a. Top Five Pesticide Quantities Applied by City Staff in 2001 (liquid)

Product Name/Manufacturer	*Total Amount of Product Used*	*Unit of Measure*	*Active Ingredient Name*	*% Active Ingredient Present*	*Total Quantity of Active Ingredient Applied*	*Locations of Applications (By Division)*
Round up Pro/Monsanto Co.	40,980.7	OZ	Isopropylamine salt of glyphosate	41.0	16802.07 OZ (131.3 gal.)	Parks, Trees and Landscape, and Golf
Scythe Herbicide/Mycogen Corp.	5842.1	OZ	Nonanoic acid	57.0	3329.97 OZ (26.01 gal.)	Parks
Pendulum 3.3 E.C. /BASF Corp.	4780.8	OZ	Pendimethalin	37.4	1788.01 OZ (13.96 gal.)	Trees and Landscape
Garlon 4 Herbicide/Dow Agrosciences	1895.0	OZ	Trichlpyr/Butoxethyl Ester	61.6	1167.62 OZ (9.1 gal.)	Trees and Landscape
Surflan AS Herbicide/Elanco	2011.9	OZ	Oryzalin	40.4	812.8 OZ (6.35 gal.)	Parks, Golf

Table 1b. Top Five Pesticide Quantities Applied by City Staff in 2001 (solid)

Product Name/Manufacturer	*Total Amount of Product Used*	*Unit of Measure*	*Active Ingredient Name*	*% Active Ingredient Present*	*Total Quantity of Active Ingredient Applied*	*Locations of Applications (By Division)*
PCNB 10%/Turfgo/ Cleary	1350	lb.	Pentochloronitrobenzene	10	135 lb.	Golf
Aliette/RhonePoulenc AG Co.	85	lb.	Fosetyl - AL	80	68 lb.	Golf
Engage TM 10G/ United Horticultural Supply	650	lb	Pentachloronitrobenzene	10	65 lb.	Golf

Pesticide Use and Integrated Pest Management Policy Implementation in the City of Sunnyvale

Quantities of Diazinon and Chlopyrifos-Containing Compounds Applied:

- No pesticides containing Diazinon were applied on City of Sunnyvale Properties from 2001 through June 2009

- From 2001-2005, only a few applications of products that contained Chlorpyrifos were used by City staff in very small amounts. From 2006 through June 2009, no applications of Chlorpyrifos-containing products have occurred.

The use of chlorpyrifos-containing pesticides is very low and infrequent. The choice to use this pesticide is made only after the City's IPM policy is followed and there is specific written justification for its use by a Pest Control Advisor. The quantity and location of its use depends on the specific need to control an insect problem.

Pesticide Removals:

- Annual searches of pesticide storage areas in Public Works, Parks and Recreation, and the Golf Course have not turned up any pesticides that were prohibited for current use. In FY 04-05, some pesticides containing Diazinon, Dursban, and chlorpyrifos were found by Public Works staff during their storage area inventory. These were disposed of in FY 05-06 as hazardous wastes, following all appropriate state and federal regulations. Storage area searches in FY 08-09did not find any pesticides that were prohibited for current use and only a few that were identified as no longer being used by staff. Some were disposed of per State and Federal requirements in FY 08-09 and others will be disposed of in accordance with appropriate State and Federal law in FY 09-10.

Sunnyvale's IPM Policy:

- A copy of the IPM Policy that was placed in the City's Administrative Policy Manual (APM) – Chapter 6, Article 12. The public also has access to the policy through the Water Pollution Control Plant website at http://wpcp.sunnyvale.ca.gov The IPM Policy information is also available on the City's Intranet website for access by all City staff.

- Outreach to the City's trained/licensed pesticide application staff about the IPM policy continued in FY 08-09 (See Attachment M for staff training information.) Outreach to all other city staff (those who are not approved to apply pesticides) about the policy occurs through two mechanisms: articles in the city staff newsletter the Harbinger reminding them of the policy; and in targeted outreach with presentations on the Environmental Procurement Policy at staff meetings. A revises presentation on the policy was prepared and discussed at three different staff meetings in FY 08-09 with the presentations will continue through FY 09-10.

Contractors and the City's IPM Policy:

- Parks Division has engaged contractors since FY 06-07 for ground squirrel and gopher control. A total of 12 ounces of Aluminum phosphide Fumitoxin and 15 lbs of Rozol pocket gopher bait were used within the gopher/ground squirrel tunnels. Another contractor was also used for broadleaf weed control by the Parks Division since FY 07-08. These contractors are made aware of the City's IPM Policy and are required to follow it.

  No contractors were used by PW/Boulevard landscaping in FY 08-09.

  The Water Pollution Control Plant (WPCP) is in the process of selecting a contractor to perform aquatic weed management in the WPCP oxidation ponds as part of pond maintenance. The contractor selected will be following the City's IPM policy for work that will begin in FY 09-10 and the requirements to follow the policy are included in the Scope of Work.

- The City employs one structural pest control contractor, who is required to abide by the IPM policy since their contract that became effective July 1, 2003 and was renewed through 2009. Data on types and quantities of pesticides used in structural pest control activities from July 2003 – December 2003, and calendar years 2004 through 2008 are included in Table 1 above. The current structural pest control contractor uses a very limited number of "caution" labeled products and follows IPM practices such as monitoring and pest identification prior to application of a pesticide. Traps (e.g., glue boards) and bait stations are often used prior to any application of pest control sprays or granular materials to try to control a pest problem through less-toxic means.

- Copies of contractor IPM training received are kept on file and provided to the City upon request. Current copies of training in FY 08-09 were provided and showed that contractor staff attended on-line education courses entitled "IPM for the PMP" and "Going Green and Organic" in addition to pest specific, legal, and safety training required for their Structural Pest Control certifications.

IPM and City Property Leaseholders:

- Lease holders were notified of the City's IPM policy in June 2003 by the City's property manager. Periodic updated have been provided through a flyer that was prepared for distribution by the contract property manager since that time. This brochure is sent out to new tenants and leaseholders as needed.

Santa Clara Valley Urban Runoff Pollution Prevention Program
Attachment H – Appendix 1 – Table 2
PI/P Pesticide Management Activities – Estimated Numbers Reached
FY 2008-2009 Annual Report
Municipality: Sunnyvale

Sunnyvale Targeted Outreach for the Pest Management Plan			
Pest Management Plan/Policy Implementation	Track and/or estimate the numbers of Sunnyvale residents and staff reached through outreach efforts (including advertising) regarding the City's IPM policy, pesticides use reduction, and related topics.	Media Sunnyvale Quarterly Report	The Quarterly Report is mailed to approximately 60,000 Sunnyvale residents and businesses each quarter. Additionally, 2000 copies of the report are distributed to the Library, City Hall, Community Center, Senior Center, Public Safety and Columbia Neighborhood Center. The Quarterly Report is also posted on the City's web page.
		Media Outreach to City staff through employee newsletters	The *Harbinger* is Sunnyvale's internal newsletter for employees. Articles and information contained in the *Harbinger* reach approximately 900 municipal employees. The *Poop Scoop* is the staff newsletter for the Water Pollution Control Plant and is read by approximately 65 employees.
		Media KSUN Community Cable TV Ads	KSUN advertising reaches about 13% of all cable subscribers in Sunnyvale, who say they tune in once or twice a month.
		Media Theater Billboards	These 15-second animated/audio ads are viewed by movie audiences two times during a 15-minute timeframe prior to every movie shown in the theaters on a total of 36 screens.
		Media IPM via Sunnyvale Website	Information regarding proper disposal of mercury containing products is listed on both the Solid Waste and Water Pollution Control Plant websites. Reach is unknown. The City of Sunnyvale does not have the ability to count number of hits to the website
		Media Sunnyvale ReNews Newsletter	This newsletter addresses pollution prevention concerns with a focus on reduce, reuse, and recycle and is mailed to approximately 29,000 single family residents and 24,000 multi-family residents quarterly. An additional 500 copies are printed and distributed from various locations.
		Media City of Sunnyvale Community e-News	This email list reaches approximately 220 community members.

Santa Clara Valley Urban Runoff Pollution Prevention Program
Attachment H – Appendix 1 – Table 2
PI/P Pesticide Management Activities – Estimated Numbers Reached
FY 2008-2009 Annual Report
Municipality: Sunnyvale

		Media Sunnyvale Sun	The Sunnyvale Sun has a readership of approximately 36,824 and a circulation of 17,963. Several ads titled *"Watch Out for Toxic Pesticides"* and focused on different pests ran in 08-09.
		Event – Community Sunnyvale Farmers Market	Outreach distributes IPM and less toxic pesticide information at the Sunnyvale Farmers Market each month. Approximately 253 individuals visited the booth in FY08-09 for general water pollution prevention information.
		Event - Community SC County Creeks and Watershed Conference	This event offered a venue for Outreach to focus on how indoor/outdoor daily activities impact the health of our watershed. We used the exhibit that showed the difference between sanitary sewers and storm drains and handed out information on pollution prevention, as well as literature. During this event, we spoke to 25 people.
		Event - Community Muslim Green Team Event	The Outreach exhibit highlighted the difference between sanitary sewers and storm drains, leading to information about water pollution prevention. This is primarily done through discussion, literature distribution, and presentations featuring the Enviroscape, which focuses on water pollution from pesticides, fertilizers, dog waste, automotive fluids and car wash. Approx. 80 children/parents stopped by the booth for literature, information and/or to view the Enviroscape presentation(s).
		Event – Schools/Youth Sunnyvale Schools Outreach	Sunnyvale uses the Enviroscape as a teaching tool for classroom presentations. The presentation focuses on watershed education and water pollution from urban runoff. Pesticides, beneficial insects, IPM and less-toxic lawn and garden care is introduced and discussed. Sunnyvale conducted 38 classroom presentations this school year, reaching a total of 886 students.
		Event – Community Compost Workshops	Workshops are held once per month 10 times during the year. Generally, approximately 12 to 40 individuals attend each new workshop session.

Attachment H – Appendix 1 – Table 2
PI/P Pesticide Management Activities – Estimated Numbers Reached
FY 2008-2009 Annual Report
Municipality: Sunnyvale

		Event – Business Corporate Health and Safety Fairs	Outreach exhibited at (5) corporate health and safety fairs this reporting year, reaching over 600 company employees.
		Event – Community Columbia Health and Safety Fair	The outreach exhibit highlighted the difference between sanitary sewers and storm drains. Literature about water pollution prevention was distributed and five Enviroscape demonstrations were presented during the event. Approximately 143 individuals (adults, students and children) visited the exhibit for information, literature and to view the presentations.
		Event – Schools/Youth Creek Education Program	This program is targeted to 3rd graders who attend Sunnyvale Schools located in the Cupertino School District. Approximately 381 Sunnyvale students participated in the program this reporting year.
		Event – Schools/Youth Community Kidz	Our portion focused on the difference between sanitary sewers and storm drains, leading to information about water pollution prevention. This was primarily done through discussion, student participation through Environmental Jeopardy, and a presentation featuring the Enviroscape. A total of 78 youth attended these sessions this year.
		Event – Schools/Youth Library Presentation	Our portion focused on the difference between sanitary sewers and storm drains, leading to information about water pollution prevention. This was primarily done through discussion and a presentation featuring the Enviroscape. Event was attended by 27 people (15 children and 12 adults).
		Event – Community State of the City	The Outreach booth featured water pollution prevention information and literature distributed included IPM activities, less-toxic pesticide use, and proper disposal information on both pesticides and mercury. Approximately 100 individuals stopped by the booth to ask questions and/or receive information.

Attachment H – Appendix 1 – Table 2
PI/P Pesticide Management Activities – Estimated Numbers Reached
FY 2008-2009 Annual Report
Municipality: Sunnyvale

		Event – Community Orchard Gardens Neighborhood Assn Meeting	Sustainable landscaping and IPM were covered during this presentation. Along with the presentation, various brochures were distributed. Seventeen residents were in attendance.
		Event – Community SNAIL Neighborhood Association Meeting	Neighborhood litter clean up volunteer event discussed and various brochures related to stormwater pollution prevention were distributed. Approximately 20 residents attended.
		Event – Community Spring Garden Market – Kelley Park/San Jose	Sunnyvale staff assisted with SCVURPPP-sponsored booth at Santa Clara County Master Gardeners Event. See SCVURPPP section of annual report for details
		Event – Community Festival in the Park – San Jose	Sunnyvale staff assisted with SCVURPPP-sponsored booth at the event. See SCVURPPP section of annual report for details.
		Event – Community Sunnyvale Pancake Breakfast	City exhibit booths provided general and educational information. A craft promoting the importance of beneficial insects and how we should all work to protect them was provided for children attending the event. The art project is always a hit. Approximately 60 children/parents stopped by the booth.
		Event – Community & Schools / Youth Plant Tours	Discussions about water pollution and its issues impacting the watershed and the environment help tour attendees gain a better understanding of the problem. At the completion of the tour, attendees are given educational materials that promote environmentally responsible behaviors. Approximately 460 individuals took a tour of the plant this fiscal year.
		Event - Business Rotary Talk	Staff spoke on the difference between and a sanitary sewer and a storm drain, the importance of pollution prevention and talked abut the Santa Clara Valley Green Gardener training program to approximately 10 members.

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2009-2009 Annual Report
Municipality: Sunnyvale
Attachment H- Appendix 2

Santa Clara Valley Green Gardener Program Implementation

Introduction:

In FY 07-08, Sunnyvale staff and members of the SCVURPPP- PI/P Pesticide Outreach Ad Hoc Task Group and contacted the Metropolitan Adult Education Program in San Jose and the Master Gardeners of Santa Clara County to offer the first Green Gardener Training Program in the Santa Clara Valley. This program had been successfully implemented in Santa Barbara, Monterey, and Santa Cruz cities and counties, and was based on a 20-hour (10 classes, 2 hours each) curriculum that was developed and provided though Water Board grant funding.

The training and certification program covered topics related to promoting the principles of ecological/sustainable landscaping practices that reduce stormwater pollution resulting from landscape maintenance activities. Training was included on promoting healthy soils, integrated pest management approaches, appropriate fertilizer usage, irrigation system scheduling, maintenance, and troubleshooting, selecting the right plant for the right place, pruning techniques, the use of mulches and compost to reduce weeds and support good soil development, and the use of appropriate types of garden equipment to reduce impacts to air quality. Providing information and training on good management practices that promote and support the use of IPM techniques are an integral part of this training program.

Sunnyvale's Participation:

Two sessions were offered in the fall of 2008 and the spring of 2009, both in English and in Spanish, for a total of four classes in FY 08-09. Sunnyvale provided in-kind staff time to assist with the development, preparation and implementation of the classes. Sections of the curriculum and final examination were modified to reflect issues for the local climate and soils. Staff provided assistance with class operations, technical assistance, and promotion.

Sunnyvale staff time was also provided to assist with the preparation and grading of the final class exam and the preparation certificates of completion for those successful students who attended 80% of the classes and passed the final exam. Four different Sunnyvale staff members taught 2-hour sessions of the class in there particular areas of expertise.

Sunnyvale staff also assisted with the re-certification of students who had completed the first class of FY 07-08 in providing reviews of recertification information provided by the students and the renewal of their cards

Success of the Program:

A total of 53 individuals from small landscape maintenance businesses have received their Santa Clara Valley Green Gardener certification. Another 20 individuals who were private home owners or who work for municipalities have also successfully completed the class. These individuals are currently being promoted as "Santa Clara Valley Green Gardeners" though outreach efforts on the part of the Program, at events, and via the www.mywatershedwatch.org website.

The classes offered were successful, especially the Spanish language class.
Given that each individual trained in the Green Gardener program may provide services to between 10– 60 clients, outreach to this group of landscape maintenance professionals can have a significant impact on reducing the impacts to water quality from current landscaping practices. This includes reduction of pesticides and fertilizers in urban runoff and the wise use of existing resources to improve the health, appearance, and value of landscapes for their customers.

Also, approximately 50% of the FY 07-08 graduates submitted information needed for the renewal of their Green Gardener card in FY 08-09. Several more individuals have indicated that their renewal information is still forthcoming.

Outreach to the public, promoting the hiring of trained Green Gardeners was accomplished in Sunnyvale by including information about the GG program and the benefit of hiring a Green Gardener at all the community events attended by staff. In addition, staff included an article entitled *Pollution Prevention Week: What can you do to protect your bay today? - Green Gardener* in the Sunnyvale Fall Quarterly Report that is mailed to all City residents and businesses. A copy of this article is included in Attachment G, Appendix 1 of this report. See the Program's section on the Green Gardener for more details on the regional outreach efforts in its section of this report.

Preparations are underway to offer the English and Spanish introductory classes in the fall of 2009.

Spring 2009 Green Gardener students visiting Sunnyvale SMaRT Station compost/green waste processing area as part of their Compost and Mulch class

Mercury Pollution Prevention Activities

FY 2008-2009 Annual Report
Municipality: Sunnyvale
Attachment I

P.S. Id.	Activity	CI Item Source	FY 08-09 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
	Control Program for Mercury					
Hg Work Plan I.A	Mercury Plan Development	Permit Prov. C.9c	Sunnyvale staff to continue to work with SCVURPPP Mercury Pollution Prevention Plan work group	Staff continued to participate in the SCVURPPP Mercury outreach group and in the region-wide mercury product recycling and reduction outreach efforts. See Appendix 1, Table 2 for a listing of efforts in this FY.	Ongoing Report 09/09	Kristy McCumby Env. Specialist
I.D &, I.F	Mercury Plan Implementation	Permit' Prov. C.9c	Sunnyvale Mercury Work Group to continue to meet and determine how Program-provided guidelines for the "virtual" elimination of mercury in urban runoff will be implemented to address controllable City sources.	The Sunnyvale "Mercury Work Group" evolved into a work group to address product stewardship and environmentally preferable procurement practices. The "virtual elimination of mercury" program is addressed using the city's EPP - Environmental Procurement Policy.	Ongoing Report 09/09	K. McCumby & Sunnyvale Mercury Work Group (PW, Env., Sustainability & Solid Wst.)
I.F & MM 1	Mercury Plan Implementation	Permit Prov. C.9.c	Continue improving current recycling programs for fluorescent lamps and Hg-containing products, as needed. Other products (e.g., thermometers/thermostats) may be included as appropriate to a particular City Department.	Fluorescent, HID, and mercury vapor lamps generated by Public Works, Parks & Rec., and Facilities management continue to be collected and shipped off-site for recycling. As thermostats, switches, or other mercury-containing products become wastes, they are collected and shipped off for recycling, as well. See Appendix 1, Table 1 showing quantities of mercury-containing wastes that were shipped off for recycling in FY 08-09.	Ongoing Report 09/ 09	Kristy McCumby, Environmental Specialist & Sunnyvale Mercury Work Group
II.B	Mercury Plan Implementation	Permit Prov. C,9.c	Continue with existing Hg-containing product disposal services offered through the City's Household Hazardous Waste collection program, through support of the Santa Clara County HHW program.	Funding for the collection of Hg-containing wastes continued for the City's HHW collection program, in addition to the wastes collected during County HHW activities.	Ongoing Report 09/ 09	Kristy McCumby, Env. Spec.& Mark Bowers, Solid Waste Prog. Manager

FY 2008-2009 Annual Report
Municipality: Sunnyvale
Attachment I

Control Program for Mercury (Cont.)						
II.C	Mercury Plan Implementation	Permit Prov. C.9.c	Annually document quantities disposed or recycled by the City divisions/ departments.	See Appendix 1, Table 1 of this Attachment for information on the quantities of Hg-containing wastes that were collected and shipped for recycling or proper disposal by the various departments in the city in FY 80-09.	Ongoing, Report 09/09	Kristy McCumby Env. Spec. with support from Bob Van Heusen, Jim Craig, & Scott Morton
II.C	Mercury Plan Implementation	Permit Prov. C.9.c	Collect and report information on quantities of fluorescent lamps collected by City HHW collection program at the SMaRT Station from residential customers. Provide this information to the Program, as needed, to add to County data for HHW collected from residents and CESQG business collection programs.	Quantities of fluorescent lamps collected by the SMaRT Station are included in Appendix 1, Table 1 of this Attachment. All other data collected on quantities of Hg-containing waste collected at the HHW events are tabulated by the county and the information is not available for the individual cities.	Ongoing Report 09/09	Kristy McCumby Env. Spec. and Mark Bowers, Solid Waste Program Manager
II.F	Mercury Plan Implementation	Permit Prov. C.9.c	Continue working with regional HHW programs to develop and help publicize fluorescent lamp and other mercury-containing products recycling programs and efforts.	• Sunnyvale continues to support HHW programs that encourage proper disposal of fluorescent lamps and other mercury-containing devices through public education, outreach and participation programs designed to reach residential, commercial and industrial users. • Sunnyvale is a contributing member of the Mercury Ad Hoc Task Group. Activities include a media campaign through print, radio and transit ads that encourages residents to dispose of fluorescents at participating store locations. Task group members assist	Ongoing Report 09/09	Jackie Besoyan, Env. Outreach Coordinator & Rich Gurney, SW Recycling Coordinator

				in developing mercury work plans, budget review and activity planning and implementation. • Sunnyvale developed outreach material such as articles on mercury pollution prevention, and attended community and business events to educate individuals, distribute literature, and promote safe disposal of mercury containing devices. • For detailed information on mercury outreach see Attachment G Table 1 – Detailed Descriptions PI/P Activities and Self-Evaluation Matrix for FY 08-09.		
Control Program for Mercury (Cont.)						
III.A	Mercury Plan Implementation	Permit Prov. C.9.c	Continue financial support of Regional Monitoring Program through SCVURPPP funding.	Financial support of the Regional Monitoring Program continued through SCVURPPP via the city's assessment fees to the Program.	Ongoing Report 09/09	Lorrie Gervin, Env. Div. Mgr.
IV.C	Mercury Plan Implementation	Permit Prov. C.9.c	Support and participate in the implementation of the WMI Watershed Action Plan.	Staff continued participation in the WMI and the Action Plan implementation. The city continues to financially support the California Product Stewardship Council and its efforts to effect producer responsibility for the reuse or disposal of products that contain mercury or other potential environmental contaminants.	Ongoing Report 09/09	Lorrie Gervin, Env. Div. Manager

FY 2008-2009 Annual Report
Municipality: Sunnyvale
Attachment I

Control Program for Mercury (Cont.)						
V.A.3	Mercury Plan Implementation	Permit Prov. C.9.c	Pretreatment inspectors will continue to integrate distribution of Mercury Outreach materials and provide outreach to industries and businesses during routine inspections of facilities for source control measures.	The Pretreatment Program distributed Mercury Outreach materials during inspections of facilities that use mercury. The Pretreatment Program inspected and distributed Mercury Outreach materials and ADA Guidelines for Dental practices to 52 dental facilities during the timeframe of this reporting year. The Pretreatment Program will continue inspections of facilities with sources of mercury on site, to integrate the distribution of Mercury Outreach materials and brochures during inspections, and to update outreach materials when appropriate	Ongoing Activities Report 09/09	Sarah Scheidt, Senior Insp. Pretreatment Program
V.A.3	Mercury Plan Implementation	Permit Prov. C.9.c	Continue distribution of brochure "Is Mercury Hiding in Your Construction/ Demolition Project" by Building Division staff as requests for Building Demolition Permit are received.	The brochure is made available to those who apply for permits for demolition projects.	Ongoing Activities Report 09/09	Gordon Blancher, CDD/Building & Kristy McCumby, Env. Spec.
V.B	Mercury Plan Implementation	Permit Prov. C.9.c	Document and evaluate each outreach activity, including the target audience and number of businesses and/or residents reached.	The Pretreatment Program inspected and distributed Mercury Outreach materials and ADA Guidelines for Dental practices to 52 dental facilities during the timeframe of this reporting year. • For documentation of outreach activities, target audience and number of individuals reached please see Attachment H-Appendix 1-Table 2 for PI/P Mercury Management Activities	Annually Report 09/09	Jackie Besoyan, Env. Outreach Coord. & Sarah Scheidt Sr. Ind. Waste Insp.

FY 2008-2009 Annual Report
Municipality: Sunnyvale
Attachment I

Control Program for Mercury (Cont.)						
V.C	Mercury Plan Implementation	Permit Prov. C.9.c	Assist with the project to determine local attitudes and behaviors to evaluate the success of the outreach efforts and saturation of outreach messages in coordination with the Watershed Watch Campaign Survey	Under direction from the Program, Sunnyvale was an active participant in all activities related to the Watershed Watch campaign survey. See the Program's section of the annual report for Watershed Watch survey information.	To be deter-mined Report 09/09	Jackie Besoyan, Env. Outreach Coord.

Response to Regional Water Quality Control Board Comments on ICD Activities Section to FY 07-08 Annual Report:
No comments were received from RWQCB2 on this section.

FY 08 - 09 Annual Report

Attachment I

Mercury Pollution Prevention Activities

Appendix 1

Table 1 – Quantities of Mercury Recycled

Table 2 – Mercury Management Activities – Estimates of Numbers Reached

Table 1:
Quantities of Hg-containing wastes recycled from City Facilities in FY 08-09.

CITY DEPARTMENT/ LOCATION	TYPE OF WASTE	QUANTITY OF WASTE
SMaRT Station (Wastes from residences and small businesses)	Fluorescent Lamps (4 ft or less length) (> 4 ft length) Compact, Circ, U-tube Hg-containing wastes (e.g., thermometers and switches)	 9,886 units 1,458 units 4,038 units 15 lbs
Water Pollution Control Plant (City-owned property)	Fluorescent Lamps (4 ft length) Misc. shaped lamps and HID, Metal Halide Hg-containing wastes (e.g., thermometers and switches)	84 units 24 units 5 lbs
Corp Yard - Public Works (City-owned Property	HID, metal halide, & Mercury vapor lamps (shipped)	612 units
Parks and Recreation Dept.	Fluorescent Lamps HID, metal halide, & Mercury vapor lamps (shipped)	93 units 36 units
Facilities Management	Fluorescent Lamps (Tubes, U-bend, & compact fluorescent HID, Metal Halide, or mercury vapor lamps, Ballasts	4019 units 27 units

Total Fluorescent Recycled/collected (all sized tubes):
Approximately 15,540 fluorescent and compact fluorescent lamps were recycled from residents and city operations in FY 08-09

Total HID, Mercury Vapor, & Metal Halide:
Approximately 699 HID, Metal Halide and mercury vapor lamps were recycled from city operations in FY 09-08

Other Hg-containing wastes:
20 lbs of laboratory waste and x mercury switches from city operations were recycled or properly disposed of in FY 08-09

Santa Clara Valley Urban Runoff Pollution Prevention Program
Attachment I – Appendix 1 – Table 2
PI/P Mercury Management Activities – Estimated Numbers Reached
FY 2008-2009 Annual Report
Municipality: Sunnyvale

Sunnyvale Targeted Outreach for Mercury Pollution Prevention Activities			
Mercury Management Plan/Policy Implementation	Track and/or estimate the numbers of Sunnyvale residents, staff, and businesses reached through outreach efforts (including advertising) regarding mercury pollution prevention, proper disposal and other related topics.	Media Sunnyvale Quarterly Report	The Quarterly Report is mailed to approximately 60,000 Sunnyvale residents and businesses every three months. Several articles related to Mercury and safe disposal were published last fiscal year. Approximately 2000 additional copies of the report are provided to various public distribution points around the city. The newsletter is also posted on the City's web page.
		Media Outreach to City staff Harbinger newsletter	The Harbinger is Sunnyvale's internal newsletter for employees. Articles and information contained in the *Harbinger* reach approximately 900 municipal employees.
		Media Sunnyvale ReNews	This newsletter addresses pollution prevention concerns with a focus on reduce, reuse, and recycle and is mailed to approximately 29,000 single family residents and 24,000 multi-family residents quarterly. An additional 500 copies are printed and distributed from various locations.
		Media Flyers and Posters	Flyers for the Mercury Thermometer were distributed throughout the City at various locations as well as several Sunnyvale pharmacies. Any person living, working, going to school in Sunnyvale who used the library, community center, senior center or city hall could view the posters. The number of people whom viewed the flyers or posters at the various pharmacies is undetermined.
		Media KSUN Community Cable TV Ads	KSUN advertising reaches about 13% of all cable subscribers in Sunnyvale, who say they tune in once or twice a month.
		Media Websites	Information regarding proper disposal of mercury containing products is listed on both the Solid Waste and Water Pollution Control Plant websites. Reach is unknown. The City of Sunnyvale does not have the ability to count number of hits to the website.
		Media Utility Bill Inserts	Stuffing utility bills with advertising inserts reaches approximately 30,000 account customers for each two-month mailing.
		Media Sunnyvale Sun	The Sunnyvale Sun has a readership of approximately 36,824 and a circulation of 17,963

		Media City of Sunnyvale Community e-News	This email list reaches approximately 220 community members.
		Media Yahoo! Groups	The group has approximately 80 members that potentially viewed the information; however the actual number this reached is unknown as others passed the info onto others.
		Media City of Sunnyvale Press Releases	All press releases are listed on the City's web site and may be picked up and used by other media agencies as well.
		Media Broadcast News: KTVU (channel 2) Community Announcement San Jose Mercury News San Francisco Chronicle	An evaluation of media mentions is not feasible due to the difficulties in gathering data from widespread advertising.
		Event – Community Farmers Market	Outreach distributed the mercury brochure produced by HHW titled *What You Didn't Know….* at the Sunnyvale Farmers Market each month during FY 08-09. This popular brochure contains information regarding the location of retail stores where individuals can properly dispose of fluorescents. Approximately 253 individuals visited the booth in FY 08-09 for general water pollution prevention information.
		Event – Community State of the City	At this community event the Outreach exhibit distributed water pollution prevention information that also featured proper disposal of mercury containing devices as household hazardous waste. Approximately 100 individuals stopped by the booth to ask questions and/or receive information.
		Event - Community Sunnyvale Pancake Breakfast	This annual event features a community breakfast, activities for kids, and exhibits that provide community information. The mercury brochure is always a popular item. Approximately 60 children/parents stopped by the booth.
		Event - Community Columbia Health and Safety Fair	General water pollution prevention literature was distributed to approximately 75 community members attending the event.

		Event - Community SC County Creeks and Watershed Conference	This event offered a venue for Outreach to focus on how indoor/outdoor daily activities impact the health of our watershed. We used the exhibit that showed the difference between sanitary sewers and storm drains and handed out information on pollution prevention, as well as literature. During this event, we spoke to 25 people.
		Event - Community Mercury Thermometer Exchanges	Two events were hosted by outreach staff during FY08-09. A total of 296 mercury containing thermometers were collected.
		Event – Business Corporate Health and Safety Fairs	Outreach exhibited at (5) corporate health and safety fairs this reporting year, reaching over 600 company employees.

City of Sunnyvale

FY 08 - 09 Annual Report

Attachment J

Copper Action Plan/Nickel Action Plan

P.S. Id.	Activity	CI Item Source	FY 08-09 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
	Copper/Nickel Baseline Activities					
CB-1 (1 &4)	Measures to reduce copper discharges from vehicle washing operations	Permit Prov. C.9.a (CAP)	• Continue to inform the public by distributing materials, brochures, and other information at city offices, public places, and events. • Promote methods to reduce copper discharges from vehicle washing by placing articles or ads in various media (e.g., the Quarterly, KSUN, websites, theater ads and utility bill inserts).	Sunnyvale continues to educate the public about water pollution caused by residential car wash activities. At the following annual events, car wash literature is always distributed, and at some events the Enviroscape is used to demonstrate how residential car wash activities cause pollution in creeks and the bay. EVENTS *Sunnyvale* • Columbia Health and Safety Fair • Farmers Markets • State of the City • Sunnyvale Pancake Breakfast • Plant Tours • Orchard Gardens Neighborhood Association Meeting *Business Environmental Fairs* • Quicklogic, Lockheed, Aruba Networks, NetApp and Northrop Grumman • Rotary Talk *Regional* • Car Wash Events (3 for FY08-09) MEDIA Outreach *Sunnyvale Quarterly Report articles* • Pollution Prevention Week *City of Sunnyvale Community e-News* • Pollution Prevention Week *KSUN Community Cable TV* • An advertisement advising residents	Ongoing Report 09/09	Jackie Besoyan, PW Env. Outreach Coord.

				about water pollution from residential car washing ran on KSUN during National Pollution Prevention Week *Harbinger* • Helping the Community to Protect the Environment *Regional* • Radio advertising on car wash events and live spots during events YOUTH Outreach *Schools* • Outreach presented the Enviroscape demonstration to 16 classes in Sunnyvale Elementary Schools. A large portion of the demonstration is storm drain pollution from washing vehicles in driveways. • During the Community Kidz workshops a portion of the presentation talks about storm drain pollution from washing vehicles in driveways. • During the library presentation a portion of the presentation talks about storm drain pollution from washing vehicles in driveways. *Creek Education Program* • This creek and storm drain education program teaches 3rd graders about pollution in creeks from urban runoff See Attachment G Table 1 PIP Activity details for more information.		

	Copper/Nickel Baseline Activities cont.					
CB-1 (1 &4)	Measures to reduce copper discharges from vehicle washing operations	Permit Prov. C.9.a (CAP)	Continue implementation of Charity Car Wash Kit program. • Expand on initial outreach on kit availability • Assess implementation of program – any issues with kit use and pollution prevention • Evaluate the success of the program by tracking frequency of use	• Outreach continued through articles in the Quarterly and Harbinger. • The number of requests to use the kits remains small, possibly due to the water conservation messages that promote taking vehicles to a car wash that recycles the wash water. • Those who have used the kits responded positively toward their use. • Outreach to local schools about the availability of the kits will continue, as these seem to have the greatest number of events planned for volunteer fund-raisers.	Ongoing Report 09/09	Kristy McCumby, PW, Env. Spec.
CB-1 (1 &4)	Measures to reduce copper discharges from vehicle washing operations	Permit Prov. C.9.a (CAP)	Require source control measures for new and redevelopment projects (those adding or replacing 10,000 sq ft of impervious area) that conduct vehicle/equipment washing and maintenance activities (Consistent with Provision C.3.k)	• As new and redevelopment projects are reviewed and vehicle washing facilities are identified on the project plans. If they are present, BMPs must be instituted that address the wash water. Depending on the circumstances, connection of a vehicle wash area to the sanitary sewer with appropriate pretreatment may be required. Otherwise, vehicle washing areas are not approved on the project plans. • The Environmental Division continues to review applicable projects and require source control measures for projects that conduct vehicle / equipment washing and maintenance activities.	Ongoing Report 09/09	Shaunn Mendrin & Sarah Scheidt, Sr. Ind. Waste Insp.

Copper/Nickel Baseline Activities cont.						
CB-1 (2 & 4)	Measures to reduce copper discharges from vehicle washing operations	Permit Prov. C.9.a (CAP)	• Continue to inspect commercial/ industrial facilities that have vehicle washing activities occurring on site (this includes auto-related businesses). • Ensure BMPs for vehicle washing are employed. • Distribute new vehicle washing BMP information that is available in three languages during inspections. • Provide an effectiveness evaluation of inspection/compliance with BMPs. • Continue to inspect vehicle-washing areas for City vehicles at the Corp Yard.	• 151 Automotive related facilities were inspected for BMP compliance during the reporting period including sales, repair, fleet, car washes, and gas stations. • In addition, the City Corp Yard was inspected this year and found to be in compliance. • Automotive BMPs, including washing BMP information, were distributed to all facilities that were inspected. • Sixteen verbal notices and 3 warning notices were issued for minor stormwater violations, all of which corrected the violations in compliance with required BMPS. • Facilities will continue to be inspected bi-annually	Ongoing Report 09/09	Sarah Scheidt, Sr. Ind. Waste Insp.
CB-1 (3 & 4)	Measures to reduce copper discharges from vehicle washing operations	Permit Prov. C.9.a (CAP)	• Encourage new mobile cleaners and those who are renewing their certification to use the BASMAA website for on-line mobile cleaner training and be recognized on the area wide certification list. • Continue to provide training (as requested) to new mobile cleaners and those seeking recertification in Sunnyvale. • Evaluate effectiveness of the training program and BASMAA on-line training. • Encourage municipal staff to use certified mobile cleaners when contracting for cleaning services Maintain records on who has been trained by City staff and report on numbers trained in the annual report.	• The Pretreatment Program continues to promote the use of the BASMAA on-line training program for Surface Cleaners. Additionally, we continue to utilize the Surface Cleaners Training Kit developed by the Program to provide training to new mobile cleaners, as needed. • The City did not certify or recertify any mobile cleaners during this reporting period.	Ongoing Report 09/09	Sarah Scheidt Sr. Ind. Waste Insp.

	Copper/Nickel Baseline Activities cont.					
CB-3	Measures to control copper discharges to storm water from targeted industrial sources	Permit Prov. C.9.a (CAP)	• Industrial Waste Inspection staff will continue specific outreach to all printed circuit board manufacturers and metal plating facilities using copper and having the potential to discharge copper into storm water. • Distribute and discuss BMPs/ Information to minimize copper discharges. • Continue inspections of all commercial/industrial facilities, including NOI sites using copper.	Industrial Waste Inspection staff continues to inspect and permit all metal plating facilities yearly based upon their regulatory category. During inspections BMP's are provided and a storm water inspection is conducted to identify any potential discharges. Staff inspects NOI filers on a yearly basis and is typically incorporated with the wastewater discharge permitting and inspection process.	Ongoing Report 09/09	Sarah Scheidt, Sr. Ind. Waste Insp.
CB-6/7	Reducing Traffic Congestion/ Promoting Alternative Transportation	Permit Prov. C.9.a (CAP)	• Continue implementation of site design standards related to transportation to meet the requirement of C.3.j of the permit. • Report on significant projects where traffic congestion reductions were included in design plans.	• In Attachment E, Appendix Table 1; Parts 1 & 2 projects #1, 4, 7, and 11 included requirements for Transportation Demand Management Plans as part of their conditions of approval as a means to reduce potential traffic congestion. Projects # 2 & 3 included pedestrian access improvements as part of the site design for the projects. Also, Project #11 was required to include traffic calming measures as part of the development. The following public projects were completed in FY 08-09 to help reduce traffic congestion through the promotion of alternative transportation: • Borregas Avenue Bicycle and Pedestrian bridges • Mary Avenue lighted crosswalk • Hollenbeck Road lighted crosswalk • Blair Avenue Traffic Calming • Kifer Road lighted cross walk • Arques Avenue lighted crosswalk	Ongoing Report 09//09	Lead: Jack Witthaus, Transportation Program Mgr, Support: Shaunn Mendrin, Sr. Planner

Copper/Nickel Baseline Activities cont.						
CB-8	Measures to classify and assess watersheds and to improve institutional arrangements for watershed protection	Permit Prov. C.9.a (CAP)	• Continue to implement HMP requirements for projects that meet the size threshold criteria in HMP applicability areas as identified by maps included in the City's BMP Guidance Manual. • Continue to review EIRs and complete CEQA reviews to ensure watershed protection is considered in CEQA actions. • Continue participation in SCBWMI activities as it implements the Watershed Action Plan. • Revise Sunnyvale's General Plan (Surface Water Sub Element), as needed, at the next scheduled update. Include recommendations based on the review of the Development Policies Comparison Project and Provision C.3.I of Order 01-119 as determined to be appropriate. • Continue participation in the Water Resources Protection Collaborative (WRPC). Council approved adoption of the Guidelines and Standards applicable to Sunnyvale in 2007.	• No projects that met the HMP thresholds in the HMP applicability areas identified by the City were submitted in FY 08-09 • As EIRs are submitted, they are reviewed to consider watershed protection, where needed. • Staff continues to participate in the SCBWMI as elements of the Watershed Action Plan are implemented. • The Surface Runoff Sub Element of the City's General Plan was not updated this year. Depending on the requirements that evolve from the Municipal Regional Permit when it is approved, the City will review this Sub-Element and determine changes that may need to be incorporated. The WRPC was not active in FY 08-09. The City adopted sections of the Guidelines and Standards that were applicable to Sunnyvale for development near creeks and waterways in May 2007. The Guidelines and Standards continue to be implemented as required.	Ongoing Report 09/09	Lead: Lorrie Gervin, Env. Div. Manager and Kristy McCumby, Env. Spec. Support for WRPC activities: Shaunn Mendrin, Sr. Planner

Copper/Nickel Baseline Activities cont.						
CB-11	Measures to improve street sweeping controls and storm water system operation and maintenance	Permit Prov. C.9.a, (CAP)	• Implement (as appropriate) improvements identified for current sweeping program and storm drain system O&M (within available City Budgets). • Evaluate the effectiveness of street sweeping and storm drain O&M in the annual report (See Streets and Roads and Storm Drain sections of this work plan).	• The street sweeping program continued this year as in past years, with no significant changes. There was no change in the funding available for street sweeping in FY 08/09. The regular schedule was maintained throughout the year. • Annual storm drain catch basin cleaning occurred and additional clean outs are done on an as-needed basis to prevent flooding. Collected debris is taken to the SMaRT Station for disposal. Better tracking of inlet cleaning activities through the use of an inlet cleaning form continues. Street sweeping data on curb miles swept and quantities of debris are reported in Attachment D-1, Appendix 1.	Ongoing Report 09/09	Tony Pineda Maintenance. Supervisor & Jim Craig, Field Services Superintendant.
CB-11	Measure to Track Street Sweeping Data	Permit Prov. C.9.a (CAP)	• Continue to follow Program guidance regarding the collection and reporting of street sweeping data. • Provide information periodically to the program. Information for reporting includes: quantity of waste collected (cubic yards), number of miles swept, and frequency of sweeping as required.	Data were tabulated from PW Streets maintenance daily logs and this information was reported to the Program, as requested. Street Sweeping data collected for this year are included in Attachment D-1, Appendix 1 of this report.	Ongoing Report 09/09	Tony Pineda, Maint. Supv. & Kristy McCumby, Env. Spec.

Copper/Nickel Baseline Activities cont.						
CB-12	Measures to Control Copper Discharges from Pools and Spas	Permit Prov. C.9.a, (CAP)	• Continue to inform the public by distributing materials, brochures, and other information at city offices, public places, and through on-site distribution at presentations and events. • Continue to provide proper pool and spa water discharge information to the public by placing ads in various media (e.g., The Quarterly, KSUN, City website, theater ads, and utility bill inserts.	Public outreach activities related to water pollution from pool and spa discharge is described below: Events *Community* At the following events, the *Draining Pools and Spas* brochure was distributed • Columbia Health and Safety Fair • Farmers Markets • State of the City • Sunnyvale Pancake Breakfast • Orchard Gardens Neighborhood Association Meeting *Business* At the following environmental events sponsored by Sunnyvale businesses, the *Draining Pools and Spas* brochure was distributed to employees: • Quicklogic, Lockheed, Aruba Networks, NetApp, and Northrup Gruman MEDIA OUTREACH *Sunnyvale Quarterly Report articles* • Pollution Prevention Week *WPCP Website* • The **Draining Pools and Spas** brochure is posted for viewing and downloading on the website at the Water Pollution Control Plant. See Attachment G Table 1 PIP Activity details for more information.	Ongoing Report 09/09	Jackie Besoyan, PW Env. Outreach Coord.

Copper/Nickel Baseline Activities cont.						
CB-21	Measures to Discourage the Architectural Use of Copper	Permit Prov. C.9.a (CAP)	• The ornamental/architectural use of copper in building designs is discouraged in practice, but not prohibited by Sunnyvale ordinance. • The City is in the process of changing its Design Guidelines to not allow the ornamental use of copper for roofs, cutters, or other architectural/ ornamental exterior uses.	Staff have incorporated issues of environmental concern (e.g., avoiding the use of ornamental copper) into the information provided to developers and into the recommended Conditions of approval attached to conditionally approved permits. The use of ornamental copper has not yet been formally incorporated. Staff will formally incorporate this when the relevant documents are next updated (expected in early 2010). In the mean time, Planning staff's practice is to prohibit the use of ornamental copper in exterior applications.	Ongoing Report 09/09	Shaunn Mendrin, Senior Planner & Kristy McCumby Env. Spec.
NB-1	Measures to Implement Metals Controls Measures: Erosion 1) Implement perf. Stds for Const. Inspect. Erosion 2) Participate in training & cert. of site inspectors	Permit Prov. C.9.b (NAP)	• Continue to implement Construction Inspection Performance Standards • Continue to have Inspectors attend Regional Board/Program workshops on Construction Site Management and erosion controls to learn erosion and sediment control techniques. • Continue to attend Program-sponsored workshops on post-development storm water control BMPs	Both Building Inspection staff and Capital Projects Administration staff implement the Construction Inspection Performance Standards in the City's URMP. See Attachment F, Appendix Table 1 for a list of inspections and corrective actions required. Staff attends training as it becomes available. See Attachment M for staff training details by division.	Ongoing Report 09/09	Gordon Blancher, Building Insp./ Coord. Hira Raina/ Nasser Fakih

Trash Investigations and Plan Development						
	Trash Investigations and Plan Development	Program Task RWQCB Letter	Assist Program in implementing Pilot Demonstration Projects to focus on assessing trash control measures effectiveness.	13 inlets were retrofitted with full capture devices as part of the pilot project in Sunnyvale with SCVURPPP. See Appendix 1 of this Attachment for details on the pilot project and preliminary data discussions.	Report 09/09	Kristy McCumby/ Env. Specialist
	Trash Investigations and Plan Development	Program Task RWQCB Letter	• Continue to identify and prioritize actions for trash problem areas in urban streams and waterways. • Identify other potential sources of trash. • Use criteria provided by Program staff in FY 07-08 to identify and prioritize the areas.	Staff continues to work with SCVURPPP to identify problem areas in urban waterways. Staff assisted SCVURPP in performing an URTA in Stevens Creek near one Sunnyvale stormwater pipe outfall near Remington Drive in October 2008 and will continue to work with them as plans are developed to address litter issues in Stevens Creek with multiple city jurisdictions. This will likely become a priority area for the City to look for opportunities for enhanced litter control actions in the future, in addition to continuing on with current litter prevention actions in other areas of the city.	Ongoing Report 09/09	Kristy McCumby/ Env. Specialist
	Trash Investigations and Plan Development	Program Task RWQCB Letter	• Continue to identify and implement trash control measures, as appropriate, to address high priority trash problem areas within Sunnyvale's jurisdiction, • Provide specific information on trash management practices implemented.	A description of trash control measures and management efforts currently in place within Sunnyvale is provided in Appendix 1 of this Attachment. Actions included multiple volunteer clean up events as well as participation in the Pilot Trash Retrofit project.	Ongoing Report 09/09	Kristy McCumby/Env. Spec & community volunteers (TBD)

Trash Investigations and Plan Development (cont.)						
	Trash Investigations and Plan Development	Program Task RWQCB Letter	Track existing trash management practices used by the City and evaluate their effectiveness, based on guidance provided by SCVURPPP. The Effectiveness Evaluation may include the use of the Urban Rapid Trash Assessment protocol and/or the KAB litter index in a subset of the high priority trash problem areas.	A discussion of existing trash management practices and evaluations is included in Appendix 1 of this Attachment. The URTA was performed in two locations in FY 08-09 where there had been some efforts to removed trash through volunteer clean up events. URTA data is provided in Appendix 2 of this Attachment.	Report 09/09	Kristy McCumby, Env. Specialist
	Trash Investigations and Plan Development	Program Task RWQCB Letter	Provide Program staff with trash management practices information from within Sunnyvale's jurisdiction, using a standardized reporting format.	Program staff was provided with requested information using URTA data forms and providing information on the Pilot Trash Retrofit project. See Appendix 2 for data table.	Ongoing Report 09/09	Kristy McCumby/ Env. Specialist
	Trash Investigations and Plan Development	Program Task RWQCB Letter	Submit Urban Rapid Trash Assessment Survey Forms, Trash Item Tally Sheets, and any other data collected to the Program staff, as appropriate.	Program staff was provided with copies of the URTA forms, as requested. Copies of the URTA results for the two sites assessed are included in Appendix 2.	Ongoing Report 09/09	Kristy McCumby/ Env. Specialist
	Trash Investigations and Plan Development	Program Task RWQCB Letter	Continue to assist Program to develop Trash Fact Sheets, as appropriate.	Staff provided assistance in the review of trash fact sheets, when requested and in providing information/photos as needed.	Ongoing Report 09/09	Kristy McCumby/ Env. Spec.
	Trash Investigations and Plan Development	Program Task RWQCB Letter	Assist program staff in developing a long-term strategy for reducing trash in urban streams and waterways, and identify other sources that may contribute trash to those areas	Staff continues to participate in the SCVURPPP Trash Ad Hoc task group and provide input/information regarding strategies for trash reduction in creeks and waterways as requested.	Ongoing Report 09/09	Kristy McCumby/Env. Spec

Trash Investigations and Plan Development (cont.)						
	Trash Plan Implementation	Program Task RWQCB Letter	Continue to build trash awareness by providing outreach to residents and to students in Sunnyvale schools in an effort to increase behavioral changes through public education.	Sunnyvale continues to provide public outreach by publishing articles, by developing and advertising through bus back ads, by promoting litter pollution prevention at events, by hosting cleanup events, and by conducting demonstrations for residents and students in order to build trash and litter pollution prevention awareness. • For detailed information on trash outreach see Attachment G Table 1 – Detailed Descriptions PI/P Activities and Self-Evaluation Matrix for FY 08-09.	Ongoing Report 09/09	Jackie Besoyan, Env. Outreach Coordinator

Trash Assessment Results, Pilot Project, and Management Actions Initiated

City of Sunnyvale
Attachment K, Appendix 1
Trash Assessment Results and Management Actions Initiated
FY 08-09

Introduction:

In FY 08-09 the City was not able to obtain a community volunteer to assist with Urban Rapid Trash Assessments (URTA), so only one assessment was done at the Sunnyvale East and Sunnyvale West Channel sites in February 2009. The URTAs were completed in locations had been previously assessed and where upstream trash management actions had been or would be implemented. Due to the lack of volunteer staff and the screening level nature of the Keep America Beautiful (KAB) assessment methodology, no further assessments using this approach were initiated. Resources were used to promote and accomplish volunteer clean up events instead.

Ongoing trash/litter pick up activities continue by both the Public Works and the Parks and Recreation Departments. Street-sweeping, litter pick up at parks and after city-sponsored events, and during landscape maintenance operations all help to reduce the accumulation of litter in storm drain inlets or that could be wind-blown into adjacent waterways.

Public outreach and education about litter and its impact to creeks and the Bay are included in classroom presentations about watersheds using the Enviroscape model. Litter prevention messages are included in local advertising efforts. The City also helped distribute tarps to cover loads and informational flyers to residents coming in to the SMaRT Station for waste disposal during the county-wide event. See Attachment G-P/IP for a description of outreach activities related to litter prevention.

The city completed three litter clean up events in FY 08-09, rather that conducting multiple URTAs and any KAB assessments. Sunnyvale sponsored sites for the Coastal Clean Up day along the Guadalupe Slough, an area that is tidally influenced from the Bay and that receives flow from San Thomas Aquino and Calabazas Creek, as well as the Sunnyvale East and West Channels. Sunnyvale sponsored three locations in neighborhoods around the city (approximately 1 square mile for each neighborhood site) as part of the Great American Litter Pick Up event. Portions of the Sunnyvale East Channel and Calabazas Creek were cleaned of litter as part of the National River Clean-Up Day event. See sections below for a description of the numbers of participants and quantities of debris removed during these events.

The city continued with the implementation of the Pilot Storm Drain Inlet (SDI) Retrofit project, in cooperation with San Jose and with the assistance of SCVURPPP. An analysis of the debris collected in each retrofitted inlet at the end of the rainy season was completed to identify the quantities and types of trash and leafy debris collected in each retrofitted inlet.

Results from these trash management initiatives are reported below, as well as an evaluation of their effectiveness.

City of Sunnyvale
Attachment K, Appendix 1
Trash Assessment Results and Management Actions Initiated
FY 08-09

Assessments:

URTA – Sunnyvale East and Sunnyvale West Channels

URTA assessments were performed on the Sunnyvale East and West Channels in February 2009. The SCVURPPP assessment reporting table, assessment forms, and photographs for these two sites are included at the end of this Appendix.

URTA scores for the Sunnyvale East Channel assessments have ranged from a low of 59 to a high of 98. Scores for the Sunnyvale West Channel ranged from a low of 81 to a high of 100. (See Table 1 below.)

Table 1: URTA scores for Sunnyvale East and West Channels FY 04-05 to FY 08-09

	FY 04-05 Fall	FY 05-06 Winter	FY 05-06 Spring	FY 06-07 Winter	FY 06-07 Spring	FY 07-08 Winter	FY 08-09 Winter
Sunnyvale East Channel	59	67	83	85	98	73	72
Sunnyvale West Channel	81	100	100	93	100	90	94

In general, scores are lower for assessments completed in the winter months after rain events during the wet season. Scores were higher in the spring, since the area had been cleaned up one time previously that year. The assessments completed this year had rankings very similar to those observed in FY 07-08.

The scores for the Sunnyvale East Channel, in general, are lower than those observed for the West Channel. This may partly be due to differences in the drainage area size for each channel. Sunnyvale West Channel drains 4.1 square miles and is 3.2 miles in length. Sunnyvale East Channel drains 6.35 square miles of Sunnyvale and part of Cupertino and is 6.4 miles in length. Trash that is conveyed to the Sunnyvale East Channel via the storm drain outfalls is coming from approximately a 35% larger drainage area than that of the Sunnyvale West Channel.

Also, there may be more litter entering the Sunnyvale East Channel from highway sources, as it is crossed by bridges for Highway 237. Litter pick up during the National River Clean-Up Event collected debris from the area adjacent to the bridge crossings over the East Channel in May 2009. The Sunnyvale West Channel is underground where Highway 237 crosses.

The majority of the trash observed at both channels appears to have been accumulated at the assessment location from upstream water transport sources. There is some wind blown accumulation from vehicles using Caribbean Drive and Highway 237 where

bridges or the roadways are adjacent to the channels and next to the URTA assessment area.

Both Sunnyvale East and West channels drain highly urbanized portions of the City with a mixture of residential, commercial, and industrial land uses. The impacts from land use activities directly adjoining the channels appear to be small. Walking surveys along the banks of the channels from Baylands to Mathilda Avenue for the Sunnyvale West Channel(where the channel undergrounds in a box culvert) and from Baylands to Fair Oaks/ Hetch-Hetchy Green Belt for the Sunnyvale East channel(where the channel undergrounds for a long distance) did not identify significant impacts from properties bordering the channels. The land use in these portions of the channel is predominantly industrial for technology-related businesses. Some minor "homeless" and "Graffiti" impacts on the Sunnyvale East Channel near the Hetch-Hetchy Green Belt crossing area were observed.

City Department Litter Control/Clean Up Activities in FY 08/09:

Public Works Department

The Street Maintenance Division continues to perform street sweeping on a monthly basis in residential areas (See street sweeping schedule with dates for each street on Sunnyvale's website at http://sunnyvale.ca.gov/Departments/Public+Works/Street+Maintenance/Street+Maint+Schedule.htm).

Weekly sweeping occurs for the downtown core area (Murphy Street) and the surrounding city-owned parking lots. Additional sweeping for leaf pick-up is done in the late fall, as well as extra sweeping for storm debris, as needed. (See Attachment D-1, Appendix 1 of this report for details on the quantity of materials collected during street sweeping activities and the number of curb miles swept.)

Public Works, Street Maintenance Division staff also assist the Public Safety Department on an as-needed basis to collect and dispose waste at homeless encampments at the City's solid waste facility. Although these encampments are not located on waterways, the collection and removal of this debris helped prevent resulting litter or small debris from entering any storm drain inlets near the encampment areas.

The Boulevard Landscaping Division is responsible for maintaining landscape along City-owned rights-of-way. In their landscape maintenance activities, they also collect litter that accumulates on street medians and roadsides that are maintained by these crews. The litter from these areas is removed 13 times per year (roughly on a monthly basis).

City of Sunnyvale
Attachment K, Appendix 1
Trash Assessment Results and Management Actions Initiated
FY 08-09

Solid Waste Division and Contractor: SMaRT Station litter control efforts along Caribbean Drive

Garbage transfer trucks hauling wastes to the SMaRT station in Sunnyvale use Caribbean Drive as their access to the City's materials recovery facility. As a result, windblown litter from the vehicles after they have off-loaded has been identified a chronic problem along the site access route. The contractor operating the SMaRT station is periodically reminded to ensure that drivers take necessary precautions to prevent litter from blowing out of trucks after having deposited their loads at the facility.

Two of the pilot SDI full capture devices identified in the SDI retrofit pilot project description below were installed along Caribbean Drive and will be monitored as one method determine the effectiveness of efforts to reduce the litter coming from solid waste transport vehicles utilizing the SMaRT Station.

Parks and Recreation Department

Parks and Recreation Department, Parks and Open Space Division staff perform weekly clean-ups of public parks and trails, as well as some school athletic facilities to prevent litter accumulations. Over 17,000 hours of staff time is used annually for litter control efforts at parks, school sports fields, and open spaces maintained by the City.

Litter Clean-up Events in FY 08-09:
The City coordinated sites for three litter clean up events in FY 08-09 and is planning to continue with these three events in FY 09-10.

Coastal Clean Up Day Event: September 20, 2008

A Coastal Clean Up Day Event location was sponsored by Sunnyvale in cooperation with the Creek Connections Action Group.. Approximately 1875 lbs of trash and 60 lbs of recyclables were collected by 43 volunteers from a 1-mile reach from one side of the Guadalupe Slough that was accessible from the Sunnyvale Water Pollution Control Plant oxidation ponds access road.

Great American Litter Pick-Up Event (GALP):
On April 25, 2009, the City coordinated three neighborhood locations for the county-wide Great American Litter Pick-up event sponsored by the Silicon Valley Anti-Litter Campaign. Neighborhoods were selected that drained into the Sunnyvale East and Sunnyvale West Channels with an area of approximately three square miles. Land use was mostly residential, with some commercial and public schools/parks. The City had 60 volunteers that picked up approximately three cubic yards of trash and one half cubic yard of recyclables from these neighborhoods before they entered the storm drain collection system.

National River Clean Up Day Event:
On May 16, 2009, in cooperation with the Creek Connections Action Group, the City coordinated a clean up of the Sunnyvale East Channel from the point where it enters the Guadalupe Slough near Baylands Park to the Highway 237 crossing. An additional area along Calabazas Creek north of Highway 237 and bordering Sunnyvale Baylands Park was also cleaned. Land use in the areas is a mixture of residential and industrial, with some public parks, trails, and rights-of-way near the channel. A total of 46 volunteers picked up approximately 338 pounds of trash and 34 pounds of recyclables from the channel banks and one side of the creek bank.

Litter Prevention Efforts

Tarp Give-Away: November 2008
At the November 1, 2008 event held at the Sunnyvale "SMaRT" station, 40 tarps were distributed to residents who brought in vehicle loads of waste for disposal. Flyers were also distributed to participants that reminded them of city ordinances and state laws regarding the transport of wastes or materials on public roads requiring that loads be covered and littering be prevented.

Public Education and Outreach Articles/Advertising
Sunnyvale continues to provide public outreach by publishing articles, theater ads, and bus-back ads promoting the prevention of litter pollution. Also, staff conducted demonstrations for residents and students at events and in schools using the Enviroscape to demonstrate sources of litter pollution and how it is transported to waterways to help increase litter prevention awareness.

For detailed information on trash outreach see Attachment G Table 1 – Detailed Descriptions PI/P Activities and Self-Evaluation Matrix for FY 08-09.

Pilot Studies Continued in FY 08-09

Pilot Trash Structural Treatment Control Study – With SCVURPPP and City of San Jose

As reported in our FY 07-08 Annual Report, thirteen storm drain inlets were selected for the installation of the StormTek ® full capture devices. Completion of the installation of the last two devices was completed in September 2008, so all units were operational at the beginning of the rainy season of FY 08-09.

All units were cleaned by Field Services staff prior to October 1, 2008. Staff inspected the units in mid-December after the first rain events to ensure the accumulation of debris would not cause overflows of the units or potential flooding. Five SDIs were identified as being approximately 50% full and Field Services was notified that clean out of the retrofitted units was required. Four of the units were cleaned in late December and the fifth was cleaned in early January.

In mid-February, two of the units along Maude Ave that had been cleaned in December had flooding incidents during a significant rainstorm that occurred on February 13 and 14. Emergency crews were dispatched and the units were removed and cleaned of debris. During the emergency removal, one of the units was damaged and had to be repaired before it could be replaced into the SDI. It was replaced into the unit the first week of March. Street flooding also occurred at the unit installed at the corner of Caribbean Drive and Borregas Ave after a storm on February 6, 2009. Approximately 11 cubic yards of leafy debris was removed from the SDI at that time.

Inspections of the all retrofitted SDIs occurred on February 26, 2009 and none were identified as needing to be cleaned out.

The 13 retrofitted inlets were cleaned on May 18, 2009 and June 5, 2009 after the end of the rainy season. All debris was removed with a clamshell shovel, bagged, labeled, and taken to a processing area where litter was sorted from the leaf debris, weighed (wet weight), and approximate volumes for both leaf debris and litter were measured. The process was similar to that which was done for the eleven units reported on in our FY 07-08 annual report. Table 2 below shows the weights and volumes of litter and leaf debris collected from each of the 11 retrofitted SDIs. Also, footnotes are provided showing the additional quantities of debris that were removed during the rainy season to prevent flooding or if there were emergency cleanings needed during flood events.

Of the 13 inlets cleaned in May 2009, a total 1601 pounds of leafy debris and approximately 38 pounds of trash were removed at that time. This was approximately 46.7 cubic ft of leafy debris and 5.5 cubic feet of litter. An additional 80 cubic ft of leafy debris and trash were removed from seven of the SDIs to prevent or as the result of street flooding before the annual clean out occurred in May 2009.

The leafy debris (deciduous leaves, conifer needles, and twigs) appeared to be from the local street trees and was not from material being dumped or discarded by residents or businesses. Sunnyvale requires the use of green-waste carts by residents for yard debris pick-up.

The most common types of litter categories observed in the retrofitted inlets were the plastics. Plastic food wrappers *(e.g., candy bar wrappers, chip bags, snack food wrappers) cellophane (cigarette packs and candy), plastic cups, lids and straws, and Styrofoam packing materials were frequently observed (especially at the two SDIs along Caribbean Drive). Paper was also very common, in some areas. Cigarette butts were frequently found, especially in inlets that were close to stop lights and on roadways with higher traffic flows. Very few glass or metal items were observed in the litter. A more detailed description of the types of trash observed will be available in the final report for the pilot project.

*Polyethylene tetraphthalate (PET) that is biaxially oriented or boPET film used for food packaging.

Table 2. Quantities of leaf debris and trash collected in Retrofitted SDIs at end of rainy season in 2009

[4] Additional debris removed by Sunnyvale Field Services staff on Dec. 16, 2008 (~10 cubic ft)
[5] Additional debris removed by Sunnyvale Field Services staff on Dec. 22, 2008 (~12 cubic ft)
[6] Additional debris removed during flood incident by Field Services staff on Feb, 16, 2009 (2 cubic ft)
[7] Additional debris removed by Sunnyvale Field Services staff on Dec. 22, 2008 (~12 cubic ft)
[8] Additional debris removed during flood event by Sunnyvale Field Services staff on Feb. 16, 2009 (~12 cubic ft)
[9] Additional debris removed during flood event by Sunnyvale Field Services staff on Feb. 6, 2009 (~11 cubic ft)

The final report on the pilot project will be produced in cooperation with SCVURPPP in the fall of 2009. More detailed information regarding the site selection and installation, including photographs of the installations is provided in the Program's section of the annual report regarding trash management actions.

Effectiveness Evaluations:

City Department Litter Clean Up and Prevention Efforts:
Both Public Works and Parks and Recreation Departments within the city continue with their efforts to control litter in public areas and rights-of-way. Litter/trash pick up is a normal part of the job for staff in both of these departments as they maintain public facilities. In areas that are known to be problematic (e.g., along routes to the SMaRT Station) the City requires contractors to pick up wind-blown debris from the truck routes. This is an effective method to help reduce litter from entering SDIs, but it is very labor intensive and can be expensive.

The City continues with street sweeping efforts to collect debris. Over 8912 cubic yards of litter, leaves, and street debris were collected in FY 08-09, which is a small increase previous years (FY 07-08 and FY 06-07), based on the same number of curb miles swept in residential, commercial, and industrial areas of the city. This number varies each year, partly due to quantities of leaves accumulating on streets. Street sweeping continues to be an effective means to help reduce leafy debris and trash from entering SDIs

Litter pick up after public events on city property is an integral part of the event planning effort. Litter remaining on-site after events has not been an issue in Sunnyvale.

Coastal Clean-Up Day, Great American Litter Clean-up and National River Clean–Up Day Events

All of these volunteer events were very successful. The number of volunteers needed for the event was met and the quantity of litter picked up, although not huge, was still proactive in keeping the wastes from entering the storm drain system (for the GALP) or into the Bay from the Coastal Clean Up Day and National Rivers Clean-up Day events. The events are popular for volunteers as they feel that they are doing something to help reduce visible pollution problems. It also provided an opportunity for outreach to the people in the neighborhoods who saw the volunteers picking up litter, helping make them more aware of litter issues. Participation by the public has continued to increase with each event.

Tarp Give-Away Event
This event was less effective this year, as it was not done on an "Extra Dump Day" event as it had been last year. However, it is still effective at providing the facility users with the appropriate covers for their loads coming in to the SMaRT Station for disposal,. It also provides them with education materials about the litter problems coming from uncovered loads and the legal requirements for covering their loads. Only 40 people received the tarp on the day of the event this year.

Public Education and Outreach Articles/Advertising
A combination of articles, theater advertisements, bus-back advertising, and promotion through demonstrations such as the Enviroscape continue to build trash and litter pollution prevention awareness levels with the public. See Attachment G, Table 1 for a detailed analysis of the effectiveness of the various outreach tools used for trash and litter outreach.

Pilot Trash Structural Treatment Control Study
The effectiveness of the pilot program is still being determined. Preliminary results indicate that the units work well as "full-capture" devices and collected significant amounts of leafy debris along with smaller quantities of litter.

Part of the pilot project was to determine the operational and maintenance costs for these units. Based on the flooding issues that occurred in some locations, despite the units being cleaned less than six weeks before the flood event occurred, it will be essential for Field Services staff to increase their inspection frequency of inlets in certain areas, due to the quantity of leafy debris that accumulates at those locations. This adds to the overall cost for maintenance of the units. In about half the units installed, the annual cleaning may be sufficient, due to the size of the SDI itself. The smaller SDIs fill up more quickly with leafy debris in some locations, whereas others, especially the larger units will only need their annual cleaning.

The maintenance and determination of the trash loading rates and costs per quantity of trash removed will not be available until the final report is prepared in the fall of 2009.

Potential Next Steps:

Caribbean Drive-

- Continue contractor efforts to collect windblown debris from trucks leaving the facility.
- Continue to work with contractor to minimize the amount of debris falling off the transport vehicles.
- Monitor full-capture, retrofitted SDIs to see if litter control efforts are helping reduce the amount of litter entering the inlets.

Sunnyvale East Channel-

- Plan for a clean-up event on National River Clean-Up day, spring 2010.
- Continue to expand number of Great American Litter Pick Up event sites for spring of 2010, pending volunteer availability and interest.

Sunnyvale West Channel-

- Plan for a clean-up event on Coastal Clean-Up Day, fall 2009
- Continue to expand the number of Great American Pick Up event sites for spring of 2010, pending volunteer availability and interest.

City Department Actions-

- Work with department staff to collect data on current level of litter control efforts, such as quantities of debris collected, to assist with effectiveness assessments of litter control efforts.
- Working with Neighborhood Preservation Division of Community Development, develop Neighborhood Litter Pick up kit (safety vests, litter grabbers, gloves, and bags) to loan out to neighborhood associations for local litter clean up efforts sponsored by residents/volunteers.

Date:2/12/2009 135

I. Site Information

1. **Site ID# SU16A** **Watershed: Sunnyvale West** **Location: Sunnyvale West @ Caribbean**

II. Assessment Information

1. Which assessment tool was used? (Check one)
   ☒**Creek**-RWQCB Version 7.0 ☐**Non-Creek**-Windshield Survey
   ☐**Non-Creek**-KAB Litter Index ☐Other _____
2. **Total Score** (RWQCB Version 7.0 or KAB Litter Index) 94
3. Windshield Survey Results-Trash Priority: ☐ **NA** ☐**High** ☐**Medium** ☐**Low**
4. What percentage or length of the area is impacted with trash (e.g. 5%, five feet, etc.)? <5%
5. This assessment is ☐ **Initial** ☒**Follow-up** (Check one)
6. If applicable, how many follow-up assessments have been conducted at this site?6

III. Trash Information

1. Describe trash type (Check five most prevalent types):

☐Rubber products	☐Metal products	☐Construction debris
☐Plastic bags	☒Cigarette butts	☐Fabric and cloth
☒Styrofoam products	☒Plastic/Synthetic items	☐Toxic substances
☐Aluminum cans	☐Tires	☐Appliances
☒Bottles (plastic and glass)	☐Woody debris	☐Furniture
☐Convenience/Fast Food wrappers	☐Yard waste	☐Biohazards
☐Man-made wood products	☐Batteries	☒Other paper

2. Potential trash source (Check all that apply):
   ☒Trash accumulation (water-borne) ☐Homeless encampments ☐Outfall _____
   ☒Trash accumulation (wind-borne) ☐Illegal dumping ☐Other _____
   ☒Litter-Vehicular ☐Litter-Dumpster/Receptacle (describe) _____
   ☐Litter-Commercial business (name)_____
   ☐Litter-School/Institution (name)_____
   ☒Litter-Other (describe) from upstream SDIs and land uses – pedestrian trails
3. Was trash observed near (Check one): ☐**Storm drain inlets** ☐**Storm drain outfalls** ☐**Creek** ☒**N/A**
4. Identify adjacent land uses to the trash areas assessed (if possible):Industrial, Public access trails

IV. Trash Management Actions

1a. Are trash management actions planned for the site? **Yes** ☒ **No** ☐
1b. If trash was removed, provide total weight or volume (if known): <1 lb
1c. Photographic documentation: ☒**Yes No**☐
2a. Other Trash Management Actions Taken (describe): Cleaned up as part of Coastal Clean Up day event in September 2008 and on "adopt a creek" list with SCVWD
3a. Follow-up action needed: **Yes** ☒ **No**☐
3b. Future trash management actions needed (Please describe): Keep on list for local creek clean up activities for a least an annual cleaning of accessible areas
3c. Is trash routinely removed from this site? **Yes**☒ **No** ☐ If yes, at what frequency annual- at least
3d. Is a future assessment needed? **Yes**☒ **No** ☐
3e. If Yes, which tool? ☒**Creek**-RWQCB Version 7.0 ☐**Non-Creek**-Windshield Survey ☐Other_____ ☐**Non-Creek**-KAB Litter Index

Notes: Vegetation growth on side banks makes debris pick up difficult. Most waste found appears to come from upstream sources. Keep on list for clean up for local annual creek and beach clean up events.

WEST VALLEY CLEAN WATER PROGRAM

September 15, 2009

Mr. Bruce Wolfe
Regional Water Quality Control Board
San Francisco Bay Region
1515 Clay St., Suite 1400
Oakland, CA 94612

Subject: FY2008-2009 Annual Report for
West Valley Communities Urban Runoff Management Program

Dear Mr. Wolfe:

This report is submitted by the West Valley Cities of Campbell, Monte Sereno, Saratoga, and the Town of Los Gatos, in conjunction with the Santa Clara Valley Urban Runoff Pollution Prevention Program's Annual Report, pursuant to provision C.6.a. of the Program's reissued municipal storm water NPDES Permit (Order No. 01-024). The report summarizes activities performed during FY2008-2009 in accordance with the West Valley Communities' Urban Runoff Management Plan (URMP) submitted to the Regional Board on September 1, 2004 and the performance standards contained therein.

Contents of Report

The goals of this Annual Report are to: 1) concisely document implementation of URMP and FY08-09 Workplan; 2) evaluate program results for continuous improvement; 3) comply with permit requirements; and 4) share this information with other Co-permittees, municipal decision-makers, and the public. This report includes the following sections:

I. Preface
   - Table of Contents
   - Transmittal Letter with Program Highlights
   - Certification Statement
   - List of Acronyms

II. Program Elements
   1. IC/ID Elimination Activities
   2. Industrial / Commercial Discharger Control Program
   3. Public Agency Activities
      - Storm Drain O & M
      - Street Sweeping
      - Corporation Yard
      - Rural Public Works
   4. New Development: Planning Procedures
   5. Construction Inspection
   6. Public Information & Participation
   7. Pesticide Management Activities
   8. Mercury Pollution Prevention Activities
   9. Copper Action Plan / Nickel Action Plan
   10. Trash Inventory and Management
   11. Water Quality Monitoring and Watershed Management

   Training Summaries are provided at the end of each element

18041 Saratoga-Los Gatos Road • Monte Sereno, California 95030 • Tel: 408-354-4734 • Fax: 408-354-6284

PROGRAM HIGHLIGHTS AND ACCOMPLISHMENTS

During FY08-09, the West Valley Communities of Campbell, Los Gatos, Monte Sereno, and Saratoga continued efforts to implement their URMP to the maximum extent practicable. The West Valley Communities also continue to benefit from its collaborative efforts through West Valley Clean Water Program (WV CWP).

- WV CWP continues to receive annual requests for in-class stormwater pollution prevention presentations with its 3-D interactive 'Enviroscape' model. In addition to school presentations, this year WV CWP was invited to the Audubon Society's Annual Event, and was a big hit among both children and adults, where more than 70 people stopped to listen, play and learn ways they can help prevent stormwater pollution.
- WV CWP's Seed Packet Distribution – specifically five varieties of CA native plants which attract *beneficial bugs* listed in '10 Most Wanted: Beneficial Bug Brochure,' turned out to be a big hit. Because these particular seeds are available for purchase only in, WV CWP purchased the loose seeds, designed labels, and engaged Sierra Club volunteers to assemble seed packets. Packets were attached to the Beneficial Bug Brochures, as well as other IPM handout materials, and distributed to students at the Enviroscape presentation, through gardening classes, at a local garden center, and given to participants in creek clean up, Arbor Day and Earth Day events. Availability of seeds was also published in four City Newsletters, generating many phone and email requests from residents. Over 600 packets were distributed in less than 3 months!
- WV Communities and WV CWP hosted six clean up events, which were well attended. Three events were conducted in conjunction with well advertised national and international namesakes – International Coastal Clean-up Day, National Rivers Clean-up and Great American Litter Pick Up (GAPU), and benefitted from collaborative event advertising. WV CWP also helped secure donations from local retailers to provide Coastal Clean-up and Rivers Day Clean-up supplies and volunteer appreciation give-away items for events held in Santa Clara County.
- WV CWP responded to and followed through to resolution over 50 phone, email and inter-agency referrals for discharge incidents. Facilities which have and incident reported or an inter-agency stormwater inspection referral (SCC FD, SCC DEH, and SJ POTW/FOG programs) are placed upon a pro-active inspection list, and re-inspected within the next year.
- WV CWP continued to support SCVURPPP's Green Gardener program, promote classes and was instrumental in providing information for local newspaper coverage of recent Green Gardener Graduates working within the WV Communities.

The West Valley Communities remain committed to a watershed approach for preventing urban runoff pollution. Through the WV CWP, the WV Communities actively participate in SCVURPPP's many task groups, including Watershed Education and Outreach (WEO), C3PO and Trash Task Groups. WV CWP also participated in the SCB WMI's Trash Summit, held last October. Finally, the proposed MRP continues as a topic of discussion and staff participates in SCVURPPP update meetings regarding MRP.

Thank you in advance for your review of this Annual Report. Should there be any questions regarding the materials submitted, please contact me at (408) 354-4734.

Respectfully,

Kelly Carroll

FY 2008-2009 ANNUAL REPORT

IC/ID Program Evaluation

IC/ID Training

The multiple trainings that the WVCWP staff and the municipal staff attended have been quite effective in building relationships with the Fire Dept., DEH, and the Municipalities. Inspectors from the Fire Dept., DEH, and the Municipalities, continue to look for possible stormwater violations while they are on their field inspections. If the Inspectors from the Fire Dept., DEH, and the Municipalities observe any potential stormwater violations they immediately contact the WVCWP Inspector. All interagency referrals are documented in the IC/ID reporting section.

Trend Analysis for City of Campbell In **FY06-07** the West Valley IC/ID inspector responded to fifty-seven (57) reports of potential violations in Campbell. Twenty-five (25) incidents originated from Campbell's primary target, automotive facilities. The next common incidents occurred at commercial facilities (19). There was only one (1) construction site violation, which is the typical number for Campbell over the last several years.

In FY07-08 the West Valley IC/ID inspector responded to forty (40) reports of potential violations in Campbell and thirty one (31) follow ups. Twenty two (22) of these were in a Commercial area, twenty (20) Food Facility, fifteen (15) Automobile Facility, five (5) Construction Site, four (4) Residential, one (1) Public Facility, and four (4) Other violations. This was a slight decrease in incident related activity from fifty seven (57) in FY06-07. The West Valley inspector provided outreach and educational materials at each of the incident responses, as appropriate.

Two (2) of these incidents were referred to another agency for Enforcement Action. One was a major shared dumpster problem which was referred to S.C. Co. DEH. This problem has been resolved by mid-July 2008, with the cooperation of the restaurant violators, DEH, and the WVCWP inspector. The other incident, involving Los Gatos Creek, also has been resolved, with the assistance of Campbell's City Staff.

Under the heading 'Incident Status', two (2) incidents remain 'open to be resolved in FY08-09.' One of these involving a Safeway Store sanitary spill problem has been resolved at the time of writing this report (July 2008) following extensive plumbing work. The other incident should be resolved as soon as Storm Drain protective mats, which are on order, are delivered.

In FY08-09 the West Valley ICID Inspector responded to fifteen (15) reports of potential violations in Campbell. Six (6) of these incidents were in residential areas, one (1) was in an Industrial area, one (1) was in commercial a area, two (3) were in food facilities, and five (5) incidents were in other/or industrial areas.

Of the fifteen (15) Incidents in Campbell, two (2) complaints were not found, one (1) was related to hazardous dumping, one (1) was related to equipment cleaning, one (1) was related to oil/grease discharge, one (1) was related to grey water discharge, one (1) was related to illicit connections, one (1) was related to paint discharge, one (1) was related to sewage backup, one (1) was related to used oil dumping, and three (3) were from vehicle and equipment leaking.

The majority of the incidents came from other agencies, or were interdepartmental referrals. Out of the fifteen (15) incidents, five (5) were referred for enforcement, one (1) was issued a warning notice, and three (3) were given a verbal notice.

*Note:The West Valley Clean Water Program only gave completely new incidents ICID numbers, therefore, follow-up inspections to original ICID's were not given new ICID numbers. This is the reason for the dramatic decline in ICID's for FY08-09.

ICID Date	Contact Name (Resp Party)	Facility Address	ICID Incident Report Source (Origin)	ICID Incident Source	ICID Incident Type	ICID Enforcement Action	Findings (Comments)	Status	Compliance Date

1/24/2009		240 Adler Ave. Campbell	Other Agency	Residential	Misc. incidents	Referral for Enforcement	1/24/09 Received call from Campbell Police re: raw sewage overflow @ 240 Adler. WVCWP Inspector responded to call. WVSD dammed off SD and pumped out any sewage that entered the sd. Approx. 50-100 gallons. Took pics.	Incident - Resolved	1/24/2009
2/13/2009		Hobee's Restaurant @ Pruneyard in Campbell	Other Agency	Commercial	Misc. incidents	Referral for Enforcement	2/13/09 Received call from WVSD re: Grease/water dumping by CPR Services @ Hobee's Restaurant. SJ FOG Inspector noticed during routine inspection. WVSD cleaned SD. (approx. 15 gal.) SJ FOG Inpsector gave educational materials.	Incident - Resolved	2/13/2009
4/9/2009		1420 W. Latimer, Campbell	Interdepartmental	Residential	Paint discharge	Warning Notice	4/9/2009 Received referral from Campbell Public Works re: person washing latex paint into sd. Public Works crew stopped him. Paint reached storm drain catch basin. WVSD removed approx. 18 gal and put into sanitary sewer system. Did not reach creek.	Referred to Agency for Action	4/9/2009

TO PROPERTY OWNERS AND BUSINESSES:

THIS IS A REMINDER THAT IT IS ILLEGAL TO DUMP HAZARDOUS WASTES SUCH AS PAINT, MOTOR OIL, DETERGENTS AND OTHER SIMILAR PRODUCTS INTO THE STORM DRAIN SYSTEM.

PER THE FEDERAL CLEAN WATER ACT, SUCH DUMPING IS PUNISHABLE BY FINES ACCORDING TO THE SEVERITY OF THE OFFENSE WITH A MINIMUM FINE OF $1,000 PER DAY.

For any questions, please call Al Oxonian at (408) 866-2162

Saratoga, CA 95070

Re: Oil Spill in Street

Dear Mr. Costa:

This is to inform you that you are in violation of the Federal Clean Water Act as a result of oil leaking in front of your property at 851 Monica Lane in the City of Campbell from parked cars in the street. Motor oil is considered a pollutant and hazardous material and is prohibited from entering the storm water system.

On November 4, 2008, the City left flyers in your property to inform the occupant that the oil spill from the cars must be cleaned with an oil absorbent mixture with the resulting mixture disposed of properly. The cars cannot be allowed to park and continue to leak oil into the street. This is a violation of the Clean Water Act that is subject to fines of as much as $1,000 per day of observed violation as provided in the City of Campbell Ordinance on the Clean Water Act. We will be monitoring this property for compliance, any future violation and possible enforcement.

We trust that this violation will not occur in the future as we are all looking to clean up storm water pollution and prevent more pollutants from entering San Francisco Bay. If you have any questions or need more information, please call me at (408) 866-2162.

Sincerely,

Al Oxonian

Re: Oil Spill in Street

Dear Resident:

This is to inform you that you are in violation of the Federal Clean Water Act as a result of oil leaking in front of your property at 851 Monica Lane in the City of Campbell from parked cars in the street. Motor oil is considered a pollutant and hazardous material and is prohibited from entering the storm water system.

On November 4, 2008, the City left flyers in your property to inform the occupant that the oil spill from the cars must be cleaned with an oil absorbent mixture with the resulting mixture disposed of properly. The cars cannot be allowed to park and continue to leak oil into the street. This is a violation of the Clean Water Act that is subject to fines of as much as $1,000 per day of observed violation as provided in the City of Campbell Ordinance on the Clean Water Act. We will be monitoring this property for compliance, any future violation and possible enforcement. **This will be your last warning prior to the city enforcing the fine for the oil spill. If the violation is still in effect by December 16, 2008, the City will have no other option than to enforce the fine for violating the Federal Clean Water Act.**

We trust that this violation will not occur in the future as we are all looking to clean up storm water pollution and prevent more pollutants from entering San Francisco Bay. If you have any questions or need more information, please call me at (408) 866-2162.

Sincerely,

Al Oxonian

Industrial/Commercial Program Evaluation

Fire Dept Inspections of Industrial / Commercial Facilities:

Of the 275 facilities inspected by the Fire Dept., four (4) potential or actual violations were found and all of those were reported to the WVCWP for follow up. The lis of violations is provided to WVCWP at the end of each fiscal year. In FY 2008-2009 the WVCWP Inspector/Program Assistant met with SCC Fire to discuss the current inspection program agreement between SCC Fire and the WV Cities. Changes to the SCC Fire inspection program were also discussed in order to meet th possible requirements under the future MRP.

When Saratoga was added to the Fire Dept Inspection Agreement for Campbell and Los Gatos (7/1/02), all West Valley facility inspections were coordinated under one umbrella. Monte Sereno does not conduct IND inspections because it has NO industrial or commercial facilities. Since 2001, WVCWP staff has met with Fire Dept staff at least twice a year to discuss standardized reporting, documentation and follow-up.

The West Valley Inspector's pro-active vehicle shop inspection program is designed to supplement Fire Dept facility inspections. Shop owners are made to realize the City's responsibility for making sure that the sites are in compliance with water quality requirements. The Inspector has made a positive impact with his visits and the distribution of educational materials depicting the right way to keep equipment, vehicle parts, and service areas covered, and all vehicle wash water managed properly. In a few cases the Inspector's meetings with vehicle shop owners have led to the facility's purchase of a wastewater capture system (noted in previous annual reports).

Annual Food Facility Inspection Training Meeting

Of the 270 facilities inspected by the DEH, four (4) potential or actual violations were found and only one (1) of those were reported to the WVCWP for follow up. The Supervising Environmental Health Specialist at DEH had left and DEH was not always able to make the referrals to WVCWP due to staff shortage. However DEH has hired new staff and this will improve the coordination between DEH and WVCWP in FY 08-09.

Held Annual Urban Runoff Food Facility Inspection Training/Meeting with Santa Clara County DEH supervisors and inspectors, WVCWP staff, and City of Cupertin staff on May 7th, 2009. 8 attendees. Topics included: Review DEH inspection reports from FY07-08 and discuss the inspection reports for FY08-09, Review coordination and responses to incidents, and update contact lists, Discuss new inspection requirements under the future MRP

Date	Facility Name	Facility Address	Enforcement Action	Inspection Notes	Notes
7/22/2008	Pruneyard Dumpster /	Pruneyard, Campbell	No Action	No violations.	Everyting looks ok. Lids on Dumpsters closed. Tallow bins covered/locked. Very Clean.

West Valley Sanitation District

October 28, 2008

Los Gatos Brewing Co.
130 N. Santa Cruz Avenue
Los Gatos, CA 95030

Dear Business Owner:

West Valley Sanitation District is implementing a regional program to control the discharge of fats, oils and grease (FOG) to the sanitary sewer system. The purpose of the Regional FOG Program is to ensure that the District and our commercial and residential customers are in compliance with state and federal requirements to prevent sewage overflows caused by fat, oil, and grease blockages in our sanitary sewer collection system. If overflowing sewage makes its way into the storm drain system, it could end up contaminating local creeks and the San Francisco Bay. In addition, these blockages could have a direct impact to you should a back-up of sewage occur at your place of business.

As part of the FOG Program, a representative from the Environmental Services Department, Watershed Protection Division of the City of San Jose will be contacting you to arrange a meeting and inspection of your facility within the next month or two. The meeting will focus heavily upon education and use of FOG Best Management Practices. During this visit they will walk through your facility, inspect your grease trap or interceptor, and review associated grease pumping and trap maintenance records.

We appreciate your cooperation in making the Regional FOG Program successful and look forward to working with you to help keep our environment pollution free. For additional information regarding the FOG Program, please visit the District website at www.westvalleysan.org, or call our office at (408) 378-2407.

Sincerely,

Robert R. Reid
General Manager and District Engineer

FY 2008-2009 ANNUAL REPORT

FY 2008-2009 Work Plan Self Evaluation Matrix

Source	Task Source	FY08-09 Work Plan Tasks	FY 08-09 Accomplishments	Responsible Party
Storm Drain Operations and Maintenance				
	2004 URMP	Annual Storm Drain Cleaning Continue contract w/ WVSD (two year cycle for residential & one year cycle for commercial & industrial); Public Works staff will clean high leaf drop and other noted areas more frequently and as needed. Examine storm drain inspection & cleaning reports from previous years to determine areas where annual cleaning would be beneficial. Inlets with any record of debris will be inspected and cleaned once or twice annually.	**CITY OF CAMPBELL:** West Valley Sanitation District (WVSD) performs systematic storm drain cleaning and inspection annually. Each year half the City's storm drains in residential areas are cleaned and inspected. Arterials and commercial/ industrial areas are done annually. For FY 2008-2009, there were 6,175 pounds of debris removed from the storm system. 4,400 lbs of leaves/paper; mud/dirt = 1,225 lbs; rocks/stones= 100 lbs; constr. Debris=450 lbs. City staff performs additional pro-active cleaning of storm drain inlets and grates before storm season in high leaf drop areas. Engineered treatment BMPs on City parking lots are cleaned at least annually.	Sr. Civil Engineer coord with WVSD per contract; Pub Works Supt coord in-field operations
	Trash Reduction Activities On-going	Trash Reduction Public Works Division will implement management actions (extra cleanup of littered catch basin inlets and surrounding areas, public outreach, and/or assessments) to address litter problem areas.	**CITY OF CAMPBELL:** During inspection and cleaning of storm drain structures, WVSD staff notes catch basins that require additional cleaning. The data will be helpful in locating trash problem areas by storm drain location. Campbell's report included 13 structures that received additional cleaning due to excessive amounts (over 100 lbs) of leaves/paper/dirt/mud/construction materials.	PW/ Dir, Sr. Civil Eng to Coord in-field operations w/ PW staff
	Training (Rural PW activities)	Training - Annual WVSD/ Oper. & Maint. Meeting WVSD & WVCWP Storm Drain and Street Maintenance Operation & Maintenance Supervisors meeting. - evaluate status of annual storm drain cleaning and provide training on maintenance issues. Rural	The annual WV Storm Drain Op & Maintenance Supervisor's workshop was held on May 14th, 2009 at Campbell Community Center. See Training Table for staff attendance. Staff from WVSD, WVCWP, and the other WV Communities also participated. Topics included: • A speaker from the regional program presented on the	Mtg lead by WVSD; Attend by Pub Works Supt/Supvrs; Hosted by WVCWP

		public works BMPs and Street Sweeping BMPs may be included in this workshop.	current NPDES Permit requirements and BMP's, and the possible future requirements of the MRP. • A speaker from Toyota Materials Handling also presented on products which would help the municipalities reduce trash in downtown/high traffic areas. *Note The WVSD Storm Drain structure cleaning & debris findings for each city were presented at the June WVCWP meeting and will be used to help identify additional trash problem areas.	
	C/I item -Source Control Measure	Storm Drain Stencils or Signage Continue to replace and/or upgrade storm drain stencils or signage on storm drains or catch basins, as needed. Stencils will be replaced with the type of stencil most appropriate for the location.	CAMPBELL: The City has approximately 1,096 SD inlets. The Public Works Supt is continuing to replace signage in the high-use and downtown areas with thermoplastic stencils due to a successful pilot in 2002 - 2004. Since thermoplastic stencils can not be applied to a vertical surface, painted stencils are the preferred method of storm drain signage in most catchment areas. The application of more durable metal plaques in 1999 and 2000 proved problematic.	
Street Sweeping/ Pavement Management				
	URMP - Street Sweeping	a. Street Sweeping Program Examine MRP to determine whether existing street sweeping schedule meets MRP requirements. Update sweeping contract as needed. FY08-09 schedule – residential swept twice monthly; downtown every week; arterials and commercial/industrial areas once weekly. High leaf drop and other noted areas cleaned more frequently and as needed	**CITY OF CAMPBELL:** WVCWP Staff met with City of Campbell Staff in April 09 to review the proposed street sweeping requirements of the Draft MRP, and Campbell's ability to meet those requirements. The MRP has not been issued to date.	Sr Civil Engineer coordinate with Public Works Sup

Storm Drain Maintenance

CITY OF CAMPBELL:

For FY 08-09, West Valley Sanitation District (WVSD) provided the Annual Storm Drain Maintenance Report for the City of Campbell. Since June 2008, the report has listed the structures that were inspected and cleaned. A total of 2,080 manholes and storm drain inlets were inspected. 13 structures were found to have over 100 lbs of leaves/paper/mud/dirt/construction materials. These have been scheduled for reinspection by the City's maintenance crews.

9/8/08	Glass debris cleanup from Island median
9/8/08	Minimal gas spill cleanup from gas can cleaned up with absorbent.
9/25/08	Small oil spill on Hamilton Ave. Spill cleaned up from roadway with absorbent.
9/29/08	Small gas spill on Orchard City and Railway Ave., cleaned up with some absorbent.
10/08	Daily removal of debris from tops of storm drains, curb and gutters, weekly sweeping of the downtown area..
10/20	Cleaned absorbent from curb and gutter

	6/1-6/30 Swept the downtown area, swept up glass and debris from the roadway. Loaded dumpsters (bi-daily from behind admin bldg.)			

Storm Drain Stencils:

CITY OF CAMPBELL:

Campbell's decision to go back to using painted stencils for most applications, and using thermoplastic storm drain stencils in selected high-use and downtown areas, is working very well. Thermoplastic signage is more durable than painted stencils and holds its color. Staff has also noted that thermoplastic stencils have endured a few years of street sweeping passes. The best feature of the thermoplastic stencils is that they are visible at night. The downside of using thermoplastic stencils is the cost (about $250 per stencil, installed) and they must be applied to a horizontal surface, preventing their visibility from a distance. Santa Clara County staff asked the WVCs for a recommendation on where to purchase metal plaques similar to those previously installed by the West Valley Cities. West Valley reported that municipal staff has discontinued application of the metal plaques because the sharp edges have a potential to get caught in street sweepers and bend, creating possible injury to pedestrians or bicyclists. Replacing the plaques was also a problem. When plaques came loose or were removed, concrete chunks crumbled from the curb with the screws (used for attaching the plaques) making replacement in the same spot impossible.

Yard Waste - Curbside Collection and Recycling:

The West Valley yard waste recycling program reduces the amount of debris that gets into the storm drain, since leaves are collected in oversized bins rather than being stored in the street. In FY 08-09, the totals were given for all diverted waste. Totals for yard waste recycled were not provided.

Training Evaluation:

CITY OF CAMPBELL: The WVCWP Storm Drain Maintenance Workshop was held on 5/14/09 this year at the Campbell Community Center. Municipal staff generally felt that the Workshop helped them to understand the possible requirements of the future MRP. Municipal Staff also discussed the pros and cons of current BMP's and how they could address these issues in the future. It was evident that BMPs are being used by municipal staff but there was some frustration among street and park maintenance workers because they don't have enough authority to convince residents and private contractors to keep pollutants from reaching the storm drain system. The WVCWP Inspector offered his card to all attendees and requested that they report any incidents to him for immediate follow-up. One challenge is to catch the violator in the act of allowing pollutants into the storm drain system. By the time the incident, or the result of the incident, is seen it is often too late to stop it. The maintenance crews are generally called to clean up spills. Attendees requested continued updates on the MRP requirements for storm drain maintenance and street sweeping practices. Several of the attendees stayed after the workshop for additional discussion among the cities

Progress Report on Short- and Medium-Term Goals
March 2009

	Short-Term Goals (FY08/09)	Progress 3/09
Policy Lead: Executive Team	• Implementation of the City Council approved SCCCA (Santa Clara County Cities' Association) Recommendations	• Build It Green and LEED checklists are submitted with building plans, information is on website. SCCCA is working on Phase II (mandatory set of baseline compliance measures); Campbell is participating. Campbell requires LEED silver for new and renovated municipal buildings over 5,000 square feet. The Orchard City Banquet Hall renovation and expansion will be LEED silver certified.
	• Implementation of the Construction & Demolition Ordinance	• Ordinance was adopted 6/3/08
Practice Lead: CDD	• LED Tree Lights	• RDA evaluating capital costs and benefits, will report by the end of fiscal year
	• Take the 'Green Government' Pledge	• Pledge was to support the Green Business program, and it is an informal pledge. Campbell has in essence fulfilled that pledge, and should continue to pledge to comply with environmental regulations, conserve energy and water, and prevent pollution and waste (source: ABAG's Bay Area Green Business Program)
	• Acquire Carbon Footprint through JVSV/ICLEI	• Most of data was submitted to ICLEI for their report; remaining data is still being prepared.
	• Explore/Evaluate City Fleet	• In next year's proposed Workplan

043095

	Short-Term Goals (FY08/09)	Progress 3/09
Education Lead: Assistant to CM	• Additional Website Information for Residential and Business "Greenness"	• "Green" checklists for building permits are on the website. Additional information is being developed for the website and is scheduled to be posted by March 31.

	Medium-Term (FY09/10 and FY10/11)	Projected Implementation
Policy Lead: Executive Team	• Biking Policy Requirements • Tree Preservation Policy • Work on Regional Green Building Standards	• Parking ordinance allows credit for providing bicycle facilities; could consider requiring facilities as part of parking ordinance review, which is in Workplan • Could protect more species or sizes of trees in ordinance. Not in Workplan at this time. • Participating in regional meetings to establish common standards.
Practice Lead: CDD	• Evaluate Streetlights • Tree Promotion Program • Explore City Photovoltaic opportunities	• Not in Workplan at this time, but staff continues to monitor development of LED technology for streetlights. • Increase tree planting requirements and/or tree giveaway. 2009 Arbor Day ceremony at Forest Hill School will include seedling give-away. Public Works Workplan calls for assisting in the development of an Urban Forest Enhancement Strategic Plan. • In next year's proposed Public Works Workplan to assist with evaluation of solar options for City

MEMORANDUM

Community Development Department

To: Mayor and Members of the City Council **Date:** June 3, 2008

From: Julianna Mandler, Interim Planner
Daniel Vanwie, Assistant Planner
Jackie C. Young Lind, Acting Community Development Director

Via: Daniel Rich, City Manager

Subject: **Study Session to consider Green Practices, Policies and Education Initiatives.**

PURPOSE

This study session is intended to explore a broad array of green-related practices and policies, and public green-education initiatives and promotions. These proposals vary with respect to costs and applicability.

BACKGROUND

Over the past year, staff has explored different practices and polices for "greening" the City's operations, and promoting green practices in the private sector, in accordance with Community Development Department Fiscal Year 07/08 Work Plan item: "Explore alternatives for enhancing green practices."

Recent achievements include the recognition of all City facilities as Green by the Bay Area Green Business Program, City participation in a regional "carbon-footprint" analysis organized by Joint Venture and conducted by the International Council for Local Environmental Initiatives (ICLEI), City membership in Sustainable Silicon Valley, Council approval of the green policies recommended for adoption by the Santa Clara County Cities Green Building Collaborative (discussed below) and continued participation in the Green Building Collaborative, Council approval of a Construction and Demolition Debris Ordinance, formation of three inter-departmental Green subcommittees (Policy, Practice and Education), publication of a Green teaser in the Summer 2008 Profile, completion of the Sierra Club survey, and submission of two "climate protection" grants to the Bay Area Quality Management District (which were ultimately not chosen for funding).

EXISTING CAMPBELL POLICIES AND PRACTICES

Campbell has recently implemented several green policies. Additionally, the City, for some time, has incorporated green (energy/resource efficient) projects, as specified below. As noted above, these measures have recently earned the City Green Business designation from the multi-county Green Business Program. Campbell joins several other Santa Clara County cities and public agencies with this recognition.

Policies

The City's existing green policies, adopted by the Council at its meeting of December 4, 2007, include:

- Recognizing and adopting the LEED/GreenPoint rating systems as standards of measure;
- Requiring the completion of a "Green Checklist" as part of all development applications for new residential and commercial construction over 500 square feet (to be implemented July 1, 2008); and
- Requiring LEED-Silver certification for all new or renovated municipal buildings over 5,000 square feet.

In addition, the City has in place an administrative policy encouraging environmentally sensitive purchasing of office supplies and equipment to minimize negative environmental impacts, improve environmental quality, and to protect the public health.

Practices

Campbell has instituted various energy/resource efficient practices/projects over the last 15 years. These include:

- Solar-heating for 500 gallons of public shower water at the Community Center.
- Solar-heated water with a tank-less system at City Hall.
- Tank-less water heater used at the Community Center, Corp Yard, and Ainsley House.
- Compact Fluorescents and T-8 bulbs with electronic ballast used in all City buildings.
- Occupancy sensors on most lighting and some HVAC zones for all City buildings.
- Water saving toilets, showers and urinals in all City buildings.
- Emergency management systems with VFDs on all City HVAC systems.

- Extensive recycle program for all products including organic waste.
- 90% green janitorial products at all City buildings.
- Sodium Hypo Chlorite generator to sanitize the Community Center pool. This system uses salt and electrical current to produce a 1% bleach that sanitizes the 263,000 gallons of pool water. Also we use Co2 to control the pH instead of acids.
- LED lights are used in the Red, Green and Don't Walk pedestrian signal hands traffic lights.
- Use of recycled rubber for paving and playgrounds.
- A City-wide office recycling program, which provides recycling receptacles to all City employees,
- Participation in an Electronic Waste event, providing an opportunity for the public to dispose of electronic waste in an ecologically sensitive manner, and
- Reducing usage of paper water cups and distribution of free mugs/water bottles to City employees.

OTHERS' POLICIES AND PRACTICES

As part of the current "green" work plan item, staff has acquired information on other Santa Clara cities, and the County on current "green" practices and policies (reference Attachment 1). This is a "hot" issue and constantly changing so some items on the attachment may not be 100% up to date. There are a large number of organizations working on green/sustainability issues. Attachment 2 is a list of such organizations. Attachment 3 is a brief overview from the Institute for Local Governments (ILG) regarding the California Climate Action Network and sample best practices.

POTENTIAL CAMPBELL PRACTICES/PROGRAMS

While the City has adopted several green policies and implemented numerous programs and practices design to increase energy and resource efficiency, there are additional green practices and programs that can be adopted and implemented to further green city operations. The following list includes a range of possible green practices and programs that staff believes are the most logical and realistic for the City, these include:

- Use of LED Street Lights
- Use of LED Tree Lights
- Taking the "Green Government" Pledge
- Adopt a City "Eco Pass" Program

- Create a Tree Promotion Program
- Evaluate alternative fuel options for the City fleet
- Explore City Photovoltaic opportunities

Use of LED Street Lights

Campbell currently uses several different types of High-Intensity Discharge (HID) lights in the City's street lights. The most used of HID lamps are Low-Pressure Sodium lamps followed by High-Pressure Sodium, Metal Halide and Mercury Vapor lamps. The City also uses very few Fluorescent lamps as well. While HID lighting is significantly more efficient and has a longer useful life than halogen incandescent lights, these lights are not necessarily the best for the environment and would have to be replaced weeks sooner than an LED light. The average life of an HID lamp is between 9,000-20,000 hours while the average estimated useful life of an LED is between 35,000 and 50,000 hours. LEDs are also a more direct light source, meaning that most of the light is directed from the lamp post and down (180 degrees rather than 240 degrees and higher), and reduces the amount of light pollution caused by other types of lamp lights.

The City is closely monitoring the development of LED technology for use in street lights, as well as the Public Utilities Commission's consideration of reduced rates for LED street lights.

Use of LED Tree Lights

In the City's downtown, Tree Lights are used year-round used as an inviting quality for Campbell's nightlife, and during the holiday season, it promotes a sense of festivity. With the same intention as LED streetlamp lights and traffic signals, use of LED Tree lights in the downtown areas and the JFK University tree (during the holidays) will reduce energy costs on the City, increase energy efficiency, and increase the average useful life of these lights.

Take the 'Green Government' Pledge

Early in its development the GBP developed "Green Government Pledge," which pledges government the goals of the GBP program. Specifically, the pledge requires the pledging city to: work cooperatively with other inspection, pollution, prevention, and resource conservation agencies involved in the GBP program; work in a cooperative, educative manner with businesses; and strive to lead by example in maintaining compliance and supporting resource conservation and pollution prevention efforts within government. This pledge is different from green business certification in that it does not require any specific "greening" actions to be taken.

Campbell's taking of this pledge could be coupled the formal adoption of a green vision slogan/statement. Although symbolic, creating a slogan could help orient green policy for the public, and establish its purpose in terms in a succinct manner. In the Summer 2008 Campbell Profile (included with the 2008 Summer Activity Guide), the slogan "The Orchard City is Green...and Getting Greener!" was used. A good slogan example from another city is Santa Clara's "Making a Green City Greener." To further encourage public participation in the ongoing green dialog, the City could solicit suggestions for a green slogan from the City's residents.

The Eco Pass Program

The Valley Transportation Authority administrates what it terms the "Eco Pass" program. This program allows employers to purchase transit passes (Eco Passes) for all its employees at a substantially reduced priced. The program requires participating employers to purchase Eco Passes for all of its employees, regardless of how many employees currently, or plan to use public transportation.

How it Works

The Eco Pass program is based on the idea that transit use would increase if its cost were diffused throughout an organization. Therefore, by having an entire organization pay for transit, transit becomes a viable and attractive option to those who would not otherwise use it. Transit use is incentivized because its per-use cost is removed, by externalizing its total costs. Eco Passes do not just apply to commute trips; they can be used any time, for any reason (e.g. going to Downtown San Jose without having to worry about finding parking).

Upon an agreement with VTA, an employer is provided with VTA issued ID cards and Eco Passes to distribute to employees. VTA offers assistance to employers in publicizing the program to employees by highlighting key transit routes and times. The program also includes "emergency rides home." When an employee or family member is ill, unscheduled overtime is requested by the employee's supervisor, or another emergency event occurs, Eco Pass users are entitled to a free taxi or accessible-van ride home.

City Hall Eco Pass Program

With the City's proximity to light-rail and increasing gas prices, the Eco Pass program presents an opportunity for Campbell to set a clear and positive example for the community by demonstrating its commitment to alternative forms of transportation. A City Hall Eco Pass program would provide City staff the option of taking VTA light-rail (or any local bus route) to work without paying daily fares. While ridership may be low initially, a purpose of the Eco Pass program is to introduce transit to those who have not used it before. In time, employees may see the benefit of taking transit to work.

Additionally, an Eco Pass program can also be seen as a fringe benefit for recruitment purposes. Some prospective employees may see the proximity and availability of transit as positive element in choosing narrowing employment possibilities.

The annual cost of VTA's Eco Pass program is determined by two factors, the proximity to transit and the number of employees. Based on VTA's Eco Pass current rates and the City's current permanent employee count of 138 (not including 28 sworn Police Officers who are provided free-transit per VTA policy), the cost of an Eco Pass program would be $8,280 annually. If the policy included temporary employees (176), for a total employee count of 314, the cost would increase to $18,840. Both of these numbers equate to $60 annually, per employee. In comparison, a VTA Adult Express (unlimited use) Pass, which is equivalent to Eco Pass, costs $1,348 a year per person. Utilizing light-rail, an Eco Pass will pay for its annual per-person cost in approximately 17 round trips.

The City of San Jose has participated in the Eco Pass program since 1996, as part of the pilot-phase of the program. San Jose provides Eco Passes to all of its full and part-time permanent employees (except Sworn Police Officers). Santa Clara County is also a participant in the program. Milpitas and Sunnyvale had participated in Eco Pass program, but due to low usage (and lack of proximity to rapid transit), both cities ceased their participation. This means that if Campbell participates in the Eco-pass program, it would be the only small city (i.e. not San Jose or the County) to do so.

Tree Promotion Program

The concept of the "urban forest" has long been accepted as an important method to curbing urban CO2 emissions, providing natural cooling, and reducing solar reflection. While the City's tree protection ordinance preserves valuable and significant trees, it is reactive in nature in that it only prohibits the destruction of some trees, it does not necessarily expand the City's "urban forest". Increasing the number of trees in Campbell can be done in two ways; expanding the tree planting requirements to require increased planting of trees in development proposals, and actively promoting the planting of trees by literally giving them away.

Increased Tree Planting Requirements

City regulations pertaining to public street tree planting are prescribed for in the City's street-tree requirements. For private property, the Zoning Code, within the landscaping requirements section, encourages the use of existing mature trees in new development. Although, the landscaping requirements do not provide any specific tree planting requirement, with the exception of parking lots. Often, tree planting for new development is done in accordance with the City's tree protection ordinance, which requires the planting of replacement trees for trees that have been removed. The City

does however, provide for a specific tree planting requirement in the San Tomas Area, through the San Tomas Area Neighborhood Plan (STANP). STANP requires that all new (residential) development—including major additions/renovations—provide a minimum of one tree per 2,000 square feet of net lot area (with existing trees counting toward this requirement).

In an effort to expand the City's "urban forest," a requirement similar to the STANP minimum tree requirement could be incorporated into the Zoning Code. This policy could make all single-family residential properties subject to the minimum tree requirement pursuant to a development proposal. A 1-tree/2,000 sq. ft. requirement would require three trees for a 6,000 sq. ft. property, four trees for an 8,000 sq. ft. property, and five trees for a 10,000 sq. ft. property. A more stringent requirement, for example, 1-tree/1,500 sq. ft., would increase the requirement to 4 trees for a 6,000 sq. ft. property, five trees (rounded down) for an 8,000 sq. ft property, and seven trees (rounded up) for a 10,000 sq. ft. property. Pursuant to existing policy and practice, trees planted according to a requirement such as this would be subject to the City's tree protection requirements.

Tree Giveaway

Various cities have instituted tree giveaway programs. These programs usually see a municipality partner with a non-profit agency to literally give away trees. This voluntary program would allow Campbell residents to receive a free tree, subject to no or very minimal requirements. Information about planting the trees would be provided when they are given away, and could also be included on the City's website.

A tree giveaway program could be a one-time event, an annual event, or run continuously. This type of program is often formed around a goal to give away a specific number if trees, sometimes with a certain number of years. The goal can help publicize the tree giveaway campaign. For instance, Campbell could aim at giving away 2,000 trees in four years (500 trees each year). Trees can be given away at public events (e.g. a tree giveaway booth at the Farmer's Market or Boogie on the Bayou), at schools, churches, etc. This program could be potentially funded in part by charging a fee on tree removal permits, which currently have no fee (see "Tree Preservation Policy" in the following section).

City Fleet Options

While it is fiscally unrealistic to replace the entire city-fleet with new fuel-efficient vehicles, such as hybrids, alternative-fuel vehicles (i.e., compressed natural gas, electric, and ethanol), or high mileage conventional vehicles, the City could consider an administrative policy encouraging or requiring that new city vehicles be fuel-efficient.

Purchasing new fuel-efficient vehicles has two purposes: it could reduce fuel costs and it exemplifies the City's commitment to reducing its impact on the environment. With respect to cost-savings, staff would need to study the various options on a case by case basis to ascertain if higher up-front costs for new fuel-efficient vehicles could be off-set by reduced fueling costs. Also needing to be taken into consideration is the additional capital cost of refueling facilities necessary for alternative-fuel vehicles.

In May of 2003, the City Council adopted a resolution in support of Clean Fuel Vehicles, stating that the City would give preference in vehicle procurement to acquiring low-emission vehicles that are cost competitive or where outside funding is available.

Photovoltaic Options

Photovoltaic systems are "solar cells" that convert solar energy into electricity. This technology is differentiated from thermal-solar systems—currently in use to heat the Community Center swimming pool and shower water— which simply capture solar heat without generating electricity. Photovoltaic systems could be installed on the roofs of City facilities, primarily the Community Center buildings (up to 80% of the roof surfaces could be used), but perhaps also on City Hall and at the Service Center. These systems could generate electricity which would be transferred into the electrical grid, essentially running the power meter backwards. By funneling electricity into the power grid, PG&E would reduce the City's electrical costs.

Photovoltaic systems generally require a substantial up-front capital cost. Given the unpredictable nature of the power market, with respect to the variable cost of electricity, it is impossible to state with certainty how long it would take for a Photovoltaic system to offset its cost with electrical cost savings. Current estimations are seven to ten years. However, if electricity costs increase then the cost-savings would be realized sooner. The exact true life-expectancy for Photovoltaic systems is unknown. Many systems are guaranteed for 40 years, but with proper maintenance, the systems could operate for far longer. A variety of solar options might be possible and could be explored over time, including funding mechanisms and partnerships.

POTENTIAL CAMPBELL POLICIES

Regionally, few green policies have been adopted that encourage or require green practices in the private sector. As with possible City green practices and programs, there are also a wide variety of green policies that can be considered. Below is a list of potential green policies aimed at the private sector that represent both regulatory and incentive based approaches, these include:

- Green Building Ordinance
- Bicycle Parking Requirements
- Residential Eco Pass Requirements
- Green Business Program Promotion
- Green Business Designation
- Green Historic Preservation
- Tree Preservation Policy

Green Building Ordinance

The Council's action to mandate the completion of a "Green Checklist" as part of all development applications (to be implemented July 1, 2008) requires the submission of a checklist indicating what, if any, green building measures are taken. It does not require that the projects incorporate any specific green building measures. A Green Building Ordinance, on the other hand, would require that green building measures (which can include construction methods, materials, design efficiency, energy/water conservation measures, etc.) be incorporated in new development. The State is currently updating the State Building Code for 2010 to incorporate mandatory green building requirements, in addition to existing energy/resource efficiency requirements. If the City adopts more stringent green building requirements than State requirement, City requirements would prevail.

Currently, a number of area cities are considering green building ordinances, with the cities of Palo Alto, Santa Cruz, Livermore, Scotts Valley, and Rohnert Park already having adopted such policies. Additionally, City staff is continuing to participate in the Santa Clara County Cities Association's Green Building Collaborative. This group is currently exploring "Tier 2" county-wide proposed/recommended green building policies.

Due to the multifaceted nature of a green building policy, which includes applicability, differential requirements, incentives, and program funding, staff will present various green building policy options in a separate study session after additional regional dialogue has occurred.

Bicycle Parking Requirements

Land Use Element Strategy 2.1h states that the City should "encourage adequate and secure bicycle facilities at employment centers, activity centers, and residential projects." The Zoning Code states that developments with 20 or more parking spaces are encouraged to provide designated parking facilities for bicycles. Additionally, the

Planning Commission may allow a reduction in the number of required parking spaces if bicycle parking is provided.

Current policy has provided private bicycle parking on a case-by-case basis, as no standard requirement is currently set. Bicycle parking could be required in a similar manner that automobile parking is required (i.e. by use). The Cities of Palo Alto and Cupertino both set specific bicycle parking requirements in their respective parking schedules. In Palo Alto, parking requirements takes the form of a percentage of automobile parking. For instance, "recreational commercial" uses must provide bicycle parking in the amount of 25% of provided automobile parking (i.e. 1 bicycle space is provided for every four automobile spaces). Many uses have no bicycle requirements, while others have nominal requirements (e.g. 10%, with a minimum of 1 space). Cupertino has a flat 5% bicycle parking requirement for many uses, although many uses have no requirement. For high density multi-family residential, Cupertino requires bicycle parking in the amount of 40% of the number of residential units (i.e. 1 bicycle space per four units).

A bicycle parking policy could take a variety of forms, but it would probably be similar to the above noted examples. Staff would research further, and survey existing development in Campbell to determine use of existing parking facilities. An option with a bicycle parking policy would be to require bicycle parking in not just new development, but as part of substantial renovations to existing commercial and multi-family residential developments.

Promoting bicycle usage is good green policy. Many automobile trips are taken to cover very short distances. Encouraging bicycle use by providing secured bicycle parking, along with encouraging transit use, and promoting a more pedestrian-oriented environment, may help Campbell due its part in reducing automobile reliance and emissions of green house gases.

Residential Eco Pass Requirements

The Eco Pass program described in the previous section could also be utilized in the private sector. Participation in the Eco-Pass program could be required, as a condition of approval, for any development requesting a parking exception due to proximity to light-rail. An Eco Pass requirement was imposed by Palo Alto on Pay Pal, when the company was located in that City. However, no city has a policy of requiring participation in the Eco Pass program in order to receive reduced parking requirements.

For residential development, the VTA also administers the Residential Eco Pass program. Like the normal Eco Pass program, pricing is determined by location and number of participants (residents). The Residential Eco Pass program allows residential

communities such as apartment buildings, condominium complexes or private neighborhoods with 25 or more residential units to participate in the program (this program is mostly utilized by affordable-housing developments due to a higher likelihood of transit usage). The organization representing the community (a managing company or an HOA) must arrange for purchase of passes for all residents over the age of five at a cost of $60 annually. The cost the individual passes is paid for by each household through its HOA dues.

Participation in the Residential Eco-Pass program could be required, as a condition of approval, and be codified for perpetuity in a development's CC&R's. Such a requirement could boost light-rail ridership, thus helping to further substantiate exceptions from established parking standards.

If this requirement had been applied to the 123-unit "Boyce" mixed-use project at 1677 Bascom Avenue, it could have had an annual cost of $18,450, assuming an average of 2.5 residents per unit (times $60 per pass). For a family of four, this requirement would represent an annual cost of $240, or $20 a month for unlimited transit use. *Per occupant, the cost of an Eco Pass is $5 a month, which is the same cost of a VTA day-pass.*

If Campbell established an Eco Pass residential requirement, it would be the first and only city in the County to do so.

Green Business Program Promotion

An element of the Green Business Program (GBP) is the promotion of designated businesses. The GBP maintains a list of green businesses to assist clients/customers identify businesses that employ environmentally-aware business practices. Designated businesses are also allowed to the use the GBP logo at their places of business, on websites, and on correspondence. To further promote the GBP in Campbell, the City could, in coordination with the GBP, to develop a "Campbell Green Business Program" or a "Downtown Campbell Green Business Program" to recognize local green businesses. Promotions could include city issued plaques for green businesses, the publication of a Campbell Green Business directory (the City of Palo Alto provides "profiles" of green businesses on its website) or a city-sponsored booth at Downtown events promoting green businesses.

Currently, Campbell has only four designated green businesses including a janitorial services firm, a "safety management and development" consulting firm, a marketing firm, and an organic tea store, suggesting a need for increased outreach. Campbell could help publicize the GBP to local business. One way this could be done, would be for the City's building inspection staff to provide GBP brochures to businesses that

appear to be good candidates for green business designation. Similarly, planning staff could discuss the program to business applicants and provide GBP brochures.

The City could also incentivize participation in the GBP. Campbell could offer reduced permitting fees, an expedited application process, or offer technical support (waste/energy audits). The Downtown Campbell Business Association has expressed interest in involvement with a Green Business Program.

Green Business Designation Requirement

To help increase green business practices, Campbell could require green business designation, as a condition of approval, for certain discretionary development proposals. For instance, all new retail development could be required to inform all prospective tenants that they would be required to obtain green business designation within a specified period of time. This requirement could also imposed on new businesses via the conditional use-permitting process.

Green Historic Preservation

Green building and historic preservation policies have not been entirely compatible. While green building encourages the use of modern energy-saving materials and processes, historic preservation tends to encourage period-era or similar materials in renovation or adaptive reuse projects. This conflict is highlighted in the manner that LEED treats historic structures. While LEED does provide two points (out of 69) for reusing a percentage of an existing building's walls, floors, and roof, as well as one point for reusing at least 50% of interior non-structural elements, it does not take into account the age of these materials. Hence, LEED does not distinguish between reusing portions of a building that are five years old and preserving portions that are more than a century old. Yet, LEED grants a large percentage of points on systems (electric, lighting, mechanical) which have a much more limited lifespan than say, exterior building walls.

Historic preservation is green. Buildings built before the invention of, or the expansive use of mechanical cooling and heating systems were designed to stay cool/warm by incorporating passive energy-saving design strategies (building orientation, cross-ventilation, awnings to mitigate solar heat again, extensive use of glazing, etc.). Thus, the encouragement of historic preservation tied with modern energy saving techniques presents an opportunity to encourage the "greening" of Campbell's historic structures.

A "Green Preservation" policy could incorporate separate green building requirements for historic structures in recognition of their inherent "greenness." Hence, historic structures could be subject to a separate green building policy. This type of policy, which would apply to substantial renovations/remodels of historic buildings, could

allow for greater leeway than requirements of a more standard green building policy. Specific elements of this type of policy would have to be worked out, probably through consultation with specialist in the field.

Tree Preservation Policy

Campbell's tree protection efforts have earned it "Tree City USA" recognition for the last 26 years. The City of Campbell's tree preservation ordinance, which regulates trees on private property, protects four species of trees (Ash, Redwood, Oak, and Ceder). While existing policy has been successful in preventing the loss of substantial trees, the regulations do little to upkeep Campbell's "urban forest" by not protecting a substantial number of trees on private property. In furtherance of "greening" the City, to help maintain Campbell's "urban forest," a more restrictive tree protection ordinance could be adopted to protect a wider variety of trees throughout the City.

A more restrictive tree protection ordinance could take a number of forms. With respect to single-family properties a tree ordinance could protect a more species of trees, in addition to the four currently protected. It could also protect trees utilizing a tree diameter test (i.e. any tree over *x* diameter is protected, irrespective of species). With this option, different review requirements could be imposed depending on the size of a tree, so that larger trees would warrant stricter staff scrutiny.

As noted previously, fee could be charged for tree-removal permits (which currently have no fee), with revenue being used to fund the aforementioned tree promotion (giveaway) program.

POTENTIAL CAMPBELL EDUCATION INITIATIVES AND PROMOTIONS

Although Campbell promotes many green outreach initiatives such as recycling events, creek clean-up days, community clean-up days and many other events, Staff would like to propose that Campbell could also include:

- Additional Information on City Website To Show How Residents Can Be More "Green"
- Additional Information on City Website To Show How Businesses Can Be More "Green"
- Showing "Green" Movies At The Heritage Theater

More detailed descriptions of these educational initiatives and programs follow below.

Add Additional Information on City Website to Show How Residents Can Be More "Green"

Currently, the City website has basic information on garbage disposal, water service, recycling services, storm water pollution prevention, sewer service, composting and hazardous waste removal. With access to more detailed information on recycling, energy efficiency, and water conservation, residents may be more inclined to green their own homes on a voluntary basis since the residents have expressed interest in becoming greener in their own spaces.

For example, Palo Alto's city website has a section called "Environment" that addresses sustainability, Green Building, open space, water quality, community events, green business, and even a "Doing Your Part" section which describes the best ways to recycle, reduce consumption, supporting renewable energy, pest control and many other solutions to making their community "greener" on a residential level.

Additionally, the City could produce a stand-alone document that could describe the City's green related actions to date, state the City's green related goals, and provide residents with useful information on how to better green their households. Attachment 4 is such a document produced by the City of Santa Clara.

Add Additional Information on City Website To Show How Businesses Can Be More "Green"

Currently, the City of Campbell's website has little or no information to show how businesses can be more "green." There is no information or links to the Bay Area Green Business Program even though Campbell does have businesses that are Green Certified. With the same intention as providing information for residents on how to "green" their own spaces, business owners should have access to information on "greening" their businesses as well.

Palo Alto's business section on its website has links to Green Building, the Green Business Program and Community Involvement which includes the Clean Bay Business Program and Business Environmental Awards. It also includes ways that businesses can help the City's sustainability efforts by including descriptions of local corporate sustainability programs from Agilent Technologies, Genencor International, Inc. headquarters, Hewlett Packard Company and Roche Palo Alto headquarters.

Show "Green" Movies At The Heritage Theater

Entertainment media has been focusing on the consequences of climate change in the last few years and exposure to these consequences in the form of a film festival held at the local theater, i.e. Campbell's Heritage Theater, can help inform residents about

current global events. Examples of "green" movies would include: "Who Killed the Electric Car?," "An Inconvenient Truth," "Erin Brockovich," "The 11th Hour," "The Day After Tomorrow," or the BBC Series or PBS Series of "Planet Earth."

STAFF RECOMMENDATION

Staff has created a chart of recommendations indicating short-, medium-, and long-term goals for each policy, practice and educational initiative (reference Attachment 5). Staff requests that Council provide input and direction on potential Green practices/programs, policies and education/promotions, indicate its preferences for short-, medium-, and long-term goals. The challenge is to move forward pro-actively while being realistic about staff and financial resource available to take on new initiatives.

NEXT STEPS

If Council authorizes the development of specific policies and practices, staff will return with work plans, options, and/or recommendations as appropriate.

FISCAL IMPACTS

The fiscal impacts are dependent on the types of practices, policies and educational initiatives that Council authorizes Staff in the next proposal.

Proposed "Green" Street Project City of Campbell

- Project Location – Hacienda Avenue from Winchester Boulevard to San Tomas Aquino Road
- Project Description: Reconstruction of 4,600 lf of Hacienda Avenue which presently has a 90-foot street right of way. Project will be reducing the existing impervious pavement area, reduce storm runoff and incorporate Low Impact Development Measures by adopting one or more of the following design concepts based on City Council Approval:
  - A linear park concept with landscaping on both sides of Hacienda Avenue.
  - Pervious pavement, Bioretention landscaping and vegetated swales.
  - For alternative transportation, bike lanes will also be incorporated into the design.
- Projected Project Cost: $ 4.3 million

Proposed "Green" Street Project City of Campbell

- Preliminary Project Schedule:
  - **Conceptual Design/Public Meetings** **11/08 to 07/09**
  - **Preliminary/Final Design** **08/09 to 03/10**
  - **Construction** **04/10 to 10/10**

environmental interests created a partnership known as the Water Resources Protection Collaborative. The approach makes a clear distinction regarding governance. Municipal organizations will continue to exercise their land use authority. The Collaborative developed model Guidelines and Standards which will serve as a basis for the District and municipal organizations to implement as appropriate. Each municipal organization will develop and apply these standards as needed for their jurisdiction. The City of Campbell adopted these guidelines in early 2008. **Evaluation of BMP O&M Inspection & Verification Program** In FY08-09, the City of Campbell had no projects requiring BMP O&M Inspections. **Reporting Group 1 and Group 2 Projects** In FY08-09 the City of Campbell had no Group 1 or Group 2 Projects to report.

Top Ten Development Tips to Protect Creeks

SANTA CLARA BASIN WMI WATERSHED

The scenic creeks that meander through the Santa Clara Valley can be harmed by development – unless we take precautions. If loose soil is allowed to wash into creeks, it can lead to sedimentation that harms migratory fish. Development in or near "riparian corridors" can result in excessive erosion, increased pollution, and impacts to wildlife habitat. Municipalities may require permanent stormwater treatment measures to reduce impacts. Follow these "top ten" tips to help protect local creeks for our enjoyment, native fish and wildlife, and future generations.

A "riparian corridor" is the strip of land, centered on a stream, characterized by vegetation that grows adjacent to freshwater watercourses.

In the Site Layout…

Don't: ✓ Do:

1. Maintain setbacks. Reduce impervious surfaces and keep buildings, patios, decks and other structures at least 100 feet away from the riparian corridor edge (*clustering buildings away from streams and using pervious paving reduces impact on habitat and protects property).*

2. Preserve healthy native and non-invasive trees and protect the riparian habitat through creative site plan design (*the urban forest provides shade, improved air quality, site aesthetics, and reduces noise. Visit www.canopy.org/db/ for tree selection tips in the Bay Area.*)

3. Avoid intrusive activities. Balance the need to protect riparian habitat from intrusive activities with creek-friendly recreation. *(Any human activity may generate noise and trash, but recreation opportunities help people become "stakeholders" and promotes stewardship.)*

In the Project Design…

4. Avoid night lighting, bright colors, reflective surfaces and noise near the riparian corridor (*riparian and wildlife habitat protection.*)

Don't: ✓ Do:

5. Control pollutant sources on the site (*cover debris and material storage, specify roofed trash enclosures, dispose of waste properly, and implement an effective trash removal program).*

In Landscaping…

6. Use suitable California native and drought tolerant plants, and avoid the use of invasive species. *(Visit www.cal-ipc.org for a list of invasives, www.cdfa.ca.gov/phpps/ipc/encycloweedia/encycloweedia_hp.htm for plants defined as noxious weeds in California, and www.cnps.org/cnps/nativeplants for information on native plants.)*

7. Use Integrated Pest Management techniques in design and maintenance (*learn how to promote healthy soils, conserve water, and help avoid the use of pesticides and quick-release fertilizers at www.ourwaterourworld.org and www.mywatershedwatch.org).*

8. Preserve, maintain, and restore the riparian setback area with native vegetation and non-invasive adapted plants to buffer the creek from development (*protects habitat and reduces erosion, sedimentation, and excessive runoff during storms*).

Throughout the Project…

9. Determine and address all project impacts on the creek and obtain appropriate regulatory permits (*site design, impervious surfaces, activity areas, site grading, filling in floodplain areas, pollution, landscaping, and stream crossings all affect habitat*).

10. Remember that every section of a stream contributes to the habitat value of the entire stream (*even channelized sections may connect better habitat areas*).

For More Information:

Contact the municipality and see the Santa Clara Valley Water District's Guidelines and Standards at www.valleywater.org/Water/Watersheds_-_streams_and_floods/Taking_care_of_streams/Creekside_property_owners.shtm#facts

CAMPBELL
Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2008-2009 ANNUAL REPORT

	URMP	Construction Inspections Continue construction site inspections and follow-up for stormwater issues (i.e., mud tracking, mat'l storage, housekeeping, etc.). Document sites inspected and note any violations through final resolution. Report violations to WVCWP for Annual Report.	Campbell staff inspected all construction sites for stormwater issues. Problems related to stormwater requirements were addressed and verbal notices to comply were issued. Compliance was monitored by Staff. Large commercial projects were monitored monthly and were required to be certified by project Civil Engineers for compliance. In FY08-09 *The City of Campbell issued permits for __0__ new commercial/ industrial buildings, __14__ residenntial units, __4__ grading permits, __2__demolition permits, and _326_ residential remodel/additions.* Any need to remind contractors about construction BMPs was handled successfully by the City's Building Inspectors. Additionally, two construction site-related, potential stormwater incidents were referred to the WVCWP Inspector by other agencies for follow-up. One potential paint-discharge violation was called in by a citizen. The attached spreadsheet provides incident details and resolution. December 19th, 2008: City of Campbell Senior Civil Engineer released a Memorandum Re: San Francisco Regional Water Quality Control Board Inspections-List Of Violations (See Attachment X)	Eng Inspectors & Bldg Official shall maintain data & report to WVCWP

CONSTRUCTION INSPECTIONS
CAMPBELL
Santa Clara Valley Urban Runoff Pollution Prevention Program

Construction Inspection Evaluation

FY08-09	FY07-08*	
	Paint Discharge	2
Mudtracking - 2	Oil Discharge	3
Erosion/sedimentation 0 BMP's not functioning - 0	Landscape/Dirt in gutter	1
Trash/housekeeping	Grey Water Discharge	1
Vehicle/equipment leaking 2		
	Total Number of Incidents	7
Total = 4	*issues observed and resolved by Municipal Inspectors.	

The number of incidents is the same as for the previous year. In FY08-09 all stormwater violations at construction sites reported in the totals, came directly from the City of Campbell's construction site inspections. Violations/incidents at construction sites observed by the WVCWP Inspector can be found under the ICID section of this report. During FY07-08 the WVCWP Inspector and Program Manager met with Campbell Engineering Inspectors in May to discuss requirements for construction inspections and the importance of documenting violations even if the incident is immediately resolved. Campbell inspectors say that if there are construction site problems, they are resolved very quickly because contractors and project managers are quick to comply.

The Construction Inspection Program currently works well – During FY08-09 the WVCWP made it a priority to provide additional training on construction inspection requirements and to encourage self evaluations of municipal inspection programs. Several WV meetings and municipal training sessions were held to discuss BMPs, URMP requirements and documentation of inspection activities.

Subject: Installation of Appropriate BMP's for Projects Under Construction
Date: Friday, October 31, 2008 11:47 AM
From: Alberto Oxonian <albertoo@cityofcampbell.com>
To: Bill Bruckart <billb@cityofcampbell.com>, Alan Hom <alanh@cityofcampbell.com>, Syed Wahidi <syedw@cityofcampbell.com>
Cc: Bob Kass <bobk@cityofcampbell.com>, Michelle Quinney <michelleq@cityofcampbell.com>, Edward Arango <edwarda@cityofcampbell.com>, <kelly.westvalley@comcast.net>

I did a field check of regulated projects (Projects that create or replace 10,000 sf or more of impervious surface) and other projects under construction and found that some of them need to install proper storm BMP's (Best Management Practice) for the rainy season.

The Regional Board staff is going to inspect selected projects in the Bay area this winter and our projects might be selected for inspection.

This is a reminder that regulated projects and other projects under construction need to do the following as a minimum:

1. Put some aggregate base (typically 3/4" baserock) in driveways used by construction traffic to eliminate/minimize dirt being tracked into the streets.
2. Put some rolled fiber material around the construction site to prevent soil carried by rainwater from being transported to the storm drain system.
3. Place a cover on top of construction materials on site (e.g. dirt mounds, cement, paints, etc.) to prevent storm water pollution.
4. Clean up any oil , diesel or petroleum products dripping from construction equipment with absorbent material. Fueling areas need to be protected from rain.

For Group 1 projects, SWPPP (Stormwater Pollution Prevention Plan) need to be displayed on site and a copy should be on file at City Hall. Also a copy of their SMP (Stormwater Management Plan) should also be on file at City Hall.

Please ensure that these requirements for compliance with the Clean Water Act are done.
Thank you for your cooperation.

Subject: FW: Fwd: Inspection Memo

Attached is an e-mail from Sue Ma of the SF Regional Water Quality Control Board (Regional Board)regarding their inspection of the 20 Group 1 construction sites (1 acre or more of impervious surface) in the Cities of Sunnyvale, Santa Clara, San Jose and Milpitas on 11/5/2008. All of the sites they visited seemed to have the proper erosion and sediment controls per Sue Ma.

Sue Ma indicated that they will continue to inspect Group 1 sites in SC County this winter so they may visit the City of Campbell Group 1 sites (Hotel site at Creekside Drive and the Subdivision Developments at Salmar Avenue and First Street).

Please ensure that these developments have the proper BMP's in place for erosion and sediment controls. I noticed that the subdivision sites at

Salmar and First Street need to provide erosion control on the driveways being used for construction activities. These three developments also need to post their Storm Water Pollution Prevention Plan (SWPPP) on site if they have not done so already.

Attached for your use is a memo regarding inspection tips that you may want to give contractors/developers for these Group 1 projects to prepare them for a possible inspection by the Regional Board.

Thanks for you help and cooperation and call me if you have any questions or concerns.

Subject: Re: Fwd: Inspection Memo

Jill's email reminded me that there was one thing I wanted to relay at the Management Committee Meeting yesterday regarding construction inspections.

On 11/5/08, I visited sites in four cities, San Jose, Milpitas, Santa Clara, and Sunnyvale, a total of 20 sites. We literally had time to

only stop and take pictures so we didn't talk to anyone and didn't issue any inspection reports. The purpose of the surveillance visits that day was to get a "snapshot" of various sites in various cities. I used both our statewide lists and the cities' lists to map out the sites and our route. We are very pleased that all the sites we visited that day seemed to have the proper erosion and sediment controls in place (kudos to the 4 cities involved!), except for a post office expansion site not directly permitted by San Jose. I referred that site to San Jose for investigation and continued follow-up and enforcement under San Jose's illicit discharge program.

We also plan to conduct regular inspections (where we will meet with the site supervisors, look at SWPPPs, and walk the sites) in Santa Clara County during this rainy season. So it's great that Eric has sent out the reminder memo to construction sites in Mountain View about what our concerns are. I hope other cities do the same.

Happy Holidays Everyone!

CITY OF CAMPBELL
MEMORANDUM

DATE: December 19, 2008

TO: Construction Site Operators

FROM: Al Oxonian, Senior Civil Engineer

SUBJECT: San Francisco Regional Water Quality Control Board (BOARD) Inspections – List of Violations

---

Staff from the BOARD has stated that their inspectors will be actively inspecting construction sites in Santa Clara County for compliance with General Construction NPDES Permit requirements. Listed below are the main violations that BOARD inspectors will enforce.

1. Failure to prepare and implement an adequate Storm Water Pollution Prevention Plan (SWPPP). *SWPPP must be available at the construction site and must be also posted.*

2. Failure to maintain a dynamic, living, defensible SWPPP as site conditions change. *The SWPPP should reflect changing site conditions. Keep a map showing BMP locations and mark up the map as BMPs change.*

3. Grading during wet weather with ineffective or inadequate BMPs. *Avoid wet weather grading if possible.*

4. Installing BMPs that don't work. *Significant potential problems include tracking dirt at the entrance, inadequate or missing perimeter controls, ineffective or not permitted dewatering operations, and hazardous materials spills*

5. Failure to inspect, monitor, document and maintain BMPs before and after storm events, and once every 24 hours during extended storm events. *Maintain an inspection log showing all inspection activities. Review the sampling strategy in the SWPPP to make sure sampling is completed, if necessary.*

6. Failure to establish and maintain effective erosion and sediment control BMPs year-round. *BMPs should be installed during non-winter months.*

7. Ignoring citizen concerns or complaints.

8. Engaging in construction activities without obtaining coverage and without filing NOI as required by the State's General Construction NPDES Permit.

9. The most serious violation is uncontrolled release of sediment or pollution into water of the State without effective BMPs.

A. SCV PROGRAM - PROJECTS/SUPPORT				
	NPDES Permit, Provision C.4, C.9 & Pest Mgt Plan (PMP)	a. Watershed Education and Outreach Campaign Help to develop/implement ongoing watershed education and outreach campaign. WVCWP Mgr assists via WEO Ad hoc Task Group. Participate in campaign development and special projects, e.g. community events. Campaign will include funding for educational programs at the Alviso Ed Center and funding for ZunZun performances in local schools. See SCVURPPP FY 08-09 Watershed Watch Work Plan for details.	WVCWP staff participates in WEO AHTG meetings. In late FY 08-09, WVCWP staff was selected to serve as Chairperson of the WEO AHTG for FY 09-10. WVCWP staff has accepted the position. Activities include development and review of outreach and survey materials. WVCWP Staff participated in FY08-09 WW Survey Task Group: reviewed goals, scope & questions in survey against past surveys; reviewed preliminary results and draft report for submittal to AHTG and MC. **Mission College's Eco Day Event** 4/22/09 - Mission Community College, Santa Clara WVCWP staff supported Program activities by working at the Watershed Watch booth, handing out stormwater outreach material, including Watershed Watch brochures and Discount Cards.	WVCWP Staff
	NPDES Permit, Provision C.4, C.9 & Pest Mgt Plan (PMP)	b. Pesticide User Outreach Project Continue to provide funding and to participate in Our Water Our World IPM Store Partnership. Project scope will include items in Program's Pesticide Management Plan based on provision c.9.d of the Permit for outreach to residents, commercial businesses, and pest control operators.	SCVURPPP Co-permittees received CA DPR/ EPA "IPM Innovator Award". Details are available in SCVURPPP "Program" report. Award was presented to the WVC Council members at Council meetings in February (presented to Saratoga City Council in May). **IPM Store Partnership** Within the West Valley Communities, there are 3 garden centers which have elected to participate in the Store Partnership Program:	WVCWP Staff

			- Summerwinds – Campbell - Home Depot – Campbell - Ace Hardware – Los Gatos There are also 4 participating stores which border Saratoga (including 1 also bordering Campbell); these stores are patronized by WVC residents, and are supported by overall funding that WVC contribute to. These additional stores are: - Summerwinds – Cupertino - Home Depot – San Jose – (De Anza Blvd.) - Yamagami's – Cupertino - Orchard Supply Hardware – San Jose (Prospect Rd. – bordered by Saratoga & Campbell) WVCWP provides funding to support ongoing maintenance and training needs for this program. WVCWP provided IPM Fact Sheets to Home Depot in Campbell in June 09. Material was delivered to Home Depot by Program staff as part of the Pesticide User Outreach Project. Fact Sheets Delivered for Display/Distribution: 100 – Wonderful Roses 200 – Safe Use & Disposal of Pesticides 200 – Naturally Managing Pests 100 – Tips for a Healthy Beautiful Lawn 200 – Keeping Cockroaches Out of Your House 200 – Keeping Fleas Off Pets & Out of Yards 100 – *Spanish* – Fleas 500 – Controlling Ants 100 – Controlling Yellowjackets	

			300 – Controlling Aphids in Your Garden 200 – Growing a Healthy Garden to Naturally Manage Pests	
	NPDES Permit, Provision C.9.c.	c. Mercury Pollution Prevention Outreach Participate in the Program's Mercury Pollution Prevention Outreach Work Group and conduct local implementation of the Program's Mercury Pollution Prevention Plan including public education on: 1) negative health and environmental impacts of mercury, and 2) proper disposal of products containing mercury.	WVCWP staff focus in FY 08-09 was on local implementation, since the Program's Mercury PP Outreach Work Group has not been meeting. Local implementation included outreach for free E-waste Recycling Events, mercury-free thermometer distribution, mercury outreach material distribution, and articles on mercury in municipal newsletters. **FREE E-WASTE RECYCLING EVENTS** Recycling of TVs, monitors and all office electronics. These events were organized by the waste contractor for the four WV Communities. **July 2008** CAMPBELL: July 19, 2008 Campbell United Church of Christ, Campbell, CA LOS GATOS: July 19, 2008 Los Gatos United Methodist Church, Los Gatos, CA SARATOGA: July 26, 2008 City of Saratoga North Campus, Saratoga, CA **April 2009** CAMPBELL: April 18th, 2009 Campbell United Church of Christ, Campbell, CA LOS GATOS: April 25th, 2009 Los Gatos United Methodist Church, Los Gatos, CA SARATOGA: April 25th, 2009 City of Saratoga North Campus, Saratoga, CA See "Mercury" section of this AR for details on results	WVCWP Staff

			of these E-waste events. EVENT OUTREACH: During Winter/early Spring of 2008/2009, WVCWP submitted articles which ran in the WVC municipal newsletters, concerning E-waste. This helped publicize the need to make use of use E-waste events. For the July 2008 events, WVCWP publicized E-waste disposal on the front page of the cleancreeks.org website. WVC advertise E-waste events in their municipal newsletters when possible. Campbell Profile – Winter 09 – Campbelll Historical Society E-Waste event **THERMOMETERS** **Audubon Wildlife Fair** Cupertino (bordering Saratoga) 10/25/08 Mercury-free thermometers, along with mercury outreach materials, were provided to parents attending WVCWP Enviroscape presentations at the Fair. **Thermometer Exchange at LG Farmers Market** Los Gatos – 5/3/09 WVCWP coordinated an exchange which was staffed by Town of LG and City of San Jose Environmental Services Dept. See "Evaluation - *SCV Program Projects/Support* " section (below) for details and see "Mercury" section of this AR for details on results of these Thermometer events.	

			Mercury Outreach - Newsletters In Winter 2009, prior to the nationwide switch to digital television, WVCWP provided an article to all WVC municipal newsletters on proper TV disposal, and environmental impacts of mercury. The article was printed in the municipal newsletters for Campbell, Monte Sereno and Saratoga. (See 'Press Releases' row, below, for details) **Outreach Materials & Thermometers** Mercury outreach materials and solar and mercury-free thermometers were distributed at community events. See "Materials Distribution" below (B. 'General Outreach', a.) Mercury Informational Material was handed out to Corp Yard Staff in July 2008; along with a flyer reminding staff to properly dispose of mercury containing thermostats/ switches. See "Mercury" section of this report for additional details	

Public Information/Participation Program EVALUATION - *SCV Program Projects/Support*

Mercury Outreach – Local Implementation of Mercury Pollution Prevention Plan

WVCWP with Sierra Club at Audubon Wildlife Fair:

Sierra Club members in attendance expressed strong interest in helping to distribute these thermometers; however the Club does not have funding to purchase these themselves for distribution. If mercury-free thermometers could be made available to the local Sierra Club group (Guadalupe Group of the Loma Prieta chapter) they would distribute them at a variety of events: Earth Day booth, travel presentations (usually held at Saratoga Library), and club events, such as Annual Group Awards & Wine-Tasting event. This initiates the question of whether it would be effective to recruit stakeholder groups to help at thermometer exchange events, or to distribute mercury-related (i.e fluorescent bulb recycling) information at stakeholder activities/events.

WVCWP with Town of Los Gatos: Thermometer Exchange at Los Gatos Farmer's Market

Residents attending the Farmer's Market were pleased to learn the Town was collaborating with the City of San Jose for this event.

WVCWP has coordinated with the other participants to hold this event again in FY 09-10. It will be held in conjunction with "Keep Los Gatos Beautiful" month in April 2010; this will allow for better outreach opportunities to publicize the event and encourage increased participation.

Based upon positive response from residents, WVCWP, WVC and San Jose Environmental Services Dept. have coordinated additional events in FY 09-10 at various venues. Efforts will be made to increase publicity for these events; some will be held mid-week and increased publicity may be needed in order to generate a turnout. Effectiveness of holding mid-week events will be evaluated.

B. WVCWP PROJECTS

GENERAL OUTREACH

			<u>SARATOGA</u> Saratoga Rec. Dept offers a gardening class, including instruction on organic and low-maintenance gardening. WVCWP distributed to the classes: 100 - Beneficial Bugs Brochures *with* 100 - Calif native seed packets, (beneficial bug attractants) put together by WVCWP staff Distributed to all Saratoga City Council members during IPM Innovator Award presentation – May 2009 5 – Healthy Gardening IPM Facts sheets *with* 5 - Calif native seed packets, (beneficial bug attractants) put together by WVCWP staff Gardening Classes taught by a Master Gardener (Monte Sereno resident) are held at the Saratoga	

			Library. The Master Gardener distributed 30 Grow-It Guides to her class members.	
General	NPDES Permit, Provision C.4 and C.9	b. Participate in Local Community Events Promote watershed messages by participating in local community events (e.g., farmers market, festivals, creeks clean-ups, etc.).	**LG Presbyterian Summer Camp Enviroscape Presentation** Los Gatos July 23rd An Enviroscape watershed presentation was given for 21 children, ages 2nd – 5th grade. The presentation covered behavior change information for: Trash, Car-washing, Pesticide Use, Pet Waste, Vehicle Fluids 25 stormdrain message 'recycled' pencils were given to children & teachers. **Audubon Wildlife Education Fair – Enviroscape Presentations –** 10/25/08 at Audubon Society McClellan Ranch, Cupertino (bordering Saratoga) Partnered with local stakeholders: SC Valley Sierra Club Chapter and Audubon Society. Audubon sponsors this event, which is held at their facility. Sierra Club shares a table with WVCWP and Sierra Club volunteers assist WVCWP staff. WVCWP gave 10-12 Enviroscape watershed presentations to groups of 4-8 children (ages appx 4-10) throughout the day. Approximately 70-80 children (total) participated in, and watched, the Enviroscape activity. Presentations were also seen by parents, who attended with their children. Presentations covered behavior change information for: Trash, Car-washing, Pesticide Use, Pet Waste, Vehicle Fluids Distributed 30 Mercury Brochures, 30 Solar	WVCWP Staff and available Municipal Staff

			Thermometers (mercury-free), and 30 Flyers for Mercury thermometer drop-off locations to the adults. **Arbor Day Celebration** Saratoga 4/24/09 4/24/09 – Beauchamps Park WVCWP staff was introduced to the attendees (appx. 40 people). Attendees visited WVCWP display where staff discussed runoff issues (including pesticides) and distributed material. Staff also circulated and distributed material. **Town of Los Gatos Public Works Open House** Town Corp Yard – May 2009 WVCWP staff and Town of Los Gatos staff participated in this annual event which helps inform the public, especially students, of the Town's Public Works activities and responsibilities (such as street sweeping). WVCWP presented stormwater-related information, including distributing materials, and answering questions for attendees. Attendees included: St. Mary's School 3rd & 4th grade, 51 students plus 9 parents and teachers. Evergreen Elementary 3rd grade, 20 students plus 5 parents and teachers. **St Thomas of Canterbury Vacation Bible School Enviroscape Presentation** SJ (between Campbell & Saratoga City boundaries) June 18, 2009	

			An Enviroscape watershed presentation was given for 18 children, ages appx. 7-10. The presentation covered behavior change information for: Trash, Car-washing, Pesticide Use, Pet Waste, Vehicle Fluids Each child received a "Pest or Pal" activity/ coloring book.	
			CAMPBELL **Arbor Day** The City of Campbell held it's Arbor Day event on April 21 at Foresthill Elementary School. A tree was planted, and gardening-related material was distributed. The City included IPM and Less Toxic Pest Control in materials that were available for attendees to take home. These included: Pests Bugging You? Grow It Guides The Bay Begins at Your Front Door! IPM Fact Sheets: Tips for a Beautiful Lawn Controlling Ants in Your House Controlling Aphids in Your Garden Keeping Cockroaches Out of Your House **Great American Pick Up** The major community event organized by City of Campbell is its "Great American Pick Up". This year, the City was able to generate attendance by 160 volunteers. The City assembles a re-usable grocery bag full of stormwater/ litter-related materials for distribution to each participating family. 100 of these bags were given out (see "Materials Distributed" row – above).	

			Details of the event are in the Creek Cleanups row of this PI/P section (below) and in the "Trash - Evaluation" section of this AR.	
			LOS GATOS **Town of Los Gatos Public Works Open House** Town Corp Yard – May 2009 Town of Los Gatos staff organized its Annual Public Works Open House for 2009. This event helps inform the public, especially students, of the Town's Public Works activities and responsibilities (such as street sweeping). In addition, the Town invites WVCWP to help insure that information related to stormwater issues is distributed.	
			SARATOGA **Arbor Day Celebration** Saratoga 4/24/09 4/24/09 – Beauchamps Park City of Saratoga staff organized this event, which was held at a neighborhood park. The event was publicized in the municipal newsletter, and included information on trees as a means of preventing runoff and erosion, especially along creekbanks. City staff introduced WVCWP to the attendees (appx. 40 people). Attendees visited the WVCWP display where staff discussed runoff issues (including pesticides) and distributed material. **Creek Cleanups** City staff organized 2 Creek Cleanups (Calabazas Creek and Saratoga Creek). See Creek Cleanups row	

			(below) for details.	
General	NPDES Permit, Provision C.4 and C.9	c. Prepare Newsletter Articles/ Press Releases Prepare and contribute articles/ press releases of interest to the City newsletter and/or local media. Topics such as HHW disposal, pesticides, mercury, trash and copper/nickel will be promoted.	**COMMERCIAL WEEKLY NEWSPAPERS** **News Articles** In FY 08-09 WVCWP worked steadily on developing a good working relationship with the 3 weekly newspapers which cover the 4 WVC. These efforts resulted in 2 effective articles published in FY 2008-2009, and 1 article which was initiated in June 2009 and appeared in July 2009. Articles were printed in the: **Campbell Reporter** (circ. 15,550), the **Los Gatos Weekly** (circ. 41,050) the **Saratoga News** (circ. 13,240). **Creek Cleanup article** In Sept. 2008, WVCWP prepared a press release for California Coastal Cleanup Day and submitted it to the 3 local weekly newspapers. WVCWP worked closely with reporters for all 3 papers to develop articles tailored to each City/Town. WVCWP provided photos and interviews. Articles discussed the Stormwater Permit and the implications of trash in the creeks. Numbers were provided on lbs of trash and recycling collected at the WVCWP site (San Tomas Aquino Creek) and 2 sites in Los Gatos. The Saratoga article also publicized the upcoming Cleanup event in Saratoga Village, sponsored by WVCWP & City of Saratoga. **IPM/ "Green Gardeners" article + Car Wash Kit**	WVCWP Staff

			In February 2009, WVCWP developed a Press Release covering upcoming IPM awards presentations for the 4 WVC, including information and photos on the Green Gardeners program. The article included information on the class series (for anyone interested in enrolling). It also promoted local companies which employ Green Gardeners graduates – so that residents could contact and utilize these graduates. In addition, in the context of describing WVCWP, the article promoted use of the Car Wash Kit for fundraising events. **<u>Car Wash Kit for fundraising events</u>** In June 2009, WVCWP initiated correspondence with the 3 weekly newspapers concerning the need to promote the Car Wash Kit during the summer months. Correspondence continued into July 2009, and resulted in a 'brief', printed in the 3 newspapers, alerting fundraising groups about the need to use the Car Wash Kit. The article generated a number of calls with questions to the WVCWP office. **COMMERCIAL WEEKLY NEWSPAPERS** **Paid Advertising** WVCWP contributed funds to the SCVURPPP's Pollutants of Concern ad campaign. This allowed ads to appear in the three (3) weekly community newspapers for a total of ten (10) weeks in FY 08-09. (Campbell Reporter, Los Gatos Weekly, Saratoga News). In addition, all ads also appeared a 2nd time in the Los	

			Gatos Weekly "Weekend Edition", so that ads appeared a total of twenty (20) times in WV newspapers. September 08: IPM/weeds October 08: Mercury/HHW November 08: Mercury/HHW Dec/January (week of 12/30): Litter Jan 09: Litter February 09: Litter March 09: Litter April 09: IPM/snails June 09 (week of 6/1): IPM/Roses June 09: IPM/Yellow Jackets <u>Recap:</u> IPM 4x Mercury 2x Litter 4x **MUNICIPAL NEWSLETTERS** WVCWP prepared a variety of news articles for use by municipal newsletters in FY 08-09. Articles shared with muni newsletters included: **<u>- Car Washing</u>** An article on Car Washing & Car Wash Kit, along with a WVCWP car washing cartoon, was submitted to *The Saratogan* municipal newsletter for Summer 08. The Car Washing cartoon strip, along with brief text, was printed (July/Aug 08).	

			- **Keep Leaves And Landscaping Material Out Of The Drain** An article was prepared alerting residents that leaves and dirt, although 'organic', should be kept away from gutter, curbs and stormdrains. Graphics included a WVCWP cartoon illustrating construction materials near the gutter. This was submitted to the muni newsletters, and also the WVC waste collection contractor, for their newsletter. The article was printed in: - The Campbell Profile - The Monte Sereno Newsletter - The Saratogan **- Proper TV Disposal** (E-waste & Mercury) An article was written covering the issue of proper TV disposal (with the upcoming digital TV changeover), along with concerns about mercury. The article included details on proper disposal options. This was submitted to the muni newsletters, and also the WVC waste collection contractor, for their newsletter. The article was printed in: - The Campbell Profile - The Monte Sereno Newsletter - The Saratogan **- Arbor Day** – Trees prevent creekbank erosion At the request of the City of Saratoga, an article was developed addressing the subject of how trees help prevent creekbank erosion.	

			Portions of the article were printed in The Saratogan as part of the effort to highlight Arbor Day. **- Less Toxic Pest Control –** Attracting Beneficial Bugs WVCWP prepared an article highlighting the dangers of pesticide use in home gardens, with details and graphics on using 'beneficial bugs' as an alternative to pesticides, and on properly identifying helpful vs harmful bugs. The article and graphics were printed in: - The Campbell Profile - The Los Gatos Vista - The Monte Sereno Newsletter - The Saratogan West Valley Communities' Solid Waste Franchisor (garbage & recycle hauler) publishes a quarterly newsletter and distributes to all households. Topics in Summer 2008: Curbside collection of used motor oil, proper disposal of sharps, universal waste, e-waste, water based paints.	
			CAMPBELL The City of Campbell publicizes "Bike to Work Day" and has a good turnout of employees who participate. This generated a 400 word article on "Bike to Work Day" and City staff, in the Campbell Reporter weekly newspaper (May 27, 2009). The article was titled "City Employees Leave Cars at Home and Pedal to Work". See Attachments *(Bike to Work article)*	

			SARATOGA City of Saratoga was able to generate publication of 2 constructive articles in the local weekly newspaper (The Saratoga News). One article covered Saratoga Mayor Chuck Page's campaign to get businesses to halt use of Styrofoam containers. The article ran on April 28, 2009, and covered issues related to getting Styrofoam out of the trash stream, it's lack of biodegradability, etc. Another article targeted the subject of greener building, and covered a variety of issues, including: -the benefits of green roofs, -recycling construction materials, and -residential 'rain harvesting' systems (which reduce runoff). See Attachments ("Happy Earth Day" & "Mayor Styrofoam") Saratoga Annual Cleanup The City was able to obtain publicity in the weekly 'Saratoga News' promoting the West Valley Collection & Recycling cleanup occurring July 21st through September 26th and to encourage citizens of Saratoga to hold a garage sale to prepare for the annual cleanup. MUNICIPAL NEWSLETTER The City's municipal newsletter, "The Saratogan" makes a consistent effort to include articles related to stormwater issues. The City has included articles generated by WVCWP, and has also used the newsletter to proactively teach	

			residents about issues such as reducing pesticide use in City Parks, encouraging residents to walk and bike using city pathways - rather than driving, etc. In FY 08-09, "**The Saratogan**" municipal newspaper carried articles on: • Trails & Bike Paths: • Less-Toxic Pest Control in City parks • Planting/Preserving Trees to prevent Creekbank Erosion • E-Waste (general) • E-Waste and Mercury (digital TV transisition) • Keeping Leaves and Dirt away from Strormdrains • Beneficial Bugs/ Less Toxic Pest Control/ Proper Pesticide Disposal • Car Washing – proper Residential Washing + Car Wash Kit	
General	CI Item	d. WVCWP Web-Site Maintain and promote cleancreeks.org website; continue to expand and update the site with new educational material and up-to-date topics for the public on HHW, pest management, and other pollutant reduction activities, e.g. for mercury, trash, & copper /nickel	**E-Waste Event** WVCWP updated their website <www.cleancreeks.org> to advertise for the E-Waste event. A thumbnail link to the flyers handed out throughout the cities was posted from 7-14-08 through 7-27-08. **Waste Collection Contractor** Strengthened relationship with WV Collection & Recycle – the waste collection contractor for the WV Communities. WVCR now includes a link to the WVCWP website on the "Links" page of their website. **Car Wash Kit** Worked with Town of Los Gatos to update Car Wash Kit contact information and details on the Town's	WVCWP Staff

			website. _____ All WVC prepared and forwarded municipal seal/logo graphics to WVCWP for use on Watershed Watch website. _____ Received inquiry about Car Wash Kit from Incline Village, NV (Lake Tahoe) – Car Wash Kit info on cleancreeks.org website (WVCWP site) was found via a Google search. In response to inquiry, WVCWP forwarded numerous materials to help NE Lake Tahoe area start a Car Wash Kit program.	
		Municipal Web-Sites	See Sections 7 through 10 of this report for details on municipal website information related to specific pollutants of concern.	

GENERAL OUTREACH EVALUATION

Press Releases/ Media Coverage

WVCWP has been working to re-establish connections with the 3 local weekly papers which are distributed to all WV households (due to a buyout several years ago, these papers had experienced re-organization).

Creek Cleanup Coverage

For FY 08-09, WVCWP staff were able to arrange for coverage of the Coastal Cleanup Day event in all 3 papers. The articles were each tailored to the community covered by that paper. Articles included photos, interviews with staff and volunteers, data on trash collected, and coverage of the Stormwater Permit and water pollution issues related to trash.

The articles reached a total of **69,840 households**, or, all the adult population of the WV Communities (each household may include several adults, older children, etc).

IPM/ Less Toxic Pest Control Coverage

To promote use of the trainees from the Green Gardeners program, WVCWP sent a Press Release to local newspapers in Campbell, Los Gatos & Saratoga. A 630 word article, including a photo, about the Green Gardeners program was published.

The article promoted both the classes (for anyone interested in enrolling) and promoted local companies which employ Green Gardeners graduates – so that residents could contact and utilize these graduates.

This was exactly the type of coverage that WVCWP was looking to secure, because it is hoped that publicity will inspire residents to hire Landscape Design & Maintenance contractors who have been trained in IPM. Since the article included interviews with Green Gardeners graduates, and owners of participating Landscaping firms, the article will make it easy for residents to contact these companies and graduates, and hopefully make a change to less-toxic pest control at their homes.

CITIZEN PARTICIPATION

Public Partici-pation	Trash Monitoring Work Plan	e. Creek Clean-ups Continue implementation of trash monitoring activity during Creek Clean-ups. Conduct a minimum of two clean-up events per yr (i.e. on Coastal Clean-up Day and National River Cleanup Day).	**Coastal Cleanup Day** *San Tomas Aquino Creek @ Westmont High 9/20/08* WVCWP hosted a Cleanup Event at the site where it has regularly hosted this event. Volunteers were instructed in use of Tally sheets, and were provided with clipboards, etc. Working in groups, volunteers were able to pick up trash and carry out trash monitoring. 15 Volunteers attended along with WVCWP and City of Saratoga staff. Details are listed in the Evaluation section (below). The Cleanup Event was covered in articles appearing in 3 weekly newspapers; details are listed in the Newsletter/Press Release section (above). Distributed 15 reusable bags (purchased from Safeway with gift card they donated to WVCWP) **National River Cleanup Day** *San Tomas Aquino Creek @ Westmont High 5/09* WVCWP hosted a Cleanup Event at the site where it has regularly hosted this event.	WVCWP Staff

			Volunteers were instructed in use of Tally sheets, and were provided with clipboards, etc. Working in groups, volunteers were able to pick up trash and carry out trash monitoring. Details are listed in the Evaluation section (below). **Sacred Heart Schoolyard Cleanup** *Schoolyard overlooking Wildcat Creek in Saratoga 4/29/09* Sacred Heart School organized the cleanup, based upon previous events held in partnership with WVCWP. Details are listed in the "Evaluation" row at the end of this table (below).	
			CAMPBELL **Great American Litter Pickup** 4/18/09 - City of Campbell, 5 different cleanup sites Volunteers were instructed in use of Tally sheets, and were provided with clipboards, etc. Working in groups, volunteers were able to pick up trash and carry out trash monitoring. 160 Volunteers participated, working for four hours. Litter was picked up from 5 sites, including the Los Gatos Creek Trail and the Los Gatos Creek County Park. Publicizing done for the event was very successful, as shown by the fact that 160 volunteers participated. Details are listed in the "Evaluation" row at the end of this table (below).	

			SARATOGA **Calabazas Creek Cleanup** *Saratoga-3/22/09* 17 Volunteers from a local church group in Saratoga attended along with The Mayor of Saratoga, Saratoga and WVCWP Staff. **Saratoga Creek at Big Basin Way Cleanup** *Saratoga – 5/26/09* Saratoga staff organized a cleanup at this site which is has been cleaned annually. 9 volunteers from Saratoga Elementary school participated (8 students and 1 teacher). Volunteers were instructed in use of Tally sheets, and were provided with clipboards, etc. Working in groups, volunteers were able to pick up trash and carry out trash monitoring. Details are listed in the "Evaluation" row at the end of this table (below).	
Public Partici-pation	Creek Keepers Campaign started FY00-01	f. "Creek Keepers" Program training Provide training on trash tallying and highlight current trash pollution issues for students and volunteers when they participate in a cleanup event.	See preceding row (above)	WVCWP Staff
TARGETED OUTREACH & SCHOOLS				
Target Schools	Expand Outreach to Teachers and	g. Schools Outreach: Watershed Ed. Curriculum Conduct outreach to K-8 teachers to	WVCWP Staff e-mailed to a number of schools which have hosted Enviroscape presentations in past years. Only 1 school responded – they requested 2 different	WVCWP Staff

	Students	solicit invitations for classroom presentations. Develop presentations as needed based upon grade levels. Presentations will cover watershed concepts, strategies for changing behaviors which affect stormwater pollution, and related concepts and vocabulary.	Enviroscape presentations. Since this does not appear to be the most effective means of outreach, staff will investigate other methods in FY 09-10. 5 schools were contacted – Canyon Heights, Foothill, Sacred Heart, St. Mary's, Lexington WVCWP was successful in outreach to 2 Summer Camp programs held at local churches. Almost 40 students were reached through presentations at these venues. See "Community Events"	
Target Schools	Based on feedback from Teachers and Students	h. Provide Watershed Education in classrooms Conduct water quality protection education or presentations in local schools, using *Enviroscape* and/or other methods to engage students in Watershed campaign messages. Improve presentation format based on teacher/student feedback. * Please note that this section was inadvertently omitted from the FY08/09 work plan and needs to be included in this report.	**St. Mary's School** Los Gatos January 15, 2009 Enviroscape Presentation to 35 Fifth graders. WVCWP Assistant gave a watershed pollution presentation using the Enviroscape to 35 Fifth graders at St. Mary's School in Los Gatos. Topics covered included: Definition of Watershed, Storm Drain Vs. Sewer, Water Cycle, Urban Run-off, and pollutants of concern. Distributed 35 beneficial bug brochures w/native seed packets, 35 WVCWP pencils made from recycled materials, 3 WVCWP Stainless Mugs, 3 WVCWP Cartoon T-Shirts. **Sedgwick Elementary School "Discovery Day"** Cupertino March 31, 2009 4 Enviroscape Presentations WVCWP gave 4 Enviroscape Presentations to approximately 90 students in the 2nd, 3rd, 4th, and 5th grades.	WVCWP Staff by arrangement w/ Teachers

			Topics covered included: Definition of watershed, Storm Drain Vs. Sewer, Water Cycle, Urban Run-off, pollutants of concern and "How to help reduce watershed pollution". Distributed 90 beneficial bug brochures w/native seed packets, 50 WVCWP Pencils made from recycled materials, and 40 Watershed watch notepads. **St. Mary's School** Los Gatos May 21, 2009 Enviroscape Presentations WVCWP Assistant gave watershed pollution presentations, using the Enviroscape, to 30 Kindergarteners (2 classes – 15/ class) at St. Mary's School in Los Gatos. Topics covered included: Definition of watershed, Storm Drain Vs. Sewer, Water Cycle, Urban Run-off, and pollutants of concern. Groups of students were rotated through the presentations. For those not in the rotation, a "Litter Pickup" activity was supervised by the teachers. WVCWP provided litter grabbers, gloves & trash bags. Students spread throughout the school grounds, picking up litter. The school grounds were generally very clean -- hardly any litter was found and students were not able to fill 1 trash bag. Teachers pointed out storm drains, explained how litter gets into them, and flows to creeks. Distributed 35 beneficial bug brochures w/ native seed packets, 3 WVCWP Stainless Mugs,	

		Additional Outreach to Schools	**Car Wash Kit for fundraising events** Since Car Wash fundraisers are frequently held at school sites, or sometimes by school-based groups using other sites, in FY 08-09 WVCWP pursued a concentrated outreach effort to schools on this subject. A flyer (specific to each municipality, and listing the relevant muni ordinance) and a letter, were e-mailed for dissemination to all schools in the WVC. Via correspondence with 2 High School District Offices and 3 Elementary School District Offices, the flyers and letters were sent to Facilities Maintenance staff and front office staff at: **High Schools** CAMPBELL – 6 HS school sites LG-STGA – 3 HS school sites **Elementary Schools** CAMPBELL – 12 Elementary & Middle School Sites LOS GATOS – 5 Elementary & Middle School Sites SARATOGA - 4 Elementary & Middle School Sites See Attachments – (*Car Wash Flyer* and *Car Wash Letter*)	
TARGETED OUTREACH				
Targeted Business	Permit Provision C.4	i. Education – Businesses Distribute BMP materials during WVCWP inspections of food facilities and automotive businesses. Discuss relevant educational material with businesses cited for potential stormwater violations.	The WVCWP Inspector distributed BMP materials to all restaurants and food facilities that were included in pro-active IND inspections in FY 08-09. **Good Cleaning Practices' (poster & packet)** Poster depicts proper mat washing techniques,	WVCWP Inspector

			Materials distributed at other inspections (IND and IC/ID and follow-ups) included: - Vacu-Boom flyer - Watershed Watch brochures - Construction sites – "Blueprint for a Clean Bay" – BMPs for Construction Sites - Preventing Stormdrain Pollution: Guidelines for Commercial & Light Industrial Facilities" booklet (SCVURPPP) – covers painting, car-washing, chemicals, etc. WV Inspector distributed 50 Pool & Spa BMP brochures to retail outlets during FY 08-09. These will help educate retail staff, and are for distribution to retail customers. **Leslie Pools – Los Gatos** 30 -- Pool & Spa Brochures **Tradewind Spas – Los Gatos** 20 – Pool & Spa Brochures	
Reporting	NPDES Permit, Provision C.4	j. Evaluation/ Reporting Document or estimate (as feasible) numbers of residents, students, municipal staff etc. reached by outreach efforts. Provide anecdotal feedback from audiences. Report number of calls, website hits and circulation or readership for newspapers or newsletters.	**Residents Reached via Articles** **COMMERCIAL NEWSPAPERS** Creek Cleanup articles were printed in the Sept 30, 2008 issues of the 3 local weekly newspapers. An article covering Green Gardeners, how to hire graduates trained in Less Toxic Pest Control, and info on the WVCWP Car Wash Kit was printed in the Feb. 17, 2009 issue of the 3 local weekly newspapers. Circulation for local weeklies: **Campbell Reporter** (circ. 15,500) **Los Gatos Weekly** (circ. 41,050)	WVCWP Staff

			Saratoga News (circ. 13,240) WVCWP paid for ads to run in these papers as part of the SCVURPP media campaign. Campbell Reporter & Saratoga News: 1x / mo for 10 months Los Gatos Weekly: 2x/mo for 10 months **MUNICIPAL NEWSLETTERS** Circulation numbers for municipal newsletters are: 23,000 Campbell households 15,208 Los Gatos residents and businesses 1,225 Monte Sereno households 12,600 Saratoga households **WASTE CONTRACTOR** West Valley Collection & Recycling is contracted to provide waste collection services for the West Valley Communities. The contractor has been proactive in providing free E-waste recyling events and in publicizing those events through their quarterly newsletter and through bill inserts. The newsletter also include additional in on the importance of recycling batteries and e-waste and similar subjects. The newsletters and bill inserts are sent to appx. **27,000** WV households. **Students Reached via Enviroscape Presentations** WVCWP staff gave Enviroscape presentations in classrooms, at summer 'church camps', and at community events. Appx. **274 students** learned about	

			watersheds and the need for behavior changes related to water pollution via this medium.	
Training	FY 08-09 Work Plan	k. Staff Training Conduct or provide WVCWP staff training/meetings to prepare for school presentations, community events & responses to public requests.	**Enviroscape** A new WVCWP staff member was trained on use of the Enviroscape. Training covered set-up and breakdown of the watershed model, use of several curriculums and associated visuals on the Enviroscape. A similar training was provided to City of Cupertino staff. **Car Wash Kit** WVCWP provided training to City of Monte Sereno front office staff on the Car Wash Kit program, so that staff will be able to handle public inquiries on the program.	WVCWP staff
Training	Additional Task – not in Work Plan	k. Staff Training Obtain staff training on effective outreach methods and materials	2 WVCWP staff attended the EPA's National Conference for Non-Point Source & Stormwater Outreach Portland OR – May 2009. WVCWP Program Manager attended a full day of training on "An Evaluation Primer for Stormwater Programs" and "Overview of Social Indicators Evaluation System and Applied Survey Development Skills". WVCWP Program Assistant provided a training for Conference attendees, and attended 2 ½ days of training on a variety of subjects. See Training Table for details	
Training	Additional Task – not in Work Plan	k. Staff Training Provide staff training on public education to a national audience of stormwater	EPA's National Conference for Non-Point Source & Stormwater Outreach Portland OR – May 2009	

		professionals	WVCWP responded to a request for abstracts showcasing successful, low-budget public education campaigns. EPA requested that WVCWP address the conference with their presentation showcasing use of cartoons for dissemination of stormwater messages. WVCWP staff created and delivered the PowerPoint presentation, which was very well-received. It is anticipated that this method of outreach will definitely be initiated in over 6 programs throughout the country. See Evalution Section (below) for details on positive feedback, and potential implementation of presentation concepts by programs throughout the U.S.	
Target Small gardening businesses	NPDES Permit, Provision C.4, C.9 & Pest Mgt Plan (PMP)	I. Training staff of small gardening businesses (Work within Program's Watershed Education and Outreach group and sub-groups)[1] Continue to assist with development of strategy started in FY06-07 to implement a campaign & training program (in Spanish & English) designed to elicit participation of staff from very small landscape businesses (typically 1-8 employees) often serving homeowners. Help fund and/or support campaign locally.	WVCWP staff participates in WEO. WVCWP Program Manager participates in the IPM Ad Hoc Task Group on behalf of the WVC. Project implementation and projects for consideration, which are discussed in the AHTG, are presented to WVC staff for appropriate follow-through. In FY 08-09, WVCWP staff were involved in meetings aimed at developing coordination between the "Bay Friendly" program, and the "Green Gardeners" program. In FY 08-09, WVCWP offered funding for 6 scholarships to reduce the cost of the Green Gardener class to attendees (enough for 6 reduced fee scholarships). To promote use of the trainees from the Green Gardeners program, WVCWP sent a Press Release to local newspapers in Campbell, Los Gatos & Saratoga.	WVCWP Mgr in cooperation with SCVURPPP's Pi/P sub-groups

[1] Funded by all Co-permittees each year.

			A 630 word article, including a photo, about the Green Gardeners program was published. The article promoted both the classes (for anyone interested in enrolling) and promoted local companies which employ Green Gardeners graduates – so that residents could contact and utilize these graduates.	
Target 16-24 yr-olds for Anti-litter messages & behavior changes	Trash Advisory Committee	m. Trash Advisory Committee (TAC) Continue to participate in development and implementation of a campaign targeting 16 to 24 yr-olds for anti litter messages to elicit changes in behaviors. Support and implement campaign locally. (Ref Section 7 of this work plan; Watershed Education & Outreach Campaign)	The "TAC" was renamed 'Silicon Valley Anti Litter Campaign (SVALC). WVCWP staff attended "General Core Group" and the "Education Sub-Group". In early FY 08-09, WVCWP staff were involved in developing a slogan and website for this campaign. WVCWP staff researched slogans in other states & programs, interviewed males in the target age group, and researched web site options. Notes were presented to group. A subset of the SVALC/ WMI Trash Sub-Group has been meeting to try and begin a new 'trash action group'. WVCWP staff have started attending these meetings; current goals are to develop a focus and action plan.	WVCWP staff in cooperation with SJ & SCC Trash Advisory Committee
			CAMPBELL Campbell Public Works Director has been meeting with a subset of the SVALC/ WMI Trash Sub-Group to try and begin a new 'trash action group'. City of Campbell staff attends the Great American Pick Up Implementation Group. Meetings are held leading up to the Great American Pick Up event, which Campbell participates in.	
Additional Outreach	Cross Ref. Sections 7-10 of this Work	n. Outreach Activities for Specific Pollutants See Sections 7 through 10 of this Work	**HIGHLIGHTS** **PESTICIDES** WVCWP staff developed and put together packets of	WVCWP Staff

	Plan	Plan, for additional Public Education and Outreach activities related to specific pollutants of concern.	native seeds for beneficial bugs, to partner with IPM printed material. See below: "Additional Task". Articles on elimination and disposal of diazinon/ chlorpyriphos and on less-toxic pest management were printed in the municipal newsletters for each WVC. A press release on the Green Gardeners program was submitted to local weekly papers and resulted in a 630 word article promoting less-toxic pest control. WVCWP contributed funding for IPM-message ads which ran in the weekly papers. **COPPER** Car Wash Kit flyers, and information on the need to use a Kit for car wash fundraisers, was distributed to staff at 31 schools. A pilot piece with Car Wash Discount Card was developed for residents. See below: "Additional Task". The Car Wash Kit was publicized in the context of a WVCWP article in the 3 weekly newspapers (Feb. 09). Further discussion with the paper in June 09 resulted in a short article on the Kit in July 09. **MERCURY** An article on proper TV disposal was developed and published in several of the municipal newsletters, prior to the switch to digital TV. **TRASH** WVCWP staff developed graphics and messages for an "Anti-Litter" mug. 230 mugs were purchased; 80 of these were for the City of Saratoga which distributed them to staff to help reduce litter, and to publicize the anti-litter message. The remaining 150 mugs were distributed by WVCWP through various events and outreach activities. (see Trash, "Additional Task"	

			below) WVCWP gave out 15 re-usable grocery bags, and began researching the possibility of purchasing re-usable bags, with an anti-litter message, for use as outreach pieces in FY 09-10.	
Additional Outreach	Cross Ref. Sections 7-10 of this Work Plan	n. Outreach Activities for Specific Pollutants Additional Task – Create Outreach Materials	**NEW IPM Outreach Material** In FY 08-09, WVCWP devoted staff time to a new campaign: creation and promotion of a new outreach product with the intent of providing material that would be desirable to residents, and which could be attached to printed information, to encourage residents to pick up and read the printed info. Staff purchased seeds of pest-resistant CA Native plants, which attract "Beneficial Bugs". Staff created envelope labels with graphics, planting information, and pest info for the seeds seeds – Attachments – *Seed Labels*). WVCWP partnered with stakeholders (local Sierra Club members) to apply the labels to envelopes, and fill them with the bulk seeds. A total of **599 seed** packets were distributed via WVCWP in FY 08-09. The seeds were promoted via articles in WVC municipal newsletters, including photos of beneficial bugs. The articles resulted in a total of 24 seed packets sent out due to resident requests. At events, the seed envelope/printed material packets appeared to be popular. Distribution was as follows: Sierra Club: 150 (will be distributed at events, such as Earth Day)	

			Campbell's Great American Litter Pickup: 100 Saratoga Rec Dept. Gardening Class: 100 City of Saratoga Arbor Day: 25 Yamagami's Garden Center: 50 St Mary's School (Enviroscape Presentation) 1/09: 35 St Mary's School (Enviroscape Presentation) 5/09: 30 Sedgwick School "Discovery Day" Enviroscape: 90 Calls from residents: 24 **Total: 599** Details are listed in the "Evaluation" row at the end of this table (below).	
Additional Outreach	Cross Ref. Sections 7-10 of this Work Plan	n. Outreach Activities for Specific Pollutants Additional Task – Create Outreach Materials	**NEW Copper Outreach Material** A pilot piece with Car Wash Discount Card was developed for residents. The Car Wash/ Copper brochure contained a Car Wash Discount Card (developed by Watershed Watch) and a list of participating commercial Car Washes, along with info about copper and toxicity. However, the piece was developed shortly before that particular Car Wash Discount Card was due to expire, so a minimal number were produced (via inkjet printer). WVCWP will evaluate whether to update and re-print the piece. The goal is to provide residents with printed materials that involve a useful item (such as the discount card) which will encourage people to read the attached stormwater pollution messages.	
		n. Outreach Activities for Specific Pollutants Additional Task – Create Outreach	**NEW Anti-Litter Outreach Material** WVCWP staff developed graphics and messages for an "Anti-Litter" mug. Graphics including representation	

		Materials	of a creek, and the message "Clean Creeks… It's In Our Hands – Save a Cup". WVC and WVCWP were listed on the mug, with WVCWP logo and web site address. (See Attachment – Mug Graphics) 230 mugs were purchased; 80 of these were paid for and used by the City of Saratoga which distributed them to staff to help reduce litter, and to publicize the anti-litter message. The remaining 150 mugs proved to be very popular and were distributed by WVCWP through various events and outreach activities. <u>MUGS DISTRIBUTED</u> *ICID Training March 9th- 11 mugs given to municipal staff *WVCWP hosted a SCVURPPP Training - 10 mugs given to attendees <u>*Los Gatos Open House May 2009</u> - St. Mary's School: 9 Mugs to parents & teachers -Evergreen Elementary: 5 mugs to parents & teachers - Approx. 10 mugs to Los Gatos and WV Sanitation District staff * Calabazas Creek Cleanup March 2009 (Saratoga) - 18 mugs to volunteers *5 mugs to City of Monte Sereno Employees *WVCWP Annual Streets and Storm Drains Training- 8 mugs to attendees and presenters. *National Rivers Cleanup Day- approx 18 mugs to volunteers *Watershed Presentation at Vacation Bible Camp in Campbell June 2009 - 5 mugs to teachers/ counselors	

			*St. Mary's School Enviroscape presentations – 6 mugs to teachers	

Public Information/Participation Program EVALUATION – WVCWP PROJECTS

RESULTS for WVCWP PRESENTATION "A Stormwater Campaign in Cartoons" at EPA NT'L CONFERENCE – MAY 2009

EPA's National Conference for Non-Point Source & Stormwater Outreach - Portland OR

WVCWP responded to a request for abstracts presenting successful, low-budget public education campaigns.

WVCWP's presentation showcasing use of cartoons for dissemination of stormwater messages was accepted as a training session at the conference. WVCWP staff created and delivered the PowerPoint presentation.

Attendees: Appx 80-90 stormwater professionals from around the US and US Territories chose to attend this presentation.

No feedback was solicited by, or was provided by EPA to, WVCWP – however, a number of participants made the effort to contact WVCWP and provide positive feedback:

Feedback: 11 people took the initiative to approach WVCWP staff in the 24 hours after the presentation and expressed appreciation for the information conveyed.

Implementation: 6 stormwater programs approached WVCWP staff later in the conference, and declared that they **will** try this concept in their own outreach efforts

Areas which plan on following concepts outlined in WVCWP's presentation:

- Sustainable Business Coordinator *for* Environmental Coalition of South Seattle (NGO which is contracted by municipalities to work with businesses and schools -- distributes spill kits, provides public education, etc. throughout western Washington)
- Stormwater Educator *for* Muncie Sanitary District, Delaware County Stormwater Management, IN
- Water Resource Educator *for* East Metro Water Resource Education Program (Eastern Minnesota)
- Surface Water Plan Educator *for* Washington State Univ. Extension, Jefferson County, WA
- Stormwater Education Coordinator *for* State of KY MS4s Kentucky Environmental Education Council & Kentucky Transportation Cabinet
- Community Relations Specialist *for* City and County of Honolulu, Department of Environmental Services

****

RESULTS for CREEK CLEANUPS

SAN TOMAS AQUINO CREEK CLEANUP @ WESTMONT HIGH SCHOOL EVENT SUMMARY

Saturday September 20th, 2008: In conjunction with International Coastal Cleanup Day

Summary of Survey Completed by Volunteers

(Based on 15 volunteer response sheets)

Most common pieces of trash collected: Cans, bottles, cigarette butts, paper, and food wrappers.

Least common pieces of trash collected: Plastic, rubber.

Most unusual pieces of trash collected: Home-made rocket from plastic bottles, dollar bills.

WVCWP Contributions:

WVCWP provided Trash Tally Sheets with clipboards, Litter Grabbers, and gloves & trash bags (via the Clean A Creek Action Group)

Approximately: 15 recycled shopping bags , juice drinks, and snacks (donated by Whole Foods of Campbell) 10 T-shirts (donated by WVCWP)

Results:

16 volunteers worked at the cleanup for 4 hours each. At a minimum wage of $8.00 an hour this would have cost $512 in temporary labor.

120 lbs of Trash was collected

170 lbs of Recyclables were collected

Total Collected= 290 lbs

Volunteer Feedback:

The Girl Scout troop which volunteered was made up of Scouts from other communities outside the WV area; the troop leader expressed appreciation that this site was very well-organized (compared to other sites where the troop has volunteered).

The Troop Leader stated that they hope to participate in WVCWP cleanups in the future.

CALABAZAS CREEK CLEANUP IN SARATOGA

March 22nd, 2009

A Church group approached the City, asking to do a Clean-up

WVCWP arranged the site for them w/ SCVWD, and provided litter grabbers, trash bags and gloves

WVCWP & City of Staff supervised – Saratoga's Mayor also participated

17 volunteers attended

Summary of Survey Completed by volunteers.

Most common pieces of trash collected: Plastic bottles, food wrappers, paper.

Least common pieces of trash collected: Plastic, rubber.

Most unusual pieces of trash collected: Orange construction cone, part of a car's exhaust.

WVCWP contributions: 18 Stainless WVCWP Mugs

Results: Approximately 15 bags of Trash.

Total: estimated 500lbs – includes several heavy metal objects

SACRED HEART SCHOOL CLEAN UP (K-8) – Saratoga (the school includes students from all WVC)

April 29, 2009

The cleanup took place on school grounds, inside the cyclone fencing, overlooking Wildcat Creek

Sacred Heart School organized the cleanup, based upon previous events held together with WVCWP.

WVCWP contributions: WVCWP staff provided litter grabbers, gloves and trash bags.

Results: Appx 60 lbs of trash were collected.

GREAT AMERICAN LITTER PICKUP - CITY OF CAMPBELL

April 18, 2009

Volunteers were instructed in use of Tally sheets, and were provided with clipboards, etc. Working in groups, volunteers were able to pick up trash and carry out trash monitoring.

160 Volunteers participated, working for four hours.

PW figures that at at minimum wage of $8.00 per hour that works out to $5,120 worth of temporary labor.

Litter was picked up from 5 sites, including the Los Gatos Creek Trail and the Los Gatos Creek County Park.

Results:

35 Bags of recyclables (cans/plastic/glass & paper) were collected

145 Bags of trash were collected

Publicizing done for the event was very successful, as shown by the fact that 160 volunteers participated.

SARATOGA CREEK AT BIG BASIN WAY CLEANUP – CITY OF SARATOGA

May 26, 2009

This Cleanup was organized by City of Saratoga staff

WVCWP contributions: WVCWP staff provided litter grabbers, gloves & bags.

The Cleanup involved parking lots between Big Basin Way businesses and the creek, and the top of the creekbank along Saratoga Creek

Participants included City of Saratoga Staff with the Saratoga Elementary School Student Council and a teacher (9 volunteers).

Results: 10 bags of garbage were collected; City staff evaluated the area as much cleaner than in previous years.

SAN TOMAS AQUINO CREEK CLEANUP @ WESTMONT HIGH SCHOOL EVENT SUMMARY

Saturday May 16, 2009: In conjunction with National River Cleanup Day

WVCWP hosted a Cleanup Event at the site where it has regularly hosted this event.

Volunteers were instructed in use of Tally sheets, and were provided with clipboards, etc. Working in groups, volunteers were able to pick up trash and carry out trash monitoring.

Distance cleaned was appx. 1.5 miles

Summary of Surveys Completed by Volunteers

(Based on 15 volunteer response sheets)

Most common pieces of trash collected: Plastic/styrofoam, bottles, cigarette butts, paper, and food wrappers.

Most unusual items found: Baseball glove in good condition, Tires

WVCWP Contributions:

WVCWP provided Trash Tally Sheets with clipboards, Litter Grabbers, and gloves & trash bags (via the Clean A Creek Action Group)

Results:

15 volunteers worked at the cleanup for 4 hours each.

400 lbs of Trash was collected

80 lbs of Recyclables were collected

Total Collected= 480 lbs

CREATE NEW OUTREACH MATERIALS

Due to problems with persuading residents to pick up printed material, WVCWP has searched for means of attracting interest in printed materials. An effort was made to find "desirable" items to incorporate with printed materials, which would encourage residents to pick up and read the information when they pick up the item.

New efforts with this theme included:

--Staff created a Car Wash/ Copper brochure, with Car Wash Discount Card and list of participating commercial Car Washes

--Staff developed graphics for, and ordered, 230 mugs with an anti-litter message: "Save a Cup – Clean Creeks, It's In Our Hands"

--Staff developed graphics for, ordered and packaged a set of seeds for 4 different pest resistant native plants, to attach to "less toxic" gardening materials and to encourage residents to take the printed information.

Response to these items has been much better than trying to distribute printed materials alone. WVCWP will continue to investigate means of incorporating this concept into outreach materials.

Following this theme, in FY 08-09, WVCWP also investigated the feasibility of purchasing re-usable grocery bags, for use in conveying information about litter/ trash problems. Minimum order requirements for this type of item are fairly large, so purchasing these bags will take a large budget commitment, or cooperation with other entities. WVCWP has been looking into cooperation with other entities, and will see whether this bears any results in FY 09-10.

"Sharps" Disposal Program

On September 1, Senate Bill 1305 (Figueroa) took effect in the State of California, making it illegal to dispose of home-generated sharps in trash or recycling receptacles. The new law requires that these sharps, including needles, syringes and lancets used for home medical care, be placed in approved sharps containers for disposal. These approved containers, often sold at pharmacies, can be filled and delivered to one of the approved drop-off locations in the community.

More than three billion sharps are used in the United States each year. In Santa Clara County alone, county residents generate over 1.2 million sharps each month. When sharps are improperly disposed, they pose a health threat to sanitation workers, children, adults and pets.

Santa Clara County's successful Household Hazardous Waste Collection Program (HHW) has identified **several locations throughout the County where the public can drop off sharps containers** for safe disposal. In the Campbell area, Kaiser Permanente Medical Offices at 220 East Hacienda Avenue, and Santa Clara Valley Medical Center at 751 South Bascom Avenue are available drop off centers. Additionally, Sharps can be dropped off by scheduling an appointment (408 299-7300) at any of the regularly scheduled HHW Waste Drop Off events.

HHW staff is actively seeking additional drop off sites at pharmacies and other health care facilities to facilitate convenient and safe disposal of sharps. A list of approved sharps retail take-back locations can be found at www.hhw.org.

Banners Brighten Downtown Campbell

Downtown Campbell has a bright new look thanks to local artist Sonya Paz who donated her artistic talent and time to create eye catching artwork for banners throughout downtown. Paz developed two different designs and color pallets to adorn downtown's decorative lamp posts. City staff worked with Paz on designing art that would reflect the message "Shop with Us" and "Dine with Us" and support your downtown community.

The Rain is Coming!

With the change in seasons we see leaves piling up in our yards, and water running down along the curbs. Although Mother Nature brings leaves and rain together, your City would like you to try to keep them separate!

Leaves can easily pile up along curbs at this time of year. This causes problems for our street sweeping equipment, so it's helpful if all homeowners can keep leaves raked and placed in your yard waste bin. (Continued on Page 7)

Another Side to the Digital TV Switch

If you watch TV at all, you are aware that in mid-February old analog TV's will no longer accept a signal from an antenna. If you've decided to buy a new TV for this Digital TV transition, what will you do with your old television?

Everyone should be aware that it's illegal to just throw out a TV. California law says that televisions are "Hazardous Waste"; they can't be disposed of with regular trash. The TV needs to be recycled, and that means dropping it off at an E-waste facility or special event.

Why?
About 40% of the heavy metals in landfills come from previous dumping of electronic items. These metals include lead, mercury and cadmium. Over time, waste leaks from landfills, and then these metals can enter our water systems.

Mercury is already an issue in the SF Bay, so local agencies are making special efforts to prevent release of mercury, a neurotoxin, into our environment.

Where?
Campbell's collection service is provided by West Valley Collection & Recycling. They will accept TV's for no charge at their drop-off facility.

Drop-off Schedule

Tuesday through Thursday - 9 am to 11am
575 Charles Street, San Jose
(408) 283-9250
Call for directions and additional information or any questions you may want answered.

Sometimes West Valley Collection is also involved in an E-Waste event. They provide details on such events in their quarterly newsletter, or sometimes in a flyer with your monthly bill. The best place to find information is their web site, www.westvalleyrecycles.com.

For something closer to home, or perhaps on a weekend, look for an E-waste Recycling Event by a local school or non-profit.

There is one happening in Campbell to benefit the Campbell Historical Museum on February 14, 2009. (See next column)

You can also check the Santa Clara County website at www.sccgov.org, look for their "Home Electronics Recyclers List", or call (408) 299-7300 for additional information.

REAL ESTATE CONSULTANT; BA; MBA

CELL: 408.582.3202 RUHI@INTEROREALESTATE.COM WWW.RUHIHOMES.CO

Dear Ruhi,

Myself and my husband are thinking about selling out home. But given the current market we are a little hesita it out there. Do you have any adive on how to add value to our home, or make it more appealing to today's buyer s have our home sold quickly, regardless of the state of the market.

Sincerely,

Pat and John

Dear Pat and John,

Thank you for your question. In today's market it is imperative that the first impression your home gives off is the best one. A fresh coat of paint goes a long by far the most inexpensive way to give your home an updated look. Choosing neutral colors and staying away from pain white walls leaves a lasting impress suggest to my clients to de-clutter and stow away big pieces of furniture that otherwise make large rooms look small. Curb appeal is essential in getting poten through the front door. A green lawn, flowes, and power washed driveways are a few small things that can enhance the exterior appeal of your home. Lastly, p photographs and increased visibility on the web will present your home in the best light. In today's market the average number of days a home is sitting on th about 70, and the inventory level is high. It is in your best interest given the current market to take the time to do these small inexpensive projects, that will n value to your home but also put you one step ahead of the competition.

I always like to walk through my clients homes so that i can give more specific advice geared toward the specific hom. Don't be fooled with what you are rea cific news publications, good homes that show well are still getting multiple offers.

I would love to walk through your home to advise you on what to do to enhance the appeadl of your home. Please forward any real estate questions you may **ruhi@interorealestate.com.** *Best of luck and remember as your Campbell Listing Specialist I am here to serve you!*

Sincerely,
Ruhi

Volunteers look for trash in San Tomas Aquino Creek on International Coastal Cleanup day Sept. 20. The West Valley Clean Water Program organized the creek cleanup.

Creek gets a cleanup, thanks to volunteers

WV Clean Water organizes the day

By CHRIS VONGSARATH

Ava Hansen wasn't so much worried about why she was out picking up trash along San Tomas Aquino Creek as she was how much trash she could pick up. The 9-year-old Junior Girl Scout from Troop 60043 learned quickly the importance of keeping the environment clean and in its natural state.

"Lots of people pollute, and they don't care if they cause global warming or not," Ava said.

While not exactly reversing global warming, Ava and a handful of other scouts and volunteers did their part in an international effort to prevent trash from ending up in the planet's oceans.

As part of the International Coastal Cleanup, volunteers from around the world pitched in to pick up trash. Last year, almost 380,000 volunteers from 75 countries netted 6,075,698 pounds of trash.

Closer to home, volunteers cleared trash from Lexington Reservoir, Vasona Lake County Park and San Tomas Aquino Creek on Sept. 20.

Ava said she had a fun time learning about the creek. The scouts challenged each other to see who could find the weirdest thing, which turned out to be a live pig.

The West Valley Clean Water Program, which provides stormwater pollution prevention for Campbell, Saratoga, Los Gatos and Monte Sereno, organized the cleanup at San Tomas Aquino Creek.

Program assistant Kathy Ottenberg said cleaning up the creek goes past mere aesthetics. In addition to having an impact on wildlife, a polluted creek could directly impact residents.

Part of the group's mission is to make sure the municipalities it serves are in compliance with state-administered stormwater discharge permits, which are intended to keep California's waterways clear.

Too much pollution could prove costly to taxpayers because municipalities would have to pay to install inserts to trap trash at stormwater gutters, Ottenberg said.

"It can have a major impact on everybody, even in terms of taxes," Ottenberg said.

About 16 volunteers collected 120 pounds of trash and another 170 pounds of recyclables at San Tomas Aquino Creek, program assistant Patrick Hansen said.

Though the creek is closed off to the public, some people frequently trespass through the area, resulting in the litter. The city of Campbell and Santa Clara Valley

San Tomas Aquino Creek cleaned up by volunteers

By Chris Vongsarath
Campbell Reporter
Article Launched: 09/25/2008 02:26:24 PM PDT

Ava Hansen wasn't so much worried about why she was out picking up trash along San Tomas Aquino Creek as she was how much trash she could pick up. The 9-year-old Junior Girl Scout from Troop 60043 learned quickly the importance of keeping the environment clean and in its natural state.

"Lots of people pollute, and they don't care if they cause global warming or not," Ava said.

While not exactly reversing global warming, Ava and a handful of other scouts and volunteers did their part in an international effort to prevent trash from ending up in the planet's oceans.

As part of the International Coastal Cleanup, volunteers from around the world pitched in to pick up trash. Last year, almost 380,000 volunteers from 75 countries netted 6,075,698 pounds of trash.

Closer to home, volunteers cleared trash from Lexington Reservoir, Vasona Lake County Park and San Tomas Aquino Creek on Sept. 20.

"It can have a major impact on everybody, even in terms of taxes," Ottenberg said.

About 16 volunteers collected 120 pounds of trash and another 170 pounds of recyclables at San Tomas Aquino Creek, program assistant Patrick Hansen said.

Though the creek is closed off to the public, some people frequently trespass through the area, resulting in the litter. The city of Campbell and Santa Clara Valley Water District are installing a passive-use trail.

Hansen said opening up the creek to the public could present a hidden benefit.

"If there is a lot of trash out there, they'll notice it and want to do something about it," he said.

Sunnyvale resident Grace Siu, Ava's mother and leader of the troop, said her scouts have participated in creek cleanups before, but never as part of an international campaign. She said the scouts were up to the task.

Kelly Carroll
West Valley Clean Water Program
18041 Saratoga - Los Gatos Road
Monte Sereno, CA 95030
Phone: 408-354-4734; E-mail: kelly.westvalley@comcast.net

Dear Ms. Carroll:

On behalf of the Conference Steering Committee, thank you for agreeing to make the presentation, ***A Stormwater Campaign in Cartoons,*** at the upcoming ***5th National Conference on Nonpoint Source and Stormwater Outreach,*** May 11-14, 2009 at the Doubletree Hotel in Portland, Oregon. The Steering Committee, as well as the expected attendees, looks forward to a productive exchange of information and ideas on developing and implementing nonpoint source and stormwater outreach strategies.

Conference Format

The conference will run for three days: Tuesday through Thursday, May 12-14. In addition, four optional pre-conference workshops will be held Monday, May 11. A draft agenda is now available on the conference Web site at www.epa.gov/nps/outreach2009/agenda.html.

Your presentation is scheduled for:

Date: Wednesday, May 13

Time: 10:30 - 12:00 p.m.

Session Title: Pictures, Toons & Beyond

Presentation Title: A Stormwater Campaign in Cartoons

The amount of time allotted for your presentation (including any co-presenters you might have) is 30 minutes. Your presentation should be no longer than **20 minutes** so that there is adequate time for speaker introductions and audience questions.

Wednesday, May 13, 2009

7:30 a.m. – 4:00 p.m. **Conference Registration**

8:15 a.m. – 9:45 a.m. **Session A4: Programs Promoting Green Development** ..... Broadway Room

Moderator: Kathy Shay, City of Austin, Texas

— **Blue Thumb—Planting for Clean Water: Using Social Marketing Techniques to Promote Native Gardens, Rain Gardens and Shoreline Plantings within Priority Watershed Areas**
Angie Hong, East Metro Water Resource Education Program, Minnesota

— **Lake Clarity Crediting Program for Lake Tahoe**
Jeremy Sokulsky, Environmental Incentives, LLC, California

— **RiverSmart Homes**
Shelby Laubhan, District of Columbia Department of the Environment

Session B4: Reaching Our Audiences Through University-Based Outreach Programs ..... Multnomah Room

Moderator: Rebecca Power, Wisconsin Cooperative Extension

— **Stormwater Management in Your Backyard: An Extension Education Initiative**
Dr. Christopher Obropta, Rutgers Agricultural Experiment Station, New Jersey

— **Changing Public Behavior: Addressing the Challenges of Applying Social Assessment to Water Management Strategies**
Elaine Andrews and Kate Reilly, Environmental Resources Center, University of Wisconsin, Madison

9:45 a.m. – 10:15 a.m. **Break**

10:15 a.m. – 11:45 a.m. **Session A5: Pictures, Toons & Beyond** ..... Broadway Room

Moderator: Jennifer McDonnell, Tetra Tech, Inc., Virginia

— **Say It with Pictures: Training Kentucky Construction Site Workers in Erosion and Sediment Control**
Barry Tonning, Tetra Tech, Inc., Kentucky

— **A Stormwater Campaign in Cartoons**
Kathy Ottenberg and Kelly Carroll, West Valley Clean Water Program, California

— **Developing and Implementing a Comprehensive Surface Water Education and Outreach Plan for a Rural County**
Pat Pearson, Washington State University Jefferson County Extension

A Stormwater Campaign in Cartoons

Small Agency Uses Cartoons for Adding
Low-Budget Fun
to the Stormwater Message

1

Why Cartoons Appealed to Us

- *BUDGET:*
  We needed a low-budget 'BRAND' image, which could be used in a variety of media
- *COMMUNITY NEWSPAPERS:*
  We wanted to use our community Weekly Newspapers -- which are mailed to every household
- *BROAD AUDIENCE:*
  We wanted an image which would appeal to residents of all types: Parents, Young Adults, Seniors, Students, Teachers, etc.

6

Making it Work: 2 Characters

- *2 Characters works well*
  --2 characters allows for information through dialogue
  --2 characters allows for one to model "WRONG" behavior, & one to model "RIGHT" behavior

Modeling 'Wrong' & 'Right'

Dialogue = "Punch line"

20

Benefits - Brand Recognition

Cartoon characters present a consistent "brand" throughout a variety of **MESSAGES**

- *VARIATION among the STRIPS*
  The strip/characters will be recognized as your "BRAND" yet, they can convey a different message, by varying:
  --the background
  and
  --the "accessories"

12

Benefits - Big Message/ Small Size

- SPEND LESS ON AD SPACE
  --When buying ad space, you need only a small area = LESS COST
- FITS EASILY INTO 8" X 11" MUNICIPAL NEWSLETTERS
  Newsletter are on a tight budget, with limited page space
  They tend to have space for a cartoon, even if not for an article

cartoon in → Municipal Newsletter

10

Benefits - Eye-Catching & Fun

Cartoons draw an audience to look at them.

- *DESIRABLE TO EDITORS:* They add Graphic Interest
  -- Various newspapers have given a 50% PSA discount, in order to include these cartoons in their papers
  -- Municipal newsletters enjoy including the cartoons

15

Downtown Saratoga gives visitors to Big Basin Way a choice. Elia Betbadal puts his empty soda can in one of the recyling containers rather in the garbage.

Happy Earth Day

We're celebrating another one on April 22

Photographs by GEORGE SAKKESTAD

Earth Day was something of an enigma when it was first discussed at a conference in the fall of 1969.

What was the point of this special day designated for April 22 that would "inspire awareness and appreciation for the Earth's environment?" Back in 1969, it seemed to just follow the beat of the hippie generation and the Summer of Love.

Nearly 40 years later, though, we know better.

Earth Day, first celebrated on April 22, 1970, has grown to become a time when we collectively treasure our planet and share ideas for sustaining our resources.

In the West Valley, we are thinking about the Earth in our homes and schools, in our businesses and local governments.

It starts at home

Los Gatos homeowner P.K. Karnik believes in recycling, but when it came to remodeling his home, he took the concept to another level.

"I look at recycling in a different light," Karnik said. "My whole notion is reuse."

Karnik used Craig's List to unload many of the things he no longer wanted, but thought other people could use. "I advertised free windows to a needy home," he said. "This church contacted me saying they had a home in East San Jose in shambles that they wanted to turn into a daycare center, so I gave them all to them."

He did the same thing with faucets, sinks, chandeliers, mirrors, blinds, cabinets and toilets. "The toilets were 4 years old, and they probably would have ended up in a landfill," Karnik said. "They were picked up by a gentleman that remodeled his rental homes in San Jose. Normally, the faucets would have gone to a scrap yard and melted in a furnace. They were put into the rental houses, along with the sinks."

Karnik also found new homes for his old water heater, plus 14 doors and a lot of lumber. Some of the lumber was recycled to make wooden pellets, but much of it will be reused. "Some large timber was given to my construction crew," he said. "They plan to haul the load to Mexico and assist their poor relatives to build homes."

In explaining his preference to reuse things instead of recycling them, Karnik says, "I save a lot of energy in the crushing process. And there are so many places that need to get fixed. I feel very good about it."

Saratoga resident Hari Sripadanna is also feeling good about

A rain harvesting system can provide water for landscaping and vegetable gardens. At right, Monte Sereno resident Jerry Block talks to John Lewis of Rain Harvesting Systems about the installation of a harvesting system in his back yard. Above, Lewis installs water filtering rain gutter guards at Block's home.

his new home. The architect is waiting for an important piece of paper that says his house is certified LEED Gold—meaning it shows Leadership in Energy and Environmental Design. LEED is a point system developed by the U.S. Green Building Council.

Among other things, Sripadanna installed low-flow showerheads and faucets. A typical shower can use as much as 3 gallons of water a minute, while Sripadanna's use 1.75 gallons.

"What really surprised me was the faucets because they actually feel more forceful than a regular faucet," he said.

Sripadanna also says it has become much easier to build a green home today because the industry has caught up with people's ideas. "Architects have always talked sustainability, but now a lot of things have come together and it's become easier for us to do," he said. "What I want to share with everyone is it's in economic reach for everybody."

One of the more unusual things Sripadanna did was to install a "live" roof that is planted with succulents. It helps keep the house cool in the summer and warm in the winter.

Sripadanna said things like that can quickly add to the points needed for LEED certification.

Sripadanna also designed his home to take advantage of natural sunlight. "There's a quality of ambiance," he said. "You can't describe how it feels when the sun warms the house naturally. It gets low-angle winter sun but not summer sun."

One thing Sripadanna did not do is install solar panels. "If you do small things across the plain, you can get (LEED) credit quite easily without going to solar panels," Sripadanna said. "My house is so energy efficient that it beats the California energy code by 50 percent."

Even so, Kurt Newick of Campbell is a firm believer in solar. He is a solar salesman who is also the founder of the local chapter of the Sierra Club's Global Warming Committee.

"Solar electric panels are far and away the most popular technology," Newick said. "I sell about three or four systems a month."

He said homeowners who are thinking about going solar need to select a company that is both licensed and bonded. "The main thing is for the homeowner to feel comfortable with the person they select," he said. "If the contractor can't answer questions in a timely way, that's a red flag."

Newick also praised a new program started by San Jose-based Renewable Power Solutions that certifies solar installers. "A certification program is critical, especially since solar is pretty new," he said, "And it's a big expenditure."

Newick has just completed an analysis of the fees municipalities charge for permits for solar installations and the subsequent inspections.

"Los Gatos is one of the highest in the Bay Area," he said. Newick's analysis shows that Los Gatos charges $511, while Campbell comes in at $225 and Saratoga charges $92.

"Campbell and Los Gatos are pretty easy to deal with," Newick said. "Saratoga is probably the best. They're pretty easygoing."

Newick also said that perhaps the most important thing a homeowner can do before installing a solar system is to have a roof inspection and a shading analysis done. "This is where you separate the men from the boys. In Los Gatos and Saratoga you have a lot of mature trees. Solar needs sun, and even the wispiest amount of shade impacts the system," Newick said. "A sunny location now may not be sunny later on. And you have no legal recourse if a neighbor's tree grows and shades your array if the tree was there first."

The word sustainability has become interchangeable with green building practices, and Monte Sereno's Jerry Block has taken the concept to heart.

He just installed a 20,000-gallon rain harvesting system that will water his landscaping and vegetable garden.

But Block says being able to store that much water on his property could easily serve other purposes. "In an emergency it can be used for firefighting," he said, "and it could supply the whole neighborhood if there's an earthquake."

Block's system was installed by Fremont-based Rain Harvesting Systems.

Special eaves along the front and sides of his house capture the rain, which then flows through a series of pipes and into four tanks that can hold 5,000 gallons each.

Except for the tanks, the system is invisible.

If the tanks get too full, Block can release the excess and replenish groundwater supplies.

Right now, Block doesn't plan to use the water for drinking, washing or showering because he says there are too many hoops to go through to get approval for that.

However, installing a special filter and ultraviolet light could easily purify the rainwater.

Block also has an extensive solar installation, so he uses very little power from PG&E.

Coupled with his solar panels, Block's rainwater collection system is the next step in his quest to find independence. "This is a way for the everyday American to be a hero," he said. "Make a sacrifice to free us from foreign dependency and invest in your country's infrastructure."

—Judy Peterson

Coulomb Technologies president Praveen Mandal charges his car at a station in front of the company's Campbell headquarters.

Continued from page 19

Government does its part

In the past the onus was put on individuals and big businesses to help shape a more environmentally friendly future by recycling more and conserving energy and water.

But as the "going green" phenomena has sunk deeper into the consciousness of American culture, public agencies, including the cities of Campbell and Saratoga and the town of Los Gatos, have begun to do their part in the creation of a more sustainable future.

Each of the three municipalities has been certified as a green business by the Bay Area Green Business Program, which verifies and motivates businesses to meet higher standards of environmental performance. More than 1,600 businesses and public agencies have been certified since the program's inception in 1997.

The town of Los Gatos was certified as a green business two years ago but has been working steadily toward adopting greener practices for more than a decade.

The town council adopted a water efficiency ordinance in 1992 to promote the conservation and efficient use of water. Guidelines were approved in 2004 for voluntary green building standards on new construction; and in 2008, Los Gatos became the first municipality in Santa Clara County to enroll in the PG&E Climate Smart program, which will help the town offset all of its identified carbon emissions.

Just last year Los Gatos began the "Growing Green Together" campaign in an effort to educate the town's employees to be more environmentally conscious while at work. Each month has a different theme that offers tips for creating a greener workplace and home. Residents can also sign up to receive the same newsletter employees obtain.

Los Gatos High School students Olivia Warne (left) and McKenna Everett look over photographs on display at a show focused on sustainability. Los Gatos Mayor Mike Wasserman (second from right) and Los Gatos High assistant principal Scott Downs also check out the show held in conjunction with Earth Day.

"It's very important for businesses and residents to take personal responsibility. Individual action is going to be key to reducing our carbon footprint," said Regina Falkner, community services director for the town of Los Gatos.

Saratoga Mayor Chuck Page agreed and added that local governments need to do their fair share in creating positive change.

"It's important that governments show leadership and do what it's asking its citizens to do," he said.

The city of Saratoga has taken many steps to become a better steward of the environment, including going to "paperless" Saratoga City Council meetings, using biodegradable utensils and cups at city hall, replacing older light bulbs with more energy-efficient models and buying two hybrid cars to replace aging city vehicles.

This month the council approved an ordinance that amends the city code to include a compilation of existing "green" laws that promote sustainability through the reduction of greenhouse gases. Putting all the laws in one section makes it easier for residents to find out what ordinances the city has passed that promotes a greener Saratoga, Page said.

But no matter what efforts cities try to make to be better stewards of the environment, they will inevitably be constrained by time and money.

But, thanks to the federal stimulus package, the city of Campbell is entitled to a $163,000 grant that must go toward energy-efficient programs. The money could go toward a number of things, but the city might look into using the funds for a solar panel analysis, said Dan Rich, city manager for Campbell.

Like Saratoga, the city of Campbell also plans on going to "paperless" city council meetings. Many other city commissions have already gone paperless.

Although city council and staff are currently looking into what the city can do in the future to reduce its carbon footprint, the city has always been "pretty aggressive" about looking into greener programs before it became fashionable, Rich said.

Rich said there has always been a desire by elected officials and residents to look into creating green policies and adopting environmentally friendly business practices. Not only have the greener policies helped out the environment, they have also helped Campbell's bottom line.

"It also made good business sense," Rich said.

—Brian Babcock

A photograph of bicycles by Fisher Middle School seventh-grader Natasha Cougoule is part of the Earth Day photo show in Los Gatos.

Education is the key

Community members realize that teaching the youth of today is an important part of shaping the leaders of tomorrow. Educators, parents and students from around the West Valley used their own skills, expertise and passion to coordinate a number of different activities on and around April 22 with one shared goal—to promote the understanding and protection of Mother Earth.

From kindergarten to college, no grade level went unnoticed.

A used book sale was scheduled April 22 to emphasize going green through recycling in and around the campus center at West Valley College, 14000 Fruitvale Ave.

"Whether you call it reducing your carbon imprint or just saving a tree, the idea is there are many popular books that trade hands anyway," said George Mageles, community resource coordinator for student health services at West Valley College.

There will be hard- and soft-bound books for sale throughout the day, and the funds raised will benefit the school's classified staff scholarship.

Mageles anticipates selling the books will be a success because faculty and administration offered such generous support preparing for the event. They offered a wide array of donations after clearing bookshelves in their homes and offices.

Students and parents from Louise Van Meter Elementary School also used a book setting as inspiration for a project.

Third-graders from the school worked on art pieces from April 14 to 16, using objects they found while spring cleaning in their homes earlier this month, including VHS tapes and old toys.

"It was junk, but all of a sudden it was shiny and new. It was just a major shift of perspective," said Daniella Simon, a parent of a student attending Van Meter. "The whole idea was don't look at things in terms of throwaway."

The students will dedicate their eco-art projects on April 22 to the Los Gatos Library's Green Section. Simon said this is a natural setting to display the work since "the library is all about the three Rs—reduce, reuse, recycle."

Simon was inspired to lead the project a year ago after first reading about eco-artists who use such materials as bottle caps to make beautiful mosaics.

The project grew into a collaboration of Art Docents of Los Gatos, Los Gatos Library, the West Valley Green Leaf Committee and Van Meter.

Simon said there were different benefits in working on the artwork.

"There seems to be gap in terms of getting information to kids," Simon said, "and this is one of the big issues that is driving me at this point. They're inheriting everything. We have a very short period of time to retrain ourselves and retrain our children."

Students from Los Gatos High School, Fisher Middle School, Blossom Hill and Lexington elementary schools are also putting their artwork on display during a photography show focused on sustainability. The exhibit is scheduled for April 25 at the Los Gatos Civic Center, 110 E. Main St., from noon to 4 p.m.

The idea was for students to take pictures to "show us the world through their eyes," said Nate Donovan, Los Gatos High photography teacher. Students ventured into different parts of the community, including local businesses, to capture the environmental effects we all have during our day-to-day lives.

No matter who you are, eventu-

ally "we are going to run out of resources," said freshman McKenna Everett.

She took 200 photos for the project, one she said is important to raise community awareness. The photographs submitted varied in styles, from scenic to abstract to photojournalism.

A picture alone is worth 1,000 words, but the photos displayed together will allow residents to "see how it all feeds into the story," said Nicole Williams, a parent volunteer for the event. "When you look at them all collectively, it makes a fantastic impact."

—Shannon Barry

Green means business

Ungdo Shin cares about what he puts in his customers, so much so that he is willing to pay more for it.

The owner of Big Basin Café in Saratoga runs an all-organic shop, meaning everything from the products to how they are served come naturally from the earth.

"In order to serve organic coffee, the delivery system also has to be non-chemical," Shin says. "We couldn't use a so-called recyclable cup, which is cost-effective but is chemically infested. So, we use a biodegradable cup instead, or else there is no use in serving organic coffee."

The cost of using biodegradable materials can be up to three times more expensive, Shin says, but it allows him to be able to call his café a truly organic coffee shop. Biodegradable—as opposed to recyclable—materials can be mixed in with other waste without contaminating the soil. Recyclable materials, meanwhile, can only be recycled, as the chemicals to make them are not natural.

For its efforts, Big Basin Café, 14471 Big Basin Way, received high marks on ecovian.com, a site featuring green business reviews and topics. The coffee shop earned five-star ratings in both organic coffee and tea served and biodegradable containers used.

In addition to tasting better, the organic coffee and natural foods at Big Basin Café, as well as the containers they're served in, benefit the customers in the long run, too. Biodegradable means all-natural, and that reduces the amount of dioxins, known to be cancer causing agents, the body absorbs, Shin said.

"Some customers are aware of what organic really means and some customers just like the taste of our coffee. But knowledgeable people know about the advantages of having biodegradable coffee and materials," Shin said.

While some businesses are going green themselves, others are helping people become more eco-friendly. Campbell-based Coulomb Technologies has been quickly rising as the leading producer of electric vehicle charging stations.

A construction worker sorts through the lumber at the home of Los Gatos resident P.K. Karnik. The lumber will be recycled to make wooden pellets, or re-used on homes in Mexico.

A mattress floats in Lexington Reservoir. It's just one of the many such items volunteers will target at a Lexington cleanup day on May 16.

Many drivers of electric vehicles can only charge their cars at home, but Coulomb allows them to refuel at the workplace or when they're out and about. The company has stations up and running in San Jose and San Francisco and as far away as Amsterdam.

And with just about every major automaker shifting toward more fuel-efficient and eco-friendly cars, Coulomb's smart-charging stations may be popping up in more cities.

"All of the automakers are doing electric cars, and we'll see them emerge between now and 2012," said Richard Lowenthal, Coulomb's founder and CEO. "So, we're out there selling stations and creating interest, and it's a worldwide thing."

Because it takes anywhere from four to eight hours to fully charge a vehicle, stations must be strategically placed. Right now, Coulomb is targeting the workplace and downtown areas, places where people tend to be for an extended period of time. But as more electric vehicles begin to hit the road, Coulomb may be looking to add stations at recreational venues, such as ballparks and arenas, Lowenthal said.

Lowenthal projects that in the next five years there will be remarkable advances in the industry, with more electric cars, charging stations and technology streamlining the two. Electric vehicles could be charging in a matter of minutes and drivers could be recharging at service stations, the way how most people do now at gas stations.

Most of these initiatives, Lowenthal says, will be made possible through the stimulus package.

"It's a good time to be doing green programs, especially green transportation," Lowenthal said. "It's good for cities to say, 'We're going to be electric vehicle-welcoming.' "

Also getting a boost from the stimulus package is Akeena Solar in Los Gatos. It may be nothing new to see solar panels on residential and commercials roofs these days, as property owners are beginning to invest in renewable energy. But Akeena is preparing for the next phase of clean technology: mixing aesthetics with being eco-friendly.

The latest solar panel from Akeena comes with a non-bulky, sleek design, but still has the reliability to last over time. The jet-black panels can be installed closer to the surface of the roof, limiting their visibility to onlookers.

When consumers begin looking for beauty to go with the brains, it's a sign that new technology has caught on.

"Without a doubt, as solar becomes more mainstream, you see that families are looking for panels that will reduce electricity bills and plus will also look well on a person's home," said Jose Tengco of Akeena Solar. "We've worked hard to ensure that we can provide the best looking and most reliable panels on the market."

The hardest part for those thinking about going solar is making the investment, but even that is starting to change. With solar power becoming more available, the price to make the switch is getting cheaper, Tengco said.

According to a study by the California Public Utilities Commission, Californians in 2008 "installed twice as many megawatts of solar power than the year before, and demand for new solar projects continues to hit record levels." Moreover, the California Solar Initiative led to more than $5 billion worth of private investment in solar projects.

"Clearly, with the going green movement and climate change, people are turning to renewable energy. And from an economic view, they find they are getting a strong return on the money invested today, so it becomes a win-win," Tengco said. "Families get to reduce electricity costs and at the same time address climate change."

Series of local events related to Earth Day

Although Earth Day is officially April 22, many Earth Day-related activities will be held throughout the week and are listed below:

Life lab—On April 22 staff and students from Saratoga Elementary School will honor Earth Day with the official opening of their Life Lab Garden. There will be different displays and presentations from 9 a.m. to 2:30 p.m. in the outdoor classroom of the school, 14592 Oak St., including water filtration systems, insects of the garden, worm composting and solar cooking.

Used book sale—A used book sale is being held April 22 to emphasize going green through recycling in and around the campus center at West Valley College, 14000 Fruitvale Ave. in Saratoga. The event is a fundraiser for the school's classified staff scholarship.

Arbor Day—A tree-planting ceremony takes place April 24 at 10 a.m. at La Rinconada Park, Wedgewood Drive and Granada Way.

Another Arbor Day celebration— The city of Saratoga will celebrate trees on Arbor Day with a community gathering at Beauchamps Park, between Beauchamps Lane and Bowhill Court. The event will be held on April 24 at 3:30 p.m. Residents can help plant a tree, learn more about the trees in Saratoga and can take a seedling home that they can plant themselves.

Highway 9 clean-up—Five local Rotary Clubs, including those from Saratoga, Los Gatos, Campbell and Cupertino, are sponsoring the "Great Highway 9 Cleanup" on April 25. Volunteers for the cleanup are asked to meet at the La Hacienda Inn, 18840 Los Gatos-Saratoga Blvd., at 9 a.m. for a free breakfast. Volunteers and Rotarians will then pick up trash along Highway 9 for a couple of hours before being treated to a barbecue.

VOLUME 126, NUMBER 7 LOS GATOS, CALIFORNIA FEBRUARY 17, 2009

Photograph by Neal Waters

Gardener Arthur Ragan, raking leaves in front of the Wells Fargo building on N. Santa Cruz Avenue in downtown Los Gatos, is among the Allied Landscape Services employees to be certified a Green Gardener in the West Valley Clean Water Program. The program serves Los Gatos, Monte Sereno, Saratoga and Campbell.

Class helps gardeners join the green team

Program has been winning awards

By JUDY PETERSON

A green gardening program that was developed in part by the West Valley Clean Water Program has been winning awards for its innovative ideas.

The clean water program, which serves Los Gatos, Monte Sereno, Saratoga and Campbell, was created to control pollution being dumped into creeks, streams and stormwater drains.

Recently, the California Stormwater Quality Association honored the Green Gardener program with an outreach award for the work it has done with small landscaping contractors.

"It was a 10-week course to educate landscape professionals on what type of environmentally safe practices are out there in place of the norm," Tito Fonseca of Allied Landscape Services said.

Fonseca and two other Allied employees were among the first to become certified Green Gardeners.

"It taught us simple gardening practices like pruning techniques, composting and minimizing water use," he said.

The latter will become even more important as water rationing is expected to be mandated in Santa Clara County beginning next month.

"We learned to use mulch over bare soil to keep water in the ground," Fonseca said.

The program also focused on minimizing the use of herbicides. "The chemical industry does a very good job advertising their products," he added, "but they don't touch on the environmental impact chemicals have."

Fonseca works with clients in both Los Gatos and Campbell.

"Green gardening is becoming more and more important to clients. Customers want to see that contractors are educated and doing what we can to preserve, protect and not pollute their property," Fonseca said.

Solutions Gardening Service owner Abel Yanez agrees.

"We wanted to separate ourselves from regular gardeners to see how we could help customers save water," Yanez said.

Yanez is using his newfound skills at customers' properties in Campbell, Saratoga and elsewhere.

"We're trying to re-layout sprinkler systems, and we're changing to organic fertilizer to help with the environment," he said.

One of the important things Yanez learned was how to test soil so that the right plants are properly placed. "You plant here and there," he said. "Now we know exactly what to do."

Yanez described the Green Gardener program as very beneficial. "We are planning to send five more people," he added.

"inadequate community facilities: e.g. the lack of a performing arts center and an inadequate library." This was 18 years ago.

Redevelopment money has funded a wide variety of improvements, including the town plaza, street reconstruction and a contribution to the high school pool.

We support the use of redevelopment funds for a new library.

ANN ROBERTS, PRESIDENT
LWV of Southwest Santa Clara Valley

More support for a library in Los Gatos

I support Los Gatos building a new public library. I *do not* support cleverly worded, misleading petitions.

ALICE H. HANSEN
Los Gatos

Blanket ban at concerts is ridiculous

Banning blankets at the local summer concerts—now I have heard everything. You either have concerts and have a fun atmosphere or you don't. The grass recovers after the concert season. It has looked fine for months.

this town that I would fight for their park.

It was another member of the skateboard park committee who decided to use paid petitioners and paid them. Steve Glickman did not hire the petitioners. They got the job done. Yes, we were beaten in the election due to dirty politics and a dirtier press. I would be happy to expound upon that at another time. The residents voted, and for whatever reason, they voted against building the park.

You talk about money wasted on elections. The town council spent more than $500,000 on surveys that concluded if the construction of a new library went to a vote, it would be turned down. Don't get me wrong; I am in support of a new library. However, there are more efficient plans and ideas that will cost far less. That is why it is so important to allow the voters to decide how the town spends taxpayer money on major projects. Why have this and other extreme expenditures pushed down our collective throats?

If you, the voter, decide to spend $18 million on a library, then I'm all for it. We have been told that the money is coming from redevelopment funds, but that is only $12 million. The rest will come out of the town gener-

worked with the developer on the First Republic building was interesting. Look at the building. It has Tuscan columns holding up arches here, Mission-like but fake Corbel-looking shapes holding up straight openings over there, windows with wood shutters, palladium windows with and without columns, straight windows without adornment, Craftsman-style exposed knee braces and an oversized tile roof. That it came out OK is testament to the developer, but stylistically it's a Tuscan, Mission, Monterey, Craftsman mess—definitely the kind of thing a committee would produce.

Let's let some originality happen. Look at what's going on in other places, countries, cities. Curious juxtapositions of color, shape and style create visual interest, not discord. Designing harmonious sameness will give us a look that one can understand easily in one pass. Los Gatos can be a much more interesting place than that. Let's allow some creativity, expressiveness, even oddness to happen here. We don't want to be known as a city of conformity, do we?

GEORGE HAVELKA

CREEK CONNECTIONS ACTION GROUP

Watershed Watch
Protect Our Creeks And Bay

Participating sponsors: Santa Clara Valey Water District, City of San Jose, Santa Clara County Parks, and Watershed Watch.
Participating agencies: Lockheed Martin SSC Leadership Association, San Francisquito Watershed Council, San Francisquito Watershed Project, Santa Clara Valley Urban Runoff Pollution Prevention Program, West Valley Clean Water Program, and the cities of Cupertino, Gilroy, Mountain View, Palo Alto and Sunnyvale.
Participating groups: Apollo High School, Blackford Neighborhood Action Coalition, Forest Hills Elementary School, Friends of Los Alamitos Watershed, San Tomas West Neighborhood Association, Save the Bay, and Silicon Valley NAACP.
Participating companies: Bianchi-Amaker Construction, Callahan Real Estate Group - Coldwell, and Intel Corporation.
Participating donors: Children's Discovery Museum of San Jose, City of San Jose Parks, Recreation, and Neighborhood Services (Happy Hollow Park and Zoo), Classic Carwash, Hobee's California Restaurants, In-N-Out Burger, San Jose Repertory Theatre, San Francisco 49ers

Subject: "Enviroscape" at Audubon Society Wildlife Education Day
Date: Tuesday, October 28, 2008 10:52 AM
From: Marj Ottenberg <marjott@yahoo.com>
To: <kelly.westvalley@comcast.net>

Kelly Carroll
West Valley Clean Water Program,
18041 Saratoga-Los Gatos Rd., Monte Sereno, CA 95030

Dear Ms. Carroll--first, let me say I wanted to send this by U.S. Mail--and have been trying for 3 days--but my printer refuses to accept my requests! So, I fall back on electronic mail!

Our Sierra Club group was THRILLED to have Patrick Hansen bring your Enviro-scape to share our space at Santa Clara Valley Audubon Society's annual Wildlife Education Day! It was the HIT of our corner of the affair! We especially appreciate the fact that it educates parents along with the kids-- who are enjoying squirting and sprinkling the various "contaminants" on the "environment"--and watching it wash into gutter to creek to Bay. Hopefully, these kids will CONTINUE to prod parents and friends, NOT to thoughtlessly discard stuff, because they now KNOW what harm such actions can cause! Patrick did an outstanding job, relating to the kids and "telling his story". I don't have a count of attendees--but everyone had to park at Monte Vista High School, about a mile up McClellan Road, and SCVAS hired school buses to ferry people from parking lot to the "party", and back again throughout the day (no cost to riders!); that parking lot was almost
completely full all day--so we know LOTS of people came! SCVAS covers the south half (and perhaps more) of Santa Clara County; they have active programs for kids as well as adults, including classroom sessions in local schools; (their monthly lecture meetings--in Palo Alto and Campbell-- draw several hundred members! I wish our Sierra Club Group could do as well!)
I was quite interested in your "mercury-free" thermometers--FAR superior to the old glass ones in many ways! I'd like to buy a few of them, to show to Sierra Club trip leaders--who are responsible for health care for trip participants. Next time I'm in Monte Sereno, I may stop by----
meanwhile, you and Patrick have our sincere THANKS! for helping us educate (and entertain) a LOT of local residents!
Marjorie Ottenberg, Program Chair, Guadalupe Regional Group, Loma Prieta Chapter, Sierra Club.

Discovery Day Enviroscape Presentation Outline

Intro: Hello My name is…

Background on the West Valley Clean Water Program….

Questions:

1. What is nonpoint source pollution?
2. What is point source pollution?
3. What is a watershed and water cycle?
4. What is the difference between a sanitary sewer system and a storm drain system?

Provide background information to audience:

What is a coastal zone? Answer Page 7. Give examples of local SF bay.

Importance of coastal wetlands.

How coastal zones are affected by water pollution.

a. Car Washing (Talk about Car Wash Kit)
b. Pet Waste
c. Hazardous Materials
d. Paint
e. Swimming Pools
f. Trash
g. Pesticides

What the West Valley Clean Water Program does and how you can help.

a. Take car to carwash, or ask about carwash kit for fundraisers
b. Reuse mugs, canvas bags etc., wrapping paper..
c. Participate in creek cleanups, pick up trash if you see it.

Play on Enviroscape model.

Dear Patrick, Kelly, and Christine,

The Sedgwick PTA, Sedgwick Staff, students and parents would like to say "Thank You" for participating in Discovery Day 2009! The students thoroughly enjoyed your presentation on Preventing Watershed Pollution. This important presentation made an impact on the students, including my 3rd grader who came home talking about how he can keep the waterways cleaner by picking up garbage by the drains and by the sidewalks.

Discover Day is a proud Sedgwick tradition that our children enjoy very much. We sincerely appreciate you taking time out of your schedule to help educate our kids. I am enclosing thank-you letters written by the children of Sedgwick Elementary.

Sincerely,
Tracey Trimeloni
PTA volunteer

WVCWP School Presentation Feedback

Thank you for inviting the West Valley Clean Water Program to give our watershed presentation. We ask you to please take the time to fill out this form. Your feedback will help us to deliver better presentations in the future. Please circle the number that corresponds with your opinion for each category. Circle 5 if you strongly agree with the statement, 4 if you agree, 3 if you are neutral, 2 if you disagree, and 1 if you strongly disagree.

A. OVERALL	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree
1. Setting/Room was pleasant	1	2	3	4	5
2. Materials used were useful	1	2	3	4	5
3. Content was interesting	1	2	3	4	5
4. Participants learned a lot	1	2	3	4	5
B. Speakers					
1. Speakers were knowledgeable	1	2	3	4	5
2. Speakers able to answer questions	1	2	3	4	5
3. Speakers kept audience interested/engaged	1	2	3	4	5
C. Results					
1. Presentation improved the students understanding of watersheds and urban run-off	1	2	3	4	5
2. I would consider having the WVCWP present at future events.	1	2	3	4	5

Comments:

Patrick was good with kids. He was on time and even got through everything he needed to do with the kids with the shorter time frame. The kids really enjoyed the hands on. Thank you so much. Sincerely Chris Daly

Created 7/23/08 PH

Annual Cleanup Program

West Valley Collection & Recycling (WVC&R) will collect an unlimited number of items from your curb at no additional cost for one day only.

Please have your items, containers and bundles curbside by

6 AM on Wednesday, August 27, 2008

WVC&R will collect:

- Items weighing up to 70 pounds (except as described below)
- Garbage in 32 gallon plastic bags, 32 gallon cans, and sturdy cardboard boxes (all small items must be contained)
- Tree prunings, branches and scrap wood up to 3" in diameter and 3' long in tied bundles weighing up to 70 pounds

WVC&R will not collect:

- 35, 65 or 95 gallon wheeled carts (they are awkward to lift manually)
- Concrete or Dirt (call Guadalupe Landfill 408.268.1670)
- Tires (call Guadalupe Landfill 408.268.1670)
- Items containing CFC's such as refrigerators (call WVC&R 408.283.9250)
- Household Hazardous Waste (call 408.299.7300 or visit www.hhw.org)
- E-Waste, Universal Waste, Motor Oil and Water Based Paints:
  - You can drop off TV's, Computers, household batteries, motor oil and water based paints at WVC&R's processing facility by appointment. For more information call customer service at 408.283.9250 or visit www.westvalleyrecycles.com
- Large items or containers over 70 pounds:
  - WVC&R will collect large items such as sofas and refrigerators for a fee. To schedule an appointment please call customer service at 408.283.9250

WVC&R makes it easy for you to donate your reusable items. For assistance locating local charitable organizations, visit www.westvalleyrecycles.com or call 408.283.9250.

Please remember to place recyclables in your recycling cart for your regular weekly collection.

To learn more about any of these programs visit www.westvalleyrecycles.com or call customer service at 408.283.9250.

BILL PAY THE EASY WAY

West Valley Collection & Recycling has made it easier than ever to pay your bill. Choose the method that works best for you.

Mail it: Make your check payable to West Valley Collection & Recycling. Be sure to include the payment stub to get credit for your payment right away. Use the pre-addressed envelope included with your bill.

Drop it off: We accept payments at our office Monday through Friday from 8 AM – 4:30 PM

Deliver checks to:
West Valley
Collection & Recycling
1333 Oakland Road,
San Jose, CA 95112

Pay / View Your Bill Online: Visit our new online payment system at www.wasteconnections.com; click on "Online Bill-Pay" and follow a few simple instructions. You must have your current invoice and credit card or debit card information available.

Home banking customers continue to use the remit address:

West Valley
Collection & Recycling
Dept. 1433
Los Angeles, CA 90084-1433

You must have your current invoice available.

Have questions about your recycling service?

Ask Randy

Q: What do I do with my used charcoal?

A: You can recycle charcoal. When you finish cooking, pour water on the briquettes. Let them dry thoroughly. Next time you grill, mix half new charcoal with half used.

The absolute safest way to dispose of ashes, regardless of whether they're red-hot or seemingly stone-cold, is to put them in a small, galvanized metal trash can that is dedicated to the purpose of ash storage. Keep the can away from any flammable materials, like your house, wood pile, dry grass, or weeds. Once ashes are completely cold bag them before placing into your garbage cart. If a dedicated ash container is not an option, stir through the ashes to make sure they are absolutely cold before placing them in the your garbage cart.

Remember, even ashes that seem cold on the surface may still be hot deep inside, even after sitting for two days, so wait at least 48 hours before disposing of them in the garbage.

AT YOUR SERVICE: Curbside Collection for Used Motor Oil

Summer's here and time to get the car in tip-top shape. West Valley Collection & Recycling provides FREE containers for your used motor oil so you can keep your car running smoothly, and help our collection go smoothly, too.

Call customer service at **(408) 283-9250** to order your FREE OIL JUGS AND OIL FILTER BAGS and WVC&R will deliver them curbside on your next collection day.

Schedule a drop off appointment for the items listed below by calling (408) 283-9250:

- ✓ Used motor oil and oil filters
- ✓ Water based paints
- ✓ Universal Waste = batteries, fluorescent tubes and bulbs and other mercury containing lamps, thermostats, electronic devices, electrical switches and relays, pilot light sensors, mercury gauges, mercury added novelties, mercury thermostats and non-empty aerosol cans that contained hazardous materials.
- ✓ E-Waste = televisions and computer monitors, CPUs, laptop computers, external computer hard drives, computer keyboards, computer mice, computer printers, DVDs and VCRs.

IMPORTANT TO NOTE:

West Valley Recycles! Summer 2008

SPLIT BODY TRUCKS: Keeping Your Yard Trimmings and Garbage Separate

It's been more than a year since West Valley Collection & Recycling began the single-stream recycling program and rolled out our new split body trucks.

Our split body trucks have made a big difference in the neighborhoods they serve on trash day, because now in most neighborhoods one truck collects all garbage and yard trimmings, where previously two were needed.

Look for new labels on the back of the trucks identifying the material in each side. The collection compartment of these trucks are completely separate with garbage occupying 40% of the capacity, and yard waste filling the other 60%. The driver maneuvers the hydraulic arm to lift and empty the contents of your garbage and yard waste cart into the chute. After tipping the cart, the driver uses a toggle switch to direct the flow of material into the appropriate chamber, keeping the two materials completely separate. The result of using split body trucks: fewer trucks moving through our neighborhoods on collection day, fewer trips to the landfill, less wear and tear on our roads, less pollution, and fewer greenhouse gasses. Next time you see these trucks on collection day, they may appear to be white, but now you know, they are really pretty green.

Remember, Keep your yard trimmings "Green" and your recyclables clean by keeping all garbage out of your yard trimmings and recycling cart. Garbage contaminates recyclable materials.

KEEP UP THE GOOD WORK!

West Valley Collection & Recycling customers are loving single-stream recycling. The use of split body trucks mean less noise and pollution and the single-stream system means more efficient collection. Everyone is doing a great job.

Here are a few reminders to ensure collection days keep running smoothly and our neighborhood streets stay clean and neat too. Remember:

- Place carts with the wheels against the curb, at least two feet apart.
- Situate carts at least five feet away from vehicles and other obstructions such as basketball hoops.
- Secure light items such as plastic grocery bags and packing peanuts in bags to eliminate litter.
- Flatten and breakdown all cardboard. This will maximize the capacity available in your recycling carts.
- Do NOT overstuff carts.
- Please be sure lids are closed.
- Keep Recycling.

Don't Get Stuck with Your Sharps–Dispose of Them Properly

PROPERLY AND SAFELY DISPOSE OF YOUR SHARPS–HERE'S HOW:

✦ **Pharmacies, Doctor's Offices or Clinics:** Place your used home-generated sharps in a biohazard commercial sharps container and contact your Pharmacist, Clinic Administrator, or personal Physician, and ask if they have a take back program in effect. Sharps containers can be purchased at your local pharmacy.

✦ **Mail Back Services:** If you purchase sharps on-line, please remember to request a pre-addressed, prepaid mail-back box for your used sharps. A list of mail back services approved by the California Department of Public Health can be found at the following website: www.cdph.ca.gov/certlic/medicalwaste

✦ **Santa Clara County Household Hazardous Waste (HHW) Program:** The HHW Program accepts sharps waste, pharmaceuticals (No Controlled Substances), and other household hazardous waste from Santa Clara County residents (except Palo Alto residents). For more information on pharmacies and other locations that accept used sharps or to make an appointment to dispose of your sharps, visit **www.hhw.org** or call **(408) 299-7300**. Remember, residents must place their used sharps in a biohazard commercial sharps container.

Home generated sharps are needles, syringes, and lancets that assist people who use sharps or syringes at home to manage an illness. When sharps are improperly disposed of they pose a threat to sanitation workers, adults, children, and even pets with needle-stick injuries. Because of the high risk to the community and environment, Senate Bill 1305 was passed and will take effect on September 2008. This law makes it illegal to place home generated sharps in the trash or recyclable containers.

West Valley Recycles!

Spring 2009

THEY'RE COMING, THEY'RE FREE!

Electronic Waste Drop-off Events are the Place to Be

West Valley Collection & Recycling is sponsoring three FREE e-Waste Drop Off Events this spring.

HERE'S WHY:

Toxic substances in electronic waste include lead, mercury, and cadmium. A typical computer monitor may contain more than 6% lead by weight. Capacitors, transformers, PVC-insulated wires, and PVC-coated components are loaded with toxins and carcinogens. In the U. S., an estimated 70% of heavy metals in landfills come from discarded electronics. Electronics do not belong in the trash!

HERE'S WHERE & WHEN:

April 25th, 2008 9:00 AM - 2:00 PM
City of Saratoga, North Campus
19848 Prospect Road, Saratoga, CA

April 25th, 2008 9:00 AM - 2:00 PM
Los Gatos United Methodist Church
111 Church Street, Los Gatos, CA

April 18th, 2008 9:00 AM - 2:00 PM
Campbell United Church of Christ
400 West Campbell Ave, Campbell, CA

HERE'S WHAT:

Unlimited amount of TVs, Computers, Monitors, Electronic Toys, Fax Machines, Phones, Copiers, HDTVs, LCDs, typewriters and Stereos including speakers will be accepted at these events.

However, we do *not* accept light bulbs, kitchen appliances or hazardous waste.

Congratulations, 2008 E-Waste Recyclers!

COLLECTIONS WERE A SMASHING SUCCESS.

Last year, a total of 169,776 pounds of E-Waste was collected from Campbell, Los Gatos, Saratoga and Monte Sereno residents who participated in our E-Waste Drop Off events. That's 169,776 pounds of dead monitors, outdated cellphones and ancient fax machines. This year, let's work together to set a new standard for the collection of Electronic waste.

Clutter Busting

Here comes spring! Let's enjoy the many reasons to get outside and enjoy the outdoors: great weather, flowering trees, tulip bulbs pushing their way towards the sun. The fact that our houses are filled to the brim with clutter—the aftermath of a long, cold, winter is another reason to get out of the house. Here are some ideas to de-clutter the house and enjoy the outdoors too. These tips make the job easy. First, organize what is not trash into three labeled piles: sell, donate, or recycle. Next, get to work:

Have a garage sale or even better, organize a neighborhood garage sale. Better yet, get your *neighbor* to organize it!.

Donate your gently used clothing, books, furniture and working appliances to a local thrift store benefiting charity. Some organizations provide pick-up service, and all of them should provide you with a donation receipt to use as a write off on your income taxes.

Create a compost pile with your tree trimmings and lawn clippings. (Remember, May flowers are right around the corner-this compost will come in handy later.)

Participate in the West Valley Collection and Recycling Clean Up Event. It's free and it's easy. We'll collect an unlimited amount of your items at the curb on your neighborhood's designated day. Items weighting over 70 pounds will not be accepted. Look for our flyer in the mail two weeks prior to the event.

Request a bulky item pick-up. We'll pick things up from your curb for a small fee. Just call customer service at **(408) 283-9250**, we'll be right over.

Recycle items that can't be reused.

Put hazardous waste in its place. Batteries, light bulbs and water based paints do not belong in our landfill. They can be dropped off along with electronic devices at our facility. Check out www.westvalleyrecycles.com ewaste and universal drop off for more information.

Drop off your e-waste. The televisions, computers stuff, and vintage VCRs that didn't get picked up at the big garage sale can be dropped at the ewaste events coming up. Check out the e-waste article in this issue for what to bring, our hours and directions.

Los Angeles CA 90060-0248

You must have your current invoice available.

Have questions about your recycling service?

Ask Randy

Q: I am going to bring my old video cameras to an e-waste drop-off location this spring. May I also bring my bottles of pesticides that I no longer use?

A: No. The Electronic Waste Events are computers, monitors, mice, keyboards, cellphones, cameras, old fax machines, and the like, not hazardous materials. Automotive fluids, lawn and garden chemicals, and household cleaners and poisons, can be disposed through the Santa Clara County Hazardous Waste Recycling and Disposal Program. For details, call **(408) 299-7300** or visit **www.hhw.org**. *To submit a question for "Ask Randy" send him an e-mail at customerservice@westvalleyrecycles.com with "Ask Randy" in the subject line.*

Greening your Cleaning

Get all of the dirt on how to clean your home in a planet-friendly way. Just in time for spring! Make your mother proud. Mother Earth, that is.

Floors: Vinegar is an excellent cleaner for ceramic tile or linoleum. Used straight or mixed with water, vinegar and a sturdy mop are all you need for a green, squeaky-clean kitchen floor.

Sinks: One part vinegar, four parts baking soda and several drops of your favorite essential oil(s) makes for a pleasant, earth-friendly sink scrub. Just like the store bought kind, apply the paste with a sponge, let sit for a few minutes then rinse for a sparkling clean sink.

Windows: Vinegar again, this time in a spray bottle. Wiping vinegar-sprayed glass with crumpled newspaper will make your windows shine bright. Don't clean windows when they're in direct sunlight, because they will dry too fast and look "streaky."

Rugs: Shake baking soda over the carpeting before vacuuming to help to absorb odors. For spot cleaning, rely on your old friend, vinegar. Spray it on, scrub out the spot with a clean cloth. Don't worry; the vinegar smell is gone in no time.

Furniture: Sprinkle stale cushions and chairs with baking soda, then vacuum after letting it sit for a while.

Toilet and Tub: Spray with vinegar first, then sprinkle on baking soda for natural, fizzy cleaning power. Scrub with a sponge or toilet brush, then rinse clean or flush.

Garbage cans: Borax is a mineral that will prevent mold and fungus, and keep away insects. Just sprinkle on the bottom of your carts or household cans.

Bad Smells: Zeolite* is a natural mineral that absorbs odors and also controls excess moisture in the air. Use it as a general deodorizer and to combat mildew or mold.

***Bonus!** When used in refrigerators and freezers, Zeolite can reduce electricity cost by up to 12% by maintaining optimum humidity, and it helps keep food fresher.

More Green Cleaning is Just a Click Away

Environmental Home Center is an online source for green building supplies, including people-friendly cleaning supplies, non-toxic paint, natural carpets, sustainable wood products, and energy-efficient insulation. (www.environmentalhomecenter.com).

Seventh Generation (www.seventhgeneration.com), the leading seller of green cleaning products in North America, offers tips on green cleaning.

The Green Guide (www.thegreenguide.com) provides consumers with practical, everyday household- and market-level actions that can yield system-wide environmental, health, and social change.

How To Eliminate Litter

Remember to place all loose light items such as shredded paper, plastic grocery bags, styrofoam packing peanuts and any other items in a tied plastic bag before placing in your cart.

Cart Labeling

You may see WVC&R supervisors in specific neighborhoods labeling garbage, recycling, and yard waste carts with address numbers. This will help differentiate your cart from your neighbors.

RESIDENTIAL

West Valley Recycles!

Fall 2008

DON'T GET STUCK WITH YOUR SHARPS: Dispose Of Them Properly!

On September 1, 2008, a new law has taken effect, which will make it illegal to place home generated sharps in trash or recycling receptacles. Home generated sharps are needles, syringes, and lancets that assist people who use sharps or syringes at home to manage an illness. When sharps are improperly disposed of they pose a threat to children, adults, sanitation workers, and even pets. Here's how to properly and safely dispose of your sharps:

Note: Residents MUST place sharps in a biohazard sharps container, which are available for purchase at your local pharmacy, before bringing to any of the approved sharps drop-off locations.

✦ **Pharmacies, Doctor's Offices or Clinics:** Contact your local Pharmacy, Medical Clinic, or personal Physician and ask if they can start a take back program.

✦ **Mail Back Services:** If you purchase sharps on-line, please remember to request a pre-addressed, prepaid mail-back box for your used sharps. A list of mail back services can be found at **http://www.cdph.ca.gov/certlic/medicalwaste**

✦ **Santa Clara County Household Hazardous Waste (HHW) Program:** For more information on pharmacies and other locations that accept used sharps, or if there is not a location near you to take back your sharps, contact The Household Hazardous Waste Program at **www.hhw.org** or call 408-299-7300.

SHARPS TAKE-BACK LOCATIONS IN THE WEST VALLEY AREA

Call for packaging requirements before you bring used household syringes, needles, and lancets to the following drop off locations:

CAMPBELL

Kaiser Permanente
Campbell Medical Offices
220 E. Hacienda Avenue, Campbell
(408) 871-6500
(for Kaiser Members only)

LOS GATOS

Shannon Road Fire Station
16565 Shannon Rd, Los Gatos
Biohazard Sharps Container Size Requirement: One quart or one and half quart size for drop off box

Community Hospital, Los Gatos
815 Pollard Road, Los Gatos
(408) 378-6131

B M A Dialysis
14651 S. Bascom, Los Gatos
(408) 358-3791
(for B M A Patients only)

Mission Oaks Campus of Good Samaritan
15891 Los Gatos Almaden Rd
Los Gatos **(408) 356-4111**

SARATOGA

West Valley Fire Station
19800 Cox Avenue, Saratoga
Biohazard Sharps Container Size Requirement: One quart or one and half quart size for drop off box

COUNTY OF SANTA CLARA, HOUSEHOLD HAZARDOUS WASTE (HHW) PROGRAM

Deposit used home-generated sharps into a biohazard sharps container, when the container is ¾ full permanently seal shut and make an appointment through our website at **www.hhw.org** or call **(408)-299-7300**

HOLIDAY SCHEDULE

Collection occurs on all holidays except December 25th and January 1st.

Both December 25th 2008 and January 1st 2009 fall on Thursday. During these weeks, if your regular collection day is Thursday collection will occur on Friday. If your regular collection day is Friday collection will occur on Saturday. No other collection days will be affected.

HOLIDAY TREE COLLECTION

Beginning December 26th 2008 and continuing through January 25th 2009, WVC&R will collect up to two Holiday trees per residence as part of your regular collection.

- Undecorated natural or flocked holiday trees are acceptable.
- Please remove stands, tinsel and decorations.
- All trees must be cut into 5-foot or preferably shorter lengths.
- Place the tree at least one foot away from WVC&R carts.

To receive your FREE recycling "How-to Guide," call Customer Service at (408) 283-9250 or visit www.westvalleyrecycles.com

HOLIDAY TREE SETOUT

West Valley Recycles! | Fall 2008

BILL PAY THE EASY WAY

West Valley Collection & Recycling has made it easier than ever to pay your bill. Choose the method that works best for you.

Mail it. Make your check payable to West Valley Collection & Recycling. Be sure to include the payment stub to get credit for your payment right away. Use the pre-addressed envelope included with your bill.

Drop it off. We accept payments at our office Monday through Friday from 8 AM – 4:30 PM

Deliver checks to:
West Valley
Collection & Recycling
1333 Oakland Road,
San Jose, CA 95112

Pay / View Your Bill Online. Visit our new online payment system at www.wasteconnections.com; click on "Online Bill-Pay" and follow a few simple instructions. You must have your current invoice and credit card or debit card information available.

Home banking customers continue to use the remit address:

West Valley
Collection & Recycling
PO BOX 60248
Los Angeles CA 90060-0248

You must have your current invoice available.

Have questions about your recycling service?

Ask Randy

Q: With the Holidays around the corner, I'm very interested in finding a way to eliminate waste and complete the recycling loop by giving to others. I just don't know where to begin.

A: Re-using an item is far better than recycling. Donating heavy coats, sweatshirts, beanies or blankets can make for a warm Holiday to a family in need. Also, if you have household electronics such as TVs, phones or computers you don't want to go to waste check out donation alternatives before you recycle using the links below.

Goodwill: **http://www.goodwill.org**
Salvation Army: **http://www.salvationarmyusa.org**
RecycleWorks Reuse Center: **http://www.recycleworks.org**

If you have clothing that is shredded or not in "wearable" condition, you can always recycle them! Tie fabrics in a clear plastic bag and place in your recycling cart for collection. We'll do the rest. **Acceptable Items:** Clean cotton, linen, polyester, rayon and wool fabrics (e.g. blankets, clothes, cloth diapers, rags, sheets) **NO** rags or textiles soiled with chemicals, oil or paint. NO Shoes, Carpets, Disposable diapers, Down-filled items, Leather, Nylon, Pillows, Rubber, Stuffed animals, Vinyl.

MAKE IT A GREEN HOLIDAY

Thinking green begins long before you determine which item goes into your garbage cart and which one goes in your recycling cart. It starts with knowing which materials to buy at the store that reduce waste in your household. So remember to always look for the recycle triangle when you buy.

When picking up gift-wrap this Holiday season remember to buy wrapping paper made from recyclable materials. YOU CANNOT RECYCLE METALLIC OR FOIL GIFT-WRAP.

For those of you that want to get really creative. You can use recyclable materials to wrap and personalize a gift using old magazines, sections of the newspaper and even a brown grocery bag. Wrapping and decorating giftsusing a grocery bag only takes a few minutes of your time to better the environment and make a memory.

Follow these easy steps:

- You will need a brown grocery bag, scissors, colorful pens or markers and tape.
- Cut down the seam of the bag from top to bottom.
- Turn inside out to hide all store advertisements and give yourself a blank canvas.
- Wrap gift.
- Decorate with personalized greetings and drawings of your choice.

IMPORTANT TO NOTE:

WEST VALLEY
COLLECTION & RECYCLING, LLC.

1333 Oakland Road
San Jose CA 95112-9894
(408) 283-9250

Coastal Art and Poetry Contest

By encouraging youth to reflect on the beauty and spirit of California's beaches and ocean, we hope to inspire a greater sense of stewardship for these natural places. A population that cares about the coast is more likely to work to conserve and protect it.

View winning artwork and poetry from previous contests (some of which will open in a new window): 2008, 2007, 2006, 2005, 2004, 2003, 2002, 2001, 2000, and 1999.

A selection of Coastal Art & Poetry Contest winners and honorable mentions will be on exhibit at the following locations during 2008:

- Coyote Point Museum of Environmental Education in San Mateo, May 6 through June 15, 2008.
- Peter and Mary Muth Interpretive Center, Newport Beach, September 2 through September 30, 2008
- Cabrillo Marine Aquarium, San Pedro, October 21, 2008 through January 11, 2009

2009 California Coastal Art & Poetry Contest

WHO: All California residents in kindergarten through 12th grades are invited to participate. There are four categories for awards in both art and poetry: K-3rd, 4th-6th, 7th-9th, and 10th-12th grade.

WHAT: Entries must have a **California** coastal or **California** marine theme. (For help with California species, click here.) Poetry and artwork must be original. Art should be no larger than 11 inches by 17 inches. Acceptable art media are paint, pencil, markers, ink, crayon, chalk or pastel (fixed), and collage. Three-dimensional pieces, computer printouts, or photocopies are not eligible. All entries must include a completed contest Entry Form.

Winners will be selected in each of four grade-level categories (K-3rd, 4th-6th, 7th-9th, and 10th-12th) in both art and poetry to receive a gift certificate for $100 to an art supply store (for winners in art, courtesy of Blick Art Materials) or book store (for winners in poetry). Each sponsoring teacher will receive a gift certificate for $40 for educational materials. Winners and honorable mentions will also receive tickets to the Aquarium of the Pacific in Long Beach, courtesy of the Aquarium.

WHEN: Entries must be postmarked by January 31, 2009.

HOW: Review and complete the Guidelines and Entry Form and submit it with your art or poetry to:

On the beach
Do you see what I see?

I see the waves.

JURIED ART CONTEST:

Your View of The Estuary

How do you see the San Francisco Bay Estuary, that unique place where land, ocean, and fresh waters meet? Do you have a favorite view or scene that "means" the estuary to you? The San Francisco Estuary Project is seeking art for possible use in a postcard, our web site, and other materials depicting the San Francisco Estuary—we are looking for scenes or impressions of the Bay, its marshes, and/or streams or rivers entering the Bay. All media are acceptable—oil, water color, pastel, pen and ink, block prints of all types, and photos. A $1,000 cash prize will be awarded to the first prize winner, $500 to the second place winner, and $250 to the third. The Estuary Project retains the right to use the artwork (credited) in print and on-line.

Please submit your entry either as a slide labled with title of piece and your name (to the address below) or as a jpg—no larger than 2 MB—emailed to lowensvi@sbcglobal.net no later than August 1, 2009. Slides cannot be returned.

For more information, contact:
Lisa Owens Viani
San Francisco Estuary Project
1515 Clay Street, 14th Floor
Oakland, CA 94612
(510) 622-2337

Courtesy of Hiroko Kusuda

We will contact the top 20 winners for possible use in a display at this year's State of the Estuary Conference at the downtown Oakland Marriott, Sept. 29-Oct. 1. No more than three entries per artist, please. Original art pieces must be no larger than 24" by 36"; artists will be responsible for delivering and retrieving their art. Digital entries may also appear on our web site, and contest submission is considered permission to use.

FY 2008-2009 ANNUAL REPORT

FY 2008-2009 Work Plan Self Evaluation Matrix

Source	Task Source	Work Plan Tasks	Accomplishments	Responsible Party
	SCVURPPP PMP (I.A.1.)	Summary of Use Track and report use of pesticides on municipally owned property. *Municipal Staff* to report to WVCWP for: 1) pesticides applied by staff 2) pesticides applied by contractors *Reports to include:* -name of pesticide used -active chemical in pesticide -purpose of pesticide -amount used in each application -date of each application WVCWP to present pesticide use data in Annual Report.	Pesticides applied by municipal staff are reported monthly to the State of CA Dept. of Pesticide Regulation with copies of monthly reports forwarded to WVCWP for tracking purposes. Pesticide use reports by the municipal Pest Control contractor (PCO) have also been forwarded to WVCWP. Per Annual Report Guidance from Water Board, actual pesticide use data is not included in this Annual Report, but is on file for future reference and analysis as needed.	PW Supt, -Parks Spvsr, -Street Maint Spvsr, -Facilities Maintenance Manager
	SCVURPPP PMP (I.A.3.) PS #3	Implement BMPS Continue to Implement IPM practices as Best Management Practices (BMPs) for any pesticide used by staff or contractors. Report on use of IPM practices on municipal property.	During FY 08-09, the WVC continued to implement the Pest Management Performance Standard (PMPS). "IPM Policy" and "Standard Operating Procedures for Pesticide Management" are being followed by staff and contractors. BMPs in general continue to be effective. WVC work with contractors to find the least-toxic method to treat resistant pest problems. The WVC use less-toxic pest management methods in municipal facilities (parks & buildings) whenever practicable, based upon budget and effectiveness. *See "Evaluation" section below for details on IPM implementation.*	-Parks Spvsr, -Street Maint Spvsr, -Facilities Maintenance Manager

			Gatos Weekly "Weekend Edition", so that IPM ads appeared a total of sixteen (16) times in WV newspapers in 08-09. September 08: IPM/weeds April 09: IPM/snails June 09 (week of 6/1): IPM/Roses June 09: IPM/Yellow Jackets WVCWP was very involved with the development of the "Green Gardeners" training program for small landscape businesses --from concept, to grant proposal, to implementation of several successful class series. (See Program Report for details.) In FY 08-09, WVCWP contributed funds for 6 scholarships to reduce the cost of the Green Gardener class to attendees (enough for 6 reduced fee scholarships). Since many WV residents employ small landscape contracting firms, it is hoped that these classes will have an impact on reducing residential pesticide use in the WVC. To promote use of the trainees from the Green Gardeners program, WVCWP sent a Press Release to local newspapers in Campbell, Los Gatos & Saratoga. A 630 word article, including a photo, about the Green Gardeners program was published. The article promoted both the classes (for anyone interested in enrolling) and promoted local companies which employ Green Gardeners graduates – so that residents could contact and utilize these graduates. See "PI/P Section", including "Attachments" for details. XREF PIP

Pesticide Management Activities Evaluation

CITY OF CAMPBELL – IPM IMPLEMENTATION

The City is in the process of developing a new City Park – appx. 1.3 acres, surrounded by apartments, townhomes and condominiums. The park is still in the planning stage; it is envisioned as a Neighborhood park and may contain a playground, picnic facilities, natural/landscaped areas and multi-use open fields.

Parks Dept. input includes plans for using native plants and pest resistant plants to the maximum extent practicable. Bioswales will be incorporated as a means of mitigating runoff on this site.

PESTICIDE USAGE REDUCTION MEASURES – Pest Specific

Campbell is implementing IPM in the following situations:

1) On-going - Yellowjackets:

• Campbell uses traps as the main means of control.

• Parks Maintenance staff tries to clean off picnic tables to prevent attracting wasps and ants.

• If a wasp nest in a tree requires treatment, the PCO uses a non-residual pesticide, and closes the hole in tree so wasps can't return to nest.

Parks staff use home insulation spray foam to close the nest/hole; treatment has been successful in preventing return of wasps.

• Staff is using traps which incorporate pheromone to attract wasps, dry fish to bring them into trap, and soap inside trap, which kills in 5-15 seconds

2) On-going - Weeds:

The Parks Dept. anticipates that it will be able to **substantially decrease its use of herbicides for turf**:

Based upon techniques learned at a previous WVC IPM Training (Cornell University Extension Turf Specialist) the Parks Department purchased a $25,000 dollar Deep Tyne Aerator in May 2008. The unit will reduce pesticide use on the turf by reducing compaction, increasing water flow through the soil profileand promoting healthier, more vigorous turf that will be able to crowd out the broadleaf and other grassy weeds. This should have a big impact on pesticide use on turf areas in the City.

• This year Campbell has encouraged our tree contractors to dump their wood chips from tree work done for the City in the City's organic waste area. The wood chips are then used in the City's mulching program to reduce weeds and reduce the watering of trees. Previously, the contractors would typically haul the wood chips to the local landfill for disposal, where it was combined with regular garbage.

• Campbell uses a chipper to create mulch from its own green waste; this mulch is used for weed control wherever possible.

• Work Furlough labor hand hoes weeds where possible. Use of black plastic to kill off emerging weeds and seeds in landscaped areas was investigated; it was found to not be workable and these efforts were discontinued.

• Staff has been using the tractor with a boom mower for mowing weeds, instead of spraying roadsides and similar areas.

3) On going - Insects:

In FY 07-08, Campbell staff tested a new **all-organic oil** in the City's tree spray program. The oil was found to be surprisingly effective against the target pest, aphids. Due to use of this new oil, the City has been able to reduce the use of pesticides in combating the aphids in City trees.

Unfortunately, the City has certain species of street trees with aphid and scale infestations which are difficult to treat. When pesticide use is necessary, a systemic pesticide, injected around the roots, is used. This results in the pesticide being taken up by the tree, rather than running off and becoming a pollutant in local streams.

• In 02-03**,** Campbell controlled an Ash Whitefly infestation with a natural predator, a minute wasp. Since the wasps were ordered and released, they have continued to suppress the Whitefly population.

• Staff is identifying insects and utilizing IPM when appropriate instead of using insecticides. No new insects were identified in FY 08-09

PESTICIDE MANAGEMENT ACTIVITES
Campbell

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2008-2009 ANNUAL REPORT

4) On-going - Gopher Control:

The City has implemented a policy of using mechanical traps for gophers instead of baits thus further reducing the use of pesticides.

5) On-going - IPM Solutions:

City staff have participated in implementation of new County computerized “IPM Solutions Database Input/Response”, which allows input of a pest problem and a response with IPM solutions. Staff refer to this database as needed.

RESULTS OF PESTICIDE USE REVIEW FY 08-09:

Campbell has taken a strong stance on pesticide use reduction in recent years, as evidenced by the past extensive involvement in IPM training by City staff.

Pesticide Management Summary

With the use of oils in lieu of pesticides and other ongoing I.P.M. practices pesticide usage continues to decrease.

As new innovative I.P.M. practices are made known to municipalities they will be implemented to continue to use less pesticides.

The City is raising its threshold limits for the number of insects and weeds in parks and urban forests. This has also led to a decrease in pesticide usage.

- Through use of IPM practices Campbell was able to eliminate use of any Organophosphate pesticides for the past 7 years. Campbell has decreased its use of insect-control pesticides by using oils and soaps to control aphids and scale in the urban forest.
- The City is making an effort to stress prevention (prevent weed growth, prevent pest infestations) where possible. Campbell is moving into use of IPM, mechanical and cultural controls (such as Deep Tyne Aerator and Boom Mower), rather than chemical controls, as much as possible given budget and staff limitations.
- The City Public Works Dept. has instituted a policy of moving towards installation of more pest resistant trees and shrubs to minimize the need for pesticides; these efforts include removal of certain tree species (such as Tulip and Raywood Ash trees) from the City of Campbell 's approved Street Tree List.
- Over the past several years, the Public Works Dept. has instituted improved methods of weed control in some parks and roadsides, such as using green waste to make wood chips, used as mulch to prevent weed growth. For the past 4 years, the City has been using its new specialized tractor with boom mower for mowing roadside & park weeds and to avoid spraying. With the purchase of the new aerator, the City anticipates a significant reduction in the use of herbicides on its extensive turf areas.

	Mercury Plan (I.E.)	Reduction of Hg Containing Products Continue implementing phase-out of mercury-containing products (MCPs). Phase-out will coincide with replacement of MCPs on an as-needed basis.	**CITY OF CAMPBELL:** Campbell adopted a mercury elimination policy during FY 03-04 and has continued to phase out mercury containing products, with the exception of fluorescent bulbs Reduction of mercury-containing products is being implemented. Research on alternative products has been conducted through WVCWP. Non-mercury or low-mercury replacements are being used wherever feasible e.g., thermostats and fluorescent bulbs. A training on phase-out and proper disposal was held in FY 07-08 for Municipal staff involved in work related to Corporation Yard activities. Mercury Informational Material was also handed out to Corp Yard Staff in July 2008; along with a flyer reminding staff to properly dispose of mercury containing thermostats/ switches.	Public Works Superintendent & Facilities Maintenance Manager
	Mercury Plan (II.B.)	Mercury Containing Product Disposal Services Provide funding and participate in County HHW collection program for residents and small businesses	The WVC support the County HHW collection program through funding, outreach activities (material distribution, website notices, etc.). All WVC adopted an Extended Producer Responsibility Resolution during FY 07-08. The waste collection contractor for the WVC has been supporting HHW collection through sponsorship of free E-waste events. The WVC support this through fees to the contractor, and through outreach efforts to support the collection events. Local implementation also included coordinating and participating in mercury thermometer collection events, and distribution of mercury-free thermometers, mercury

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2008-2009 ANNUAL REPORT

Mercury Pollution Prevention Activities Evaluation

MERCURY AHTG

WVCWP staff focus in FY 08-09 was on local implementation, since the Program's Mercury PP Outreach Work Group has not been meeting.

Local implementation included outreach for free E-waste Recycling Events, mercury-free thermometer distribution, mercury outreach material distribution, and articles on mercury in municipal newsletters.

THERMOMETERS

Residents have responded well to thermometer exchange events, and to receiving Mercury-free thermometers.

WVCWP, WVC and San Jose Environmental Services Dept. have begun coordinating additional events in FY 09-10 at various venues. Efforts will be made to increase publicity for these events; some will be held mid-week and increased publicity may be needed in order to generate a turnout. Staff will attempt to evaluate effectiveness of holding mid-week events.

Thermometer events in FY 08-09 included:

Audubon Wildlife Fair

Cupertino (bordering Saratoga) 10/25/08

Mercury-free thermometers, along with mercury outreach materials, were provided to parents accompanying their children to the WVCWP Enviroscape presentations at the Fair. **30** thermometers were distributed.

Residents were very pleased with the opportunity to receive a mercury-free, solar thermometer. Sierra Club member in attendance expressed strong interest in these thermometers, and an interest in distributing them, but the Club does not have funding to purchase these themselves.

Thermometer Exchange at LG Farmers Market

Los Gatos – 5/3/09

WVCWP coordinated an exchange which was staffed by Town of LG and City of San Jose Environmental Services Dept. A booth was set up at the weekly LG Farmer's Market. Residents were asked to bring in mercury thermometers, and were given mercury-free thermometers in exchange.

13 mercury thermometers were collected for proper disposal. City of SJ was impressed with the turnout by Los Gatos residents, since outreach materials had no been completed yet, so little outreach had been done. Residents attending the Farmer's Market were pleased to learn the Town was collaborating with the City o San Jose for this event.

WVCWP has coordinated with the other participants to hold this event again in FY 09-10. It will be held in conjunction with "Keep Los Gatos Beautiful" month in

April 2010; this will allow for better outreach opportunities to publicize the event and encourage increased participation.

MERCURY OUTREACH - NEWSLETTERS

In Winter 2009, prior to the nationwide switch to digital television, WVCWP provided an article to all WVC municipal newsletters on proper TV disposal, and environmental impacts of mercury.

The article was printed in the municipal newsletters for Campbell, Monte Sereno and Saratoga.

For additional details on outreach related to Mercury, see “Public Information/ Participation” section of this report.

RESOLUTION NO. 10933

BEING A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF CAMPBELL SUPPORTING EXTENDED PRODUCER RESPONSIBILITY

WHEREAS, on February 8, 2006 California's Universal Waste Rule (CCR, Title 22, Division 4.5, Chapter 23) became effective; and

WHEREAS, the Universal Waste Rule bans landfill disposal of certain products that are deemed hazardous, including household batteries, fluorescent bulbs and tubes, thermostats and other items that contain mercury, as well as electronic devices such as video cassette recorders, microwave ovens, cellular phones, cordless phones, printers, and radios; and

WHEREAS, state policies currently make local governments responsible for achieving waste diversion goals and enforcing product disposal bans, both of which are unfunded mandates; and

WHEREAS, Universal Waste management costs are currently paid by taxpayers and rate payers and are expected to increase substantially in the short term unless policy changes are made; and

WHEREAS, local governments have no input on the design of the products, make no profit from the products, and do not have the resources to adequately address the rising volume of discarded products; and

WHEREAS, the City Council of the City of Campbell supports statewide efforts to hold producers responsible for Universal Waste products and other product waste management costs; and

WHEREAS, Extended Producer Responsibility (EPR) is a policy approach in which producers assume responsibility for management of waste products and which has been shown to be effective; and

WHEREAS, when producers are responsible for ensuring their products are reused or recycled responsibly, and when health and environmental costs are included in the product price, there is an incentive to design products that are more durable, easier to repair and recycle, and less toxic; and

WHEREAS, in January 2008 the California Integrated Waste Management Board adopted a Framework for an EPR system in California.

NOW, THEREFORE, BE IT RESOLVED, that the City Council of the City of Campbell urges the California Legislature to enact framework EPR legislation that shifts Universal and other waste management costs from local government to the producers of the product, and which will give producers the incentive to redesign products to make them less toxic and easier to reuse and recycle; and

BE IT FURTHER RESOLVED, that the City Council of the City of Campbell encourages all manufacturers to share in the responsibility for eliminating waste through minimizing excess packaging, designing products for durability, reusability and the ability to be recycled; using recycled materials in the manufacture of new products; and providing financial support for collection, processing, recycling, or disposal of used materials.

PASSED AND ADOPTED this 1st day of July, 2008 by the following roll call vote:

AYES: Councilmembers: Furtado, Kennedy, Low, Hernandez, Burr

NOES: Councilmembers: None

FY 2008-2009 Work Plan Self Evaluation Matrix

Activity	Source	Work Plan Tasks	Accomplishments	Responsible Party
Vehicle Washing Operations	CB-1	As part of the West Valley Industrial Commercial Inspection Program, promote improved car washing methods at auto businesses. Provide info on alternative arrangements for businesses with possible compliance problems. (Section 2.i of this work plan - Industrial Inspection Program)	The Stormwater Discharge Inspector distributes vehicle washing outreach materials during pro-active inspections and in relation to any actual or suspected vehicle washing incident. The Inspector is able to answer questions and offer suggestions with the help of visuals. A WVCWP-created fact sheet provides information on wastewater capture systems for automotive facilities. The fact sheet was designed to provide small-scale automotive facilities (those that find installing a full-fledged wash rack cost-prohibitive) with examples of inexpensive treatment technologies and distributor information. This method of outreach has been very effective.	WVCWP Inspector
Vehicle Washing Operations	CB-1	Place outreach material on proper vehicle/equipment washing at municipal counters, post offices, libraries and public events. Update WVCWP website to include copper information.	• WVCWP updated the "Car Wash Kit" flyer for car wash fund-raising events. The updated version was re-posted at City Halls • Car washing information is contained in the "Watershed Watch" brochure was has been distributed widely. • The WVCWP website home page (www.cleancreeks.org) features a graphic highlighting car washing, and a link to a printable PDF with information on proper car washing, and water quality degradation from improper washing: http://www.cleancreeks.org/images_new/carwashweb.pdf WVCWP also created a new brochure with info on copper and car washing, and with a Discount Card for use at local commercial car washes. The brochure included a list of participating car wash businesses. The brochure was	WVCWP staff

			distributed in Fall of 2008; the Discount Card expired as of Dec. 2008. WVCWP will discuss creation of an updated version for FY 09-10. See PI/P section for details and attachments.	
Vehicle Washing Operations & Pool/ Spa Maint.	CB-1 & CB-12	In classroom presentations, introduce impacts of copper on aquatic life; teach proper methods of car washing and pool & spa drainage using the Enviroscape watershed model.	WVCWP's classroom presentations are scripted to include hands-on activities so that students can watch pollutants, such as copper from car-washing activities & pool draining, flow directly to waterways. In addition to recommending the use of commercial carwash facilities, WVCWP encourages washing on a gravel or lawn area where wash water is captured and infiltrated. Students also learn about runoff from car wash fundraisers and the need to borrow the WVCWP Car-Wash Kit for any such event. Proper Pool Draining instruction includes photos of a Sanitary Sewer Cleanout, and other graphics about pool & spa drainage. School presentations in FY 08-09 included: St. Mary's School, Los Gatos – Presentation for 5th graders on 1-15- 09 Sedgewick Elementary, Cupertino 3-31-09 – Presentations for 2nd, 3rd, 4th, and 5th grades. St. Mary's School, Los Gatos – Presentations for Kindergartners graders on 5-21-09 In addition, children of various ages viewed Enviroscape presentations at various community events.	WVWCP staff

			See PI/P section for details.	
Vehicle Washing Operations	CB-1	Promote use of Car Wash Kit. Provide kit; provide training to charity car wash organizers. Document use in A/R. Solicit feedback from participants.	**PROMOTING USE OF CAR WASH KIT** **Car Washing Advertising/Articles** An short article on Car Washing & the Car Wash Kit was submitted to the 3 local weekly newspapers in late June 2009. The article was printed in July 2009. Car Wash Kit info was also included in a separate article which covered WVCWP projects; this article ran in the 3 local weekly papers in Feb 2009. WVCWP participated in a Car Washing media campaign, developed and run by SCVURPPP. In addition, WVCWP provided extra funding for the ads to run in the 3 local weekly papers, with a total combined circulation of 69,840. **New Car Wash Outreach Material** WVCWP developed a tri-fold size flyer on the subject of car washing. The flyer features info on copper, right and wrong ways to wash a car in terms of protecting creeks, a 'commercial car wash discount card', a list of participating local commercial car washes, and information on using the WVCWP Car Wash Kit. Car Wash Kit **Training** was given to Monte Sereno office staff (3) 7/25/08 by WVCWP Program Assistant. Topics: ▪ Runoff as Illegal Discharge – Municipal Ordinance ▪ Car Wash Fundraisers need to use free Car Wash Kit ▪ How kit works	WVWCP staff

CAMPBELL

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2008-2009 ANNUAL REPORT

Activity	Source	Work Plan Tasks	Accomplishments	Responsible Party
			Expanded Car Wash Kit Program WVCWP worked to develop an expanded Car Wash Kit program. Staff solicited feedback from other successful programs in 3 states. A new Car Wash Kit program was developed, which would allow loaning of Kits to more users, with less need for direct WVCWP staff involvement (due to limited staff time). The new program will allow WVCWP to more heavily promote the use of the Car Wash Kit, because staff time will not be such a limiting factor if demand for the kit(s) increases. The new Car Wash Kit Program includes: • A set of photo instructions for Kit set-up, and link to an internet video of Kit set-up • Written program procedures • Budgeting to acquire a new part for the Kit, to facilitate ease of use (rubber mat to cover storm drain grate) • Budgeting to acquire another Kit, if demand justifies this **Promotion of Car Wash Kit to WVC Schools:** In FY 08-09, the Kit was promoted to ALL schools within the WVC jurisdictions. Facilities managers and front office staff were notified that anyone holding a Car Wash Event on school grounds, or students groups holding Car Wash Events at other sites, MUST use the Car Wash Kit. See PI/P section for details.	
Vehicle Washing Operations	CB-1	Within the development project permit process for Group 2 projects, require source control measures at facilities that will conduct vehicle/ equipment washing

WEST VALLEY COMMUNITIES

COPPER ACTION PLAN/NICKEL ACTION PLAN
CAMPBELL

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2008-2009 ANNUAL REPORT

Copper/Nickel Action Plan Evaluation

Car Wash Outreach Evaluation:

WVCWP initiated several new Car Wash outreach efforts this year:

-- Outreach to schools via letters and flyers to Facilities Maintenance Supervisors and Front Desk staff. This outreach was aimed at covering all schools in the WVC. The main focus was on any car wash fundraising events that might take place on school property. However, it is hoped that the information will also reach school-based groups which might initiate car wash fundraisers (such as Band, Athletics, etc.) even if they choose to hold the car wash at a non-school site.

Any chance to evaluate results of this outreach is not expected to materialize until after school starts in Fall 2009. Results will be evaluated based upon determining whether there is an increase in calls requesting the Car Wash Kit.

-- WVCWP staff created a new outreach piece concerning residential car washing. This was a double-sided piece, with info on copper and car washing, and with a Discount Card for use at local commercial car washes. The brochure included a list of participating car wash businesses which accept the Discount Card.

The Card is available on the Watershed Watch website at http://www.mywatershedwatch.org/WW_Discount.pdf, but WVCWP staff anticipated that residents would appreciate:

--being made aware of the discount card, by picking up the outreach piece

--having the card printed out, in an easy-to-use format (just cut off the top part of the flyer, in order to have a wallet-sized card.

--seeing the card alongside a list of local, participating commercial car washes.

The brochure was distributed in Fall of 2008; however, the Discount Card expired as of Dec. 2008. Since the piece was created shortly before the Discount Car expired, it was not distributed widely, and so it was not possible to evaluate how well-received it was. WVCWP will discuss creation of an updated version for FY 09-10.

-- A short article on the necessity of using the Car Wash Kit for car wash fundraising events was initiated with the 3 local weekly newspapers in late June 2009. The article ran in the papers in July 2009. The articles in the 3 newspapers did generate a number of calls to the WVCWP office to discuss the Car Wash Kit. It appears that getting information on car washing into the local weekly papers is an effective means of disseminating car wash information.

Pool and Spa Maintenance:

In FY 07-08, WVCWP initiated outreach to residents via placing literature displays in a retail pool and spa store. When WVCWP staff returned to the store in FY

08-09, it was found that this type of outreach was well-received by the store, and a number of brochures had been picked up by residents.

In March 2009, an additional 30 brochures were placed at this retailer, and a new retailer was also approached; 20 Pool & Spa brochures were placed with the new retailer (Tradewind) for pickup by residents.

Educational Outreach Evaluation:

Both Pool & Spa draining and Car Washing are covered thoroughly during Enviroscape presentations at schools and at community events. Children appear to clearly understand the messages being conveyed. They actively learn about copper and brake pads by sprinkling powder which represents copper around a toy car on the Enviroscape. They then watch the copper being washed into the 'creek' and down to the 'Bay' when the car is washed, and when 'rain' creates runoff on the watershed model. A number of Enviroscape presentations were given during FY 08-09. See PI/P section for details.

City employees leave cars at home and pedal to work

By Chris Vongsarath
Campbell Reporter

Posted: 05/27/2009 06:05:07 PM PDT

Updated: 05/27/2009 06:05:08 PM PDT

Campbell officials left the car keys at home and grabbed a helmet as they joined their colleagues on May 14 in the effort to reduce vehicle emissions in the Bay Area .

For years Bike to Work Day has encouraged commuters to opt for alternative transportation to get to work.

According to the Silicon Valley Bicycle Coalition, if every person living within 5 miles of their workplace participated in the event, more than 60,000 vehicles would be off the road, reducing tailpipe emissions by more than 150,000 pounds. Not to mention there would be plenty of parking spaces available throughout the day.

Campbell made an event out of the initiative, with a solid group of city employees ditching their four-wheeled vehicles for a two-wheeled version.

There were about 13 participants this year, which is a bit down from last year's numbers but still a good turnout, said Councilman Dan Furtado, who has participated in the event the last several years.

Furtado only had to travel a mile or two from his home to Campbell City Hall, but he said just being out there sends a message about the importance of reducing emissions.

"It highlights the fact of both exercise and that we could and should consider alternative transportation," said Furtado, who pedaled around on his 1950s Schwinn cruiser.

Others faced a more arduous commute.

Five bicyclists had to make a round trip of more than 20 miles, including city manager Dan Rich, who made the trek from his home in Palo Alto.

"Headwinds are stronger than one would think in the afternoon," he said, jokingly.

Before the day got started, participants met in front of city hall for refreshments and pictures. They also had contests.

City engineer Michelle Quinney won the "Leg Power" award for her round-trip ride of 29 miles, and public works director Bob Kass earned the "Team Spirit" and "True Blue Biker" awards for his frequent bike commutes throughout the week. Janet Sullivan and Mike Scott were winners of the "Campbell Velo Club Newbie" award.

Campbell was among numerous Bay Area municipalities, as well as corporations and organizations, to participate in the effort to put more bicyclists and fewer drivers on the road—if only for one day.

"It's a fun day that creates a bond between employees while benefiting our bodies and the environment," Rich said.

Hello,
I'm writing to you from the West Valley Clean Water Program (WVCWP).

We are the stormwater/ runoff pollution prevention agency for the Cities of Campbell, Monte Sereno, Saratoga and the Town of Los Gatos.

We're writing to you concerning any **Car Wash Events** (i.e. fundraisers) that might be held on school grounds.

Please forward this e-mail to any appropriate staff who might handle approval, scheduling, etc. for Car Wash Events -- including staff at each different school site.

Attached is a flyer that can be posted in relevant offices, detailing requirements for Car Wash Events.

For any questions about this e-mail, contact me at:

kottenberg@wvcwp.org

Here are points related to this issue:

1) Runoff from Car Wash Events is prohibited from entering stormdrains by Municipal Ordinance, pursuant to CA State Water Board regulations.

2) Runoff can be diverted from stormdrains by use of our agency's FREE Car Wash Kit.

3) In order to hold a Car Wash Event, the school should direct event organizers that they **MUST** contact WVCWP and schedule use of the Car Wash Kit.

4) Contact the WVCWP Inspector at: 408. 354. 4734 or by e-mail at office@wvcwp.org

Thank you for your cooperation in complying with this Municipal Ordinance.

Kathy Ottenberg
Program Assistant
West Valley Clean Water Program
18041 Saratoga-Los Gatos Rd.
Monte Sereno, CA 95030
408. 354. 4734

Protect Our Creeks during your next

Car Wash

Fundraising Event

Anyone organizing a **Car Wash Event**
in Campbell, Los Gatos, Monte Sereno or Saratoga
MUST borrow the **FREE Car Wash Kit** from
West Valley Clean Water Program *(WVCWP)*

The *State Water Board* requires municipalities to prevent Car Wash Event runoff from flowing into Storm Drains.
(Campbell Municipal Code 14.02.030)

All Car Wash Events MUST use the ***Car Wash Kit***, which keeps runoff out of Storm Drains.

To schedule use of the Car Wash Kit, CONTACT
West Valley Clean Water Program at **408-354-4734** *or* **office@wvcwp.org**

- Copper washes off of car brake pads – and it's toxic to aquatic life
- Oil, coolant & other pollutants are also carried in car wash runoff
- Without the Car Wash Kit runoff flows straight into our creeks. With a Kit, dirty water is sent to the Wastewater Treatment plant.

WEST VALLEY CLEAN WATER PROGRAM

Honorable Christine Kehoe
State Capitol, Room 5050
Sacramento, CA 95814

March 30, 2009

Subject: Support of Senate Bill 346

Dear Senator Kehoe:

The West Valley Clean Water Program (WVCWP) strongly supports Senate Bill 346, which would restrict the use of copper and other toxic materials in vehicle brake pads.

WVCWP's member agencies, the Cities of Campbell, Monte Sereno, Saratoga and Town of Los Gatos, are required to control copper discharges to creeks, estuaries and the ocean under its National Pollutant Discharge Elimination System (NPDES) Stormwater Permit. Copper, an identified pollutant of San Francisco Bay, is toxic to phytoplankton, the base of the aquatic food chain, and has been shown to adversely impact salmon sensory organs, potentially compromising their ability to return to spawning streams and avoid predators. Through work completed by the Brake Pad Partnership, we now identify brake pads to be the largest single source of copper to waterways, and estimate they contribute as much as 35% of the copper reaching San Francisco Bay. Individually, or even collaboratively, local governments under NPDES Stormwater Permits are not able to effectively control brake dust, leaving legislative action as the only viable alternative to reduce the copper loadings at its source – brake pads.

As members of the Santa Clara Valley Urban Runoff Pollution Prevention Program (SCVURPPP), we are proud to be one of the original founding supporters of the Brake Pad Partnership, and have continually supported their efforts for over 15years. The Partnership is a collaborative group comprised of government staff, brake pad manufacturers and environmentalists, working together for a solution to this issue. The problem has been studied, quantified, and all participants now agree that an orderly phase-out of copper is in everyone's best interest. The Partnership garnered support of brake pad manufacturers for legislative action because without more definitive restrictions, less responsible manufacturers could continue to sell high copper content brake pads in California. The Partnership also has support of environmentalists because of impacts copper has on ecosystems, and because the bill would also address lead and asbestos which still appear in brake pads sold by less responsible manufacturers.

We are encouraged by the Partnership's ability to build consensus among its stakeholders and together with them, we strongly support Senate Bill 346 going forward to the Environmental Quality Committee. Controlling this key source of copper is of critical importance.

Thank you for your energetic leadership on so many important environmental issues like this one!

Sincerely,

Kelly J. Carroll, PE
West Valley Clean Water Program

			devices, however at this time, the intended distribution scheme among Bay Area entities remains unknown and solely within the control of SFEP. At the annual WVCWP Street Maintenance Supervisors Storm drain meeting, all attendees viewed a presentation on a possible pilot program: a solar-powered trash-compacting trash can system.	
	Trash Work Plan	Evaluations Continue to conduct trash evaluations in a subset of local trash problem areas using the Programs Urban Rapid Trash Assessment (RTA) protocol and/or the KAB Litter index.	WVCWP staff used SCVURPPP's standardized reporting forms to assess trash problems. Trash evaluations have been carried out by WVCWP staff during Creek Cleanup events and during independent visits to trash problem area sites. Trash assessment forms were completed. WVCWP staff used SCVURPPP's standardized reporting forms to assess trash problems. WVCWP staff conducted **20** assessments at the identified sites and listed problem areas in West Valley communities. The number of assessments included: Campbell **4 --** Los Gatos **3** -- Monte Sereno **5** and Saratoga **4.**	WVCWP staff, Sr Civil Eng and Parks & Pub Works staff
	Trash Work Plan	Identify and Prioritize Problem Areas Continue to identify and prioritize trash problem areas based on criteria provided by Program staff during FY 08-09.	Identification & prioritization are determined by: • monitoring previously identified problem areas • using volunteer monitoring during cleanup events at problem sites • keeping records of areas where Trash has been noted, or illegal dumping has been noted. If the site is noted repeatedly, then identifying it as a Problem Area will be considered.	Parks & Pub Works staff, Sr Civil Eng & WVCWP staff
	Technical Memo: *Trash Mgmt Effective-ness Strategy (FY06-*	Evaluate Trash Management Measures Evaluate and report on existing trash management practices. Evaluation methods may include using Urban Rapid	WVCWP staff used SCVURPPP's standardized reporting forms to identify trash problems. When completed by staff, these forms provide data on trash monitoring and management activities at the listed problem sites.	WVCWP staff

Source	WPActivity	Work Plan Tasks	Accomplishments	Responsible Party
	07)	Trash Assessments and/or the KAB Litter Index in priority trash problem areas.		
	Program's Trash Work Plan	Management Practices Continue to identify and implement trash control measures, where practical and feasible, to reduce trash and debris.	Control measures in addition to scheduled/systematic control measures • notify Caltrans when exceptional litter or debris problems are noticed along highways/freeways and around on-ramps • conduct removal of trash and litter as needed at sites within municipal jurisdiction • remove trash (where feasible) at some sites in Caltrans' jurisdiction • monitor identified problem areas • hold volunteer cleanup events at problem sites, when feasible • highlight litter problems during classroom presentations • WVC inspectors for industrial/commercial and construction sites watch for litter and illegal dumping. Inspectors will consider an accumulation of debris at a site to be a stormwater violation and refer such sites to the Stormwater Discharge Inspector. Systematic Control Measures • Trash collection is mandatory for WV residents - via WV Collection & Recycling (WVC&R) • WVC&R holds free, curbside Waste Collection days for items weighing up to 70 lbs, wood scraps and other items (i.e. items not usually allowed under weekly collection guidelines.) •	
				Parks Spvsr & PW Supt;

Source	WPActivity	Work Plan Tasks	Accomplishments	Responsible Party
			CAMPBELL: The City is contacted by residents to remove debris or other HHW from residential neighborhoods or the public right-of-way. Items are brought to the Service Center for appropriate disposal. City Street Maintenance staff periodically place door hangers on residents' front doors as a reminder to residents to contact West Valley Collection and Recycling to properly dispose of debris and other related items. Approximately 50 were placed last year and 30 this year to date. • In addition to street sweeping efforts, regular hand sweeping of Campbell's downtown area is done 2x/ week to reduce litter. • Inclusion of additional sweeping in our "heavy leaf drop" areas – hand sweeping & shovels – is done in Fall and early winter • Campbell has included more (60) garbage cans at City parks (which includes the replacement of broken cans) • City staff met with WVCR (waste contractor) to go over the commercial run to ensure that all commercial cans are collected on a regular basis • Increased recycling efforts at City parks. The City of Campbell Corporation Yard has two 20 cubic yard dumpsters which are filled daily and picked up by WVC&R three times per week. This eliminates the spreading of trash or debris within its facilities – Corp Yd BMPs are included in contracts with the Street Sweeper, center-line striping contractor, etc. Proper disposal methods by City staff:	WVCWP staff to assist

			request for needed & desired funding In Summer 2008, WVCWP staff researched a variety of topics for the TAC. Researched anti-litter logos, slogans, potential website/domain names. Researched related web sites from similar campaigns. Surveyed teenage boys from target age-group (informal). WVCWP Program Manager provided research results to TAC.	
Citizen Participation	See PI/P – Citizen Participation	Monitoring/Citizen Participation Continue to promote citizen participation program to monitor trash near local creeks. Transfer data to trash tally sheets (element of Creek Keeper's Program). See PI/P (Section 6 of this Work Plan)	WVCWP staff conducted 2 trash monitoring / Cleanup events with student and citizen volunteers. The volunteers at all clean-up events were taught to participate in groups and learned how to use the WVCWP trash tally forms to collect the data which helps identify trash sources.	WVCWP Staff
			CAMPBELL: Annual Community Cleanup Event. Litter removal occurred from the parks, along the freeway and railroad tracks. Several volunteers performed debris cleanup of the listed locations. Some debris collected was recycled material. Debris was kept from making its way to the waterways. • WVCWP Manager spoke to volunteers about litter issues in WV watersheds. Volunteers completed WVCWP surveys regarding types of litter collected. Kits were distributed to each volunteer which included recycling information, proper debris disposal, etc. Free "cup holder" ash trays were available to volunteers. These were distributed in an effort to help reduce cigarette butt litter. Approx. 150 reusable shopping bags were given out	Public Works staff

Source	WPActivity	Work Plan Tasks	Accomplishments	Responsible Party
			(reducing the amount of plastic (grocery) bag usage) Details on the event can be found in the **PI/P section,** including amount of trash collected, number of volunteers, etc.	

Trash Inventory & Management Evaluation

General Evaluation of Trash Problems

TRASH MONITORING

After several years of monitoring trash sites, WVCWP staff is familiar with the sites and the problems that need to be addressed. Two leading trash sources in West Valley communities are "Illegal dumping" and "vehicular litter" (found along highways, freeway-on-and-off-ramps, and smaller arterial roads). The type of litter that is retrieved is predominantly snack, food, beverage and other product packaging and cigarette butts.

WVCWP staff have found that having Creek Cleanup volunteers use 'Tally Sheets' is helpful. However, it has been noted that having volunteers compute TOTAL TRASH at the end of an event tends to overstate the amount of trash collected. Perhaps due to the 'sense of accomplishment' at the end of their efforts, volunteers seem to inflate the amount of trash per bag.

Therefore, a 1/3 or 1/2 full bag becomes 'a bag', as if it is a full bag. So, for example, an event with 10 bags that are 1/2 full, plus 6 bags that are actually full, could become "16 bags of trash collected" – rather than the more accurate **5 bags** (10 bags x 0.5 – half full = **5 full bags**) + **6** full bags = **11 bags**.

Staff will make an effort to convey the importance of accurate totals to volunteers in the future.

SCHOOL INVOLVEMENT

School lunch yards can be another source of trash, and WVCWP regularly holds outreach activities at schools, including cleanups, to address this issue. However, recent litter pickup events at schools have found relatively little trash. WVCWP has found that it is more effective to have 1 class work on litter pickup (such as during an Enviroscape presentation rotation) than to have a whole school turn out – because the school yard may be too clean to generate much litter pick-up activity for a large group of students. This approach was tried at St. Mary's Elementary School (Los Gatos) in FY 08-09 and it worked well.

WVCWP TRASH ACTIVITIES EVALUATION

Source	WPActivity	Work Plan Tasks	Accomplishments	Responsible Party

Creek Keeper Events – Volunteer Participation - Trash Identification, Tallying & Pick-up

WVCWP hosted 2 Clean-up events, with Trash Monitoring training and completion of tally sheets.

Coastal Cleanup Day

San Tomas Aquino Creek @ Westmont High 9/20/08

WVCWP hosted a Cleanup Event at the site where it has regularly hosted this event.

Volunteers were instructed in use of Tally sheets, and were provided with clipboards, etc. Working in groups, volunteers were able to pick up trash and carry out trash monitoring.

15 Volunteers attended along with WVCWP and City of Saratoga staff.

Distributed 15 reusable bags (purchased from Safeway with gift card donated by Safeway to WVCWP).

Trash Totals from all events are found in Attachments (Trash Summaries)

The Cleanup Event was covered in articles appearing in 3 weekly newspapers; details are listed in the Newsletter/Press Release section (above; also see PI/P Section Attachments *(Coastal Cleanup Day article)*.

National River Cleanup Day

San Tomas Aquino Creek @ Westmont High 5/09

WVCWP hosted a Cleanup Event at the site where it has regularly hosted this event.

Volunteers were instructed in use of Tally sheets, and were provided with clipboards, etc. Working in groups, volunteers were able to pick up trash and carry out trash monitoring. Trash Totals from all events are found in Attachments (Trash Summaries)

CREEK CLEANUP EVALUATION

The site usually used by WVCWP site for Creek Cleanups is being evaluated by staff. It appears that there is less trash to be picked up at the September event than at the May event. This is possibly due to the fact that a Cleanup is held in May, then school is out for 3 months; the weather during this period is not windy & rainy, so trash isn't being carried into creek – in Sept. school has just started up. This may result in there being less

Source	WPActivity	Work Plan Tasks	Accomplishments	Responsible Party

trash in May than in Sept.

WVCWP will investigate the possibility of hosting a Cleanup at a different site in September, where lots of summertime activity would be taking place, which might be more likely to have trash built up in Sept. Cleanup at such a site would help prevent trash from entering the creeks when rains start later in the Fall.

CITY OF CAMPBELL

The City of Campbell has been making a concerted effort, on many different fronts, to address the issue of litter/ trash.

Highlights from FY 08-09:

City of Campbell Public Works Director and Campbell City Council Member, Dan Furtado, continue their participation in the Silicon Valley Litter Technical Advisory Committee. The Public Works Dept's Office Specialist attends the Litter Control and Removal Committee meetings. Goals for litter removal are discussed, along with public awareness and increase of additional municipal involvement.

Suggestion from Litter Control Committee: San Jose has windshield stickers that have the hotline # to report littering. – expand the utilization of this program so everyone can get similar stickers.

The Office Specialist also attends the Great American Pickup (GAPU) Meetings. This is a committee that plans annual cleanup events within their own jurisdictions and promotes the event to other cities/ agencies.

An Annual Community Garage Sale is held to try to divert trash from the solid waste stream, and try to help avoid illegal dumping. Between 200 – 300 homes participate each year. Recycling and appropriate disposal of HHW, etc. are publized in the garage sale listing that is distributed to each participant of the garage sale.

When City staff are notified of any sort of trash 'incident' (such as trash dumped in a residential area), staff place door hangers on residents' front doors as a reminder to residents to contact West Valley Collection and Recycling to properly dispose of debris and other related items. Approximately 50 were placed last year and 30 this year to date. In FY 09-10, staff will compare the City's doorhangers with WVCWP doorhangers, and determine whether information on the 2 different hangers is conducive to placing both of the hangers on residents' doors.

Source	WPActivity	Work Plan Tasks	Accomplishments	Responsible Party

In addition to street sweeping efforts, regular hand sweeping of Campbell's downtown area is done 2x/ week to reduce litter.

TRASH & RECYCLING CANS

- Campbell purchased and placed approximately 60 new garbage cans at City parks. Xome of these new cans were replacements for broken cans; a large number were additional cans to increase the total number of trash cans in parks.
- The City has increased recycling efforts at City parks.
- City staff met with WVCR (waste contractor) to go over the commercial run to ensure that all commercial cans are collected on a regular basis

City of Campbell and non-municipal jurisdictions:

City of Campbell makes an effort to work closely with CalTrans to address generation of trash, even though CalTrans property is outside of the City's jurisdiction. The on and off ramps of Campbell at Highway 17 throughout Campbell have been found to be an ongoing source of litter.

Although Caltrans has the Adopt-A-Highway program in place for most of the freeway itself, there are still some locations that need more frequent cleanup. Some of these locations are not accessible by the volunteers; others are accessible by Caltrans personnel only. CalTrans has been as responsive as possible, based on available staff/budget constraints.

- The City of Campbell previously met regularly with Caltrans to investigate possible solutions to increase cleanup within its jurisdiction.
- 2008 – The City investigated the possibility of getting local businesses involved in the Adopt-A-Highway program. Staff met with CalTrans to confirm Adopt-a-Highway sponsors within it's jurisdiction along Highway 17. Cleanup of these adopted locations increased to twice per month. This program was put on hold by the State; this, in turn, has resulted in a hold on Campbell's efforts to initiate adoption of areas that are not yet covered by the program.

The City of Campbell has been very successful with its Great American Pickup Event.

Promotional methods have resulted in large numbers of volunteers participating. In April 2009, 160 volunteers attended.

- Paid advertisement of the event was done in local media papers, such as the Campbell Reporter, Campbell Times, and Campbell Express
- The municipal newsletter the Campbell Profile also publicized the event.
- The GAPU was also included in the community calendars of various media.
- Local schools are encouraged to participate. Each year, a letter is mailed to announce the event giving students the opportunity to volunteer in their community.

EVALUATION OF THE SITUATION FROM CITY OF CAMPBELL PUBLIC WORKS DIRECTOR:

The City's PW Director recently took a boat trip on Coyote Creek and saw the extent of the Trash problem. Overall, it appears that there has been a

TRASH INVENTORY & MANAGEMENT
CAMPBELL

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2008-2009 ANNUAL REPORT

Source	WPActivity	Work Plan Tasks	Accomplishments	Responsible Party
lack of a lead institution and of political leadership addressing this problem. The problem areas in creeks are hidden from the general public. Since trash is not very visible on city streets, people don't realize it is an issue. Even if they see the problem, they may believe it is a local issue and may believe that trash in creeks is the responsibility of the SCV Water District. It is possible that a regional public education, outreach and advertising campaign would help to have an impact on this issue. **City of Campbell 'Great American Pick Up' results:** The City of Campbell held one, very successful, cleanup event in FY 08-09. This was the "Great American Litter Pickup" in April 2009. City Public Works staff worked to publicize the event in a variety of venues prior to the date (flyers, news articles, municipal newsletter, letters to schools, posting on City website and CalTrans website). The publicity resulted in **160 volunteers** participating in cleaning up litter at 5 different sites; several of the sites were adjacent to a creek. **Great American Litter Pick Up** 4/18/09 - City of Campbell Volunteers were instructed in use of Tally sheets, and were provided with clipboards, etc. Working in groups, volunteers were able to pick up trash and carry out trash monitoring. 160 Volunteers participated, working for four hours. PW figures that at minimum wage of $8.00 per hour that works out to $5,120 worth of temporary labor. Litter was picked up from 5 sites, including the Los Gatos Creek Trail and the Los Gatos Creek County Park. 35 Bags of recyclables (cans/plastic/glass & paper) were collected 145 Bags of trash were collected

LG07	6/15/2009	Quito Rd from Old Adobe Rd. to Pollard Rd.	KAB	2	Conduct KAB assessments once or twice a year.	Continue to assess once or twice per year and pickup trash as needed.
LG08	6/15/2009	Quito Rd. on both sides of Mt. Claire Rd.	KAB	1.5	Conduct KAB assessments once or twice a year.	Continue to assess once or twice per year and clean creek banks when trash becomes excessive.
Monte Sereno						
				Guadalupe River		
MS05	6/15/2009	Hwy 9 (Ridgecrest Ave to Rose Ave)	KAB	2	Assess once or twice a year. Try to arrange a day to pick up litter. This area is in Caltrans jurisdiction along Hwy 9.	Assess once or twice a year. Conduct cleanup once a year if feasible. Notify Caltrans if litter is excessive.
MS01	6/15/2009	Hwy. 9 (Rose Ave. to Grandview Dr) including medians	KAB	1	Assess once or twice a year. Try to arrange a day to pick up litter. This area is in Caltrans jurisdiction along Hwy 9.	Assess once or twice a year. West Valley staff will cleanup once a year if feasible. Notify Caltrans when litter is excessive.
				San Tomas Aquino Creek		
MS04	6/15/2009	Hwy 9 (Blythswood Dr. to Ridgecrest Ave.)	KAB	2	Assess once or twice a year. Try to arrange a day to pick up litter. This area is in Caltrans jurisdiction along Hwy 9.	Assess once or twice a year. Conduct cleanup once a year if feasible. Notify Caltrans if litter is excessive.

Trash Problem Area Evaluation Results by Copermittee & Watershed

ID #	Date	Location	Assessment Tool	Score	Existing Management Actions	Recommended Management Actions and/or Future Evaluations
MS02	6/15/2009	Hwy. 9 (Grandview Dr. to Daves Ave.)	KAB	2	Assess once or twice a year. Try to arrange a day to pick up litter. This area is in Caltrans jurisdiction along Hwy 9.	Assess once or twice a year. West Valley staff will cleanup once a year if feasible. Notify Caltrans when litter is excessive.
MS03	6/15/2009	Hwy. 9 (Daves Ave. to Quito Rd)	KAB	1.5	Asses once or twice a year. Try to arrange a day to pick up litter. This area is in Caltrans jurisdiction along Hwy. 9	Continue to monitor and try to arrange a WVCWP cleanup. Site is in Caltrans jurisdiction.
Saratoga						
				San Tomas Aquino Creek		
SA03	6/15/2009	First 200' stretch of creek behind Big Basin Way. Represents the gas station and commercial parking lot area behind Big Basin Way along the top bank of Saratoga Creek.	KAB	3	This site is located behind restaurants and commercial establishments. Most of the litter is from pedestrians and trash that is left at the edge of the parking lot near the guardrail at the top of the creek bank. Current practice includes assessment at least once a year.	Creek access is limited due to steep slopes and dense vegetation. WVCWP staff will continue to monitor trash and work with Saratoga staff and volunteers to hold cleanups when feasible. Provide additional outreach to businesses and continue to assess annually.
SA05	6/15/2009	125' stretch of Quito Rd. from Sobey Rd. (near Hwy 9) extending toward Bicknell Rd.	KAB	2	Conduct assessment once or twice a year.	Quito Rd. is in Caltrans Jurisdiction. WVCWP staff will provide cleanup as time permits due to the potential for trash entering nearby San Tomas Aquino Creek.
SA02	4/29/2009	A 400' stretch of Wildcat Creek behind Sacred Heart School.	KAB	1.5	This site is on property by a private school. Cleanups are conducted annually when feasible. There are a few residential homes nearby, but the site is not easily accessed because it is fenced off and locked.	Continue to work with teachers on presentations to promote anti-litter and anti-dumping activities. Coordinate annual cleanups with urban RTA as feasible.

Great American Litter PICK UP

Saturday, April 18, 2009

Clean-up: 8:30 – 11:30 AM • Celebration: 12:00 – 1:00 PM

Help clean up litter in the City of Campbell. Register your family, friends, students or service club!
To register for this event, please call (408)866-2145, or visit our website at www.cityofcampbell.com

The City of Campbell's cleanup will focus on four locations: the Los Gatos Creek County Park, the Los Gatos Creek Trail, the freeway on and off ramps at Camden and Highway 17 and along the railroad tracks adjacent to Winchester Boulevard.

Rain or shine, volunteers will be asked to meet at the park at which time they will sign in and then disperse into groups. An agenda and instructions on safety and debris removal will be discussed. Gloves, vests and other tools will be furnished.

Volunteers are encouraged to dress appropriately for the event.

Refreshments will be provided in the morning and the event will conclude with a lunch at noon at the park pavilion.

Schedule of Events:

Registration	**8:00 – 8:15 AM**	**Los Gatos Creek County Park** **1220 Dell Avenue, Campbell**
Orientation	**8:15 – 8:30 AM**	**Welcome and Introductions, safety precautions, group assignments**
Disperse to Cleanup Sites	**8:30 – 11:30 AM**	**Pick up litter in designated areas**
Celebratory Lunch	**12:00 – 1:00 PM**	**Return to Los Gatos Creek County Park Pavilion, Closing Ceremonies**

For information online, please visit our website at www.cityofcampbell.com.

Urban Rapid Trash Assessment Worksheet

Santa Clara Valley Urban Runoff Pollution Prevention Program

WATERSHED/STREAM: San Tomas Aquino
MONITORING GROUP, STAFF: WVCWP
STATION NAME /LOCATION: Westmont

DATE/TIME: 2/5/09
STATION ID

Trash Assessment Parameter	CONDITION CATEGORY: Least Disturbed (Optimal Urban)	Sub optimal Urban	Marginal Urban	Poor
1. Level of Trash	On first glance, little or no trash visible. Little or no trash evident when streambed and stream banks are closely examined for litter and debris, for instance by looking under leaves.	On first glance, trash is evident in low levels. After close inspection small levels of trash evident in stream bank and streambed.	Trash is evident in medium on first glance. Stream, bank surfaces, and riparian zone contain litter and debris. Evidence of site being used by people: scattered cans, bottles, food wrappers, blankets, clothing.	Trash distracts the eye on first glance. Stream, bank surfaces, and immediate riparian zone contain substantial levels of litter and debris Evidence of site being used frequently by people: many cans, bottles, and food wrappers, blankets, clothing.
SCORE	20 19 18 17 16	15 14 13 12 11	10 9 8 7 6	5 4 3 2 1 0
2. Actual Number of Trash Items Found	0 to 100 trash items found based on a trash assessment of a 100-foot stream reach.	101 to 250 trash items found based on a trash assessment of a 100-foot stream reach.	251 to 500 trash items found based on a trash assessment of a 100-foot stream reach.	Over 500 trash items found based on a trash assessment of a 100-foot stream reach.
SCORE	20 19 18 17 16	15 14 13 12 11	10 9 8 7 6	5 4 3 2 1 0
3. Transportable, Persistent, Buoyant Litter	Little or no (< 25 pieces) transportable, persistent, buoyant litter such as: hard or soft plastics, styrofoam, balloons, cigarette butts.	Low to medium presence (26-75 pieces) of transportable, persistent, buoyant litter such as: hard or soft plastics, styrofoam, balloons, cigarette butts.	Medium prevalence (76-200 pieces) of transportable, persistent, buoyant litter such as: hard or soft plastics, styrofoam, balloons, cigarette butts.	Large amount (>200 pieces) of transportable, persistent, buoyant litter such as: hard or soft plastics, balloons, styrofoam, cigarette butts;
SCORE	20 19 18 17 16	15 14 13 12 11	10 9 8 7 6	5 4 3 2 1 0
4. Biohazard, Toxic and Sharp Objects	B: Trash contains no medical waste, diapers, pet or human waste. No evidence of toxic substances such as chemical containers or batteries. Only 1 piece of broken glass or metal debris, if any, is present.	B: No toxic substances, but small presence (2-10 pieces) of sharp objects such as broken glass and metal debris.	Presence of **any one** of the following: hypodermic needles or other medical waste; used diaper, pet waste, or human feces; any toxic substance such as chemical containers, batteries, or fluorescent light bulbs. Medium to high prevalence (11-50 pieces) sharp objects.	Presence of **more than one** of the items described in the marginal condition category, and/or high prevalence of (> 50) sharp objects.
Site Accessibility	A: Access is difficult, restricted by locked gate or some other physical barrier like steep banks or thick riparian veg. Site reach does not appear to be used by people. Might be private property or protected watershed.	A: Access is limited and site reach does not appear to be used by people. No trails down to creek.	A: Public access to reach is fair to good but site does not appear to be used frequently, **or** private access is good without any public access.	A: Excellent reach access including trails down to and adjacent creek and creekside space for sitting down. Some evidence that reach is used frequently by the public (e.g. rope swings, many beer/soda cans and food wrappers left on the banks, etc.).
B SCORE	10 9	8 7 6	5 4 3	2 1 0
A SCORE	10 9	8 7 6	5 4 3	2 1 0

1 *Urban Rapid Trash Assessment Protocol, SCVURPPP (Version 1)*

Urban Rapid Trash Assessment Worksheet

Santa Clara Valley Urban Runoff Pollution Prevention Program

	CONDITION CATEGORY			
Trash Assessment Parameter	**Least Disturbed (Optimal Urban)**	**Sub optimal Urban**	**Marginal Urban**	**Poor**
5. Illegal Dumping	D: No evidence of illegal dumping. No bags of trash, no yard waste, no household items placed at site to avoid proper disposal, no shopping carts.	D: Some evidence of illegal dumping. Limited vehicular access limits the amount of potential dumping, or material dumped is diffuse paper-based debris.	D: Presence of **one** of the following: furniture, appliances, shopping carts, bags of garbage or yard waste, coupled with vehicular access that facilitates in-and-out dumping of materials to avoid landfill costs.	D: Evidence of chronic dumping, with **more than one** of the following items: furniture, appliances, shopping carts, bags of garbage, or yard waste. Easy vehicular access for in-and-out dumping of materials to avoid landfill costs.
Illegal Littering	L: Any trash is incidental litter or carried downstream from another location.	L: Some evidence of litter within creek and banks originating from adjacent land uses	L: Prevalent in-stream or shoreline littering that appears to originate from adjacent land uses.	L: Large amountof litter within creek and on banks that appears to originate from adjacent land uses.
D-SCORE	10 9	8 7 6	5 4 3	2 1 0
L-SCORE	10 9	8 7 6	5 4 3	2 1 0
6. Accum-ulation of Trash	There does not appear to be a problem with trash accumulation from downstream transport. Trash, if any, appears to have been directly deposited at the stream location.	Some evidence that litter and debris have been transported from upstream areas to the location, based on evidence such as silt marks, faded colors or location near high water line.	Evidence that trash is carried to the location from upstream, as evidenced by its location near high water line, siltation marks on the debris, or faded colors.	Trash appears to have accumulated in substantial quantities at the location based on delivery from upstream areas, and is in various states of degradation based on its persistence in the waterbody. A large percentage of trash items have been carried to the location from upstream.

WEST VALLEY
CLEAN WATER PROGRAM

Charles R. Hoppin, Chair
State Water Resources Control Board
1001 I Street
Sacramento, CA 95814

June 3, 2009

Re: Support for Expanded Use Proposal No. 16877-Bay Area-wide Trash Capture Demonstration Project

Dear Mr. Hoppin,

The West Valley Clean Water Program (WVCWP) supports proposal No. 16877-Bay Area-wide Trash Capture Demonstration Project submitted by San Francisco Estuary Project (SFEP) and Association of Bay Area Governments (ABAG) for installation of trash capture devices in catch basins in Bay Area cities and counties. WVCWP represents the urban runoff program for four small south San Francisco Bay communities: Campbell, Los Gatos, Monte Sereno and Saratoga.

Over the past year we have been closely tracking the Trash Capture Pilot Demonstration Project by our county-wide urban runoff program (aka: SCVURPPP), and have contemplated, given our limited and scarce local resources, how our communities might also install such capture devices in selected areas. By funding this project and including our smaller agencies in the proposed Bay-Area Project, we could have a visible and tangible effect on reducing trash entering waterways through storm drains.

Furthermore, being at the top of the watershed, we know that even if only a few devices are installed within our communities, they will have a significant impact on trash and litter in waters downstream. We are committed to watershed approaches and support this project's effort to embrace and further watershed based solutions.

Respectfully,

Kelly Carroll
Program Manager

Mr. Bruce Wolfe, Executive Officer
Regional Water Quality Control Board
San Francisco Bay Region
1515 Clay St., Suite 1400
Oakland, CA 94612

Subject: City of Cupertino Urban Runoff Management Program
FY 2008-2009 Annual Report

Dear Mr. Wolfe:

This report is submitted by the City of Cupertino, in conjunction with the Santa Clara Valley Urban Runoff Pollution Prevention Program's Annual Report, pursuant to provision C.6.a.of the Program's municipal storm water NPDES Permit (Order No. 01-024). The report summarizes activities performed during FY 2008-2009 in accordance with the City of Cupertino's Urban Runoff Management Plan (URMP) submitted to the Water Board on September 1, 1997 and updated in October 2000 and September 2004, and the performance standards contained therein.

Contents of Report

The goals of this Annual Report are to: 1) concisely document implementation of our URMP and FY 08-09 work plan during the past fiscal year; 2) evaluate program results for continuous improvement; 3) comply with permit requirements; and 4) share this information with other Co-permittees, municipal decision-makers, and the public. To accomplish these goals, the report contains the following sections:

- 0: - Certification Statement
- 0: - Response to Water Board Comments
  There were no comments for Cupertino on the FY 07-08 Annual Report by Water Board Staff that required a response.
- 0: - Table of Contents
- 0: - Acronyms
- 1: - IC/ID Elimination
- 2: - Industrial/Commercial Discharger Control Program
- 3: - Public Agency
  - Public Streets, Roads & Highways O & M and Rural Roads
  - Storm Drain Operation and Maintenance
  - Corporation Yards Operation and Maintenance
- 4: New Development and Redevelopment Procedures
- 5: Construction Inspection

- 6: Public Information & Participation
- 7: Pesticide Management
- 8: Mercury Pollution Prevention
- 9: Copper and Nickel Action Plan
- 10: Trash Inventory and Management
- 11: Water Quality Monitoring
- Permit Reapplication Process
- 12: Staff Training Summary Table

Program Highlights and Accomplishments

City Council approved funding for a new Environmental Affairs Coordinator who was hired in December 2008. She immediately applied for and eventually received grant funding that enabled the City to perform a detailed energy and water conservation audit of all City owned facilities, streets and parks. Soon after she came on board, a "Green Team" was established with at least one representative from every department and facility. The exchange of ideas and focus on all things "green" has prompted more enthusiasm among City staff in general for programs that benefit water quality. The City Council and the City Manager have, by this move, given clear direction that Cupertino strives to be an environmental leader and priority is given to decisions that improve the environmental health of the community and the world.

IC/ID Elimination and Industrial Commercial Discharger Control:

In FY '09-'10, the City will increase staff time dedicated to NPDES inspections and follow-up by 40%. The IC/ID Inspector's time has always been shared equally with the Public Works Maintenance Department. Due to an increase in reported incidents, the staff person providing inspections will dedicate 90% of his hours to NPDES inspections and 10% of his time to Maintenance Activities. This was approved as part of Public Work's budget planning process in March 2009.

In FY '08-'09 the IC/ID Inspector responded to 97 incidents by conducting 148 initial and follow-up inspections where verbal notice and/or storm drain education information was discussed. Each reported site, (residential, commercial and industrial) was brought into compliance. Additionally, the Inspector's daily logs show that he conducted proactive drive-by inspections of 246 commercial, industrial and food facilities. The increased scrutiny is working well. The Santa Clara County Environmental Health Specialists that conduct restaurant inspections and report urban runoff violations to the City, as part of an agreement between Cupertino and County, did not find any violations in Cupertino during FY 08-09. All industrial facilities that had previous non-compliance issues were revisited this year and were found to be in compliance.

Public Education, Community Participation and Trash Management

This spring, Environmental Programs staff partnered with the new Environmental Affairs Coordinator to help host an Earth Day Fair. The City held its first creek cleanup event at Calabazas Creek in conjunction with international Coastal Cleanup Day in September 2008. The event was advertised in the City's newsletter on relatively short notice. When over 60 residents and local students showed up to participate, it validated the effectiveness of communicating with the City's population via our newsletter, the *Cupertino Scene.* The success of the first cleanup event led to the second event held on National River Cleanup Day in May 2009. This time, over 80 people called to pre-register and we began to encourage people to volunteer at other nearby sites. This encouraged Environmental

Programs staff arrange for a second cleanup site at nearby Regnart Creek to accommodate more people.

Household Hazardous Waste Collection

Cupertino staff promoted HHW services in displays at City Hall, the Community Center and the Cupertino Library, as well as in the City newsletter, on the City's website and at all City community events. Cupertino's residential participation in HHW events was reported in November 2008 for FY '07-'08; at 7.2 % or 1,444 cars from a possible 20,172 households. The Countywide Household Hazardous Waste drive-thru events drew significantly more residents from Cupertino than expected. The cities in Santa Clara County had signed an agreement to fund services for 3% of their population. In FY '08-'09, Cupertino participation was more than double that percentage and the City increased its commitment to fund the cost of the program to pay for any and all Cupertino residents who want to participate.

New Development and Redevelopment Procedures

BMP O&M Inspection Program:

During FY '08-'09, the Cupertino Environmental Programs and Engineering staff worked extensively with a private developer and property owner to remediate bio-swales that had failed after the first year treatment. The site was completely redeveloped and in 2007 was leased to a grocery store. In June 2008, routine BMP O&M inspections by the City revealed that pedestrian and cart traffic challenged the vegetation in the swales. Compacted soil kept subsequently replanted seeds from taking root and thriving. After test plots were examined, a swale remediation plan was developed and implemented, which included installing 12 inches of new soil, a two-rail fence to protect the area from cart and pedestrian traffic and the planting of heartier, taller *Juncus Patens* to create the vegetative cover. Through this experience, City staff who review plans for bio-swales have learned to recognize the challenges that come with putting swales in parking lots. In addition, Public Works staff learned first-hand that the BMP O&M inspections, follow-up to resolution and the O&M agreements are necessary and useful for maintaining successful storm water treatment measures at private development sites.

Stevens Creek Corridor Restoration Project (Blackberry Farm Redevelopment)-Phase 1

This creek restoration project, the first done by the City of Cupertino, fulfills a quest over 25 years old. Planning for this project was initiated in 2001. The citywide envisioning process took place from 2002 to 2004. The concept generated great interest from the community and this series of public meetings drew about 500 regular participants. Public opinion surveys found that residents' strong priority for the project was restoring the creek and making it healthy.

The Stevens Creek Task Force prepared a feasibility report with recommendations on how best to develop a trail from one end of the City to the other along Stevens Creek, including the opportunity to use 60 acres of land from McClellan Ranch to Stevens Creek Blvd. The project involved land purchased by the City in stages, Santa Clara Valley Water District holdings, and Blackberry Farm, formerly a privately-owned picnic area that was acquired by the City in 1991.

Concurrent with the City's project scoping, the Santa Clara Valley Water District was negotiating a legal settlement with entities concerned with steelhead and salmon protection in three local creeks, including Stevens Creek. In 2004, the Water District's negotiations let to a settlement involving the Department of Fish & Game, the U.S. Natural Marine Fisheries Service, and several other groups to effect cold water management to provide fish with improved spawning and rearing habitat and improved fish passage conditions. As part of this collaborative action agreement, the Water District used District funds to pay for elements of the creek restoration plan. The City also obtained partial funding from other sources, such as the California Natural Resources Agency, California Department of Parks and Recreation and the California Department of Water Resources.

Construction of Phase 1 of this project began in June 2008 and was completed in July 2009. Water quality-related aspects are replacement of over 3 acres of conventional asphalt parking lot with a smaller lot made up of porous pavement and vegetated geocell parking stalls; a 0.7 mile multi-use ADA-compliant trail along the creek most of which is porous concrete; removal of a diversion dam and low flow stream crossings in Blackberry Farm; relocation of a maintenance facility out of the riparian corridor; realignment, widening, and regrading of the Stevens Creek channel for a more natural meander, greater bank stability, and less down-cutting; and habitat restoration with native plantings.

Construction Inspection

Guidance for Planned Fire Test Discharges at Construction Sites

Building inspectors brought their concern about fire sprinkler test discharges at construction sites to attention of the Environmental Programs Manager. After a meeting to discuss the challenges involved, the Building Official requested guidance be developed for contractors, with options for ways to control the discharges. A draft fact sheet, *City of Cupertino Requirements for Fire Sprinkler System Tests and Water Pipe Flushing* (attached to the Copper section of this report) was developed in June 2009 and presented to Building Inspectors and the Deputy Fire Marshall at the annual in-house Construction Inspection training meeting. Feedback from Building and Fire Department staff helped to establish procedures that will be piloted by the City in FY '09-'10. The IC/ID Inspector will visit sites where these tests are planned to evaluate the BMPs that are used and to provide storm drain and watershed protection information to contractors.

Thank you for your review of this Annual Report. If you have any questions regarding the materials submitted, please contact me at 408.777.3242.

Very truly yours,

Cheri C. Donnelly

FY 08 - 09 Annual Report

Section 1

IC/ID Elimination Activities

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2008-2009 Annual Report: IC/ID Tasks
Cupertino

Perf Std ID	Activity	FY08-09 Tasks	Status / Description	Due Date	Responsible Party
Illicit Connection & Illegal Dumping Elimination Activities					
ICID PS-2	Staff training	Hold annual training for urban runoff inspector and on-call staff. In order to promote better channels of communication and consensus on storm drain protection measures & BMPs, Cupertino's IC/ID Inspector and Env Programs Mgr	Cupertino's IC/ID Inspector attended training meetings and workshops to coordinate with other agencies, NGOs and w/ City staff from several departments : • The Inspector attended the Program's *Construction Site Management Workshop* on 11/21/08. • Met with Cupertino Sanitary District's Inspectors (who are also San Jose storm water inspectors) to coordinate the response to storm water issues that are discovered during fats, oils and grease (FOG) inspections (2/4/09). • Env Programs Mgr accompanied the IC/ID Inspector to San Jose Water Company's annual Drain Inlet Protection BMP class for their crews (3/26/09). • Attended Stevens Creek Monitoring session led by an EOA/SCVURPPP Scientist, held in Cupertino. Attendees included reps from Water District, SC County, Sunnyvale, Mtn View, Los Altos, Cupertino and included Stevens Creek Permanente Watershed Council Director. Discussed strategy to address potential impacts on creek from surrounding areas. IC/ID Inspector helped to identify source of dry weather flows.(4/30/09) • Attended the annual SC County DEH Restaurant Inspection meeting. This year, managers met to coordinate reporting, better communication between agencies and to determine any needs for new outreach materials (5/07/09). • Participated in the Building Inspector's annual Const. Inspection training meeting (6/30/09)	**Training Dates** 11/21/08 2/4/09 3/26/09 4/30/09 5/7/09 6/30/09	Environmental Programs Manager and IC/ID (nonpoint source) Inspector

Perf Std ID	Activity	FY08-09 Tasks	Status / Description	Due Date	Responsible Party
			• The Env.Prgm. Mgr. met weekly with the City's IC/ID Inspector to discuss improvements in Cupertino's incident response and reporting procedures for industrial/commercial inspections. FY08-09 On-call Staff training was postponed until the August 5, 2009 meeting with all Service Center (corp. yard) Staff.		
ICID PS-4	Field Investigations	NPS inspector annually walks the creeks, watching for evidence of any illegal dumping or illicit connections.	The IC/ID (NPS) Inspector's creek walk was discontinued this year to make time for additional inspections, especially for drive-by inspections of food facility dumpster areas and storm drains. He spent additional time supporting and coordinating with other departmental staff (bldg inspectors, Code Enforcement and maintenance workers) on storm drain cleaning and incident follow up.	Ongoing	IC/ID Inspector
ICID PS-6	Enhanced reporting requirements	Provide quarterly reports to Program.	Quarterly reports were submitted to Program staff as requested. Cupertino's IC/ID detailed inspection table is included at the end of this section. All violations are resolved immediately or are re-inspected through resolution, with additional re-check inspections after compliance.	Quarterly	Environmental Programs Staff enters inspector's data in the Access database
ICID PS-7	Effectiveness Evaluation	Review and evaluate the effectiveness of city efforts.	See Below	7/09	Public Works Dept.

Evaluation:

A total of 97 incidents were followed-up by the IC/ID Inspector generating 96 verbal warnings and 51 additional visits to ensure compliance. Compliance was secured at all sites, because he either stayed on site until he could verify resolution or he returned (usually the same day) for a follow-up inspection. In addition to responding to incidents, the inspector visited 246 facilities as part of his *dailies* (daily proactive drive-by inspections) which this year included 137 restaurants, 30 grocery stores and 31 mixed commercial and food facilities. Some of these inspections are follow-ups at sites where there have been previous violations. Therefore the increase in reported or discovered incidents (up from 63 the previous year) is attributed to the increased scrutiny and time spent in the field. The attached spreadsheet of incidents listed by source shows that more than half of the incidents in Cupertino this year (52 out of 97) were from food facilities. The breakdown of these is 22 from oil and grease discharges, 15 from non-hazardous dumping (generally the dumpster area is littered with cardboard boxes and debris), 6 dumpster discharges, and 6 miscellaneous incidents (usually a combination of litter, cardboard and grease). The remainder of the violations included

Perf Std ID	Activity	FY08-09 Tasks	Status / Description	Due Date	Responsible Party

1 violation each of: carpet washing, surface cleaning, an illicit plumbing connection, and hazardous dumping (fluorescent bulbs in the dumpster). In Cupertino, where food facilities and restaurants make up most of the commercial businesses, the use of the inspector's time to monitor these sites is well spent. The runner up for incident sources in FY08-09 is *residential* where pool discharges, over-watering and broken sprinklers are the most common violations (12 out of 19 incidents). The inspector uses educational materials, a camera and the municipal code (including the monetary fine named therein) to achieve compliance. He takes his time to explain the City's efforts toward watershed protection and often assists in the cleanup providing the business and residential community with support as well as instruction. This method seems to be working extraordinarily well; he has received commendation letters and letters of appreciation from several of the people that he contacted to resolve their storm drain violation.

The IC/ID Inspector's 97 reported follow-ups to storm drain incidents represent an increase of 34 responses over the previous year. While the Inspector's annual creek walks were discontinued this year, he still spent some time on creek and storm drain surveillance. He has worked for the City's corporation yard or Service Center for over 30 years and provides valuable historical knowledge about the local watersheds and the City's storm drain system. This year he assisted the Stevens and Permanente Creek Watershed Council (SPCWC) in trying to locate the source of a dry weather flow from an outfall near Stevens Creek Blvd and Blackberry Farm Golf Course. The City might resume the Inspector's creek walk on a triennial schedule so that he can keep an eye on potential erosion threats to the watershed. His walks over the past few years have revealed only healthy-looking creeks in Cupertino. Whereas his incident responses and watershed education efforts will result in more community awareness and overall compliance.

Cupertino Village

In May 2008 this shopping and restaurant center harbored several illegal discharges. Cupertino's IC/ID Inspector uses a camera to document violations, encourage compliance, and provide examples of desired standards. (See attached photos). In spring of 2008 trash and debris were on the ground and the compactor was leaking. The tallow bin was overfull with grease and many of the tenants did not hit their target when dumping their restaurant oil into the bin, which contributed to the oil on the ground. The IC/ID Inspector was particularly concerned about the compactor leaking, because the oil and trash could flow into the storm drain. It took weeks of visiting the site and working with the property management group, the property owner, Cupertino's Code Enforcement Officer and the IC/ID Inspector before resolution was achieved. In August 2008, the owner installed a new compactor. Plans had already been made to design and build a new enclosure. The new enclosure was conditioned by the City's Planning staff to include a 4" wide trench with removable grate cover around the enclosure. This has helped to prevent spills from getting to the storm drain long enough to allow for safe cleanup by the maintenance staff. The IC/ID Inspector recommended secondary containment for the tallow bins in the new enclosure and the property owner complied. Other features of compliance included full-time maintenance staff hired by the property owner to monitor the dumpster areas, a tallow bin enclosure that is separate from the trash compactor and recycling enclosure, and a tenant education program that included signage in 3 languages at the dumpster areas as well as notices sent to restaurant owners and at least one group meeting with tenants to ensure that house-keeping practices were understood.

Cupertino's enforcement and inspection staff consider this a site that sets the standard for the City. They will strive for similar results at other shopping & restaurant centers. The IC/ID Inspector visited the site repeatedly in 2008 and issued notices to comply until the problem was turned over to the City attorney. At that point a meeting was required with the property owner to determine penalties and fines. The persistence paid off by opening lines of communication (by email and phone) with the property owner. This is a difficult property to maintain as more than half of a dozen restaurants share the dumpster areas and several different languages are spoken among business owners and restaurant staff. In 08-09 the IC/ID Inspector visited Cupertino Village weekly to prevent any new problems from arising. There were a few incidents that needed follow up, but the property owner always complied within 24 hours. Since the owner lives on the East Coast he has hired a local property management service that responds at the first call. Photos were often emailed from City staff to show the

Santa Clara Valley Urban Runoff Pollution Prevention Program

Cupertino

Perf Std ID	Activity	FY08-09 Tasks	Status / Description	Due Date	Responsible Party
violation and the property management reciprocated with photos to show that resolution had been achieved. Although it is not required in covered trash enclosures, the IC/ID Inspector, after several successfully resolved incidents related to grease problems, advises or requires secondary containment for tallow bins where there is a high probability that grease spills will occur. In order to promote better channels of communication and consensus on storm drain protection measures and BMPs, Cupertino's IC/ID Inspector and Env Programs Mgr attended San Jose Water Company's annual storm drain field-staff training in March 2009. This is the first step in working with businesses that regularly work in the City, but do not have their businesses in the City. The Inspector increased surveillance of food facilities and dumpster areas in 08-09. This increase also led to a decision to increase the inspector's time dedicated to storm water inspections from part-time to 90% time. The balance of his time is still spent as maintenance staff at the City's Service Center.					

New 08-09 Trash Enclosure and Tallow Bin Enclosure at Cupertino Village

New 08-09 Trash Enclosure and Tallow Bin Enclosure at Cupertino Village

CUPERTINO
Summary of ICID Inspections
7/1/08 to 6/30/09

	Date	Resolved	Facility Name	Address	Incident Reporting Source	Incident Type	Incident Source	Enforcement Action	Inspector Notes
1	7/3/08	Yes	P.W. Market	20620 Homestead Rd	Illicit Discharge Inspectors	Misc. incidents	Food Facilities	Verbal Notice	Inspector spoke to the store manager and asked that the trash and oil discharge be cleaned up. Provided storm drain education and watershed protection information.
2	7/3/08	Yes	Ranch 99	10983 N. Wolfe Road	Illicit Discharge Inspectors	Food Facility Oil and grease discharge	Food Facilities	Verbal Notice	Inspector spoke to the store manager and asked him to clean up the oil and tallow discharge, and the trash. Provided Public Education information.
3	7/7/08	Yes	Resident Palo Vista Rd	10418 Palo Vista Road	Illicit Discharge Inspectors	Allowable Discharge	Residential	Verbal Notice	Inspector spoke to resident to report the discharge from broken sprinkler head and the excessive water going onto sidewalk, gutter and into the stormdrain. Asked that the sprinkler be fixed. Provided storm drain education.
4	7/8/08	Yes	AQUABLUE	22271 Kendle	Interdepartmental	Pools/Spas/Fountains discharge	Residential	Verbal Notice	Told AQUABLUE employee not to discharge the pool water into the storm drain. Spoke to president of the company and provided public education and watershed protection info.
5	7/8/08	Yes	Commercial Area	10833 Saich Way	Illicit Discharge Inspectors	Allowable Discharge	Commercial	No Action	Fire Dept used class A fire foam on a high-risk fire that started at a liquor store. They used methods necessary for putting out the fire. Some fire foam went into the storm drain, but incident was not near a creek.
6	7/17/08	Yes	Resident Carmen Rd	10200 Carmen Road	Illicit Discharge Inspectors	Allowable Discharge	Residential	Verbal Notice	Spoke to resident and informed him not to discharge water from the hose into the stormdrain. Provided storm drain and watershed protection education.
7	7/24/08	Yes	Resident Cupertino City Center	20350 Cupertino City Center	Citizen Complaints	Allowable Discharge	Residential	Verbal Notice	Contacted San Jose Water to turn off water at household. Provided resident with watershed protection education.
8	8/5/08	Yes	Cupertino Village	10983 North Wolfe Road	Illicit Discharge Inspectors	Food Facility Oil and grease discharge	Food Facilities	Verbal Notice	Cupertino Village property management hired a full-time maintenance person to work at the site to monitor and clean up all compactor and tallow bin problems. Cupertino's Inspector asked maintenance person to clean up the tallow bin area and to use rice hull ash absorbent to clean up the grease. Also told her to provide secondary containment for tallow bin. She cleaned up the grease. (grease is an ongoing problem here, where staff from at least 7 restaurants empty grease into one tallow bin area).
9	8/5/08	Yes	P.W. Market	20620 Homestead Road	Illicit Discharge Inspectors	Dumpster Discharge	Food Facilities	Verbal Notice	Spoke to store manager about the leaking compactor. Asked him to repair the compactor and clean up the discharge.
10	8/5/08	Yes	Whole Foods Market	20955 Stevens Creek Blvd	Illicit Discharge Inspectors	Food Facility Oil and grease discharge	Food Facilities	Verbal Notice	Spoke to Lead Receiver about the discharge of grease onto the floor. She agreed to clean it.

CUPERTINO
Summary of ICID Inspections
7/1/08 to 6/30/09

11	8/6/08	Yes	Resident Stevens Creek Blvd	20259 North Point Homestead Road	Citizen Complaints	Vehicle and equipment leaking	Residential	Verbal Notice	Spoke to General Contractor and asked him to absorb the hydraulic fluid and clean up the street and gutter. Provided storm drain and watershed protection information. Revisited site.
12	8/7/08	Yes	Ranch 99 Market	10983 N. Wolfe Rd	Illicit Discharge Inspectors	Food Facility Oil and grease discharge	Food Facilities	Verbal Notice	Spoke to store staff and required clean up of leakage from the compactor. Told them to not to allow discharge to reach the storm drain. Told them to berm area and direct flow to sanitary drain. Provided storm drain education.
13	8/7/08	Yes	Resident Las Ondas Wy	20109 Las Ondas Way	Citizen Complaints	Pools/Spas/Fountains discharge	Residential	Verbal Notice	Inspector spoke to homeowner and informed him that you can not discharge fishpond water into the storm drain. Provided pond water information and storm drain education.

Summary of ICID Inspections
7/1/08 to 6/30/09

65	2/25/09	Yes	Japanese Fusion Tapus	19980 Homestead Road	Citizen Complaints	Surface cleaning discharge	Food Facilities	Verbal Notice	Informed *Drain Doctor* employee that discharging mud into the storm drain is prohibited and asked him to clean up the mess and the storm drain. Provided storm drain education and watershed protection info.
66	3/3/09	Yes	Peninsula Bible Church	10601 Blaney Ave	Citizen Complaints	Paint discharge	Commercial	Verbal Notice	Two children with their father complained about "blue ink" in the street. Painters had thrown excess paint into dirt area, then washed it into the street. The ICID inspector provided storm drain education along with a warning about the City's penalty fine for discharging toxic material to a storm drain. The Inspector showed them how to clean it up using a berm and vacuum method. They were given information on the County's HHW disposal program.
67	3/9/09	Yes	PG&E Substation	PG&E Substation located at an area between Claifornia Oak and English Oak Ct	Citizen Complaints	Allowable Discharge	Public facilities and Utilities	Verbal Notice	Citizen claimed that the pump station wasn't working. He was concerned that the failure might lead to illegal discharges to the creek. The Water Retention Pond at the PG&E Substation at Monte Vista is not automatic for monitoring purposes. It was set up this way so that the water will not overflow and run/release into the creek. It was working correctly. An authorized SWPPP was checked by the City's inspector. He also verified that permits from the County of Santa Clara, City of Cupertino and Department of Fish and Game were all in order. BMPs were set up correctly.
68	4/2/09	Yes	Apple Computer, Inc.	19333 Vallco Parkway	Other Agency	Tracking soil	Construction Sites	Verbal Notice	Spoke with Foreman about mud tracking and advised him to clean up all the mud and the stormdrain. Provided storm drain education and information on watershed protection. (Muni Code 9.18010). Revisited site the same day to verify cleanup.
69	4/2/09	Yes	KFC Restaurant	10526 South De Anza Blvd.	Citizen Complaints	Food Facility Oil and grease discharge	Food Facilities	Verbal Notice	Advised the owners to clean up the grease from the parking lot and stormdrain. Followed up the next day and it was cleaned up. Provided Storm drain education and Watershed Prevention info.
70	4/8/09	Yes	DeAnza College	21250 Stevens Creek Blvd	Illicit Discharge Inspectors	Water line breaks	Public facilities and Utilities	Verbal Notice	Contacted the on-site Supervisor at DeAnza College about the boiler. Went back to follow up. A 2.5" copper hot-water-heating line for *Flint Center*'s boiler was repaired. The section of bad pipe was replaced and the entire line was pressure tested.
71	4/9/09	Yes	Focus Hair	20956 Homestead Rd	Citizen Complaints	Grey water discharge	Commercial	Verbal Notice	Contacted the manager and advised her to empty bucket of soapy water into a sink or toilet. Provided public education and stormwater pollution prevention and watershed protection information. Revisited site same day to recheck storm drain area.
72	4/9/09	Yes	SCVWD	End of Mary Ave at Highway 280	Interdepartmental	Misc. incidents	Public facilities and Utilities	Verbal Notice	City staff noticed white liquid coming from an outfall flowing into Junipero Serra Channel. City's IC/ID inspector contacted Water District about their right of way. SCVWD could not identify the source, but it appeared that someone had illegally dumped the liquid substance. SCVWD cleaned up the spill. The City's Inspector revisited the site that day to verify cleanup.

Industrial/Commercial Discharger Control Program

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2008-2009 Annual Report: IND – Industrial & Commercial Inspection Tasks
Cupertino

P.S. Id.	Activity	FY08-09 Tasks	Status / Comments	Due Date	Responsible Party
Industrial/Commercial Discharger Control Programs					
IND-PS-3	Staff Training - Coordination with County Environmental Health Specialists on joint inspections of food facilities	Continue to hold an annual overview of the restaurant inspection program with the Co. Health Dept.	Cupertino's annual restaurant inspection training meeting was held on 5/7/09 with two SC County Supervising Environmental Health Specialists and the Senior Env. Health Specialist (Inspector) for facilities in Cupertino. Managers and ICID Inspectors from Cupertino and the West Valley Communities call the annual meetings to coordinate the joint inspection program of retail food facilities in their cities. Topics discussed included: Review of inspection reports from current year and previous fiscal year. Cupertino had not yet received any referrals for violations from DEH inspectors for FY08-09. Cupertino's Environmental Programs Manager asked the County Health Supervisors to verify that this was accurate. The proposed requirements from the not yet final MRP were examined to determine changes in the joint inspection Agreement that might be required in FY 09-10. City reps informed the County DEH Supervisors that we would be interested not only in food facility inspections, but in pool discharge violations and sanitary sewer overflows as well. We reviewed the joint inspection Agreement (not a formal MOA) and noted that an updated version would be needed after the MRP is approved.	5/7/09	Environmental Programs Mgr & Cupertino's IC/ID Inspector attend annual training meetings with DEH Supervisors or with DEH Supervisors & Inspectors on alternate years. In 08-09 the meeting was with DEH Supervising Env. Health Specialists.

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2008-2009 Annual Report: IND – Industrial & Commercial Inspection Tasks
Cupertino

P.S. Id.	Activity	FY08-09 Tasks	Status / Comments	Due Date	Responsible Party
IND PS-3	Check for new industrial businesses.	In Spring '09 the City's Industrial Inspector will review applications for "Tenant Improvements" (TI) in the Building Dept. to determine if any of the businesses on our two light-Industrial streets had changed their operations and should be included in our routine Industrial inspections.	No tenant improvements were submitted that would trigger a requirement for new industrial inspections.	Spring'09 and ongoing	Industrial inspector
IND PS-3	Commercial Inspections	The industrial facility inspections that cover approximately 34 vehicle maintenance shops, dry cleaners and veterinarians in Cupertino will be conducted in FY09-10 since they were inspected in FY07 - 08. Inspections are on a biennial schedule.	Eleven industrial facilities in Cupertino were inspected in '08-'09 at the beginning of the fiscal year. This is the balance of the 24 inspections that were conducted in FY07-08. See evaluation of industrial facility inspections, below.	9/08 AR	Industrial Inspector
IND PS-3	Commercial Food Facility Inspections	The County Dept of Environmental Health conducts restaurant inspections annually in Cupertino (through an agreement between the City and the Health Dept.). The City's nonpoint source inspector also conducts daily proactive inspections of storm drains near or on restaurant property and distributes educational storm drain and watershed protection information as necessary.	The County Health Dept. inspected 256 food facilities in Cupertino, which included large and small restaurants, bakeries, and grocery stores where cooked food is prepared and sold on site. This year, County Inspectors did not find any violations in Cupertino. Cupertino's IC/ID Inspector completed 198 daily drive-by inspections, including 137 restaurants, 30 grocery stores and 31 shopping centers (mixed commercial and restaurant). He followed up and resolved 52 incidents related to food facility violations. In February, San Jose Fats, Oil and Grease (FOG) Inspectors for Cupertino Sanitary District met with the City's Environmental Programs Mgr and the IC/ID Inspector to discuss coordinating efforts. As a result, several referrals from FOG inspectors helped the City's IC/ID Inspector maintain compliance at additional food facilities. Cupertino's increased scrutiny of food facility inspections may have preempted the inspections by County. All food facility violations trigger additional proactive inspections by Cupertino's ICID Inspector. See IC/ID Section (1) of this report for more detail.	FY08-09 ongoing	County Dept of Environmental Health Inspectors with Cupertino ICID Inspector follow-up.

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2008-2009 Annual Report: IND – Industrial & Commercial Inspection Tasks
Cupertino

P.S. Id.	Activity	FY08-09 Tasks	Status / Comments	Due Date	Responsible Party
IND PS-4	Staff training – Industrial facility Inspections	Hold annual training for Industrial Inspector.	On June 30, '09, an in-house training session for the Building Inspectors (who also conduct IND inspections) included a review of Cupertino's Industrial and Commercial Inspection goals and a discussion about the likelihood of annual IND inspections in the future.	6/30/09	Environmental Programs and IND Inspectors from the Building Dept
IND PS-4	Enhanced reporting requirements	Continue to track all non-compliance, follow-up enforcement actions and final resolutions resulting from inspections. Submit data to the Program quarterly.	Cupertino's data on results and follow-up of industrial/commercial inspections conducted during the fiscal year was submitted to the Program in July 2008 and is included as an attachment at the end of this IND section.	Ongoing	Public Works Dept.
IND PS-4	Effectiveness Evaluation of Restaurant Inspections	Review and evaluate the effectiveness of city efforts.	The restaurant and food facility inspections were very successful in 08-09. Inspections were augmented by 198 proactive drive-by inspections from the IC/ID Inspector and referrals from the fats, oils and grease (FOG) inspectors hired by Cupertino Sanitary District. This increased scrutiny produced 52 investigated incidents with verbal notice and storm drain education and 32 follow-up inspections to verify compliance. Because of ongoing staff changes and some language barriers at food facilities it is expected that this kind of inspection, follow-up and education will continue to be necessary to keep food facilities in Cupertino in compliance. The City has at least 256 food facilities and restaurants, but the current inspection program is working very well.	Ongoing	Public Works Dept.
IND PS-4	Effectiveness Evaluation of Industrial Facility Inspections.	Review and evaluate the effectiveness of city efforts.	Only one IND violation was observed at a veterinary clinic where the parking lot storm drains needed cleaning. Compliance was verified by the IND Inspector. All compliance issues are resolved within 10 days, but generally are taken care of within 24 hours. In addition, the IC/ID Inspector conducted 236 daily drive-by	7/09	Public Works Dept.

Section 3

Public Agency Activities

- **Public Streets, Roads & Highways O & M and Rural Roads**
- **Storm Drain Operation and Maintenance**
- **Corporation Yards Operation and Maintenance**

P.S. Id.	Activity	FY08-09 Tasks	Status / Comments	Due Date	Responsible Party
Public Streets, Roads, and Highways Operation and Maintenance and Rural Roads					
PSRH PS-3	Staff training	Hold annual training for public works, streets division staff and public works supervisors.	Eleven City Public Works Streets Maintenance staff attended the SCVURPPP Rural Roads BMP Maintenance training on September 25, 2008. In-house general training for Service Center staff was deferred to August 5, 2009 and will be discussed in next year's annual report.	6/09	Public Works Dept.
PSRH PS-5	Effectiveness Evaluation	Review and evaluate the effectiveness of city efforts.	See below.	6/09	Public Works Dept.

EVALUATION

The City's new Service Center Manager (Assistant Director of Public Works-Maintenance) was hired in summer 2008. He brings 10 years of urban runoff experience with another SCVURPPP agency and was a Management Committee alternate representative in his former position. In his first few months in Cupertino, he made several significant changes, including Service Center organization and clean-up modifications to minimize unnecessary runoff. In fall 2008, he also began collaborating with the Environmental Programs Manager to fund and construct a Service Yard wash rack. Plans for the new wash rack are complete and construction is expected by the end of 2009. This project is being funded by cost savings realized by using City staff, instead of a contractor (as had been done previously), for routine storm drain cleaning.

The City's street sweeping program, by contractor, did not change during FY '08-'09. The contractor is using one broom type and one vacuum type sweeper to perform routine City street sweeping. In response to complaints of dust generated during sweeping, the IC/ID Inspector has noticed that sweeper drivers may be going too fast (15± mph, instead of the 5-7 mph specified in the agreement). Incomplete debris collection may also be due to inefficient equipment, causing poor vacuuming. He recommends that the contractor clean the screens on the vacuum sweeper more often and feels that the broom type sweeper is more effective. The City will consider incorporating the street sweeping function into its solid waste handling contract and requiring the contractor to use a regenerative air type sweeper, if it is determined to be more effective. Also, the Assistant Director of Public Works-Maintenance is expecting to change the sweeper routes to make them more efficient. Frequent additional fall leaf clean-up by the Grounds Maintenance Division in both the East Estates and Rancho Rinconada areas continues to be very effective.

During FY '08-'09, there was no major work involving City crew maintenance on the less than 1 mile of rural roads. As with other Cupertino roadways, the only pavement work done by City crews is filling potholes with "cold patch." Street resurfacing and work on traffic loop detectors are done by contractors. Contract documents for these types of work include urban runoff quality control BMPs and have for many years.

City crews in the Grounds Division clean the plaza at the Civic Center approximately weekly using steam washing (w/o soap). Frequent additional fall leaf clean-up in both the East Estates and Rancho Rinconada areas continues to be very effective.

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2008-2009 Annual Report: Public Agency Activities
Cupertino

P.S. Id.	Activity	FY08-09 Tasks	Status / Comments	Due Date	Responsible Party
Storm Drain System Operation and Maintenance					
SD PS-1	Storm Drain Maintenance	All tasks are routine and on-going	The City's cleans all of the storm drain inlets on a 2-year rotating basis. Half of the storm drains are cleaned one year, and the remaining half the following year. Certain known problem areas are cleaned every year before the rainy season.	Ongoing	Public Works Dept.
SD PS - 2	Storm Drain Operation and Maintenance	Review and evaluate one BMP, with input from maintenance staff. Evaluate "hot spots" as appropriate.	City crews took over routine storm drain cleaning in Sept, 2009. Money saved through this change is being used to design and fund a wash rack at the City's Service Center. A contractor using a Vac-Con truck still cleans problem areas, as directed by the City. The City's IC/ID Inspector continues to be closely involved with making sure that any illegal storm drain discharge discovered during routine cleaning is completely resolved. In spring 2009, the City approved a staff realignment request increasing the hours he spends on urban runoff issues.	6/09	Public Works Dept.
SD-4	Annual training	Hold annual training for staff responsible for the maintenance of the storm drain system.	Annual training for Public Works Maintenance staff was deferred to August 5, 2009 and will be discussed in next year's Annual Report.	6/09	Public Works Dept.
SD PS-5	Effectiveness Evaluation	Review and evaluate the effectiveness of city efforts.	See below.	6/09	Public Works Dept.
EVALUATION					
Since the City went from having City crews using "clam" shovels to clean storm drains instead of a contractor, the IC/ID inspector has not seen a change in the number of clogged storm drains. Accordingly, he continues to remind the crews to clean the lines 2 to 3 ft. both upstream and downstream of inlets. Once the new wash rack is installed, this topic will be discussed at a Service Center training session.					

Santa Clara Valley Urban Runoff Pollution Prevention Program

Cupertino

P.S. Id.	*Activity*	*FY08-09 Tasks*	*Status / Comments*	*Due Date*	*Responsible Party*
Corporation Yard Operation and Maintenance					
PSRH PS-3	Staff training	Hold annual training for corporation yard staff and public works supervisors.	On July 14, 2008, the Environmental Programs Manager, the IC/ID (Non-Point Source) Inspector and the City's civil engineering consultant met with the Assistant Director of Public Works for Maintenance, and the Street Maintenance and Grounds Maintenance Supervisors to go over storm water quality control activities and the most recent Service Center (Corp Yard) SWPPP, written in 2001. According to staff, there have been no major modifications to procedures at this site for several years. The new Assistant Director of Public Works for Maintenance (hired 8/2008), immediately oversaw the cleanup and reorganization of the Service Yard and determined which upgrades were priorities.	Annually	Public Works Dept.
PSRH PS-5	Effectiveness Evaluation	Review and evaluate the effectiveness of city efforts.	See below.	7/08	Public Works Dept.

EVALUATION

The Service Center's Hazardous Waste Coordinator inspects the Yard weekly as part of the City's regular Haz Mat inspections. Continuous staff training is the likely reason that there were no significant spills at the Service Yard. In March 2009, in response to a resident's inquiry, the Environmental Programs staff put together and provided a laminated fact sheet with mercury spill clean-up procedures to the Hazardous Waste Coordinator and IC/ID Inspector. Service Center staff have been trained to contact these two people if there are mercury spill questions.

The City's IC/ID Inspector continues to work with service center supervisors to maintain a high level of housekeeping. Funding was requested and approved, in '08-'09, for new vehicle wash rack. Installation will take place in fall of '09-'10.

Due to significant staff changes (including the retirement of the long-time Assistant Director of Public Works for Maintenance, in July 2008), the Environmental Programs Manager met with the new Assistant Director several times during the year to inquire about existing service yard procedures and to plan for implementation of the proposed MRP. The new Assistant Director read the sections of the MRP tentative order that pertain to service yard responsibilities and is preparing for implementation that will begin when the MRP is approved. The Assistant PW Director and the Environmental Programs Manager expect (upon adoption of the MRP) to schedule an update of the 2001 version of service yard SWPPP.

New Development and Redevelopment Procedures

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2008-2009 Annual Report: New and Redevelopment Requirements
Cupertino

Activity	Permit Item Source	FY08- 09 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
NEW DEVELOPMENT AND CONSTRUCTION CONTROLS – PLANNING PROCEDURES					
C.3.b Development Project Approval Process -- Planning Procedures					
Ordinance Revision	C.3.b.2	Modify existing review policies, procedures, and/or conditions of approval to incorporate C.3 requirements (based on results of tasks under C.3.c. through C.3.m.)	The City's current Water Course Protection ordinance was effective June 20, 2006. There were no revisions to the City's Water Course Protection ordinance during the '08-'09 fiscal year, in part due to continued MRP negotiations.	N.A.	Public Works, Planning, City Attorney
Staff Training	C.3.b.3	Continue to train Cupertino staff in planning, building, and engineering departments on the C.3 provisions.	SCVURPPP's Annual C.3 Workshop on 6/17/09 was attended by Cupertino's Environmental Programs (EP) Manager, one EP staff and an Assistant Planner. In addition, at the request of Cupertino staff, two Civil Engineers from *Kier and Wright* (a firm which designed storm water treatment facilities for a C.3 project in Cupertino) attended the workshop. In-house training was given to Public Works on 2/23/09 and 3/9/09 and 3/11/09. Planning staff also attended the training meeting on 3/11/09. Topics discussed included implementation of current C.3 requirements; proposed C.3 provisions in the Tentative Order on the draft MRP; "green" street design; the City's new Table of Contents for Storm Water Management Plans, the City's revised *Impervious Surface Data Sheet* and a related requirement that private projects reserve 4% of developable acreage for stormwater treatment facilities. The requirements for "green streets" were reviewed and discussed as staff considered potential	6/09	Public Works – Environmental Division

Cupertino

Activity	Permit Item Source	FY08- 09 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
			opportunities in Cupertino. On 12/3/08, the Environmental Programs Mgr and Assistant Civil Engineer participated in EPA's Watershed Academy Webcast: *Using Rain Gardens to Reduce Runoff-- Slow it down, Spread it out, Soak it in.* The webcast was informative, provided printed materials for follow up training with other staff and enabled staff to gain knowledge and entertain ideas related to specific topics that are appropriate for Cupertino. In December 2008, under the direction of City Council, the City hired an Environmental Affairs Coordinator. This position and the Director of Public Relations and Environmental Affairs work in the City Manager's Office. The Coordinator works closely with the Planning Department to ensure that the City Council's standards for environmental sensitivity are reflected in new and redevelopment projects. The Environmental Affairs Coordinator received LEED AP (Accredited Professional) Certification in June. Additionally, the City's civil engineering consultant attended an APWA webcast on porous pavement at the City of Los Altos on October 16, 2008.		
C.3.c. Requirements for Group 1 and Group 2 Projects					
Guidance Manual	C.3.c.4	Review any changes to the SCVURPPP C.3 Guidance Manual.	In March '09, the Environmental Programs Manager and two Public Works Engineers developed a Stormwater Management	N.A.	Public Works Environmental Division

Cupertino

Activity	Permit Item Source	FY08- 09 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
			Plan Table of Contents/checklist for developers and City staff that review C.3 project plans (copy attached). The same team revised the *Impervious Surface Calculation Sheet* to notify project owners that 4% of the site must be reserved for stormwater treatment measures (copy attached). Changes to this calculations sheet were done to discourage developers from trying to squeeze in treatment measures undesirable to the City near the end of the project design phase. The SCVURPPP C.3 Guidance Manual was not updated this year; revisions will be incorporated after adoption of the MRP.		
Guidance Manual Update	C.3.c.9	Update Performance Standard as needed.	Once the MRP negotiations are completed, as appropriate, the City will assist SCVURPPP with any revisions to the Planning Procedures Performance Standard.	6/09	Public Works Environmental Division
C.3.e Operation and Maintenance of Treatment BMPs					
Data Form and Staff Training	C.3.e.1	Log information about treatment BMPs installed at approved Group 1 and 2 projects and maintain a list or database of properties, treatment BMPs, and responsible operators.	Swales in a shopping center parking lot at Stevens Creek Blvd and Stelling Road (Whole Foods) required several inspections when vegetation started to die out a little over one year after the project had been completed. To determine what caused the failure and what measures would remediate the problems, seven inspections and meetings with the developer/owner, the project's civil engineer, the landscape architect, the tenant, the City inspector, a City Engineer, the Environmental Programs Manager, and	Inspections with developer's team, tenant and City staff Oct 10 Jan 7 Dec 8 Dec 12 Feb 17 Jun 6 Meetings Dec 10 April 22	Public Works Engineering Inspector, Engineer and Environmental Programs Mgr

Cupertino

Activity	Permit Item Source	FY08- 09 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
			the City's civil engineering consultant took place between fall '08 and spring '09. Incremental steps were taken, starting with replanting test patches of fescue, protected by caution tape to keep pedestrians and shopping carts out of the area while it was being reestablished. When the test plots failed, it was determined that shopping carts and unhealthy soil were threats to the growing process. Two companies familiar with IPM practices, one of which is involved with the Bay Friendly Coalition, evaluated the soil, which turned out to be extremely compacted. Ultimately compacted soil was removed and replaced with at least 12" of engineered soil and a two-rail wood fence was put up to protect the swales from carts and pedestrians. Juncus Patens were planted instead of low-lying grass. The landscaper chosen for the remediation project was also hired to maintain the swales in the future. This remediation was completed in May 2009. The site will be inspected by City staff at least bimonthly during FY09-10. See the Evaluation discussion and photos at the end of this report for more details.		
BMP O&M Agreement Mechanism	C.3.e.2	Review use of City's BMP O&M and easement agreements and consider modifications, as needed.	No changes to the City's BMP O&M easement agreements were made in FY '08-'09. The BMP O&M agreement with Sandhill Properties was instrumental in helping City staff work with the developer toward full compliance related to post-construction BMP O&M at the Whole Foods site.	9/09 AR and ongoing	Public Works, Planning, City Attorney
BMP Inspection	C.3.e.5	Develop local program for inspecting a	The Public Works Inspector annually	6/09	Public Works

Cupertino

Activity	Permit Item Source	FY08- 09 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
Program		subset of prioritized treatment BMPs to verify that the responsible party is performing proper O&M.	inspects all sites with stormwater treatment controls. Any site with flow controls will also be inspected annually (however, there have been no projects subject to the HMP). To identify the new sites to be inspected for BMP O&M, approved C.3-regulated projects are logged into the City's Project reporting table in the current annual report. To determine the locations of other sites needing routine annual inspections, the Public Works Inspector also reviews the reporting tables from previous years. The results of all O&M inspections are documented in an Excel spreadsheet (*BMP O&M Inspection Results*) and given to the Program for inclusion in area-wide analysis . The Public Works Inspector periodically reviews this spreadsheet to determine sites needing special re-inspections. Once the MRP is approved, the Environmental Programs Manager will pursue the use of an Access database to track approved C.3 projects. See the organizational description of the City's BMP O&M Inspection Program at the end of this section of the annual report.		Engineering
Reporting	C.3.e.6	Report on the Cupertino treatment BMPs O&M verification program in each annual report, including organizational structure, evaluation of effectiveness, and planned improvement to the program. Include a list or summary of treatment BMPs inspected during the year, inspection results, and any	Two sites received post-construction BMP O&M inspection during FY '08-'09. Another site was inspected at the completion of construction to check for initial BMP installation. See the *BMP O&M Inspection Results* spreadsheet at the end of this section. 		required follow-up and correction.	track specific concerns raised during inspections of the swales that were brought into compliance this year and will report on those findings in the FY '09-'10 Annual Report. A *Before and after* photo of remediated swales is also attached.		
C.3.f Hydromodification Management Plan					
Staff training	C.3.f.3	Implement HMP as part of requirements for Group 1 projects that may cause increased erosion or other related impacts.	Planning and/or Public Works staff review every project for HMP applicability. As in previous years, in FY '08-'09, there were no projects in Cupertino subject to these requirements.	9/09 AR and on-going	Public Works and Planning
C.3.h Alternative Certification					
Reporting	C.3.h.1	List projects certified by someone other than City staff.	In July 2008, Public Works staff began allowing 3rd party certification of treatment and flow control BMPs, by approved certifiers from BASMAAs list. In FY '08-'09, there were no projects that were certified by a 3rd party.	Report in 9/09 AR and ongoing	Public Works Environmental Division
C.3.k Source Control Measures					
Ordinance Revision	C.3.k.	Enhance source control requirements for new and redevelopment projects.	There were no revisions to the list of source control requirements contained in the City's Water Course Protection ordinance. These requirements will be reviewed upon issuance of the MRP to determine if changes are needed.	9/09 AR and ongoing	Public Works & Environmental Programs to coordinate with Building and Planning staff

Cupertino

Activity	Permit Item Source	FY08- 09 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
Reporting	C.3.k.3	Implement source control measures requirements by including appropriate conditions of approval in Group 1 and 2 projects. Report status and provide examples of application of conditions in annual reports.	All private development projects regulated by C.3 provisions are subject to a standard development condition of approval requiring source control measures, including those for reducing/eliminating pesticide use and incorporating trash controls. The Steven's Creek Corridor Restoration Project, a City-sponsored CIP, included replacing a large PCC parking lot with a smaller "green" parking lot composed of porous concrete and vegetated geocells. See project detail table	9/09 AR and ongoing	Public Works Environmental Division
C.3.m Water Quality Review Processes					
CEQA Review	C.3.m.1	Review CEQA initial study checklists and other environmental review documents and modify documents as needed to include questions that sufficiently address water quality impacts of projects.	There were no changes made to the City's CEQA review process in FY '08-'09.	9/09 AR and ongoing	Public Works Environmental Division and Planning
C.3.n Reporting Requirements					
Reporting	C.3.n.1	Provide information described in Table 1 of Provision C.3. in annual reports.	In FY '08-'09 one private development project was added to the City's Group 1 database (see Table 1 of this Annual Report for additional information). No Group 2 projects were approved during this reporting period	9/09 AR and ongoing information collection	Public Works Environmental Division and Planning
Reporting	C.3.n.4	Collect and report the following for all projects that must implement treatment measures: BMPs, site design, and source control measures used, sizing criteria, O&M responsibility mechanism and responsible party.	See Table 2 of this Annual Report for detailed information on C.3 and other regulated projects. .	9/09 AR and ongoing	Planning and Public Works Engineering

Cupertino

Activity	Permit Item Source	FY08- 09 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
Pesticide Control Measures	C.3.n.5	Collect information and report a summary of types of pesticide reduction measures required for development projects and the percentage of projects for which pesticide reduction measures were required.	All projects receive, as part of the Application Packet, a list of conditions related to reducing pesticide use (Cupertino's guidance on *Pesticide Control Measures for Development Projects* are attached). This packet also includes the Pesticide Maintenance Fact Sheet and the Pest-Resistant plant list. See Table 2 of this section for more detail.	9/09 AR and ongoing	Planning and Public Works Engineering

Evaluation Summary

Lessons learned as a result of BMP O&M compliance problems at Sandhill Properties' development site (Whole Foods) include:

1. Shopping cart and pedestrian traffic threaten the growth of vegetated swales. Require protective barriers.
2. Compacted soil doesn't support vegetation. Twelve to eighteen inches of engineered or remediated soil is needed to maintain thick vegetated cover.
3. In public places, grass is more likely to be walked on and trampled than taller plants, like *Juncus Patens*.
4. The storm water management plan for this site was not sufficient and prompted staff to develop a table of contents/checklist to guide developers/engineers in the preparation of future SWMPs.
5. Compliance required persistent and intensive coordination between the City's Public Works Department, the developer/owner, and the leaseholder; it would have been more difficult to achieve without the carefully written BMP O&M agreement, specific requirements in the Municipal Code (sections 9.18.170, 9.18.180 and 9.18.190, available at http://www.amlegal.com/nxt/gateway.dll/California/cupertino/cityofcupertinocaliforniamunicipalcode?f=templates$fn=default.htm$3.0$vid=amlegal:cupertino_ca) and the diligence of City's Environmental Programs and Engineering staff.

City staff will review the effectiveness of the SWMP *Table of Contents* checklist and the changes made to the City's *Impervious Surface Data Sheet* and discuss the findings in future annual reports, as warranted.

Staff in Cupertino's Public Works and Parks and Recreation Dept oversaw the Steven Creek Restoration Project at Blackberry Farm. For information on measures taken to protect native habitat and restore the creek to its naturally sustainable course, visit http://www.cupertino.org/index.aspx?page=314

Group 1 & 2 New Development and Redevelopment Projects[1]

Approved During FY 08-09

Project Name	Project Type[2]	Site Size (ac. or s.f.)	New Impervious Surface (s.f.)[3]	Area of Land Disturbed (Ac.)	Project Status Deemed Complete & Project Approval Date[4]	Storm Water Control Measures Included in Project
Private Projects						
19620 Stevens Creek Blvd. Marketplace KCR Development Calabazas Creek Watershed in the West Valley Watershed	Group 1 Significant Redevelopment	9.9 Ac. (Entire Site)	2.06 Ac.	2.29 Ac.	Complete Approval: 1/3/2008	Roof drains and parking lot drain to two (2) Vegetated Swales, then drainage is carried underground to a Mechanical Treatment Unit (CDS Unit) prior to draining to the City Storm Drain System.

[1] List all projects with new impervious surface area greater than 10,000 s.f.

[2] Describe project type, as defined in Provision C.3.c.

[3] "New" is defined as impervious surface created, added or replaced.

[4] **Date of Project Approval** is the date of final approval before construction begins on the project, typically approval of a grading or building permit.

Project Name	Project Type[5]	Site Size (ac. or s.f.)	New Impervious Surface (s.f.)[6]	Area of Land Disturbed (Ac.)	Project Status Deemed Complete & Project Approval Date[7]	Storm Water Control Measures Included in Project
Union Church (Crystal Choir) 20900 Stevens Creek Boulevard	Group 2	132,588 SF (entire site)	18,500 SF	18,500 SF	Project Approval with Conditions of Approval on June 19, 2009. Conditions of Approval include a 3rd party reviewed Storm Water Management Plan .	Sheet flow from the parking lot and runoff from roof drains are directed to a landscaped area and then to Bioretention area (sized using volume based method), where it is treated and percolated into the ground.

[5] Describe project type, as defined in Provision C.3.c.
[6] "New" is defined as impervious surface created, added or replaced.
[7] **Date of Project Approval** is the date of final approval before construction begins on the project, typically approval of a grading or building permit.

Project Name	Project Type[8]	Site Size (ac. or s.f.)	New Impervious Surface (s.f.)[9]	Area of Land Disturbed (Ac.)	Project Status Deemed Complete & Project Approval Date[10]	Storm Water Control Measures Included in Project
Public Projects						
Phase 1 Stevens Creek Restoration Project & Blackberry Farm redevelopment 21979 San Fernando Ave., Cupertino Stevens Creek Watershed	Significant Redevelopment with C3-type treatment facilities	17.6 Ac. For Phase 1	No increase in impervious area. Approx 8,000 ac of impervious surface for buildings/patio area. Asphalt & concrete reduced by 3.4 acres.	13.7 Ac affected, disturbed area was much less.	Phase 1 Completed June 20, 2009 Council approved 10/3/06 Scope & Budget approved 3/18/08 Contract awarded for pervious parking lot and for parking stalls w/ vegetated geocells on August 5, 2008. Construction for Phase 1 started in summer 2008.	Pervious concrete (*Stoneycrete*) and grass geocells for 67,500 sq ft of parking area. Native plants. Restoration of natural. Realignment of creek to improve aquatic habitat. Removal of non-native species. Replanting trees to stabilize banks. Removal of barriers to fish passage

[8] Describe project type, as defined in Provision C.3.c.
[9] "New" is defined as impervious surface created, added or replaced.
[10] **Date of Project Approval** is the date of final approval before construction begins on the project, typically approval of a grading or building permit.

CITY OF CUPERTINO

Reporting Form for Planning Procedures Performance Standard and Provision C.3.n.ii. & iii. Reporting Requirements

Part 2

Stormwater Control Measures for Group 1 and 2 Projects[1] Approved During FY 08-09

Project Name	Treatment BMPs	Numeric Sizing Criteria Used	O&M Responsibility Mechanism and Responsible Party	Site Design Measures	Source Control Measures	Pesticide Reduction Measures
Private Projects						
19620 Stevens Creek Blvd. Multi-Use Commercial Development City Storm Drain System Calabazas Creek Watershed	Two (2) Vegetated Swales CDS Mechanical Treatment Unit	Uniform Intensity Flow Control method (Rational method) for Flow-based treatment control	O&M Agreements are signed prior to building occupancy. O&M agreement was signed 6/3/09.	Roof drains and parking lot drain to two (2) Vegetated Swales, then drainage is carried underground to a Mechanical Treatment Unit (CDS Unit) prior to draining to the City Storm Drain System.	Storm drain inlets marked "No Dumping Flows To Bay"; Education for owners, tenants & occupants, Employee training. Efficient irrigation systems, water conservation, smart controllers, and source corol.	Pest reduction technique handout provided to developer. Standard conditions of approval include native plants and/or pest resistant landscaping.

[1] List all* projects with new impervious surface area greater than 10,000 sq.ft. See SCVURPP "C.3. Handbook: Guidance for Implementation of Stormwater Requirements for New and Redevelopment Projects".

*Projects that do not require stormwater treatment because they fall under the Alternative Compliance Program must be reported as per Provision C.3.g.v. (see Reporting Form Part 3). Cupertino projects will not be approved for Alternative Compliance under the current NPDES Permit.

Project Name	Treatment BMPs	Numeric Sizing Criteria Used	O&M Responsibility Mechanism and Responsible Party	Site Design Measures	Source Control Measures	Pesticide Reduction Measures
Union Church (Crystal Choir) 20900 Stevens Creek Boulevard	Drainage directed to landscaped bioretention area	Rational method for Volume-based treatment method	O&M Agreement to be signed prior to building occupancy.	Sheet flow from the parking lot and runoff from roof drains are directed to a landscaped area and then to Bioretention area (sized using volume based method), where it is treated and percolated into the ground.	Parking area sheetflow and runoff from roof drains are directed to the landscaped bioretention area. No new storm drains inlets on site.	Pest reduction technique handout provided to developer. Standard conditions of approval include native plants and/or pest resistant landscaping.
Public Projects						
Stevens Creek Restoration Project and Blackberry Farm Redevelopment Phase 1 Stevens Creek Watershed	Pervious Pavement for parking lot and grass cell parking stalls	Impervious area < 10,000 sq ft. The entire site was designed to maximize open space and water quality benefits as well as to restore ecosystems and habitat for wild & aquatic life.	City will maintain pervious pavement and grass cell parking, native plants	Removal of 3.76 acres of impervious asphalt surface. Use of permeable materials including flagstone around pool.	Open space and pervious surface covers most of the project site. No new storm drains on the site. Reduced direct runoff with infiltration through planted areas. Parking area runoff is now directed to one long bioswale in addition to pervious concrete and geocell surface for parking.	Non native plants removed. A variety of native restoration plantings were installed. Repair and enhance native oak and grass habitat. Riparian and oak-woodland areas restored and created. A meadow area was restored with native bunch grasses using seed from Stevens Creek Watershed.

CITY OF CUPERTINO, DEPARTMENT OF PUBLIC WORKS

June 30, 2009

STEVENS CREEK CORRIDOR UPDATE

Stevens Creek Corridor Project, Phase 1, WDID No. C351612
21979 San Fernando Avenue, Cupertino, CA
Photos of Completed Construction for Notice of Termination

An orchard and windmill were installed. The orchard features fruit tree species historically grown within the city.

A major project element was the upgrading of public amenities at the Blackberry Farm site.

Photo above shows the new entry drive. Landscaping incorporates native plants and natural boulders.

The photo left shows a flagstone gathering area in the center of the orchard and a new ticket kiosk building with trellises.

The concession stand and snack bar area, right, was renovated and upgraded.

STEVENS CREEK CORRIDOR UPDATE

An existing large asphalt parking lot was removed and replaced with a smaller "green" parking area.

Drive lanes are constructed of porous, tan-colored concrete.

Parking bays designed for summertime use are made of meadow grasses, reinforced with a geocell grid to handle vehicle wheel loads.

Vegetated swales collect run-off and all allow infiltration. The swales are planted with sedges, rushes and native Alder trees grown from cuttings from the creek corridor. The entire parking area now is made of porous surfacing.

043385

STEVENS CREEK CORRIDOR UPDATE

Restoration of the Stevens Creek channel was part of this project. The restoration work was completed fall 2008.

Photo left is of a backwater wetland area created from a portion of the former creek channel.

Barriers to fish passage were removed from the creek. At the photo location right, an existing dam was removed and the channel repaired.

The photo left shows another location where a barrier was removed from the channel & restoration was done. The restored creek will provide better habitat for fish and wildlife.

A new bridge spans the creek at the location of a former bridge. New stone seatwalls allow visitors to enjoy views of the creek.

Treatment BMPs Inspection Activity Report FY 08-09

Date	APN	Reason for Inspection	Project Type	Treatment BMP Type	Inspection Results	Enforcement Action	Comments
					1		
8/21/2008	326-31-020	Follow-up	Commercial	Vegetated Swale	15. Poor Vegetation Coverage	Warning Notice	Sandhill Properties at 20955 Stevens Creek Blvd, Notice to comply was sent in June 2008. Follow up Inspection was conducted in August 2008. Swales needed to be seeded/ revegetated.
11/12/2008	326-31-020	Follow-up	Commercial	Vegetated Swale	15. Poor Vegetation Coverage	Not Applicable	Follow up inspections at Sandhill Properties at 20955 Stevens Creek Blvd included meetings with business maintenance staff and property owner. Several attempts were made to remediate swales before efforts were successful. Swales needed to be seeded/ vegetated. Soil was problematic; vegetation wouldn't thrive - test plots were replanted without success in October 2008.
02/13/2009	326-31-020	Follow-up	Commercial	Vegetated Swale	15. Poor Vegetation Coverage	Not Applicable	Follow up inspection to check progress on swales. City staff met with property owner and business maintenance staff to decide on new plan to remediate the swales.
06/3/2009	326-31-020	Follow-up	Commercial	Vegetated Swale	1. No Visible/Apparent Problems	None	Existing soil was replaced with new engineered soil and taller sturdier vegetation was planted. By mid-June plants were doing well and split rail fences were placed around the swales to protect them from pedestrian and grocery cart traffic.
08/21/2008	326-31-020	Follow-up	Commercial	Other	18. Standing Water/Excessive Ponding/Soggy Soil	Warning Notice	Sandhill Properties, Notice sent, Initial Inspection was conducted in June 2008. Drywell has standing water (No mosquito Larve).
11/12/2008	326-31-020	Follow-up	Commercial	Other	1. No Visible/Apparent Problems	None	10900 Tantau. Inspection during construction. Project was completed November 5, 2008.
11/5/2008	316-09-029	Other	Commercial	Vortex Separator	1. No Visible/Apparent Problems		10900 Tantau. Inspection during construction. Project was completed November 5, 2008.
11/5/2008	316-09-029	Other	Commercial	Vegetated Swale	1. No Visible/Apparent Problems	None	
11/5/2008	316-09-029	Other	Commercial	Porous Pavement	1. No Visible/Apparent Problems	None	
6/30/2009	326-33-110	Initial	Commercial	Vortex Separator	1. No Visible/Apparent Problems	None	Apple Computer site, Initial inspection. (Formerly Any Mountain site)

CITY OF CUPERTINO

STANDARD OPERATING PROCEDURES FOR CUPERTINO'S

PERMANENT BMP OPERATION AND MAINTENANCE INSPECTION PROGRAM

Selection of Annual Permanent BMP O&M Inspection Sites

- Permanent BMPs at all C.3 regulated project properties will be inspected annually, by early fall**.** The permanent BMPs are inspected by the PW Inspector when the project is first completed. If early fall is not a full year since the original inspection, then O & M inspections will take place after the one year period. After that inspections will be scheduled by early fall.
- In the future, depending on the total number of Group 1, 2A & 2B properties in Cupertino, the City may develop criteria for inspecting a subset of these sites, as allowed under NPDES Permit Provision C.3.e.

Permanent BMP O&M Inspection Program Responsibilities

- Public Works Engineering Division staff perform development plan review for stormwater quality compliance
- The Public Works Inspector tracks the permanent BMP construction and BMP O&M inspections and enforcement for all C.3 regulated projects using the C.3 project reporting tables and an Excel inspection results spreadsheet.
- Since the Public Works Inspector will inspect construction of the on-site permanent BMPs at C3 regulated projects and will sign-off on final City-approval for site occupancy, he/she will note when the project is completed.
- The Public Works Inspector will submit a Permanent BMP O&M Inspection summary report for the previous fiscal year to the Environmental Programs Manager by July 30th of each year.
- The Environmental Programs Manager will include BMP O&M inspection data in the Annual Report.

Permanent BMP O&M Pre-Inspection Preparation

- The Public Works Inspector reviews the C3 regulated project reporting table and the Permanent BMP O&M Inspection records at least two weeks prior to beginning annual inspections.
- The Public Works Inspector or Public Works Administrative staff will contact each Group 1, 2A & 2B site owner/manager to arrange a mutually agreeable inspection appointment.

- Prior to each site inspection, the Public Works Inspector will review the site's Storm Water Management Plan, including any applicable as-built construction plans, for BMP information, including BMP types and locations. At this time, the Inspector will also review the property owner's available site BMP O&M maintenance records (required per Muni Code 9.18.180), any previous inspection reports, and any necessary special procedures (e.g., inspection forms, underground confined space entry).
- The Public Works Inspector will, if needed, review the applicable CASQA or SCVURPPP BMP fact sheets and information on the City's BMP Inspection Program, which may be useful in addressing questions or comments raised by BMP owners or operators during the inspection.
- Prior to each site inspection, the Public Works Inspector will assemble the necessary equipment and supplies.

Permanent BMP O&M Inspection and Enforcement Procedures

- Upon arriving at the inspection site, the Public Works Inspector will contact the site manager/owner and explain the purpose of the visit.
- Permanent BMP O&M inspection by the City will be conducted and documented in accordance with the SCVURPPP standard inspection checklist.
- If any deficiency is noted, the Public Works Inspector will document it in writing. The written Notice of Violation will include a copy of the BMP O&M inspection form, including a list of corrective actions needed and a compliance schedule. This Notice will be sent to the Group 1, 2A & 2B property owner/manager within ten working days of an inspection.
- The Public Works Inspector will enter the permanent BMP O&M inspection information, including any violations, into the Permanent BMP O&M Inspection Excel spreadsheet.
- The Public Works Inspector will provide written notification to the Environmental Programs Manager of any Group 1, 2A & 2B property with a permanent BMP O&M violation, including information on location, the nature of violation and any needed follow-up.
- The property owner and, if applicable, the site manager, will be instructed to notify the Public Works Inspector within the time period indicated on the Notice of Violation so that the facilities can be re-inspected. The inspector will complete a new inspection form, noting whether all recommended maintenance activities have been completed and if any other actions are needed to assure proper operation of the facility.
- If repairs are not undertaken or are not done properly within the time allocated in the compliance schedule, the City will begin enforcement proceedings as provided in City Code Section 9.18.
- Once all necessary repairs have been completed, the Public Works Inspector will note this in the City's BMP O&M SCVURPPP Excel Spreadsheet, including the date work was completed and any other pertinent information (such as if City intervention was required to complete corrective work).

C.3 Stormwater Management Plan (Table of Contents)

1. Project Setting

a. Project name, location, description, common address, parcel number and legal description of the site.

b. Contact information for all persons having a legal responsibility for the property.

c. Existing site features and conditions and name of water body your site discharge contributes to. Name of 303d water body. (Regional Board website)

d. Vicinity map.

e. Narrative of opportunities and constraints for storm water treatment controls.

f. City of Cupertino C.3 impervious surface form.

2. Develop Site Design Measures to Limit Impervious Surfaces

a. Measures to cluster development and protect natural resources.

b. Measures used to limit direct connections to impervious area.
   i. Site design features
   ii. Pervious pavements
   iii. Detention and drainage design
   iv. Roof run-off through treatment facility

c. Table summarizing pervious and self retaining areas

3. Selected Method of Design for Treatment Facilities[1]

a. Method of treatment used.

b. Numeric sizing criteria calculation for designing pollutant removal treatment systems.

   i. Provide sizing calculations

[1] Hydro Modification are only used for projects with 1 acre or more impervious surface and creating more impervious surface area over the pre-project (existing) condition.

c. When landscape treatment facilities are used

   i. Describe content of amended soil (% ratio of soil to sand)

   ii. List all types of plants used in treatment facilities

   iii. List ways used to limit irrigation and pesticide use

d. Show structural and construction details for all components of proposed drainage system(s) and storm water management facilities

e. Attach two part completed summary table including square footage of impervious area, type of treatment/flow control facilities, etc.
See attached reporting tables (Part 1 & Part 2)

4. Source Control Measures

a. Description of site activities and potential source of pollutants and mitigation plans (street sweeping, covered storage areas, etc.)

b. Table showing sources and permanent source controls.

5. Summary of permitting and code compliance issues

a. List any other applicable environmental permits that will be required for the project and responsible agencies (i.e., Santa Clara Valley Water District, State Department of Fish and Game, City Streamside Permit)

b. Compliance with conditions of approval for projects discharging directly to 303(d) listed water bodies. Show post development run off does not exceed pre-development run off for 303(d) listed pollutants. (Is the project tributary to an already impaired water body, as listed on the clean water act section 303(d) list? If so, will it result in an increase in any pollutant for which the water body is already impaired?)[2]

6. Facility Maintenance Requirements

a. Ownership and responsibility for maintenance in perpetuity

   i. Commitment to execute all required agreements

   ii. Statement accepting responsibility for operation and maintenance of facilities until that responsibility is formally transferred.

[2] This requirement is part of provision C.3.m(v.i) in the current NPDES permit. This requirement is part of C.3.a(i) in the new municipal regional permit (MRP) expected for July 1, 2009.

iii. Annual inspections and maintenance of all treatment facilities on project site

iv. Owner's storm water treatment facilities inspection and maintenance log

b. Summary of all treatment facilities maintenance inspection items and inspection schedule

7. Certification

a. Certification by the owner/developer that all storm water management construction will be done according to storm water management plan.

b. Certification statement signed by the developer's responsible design registered civil engineer stating that facilities are correctly sized and designed according to NPDES Permit requirements.

c. Certification by a qualified third party registered civil engineer reviewer with current training on storm water treatment system design for water quality and an understanding of groundwater protection principles (storm water design training must be within 3 years of certification signature date)

d. As-built certification signature executed by the responsible registered civil engineer after project completion

Appendix

A. Preliminary Title Report

B. Geotechnical Investigations Report within expiration

C. Hydrology & Hydraulic Report

Attachments

A. BMP map of all treatment on site (Stormwater Management Plan)

B. Landscape Plan

C. Grading and Drainage Plan

D. Topographic survey information showing existing and proposed contours, including all areas necessary for the post-development hydraulic analyses of proposed stormwater management facilities

D. Erosion and sediment control plan, as required by City code section 16.08, excavation grading and retaining walls

E. Site Utility Plan

F. Annual report table Part 1 & Part 2

CUPERTINO

City of Cupertino

NPDES PERMIT C.3. IMPERVIOUS SURFACE FORM

What Projects Apply? Projects replacing or adding ≥ 10,000 sq. ft. of impervious surface

All projects creating, adding, or replacing 10,000 square feet or more of impervious surface on the project site must fill out this worksheet and **must reserve a minimum of 4% of developable surface area** for the placement of storm water treatment facilities, unless an alternative storm water treatment plan is approved by the Public Works Engineer.

What is an Impervious Surface?

An impervious surface prevents the infiltration or passage of water into the soil. Impervious surfaces include building rooftops, paved patios, covered patios, driveways, parking lots, paved walkways, sidewalks and streets.

General Information:

Date:_____ **Applicant's Ph #:**_____

Project Location:_____
(address)

Project Description: _____**APN #**__ __ __ - __ __ - __ __ __

Applicant Name:_____

Project Type (check all that apply):

☐ Residential ☐ Commercial ☐ Industrial ☐ Public

Project Information:

1. **Lot size** _____ sq. ft
2. **Existing Impervious Surface Area** (includes land covered by buildings, sheds, patios/covers, parking lots, streets, sidewalks, paved walkways and driveways) _____ sq. ft.
3. **Total Proposed Impervious Surface Area** _____sq. ft

   Determine the impervious surface area that will result from the project by adding the following surfaces that will be newly constructed, added, or replaced.

   a. Building roof area _____sq. ft.

   b. Parking lot and/or driveways +_____sq. ft.

   c. Walkways +_____sq. ft.

   d. Plazas, patios, and courtyards +_____sq. ft.

   e. Other (specify_____) +_____sq. ft.

4. **Percentage of increase/replacement of impervious surface area** _____ %

   (sq.ft of New plus Existing Imp Sfc divided by sq ft of Existing Imp Sfc)

5. **Total Area of Land Disturbance** _____ sq. ft.

6. **Condition of Approval for Landscape Plans (use of native plants, tree preservation).**

_____

Types of Stormwater Controls:

Description	
☐ Stormwater Treatment Measure (REQUIRED)	REQUIRED
☐ Source Control Measure	Recommended
☐ Site Design Measure	Recommended

Examples of Stormwater Control Measures:

Stormwater Treatment

- Biofilter (veg. swale/strip)
- Detention basin (dry)
- Detention pond (wet)
- Underground detention
- Media filter (sand, organic matter, bioretention)
- Infiltration trench
- Porous pavement
- Wetland basin
- Wetland channel
- Inlet filter
- Other _____

Source Controls

- Wash area/racks, drain to sanitary sewer
- Covered dumpster area, drain to sanitary sewer
- Swimming pool, drain to sanitary sewer
- Beneficial landscaping (minimizes irrigation, runoff, pesticides and fertilizers; promotes treatment)
- Outdoor material storage protection
- Covers, drains for loading docks, maintenance bays, fueling areas
- Maintenance (street sweeping, catch basin cleaning)
- Other _____

Site Design

- Minimize land disturbance
- Minimize impervious surfaces
- Minimum-impact street or parking lot design
- Cluster structures/pavement
- Disconnect downspouts
- Alternative driveway design
- Microdetention in landscape
- Preserve open space
- Protect riparian and wetland areas, riparian buffers
- Minimize hydrograph change
- Other _____

Projects with greater than 10,000 ft ONLY:

Projects with greater than 10,000 square feet of total new, added, and replaced impervious surface area are subject to storm water treatment requirements. Requirements satisfy provision C.3 of the City's NPDES permit. ***Contact the Public Works Department at (408) 777-3354 for guidance.***

CITY OF CUPERTINO
URBAN RUNOFF POLLUTION PREVENTION PROGRAM

PESTICIDE CONTROL MEASURES FOR DEVELOPMENT PROJECTS

If a landscaping plan is required as part of a development project application, the plan shall meet the following conditions related to reduction of pesticide use on the project site:

1. Landscaping shall be designed with efficient irrigation to reduce runoff, promote surface infiltration, and minimize the use of fertilizers and pesticides that can contribute to water pollution.

2. Where feasible, landscaping shall be designed and operated to treat stormwater runoff by incorporating elements that collect, detain, and infiltrate runoff. In areas that provide detention of water, plants that are tolerant of saturated soil conditions and prolonged exposure to water shall be specified.

3. Pest-resistant landscaping plants shall be considered for use throughout the landscaped area, especially along any hardscaped area. The City shall have the authority to approve the installation of comparable substitute pest-resistant plant materials to satisfy the requirements of the approved landscape plan when the approved plants and materials are unavailable for installation, or when other unforeseen conditions prevent the exact implementation of the landscape plan. A copy of the *"Pest Resistant Plants for the San Francisco Bay Area"* list shall be used as a reference.

4. Plant materials selected shall be appropriate to site specific characteristics such as soil type, topography, climate, amount and timing of sunlight, prevailing winds, rainfall, air movement, patterns of land use, ecological consistency and plant interactions to ensure successful establishment.

5. Existing native trees, shrubs, and ground cover shall be retained and incorporated into the landscape plan to the maximum extent possible.

6. Proper maintenance of landscaping, with minimal pesticide use, shall be the responsibility of the property owner.

To obtain a copy of the *"Pest Resistant Plants for the San Francisco Bay Area"* list or for more information on landscaping elements for stormwater treatment, contact the Cupertino Planning Division at (408) 777-3308.

FY 08 - 09 Annual Report

Section 5

Construction Inspection

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2008-2009 Annual Report: Construction Inspection Requirements
Cupertino

Activity	Permit Item Source	FY08-09 Tasks	Status/Comments	Due Date (mo/yr)	Responsible Party
NEW DEVELOPMENT AND CONSTRUCTION CONTROLS –CONSTRUCTION SITE INSPECTION					
Inspection Tracking	Const PS-5	City will include a summary of the year's written inspection notices and follow-up actions in each year's annual report.	The City uses an Access database to collect and track compliance activities and pre-wet season inspections. The inspections Detail spreadsheet is attached immediately following this section.	9/09 AR and ongoing	Public Works Engineering
Staff training	Const PS-6	Hold annual training for building dept. and public works staff.	In-house urban runoff training for Building Inspectors and the PW Engineering Inspector took place on June 30, 2009. The main focus of this session was dealing with planned private fire system discharges. In June 2009, the City developed draft guidance on BMPs for fire sprinkler tests and a draft of this document was provided to inspectors and Fire Dept staff at the training.(see *Cupertino Requirements for Fire Sprinkler System Tests* in *Copper*, Section 9, of this report). Building Inspectors and Fire Dept Marshall offered suggestions and feedback. There was also a slide presentation by the Environmental Programs Mgr and a question and answer period. Inspectors discussed the City's Construction BMP educational material and how to coordinate enforcement follow-up with the PW IC/ID Inspector. Three staff from the City's Building Inspection Division and five Public Works Department staff attended the *Construction Site Management Workshop* conducted by SCVURPPP on November 20 and 21, 2008.	6/30/09	Public Works Engineering

Cupertino

EVALUATION

More Staff Time Planned for Dedication to IC/ID Inspections

In FY 08-09, the Environmental Programs Division requested expanding the hours the City's IC/ID Inspector devotes to urban runoff issues (the balance of his time is spent on street maintenance at the Public Works Service Yard). Urban runoff inspections over the past few years had been limited to one part-time inspector (50% of his full time hours in FY08-09). In Spring 2009, the Public Works Director approved this staff realignment, which will begin in FY 09-10. The IC/ID Inspector will work 90% of his time conducting inspections and activities related to the City's storm drain protection program. This will include assisting Building Inspectors with follow-up on construction site issues and providing additional industrial/ commercial inspections (currently assigned to building inspectors). At the June 2009 in-house urban runoff construction inspection training session, Building Inspectors noted that they were happy to gain more staff support. The Public Works Inspector continues to handle all pre-construction meetings at larger jobs (jobs > 1 acre) and field visits to make sure erosion control measures are installed and maintained throughout the project.

Increase in Reported Incidents

Over the past three years, Cupertino issued approximately 2,200 building permits annually. Construction site urban runoff quality control was enforced through more than 18,000 inspections by Building Division and Public Works inspectors. In FY'08-'09, there were 70 documented construction site incidents related to urban runoff quality, up from 23 the previous reporting period (see detail of inspections for FY '08-'09 in the spreadsheet immediately following this report). None of the incidents involved City capital improvement projects. The primary reason for the increase in reported construction related incidents is most likely due to training done on June 10, 2008 stressing the need to coordinate enforcement with the Environmental Programs Manager and keep complete documentation of enforcement activities.

Pilot Procedures to Address Water Discharges from Planned Fire System Tests for New Development and Private Maintenance

Environmental Programs staff will continue to coordinate with Building and IC/ID Inspectors, County Fire staff and contractors to assess the effectiveness of the pilot program to control planned private water system discharges. See draft *Cupertino Requirements for Fire Sprinkler System Tests and Water Pipe Flushing* in the Copper Section (Sect. 9) of this report. Any changes to this new process and feedback on the effectiveness of the draft guidance for contractors will be discussed in future annual reports.

Public Information and Participation

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2008-2009 Annual Report: Public Information and Participation
Cupertino

P.S. Id.	Activity	FY08-09 Tasks	Status / Comments	Due Date	Responsible Party
PI/P	On-going public Information program	Staff will continue to use a variety of outreach avenues to educate audiences in the city.	See following PI/P table for implementation of PI/P activities.	Ongoing	Public Works Dept.

PI/P General Outreach

Activity	Communication Vehicle	Status/Comments
NPS literature distribution to the general public at City facilities: • Library • City Hall lobby • Quinlan Community Ctr. • Planning/ Building Dept. counter • Backyard Compost workshops • Bay-Friendly Gardening workshops	**NPS Prgm. literature:** Home Maintenance Tips for a Cleaner Bay, eight construction tri-folds (2006 revision), Builder's Reuse and Recycling Guide, IPM pest-specific fact sheets, Landscape Maintenance Techniques for Pest Reduction, Grow-It!, pool water brochure (2006 revision), A Vision For Our Watershed, The Bay Begins at Your Front Door, You Are the Solution to Water Pollution **HHW Prgm literature:** HHW brochure (for residents), small business hazardous waste brochure, *What You Don't Know About Mercury and Universal Waste* brochure, What Responsible Businesses Need to Know About Mercury and Universal Waste, Diazinon-warning flyer, Computer and Television Recycling and Disposal flyers, Drop-off Sites for Mercury Containing Products, Electronics, & Other Hazardous Items, Important Resources: How to Reduce, Reuse and Recycle in Cupertino **Air District** and **Rideshare literature:** Driving is Getting Us Nowhere, Clean Air Begins at Home, Spare the Air at Lunchtime, Go Online to Spare the Air, 10 Ways You Can Spare the Air, Spare the Air in Summertime (Ozone), Air Quality and Asthma, Smoking Vehicles, Spare the Air in the Wintertime too!, Don't Light Tonight!, Wood Burning, Spare the Air (Chinese version), Trip Linking Home Composting classes were held in November 1, 2008, and March 7**, 2009** @ McClellan Ranch and	New quantities of these materials are easily obtained from other agencies or they are copied by staff internally. The public has ongoing access to these materials, which requires them to be restocked on a weekly basis. This material is easily obtained from the agencies or is copied by staff internally. The materials continue to be taken by the public at a pace where a weekly visit to each site is necessary.

Activity	Communication Vehicle	Status/Comments
	Quinlan Community Center. The City hosted its first Bay Friendly Gardening Basics class on Saturday, May 2, 2009, at the Quinlan Community Center. Bay Friendly workshops provide an overview of design and maintenance considerations and practices that will help the participants make smart choices at the nursery.	
Rideshare Week and Bike-to-Work Day: Encourage participation among City employees and the general public	The City will promote alternative modes of transportation to protect air and water quality. Copper brake pads from vehicles are the biggest contributor to levels of copper in the Bay that endanger aquatic life. Promoting alternative, environmentally safer, modes of transportation enhances local air and water quality. E-mail messages: Email messages to employees in May for Bike-to-Work Day. Cupertino's Bicycle/Pedestrian Commission supports energizer stations at the Quinlan Community Center, Apple Computer, and Hewlett Packard sites. Articles in Scene newsletter: Articles were published in the May City newsletter, the Scene, for Bike-to-Work Day.	The email message, sent out April 30, 2009 serves to remind employees about this environmentally friendly form of transportation and the related activities occurring on Bike-to-Work Day. This year the City of Cupertino opened the new Mary Avenue bicycle and footbridge in time for bike to work day. The bridge is strictly for pedestrians and bicyclists and connects the cities of Cupertino and Sunnyvale by providing access across the 280 freeway in that area. According to the Cupertino Bicycle and Pedestrian Commission, 136 bicycle commuters traveled northbound and 98 southbound. The total of 234 bicyclers was a 20 percent increase from last year's Bike to Work Day. 90 bicyclers stopped this year at the Energizer Station on Stelling Road in front of Quinlan Center; Both Apple and HP had energizer stations for their employees who biked to work.
HHW display at Quinlan Community Center	General HHW display set up at the start of the month of HHW Event. Display materials include: HHW Event Flyer, HHW brochure (for residents), Small Business Services-hazardous waste recycling and disposal brochure, What You Don't Know About Mercury and U-waste, What Responsible Businesses Need to Know About Mercury and U-waste, Properly Dispose of Your Home-generated Sharps, Are You Moving?, Important Resources: How to Reduce, Reuse and Recycle in	HHW display set up from 8/5/08 to 8/26/08, for 8/23/08 HHW event. Outreach information on the event is usually displayed 2 - 4 wks in August, prior to Cupertino HHW event. The County now surveys the HHW customers about how they became aware of the program- and sorts the data by city. In the most recent data available, FY 08-09, residents found out

Activity	Communication Vehicle	Status/Comments
	Cupertino, Drop-off Sites for Mercury Containing Products, Electronics, & Other Hazardous Items flyer, Free Home Repair and Garden Products flyer. Articles in June and July Scene newsletter. Articles and ads in the Cupertino Courier and the San Jose Mercury News West Valley Section, in which Cupertino is included in this section. General HHW display set up 3 wks prior to Cupertino HHW event on 8/23/08.	about the program this way: • By calling the garbage company: 29% • By reading the City's newsletter: 33% • By reading the local newspaper: 7% • From a flyer: 6% • From the City's website: 10% • By calling the City: 8% • HHW Website: 5%
HHW display at Quinlan Community Center		We can conclude that our City newsletter, the Scene, is a valuable outreach tool. We will continue to buy ads in the local paper and present a display of what typical HHW products can be taken to a HHW event just before our major August HHW event.
NPS literature distribution to residents at Cupertino HHW event	The County's HHW staff distributes the following pieces, at the events, on behalf of the City of Cupertino: Upcoming Citywide Garage Sale, On Call Disposal Days, Drop-Off Sites for Mercury Containing Products, Electronics, & Other Hazardous Items, Nearby Recycling Centers, E-Waste Recycling locations, Backyard Compost Workshop Classes, Santa Clara Valley Green Gardener program-Is Your Gardner a Green Gardener?. An event was held in Cupertino on 8/23/08.	We are assuming that those users of the HHW event are environmentally conscious, and are probably the kind of people who are interested in stormwater related literature.
Audubon Fair; literature provided to Park and Rec staff to distribute at fair.	Provided the following on 10/25/08 at McClellan Ranch Grow It Guides Draining Pools and Spas brochures Pest or Pals Coloring Books	According to the City's naturalist, who staffed the Audubon Fair event, approximately 500 attended. Brochures were available to those in attendance. Environmental Programs staff had planned to set up an interactive Enviroscape presentation at the fair, but West Valley Communities offered to provide the activity for the event. The presentation which uses a

Activity	Communication Vehicle	Status/Comments
	Recycled Pencils Seed Packets The 10 Most Wanted Bugs in Your Garden Pests Bugging You – Pocket Guides Important Resources – How to Reduce, Reuse & Recycle in Cupertino brochure & magnets Household Hazardous Waste Program Brochure E-Waste Recycling flyer	miniature urban neighborhood near a creek and bay interactively shows children how pollutants like pesticides, paint, dirt, litter and carwash water reach our local waterways via rain and overwatering. Approximately 80 children and families viewed the presentation.
Auto Pollution Display at Quinlan Community Center	Display featuring: The Bay Begins at Your Front Door, Home Maintenance Tips for a Cleaner Bay, Washing Cars and Other Vehicles: Vehicle Shop Practices for a Cleaner Bay, Your Shop Can Make a Difference!, How to Hold a Fundraising Car Wash, A Vision for Our Watershed, Cars Pollute Water Too, Recycle Your Used Motor Oil, SCVURPPP ICID cards on Residential Car Washing/Engine Degreasing/Vehicles Dripping Auto Fluids/Sediments, information on City's free car washing kit. Literature provided explains impact of copper pollution from brake pads as well as information regarding other types of auto pollution.	Auto Pollution display set up from 10/21/08 – 12/2/08
Water quality protection literature distribution to residents at Cupertino HHW event <u>(not included in 08-09 WP)</u>	Literature in the HHW Program's Used Oil recycling bag: *Pests Bugging You, Home Maintenance Tips, Grow It!* HHW Program logo on pencil and shop rag, all of the IPM pest-specific fact sheets, and a Mercury-pollution prevention fact sheet.	Literature was literature was distributed at the City's first Earth Day event on April 19, 2009, held at Quinlan Community Center.

Activity	Communication Vehicle	Status/Comments
Mercury Bulb Disposal Display at Quinlan Community Center	Information on HHW Mercury Bulb hazards, proper disposal and drop-off available during Quinlan HHW Display during August 2008.	Literature on mercury was provided as part of the August 2008 Household Hazardous Waste Display. Mercury Display at Quinlan Community Center was included in the Household Hazardous Waste Display in August 2008 & Pesticide & Watershed Pollution Display through the month of April 2009. Advertised new fluorescent bulb drop off locations on the City's website, and the Cupertino Scene Newsletter.
Website **& City TV Channel**: Include storm water messages on City's website & City Channel.	Environmental Programs Staff updates the City's website as new links to other agencies are identified and when new material related to storm water is available.	The City aired "Give the Experience" the Santa Clara County Holiday Ad to encourage giving an experience rather than purchasing packaged gifts, reduces the amount of trash and litter. The TV Commercial Ad (Cupertino's City TV Channel) & Radio Spot (Cupertino Radio 1670 AM) ran from 11/19/08 – 1/5/09. As the public becomes accustomed to using websites, this tool becomes more valuable and is a cost effective and efficient way to educate the public. The City aired the following on the City Channel during FY 08/09: "Don't Trash California" 52 times on the City's TV Channel; "Save The Bay" regarding Plastic Bag Pollution 208 times; 90 minute documentary – "Liquid Assets" Story of our Water Infrastructure 52 times; "Give an Experience" – Holiday Litter Reduction 2 times per day during the holidays; "Sewer Smart" PSA 26 times.

Cupertino

Activity	Communication Vehicle	Status/Comments
Only included one time in 08-09 WP (divided into 4 rows in 07-08 AR): Watershed Education & Outreach Campaign: Conduct or participate in local activities that are coordinated with the Watershed Education & Outreach campaign. Evaluate the effectiveness of PI/P projects by direct or indirect means, as appropriate.	The Environmental Programs Manager is a member of WE&O ad hoc task group and reviews and comments on all work plans and materials produced for the Watershed Watch campaign.	A mercury thermometer exchange was held at Cupertino's Fall Festival on 9/13/08 and the City's Earth Day event on 4/19/09, staff by the County HHW program and the San Jose Environmental Services. Approximately 200 Mercury Thermometers were collected and exchanged with digital non-mercury thermometers. Outreach materials distributed included Home Maintenance Tips, County U-Waste Brochure, Safe Medicine Disposal Flyers, IPM fact sheets, pencils, Pens, Got Bugs Magnets, Activity Books, Kids Guide to Backyard Bugs, Grow It Guide, HHW brochure, Pools and Spas Brochure, Reusable Bags, and Fly Swatters.
Watershed Education & Outreach Campaign: Conduct or participate in local activities that are coordinated with the Watershed Education & Outreach campaign. Evaluate the effectiveness of PI/P projects by direct or indirect means, as appropriate.	Staff attends WE&O meetings and subcommittee meetings and reviews and comments on work plans and materials produced by the campaign.	Participated in Tarp Giveaway event on November 1, 2008 at Zanker Landfill for the Anti-Litter campaign. Distributed over 41 tarps. Unfortunately, it was a rainy day, which reduced the number of landfill attendees. A total of 395 tarps were distributed at all landfills (countywide). Combined with the 676 tarps handed out in April 5, 2008, Santa Clara County met their Campaign goal of handing out 1,000 tarps in 2008.
Watershed Education & Outreach Campaign: Conduct or participate in local activities that are coordinated with the Watershed Education & Outreach campaign. Evaluate the effectiveness of PI/P projects by direct or indirect means, as appropriate.	Staff attends WE&O meetings and subcommittee meetings and reviews and comments on work plans and materials produced by the campaign.	Environmental Programs Manager participated in the Spring Garden Market on 4/4/09. Outreach material and education provided to the public focused on environmentally friendly gardening, IPM, and the Bay begins at your front door.

Watershed Education & Outreach Campaign: Conduct or participate in local activities that are coordinated with the Watershed Education & Outreach campaign. Evaluate the effectiveness of PI/P projects by direct or indirect means, as appropriate.	Staff attends WE&O meetings and subcommittee meetings and reviews and comments on work plans and materials produced by the campaign.	Participated in a Car Wash Event held on May 13, 2009 at Robertsville Classic Carwash in San Jose. Distributed Outreach material on proper car washing, and coupons for future car washes at participating locations.
Promote Water Conservation **(Not in WP, added 8/7/09)**	City Staff attended meetings with the water district to establish limits on water use. Distribute water conservation brochures and flyers at city facilities: City Hall, Quinlan, Senior Center, and Library. Articles in the Scene.	Santa Clara Valley Water District placed 2 ads in the Cupertino Courier (8/20/08, 8/24/08) with tips on water conservation, rebate programs, and Water-Wise House Calls.

Activity	Communication Vehicle	Status/Comments
PI/P Targeted Outreach		
City staff: • Building inspectors • Public Works inspector and plan checker • Planning Dept. planners • NPS inspector (in Public Works) • Corp yard & street dept staff • Public Works staff managing golf course maintenance contract and managing structural pesticide spraying contract • City employees for general info on less-toxic alternatives for their own home use, and info on not using pesticides on the job, if unauthorized (detail in the Pesticide Workplan)	See Training Activities Table, for details about specific in-house and program trainings. NPS literature distributed, as appropriate. E-mails: • 18 Spare the Air emails were sent to city employees informing them of Spare the Air Days. • An email was sent to employees on 9/2/08 informing them of the importance of battery recycling and listed locations of battery recycling containers at City Hall, Quinlan, Senior Center, and Service Center. • Bike to work email sent 4/30/09 • Less toxic email was sent 8/18/08 to all city employees. • Email on the new electronic waste collection program and events offered by the County Household Hazardous Waste Program was sent to city employees on 5/11/09. See Training Activities Table, for details about specific trainings. NPS literature distributed, as appropriate E-mails: • Sent Email to City employees regarding how to dispose of batteries properly at City facilities on 8/08. Battery containers are placed in specific areas at City facilities, and most employees are aware of battery recycling and proper disposal.	Internal training at least once/yr, for each listed group of employees. In addition, building inspectors, planners, public works inspector and the city's storm water inspector may attend Program-sponsored training events. Continue to focus on mercury-containing products for trainings with Bldg. inspectors and Public Works maintenance staff. **General remarks:** Trainings regularly provide an informal forum for staff to discuss any recent concerns about operations. The City believes that employees understand stormwater concerns as evidenced by the number of public incidents reported by staff, the types of informed questions asked by staff, and the tradition of on-going training for many years. **Building Dept:** Focus: performance standard, construction BMPs and source control BMPs, inspection notices. **PW and Planning Plan Checkers:** Focuses: C-3, Group 1, 2A & 2B, HMP Pesticide Control, website information, construction permit and MRP. **Corp Yard and Street Dept training:** Focus: Topics included corporation yard operations and maintenance, vehicle and equipment cleaning, dumping incidents, pest management, and universal waste recycling and disposal. In addition, building inspectors, planners, public works inspector and the City's storm water

Activity	Communication Vehicle	Status/Comments
	• Sent 4/30/09 informing them of Bike to Work Day • Approximately 18 Spare the Air emails sent to employees informing them of Spare the Air Days	inspector attended Program-sponsored training events. Continue to focus on mercury-containing products for trainings with Bldg. inspectors and Public Works maintenance staff.
City contractors: Require PCOs, contracted for work on City facilities, to use pest control methods consistent with our IPM policy Require these PCOs to attend training workshops, as appropriate. (See Pesticide workplan for details.)	See "Training Activities" Contract specifications require an IPM approach.	Contractor's staff is required to attend Program workshops, if any workshops. The City's contractor for Blackberry Farm has attended accredited courses through the Continuing Education Center for Pest Management. He maintains his license as a Pest Control Advisor. The City's pest management policy and SOPs are reviewed with the contractor annually for compliance.
Creek cleanup volunteers	Articles in the City newsletter, the Scene and the Courier. Event flyers distributed to Quinlan, Senior Center, City Hall, and the Library, which include a list of cleanup sites.	Articles placed in the September '08, February '09, March '09, April '09, and May '09 Scene and the Courier (4/29/09, 5/13/09) to ask for volunteers for the Coastal Cleanup event in September '08 and the National River Cleanup Event in May '09. Both events were held at Calabazas Creek at Creekside Park. 74 volunteers were present at the September Event and 80 volunteers were present at the May Event. Cupertino will be sponsored its 1st Creek Clean Up event on 9/20/08 in conjunction with Coastal Clean Up event. The City also participated in its 2nd Clean Up event, in conjunction with the National River Clean Up Day @ Creekside Park, cleaning Calavazas Creek on 5/16/09. Environmental programs Manager met with high-school students who wanted to volunteer or report on the City's environmental programs.

Activity	Communication Vehicle	Status/Comments
		The students were eager to participate in a training session on how to perform Urban Rapid Trash Assessments. They wanted to know how those monitoring results can help the City to plan educational campaigns, to reduce the amount of litter in Cupertino's water bodies.
Nursery customers and staff: Pt-of-sale IPM campaign (2 stores: Yamagami's Nursery and Summer Winds Garden Ctr.)	IPM Partnership trainer to speak at both nurseries to train staff. Program pest-specific IPM fact sheets displayed at both nurseries for customer education and to assist the staff in selling the less-toxic products.	Program's contractor sets up each store and program staff restocks, as needed. Set up by EOA staff and Program contractor in the Spring. This is a very efficient way to be sure the nurseries get uniform and effective training and up-to–date information on new products.
Auto Repair Shops	Education of shop mgrs. during bi-annual inspections by City Bldg. Dept staff; staff use Program literature, if necessary. Continue to add the discussion of proper disposal of mercury-containing products (esp. switches and relays).	Ongoing, bi-annually. Service station inspections take place bi-annually. Auto repair shop inspections were conducted bi-annually and were completed in FY 07-08. The bi-annual inspections will be conducted in FY 09-10. The ICID Inspector did inspect auto repair shops 35 times during the year as a proactive inspection. See inspection table in IND Section 2.
Restaurant education	Restaurant posters are distributed at inspections by County health inspectors, or by City NPS inspector, if responding to problems. County health inspector routinely inspects all restaurants annually, and inspects on an "on-complaint" basis. Additionally, the City's inspector provides a copy of a restaurant worker tri-fold (available in English, Spanish, Vietnamese, or Chinese) explaining proper	The City's Non-point Source Inspector provides public education and information on stormwater pollution prevention and watershed protection, when visiting restaurants were spills or illegal discharge violations have occurred. Verbal guidance and written violation notices are provided when necessary. The NPS inspector performed 137 proactive inspections of restaurants in FY 08-09.

Activity	Communication Vehicle	Status/Comments
	restaurant cleaning behavior, as needed. Health Dept. inspectors are now also distributing the recently acquired "Don't Set a Table for Pests" brochure.	The County continues to distribute posters to new restaurants that don't have them. When the City's NPS inspector responds to spills or illegal discharge problems at restaurants, he provides verbal guidance, written violation notices, and often leaves a program brochure, cards or poster. The illustrations on the IC/ID cards are helpful for situations where there is a language barrier. The Chinese version of the tri-fold is helpful in our community, which has a high percentage of Chinese speaking people, and many Chinese restaurants. City staff on-response basis for problems; and spot check for trouble businesses.
Development Community	Stormwater-related literature distributed at Planning/Bldg counter: • 8 construction tri-folds • Small business hazardous waste brochure • Landscape Maintenance Techniques for Pest Reduction • Construction BMP sheet—is required to be incorporated in all building plan sets. • Mercury and Universal Waste brochure for businesses • Diazinon flyer • Builder's Reuse and Recycling Guide • HHW Brochure • Important Resources: How to Reduce, Reuse, Recycle in Cupertino	Materials are updated and restocked as needed. New supplies of Blueprint for a Clean Bay were obtained in FY 09-10 and will be distributed throughout the year. The Building Department was informed of revised construction tri-folds at the Water Quality Training on 6/30/09 and new supplies were given as needed. Restock as needed, check regularly An important piece distributed by public works and building depts. is our formal Construction BMP sheet. The sheet is attached to all plans that move through the planning and bldg depts. No plans are finalized without it. It is made clear to the project applicant that the information

Activity	Communication Vehicle	Status/Comments
		must be conveyed to all subcontractors and that they are responsible for their sub's behavior on the site. The sheet will provide evidence that the NPS concerns were explained to the applicant in case of violations during construction. Many C.3 related documents are on the City's website. The information is easily accessible and in one place for developers, engineers and architects, as well as City employees.
	Development Requirements SCVURPPP Guidebook of Site Design Examples SCVURPPP C.3 Manual Cupertino Stormwater Guidelines for C.3 project Stormwater Management Facility Easement Agreement Stormwater Management Facilities Operation and Maintenance Agreement Pesticide Control Measures For Development Projects Screening Projects for C.3 Requirements Cupertino Notice to Contractors and Developers about C3 "Deemed Complete" Memo (modified) for Development Community Impervious Surface Calculation Worksheet Cupertino Permanent BMP Matrix Hydromodification Applicability Map Cupertino Muni. Problem contractors in the field	Primarily verbal. Program's specific activities cards. Violation notices. Construction tri-folds.	Specific activity cards are available to give to violators in the field on an as-needed basis.

Activity	Communication Vehicle	Status/Comments
Residents living near creeks	Water District's Stream Care Guide and new Creek wise Guide for Creekside property owners (available from Environmental Programs and Planning counter).	Staff will develop flyer on use of pyrethroids for creekside property owners and landscapers in FY 09-10. No feedback from residents, but the guides continue to be taken from the counter display area. Useful to have a piece that addresses the special responsibility of residents that live near creeks.
Environmental groups, local—City staff to provide IPM fact sheets to Audubon Society for their center and for their annual event.	Provided the following for the Audubon Society annual event on 10/25/08: Grow It Guides, Draining Pools and Spas brochures, Pest or Pals Coloring Books, Recycled Pencils, Seed Packets, The 10 Most Wanted Bugs in Your Garden, Pests Bugging You – Pocket Guides, Important Resources – How to Reduce, Reuse & Recycle in Cupertino brochure & magnets, Household Hazardous Waste Program Brochure, E-Waste Recycling flyer.	These pieces of information are displayed and available year round at the Audubon Society Center. They are also featured and displayed at their annual event in October.
Provide info on IPM workshop opportunities to school districts and sanitary district. (See Pesticide Workplan for details.)	There were no Regional Workshops held in Santa Clara County this year.	N/A
Outreach to local commercial businesses to encourage the use of pest-resistant plants in landscape. Included in Planning Dept. applicant packet (Pesticide Workplan for details.)	Pest-resistant plant list is distributed through the Planning Dept. application packet.	Ongoing
Community Participation Events		
Participate in regional creek cleanup event (if creeks in Cupertino need cleaning). Publicize cleanup.	Cleanup events were advertised in the Scene and the Courier. Volunteers collect trash and recyclables from the Creek and surrounding bank.	Staff coordinated and hosted Cupertino's first Community volunteer cleanup event as a participant in the September '08 Coastal Cleanup Event The success of the first event led to holding the May '09 National River Cleanup Event. Both cleanups were at Calabazas Creek at Creekside Park in Cupertino. Events were co-

Activity	Communication Vehicle	Status/Comments
	Volunteers pick up trash along both creek and nearby streets at McClellan Ranch through the City's Creek Education Program.	sponsored by Whole Foods. 74 volunteers were present at the September Event and 80 volunteers were present at the May Event. Cleanups are an effective way of inspiring enthusiasm for creek and water quality protection as well as bringing about an awareness of trash problems in community and how residents can help to prevent these problems. Environmental Programs Manager met with high-school students who wanted to volunteer or write a report on the City's environmental efforts. The students were eager to participate in a training session on how to perform Urban Rapid Trash Assessments. They wanted to know how the monitoring results could help the City to plan educational campaigns, to reduce the amount of litter in Cupertino's creeks and the Bay. The Cleanup events were advertised in the Sept. '08, Feb. '09, March '09, April '09, and May '09 Scene and the Courier (4/29/09, 5/13/09) The Water district bought ads in the Courier and mailed out reminders to last year's volunteers.
PI/P Schools Educational Outreach		
Creek Education project available to all 3rd grade teachers, including combo teachers and shared position teachers in the Cupertino Union School District: about 100 classes (half are in Cupertino; remaining schools in cities of San Jose,	Teachers are trained to teach the creek ed. unit to their own classes, and co-lead creek field trip for their students; City's Park & Rec naturalist and the Cupertino's Creek Ed Coordinator prepares the teachers. City provides two docents for creek tours.	This program is very popular with our school district and the teachers. The City started the program in 1995, and continues to refine it as needed. During a half hour review of general NPS and creek concepts that precedes

Activity	Communication Vehicle	Status/Comments
Sunnyvale, Santa Clara, Saratoga, Los Altos) participated this year. Teachers are trained to teach the creek ed. unit to their own classes, and co-lead creek field trip for students.	3-hr training workshops for teachers; 2-wk curriculum for students taught by teachers, w/ half-day creek field trip. City's Park & Rec naturalist teaches 2-day training workshops for all (previously untrained) 3rd-grade teachers. Teachers are trained to teach the creek ed. unit to their own classes, and co-lead creek field trip for their students. 2-wk curriculum for students taught by teachers, finishing with ½ -day creek field trip to Stevens Creek at McClellan Ranch in Cupertino. City provides two docents for creek field trip (city's naturalist and part-time paid docent).	the actual creek walk, our docents have the opportunity to observe whether each teacher has, in fact, spent time in the classroom preparing the students for the field trip. Typically, almost all of the students are familiar with the concepts. Provide teacher training for all (previously untrained) 3rd-grade teachers. Provide creek field trip opportunity to all District 3rd-grade and 3rd/4th -grade students.
Respond to school group requests for tours, workshop, field trips, as possible	City has use of a part-time paid docent who has been able to satisfy outside requests. The City's Park and Rec staff naturalist assists the students of Monta Vista High School to regularly perform water quality monitoring and research in Stevens Creek (the City's principal creek, 2 blocks from the high school).	City naturalist met with 4-H members during seven 1 1/2 hr. sessions to learn about insects, insect identification, life-cycles, and ecological importance and control alternatives. Four 1 ½ hour presentations were made to students in ES1 ES52 classes regarding Stevens Creek Watershed. Discussion of the effects of non-permeable surfaces, non-point source pollution, and storm water discharge into creeks was included as part of general discussion of watershed concepts. No field trips were conducted this year because the usual site was closed for a creek restoration and Park renovation project.

Activity	Communication Vehicle	Status/Comments
		In general, creek and water quality studies have become more common in schools, without the intervention of the City. However our City's naturalist is well known among local teachers as a science resource, and is often informally drawn into school projects. Since she is the lead docent in our 3rd-grade creek program, she is already very aware of stormwater and watershed issues, and shares that info with the teachers and students.
Encourage teachers to attend the Wacky Watershed teacher-training workshops.	E-mails and phone calls to the District's science curriculum advisor.	The Wacky Watershed trainings were put on hold in FY 08-09.
Support of student projects involving water issues.	Interviews with students at City Hall and education provided at Calabazas Creek.	Met with high school students twice, one on 1/27/09 and 3 on 2/19/09, to discuss the health of creeks and the importance of keeping creeks clean. In addition to interviews staff took eight students to perform a cleanup and RTA at Calabazas Creek on 2/19/09.
		See Educational Outreach Programs Table for more details on programs that include schools.

City of Cupertino
Educational Outreach Programs Report
FY 2008-09

Name of Program	Focus & Short Description	Type of Program	Target Grade	Location	Total No. of students	Evaluation
Monta Vista High School Biology Field Trip	No field trips were conducted this year because the usual site was closed for a creek restoration and Park renovation project.	Presentation	9th	Blackberry Farm	0	This program was on hold for the restoration of the section of Stevens Creek at Blackberry Farm and the renovation of the surrounding park area.
De Anza College Environ-mental Studies Field Trips	Four 1 ½ hour presentations were made to students in ES1 ES52 classes regarding Stevens Creek Watershed. Discussion of the effects of non-permeable surfaces, non-point source pollution, and storm water discharge into creeks was included as part of general discussion of watershed concepts.	Field Trip	College	McClellan Ranch	110	Instructor finds this field trip a valuable Addition to both ES1 and ES52 *(Intro to Environmental Studies and Humans, the Environment, and Sustainability)* and plans to return next semester.
Volunteer Projects	Volunteers pick up trash along Stevens Creek and nearby streets.	Creek Cleanup	4th-8th Grade	McClellan Ranch	40	Effective in cleaning up creek as well as raising awareness of trash problems in community.
Creek Education Program	Creek Education project available to all 3rd grade teachers, including combo teachers and shared position teachers in the Cupertino Union School District: about 100 classes (half are in Cupertino; remaining schools in cities of San Jose, Sunnyvale, Santa Clara, Saratoga, Los Altos) participated this year. Teachers are trained to teach the creek ed. unit to their own classes, and co-lead creek field trip for their students; City's Park & Rec naturalist and the Cupertino's Creek Ed Coordinator prepare the teachers. City provides two docents for creek tours. 3-hr training workshops for teachers; 2-wk curriculum for students taught by teachers, w/ half-day creek field trip.	Presentation, Teacher Training, Field Trip and Creek Cleanup	3rd* *Every other year, Murdock/Portal brings their 2/3 classes. Due to their school set up, at that time we have 2nd graders participating in program.	Schools and McClellan Ranch	1910	This program is very popular with our school district and the teachers. We started the program in 1995, and continue to refine it as needed. During a half hour review of general NPS and creek concepts that precedes the actual creek walk, our docents have the opportunity to observe whether each teacher has, in fact, spent time in the classroom preparing the students for the field trip. Typically, almost all of the students are familiar with the concepts. This past year, 08-09, we had approximately 1910 students, 105 teachers, and 394 parent volunteers participate in our program.

City of Cupertino
Educational Outreach Programs Report
FY 2008-09

4-H Entomology Project	City naturalist met with 4-H members during seven 1 1/2 hr. seesions to learn about insects, insect identification, life-cycles, ecological importance and control alternatives		1st - 4th grades	Cupertino	15	This program is effective in helping children overcome fears of insects, develop competency in insect identifiaction, learn ecological importance of insects, and be introduced to some non-toxic pest control alternatives
Insect an pesticide alternatives information	City naturalist set up hands-on insect display table at Santa Clara Valley Audubon Society's Wildlife Education Day and at Cupertino's Earth Day to familiarize children and adults with common garden insects and spiders, learn about the beneficial aspect of some insects and spiders and to introduce alternative pest control materials					
Garden insect and pesticide alternatives information table at community events	City naturalist set up hands-on insect display table at Santa Clara Valley Audubon Society's Wildlife Education Day and at Cupertino's Earth Day to familiarize children and adults with common garden insects and spiders, learn about the beneficial aspect of some insects and spiders and to introduce alternative pest control materials		adults and children	McClellan Ranch and Quinlan Community Center	700	This program was effective in engaging participants at event into discussion about insects and spiders, the benefits of some of these organisms in the garden and alternatives to pesticides for dealing with pests.
Monta Vista High School Creek Cleanup	2 City Staff worked with 8 high school students to clean approximately 200ft of Calabazas Creek. Education was provided on the importance of maintaining clean creeks and instructions were provided on how to perform an RTA.	C	High School	Calabazas Creek at Creekside Park	8	Program was effective in raising awareness of trash issues and the importance of keeping creeks clean.

City of Cupertino
Educational Outreach Programs Report
FY 2008-09

Monta Vista High School Interview	Environmental Program Manager met with three high school students to provide an interview for their project about current environmental concerns. Topics discussed included: litter in creeks, pesticides, negative impact of sediment and erosion, impervious surface and C.3 requirements.	O	High School	Cupertino City Hall	3	Interview was effective in providing information on creek and watershed issues to high school students that would in return take the information back to their classmates.
Volunteer Projects	Two creek cleanup events were held this year. The National Coastal Cleanup Event and the National River Cleanup Event. Both events had over 80 volunteers that ranged in age from elementary school to adult. Trash and recyclables were collected from Calabazas Creek and adjacent areas at both events.	C	adults and children	Calabazas Creek at Creekside Park	160	These cleanup events are effective in removing litter from the creek as well as educating the public on the importance of maintaining clean creeks.
Cupertino Earth Day Event	Cupertino Environmental Programs staff set up tables at the City's Earth Day Event that included information on environmental issues, city services and programs. The display included continuous presentations with the Enviroscape, bringing the watershed and urban runoff to life in an interactive exercise. The presentations included an introduction to the watershed, urban runoff, and how everything in the street or storm drain has a direct flow path to the creeks and Bay.	Presentation	adults and children	Quinlan Center	150	The information provided, especially through the Enviroscape presentations, was effective in educating the public on watershed issues such as litter, pesticides, oil, and other sources of pollution for urban runoff.

City of Cupertino

FY 08 - 09 Annual Report

Section 7

Pesticide Management

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2008-2009 Annual Report: Pest Management
Cupertino

Program Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Responsible Party
I. Municipal Pesticide Use ***Goal I.A.*** *Eliminate all unnecessary municipal pesticide use (particularly organophosphate (OP) pesticide use) and implement Integrated Pest Management (IPM) techniques.*				
I.A.1	Track pesticide use on municipally owned property. (PS #9). The results are reported in the AR.	City collected pesticide-use information from four groups that apply pesticides on city property: • Streets Dept. (on medians) • Parks Dept. (In the parks) • Facilities maintenance (grounds surrounding city buildings) • Parks Dept hires Golf course Superint. All of these departments submit copies of the monthly County Ag reports along with the City's Pesticide-use form (identifying the pest targeted pest, whether the pesticide used was on the approved list for City of San Francisco, and comparing use from the reported year with that of previous year). This is an effective tool for noting any changes in pesticide use. No organophosphates pesticides are kept or used on City property. *In '08 - '09, City staff's first attempt to get rid of the Common Groundsel employed the use of Pendimethalin (instead of Roundup and Surflan) because it was on the "approved list". However, Common Groundsel was resistant to the Pendimethalin; when Groundsel grew through, City staff had to get rid of it with Roundup and Surflan so it wouldn't grow back. Groundsel can grow to be 2 ft. tall.* ***Staff first attempted to use more***	Ongoing	Corp Yard Supervisor & Director; Parks & Rec

Program Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Responsible Party
		of the "approved" Pendimethalin to correct the problem. This accounts for the increase in pesticide use in '08-'09 (see attached pesticide use comparison). *When the additional Pendimethalin did not prevent the Groundsel, Surflan was used. The Groundsel problem did not recur when Surflan was used.* The Pest Control Advisor will review alternatives for preventing and exterminating Common Groundsel and advise staff of any new practices that should be implemented. Any changes to procedures will be reported in the 09-10 Ann Rpt.		
I.A.3	Continue to refine and implement SOPs and BMPs for implementing the IPM policy. (PS #3).	The City has developed pest-specific and location-specific SOPs for pest management operations at city facilities. No changes in IPM procedures were implemented in FY08-09. However, a new product (*Sapphire*) was used on the golf course to combat English Daisy. Since we'd heard that San Fransico had used Saphire on city property and Cupertino follows San Francisco's list of approved pesticides, we contacted a parks PCO for the City and got this reply: *"We used Sapphire for the first time last fall and were able to knock down all English Daisy that would normally just get stunted by Vanquish and Turflon."* Cupertino's Golf Course Superintendant claimed that approving the use of *Sapphire (with penoxsulum)* would reduce pessticide use for English Daisy because it is more effective and lasts longer. Cupertino will learn more about its	Ongoing	Corp Yard Supervisor & Director, Park & Rec

Program Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Responsible Party
		overall effectiveness and any benefits in pesticede reduction in 09-10.		
I.A.4	Update URMP with Pest Mgmt. changes.	No changes were made to the Cupertino's IPM SOPs in FY 08-09.	Ongoing	Envt'l Div
I.A.5	Continue to ensure that any contractor employed to conduct pest control and pesticide application on municipal property engages in pest control methods consistent with the IPM policy adopted by the agency (PS #6).	The City employs two contractors for pest management: 1. Rude PM Complete Pest Service (for structural and building grounds control): The principal has implemented the City's SOPs when controlling ants, rats, and cockroaches. His work was monitored by the City's Facilities Supervisor. 2. Professional Turf Management (contractor for maintenance of the municipal golf course grounds). Specific IPM requirements are called out in the contract. A City Parks and Recreation Supervisor (Don McCarthy) monitors their work. Forty three pest-specific SOPs have been jointly established by the contractor, the City's in-house Pest Control Advisor, City Environmental staff, and the City's Recreation Supervisor. Annual meeting between Env Programs Mgr. and City's Contractor and Recreation Supervisor took place June 11, 2009. Several discussions of pesticide use were conducted among this group by email in Novermber 2008 and April 2009. The June 11th meeting included a review of the SOPs. One new herbicide, Sapphire, was piloted in FY08-09. It lasts for 2 years, therefore fewer applications are required. Golf course Super reported that DPR lists it	Ongoing	Corp Yard Supervisor & Director, Parks & Rec

Program Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Responsible Party
		as a *restricted-risk* pesticide, less problematic than a phenoxy herbicide, although it is expensive. It was used for especially for English Daisy, which is a big problem at the City's golf course. It is expected to cut down on the number of applications that are needed.		
I.A.6	Conduct annual, City facility search of chemical storage areas for pesticides no longer legal for application, and properly dispose of them. (PS #10)	The City's Street Maintenance Supervisor is also is the City's Pest Control Advisor. She reviews the list of banned pesticides to ensure that none are stored, or available for use, on City property.	7/09 and annually	Corp Yard Supervisor & Street Maint Supervisor
MM I.A.1.	Document completion of tasks in annual reports. Use pesticide-tracking process to document pesticide use.	A summary report on pesticide use is included, following this document. It compares use in FY 08-09 to use the previous year.	08-09 AR and ongoing	Corp Yard Supervisor & Director, Park & Rec & Envt'l Div
Goal I.B. *Raise awareness of all municipal employees and train employees who apply pesticides for the municipality about the municipality's IPM Policy and/or IPM techniques as appropriate.*				
I.B.1	Ensure that employees who apply pesticides for the agency obtain the appropriate County Ag and DPR- required training (PS #5a).	Included in "Pest Management Training FY 2008-2008," attached. Two annual Pesticide Trainings were provided: The annual in-house training for pest control operators was conducted on on 1/15/2009 for all City employees who are certified or licensed to apply pesticides (35 maintenance workers).	Annually	Corp Yard Supervisor & Dir., Park & Rec
I.B.2	Provide annual training on the IPM Policy, SOPs, and BMPs, and the latest IPM techniques to employees within departments responsible for pesticide application (PS #5b).	Cupertino's IPM policy was reviewed and BMPs were discussed in the training meeting held on June 11, 2009 for the Pest Control Advisor and the Golf Course Supervisor for the City. Appropriate maintenance staff is trained individually by the City's Pest Control Advisor on	6/09 and annually	Street Maint Supervisor, Facility Maintenance Supvervisor, and Golf Course

Program Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Responsible Party
		City IPM policy and requirements. Additional training is provided if specific pest problems occur. New methods are piloted as appropriate to reduce impact to the environment and protect natural ecosystems.		Superintendant Envt'l Programs Division
I.B.3	Annually inform employees who are not authorized to apply pesticides, that they cannot use over-the-counter pesticides in the workplace (PS #5c)	Email was sent to all City employees on August 18, 2008.	2/09 By e-mail	Envt'l Div
MM I.B.1.	Document and evaluate effectiveness of annual staff training.	The Environmental Prgms. (EP) Mgr. receives regional training by attending Urban Pesticides Committee (UPC) meetings whenever possible. Most accessible are the meetings which offer a dial-in option. EP Mgr attended the meeting on 9-16-08. Notable items for discussion included: • Pyrethroids in urban waters, statewide survey (presentation) - Armand Ruby • **Pyrethroids reevaluation discussion -** John Sanders - begins about **11:30am, be sure to read attached memos (questions/responses)** • Aquatic and sediment toxicity testing (presentation) - Patti TenBrook Cupertino's EP Manager hosted an in-house pesticide management training on 6/11//09. Training was attended by the Public Works maintenance Supervisor, the City's Parks and Rec Supervisor, the Golf Course Superintendent and the golf course Parks and Rec Supervisor. Topics discussed included current pesticides used that are not on the SF list, including Sapphire (vs. Dicamba), Surflan, and PCNB. Current management techniques utilized by the	08-09 AR Ongoing	Envt'l Div

Program Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Responsible Party
		golf course were discussed including preventing weeds with wood chips, compost to fill holes, and leaving grassclippings on lawn in appropriate areas. City Staff are aware of the City's IPM policy and continue to use IPM practices in the field that are suggested by the City's Pest Control Advisor, such as baiting, expanded mulching with wood chips to completely eliminate pesticide usefor weed control in suitable areas, and replacing disease prone plants and trees with pest resistant alternatives. Practices used by the City are working well and the method of training by trying new methods has kept the City from having to use herbicide for weed control in most areas (some areas (the golf course green) require herbicide for elimination of weeds).		
II. Public Education and Outreach ***Goal II.A.*** *Increase awareness of IPM so target audiences recall less toxic pest management messages and adopt IPM behaviors. Target audiences include residential pesticide users, professional pest control businesses, customers of professional pest control businesses, pesticide retailers, school districts, and other special districts (PS # 7).*				
II.A.1	Assist with local implementation of the Watershed Education & Outreach (WE&O) Campaign, which targets the general public and includes messages about less-toxic pest control and proper disposal.	City staff is a regular participant in the Santa Clara Valley Program's Pesticide User Outreach Group. In January SCVURPPP agencies received an IPM Innovator award for leadership and creativity in advancing the use of reduced-risk programs for urban pest management. City Staff will continue to participate in, provide input and critique the WE&O strategies for promoting IPM and reduction of pesticide use in FY 09-10. Cupertino's website has a link to the Program's IPM page at www.mywatershedwatch.org and a	Ongoing	Envt'l Div

Program Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Responsible Party
		link to the Our Water – Our World (OWOW) campaign website: www.ourwaterourworld.org Cupertino staff provided support for the implementation of the Program's *"Watch out for Toxic Pesticides"* campaign.		
II.A.2	Assist Prgm in developing simple, effective, targeted messages regarding proper pesticide use and disposal, effects on water quality, and IPM.	Environmental Programs staff reviewed and commented on all IPM messages for print, radio, internet, and transit for the Santa Clara Program's WEO media campaign.	Ongoing	Envt'l Div
II.A.4	Identify and attend local community events and distribute outreach material. Distribute literature at Backyard Compost workshops and promote City compost distribution program.	IPM material are provided for the instructors of three free compost & gardening classes in Cupertino this year. Two Backyard Compost Workshops were provided in November '08 and in March '09. A class was offered in October '08, but registration was low enough that it was canceled. Instead of the two compost classes that are traditionally offered in the spring, new Bay Friendly Gardening classes, which include composting instructions were introduced Countywide and held in larger venues to accommodate more attendees. The original backyard compost classes generally served about 20-25 people. The Bay Friendly classes, one at Cupertino's Community Center on May 2nd, were open to 50 students. Most Bay Friendly classes reached maximum enrollment, a testament to their popularity and an indication that the City will want to support more Bay Friendly classes in the future. IPM Literature was provided to compost instructors. The use of compost reduces the use of pesticides, fertilizers, and water. In addition, composting creates healthier plants by improving	Two composting workshops 11/08 & 3/09. One Bay Friendly Gardening class with composting as an element 5/09.	Environmental Programs Div

Program Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Responsible Party
		the soil, as well as reducing the rate of soil erosion. Cupertino also offers free compost to residents who are unable to make their own. Compost is processed from municipal and residential yardwaste. The compost give-away is a very popular program that is available Friday and Saturday mornings from March through October.		
II.A.4	Identify and attend local community events and distribute outreach material. Install an IPM-products and literature display in the Community Center for 2 wks	The IPM display at Quinlan Community Center ran through March and April of '09 and included the following literature and information: IPM Fact Sheets, Free Compost, Free Home Repair and Garden Products, Home Maintenance Tips for a Cleaner Bay, Landscape Maintenance Techniques for Pest Reduction, Worm Composting, Grasscycling, The Bay Begins at Your Front Door, Pests Bugging You?, The 10 Most Wanted Bugs in Your Garden, SCVURPP ICID cards for Overwatering, When Pests Invade, Where Does Your Water Go?, Natural Enemies Are Your Allies! Materials that were made available throughout the year at Quinlan, City Hall, and Library included IPM fact sheets, Is Your Gardener a Green Garden?, Home Maintenance Tips for a Cleaner Bay, Landscape Maintenance Techniques for Pest Reduction and The Bay Begins at Your Front Door.	March through April 2009	Environmental Programs Div
II.A.6	Review existing city web link, on the Cupertino city website, to any IPM website developed by the WE&O campaign.	Cupertino includes two pesticide reduction flyers in the new development packet that is on the City's website, *Landscape Maint Techniques for Pest Reduction* and *Pesticide Control Measures*	Review annually	Envt'l Div

Program Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Responsible Party
		for Development Projects.		
II.A.9	Continue to fund BASMAA Regional Media Relations Campaign[1] featuring pitches to Bay Area media and responses to breaking news on pesticide-related topics.	Program funds BASMAA baseline projects, including Regional Media Relations Campaign. Program staff attends meetings and provides input as needed. 28 Santa Clara County stores within the Program participate in the BASMAA *Our Water Our World Program*.	Ongoing	N.A.
II.A.10	City staff to provide IPM-related press releases to local media—using Program generated materials if they are developed.	Articles on the availability of pest control fact sheets and less-toxic products and techniques appeared in the March '09, April '09 and May '09 City newsletter, the Scene. An article promoting the Green Gardner Program was in the June '09 Scene. Program ads for Watch Out for Toxic Pesticides were placed in the Cupertino Courier (917/08, 4/22/09).	Annually, as appropriate	Envt'l Div
II.A.12	Continue to assist with implementation of local components of a "Pesticide User Outreach" project targeting residential and commercial users	Will assist as needed. Includes IPM retail nursey store partnership; working with County HHW Prgm, and general support of SCVURPPP and BASMAA IPM-related outreach activities. City staff continued to provide support to Program staff for the retail nursery IPM outreach. Cupertino's Program assessment dollars helped fund the OWOW Consultant's training of 160 employyes at 28 stores, including 10 stores Home Depot stores, which was new to the OWOW Store Partnership Program. In addition, Annie Joseph worked with the Cupertino SummerWinds on "Earth Friendly Products", with more shelf space dedicated to less-toxic products. The consultant for the	Ongoing	Envt'l Div

[1] Funded by all Co-permittees each year.

Program Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Responsible Party
		OWOW campaign was also asked to provide suggestions for the earth friendly section of their website. The OWOW Program received prominent mention. Although the economy has been tough on nursery sales this year, an increase in less-toxic product business was noticed in FY08-09.		
II.A.13	Inform local elementary and high school districts, and local sanitary district, of any pertinent opportunities for IPM training.	The County IPM Manger, in the Office of the County Executive for Santa Clara County as well as city staff, contact and invite these agencies as trainings become available. A Santa Clara County regional workshop was not held in 08-09.	As future workshops are announced	Envt'l Div
II.A.14	Internal outreach on IPM to encourage employees to use IPM techniques away from work: 1. Set up display of less-toxic products and IPM literature at Corporation Yard and City Hall. 2. Distribute IPM fact sheets electronically to city employees through e-mail.	Throughout March and April of '09 IPM informational materials were on display at Quinlan Community Center. The display was included as a table at Cupertino's 1st annual Community Center Earth Day Event (April 19), which was attended by approx 500 residents and city employees. Throughout April, IPM fact sheets were displayed in City Hall. A Pesticide, Watershed Pollution & Mercury display was at Cupertino's Quinlan Center from 3/5/09 – 4/30/09. See photo of display attached at the end of this report section.	By 5/09	Envt'l Div
MM II.A.1.	Document or estimate numbers of residents reached by outreach efforts and media advertising	Articles in the City's monthly newsletter (The Scene) are reportedly read by 87% of residential households, or about 16,677 households. (The City performs a telephone survey every 3 years). Articles on pesticide fact sheets were published in the March, April, and May issues of the City's newsletter, the Scene. More residents are requesting *Grow It* fan guides	Annually, for AR	Envt'l Div

Program Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Responsible Party
		which include information from all of the IPM fact sheets.		
Goal II.B. *Educate pesticide retailers and consumers about less toxic pest control products and promote the sale of such products.*				
II.B.1	Continue to fund and participate in the BASMAA Regional IPM Partnership	Program funds BASMAA baseline projects, including Regional IPM Partnership.	Ongoing	Envt'l Div
II.B.2	Continue to support the IPM Store Partnership Program.	Two nurseries participate in Cupertino. Nursery employee training provided by Program contractor, Annie Josephs. SCVURPPP staff provide re-stocking visits. Cupertino staff participates in the Pesticide User Sub-group meetings and helps fund and promote the employee IPM training program. On May 4th after years of (the *Our Water Our World* consultant's) efforts to encourage *Home Depot to* become a retail partner, Home Depot issued a memo to its CA store managers introducing the *Our Water Our World* "coalition of organizations whose purpose is to encourage consumers to use less toxic pest controls in and around their homes. [OWOW members] specialize in retail friendly education. Their goal is not to alienate the consumers by telling them what they can't use. Their information focuses on less toxic pest management and ties into products currently on [Home Depot] shelves." The memo went on to explain that the OWOW consultant would be contacting store managers to set up training for employees. It was mentioned that training would take place for staff to teach them how to label less toxic products with shelf talkers. The memo also stated that the	Ongoing	Envt'l Div

Program Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Responsible Party
		effort ties in well with Home Depot's "How-to" weekend events and that the OWOW consultant may display a sampling of excellent less toxic and Eco Options products off of Home Depot's shelves. This represents a huge accomplishment in the OWOW campaign's partnerships with local retail stores. Cupertino's resident's will benefit from this new program as *Home Depot* on S. De Anza Blvd is in the part of San Jose that borders Cupertino.		
MM II.B.1.	Assist Program in documenting number of participating stores, materials distributed, employees trained, and cost-effectiveness of the IPM Store Partnership Program.	Two Cupertino stores are IPM partners. The store provides IPM staff training to support sale of least toxic pest control products.	Annually	Envt'l Div
III. Pest Control Operators (PCOs) ***Goal III.A.*** *Minimize pesticide use by PCOs contracted for structural pest control and landscape maintenance.*				
III.A.4	Require PCOs contracted for municipal applications to use pest control methods consistent with the municipality's IPM policy (through contract specifications). Specifically, require contractors to: a) follow the agency's IPM policy, BMPs, and SOPs; b) provide evidence of current IPM training, when feasible; and c) provide documentation of pesticide use on agency property to the agency in a timely manner (PS#6).	IPM specifications and training requirements are included in the contract for Cupertino's golf course maintenance contractor. An overview of the IPM policy, BMPs and SOPs took place during the annual meeting (6-11-09). Monthly pesticide use reports were submitted to the Environmental Programs Division and a summary is provided following this pesticide management report table. Termite fumigant was required for Cupertino Senior Center on 8/13/08. Vikane, EPA approved and the least toxic of two available fumigants, was used.	Ongoing Golf course Maint Superintendant annual IPM training mtg was held on 6/11/09	Corp Yard Supervisor & City PCO (Streets Maint Supervisor) Environmental Programs Mgr & Parks Maint Superintendant plus Parks & Rec Supervisor and City Parks staff
MM	Document pesticide use by PCOs on municipal property. City will strive, over time, to resolve	Pesticide use forms were submitted to the City's Environmental Div for compilation and analysis.	In the Annual Report	Corp Yard Supervisor &

III.A.1.	difficulties associated with reporting use by contractors and leaseholders, and other data collection limitations.	See pesticide use comparison table, following this section.		Director, Park & Rec
Goal III.B. *Require all PCOs to implement Best Management Practices (BMPs).*				
III.B.2	Require PCOs contracted by municipalities to implement BMPs through contract specifications.	Any pesticide that is not on the approved list of pesticides (list is from San Francisco) must be approved by Cupertino's Pest Control Advisor, the maintenance Supervisor for Streets.	Ongoing	Corp Yard Supervisor & Director, Park & Rec
MM III.B.1.	Document efforts to complete the above actions.	See III.A.4, above.	In the Annual Report	Svc Center Spvsr &Dir, Parks & Rec
IV. Commercial Businesses				
Goal IV.A. *Determine the extent of commercial business employees' use of pesticides (i.e., pesticide applications not performed by a licensed PCO) and conduct appropriate outreach regarding less toxic pest management.*				
IV.A.2	Assist in implementation of education programs that target commercial businesses, per recommendations developed in Program work plan—with restaurant focus.	Restaurant posters are distributed by the County Health Inspectors and the city's stormwater inspector, as needed, in response to problems. The Pesticide User Outreach group, which Cupertino staff participates in, addresses educational outreach to commercial business IPM outreach currently includes: restaurants and retail nurseries and new development: The Program has provided the County Health Dept. restaurant inspectors with copies of "*Don't Set a Table for Pests*" brochure that inspectors are distributing to new or remodeled food facilities throughout the County. The City's IC/ID Inspector also inspects restaurants and distributes appropriate educational materials. The fact sheet, *Landscape Maintenance Techniques for Pest Reduction* and the	Ongoing	Envt'l Div

Program Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Responsible Party
		Program's pest-resistant plant list are included in the City's development applicant information packet.		
MM IV.A.1.	Document outreach efforts targeting businesses.	In FY 08-09 the City's IC/ID Inspector performed 137 proactive inspections of restaurants. In FY08-09, the County Health inspectors visited 256 food facilities in Cupertino. They distributed pest control outreach materials to restaurants who hadn't already received the information.	In the Annual Report	Envt'l Div
V. Household Hazardous Waste Collection ***Goal V.A.*** *Provide pesticide disposal services through household hazardous waste (HHW) collection programs for all residents and small businesses, and encourage use of these programs.*				
V.A.1	Ensure that adequate pesticide disposal services exist for residents and conditionally exempt small quantity commercial generators.	The City participates in the Countywide Household Hazardous Waste Program, which provides HHW collection for residents and small businesses. In addition, the City provides funding for the HHW Event that is held Cupertino every August. The City will look to include HHW collection services in the upcoming negotiations for its solid waste contract.	Ongoing	Envt'l Div
V.A.3	Work with HHW collection agencies to support, enhance, and help publicize programs for proper pesticide disposal (PS #7).	The City supports the County HHW program by assisting in the development of its program, in addition to publicizing any new and existing services the HHW program offers. The Environmental Prgms. Mgr. participates in the HHW Ad Hoc group and is a member of the CA Product Stewardship Council, which promotes extended producer responsibility and Cradle-to-Cradle (producer take-back of material for re-use, as opposed to disposal of toxic	Ongoing	Envt'l Div

Program Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Responsible Party
		materials.)		
V.A.5	Provide hazardous waste disposal information to residents, through 3-4 city newsletter articles, 3 ads in local newspaper and flyers at City library, community center, and City Hall.	HHW services were advertised in the July '08, May '09, and June '09 Scene and in the Cupertino Courier on 8/6/08, 8/13/08, and 8/20/08 (ad and article). An HHW Display ran from 8/5/08 to 8/26/08 at Quinlan and a Pesticide display ran through March and April '09, at Quinlan, which included information on HHW services. (See table of media ads in PIP section). HHW brochures and flyers are available year round at Quinlan, Library, Senior Center, and City Hall, for residents and small businesses.	Periodically	Envt'l Div
MM V.A.1.	Document that household hazardous waste collection programs adequately serve residents and businesses and that any exchange programs do not exchange organophosphate or banned pesticides.	The City provided enough funding to the County HHW program to service the disposal needs of all of the households that choose to use the service. Over 1,000 households (or 6% of the residential households in the City) have opted to use HHW. The County HHW program does not re-distribute any organophosphate or banned pesticides.	Annually	Envt'l Div
VII. New Development ***Goal VII.A*** *Minimize pesticide use at new and redevelopment sites.*				
VII.A.2	Consider pest-resistant landscaping and design features in the design, landscaping, and environmental reviews of proposed development projects. (C.9.d.ii.)	All applicants for a development permit are given information on pesticide-resistant plants. Each applicant is also given *Landscape Maintenance Techniques for Pest Reduction* and the City's list of pesticide control measures to be incorporated into the site design. Cupertino's Permanent BMP Selection Matrix for C.3 projects includes a reference to pest-resistant plantings. No changes were made to the review process for landscaping this year.	Ongoing	Envt'l Div & Planning Dept.

Program Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Responsible Party
VII.A.4	Collect information and report a summary of types of pesticide reduction measures required for development projects and the percentage of projects for which pesticide reduction measures were required. (C.3.n.5)	All projects (100%) are given a copy of the document "*Pesticide Control Measures for Development Projects*", listing six different control measures. Planners include a COA for all C3 projects requiring a landscaping plan to include pesticide reduction measures.	In the Annual Report	Envt'l Div & Planning Dept.
MM VII.A.1.	Summarize types of pesticide reduction measures required (e.g., by condition of approval) for new development & significant redevelopment projects, & the percentage of those projects for which pesticide reduction measures were required. (C.3.n.)	See VII.A.4, 100% of projects receive Pesticide Control Measures and C3 Projects incorporate pesticide resistant landscaping in the COAs, such as the use of drought resistant and native plants, which are less susceptible to infestations.	In the Annual Report	Envt'l Div & Planning Dept.
VIII. Monitoring and Science ***Goal VII.A.*** *Participate in coordinated monitoring efforts to support pesticide TMDL development and implementation.*				
VIII.A.1	Continue financial support of the Regional Monitoring Program (RMP) through city contribution to Program budget.	The City continued to help fund the RMP through the annual assessment to the Program.	Annually	Envt'l Div
X. Review and Revision of Work Plan ***Goal X.A.*** *Implement a work plan that includes appropriate goals, actions, and monitoring mechanisms to reduce pesticide-related toxicity in urban runoff.*				
X.A.1.	Review and continuously improve the goals, actions, and monitoring mechanisms of the work plan considering results of self-evaluations, comments from Water Board staff and other interested parties, and results of local performance review meetings, if any.	The Pesticide Managemnt Plan provides an array of goals that are adapted for the City when feedback from the general public and from municipal staff is provided. The *Grow It* guide continues to be a sellout item at every event and is welcomed by nurseries and gardening stores for their customers. *Grow It* was considered for reprint in 08-09; and the plans for a reprint will continue to be discussed in 09-10. The OWOW campaign, with consultant, Annie Joseph, has provided training for local nursery staff. The	Annually	Envt'l Div

Program Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Responsible Party
		majority of the people attending public events take home the pest management fact sheets that pertain to their own pest challenges. They are eager to engage in discussion about gardening and using least-toxic chemicals. Staff usually encourages residents to try housekeeping tips, such as vacuuming spiders and spider webs rather than using a spray to exterminate them. Residents want to use non-toxic methods because it is safer for their families and their pets. This face to face interaction with residents at events like Cupertino's Environmental Day in April is an effective method of teaching safer pest control strategies for the home. While there haven't been any recent comments on the Pest Management Plan from Water Board staff, there are new strategies and campaigns that are considered within the Pesticide User Outreach group that keep the work plan current (such as the implementation of the Green Gardener training program for residential landscape maintenance workers).		
MM X.A.1.	Revise work plan to include any continuous improvement items. Report on completion of work plan tasks in Annual Report.	Under the current NPDES permit, the work plan does not appear to need revision; however it will be reevaluated upon adoption of the MRP.	Dependent on MRP adoption	Envt'l Div
MM X.A.1.	Revise work plan to include any additional improvement items. Report on implementation in the Annual Report.	The City implemented a 20% cut in water usage in 4/2009. The city previously watered grounds 5 days a week, and now is watering 4 days a week. The City is doing more aeration to try and help out with this substantial reduction. The reduction in irrigation also reduced the amount of dry weather flow that entered the storm drains.	As of April 2009	Public Works – Streets and Grounds Maintenance Supervisors

City of Cupertino

Pesticide Use Comparison Report
FY 08-09

The following table summarizes the use of specific pesticide products on city property in the fiscal years 07-08 and 08-09.

These totals combine Pesticide Use from all Divisions.

Active Ingredient	**Target Pest**	**On SF List?**	**Locations**	**FY 07-08**	**FY 08-09**
Bayleton	Fungus	Yes	Greens	0	15.3lbs
Dicomba	Weeds	Yes	Golf	21.8 lbs	0
Fipronil:	Ants	Yes	Facilities	.250 lbs	.160 lbs
Fluridone	Weeds	Yes	Golf	.500 lbs	0
Glyphosate (active in *Roundup*)	Weeds	Yes	Various	71.254 lbs	140.218 lbs
Ipridione	Fungus	Yes	Golf	7.200 lbs	0
Isoxaben	Weeds	No	Medians	10.500 lbs	0
Oryzalin (Surflan)	Weeds	No	Medians	57.841 lbs	36.743 lbs
Oxydiazon	Weeds	No	Medians	0	2.6 lbs
PCNB	Snow Mold	No*	Golf	15 lbs	9.0 lbs
Pendimethalin ***(Note 1)***	Weeds	Yes	Parks	24.700 lbs	**116.623 lbs**
Penoxsulam (Sapphire)	Weeds	Yes	Golf		.080 lbs
Triclopr	Weeds	Yes	Parks	6 lbs	4 lbs
Trifuralin	Weeds	No	Parks	.15 lbs	0
Total:				***215.195 lbs***	***324.724 lbs***

- ***Note 1*** *City staff's first attempt to get rid of the Common Groundsel employed the use of Pendimethalin instead of Surflan because it was on the "approved list". However, Common Groundsel was resistant to the Pendimethalin; when Groundsel grew through, City staff had to spray it out with Roundup and Surflan so it wouldn't grow back. Groundsel can grow to be 2 ft. tall. The City attempted to use* <u>*more*</u> *of the "approved" Pendimethalin to correct the problem. This accounts for the increase in pesticide use in '08-'09. When the increased quantity of Pendimethalin did not prevent the Groundsel, Surflan was used. The Groundsel problem did not recur when Surflan was used.*

City of Cupertino

FY 08 - 09 Annual Report

Section 8

Mercury Pollution Prevention

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2008-2009 Annual Report: Mercury Control Program
Cupertino

Program Work Plan Task	Activity	CI Item Source[1]	FY08-09 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
Mercury Control Program						
I. Municipal Use of Mercury-Containing Products						
Goal I. Eliminate all unnecessary municipal use of mercury-containing products and establish proper disposal methods for products that cannot be eliminated.						
I.F	Implement guidelines for mercury reduction	C.9.c	City will continue to implement the Guidelines for Mercury-Containing Products Reduction and Management and Mercury Virtual Elimination Policy.	Guidelines are being implemented on an ongoing basis. Cupertino's Env Prog Mgr is part of the Program's Mercury Pollution Prevention Outreach Ad Hoc Task Group.	Report in 08-09 AR	Public Works
I.F.1	Train staff in Mercury spill cleanup	C.9.c	Train corporation yard staff and facilities maintenance staff in correct procedures to clean up: a. A broken fluorescent lamp b. A broken thermometer or thermostat	The '08-'09 annual Corp Yard staff training was postponed until 8/5/09, it will include a discussion on how to safely clean up a mercury spill. A mercury spill fact sheet with safe cleanup tips was put together by *Environmental Programs* staff in response to a resident that called to report that she had broken a thermometer in the house and was worried about the safety of her small children. The laminated tip sheet for mercury spill cleanup will be presented to corporation yard staff in the annual training meeting. A poster of the cleanup tips will be put in the Service Center office and a binder-sized copy will be provided to include in the corporation yard SWPPP.	Apr. 08	Facilities Mgr in Coordination with Environmental Programs Mgr
I.F.2	Annual survey of mercury-containing products used by city staff.	C.9.c	City staff to annually report on: 1. The number of lamps recycled. 2. Any other Hg-containing product that is used by city staff.	City staff reported the following quantities of universal waste collected from City employees and City facilities. 73- 4ft T8 bulbs, 29-4ft T12 bulbs, 9-3st T8	Report in 08-09 AR	

[1] Place where continuous improvement item identified, either Annual Report, URMP, Work Plan, Review, or Program (task approved by the Management Committee for all co-permittees, if applicable, such as performance standard revisions).

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2008-2009 Annual Report: Mercury Control Program
Cupertino

Program Work Plan Task	Activity	CI Item Source[1]	FY08-09 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
				bulbs, 11-3ft T12 bulbs, 66 compact bulbs, 3-FM12w, 2 F30-T12, 5-F54-T5, 2-F13-T5, 8-F40/30BX, 103 lbs of Alkaline & Ni-Cad batteries, 14 lbs of Li batteries. The bulbs listed above were sent to West Light Supply company for safe disposal. In addition, City maintenance staff took approximately the same quantity of bulbs and batteries (as listed above) to Cupertino's Residential Environmental Recycling Day event on October 18th, where residential universal waste was collected by *AERC*, a permitted universal waste collection company. The City's universal waste was included with the collection of residential waste and the entire disposal cost was paid for by the City. Cupertino's franchised garbage collection company, which hosted the event, did not separate the residential U-waste from the City's. Therefore, the actual numbers of batteries and bulbs properly disposed of during FY 08-09 were significantly higher than what was reported. Environmental Programs staff has asked the maintenance staff to track the City's disposal separately in the future. The following was collected at the 10/08, 1/09 and 4/09 Environmental Days: 9,834 lbs of E-Waste, 27 2ft' lamp bulbs, 1587 4 ft' lamp bulbs, 110 8ft' light bulbs, 218 compact bulbs, 1912 lbs batteries. No additional disposal of mercury containing products was reported.		

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2008-2009 Annual Report: Mercury Control Program
Cupertino

Program Work Plan Task	Activity	CI Item Source[1]	FY08-09 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
MMI	Document completion of tasks	C.9.c	Document completion of tasks in annual reports. Use mercury-containing product reporting guidelines.	1. Cupertino has been implementing a City Council policy requiring the elimination of mercury from controllable sources, since March 2004. 2. City maintenance staff is only using low- or no- mercury bulbs. No mercury switches or relays are being used. 3. City maintenance staff has followed a specific protocol for disposal of fluorescent tubes. They are collected as universal waste and sent to a recycling facility for mercury recovery. 4. Corp yard staff has been trained on the mercury policy and what to do in the case of a mercury spill, or if a fluorescent bulb breaks. 5. Articles were placed in the City's newsletter regarding locations in the community for proper disposal of fluorescent bulbs. 6. A mercury thermometer exchange was held at Cupertino's Fall Festival on 9/13/08 and the City's Earth Day event on 4/19/09. Brochures containing info on proper disposal of fluorescent bulbs were distributed at the event and at City facilities and library; and at other local events. 7. Countywide HHW Program held a collection event at De Anza College on August 23, 2008. See section V.C	Annually, In AR	Public Works

II. Household Hazardous Waste Collection

Goal II. Provide mercury-containing products disposal services through household hazardous waste (HHW) collection programs for residents and small businesses, and encourage use of these programs.

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2008-2009 Annual Report: Mercury Control Program
Cupertino

Program Work Plan Task	Activity	CI Item Source[1]	FY08-09 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
II.B	Provide HHW Program services	C.9.c	Provide mercury-containing products disposal services for residents and small businesses.	The City provides annual funding to the County Household Hazardous Waste Program to ensure that Cupertino residents have regular access to drop-off services for mercury containing items, such as fluorescent lamps, batteries, and thermometers. The City advertizes the Cupertino HHW Event held every August as well as ongoing disposal services of the HHW Program and drop-off sites that are available throughout the City. The City partnered with the its garbage company to offer three Environmental Days throughout the year that allowed residents to drop-off used fluorescent bulbs, batteries and other U-waste and E-waste for recycling (Oct. '08, Jan. '09, and April '09). Throughout FY 09-10 the City will discuss the need for the collection and recycling of mercury containing products to be included in its new solid waste agreement. The City has provided adequate funding to ensure hazardous waste disposal services are available for Cupertino residents since 1992. Over 1,000 customers or 6% of Cupertino households are funded to attend the HHW program. Residents can also drop-off spent fluorescent lamps and thermometers at a number of designated locations in the county.	Ongoing	
II.D	Document products disposed at HHW Program	C.9.c	Implement guidelines for documenting and reporting quantities of mercury-containing products disposed.	This year the HHW Countywide program collected: **104,549 pounds of fluorescent bulbs** from **32 retail drop-off locations**. This represents a 15.8% decrease is	Report in 08-09 AR	Public Works

Program Work Plan Task	Activity	CI Item Source[1]	FY08-09 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
				fluorescent bulbs collected from last year. The decrease in the volume of fluorescent lamps may be explained by the pilot project that started in Nov/December 2007 and ended February 2009. The project was to have the partners pay for recycling cost of compact fluorescent lamps (CFLs) while the HHW Program would continue to pick up and pay for the recycling of fluorescent tubes. The goal was to transition some of the collection and recycling responsibilities to the partners; however, after some time, many of the store partners no longer wanted to participate in the program because of the cost associated with recycling. Some stopped taking the CFLs from residents. As a result, the pilot program ended in February 2009 and the HHW Program continued to pay for the universal wastes collected from recycling partners. The County does not plan to continue the pilot project. The HHW Program collected: **570 lbs of elemental Hg (e.g. thermostats, thermometers)** **113,490 lbs of household batteries** from **66 battery partners**. This represents an increase in battery collection of 13.4% from last year. **497 mercury containing thermometers at 8 thermometer exchange events and 1 drop-off location.** This represents an increase of 34.3% over last year.

				This shows that public participation in proper universal waste disposal is increasing rapidly with awareness. The County doesn't track City-specific data.		
III. Monitoring and Science **Goal III.** Participate in coordinated monitoring efforts to support mercury TMDL development and implementation, including assessment of air pollution sources of mercury and concentrations of mercury in sediment.						
III.A	Financial support for RMP.	C.9.c	Assist Program to continue to provide financial support for the Regional Monitoring Program (RMP). Support the Program's continued participation in the RMP steering committee and technical review committee.	The City provides funding and support for the RMP through Program assessments and review of meeting summaries through the Management Committee.	Ongoing	
III.B	Assist Prgm in support of regional monitoring plan	C.9.c	Assist Program to provide financial and staff support for a coordinated regional plan to collect data for the mercury TMDL, as defined in the RWQCB/BACWA/BASMAA MOU.	The City supported CEP activities (formerly TMDL MOU) via Program staff participation until the Work Group disbanded in 2008. Cupertino continues to support Program staff's participation in regional collaborative projects through BASMAA.	Ongoing	Program and City's Env Progr Mgr
Hg TMDL support	Review proposed EPA amendments that would reduce Hg emissions from cement kilns nationwide.		Cupertino's Environmental Programs Manager attended a community meeting, sponsored by Bay Area Air Quality Management District and the County, to gather information about the environmental impact of a local cement manufacturing plant. A *Mercury News* article posted 6/25/09 by Paul Rogers is provided at the end of this annual report section.	On June 11th Cupertino's Environmental Programs Manager attended a community event in Saratoga and gathered information that would enable concerned residents to take some worthwhile action to limit the amount of mercury generated from a local cement manufacturing plant. On May 6, '09, EPA proposed amendments to the National Emission Standards for Hazardous Air Pollutants from the Portland Cement Manufacturing Industry (74 FR 21136). The proposed	June 2009	Env. Programs Mgr

Cupertino

Program Work Plan Task	Activity	CI Item Source[1]	FY08-09 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
				amendments would reduce emissions of mercury, total hydrocarbons, hydrochloric acid and particulate matter from both new and existing cement kilns, by setting numeric emission limits. BAAQMD staff told the meeting audience that those who are seeking reductions in emissions from the cement plant could send comments to the EPA before the comment period deadline of September 4, 2009. Bay Area Air Quality Management District (BAAQMD) spokesperson emphasized that BAAQMD can only enforce requirements set forth the by the State or federal government. The local Lehigh cement plant is currently in compliance. If the proposed EPA amendment is approved, cement plants nationwide will have to meet tougher requirements. Lehigh reports emitting 236 lbs per year of mercury into the air. An 81% reduction in mercury emissions would result in a limit of 45 lbs per year. A 93% reduction would result in an annual emission of ~ 16.5 lbs per year of mercury.		
V. Public Education and Outreach **Goal V.** Increase awareness of proper disposal of mercury-containing products and available non-mercury containing alternatives. Target audiences include residential, commercial, and industrial users and municipal employees.						
V.A.	Mercury control program outreach activities:	C.9.c	Assist the Program in developing various outreach programs to educate target audiences about proper disposal of mercury-containing products and alternative non-mercury containing	Environmental Programs Manager participates in the Mercury Pollution Prevention Outreach Work Group. Tough new mercury rules loom for Cupertino cement plant

By Paul Rogers Mercury News

Posted: 06/25/2009 05:43:14 AM PDT
Updated: 06/25/2009 10:16:59 AM PDT

Inside of Lehigh Southwest Cement plant on Thursday June, 18 2009 in Cupertino.... (Dai Sugano)

Related Sections

For 70 years, it has sat on Cupertino's western edges, like a vast bite out of the surrounding green foothills.

With a deep limestone quarry and blazing kiln, the Lehigh Southwest Cement Plant has made the cement that built northern California — from Shasta Dam to Highway 101.

But the plant is also one of the Bay Area's largest polluters. And now the hulking facility, along with other cement plants across the nation, is facing a historic crackdown from the U.S. Environmental Protection Agency to reduce everything from mercury to soot emissions.

"The cement industry has flown under the radar for the last 20 years. And they are a major polluter," said Jim Pew, an attorney with Earthjustice, a Washington, D.C., environmental group.

Cement industry leaders call the proposed regulations an unreasonably strict blow during a recession that will drive up the cost of homes, roads and bridges.

"We've just never been faced with a situation where even if we employ the state-of-the-art technology, some of our facilities may not meet the required levels," said Tim Matz, Lehigh's director of environmental affairs.

"If a facility can't meet the levels, it may have to close."

Bay Area air regulators consider emissions to nearby communities from the Cupertino plant to be within accepted health levels. But the new federal standards would help clean up San Francisco Bay and local reservoirs by reducing mercury contamination in fish, and in doing so lowering the risk to anyone who eats fish.

Mercury is the most high-profile pollutant the rules target. A potent neurotoxin and naturally occurring element, mercury can harm kidneys and the nervous system.

One study by the Centers for Disease Control found that eight percent of American women of childbearing age have mercury in their bodies at high enough levels to put their babies at risk of birth defects, loss of IQ and learning disabilities.

And cement kilns are some of America's top mercury polluters.

The Lehigh plant in Cupertino, formerly known as Hanson Permanente, ranks as the second largest emitter of airborne mercury in California, having put 238 pounds into the air in 2007.

The only other cement plant in the region, the Cemex plant near Santa Cruz in Davenport, ranked third, with 163 pounds released in 2007. That plant is temporarily closed due to reduced demand.

In April, the EPA issued sweeping new proposed rules that would require 163 cement kilns nationwide to cut emissions of mercury, along with soot, hydrocarbons, sulfur dioxide and hydrochloric acid by 2013.

The rules would require cement plants to cut mercury emissions by up to 93 percent from current levels, with similar reductions for other pollutants. If the rules are adopted, they will be the first mercury emissions standard ever on the cement industry.

"We're very excited. These rules are historic," said Joyce Eden, a yoga teacher who lives half a mile from the Cupertino plant and has criticized it for years.

Complicating the issue is that nobody knows exactly where the mercury from the Cupertino plant goes. It occurs naturally in high concentrations in Bay Area limestone. The New Almaden mines south of San Jose were the largest mercury mines in North America in the 1800s and helped fuel the Gold Rush because mercury was used to separate gold from ore.

When limestone is burned in the Cupertino plant's kilns at 2,750 degrees, the mercury vaporizes and disperses in the air. Some drifts for miles, and when it rains, some washes into the bay, where it concentrates in fish.

A study in November by the Bay Area Air Quality Management District after measuring emissions from the Cupertino plant's kiln found its pollution levels were so dispersed and so low that they don't require posted risk warnings, let alone further reduction to protect the public from exposure.

Living near the plant and breathing the air every day for 70 years would cause just two extra cases of cancer per 1 million people, the study found. And mercury levels were less than half of what the state considers a risk.

"We found that the level of exposure is safe for the residents who live there. And as pollutants are transported further away from the plant, the concentration decreases," said Brian Bateman, chief of engineering for the air district.

Still, Bateman said he supports the EPA rules because of the impacts on the bay.

State health officials advise pregnant women to eat no more than 1 meal of fish from the bay a month due to the mercury contamination.

Cupertino cement plant managers say they may be able to meet the new mercury standards, but the equipment will cost $40 million or more. The cement industry wants varying standards based on local mercury levels. It says the rules may cause more of America's cement to be imported from China and other countries, increasing worldwide toxic pollution and global warming emissions.

Meanwhile, the EPA has been monitoring air quality at Stevens Creek Elementary School in Cupertino as part of a precautionary nationwide program to measure air pollution around schools near industrial facilities. The EPA is testing the Cupertino school for chromium, a toxic metal found last year in the air around the Davenport plant. But chromium levels from the Cupertino plant have been very low in previous tests, Bateman noted, in large part because the Cupertino plant uses iron ore instead of steel slag, which is high in chromium, like the Davenport plant did.

The final EPA decision on mercury standards is expected by next March.

"This is an industry that has a right to be here. They follow the rules," said Lehigh spokeswoman Sandy James, a former Cupertino mayor. "It's important to the community. The question is: How do we exist together?"

	Street sweeping data	By contract – residential swept twice monthly; downtown every week; arterials and Commercial/industrial areas once weekly. High leaf drop and other noted areas cleaned more frequently and as needed (i.e., construction zones - swept by responsible party).	The City has a contractor that provides street sweeping services on residential and arterial streets. This year the street sweeping contractor collected 1,739 cubic yards of debris from 6,577 curb miles of residential streets, and 874 cubic yards of debris from 2,552 curb miles of commercial and arterial streets. Total annual amount of debris recovered by the sweeper was 2,613 cubic yards. Residents and businesses are also given large recycling receptacles for yard waste as part of the required solid waste service. Yard waste is not allowed in streets but waste from receptacles is picked up weekly. **A total of 7,449 tons of yard waste was recycled**.	Report in 9/09 AR Ongoing	Public Works
CB-11.2	Evaluate Street sweeping and Stormdrain O&M	Evaluate need for improvement of current street sweeping and storm drain system O&M programs (within available budgets).	Street sweeping occurs twice every month and all catch basins are cleaned on a two year rotating basis and during emergencies as needed. With increased need, certain areas of the city have extra sweeping. There isn't a build-up of debris or flooding issues that would indicate the need for increased service. The schedule appears to be effective and is within the available budget. Schedule is noted on the street sweeping map at the City's website:	9/09 AR	Public Works

Pollution Prevention Program

FY 2008-2009 Monthly Record Keeping Form

Year FY 2008/09: (July 2008 – June 30, 2009)

Agency: City of Cupertino

Completed by: Lauren Mende Tacke **Date**: July 13 , 2009

STREET SWEEPING	Volume of material collected (cubic yards)	Miles swept* (curb miles)
1. Sweeping		
Residential Areas:		
Broom	1,739	6,577.2
Regenerative Air		
Vacuum		
Commercial Areas:		
Broom	597	1,744.8
Regenerative Air		
Vacuum		
Industrial Areas:		
Broom		
Regenerative Air		
Vacuum		
Other Areas Swept: (e.g., parking lots, major arterials)		
Broom	277	807.1
Regenerative Air		
Vacuum		
TOTAL	2,613	9,159.1

2. Have there been any changes in your street sweeping program?
(efforts to have parked cars removed, changed sweeping frequency, new equipment, significant downtime, etc.)

LEAF REMOVAL

Volume of leaves removed by City/Town crews: n/a cubic yards

Leaves bagged by residents and picked up by your City/Town: n/a bags

Check box if you have a yard waste collection program: ■ Volume of yard waste collected: **7,448.89** cubic yards

Check box if you do not have a leaf removal program other than routine street sweeping or yard waste collection: ☐

* Report total miles covered by sweepers including areas operated in tandem or repeated.

City of Cupertino Requirements for Fire Sprinkler System Tests & Water Pipe Flushing

Tests for automatic fire sprinkler systems and pipe flushing are prohibited from being discharged directly to the street or the storm drain system as they may contain bacteria and other pollutants such as metals, oil, sediment, or chlorine/chloramines (disinfectants).

To determine the required pollution control measures, dischargers will first use the attached form to collect information on the type of flow; its location; and the approximate quantity, flow rate (gallons per minute), and quality. Then, at least three weeks in advance of testing or flushing, the discharger will discuss this information with the City's Environmental Programs Manager, who may be reached at (408) 777-3242 or cherid@cupertino.org. After the discharge activity is finished, provide the completed form to the Environmental Programs Manager.

A City of Cupertino Stormwater Inspector will be present during discharges to ensure the use of the following control measures, as applicable to the type of flow and the specific site conditions.

1. Discharge to Landscape

Discharge to landscape is the preferred method of water disposal, provided that the water quality will not damage vegetation and the flow velocity and duration will not disturb the landscape or cause sediment to enter the storm drains. If the chlorine concentration of the discharge is >1.5 mg/l, it will need to be treated before it is used for irrigation (see # 6, below).

2. Discharge to Sanitary Sewer

If discharge to landscaping is not feasible, flows may be directed to the sanitary sewer after obtaining a permit from the Cupertino Sanitary District (408-253-7071). It may take a few weeks to obtain a sewer discharge permit, the minimum cost of which starts at approximately $1,200.

3. Collect in Baker Tank

Fire sprinkler and water line flushing water can also be collected in a Baker tank and then, depending on the quality, reused for other purposes such as dust suppression at construction sites or for irrigation.

4. Treat with Filtering System

Another disposal option is to use a mobile filtering system that cleans water on site. The clean water can then be discharged to landscaping, protected storm drains (see Figures 1 and 2), or conserved for other uses.

5. Discharge to Protected Storm Drain

Up to 50,000 gallons of clean, potable water (chlorine concentration <1.5 mg/l) may be directed to a storm drain if all contaminants, including trash, leaves, and sediment, are first removed from the flow path and the receiving drain inlet is protected as shown in Figures 1 and 2, below. Prior to the discharge, inspect the flow path and wipe up any liquid contaminants, such as motor oil or antifreeze. If the flow path is unpaved, ensure that the flow velocity is low enough so that force of the discharge does not cause eroded material to enter the storm drain. Monitor the flow path and receiving inlet during the discharge and adjust the flow rate or inlet protection as necessary. Remove and dispose of all sediment, pollutants, and debris that may have been deposited during discharge.

Figure 1
Drain Inlet Protection

Figure 2
Catch Basin Protection

6. Dechlorination

If the chlorine concentration of the discharge exceeds 1.5 mg/l, the water must be treated to remove the chlorine prior to disposal to the storm drain. Dechlorination is also required if the flow volume exceeds 50,000 gallons.

Chlorine test strips can be used to determine the chlorine concentration. Since discharges could contain chloramine, which is not effectively neutralized with aeration, they must be dechlorinated using chemicals, including but not limited to, sodium thiosulfate, sodium ascorbate, or ascorbic acid. These chemicals are available in tablet and/or liquid form and may be applied with the use of jugs, mats or socks set in the flow path or proprietary nozzles attached to the discharge point. Contact the Environmental Program Manager for more information.

1. Location of Discharge (street address): _____
2. Type of Discharge (ex: fire sprinkler system test, water line flushing, etc): _____
3. Property Owner Name: _____
4. Owner Contact/Phone #: _____
5. Property Management Company (if applicable): _____
6. Management Company Contact/Phone #: _____
7. Contractor Name/Phone # (if applicable): _____
8. Scheduled Date(s) and Start Time(s) of Discharge: _____
9. Estimated Discharge Volume (gallons): _____
10. Estimated Discharge Flow Rate (feet/second): _____
11. Anticipated Pre-Treatment Water Quality (select all that apply):
    - o Potable
    - o Rusty/Sandy/Silty
    - o Stagnant
    - o Super-Chlorinated (>1.5 mg/l chlorine)
    - o Other (describe): _____
12. Discharge Disposal Method (select all that apply):
    - o Direct to landscaping
    - o Sanitary Sewer
    - o Baker Tank
    - o Mobile Filtration Unit
    - o Dechlorination (describe method): _____
    - o Other: _____
13. Best Management Measures Used (select all that apply):
    - o Clean flow path
    - o Drain inlet protection
    - o Post-discharge inlet cleaning
    - o Erosion control: _____
    - o Other (describe): _____

City of Cupertino

FY 08 - 09 Annual Report

Section 10

Trash Inventory and Management

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2008-2009 Annual Report: Trash Management
Cupertino

P.S. Id.	Activity	FY08-09 Tasks	Status / Comments	Due Date	Responsible Party
Trash Inventory and Management					
Trash Work Plan	Trash mgmt practices	Assist Program in implementing Pilot Demonstration Projects, which focuses on assessing control measure effectiveness.	In FY07-08, as part of the City of Sunnyvale's Storm Drain Inlet Capture System Pilot Program, by agreement with Cupertino's Environmental Programs Mgr, Sunnyvale installed and has maintained one S/D capture system in Cupertino at Homestead Rd and Stelling Rd. Sunnyvale reports that the majority of debris collected from the system is leaves.	Report in 9/09 AR Ongoing	Public Works Dept.
Trash Work Plan	Trash mgmt practices	Continue identifying and prioritizing trash problem areas in urban streams and waterways and other potential sources that may contribute trash to those areas. Identification and prioritization should be based on criteria provided by Program staff during FY 06-07.	Trash evaluations were performed on 10/8/08. One site will be removed from the problem list, as no problems have been identified at the site for several years and based on the recommendation of Program staff. In FY 08-09, one site was divided into two different sites as the large area differs significantly in its level of trash. An additional site was also added to the problem list at Calabazas Creek at Creekside Park. This site was evaluated and cleaned 6 times in FY 08-09, including during the National Coastal Cleanup Event (Sept. '08), the National River Cleanup Event (May '09), and a cleanup with Cupertino 8 high school students (Feb. '09). Cupertino held its first volunteer community cleanup event in September 2008 with 74 volunteers. This was a remarkable number of participants, given that this was a first-time event. It confirms the idea that many residents read the *Cupertino Scene (Monthly Newsletter)* and that putting articles in the *Scene* is an effective method of communicating with Cupertino residents. Since there was an	Report in 9/09 AR Ongoing	Public Works Dept.

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2008-2009 Annual Report: Trash Management
Cupertino

P.S. Id.	Activity	FY08-09 Tasks	Status / Comments	Due Date	Responsible Party
			overwhelming response to the City's 2nd Creek Clean Up Event in May 2009, and the event was at full capacity (80 volunteers), staff redirected volunteers to other sites within and outside of Cupertino. Based on the overwhelmingly positive responses to the City Clean Up events, the City is considering holding three cleanup events per year.		
Trash Work Plan	Trash mgmt practices	Identify and continue implementing trash control measures, where practical and feasible, to reduce trash.	City staff performed 10 KAB assessments and 3 RTAs at problem sites in FY 08-09. The level of trash was evaluated and trash and recyclables were collected from the sites. Future management actions were addressed for each site. City staff performed KAB assessments at problem sites, considered improved Mgmt actions and conducted any necessary cleanup.	Report in 9/09 AR	Public Works Dept.
Trash Work Plan	Trash evaluations	Track existing trash management practices to evaluate effectiveness. Selected effectiveness methods will be provided within the technical memorandum entitled Trash Management Effectiveness Strategy, which was developed in late FY 06-07. Effective methods may include using the Program's Urban Rapid Trash Assessment protocol (Version 1.0) and/or the KAB litter index in a subset of high priority trash problem areas.	All problem sites were evaluated in October 2008. One site was recommended for removal from the list and one new site was added to the list. KAB scores ranged from 1 to 3 with 1 indicating a low priority trash problem area and 3 indicating a moderate to high level of trash. Problem sites were given the following scores: four sites=KAB of 1, two sites=KAB of 2, four sites=KAB of 3.	Report in 9/09 AR Ongoing	Public Works Dept.
		Provide Co-permittee specific information on trash management practices implemented in our jurisdiction, using the Program's standardized reporting form entitled Trash Problem Area Activity Report (to be used for Program-wide reporting), as appropriate.	City staff performed KAB trash evaluations and reported results to the Program for all previously identified problem sites.		Public Works Dept.

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2008-2009 Annual Report: Trash Management
Cupertino

P.S. Id.	Activity	FY08-09 Tasks	Status / Comments	Due Date	Responsible Party
Trash Work Plan	Trash evaluations	Submit Urban Rapid Trash Assessment Survey Forms, Trash Item Tally Sheets and any other data collection tool to Program staff, as appropriate.	KAB trash assessment data for Cupertino's trash problem sites were provided to the Program in July 2009. Cupertino performed 3 Urban Rapid Trash Assessments in FY 08-09.	FY 08-09 Ongoing	Public Works Dept.
Trash Work Plan	Trash mgmt practices	Assist Program staff in developing long-term trash management strategy for reducing trash in urban streams and waterways and other potential sources that may contribute trash to those areas.	The Env. Programs Mgr. participates in SCVURPPP's Trash Management Ad Hoc Task Group. Within the group and via MC meetings, long-term trash management strategies are discussed, considered and identified. In FY07-08 San Jose and Sunnyvale installed trash capture systems as a pilot program. Installation of one device in Cupertino was approved. This device is maintained by Sunnyvale and is reviewed at MC meetings to help determine future strategy.	FY 08-09 Ongoing	Public Works Dept.
Trash Work Plan	Trash mgmt practices	Begin implementation of long-term trash management strategy for each high priority watershed defined within the technical memorandum entitled *Prioritization of Trash Problem* (to be completed during FY 06-07). This strategy will be provided within the technical memorandum entitled *Long-Term Trash Management Strategy*, which will be developed during FY 07-08.	In FY 08-09, City's Public Works staff continued to work with Cupertino's Illegal Discharge Inspector on implementation of long-term trash management for existing priority areas. PW staff also conducted field trips and coordinated with Water District staff to identify new priority locations in the Calabazas Creek watershed.	FY 08-09 Ongoing	Public Works Dept.
Trash Work Plan	Trash mgmt practices	Assist Program in developing Trash Fact Sheets, as appropriate.	SCVURPPP's Trash Tool box was developed in FY 07-08. Env Prog Mgr participated in Trash Ad Hoc Task Group where sections of the Tool Box were previewed and comments were provided. In FY 08-09 the Tool Box received an award from CASQA for Outstanding Stormwater BMP Implementation Project. Due to a significant overhaul of the City's website SCVURPPP's Trash Fact Sheet was not	FY 08-09 Ongoing	Public Works Dept.

FY 2008-2009 Annual Report: Trash Management
Cupertino

P.S. Id.	Activity	FY08-09 Tasks	Status / Comments	Due Date	Responsible Party
			added to Cupertino's website until summer of FY 09-10 http://www.cupertino.org/index.aspx?page=152 A small amount of Trash Fact Sheets were distributed at the City Hall, Senior Center, Quinlan Center, and the Library in FY 08-09.		
Trash Work Plan	Trash mgmt practices	Begin to develop strategies to reduce litter pollution from plastic bags through the promotion of reusable bags.	Environmental Prgms. Mgr. met with the Cupertino President of the Chamber of Commerce three times in FY 08-09 to address the plastic bag issue and to promote the use of reusable bags. During these meetings the Top 10 Things That Stores Can Do To Encourage Multiple-Use Carry-out Bags Without a City Ordinance, flyer was developed, which included the following tasks: 1. Encourage Customers to Shop Cupertino where the community is coming together to reduce unnecessary packaging. 2. Ask Customers first, before giving out bags that are not needed and perhaps not wanted, if they would like a bag, as opposed to immediately bagging their products. Encourage customers not to take a bag when they only have a small amount of items. (Checker could explain that this is a community effort to be green). Asking the question, may prompt customers to remember to bring their own bags into the store next time. Or, stores can ask customers if they would like to purchase one of their affordable, reusable bags. 3. Sell bags in the local stores that fold into a pouch and attach to your purse or key chain. Whole Foods and other stores sell these near their checkout lines. These smaller bags are shaped like plastic bags and are conveniently at hand to bag small items which are purchased in between bigger shopping trips. Bags of varying sizes	Ongoing	Public Works Dept.

FY 2008-2009 Annual Report: Trash Management
Cupertino

P.S. Id.	Activity	FY08-09 Tasks	Status / Comments	Due Date	Responsible Party
			should be available for sale throughout the store, including at each checkout aisle and at the back of the store. 4. Put a sign up in a window at the front of the store or a banner on the store to remind customers, before they leave their cars or parking lot, to bring their own bags. 5. Advertise and applaud store efforts to partner with the community on green activities. Advertise that reusable bags are more convenient. They usually fit more, you can carry them on your shoulder, allowing you to carry more bags at once, and you don't have to worry about storing/throwing away plastic bags. 6. If possible, stores may reward customers with a free promotional item, a sample, or a discount on certain products, if they remember to bring their own bags. 7. Put an attractive bin near the front of the store for customers to return their barely-used bags. This bin can also serve to supply customers with used bags, on their way into the store, if they forget to bring their own. Advertise that bags are available for new/returning customers to use. Checker/bagger should tell the customer where they can get these and give them time to collect some. Or, stores should have returned, clean bags available at each checkout aisle. First the checker/bagger should ask the customer if they have their own bags, if they don't, then they should ask if they would be willing to use recycled/returned bags. 8. Encourage people to bring back their clean, barely-used bags and donate them to the bag-loan bin. This promotes the idea that bags have value and should be conserved for a day when they are no longer free. Advertise that collection bins not only take grocery bags but also clean: retail bags, newspaper bags, ziplock bags, paper

Cupertino

P.S. Id.	Activity	FY08-09 Tasks	Status / Comments	Due Date	Responsible Party
			towel/toilet/tissue plastic wrap, bread/produce bags, packaging wrap, etc. 9. If stores are willing, they could help by tracking any decrease in the amount of bags that they need to buy for their customers each month. 10. Add any other actions that might encourage shoppers and businesses to have fun with this. If it starts to gain momentum we can probably get the local newspaper to write about the businesses that are part of the campaign. Store owners will be able to think of better ideas as they consider working with their customers to reduce unnecessary packaging. Pro-active measures do not force anyone to comply, but can turn the effort into a campaign that customers take pride in; one that pulls the local shopping community together. Environmental Programs handed out reusable bags with the City logo at Cupertino's first annual Earth Day, during Earth Week, and upon special request. Staff regularly attends Pub Ed and TAC meetings that include discussions on plastic bag litter issues and programs to promote reusable bags and provides feedback and funding whenever possible.		
	WE&O Outreach	Participate in the WE&O outreach ad hoc group, and two of its subgroups: the Schools outreach group and the IPM group.	Environmental Programs staff participated in these groups in FY 08-09 and will continue to participate in FY09-10.	Ongoing	Public Works Dept.
	WE&O Core Group	Review WMI meeting minutes and materials.	The MC is briefed on WMI meetings and meeting summaries. WMI meeting minutes and materials are distributed by the Program and reviewed by the City's Environmental Programs Manager.	Ongoing	Public Works Dept.

#	Date	Site ID	Watershed	Location	Assessment Tool	Score	Trash Management Activities	Comments
	August 11, 2008	7	Stevens Creek	Calabazas Creek at Creekside Park between Miller Avenue and Estates Drive, close to where Regnart Creek meets Calabazas Creek.	KAB	2	Staff removed small amount of litter and left the remainder for an upcoming City cleanup event. One shopping cart was removed by the City Inspector. 3 carts in creek were reported to SCV Water District, who confirmed they picked them up. Site scheduled for future cleanup events.	Significant amount of trash viewed along creek including bottles, cans, paper, food wrappers, plastic bags, toys, four shopping carts.
	September 20, 2008	7	Stevens Creek	Calabazas Creek at Creekside Park between Miller Avenue and Estates Drive, close to where Regnart Creek meets Calabazas Creek.	KAB	3	300 lbs. of trash and 78 lbs. of recyclables were collected by City Staff and 74 volunteers at National Coastal Cleanup Event. Site to be cleaned again during National River Cleanup Event on 5/16/09. Site will be monitored between cleanup events.	Significant amount of trash collected from 2 miles of the creek. Approximately 2,900 items were removed from the creek and surrounding area.
	October 8, 2008	7	Stevens Creek	Calabazas Creek at Creekside Park off Miller Avenue and Estates Drive, close to where Regnart Creek meets Calabazas Creek.	RTA	108	Staff walked the creek following cleanup event on 9/20/08. Small amount of litter was removed. Additional cleanup events and monitoring will be provided throughout the year.	Eight pieces of litter made from plastic were removed.
	October 8, 2008	1A	Stevens Creek	North Tantau and Vallco Parkway (Finch Ave), vacant lot: private property	KAB	1	Little trash observed. Should continue to monitor and remove trash present. This site is now monitored as two separate sites (CU01A & CU01B).	Very little trash observed.
	October 8, 2008	1B	Stevens Creek	Stevens Creek Blvd. and Tantau. Near VTA bus stop and across the street from Subway and Roasted Coffee Bean	KAB	2	Small amount of trash present. Continue to monitor site during future planned development projects. This site is now monitored as two separate sites (CU01A & CU01B).	Little trash observed. Small, scattered pieces of paper and cigarette butts found.

#	Date	Site ID	Watershed	Location	Assessment Tool	Score	Trash Management Activities	Comments
	October 8, 2008	2	Stevens Creek	Homestead and Mary Ave. adjacent to high school; private property.	KAB	1	Site is not a serious trash problem. Due to new pedestrian bridge at this site, the site will be monitored in 09-10 to see if increased pedestrian and bike traffic creates new litter issues.	No trash observed. No direct access to waterway.
	October 8, 2008	3	Stevens Creek	Disney Lane near Miller at back entrance to Hyde Jr. High, adjacent to track field; private property	KAB	3	Significant amount of litter was collected by staff near school yard - including trash, paper, food and beverage containers. Storm drain is located down the road. Site should be monitored and cleaned yearly.	Large amount of litter collected including 40 food wrappers, 10 beverage containers, 30+ cigarette butts, paper, tissues, condom, string and wire pieces.
	October 8, 2008	4	Stevens Creek	Ann Arbor and Ann Arbor Ct., close to City park; private property	KAB	1	No direct access to waterway. Will discontinue further visits to this site due to several years of little to no trash and recommendation by the Program.	No trash was observed.
	October 8, 2008	5	Stevens Creek	Somerset Park at Stokes and Dempster, owned and maintained by City	KAB	1	No direct access to waterway. Small amount of trash was removed. Site is a park maintained by City staff. Site has been monitored for five years and is no longer a trash problem area. Will monitor once a year and consider accessing area adjacent to site on the railroad tracks where some trash was observable-300-400ft down on Peninsula Ave.	Very small amount of trash was observed including 2 plastic bags and a food wrapper.

#	Date	Site ID	Watershed	Location	Assessment Tool	Score	Trash Management Activities	Comments
	October 8, 2008	6	Stevens Creek	Park Circle East & West, area behind apartments, private property	KAB	3	Staff assessed litter type and cleaned the area. Will continue to monitor this site. Will consider strategies for public outreach to apartment residents, landlords and property managers regarding litter issues at this site.	Fair amount of trash observed along the street including 2 plastic bags, cardboard, 5 food wrappers, styrofoam cup, 7 shopping carts, 15 cigarette butts, 2 tissues, paper and plastic pieces.
	January 7, 2009	7	Stevens Creek	Calabazas Creek at Creekside Park between Miller Avenue and Estates Drive, close to where Regnart Creek meets Calabazas Creek.	RTA	94	Staff identified and collected varying types of litter during the rainy season from the waterway and creek bank (plastic bags entangled in vegetation). Site will be monitored and cleaned regularly.	53 items were collected including 15 plastic bags, 16 plastic pieces (soft and hard), paper, cardboard, food wrappers, glass pieces, and string.
	February 19, 2009	7	Stevens Creek	Calabazas Creek at Creekside Park between Miller Avenue and Estates Drive, close to where Regnart Creek meets Calabazas Creek.	RTA	80	Staff, with 8 Cupertino high school students, identified and collected litter following a week-long rainfall. Site will be monitored and cleaned regularly.	190 items were collected from the creek and surrounding area.
	May 16, 2009	7	Stevens Creek	Calabazas Creek at Creekside Park between Miller Avenue and Estates Drive, close to where Regnart Creek meets Calabazas Creek.	KAB	3	Staff coordinated and participated in the National River Cleanup Event at Calabazas Creek. 80 volunteers were present and approximately 1000 lbs. of trash and 300 lbs. of recycling were collected along 3 miles of the creek. Staff will continue to monitor site and will use this site for future cleanup events.	Approximately 1734 items were collected from the creek and surrounding area including.

Staff Training Summary Table

City of Cupertino
Stormwater Pollution Prevention Program

FY 08-09 Annual Report

Staff Training Summary

Training Event	Date	Participants
Participation in Urban Pesticides Committee: Topics: UP3 Activities; Agency Updates (from DPR, SWRCB Urban monitoring study, BASMAA Our Water Our World, CASQA preview of conference presentation); IPM EcoWise Certified requests for participation; National IPM Certification (Quality Pro Green); statewide survey of pyrethroids in urban waters and pyrethroid revaluation process	9/16/08	Environmental Program Mgr attended the UPC teleconference
Public Works-BMPs for Road Maintenance: Public Works Streets Maintenance staff attended the SCVURPPP Rural Roads BMP Maintenance training.	9/25/08	Eleven City Public Works Streets Maintenance staff attended.
Participation in Trash Summit: Meeting to discuss solutions to trash and litter issues and shift the focus of outreach from cleaning up litter to preventing litter. Group exchanged information on what programs were available and where improvements were needed for the primary litter problems, which were identified as pedestrian, vehicle, waste container management, illegal dumping and encampments.	10/15/08	An Environmental Programs staff member, local city and county government and non-governmental organizations, members of the public.
Construction Site Management Workshop	11/20/08 - 11/21/08	IC/ID Inspector, three staff from the City's Building Inspection Division and five Public Works Department staff.
Annual Pesticide Training: Annual pesticide training for pest control operators for the City.	1/15/09	35 City maintenance employees attended the training.
Participation in Fats, Oils, and Grease Inspections: Meeting to coordinate appropriate response to storm water issues that are discovered during fats, oils, and grease (FOG) inspections.	2/4/09	Cupertino's IC/ID Inspector met with Cupertino Sanitary District's Inspectors (who are also San Jose storm water inspectors).

Training Activities

Training Event	Date	Participants
Annual Drain Inlet Protection BMP class: Annual class for San Jose Water Company's crews.	3/26/09	Env Programs Mgr & the IC/ID Inspector attended San Jose Water Company's BMP Inlet Protection training for SJ Water field staff.
Watershed Monitoring Session: Meeting led by an EOA/SCVURPPP Scientist in Cupertino to discuss strategies for addressing potential impacts to Stevens Creek from the surrounding area. IC/ID Inspector helped to identify dry weather flow sources.	4/30/09	Attendees included reps from Water District, SC County, Sunnyvale, Mountain View, Los Altos, and Cupertino and the Stevens Creek Permanente Watershed Council Director.
Co. Health Dept: IND Annual SC County DEH Restaurant Inspection meeting. Managers met to coordinate reporting, better communication between agencies and to determine any needs for new outreach materials.	5/7/09	DEH Supervisor; Environmental Programs Manager and IC/ID Inspector from City of Cupertino; Program Manager and IC/ID Inspector for the WV Communities; two SC County Supervising Environmental Health Specialists and one Environmental Health Specialist (Inspector).
Public Works staff that apply pesticides: In-house training for licensed pest control applicators.	6/11/09	All City employees who are certified or licensed to apply pesticides.
Park & Rec staff; Golf Course contractor: Pest Mgmt Mtg to review golf course IPM SOPs, permitted pesticides, current pesticides not on the SF list, current management techniques, potential for less-toxic pesticide use, performance standards.	6/11/09	Environmental Programs Manager; Public Works Supervisor for Street Maintenance; Golf Course Superintendent, Parks Supervisor (Community Center); Parks Coordinator (Golf Course).
Public Works: Annual C.3 Workshop. Stormwater Management for New Development and Redevelopment Projects (SCVURPPP)	6/17/09	Environmental Programs Manager, Environmental Programs staff, and an Assistant City Planner. At the request of Cupertino staff, a Civil Engineer from the private sector (Kier and Wright) attended the C.3 workshop. Kier and Wright design storm water treatment facilities for developers of large (C.3 permitted) projects. They had done work in Cupertino.
Building Inspector's Training: Annual Construction Inspection Training Meeting. Review of Cupertino's Industrial and Commercial Inspection goals and a discussion about the possibility of annual IND inspections in the future. Env. Prog. Mgr. provided draft guidance on BMPs for conditionally exempt discharges from fire	6/30/09	Env Programs Mgr, IC/ID Inspector, Env. Programs staff, Building and Construction Inspection staff, Public Works Inspector, SC County Fire Marshall.

Oakland, CA 94612

SUBJECT: CITY OF LOS ALTOS URBAN RUNOFF MANAGEMENT PROGRAM FY 2008-2009 ANNUAL REPORT

Dear Mr. Wolfe:

This report is submitted by the City of Los Altos, in conjunction with the Santa Clara Valley Urban Runoff Pollution Prevention Program's Annual Report, pursuant to provision C.6.a. of the Program's reissued municipal storm water National Pollutant Discharge Elimination System (NPDES) Permit (Order No. 01-024). The report summarizes activities performed during FY 2008-2009 in accordance with the City of Los Altos' Urban Runoff Management Plan (URMP) submitted to the Regional Board on September 1, 1997 and updated in October 2000 and September 2004, and the performance standards contained therein.

Contents of Report

The goals of this Annual Report are to: 1) concisely document implementation of our URMP and FY 08-09 work plan during the past fiscal year; 2) evaluate program results for continuous improvement; and 3) share this information with other Co-permittees, municipal decision-makers, and the public. To accomplish these goals, the City of Los Altos Annual Report contains the following sections:

I. Cover Letter

II. Certification Statement

III. Self-Evaluation and Work Plan Completion Matrix:

- IC/ID Elimination Activities
- Industrial/Commercial Discharger Control Program
- Public Agency Activities
  - i. Public Streets, Roads and Highways Operation and Maintenance
  - ii. Corporation Yard Operation and Maintenance
  - iii. Storm Drain System Operation and Maintenance
- New Development and Redevelopment Planning Procedures
- New Development and Redevelopment Construction Inspection
- Pest Management Activities
- Mercury Pollution Prevention Activities
- Other Water Quality and Watershed Management Requirements
  - i. Trash Management
  - ii. Copper Action Plan
  - iii. Nickel Action Plan
- Public Information/Participation
- Annual Report and Work Plan
- Staff Training

Program Highlights and Accomplishments

During FY 2008-2009 the City of Los Altos continued to implement our Urban Runoff Management Plan (URMP) to the maximum extent practicable. The activities implemented for each element of the City's URMP are described in Chapter 6 of the Santa Clara Valley Urban Runoff Pollution Prevention Program's Urban Runoff Management Plan. Some brief highlights of our many accomplishments during FY 2008/2009 are described below.

The city continues to aggressively inspect all construction sites for proper installation of storm water runoff best management practices. The city is primarily built out, therefore these inspection were conducted at over 200 major remodel/rebuilding construction sites during the last rainy season. The City believes this has the potential to produce the largest amount of contamination to be creeks around the city, therefore much of our limited resources have been directed toward this inspection task. The City informs each of property owners and many of their contractors for these projects initially by letter explaining the necessity of protecting their property from allowing contaminated storm runoff from their property. This letter included detailed suggestions to help prevent erosion of sediments from the site. Prior to the beginning of the rainy season, our inspector visited each one of these sites and reiterated to the contractors what the requirements that city will be expecting to see at their sites. Between mid-October to April, our inspector was able to visit most all

of these sites on a monthly basis, especially those with high priority for potential erosion. During this time, citations were issued for those that did not have proper controls in place. By the end of the rainy season, the City was able to witness properly maintained erosion controls at most all of private construction sites.

State Water Board directed all cities in California to prepare a Sewer Management Plan. The City's plan was complete early last year which was ahead of schedule set by the Board. This Plan is being used by the California Water Environment Association in their statewide training for the development of this plan. Our plan also used as guide by many cities for the preparation of their plan. This main purpose of this plan is to prevent sewer overflows into the various waterways in California.

The City of Los Altos is pleased with its maintenance program and compliance with the control of sources of pollution. The City received an award for having 16 consecutive Clean Bay Business certifications for having its city corporation yard in complete compliance with all point source control. The city continues to follow an extensive training program for its staff dealing with the use of pesticides. The City staff always considers the use of safer type of pesticides including making every effort to use alternatives such as the use of mulches for weed control rather than herbicide.

Over the concern that potentially unused pharmaceuticals were being improperly disposed, the city of Los Altos continues to be one of the few cities in the Bay Area offer a service that a police officer would be available to pick up any unused pharmaceuticals from residents upon request. Also the city's police department offers a drop off point for this material. During the fiscal year, the police department responded to over 70 service calls for pharmaceutical pick ups.

The City is proud on its trash control program. As examples, every Friday city crews conduct trash pickup in the entire downtown area. This is further augmented by the downtown association which conducts occasional trash pickup events with the use of volunteers. The city has a contractor that does trash control at city parks on a daily basis during the summer and on weekends during the winter. City crews pick up trash on Foothill Boulevard routinely and the City's weekend work program also schedules trash pick up as needed.

The City continues to be one of the leaders in the Bay Area in source control at its development or redevelopment sites. The city continues to require the incorporation of site design source controls into all of its projects, regardless of size. During the fiscal year the city required a little less than a 100 new single family rebuilding and remodeling projects to contain their drainage on site by having them make every attempt to incorporated site design measures which require stormwater flow to be directed over landscaped area prior to discharge in the city's streets and not allow any connections to the city's storm drain system. This helped reduce the flow in the city's system as well as treat the storm water on site prior to any discharge.

Continuous Improvement Activities

The City continues to address challenges encountered in implementation of improvements to its Urban Runoff Management Plan with existing staff. Overall, staff believes that the program is being implemented consistently throughout the City and is effective in reducing pollution of the local creeks. The largest challenge facing the City in its effort to comply with the permit, as with other cities, continues to be having only minimal funding and few staff available for this program. Since Los Altos has no storm drain fee, funding for this program must comes from our General Fund. To address this issue, The City has begun a citywide storm drain master plan. As part that master plan, there will funding needs and funding method analysis, including the funding of this program. It is hoped that the city will be able to use these recommendations to develop a funding method for this program. This would appear that this will become more of a challenge with the eventual adoption of the proposed Municipal Regional Permit that will replace the city's current permit.

The city is beginning to see a much bigger effort than originally anticipated to tract evolving number of major private development/redevelopment projects that the city is responsible for tracking, inspecting and enforcing of storm water treatment at the sites. It appears this effect will be further escalated when the proposed Regional Permit is adopted. The city sees this as a major financial challenge that it must face in the near future.

In summary, the City continues to be committed to the implementation of its Urban Runoff Management Plan. This has proven again to be a challenge with limited staffing levels, minimal funding availability and increased work effort to comply with the Program. In the coming year the City will continue to strive to increase its level of effort dedicated to the Santa Clara Valley Urban Runoff Pollution Protection Program.

I welcome your review of this Annual Report and any comments that you might have to offer that would help the City improve the managing of the program. If you have any questions regarding the materials submitted, please contact me at (650) 947-2624

Very truly yours,

Larry Lind
Senior Engineer

Cc. Sue Ma, RWQCB

ILLICIT CONNECTION & ILLEGAL DUMPING ELIMINATION ACTIVITIES

FY 2008-2009 Work Plan Self Evaluation Matrix

Item No.	Activity	FY 08-09 Work Plan Tasks	FY 08-09 Accomplishments	Responsible Party
1	Continue to provide training as required on ICID activities	Los Altos will continue to provide information and training to Engineering, Planning, Building Inspection and Public Safety personnel with a focus on new personnel. Each Department holds regular meetings for which the subject of ICIDs is discussed. Staff will be encouraged to attend formal training as it becomes available.	The City of Los Altos continues to provide training to city staff ICID issues. For example, the city sent personnel to SCVURPPP training workshop, “Construction Site Management Workshops," in November at the Quinlan Center in Cupertino. City personnel learned what to look for during stormwater inspections of commercial and industrial facilities that are under construction.	Community Development & Public Works Department
2	Continue to evaluate and improve response and documentation of illegal dumping activities	Los Altos uses the police department to provide immediate respond to reports of illegal dumping. Their response is also coordinated with the URP Coordinator. These responses would be documented by the officer’s police report.	During the FY the city primarily used the police department to respond to reports of illegal dumping and the Engineering Division inspector or engineer as a backup. The police department maintains documentation of those incidents and the engineering department maintains a master list. During FY 07-08, PD recorded three responses that relate to potential illegal dumping primarily pool dumping. Each of the incidents was properly addressed. The sewer maintenance department continues to respond to sewer overflows. The city has a crew on standby 24 hours a day and therefore can respond to these quickly. During FY 07-08, city crews addressed only eleven sewer overflows, which were properly cleaned up before entering any storm drain systems. During the FY, the city also continued most all construction sites regardless of size to assure they have proper BMPs installed and maintained	Public Works Department

3	Sanitary Sewer System	Los Altos has adopted a new Sewer System Master Plan and has begun the implementation to comply with the States SSMP and to help prevent system overflows	The Sanitary Sewer Master Plan was adopted on 1 August 2005. In 2008 The City completed and adopted its Sewer System Management Plan (SSMP) required by both regional and the State boards. This Plan has been used as a guide for several municipalities as a guide for the preparation of there SSMP. In accordance with the recommendations in the city's Sanitary Sewer Master Plan that was adopted in 2005, the City is designing and has under construction several sewer repair projects. In addition, Los Altos will be awarding the fourth Sewer Root Foaming contract in summer of 2009, which will begin the retreatment of the entire system. This keeps the city on schedule with treatment every three years as recommend by the Master Plan. The City will continue to raise the sewer rates as necessary to fulfill the recommendations of the Master Plan.	Public Works & Community Development Departments
4	FY 2008-2009 Annual Report.	Evaluate IC/ID activities in FY 2008-2009 and explore opportunities to increase program effectiveness in the September 2009 submittal of the Annual Report	See "ICID Program Evaluation" and "ICID Report Data" below.	Public Works Department

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2008-2009 Annual Report

Municipality: City of Los Altos ***Attachment B***

ICID Program Evaluation FY 2008/2009
It seems this program continues to be working very well. More people seem to be aware of the need to prevent illegal discharges from entering the storm drain systems. With a full time inspector, the city was able to better police this issue, including the continued program of attempting to inspect over 200 single-family construction sites in Los Altos. This increase enforcement shows a noticeable improvement in the number of contractors that automatically provide the proper BMPs and also maintain them. Even then without the presence of an inspector, many still do not maintain a properly controlled site. Though the city Police Department still respond to emergencies and address those responses according, most of enforcement responsibility continues to be that of Engineering Division with its full time inspector since many are minor in natural. This continues to allow better follow-up to verify continued compliance and better record keeping and free up the Police to other, more pressing issues. The City of Los Altos continues to implement recommendations from this Sewer Master Plan to minimize overflows. No serious sewer overflow was report during the fiscal year. This Master Plan has placed the city in advanced compliance with the State's and Regional Boards requirement to have a Sewer System Management Plan The city completed this document in 2008, one year a head of schedule though the city has been implementing the recommendation in this plan for well over a year. The city's document has been used by many cities in the state a guide for the preparation of their Management Plan. Though the city still believes it is capable of responding to any event, it continues to struggle with the documentation necessary for any of these incidents. Staff will continue to work with the police department in their documentation and follow-up actions on these incidents.

INDUSTRIAL/COMMERCIAL DISCHARGER CONTROL PROGRAMS

FY 2008-2009 Work Plan Self Evaluation Matrix

Item No.	Activity	FY 08-09 Work Plan Tasks	FY 08-09 Accomplishments	Responsible Party
1	Inspection of Vehicle Service Facilities	Los Altos will continue to coordinate and support the program conducted by the Palo Alto Regional Water Quality Treatment Plant. Palo Alto conducts annual inspections of all vehicle service facilities in Los Altos. The City will document and conduct follow-up on any storm water discharge violations identified in these inspections.	During January 2009 the City of Palo Alto inspected 14 vehicle service facilities in Los Altos. None were found with any violations and all facilities were given the Clean Bay Business award. During the year, there were no other reports on discharges from any of these facilities.	URP Coordinator
2	Inspection of Food Service Facilities	Los Altos will continue to coordinate and support the County of Santa Clara Department of Environmental Health's annual inspections of all 145 food service facilities in the City. The City will document and conduct follow-up on any storm water discharge violations identified in these annual inspections.	During the year Santa Clara County Department of Environmental Health (DEH) conducted 218 individual inspections of 145 food services facilities in Los Altos. . DEH inspects and reports on the storage of oil, grease, illegal washing and garbage, which is usually exterior to the facility. They provide guidance and proper handling and cleanup of those areas. During the FY 08/09, DEH did not report any violation for which they could correct.	URP Coordinator & Code Enforcement Officer

Item No.	Activity	FY 08-09 Work Plan Tasks	FY 08-09 Accomplishments	Responsible Party
3	Inspection of Other Commercial Facilities	Los Altos has very limited Commercial Facilities (and no Industrial facilities), but is prepared to inspect any of the other listed categories of commercial facilities should a complaint be filed and take necessary action if required.	No violations or complaints were filed during the fiscal year.	URP Coordinator & Code Enforcement Officer
4	FY 2008-2009 Annual Report	Evaluate inspection activities in FY 2008-2009, explore opportunities to increase program effectiveness and report results in September 2009 submittal of the Annual Report	See "Industrial/Commercial Program Evaluation" below.	URP Coordinator

Industrial/Commercial Program Evaluation
FY 2008/2009

The incidents under this item continue to be limited and those that do occur are minor. No incidents were reported to the city during the fiscal year. Biggest reason, obviously, is the lack of industrial/commercial facilities in the city. The city could further increase the frequency of the inspections, but it is difficult to justify since there are no reportable violations or potential violations.

1	BMP for street and road operations and maintenance	Los Altos will continue to assure that BMPs are applied at all of its street maintenance operations. Will evaluated its SOP for this maintenance annually and update as deemed necessary.	Crews continue to be trained on utilizing BMP's from the CASQA Stormwater Best Management Practice Handbook for Municipal Operations. For example, for sawcutting and sidewalk grinding, which is a sizable task for city staff, the SOPs include vacuuming up excessive material and slurry before reaching storm drains. City staff did not find any improvements it could make to SOPs during the fiscal year.	Public Works Maintenance Department
2	BMP training	Los Altos will continue to provide training on an as needed basis to its municipal staff in the use of appropriate BMPs. Will provide monthly discussions with maintenance staff on the implementation of BMPs. Staff will be encouraged to attend any formal training if available.	City maintenance crews received a wide range of training during the year. See "Staff Training" list at the end for this report of a list of training attended by the various maintenance staff. In addition, maintenance staff met quarterly during the FY to discuss upcoming programs. At these meetings staff is reminded of the implementation of BMPs required for these programs.	Public Works Department

Municipality: City of Los Altos ***Attachment B***

Public Streets, Roads & Highway O&M Program Evaluation FY 2008/2009
Roads and streets operations follow BMPs for storm water protection. There have been no complaints or incidents of discharge to the storm system due to Street Division operations. Crews completed 173 hours in road shoulder work to ensure proper drainage and spent 347 hours during the fall leaf pickup program in support of the annual street sweeping program. Due to past shoulder activities, the level of effort to ensure proper drainage has decreased. They picked up over 74 cubic yards of leaves during this time, which reduced the load that would have entered the storm drain system. The city plans to continue these programs and will continue to evaluate means for improvements.

Corporation Yard O&M Program Evaluation
FY 2008/2009

During FY 08-09, the Municipal Service Center was awarded its 16th consecutive annual Clean Bay Business Certificate in maintaining the corporation yard. Automotive and shop personnel also passed the Hazardous Material Program compliance inspection by the Santa Clara County Department of Environmental Health. Automotive personnel completed 1491 hours on vehicle maintenance. Crews continue fueling at local gas stations and do not maintain any fueling processes. The five-year-old wash pad has been successful in receiving wastewater and putting it into the sewer system after going through a separator. Regulatory compliance has been maintained in emptying the separator on a quarterly basis and crews continue to utilize of the wash pad for cleaning maintenance equipment. The City continues to exceed compliance with all environmental requirements within its corporation yard.

PUBLIC AGENCY ACTIVITIES
STORM DRAIN SYSTEM O & M
FY 2008-2009 Work Plan Self Evaluation Matrix

Item No.	Activity	FY 08-09 Work Plan Tasks	FY 08-09 Accomplishments	Responsible Party
1	Storm Drain O & M & Training	Los Altos will continue to train staff & implement and improve BMPs and SOP for the storm drain system operation and maintenance activities. Will evaluated its SOP for this maintenance task annually and update as deemed necessary.	Staff followed the guidance in the CASQA Handbook on Municipal Stormwater Best Management Practice for storm drain maintenance. Entire storm drain system was inspected and all catch basins were cleaned where needed. All material was disposed of properly. Maintenance Staff received annual training from the city's URPPP Coordinator. No updates were deemed necessary for the SOPs. Engineering staff anticipates a Storm Drain Master to be established in the near future.	Public Works Department
2	Reporting of Observed ICID Evidence	Los Altos will continue to train and require staff to notify appropriate personnel when incidents or unusual contaminants are observed during routine maintenance. Eventually this information is forwarded to the Police Department where it will be documented and considered for enforcement.	The City of Los Altos continues to provide guidance and training to their staff personnel. During routine maintenance staff training, field crews are instructed on what illegal discharges are and are told to report them to their supervisor or to the city's Code Enforcement Officer for follow-up action.	Public Works Department

3	FY 2008-2009 Annual Report	Evaluate O&M activities in FY 2008-2009, including effectiveness of BMPs, explore opportunities to increase program effectiveness, and report the results in the September 2009 submittal of the Annual Report	See "Storm Drain System O&M Program Evaluation" section below.	URP Coordinator

Storm Drain System O&M Program Evaluation
FY 2008/2009

O&M activities for storm drain maintenance were very successful this year. Crews were able to clean all of the storm drain system prior to the rainy season and we experienced very little storm drain problems during the rainy season. Staff continued to implement the method of cleaning and inspecting the storm drain system through the GIS quadrant system (63 quadrants) instead of our 10 maintenance zones. This method has improved the work schedule and completeness of this operation. Typical storm related drainage problems were in locations where there is no storm drain system.

NEW DEVELOPMENT & REDEVELOPMENT PLANNING PROCEDURES (C.3)

FY 2008-2009 Work Plan Self Evaluation Matrix

Item No.	Activity	FY 08-09 Work Plan Tasks	FY 08-09 Accomplishments	Responsible Party
C.3.b Development Project Approval Process **Goal:** To modify Los Altos' development project approval processes, for both private and public development project, to incorporate the requirement of Provision C.3				
1	C.3 Training	Continue to train Los Altos staff in planning, building, and engineering division on the latest developments of the C.3 provisions and goals. Los Altos staff will attend Program workshops as they become available.	Private Projects: Though projects initially begin within the Planning Department, the Engineering Division continues to deal with verify compliance with the City's NPDES permit. Most "large" projects for the city are primary just rebuilds of single-family residences. The Engineering Division reviewed approximately one hundred forty of these projects during the FY and comments were made to assure that the design provided property source control measures in accordance with the Permit. During the FY Los Altos approved no building plans for significant development/redevelopment projects. But there are two such projects pending. Public Projects: As noted in the Staff Training Summary at the end of this Annual Report, Staff involved in the design and review of all Public Projects, as well as Private Projects, attended all Program sponsored training on C.3. During FY 2008/2009 the City did not implement any significant development/redevelopment public projects and there are not any that are planned in the near future based on the current C3 requirements.	Community Development & Public Works Department

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2008-2009 Annual Report

Municipality: City of Los Altos ***Attachment B***

Item No.	Activity	FY 08-09 Work Plan Tasks	FY 08-09 Accomplishments	Responsible Party
2	Policies, procedures, and/or conditions of approval	Continue to review policies, procedures, and/or conditions of approval to incorporate Group 1 & 2 requirements. Los Altos will modify documents as necessary for Group 1 and Group 2 projects.	Private and Public Projects: The city of Los Altos believes that its policies, procedures and/or conditions of approval are adequate for significant development/redevelopment projects, but the city will continue to review the process and make adjustment as necessary.	Community Development & Public Works Department
C.3.e. Operation and Maintenance of Treatment BMPs **Goal:** To develop and implement local agency operation and maintenance (O&M) verification programs to help ensure the proper maintenance of stormwater treatment measures on public and private property.				
1	Group 1 and 2 project BMPs.	Continue to evaluate procedure for logging information about treatment BMPs installed at any approved Group 1 and Group 2 projects, and for maintaining a list or database of properties, treatment BMPs, and responsible operators.	During the FY Los Altos approved no building plans for significant development/redevelopment projects. But there are two such projects pending. The Engineering Division continues to document the information necessary for these projects. This also includes all necessary inspections and annual reporting.	Community Development & Public Works Department
2	O&M Agreement	Los Altos will review its O&M agreement language as projects become available. Los Altos will review the procedures and documents and make improvements as deem necessary.	During the FY Los Altos approved no building plans for development/redevelopment projects. But there are two such projects pending. The City approved the final construction of the condominium project at 4400 El Camino Real and received an executed and recorded maintenance agreement for the maintenance of the storm water treatment devices that were installed during construction. The City of Los Altos will continue to evaluate existing and any new agreements and make improvements as determined necessary.	Community Development & URP Coordinator

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2008-2009 Annual Report

Municipality: City of Los Altos ***Attachment B***

Item No.	Activity	FY 08-09 Work Plan Tasks	FY 08-09 Accomplishments	Responsible Party
3.	Group 1 and Group 2 project BMP O&M verification inspection.	Inspect Group 1 and Group 2 projects for treatment BMPs O&M verification. Currently the City of Los Altos will conduct O&M verifications of treatment measures all Group 1 and Group 2 projects at least annually	During FY 2008-2009 the City of Los Altos did not conduct a BMP verification inspection at its only significant development/redevelopment projects since it had been inspected during the previous year.	Community Development & URP Coordinator
4	Evaluate and report on the City of Los Altos' Treatment BMPs Operation and Maintenance Verification program	Report on the evaluation of the treatment BMPs O&M verification program conducted during FY 2008-2009 in the September 2009 submittal of the Annual Report, including organizational structure, evaluation of effectiveness, and planned improvement to the program. Include a list or summary of treatment BMPs inspected during the year, inspection results, and any required follow-up and correction. A report on the City of Los Altos' Treatment BMPs Operation and Maintenance Verification program will be included in the Annual Report for those projects that exist.	For further information on the organization structure on the operation and maintenance verification program see pages 16 and 17 of the City of Los Altos 2003/2004 Annual Report. During FY 2008-2009 the City of Los Altos did not conduct a BMP verification inspection at its only significant development/redevelopment projects since it had been inspected during the previous year.	Community Development & URP Coordinator
C.3.f. Hydromodification Management Plan **Goal:** To manage increases in runoff peak flow and volume for Group 1 projects, where such increases may cause increased erosion of creek beds and banks or related impact, through implementation of a hydromodification management plan (HMP)				
1	Hydromodification Management Plan (HMP)	Continue to implementation of HMP requirements for Group 1 and Group 2 projects that may cause increased erosion or other related impacts. Los Altos will implement HMP as required.	Based on the requirements established in city ordinance regarding implementing the requirements of the HMP, the city had no projects that must implement any hydromodification management.	URP Coordinator

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2008-2009 Annual Report

Municipality: City of Los Altos ***Attachment B***

Item No.	Activity	FY 08-09 Work Plan Tasks	FY 08-09 Accomplishments	Responsible Party
C.3.g. Waiver and Compensatory Mitigation Program **Goal:** Establish a program under which a project proponent may request a waiver from treatment BMP requirements due to impracticability, with a provision to provide an equivalent water quality benefit to the same receiving water (that allows participation in regional solutions)				
1	Local waiver program.	Continue to evaluate the need for a local waiver program. Los Altos is not anticipating the need for any waiver requests.	The Program has not made substantive progress on waivers but the city had no need during FY 08/09 for a waiver project and is available to provide assistance as required.	URP Coordinator
C.3.h. Alternative Certification of Stormwater Treatment Measures **Goal:** Establish a procedure for a signed certification form a Civil Engineer or a Licensed Architect of Landscape Architect that project plans meet the requirement set forth in Provisions C.3.d and C.3.f.				
1	Alternative Certification of Stormwater Treatment Measures	In lieu of conducting a detailed review to verify the adequacy of the measures required pursuant to Provisions C.3.d and C.3.f, the City of Los Altos will continue to accept a signed statement from a Civil Engineer or a Licensed Architect or Landscape Architect registered in the State of California that the project plans meet the criteria established by the Permit	After dealing with its second significant development/redevelopment project, the City of Los Altos is still evaluating plans to set up a fee structure that will require a developer to pay for a city consultant to certify their designs. When the building plans are submitted, the City requires a submittal of what is called a Storm Water Management Plan stamped by a registered engineer. This Plan explains what BMPs, along with other control measures, that are being proposed in the design plans, why they are being proposed and all the necessary calculations to support the design. The city will have the developer provide a third party review of this plan.	Community Development & URP Coordinator

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2008-2009 Annual Report

Municipality: City of Los Altos ***Attachment B***

Item No.	Activity	FY 08-09 Work Plan Tasks	FY 08-09 Accomplishments	Responsible Party
2	Certified Projects	Maintain a list of those new projects during the FY approved by someone other that the City of Los Altos staff and report the results in the September 2009 submittal of the Annual Report	The city does maintain a list, but did not have any new building plans for significant development/redevelopment projects. But there are two such projects pending.	URP Coordinator
C.3.j. Site Design Measures Guidance and Standards Development **Goal:** To incorporate site design measures that reduce water quality impacts into local design standards and encourage their use in project designs so as to meet the requirements of C.3				
1	Existing local design standards and guidance.	Continue to review existing local design standards and guidance. Incorporate any revised standards and guidance into local project approval process and "fully implement" the revised standards and guidance and report the results in the September 2009 submittal of the Annual Report	See the "Site Design Measures Guidance and Standards Development Action Summary" that follows.	Community Development, Public Works Department & URP Coordinator

FY 2008-2009 Annual Report

Municipality: City of Los Altos ***Attachment B***

Item No.	Activity	FY 08-09 Work Plan Tasks	FY 08-09 Accomplishments	Responsible Party
C.3.k. Source Control Measures **Goal:** Require source control measures for new redevelopment projects to limit pollutant generation, discharge and runoff to the maximum extent practicable.				
1	Source Control Measures.	Los Altos will continue to implementation of source control measures. Los Altos will continue to implement source control regardless of the size of the project to the maximum extent practicable	Private Projects: The City of Los Altos continues to implement source control as delineated in its 2004 Urban Runoff Management Plan in all development projects, regardless of size. Since the city is primary built-out residential community, there we no new significant development/redevelopment project permits issued during the FY. Public Projects: During the time frame between July 1, 2008 and June 30, 2009 the city of Los Altos awarded 13 small construction projects. None of these projects fell under the definition of a significant development/redevelopment project. Other than construction BPMs that were applied, these projects did not allow any opportunity to apply such things as source control, etc. However, Los Altos will continue to evaluate Planning Procedures Performance Standard and will implement source control measures on public projects as necessary.	Community Development, Public Works Department & URP Coordinator

Item No.	Activity	FY 08-09 Work Plan Tasks	FY 08-09 Accomplishments	Responsible Party
C.3.m. Water Quality Review Processes				
Goal: To ensure that water quality impacts and appropriate mitigation measures are identified as part of environmental review of proposed projects.				
1	CEQA checklists and other environmental review documents	Continue to review CEQA checklists and other environmental review documents and modify documents as needed.	The City of Los Altos' current checklist sufficiently addresses water quality impacts for significant development/redevelopment projects.	Community Development
C.3.n. Reporting Requirements				
Goal: To meet the Provision C.3. reporting requirements, and plan for anticipated data needs, and begin collecting and tracking required data on development projects as needed.				
1	Group 1 and Group 2 projects.	Continue to collect and report information on all Group 1 and Group 2 projects in accordance with the reporting forms parts 1 and 2 in the City of Los Altos Planning Procedures Performance Standard.	See "New Development-Planning Procedures Report Data" that follows.	URP Coordinator
2	Pesticide reduction measures for Group 1 and Group 2 projects in the City of Los Altos	Continue to collect and report (including percentage projects for which pesticide reduction measures were required) information on pesticide reduction measures required all Group 1 and Group 2 projects in the City of Los Altos.	See "New Development-Planning Procedures Report Data" that follows.	Community Development, Public Works Department
3	FY 2008-2009 Annual Report.	Evaluate C.3 activities in FY 2008-2009, explore opportunities to increase program effectiveness and record results in the September 2009 submittal of the Annual Report	See "New Development-Planning Procedures Program Evaluation" that follows	Community Development, Public Works Department & URP Coordinator

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2008-2009 Annual Report

Municipality: City of Los Altos ***Attachment B***

New Development-Planning Procedures Program Evaluation
FY 2008/2009

Public Projects: During the time frame between July 1, 2008 and June 30, 2009 the city of Los Altos awarded thirteen small construction projects. None of these projects fell under the definition significant development/redevelopment projects. All projects dealt with some kind of repair to facilities. Other than construction BPMs that were applied, these projects did not allow any opportunity to apply such things as source control, etc. However, the City of Los Altos continues to review all public projects with respect to all C.3 requirements. Due to lack of large projects, the city is unable to really evaluate the program as it relates to public projects.

Private Projects: During the time frame between July 1, 2008 and June 30, 2009 the City of Los Altos approved no building plans for significant development/redevelopment projects. But there are two such projects pending. .As in the past, the City of Los Altos continues to work with all applicants to limit the amount of storm water runoff from private property. Most developers are familiar with these city requirements and the design to retain storm water on site for land disposal is now shown on most designs that are submitted for approval. Though this program has been in effect for some time, it is nearly impossible to measure the impact on the flows in the city storm drain system due to very limited projects.

Regional Board Comments on New Development-Planning Procedures in FY 2007-2009 Annual Report

Site Design Measures Guidance and Standards Development Action Summary			
Site Design Question	**Proposed Action (9/15/03)**	**Personnel Involved in the Discussion**	**Summary of Action Taken (6/30/09)**
Policies to Limit Site Impervious and Incorporate Post-Construction BMPs into Development Projects			
1. Is the minimum sidewalk width allowed in the community 4 feet or less?	The City of Los Altos has very minimum sidewalks throughout the city. The City standard width is 4 feet unless it can be justified otherwise through usage calculations or to match existing adjacent walkways. Less width would affect ADA requirements. Since Los Altos is built out and will not have any large development, it is anticipated that there is no need to put this in writing.	Public Works (Engineering) & Community Development (Planning)	During FY 08/09 the City of Los Altos had no new concrete sidewalks installed. This is because the city is mainly built out and the residents are also resistant to their installation. Los Altos plans to continue to evaluate new sidewalks on a case-by-case basis and provide directions in the form of the conditions of approval. Los Altos has also document the minimum width in their Standard Plans and Specification, which is currently being developed by a consultant for the city.
2. Are sidewalks generally sloped so they drain to the front yard or park strip rather than the street?	The City of Los Altos will work with the Program as appropriate. Los Altos will require that sidewalks drain to a soil area on a case-to-case basis. Since Los Altos is built out, and will not have any large development, it is anticipated that most sidewalks will remain as currently constructed.	Public Works (Engineering) & Community Development (Planning)	During FY 08/09 the City of Los Altos had no new concrete sidewalks installed. Los Altos will continue to evaluate new sidewalks on a case-by-case basis for drainage and provide directions in the form of the conditions of approval
3. Are the use of benign roof materials promoted?	Through the design review process, the City reviews building materials, including roof materials, and encourages the use of benign roofing materials such as wood shake or tile. The City has required that project sponsors change roofing materials and/or colors to lessen impacts. During this FY the city will adopt an ordinance to prohibiting copper in roofing systems similar to Palo Alto's ordinance	Community Development (Planning) & Public Works (Engineering)	The City of Los Altos is still evaluating the need for an ordinance prohibiting copper roofing systems. Los Altos feels this can be done without an ordinance and will try and discourage applicants from using copper on their projects. With the cities policy of not allowing direct discharges to the storm drain system has minimize the impact of copper discharges.

Site Design Measures Guidance and Standards Development Action Summary (Cont.)			
Site Design Question	**Proposed Action (9/15/03)**	**Personnel Involved in the Discussion**	**Summary of Action Taken (6/30/09)**
4. Does the community encourage inclusion of turf play yards or courtyards that also serve as infiltration areas or overflow parking areas?	Yes, they are encouraged on a case-by-case basis, when large projects are proposed. City has copies of BASMAA's Start at the Source to help encourage such ideas. City of Los Altos will provide a link on local website to SCVURPPP and/ BASMAA website containing electronic copy of BASMAA's Start at the Source.	Public Works (Engineering) & Community Development (Planning)	The City of Los Altos continues to maintain a link on its website to SCVURPPP website containing electronic copy of BASMAA's Start at the Source
5. Is the minimum radius allowed for cul-de-sacs less than 35 feet?	Since Los Altos does not expect to have many, if any, new cul-de-sacs, Los Altos plans to take each on a case-by-case basis and provide the minimum radius agreed upon by the appropriate agencies. Los Altos will also continue to work with the program and other jurisdictions regarding this matter. Will review matter with the Santa Clara County Fire Department for their input	Public Works (Engineering)	During FY 08/09 the City of Los Altos had only one new cul-de-sac installed mainly because the city is built out. To provide the smallest cul-de sac to meet the needs of the city, this location was carefully evaluated by Engineering and Planning. Los Altos will continue to evaluate any new cul-de-sac on a case-by-case basis for requiring a minimum radius as part of the conditions of approval.
6. Are there established design criteria or guidance for swales that can provide stormwater quality treatment (i.e., dry ponds, biofilters, or grass swales)?	City of Los Altos will consider revising the current version of its municipal code this FY by removing the prohibition for the use of reservoirs and simply stating that the device will be subject to approval by the City Engineer to insure flexibility. City of Los Altos will consider any treatment BMP presented in the handbooks on a case-by-case basis.	Public Works (Engineering)	City of Los Altos has not revised its municipal code, but still plans to do so.

FY 2008-2009 Annual Report

Municipality: City of Los Altos ***Attachment B***

Site Design Measures Guidance and Standards Development Action Summary (Cont.)			
Site Design Question	**Proposed Action (9/15/03)**	**Personnel Involved in the Discussion**	**Summary of Action Taken (6/30/09)**
7. Are model shared parking agreements provided?	The City does not have a model shared parking agreement, but it currently has an existing parking agreement with a local restaurant. Also the City does have a mechanism to allow cooperatively operated parking facilities. The agreements are reviewed on a case-by-case basis by staff and the City Attorney. Also, the City has allowed a business to rent parking spaces in the public parking plaza during the evening to help satisfy their parking requirement.	Public Works (Engineering) & Community Development (Planning)	No further action was required. During FY 08/09 there were no cases where parking agreements became an issue.
8. If mass transit is provided nearby, is the parking ratio reduced?	All multi-family and mixed-use projects are required to provide affordable housing. The City grants development incentives for all projects with affordable housing. Incentives can include a reduction in the amount of parking. When considering a reduction in parking, proximity to mass transit would be a primary consideration	Community Development (Planning)	During FY 08/09 the city did not have any multi-family or mixed-use projects. Completed a Condominium project at 4400 El Camino Real. Of the 78 units, 7 were offered affordable housing with some incentives.
9. Is the minimum driveway width specified in the community 9 feet or less (one lane) or 18 feet (two lanes)?	The driveway widths in certain residential districts and commercially operated public parking facilities can be reduced subject to approval of an alternative design by the architectural and site control committee. The City prefers this approach rather than changing the standards because it allows flexibility and it allows the City to determine the appropriate width based on site conditions.	Community Development (Planning)	During FY 08/09 there were no cases where driveway width really became an issue.

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2008-2009 Annual Report

Site Design Measures Guidance and Standards Development Action Summary (Cont.)			
Site Design Question	**Proposed Action (9/15/03)**	**Personnel Involved in the Discussion**	**Summary of Action Taken (6/30/09)**
Drainage Design Requirements			
1. Does the municipality promote limiting runoff to pre-development levels (e.g. through detention or retention, limits on impervious surface area, etc.)?	The City of Los Altos plans to adopt an ordinance to require developer to comply with Provision C.3 of the NPDES permit, which would limit runoff to pre-development level. As a matter of conditions of approval, Los Altos requires limiting runoff from single-family redevelopment not covered by the permit. It is anticipated that this ordinance will be enacted prior to the implementation of the C3 provisions in Oct 2003.	Public Works (Engineering) & Community Development (Planning)	The City of Los Altos has adopted an ordinance that requires developers to comply with Provision C.3 of the NPDES permit limiting runoff to pre-development levels. The City of Los Altos also continues to limit runoff on all of its projects, regardless of size by preventing any runoff from all new construction sites to maximum extent practicable.
2. Are there design criteria for stormwater best management practices?	Will review and implement procedures on a case by case basis for projects as they become available like implementing appropriate best management practices shown in the New Development and Redevelopment handbook by CSQA as a matter of conditions of approval.	Public Works (Engineering) & Community Development (Planning)	The City of Los Altos continues to use those BMPs that are defined in California Stormwater Quality Association *Stormwater Best Management Practice Handbook for New Development and Redevelopment*.
Natural Resource Protection/Restoration			
1. Is the minimum buffer width (from top of bank) 75 feet or more in a stream buffer ordinance/policy/guidelines?	The City works with the Santa Clara Valley Water District, and when necessary requires a biotic study, to determine the appropriate buffer for projects adjacent to a creek. Most of the lots in Los Altos adjacent to the creek are residential. Requiring a 75-foot buffer from top of bank is not practical in most cases, as it would render most lots unusable.	Community Development (Planning)	The City of Los Altos adopted the provisions of the Water Resources Protection Collaborative and will issue permits based on the requirements of Santa Clara Valley Water District.

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2008-2009 Annual Report

Municipality: City of Los Altos ***Attachment B***

Site Design Measures Guidance and Standards Development Action Summary (Cont.)			
Site Design Question	**Proposed Action (9/15/03)**	**Personnel Involved in the Discussion**	**Summary of Action Taken (6/30/09)**
2. Does the stream buffer ordinance specify enforcement and education mechanisms?	The City's Environmental Committee continues to discuss appropriate creek protection measures and ways to educate the public. Will obtain and include information from the Marin County Stormwater Pollution Prevention Program efforts on creek side approaches.	Community Development (Planning)	The City of Los Altos adopted the provisions of the Water Resources Protection Collaborative and will issue permits based on the requirements of Santa Clara Valley Water District.
3. Is land conservation, impervious cover reduction, or other types of water quality protection a major goal or objective to the open space design guidance?	City staff understands the importance of water quality protection and makes sure impacts are evaluated and appropriate protection measures are included in project approvals as a long-standing city policy on source control. The City adopted a new General Plan in November 2002. This document and current development policies encourages the conservation of natural features	Community Development (Planning)	The City continues to follow its General Plan.
4. Are flexible site design criteria available for developers that preserve open space and utilize cluster design options (e.g., setbacks, road widths, lot sizes)?	The City's approach is to consider road width modifications on a case-by-case basis to determine the appropriate width for the specific site being developed. All new residential streets in the City of Los Altos will be 10 minimum lane widths.	Public Works (Engineering)	There were no new streets being proposed during FY 08/09.

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2008-2009 Annual Report

Municipality: City of Los Altos ***Attachment B***

Site Design Measures Guidance and Standards Development Action Summary (Cont.)			
Site Design Question	**Proposed Action (9/15/03)**	**Personnel Involved in the Discussion**	**Summary of Action Taken (6/30/09)**
5. Are open space areas encouraged to be consolidated into larger units?	It is City policy to encourage protection of creeks, creek side area and riparian habitat in their natural state while ensuring public safety and preserving valuable natural resources. For example, the City has plans for a bike path along the Hetch-Hetchy right-of-way in conjunction with the development of the Resident Inn/Office Complex on El Camino Real.	Community Development (Planning)	City of Los Altos continues to follow its policy.
6. Does a minimum percentage of open space near sensitive areas have to be managed in a natural condition?	The City continues to work with the Santa Clara Valley Water District and other appropriate agencies to establish buffers near sensitive areas. The appropriate buffer varies based on site conditions. Based on the recommendation of the Santa Clara Valley Water District and a biotic assessment, the City recently required a 25 foot buffer as a condition of approval for a subdivision abutting a creek. The width of the buffer was based on the needs of the site. We prefer this approach to establishing a minimum percentage that may or may not be appropriate for a site. .	Community Development (Planning)	The City of Los Altos adopted the provisions of the Water Resources Protection Collaborative and will issue permits based on the requirements of Santa Clara Valley Water District.
7. Does the community encourage minimization of impervious surface areas in recreational open space areas?	The newly adopted General Plan includes policy language that encourages the minimization of impervious surface areas. This policy and requirements in the conditions of approval works well for the City and at this time no additional guidance or policy language is deemed necessary. However, the City will continue to evaluate if addition policy language would be beneficial.	Community Development (Planning)	The City of Los Altos continues to enforce the policy from the General Plan.

Municipality: City of Los Altos ***Attachment B***

Site Design Measures Guidance and Standards Development Action Summary (Cont.)			
Site Design Question	**Proposed Action (9/15/03)**	**Personnel Involved in the Discussion**	**Summary of Action Taken (6/30/09)**
8. Does your municipality encourage distinct low-impervious buffers between cities (e.g., greenbelts, open space, wild land corridors, and agricultural areas)?	Given the existing built out environment of the city and the continual housing needs pressure, this is not really practical to create low-impervious buffers between the cities. The westerly and southwesterly border between Palo Alto, Los Altos Hills and the County is Adobe Creek, and on the easterly border with Sunnyvale is Steven Creek which in itself already serves as a pervious buffer.	Community Development (Planning)	No further action was required.
9. Is there flexibility to meet regulatory or conservation restrictions (density compensations, buffer averaging, transferable development rights, off-site mitigation) offered to developers?	The City recently updated the General Plan. The policies in the General Plan were evaluated and determined to be appropriate for Los Altos.	Community Development (Planning)	The City of Los Altos continues to enforce policies in the General Plan

Site Design Question	**Proposed Action (9/15/03)**	**Personnel Involved in the Discussion**	**Summary of Action Taken (6/30/09)**
Policies to Limit Auto Use/Promote Alternative Transportation			
1. Does the municipality promote comprehensive pedestrian and bike trail corridors through a well-connected network of streets and pathways?	The City of Los Altos completed a citywide Bicycle Transportation Plan (BTP) in February 2002. The City meets monthly with its Bicycle/Pedestrian Advisory Committee (BPAC) to discuss means to pursue the goals of this Plan and also to improve pedestrian access within the City and into adjacent communities.	Public Works (Engineering)	The City of Los Altos continues to pursue the goals of the Plan with the BPAC, which is a subcommittee of the city's Traffic Commission that was established by City Council. For example, The BPAC is assisting a joint four-city team that is evaluating the feasibility study to connect the Stevens Creek Trail between Mountain View and Cupertino. City Council also appropriated funds in FY 08/09 to update the BTP.
2. Does the municipality promote neighborhood greenbelts with walkways and bike paths?	The City continues to seek opportunities for bikeways and pathways. The City recently awarded a contract as part of the safe routes to school program to install bike improvements along Berry Avenue. Also, the city has obtained easements along the Hetch-Hetchy right-of-way to use the area for a bike path. As opportunities arise, the City will continue to obtain easements in order to complete this plan for the Hetch-Hetchy.	Public Works (Engineering) & Community Development (Planning)	The City continues to seek opportunities for bikeways and pathways. For example, during FY 08/09 the city awarded a construction contract to improve and provide a safer route to school for children.
3. Do street standards promote street layouts that reduce overall impervious surface area and/or trip length?	The City Council was concerned that many of the streets in Los Altos that did not have curb and gutters were becoming too wide because the residence were allowed to paved their shoulders. Therefore in November 2001 they passed a shoulder paving policy that restricts the width of the street plus the paved shoulders not to exceed 19 feet from the street centerline and also requires new street trees in the shoulder area as part of any new work. It was hoped that this would promote landscaping further out toward the edge of the streets into the public right of way.	Public Works (Engineering) & Community Development (Planning)	The City of Los Altos continues to enforce the Shoulder Paving Policy, which was updated by City Council in FY 08/09.

NEW DEVELOPMENT & REDEVELOPMENT CONSTRUCTION INSPECTION

FY 2008-2009 Work Plan Self Evaluation Matrix

Item No.	Activity	FY 08-09 Work Plan Tasks	FY 08-09 Accomplishments	Responsible Party
1	Construction Site Inspections	Los Altos will continue to review and revise SOPs and the City's legal authority related violations as required, as well as conduct and enforce construction site inspections, and identify continuous improvements. Public projects contain contractual provision requiring the use of BMPs. Los Altos will continue to enforce and improve these provisions if determined necessary.	Public Projects: During the time frame during FY 08/09 the city of Los Altos awarded thirteen small construction projects. Projects dealt with some kind of repair or maintenance. Of these, only three were under construction during the raining season. Therefore the city had no problem assuring that all proper construction BMPs were in place and properly maintained. Private Projects: During FY 08/09 the city continued to inspect all construction projects, regardless of size even though this exceeds that required by the permit. Though it is impossible to visit all location on a regular basis, the city feels that due to the large number of rebuilds in the city that this equates to a rather large development and therefore they all should install and maintain some degree of construction BMPs.	Community Development & Public Works Department

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2008-2009 Annual Report

Municipality: City of Los Altos ***Attachment B***

Item No.	Activity	FY 08-09 Work Plan Tasks	FY 08-09 Accomplishments	Responsible Party
2	Construction BMPs and Control Measures	Los Altos will continue to implement BMPs and other storm water requirements developed through the application process. For Public projects, the contract documents will include the necessary BMPs and control measures applicable for each specific project.	Public Projects: During the time frame during FY 08/09 the city of Los Altos awarded thirteen small construction projects. Projects dealt with some kind of repair or maintenance. Of these, only three were under construction during the raining season. Therefore the city had no problem assuring that all proper construction BMPs were in place and properly maintained. The City of Los Altos feels that its current practice is sufficient, but will continue to review this process. Private Projects: Plans of major remodels and rebuilds submitted to the Community Development Department for permitting were reviewed by the Engineering Division. Though none of these projects approved during FY 08/09 were determined to have the potential for significant erosion from construction activities, the City still assures that all applicable construction BMPs and Control Measures requirements are being included in the project plans. Prior to the rainy season, the property owners for each of the projects under construction in the city were sent a letter providing each with details of the primary BMPs that were expected to be installed at each location to protect erosion of sediments from their construction site and also informing them that city inspections would be conducted during the rainy systems to assure they are properly installed and maintained. This letter indicated that a citation would be issued for those construction sites that did not install and properly maintain these BMPs. City continued attempting to inspect all construction projects, regardless of size even though this exceeds that required by the permit.	Community Development & Public Works Department

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2008-2009 Annual Report

Municipality: City of Los Altos ***Attachment B***

Item No.	Activity	FY 08-09 Work Plan Tasks	FY 08-09 Accomplishments	Responsible Party
3	Rainy Season Construction Inspections	Los Altos will continue to conduct construction site inspections for adequacy of storm water quality control measures. The sites will be those that have an active permit from the building department and construction at public facilities. Continue to conduct monthly inspections at these sites during wet season. In addition, Los Altos will continue to inspect each site prior to the beginning of the wet season to assure all have adequate storm water quality control measures.	Public Projects: During the time frame during FY 07/08 the city of Los Altos awarded thirteen small construction projects. Projects dealt with some kind of repair or maintenance. Of these, only three were under construction during the raining season. Therefore the city had no problem assuring that all proper construction BMPs were in place and properly maintained Private Projects: The City of Los Altos developed a list of over 200 construction projects that had any kind of site work. Except for three, all projects were single-family major remodels or rebuilds. Though none of these projects approved during FY 08/09 were determined to have the potential for significant erosion from construction activities, the City still assures that all applicable construction BMPs and Control Measures requirements are being included in the project plans. And prior to the rainy season, the property owner for each of the projects under construction in the city were sent a letter providing each with details of the primary BMPs that were expected to be installed at each location to protect erosion of sediments from their construction site and also informing them that city inspections would be conducted during the rainy systems to assure they are properly installed and maintained. This letter indicated that a citation would be issued for those construction sites that did not install and properly maintain these BMPs	Community Development & Public Works Department
4	Staff Training and Educational Material Library.	Los Altos will continue to require inspectors to attend annual workshops and training, as well as providing internal training prior to each rainy season.	Public/Private Projects: City design engineers and construction and maintenance inspectors attended the January 2009 training at Cupertino on “Construction Site Management”	Community Development & Public Works Department

5	FY 2008-2009 Annual Report	Evaluate Inspection activities conducted in FY 2008-2009 and explore opportunities to increase program effectiveness and report the results in the September 2009 submittal of the Annual Report	See "New Development-Construction Inspection Program Evaluation" section below.	Community Development & Public Works Department

New Development-Construction Inspection Program Evaluation FY 2008/2009

Private Projects: During FY 08/09, the Engineering Division conducted construction inspections of over 200 private projects, almost all being single family homes being rebuilt, to assure these project had and maintained construction BMPs. Though each project could not be inspected monthly, all were inspected prior to the rainy season and most all were inspected two to three times during the year. Eight citations were issued for not installing BMPs or for poorly maintained BMPs on site. In general, contractors installed and properly maintained their sites. But it was clear that without constant inspections, BMPs would not be properly maintenance at many sites, let alone even installed. Therefore City plans to continue with this inspection process during FY 09/10.

Public projects: The city had only thirteen small construction contracts during the year. All were finished within 2-4 months and only three were under construction during the raining season. All construction inspectors are trained in the application of applicable BMPs. For example, catch basins near sites are protected with filter fabric to prevent debris for entering the storm drain system and fiber rolls are installed around all sites. For public projects, the city has no problem with complying with its permit.

PEST MANAGEMENT
(Provision C.9.d of the Permit)

FY 2008-2009 Work Plan Self Evaluation Matrix

Item No.	Activity	FY 08-09 Work Plan Tasks	FY 08-09 Accomplishments	Responsible Party
Municipal Pesticide Use **Goal 1.A.** Eliminate all unnecessary municipal pesticide uses (particularly organophosphate (OP) pesticide use) and implement Integrated Pest Management (IMP) techniques.				
1	Pesticide Use on Municipally Owned	Continue to track pesticide use on municipally owned property, continue to review IPM policy requiring the use of IPM techniques in the agency's operations, minimization of pesticide use, continue to review standard operating procedures (SOPs) and best management practices (BMPs) for implementing the IPM policy, continue to conduct a periodic agency-wide search of chemical storage areas for pesticides no longer legal for application, and properly dispose of any such pesticides pursuant to appropriate waste disposal regulations, and will continue to conduct internal outreach on less toxic pest control to employees who do not necessarily purchase or apply pesticides during the course of their work (to encourage employees to use IPM techniques away from work).	The City continued to record all pesticide application and submit this documentation on a monthly basis to the Santa Clara County Department of Pesticide Regulation. No pesticide violations or other related concerns were reported during the year.	URP Coordinator & Public Works Maintenance Department

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2008-2009 Annual Report

Municipality: City of Los Altos ***Attachment B***

Item No.	Activity	FY 08-09 Work Plan Tasks	FY 08-09 Accomplishments	Responsible Party
2	FY 2008-2009 Annual Report	Los Altos will document municipal pesticide use and activities and report the results in the September 2009 submittal of the Annual Report.	The city continues to maintained a detailed record of all pesticide used by maintenance staff.	URP Coordinator
Goal 1.B. Raise awareness of all municipal employees and train employees who apply pesticides for the municipality about the municipality's IPM Policy and/or IPM techniques as appropriate.				
1	Pesticide Applicator Training	Los Altos will continue to ensure that employees who apply pesticides for the agency obtain the appropriate training as required by the County Agricultural Commissioner and the State Department of Pesticide Regulation (DPR). Los Altos employees are trained every January in order to maintain its operator ID number	All Parks Division employees involved with pesticide application received annual training, like the July training to maintain their operator ID number or prepared to be certified, in the proper use, handling, mixing, storage, and application of Roundup Pro and Surflan AS (the only two pesticide used by city staff). In January 2009, Parks Division passed Santa Clara County Department of Pesticide Regulation annual inspection including our training documentation.	Public Works Maintenance Department
2	Pesticide Applicator Training	Los Altos will continue to provide annual training on the appropriate portions of the IPM Policy, SOPs, and BMPs, and the latest IPM techniques to employees within departments responsible for pesticide application. Los Altos' IPM Policy states that the City will conduct training at least once a year on Pest Management.	14 Parks Division employees involved with pesticide spraying receive annual training in February 2009 conducted at the Municipal Service Center. Training was conducted by certified spray applicator regarding IPM Policy, BMP's, and SOP's. Training is summarized in the Staff Training list at the end of this Annual Report. Training is expected to be expanded to include all Maintenance Services personnel.	Public Works Maintenance Department

FY 2008-2009 Annual Report

Municipality: City of Los Altos ***Attachment B***

Item No.	Activity	FY 08-09 Work Plan Tasks	FY 08-09 Accomplishments	Responsible Party
3	Employee Training	Los Altos will continue annually to inform employees who are not authorized and trained to apply pesticides that they cannot use over-the-counter pesticides in or around the workplace, consistent with the IPM Policy. Los Altos' IMP Policy states that the City will conduct training at least once a year informing employees of the use of pesticides in the work place.	Staff was unable to conduct formal internal outreach to employees, but supervisor personnel are continually monitor the public spaces and there were unauthorized use of pesticides reported during the fiscal year	Public Works Maintenance Department
4	FY 2008-2009 Annual Report	Los Altos is required to provide similar documentation to the Santa Clara County Department of Pesticide Regulations. Los Altos will provide the required information in the September 2009 submittal of the Annual Report	Training is listed in the Staff Training list at the end of this Annual Report.	Public Works Maintenance Department

Municipality: City of Los Altos ***Attachment B***

Item No.	Activity	FY 08-09 Work Plan Tasks	FY 08-09 Accomplishments	Responsible Party
Public Education and Outreach **Goal II.A.** Increase awareness of IPM so target audiences recall less toxic pest management messages and adopt IPM behaviors. Target audiences include residential and commercial users, pesticide retailers, municipal employees, and special districts (PS #6)				
1	Watershed Education & Outreach (WE&O) Campaign	Continue to support the Watershed Education & Outreach (WE&O) Campaign, which will target the general public and include messages about less-toxic pest control and proper disposal. The Campaign will include extensive media campaign with South Bay English- and Spanish- language TV and radio stations.	As documented in the Public Information Participation section of this Annual Report, the City of Los Altos continues to support the Watershed Education & Outreach Campaign.	URP Coordinator
2	BASMAA Regional Media Relations Campaign	Continue to fund BASMAA Regional Media Relations Campaign featuring pitches to Bay Area media and responses to breaking news on pesticide-related topics. Los Altos will continue to fund the Program for BASMAA baseline projects, including Regional Media Relations Campaign.	The City of Los Altos continues to fund and support the efforts of the BASMAA Regional Media Relation Campaign through the Program.	URP Coordinator
3	Pesticide User Outreach	Continue to assist Program with implementation of local components of a "Pesticide User Outreach" project targeting residential and commercial users	The City of Los Altos continued to assist the Program with the implementation of public outreach. .	URP Coordinator

FY 2008-2009 Annual Report

Municipality: City of Los Altos ***Attachment B***

Item No.	Activity	FY 08-09 Work Plan Tasks	FY 08-09 Accomplishments	Responsible Party
4	IPM Outreach	Continue to provide information on less toxic pest control (e.g., IPM techniques, municipal IPM policies, model contract language, training opportunities, etc.) to neighboring special districts (e.g., open space districts, vector control districts, and school districts) as appropriate. Program to assist with materials. Los Altos will distribute applicable information as required	The only neighboring districts are the school district and the City of Los Altos did not provide them information on less toxic pest control. Los Altos would provide assistance to them if necessary.	URP Coordinator
5	FY 2008-2009 Annual Report	Document or estimate numbers of residents reached by outreach efforts and media advertising. Los Altos will document this outreach effort in the September 2009 submittal of the Annual Report	See "FY 08/09 Accomplishments" for Item No. 2 under "Public Information/Participation" section of this report for the accomplishment for this task. It is difficult to say exactly how many residents it reaches though most of the people seem to be interested in reducing the risk from pesticides.	URP Coordinator
Goal II.B. Educate pesticide retailers and consumers about less toxic pest control products and promote the sale of such projects.				
1	BASMAA Regional IPM Partnership	Los Altos will continue to fund and participate in the BASMAA Regional IPM Partnership. Program funds BASMAA baseline projects, including Regional IPM Partnership.	The City of Los Altos still continues to fund and participate, as necessary, in this program. As a benefit of this program, the city is able to receive updated and to replenishes its IPM fact sheets	URP Coordinator

Municipality: City of Los Altos ***Attachment B***

Item No.	Activity	FY 08-09 Work Plan Tasks	FY 08-09 Accomplishments	Responsible Party
2	IPM Store Partnership Program	Los Altos will continue to implement cost-effective elements of the IPM Store Partnership Program, as identified in the work plan developed by the Program. Create and provide fact sheets and other materials to pesticide retailers to facilitate point-of-purchase outreach. Visit stores as necessary to ensure ongoing participation. Los Altos will continue working with the City of Palo Alto on this program.	See "FY 08/09 Accomplishments" for Item No. 2 under "Public Information/Participation" section of this report for the accomplishment for this task.	URP Coordinator
3	IPM Store Partnership Program	Los Altos will continue to assist Program to document number of participating stores, materials distributed and employees trained. Los Altos will continue to assist Palo Alto and will documentation the cost evaluation as required.	The City of Los Altos was available to provide assistance as necessary.	URP Coordinator
Pest Control Operators (PCOs) **Goal III.A.** Minimize pesticide use by PCOs contracted for structural pest control and landscape maintenance.				
1	Municipal PCOs	Continue to have PCOs contracted for municipal applications to use pest control methods consistent with the municipality's IPM policy (through contract specifications).	Staff was unable to conduct formal internal outreach to employees, but supervisor personnel are continually monitor the public spaces and there were unauthorized use of pesticides reported during the fiscal year	Public Works Maintenance Department
2.	FY 2008-2009 Annual Report	Document the pesticide use by the PCOs on municipal property effort in the September 2009 submittal of the Annual Report, as necessary	Training is listed in the Staff Training list at the end of this Annual Report.	URP Coordinator

FY 2008-2009 Annual Report

Municipality: City of Los Altos ***Attachment B***

Item No.	Activity	FY 08-09 Work Plan Tasks	FY 08-09 Accomplishments	Responsible Party
Goal III.B. Require all PCOs to implement Best Management Practices (BMPs)				
3	Municipal PCO BMPs	Continue to require PCOs contracted by municipalities to implement BMPs through contract specifications.	All pesticide work is done through open purchase order. Contract language and city policy stipulates that the PCO utilities proper BMPs. Parks Supervisor advises contractors of the City of Los Altos IPM program.	Public Works Maintenance Department
4	FY 2008-2009 Annual Report	Document efforts to complete the above actions in the September 2009 submittal of the Annual Report	The city continued to maintain a detailed record of all pesticide used by maintenance staff.	URP Coordinator
Commercial Businesses **Goal IV.A.** Determine the extent of commercial business employees' use of pesticides (I.E., pesticide applications not performed by a licensed PCO) and conduct appropriate outreach regarding less toxic pest management.				
1	Commercial Business Outreach Work Plan.	Assist Program to provide outreach on less toxic pest control to target businesses in the South Bay, as appropriate and cost-effective.	The city of Los Altos continued to be available to assist the Program on outreach to the businesses in the South Bay.	URP Coordinator

FY 2008-2009 Annual Report

Municipality: City of Los Altos ***Attachment B***

Item No.	Activity	FY 08-09 Work Plan Tasks	FY 08-09 Accomplishments	Responsible Party
Household Hazardous Waste Collection **Goal V.A.** Provide pesticide disposal services through household hazardous waste (HHW) collection programs for all residents and small businesses, and encourage use of these programs.				
1	Small Quantity Commercial Generators.	Continue to ensure that adequate pesticide disposal services exist for residents and conditionally exempt small quantity commercial generators.	The City of Los Altos residents have access to the household hazard waste collection services available through the County Household Hazardous Program. This program includes an appointment-based drop-off at various weekly events held throughout the county including one event held at Foothill College on April 11, 2009. At this event, there were 190 participants from the City of Los Altos, 29 from the Town of Los Altos Hills and 297 from other locations in Santa Clara County.	Public Works Department
2	Pesticide Disposal	Continue to work with HHW collection agencies to support, enhance, and help publicize programs for proper pesticide.	The City of Los Altos attends monthly meetings with the Technical Advisory Committee, which consists of cities in the Santa Clara County. Los Altos is also a member of the HHW subcommittee, which meets quarterly. In conjunction with this committee the city provide technical advice and funding to help support the Santa Clara County Household Hazardous Waste web site.	Public Works Department

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2008-2009 Annual Report

Municipality: City of Los Altos ***Attachment B***

Item No.	Activity	FY 08-09 Work Plan Tasks	FY 08-09 Accomplishments	Responsible Party
3	Hazardous Waste Disposal Outreach	Continue to provide hazardous waste disposal information to residents, through distribution of materials (e.g., utility bill insert, city newsletter, community events, etc.) or advertising in local media	HHW collection is advertised in the annual mailer sent out to all solid waste customers of the Los Altos Garbage Company in October 2007 and thru telephone response to queries, and through the County's solid waste website at sscgov.org. The annual household hazardous waste pickup in Los Altos is advertised in the local paper, the Los Altos Town Crier. In May 2007, the City's Environmental Commission was tasked by the City Council to provide input on a new RFP for solid waste collection, with HHW program participation and diversion of HHW being one of the primary service objectives. The City's HHW and recycling programs are also advertised in a tabbed section of the SBC Yellow Pages, and advertised in the Countywide recycling website: Recyclestuff.org	Public Works Department
4	FY 2008-2009 Annual Report	Document that household hazardous waste collection programs adequately serve residents and businesses (conditionally exempt small quantity generators) in the September 2009 submittal of the Annual Report.	Based on customer feedback at local events, 72% of participants rate the HHW program as "Good" or "Excellent". Data from the FY 07 indicate over 97% reported they received adequate information when they called the appointment line to schedule their HHW drop-off. Additionally, Los Altos Police Department had no reports of hazardous waste abandoned during the fiscal year. Communiqué feedback from residents also commends the efficiency of the HHW program.	URP Coordinator

FY 2008-2009 Annual Report

Municipality: City of Los Altos ***Attachment B***

Item No.	Activity	FY 08-09 Work Plan Tasks	FY 08-09 Accomplishments	Responsible Party
New Development **Goal VI.A.** Minimize pesticide use at new and redevelopment sites.				
1	Pest-resistant Landscaping and Design Features	Los Altos will encourage developers and contractors to consider pest resistant landscaping and design features. Los Altos will report the percentage of new development and redevelopment project for which pesticide reduction measures were required in Annual Report	Private Projects: The City continues to encourage project applicants to use pest resistant landscaping and have information available for project sponsors to help them achieve this goal. The City of Los Altos had no new significant development/redevelopment project approved during FY 08/09. All projects were rebuilding or additions to single family residences. The limited commercial projects are typically remodels in the built-out areas of the city and therefore have very limited, if any, for landscaping. Public Projects: There were no public projects during FY 08/09 that fell in the category of a significant development or redevelopment, nor any new project that had landscaping.	Community Development Department
Monitoring and Science **Goal VII.A.** Participate in coordinated monitoring efforts to support pesticide TMDL development and implementation.				
1	Regional Monitoring Program (RMP)	Assist in the financial support of the Regional Monitoring Program (RMP)	City of Los Altos continues to provide a share of cost to the Program for this effort.	URP Coordinator

FY 2008-2009 Annual Report

Municipality: City of Los Altos ***Attachment B***

Pest Management Program Evaluation FY 2008/2009
The City of Los Altos continues to have a very small pesticide program and we believe we have good control to minimizing pesticides in urban runoff. Improvements could be made in the area of use of more pest resistant landscaping in private projects, but since the city is built out, this extra effort probably would not have much of an impact. The City still could always use assistance/information on pest resistant landscaping since staff is not well trained on the development of this type of landscaping. Staff continues to monitor and comply with Pest Management Program and utilizes IPM policy to determine best procedure for pest control. Through annual training of Maintenance Division personnel on Public Work's IPM policies and practices and following BMP's and SOP's in the safe use and application of pesticides. Public Works had no citations or complaints this year. All City pesticide applications are documented with Santa Clara County Department of Pesticide Regulation. All contract spraying was completed with a recommendation from a PCA who was advised of our IPM policy before making a recommendation. The city will continue to train Public Works personnel on Public Work's IPM policy The Household Hazardous Waste program seems to work well and remain unchanged from last year's report. California's AB939 allows jurisdictions to set tipping fees at jurisdiction's landfill's to include a fee to support Household Hazardous Waste collection, and disposal or recycling. Santa Clara County has set this fee at $1.85 / ton of municipal waste and it remains unchanged from last year. As with the previous year, this generates enough revenue for Los Altos residents to use HHW disposal services costing $39,000, equaling 322 households annually. This funding level is intended to provide "free" disposal of HHW to 3% of the city's households. Actual participation by Los Altos is estimated at 9%, and the City provided augmentation of about $77,000 from the Solid Waste Fund in 2008/2009 so that all residents of Los Altos who desire to use the HHW collection program could do so at no direct cost to the resident. The City rarely experiences abandoned waste incidents, and when it occurs, the Maintenance Division responds. There are areas that might need improvement, such as very limited participation by multi-family unit dwellers and families where English is not spoken in the home

FY 2008-2009 Work Plan Self Evaluation Matrix

Item No.	Activity	FY 08-09 Work Plan Tasks	FY 08-09 Accomplishments	Responsible Party
Municipal Use of Mercury-Containing Products				
Goal I. Eliminate all unnecessary municipal use of mercury containing products and establish proper disposal methods for products that cannot be eliminated.				
1	Mercury Policy.	Los Altos will continue to implement its policy for mercury-containing product reduction and management.	The City of Los Altos does not have a written mercury policy, but has been managing its usage and disposal for some time. For example, when florescent lights are replaced, the old ones are collected and are periodically manifested to a proper disposal site. Last FY the City of Los Altos had 225 four-foot tubes picked up by a recycling contractor. New lights are low mercury florescent type. From a city operation standpoint these lights are probably the largest and about the only source of mercury.	URP Coordinator
2	FY 2008-2009 Annual Report	Los Altos will summarize effort in the September 2009 submittal of the Annual Report. including the quantities of mercury-containing products disposed from City building and departments at hazardous waste collection facilities.	Aside from the fluorescent lighting in most of the city buildings, the only other known mercury sources are mercury thermostats in 5 of 11 city buildings and mercury switches in the cities two sewer pump stations. When the lights burn out, these florescent light tubes are replaced with low mercury tubes. Last FY the City of Los Altos had, 225 four-foot tubes picked up by a recycling contractor.	URP Coordinator

Municipality: City of Los Altos ***Attachment B***

Item No.	Activity	FY 08-09 Work Plan Tasks	FY 08-09 Accomplishments	Responsible Party
Household Hazardous Waste Collection **Goal Ii.** Provide mercury-containing products disposal services through household hazardous waste (HHW) collection programs for residents and small businesses, and encourage use of these programs.				
1	Disposal Services	Continue to provide mercury-containing products disposal services for residents and small businesses.	The City of Los Altos supports the County's HHW program which includes mercury collection and collection of "universal waste" i.e. fluorescent light tubes that contain mercury. This year is the second year of a program that added a free collection service for participating retailers who agreed to act as repositories for fluorescent lamps. The local hardware store participates, and additionally collects and holds alkaline batteries for turn in to the county-approved contractor for disposal (batteries) and recycling (fluorescent bulbs). The HHW collection events also take mercury thermometers, fluorescents, and batteries. The RFP to be advertised in Fall 2009 adds batteries and compact fluorescent lights to the curbside collection menu for residents.	Public Works
2	Fluorescent light recycling program	Los Altos will continue to assist the Program and also continue to work with local agencies to develop and publicize fluorescent light recycling program	Addressed in Disposal Services above. Also, a contract supplier, who provides on-call pickup of bulbs when enough are collected at the Municipal Services Center, recycles municipally generated fluorescents.	
3	Documenting and Reporting Guidelines	Continue documenting and reporting quantities of mercury-containing products disposed in the September 2009 submittal of the Annual Report.	The City is unable to report on the quantities from the city since it is collected and disposed of aggregately with other Santa Clara County cities by the county's HHW Program	Public Works

Municipality: City of Los Altos ***Attachment B***

Item No.	Activity	FY 08-09 Work Plan Tasks	FY 08-09 Accomplishments	Responsible Party
Monitoring and Science **Goal Iii.** Participate in coordinated monitoring efforts to support mercury TMDL development and implementation, including assessment of air pollution sources of mercury and concentrations of mercury in sediment.				
1	Regional Monitoring Program (RMP)	Continue financial support of the Regional Monitoring Program (RMP). Continue to support the RMP steering committee and technical review committee. Continue to support the coordinated regional plan to collect data for the mercury TMDL, as defined in the RWQCB/BACWA/BASMAA MOU.	The City of Los Altos continues to provide financial support for the Regional Monitoring Program. Also the City of Los Altos continues to provide comments as necessary for the program regarding the issue of mercury TMDL.	URP Coordinator
Public Education and Outreach **Goal:** Increase awareness of proper disposal of mercury-containing products and available non-mercury containing alternatives. Target Audiences include residential, commercial and industrial users and municipal employees.				
1	Development of Outreach Material	Los Altos will continue to support the program in the development of outreach materials.	The city of Los Altos continued to support the Program efforts during the FY to develop partnerships with various retail stores to provide free fluorescent lamps drop-off sites for residents. The city has implemented the service in one of the city's hardware stores.	URP Coordinator
2	Distribution of outreach material	Los Altos will continue to distribute outreach material and document each activity in Annual Report	The City of Los Altos continued to support the program in the development and distribution of various fact sheets, newsletter articles, press releases, newspaper ads, etc.	URP Coordinator

Municipality: City of Los Altos ***Attachment B***

Mercury Pollution Prevention Program Evaluation FY 2008/2009
Due to the limited amount of mercury products within the city buildings, it is difficult to provide a practical evaluation of this program. The largest and about the only source of mercury within the city's buildings is fluorescent light tubes. During FY 08/09 the City of Los Altos had approximately 225 tubes picked up by a recycling contractor. There one hardware store in the city that collects fluorescents and batteries from residents. The City continues to review this program to areas of improvements. Proposed improvements include adding proposed new requirement to curbside pickup of fluorescent tubes and batteries.

FY 2008-2009 Work Plan Self Evaluation Matrix

Item No.	Activity	FY 08-09 Work Plan Tasks	FY 08-09 Accomplishments	Responsible Party
1	Multi Year Monitoring Plan (Provision C.7.b)	Los Altos will continue to support the Program in the development of this Plan.	The City of Los Altos continues to support the Program's efforts in their monitoring of streams and waterways in the Santa Clara Valley. The City reviewed and approved the Programs work during FY 2008/2009.	URP Coordinator
2	Watershed Measures (Provision C.10)	Los Altos will continue to work with the WMI Land Use Subgroup and Program staff as applicable.	The City of Los Altos continues to monitor the activities by the WMI Land Use Subgroup and Program staff.	URP Coordinator
3	PCB & Dioxin Plans (Provision C.9.e)	Los Altos will continue to monitor sampling events and is prepared to conduct "hot spot" investigations, if deemed necessary.	The City of Los Altos continued to monitor the program. No "hot spot" investigations by the city were necessary during the FY.	URP Coordinator
4	Control Program for Sediment (Provision C.9.f.iii)	Los Altos will continue to work with the Program to identify and conduct a watershed analysis and management practice assessment to understand location and extent of potential sediment sources. Will implement appropriate management actions if applicable to address any identified sources in the City of Los Altos.	Los Altos continues to assist the Program by reviewing the information that is developed by the Program and the committee.	URP Coordinator
5	Street Sweeping	Los Altos will continue to evaluate how it documents waste from this operation and provide available information to the Program	See the "Copper Action Plan Task" in this section of the Annual Report	Public Works

Trash Management				
6	Pilot Demonstration Project	City of Los Altos will assist the Program in implement a \pilot demonstration project which focuses on documenting type and volume of trash that can potentially be conveyed through the storm drain system.	The City of Los Altos is a member of the Trash AHTG working on assisting the Program in the development and implementation of this pilot project during FY 08/09. .	URP Coordinator
7	Trash Evaluation	City of Los Altos will continue to use Program guidance to develop a strategy to conduct trash evaluation within the city as applicable. This will include an evaluation in a subset of identified trash problems areas. Will revise trash problem areas list on an as needed basis. Submit date to Program as appropriate.	The City of Los Altos is a member of the Trash AHTG working on the development of the Trash Program. Through this task group, the City of Los Altos has assisted the Program during FY 07/08 to facilitate documentation and evaluation of existing task management practice. This includes discussions, reviews and approvals as this program continues.	URP Coordinator
8	Trash Problem Areas	City of Los Altos will continue to identify and to implement of trash control measures where necessary, practicable and feasible to reduce trash.	During FY 07/08 the City of Los Altos inspected each of its eight identified hot spots. Data is summarized at the end of this “Trash Management” section. The preliminary evaluation of the results of these inspections is summarized in the “Other Water Quality & Watershed Management Programs Evaluation”.	URP Coordinator
9	Strategy to Reduce Trash	The City of Los Altos will continue to assist Program in developing a long-term effective strategy for reducing trash in urban streams and waterways. Implement the strategy as appropriate is developed.	As a member of the Trash AHTG, the City of Los Altos continues to assist the Program in the development of an effective strategy for reducing trash.	URP Coordinator
10	Trash Fact Sheets	Los Altos will work with the Program to review existing and new guidance documents relevant to trash management and identify potential revisions, as appropriate.	As a member of the Trash AHTG, the City of Los Altos continued to assist the Program in the development of Fact Sheets for trash management.	URP Coordinator

Municipality: City of Los Altos ***Attachment B***

Item No.	Activity	FY 08-09 Work Plan Tasks	FY 08-09 Accomplishments	Responsible Party
	Copper Action Plan Tasks			
11	Vehicle Washing Operations (CB-1)	• Continue to distribute outreach materials on proper vehicle/equipment washing at City department counters and public events, and post on City website.	Los Altos continues to dedicate counter space accessible to the public at City Hall for these various brochures like "The Bay Begins at Your Front Door". Los Altos also continues to provide for a link on its web page that the public can also use to access information.	URP Coordinator
		• Continue to submit data regarding vehicle washing outreach activities and effectiveness evaluation in annual reports.	This is difficult for Los Altos to quantify other than to say, from observation; there have been only rare incidents of vehicle washing both during construction operation and residential car washing.	URP Coordinator
		• Continue to require source control measures for Group 1 new development and redevelopment projects that will conduct vehicle/equipment washing and maintenance activities (consistent with Permit Provision C.3.k).	During the FY, Los Altos did not have new significant development/redevelopment or any project that involved vehicle/equipment washing and maintenance activities.	URP Coordinator
		• Continue to inspect industrial/ commercial facilities, which conduct vehicle/equipment washing activities on-site (this includes auto-related businesses). Ensure that BMPs for vehicle/equipment washing are implemented. Provide an effectiveness evaluation of inspection/compliance with BMPs	All fourteen auto businesses in Los Altos are formally inspected annually and no violations were noted.	URP Coordinator

Item No.	Activity	FY 08-09 Work Plan Tasks	FY 08-09 Accomplishments	Responsible Party
11	Vehicle Washing Operations (CB-1) (cont.)	• Continue to maintain car wash systems for City vehicles at the corporation yard.	The City continues to wash their maintenance vehicles the vehicle wash rack at the corporation yard, which is connected to the sanitary sewer system. All staff vehicles are washed at commercial car washes.	URP Coordinator
		• Continue to encourage municipal staff to use certified mobile cleaners when contracting cleaning services.	Municipal staff are BASMAA certified for power washing techniques and follow all the required BMPs	URP Coordinator
		• Refer Mobile surface cleaners who desire BASMAA surface cleaning certification and recertification to the BASMAA website	The city of Los Altos continues to refer surface cleanings to the BASMAA certification as well as informing the downtown merchants of the need for employing certified surface cleaners.	URP Coordinator
12	Industrial Copper Control (CB-3)	Continue Industrial Inspection program for vehicle service facilities and any other related industrial facilities.	During January 2009 the City of Palo Alto inspected 14 vehicle service facilities in Los Altos. None were found with any violations and all facilities were given the Clean Bay Business award. During the year, there were no other reports on discharges from any of these facilities. The CB-3 of the Copper Action Plan was primarily directed toward such facilities as circuit board manufactures or similar facility, however there no such facilities in Los Altos	URP Coordinator

Other Water Quality & Watershed Management Programs Evaluation FY 2008/2009
Monitoring-The City of Los Altos continues to work with the Program on this task. Since the effort is by the Program, they have provided an evaluation of this task. PCB-Dioxin- The City of Los Altos continues to work with the Program on this task. Since the effort is by the Program, they have provided an evaluation of this task. Watershed Measures- The City of Los Altos continues to work with the Program on this task. Since the effort is by the Program, they have provided an evaluation of this task. Sedimentation- The City of Los Altos continues to work with the Program on this task. Since the effort is by the Program, they have provided an evaluation of this task. Trash Program-The City of Los Altos continues to work with the Program on this issue as a member of its Adhoc committee. The city continued to assess eight previously selected trash problem areas within the city. The city has a program to inspect these areas and conduct any necessary cleanup on at least a monthly basis. Even after this further assessment, it continues to appear that Los Altos may not have a significant trash problem. This may be due to the lack of industrial and commercial areas along with it aggressive cleanup program, both voluntary and by city staff. Therefore the city would prefer to direct limited assessment resources to other areas, but the city will continue to be a member of the trash committee and continue to provide support to the Program to further comply with its permit. Copper Action Plan-The city continues to address various tasks as defined by the Action Plan. Due to lack of industrial and commercial areas, this leaves most of the effort to residential areas and to schools. The city continues to discourage the use of exterior copper in their construction though most contractors continue to use copper in their construction projects. The city continues to have an aggressive street sweeping and storm drain cleaning programs. This may explain why there appears to be a lack of persistent trash problem areas throughout the city. The city continues to address inquiries from pool owners on their discharges. The city has room to improve alternate modes of transportation other than cars by improving its pedestrian access and its bicycle facilities. Both are included in the General Plan and future Capital Improvement Projects. The City of Los Altos also continues to work with the Program on this task. Nickel Action Plan-The primary effort for the city under this Action Plan deals with discharges from construction sites. City inspectors aggressively assure that there is no or minimal discharges from any of its constructions sites. Though the inspectors attend various training sessions, very little addresses what the nickel sources are that might be coming from construction sites. The City of Los Altos also continues to work with the Program on this task

(Provision C.4)

FY 2008-2009 Work Plan Self Evaluation Matrix

Item No.	Activity	FY 08-09 Work Plan Tasks	FY 08-09 Accomplishments	Responsible Party
1	Distribution of all current Program BMPs and literature	Los Altos will continue to promote and maintain a request line for public information materials. Continue to distribute public information materials to the City libraries, Public Works Engineering help desk, building and planning department desks, at the Municipal Service Center and Chamber of Commerce. Keep records on the usage of this material	The City of Los Altos continued with the distribution of the public information within the various public buildings in the City of Los Altos that promotes the use of less toxic pesticides and other environmental issues include the proper draining of swimming pool water. Los Altos does not provide this information at its county libraries due to the lack of available space. Los Altos also hosted a table at some of its weekly Farmers Market event held during the summer months and provided handouts that deal with environmental issues. The city continues to maintain information on its web page on how residents could help to reduce pollutants into the environment including how to prevent sewer overflows.	URP Coordinator

Item No.	Activity	FY 08-09 Work Plan Tasks	FY 08-09 Accomplishments	Responsible Party
3	Watershed Education & Outreach Campaign.	Los Altos will continue to encourage municipal staff to participate in Watershed Education & Outreach campaign as the events are scheduled	The URP Coordinator continues to monitor the efforts of the Program's Watershed Education & Outreach campaign and provide suggestion as required. Inform city staff of various outreach opportunities.	URP Coordinator
4	Evaluate the effectiveness of PIP projects	Los Altos will continue to review and will attempt to assess the effectiveness of all PIP projects at the local municipal staff level.	See "Public Information/Participation Program Evaluation" section below.	URP Coordinator
5	Web page	Los Altos will continue to maintain URP issues on its city web page.	The city continues to maintain a web page on stormwater issues including links to the SCVWD, BASMAA and SCVURPPP as well as information for the prevention of sewer overflows.	Community Development, Public Works Department
6	Articles in the Communiqué	Los Altos will continue prepare and contribute articles of interest to the City's publication called the Communiqué. The Communiqué is published up to three times annually.	The newsletter is published by the city three times a year and is mailed to every address in the city. Unfortunately this is a rather small newsletter, but the city provided small articles on urban storm water runoff issues. For example, one article was on the source of pollution that might get into a storm drain from a typical residential property and how to avoid the discharge of that source.	URP Coordinator
7	Storm Drain Stenciling	Los Altos will continue to be point of contact with the City's schools and organization that are interested in stenciling storm drain catch basing. Provide support and materials for each event of which they are typically 3-4 per year	The continued with a process where city maintenance employees install permanent plastic stencils. This is being done at the same time the catch basins are cleaned.	URP Coordinator

Municipality: City of Los Altos ***Attachment B***

Public Information/Participation Program Evaluation FY 2008/2009
The City of Los Altos continues to believe that distribution of material at Los Altos partner stores each year has an impact positive. City stores such as the Los Altos Garden Supply and Los Altos Nursery continue to get more usage of the various facts sheets than those stocked at city hall. This is also true for such events as the city's Farmers Market. Primary reason is the exposure audience is more conducive to these fact sheets than the visitors to city hall. The city continues with its program that was launched in early 2008 that allows residents to contact the police department to have them pick up and dispose of pharmaceutical. During the fiscal year, the city responded to 73 calls for drug pick.

LOS ALTOS HILLS
CALIFORNIA

August 27, 2009

Mr Bruce Wolfe
Regional Water Quality Control Board
San Francisco Bay Region
1515 Clay St , Suite 1400
Oakland, CA 94612

Subject: Town of Los Altos Hills Urban Runoff Management Program
FY 2008-2009 Annual Report

Dear Mr. Wolfe:

This report is submitted by Town of Los Altos Hills, in conjunction with the Santa Clara Valley Urban Runoff Pollution Prevention Program's Annual Report, pursuant to provision C 6 a of the Program's reissued municipal storm water NPDES Permit (Order No 01-024) The report summarizes activities performed during FY 2008-2009 in accordance with the Town of Los Altos Hills' Urban Runoff Management Plan (URMP) submitted to the Regional Board on September 1, 1997 and updated in October 2000 and September 2004, and the performance standards contained therein

Contents of Report

The goals of this Annual Report are to: 1) concisely document implementation of our URMP and FY 08-09 work plan during the past fiscal year; 2) evaluate program results for continuous improvement; 3) comply with permit requirements; and 4) share this information with other Co-permittees, municipal decision-makers, and the public To accomplish these goals, the report contains the following sections.

I Contents of report;
II Program highlights and accomplishments;
III Summary of continuous improvement activities;
IV Attachments:
  A Certification Statement
  B Self-Evaluation and Work Plan Completion Matrix
    - IC/ID Elimination Activities
    - Public Streets, Roads and Highways Operation and Maintenance
    - Corporation Yard Operation and Maintenance
    - Rural Public Works Activities
    - Storm Drain System Operation and Maintenance
    - New Development Planning Procedures
    - Construction Inspection
    - Pesticide Management Activities
    - Mercury Pollution Prevention Activities
    - Other Water Quality and Watershed Management Requirements
    - Public Information/Participation
    - Staff Training Summary Table

Program Highlights and Accomplishments

26379 Fremont Road
Los Altos Hills
California 94022
650/941-7222
Fax 650/941-3160

We feel that the Program continued to be effective in meeting our Program goals. Though there are only nineteen full time staff in the Town of Los Altos Hills, the staff has been working with team effort to implement our URMP and FY 08-09 Work Plan to the maximum extent practicable

The Town of Los Altos Hills did not encounter any significant problems or incidents during the past year The Town had 14 incidents of sanitary sewer overflow in FY08-09. Most of the sewer overflow happened on the street and the lands of private property. The surface of the overflow locations were cleaned immediately

Continuous Improvement Activities

The Town of Los Altos Hills was able to accomplish several of the work plan goals in the past year and will continue to improve in outside staff training, public outreach and increased public awareness of Program goals

This year, Public Works staff inspected 45 construction sites of private development and four public works projects The pre-rainy season and rainy season inspections were effective in getting construction sites to install proper BMPs The inspection coverage of the sites was adequate because it focused on the erosion/sediment controls. The Town of Los Altos Hills did not take any enforcement actions this year since the contractors followed the instructions or warning of the inspector. The inspector always inspected the sites after each verbal warning to make sure compliance was achieved. The contractors on Public Works projects have done a good job in erosion/sediment control.

Thank you for your review of this Annual Report and we welcome any comments that you might have. If you have any questions regarding the materials submitted, please contact Richard Chiu at (650) 941-7222 ext 228.

Very truly yours,

Richard Chiu

Richard Chiu, P.E
Public Works Director

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 08-09 Annual Report

Municipality: Los Altos Hills

P.S. Id.	Activity	CI Item Source[1]	FY 08-09 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
Illicit Connection & Illegal Dumping Elimination Activities						
ICID-2	Staff Training	URMP	Conduct annual training for urban runoff inspector and on-call staff.	Town conducted annual training on this subject.	On-going	Public Works
			Review and evaluate effectiveness	This year the Town of Los Altos Hills has no reported incidents of construction site waste discharged to the storm drain system. During this period, there were 14 sanitary sewer overflow from manholes on the public sewer main system.	On-going	Public Works
Industrial/Commercial Discharger Control Programs						
	None in the Town of Los Altos Hills					
Public Streets, Roads, and Highways Operation and Maintenance						
PSRH-3	Staff Training	URMP	Conduct annual training for Public Works Maintenance staff.	Town conducted annual training on this subject.	On-going	Public Works
	Street Sweeping	URMP	Sweep streets with catch basins once a month. Collect the types of street sweeping data and make it available to Program staff.	The selected streets are swept once a month all year round. The entire length of 1,817 miles have been swept. About 17 CY of material per month was collected from street sweeping.	On-going	Public Works

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 08-09 Annual Report

Municipality: Los Altos Hills

P.S. Id.	Activity	CI Item Source[1]	FY 08-09 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
			Review and evaluate effectiveness	Town's maintenance crew performed street curb, swale, and shoulder cleaning work prior to rainy season and picked up piles of leaves to keep the street drainage system clean. Crew also clean underground storm drain pipes.	On-going	Public Works
Rural Roads						
New	Rural Roads O&M Performance Standards	C.5	Implement the Performance Standards. Sweep streets according to the schedule mentioned in above section.	The Town has incorporated the Performance standards into URMPs.	Annually	Public Works
			Review and evaluate effectiveness	No new rural road designed or constructed this year.	On-going	Public Works
Storm Drain System Operation and Maintenance						
SD	Storm Drain Maintenance	URMP	All tasks are routine and on-going.	All routine tasks have been conducted continually.	On-going	Public Works
SD	Reporting of Observed ICID Evidence	URMP	Report to Program for the ICID data annually.	Maintenance crews were trained to call Code Enforcement Officer to report ICIDs.	On-going	Public Works
	Storm Drain Maintenance	URMP	Evaluate and ensure that contractors use appropriate BMPs when conducting such activities as street painting, storm drain O&M, etc.	We have evaluated and ensured that contractors use appropriate BMPs when conducting such activities as street painting, storm drain O&M, etc.	On-going	Public Works
			Review and evaluate effectiveness	Town's storm drain system was inspected and cleaned prior to and during the rainy season. This preventive measure reduced a lot of complaints or emergency calls during the rainy days. All material collected was disposed properly.	On-going	Public Works

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 08-09 Annual Report

Municipality: Los Altos Hills

P.S. Id.	Activity	CI Item Source[1]	FY 08-09 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
Water Utility Operation and Maintenance						
	Not operated by the Town of Los Altos Hills					
Corporation Yards Operation and Maintenance						
	Staff Training	URMP	Conduct annual training for Public Works Maintenance staff.	The corporation yard in the Town of Los Altos Hills does not perform heavy vehicle and equipment maintenance. The yard has been inspected by the County's Environmental Health Department for material storage.	On-going	Public Works
			Review and evaluate effectiveness	The yard only handle light maintenance for the small scale of the equipment and therefore there is no pollution problem.	On-going	Public Works
New Development and Construction Controls -- Planning Procedures (C.3)						
	C.3.c Requirements for Group 1 and Group 2 Projects					
New		C.3.c.9	Update performance standards for Group 2 projects as needed. Prepare to implement Group 2 starting August, 2006.	Town's ordinance covers Group 2 projects.	Continuous Improvement	Public Works.
	C.3.e Operation and Maintenance of Treatment BMPs					

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 08-09 Annual Report

Municipality: Los Altos Hills

P.S. Id.	Activity	CI Item Source[1]	FY 08-09 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
New	Reporting	C.3.e.6	Provide details of O&M verification program (organizational structure, evaluation, and proposed improvements), and a list of treatment BMPs inspection results.	We do not have any Group 1 project in the Town of Los Altos Hills. Group 2 single family homes are exempted. The Town has developed the Town's verification program for the projects requiring stormwater control measures. The staff in Public Works and Planning Departments has been implementing the program. They conducted pre-final and final inspections on site development projects to ensure that drainage, erosion control and landscaping work comply with the stormwater control measures.	N/A	Public Works
			Review and evaluate effectiveness	It is very effective to conduct pre-final and final inspections on site development projects to ensure that drainage, erosion control and landscaping work comply with the stormwater control measures.		Public Works
	C.3.f Hydrograph Modification Plan					
New	Reporting	C.3.f	Attend HMP training workshop conducted by the Program to train staff on HMP	We will not have any Group 1 project in the Town of Los Altos Hills. Group 2 single family homes are exempted.	N/A	Public Works
	C.3.j Site Design Measures Guidance and Standards Development					
New		C.3.j.4	Incorporate any revised standards and guidance into local project approval process and "fully implement" the revised standards and guidance.	The Town has an ordinance to implement C.3. requirements since September 2005. The ordinance provides legal authority for the Town to implement C.3. requirements.		Public Works
	C.3.n Reporting Requirements					

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 08-09 Annual Report

Municipality: Los Altos Hills

P.S. Id.	Activity	CI Item Source[1]	FY 08-09 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
New	Collect and report the following for all projects that must implement treatment measures: BMPs, site design, and source control measures used, sizing criteria, O&M responsibility mechanism and responsible party	C.4.n.4	A system will be in place to collect the information in case such a project is proposed	Los Altos Hills does not expect to have any Group 1 new development or redevelopment projects. Group 2 single family homes are exempted.	ongoing	Public Works
New Development -- Construction Inspection						
Const -6	Staff Training	URMP	Conduct annual training for Public Works staff.	We attended training conducted by the Program on November 20, 2008.	ongoing	Public Works
Const -5		Program (Revised PS)	Inspect all construction sites before and during rainy season per Performance Standard. Los Altos Hills will include a summary of the year's written inspection notices (for sites with inadequate erosion/sediment controls) and follow-up actions in the FY 09-10 AR.	This year Public Works inspector inspected **45** construction sites of private development construction projects. **5** of the private construction sites appeared to have erosion/sediment control problems prior to the 1st or 2nd inspections.	ongoing	Public Works.

Municipality: Los Altos Hills

P.S. Id.	Activity	CI Item Source[1]	FY 08-09 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
			Review and evaluate effectiveness	The typical problems were that site access roads were not covered by the crushed rocks and mud were tracked to the streets; the soil stockpiles were not covered by the plastic sheets; and fiber rolls were not installed. After 1st or 2nd inspections and the warnings given to the contractors, the problems on those sites were corrected. Construction inspection before and during rainy season is very effective to correct the inadequate erosion/sediment controls		Public Works
Pest Management Program						
I. Municipal Pesticide Use						
Goal I.A. Eliminate all unnecessary municipal pesticide use (particularly organophosphate (OP) pesticide use) and implement Integrated Pest Management (IPM) techniques.						
		MM I.A.1	Document completion of tasks in annual reports. Use pesticide tracking process to document pesticide use.	The contractors hired by the Town monitored and recorded all pesticide use on Town owned properties on a monthly basis. Town no longer contract with anyone to spray pesticide for weed control.	Annually;	Public Works
Goal I.B. Raise awareness of all municipal employees and train employees who apply pesticides for the municipality about the municipality's IPM Policy and/or IPM techniques as appropriate.						
		I.B.3	Periodically (at least annually) inform employees who are not authorized and trained to apply pesticides that they cannot use over-the-counter pesticides in or around the workplace, consistent with the IPM Policy (PS #4c).	The employees are informed annually.	At least Annually	Public Works

FY 08-09 Annual Report

Municipality: Los Altos Hills

P.S. Id.	Activity	CI Item Source[1]	FY 08-09 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
II. Public Education and Outreach						
Goal II.A. Increase awareness of IPM so target audiences recall less toxic pest management messages and adopt IPM behaviors. Target audiences include residential and commercial users, pesticide retailers, municipal employees, and special districts. (PS #6)						
		II.A.14	Conduct internal outreach on less toxic pest control to employees who do not necessarily purchase or apply pesticides during the course of their work (to encourage employees to use IPM techniques away from work).	Town has Environmental Design and Protection Committee and Open Space Committee who promote less toxic pest and weed control in the Town.	Annually	Public Works
III. Pest Control Operators (PCOs)						
Goal III.A. Minimize pesticide use by PCOs contracted for structural pest control and landscape maintenance.						
		III.A.4	Require PCOs contracted for municipal applications to use pest control methods consistent with the municipality's IPM policy (through contract specifications). Specifically, require contractors to: a) follow the agency's IPM policy, BMPs, and SOPs; b) provide evidence of current IPM training, when feasible; and c) provide documentation of pesticide use on agency property to the agency in a timely manner (PS#6).	Town required the Contractors, to follow the current IPM policy. They received current IPM training and provided documentation of pesticide use on Town property. The weed control service is designed using the IPM philosophy to suppress and control the most common weed species. The pesticide usage has not changed over the past year and past few years.	Ongoing	Public Works
Goal III.B. Require all PCOs to implement Best Management Practices (BMPs).						
		III.B.2	Require PCOs contracted by municipalities to implement BMPs through contract specifications. (See Action III.A.4, above.) (PS #6)	The Town implemented BMPs for work in the Town.	Annually	Public Works
		MM III.B.1	Document efforts to complete the above actions.		Annually	Public Works

	IV. Commercial Businesses					
	None in Los Altos Hills.					
	V. Household Hazardous Waste Collection					
	Goal V.A. Provide pesticide disposal services through household hazardous waste (HHW) collection programs for all residents and small businesses, and encourage use of these programs.					
		V.A.5	Provide hazardous waste disposal information to residents, through distribution of materials (e.g., utility bill insert, city newsletter, community events, etc.) or advertising in local media	GreenWaste Recovery, Inc. provided hazardous waste disposal information to residents through garbage bill inserts.	Periodically, at least annually	Public Works
	VII. New Development					
	Goal VII.A Minimize pesticide use at new and redevelopment sites.					
		VII.A.2	Consider pesticide reduction in the design and landscaping of proposed development projects. (C.9.d.ii.). Provide the Fact Sheet to the public during plan review process	Public Works and Planning Departments will handout Fact Sheet to the public during plan review process.	Annually	Public Works
		MM VII.A.1.	Summarize types of pesticide reduction measures required (such as by conditions of approval) for new development and significant redevelopment projects, and the percentage of new development and significant redevelopment projects for which pesticide reduction measures were required. (C.3.n.)	As applicable, the Town will modify conditions of approval.	Annually	Public Works
	VIII. Monitoring and Science					
	X. Review and Revision of Work Plan					
	Goal X.A Implement a work plan that includes appropriate goals, actions and monitoring mechanisms to reduce pesticide related toxicity in urban runoff.

WEST VALLEY CLEAN WATER PROGRAM

September 15, 2009

Mr. Bruce Wolfe
Regional Water Quality Control Board
San Francisco Bay Region
1515 Clay St., Suite 1400
Oakland, CA 94612

Subject: FY2008-2009 Annual Report for
West Valley Communities Urban Runoff Management Program

Dear Mr. Wolfe:

This report is submitted by the West Valley Cities of Campbell, Monte Sereno, Saratoga, and the Town of Los Gatos, in conjunction with the Santa Clara Valley Urban Runoff Pollution Prevention Program's Annual Report, pursuant to provision C.6.a. of the Program's reissued municipal storm water NPDES Permit (Order No. 01-024). The report summarizes activities performed during FY2008-2009 in accordance with the West Valley Communities' Urban Runoff Management Plan (URMP) submitted to the Regional Board on September 1, 2004 and the performance standards contained therein.

Contents of Report

The goals of this Annual Report are to: 1) concisely document implementation of URMP and FY08-09 Workplan; 2) evaluate program results for continuous improvement; 3) comply with permit requirements; and 4) share this information with other Co-permittees, municipal decision-makers, and the public. This report includes the following sections:

I. Preface
   - Table of Contents
   - Transmittal Letter with Program Highlights
   - Certification Statement
   - List of Acronyms

II. Program Elements
   1. IC/ID Elimination Activities
   2. Industrial / Commercial Discharger Control Program
   3. Public Agency Activities
      - Storm Drain O & M
      - Street Sweeping
      - Corporation Yard
      - Rural Public Works
   4. New Development: Planning Procedures
   5. Construction Inspection
   6. Public Information & Participation
   7. Pesticide Management Activities
   8. Mercury Pollution Prevention Activities
   9. Copper Action Plan / Nickel Action Plan
   10. Trash Inventory and Management
   11. Water Quality Monitoring and Watershed Management

   Training Summaries are provided at the end of each element

18041 Saratoga-Los Gatos Road • Monte Sereno, California 95030 • Tel: 408-354-4734 • Fax: 408-354-6284

PROGRAM HIGHLIGHTS AND ACCOMPLISHMENTS

During FY08-09, the West Valley Communities of Campbell, Los Gatos, Monte Sereno, and Saratoga continued efforts to implement their URMP to the maximum extent practicable. The West Valley Communities also continue to benefit from its collaborative efforts through West Valley Clean Water Program (WV CWP).

- WV CWP continues to receive annual requests for in-class stormwater pollution prevention presentations with its 3-D interactive 'Enviroscape' model. In addition to school presentations, this year WV CWP was invited to the Audubon Society's Annual Event, and was a big hit among both children and adults, where more than 70 people stopped to listen, play and learn ways they can help prevent stormwater pollution.
- WV CWP's Seed Packet Distribution – specifically five varieties of CA native plants which attract *beneficial bugs* listed in '10 Most Wanted: Beneficial Bug Brochure,' turned out to be a big hit. Because these particular seeds are available for purchase only in, WV CWP purchased the loose seeds, designed labels, and engaged Sierra Club volunteers to assemble seed packets. Packets were attached to the Beneficial Bug Brochures, as well as other IPM handout materials, and distributed to students at the Enviroscape presentation, through gardening classes, at a local garden center, and given to participants in creek clean up, Arbor Day and Earth Day events. Availability of seeds was also published in four City Newsletters, generating many phone and email requests from residents. Over 600 packets were distributed in less than 3 months!
- WV Communities and WV CWP hosted six clean up events, which were well attended. Three events were conducted in conjunction with well advertised national and international namesakes – International Coastal Clean-up Day, National Rivers Clean-up and Great American Litter Pick Up (GAPU), and benefitted from collaborative event advertising. WV CWP also helped secure donations from local retailers to provide Coastal Clean-up and Rivers Day Clean-up supplies and volunteer appreciation give-away items for events held in Santa Clara County.
- WV CWP responded to and followed through to resolution over 50 phone, email and inter-agency referrals for discharge incidents. Facilities which have and incident reported or an inter-agency stormwater inspection referral (SCC FD, SCC DEH, and SJ POTW/FOG programs) are placed upon a pro-active inspection list, and re-inspected within the next year.
- WV CWP continued to support SCVURPPP's Green Gardener program, promote classes and was instrumental in providing information for local newspaper coverage of recent Green Gardener Graduates working within the WV Communities.

The West Valley Communities remain committed to a watershed approach for preventing urban runoff pollution. Through the WV CWP, the WV Communities actively participate in SCVURPPP's many task groups, including Watershed Education and Outreach (WEO), C3PO and Trash Task Groups. WV CWP also participated in the SCB WMI's Trash Summit, held last October. Finally, the proposed MRP continues as a topic of discussion and staff participates in SCVURPPP update meetings regarding MRP.

Thank you in advance for your review of this Annual Report. Should there be any questions regarding the materials submitted, please contact me at (408) 354-4734.

Respectfully,

Kelly Carroll

IC/ID Program Evaluation

IC/ID Training

The multiple trainings that the WVCWP staff and the municipal staff, attended have been quite effective in building relationships with the Fire Dept., DEH, and the Municipalities. Inspectors from the Fire Dept., DEH, and the Municipalities, continue to look for possible stormwater violations while they are on their field inspections. If the Inspectors from the Fire Dept., DEH, and the Municipalities, observe any potential stormwater violations they immediately contact the WVCWP Inspector. All interagency referrals are documented in the IC/ID reporting section.

ILLICIT CONNECTION & ILLEGAL DUMPING ELIMINATION ACTIVITIES
Los Gatos
Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2008-2009 ANNUAL REPORT

Trend Analysis for Town of Los Gatos

In FY06-07 twenty-six (26) reported incidents were investigated; of which 23 were actual violations. A majority of the violations took place at food facilities (8), construction sites (7) and commercial places (4). Verbal notices were issued for 24 incidents, while 2 warning notices were issued to a restaurant. The West Valley Inspector continued to conduct proactive inspections at restaurants and vehicle shops, particularly at those sites which have had violations in the past. Town staff conducts proactive inspections at construction sites. The other sources of reports were citizen complaints or referral by Town staff and other agencies. Two (2) allowable discharges were reported, but these do not represent an intentional violation. The only notable trend is the need for continued outreach to workers at construction sites and food facilities. The WVCWP inspector will continue proactive inspection jointly with the Fire Department Inspectors and municipal staff to provide education and outreach as appropriate.

In FY07-08 the West Valley IC/ID inspector responded to forty (40) reports of potential violations in Los Gatos and thirty four (34) follow ups. Three (3) of these

In FY08-09 Thirteen (13) Incidents were reported to the WVCWP. Of those thirteen (11) incidents, one (2) complaint was not found, and one (1) was an allowable discharge. Incidents reported included: (1) carpet cleaning discharge, (1) food facility oil & grease discharge, (1) Grey water discharge, (1) Pool/spas/fountains discharge, (1) vehicle and equipment leaking, (1) vehicle washing, (1) waterline break, and (3) Misc. incidents. The majority (6) of the incidents were in residential areas. Most of the incidents referrals were either (6) interdepartmental, or (4) from other agencies. Out of the eleven (13) incidents, six (6) were referred for enforcement action after the initial investigation, while five (5) received verbal notices.

*Note

The West Valley Clean Water Program only gave completely new incidents ICID numbers, therefore, follow-up inspections to original ICID's were not given new ICID numbers. This is the reason for the dramatic decline in ICID's for FY08-09.

ICID Date	Contact Name (Resp Party)	Facility Address	ICID Incident Report Source (Origin)	ICID Incident Source	ICID Incident Type	ICID Enforcement Action	Findings (Comments)	Status	Compliance Date
7/17/2008		Los Gatos Creek, behind Riviera Terrace Apts.	Interdepartmental	Other/unknown	Misc. incidents	Referral for Enforcement	Debris/Trash in creek and along the bank. See pics.	Incident - Resolved	7/21/2008
8/15/2008	Rupa Iyar	15292 Kennedy Rd., Los Gatos	Interdepartmental	Residential	Allowable discharge	None	Water coming down road from residence. WVCWP Inspector talked w/ resident. Contractor was washing down drain to flush out rattlesnakes. Water only. All clear now.	Incident - Resolved	8/18/2008
9/26/2008		23020 Old Santa Cruz Hwy.	Other Agency	Residential	Complaint not found	Referral for Enforcement	9/26 Sue Ma (Regional Water Board) left message about anonymous complaint. Complaint was about constrcution/roofing debris that was blown around site. Apparently the constrcuction company did not cover materials properly.	Referred to Agency for Action	9/26/2008
9/26/2008		330 N. Santa Cruz Ave., Los Gatos	Interdepartmental	Food Facilities	Misc. incidents	Verbal Notice	9/26 Bella Cokic reported lids off of dumpsters and washing of garbage cans with chlorine. Good afternoon Kelly:

Just wanted to give you and Patrick a quick update on 135 Riviera Drive case. See e-mail below...I hope things are going well on your end. Thanks again for assisting with this case. Have a good day.

Best regards,

Bella Cokic
Code Compliance Officer
Town of Los Gatos
(408) 399-5720

>>> <duriarte@valleywater.org> 8/6/2008 3:08 PM >>>
Bella,
The District conducted a follow-up field visit at 135 Riviera Drive on 07/28/08 and the sofa, sofa sections and trash has been removed. The foam pieces (sofa stuffing) remain and are to be picked up by the apartment maintenance crew. The downed tree and tree branches to be picked up by the District. A work order has been issued.
George Malekos
Code Enforcement Project Assistant

Industrial / Commercial Programs

West Valley Communities

INDUSTRIAL/COMMERCIAL DISCHARGER CONTROL PROGRAMS

Los Gatos

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2008-2009 ANNUAL REPORT

Industrial/Commercial Program Evaluation

Fire Dept Inspections of Industrial / Commercial Facilities:

Of the 85 facilities inspected by the Fire Dept., 2 potential or actual violations were found and reported to the WVCWP for follow up. The list of violations is provided to WVCWP at the end of each fiscal year. The West Valley Inspector will schedule a training meeting with the Fire Dept Haz Mat Specialist in FY 09-10 to discuss further inspections of sites with reported violations during FY 08-09. The sites with previous violations will be prioritized for inspections at the beginning of FY 09-10.

When Saratoga was added to the Fire Dept Inspection Agreement for Campbell and Los Gatos (7/1/02), all West Valley facility inspections were coordinated under one umbrella. Monte Sereno does not conduct IND inspections because it has NO industrial or commercial facilities. Since 2001, WVCWP staff has met with Fire Dept staff at least twice a year to discuss standardized reporting, documentation and follow-up.

The West Valley Inspector's pro-active vehicle shop inspection program is designed to supplement Fire Dept facility inspections. Shop owners are made to realize the City's responsibility for making sure that the sites are in compliance with water quality requirements. The Inspector has made a positive impact with his visits and the distribution of educational materials depicting the right way to keep equipment, vehicle parts, and service areas covered, and all vehicle wash water managed properly. In a few cases the Inspector's meetings with vehicle shop owners have led to the facility's purchase of a wastewater capture system (noted in previous annual reports).

Annual Food Facility Inspection Training Meeting

Of the 218 facilities inspected by the DEH, one potential or actual violations was found and reported to the WVCWP for follow up. The Supervising Environmental Health Specialist at DEH had left and DEH was not always able to make the referrals to WVCWP due to staff shortage. However DEH has hired new staff and this will improve the coordination between DEH and WVCWP in FY 09-10.

Held Annual Urban Runoff Food Facility Inspection Training/Meeting with Santa Clara County DEH supervisors and inspectors, WVCWP staff, and City of Cupertino staff on May 7th, 2009. 8 attendees. Topics included: Review DEH inspection reports from FY07-08 and discuss the inspection reports for FY08-09, Review coordination and responses to incidents, and update contact lists, Discuss new inspection requirements under the future MRP

Date	Facility Name	Facility Address	Enforcement Action	Inspection Notes	Notes
7/14/2008	Hertz Rental	15525 B Los Gatos Blvd., L	No Action	No violations.	Do not wash cars there anymore. Resolved.
8/5/2008	Safeway Store	470 N. Santa Cruz Av., Los	No Action	Follow up inspection. Problems in past around food compactor. All OK. No food scraps. Lids closed on dumpsters. Big improvement.	
8/11/2008	Leslie's Pool Supplies	15505 Los Gatos Blvd., Los	No Action	All Pool & Spa brochures have been distributed. Left 50 more. Please call when gone.	Positive comments from customers.
2/20/2009	Rotten Robbie	15299 Los Gatos Blvd., Los	Level 1	2/20/2009 Follow-up to SCC Fire referral received on 2/20/2009 re: Dumpster lids open, SCC Fire had them close lids during inspection. WVCWP Inspector checked dumpster area, lids were closed. Provided additional info to employee.	
2/20/2009	Restaurants @ 145 W	145 W. Main Street LG	No Action	2/20/09 Follow up to incident in FY07-08 re: messy dumpster area. Took a look around, dumpster area looked ok, did not appear to be washing floor mats outside.	
2/27/2009	Silicon Valley Auto Gr	66 E. Main St., Los Gatos	No Action	2/27/09 Followup to FY07-08 ICID Re: Carwashing in street. Did followup and did not observe any signs of carwashing/runoff	
2/27/2009	McDonalds Restaurar	15475 Los Gatos Blvd., Lo	No Action	2/27/09 Looked around dumpster area. Lids on dumpsters and clean. Everything looks good.	
3/4/2009	Los Gatos Auto Body	17642 Shellburne Way, Los	No Action	3/4/09 Followup to ICID FY0708 re: problems with sump pump in the past. Its was fixed in FY-0708. Talked with employee who said they havent had any more problem with the pump and its working fine. No runoff flowing to the street.	
3/12/2009	Moore Buick	15500 Los Gatos., Los Ga	No Action	3/12/09 Follow up to SCC Fire referral re: Blowdown from aircompressor entering storm drain. Conducted folowup, with Garage Manager. Showed me the containment device they installed to prevent this in the future.	
5/28/2009	South Bay Towing	615 University Ave., Los G	No Action	5/28/09 Followup to FY07-08 ICID re: problems with runoff into street. 5/28/09 WVCWP Inspector did followup inspection. No signs of runoff into street. Everything looks good. Stored cars have proper containment to catch any oil or other fluids.	
5/28/2009	Los Gatos Gourmet	109 West Main St., Los Ga	No Action	5/28/09 Follow up to ICID FY07-08 Re: bags and food scraps on ground. WVCWP Inspector did followup checked in back of restaurant. Dumpster area looked clean, no food scraps on ground and lids closed.	
6/2/2009	Town of Los Gatos Co	41 Miles Ave., Los Gatos	No Action	6/2/09 Some signs of trash blowing from dumpster which was picked up immediately and dumpster lid was closed. Everything else looked great.	WVCWP Inspector and WVCWP Manager performed annual Corp Yard Walk Thru. Topics covered: Locations and updates to SWPPP, Dry cleanup methods, storage of chemicals, and other materials, spill log records, vehicle washing, trainings, flourescent bulbs
6/30/2009	Southern Kitchen	27 Main Street, Los Gatos	Level 1	6/30/09 Proactive Restaurant Inspection. Took a look around dumpster area, noticed lids were open on dumpster, closed during inspection.	6/30/09 Gave poster and discussed restaurant housekeeping and BMP's.
6/30/2009	Pedro's Cabo Grill	316 N. Santa Cruz Ave., Lo	Level 1	6/30/09 Proactive Restaurant Inspection. Took look in back around dumpster area. Lid was open on dumpster, closed during inspection.	6/30/09 Talked with manager about restaurant housekeeping and bmp's. Gave poster.

IND: Inspection Table

Date	Facility Name	Facility Address	Enforcement Action	Inspection Notes	Notes
6/30/2009	I-Gatti	25 Main Street, Los Gatos	No Action	6/30/09 Proactive Restaurant Inspection.	6/30/09 Met with Mike, new Manager, discussed proper housekeeping, disposal of mopwater, covering dumpsters/tallow bins. Gave poster. Mop bucket in mop sink/washout, indicates employees are disposing of mopwater properly.
6/30/2009	Forbes Mill Steakhous	206 N. Santa Cruz Ave., L	No Action	6/30/09 Proactive Restaurant Inspection. Took look around dumpster area and tallow bin. Everything looked good.	6/30/09 Need to do a return visit. Employees do not arrive at Forbes Mill until after 4pm.
6/30/2009	Los Gatos High Schoo	20 High School Ct., Los Ga	No Action	6/30/09 Followup to FY07-08 ICID re: Accidental Chlorine spill. 6/30/09 Everyhting good. No more incidents.	6/30/09 Talked with John Guerra (maint. Supervisor), has talked with employees about how to prevent accidental spills in the future.

October 28, 2008

Los Gatos Brewing Co.
130 N. Santa Cruz Avenue
Los Gatos, CA 95030

Dear Business Owner:

West Valley Sanitation District is implementing a regional program to control the discharge of fats, oils and grease (FOG) to the sanitary sewer system. The purpose of the Regional FOG Program is to ensure that the District and our commercial and residential customers are in compliance with state and federal requirements to prevent sewage overflows caused by fat, oil, and grease blockages in our sanitary sewer collection system. If overflowing sewage makes its way into the storm drain system, it could end up contaminating local creeks and the San Francisco Bay. In addition, these blockages could have a direct impact to you should a back-up of sewage occur at your place of business.

As part of the FOG Program, a representative from the Environmental Services Department, Watershed Protection Division of the City of San Jose will be contacting you to arrange a meeting and inspection of your facility within the next month or two. The meeting will focus heavily upon education and use of FOG Best Management Practices. During this visit they will walk through your facility, inspect your grease trap or interceptor, and review associated grease pumping and trap maintenance records.

We appreciate your cooperation in making the Regional FOG Program successful and look forward to working with you to help keep our environment pollution free. For additional information regarding the FOG Program, please visit the District website at www.westvalleysan.org, or call our office at (408) 378-2407.

Sincerely,

Robert R. Reid
General Manager and District Engineer

Storm Drain Operations and Maintenance				
	2004 URMP	Annual Storm Drain Cleaning Continue contract w/ WVSD (two year cycle for residential & one year cycle for commercial & industrial); Public Works staff will clean high leaf drop and other noted areas more frequently and as needed. Examine storm drain inspection & cleaning reports from previous years to determine areas where annual cleaning would be beneficial. Inlets with any record of debris will be inspected and cleaned once or twice annually.	LOS GATOS: West Valley Sanitation District (WVSD) performs systematic storm drain cleaning and inspection annually. Half of the Town's storm drains in residential areas are cleaned and inspected each year. Arterials and commercial/industrial areas are done annually. Town maintenance staff provides additional cleaning in high leaf drop areas and to remove storm debris from all inlets and grates as needed.	Public Works Director coord with WVSD per contract; Street Maint. Supt coord in-field operations; WVCWP Mgr to assist
	Trash Reduction Activities On-going	Trash Reduction Public Works Division will implement management actions (extra cleanup of littered catch basin inlets and surrounding areas, public outreach, and/or assessments) to address litter problem areas.	LOS GATOS: During inspections and cleaning of storm drain structures, WVSD staff notes catch basins that require additional cleaning. The data provides indications of trash problem areas by storm drain locations. Reports for the Town of Los Gatos included 71 structures that received additional cleaning.	PW Dir. Coord in-field operations w/ PW staff
	Training (Rural PW activities)	Training - Annual WVSD/ Oper. & Maint. Meeting WVSD & WVCWP Storm Drain and Street Maintenance Operation & Maintenance Supervisors meeting. - evaluate status of annual storm drain cleaning and provide training on maintenance issues. Rural public works BMPs and Street Sweeping BMPs may be included in this workshop.	The annual WV Storm Drain Op & Maintenance Supervisor's workshop was held on May 14th, 2009 at Campbell Community Center. See Training Table for staff attendance. Staff from WVSD, WVCWP, and the other WV Communities also participated. Topics included: • A speaker from the regional program presented on the current NPDES Permit requirements and BMP's, and the possible future requirements of the MRP. • A speaker from Toyota Materials Handling also presented on products which would help the	Mtg lead by WVSD; Attend by Pub Works Supvsrs/ Supt. Hosted by WVCWP

Public Agency Activities: Operations and Maintenance Evaluation

Storm Drain Maintenance

In FY08-09, West Valley Sanitation District (WVSD) provided its fourth enhanced annual report to the cities on storm drain cleaning. Since June 2008 the reports have listed the structures that were inspected and cleaned with the maintenance crew's findings. A total of 1,576 structures were inspected.

- Of those inspected, 1442 were found without any debris and were noted as "clean."
- Of those inspected, 134 had some visible debris upon inspection.

Crews noted the weight and type of debris removed. Descriptors for solids removed are: leaves/paper, mud/dirt, foreign object, rocks/stone, sand/gravel, oil/soap and roots etc. The reports are generated from a database of numbered storm drain locations with the street names. The WVSD reports were distributed at the June 23rd WVCWP Meeting and will be reviewed by WV cities as they determine future management actions for trash problem areas.

Storm Drain Stencils:

The Town's decision to go back to using painted stencils for most applications, and using thermoplastic storm drain stencils in selected areas, is working very well. The Town decided to use thermoplastic stencils in selected areas because they are reflective, they adhere well to coarse and uneven surfaces and can withstand heavy traffic. The downside of using thermoplastic stencils is the cost (about $250 per stencil, installed) and they must be applied to a horizontal surface. West Valley reported that municipal staff have discontinued application of the metal plaques because the sharp edges have a potential to get caught in street sweepers and bend, creating a potential to injure pedestrians or bicyclists. Replacing the plaques was also a problem. When plaques came loose or were removed, concrete chunks crumbled from the curb with the screws (used for attaching the plaques) making replacement in the same spot impossible.

Street Sweeping:

Town staff modified its sweeping routes to increase efficiency. Because of the change in routes, staff revaluated the Town zoning map to determine which streets are residential or commercial streets. The miles swept in each area may vary due to the change in routes. During the three month period, from October to December, there is generally more debris on the roadways. In some instances, staff has had to drive over the area more than once in order to collect all the debris. This explains the higher volume of debris and curb miles shown on this report.

Yard Waste - Curbside Collection and Recycling:

The West Valley yard waste recycling program reduces the amount of debris that gets into the storm drain, since leaves are collected in oversized bins rather than being stored in the street. In FY 08-09, the totals were given for all diverted waste. Totals for yard waste recycled were not provided.

FY 2008-2009 ANNUAL REPORT

Source	Task Source	FY08-09 Work Plan Tasks	FY 08-09 Accomplishments	Responsible Party
The WVCWP Storm Drain Maintenance Workshop was held on 5/14/09 this year at the Campbell Community Center. Municipal staff generally felt that the Workshop helped them to understand the possible requirements of the future MRP. Municipal Staff also discussed the pros and cons of current BMP's and how they could address these issues in the future. It was evident that BMPs are being used by municipal staff but there was some frustration among street and park maintenance workers because they don't have enough authority to convince residents and private contractors to keep pollutants from reaching the storm drain system. The WVCWP Inspector offered his card to all attendees and requested that they report any incidents to him for immediate follow-up. One challenge is to catch the violator in the act of allowing pollutants into the storm drain system. By the time the incident, or the result of the incident, is seen it is often too late to stop it. The maintenance crews are generally called to clean up spills. Attendees requested continued updates on the MRP requirements for storm drain maintenance and street sweeping practices. Several of the attendees stayed after the workshop for additional discussion among the cities **Corporation Yard SWPPPs:** Los Gatos Corp Yard Walk-Thru June 2nd, 2009 Attendance: (1) Town of Los Gatos Public Works Staff and (2) WVCWP Staff Leader: WVCWP Inspector/Assistant & WVCWP Manager Topics: ▪ Review SWPPP ▪ Proper Spill Handling/Cleanup ▪ Secondary Containment ▪ Vehicle Washing ▪ Disposal of and Record Keeping of Products Containing Mercury (Mercury Booklet) ▪ Pesticides; Training, Record Keeping, and Storage ▪ Street Sweeping Data ▪ E-Waste Drop Off now at Goodwill Drop Off Sites ▪ Sign In Log; including name and job title

Rural Public Works Activities Program Evaluation				
Stormwater BMPs are discussed in pre-construction meetings with contractors; the Town inspects all contracted rural public works work in its jurisdiction and ensures the use of stormwater quality and erosion control BMPs. No CIPs involving Rural Public Works were conducted this year. Maintenance work included clearing of shoulders to prevent erosion and debris runoff during the rainy season. When future construction of Rural Public Works takes place, measures will be implemented for erosion prevention. All CIP projects involving rural road work includes specific guidelines on stormwater BMP's as a part of the bid package and construction documents.

C.3.f Hydromodification Management Plan				
HMP – Hydrograph Modification Mngmt Plan	C.3.f	Town staff will continue to track HMP progress and implement its requirements for qualified Group 1 projects that may cause increased erosion or other related impacts.	The Town of Los Gatos did not have any HMP Projects in FY08-09.	Civil Engineer staff
Training		Continue to provide incremental training on HMP requirements to City staff after adoption of the MRP via SCVURPPP workshops and/or WVCWP in-house staff training.	To stay informed of the most recent HMP developments, the WVCWP Mgr participates in the C3PO AHTG meetings. Proposed revisions to the HMP were reviewed during the West Valley Clean Water Program's Meetings in FY08-09.	SCVURPPP/ Eng Div / Plan. Div.— WVCWP to coordinate
HMP Reporting	C.3.f.viii	Summarize development and implementation status for projects incorporating HMP measures and provide details to WVCWP staff for Annual Report.	The Town of Los Gatos did not have any HMP Projects in FY08-09.	Town's WV Rep & Assoc. Civil Engineer
C.3.g Waiver and Compensatory Mitigation Program				
Waiver Program or Alternate Compliance	Permit C.3.g.	Currently, **WV Communities** do not offer an alternate compliance option to developers of Group 1 or Group 2 projects. No changes are expected to this approach in FY 08-09 unless regional watershed projects become available to support.	Currently, the Town of Los Gatos does not offer an alternate compliance option to developers of Group 1 or Group 2 projects. No changes are expected to this approach in FY 09-10 unless regional watershed projects become available to support.	Eng Div
C.3.h Alternate Certification				
Alternate Certification reporting	Permit C.3.h	Report on all projects that are certified by someone other than municipal staff and the mechanism for ensuring outside certifiers are qualified.	Currently, the Town of Los Gatos does not offer an alternate compliance option to developers of Group 1 or Group 2 projects. No changes are expected to this approach in FY 09-10 unless regional watershed projects become available to support.	

PLANNING PROCEDURES

Los Gatos

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2008-2009 ANNUAL REPORT

Source	Task Source	Work Plan Tasks	Accomplishments	Responsible Party
C.3.j Site Design Guidance				
Site Design Guidance	Permit C.3.j	Summarize the status of revision and implementation of site design measures guidance and standards.	Town is currently going through the general plan update process, anticipated completion date is 2010. Site design measures guidance and standards will be addressed.	Assoc Planner & Town's WV Rep, PPW staff Engineer
C.3.l General Plan Update				
General Plan	Permit C.3.l	At next planned update, revise General Plan to reflect principles and policies to address requirements for development projects.	Town is currently going through the general plan update process, anticipated completion date is 2010	Assoc Planner & Town's WV Rep
C.3.n Reporting Requirements				
C3 Project Reporting	Permit C.3.n.i.	Report details required by the Permit for all Group 1 and Group 2 projects that received final approval for construction during FY08-09. E.g. list project name, location, type, deemed complete date, final approval date prior to grading, project size, amt impervious surface, watershed, developer name and S/W measures and treatments used.	See the attached table, Part 1 of the Los Gatos New and Redevelopment Projects Reporting Forms.	PW Engr. Div. Staff to collect data
C3 Project Reporting	Permit C.3.n.ii.	For "regulated" projects provide details in the annual report on the S/W treatments used, the sizing criteria, O&M verification status, any follow-up action, site design measures used, source control measures used and pesticide reduction measures	See the attached table, Part 2 of the Los Gatos New and Redevelopment Projects Reporting Forms.	Town's WV Rep provide data to WVCWP staff

PLANNING PROCEDURES

		required.		
Report Pesticide Reduction Measures	NPDES Permit Provision C.3.n.iii	For "regulated" projects, report on the percentage of projects for which pesticide reduction measures were required.	Los Gatos has an irrigation efficiency ordinance to promote use of less water and minimize runoff that can carry pesticides/fertilizers into local waterways. Town Code 26.40.030– encourages protection and preservation of native species, natural areas, and designs to minimize irrigation runoff. The Town's "Hillside Design Guidelines' limit the amount of non-native plants that can be used in new developments. A pesticide reduction fact sheet is given to all project applicants.	Civil Engr. & Assoc Planner provide info to WVCWP staff

Planning Procedures Evaluation

Town Public Works staff continues to coordinate reviews with the Community Development Department to ensure that all development projects have written conditions to meet storm water quality requirements. In addition, Public Works staff assists developers and their design team members with C.3 technical and legal issues (specifically the BMP O&M agreement).

The Town's Public Works Director has followed the development of proposed MRP requirements with assistance and analysis by the Sr. Engineering Technician and the Public Works Analyst. Town staff, as part of West Valley monthly meetings, continues to examine and discuss feasible ways to implement some of the more challenging C.3 requirements proposed in the draft MRP.

In FY08-09 the Town of Los Gatos participated in the Water Resources Protection Collaborative. The Collaborative was enacted in an effort to clarify and streamline local permitting for streamside activities, representatives from the water district, cities, the county and business, agriculture, streamside property owner and environmental interests created a partnership known as the Water Resources Protection Collaborative. The approach makes a clear distinction regarding governance. Municipal organizations will continue to exercise their land use authority. The Collaborative developed model Guidelines and Standards which will serve as a basis for the District and municipal organizations to implement as appropriate. Each municipal organization will develop and apply these standards as needed for their jurisdiction. The Town of Los Gatos adopted these guidelines in early 2008.

Source	WP Task	Work Plan Tasks	Accomplishments	Responsible Party
	URMP	Staff Training Participate in and support RWQCB and Program- sponsored workshops on erosion control and construction BMPs; support distribution of related materials. Construction inspectors must attend Erosion Control and Site Inspection Meeting every two years.	**TOWN OF LOS GATOS: Construction Stormwater Management Compliance Workshops** Thursday November 20th and Friday November 21st Quinlan Community Center, 10185 N. Stelling Road, Cupertino, CA, 95014 8:00 am – 3:00 pm (Attendees: Town of Los Gatos Engineering Inspector, Town of Los Gatos Assistant Civil Engineer, WVCWP Manager, WVCWP Assistant) **Construction General Permit Workshop** May 27, 2009 (WVCWP Manager Attended)	WVCWP to coord w/ SCVURPPP; inspectors to attend training
	URMP	Construction Inspections Continue construction site inspections and follow-up for stormwater issues (i.e., mud tracking, mat'l storage, housekeeping, etc.). Document sites inspected and note any violations through final resolution. Report violations to WVCWP for Annual Report.	Town Code Sec. 12.20.010 et seq., requires erosion and sediment control materials to be onsite by October 1st and in place before October 15th. Once-a-week inspections, and additional inspections during and after every major storm, are carried out by Town Engineering staff on all sites with active grading permits. During FY08-09 the Town had 23 active grading permits. Engineering Inspectors check for erosion control, proper materials storage and disposal and other construction-related Best Management Practices. The Town of Los Gatos Building Inspectors handle storm water issues as they come up, but have no procedure currently for documenting violations or the compliance method. Only sites that do not comply in a reasonable time are cited and documented	Eng & Bldg Inspectors WV Inspector by referral

BMP Maint	1
	7

The Construction Inspection Program currently works well due to coordinated efforts between the Town's engineering inspectors and the WVCWP Inspector. Potential incidents reported by other agencies or citizens, are inspected and re-inspected until resolution is achieved.

The Town of Los Gatos noted an estimated 70 stormwater violations during construction site inspections in FY08-09. The totals for stormwater violations in FY08-09 are higher because the totals came directly from the Town of Los Gatos construction site inspection reports. In previous years the number of stormwater violation came only from incidents that were reported to the WVCWP Inspector. Construction related incidents the WVCWP Inspector reported to in FY08-09 can be found in the ICID section of this report.

In FY07-08 Six ICID reports were found to be at construction sites during FY0708, and this is comparable to last year, when the WVCWP Inspector responded to six (6) construction-related incident calls for the Town. Both of the dirt tracking sites were revisited in FY-07-08. The number of incidents in Los Gatos has dropped from seventeen (17) in FY04-05 to seven (7) in FY05-06 and then to (4) in FY06-07 (within the Town's jurisdiction). Two incidents in FY06-07 were outside the Town's jurisdiction, totaling six incident calls for FY06-07. However, the number of reported incidents may increase when WVCWP's half-time Inspector has time for drive-by inspections to watch for minor remodeling jobs, which do not require a permit. Smaller home improvement jobs i.e. painting, landscaping, re-flooring, re-tiling and concrete replacement, etc. can go unnoticed, but do contribute to stormwater violations. In FY06-07 the WVCWP inspector spent most of his time responding to incident calls and conducting pro-active inspections of restaurants and vehicle maintenance facilities.

Work Plan Self Evaluation Matrix

Source	WP Task	FY08-09 Work Plan Tasks	FY 08-09 Accomplishments	Responsible Party
A. SCV PROGRAM - PROJECTS/SUPPORT				
	NPDES Permit, Provision C.4, C.9 & Pest Mgt Plan (PMP)	a. Watershed Education and Outreach Campaign Help to develop/implement ongoing watershed education and outreach campaign. WVCWP Mgr assists via WEO Ad hoc Task Group. Participate in campaign development and special projects, e.g. community events. Campaign will include funding for educational programs at the Alviso Ed Center and funding for ZunZun performances in local schools. See SCVURPPP FY 08-09 Watershed Watch Work Plan for details.	WVCWP staff participates in WEO AHTG meetings. In late FY 08-09, WVCWP staff was selected to serve as Chairperson of the WEO AHTG for FY 09-10. WVCWP staff has accepted the position. Activities include development and review of outreach and survey materials. WVCWP Staff participated in FY08-09 WW Survey Task Group: reviewed goals, scope & questions in survey against past surveys; reviewed preliminary results and draft report for submittal to AHTG and MC. **Mission College's Eco Day Event** 4/22/09 - Mission Community College, Santa Clara WVCWP staff supported Program activities by working at the Watershed Watch booth, handing out stormwater outreach material, including Watershed Watch brochures and Discount Cards.	WVCWP Staff
	NPDES Permit, Provision C.4, C.9 & Pest Mgt Plan (PMP)	b. Pesticide User Outreach Project Continue to provide funding and to participate in Our Water Our World IPM Store Partnership. Project scope will include items in Program's Pesticide Management Plan based on provision c.9.d of the Permit for outreach to residents, commercial businesses, and pest control operators.	SCVURPPP Co-permittees received CA DPR/ EPA "IPM Innovator Award". Details are available in SCVURPPP "Program" report. Award was presented to the WVC Council members at Council meetings in February (presented to Saratoga City Council in May). **IPM Store Partnership** Within the West Valley Communities, there are 3 garden centers which have elected to participate in the Store Partnership Program:	WVCWP Staff

			- Summerwinds – Campbell - Home Depot – Campbell - Ace Hardware – Los Gatos There are also 4 participating stores which border Saratoga (including 1 also bordering Campbell); these stores are patronized by WVC residents, and are supported by overall funding that WVC contribute to. These additional stores are: - Summerwinds – Cupertino - Home Depot – San Jose – (De Anza Blvd.) - Yamagami's – Cupertino - Orchard Supply Hardware – San Jose (Prospect Rd. – bordered by Saratoga & Campbell) WVCWP provides funding to support ongoing maintenance and training needs for this program. WVCWP provided IPM Fact Sheets to Home Depot in Campbell in June 09. Material was delivered to Home Depot by Program staff as part of the Pesticide User Outreach Project. Fact Sheets Delivered for Display/Distribution: 100 – Wonderful Roses 200 – Safe Use & Disposal of Pesticides 200 – Naturally Managing Pests 100 – Tips for a Healthy Beautiful Lawn 200 – Keeping Cockroaches Out of Your House 200 – Keeping Fleas Off Pets & Out of Yards 100 – *Spanish* – Fleas 500 – Controlling Ants 100 – Controlling Yellowjackets	

			300 – Controlling Aphids in Your Garden 200 – Growing a Healthy Garden to Naturally Manage Pests	
	NPDES Permit, Provision C.9.c.	c. Mercury Pollution Prevention Outreach Participate in the Program's Mercury Pollution Prevention Outreach Work Group and conduct local implementation of the Program's Mercury Pollution Prevention Plan including public education on: 1) negative health and environmental impacts of mercury, and 2) proper disposal of products containing mercury.	WVCWP staff focus in FY 08-09 was on local implementation, since the Program's Mercury PP Outreach Work Group has not been meeting. Local implementation included outreach for free E-waste Recycling Events, mercury-free thermometer distribution, mercury outreach material distribution, and articles on mercury in municipal newsletters. **FREE E-WASTE RECYCLING EVENTS** Recycling of TVs, monitors and all office electronics. These events were organized by the waste contractor for the four WV Communities. **July 2008** CAMPBELL: July 19, 2008 Campbell United Church of Christ, Campbell, CA LOS GATOS: July 19, 2008 Los Gatos United Methodist Church, Los Gatos, CA SARATOGA: July 26, 2008 City of Saratoga North Campus, Saratoga, CA **April 2009** CAMPBELL: April 18th, 2009 Campbell United Church of Christ, Campbell, CA LOS GATOS: April 25th, 2009 Los Gatos United Methodist Church, Los Gatos, CA SARATOGA: April 25th, 2009 City of Saratoga North Campus, Saratoga, CA See "Mercury" section of this AR for details on results	WVCWP Staff

			of these E-waste events. EVENT OUTREACH: During Winter/early Spring of 2008/2009, WVCWP submitted articles which ran in the WVC municipal newsletters, concerning E-waste. This helped publicize the need to make use of use E-waste events. For the July 2008 events, WVCWP publicized E-waste disposal on the front page of the cleancreeks.org website. WVC advertise E-waste events in their municipal newsletters when possible. Campbell Profile – Winter 09 – Campbelll Historical Society E-Waste event **THERMOMETERS** **Audubon Wildlife Fair** Cupertino (bordering Saratoga) 10/25/08 Mercury-free thermometers, along with mercury outreach materials, were provided to parents attending WVCWP Enviroscape presentations at the Fair. **Thermometer Exchange at LG Farmers Market** Los Gatos – 5/3/09 WVCWP coordinated an exchange which was staffed by Town of LG and City of San Jose Environmental Services Dept. See "Evaluation - *SCV Program Projects/Support* " section (below) for details and see "Mercury" section of this AR for details on results of these Thermometer events.	

			Mercury Outreach - Newsletters In Winter 2009, prior to the nationwide switch to digital television, WVCWP provided an article to all WVC municipal newsletters on proper TV disposal, and environmental impacts of mercury. The article was printed in the municipal newsletters for Campbell, Monte Sereno and Saratoga. (See 'Press Releases' row, below, for details) **Outreach Materials & Thermometers** Mercury outreach materials and solar and mercury-free thermometers were distributed at community events. See "Materials Distribution" below (B. 'General Outreach', a.) Mercury Informational Material was handed out to Corp Yard Staff in July 2008; along with a flyer reminding staff to properly dispose of mercury containing thermostats/ switches. See "Mercury" section of this report for additional details	

Public Information/Participation Program EVALUATION - *SCV Program Projects/Support*

Mercury Outreach – Local Implementation of Mercury Pollution Prevention Plan

WVCWP with Sierra Club at Audubon Wildlife Fair:

Sierra Club members in attendance expressed strong interest in helping to distribute these thermometers; however the Club does not have funding to purchase these themselves for distribution. If mercury-free thermometers could be made available to the local Sierra Club group (Guadalupe Group of the Loma Prieta chapter) they would distribute them at a variety of events: Earth Day booth, travel presentations (usually held at Saratoga Library), and club events, such as Annual Group Awards & Wine-Tasting event. This initiates the question of whether it would be effective to recruit stakeholder groups to help at thermometer exchange events, or to distribute mercury-related (i.e fluorescent bulb recycling) information at stakeholder activities/events.

WVCWP with Town of Los Gatos: Thermometer Exchange at Los Gatos Farmer's Market

Residents attending the Farmer's Market were pleased to learn the Town was collaborating with the City of San Jose for this event.

WVCWP has coordinated with the other participants to hold this event again in FY 09-10. It will be held in conjunction with "Keep Los Gatos Beautiful" month in April 2010; this will allow for better outreach opportunities to publicize the event and encourage increased participation.

Based upon positive response from residents, WVCWP, WVC and San Jose Environmental Services Dept. have coordinated additional events in FY 09-10 at various venues. Efforts will be made to increase publicity for these events; some will be held mid-week and increased publicity may be needed in order to generate a turnout. Effectiveness of holding mid-week events will be evaluated.

B. WVCWP PROJECTS

GENERAL OUTREACH

General	NPDES Permit, Provision C.4 and C.9	a. Distribute Materials. Distribute public information materials at civic centers, libraries, building and planning department counters and similar venues. Maintain a website (and phone request line) for public requests and distribution of materials.	**DISTRIBUTION AT MUNICIPAL FACILITIES** CAMPBELL • 25 Grow It Guides • 50 Pool & Spa Brochures LOS GATOS • 25 Grow It Guides • 50 Pool & Spa Brochures • 100 Watershed Watch brochures MONTE SERENO • 15 Grow It Guides • 25 Pool & Spa Brochures • 25 Watershed Watch brochures • 25 Beneficial Bugs brochures with native seed packets attached SARATOGA	WVCWP Staff

			• 25 Grow It Guides • 25 Pool & Spa Brochures **<u>'Car Wash Kit' flyers at Municipal Facilities</u>** June 2009 (updating previous flyers) • Campbell (Planning Counter) • LG City Hall (2x: 1 @ Public Works, 1 @ Planning Counter) • MS City Hall (2x: 1 @ Front Counter, 1 @ Post Office) • Saratoga City Hall (1 @ Planning Counter) **<u>Town of Los Gatos Public Works Open House</u>** <u>Town Corp Yard – May 2009</u> -----<u>St. Mary's School 3rd & 4th grade</u> 51 - Watershed Watch Brochures 9 - Anti-Litter Mugs (to adults/teachers), -----<u>Evergreen Elementary 3rd grade</u> 20 - Watershed Watch Brochures 5 - Anti-Litter Mugs (to adults/teachers) -----Town of Los Gatos and WV Sanitation District staff 10 - Anti-Litter Mugs **<u>City of Saratoga Municipal Facilities</u>** <u>January 2009</u> 80 - Anti-Litter Mugs to City of Saratoga staff. (For details on WVCWP-created **Anti-Litter Mugs**, see "WVCWP PROJECTS – Targeted Outreach – n.	

			Outreach Activities for Specific Pollutants - Additional Task – Create Outreach Materials - Mugs" below). **WV Communities E-Waste Recycling Outreach Materials Distributed** **7/19/08 & 7/26/08 E-waste Events:** Flyers were distributed by the waste contractor in all Campbell, Los Gatos, Monte Sereno, and Saratoga resident's monthly bills. **4/18/09 & 4/25/09 E-waste Events** E-Waste Events were advertised in the WV Collection & Recycling (waste contractor) newsletter, distributed to all WV Communities households. **DISTRIBUTED VIA COMMUNITY EVENTS** **LG Presbyterian Summer Camp** Los Gatos July 23rd 25 stormdrain message 'recycled' pencils were given to children & teachers **Coastal Cleanup Day – Volunteer Appreciation Party** 9/20/08 Vasona County Park – Los Gatos 5 - WVCWP Copper flyers with Car Wash Discount Card **9/20/08 WVCWP Creek Cleanup** 15 re-usable grocery bags (purchased from Safeway using their donated gift card for Coastal Cleanup Day)	

			Audubon Wildlife Education Fair 10/25/08 - Audubon McClellan Ranch site, Cupertino, (bordering Saratoga) 30 - Solar Thermometers (mercury-free) 30 - Mercury Brochures 30 - Flyers for Mercury thermometer drop-off locations **Great American Litter Clean up** Los Gatos Creek Park, Campbell 4/18/09 100 - Junk Mail Reduction Kits 100 – 'Oil Rag' printed with oil recycling and HHW info 100 – HHW brochures 100 – E-Waste/cell phone recycling brochures 100 – Mercury brochures 100 – Watershed Watch brochures (watershed pollution around your house) 100 – Beneficial Bug brochures *with* 100 – Calif. native wildflower seed packets (attract beneficial bugs - WV assembled seed packets) 100 – Re-usable Canvas Shopping Bags ("City of Campbell") **Arbor Day Celebration** Saratoga 4/24/09 6 - Watershed Watch Brochures 25 - Beneficial Bug Brochures *with* 25 - Calif native seed packets 31 - Watershed Watch Discount Cards	

			St Thomas of Canterbury Vacation Bible School SJ (between Campbell & Saratoga City boundaries) June 18, 2009 18 - "Pest or Pal?" Activity/ Coloring books **DISTRIBUTION at SCHOOLS** **St. Mary's School** Los Gatos January 15, 2009 35 - Beneficial Bug Brochures *with* 35 - Native Seed Packets 35 - WVCWP Stormwater message 'recycled' pencils, 3 - WVCWP Stainless Mugs 3 - WVCWP Cartoon T-Shirts. **Sedgwick Elementary School "Discovery Day"** Cupertino March 31, 2009 90 - Beneficial Bug Brochures *with* 90 - Native Seed Packets 50 - WVCWP Stormwater message 'recycled' pencils, 40 – Watershed Watch notepads **St. Mary's School** Los Gatos May 21, 2009 35 - Beneficial Bug Brochures *with* 35 - Native Seed Packets	

			3 - WVCWP Stainless Mugs **DISTRIBUTION at RETAIL FACILITIES** **Yamagami's Nursery** May 2009 Cupertino (bordering Saratoga) 50 – Beneficial Bug Brochures *with* 50 -- Calif native seed packets **Leslie Pools – Los Gatos** 30 -- Pool & Spa Brochures **Tradewind Spas – Los Gatos** 20 – Pool & Spa Brochures **DISTRIBUTION to/for STAKEHOLDERS** **Santa Clara County Chapter, Sierra Club** 50 – Beneficial Bug Brochures *with* 150 -- Calif native seed packets (4 different varieties) **San Francisco Estuary Project Art Contest** As requested by the SF Estuary Project, WVCWP staff helped to publicize the San Francisco Estuary Project Art Contest. The contest will provide SF Bay/wetlands-related artwork for use in outreach material and websites. The Contest Flyer, and details, were e-mailed to Recreation Depts. for distribution to art classes: -City of Campbell, -Town of Los Gatos	

			-City of Saratoga Flyer + info were sent to WV Community College, and were distributed to summer art classes at the college. Flyer + info were sent to the art teacher for Canyon Heights Academy, who has expressed interest in environmental art. The flyer was posted at: • Campbell Cmmty Ctr • Campbell Library • Los Gatos Library • Monte Sereno Post Office • Saratoga Library	
			CAMPBELL Distribution of Seed Packets 1set of seed packets mailed 4/7/09, per telephone request.	
			LOS GATOS Distribution of Seed Packets In response to a WVCWP article on Beneficial Bugs, printed in the Los Gatos “Vista” newsletter, WVCWP received calls for seeds which attract Beneficial Bugs. Calls began immediately after the newsletter was received in Los Gatos households. Seed packets for 4 different plant species were available. 1 set of packets mailed 4/7/09, per telephone request 1 set of packets mailed 4/8/09, per telephone request 1 set of packets mailed 4/9/09, per telephone request	

			2 sets of packets mailed 4/10/09, per telephone requests 2 sets of packets mailed 4/13/09, per telephone requests 1 set of packets mailed 4/15/09, per telephone request	
			MONTE SERENO Distribution of Seed Packets 1set of packets mailed 4/3/09, per telephone request 1set of packets mailed 4/7/09, per telephone request A Monte Sereno Master Gardener teaches gardening classes at the Saratoga Library. The Master Gardener distributed 30 Grow-It Guides to her class members.	
			SARATOGA Saratoga Rec. Dept offers a gardening class, including instruction on organic and low-maintenance gardening. WVCWP distributed to the classes: 100 - Beneficial Bugs Brochures *with* 100 - Calif native seed packets, (beneficial bug attractants) put together by WVCWP staff Distributed to all Saratoga City Council members during IPM Innovator Award presentation – May 2009 5 – Healthy Gardening IPM Facts sheets *with* 5 - Calif native seed packets, (beneficial bug attractants) put together by WVCWP staff Gardening Classes taught by a Master Gardener (Monte Sereno resident) are held at the Saratoga	

			Library. The Master Gardener distributed 30 Grow-It Guides to her class members.	
General	NPDES Permit, Provision C.4 and C.9	b. Participate in Local Community Events Promote watershed messages by participating in local community events (e.g., farmers market, festivals, creeks clean-ups, etc.).	**LG Presbyterian Summer Camp Enviroscape Presentation** Los Gatos July 23rd An Enviroscape watershed presentation was given for 21 children, ages 2nd – 5th grade. The presentation covered behavior change information for: Trash, Car-washing, Pesticide Use, Pet Waste, Vehicle Fluids 25 stormdrain message 'recycled' pencils were given to children & teachers. **Audubon Wildlife Education Fair – Enviroscape Presentations –** 10/25/08 at Audubon Society McClellan Ranch, Cupertino (bordering Saratoga) Partnered with local stakeholders: SC Valley Sierra Club Chapter and Audubon Society. Audubon sponsors this event, which is held at their facility. Sierra Club shares a table with WVCWP and Sierra Club volunteers assist WVCWP staff. WVCWP gave 10-12 Enviroscape watershed presentations to groups of 4-8 children (ages appx 4-10) throughout the day. Approximately 70-80 children (total) participated in, and watched, the Enviroscape activity. Presentations were also seen by parents, who attended with their children. Presentations covered behavior change information for: Trash, Car-washing, Pesticide Use, Pet Waste, Vehicle Fluids Distributed 30 Mercury Brochures, 30 Solar	WVCWP Staff and available Municipal Staff

			Thermometers (mercury-free), and 30 Flyers for Mercury thermometer drop-off locations to the adults. **Arbor Day Celebration** Saratoga 4/24/09 4/24/09 – Beauchamps Park WVCWP staff was introduced to the attendees (appx. 40 people). Attendees visited WVCWP display where staff discussed runoff issues (including pesticides) and distributed material. Staff also circulated and distributed material. **Town of Los Gatos Public Works Open House** Town Corp Yard – May 2009 WVCWP staff and Town of Los Gatos staff participated in this annual event which helps inform the public, especially students, of the Town's Public Works activities and responsibilities (such as street sweeping). WVCWP presented stormwater-related information, including distributing materials, and answering questions for attendees. Attendees included: St. Mary's School 3rd & 4th grade, 51 students plus 9 parents and teachers. Evergreen Elementary 3rd grade, 20 students plus 5 parents and teachers. **St Thomas of Canterbury Vacation Bible School Enviroscape Presentation** SJ (between Campbell & Saratoga City boundaries) June 18, 2009	

			An Enviroscape watershed presentation was given for 18 children, ages appx. 7-10. The presentation covered behavior change information for: Trash, Car-washing, Pesticide Use, Pet Waste, Vehicle Fluids Each child received a "Pest or Pal" activity/ coloring book.	
			CAMPBELL **Arbor Day** The City of Campbell held it's Arbor Day event on April 21 at Foresthill Elementary School. A tree was planted, and gardening-related material was distributed. The City included IPM and Less Toxic Pest Control in materials that were available for attendees to take home. These included: Pests Bugging You? Grow It Guides The Bay Begins at Your Front Door! IPM Fact Sheets: Tips for a Beautiful Lawn Controlling Ants in Your House Controlling Aphids in Your Garden Keeping Cockroaches Out of Your House **Great American Pick Up** The major community event organized by City of Campbell is its "Great American Pick Up". This year, the City was able to generate attendance by 160 volunteers. The City assembles a re-usable grocery bag full of stormwater/ litter-related materials for distribution to each participating family. 100 of these bags were given out (see "Materials Distributed" row – above).	

			Details of the event are in the Creek Cleanups row of this PI/P section (below) and in the "Trash - Evaluation" section of this AR.	
			LOS GATOS **Town of Los Gatos Public Works Open House** Town Corp Yard – May 2009 Town of Los Gatos staff organized its Annual Public Works Open House for 2009. This event helps inform the public, especially students, of the Town's Public Works activities and responsibilities (such as street sweeping). In addition, the Town invites WVCWP to help insure that information related to stormwater issues is distributed.	
			SARATOGA **Arbor Day Celebration** Saratoga 4/24/09 4/24/09 – Beauchamps Park City of Saratoga staff organized this event, which was held at a neighborhood park. The event was publicized in the municipal newsletter, and included information on trees as a means of preventing runoff and erosion, especially along creekbanks. City staff introduced WVCWP to the attendees (appx. 40 people). Attendees visited the WVCWP display where staff discussed runoff issues (including pesticides) and distributed material. **Creek Cleanups** City staff organized 2 Creek Cleanups (Calabazas Creek and Saratoga Creek). See Creek Cleanups row	

			(below) for details.	
General	NPDES Permit, Provision C.4 and C.9	c. Prepare Newsletter Articles/ Press Releases Prepare and contribute articles/ press releases of interest to the City newsletter and/or local media. Topics such as HHW disposal, pesticides, mercury, trash and copper/nickel will be promoted.	**COMMERCIAL WEEKLY NEWSPAPERS** **News Articles** In FY 08-09 WVCWP worked steadily on developing a good working relationship with the 3 weekly newspapers which cover the 4 WVC. These efforts resulted in 2 effective articles published in FY 2008-2009, and 1 article which was initiated in June 2009 and appeared in July 2009. Articles were printed in the: **Campbell Reporter** (circ. 15,550), the **Los Gatos Weekly** (circ. 41,050) the **Saratoga News** (circ. 13,240). **Creek Cleanup article** In Sept. 2008, WVCWP prepared a press release for California Coastal Cleanup Day and submitted it to the 3 local weekly newspapers. WVCWP worked closely with reporters for all 3 papers to develop articles tailored to each City/Town. WVCWP provided photos and interviews. Articles discussed the Stormwater Permit and the implications of trash in the creeks. Numbers were provided on lbs of trash and recycling collected at the WVCWP site (San Tomas Aquino Creek) and 2 sites in Los Gatos. The Saratoga article also publicized the upcoming Cleanup event in Saratoga Village, sponsored by WVCWP & City of Saratoga. **IPM/ "Green Gardeners" article + Car Wash Kit**	WVCWP Staff

			In February 2009, WVCWP developed a Press Release covering upcoming IPM awards presentations for the 4 WVC, including information and photos on the Green Gardeners program. The article included information on the class series (for anyone interested in enrolling). It also promoted local companies which employ Green Gardeners graduates – so that residents could contact and utilize these graduates. In addition, in the context of describing WVCWP, the article promoted use of the Car Wash Kit for fundraising events. **<u>Car Wash Kit for fundraising events</u>** In June 2009, WVCWP initiated correspondence with the 3 weekly newspapers concerning the need to promote the Car Wash Kit during the summer months. Correspondence continued into July 2009, and resulted in a 'brief', printed in the 3 newspapers, alerting fundraising groups about the need to use the Car Wash Kit. The article generated a number of calls with questions to the WVCWP office. **COMMERCIAL WEEKLY NEWSPAPERS** **Paid Advertising** WVCWP contributed funds to the SCVURPPP's Pollutants of Concern ad campaign. This allowed ads to appear in the three (3) weekly community newspapers for a total of ten (10) weeks in FY 08-09. (Campbell Reporter, Los Gatos Weekly, Saratoga News). In addition, all ads also appeared a 2nd time in the Los	

			Gatos Weekly "Weekend Edition", so that ads appeared a total of twenty (20) times in WV newspapers. September 08: IPM/weeds October 08: Mercury/HHW November 08: Mercury/HHW Dec/January (week of 12/30): Litter Jan 09: Litter February 09: Litter March 09: Litter April 09: IPM/snails June 09 (week of 6/1): IPM/Roses June 09: IPM/Yellow Jackets <u>Recap:</u> IPM 4x Mercury 2x Litter 4x **MUNICIPAL NEWSLETTERS** WVCWP prepared a variety of news articles for use by municipal newsletters in FY 08-09. Articles shared with muni newsletters included: **<u>- Car Washing</u>** An article on Car Washing & Car Wash Kit, along with a WVCWP car washing cartoon, was submitted to *The Saratogan* municipal newsletter for Summer 08. The Car Washing cartoon strip, along with brief text, was printed (July/Aug 08).	

			- **Keep Leaves And Landscaping Material Out Of The Drain** An article was prepared alerting residents that leaves and dirt, although 'organic', should be kept away from gutter, curbs and stormdrains. Graphics included a WVCWP cartoon illustrating construction materials near the gutter. This was submitted to the muni newsletters, and also the WVC waste collection contractor, for their newsletter. The article was printed in: - The Campbell Profile - The Monte Sereno Newsletter - The Saratogan **- Proper TV Disposal** (E-waste & Mercury) An article was written covering the issue of proper TV disposal (with the upcoming digital TV changeover), along with concerns about mercury. The article included details on proper disposal options. This was submitted to the muni newsletters, and also the WVC waste collection contractor, for their newsletter. The article was printed in: - The Campbell Profile - The Monte Sereno Newsletter - The Saratogan **- Arbor Day** – Trees prevent creekbank erosion At the request of the City of Saratoga, an article was developed addressing the subject of how trees help prevent creekbank erosion.	

			Portions of the article were printed in The Saratogan as part of the effort to highlight Arbor Day. **- Less Toxic Pest Control –** Attracting Beneficial Bugs WVCWP prepared an article highlighting the dangers of pesticide use in home gardens, with details and graphics on using 'beneficial bugs' as an alternative to pesticides, and on properly identifying helpful vs harmful bugs. The article and graphics were printed in: - The Campbell Profile - The Los Gatos Vista - The Monte Sereno Newsletter - The Saratogan West Valley Communities' Solid Waste Franchisor (garbage & recycle hauler) publishes a quarterly newsletter and distributes to all households. Topics in Summer 2008: Curbside collection of used motor oil, proper disposal of sharps, universal waste, e-waste, water based paints.	
			CAMPBELL The City of Campbell publicizes "Bike to Work Day" and has a good turnout of employees who participate. This generated a 400 word article on "Bike to Work Day" and City staff, in the Campbell Reporter weekly newspaper (May 27, 2009). The article was titled "City Employees Leave Cars at Home and Pedal to Work". See Attachments *(Bike to Work article)*	

			SARATOGA City of Saratoga was able to generate publication of 2 constructive articles in the local weekly newspaper (The Saratoga News). One article covered Saratoga Mayor Chuck Page's campaign to get businesses to halt use of Styrofoam containers. The article ran on April 28, 2009, and covered issues related to getting Styrofoam out of the trash stream, it's lack of biodegradability, etc. Another article targeted the subject of greener building, and covered a variety of issues, including: -the benefits of green roofs, -recycling construction materials, and -residential 'rain harvesting' systems (which reduce runoff). See Attachments ("Happy Earth Day" & "Mayor Styrofoam") Saratoga Annual Cleanup The City was able to obtain publicity in the weekly 'Saratoga News' promoting the West Valley Collection & Recycling cleanup occurring July 21st through September 26th and to encourage citizens of Saratoga to hold a garage sale to prepare for the annual cleanup. MUNICIPAL NEWSLETTER The City's municipal newsletter, "The Saratogan" makes a consistent effort to include articles related to stormwater issues. The City has included articles generated by WVCWP, and has also used the newsletter to proactively teach	

			residents about issues such as reducing pesticide use in City Parks, encouraging residents to walk and bike using city pathways - rather than driving, etc. In FY 08-09, "**The Saratogan**" municipal newspaper carried articles on: • Trails & Bike Paths: • Less-Toxic Pest Control in City parks • Planting/Preserving Trees to prevent Creekbank Erosion • E-Waste (general) • E-Waste and Mercury (digital TV transisition) • Keeping Leaves and Dirt away from Strormdrains • Beneficial Bugs/ Less Toxic Pest Control/ Proper Pesticide Disposal • Car Washing – proper Residential Washing + Car Wash Kit	
General	CI Item	d. WVCWP Web-Site Maintain and promote cleancreeks.org website; continue to expand and update the site with new educational material and up-to-date topics for the public on HHW, pest management, and other pollutant reduction activities, e.g. for mercury, trash, & copper /nickel	**E-Waste Event** WVCWP updated their website <www.cleancreeks.org> to advertise for the E-Waste event. A thumbnail link to the flyers handed out throughout the cities was posted from 7-14-08 through 7-27-08. **Waste Collection Contractor** Strengthened relationship with WV Collection & Recycle – the waste collection contractor for the WV Communities. WVCR now includes a link to the WVCWP website on the "Links" page of their website. **Car Wash Kit** Worked with Town of Los Gatos to update Car Wash Kit contact information and details on the Town's	WVCWP Staff

			website. All WVC prepared and forwarded municipal seal/logo graphics to WVCWP for use on Watershed Watch website. Received inquiry about Car Wash Kit from Incline Village, NV (Lake Tahoe) – Car Wash Kit info on cleancreeks.org website (WVCWP site) was found via a Google search. In response to inquiry, WVCWP forwarded numerous materials to help NE Lake Tahoe area start a Car Wash Kit program.	
		Municipal Web-Sites	See Sections 7 through 10 of this report for details on municipal website information related to specific pollutants of concern.	

GENERAL OUTREACH EVALUATION

Press Releases/ Media Coverage

WVCWP has been working to re-establish connections with the 3 local weekly papers which are distributed to all WV households (due to a buyout several years ago, these papers had experienced re-organization).

Creek Cleanup Coverage

For FY 08-09, WVCWP staff were able to arrange for coverage of the Coastal Cleanup Day event in all 3 papers. The articles were each tailored to the community covered by that paper. Articles included photos, interviews with staff and volunteers, data on trash collected, and coverage of the Stormwater Permit and water pollution issues related to trash.

The articles reached a total of **69,840 households**, or, all the adult population of the WV Communities (each household may include several adults, older children, etc).

IPM/ Less Toxic Pest Control Coverage

To promote use of the trainees from the Green Gardeners program, WVCWP sent a Press Release to local newspapers in Campbell, Los Gatos & Saratoga. A 630 word article, including a photo, about the Green Gardeners program was published.

The article promoted both the classes (for anyone interested in enrolling) and promoted local companies which employ Green Gardeners graduates – so that residents could contact and utilize these graduates.

This was exactly the type of coverage that WVCWP was looking to secure, because it is hoped that publicity will inspire residents to hire Landscape Design & Maintenance contractors who have been trained in IPM. Since the article included interviews with Green Gardeners graduates, and owners of participating Landscaping firms, the article will make it easy for residents to contact these companies and graduates, and hopefully make a change to less-toxic pest control at their homes.

CITIZEN PARTICIPATION

Public Partici-pation	Trash Monitoring Work Plan	e. Creek Clean-ups Continue implementation of trash monitoring activity during Creek Clean-ups. Conduct a minimum of two clean-up events per yr (i.e. on Coastal Clean-up Day and National River Cleanup Day).	**Coastal Cleanup Day** *San Tomas Aquino Creek @ Westmont High 9/20/08* WVCWP hosted a Cleanup Event at the site where it has regularly hosted this event. Volunteers were instructed in use of Tally sheets, and were provided with clipboards, etc. Working in groups, volunteers were able to pick up trash and carry out trash monitoring. 15 Volunteers attended along with WVCWP and City of Saratoga staff. Details are listed in the Evaluation section (below). The Cleanup Event was covered in articles appearing in 3 weekly newspapers; details are listed in the Newsletter/Press Release section (above). Distributed 15 reusable bags (purchased from Safeway with gift card they donated to WVCWP) **National River Cleanup Day** *San Tomas Aquino Creek @ Westmont High 5/09* WVCWP hosted a Cleanup Event at the site where it has regularly hosted this event.	WVCWP Staff

			Volunteers were instructed in use of Tally sheets, and were provided with clipboards, etc. Working in groups, volunteers were able to pick up trash and carry out trash monitoring. Details are listed in the Evaluation section (below). **Sacred Heart Schoolyard Cleanup** *Schoolyard overlooking Wildcat Creek in Saratoga 4/29/09* Sacred Heart School organized the cleanup, based upon previous events held in partnership with WVCWP. Details are listed in the "Evaluation" row at the end of this table (below).	
			CAMPBELL **Great American Litter Pickup** 4/18/09 - City of Campbell, 5 different cleanup sites Volunteers were instructed in use of Tally sheets, and were provided with clipboards, etc. Working in groups, volunteers were able to pick up trash and carry out trash monitoring. 160 Volunteers participated, working for four hours. Litter was picked up from 5 sites, including the Los Gatos Creek Trail and the Los Gatos Creek County Park. Publicizing done for the event was very successful, as shown by the fact that 160 volunteers participated. Details are listed in the "Evaluation" row at the end of this table (below).	

			SARATOGA **Calabazas Creek Cleanup** *Saratoga-3/22/09* 17 Volunteers from a local church group in Saratoga attended along with The Mayor of Saratoga, Saratoga and WVCWP Staff. **Saratoga Creek at Big Basin Way Cleanup** *Saratoga – 5/26/09* Saratoga staff organized a cleanup at this site which is has been cleaned annually. 9 volunteers from Saratoga Elementary school participated (8 students and 1 teacher). Volunteers were instructed in use of Tally sheets, and were provided with clipboards, etc. Working in groups, volunteers were able to pick up trash and carry out trash monitoring. Details are listed in the "Evaluation" row at the end of this table (below).	
Public Partici-pation	Creek Keepers Campaign started FY00-01	f. "Creek Keepers" Program training Provide training on trash tallying and highlight current trash pollution issues for students and volunteers when they participate in a cleanup event.	See preceding row (above)	WVCWP Staff
TARGETED OUTREACH & SCHOOLS				
Target Schools	Expand Outreach to Teachers and	g. Schools Outreach: Watershed Ed. Curriculum Conduct outreach to K-8 teachers to	WVCWP Staff e-mailed to a number of schools which have hosted Enviroscape presentations in past years. Only 1 school responded – they requested 2 different	WVCWP Staff

	Students	solicit invitations for classroom presentations. Develop presentations as needed based upon grade levels. Presentations will cover watershed concepts, strategies for changing behaviors which affect stormwater pollution, and related concepts and vocabulary.	Enviroscape presentations. Since this does not appear to be the most effective means of outreach, staff will investigate other methods in FY 09-10. 5 schools were contacted – Canyon Heights, Foothill, Sacred Heart, St. Mary's, Lexington WVCWP was successful in outreach to 2 Summer Camp programs held at local churches. Almost 40 students were reached through presentations at these venues. See "Community Events"	
Target Schools	Based on feedback from Teachers and Students	h. Provide Watershed Education in classrooms Conduct water quality protection education or presentations in local schools, using *Enviroscape* and/or other methods to engage students in Watershed campaign messages. Improve presentation format based on teacher/student feedback. * Please note that this section was inadvertently omitted from the FY08/09 work plan and needs to be included in this report.	**St. Mary's School** Los Gatos January 15, 2009 Enviroscape Presentation to 35 Fifth graders. WVCWP Assistant gave a watershed pollution presentation using the Enviroscape to 35 Fifth graders at St. Mary's School in Los Gatos. Topics covered included: Definition of Watershed, Storm Drain Vs. Sewer, Water Cycle, Urban Run-off, and pollutants of concern. Distributed 35 beneficial bug brochures w/native seed packets, 35 WVCWP pencils made from recycled materials, 3 WVCWP Stainless Mugs, 3 WVCWP Cartoon T-Shirts. **Sedgwick Elementary School "Discovery Day"** Cupertino March 31, 2009 4 Enviroscape Presentations WVCWP gave 4 Enviroscape Presentations to approximately 90 students in the 2nd, 3rd, 4th, and 5th grades.	WVCWP Staff by arrangement w/ Teachers

			Topics covered included: Definition of watershed, Storm Drain Vs. Sewer, Water Cycle, Urban Run-off, pollutants of concern and "How to help reduce watershed pollution". Distributed 90 beneficial bug brochures w/native seed packets, 50 WVCWP Pencils made from recycled materials, and 40 Watershed watch notepads. **St. Mary's School** Los Gatos May 21, 2009 Enviroscape Presentations WVCWP Assistant gave watershed pollution presentations, using the Enviroscape, to 30 Kindergarteners (2 classes – 15/ class) at St. Mary's School in Los Gatos. Topics covered included: Definition of watershed, Storm Drain Vs. Sewer, Water Cycle, Urban Run-off, and pollutants of concern. Groups of students were rotated through the presentations. For those not in the rotation, a "Litter Pickup" activity was supervised by the teachers. WVCWP provided litter grabbers, gloves & trash bags. Students spread throughout the school grounds, picking up litter. The school grounds were generally very clean -- hardly any litter was found and students were not able to fill 1 trash bag. Teachers pointed out storm drains, explained how litter gets into them, and flows to creeks. Distributed 35 beneficial bug brochures w/ native seed packets, 3 WVCWP Stainless Mugs,	

		Additional Outreach to Schools	**Car Wash Kit for fundraising events** Since Car Wash fundraisers are frequently held at school sites, or sometimes by school-based groups using other sites, in FY 08-09 WVCWP pursued a concentrated outreach effort to schools on this subject. A flyer (specific to each municipality, and listing the relevant muni ordinance) and a letter, were e-mailed for dissemination to all schools in the WVC. Via correspondence with 2 High School District Offices and 3 Elementary School District Offices, the flyers and letters were sent to Facilities Maintenance staff and front office staff at: **High Schools** CAMPBELL – 6 HS school sites LG-STGA – 3 HS school sites **Elementary Schools** CAMPBELL – 12 Elementary & Middle School Sites LOS GATOS – 5 Elementary & Middle School Sites SARATOGA - 4 Elementary & Middle School Sites See Attachments – (*Car Wash Flyer* and *Car Wash Letter*)	
TARGETED OUTREACH				
Targeted Business	Permit Provision C.4	i. Education – Businesses Distribute BMP materials during WVCWP inspections of food facilities and automotive businesses. Discuss relevant educational material with businesses cited for potential stormwater violations.	The WVCWP Inspector distributed BMP materials to all restaurants and food facilities that were included in pro-active IND inspections in FY 08-09. **Good Cleaning Practices' (poster & packet)** Poster depicts proper mat washing techniques,	WVCWP Inspector

			Materials distributed at other inspections (IND and IC/ID and follow-ups) included: - Vacu-Boom flyer - Watershed Watch brochures - Construction sites – "Blueprint for a Clean Bay" – BMPs for Construction Sites - Preventing Stormdrain Pollution: Guidelines for Commercial & Light Industrial Facilities" booklet (SCVURPPP) – covers painting, car-washing, chemicals, etc. WV Inspector distributed 50 Pool & Spa BMP brochures to retail outlets during FY 08-09. These will help educate retail staff, and are for distribution to retail customers. **Leslie Pools – Los Gatos** 30 -- Pool & Spa Brochures **Tradewind Spas – Los Gatos** 20 – Pool & Spa Brochures	
Reporting	NPDES Permit, Provision C.4	j. Evaluation/ Reporting Document or estimate (as feasible) numbers of residents, students, municipal staff etc. reached by outreach efforts. Provide anecdotal feedback from audiences. Report number of calls, website hits and circulation or readership for newspapers or newsletters.	**Residents Reached via Articles** **COMMERCIAL NEWSPAPERS** Creek Cleanup articles were printed in the Sept 30, 2008 issues of the 3 local weekly newspapers. An article covering Green Gardeners, how to hire graduates trained in Less Toxic Pest Control, and info on the WVCWP Car Wash Kit was printed in the Feb. 17, 2009 issue of the 3 local weekly newspapers. Circulation for local weeklies: **Campbell Reporter** (circ. 15,500) **Los Gatos Weekly** (circ. 41,050)	WVCWP Staff

			Saratoga News (circ. 13,240) WVCWP paid for ads to run in these papers as part of the SCVURPP media campaign. Campbell Reporter & Saratoga News: 1x / mo for 10 months Los Gatos Weekly: 2x/mo for 10 months **MUNICIPAL NEWSLETTERS** Circulation numbers for municipal newsletters are: 23,000 Campbell households 15,208 Los Gatos residents and businesses 1,225 Monte Sereno households 12,600 Saratoga households **WASTE CONTRACTOR** West Valley Collection & Recycling is contracted to provide waste collection services for the West Valley Communities. The contractor has been proactive in providing free E-waste recyling events and in publicizing those events through their quarterly newsletter and through bill inserts. The newsletter also include additional in on the importance of recycling batteries and e-waste and similar subjects. The newsletters and bill inserts are sent to appx. **27,000** WV households. **Students Reached via Enviroscape Presentations** WVCWP staff gave Enviroscape presentations in classrooms, at summer 'church camps', and at community events. Appx. **274 students** learned about	

			watersheds and the need for behavior changes related to water pollution via this medium.	
Training	FY 08-09 Work Plan	k. Staff Training Conduct or provide WVCWP staff training/meetings to prepare for school presentations, community events & responses to public requests.	**Enviroscape** A new WVCWP staff member was trained on use of the Enviroscape. Training covered set-up and breakdown of the watershed model, use of several curriculums and associated visuals on the Enviroscape. A similar training was provided to City of Cupertino staff. **Car Wash Kit** WVCWP provided training to City of Monte Sereno front office staff on the Car Wash Kit program, so that staff will be able to handle public inquiries on the program.	WVCWP staff
Training	Additional Task – not in Work Plan	k. Staff Training Obtain staff training on effective outreach methods and materials	2 WVCWP staff attended the EPA's National Conference for Non-Point Source & Stormwater Outreach Portland OR – May 2009. WVCWP Program Manager attended a full day of training on "An Evaluation Primer for Stormwater Programs" and "Overview of Social Indicators Evaluation System and Applied Survey Development Skills". WVCWP Program Assistant provided a training for Conference attendees, and attended 2 ½ days of training on a variety of subjects. See Training Table for details	
Training	Additional Task – not in Work Plan	k. Staff Training Provide staff training on public education to a national audience of stormwater	EPA's National Conference for Non-Point Source & Stormwater Outreach Portland OR – May 2009	

		professionals	WVCWP responded to a request for abstracts showcasing successful, low-budget public education campaigns. EPA requested that WVCWP address the conference with their presentation showcasing use of cartoons for dissemination of stormwater messages. WVCWP staff created and delivered the PowerPoint presentation, which was very well-received. It is anticipated that this method of outreach will definitely be initiated in over 6 programs throughout the country. See Evalution Section (below) for details on positive feedback, and potential implementation of presentation concepts by programs throughout the U.S.	
Target Small gardening businesses	NPDES Permit, Provision C.4, C.9 & Pest Mgt Plan (PMP)	I. Training staff of small gardening businesses (Work within Program's Watershed Education and Outreach group and sub-groups)[1] Continue to assist with development of strategy started in FY06-07 to implement a campaign & training program (in Spanish & English) designed to elicit participation of staff from very small landscape businesses (typically 1-8 employees) often serving homeowners. Help fund and/or support campaign locally.	WVCWP staff participates in WEO. WVCWP Program Manager participates in the IPM Ad Hoc Task Group on behalf of the WVC. Project implementation and projects for consideration, which are discussed in the AHTG, are presented to WVC staff for appropriate follow-through. In FY 08-09, WVCWP staff were involved in meetings aimed at developing coordination between the "Bay Friendly" program, and the "Green Gardeners" program. In FY 08-09, WVCWP offered funding for 6 scholarships to reduce the cost of the Green Gardener class to attendees (enough for 6 reduced fee scholarships). To promote use of the trainees from the Green Gardeners program, WVCWP sent a Press Release to local newspapers in Campbell, Los Gatos & Saratoga.	WVCWP Mgr in cooperation with SCVURPPP's Pi/P sub-groups

[1] Funded by all Co-permittees each year.

			A 630 word article, including a photo, about the Green Gardeners program was published. The article promoted both the classes (for anyone interested in enrolling) and promoted local companies which employ Green Gardeners graduates – so that residents could contact and utilize these graduates.	
Target 16-24 yr-olds for Anti-litter messages & behavior changes	Trash Advisory Committee	m. Trash Advisory Committee (TAC) Continue to participate in development and implementation of a campaign targeting 16 to 24 yr-olds for anti litter messages to elicit changes in behaviors. Support and implement campaign locally. (Ref Section 7 of this work plan; Watershed Education & Outreach Campaign)	The "TAC" was renamed 'Silicon Valley Anti Litter Campaign (SVALC). WVCWP staff attended "General Core Group" and the "Education Sub-Group". In early FY 08-09, WVCWP staff were involved in developing a slogan and website for this campaign. WVCWP staff researched slogans in other states & programs, interviewed males in the target age group, and researched web site options. Notes were presented to group. A subset of the SVALC/ WMI Trash Sub-Group has been meeting to try and begin a new 'trash action group'. WVCWP staff have started attending these meetings; current goals are to develop a focus and action plan.	WVCWP staff in cooperation with SJ & SCC Trash Advisory Committee
			CAMPBELL Campbell Public Works Director has been meeting with a subset of the SVALC/ WMI Trash Sub-Group to try and begin a new 'trash action group'. City of Campbell staff attends the Great American Pick Up Implementation Group. Meetings are held leading up to the Great American Pick Up event, which Campbell participates in.	
Additional Outreach	Cross Ref. Sections 7-10 of this Work	n. Outreach Activities for Specific Pollutants See Sections 7 through 10 of this Work	**HIGHLIGHTS** **PESTICIDES** WVCWP staff developed and put together packets of	WVCWP Staff

	Plan	Plan, for additional Public Education and Outreach activities related to specific pollutants of concern.	native seeds for beneficial bugs, to partner with IPM printed material. See below: "Additional Task". Articles on elimination and disposal of diazinon/ chlorpyriphos and on less-toxic pest management were printed in the municipal newsletters for each WVC. A press release on the Green Gardeners program was submitted to local weekly papers and resulted in a 630 word article promoting less-toxic pest control. WVCWP contributed funding for IPM-message ads which ran in the weekly papers. **COPPER** Car Wash Kit flyers, and information on the need to use a Kit for car wash fundraisers, was distributed to staff at 31 schools. A pilot piece with Car Wash Discount Card was developed for residents. See below: "Additional Task". The Car Wash Kit was publicized in the context of a WVCWP article in the 3 weekly newspapers (Feb. 09). Further discussion with the paper in June 09 resulted in a short article on the Kit in July 09. **MERCURY** An article on proper TV disposal was developed and published in several of the municipal newsletters, prior to the switch to digital TV. **TRASH** WVCWP staff developed graphics and messages for an "Anti-Litter" mug. 230 mugs were purchased; 80 of these were for the City of Saratoga which distributed them to staff to help reduce litter, and to publicize the anti-litter message. The remaining 150 mugs were distributed by WVCWP through various events and outreach activities. (see Trash, "Additional Task"	

			below) WVCWP gave out 15 re-usable grocery bags, and began researching the possibility of purchasing re-usable bags, with an anti-litter message, for use as outreach pieces in FY 09-10.	
Additional Outreach	Cross Ref. Sections 7-10 of this Work Plan	n. Outreach Activities for Specific Pollutants Additional Task – Create Outreach Materials	**NEW IPM Outreach Material** In FY 08-09, WVCWP devoted staff time to a new campaign: creation and promotion of a new outreach product with the intent of providing material that would be desirable to residents, and which could be attached to printed information, to encourage residents to pick up and read the printed info. Staff purchased seeds of pest-resistant CA Native plants, which attract "Beneficial Bugs". Staff created envelope labels with graphics, planting information, and pest info for the seeds seeds – Attachments – *Seed Labels*). WVCWP partnered with stakeholders (local Sierra Club members) to apply the labels to envelopes, and fill them with the bulk seeds. A total of **599 seed** packets were distributed via WVCWP in FY 08-09. The seeds were promoted via articles in WVC municipal newsletters, including photos of beneficial bugs. The articles resulted in a total of 24 seed packets sent out due to resident requests. At events, the seed envelope/printed material packets appeared to be popular. Distribution was as follows: Sierra Club: 150 (will be distributed at events, such as Earth Day)	

			Campbell's Great American Litter Pickup: 100 Saratoga Rec Dept. Gardening Class: 100 City of Saratoga Arbor Day: 25 Yamagami's Garden Center: 50 St Mary's School (Enviroscape Presentation) 1/09: 35 St Mary's School (Enviroscape Presentation) 5/09: 30 Sedgwick School "Discovery Day" Enviroscape: 90 Calls from residents: 24 **Total: 599** Details are listed in the "Evaluation" row at the end of this table (below).	
Additional Outreach	Cross Ref. Sections 7-10 of this Work Plan	n. Outreach Activities for Specific Pollutants Additional Task – Create Outreach Materials	**NEW Copper Outreach Material** A pilot piece with Car Wash Discount Card was developed for residents. The Car Wash/ Copper brochure contained a Car Wash Discount Card (developed by Watershed Watch) and a list of participating commercial Car Washes, along with info about copper and toxicity. However, the piece was developed shortly before that particular Car Wash Discount Card was due to expire, so a minimal number were produced (via inkjet printer). WVCWP will evaluate whether to update and re-print the piece. The goal is to provide residents with printed materials that involve a useful item (such as the discount card) which will encourage people to read the attached stormwater pollution messages.	
		n. Outreach Activities for Specific Pollutants Additional Task – Create Outreach	**NEW Anti-Litter Outreach Material** WVCWP staff developed graphics and messages for an "Anti-Litter" mug. Graphics including representation	

		Materials	of a creek, and the message "Clean Creeks… It's In Our Hands – Save a Cup". WVC and WVCWP were listed on the mug, with WVCWP logo and web site address. (See Attachment – Mug Graphics) 230 mugs were purchased; 80 of these were paid for and used by the City of Saratoga which distributed them to staff to help reduce litter, and to publicize the anti-litter message. The remaining 150 mugs proved to be very popular and were distributed by WVCWP through various events and outreach activities. <u>MUGS DISTRIBUTED</u> *ICID Training March 9th- 11 mugs given to municipal staff *WVCWP hosted a SCVURPPP Training - 10 mugs given to attendees <u>*Los Gatos Open House May 2009</u> - St. Mary's School: 9 Mugs to parents & teachers -Evergreen Elementary: 5 mugs to parents & teachers - Approx. 10 mugs to Los Gatos and WV Sanitation District staff * Calabazas Creek Cleanup March 2009 (Saratoga) - 18 mugs to volunteers *5 mugs to City of Monte Sereno Employees *WVCWP Annual Streets and Storm Drains Training- 8 mugs to attendees and presenters. *National Rivers Cleanup Day- approx 18 mugs to volunteers *Watershed Presentation at Vacation Bible Camp in Campbell June 2009 - 5 mugs to teachers/ counselors	

			*St. Mary's School Enviroscape presentations – 6 mugs to teachers	

Public Information/Participation Program EVALUATION – WVCWP PROJECTS

RESULTS for WVCWP PRESENTATION "A Stormwater Campaign in Cartoons" at EPA NT'L CONFERENCE – MAY 2009

EPA's National Conference for Non-Point Source & Stormwater Outreach - Portland OR

WVCWP responded to a request for abstracts presenting successful, low-budget public education campaigns.

WVCWP's presentation showcasing use of cartoons for dissemination of stormwater messages was accepted as a training session at the conference. WVCWP staff created and delivered the PowerPoint presentation.

Attendees: Appx 80-90 stormwater professionals from around the US and US Territories chose to attend this presentation.

No feedback was solicited by, or was provided by EPA to, WVCWP – however, a number of participants made the effort to contact WVCWP and provide positive feedback:

Feedback: 11 people took the initiative to approach WVCWP staff in the 24 hours after the presentation and expressed appreciation for the information conveyed.

Implementation: 6 stormwater programs approached WVCWP staff later in the conference, and declared that they **will** try this concept in their own outreach efforts

Areas which plan on following concepts outlined in WVCWP's presentation:

- Sustainable Business Coordinator *for* Environmental Coalition of South Seattle (NGO which is contracted by municipalities to work with businesses and schools -- distributes spill kits, provides public education, etc. throughout western Washington)
- Stormwater Educator *for* Muncie Sanitary District, Delaware County Stormwater Management, IN
- Water Resource Educator *for* East Metro Water Resource Education Program (Eastern Minnesota)
- Surface Water Plan Educator *for* Washington State Univ. Extension, Jefferson County, WA
- Stormwater Education Coordinator *for* State of KY MS4s Kentucky Environmental Education Council & Kentucky Transportation Cabinet
- Community Relations Specialist *for* City and County of Honolulu, Department of Environmental Services

****

RESULTS for CREEK CLEANUPS

SAN TOMAS AQUINO CREEK CLEANUP @ WESTMONT HIGH SCHOOL EVENT SUMMARY

Saturday September 20th, 2008: In conjunction with International Coastal Cleanup Day

Summary of Survey Completed by Volunteers

(Based on 15 volunteer response sheets)

Most common pieces of trash collected: Cans, bottles, cigarette butts, paper, and food wrappers.

Least common pieces of trash collected: Plastic, rubber.

Most unusual pieces of trash collected: Home-made rocket from plastic bottles, dollar bills.

WVCWP Contributions:

WVCWP provided Trash Tally Sheets with clipboards, Litter Grabbers, and gloves & trash bags (via the Clean A Creek Action Group)

Approximately: 15 recycled shopping bags , juice drinks, and snacks (donated by Whole Foods of Campbell) 10 T-shirts (donated by WVCWP)

Results:

16 volunteers worked at the cleanup for 4 hours each. At a minimum wage of $8.00 an hour this would have cost $512 in temporary labor.

120 lbs of Trash was collected

170 lbs of Recyclables were collected

Total Collected= 290 lbs

Volunteer Feedback:

The Girl Scout troop which volunteered was made up of Scouts from other communities outside the WV area; the troop leader expressed appreciation that this site was very well-organized (compared to other sites where the troop has volunteered).

The Troop Leader stated that they hope to participate in WVCWP cleanups in the future.

CALABAZAS CREEK CLEANUP IN SARATOGA

March 22nd, 2009

A Church group approached the City, asking to do a Clean-up

WVCWP arranged the site for them w/ SCVWD, and provided litter grabbers, trash bags and gloves

WVCWP & City of Staff supervised – Saratoga's Mayor also participated

17 volunteers attended

Summary of Survey Completed by volunteers.

Most common pieces of trash collected: Plastic bottles, food wrappers, paper.

Least common pieces of trash collected: Plastic, rubber.

Most unusual pieces of trash collected: Orange construction cone, part of a car's exhaust.

WVCWP contributions: 18 Stainless WVCWP Mugs

Results: Approximately 15 bags of Trash.

Total: estimated 500lbs – includes several heavy metal objects

SACRED HEART SCHOOL CLEAN UP (K-8) – Saratoga (the school includes students from all WVC)

April 29, 2009

The cleanup took place on school grounds, inside the cyclone fencing, overlooking Wildcat Creek

Sacred Heart School organized the cleanup, based upon previous events held together with WVCWP.

WVCWP contributions: WVCWP staff provided litter grabbers, gloves and trash bags.

Results: Appx 60 lbs of trash were collected.

GREAT AMERICAN LITTER PICKUP - CITY OF CAMPBELL

April 18, 2009

Volunteers were instructed in use of Tally sheets, and were provided with clipboards, etc. Working in groups, volunteers were able to pick up trash and carry out trash monitoring.

160 Volunteers participated, working for four hours.

PW figures that at at minimum wage of $8.00 per hour that works out to $5,120 worth of temporary labor.

Litter was picked up from 5 sites, including the Los Gatos Creek Trail and the Los Gatos Creek County Park.

Results:

35 Bags of recyclables (cans/plastic/glass & paper) were collected

145 Bags of trash were collected

Publicizing done for the event was very successful, as shown by the fact that 160 volunteers participated.

SARATOGA CREEK AT BIG BASIN WAY CLEANUP – CITY OF SARATOGA

May 26, 2009

This Cleanup was organized by City of Saratoga staff

WVCWP contributions: WVCWP staff provided litter grabbers, gloves & bags.

The Cleanup involved parking lots between Big Basin Way businesses and the creek, and the top of the creekbank along Saratoga Creek

Participants included City of Saratoga Staff with the Saratoga Elementary School Student Council and a teacher (9 volunteers).

Results: 10 bags of garbage were collected; City staff evaluated the area as much cleaner than in previous years.

SAN TOMAS AQUINO CREEK CLEANUP @ WESTMONT HIGH SCHOOL EVENT SUMMARY

Saturday May 16, 2009: In conjunction with National River Cleanup Day

WVCWP hosted a Cleanup Event at the site where it has regularly hosted this event.

Volunteers were instructed in use of Tally sheets, and were provided with clipboards, etc. Working in groups, volunteers were able to pick up trash and carry out trash monitoring.

Distance cleaned was appx. 1.5 miles

Summary of Surveys Completed by Volunteers

(Based on 15 volunteer response sheets)

Most common pieces of trash collected: Plastic/styrofoam, bottles, cigarette butts, paper, and food wrappers.

Most unusual items found: Baseball glove in good condition, Tires

WVCWP Contributions:

WVCWP provided Trash Tally Sheets with clipboards, Litter Grabbers, and gloves & trash bags (via the Clean A Creek Action Group)

Results:

15 volunteers worked at the cleanup for 4 hours each.

400 lbs of Trash was collected

80 lbs of Recyclables were collected

Total Collected= 480 lbs

PUBLIC INFORMATION/PARTICIPATION

West Valley Communities: Campbell, Los Gatos, Monte Sereno, Saratoga

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2008-2009 ANNUAL REPORT

CREATE NEW OUTREACH MATERIALS

Due to problems with persuading residents to pick up printed material, WVCWP has searched for means of attracting interest in printed materials. An effort was made to find "desirable" items to incorporate with printed materials, which would encourage residents to pick up and read the information when they pick up the item.

New efforts with this theme included:

--Staff created a Car Wash/ Copper brochure, with Car Wash Discount Card and list of participating commercial Car Washes

--Staff developed graphics for, and ordered, 230 mugs with an anti-litter message: "Save a Cup – Clean Creeks, It's In Our Hands"

--Staff developed graphics for, ordered and packaged a set of seeds for 4 different pest resistant native plants, to attach to "less toxic" gardening materials and to encourage residents to take the printed information.

Response to these items has been much better than trying to distribute printed materials alone. WVCWP will continue to investigate means of incorporating this concept into outreach materials.

Following this theme, in FY 08-09, WVCWP also investigated the feasibility of purchasing re-usable grocery bags, for use in conveying information about litter/ trash problems. Minimum order requirements for this type of item are fairly large, so purchasing these bags will take a large budget commitment, or cooperation with other entities. WVCWP has been looking into cooperation with other entities, and will see whether this bears any results in FY 09-10.

Stormwater Pollution

Everyday activities can pollute stormwater. Have you ever done any of the following?

Washed cars in streets or driveways?

Soapy water is not absorbed by paved surfaces. It flows along the curb to the storm drain and into local creeks and San Francisco Bay. Even soaps labeled nontoxic or biodegradable are harmful to the environment.

Instead: Use a commercial car wash service that recycles water or, if you continue to wash your car at home, direct water onto a lawn or unpaved surface and minimize the amount of soap you use. Find out how to receive a Watershed Watch discount card for car wash discounts.

For information about how to safety conduct an environmentally-friendly car washing event, contact the West Valley Clean Water Program (WVCWP) to receive a free Car Wash Kit and training at office@wvcwp.org.

Hosed off driveways and sidewalks?

Water used for hose-downs takes particles of motor oil, other automotive fluids, grime, trash, leaves, and other pollutants into the storm drain system.

Instead: Regularly sweep driveways, sidewalks, and curbside gutters. Clean oil and grease spots off the driveway by applying a dry absorbent such as kitty litter, corn meal or sawdust to the spot. Let it sit for several hours, then sweep into a plastic bag and place in the garage.

Emptied buckets of dirty cleaning water into the gutter?

Liquids poured into the gutter flow into the storm drain system. There is no treatment or creening of materials in the storm drain system. They flow directly into local creeks and San Francisco Bay.

Instead: Put dirty cleaning water into a sink or toilet where it will be "cleaned up" during the wastewater treatment process.

Left pet waste on the lawn?

Pet wastes can be washed into the storm drain system by rain or irrigation watering. Pet waste adds hazardous bacteria and organic compounds that can alter a creek's water chemistry and can lead to the death of plants and fish.

Instead: Dispose of pet waste in the garbage.

Overused garden chemicals?

Pesticides and hebicides can wash or be blown by the wind into the storm drain system where they are hazardous to aquatic life.

Instead: Use garden chemicals according to label instructions. Never use garden chemical when rain is forecast for the next 24 hours. Consider organic gardening methods.

Over-watered your landscaping or garden?

Excess water from too much irrigation will pick up pollutants onthe way into the storm drain.

Instead: Water only your lawn and garden - not the sidewalk.

Allowed car to leak oil, antifreeze, or other liquids?

Automotive liquids allowed to drip on driveways and roads turns into an oily residue that is washed into the storm drain system by rainwater or runoff from landscape watering or sidewalk/driveway hose-downs

Instead: Have leaks repaired as soon as you notice a spot on the driveway or in the garage.

Drained pool, spa, hot tub, or fountain water into the storm drains?

The chemicals used in pools, spas, hot tubs and fountains can be toxic to aquatic life in local streams and the San Francisco Bay Area.

Instead: When cleaning out your pool, spa, hot tub, or fountain, discharge the water into a sewer line after obtaining permission from the local sewage treatment plant.

Dumped anything into the storm drains?

Instead: Use motor oil recycling programs, household hazardous waste collection programs, composting, and other recycling and or garbage disposal services. Contact the Community Services Recycling Program at (408) 399-5796.

Remember, what is dumped into the storm drain flows directly into local creeks and San Francisco Bay without filtering or treatment.

Copyright Notices | Powered by CivicPlus

Stormwater System

The Stormwater Drainage System is not the Sanitary Sewer System

The Storm Water System is a series of underground drains to direct rainwater (stormwater runoff) to the creeks and tributaries that flow to the bay. The **Stormwater Drainage System (also known as the Storm Drain System) is completely separate from the Sewer System** which links home plumbing (sinks and toilets) to the sewage treatment system processing plants.

It is very important to keep these two systems separated, and to manage what goes in each system. For instance, it is **OK to drain pools and spas into the sewer system** (hook up to your clean-out or washer outlet) but **absolutely do not drain spa or pool water into the curb/storm drain system** as the treated water contaminates creek and bay water. Also, to help keep the storm drains clear and flowing, please do not sweep leaves from sidewalks into gutters (use your yard waste bin provided by Green Valley Waste Disposal. To download a brochure on proper method to drain your pool or spac, please click on Draining Pools & Spas

Stormwater Pollution Information

Unfortunately, our everyday activities can pollute stormwater. Click on Stormwater Pollution for information on what you can do to prevent stormwater pollution.

Carwash Fundraisers

As part of the Town's permit from the San Francisco Bay Regional Water Quality Control District to discharge water into creeks that flow to San Francisco Bay, only storm water can be discharged into the Town's drainage system. Water that contains soap and other contaminants from washing many cars is a violation of Town Code Section 22.30.015(a) & (b). If proper procedures aren't followed, you or organization may be cited and fined.

Thanks to our partners in the fight against water pollution, the West Valley Clean Water Program, a fund-raiser car-wash kit has been put together. The kit has plugs that will block the storm drain inlet and a submersible pump to pump the contaminated water on to a landscape area, where natural biological action will rid the water of contaminants before it is absorbed by the ground or flows to another storm drain inlet.

The kit is available free of charge to organizations planning a fundraiser. Please contact the West Valley Clean Water Program at (408) 354-4734.

West Valley Clean Water Program

WARMTH WITHOUT WASTE

Keep warm this winter while reducing your energy consumption.

AT WORK

- Use a reusable coffee mug to enjoy your coffee, tea or cocoa at work. Sipping a hot beverage helps keep us feeling warm while eliminating disposable cups reduces our impact on the environment. Did you know that many cafés in Town even offer a discount to customers that bring in their own beverage container? Check with your favorite location for participation.

- Instead of turning up the thermostat, put on an extra layer. Keep a sweater or coat in your office to warm up when needed.

SOMETHING TO THINK ABOUT

According to PG&E, lowering the thermostat in your home to at least 68 degrees can save your household from annually emitting an average of 282 pounds of CO_2 and has a cost savings of $23-$38. If every household in the Town of Los Gatos made this thermostat adjustment, together we could save over 3.4 million pounds of CO_2 from being emitted annually. That's more CO_2 than 150 average homes emit all year!

AT HOME

- Setting the thermostat at 68 degrees or lower can greatly reduce energy consumption. If you are feeling chilly, put on warm clothing or bundle up on the couch with a blanket and a loved one.

- Invite your friends and family over for dinner. Filling your home with people is a natural way for everyone to keep warm, while having a great time, without turning on the heater.

- Check your home for energy inefficiencies including windows and doors with faulty seals that are allowing the cold outside air in, and air filters that need to be replaced. Make the appropriate repairs. PG&E offers helpful energy saving tips on their website.

- Let the sunshine in! Open the curtains and blinds on windows that receive direct sunlight to heat the room naturally.

RESOURCE LINKS

PG&E has several energy saving tips, programs and money saving rebates available to customers. There are also online tools available to help you analyze your home's energy use. For more information, visit http://pge.com/myhome/

Visit the links below for more energy saving tips and ideas:
http://www.ehow.com/how_1244_save-energy-winter.html

http://www.energystar.gov/index.cfm?c=heat_cool.pr_winter

LOS GATOS
growing greener together

TOWN OF LOS GATOS

February 2009

Children's Programs at the Library

With generous support from the Friends of the Los Gatos Library, an excellent group of volunteers, and community partnerships, the Los Gatos Library continues to offer many youth-centered programs. This January, the Library partnered with Los Gatos-Saratoga Recreation to host a series of collaborative programs, including Music Together, a pony presentation, Parent and Me Kidz Yoga, and more. Together, we were able to bring a greater variety of programming and a wider range of educational content to the community. Based upon positive feedback from our attendees, we look forward to continued programming and collaboration efforts with the Recreation Department.

The children's room is a community hub with something for everyone. In 2008 we were fortunate to launch two new volunteer-led programs. Homework Together is a drop-in homework help program for children of all ages. Offered on Mondays and Wednesdays, this program is organized and run by a group of fantastic teenagers. Our new bilingual (Spanish/English) storytime is led by Karen McVay, a wonderful volunteer and teacher for Spanish for Little Hands. Karen offers this program the first Thursday of each month. With the continued support of our talented volunteers, both the Children's Knitting Group and Books Together had another successful year. It is the dynamic combination of staff expertise and volunteer dedication that make Los Gatos Library great.

If you have not come by the Library recently, stop by and check out some of our upcoming programs:

Keep Los Gatos Beautiful Family Concert and Picnic
Thursday, April 30, 2009
6:00 pm

Families are invited to join us in celebrating Keep Los Gatos Beautiful month. Bring a picnic dinner in re-useable containers and a picnic blanket and enjoy the fun, unstoppable, eco-friendly music of Lori and RJ (aka Cotton Candy Express) on the Civic Center lawn. This event is free and open to all ages.

Summer Reading Kick Off – Get Creative @ Your Library
Thursday, June 4, 2009
4:00 pm

Come to the Library and sign up for a summer of reading fun. Summer reading is open to everyone, from babies to adults. This event is free and open to all ages.

Sing Along with Andy Z
Friday, June 12, 2009
10:30 am

Andy Z is a children's performer, singer/songwriter and educator from the San Francisco Bay Area whose music touches the hearts of all ages. Andy will have your children smiling, singing and dancing. This event is free and open to preschool-aged children (ages 5 and under) and their parents/guardians.

Drummm
Thursday, June 18, 2009
4:00 pm

Drummm provides a hands-on, interactive, group music-making experience in a fun, playful environment. This event is free and open to all ages.

Save the date for some Middle School FUN at the Library.
Thursday, June 25, 2009
4:00 pm

This event is free and open to students in grades 6–8.

Charles the Clown
Thursday, July 9, 2009
6:30 pm

Charles begins the program as an ordinary, everyday man (except for the red pants and colorful shirt). After discussing costumes with the children, he starts to become a clown. Everything goes wrong! This event is free and open to all ages.

Ventriloquist Steve Chaney & Corny Crow
Thursday, July 16, 2009
6:30 pm

Be prepared to laugh as Steve Chaney and his partner Corny Crow juggle, perform magic, and act silly. This event is free and open to all ages.

Save the date for some Middle School FUN at the Library.
Thursday, July 23, 2009
4:00 pm

This event is free and open to students in grades 6–8.

Big Truck Day
Saturday, August 1, 2009
10:00 am – 12:00 pm

Come and see some of our big trucks in the Library parking lot — fire trucks, police cars, and more! This event is free and open to all ages.

P&T Puppets present "Pirates! The Pie Rats of Penn's Aunt"
Thursday, August 6, 2009
6:30 pm

P&T Puppet Theater offers a wonderful assortment of puppets and a brilliant script. Be prepared to get involved! This event is free and open to all ages.

Summer Reading Finale & Carnival
Thursday, August 13, 2009
4:00 pm

Come collect your summer reading prize and join in the carnival fun. This event is free and open to all ages.

Weekly Storytimes

In addition to our special programs, there are several ongoing programs that liven up the Children's Room each week, including weekly storytimes. Storytimes are a balance of participatory and listening activities for children and their parents/guardians. These activities include story-reading, story-telling, music, fingerplays, and movement arranged by the Children's Librarian for each age group.

Toddler Storytime
Mondays, 10:30 am
Ages 24–36 months

Preschool Storytime
Tuesdays, 10:30 am
Ages 3–5 years

Wonderful Ones
Fridays, 10:30 am
Ages 12–24 months

Bouncing Babies
Fridays, 11:30 am
Ages 0 –12 months

Los Gatos Library Unveils Green Section

Now you can get all your "green" information in one convenient area at the Los Gatos Library. Located upstairs near the circulation desk, the Green Section showcases books about solar power, composting, green living, and much, much more. There is even a section of green fiction featuring such green classics as *Ecotopia* by Ernst Callenbach, and *All Over Creation* by Ruth Ozeki. In addition, prominently displayed is a demonstration of Kill-A-Watt® meters. The display shows how compact fluorescent bulbs use less than half as much energy as traditional incandescent bulbs. A limited number of these Kill-A-Watt® meters are available for checkout at the circulation desk. Also featured are tips for green living and samples of reusable shopping bags from West Valley Green Leaf Committee and the Town .

It Pays to Shop Los Gatos!

Did you know that every time you shop at stores or dine out in Los Gatos, the Town receives 1 cent of the 8.25 cents of sales tax per dollar that is collected? Sales Tax and Use Tax revenues account for approximately 28% of the revenue received by the Town's General Fund.

The General Fund supports the majority of the basic services and programs local residents and businesses rely on, including police, parks, streets, and the library. Every time you shop locally or dine out in town, you help support and maintain the quality of Town services that residents have come to expect and that make Los Gatos such a desirable place to live.

It Saves to Shop Los Gatos!

The Town prides itself on its efforts to lessen the impacts its operations may have on the environment. You too can make a difference and help to save the environment! By shopping locally you choose to help reduce carbon impacts created by traveling to other communities. Local stores help to sustain vibrant, compact, and walkable town centers which in turn are essential to reducing sprawl, automobile use, and air pollution.

It Nourishes to Shop Los Gatos!

Support local prosperity by choosing to shop in town. Not only will that choice support local businesses that call Los Gatos their home, but it celebrates the small-town character that has made our community a desirable place to live, work, and play. Help keep Los Gatos' small town character with a big town heart!

Los Gatos: Growing Greener Together

The Los Gatos: Growing Greener Together program provides education, tips, and green practices that can be used at home, at work, and at play. Each month, the Growing Greener website, **www.LosGatosCA.gov/growinggreener**, spotlights a different green theme and provides information, links, and green practices that relate to the theme. The April theme for Los Gatos: Growing Greener Together is Keep Los Gatos Beautiful; Keeping Our Community Clean, Green, and Beautiful. Consider implementing these green practices at your home or office:

- Add a plant to your office or work space. Live plants not only brighten a room and improve air quality, they have also been linked with stress reduction in the work place.
- Just say "No" to junk mail! Remove your name from those pesky mailing lists. You know…the ones that send you magazines and envelopes full of unwanted paper that immediately go from your mail box to the recycle bin? Contact the source and ask to be put on an email-only mailing list or to be removed from their list altogether.
- Challenge yourself to do a little extra this month. Maybe that means arranging a new carpool for work or walking to a local eatery for lunch instead of driving.
- Visit the Farmers Market! Every Sunday, the Farmers Market is held on Montebello Way near Town Plaza Park. Here you can enjoy live entertainment and purchase many local products including fresh produce, organic options, tasty treats, and more. By buying local, we can decrease our environmental impact and support local farmers and businesses.

This April is also the first anniversary of Los Gatos: Growing Greener Together, and to celebrate we have introduced a "Notify Me" feature to the program. To receive the monthly Growing Greener information via email, visit **www.LosGatosCA.gov/notifyme**, and subscribe to the Los Gatos: Growing Greener Together email list.

A Safe Garden

If you use pesticides in your yard, it may not be the healthy green oasis that you have in mind. Children and pets can absorb pesticide residues while playing in the grass and landscaping. Pesticides may also get tracked inside onto the carpet, where children and pets play. Pesticide residue can even end up on children's toys. In addition, pesticides are carried by water runoff into our creeks, where they can affect local wildlife and enter our water supply.

Who are these bugs?

One point to keep in mind is that you may not need to be spraying for pests. Many of the bugs you see in your garden are harmless, or even beneficial and can help you to control the harmful bugs. These helpful bugs are often killed when gardeners mistake them for pests. For example, this Ladybug larva (shown below) will eat aphids, but might not be recognized as a ladybug. If you saw this Lacewing (shown at right) in your garden, would you know it was eating aphids and mealybugs? To see more photos of beneficial insects, visit the UC Davis IPM website, **http://www.ipm.ucdavis.edu**.

Attracting "Good Bugs"

One alternative to pesticides is to utilize beneficial insects to kill your garden pests. Beneficial insects can be attracted to your garden by planting foliage that they like. The West Valley Clean Water Program has free seed packets available, which come with a full-color brochure showing photos of the "good bugs." To request a seed packet, call the West Valley Clean Water Program at (408) 354-4734, or send an email to: **info.westvalley@comcast.net**.

Dispose of Banned Pesticides

Some pesticides have been taken off the market as unsafe and should be disposed of. All pesticides containing DIAZINON or CHLORPYRIFOS have been banned from residential use. Check your storage shelves for products with these chemicals, and take them to a free Household Hazardous Waste drop-off site; visit **www.hhw.org** for details.

Keep Los Gatos Beautiful

April is Keep Los Gatos Beautiful Month. Every year during April, the Town supports events dedicated to the beautification of Los Gatos and to our commitment to living and growing greener as a community. This year's events promise to provide a variety of educational and entertaining celebrations for all ages. From booths at the Farmers Market to the Town's Arbor Day event, there is something for everyone. This year's events will include:

Plant Swap

The 55+ Program will be hosting a plant swap for adults age 55 and over on Wednesday, April 22 from 9:00 am to 2:30 pm at the Los Gatos Neighborhood Center, 208 East Main Street. You are invited to share or swap plant starts, seeds, and bulbs with other gardening enthusiasts. For more information, call the 55+ Program at (408) 354-2360.

Farmers Market Exhibits

On April 5, 19, and 26, special exhibits will be held at the Los Gatos Farmers Market, including information on the local Master Gardener Program and the Santa Clara County Composting Education Program. The Farmers Market is held each Sunday from 9:00 am to 12:30 pm on Montebello Way at the corner of Main Street and South Santa Cruz Avenue.

Arbor Day Celebration

The Town has been named a "Tree City USA" by the National Arbor Day Foundation for the 29th year in a row! Join us as we celebrate Arbor Day and this special recognition with a tree planting ceremony at La Rinconada Park on Friday, April 24 at 10:00 am.

Our annual Keep Los Gatos Beautiful newsletter, which includes detailed information about these and other planned events, is available at **www.LosGatosCA.gov/keeplosgatosbeautiful**.

General Plan and Housing Element Update

Continued from page 6

to detailed statutory requirements regarding its content and is subject to mandatory review by the California Department of Housing and Community Development. One of the first parts of updating the Housing Element will be to update its Technical Appendix, which will include such information as:

- Needs Assessment
- Projected Housing Needs
- Constraints to Housing Development

Comprehensive information about the General Plan update process is available on the Town's General Plan Update website, **www.lggeneralplanupdate.org**. There, you can view the General Plan Update Background Report and Housing Element Technical Appendix, read the agendas and minutes of the General Plan Update Committee, and keep up to date with all process and milestone announcements. You can also sign up to receive email updates about the process; just visit **www.LosGatosCA.gov/notifyme.**

Subject: Public Works Week Open House May 19
Date: Tuesday, January 27, 2009 11:38 AM
From: Tim Kawasaki <tkawasaki@losgatosca.gov>
To: <kelly.westvalley@comcast.net>

Hi Kelly:

The Town of Los Gatos will be celebrating Public Works Week on Tuesday, May 19, from 9-12 noon with an Open House. Right now we have about 75 elementary students signed up to attend the event. We will be holding one hour tours of the corporation yard and setting up booths/stations to do some simulation exercises with the kids. The event is also open to the public.

We would love it if West Valley Clean Water Program could join us by setting up a table at this event. This would be a perfect opportunity to educate the public about your programs. Please let me know if your staff could attend this event.

If you have any specific questions about the event, let me know. Thanks, and we hope you can join us!

TIMK.

March 24, 2009

Kelly Carroll
West Valley Clean Water Program
18041 Saratoga - Los Gatos Road
Monte Sereno, CA 95030
Phone: 408-354-4734; E-mail: kelly.westvalley@comcast.net

Dear Ms. Carroll:

On behalf of the Conference Steering Committee, thank you for agreeing to make the presentation, ***A Stormwater Campaign in Cartoons,*** at the upcoming ***5th National Conference on Nonpoint Source and Stormwater Outreach,*** May 11-14, 2009 at the Doubletree Hotel in Portland, Oregon. The Steering Committee, as well as the expected attendees, looks forward to a productive exchange of information and ideas on developing and implementing nonpoint source and stormwater outreach strategies.

Conference Format

The conference will run for three days: Tuesday through Thursday, May 12-14. In addition, four optional pre-conference workshops will be held Monday, May 11. A draft agenda is now available on the conference Web site at www.epa.gov/nps/outreach2009/agenda.html.

Your presentation is scheduled for:

Date: Wednesday, May 13

Time: 10:30 - 12:00 p.m.

Session Title: Pictures, Toons & Beyond

Presentation Title: A Stormwater Campaign in Cartoons

The amount of time allotted for your presentation (including any co-presenters you might have) is 30 minutes. Your presentation should be no longer than **20 minutes** so that there is adequate time for speaker introductions and audience questions.

Wednesday, May 13, 2009

7:30 a.m. – 4:00 p.m. **Conference Registration**

8:15 a.m. – 9:45 a.m. **Session A4: Programs Promoting Green Development** ..... Broadway Room

Moderator: Kathy Shay, City of Austin, Texas

— **Blue Thumb—Planting for Clean Water: Using Social Marketing Techniques to Promote Native Gardens, Rain Gardens and Shoreline Plantings within Priority Watershed Areas**
Angie Hong, East Metro Water Resource Education Program, Minnesota

— **Lake Clarity Crediting Program for Lake Tahoe**
Jeremy Sokulsky, Environmental Incentives, LLC, California

— **RiverSmart Homes**
Shelby Laubhan, District of Columbia Department of the Environment

Session B4: Reaching Our Audiences Through University-Based Outreach Programs ..... Multnomah Room

Moderator: Rebecca Power, Wisconsin Cooperative Extension

— **Stormwater Management in Your Backyard: An Extension Education Initiative**
Dr. Christopher Obropta, Rutgers Agricultural Experiment Station, New Jersey

— **Changing Public Behavior: Addressing the Challenges of Applying Social Assessment to Water Management Strategies**
Elaine Andrews and Kate Reilly, Environmental Resources Center, University of Wisconsin, Madison

9:45 a.m. – 10:15 a.m. **Break**

10:15 a.m. – 11:45 a.m. **Session A5: Pictures, Toons & Beyond** ..... Broadway Room

Moderator: Jennifer McDonnell, Tetra Tech, Inc., Virginia

— **Say It with Pictures: Training Kentucky Construction Site Workers in Erosion and Sediment Control**
Barry Tonning, Tetra Tech, Inc., Kentucky

— **A Stormwater Campaign in Cartoons**
Kathy Ottenberg and Kelly Carroll, West Valley Clean Water Program, California

— **Developing and Implementing a Comprehensive Surface Water Education and Outreach Plan for a Rural County**
Pat Pearson, Washington State University Jefferson County Extension

A Stormwater Campaign in Cartoons

Small Agency Uses Cartoons for Adding
Low-Budget Fun
to the Stormwater Message

1

Why Cartoons Appealed to Us

- *BUDGET:*
  We needed a low-budget 'BRAND' image, which could be used in a variety of media
- *COMMUNITY NEWSPAPERS:*
  We wanted to use our community Weekly Newspapers -- which are mailed to every household
- *BROAD AUDIENCE:*
  We wanted an image which would appeal to residents of all types: Parents, Young Adults, Seniors, Students, Teachers, etc.

6

Making it Work: 2 Characters

- *2 Characters works well*
  --2 characters allows for information through dialogue
  --2 characters allows for one to model "WRONG" behavior, & one to model "RIGHT" behavior

Modeling 'Wrong' & 'Right'

Dialogue = "Punch line"

20

Benefits - Brand Recognition

Cartoon characters present a consistent "brand" throughout a variety of **MESSAGES**

- *VARIATION among the STRIPS*
  The strip/characters will be recognized as your "BRAND" yet, they can convey a different message, by varying:
  --the background
  and
  --the "accessories"

12

Benefits - Big Message/ Small Size

- SPEND LESS ON AD SPACE
  --When buying ad space, you need only a small area = LESS COST
- FITS EASILY INTO 8" X 11" MUNICIPAL NEWSLETTERS
  Newsletter are on a tight budget, with limited page space
  They tend to have space for a cartoon, even if not for an article

cartoon in → Municipal Newsletter

10

Benefits - Eye-Catching & Fun

Cartoons draw an audience to look at them.

- *DESIRABLE TO EDITORS:* They add Graphic Interest
  -- Various newspapers have given a 50% PSA discount, in order to include these cartoons in their papers
  -- Municipal newsletters enjoy including the cartoons

Volunteers look for trash in San Tomas Aquino Creek on International Coastal Cleanup day Sept. 20. The West Valley Clean Water Program organized the creek cleanup.

Creek gets a cleanup, thanks to volunteers

WV Clean Water organizes the day

By CHRIS VONGSARATH

Ava Hansen wasn't so much worried about why she was out picking up trash along San Tomas Aquino Creek as she was how much trash she could pick up. The 9-year-old Junior Girl Scout from Troop 60043 learned quickly the importance of keeping the environment clean and in its natural state.

"Lots of people pollute, and they don't care if they cause global warming or not," Ava said.

While not exactly reversing global warming, Ava and a handful of other scouts and volunteers did their part in an international effort to prevent trash from ending up in the planet's oceans.

As part of the International Coastal Cleanup, volunteers from around the world pitched in to pick up trash. Last year, almost 380,000 volunteers from 75 countries netted 6,075,698 pounds of trash.

Closer to home, volunteers cleared trash from Lexington Reservoir, Vasona Lake County Park and San Tomas Aquino Creek on Sept. 20.

Ava said she had a fun time learning about the creek. The scouts challenged each other to see who could find the weirdest thing, which turned out to be a live pig.

The West Valley Clean Water Program, which provides stormwater pollution prevention for Campbell, Saratoga, Los Gatos and Monte Sereno, organized the cleanup at San Tomas Aquino Creek.

Program assistant Kathy Ottenberg said cleaning up the creek goes past mere aesthetics. In addition to having an impact on wildlife, a polluted creek could directly impact residents.

Part of the group's mission is to make sure the municipalities it serves are in compliance with state-administered stormwater discharge permits, which are intended to keep California's waterways clear.

Too much pollution could prove costly to taxpayers because municipalities would have to pay to install inserts to trap trash at stormwater gutters, Ottenberg said.

"It can have a major impact on everybody, even in terms of taxes," Ottenberg said.

About 16 volunteers collected 120 pounds of trash and another 170 pounds of recyclables at San Tomas Aquino Creek, program assistant Patrick Hansen said.

Though the creek is closed off to the public, some people frequently trespass through the area, resulting in the litter. The city of Campbell and Santa Clara Valley

San Tomas Aquino Creek cleaned up by volunteers

By Chris Vongsarath
Campbell Reporter
Article Launched: 09/25/2008 02:26:24 PM PDT

Ava Hansen wasn't so much worried about why she was out picking up trash along San Tomas Aquino Creek as she was how much trash she could pick up. The 9-year-old Junior Girl Scout from Troop 60043 learned quickly the importance of keeping the environment clean and in its natural state.

"Lots of people pollute, and they don't care if they cause global warming or not," Ava said.

While not exactly reversing global warming, Ava and a handful of other scouts and volunteers did their part in an international effort to prevent trash from ending up in the planet's oceans.

As part of the International Coastal Cleanup, volunteers from around the world pitched in to pick up trash. Last year, almost 380,000 volunteers from 75 countries netted 6,075,698 pounds of trash.

Closer to home, volunteers cleared trash from Lexington Reservoir, Vasona Lake County Park and San Tomas Aquino Creek on Sept. 20.

"It can have a major impact on everybody, even in terms of taxes," Ottenberg said.

About 16 volunteers collected 120 pounds of trash and another 170 pounds of recyclables at San Tomas Aquino Creek, program assistant Patrick Hansen said.

Though the creek is closed off to the public, some people frequently trespass through the area, resulting in the litter. The city of Campbell and Santa Clara Valley Water District are installing a passive-use trail.

Hansen said opening up the creek to the public could present a hidden benefit.

"If there is a lot of trash out there, they'll notice it and want to do something about it," he said.

Sunnyvale resident Grace Siu, Ava's mother and leader of the troop, said her scouts have participated in creek cleanups before, but never as part of an international campaign. She said the scouts were up to the task.

Happy Earth Day

We're celebrating another one on April 22

Photographs by GEORGE SAKKESTAD

Earth Day was something of an enigma when it was first discussed at a conference in the fall of 1969.

What was the point of this special day designated for April 22 that would "inspire awareness and appreciation for the Earth's environment?" Back in 1969, it seemed to just follow the beat of the hippie generation and the Summer of Love.

Nearly 40 years later, though, we know better.

Earth Day, first celebrated on April 22, 1970, has grown to become a time when we collectively treasure our planet and share ideas for sustaining our resources.

In the West Valley, we are thinking about the Earth in our homes and schools, in our businesses and local governments.

It starts at home

Los Gatos homeowner P.K. Karnik believes in recycling, but when it came to remodeling his home, he took the concept to another level.

"I look at recycling in a different light," Karnik said. "My whole notion is reuse."

Karnik used Craig's List to unload many of the things he no longer wanted, but thought other people could use. "I advertised free windows to a needy home," he said. "This church contacted me saying they had a home in East San Jose in shambles that they wanted to turn into a daycare center, so I gave them all to them."

He did the same thing with faucets, sinks, chandeliers, mirrors, blinds, cabinets and toilets. "The toilets were 4 years old, and they probably would have ended up in a landfill," Karnik said. "They were picked up by a gentleman that remodeled his rental homes in San Jose. Normally, the faucets would have gone to a scrap yard and melted in a furnace. They were put into the rental houses, along with the sinks."

Karnik also found new homes for his old water heater, plus 14 doors and a lot of lumber. Some of the lumber was recycled to make wooden pellets, but much of it will be reused. "Some large timber was given to my construction crew," he said. "They plan to haul the load to Mexico and assist their poor relatives to build homes."

In explaining his preference to reuse things instead of recycling them, Karnik says, "I save a lot of energy in the crushing process. And there are so many places that need to get fixed. I feel very good about it."

Saratoga resident Hari Sripadanna is also feeling good about

A rain harvesting system can provide water for landscaping and vegetable gardens. At right, Monte Sereno resident Jerry Block talks to John Lewis of Rain Harvesting Systems about the installation of a harvesting system in his back yard. Above, Lewis installs water filtering rain gutter guards at Block's home.

his new home. The architect is waiting for an important piece of paper that says his house is certified LEED Gold—meaning it shows Leadership in Energy and Environmental Design. LEED is a point system developed by the U.S. Green Building Council.

Among other things, Sripadanna installed low-flow showerheads and faucets. A typical shower can use as much as 3 gallons of water a minute, while Sripadanna's use 1.75 gallons.

"What really surprised me was the faucets because they actually feel more forceful than a regular faucet," he said.

Sripadanna also says it has become much easier to build a green home today because the industry has caught up with people's ideas. "Architects have always talked sustainability, but now a lot of things have come together and it's become easier for us to do," he said. "What I want to share with everyone is it's in economic reach for everybody."

One of the more unusual things Sripadanna did was to install a "live" roof that is planted with succulents. It helps keep the house cool in the summer and warm in the winter.

Sripadanna said things like that can quickly add to the points needed for LEED certification.

Sripadanna also designed his home to take advantage of natural sunlight. "There's a quality of ambiance," he said. "You can't describe how it feels when the sun warms the house naturally. It gets low-angle winter sun but not summer sun."

One thing Sripadanna did not do is install solar panels. "If you do small things across the plain, you can get (LEED) credit quite easily without going to solar panels," Sripadanna said. "My house is so energy efficient that it beats the California energy code by 50 percent."

Even so, Kurt Newick of Campbell is a firm believer in solar. He is a solar salesman who is also the founder of the local chapter of the Sierra Club's Global Warming Committee.

"Solar electric panels are far and away the most popular technology," Newick said. "I sell about three or four systems a month."

He said homeowners who are thinking about going solar need to select a company that is both licensed and bonded. "The main thing is for the homeowner to feel comfortable with the person they select," he said. "If the contractor can't answer questions in a timely way, that's a red flag."

Newick also praised a new program started by San Jose-based Renewable Power Solutions that certifies solar installers. "A certification program is critical, especially since solar is pretty new," he said, "And it's a big expenditure."

Newick has just completed an analysis of the fees municipalities charge for permits for solar installations and the subsequent inspections.

"Los Gatos is one of the highest in the Bay Area," he said. Newick's analysis shows that Los Gatos charges $511, while Campbell comes in at $225 and Saratoga charges $92.

"Campbell and Los Gatos are pretty easy to deal with," Newick said. "Saratoga is probably the best. They're pretty easygoing."

Newick also said that perhaps the most important thing a homeowner can do before installing a solar system is to have a roof inspection and a shading analysis done. "This is where you separate the men from the boys. In Los Gatos and Saratoga you have a lot of mature trees. Solar needs sun, and even the wispiest amount of shade impacts the system," Newick said. "A sunny location now may not be sunny later on. And you have no legal recourse if a neighbor's tree grows and shades your array if the tree was there first."

The word sustainability has become interchangeable with green building practices, and Monte Sereno's Jerry Block has taken the concept to heart.

He just installed a 20,000-gallon rain harvesting system that will water his landscaping and vegetable garden.

But Block says being able to store that much water on his property could easily serve other purposes. "In an emergency it can be used for firefighting," he said, "and it could supply the whole neighborhood if there's an earthquake."

Block's system was installed by Fremont-based Rain Harvesting Systems.

Special eaves along the front and sides of his house capture the rain, which then flows through a series of pipes and into four tanks that can hold 5,000 gallons each.

Except for the tanks, the system is invisible.

If the tanks get too full, Block can release the excess and replenish groundwater supplies.

Right now, Block doesn't plan to use the water for drinking, washing or showering because he says there are too many hoops to go through to get approval for that.

However, installing a special filter and ultraviolet light could easily purify the rainwater.

Block also has an extensive solar installation, so he uses very little power from PG&E.

Coupled with his solar panels, Block's rainwater collection system is the next step in his quest to find independence. "This is a way for the everyday American to be a hero," he said. "Make a sacrifice to free us from foreign dependency and invest in your country's infrastructure."

—Judy Peterson

Continued from page 19

Government does its part

In the past the onus was put on individuals and big businesses to help shape a more environmentally friendly future by recycling more and conserving energy and water.

But as the "going green" phenomena has sunk deeper into the consciousness of American culture, public agencies, including the cities of Campbell and Saratoga and the town of Los Gatos, have begun to do their part in the creation of a more sustainable future.

Each of the three municipalities has been certified as a green business by the Bay Area Green Business Program, which verifies and motivates businesses to meet higher standards of environmental performance. More than 1,600 businesses and public agencies have been certified since the program's inception in 1997.

The town of Los Gatos was certified as a green business two years ago but has been working steadily toward adopting greener practices for more than a decade.

The town council adopted a water efficiency ordinance in 1992 to promote the conservation and efficient use of water. Guidelines were approved in 2004 for voluntary green building standards on new construction; and in 2008, Los Gatos became the first municipality in Santa Clara County to enroll in the PG&E Climate Smart program, which will help the town offset all of its identified carbon emissions.

Just last year Los Gatos began the "Growing Green Together" campaign in an effort to educate the town's employees to be more environmentally conscious while at work. Each month has a different theme that offers tips for creating a greener workplace and home. Residents can also sign up to receive the same newsletter employees obtain.

Los Gatos High School students Olivia Warne (left) and McKenna Everett look over photographs on display at a show focused on sustainability. Los Gatos Mayor Mike Wasserman (second from right) and Los Gatos High assistant principal Scott Downs also check out the show held in conjunction with Earth Day.

"It's very important for businesses and residents to take personal responsibility. Individual action is going to be key to reducing our carbon footprint," said Regina Falkner, community services director for the town of Los Gatos.

Saratoga Mayor Chuck Page agreed and added that local governments need to do their fair share in creating positive change.

"It's important that governments show leadership and do what it's asking its citizens to do," he said.

The city of Saratoga has taken many steps to become a better steward of the environment, including going to "paperless" Saratoga City Council meetings, using biodegradable utensils and cups at city hall, replacing older light bulbs with more energy-efficient models and buying two hybrid cars to replace aging city vehicles.

This month the council approved an ordinance that amends the city code to include a compilation of existing "green" laws that promote sustainability through the reduction of greenhouse gases. Putting all the laws in one section makes it easier for residents to find out what ordinances the city has passed that promotes a greener Saratoga, Page said.

But no matter what efforts cities try to make to be better stewards of the environment, they will inevitably be constrained by time and money.

But, thanks to the federal stimulus package, the city of Campbell is entitled to a $163,000 grant that must go toward energy-efficient programs. The money could go toward a number of things, but the city might look into using the funds for a solar panel analysis, said Dan Rich, city manager for Campbell.

Like Saratoga, the city of Campbell also plans on going to "paperless" city council meetings. Many other city commissions have already gone paperless.

Although city council and staff are currently looking into what the city can do in the future to reduce its carbon footprint, the city has always been "pretty aggressive" about looking into greener programs before it became fashionable, Rich said.

Rich said there has always been a desire by elected officials and residents to look into creating green policies and adopting environmentally friendly business practices. Not only have the greener policies helped out the environment, they have also helped Campbell's bottom line.

"It also made good business sense," Rich said.

—Brian Babcock

A photograph of bicycles by Fisher Middle School seventh-grader Natasha Cougoule is part of the Earth Day photo show in Los Gatos.

Education is the key

Community members realize that teaching the youth of today is an important part of shaping the leaders of tomorrow. Educators, parents and students from around the West Valley used their own skills, expertise and passion to coordinate a number of different activities on and around April 22 with one shared goal—to promote the understanding and protection of Mother Earth.

From kindergarten to college, no grade level went unnoticed.

A used book sale was scheduled April 22 to emphasize going green through recycling in and around the campus center at West Valley College, 14000 Fruitvale Ave.

"Whether you call it reducing your carbon imprint or just saving a tree, the idea is there are many popular books that trade hands anyway," said George Mageles, community resource coordinator for student health services at West Valley College.

There will be hard- and soft-bound books for sale throughout the day, and the funds raised will benefit the school's classified staff scholarship.

Mageles anticipates selling the books will be a success because faculty and administration offered such generous support preparing for the event. They offered a wide array of donations after clearing bookshelves in their homes and offices.

Students and parents from Louise Van Meter Elementary School also used a book setting as inspiration for a project.

Third-graders from the school worked on art pieces from April 14 to 16, using objects they found while spring cleaning in their homes earlier this month, including VHS tapes and old toys.

"It was junk, but all of a sudden it was shiny and new. It was just a major shift of perspective," said Daniella Simon, a parent of a student attending Van Meter. "The whole idea was don't look at things in terms of throwaway."

The students will dedicate their eco-art projects on April 22 to the Los Gatos Library's Green Section. Simon said this is a natural setting to display the work since "the library is all about the three Rs—reduce, reuse, recycle."

Simon was inspired to lead the project a year ago after first reading about eco-artists who use such materials as bottle caps to make beautiful mosaics.

The project grew into a collaboration of Art Docents of Los Gatos, Los Gatos Library, the West Valley Green Leaf Committee and Van Meter.

Simon said there were different benefits in working on the artwork.

"There seems to be gap in terms of getting information to kids," Simon said, "and this is one of the big issues that is driving me at this point. They're inheriting everything. We have a very short period of time to retrain ourselves and retrain our children."

Students from Los Gatos High School, Fisher Middle School, Blossom Hill and Lexington elementary schools are also putting their artwork on display during a photography show focused on sustainability. The exhibit is scheduled for April 25 at the Los Gatos Civic Center, 110 E. Main St., from noon to 4 p.m.

The idea was for students to take pictures to "show us the world through their eyes," said Nate Donovan, Los Gatos High photography teacher. Students ventured into different parts of the community, including local businesses, to capture the environmental effects we all have during our day-to-day lives.

No matter who you are, eventu-

ally "we are going to run out of resources," said freshman McKenna Everett.

She took 200 photos for the project, one she said is important to raise community awareness. The photographs submitted varied in styles, from scenic to abstract to photojournalism.

A picture alone is worth 1,000 words, but the photos displayed together will allow residents to "see how it all feeds into the story," said Nicole Williams, a parent volunteer for the event. "When you look at them all collectively, it makes a fantastic impact."

—Shannon Barry

Green means business

Ungdo Shin cares about what he puts in his customers, so much so that he is willing to pay more for it.

The owner of Big Basin Café in Saratoga runs an all-organic shop, meaning everything from the products to how they are served come naturally from the earth.

"In order to serve organic coffee, the delivery system also has to be non-chemical," Shin says. "We couldn't use a so-called recyclable cup, which is cost-effective but is chemically infested. So, we use a biodegradable cup instead, or else there is no use in serving organic coffee."

The cost of using biodegradable materials can be up to three times more expensive, Shin says, but it allows him to be able to call his café a truly organic coffee shop. Biodegradable—as opposed to recyclable—materials can be mixed in with other waste without contaminating the soil. Recyclable materials, meanwhile, can only be recycled, as the chemicals to make them are not natural.

For its efforts, Big Basin Café, 14471 Big Basin Way, received high marks on ecovian.com, a site featuring green business reviews and topics. The coffee shop earned five-star ratings in both organic coffee and tea served and biodegradable containers used.

In addition to tasting better, the organic coffee and natural foods at Big Basin Café, as well as the containers they're served in, benefit the customers in the long run, too. Biodegradable means all-natural, and that reduces the amount of dioxins, known to be cancer causing agents, the body absorbs, Shin said.

"Some customers are aware of what organic really means and some customers just like the taste of our coffee. But knowledgeable people know about the advantages of having biodegradable coffee and materials," Shin said.

While some businesses are going green themselves, others are helping people become more eco-friendly. Campbell-based Coulomb Technologies has been quickly rising as the leading producer of electric vehicle charging stations.

A construction worker sorts through the lumber at the home of Los Gatos resident P.K. Karnik. The lumber will be recycled to make wooden pellets, or re-used on homes in Mexico.

A mattress floats in Lexington Reservoir. It's just one of the many such items volunteers will target at a Lexington cleanup day on May 16.

Many drivers of electric vehicles can only charge their cars at home, but Coulomb allows them to refuel at the workplace or when they're out and about. The company has stations up and running in San Jose and San Francisco and as far away as Amsterdam.

And with just about every major automaker shifting toward more fuel-efficient and eco-friendly cars, Coulomb's smart-charging stations may be popping up in more cities.

"All of the automakers are doing electric cars, and we'll see them emerge between now and 2012," said Richard Lowenthal, Coulomb's founder and CEO. "So, we're out there selling stations and creating interest, and it's a worldwide thing."

Because it takes anywhere from four to eight hours to fully charge a vehicle, stations must be strategically placed. Right now, Coulomb is targeting the workplace and downtown areas, places where people tend to be for an extended period of time. But as more electric vehicles begin to hit the road, Coulomb may be looking to add stations at recreational venues, such as ballparks and arenas, Lowenthal said.

Lowenthal projects that in the next five years there will be remarkable advances in the industry, with more electric cars, charging stations and technology streamlining the two. Electric vehicles could be charging in a matter of minutes and drivers could be recharging at service stations, the way how most people do now at gas stations.

Most of these initiatives, Lowenthal says, will be made possible through the stimulus package.

"It's a good time to be doing green programs, especially green transportation," Lowenthal said. "It's good for cities to say, 'We're going to be electric vehicle-welcoming.' "

Also getting a boost from the stimulus package is Akeena Solar in Los Gatos. It may be nothing new to see solar panels on residential and commercials roofs these days, as property owners are beginning to invest in renewable energy. But Akeena is preparing for the next phase of clean technology: mixing aesthetics with being eco-friendly.

The latest solar panel from Akeena comes with a non-bulky, sleek design, but still has the reliability to last over time. The jet-black panels can be installed closer to the surface of the roof, limiting their visibility to onlookers.

When consumers begin looking for beauty to go with the brains, it's a sign that new technology has caught on.

"Without a doubt, as solar becomes more mainstream, you see that families are looking for panels that will reduce electricity bills and plus will also look well on a person's home," said Jose Tengco of Akeena Solar. "We've worked hard to ensure that we can provide the best looking and most reliable panels on the market."

The hardest part for those thinking about going solar is making the investment, but even that is starting to change. With solar power becoming more available, the price to make the switch is getting cheaper, Tengco said.

According to a study by the California Public Utilities Commission, Californians in 2008 "installed twice as many megawatts of solar power than the year before, and demand for new solar projects continues to hit record levels." Moreover, the California Solar Initiative led to more than $5 billion worth of private investment in solar projects.

"Clearly, with the going green movement and climate change, people are turning to renewable energy. And from an economic view, they find they are getting a strong return on the money invested today, so it becomes a win-win," Tengco said. "Families get to reduce electricity costs and at the same time address climate change."

—Chris Vongsarath

Series of local events related to Earth Day

Although Earth Day is officially April 22, many Earth Day-related activities will be held throughout the week and are listed below:

Life lab—On April 22 staff and students from Saratoga Elementary School will honor Earth Day with the official opening of their Life Lab Garden. There will be different displays and presentations from 9 a.m. to 2:30 p.m. in the outdoor classroom of the school, 14592 Oak St., including water filtration systems, insects of the garden, worm composting and solar cooking.

Used book sale—A used book sale is being held April 22 to emphasize going green through recycling in and around the campus center at West Valley College, 14000 Fruitvale Ave. in Saratoga. The event is a fundraiser for the school's classified staff scholarship.

Arbor Day—A tree-planting ceremony takes place April 24 at 10 a.m. at La Rinconada Park, Wedgewood Drive and Granada Way.

Another Arbor Day celebration— The city of Saratoga will celebrate trees on Arbor Day with a community gathering at Beauchamps Park, between Beauchamps Lane and Bowhill Court. The event will be held on April 24 at 3:30 p.m. Residents can help plant a tree, learn more about the trees in Saratoga and can take a seedling home that they can plant themselves.

Highway 9 clean-up—Five local Rotary Clubs, including those from Saratoga, Los Gatos, Campbell and Cupertino, are sponsoring the "Great Highway 9 Cleanup" on April 25. Volunteers for the cleanup are asked to meet at the La Hacienda Inn, 18840 Los Gatos-Saratoga Blvd., at 9 a.m. for a free breakfast. Volunteers and Rotarians will then pick up trash along Highway 9 for a couple of hours before being treated to a barbecue.

VOLUME 126, NUMBER 7 | LOS GATOS, CALIFORNIA | FEBRUARY 17, 2009

Photograph by Neal Waters

Gardener Arthur Ragan, raking leaves in front of the Wells Fargo building on N. Santa Cruz Avenue in downtown Los Gatos, is among the Allied Landscape Services employees to be certified a Green Gardener in the West Valley Clean Water Program. The program serves Los Gatos, Monte Sereno, Saratoga and Campbell.

Class helps gardeners join the green team

Program has been winning awards

By JUDY PETERSON

A green gardening program that was developed in part by the West Valley Clean Water Program has been winning awards for its innovative ideas.

The clean water program, which serves Los Gatos, Monte Sereno, Saratoga and Campbell, was created to control pollution being dumped into creeks, streams and stormwater drains.

Recently, the California Stormwater Quality Association honored the Green Gardener program with an outreach award for the work it has done with small landscaping contractors.

"It was a 10-week course to educate landscape professionals on what type of environmentally safe practices are out there in place of the norm," Tito Fonseca of Allied Landscape Services said.

Fonseca and two other Allied employees were among the first to become certified Green Gardeners.

"It taught us simple gardening practices like pruning techniques, composting and minimizing water use," he said.

The latter will become even more important as water rationing is expected to be mandated in Santa Clara County beginning next month.

"We learned to use mulch over bare soil to keep water in the ground," Fonseca said.

The program also focused on minimizing the use of herbicides. "The chemical industry does a very good job advertising their products," he added, "but they don't touch on the environmental impact chemicals have."

Fonseca works with clients in both Los Gatos and Campbell.

"Green gardening is becoming more and more important to clients. Customers want to see that contractors are educated and doing what we can to preserve, protect and not pollute their property," Fonseca said.

Solutions Gardening Service owner Abel Yanez agrees.

"We wanted to separate ourselves from regular gardeners to see how we could help customers save water," Yanez said.

Yanez is using his newfound skills at customers' properties in Campbell, Saratoga and elsewhere.

"We're trying to re-layout sprinkler systems, and we're changing to organic fertilizer to help with the environment," he said.

One of the important things Yanez learned was how to test soil so that the right plants are properly placed. "You plant here and there," he said. "Now we know exactly what to do."

Yanez described the Green Gardener program as very beneficial. "We are planning to send five more people," he added.

"inadequate community facilities: e.g. the lack of a performing arts center and an inadequate library." This was 18 years ago.

Redevelopment money has funded a wide variety of improvements, including the town plaza, street reconstruction and a contribution to the high school pool.

We support the use of redevelopment funds for a new library.

ANN ROBERTS, PRESIDENT
LWV of Southwest Santa Clara Valley

More support for a library in Los Gatos

I support Los Gatos building a new public library. I *do not* support cleverly worded, misleading petitions.

ALICE H. HANSEN
Los Gatos

Blanket ban at concerts is ridiculous

Banning blankets at the local summer concerts—now I have heard everything. You either have concerts and have a fun atmosphere or you don't. The grass recovers after the concert season. It has looked fine for months.

this town that I would fight for their park.

It was another member of the skateboard park committee who decided to use paid petitioners and paid them. Steve Glickman did not hire the petitioners. They got the job done. Yes, we were beaten in the election due to dirty politics and a dirtier press. I would be happy to expound upon that at another time. The residents voted, and for whatever reason, they voted against building the park.

You talk about money wasted on elections. The town council spent more than $500,000 on surveys that concluded if the construction of a new library went to a vote, it would be turned down. Don't get me wrong; I am in support of a new library. However, there are more efficient plans and ideas that will cost far less. That is why it is so important to allow the voters to decide how the town spends taxpayer money on major projects. Why have this and other extreme expenditures pushed down our collective throats?

If you, the voter, decide to spend $18 million on a library, then I'm all for it. We have been told that the money is coming from redevelopment funds, but that is only $12 million. The rest will come out of the town gener-

worked with the developer on the First Republic building was interesting. Look at the building. It has Tuscan columns holding up arches here, Mission-like but fake Corbel-looking shapes holding up straight openings over there, windows with wood shutters, palladium windows with and without columns, straight windows without adornment, Craftsman-style exposed knee braces and an oversized tile roof. That it came out OK is testament to the developer, but stylistically it's a Tuscan, Mission, Monterey, Craftsman mess—definitely the kind of thing a committee would produce.

Let's let some originality happen. Look at what's going on in other places, countries, cities. Curious juxtapositions of color, shape and style create visual interest, not discord. Designing harmonious sameness will give us a look that one can understand easily in one pass. Los Gatos can be a much more interesting place than that. Let's allow some creativity, expressiveness, even oddness to happen here. We don't want to be known as a city of conformity, do we?

GEORGE HAVELKA
Los Gatos

Yellowjackets?

Use less toxic ways to control pests and prevent polluted runoff from entering our creeks and the Bay.

Fill yellowjacket traps with apple juice.

Participating sponsors: Santa Clara Valey Water District, City of San Jose, Santa Clara County Parks, and Watershed Watch.
Participating agencies: Lockheed Martin SSC Leadership Association, San Francisquito Watershed Council, San Francisquito Watershed Project, Santa Clara Valley Urban Runoff Pollution Prevention Program, West Valley Clean Water Program, and the cities of Cupertino, Gilroy, Mountain View, Palo Alto and Sunnyvale.
Participating groups: Apollo High School, Blackford Neighborhood Action Coalition, Forest Hills Elementary School, Friends of Los Alamitos Watershed, San Tomas West Neighborhood Association, Save the Bay, and Silicon Valley NAACP.
Participating companies: Bianchi-Amaker Construction, Callahan Real Estate Group - Coldwell, and Intel Corporation.
Participating donors: Children's Discovery Museum of San Jose, City of San Jose Parks, Recreation, and Neighborhood Services (Happy Hollow Park and Zoo), Classic Carwash, Hobee's California Restaurants, In-N-Out Burger, San Jose Repertory Theatre, San Francisco 49ers

Subject: "Enviroscape" at Audubon Society Wildlife Education Day
Date: Tuesday, October 28, 2008 10:52 AM
From: Marj Ottenberg <marjott@yahoo.com>
To: <kelly.westvalley@comcast.net>

Kelly Carroll
West Valley Clean Water Program,
18041 Saratoga-Los Gatos Rd., Monte Sereno, CA 95030

Dear Ms. Carroll--first, let me say I wanted to send this by U.S. Mail--and have been trying for 3 days--but my printer refuses to accept my requests! So, I fall back on electronic mail!

Our Sierra Club group was THRILLED to have Patrick Hansen bring your Enviro-scape to share our space at Santa Clara Valley Audubon Society's annual Wildlife Education Day! It was the HIT of our corner of the affair! We especially appreciate the fact that it educates parents along with the kids-- who are enjoying squirting and sprinkling the various "contaminants" on the "environment"--and watching it wash into gutter to creek to Bay. Hopefully, these kids will CONTINUE to prod parents and friends, NOT to thoughtlessly discard stuff, because they now KNOW what harm such actions can cause! Patrick did an outstanding job, relating to the kids and "telling his story". I don't have a count of attendees--but everyone had to park at Monte Vista High School, about a mile up McClellan Road, and SCVAS hired school buses to ferry people from parking lot to the "party", and back again throughout the day (no cost to riders!); that parking lot was almost
completely full all day--so we know LOTS of people came! SCVAS covers the south half (and perhaps more) of Santa Clara County; they have active programs for kids as well as adults, including classroom sessions in local schools; (their monthly lecture meetings--in Palo Alto and Campbell-- draw several hundred members! I wish our Sierra Club Group could do as well!)
I was quite interested in your "mercury-free" thermometers--FAR superior to the old glass ones in many ways! I'd like to buy a few of them, to show to Sierra Club trip leaders--who are responsible for health care for trip participants. Next time I'm in Monte Sereno, I may stop by----
meanwhile, you and Patrick have our sincere THANKS! for helping us educate (and entertain) a LOT of local residents!
Marjorie Ottenberg, Program Chair, Guadalupe Regional Group, Loma Prieta Chapter, Sierra Club.

Discovery Day Enviroscape Presentation Outline

Intro: Hello My name is…

Background on the West Valley Clean Water Program….

Questions:

1. What is nonpoint source pollution?
2. What is point source pollution?
3. What is a watershed and water cycle?
4. What is the difference between a sanitary sewer system and a storm drain system?

Provide background information to audience:

What is a coastal zone? Answer Page 7. Give examples of local SF bay.

Importance of coastal wetlands.

How coastal zones are affected by water pollution.

a. Car Washing (Talk about Car Wash Kit)
b. Pet Waste
c. Hazardous Materials
d. Paint
e. Swimming Pools
f. Trash
g. Pesticides

What the West Valley Clean Water Program does and how you can help.

a. Take car to carwash, or ask about carwash kit for fundraisers
b. Reuse mugs, canvas bags etc., wrapping paper..
c. Participate in creek cleanups, pick up trash if you see it.

Play on Enviroscape model.

Dear Patrick, Kelly, and Christine,

The Sedgwick PTA, Sedgwick Staff, students and parents would like to say "Thank You" for participating in Discovery Day 2009! The students thoroughly enjoyed your presentation on Preventing Watershed Pollution. This important presentation made an impact on the students, including my 3rd grader who came home talking about how he can keep the waterways cleaner by picking up garbage by the drains and by the sidewalks.

Discover Day is a proud Sedgwick tradition that our children enjoy very much. We sincerely appreciate you taking time out of your schedule to help educate our kids. I am enclosing thank-you letters written by the children of Sedgwick Elementary.

Sincerely,
Tracey Trimeloni
PTA volunteer

WVCWP School Presentation Feedback

Thank you for inviting the West Valley Clean Water Program to give our watershed presentation. We ask you to please take the time to fill out this form. Your feedback will help us to deliver better presentations in the future. Please circle the number that corresponds with your opinion for each category. Circle 5 if you strongly agree with the statement, 4 if you agree, 3 if you are neutral, 2 if you disagree, and 1 if you strongly disagree.

A. OVERALL	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree
1. Setting/Room was pleasant	1	2	3	4	5
2. Materials used were useful	1	2	3	4	5
3. Content was interesting	1	2	3	4	5
4. Participants learned a lot	1	2	3	4	5
B. Speakers					
1. Speakers were knowledgeable	1	2	3	4	5
2. Speakers able to answer questions	1	2	3	4	5
3. Speakers kept audience interested/engaged	1	2	3	4	5
C. Results					
1. Presentation improved the students understanding of watersheds and urban run-off	1	2	3	4	5
2. I would consider having the WVCWP present at future events.	1	2	3	4	5

Comments:

Patrick was good with kids. He was on time and even got through everything he needed to do with the kids with the shorter time frame. The kids really enjoyed the hands on. Thank you so much. Sincerely Chris Daly

Created 7/23/08 PH

Annual Cleanup Program

West Valley Collection & Recycling (WVC&R) will collect an unlimited number of items from your curb at no additional cost for one day only.

Please have your items, containers and bundles curbside by

6 AM on Wednesday, August 27, 2008

WVC&R will collect:

- Items weighing up to 70 pounds (except as described below)
- Garbage in 32 gallon plastic bags, 32 gallon cans, and sturdy cardboard boxes (all small items must be contained)
- Tree prunings, branches and scrap wood up to 3" in diameter and 3' long in tied bundles weighing up to 70 pounds

WVC&R will not collect:

- 35, 65 or 95 gallon wheeled carts (they are awkward to lift manually)
- Concrete or Dirt (call Guadalupe Landfill 408.268.1670)
- Tires (call Guadalupe Landfill 408.268.1670)
- Items containing CFC's such as refrigerators (call WVC&R 408.283.9250)
- Household Hazardous Waste (call 408.299.7300 or visit www.hhw.org)
- E-Waste, Universal Waste, Motor Oil and Water Based Paints:
    - You can drop off TV's, Computers, household batteries, motor oil and water based paints at WVC&R's processing facility by appointment. For more information call customer service at 408.283.9250 or visit www.westvalleyrecycles.com
- Large items or containers over 70 pounds:
    - WVC&R will collect large items such as sofas and refrigerators for a fee. To schedule an appointment please call customer service at 408.283.9250

WVC&R makes it easy for you to donate your reusable items. For assistance locating local charitable organizations, visit www.westvalleyrecycles.com or call 408.283.9250.

Please remember to place recyclables in your recycling cart for your regular weekly collection.

To learn more about any of these programs visit www.westvalleyrecycles.com or call customer service at 408.283.9250.

BILL PAY THE EASY WAY

West Valley Collection & Recycling has made it easier than ever to pay your bill. Choose the method that works best for you.

Mail it: Make your check payable to West Valley Collection & Recycling. Be sure to include the payment stub to get credit for your payment right away. Use the pre-addressed envelope included with your bill.

Drop it off: We accept payments at our office Monday through Friday from 8 AM – 4:30 PM

Deliver checks to:
West Valley
Collection & Recycling
1333 Oakland Road,
San Jose, CA 95112

Pay / View Your Bill Online: Visit our new online payment system at www.wasteconnections.com; click on "Online Bill-Pay" and follow a few simple instructions. You must have your current invoice and credit card or debit card information available.

Home banking customers continue to use the remit address:

West Valley
Collection & Recycling
Dept. 1433
Los Angeles, CA 90084-1433

You must have your current invoice available.

Have questions about your recycling service?

Ask Randy

Q: What do I do with my used charcoal?

A: You can recycle charcoal. When you finish cooking, pour water on the briquettes. Let them dry thoroughly. Next time you grill, mix half new charcoal with half used.

The absolute safest way to dispose of ashes, regardless of whether they're red-hot or seemingly stone-cold, is to put them in a small, galvanized metal trash can that is dedicated to the purpose of ash storage. Keep the can away from any flammable materials, like your house, wood pile, dry grass, or weeds. Once ashes are completely cold bag them before placing into your garbage cart. If a dedicated ash container is not an option, stir through the ashes to make sure they are absolutely cold before placing them in the your garbage cart.

Remember, even ashes that seem cold on the surface may still be hot deep inside, even after sitting for two days, so wait at least 48 hours before disposing of them in the garbage.

AT YOUR SERVICE: Curbside Collection for Used Motor Oil

Summer's here and time to get the car in tip-top shape. West Valley Collection & Recycling provides FREE containers for your used motor oil so you can keep your car running smoothly, and help our collection go smoothly, too.

Call customer service at **(408) 283-9250** to order your FREE OIL JUGS AND OIL FILTER BAGS and WVC&R will deliver them curbside on your next collection day.

Schedule a drop off appointment for the items listed below by calling (408) 283-9250:

- ✓ Used motor oil and oil filters
- ✓ Water based paints
- ✓ Universal Waste = batteries, fluorescent tubes and bulbs and other mercury containing lamps, thermostats, electronic devices, electrical switches and relays, pilot light sensors, mercury gauges, mercury added novelties, mercury thermostats and non-empty aerosol cans that contained hazardous materials.
- ✓ E-Waste = televisions and computer monitors, CPUs, laptop computers, external computer hard drives, computer keyboards, computer mice, computer printers, DVDs and VCRs.

IMPORTANT TO NOTE:

E-Waste Drop Off Event

E-Waste Drop Off Events will be taking place in West Valley cities soon. Please go to www.westvalleyrecycles.com to find the event in your community. Drop off E-waste such as computers, computer monitors, hard drives, TV's and VCR's absolutely FREE.

Clean Yard Trimmings

Keep your yard trimmings "Green" and your recyclables clean by keeping all garbage out of your yard trimmings and recycling cart. Garbage contaminates recyclable materials.

RESIDENTIAL

West Valley Recycles! Summer 2008

SPLIT BODY TRUCKS: Keeping Your Yard Trimmings and Garbage Separate

It's been more than a year since West Valley Collection & Recycling began the single-stream recycling program and rolled out our new split body trucks.

Our split body trucks have made a big difference in the neighborhoods they serve on trash day, because now in most neighborhoods one truck collects all garbage and yard trimmings, where previously two were needed.

Look for new labels on the back of the trucks identifying the material in each side. The collection compartment of these trucks are completely separate with garbage occupying 40% of the capacity, and yard waste filling the other 60%. The driver maneuvers the hydraulic arm to lift and empty the contents of your garbage and yard waste cart into the chute. After tipping the cart, the driver uses a toggle switch to direct the flow of material into the appropriate chamber, keeping the two materials completely separate. The result of using split body trucks: fewer trucks moving through our neighborhoods on collection day, fewer trips to the landfill, less wear and tear on our roads, less pollution, and fewer greenhouse gasses. Next time you see these trucks on collection day, they may appear to be white, but now you know, they are really pretty green.

Remember, Keep your yard trimmings "Green" and your recyclables clean by keeping all garbage out of your yard trimmings and recycling cart. Garbage contaminates recyclable materials.

KEEP UP THE GOOD WORK!

West Valley Collection & Recycling customers are loving single-stream recycling. The use of split body trucks mean less noise and pollution and the single-stream system means more efficient collection. Everyone is doing a great job.

Here are a few reminders to ensure collection days keep running smoothly and our neighborhood streets stay clean and neat too. Remember:

- Place carts with the wheels against the curb, at least two feet apart.
- Situate carts at least five feet away from vehicles and other obstructions such as basketball hoops.
- Secure light items such as plastic grocery bags and packing peanuts in bags to eliminate litter.
- Flatten and breakdown all cardboard. This will maximize the capacity available in your recycling carts.
- Do NOT overstuff carts.
- Please be sure lids are closed.
- Keep Recycling.

Don't Get Stuck with Your Sharps–Dispose of Them Properly

PROPERLY AND SAFELY DISPOSE OF YOUR SHARPS–HERE'S HOW:

✦ **Pharmacies, Doctor's Offices or Clinics:** Place your used home-generated sharps in a biohazard commercial sharps container and contact your Pharmacist, Clinic Administrator, or personal Physician, and ask if they have a take back program in effect. Sharps containers can be purchased at your local pharmacy.

✦ **Mail Back Services:** If you purchase sharps on-line, please remember to request a pre-addressed, prepaid mail-back box for your used sharps. A list of mail back services approved by the California Department of Public Health can be found at the following website: www.cdph.ca.gov/certlic/medicalwaste

✦ **Santa Clara County Household Hazardous Waste (HHW) Program:** The HHW Program accepts sharps waste, pharmaceuticals (No Controlled Substances), and other household hazardous waste from Santa Clara County residents (except Palo Alto residents). For more information on pharmacies and other locations that accept used sharps or to make an appointment to dispose of your sharps, visit **www.hhw.org** or call **(408) 299-7300**. Remember, residents must place their used sharps in a biohazard commercial sharps container.

Home generated sharps are needles, syringes, and lancets that assist people who use sharps or syringes at home to manage an illness. When sharps are improperly disposed of they pose a threat to sanitation workers, adults, children, and even pets with needle-stick injuries. Because of the high risk to the community and environment, Senate Bill 1305 was passed and will take effect on September 1, 2008. This law makes it illegal to place home generated sharps in the trash or recyclable containers.

West Valley Recycles!

Spring 2009

THEY'RE COMING, THEY'RE FREE!

Electronic Waste Drop-off Events are the Place to Be

West Valley Collection & Recycling is sponsoring three FREE e-Waste Drop Off Events this spring.

HERE'S WHY:

Toxic substances in electronic waste include lead, mercury, and cadmium. A typical computer monitor may contain more than 6% lead by weight. Capacitors, transformers, PVC-insulated wires, and PVC-coated components are loaded with toxins and carcinogens. In the U. S., an estimated 70% of heavy metals in landfills come from discarded electronics. Electronics do not belong in the trash!

HERE'S WHERE & WHEN:

April 25th, 2008 9:00 AM - 2:00 PM
City of Saratoga, North Campus
19848 Prospect Road, Saratoga, CA

April 25th, 2008 9:00 AM - 2:00 PM
Los Gatos United Methodist Church
111 Church Street, Los Gatos, CA

April 18th, 2008 9:00 AM - 2:00 PM
Campbell United Church of Christ
400 West Campbell Ave, Campbell, CA

HERE'S WHAT:

Unlimited amount of TVs, Computers, Monitors, Electronic Toys, Fax Machines, Phones, Copiers, HDTVs, LCDs, typewriters and Stereos including speakers will be accepted at these events.

However, we do *not* accept light bulbs, kitchen appliances or hazardous waste.

Congratulations, 2008 E-Waste Recyclers!

COLLECTIONS WERE A SMASHING SUCCESS.

Last year, a total of 169,776 pounds of E-Waste was collected from Campbell, Los Gatos, Saratoga and Monte Sereno residents who participated in our E-Waste Drop Off events. That's 169,776 pounds of dead monitors, outdated cellphones and ancient fax machines. This year, let's work together to set a new standard for the collection of Electronic waste.

Clutter Busting

Here comes spring! Let's enjoy the many reasons to get outside and enjoy the outdoors: great weather, flowering trees, tulip bulbs pushing their way towards the sun. The fact that our houses are filled to the brim with clutter—the aftermath of a long, cold, winter is another reason to get out of the house. Here are some ideas to de-clutter the house and enjoy the outdoors too. These tips make the job easy. First, organize what is not trash into three labeled piles: sell, donate, or recycle. Next, get to work:

Have a garage sale or even better, organize a neighborhood garage sale. Better yet, get your *neighbor* to organize it!.

Donate your gently used clothing, books, furniture and working appliances to a local thrift store benefiting charity. Some organizations provide pick-up service, and all of them should provide you with a donation receipt to use as a write off on your income taxes.

Create a compost pile with your tree trimmings and lawn clippings. (Remember, May flowers are right around the corner-this compost will come in handy later.)

Participate in the West Valley Collection and Recycling Clean Up Event. It's free and it's easy. We'll collect an unlimited amount of your items at the curb on your neighborhood's designated day. Items weighting over 70 pounds will not be accepted. Look for our flyer in the mail two weeks prior to the event.

Request a bulky item pick-up. We'll pick things up from your curb for a small fee. Just call customer service at **(408) 283-9250**, we'll be right over.

Recycle items that can't be reused.

Put hazardous waste in its place. Batteries, light bulbs and water based paints do not belong in our landfill. They can be dropped off along with electronic devices at our facility. Check out www.westvalleyrecycles.com ewaste and universal drop off for more information.

Drop off your e-waste. The televisions, computers stuff, and vintage VCRs that didn't get picked up at the big garage sale can be dropped at the ewaste events coming up. Check out the e-waste article in this issue for what to bring, our hours and directions.

PO BOX 60248
Los Angeles CA 90060-0248

You must have your current invoice available.

Have questions about your recycling service?

Ask Randy

Q: I am going to bring my old video cameras to an e-waste drop-off location this spring. May I also bring my bottles of pesticides that I no longer use?

A: No. The Electronic Waste Events are computers, monitors, mice, keyboards, cellphones, cameras, old fax machines, and the like, not hazardous materials. Automotive fluids, lawn and garden chemicals, and household cleaners and poisons, can be disposed through the Santa Clara County Hazardous Waste Recycling and Disposal Program. For details, call **(408) 299-7300** or visit **www.hhw.org**. *To submit a question for "Ask Randy" send him an e-mail at customerservice@westvalleyrecycles.com with "Ask Randy" in the subject line.*

Greening your Cleaning

Get all of the dirt on how to clean your home in a planet-friendly way. Just in time for spring! Make your mother proud. Mother Earth, that is.

Floors: Vinegar is an excellent cleaner for ceramic tile or linoleum. Used straight or mixed with water, vinegar and a sturdy mop are all you need for a green, squeaky-clean kitchen floor.

Sinks: One part vinegar, four parts baking soda and several drops of your favorite essential oil(s) makes for a pleasant, earth-friendly sink scrub. Just like the store bought kind, apply the paste with a sponge, let sit for a few minutes then rinse for a sparkling clean sink.

Windows: Vinegar again, this time in a spray bottle. Wiping vinegar-sprayed glass with crumpled newspaper will make your windows shine bright. Don't clean windows when they're in direct sunlight, because they will dry too fast and look "streaky."

Rugs: Shake baking soda over the carpeting before vacuuming to help to absorb odors. For spot cleaning, rely on your old friend, vinegar. Spray it on, scrub out the spot with a clean cloth. Don't worry; the vinegar smell is gone in no time.

Furniture: Sprinkle stale cushions and chairs with baking soda, then vacuum after letting it sit for a while.

Toilet and Tub: Spray with vinegar first, then sprinkle on baking soda for natural, fizzy cleaning power. Scrub with a sponge or toilet brush, then rinse clean or flush.

Garbage cans: Borax is a mineral that will prevent mold and fungus, and keep away insects. Just sprinkle on the bottom of your carts or household cans.

Bad Smells: Zeolite* is a natural mineral that absorbs odors and also controls excess moisture in the air. Use it as a general deodorizer and to combat mildew or mold.

***Bonus!** When used in refrigerators and freezers, Zeolite can reduce electricity cost by up to 12% by maintaining optimum humidity, and it helps keep food fresher.

More Green Cleaning is Just a Click Away

Environmental Home Center is an online source for green building supplies, including people-friendly cleaning supplies, non-toxic paint, natural carpets, sustainable wood products, and energy-efficient insulation. (www.environmentalhomecenter.com).

Seventh Generation (www.seventhgeneration.com), the leading seller of green cleaning products in North America, offers tips on green cleaning.

The Green Guide (www.thegreenguide.com) provides consumers with practical, everyday household- and market-level actions that can yield system-wide environmental, health, and social change.

How To Eliminate Litter

Remember to place all loose light items such as shredded paper, plastic grocery bags, styrofoam packing peanuts and any other items in a tied plastic bag before placing in your cart.

Cart Labeling

You may see WVC&R supervisors in specific neighborhoods labeling garbage, recycling, and yard waste carts with address numbers. This will help differentiate your cart from your neighbors.

RESIDENTIAL

West Valley Recycles!

Fall 2008

DON'T GET STUCK WITH YOUR SHARPS: Dispose Of Them Properly!

On September 1, 2008, a new law has taken effect, which will make it illegal to place home generated sharps in trash or recycling receptacles. Home generated sharps are needles, syringes, and lancets that assist people who use sharps or syringes at home to manage an illness. When sharps are improperly disposed of they pose a threat to children, adults, sanitation workers, and even pets. Here's how to properly and safely dispose of your sharps:

Note: Residents MUST place sharps in a biohazard sharps container, which are available for purchase at your local pharmacy, before bringing to any of the approved sharps drop-off locations.

✦ **Pharmacies, Doctor's Offices or Clinics:** Contact your local Pharmacy, Medical Clinic, or personal Physician and ask if they can start a take back program.

✦ **Mail Back Services:** If you purchase sharps on-line, please remember to request a pre-addressed, prepaid mail-back box for your used sharps. A list of mail back services can be found at **http://www.cdph.ca.gov/certlic/medicalwaste**

✦ **Santa Clara County Household Hazardous Waste (HHW) Program:** For more information on pharmacies and other locations that accept used sharps, or if there is not a location near you to take back your sharps, contact The Household Hazardous Waste Program at **www.hhw.org** or call 408-299-7300.

SHARPS TAKE-BACK LOCATIONS IN THE WEST VALLEY AREA

Call for packaging requirements before you bring used household syringes, needles, and lancets to the following drop off locations:

SARATOGA

West Valley Fire Station
19800 Cox Avenue, Saratoga
Biohazard Sharps Container Size Requirement: One quart or one and half quart size for drop off box

COUNTY OF SANTA CLARA, HOUSEHOLD HAZARDOUS WASTE (HHW) PROGRAM

Deposit used home-generated sharps into a biohazard sharps container, when the container is ¾ full permanently seal shut and make an appointment through our website at **www.hhw.org** or call **(408)-299-7300**

HOLIDAY SCHEDULE

Collection occurs on all holidays except December 25th and January 1st.

Both December 25th 2008 and January 1st 2009 fall on Thursday. During these weeks, if your regular collection day is Thursday collection will occur on Friday. If your regular collection day is Friday collection will occur on Saturday. No other collection days will be affected.

HOLIDAY TREE COLLECTION

Beginning December 26th 2008 and continuing through January 25th 2009, WVC&R will collect up to two Holiday trees per residence as part of your regular collection.

- Undecorated natural or flocked holiday trees are acceptable.
- Please remove stands, tinsel and decorations.
- All trees must be cut into 5-foot or preferably shorter lengths.
- Place the tree at least one foot away from WVC&R carts.

To receive your FREE recycling "How-to Guide," call Customer Service at (408) 283-9250 or visit www.westvalleyrecycles.com

Have questions about your recycling service?

Ask Randy

Q: With the Holidays around the corner, I'm very interested in finding a way to eliminate waste and complete the recycling loop by giving to others. I just don't know where to begin.

A: Re-using an item is far better than recycling. Donating heavy coats, sweatshirts, beanies or blankets can make for a warm Holiday to a family in need. Also, if you have household electronics such as TVs, phones or computers you don't want to go to waste check out donation alternatives before you recycle using the links below.

Goodwill: **http://www.goodwill.org**
Salvation Army: **http://www.salvationarmyusa.org**
RecycleWorks Reuse Center: **http://www.recycleworks.org**

If you have clothing that is shredded or not in "wearable" condition, you can always recycle them! Tie fabrics in a clear plastic bag and place in your recycling cart for collection. We'll do the rest. **Acceptable Items:** Clean cotton, linen, polyester, rayon and wool fabrics (e.g. blankets, clothes, cloth diapers, rags, sheets) **NO** rags or textiles soiled with chemicals, oil or paint. NO Shoes, Carpets, Disposable diapers, Down-filled items, Leather, Nylon, Pillows, Rubber, Stuffed animals, Vinyl.

MAKE IT A GREEN HOLIDAY

Thinking green begins long before you determine which item goes into your garbage cart and which one goes in your recycling cart. It starts with knowing which materials to buy at the store that reduce waste in your household. So remember to always look for the recycle triangle when you buy.

When picking up gift-wrap this Holiday season remember to buy wrapping paper made from recyclable materials. YOU CANNOT RECYCLE METALLIC OR FOIL GIFT-WRAP.

For those of you that want to get really creative. You can use recyclable materials to wrap and personalize a gift using old magazines, sections of the newspaper and even a brown grocery bag. Wrapping and decorating giftsusing a grocery bag only takes a few minutes of your time to better the environment and make a memory.

Follow these easy steps:

- You will need a brown grocery bag, scissors, colorful pens or markers and tape.
- Cut down the seam of the bag from top to bottom.
- Turn inside out to hide all store advertisements and give yourself a blank canvas.
- Wrap gift.
- Decorate with personalized greetings and drawings of your choice.

Coastal Art and Poetry Contest

By encouraging youth to reflect on the beauty and spirit of California's beaches and ocean, we hope to inspire a greater sense of stewardship for these natural places. A population that cares about the coast is more likely to work to conserve and protect it.

View winning artwork and poetry from previous contests (some of which will open in a new window): 2008, 2007, 2006, 2005, 2004, 2003, 2002, 2001, 2000, and 1999.

A selection of Coastal Art & Poetry Contest winners and honorable mentions will be on exhibit at the following locations during 2008:

- Coyote Point Museum of Environmental Education in San Mateo, May 6 through June 15, 2008.
- Peter and Mary Muth Interpretive Center, Newport Beach, September 2 through September 30, 2008
- Cabrillo Marine Aquarium, San Pedro, October 21, 2008 through January 11, 2009

2009 California Coastal Art & Poetry Contest

WHO: All California residents in kindergarten through 12th grades are invited to participate. There are four categories for awards in both art and poetry: K-3rd, 4th-6th, 7th-9th, and 10th-12th grade.

WHAT: Entries must have a **California** coastal or **California** marine theme. (For help with California species, click here.) Poetry and artwork must be original. Art should be no larger than 11 inches by 17 inches. Acceptable art media are paint, pencil, markers, ink, crayon, chalk or pastel (fixed), and collage. Three-dimensional pieces, computer printouts, or photocopies are not eligible. All entries must include a completed contest Entry Form.

Winners will be selected in each of four grade-level categories (K-3rd, 4th-6th, 7th-9th, and 10th-12th) in both art and poetry to receive a gift certificate for $100 to an art supply store (for winners in art, courtesy of Blick Art Materials) or book store (for winners in poetry). Each sponsoring teacher will receive a gift certificate for $40 for educational materials. Winners and honorable mentions will also receive tickets to the Aquarium of the Pacific in Long Beach, courtesy of the Aquarium.

WHEN: Entries must be postmarked by January 31, 2009.

HOW: Review and complete the Guidelines and Entry Form and submit it with your art or poetry to:

Do you see what I see?

I see the waves.

JURIED ART CONTEST:

Your View of The Estuary

How do you see the San Francisco Bay Estuary, that unique place where land, ocean, and fresh waters meet? Do you have a favorite view or scene that "means" the estuary to you? The San Francisco Estuary Project is seeking art for possible use in a postcard, our web site, and other materials depicting the San Francisco Estuary—we are looking for scenes or impressions of the Bay, its marshes, and/or streams or rivers entering the Bay. All media are acceptable—oil, water color, pastel, pen and ink, block prints of all types, and photos. A $1,000 cash prize will be awarded to the first prize winner, $500 to the second place winner, and $250 to the third. The Estuary Project retains the right to use the artwork (credited) in print and on-line.

Please submit your entry either as a slide labled with title of piece and your name (to the address below) or as a jpg—no larger than 2 MB—emailed to lowensvi@sbcglobal.net no later than August 1, 2009. Slides cannot be returned.

For more information, contact:
Lisa Owens Viani
San Francisco Estuary Project
1515 Clay Street, 14th Floor
Oakland, CA 94612
(510) 622-2337

Courtesy of Hiroko Kusuda

We will contact the top 20 winners for possible use in a display at this year's State of the Estuary Conference at the downtown Oakland Marriott, Sept. 29-Oct. 1. No more than three entries per artist, please. Original art pieces must be no larger than 24" by 36"; artists will be responsible for delivering and retrieving their art. Digital entries may also appear on our web site, and contest submission is considered permission to use.

FY 2008-2009 ANNUAL REPORT

FY 2008-2009 Work Plan Self Evaluation Matrix				
Source	**Task Source**	**Work Plan Tasks**	**Accomplishments**	**Responsible Party**
	SCVURPPP PMP (I.A.1.)	Summary of Use Track and report use of pesticides on municipally owned property. *Municipal Staff* to report to WVCWP for: 1) pesticides applied by staff 2) pesticides applied by contractors *Reports to include:* -name of pesticide used -active chemical in pesticide -purpose of pesticide -amount used in each application -date of each application WVCWP to present pesticide use data in Annual Report.	Pesticides applied by municipal staff are reported monthly to the State of CA Dept. of Pesticide Regulation with copies of monthly reports forwarded to WVCWP for tracking purposes. Pesticide use by the municipal Pest Control contractor (PCO) have also been forwarded to WVCWP. Per Annual Report Guidance from Water Board, actual pesticide use data is not included in this Annual Report, but is on file for future reference and analysis as needed.	
			TOWN OF LOS GATOS: Town of Los Gatos Parks Maintenance staff is applying only Roundup, Garlon, and occasionally Surflan. No organophosphates (diazinon, chlorpyrifos) were applied by Town staff or Town's Pest Control contractor.	Parks Maint Supt & Facilities Mgr
	SCVURPPP PMP (I.A.3.) PS #3	Implement BMPS Continue to Implement IPM practices as Best Management Practices (BMPs) for any pesticide used by staff or contractors. Report on use of IPM practices on municipal property.	During FY 08-09, the WVC continued to implement the Pest Management Performance Standard (PMPS). "IPM Policy" and "Standard Operating Procedures for Pesticide Management" are being followed by staff and contractors. BMPs in general continue to be effective. WVC work with contractors to find the least-toxic method to treat resistant pest problems.	WVCWP & Town's WV Rep coord w/ Parks Supt & Facilities Mgr

			The WVC use less-toxic pest management methods in municipal facilities (parks & buildings) whenever practicable, based upon budget and effectiveness. *See "Evaluation" section below for details on IPM implementation.*	
	SCVURPPP PMP (I.A.6.)	Banned Pesticides Inventory If any pesticides have been banned w/in the past FY (per EPA, State &/or local requirements), conduct an agency-wide search of chemical for these pesticides. Properly dispose of these banned substances pursuant to appropriate waste disposal regulations.	**TOWN OF LOS GATOS:** Staff reviewed the list of banned pesticides for the FY and found none of the pesticides used by the Town were identified on the list. No further action was required.	PW Supt/ Parks Supt
	SCVURPPP PMP (I.B.1.) PS#5.a	Training for Applicators Ensure that employees who apply pesticides for the agency obtain the appropriate training as required by the County Agricultural Commissioner and the State Department of Pesticide Regulation (DPR)	**TOWN OF LOS GATOS:** The Annual Pesticide Safety Training was held on April 14, 2009. Dennis Merrill, president of *Killroy/ Sensitive Solutions Pest Control* gave the presentation. 11 Town of Los Gatos Parks & Public Works staff attended. The Training stressed Safety, Environmental Hazards and Drift – if winds are 5 mph or more, the Town will not spray any pesticide. The Safety Training covered 9 different pesticides. Topics related to runoff issues included: • Labeling • Hazards • Routes pesticides can enter the human body • Drift • Runoff • Wildlife Hazards • Laws & Regulations Proper Disposal	Parks Supt

PESTICIDE MANAGEMENT ACTIVITES
Los Gatos

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2008-2009 ANNUAL REPORT

	SCVURPPP PMP (I.B.2.) PS#5.b	Staff Training for Applicators Attend and/or conduct annual training which reviews appropriate portions of the IPM Policy, BMPs, and relevant IPM techniques for employees within departments responsible for pesticide application.	**TOWN OF LOS GATOS:** Town of LG staff have regularly attended locally available IPM trainings in past years. A Tailgate Training on use of broadleaf control pesticides was held in June 2009 (Roundup, Garlon, Surflan) with emphasis on avoiding spraying (applying granules when possible), applying only on days when there will be no runoff (no rain predicted, no irrigation scheduled), and avoiding use of pesticides when possible (ie using hoes instead). The Interim Parks Supervisor is a certified Arborist, with training in a variety of controls for insect infestations. Due to a number of changes in staff (Parks & Forestry Supervisor, Parks & Public Works Director, WVCWP Stormwater Representative, etc.), and delays in replacement of staff, IPM training dates have been extended into FY 09-10. Town of Los Gatos maintenance staff basically deal only with control of broadleaf weeds. Each year the Town is able to implement increased mechanical control (hoeing, mulching, etc.) and prevention, and to cut back on any broadleaf weed control via pesticides – thereby reducing staff involvement in pesticide use. This results in less necessity for IPM training.	Parks Maint Supt/ Parks Maint staff WVCWP to provide training
	SCVURPPP PMP (I.B.3.) PS#5.c	Municipal Staff Education Inform employees who are not authorized and trained to apply pesticides that they cannot use over-the-counter pesticides in or around the workplace.	**TOWN OF LOS GATOS:** Entire City staff received this information via e-mail in June 2009. The notification letter included details on: • NPDES Stormwater Permit • Contact info for appropriate staff to request pest removal • Contact info for appropriate staff for disposal of any pesticides found	Town's WV Rep; WVCWP to provide notice

			• Reminder of City IPM Policy and Pest Specific IPM Plans • Reminder of goal to reduce pesticide use • Notification that only designated staff may order, purchase and apply pesticides for use on City property. • Reminder that this restriction includes over-the-counter pesticides	
	SCVURPPP PMP (II.A.1.)	Watershed Ed. & Outreach Campaign (WE&O)[1] Attend WEO and IPM work groups. Continue to assist with development of strategy for a campaign and training program (in Spanish & English) designed for staff of very small landscape businesses (typically 1-8 employees) mainly serving homeowners.	WVCWP staff participate in WEO. WVCWP Program Manager participates in the IPM Ad Hoc Task Group on behalf of the WVC. Project implementation and projects for consideration, which are discussed in the AHTG, are presented to WVC staff for appropriate follow-through. In FY 08-09, WVCWP staff were involved in meetings aimed at developing coordination between the "Bay Friendly" program, and the "Green Gardeners" program (Green Gardeners – see below). WVCWP contributed funds to the SCVURPPP's IPM ad campaign. This allowed the IPM ad to appear in the three (3) weekly community newspapers for four (4) weeks in the spring. (Campbell Reporter, Los Gatos Weekly, Saratoga News). In addition, all ads also appeared a 2nd time in the Los Gatos Weekly "Weekend Edition", so that IPM ads appeared a total of sixteen (16) times in WV newspapers in 08-09. September 08: IPM/weeds April 09: IPM/snails June 09 (week of 6/1): IPM/Roses June 09: IPM/Yellow Jackets	WVCWP Staff

[1] Funded by all Co-permittees each year.

			WVCWP was very involved with the development of the "Green Gardeners" training program for small landscape businesses --from concept, to grant proposal, to implementation of several successful class series. (See Program Report for details.) In FY 08-09, WVCWP contributed funds for 6 scholarships to reduce the cost of the Green Gardener class to attendees (enough for 6 reduced fee scholarships). Since many WV residents employ small landscape contracting firms, it is hoped that these classes will have an impact on reducing residential pesticide use in the WVC. To promote use of the trainees from the Green Gardeners program, WVCWP sent a Press Release to local newspapers in Campbell, Los Gatos & Saratoga. A 630 word article, including a photo, about the Green Gardeners program was published. The article promoted both the classes (for anyone interested in enrolling) and promoted local companies which employ Green Gardeners graduates – so that residents could contact and utilize these graduates. See "PI/P Section", including "Attachments" for details. XREF PIP	
	SCVURPPP PMP (II.A.4.)	Community & School Opportunities Identify opportunities and attend community events/school classrooms to demonstrate reasons for, and methods of, less toxic pest control.	Information on the importance of reducing pesticide use, and the toxic effects of pesticide runoff, is included in all WVCWP Enviroscape presentation. This includes presentations at schools and at community events. Events in FY 08-09 included: **LG Presbyterian Summer Camp** Los Gatos July 23rd Enviroscape presentation to 21 children, ages 2nd5th grade	WVCWP Staff

			Audubon Wildlife Fair Cupertino (bordering Saratoga) 10/25/08 Enviroscape presentations to appx. 70 – 80 children, and their parents. **St. Mary's School** Los Gatos January 15, 2009 Enviroscape Presentation to 35 Fifth graders. **Sedgwick Elementary School "Discovery Day"** Cupertino March 31, 2009 WVCWP gave 4 Enviroscape Presentations to approximately 90 students in the 2nd, 3rd, 4th, and 5th grades. **Arbor Day Celebration** Saratoga 4/24/09 4/24/09 – Beauchamps Park WVCWP was introduced to the attendees (appx. 40 people). Attendees visited WVCWP display where staff discussed runoff issues (including pesticides) and distributed material. Staff also circulated and distributed material. **St. Mary's School** Los Gatos May 21, 2009 Enviroscape Presentation to 30 Kindergartners (2 classes)	

			St Thomas of Canterbury Vacation Bible School SJ (between Campbell & Saratoga City boundaries) June 18, 2009 Enviroscape presentation to 18 children, ages appx. 7-10 Each child received a "Pest or Pal" activity/ coloring book IPM information, and HHW brochures detailing proper pesticide disposal, are distributed at a variety of venues. See following row, and "PI/P Section" for further details on outreach for less toxic pest control.	
	SCVURPPP PMP (II.A.5.)	Community Material Distribution Participate in public sale events at local hardware store(s). Provide watershed protection information and reminders (gifts) to community by walking aisles of the gardening center with gift basket full of handouts during the sales.	In FY 08-09, WVCWP devoted staff time to a new campaign: creation and promotion of a new outreach product with the intent of providing material that would be desirable to residents, and which could be attached to printed information, to encourage residents to pick up and read the printed info. Envelopes of pest-resistant CA Native Seeds, which attract "Beneficial Bugs", were created to use as give-aways, and to encourage residents to pick up (and read) the attached printed info on 'less toxic' gardening. WVCWP staff purchased 4 different types of seeds in bulk. Staff created labels with graphics, planting information, and pest info for the seed envelopes (see PI/P section – Attachments). WVCWP partnered with stakeholders (local Sierra Club members) to fill the packets with the bulk seeds. A total of **600 seed** packets were distributed via WVCWP in FY 08-09. The seeds were promoted via articles in WVC municipal newsletters, including photos of beneficial bugs. The articles resulted in a total of 24 seed packets sent out due to resident requests.	WVCWP Staff

			At events, the seed envelope/printed material packets appeared to be popular. Distribution was as follows: Sierra Club: 150 (will be distributed at events, such as Earth Day) Campbell's Great American Litter Pickup: 100 Saratoga Rec Dept. Gardening Class: 100 City of Saratoga Arbor Day: 25 Yamagami's Garden Center: 50 St Mary's School (Enviroscape Presentation) 1/09: 35 St Mary's School (Enviroscape Presentation) 5/09: 30 Sedgwick School "Discovery Day" Enviroscape: 90 Citizen Calls: 24 Total: 599 In addition, IPM/ Less Toxic Pest Control info is distributed at a variety of community events, school events and via displays at municipal facilities. See PI/P Section: "Materials Distribution" for details	
	SCVURPPP PMP (II.A.6.)	Web Site As new information is available, update web site to provide easy access to information on IPM and reduction of pesticide use.	WVCWP staff have been working on plans for a major web site update. Plans are not currently solidified to the point of instituting web site revisions.	WVCWP Staff
			TOWN OF LOS GATOS: The Town website specifically addresses pesticides on it's Stormwater Pollution page: http://www.town.los-gatos.ca.us/index.aspx?NID=922 "Have you ever: Overused garden chemicals? Pesticides and herbicides can wash or be blown by the wind into the storm drain system where they are hazardous	

			to aquatic life. Instead: Use garden chemicals according to label instructions. Never use garden chemical when rain is forecast for the next 24 hours. Consider organic gardening methods."	
	SCVURPPP PMP (II.A.13.)	Special Districts Invite neighboring special districts (e.g. sanitary, open space districts, and school districts) to attend WVCWP sponsored IPM workshops, when workshops are offered.	Due to resources being directed to numerous trainings/meeting for municipal staff concerning the Municipal Regional Permit, WVCWP was not able to sponsor an IPM training this year.	WVCWP Staff
	SCVURPPP PMP (II.A.14.)	Conduct internal IPM outreach Provide all City/ Town staff with information on environmentally safer, integrated pest management to encourage employees to use IPM methods away from work. Email announcements as appropriate & display IPM materials at City/ Town Hall.	A new e-mail notice covering this subject was created by WVCWP staff. The notice contains links to "Our Water, Our World"; "UC Davis IPM" site; "Universities' Pesticide Info Network"; and "Pesticide Action Network" database. It was e-mailed to all municipal employees in August 2008 (see Attachment). In addition, IPM material is on display & available for pick-up by employees at Municipal Offices.	
	SCVURPPP PMP (II.B.2)	Participate in continuing implementation of IPM Store Partnership Program through funding and through staff assistance in contact with stores & providing IPM materials.	Within the West Valley Communities, there are 3 garden centers which have elected to participate in the Store Parnership Program: Summerwinds – Campbell Home Depot – Campbell Ace Hardware – Los Gatos There are also 4 participating stores which border Saratoga (including 1 also bordering Campbell) which are patronized by WVC residents. These are: Summerwinds – Cupertino Home Depot – San Jose – (De Anza Blvd.) Yamagami's – Cupertino Orchard Supply Hardware – San Jose (Prospect Rd. –	WVCWP Staff

			bordered by Saratoga & Campbell) WVCWP provides funding to support ongoing maintenance and training needs for this program. In addition, in FY 08-09, WVCWP provided IPM Fact Sheets for distribution at Home Depot – Campbell: <u>Fact Sheets Delivered for Display/Distribution:</u> 100 – Wonderful Roses 200 – Safe Use & Disposal of Pesticides 200 – Naturally Managing Pests 100 – Tips for a Healthy Beautiful Lawn 200 – Keeping Cockroaches Out of Your House 200 – Keeping Fleas Off Pets & Out of Yards 100 – *Spanish* – Fleas 500 – Controlling Ants 100 – Controlling Yellowjackets 300 – Controlling Aphids in Your Garden 200 – Growing a Healthy Garden to Naturally Manage Pests	
	SCVURPPP PMP (III.A.1)	<u>Pest Control Operators</u> Maintain database of licensed structural and landscape maintenance PCOs within WVC for outreach purposes.	In FY 08-09, WVCWP staff developed a list of Landscape Maintenance companies and individuals with staff trained at the 'Green Gardeners' program, including a listing of those who are operating in the WV Communities. This can be used for outreach to these contractors who have already demonstrated an interest in Less Toxic Pest Control. The list includes landscaping companies, and also staff, such as landscaping staff at a Senior Citizen residential facility.	WVCWP staff

PESTICIDE MANAGEMENT ACTIVITES
Los Gatos

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2008-2009 ANNUAL REPORT

	SCVURPPP PMP (III.A.4)	Track and Report PCO Use of Pesticides Require PCOs contracted by municipality to implement BMPs through contract specifications and track and report PCO use of pesticides on municipal property.		
			TOWN OF LOS GATOS: The Town requires its contractor for Pesticide application, Killroy, to follow all required application BMPs as a term in their contract. Killroy provides the Town with all required documentation of pesticide application performed by Killroy. Invoices for all pesticides applied by PCOs have been provided to WVCWP for tracking purposes.	Parks Supt / Facility Mgr / PW Dir assist w/ contracts
	SCVURPPP PMP (IV.A.2.)	Commercial Business Education Continue ICID Inspector's education program targeting retail food facilities through distribution of "Don't Set a Table for Pests".	In FY08-09 Santa Clara County DEH distributed the "Don't Set a Table for Pests" brochures to restaurants during routine inspections.	WVCWP Inspector
	SCVURPPP PMP (V.A.3.)	Promote HHW Collection Work with HHW collection agencies to support, enhance, and help publicize programs for proper pesticide disposal.	All WVC contribute funds to the County HHW disposal program, enabling residents and small businesses to drop off pesticides at HHW sites.	WVCWP / PW & Community Services Dept. staff to assist

PESTICIDE MANAGEMENT ACTIVITES
Los Gatos

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2008-2009 ANNUAL REPORT

Pesticide Management Activities Evaluation

PESTICIDE USAGE REDUCTION MEASURES

Last year, Town of Los Gatos invested in an Irrigation Upgrade Project at Bachman Park to replace its outdated irrigation system. The new irrigation system has been designed with input from the Santa Clara Valley Water District, and has water-saving devices to irrigate the lawn in a much more efficient manner. The previous irrigation system's efficiency rating was 5%. The new system is closer to 100% efficient.
New system has gone online & is working well; it has cut down on water use and runoff. Visual inspections show a definite reduction in runoff; when runoff is observed, watering is adjusted accordingly to eliminate runoff, thereby helping to avoid any possible problems of fertilizers and pesticides running off into nearby creeks.
In addition, a similar upgrade was installed in the Los Gatos Town Plaza area. New irrigation heads heads were installed, based on the same principles as the Bachman Park project. Again, the project has been successful in eliminating runoff which could carry pollutants in the nearby creek.

Los Gatos is implementing IPM in the following situations:
YELLOWJACKETS:
• Los Gatos uses traps as the main means of control.
• Parks staff uses steam cleaning on picnic tables to prevent attracting wasps & ants.

WEEDS:

- Each year the Town has been able to obtain, and use, more & more mulch. The mulch is used for both weed control and also to cut down on watering, reducing potential runoff problems. Mulch is used to reduce weed growth on roadsides, median islands, parking lot landscaping and in parks, tree plantings.
  - Los Gatos continues to arrange to receive free wood chippings from PG&E tree-trimming contractor and others (currently using at least 200 cu yds of chips every year from a variety of contractors).
  - The Town uses a chipper to create mulch from green waste; this mulch is used for weed control wherever possible.
- Staff hand-pull weeds where feasible, and they are moving to more hoeing of weeds.
- The Town continues to use Corrections Dept inmates for weed control. Inmates are utilized for both hoeing and pulling of weeds. The Corrections Dept. provides inmates on every weekend day, on each weekend that weather conditions allow.
- Los Gatos purchased a flail mower to mow weeds in large areas. The mower is working well; it was used in an additional area this year. It is used on appx 10 acres total of weeds.

RODENTS:
• Rats & mice are trapped by contractor (baits used as last resort).

West Valley Communities

PESTICIDE MANAGEMENT ACTIVITES
Los Gatos

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2008-2009 ANNUAL REPORT

INVASIVE SPECIES:
• Various species along Los Gatos Creek are hand-pulled by Native Plant Society volunteers.
• Scotch Broom is cut down by Parks staff and volunteers supervised by staff.

SCALE INFESTATION ON TULIP TREES:
• Insecticidal soap: Parks staff sprays trees with low concentration insecticidal soap & water.
• Tree replacement: Insecticidal soap has not been proving very effective. The next step has been to start removing Tulip Trees and begin replacing them with trees that are more pest resistant – London Plane trees. These trees have low water requirements, and are more resistant to local pests.

PYLLID INFESTATION ON EUCALYPTUS TREES:

- Parasitic wasps, rather than pesticides, have been used to control this insect infestation.
- Over the last 2 years Lerp Psyllids infested Eucalyptus globulus trees in the Town. The Parks Dept. called UC Davis IPM for assistance in controlling the pest. Staff was able to arrange for drops of parastic wasps at specified sites, to control the infestations. The wasps did seem to help resolve the problem.
- If a similar problem arises in the future, Parks Dept. will try using the same protocol.

RESULTS OF PESTICIDE USE REVIEW FY 08-09:

Los Gatos staff has eliminated the use of any OP pesticides for the past 7 years (and in preceding years minimal OPs were used: such as .475 oz of diazinon for ant control in FY 01-02). Avoidance of OP use has been achieved through use of IPM practices and through seeking out less-toxic pesticides.

- The Town is making an effort to stress prevention (prevent weed growth through use of mulch; prevent pest infestations through replacing susceptible trees, etc.) where possible.
- Los Gatos is moving into use of IPM and engineered, rather than chemical, controls as much as possible given budget and staff limitations.
- Over the past several years, the Public Works Dept. has instituted improved methods of weed control in some parks and roadsides, such as:
    - the continuous increase in the arrangements for free wood chips which are used as mulch to prevent weed growth and reduce watering and runoff
    - the use of Corrections Dept. labor for hand-control of weeds
    - the purchase of a flail mower for mechanical weed removal
- In Town facilities, sanitation is being stressed as a means to prevent pest infestations (ants, mice, etc.) so that chemical controls will not be needed.

Overall analysis

Due to implementation of all of the above IPM techniques, much less staff time is now involved in actual application of pesticides. The balance of manpower hours is shifting from pesticide applications to other methods of weeds and insect controls.

To: All Town of Los Gatos Staff

From: Todd Capurso

Re: USE OF PESTICIDES ON TOWN PROPERTY – Annual Reminder

Date: June 10, 2009

This notice is distributed to remind Town staff that only staff specifically designated through the Parks and Public Works Department management may order, purchase and apply pesticides for use on Town property. THIS RESTRICTION INCLUDES OVER-THE-COUNTER PESTICIDES.

Pesticide use by the Town of Los Gatos is tracked by the California Water Board as part of the Town's Stormwater Permit requirements. This message is required annually by the permit. It is important that all Town staff be informed of, and comply with, the permit's requirements concerning pesticide use.

To help meet this goal, staff members should:

1) Remember that only staff designated through the Parks and Public Works Department management may order, purchase and apply pesticides on Town property, including over-the-counter pesticides.

2) To request removal of pests (such as mice, ants, wasps, etc.) from Town property, please contact the Facilities Division at 399-5770 to initiate a work request.

3) Responsibly dispose of any existing pesticide containers found on Town property through the Town's Hazardous Waste program. Contact Bruce Smith at 399-5778.

4) If any pesticides are currently stored in any Town facilities (such as ant sprays, wasp sprays, etc.) and you are not a designated Parks and Public Works Department Pesticide Applicator, discontinue any further pesticide applications and dispose of the containers as outlined above in Step #3.

Thank you for your help in our efforts to protect employee health and local water quality.

USE OF PESTICIDES

The Town of Los Gatos adopted an Integrated Pest Management (IPM) Policy and IPM Plans to address removing various pests from Town property. The IPM Plans include strategies for removing pests (such as ants and wasps) using the least toxic methods possible.

The California Water Board's Stormwater Discharge Permit requires municipalities to reduce pesticide use. One goal of the policy is to ensure that pesticides which are applied are handled only by staff who have received training in pesticide use and 'less toxic' pest control. By adhering to these plans, we meet the permit requirements, and help provide a healthier environment for staff and the public.

If there are any questions about this procedure or the NPDES Stormwater Permit, please call: Trang Tu-Nguyen at 399-5771.

FY 2008-2009 Work Plan Self Evaluation Matrix

Source	WP Task	Work Plan Tasks	Accomplishments	Responsible Party
	Mercury Plan (I.E.)	Reduction of Hg Containing Products Continue implementing phase-out of mercury-containing products (MCPs). Phase-out will coincide with replacement of MCPs on an as-needed basis.	**TOWN OF LOS GATOS:** Los Gatos adopted a mercury elimination policy during FY 03-04 and has continued to phase out Mercury Containing Products, with the exception of fluorescent bulbs. Reduction of mercury-containing products is being implemented. Research on alternative products has been conducted through the WVCWP. Non-mercury or low-mercury replacements are being used wherever feasible e.g., thermostats and fluorescent bulbs. A training on phase-out and proper disposal was held in FY 07-08 for Municipal staff involved in work related to Corporation Yard activities. Mercury Informational Material was also handed out to Corp Yard Staff in July 2008; along with a flyer reminding staff to properly dispose of mercury containing thermostats/ switches.	WVCWP & Town's WV Rep; Street Maint Supt & Facilities Mgr to report data
	Mercury Plan (II.B.)	Mercury Containing Product Disposal Services Provide funding and participate in County HHW collection program for residents and small businesses	The WVC support the County HHW collection program through funding, outreach activities (material distribution, website notices, etc.). All WVC adopted an Extended Producer Responsibility Resolution during FY 07-08. The waste collection contractor for the WVC has been supporting HHW collection through sponsorship of free E-waste events. The WVC support this through fees to the contractor, and

			SARATOGA: April 25th, 2009 City of Saratoga North Campus, Saratoga, CA **RESULTS FOR 3 APRIL EVENTS:** weight totals for each city Los Gatos – 12,533 lbs. Campbell – 9070 lbs. Saratoga – 14,966 lbs. **OUTREACH** During Winter/early Spring of 2008/2009, WVCWP submitted articles which ran in the WVC municipal newsletters, concerning E-waste. This helped publicize the need to make use of use E-waste events. For the July 2008 events, WVCWP publicized E-waste disposal on the front page of the cleancreeks.org website.	
			TOWN OF LOS GATOS: The Town of Los Gatos has been able to continue its commitment to funding for County HHW. The Town of Los Gatos website includes extensive information on HHW for residents. In addition, the site posts timely information related to HHW and MCP disposal. The site gives phone contact info and a website link for HHW. The page was updated in March 2009. http://www.town.los-gatos.ca.us/index.aspx?NID=331 In May 2009, Town of Los Gatos staff worked with WVCWP and City of San Jose Environmental Services Dept. to provide a booth for a Mercury Thermometer	Pub Works Director/ Town Manager

			Exchange at the Town of Los Gatos Farmer's Market. 13 mercury thermometers were collected for proper disposal. See "Evaluation" section below for details.	
	Mercury Plan (II.C.)	Track Disposal of Mercury Containing Products Continue documenting the quantities of mercury-containing fluorescent bulbs disposed from City/ Town buildings and departments at hazardous waste collection facilities. The quantities of disposed product will be reported in annual report	**TOWN OF LOS GATOS:** The Town Facilities Manager continued documenting and reporting quantities of mercury-containing products disposed of by the Town as hazardous waste in FY 08-09. Mercury-containing products (primarily fluorescent bulbs) are returned bulb for bulb to the lighting vendor. In FY 08-09, the Town disposed of: • 126x - U-shaped and compact lamps • 612x - 4-ft lamps • 15x - 8-ft lamps Bins for recycling used batteries are distributed throughout Town departments so that batteries don't end up in the trash. All battery bins are disposed of through HHW.	Facilities Manager & Streets Maint Supt
	Mercury Plan (II.F)	Fluorescent Light Recycling Campaign Continue participation in the Mercury Ad Hoc Task Group and support ongoing implementation of an outreach program to about recycling fluorescent bulbs.	Mercury AHTG has now been disbanded. The Mercury AHTG developed the Mercury Plan , the Mercury Virtual Elimination Policy etc. (see http://www.scvurppp-w2k.com/mercury.htm for the list of products). The Mercury P2 Outreach Work Group was formed to implement the outreach requirements in the Mercury Plan. These included developing fact sheets, newsletter articles and media advertising. WVC support ongoing implementation by distributing info on fluorescent bulb recycling, and teaching about the issue presentations at schools and public events. The Town of Los Gatos website HHW page includes a link	SCVURPPP & WVCWP to coordinate w/ HHW staff

			to the County HHW website, with a pdf listing drop-off locations for fluorescent bulbs.	

Mercury Pollution Prevention Activities Evaluation

MERCURY AHTG

WVCWP staff focus in FY 08-09 was on local implementation, since the Program's Mercury PP Outreach Work Group has not been meeting.

Local implementation included outreach for free E-waste Recycling Events, mercury-free thermometer distribution, mercury outreach material distribution, and articles on mercury in municipal newsletters.

THERMOMETERS

Residents have responded well to thermometer exchange events, and to receiving Mercury-free thermometers.

WVCWP, WVC and San Jose Environmental Services Dept. have begun coordinating additional events in FY 09-10 at various venues. Efforts will be made to increase publicity for these events; some will be held mid-week and increased publicity may be needed in order to generate a turnout. Staff will attempt to evaluate effectiveness of holding mid-week events.

Thermometer events in FY 08-09 included:

Audubon Wildlife Fair

Cupertino (bordering Saratoga) 10/25/08

Mercury-free thermometers, along with mercury outreach materials, were provided to parents accompanying their children to the WVCWP Enviroscape presentations at the Fair. **30** thermometers were distributed.

Residents were very pleased with the opportunity to receive a mercury-free, solar thermometer. Sierra Club member in attendance expressed strong interest in these thermometers, and an interest in distributing them, but the Club does not have funding to purchase these themselves.

Thermometer Exchange at LG Farmers Market

Los Gatos – 5/3/09

WVCWP coordinated an exchange which was staffed by Town of LG and City of San Jose Environmental Services Dept. A booth was set up at the weekly LG

MERCURY POLLUTION PREVENTION ACTIVITES

LOS GATOS

Santa Clara Valley Urban Runoff Pollution Prevention Program

Source	WP Task	Work Plan Tasks	Accomplishments	Responsible Party

Farmer's Market. Residents were asked to bring in mercury thermometers, and were given mercury-free thermometers in exchange.

13 mercury thermometers were collected for proper disposal. City of SJ was impressed with the turnout by Los Gatos residents, since outreach materials had not been completed yet, so little outreach had been done. Residents attending the Farmer's Market were pleased to learn the Town was collaborating with the City of San Jose for this event.

WVCWP has coordinated with the other participants to hold this event again in FY 09-10. It will be held in conjunction with "Keep Los Gatos Beautiful" month in April 2010; this will allow for better outreach opportunities to publicize the event and encourage increased participation.

MERCURY OUTREACH - NEWSLETTERS

In Winter 2009, prior to the nationwide switch to digital television, WVCWP provided an article to all WVC municipal newsletters on proper TV disposal, and environmental impacts of mercury.

The article was printed in the municipal newsletters for Campbell, Monte Sereno and Saratoga.

For additional details on outreach related to Mercury, see "Public Information/ Participation" section of this report.

LOS GATOS
FY 2008-2009 ANNUAL REPORT

FY 2008-2009 Work Plan Self Evaluation Matrix

Activity	Source	Work Plan Tasks	Accomplishments	Responsible Party
Vehicle Washing Operations	CB-1	As part of the West Valley Industrial Commercial Inspection Program, promote improved car washing methods at auto businesses. Provide info on alternative arrangements for businesses with possible compliance problems. (Section 2.i of this work plan - Industrial Inspection Program)	The Stormwater Discharge Inspector distributes vehicle washing outreach materials during pro-active inspections and in relation to any actual or suspected vehicle washing incident. The Inspector is able to answer questions and offer suggestions with the help of visuals. A WVCWP-created fact sheet provides information on wastewater capture systems for automotive facilities. The fact sheet was designed to provide small-scale automotive facilities (those that find installing a full-fledged wash rack cost-prohibitive) with examples of inexpensive treatment technologies and distributor information. This method of outreach has been very effective.	WVCWP Inspector
Vehicle Washing Operations	CB-1	Place outreach material on proper vehicle/equipment washing at municipal counters, post offices, libraries and public events. Update WVCWP website to include copper information.	• WVCWP updated the "Car Wash Kit" flyer for car wash fund-raising events. The updated version was re-posted at City Halls • Car washing information is contained in the "Watershed Watch" brochure was has been distributed widely. • The WVCWP website home page (www.cleancreeks.org) features a graphic highlighting car washing, and a link to a printable PDF with information on proper car washing, and water quality degradation from improper washing: http://www.cleancreeks.org/images_new/carwashweb.pdf WVCWP also created a new brochure with info on copper and car washing, and with a Discount Card for use at local commercial car washes. The brochure included a list of participating car wash businesses. The brochure was distributed in Fall of 2008; the Discount Card expired as of	WVCWP staff

			Dec. 2008. WVCWP will discuss creation of an updated version for FY 09-10. See PI/P section for details.	
			LOS GATOS The Town of Los Gatos website includes a "Stormwater Pollution" page, which has a CAR WASHING section. In FY 08-09, the Town added a **link to the WVCWP Car Wash Kit flyer**, and a **link to the Watershed Watch Discount Card for car washes.** The Town also updated contact info for borrowing WVCWP Car Wash Kit.	
Vehicle Washing Operations & Pool/ Spa Maint.	CB-1 & CB-12	In classroom presentations, introduce impacts of copper on aquatic life; teach proper methods of car washing and pool & spa drainage using the Enviroscape watershed model.	WVCWP's classroom presentations are scripted to include hands-on activities so that students can watch pollutants, such as copper from car-washing activities & pool draining, flow directly to waterways. In addition to recommending the use of commercial carwash facilities, WVCWP encourages washing on a gravel or lawn area where wash water is captured and infiltrated. Students also learn about runoff from car wash fundraisers and the need to borrow the WVCWP Car-Wash Kit for any such event. Proper Pool Draining instruction includes photos of a Sanitary Sewer Cleanout, and other graphics about pool & spa drainage. School presentations in FY 08-09 included: St. Mary's School, Los Gatos – Presentation for 5th graders on 1-15- 09 Sedgewick Elementary, Cupertino 3-31-09 – Presentations for 2nd, 3rd, 4th, and 5th grades.	WVWCP staff

Activity	Source	Work Plan Tasks	Accomplishments	Responsible Party
			St. Mary's School, Los Gatos – Presentations for Kindergartners graders on 5-21-09 In addition, children of various ages viewed Enviroscape presentations at various community events. See PI/P section for details.	
Vehicle Washing Operations	CB-1	Promote use of Car Wash Kit. Provide kit; provide training to charity car wash organizers. Document use in A/R. Solicit feedback from participants.	**PROMOTING USE OF CAR WASH KIT** **Car Washing Advertising/Articles** An short article on Car Washing & the Car Wash Kit was submitted to the 3 local weekly newspapers in late June 2009. The article was printed in July 2009. Car Wash Kit info was also included in a separate article which covered WVCWP projects; this article ran in the 3 local weekly papers in Feb 2009. WVCWP participated in a Car Washing media campaign, developed and run by SCVURPPP. In addition, WVCWP provided extra funding for the ads to run in the 3 local weekly papers, with a total combined circulation of 69,840. **New Car Wash Outreach Material** WVCWP developed a tri-fold size flyer on the subject of car washing. The flyer features info on copper, right and wrong ways to wash a car in terms of protecting creeks, a 'commercial car wash discount card', a list of participating local commercial car washes, and information on using the WVCWP Car Wash Kit. Car Wash Kit **Training** was given to Monte Sereno office staff (3) 7/25/08 by WVCWP Program Assistant. Topics: ▪ Runoff as Illegal Discharge – Municipal Ordinance	WVWCP staff

COPPER ACTION PLAN/NICKEL ACTION PLAN
LOS GATOS
FY 2008-2009 ANNUAL REPORT

Activity	Source	Work Plan Tasks	Accomplishments	Responsible Party
			▪ Car Wash Fundraisers need to use free Car Wash Kit ▪ How kit works **Expanded Car Wash Kit Program** WVCWP worked to develop an expanded Car Wash Kit program. Staff solicited feedback from other successful programs in 3 states. A new Car Wash Kit program was developed, which would allow loaning of Kits to more users, with less need for direct WVCWP staff involvement (due to limited staff time). The new program will allow WVCWP to more heavily promote the use of the Car Wash Kit, because staff time will not be such a limiting factor if demand for the kit(s) increases. The new Car Wash Kit Program includes: • A set of photo instructions for Kit set-up, and link to an internet video of Kit set-up • Written program procedures • Budgeting to acquire a new part for the Kit, to facilitate ease of use (rubber mat to cover storm drain grate) • Budgeting to acquire another Kit, if demand justifies this **Promotion of Car Wash Kit to WVC Schools:** In FY 08-09, the Kit was promoted to ALL schools within the WVC jurisdictions. Facilities managers and front office staff were notified that anyone holding a Car Wash Event on school grounds, or students groups holding Car Wash Events at other sites, MUST use the Car Wash Kit. See PI/P section for details.	
Vehicle Washing	CB-1	Within the development project permit process for Group 2 projects, require	**LOS GATOS:** Los Gatos did not have any regulated projects in FY 08-09	Comm. Dev. Dir, Assoc. Civil Eng, and

COPPER ACTION PLAN/NICKEL ACTION PLAN

Activity	Source	Work Plan Tasks	Accomplishments	Responsible Party
Operations		source control measures at facilities that will conduct vehicle/ equipment washing and maintenance activities (consistent with Permit requirements).	that would conduct vehicle/equipment washing and maintenance activities.	Town'sWV Rep
Vehicle Washing Operations	CB-1	Include recommended source controls for vehicle washing in the City's corporation yard SWPPP and continue to train staff to use BMPs.	**LOS GATOS:** Source control BMPs are included in the SWPPP. Corp Yards BMP training is covered annually in the Corp Yard Walk Through (see Public Agency Activities section). Municipal staff follow best management practices and continue to ensure that vehicle wash systems in the Corp Yards prevent wash water runoff. Municipal staff viewed the BASMAA training video in 2006. Public Works Maintenance Staff viewed the video as part of a Tailgate discussion on the topic in October 2007.	Town's WV Rep and Public Works staff
Industrial Copper Control	CB-3	Continue joint Inspections with Fire Dept., targeting industrial sources for copper, e.g. metal plating and metal finishing facilities.	The Town has an agreement with the SCC Fire Dept to conduct urban runoff inspections for machine shops and metal manufacturing facilities. Annual meetings are held between the WVCWP Manager and Inspector and the Fire Dept Haz Mat Specialist to ensure excellent communication and prompt follow-up to potential and actual violations. For Los Gatos inspection data, **see IND section** of this report.	SCVC Fire Dept.
Reducing Traffic Congestion	CB-6/7	Within the development permit process, encourage pedestrian oriented design practices (trails) and planning that will accommodate bicyclists (paths).	The West Valley communities encourage best design practices wherever practicable. These small communities tend not to have large developments conducive to requiring alternative transportation within the permitting process. However, the cities and the Town encourage alternatives transportation through other means: For several years, the cities of Monte Sereno and Saratoga, and Town of Los Gatos, have been working with CalTrans on improving bicycle and walking features along	Comm. Dev. Dir, Assoc. Civil Eng, and Town's WV Rep

Car Wash Outreach Evaluation:

WVCWP initiated several new Car Wash outreach efforts this year:

-- Outreach to schools via letters and flyers to Facilities Maintenance Supervisors and Front Desk staff. This outreach was aimed at covering all schools in the

WEST VALLEY COMMUNITIES

COPPER ACTION PLAN/NICKEL ACTION PLAN
LOS GATOS
FY 2008-2009 ANNUAL REPORT

Activity	Source	Work Plan Tasks	Accomplishments	Responsible Party

WVC. The main focus was on any car wash fundraising events that might take place on school property. However, it is hoped that the information will also reach school-based groups which might initiate car wash fundraisers (such as Band, Athletics, etc.) even if they choose to hold the car wash at a non-school site.

Any chance to evaluate results of this outreach is not expected to materialize until after school starts in Fall 2009. Results will be evaluated based upon determining whether there is an increase in calls requesting the Car Wash Kit.

-- WVCWP staff created a new outreach piece concerning residential car washing. This was a double-sided piece, with info on copper and car washing, and with a Discount Card for use at local commercial car washes. The brochure included a list of participating car wash businesses which accept the Discount Card.

The Card is available on the Watershed Watch website at http://www.mywatershedwatch.org/WW_Discount.pdf, but WVCWP staff anticipated that residents would appreciate:

--being made aware of the discount card, by picking up the outreach piece

--having the card printed out, in an easy-to-use format (just cut off the top part of the flyer, in order to have a wallet-sized card.

--seeing the card alongside a list of local, participating commercial car washes.

The brochure was distributed in Fall of 2008; however, the Discount Card expired as of Dec. 2008. Since the piece was created shortly before the Discount Car expired, it was not distributed widely, and so it was not possible to evaluate how well-received it was. WVCWP will discuss creation of an updated version for FY 09-10.

-- A short article on the necessity of using the Car Wash Kit for car wash fundraising events was initiated with the 3 local weekly newspapers in late June 2009. The article ran in the papers in July 2009. The articles in the 3 newspapers did generate a number of calls to the WVCWP office to discuss the Car Wash Kit. It appears that getting information on car washing into the local weekly papers is an effective means of disseminating car wash information.

Pool and Spa Maintenance:

In FY 07-08, WVCWP initiated outreach to residents via placing literature displays in a retail pool and spa store. When WVCWP staff returned to the store in FY 08-09, it was found that this type of outreach was well-received by the store, and a number of brochures had been picked up by residents.

In March 2009, an additional 30 brochures were placed at this retailer, and a new retailer was also approached; 20 Pool & Spa brochures were placed with the new retailer (Tradewind) for pickup by residents.

Educational Outreach Evaluation:

Both Pool & Spa draining and Car Washing are covered thoroughly during Enviroscape presentations at schools and at community events. Children appear to clearly understand the messages being conveyed. They actively learn about copper and brake pads by sprinkling powder which represents copper around a toy car on the Enviroscape. They then watch the copper being washed into the 'creek' and down to the 'Bay' when the car is washed, and when 'rain' creates runoff on the watershed model. A number of Enviroscape presentations were given during FY 08-09. See PI/P section for details. **SARATOGA, MONTE SERENO, LOS GATOS:** **Highway 9 upgrade (Encouraging pedestrian- and bike-oriented transportation (trails, bike lanes and paths):** Phase I has been completed (bicycle improvements). Phase II – is in preliminary design (pedestrian improvements), and Phase III – is waiting for startup (bicycle loop installation and improvements to Austin Way intersection).				

Hello,
I'm writing to you from the West Valley Clean Water Program (WVCWP).

We are the stormwater/ runoff pollution prevention agency for the Cities of Campbell, Monte Sereno, Saratoga and the Town of Los Gatos.

We're writing to you concerning any **Car Wash Events** (i.e. fundraisers) that might be held on school grounds.

Please forward this e-mail to any appropriate staff who might handle approval, scheduling, etc. for Car Wash Events -- including staff at each different school site.

Attached is a flyer that can be posted in relevant offices, detailing requirements for Car Wash Events.

For any questions about this e-mail, contact me at:

kottenberg@wvcwp.org

Here are points related to this issue:

1) Runoff from Car Wash Events is prohibited from entering stormdrains by Municipal Ordinance, pursuant to CA State Water Board regulations.

2) Runoff can be diverted from stormdrains by use of our agency's FREE Car Wash Kit.

3) In order to hold a Car Wash Event, the school should direct event organizers that they **MUST** contact WVCWP and schedule use of the Car Wash Kit.

4) Contact the WVCWP Inspector at: 408. 354. 4734 or by e-mail at office@wvcwp.org

Thank you for your cooperation in complying with this Municipal Ordinance.

Kathy Ottenberg
Program Assistant
West Valley Clean Water Program
18041 Saratoga-Los Gatos Rd.
Monte Sereno, CA 95030
408. 354. 4734

Protect Our Creeks during your next

Car Wash

Fundraising Event

Anyone organizing a **Car Wash Event**
in *Campbell, Los Gatos, Monte Sereno or Saratoga*
MUST borrow the **FREE Car Wash Kit** from
West Valley Clean Water Program *(WVCWP)*

The *State Water Board* requires municipalities to prevent Car Wash Event runoff from flowing into Storm Drains.

Town Code Section 22.30.015(a) & (b)

All Car Wash Events MUST use the ***Car Wash Kit***, which keeps runoff out of Storm Drains.

To schedule use of the Car Wash Kit,
West Valley Clean Water Program at **408-354-4734** *or* **office@wvcwp.org**

- Copper washes off of car brake pads – and it's toxic to aquatic life
- Oil, coolant & other pollutants are also carried in car wash runoff
- Without the Car Wash Kit runoff flows straight into our creeks. With a Kit, dirty water is sent to the Wastewater Treatment plant.

WEST VALLEY CLEAN WATER PROGRAM

Honorable Christine Kehoe
State Capitol, Room 5050
Sacramento, CA 95814

March 30, 2009

Subject: Support of Senate Bill 346

Dear Senator Kehoe:

The West Valley Clean Water Program (WVCWP) strongly supports Senate Bill 346, which would restrict the use of copper and other toxic materials in vehicle brake pads.

WVCWP's member agencies, the Cities of Campbell, Monte Sereno, Saratoga and Town of Los Gatos, are required to control copper discharges to creeks, estuaries and the ocean under its National Pollutant Discharge Elimination System (NPDES) Stormwater Permit. Copper, an identified pollutant of San Francisco Bay, is toxic to phytoplankton, the base of the aquatic food chain, and has been shown to adversely impact salmon sensory organs, potentially compromising their ability to return to spawning streams and avoid predators. Through work completed by the Brake Pad Partnership, we now identify brake pads to be the largest single source of copper to waterways, and estimate they contribute as much as 35% of the copper reaching San Francisco Bay. Individually, or even collaboratively, local governments under NPDES Stormwater Permits are not able to effectively control brake dust, leaving legislative action as the only viable alternative to reduce the copper loadings at its source – brake pads.

As members of the Santa Clara Valley Urban Runoff Pollution Prevention Program (SCVURPPP), we are proud to be one of the original founding supporters of the Brake Pad Partnership, and have continually supported their efforts for over 15years. The Partnership is a collaborative group comprised of government staff, brake pad manufacturers and environmentalists, working together for a solution to this issue. The problem has been studied, quantified, and all participants now agree that an orderly phase-out of copper is in everyone's best interest. The Partnership garnered support of brake pad manufacturers for legislative action because without more definitive restrictions, less responsible manufacturers could continue to sell high copper content brake pads in California. The Partnership also has support of environmentalists because of impacts copper has on ecosystems, and because the bill would also address lead and asbestos which still appear in brake pads sold by less responsible manufacturers.

We are encouraged by the Partnership's ability to build consensus among its stakeholders and together with them, we strongly support Senate Bill 346 going forward to the Environmental Quality Committee. Controlling this key source of copper is of critical importance.

Thank you for your energetic leadership on so many important environmental issues like this one!

Sincerely,

Kelly J. Carroll

FY 2008-2009 ANNUAL REPORT

FY 2008-2009 Work Plan Self Evaluation Matrix

Source	WPActivity	Work Plan Tasks	Accomplishments	Responsible Party
	Program's Trash Work Plan	Long-Term Management Strategy Participate in Trash Ad Hoc Task Group and assist Program staff in developing (and revising per the MRP) long-term trash management strategy for reducing trash in urban streams and waterways and other potential sources that may contribute trash to those areas.	The West Valley Clean Water Program Mgr attended the Trash AHTG meetings and provided feedback from West Valley cities on implementation strategy and tools. Program Mgr participated in SCBWMI Trash Summit (Oct 2009), and began participating in SCBWMI Trash Subgroup. See PI/P section for details.	WVCWP Mgr to participate in AHTG and coordinate WVC efforts
	Program's Trash Work Plan	Additional Task – not in 08-09 Work Plan Participate in Creek Connection Action Group developing long-term trash management strategy for reducing trash in waterways. Address other potential sources which may contribute trash to waterways.	These meetings were discontinued due to staff changes at Creek Connections Action Group.	WVCWP staff attends meetings
	Program's Trash Mgmt Strategy	Update Trash Management Strategy Revise and implement trash management strategy based on storm drain inlet inspection and cleaning reports from the WV Sanitation District. Work with SCVURPPP (Program) staff to identify the high trash impact areas within the City's jurisdiction which likely discharge trash and litter to receiving waters.	WVCWP staff, and municipal reps, met with West Valley Sanitation District to review current program status and discuss anticipated Storm Drain Cleaning Program adjustments anticipated in MRP.	
			LOS GATOS: Town of Los Gatos Public Works staff continues to devote time to monitoring high trash impact areas, and collecting any trash found during monitoring activities. See "Trash	WVCWP and Town's WV Rep coordinate with Parks and Pub Works staff

LOS GATOS

FY 2008-2009 ANNUAL REPORT

Source	WPActivity	Work Plan Tasks	Accomplishments	Responsible Party
			Work Plan: Evaluations" row below.	
	Program's Trash Work Plan	Pilot Demonstration Support Program in implementing Pilot Demonstration Projects which focus on assessing control measure effectiveness.	WVCWP submitted letter of support for SFEP grant application for trash capture device implementation; WVCWP is optimistic that WV Communities will be included in the final distribution pool for the capture devices, however at this time, the intended distribution scheme among Bay Area entities remains unknown and solely within the control of SFEP. At the annual WVCWP Street Maintenance Supervisors Storm drain meeting, all attendees viewed a presentation on a possible pilot program: a solar-powered trash-compacting trash can system.	Public Works Dir, Town's WV Rep & WVCWP Mgr
	Trash Work Plan	Evaluations Continue to conduct trash evaluations in a subset of local trash problem areas using the Programs Urban Rapid Trash Assessment (RTA) protocol and/or the KAB Litter index.	WVCWP staff used SCVURPPP's standardized reporting forms to assess trash problems. Trash evaluations have been carried out by WVCWP staff during Creek Cleanup events and during independent visits to trash problem area sites. Trash assessment forms were completed. WVCWP staff used SCVURPPP's standardized reporting forms to assess trash problems. WVCWP staff conducted **20** assessments at the identified sites and listed problem areas in West Valley communities. The number of assessments included: Campbell **4 --** Los Gatos **3** -- Monte Sereno **5** and Saratoga **4.**	WVCWP Staff
			LOS GATOS: Town Public Works Maintenance Staff continue to monitor for trash by conducting windshield surveys of all identified hot spots (Shannon Road, Santa Rosa Drive, Hicks, and Blossom Hill Road) in the Town of Los Gatos**.** All trash visible during the windshield surveys was

			collected and properly disposed of.	
	Trash Work Plan	Identify and Prioritize Problem Areas Continue to identify and prioritize trash problem areas based on criteria provided by Program staff during FY 08-09.	Identification & prioritization are determined by: • monitoring previously identified problem areas • using volunteer monitoring during cleanup events at problem sites • keeping records of areas where Trash has been noted, or illegal dumping has been noted. If the site is noted repeatedly, then identifying it as a Problem Area will be considered.	WVCWP staff, Town's WV Rep and Parks & Pub Works staff
	Technical Memo: *Trash Mgmt Effective-ness Strategy (FY06-07)*	Evaluate Trash Management Measures Evaluate and report on existing trash management practices. Evaluation methods may include using Urban Rapid Trash Assessments and/or the KAB Litter Index in priority trash problem areas.	WVCWP staff used SCVURPPP's standardized reporting forms to identify trash problems. When completed by staff, these forms provide data on trash monitoring and management activities at the listed problem sites.	WVCWP staff
	Program's Trash Work Plan	Management Practices Continue to identify and implement trash control measures, where practical and feasible, to reduce trash and debris.	Control measures in addition to scheduled/systematic control measures • notify Caltrans when exceptional litter or debris problems are noticed along highways/freeways and around on-ramps • conduct removal of trash and litter as needed at sites within municipal jurisdiction • remove trash (where feasible) at some sites in Caltrans' jurisdiction • monitor identified problem areas • hold volunteer cleanup events at problem sites, when feasible • highlight litter problems during classroom presentations • WVC inspectors for industrial/commercial and	Town's WV Rep, Parks & Maint Superintendents & WVCWP staff

			program of quarterly creekside cleanups along the Los Gatos Creek Trail. This is an "Adopt-a-Trail" program supervised by Parks & Public Works Dept. Volunteers for this program are drawn from the "American Association of University Women" organization. Volunteer programs like this are promoted through the "Community Unity" page on the Town website: http://ca-losgatos.civicplus.com/documents/Community%20Services/Volunteer%20Services/Town-%20ongoing%20opportunities%206-25-09.PDF	

Trash Inventory & Management Evaluation

General Evaluation of Trash Problems

TRASH MONITORING

After several years of monitoring trash sites, WVCWP staff is familiar with the sites and the problems that need to be addressed. Two leading trash sources in West Valley communities are "Illegal dumping" and "vehicular litter" (found along highways, freeway-on-and-off-ramps, and smaller arterial roads). The type of litter that is retrieved is predominantly snack, food, beverage and other product packaging and cigarette butts.

WVCWP staff have found that having Creek Cleanup volunteers use 'Tally Sheets' is helpful. However, it has been noted that having volunteers compute TOTAL TRASH at the end of an event tends to overstate the amount of trash collected. Perhaps due to the 'sense of accomplishment' at the end of their efforts, volunteers seem to inflate the amount of trash per bag.

Therefore, a 1/3 or 1/2 full bag becomes 'a bag', as if it is a full bag. So, for example, an event with 10 bags that are 1/2 full, plus 6 bags that are actually full, could become "16 bags of trash collected" – rather than the more accurate **5 bags** (10 bags x 0.5 – half full = **5 full bags**) + **6** full bags = **11 bags**.

Staff will make an effort to convey the importance of accurate totals to volunteers in the future.

SCHOOL INVOLVEMENT

School lunch yards can be another source of trash, and WVCWP regularly holds outreach activities at schools, including cleanups, to address this issue. However, recent litter pickup events at schools have found relatively little trash. WVCWP has found that it is more effective to have 1 class work on litter pickup (such as during an Enviroscape presentation rotation) than to have a whole school turn out – because the school yard may be too clean to generate much litter

Source	WPActivity	Work Plan Tasks	Accomplishments	Responsible Party

pick-up activity for a large group of students. This approach was tried at St. Mary's Elementary School (Los Gatos) in FY 08-09 and it worked well.

WVCWP TRASH ACTIVITIES EVALUATION

Creek Keeper Events – Volunteer Participation - Trash Identification, Tallying & Pick-up

WVCWP hosted 2 Clean-up events, with Trash Monitoring training and completion of tally sheets.

Coastal Cleanup Day

San Tomas Aquino Creek @ Westmont High 9/20/08

WVCWP hosted a Cleanup Event at the site where it has regularly hosted this event.

Volunteers were instructed in use of Tally sheets, and were provided with clipboards, etc. Working in groups, volunteers were able to pick up trash and carry out trash monitoring.

15 Volunteers attended along with WVCWP and City of Saratoga staff.

Distributed 15 reusable bags (purchased from Safeway with gift card donated by Safeway to WVCWP).

Trash Totals from all events are found in Attachments (Trash Summaries)

The Cleanup Event was covered in articles appearing in 3 weekly newspapers; details are listed in the Newsletter/Press Release section (above; also see PI/P Section Attachments *(Coastal Cleanup Day article)*.

National River Cleanup Day

San Tomas Aquino Creek @ Westmont High 5/09

WVCWP hosted a Cleanup Event at the site where it has regularly hosted this event.

15 Volunteers participated in this event. Volunteers were instructed in use of Tally sheets, and were provided with clipboards, etc. Working in groups, volunteers were able to pick up trash and carry out trash monitoring.

Volunteers cleaned 1.5 miles of creek. Appx. 400 lbs of trash (including heavy metal objects) were picked up, along with appx. 80 lbs of recyclables. Most unusual items found were tires, and a baseball glove in good condition.

Trash Totals from all events are found in Attachments (Trash Summaries)

West Valley Communities

TRASH INVENTORY & MANAGEMENT
LOS GATOS

FY 2008-2009 ANNUAL REPORT

Source	WPActivity	Work Plan Tasks	Accomplishments	Responsible Party

CREEK CLEANUP EVALUATION

The site usually used by WVCWP site for Creek Cleanups is being evaluated by staff. It appears that there is less trash to be picked up at the September event than at the May event. This is possibly due to the fact that a Cleanup is held in May, then school is out for 3 months; the weather during this period is not windy & rainy, so trash isn't being carried into creek – in Sept. school has just started up. This may result in there being less trash in May than in Sept.

WVCWP will investigate the possibility of hosting a Cleanup at a different site in September, where lots of summertime activity would be taking place, which might be more likely to have trash built up in Sept. Cleanup at such a site would help prevent trash from entering the creeks when rains start later in the Fall.

TOWN OF LOS GATOS

Town of Los Gatos continues its ongoing volunteer program of quarterly creekside cleanups along the Los Gatos Creek Trail. This is an "Adopt-a-Trail" program supervised by Parks & Public Works Dept.

Currently, volunteers for this program are drawn from the "American Association of University Women" organization, but "Los Gatos Creek Trail litter cleanup" is listed on the Town website as a 'volunteer opportunity', so it is possible that additional volunteers will join the activity in the future. The regular cleanup has proven to be an effective means of helping keep litter off the trail, and therefore out of the adjoining Los Gatos Creek.

Information on the LG Creek Trail can be found on the Town website at:

http://www.town.los-gatos.ca.us/index.aspx?NID=907

The Trail is 10 miles long from its southernmost end in Los Gatos (at Lexington Reservoir) to its northern end in San Jose. Los Gatos cleanup efforts cover the approximately 5 miles of Trail which run through Los Gatos.

4. Biohazard, Toxic and Sharp Objects	B: Trash contains no medical waste, diapers, pet or human waste. No evidence of toxic substances such as chemical containers or batteries. Only 1 piece of broken glass or metal debris, if any, is present.	B: No toxic substances, but small presence (2-10 pieces) of sharp objects such as broken glass and metal debris.	Presence of **any one** of the following: hypodermic needles or other medical waste; used diaper, pet waste, or human feces; any toxic substance such as chemical containers, batteries, or fluorescent light bulbs. Medium to high prevalence (11-50 pieces) sharp objects.	Presence of **more than one** of the items described in the marginal condition category, and/or high prevalence of (> 50) sharp objects.
Site Accessibility	A: Access is difficult, restricted by locked gate or some other physical barrier like steep banks or thick riparian veg. Site reach does not appear to be used by people. Might be private property or protected watershed.	A: Access is limited and site reach does not appear to be used by people. No trails down to creek.	A: Public access to reach is fair to good but site does not appear to be used frequently, **or** private access is good without any public access.	A: Excellent reach access including trails down to and adjacent creek and creekside space for sitting down. Some evidence that reach is used frequently by the public (e.g. rope swings, many beer/soda cans and food wrappers left on the banks, etc.).
B SCORE	10 9	8 (7) 6	5 4 3	2 1 0

Urban Rapid Trash Assessment Worksheet

Santa Clara Valley Urban Runoff Pollution Prevention Program

	CONDITION CATEGORY			
Trash Assessment Parameter	**Least Disturbed (Optimal Urban)**	**Sub optimal Urban**	**Marginal Urban**	**Poor**
5. Illegal Dumping	D: No evidence of illegal dumping. No bags of trash, no yard waste, no household items placed at site to avoid proper disposal, no shopping carts.	D: Some evidence of illegal dumping. Limited vehicular access limits the amount of potential dumping, or material dumped is diffuse paper-based debris.	D: Presence of **one** of the following: furniture, appliances, shopping carts, bags of garbage or yard waste, coupled with vehicular access that facilitates in-and-out dumping of materials to avoid landfill costs.	D: Evidence of chronic dumping, with **more than one** of the following items: furniture, appliances, shopping carts, bags of garbage, or yard waste. Easy vehicular access for in-and-out dumping of materials to avoid landfill costs.
Illegal Littering	L: Any trash is incidental litter or carried downstream from another location.	L: Some evidence of litter within creek and banks originating from adjacent land uses	L: Prevalent in-stream or shoreline littering that appears to originate from adjacent land uses.	L: Large amountof litter within creek and on banks that appears to originate from adjacent land uses.
D-SCORE	10 9	8 7 6	5 4 3	2 1 0
L-SCORE	10 9	8 7 6	5 4 3	2 1 0
6. Accum-ulation of Trash	There does not appear to be a problem with trash accumulation from downstream transport. Trash, if any, appears to have been directly deposited at the stream location.	Some evidence that litter and debris have been transported from upstream areas to the location, based on evidence such as silt marks, faded colors or location near high water line.	Evidence that trash is carried to the location from upstream, as evidenced by its location near high water line, siltation marks on the debris, or faded colors.	Trash appears to have accumulated in substantial quantities at the location based on delivery from upstream areas, and is in various states of degradation based on its persistence in the waterbody. A large percentage of trash items have been carried to the location from upstream.

WEST VALLEY
CLEAN WATER PROGRAM

Charles R. Hoppin, Chair
State Water Resources Control Board
1001 I Street
Sacramento, CA 95814

June 3, 2009

Re: Support for Expanded Use Proposal No. 16877-Bay Area-wide Trash Capture Demonstration Project

Dear Mr. Hoppin,

The West Valley Clean Water Program (WVCWP) supports proposal No. 16877-Bay Area-wide Trash Capture Demonstration Project submitted by San Francisco Estuary Project (SFEP) and Association of Bay Area Governments (ABAG) for installation of trash capture devices in catch basins in Bay Area cities and counties. WVCWP represents the urban runoff program for four small south San Francisco Bay communities: Campbell, Los Gatos, Monte Sereno and Saratoga.

Over the past year we have been closely tracking the Trash Capture Pilot Demonstration Project by our county-wide urban runoff program (aka: SCVURPPP), and have contemplated, given our limited and scarce local resources, how our communities might also install such capture devices in selected areas. By funding this project and including our smaller agencies in the proposed Bay-Area Project, we could have a visible and tangible effect on reducing trash entering waterways through storm drains.

Furthermore, being at the top of the watershed, we know that even if only a few devices are installed within our communities, they will have a significant impact on trash and litter in waters downstream. We are committed to watershed approaches and support this project's effort to embrace and further watershed based solutions.

Respectfully,

Kelly Carroll
Program Manager

Training Summary: Pesticide

City of Campbell: All parks staff who hold "Qualified Applicator Certificates (QAC) or higher from the CA Dept. of Pesticide Regulation, pursue the necessary CEUs to maintain their certificates, and are currently up-to-date. Annual Department of Agriculture Pesticide Safety Training for all Parks Maintenance crew was held on June 4, 2009 at the City's Corporation yard.	June 4, 2009	City of Campbell (33) Parks and Maintenance Crews
Town of Los Gatos: The Annual Pesticide Safety Training was held on April 14, 2009. Dennis Merrill, president of *Killroy/ Sensitive Solutions Pest Control* gave the presentation. 11 Town of Los Gatos Parks & Public Works staff attended. The Training stressed Safety, Environmental Hazards and Drift – if winds are 5 mph or more, the Town will not spray any pesticide. The Safety Training covered 9 different pesticides. Topics related to runoff issues included: • Labeling • Hazards • Routes pesticides can enter the human body • Drift • Runoff • Wildlife Hazards • Laws & Regulations	April 14, 2009	Town of Los Gatos (11) Parks and Public Works Staff

Town of Los Gatos: A Tailgate Training on use of broadleaf control pesticides was held in June 2009 (Roundup, Garlon, Surflan) with emphasis on avoiding spraying (applying granules when possible), applying only on days when there will be no runoff (no rain predicted, no irrigation scheduled), and avoiding use of pesticides when possible (ie using hoes instead). .	June 2009	Town of Los Gatos Maintenance Staff (11)
CITY OF SARATOGA: The Annual Pesticide Safety Training was held on July 25, 2008. It was held at Saratoga Corp yard and all of the Parks and Streets Maintenance staff attended. The training was given by Pete Howes, Horticulturist, and covered long & short-term effects of pesticides and environmental concerns.	July 25, 2009	City of Saratoga Parks and Street Maintenance Staff
CITY OF SARATOGA: All Parks staff received IPM training in June 2009 All 9 Parks Dept employees have Qualified Applicator Certificates, and have been attending seminars for their Continuing Education hours. Some seminars include topics related to IPM and Less Toxic Pest Control.	June 2009	City of Saratoga Parks Staff (9)

Mr. Bruce Wolfe
California Regional Water Quality Control Board
San Francisco Bay Region
1515 Clay St., Suite 1400
Oakland, CA 94612

Subject: Milpitas Urban Runoff Program
FY 08-09 Annual Report

Dear Mr. Wolfe:

This report is submitted by the City of Milpitas, in conjunction with the Santa Clara Valley Urban Runoff Pollution Prevention Program's Annual Report, pursuant to provision C.6.a. of the Program's reissued municipal storm water National Pollutant Discharge Elimination System (NPDES) Permit (Order No. 01-024). The report summarizes activities performed during FY 08-09 in accordance with the Milpitas Urban Runoff Management Plan (URMP) submitted to the Regional Water Quality Control Board (RWQCB) on March 1, 2008, and the performance standards contained therein. There were no comments issued by the RWQCB on FY 06-07, FY 07-08, FY 07-08, FY 08-09 URMPs or FY 05-06, FY 06-07 and FY 07-08 Annual Reports.

Contents of Report

The goals of this Annual Report are to: 1) document implementation of our FY 08-09 Work Plan during the past fiscal year, 2) evaluate program results for continuous improvement, and 3) share this information with other Co-permittees, municipal decision-makers, and the public. To accomplish these goals, the report contains the following sections:

1. Certification Statement
2. Acronyms
3. IC/ID Elimination Activities
4. Industrial/Commercial Discharge Control Program
5. Public Agency Activities
    - Public Streets, Roads & Highways O & M
    - Rural Roads Public Works O & M
    - Storm Drain O & M
    - Water Utility O & M
    - Other Public Agency Activities (Corp Yard, Parks, Ponds etc.)
6. New Development Planning Procedures
7. New Development Construction Activities
8. Public Information and Participation
9. Pest Management Activities
10. Mercury Pollution Prevention Activities
11. Copper Action Plan
12. Nickel Action Plan

13. Trash Inventory and Management
14. Staff Training Summary Table

Thank you for your review of this Annual Report. If you have any questions regarding the materials submitted, please contact Paramjit Uppal at (408) 586-3351 or me at (408) 586-3345.

Sincerely,

Kathleen Phalen

Illicit Connection & Illegal Dumping Elimination (ICID) Activities – Self-evaluation Matrix

Implem. Id.	Activity	Item Source	Tasks Identified in FY 2008-2009 Work Plan	Status / Comments	Due Date (mo/yr)	Responsible Party (Lead)/ Coordinator
H-1	Service Requests	URMP page H-6	Review existing service requests (SOP 7-1)	This SOP will be reviewed as required.	Ongoing	Code Enforcement (Gloria Anaya)/ Utility Engineering (Paramjit Uppal)
H-2	Record Tracking	URMP page H-6	Hand-held devices to record inspection in the field.	Data from paper inspection forms is entered into the database. This practice will continue for the foresceeable future due to budget constrains.	Ongoing	Fire Department (Patti Joki) & Information Services Utility Engineering (Paramjit Uppal)
H-3	Utility Maintenance SOP on storm drain inspections	URMP page H-7	Revise and finalize Utility Maintenance SOP	SOP remains in draft format. Public Works Dept. staff routinely inspects all the storm water catch basins in 18 month cycles. In 08-09, a total of 3120 catch basins were inspected and 2492 of these were cleaned. Completion of the Utility Maintenance SOP (for storm drain and outfall inspection, coordination and referral activities if suspicious materials are found) is deferred due to lack of resources.	Ongoing	Utility Maintenance (Steve Smith)/ Utility Engineering (Paramjit Uppal)
H-4	Field Investigation, reporting and recording of Storm Water Infiltration Devices (SWIDs)	URMP page H-7	Train staff, document SWID locations, implement SWID inspection, and develop process for reporting and record keeping.	To date, no SWIDs are documented in City's or SCVWD's records. In the future, City will report any SWIDs that are found within the City to SCVWD using referral cards.	Ongoing	Utility Engineering (Paramjit Uppal)

H-5	Additional efforts with restaurants	URMP page H-7	Develop pollution prevention partnership with owners of food facilities to educate operators.	A special Task Force was convened a few years ago to inspect and meet major retail food stores and restaurants in shopping centers. The Task Force has been successful and has moved into a second phase, which is periodic inspection and handing out outreach materials as needed. The Fire Department Inspectors continue to inspect restaurants with grease interceptors every 3 years.	Ongoing	Utility Engr., Code Enforcement (Gloria Anaya), Fire Dept. (Patti Joki))
H-6	Effectiveness Evaluation	URMP page H-7	Conduct annual evaluation of the effectiveness of the program.	See evaluation text.	Ongoing	Fire Department (Patti Joki)/ Paramjit Uppal
H-7	Record Keeping/Reporting	URMP page H-7	Document and report IC/ID incidents using descriptive categories. Maintain records for reporting.	Staff maintains records by completing the Standard Incident Reporting Form. ICID incident reports were submitted electronically to the Program. Reports are also submitted to the RWQCB with the Annual Reports.	Ongoing	Fire Department (Patti Joki)/ Paramjit Uppal
H-8	Staff training	URMP page H-7	Staff will attend training sessions organized by the SCVURPP program	See Staff training Table at the end of this Report.	Ongoing	

Evaluation - ICID Elimination Activities

City staff, including the Fire Department, Building and Safety, and Engineering Divisions, responded to all reported ICID incidents. A summary of ICID incidents is provided in the attached ICID Enhanced Reporting Form. It categorizes each incident under the standard incident types.

All restaurants in Milpitas are inspected once every three years by the Fire Department. Every year, a portion of the total number of sites is inspected based upon the year they entered into business. Restaurants may also be inspected on a complaint driven basis, including spills and referrals from other agencies. The next inspection cycle will be calendar year 2010.

The City of Milpitas responds to all the incidents that are reported. Outreach for proper disposal of applicable materials, including vehicle fluids, is provided to the business community in all appropriate circumstances. The annual HazMat and Industrial/Commercial inspections, coupled with education and outreach has led to better understanding of ICID elimination activities.

There were no specific comments from the Regional Board on the Milpitas FY 05-06, FY 06-07 or FY 07-08 Annual Reports. The Regional Board has not provided comments on the FY06-07, FY 07-08, FY 08-09 or FY 09-10 Work Plans.

City of Milpitas
FY 2008-2009 Illicit Connection and Illegal Discharge Report Summary (a) and (c)

ICID Incident Type (b)	Reporting Source					Incident Source								Location Date and Responsible Party	Enforcement Action						Comments
	City Inspector	Inter-Department	Other Agency	Citizen	Other	Resi.	Ind.	Com.	Auto Facility	Food Facility	Const. Site	Public Facility	Other/ Unknown		Verbal (d)	Warning (e)	Adm. (f)	Adm. W/ Penalty or Fine (g)	Criminal (h)	Referral for Enforcement (i)	
Tracking Soil	Mike Marino										X			1666 S. Main St., 11/3/2008; 11/5/2008, 11/21/2008, Aspen Project		X					Instructed contractor to remove mud from sidewalk near middle gate and put more rock at construction entrance.
Tracking Soil	Mike Mariano										X			1666 S. Main St., 10/28/08 and 10/30/2008; Aspen Project		X					Instructed contractor to comply with SWPPP & grading plan so no dirt is tracked to the street.
Accidental Spills	Paul Inouye				X		X							3/10/2009; 233 S. Hillview Dr; Kovio				X			Sodium Hydroxide spilled from secondary containment and about 35 gallons discharged into storm drain. Customer ordered to provide additional spill control detection for pumps; review & modify emergency plan and provide additional employee training
Tracking Soil	Erik Forstreuter	X									X			2/9/2009; BART Extension Project at Hanson Ct; J. Fletrcher Creamer & Son Inc.		X					Mud tracked into the street on Hanson Ct. Customer ordered to establish 50' entry / exit 6" thick with filter fabric at the base & 3" + clean drain to clean exiting truck tires.
Tracking Soil	Erik Forstreuter	X									X			2/9/2009; BART Extension Project at Hanson Ct; A.R.B. Inc.		X					Mud tracked into the street on Hanson Ct. Customer ordered to establish 50' entry / exit 6" thick with filter fabric at the base & 3" + clean drain to clean exiting truck tires.
Water Line Breaks	Steve Smith													Throughout the City on various dates in FY 08-09							A total of 62 potable water service line breaks and 32 main line breaks happen during FY 08-09. In cases where discharge occurred, we followed procedure to capture and dechlorinate to protect creeks.

All violations were corrected in timely manner and work was performed satisfaction to City inspectors.
(a) Categories conform to those requested by Program
(b) Incident types include only those which were reported for this period
(c) Reporting person's identity is not provided to protect confidentiality
d) Verbal warning providing information for corrective action
e) Written letter providing information for corrective action
f) Official letter describing requirements and consequences
g) Administrative Action with assessment of fines
h) Legal Action
i) Refer case to agency with enforcement powers

Evaluation - Industrial Commercial Discharge Control Program

During the past reporting period, the Hazardous Materials and Environmental Services Unit continued to implement its comprehensive inspection program. A total of 407 inspections were completed in FY 08-09. The inspection reports are summarized in the two attached Enhanced Reporting Forms. There are 464 permitted facilities that are included in the Fire Department's annual HazMat inspection program. Some of these facilities, such as the badminton court or cell phone towers, generally do not have urban runoff issues to report, and are inspected mainly for safety purposes. Fire Department's HazMat inspectors try to inspect most of the listed HazMat facilities at least once a year. However, due to staffing shortage and the steady increase in the number of new facilities every year, it is not always possible to complete the inspections strictly within the one-year time frame. Restaurants are inspected every three years.

The program's main emphasis is that of education and outreach to prevent illegal discharge. The Fire Department has been inspecting businesses for hazardous material code compliance since the early 1980's. Thus, businesses have been educated to use best management practices for many years. Owing to annual inspections, education and outreach, we have seen an increase in awareness regarding proper storage, transportation, use and disposal of applicable materials. There is also a growing awareness of the importance of protecting the Bay from unauthorized releases.

The inspection process identifies best management practice violations and allows time for compliance. All violations are followed up and resolved. When the responsible business fails to comply, enforcement action such as issuance of administrative, civil or criminal citations is taken. If a severe violation is observed, such as material disposal into a storm drain, then a higher level of enforcement action, such as referral to the City or District Attorney, may be taken. For this past fiscal year, no referrals were necessary.

There were no specific comments from the Regional Board on the Milpitas FY 05-06, FY 06-07 or FY 07-08 Annual Reports. The Regional Board has not provided comments on the FY 06-07, FY 07-08, FY 08-09, or FY 09-10 Work Plans.

EVALUATION – PUBLIC STREETS, ROADS AND HIGHWAYS O& M

The City's contract street sweeping program is managed by the Maintenance Division of the Public Works Department and funded by the Solid Waste collection program. Allied Waste Industries performs the street sweeping as part of its municipal solid waste services contract. In FY 08-09, a total of more than 8,841 miles were swept and 3,915 cubic yards of debris was collected. The volume of debris did not include leaves removed. Leaf removal program is implemented in the fall and winter months only.

Each established sweeping route is swept on the same day of the week. Residential, arterial, and commercial street sweeping is conducted two times a month. Industrial street sweeping is conducted four times a month. Open space areas and mountain roads that have no curb and gutter are not scheduled for routine sweeping, but are swept on an as-needed basis. On Monday and Friday, debris from the rural roads and the main arterial roads are collected.

The City conducts additional street sweeping in the period from early fall into the winter months until leaf fall has been completed. During November and December, three primary areas are swept weekly to remove leaves. This practice effectively removes leaves, debris, and other pollutants, which would otherwise be washed into the storm drain system. Additional City crews are called upon to assist in the fall cleanup.

The City's contractor promptly removes street sweeping material and disposes of nearly all the materials at the Newby Island landfill. A significant amount of this material is taken to the compost area for beneficial reuse.

Milpitas has a highly effective street maintenance program. There are very few complaints. Complaints are promptly responded to ensure customer and community satisfaction. The City's field crews are trained annually to look for street sweeping BMP deficiencies in the field on a daily basis. Training is provided through Public Works Maintenance's Safety Program. Quarterly meetings are held to discuss BMP deficiencies and safety issues. BMP deficiencies are forwarded to the field employee's immediate supervisor and a service request is generated (record keeping and documentation) and directed to the appropriate department for resolution.

There were no specific comments from the Regional Board on the Milpitas FY 05-06, FY 06-07 or FY 07-08 Annual Reports. The Regional Board has not provided comments on the FY 06-07, FY 07-08, FY 08-09 or FY 09-10 Work Plans.

G-2-12	Identify rural PW facilities	URMP page G-2-8	Identify rural PW facilities under the City's jurisdiction.	Completed. Rural facilities include the streets and roads in the undeveloped or low density Hillside Area east of Piedmont Road including the Ed Levin County Regional Park.	Ongoing	Public Works (David Gordillo) /Utility Engineering

EVALUATION – RURAL PUBLIC WORKS MAINTENANCE AND OPERATION

The rural roads are located in the part of City designated "Hillside." The City's General Plan designates the hilly undeveloped area east of Piedmont Road to be rural and recreational. There are 139 miles of City streets, of which rural roads are only 2 miles. Typically, open space areas and mountain roads that have no curb and gutter are not scheduled for routine sweeping, but are swept on an as-needed basis. Twice a week, Mondays and Fridays, debris is picked up by hand from the rural roads. These roads are not in the proximity of creeks. The dust swept by wind from these areas would typically accumulate in the City's valley floor areas, and would be removed during routine street sweeping.

The SCVURPP Program has established a definition for rural roads and provided guidelines on performance standards, BMPs and SOPs. The City's maintenance activities produce results consistent with the program guidelines. The public has long valued the natural ambience of the rural Hillside area and fully supports efforts to keep the area pristine.

There were no specific comments from Regional Board on the Milpitas FY 05-06, FY 06-07 or FY 07-08 Annual Reports. The Regional Board has not issued comments on the FY 06-07, FY 07-08, FY 08-09 or FY 09-10 Work Plans.

Evaluation - Storm Drain Operations and Maintenance

- Staff from police, fire, and public works continued to implement the City's SOP 8-6 titled "Response and Clean-up Guidelines for Hazardous and Non-Hazardous Material Releases including Discharges of Pollutants into Storm Drains and Water Courses (Urban Runoff Pollution Prevention)."

- In FY 08-09 City staff inspected all 78 outfalls and found five that need repair. Three of these five have been repaired and other two at California Circle Pump Station need repair.

- City staff performed the operation and maintenance tasks of the storm drain system; contractors were not used.

- Staff has not reported any problems with BMPS; no updates are planned at this time.

There were no specific comments from the Regional Board on the Milpitas FY 05-06 or 06-07 Annual Reports. The Regional Board has not issued comments on the FY 06-07, FY07-08, FY08-09 or FY 09-10 Work Plans.

D-8	WUPPP	URMP page D-5	Implement pollution control measures identified in the WUPPP to manage chlorine, biocides, and algaecides and prevent erosion and sediments.	Staff has implemented pollution control measures.	ongoing	Public Works Maintenance (Steve Smith)/ Marilyn Nickel

Evaluation - Water Utility Operations and Maintenance

- Due to a shortage of staffing resources, we did not update the inventory of key discharges. However, no new facilities or activities have been incorporated and the previous inventory remains applicable.
- Contractors are typically utilized to fix major water line breaks and 3 water lines breaks were contracted out in FY 08-09. There were no complaints about contractors not following BMPs to fix water line breaks.
- The first priority is to stop the flow of water.
- Staff has not reported any problems with BMPS; no updates are planned at this time.

There were no specific comments from the Regional Board on the Milpitas FY 05-06, FY 06-07 or FY 07-08 Annual Reports. The Regional Board has not issued comments on the FY 06-07, FY 07-08, FY 08-09 or 09-10 Work Plans.

E-C.3.c.9	Develop work plan for Group 2	URMP page E20	Update guidance manual and performance standards for Group 2 projects as needed.	C.3 Guidebook was updated in October 2005 to include Group 2 requirements.	Completed	Program, Planning & Engineering
E-C.3.d.1	Analyze Rainfall data	URMP page E20	Analyze local rainfall data and develop area-specific volume and flow based design criteria (Program with assistance from SCVWD).	Provided support to Program as needed.	Completed	Program & Engineering
E-C.3.d.2	Develop guidance	URMP page E20	Develop guidance on appropriate criteria to use for each BMP type.	City has incorporated guidance on BMPs in C.3 Guidebook.	Completed	Program
E-C.3.e.1	Develop logging procedure for O & M verification	URMP page E20	Develop and implement a procedure for logging information about treatment BMPs installed at approved Group 1 projects, and for maintaining a list or database of properties, treatment BMPs, and responsible operators	A city-wide computer database (CRW) Permit Tracking System to track C.3 activities including O & M has been developed and is in use. Meanwhile, Staff continues using Access database, which went online in October 2005. Staff is using this database to log information about treatment BMPs installed for both Group 1	Completed	Planning, Engineering, Building Inspection & Fire Department

Implem. Id.	Activity	Item Source	Tasks Identified in FY 2008-2009 Work Plan	Status / Comments	Due Date (mo/yr)	Responsible Party (Lead)/ Coordinator
				and Group 2 projects. As needed, revisions may be made to the database throughout the year to enhance effectiveness.	Ongoing	
E-C.3.e.2	Develop model language for O & M verification	URMP page E21	Develop model language for documents assigning responsibility to the developer/owner of private projects for O&M of treatment BMPs, or to the appropriate agency for O&M of treatment BMPs at public projects. These documents may include O&M responsibility agreements, written conditions in sales/ lease agreements, use permit conditions, provisions in CC&Rs, etc.	O & M Agreements are addressed in the updated version of the City's Stormwater C.3 Guidebook. The Guidebook is available from the Planning Division, the Engineering Division, or via the City's website.	Completed	Program, Planning & Engineering
E-C.3.e.3	Adopt model O & M verification procedure	URMP page E21	Adopt model O&M agreement language to meet agency-specific needs and requirements and incorporate into the project review and approval process.	O & M Agreements are addressed in the updated version of the City's Stormwater C.3 Guidebook. The Guidebook is available from the Planning Division, the Engineering Division, or via the City's website.	Completed	Planning & Engineering
E-C.3.e.4	Develop O & M requirements	URMP page E21	Develop fact sheets on the O&M requirements and frequencies for various BMP types that can be used to educate parties responsible for O&M and attached to O&M agreements. Include fact sheets for pesticide reduction measures related to landscape maintenance.	The City's updated Stormwater C.3 Guidebook references fact sheets contained in the Program's C.3 Stormwater Handbook. The 3rd Edition of the C.3 Guidebook was adopted in October 2005. The Guidebook assists developers and the City to conform their projects to the C.3 requirements. The Guidebook establishes BMP O&M requirements and verification procedures. The Guidebook is available from the Planning Division, the Engineering Division, or via the City's website.	Completed	Program
E-C.3.e.5	Develop inspection program for O & M verification	URMP page E21	Develop local programs for inspection of a subset of prioritized treatment BMPs to verify that proper O&M is being performed by the responsible party (Program to assist	Developed in tandem with O&M data management effort. See E-C3.e.1. Planning Staff has developed a list of all	FY 06/07 Completed	Engineering and Planning

Implem. Id.	Activity	Item Source	Tasks Identified in FY 2008-2009 Work Plan	Status / Comments	Due Date (mo/yr)	Responsible Party (Lead)/ Coordinator
			in defining which BMPs are priority for inspection.)	pre C.3 permanent BMP installations for use in a future inspection program.	8/06	
E-C.3.e.6		URMP page E21	Report on the Co-permittee's treatment BMPs O&M verification program in each annual report, including organizational structure, evaluation of effectiveness, and planned improvement to the program. Include a list or summary of treatment BMPs inspected during the year, inspection results, and any required follow-up and correction.	To date, City has six sites, with permanent BMP (Humane Society of Silicon Valley, Piercey Toyota, Main Sewage Pump Station, East Centria, Devries, and City Library). All sites were inspected by City staff in June 2009 and were found to be in compliance. The database has a reporting component which summarizes treatment BMPs inspected during the year, inspection results, and any follow-up and correction.	FY 08/09 Completed and Ongoing	Engineering & Building
E-c.3.f.1	Prepare HMP	URMP page E22	Complete the HMP and required interim products (Program, SCVWD, and City of San Jose have lead role)	The Regional Board adopted the SCVURPPP HMP in July 2005.	Completed	Engineering
E-c.3.f.2	Guidance to implement HMP	URMP page E22	Develop guidance to the Co-permittees on implementation of the HMP as part of requirements for Group 1 projects that may cause increased erosion or other related impacts.	Program to develop guidance (see f.1) City adopted its own C3 Guidebook on September 24, 2003 and updated it in October 2005 to add HMP requirements.	Completed	Program
E-c.3.f.3	Adopt HMP	URMP page E22	Upon adoption by the Regional Board, begin implementation of HMP requirements for Group 1 projects that may cause increased erosion or other related impacts. Before adoption, encourage early implementation of likely elements of the HMP where possible.	City updated its C3 Guidebook in October 2005 to include HMP requirements. HMP workgroup was reformed into a HMP Implementation Phase (HMI) in October 2005. Workgroup focuses on issues and needs of co-permittees and developers for implementing the HMP. City is participating as required.	Completed Ongoing	Engineering
E-c.3.f.4	Peak runoff limitation	URMP page E22	Evaluate potential regional treatment and/or flow control projects	Water District to conduct this task with Program and City of San Jose assistance. City completed a preliminary feasibility evaluation of its existing stormwater lagoons to determine if treatment capacities	Completed. Further review will be needed if City	*SCVWD, Program & Engineering

				could be made available.	elects to proceed.	
E-c.3.g.1	Model Waiver program	URMP page E23	Develop a model waiver program that includes (Required by C.3.g.iii): - the legal requirements and mechanisms for implementing the waiver program - criteria for determining impracticability or unfeasibility (technical and financial) - method for evaluating the equivalency of the proposed mitigation criteria for participation in regional facilities requirements for logging project information for reporting purposes	City developed a local waiver program that was approved by the RWQCB in June 2005.	Completed	Program, Planning, Engineering
E-c.3.g.2	Local waiver program	URMP page E23	Develop local waiver program, perform legal review, and incorporate waiver provisions in project review process. (If model program has not been adopted by Regional Board, develop interim waiver program per C.3.g.vi.)	City developed a local waiver program that was approved by the RWQCB in June 2005.	Completed	City Attorney, Engineering, Planning
E-c.3.g.3	Track information for granted waivers	URMP page E23	Begin tracking information for reporting on waivers granted, including project name, location, type, percent impervious surface, reasons for and terms of waiver, and the alternative benefit project and completion date.	No waivers were requested or granted in FY 07-08. Waivers, if granted, would be tracked in CRW Permit Software database.	Completed.	Planning, Engineering
E-c.3.h.1	Alternate compliance	URMP page E24	Develop an internal procedure to allow alternative compliance.	Requirements for alternative compliance have been included in Stormwater C.3 Guidebook. Consultant has prepared a procedure for alternative compliance.	Completed.	Planning, City Attorney, Engineering
E-C.3.j.1	Develop site design guidance	URMP page E24	Develop and submit a detailed work plan and schedule for review, revision, and implementation of revised site design standards and guidance.	City staff participated on Ad-Hoc committee to develop Site Design Guidance. The 3rd Edition of the C.3 Guidebook was adopted in October 2005. Step 3 of Chapter 3 of the Guidebook addresses Design to Minimize Imperviousness through cluster development, optimizing the site layout, minimizing directly	Completed	Program, Planning Engineering

Implem. Id.	Activity	Item Source	Tasks Identified in FY 2008-2009 Work Plan	Status / Comments	Due Date (mo/yr)	Responsible Party (Lead)/ Coordinator
				connected impervious area, detaining and retaining runoff throughout the site and through documentation of design.		
E-C.3.j.2	Adopt site design guidance locally	URMP page E24	Review existing local design standards and guidance, and compare them to the list of areas to address in Provision C.3.j. and other references such as "Start at the Source" and the "Development Policies Comparison" work sheet. Prepare and submit an analysis of local standards, identified opportunities for revision, and proposed revisions.	The 3rd Edition of the C.3 Guidebook was adopted in October 2005. Step 3 of Chapter 3 of the Guidebook addresses Design to Minimize Imperviousness through cluster development, optimizing the site layout, minimizing directly connected impervious area, detaining and retaining runoff throughout the site and through documentation of design.	Completed	Planning, Engineering
E-C.3.j.3	Site design guidance	URMP page E25	Oversee completion of and work with the BASMAA work group on the BASMAA project "Using Start at the Source to Comply with Development Standards," which will evaluate how site design measures can be used to meet the numeric design standards in Provision C.3.d.	City staff participated on Ad-Hoc committee to develop model documents. The analysis of the City design standards were submitted to the Program in September of 2003. The 3rd Edition of the C.3 Guidebook was adopted in October 2005. Step 3 of Chapter 3 of the Guidebook addresses Design to Minimize Imperviousness through cluster development, optimizing the site layout, minimizing directly connected impervious area, detaining and retaining runoff throughout the site and through documentation of design.	Completed	Program
E-C.3.j.4	Incorporate Site design guidance into local project approval process	URMP page E25	Incorporate any revised standards and guidance into local project approval process and "fully implement" the revised standards and guidance.	The results of b.2, together with b.1, c.4, c.7 & j.2 were incorporated into the 3rd Edition of the C.3 Guidebook, which was adopted in October 2005.The Guidebook, in Step 3 of Chapter 3 addresses Design to Minimize Imperviousness through cluster development, optimizing the site layout, minimizing directly connected impervious area, detaining and retaining runoff throughout the site and through documentation of design.	Completed	Planning, Engineering

Implem. Id.	Activity	Item Source	Tasks Identified in FY 2008-2009 Work Plan	Status / Comments	Due Date (mo/yr)	Responsible Party (Lead)/ Coordinator
E-C.3.k.1	Revise existing PS to include Source Controls requirements	URMP page E26	Revise the current Planning Procedures Performance Standard to include source control requirements (complete as part of Action c.5.). Develop a model list of source control measures (in the form of conditions of approval), based on existing lists used by Co-permittees, examples in Provisions C.3.k. and other references, and include the list as an attachment to the revised performance standard. Products, Required by C.3.k (last paragraph): -- Draft conditions of approval for source control measures - 9/15/02 -- Model revised performance standard – 3/1/03	The revised Guidebook addresses source control requirements in Chapter 3, Step 6 and provides a model list of source control measures in Appendix C including those that must be designed into the project at the outset, and those that comprise operational BMPs activities to be conditioned upon project approval.	Completed	Program
E-C.3.k.2	Revise existing PS	URMP page E26	Incorporate model revised Planning Procedures Performance Standard into local urban runoff management plans including effectiveness & evaluation.	Adopted above PS, and Source Control Measures are being implemented.	Completed	Planning
E-C.3.k.3	Develop work plan to include Source Control	URMP page E27	Develop a work plan for and begin implementation of source control measures requirements by including appropriate conditions of approval in Group 1 projects. Report status and provide examples of application of conditions in annual reports.	• Began including Conditions of approval (COA) for "Source Control" (City already picks from BMP matrix for all projects). Also included in City's C-3 Guidebook. • Source Control Measures are being implemented and included in Special Conditions of Approval. Also included in City's C.3 Guidebook. • The 3rd Edition of the C.3 Guidebook was adopted in October 2005. The guidebook outlines requirements for submittal of a Stormwater Control Plan with Group 1 and Group 2 projects. Development proposals must incorporate BMPs into project design at the outset, instead of conditioning the project approval after basic project design was already completed.	Completed Completed Completed	Planning & Engineering

Implem. Id.	Activity	Item Source	Tasks Identified in FY 2008-2009 Work Plan	Status / Comments	Due Date (mo/yr)	Responsible Party (Lead)/ Coordinator
				• Beginning 10/6/05, City started requiring submittal of a Stormwater Control Plan with planning application submittal for Group 2A projects, such as plan to incorporate BMPs into project design. In August 2006, City will impose same requirements for Group 2B projects as identified in the C.3 Guidebook. • City staff continues to include conditions of approval, including a condition that project construction plans incorporate the BMPs in the approved Stormwater Control Plan.	Completed Completed and Ongoing	
E-C.3.l.1	Review General Plan (GP)	URMP page E28	Review current GP policies related to water quality and watershed protection and incorporate additional policies as needed to implement C.3 requirements. Refer to Provision C.3.l. for examples.	City updated its GP on January 17, 2006 to better implement the provisions of C3.	Completed	Planning & Engineering
E-C.3.m.1	Review CEQA checklist	URMP page E28	Review CEQA initial study checklists and other environmental review documents and modify documents as needed to include questions that sufficiently address water quality impacts of projects (see example questions in Provision C.3.m.)	City, with consultant, reviews CEQA checklist to address stormwater concerns; no revisions were needed.	Ongoing as CEQA review is needed.	Planning
E-C.3.n.1	Reporting	URMP page E28	Provide information described in Table 1 of Provision C.3. in annual reports	The City's C.3 Guidebook incorporates the Table 1 (of Permit) requirements.	Provided in Annual Reports	Planning, Engineering Fire
E-C.3.n.2	Data management	URMP page E29	Prepare summary of data to be collected to meet C.3. requirements and recommendations for data management (data base fields, stage in review process to request data, etc.)	The database is operational and staff has been trained. See Staff Training Summary Table for details.	Completed	Program
E-C.3.n.3	Reporting	URMP page E29	Collect and report the following for all new and redevelopment projects that are required to meet C.3. Required by C.3.n.1 -- project name, location, type (per C.3.c.), size (ac. or sq. ft.), and impervious surface	These projects are shown on the Reporting Form for Significant Development (included in this section).	Completed	Planning & Engineering

Implem. Id.	Activity	Item Source	Tasks Identified in FY 2008-2009 Work Plan	Status / Comments	Due Date (mo/yr)	Responsible Party (Lead)/ Coordinator
			area. For redevelopment projects, include area of land disturbance.			
E-C.3.n.4	Reporting	URMP page E29	Collect and report the following for all projects that must implement treatment measures: BMPs, site design, and source control measures used, sizing criteria, O&M responsibility mechanism and responsible party for C.3 projects.	These projects are shown on the Reporting Form for Significant Development (included in this section).	Completed	Planning & Engineering
E-C.3.n.5	Effectiveness Evaluation	URMP page E30	Collect information and report a summary of types of pesticide reduction measures required for C.3 development projects, and the percentage of projects for which pesticide reduction measures were required. (Model conditions of approval for pest resistant landscaping features and practices and a reporting format for pesticide reduction measures are being prepared as part of Actions VII.A.1. and VII.A.4. of the Program's Pesticide Management Plan. Co-permittees are to begin to consider pest-resistant landscaping and design features in the design, landscaping and environmental reviews of development projects in FY 02-03, per Pesticide Management Plan Action VII.A.2.) Required by C.3.n.iii (Model COA 6/02)	Started collecting data – 7/02 Group 1 and Group 2A projects are reported in Significant Development Projects Table.	Ongoing	Engineering

Evaluation – New Development Planning Procedures

The Planning, Engineering (Land Development, Design and Construction, Utility Engineering), and Building Divisions have coordinated to integrate the C.3 provisions into the City development approval procedures. The City updated its Stormwater C.3 Guidebook in October 2005 to update O & M verification, Hydromodification, Group 2 definition and the waiver program.

General Plan Amendment: Staff updated the Open Space and Environmental Conservation Element of the General Plan as follows:

4.4 Water Quality and Conservation

For water supply, see Section 2.6: Public Utilities and Services.

Urban Runoff (Stormwater) Pollution Prevention

Urban runoff to Bay area creeks and San Francisco Bay contains pollutants that impair aquatic life. Bay fish contain elevated concentrations of mercury, PCBs, and other pollutants harmful to human health.

The California Regional Water Quality Control Board for the San Francisco Bay Region (Water Board) is responsible for enforcing the state's Porter-Cologne Water Quality Act and portions of the Federal Clean Water Act. The Water Board's *Water Quality Control Plan* (Basin Plan) identifies beneficial uses of San Francisco Bay and its tributaries and sets forth criteria and programs for protection of beneficial uses.

The Water Board has issued Municipal Stormwater Runoff National Pollutant Discharge Elimination System (NPDES) permits to Bay Area counties, water districts and municipalities. The permits mandate comprehensive programs to reduce urban runoff pollutants to the maximum extent practicable.

Milpitas, 12 other cities and towns in northern Santa Clara County, Santa Clara County, and the Santa Clara Valley Water District are Co-permittees under a single stormwater NPDES permit. The NPDES permit was issued in 1990 and reissued, with additional requirements, in 1995 and 2001.

Milpitas' *Urban Runoff Management Plan* details the City's comprehensive urban runoff pollution prevention program. To implement the plan, the City:

- Inspects municipal storm drains to eliminate illicit discharges and prevent illegal dumping.
- Inspects private industrial and commercial facilities and enforces requirements to implement Best Management Practices (BMPs) to reduce stormwater pollutants.
- Educates the public about stormwater pollution and prevention methods, and encourages public participation in program planning.
- Inspects construction sites and enforces requirements to implement BMPs to control erosion, sedimentation, and pollutants from construction activities.
- Requires applicants for development approvals to incorporate permanent pollution prevention measures into development projects.
- Advocates and employs Integrated Pest Management, an approach to pest management that relies on information about the life cycles of pests and their interaction with the environment.

Pest control methods are applied with the most economical means and with the least possible hazard to people, property, and the environment.

- In cooperation with other agencies, monitors the occurrence and effects of stormwater pollutants in receiving waters.

The City has adopted Performance Standards for its pollution prevention activities. These Performance Standards are continuously improved, with an updated Performance Standard, or new Performance Standard, adopted each year.

Milpitas' *Urban Runoff and Watercourse Protection Ordinance* (Title XI, Chapter 16 of the Milpitas Municipal Code) expresses the City's authority to prohibit non-stormwater discharges to storm drains and to require residents and businesses to implement BMPs.

The 2001 reissued permit added more stringent requirements (Provision "C.3") to control runoff and runoff pollutants from new development. Applicable projects[1] must include facilities to treat runoff before it is discharged from the site. The City is required to inspect these facilities and ensure that they are operated and maintained in perpetuity.

In addition, the reissued permit requires the City to manage increases in peak runoff flow and increased runoff volume where necessary to prevent accelerated erosion of creek beds and banks.

In September 2005, the Milpitas Planning Commission agenda included the revision of the *Stormwater C.3 Guidebook* (adopted in September of 2003) to guide staff and applicants when implementing the new requirements.

Water Conservation

Prompted by the recent drought and water shortages, the City in 1993 adopted a Water Efficient Landscapes Ordinance and in 1994 adopted the Water Conservation Ordinance. The Ordinance seeks to promote conservation and efficient use of water by restricting new and rehabilitated landscaping for public agency projects, private commercial and industrial projects, and common-area landscaping in single-family and multifamily subdivisions and planned unit developments to maximum applied water allowances. It also requires preparation of landscape documentation packages for new and rehabilitated landscapes.

Recycled Water

---

[1] Beginning October 15, 2003, the C.3 requirements are applied to projects that add or replace one acre or more of impervious surface. On or before October 20, 2005, the City will implement Group 2A which consists of an impervious area of 10,000 square feet on sites with a gas station, auto wrecking yard, loading docks and surface parking lots containing more than 10,000 square feet or more of impervious surface area, and vehicle or equipment maintenance areas, outdoor handling or storage of waste or hazardous materials, outdoor animal care, outdoor horticultural activities, and various other industrial and commercial uses where potential pollutant loading cannot be satisfactorily mitigated through other post-construction source control and site design practices. All other developments with impervious areas of 10,000 square feet or more will be required to implement C.3 requirements in accordance with the City's NPDES Permit. On or before August 15, 2006, this threshold is reduced to 10,000 square feet of impervious surface for all sites.

The City of Milpitas desires to conserve potable water supplies and encourages the use of recycled water for appropriate uses. Potable water shall not be used for irrigation if recycled water is available except as specified in the City Municipal Code.

Chapter 4.9
d. Water Quality and Conservation

Guiding Principles

4.d-G-1. Assure reasonable protection of beneficial uses of creeks and South San Francisco Bay, and protect environmentally sensitive areas.

4.d-G-2. Comply with regulatory requirements pertaining to water quality.

4.d-G-3. Continuously improve implementation of stormwater pollution-prevention activities.

4.d-G-4. Mitigate the effects that land development can have on water quality.

4.d-G-5. Protect and enhance the quality of water resources in the Planning area.

4.d-G-6. Promote conservation and efficiency in the use of water.

Implementing Policies

4.d-P-1. Implement a comprehensive municipal stormwater pollution-prevention program in compliance with requirements of the Water Board's stormwater NPDES permit.

4.d-P-2. Minimize the use of pesticides that may effect water quality.

4.d-P-3. Work cooperatively with other cities, towns, and the Santa Clara Valley Water District to comply with regulations, reduce pollutants in runoff, and protect and enhance water resources in the Santa Clara Basin.

4.d-P-4. Where consistent with other policies, preserve, create, or restore riparian corridors and wetlands. Where possible, set back development from these areas sufficiently to maximize habitat values.

4.d-P-5. Where feasible, conform developments to natural landforms, avoid excessive grading and disturbance of vegetation and soils, retain native vegetation and significant trees, and maintain natural drainage patterns.

4.d-P-6. Where possible, avoid new outfalls to natural or earthen channels.

4.d-P-7. Applicable projects shall minimize directly connected impervious area by limiting the overall coverage of paving and roofs, directing runoff from

impervious areas to adjacent pervious areas, and selecting permeable pavements and surface treatments.

4.d-P-8. Applicable projects shall incorporate facilities (BMPs) to treat stormwater before discharge from the site. The facilities shall be sized to meet regulatory requirements.

4.d-P-9. Applicable projects shall control peak flows and duration of runoff where required to prevent accelerated erosion of downstream watercourses.

4.d-P-10. Projects accommodating outdoor activities, including work areas, storage areas or other areas that are potential sources of stormwater pollutants, shall incorporate measures to control those pollutant sources to the maximum extent practicable.

4.d-P-11. Owners and operators of stormwater treatment facilities shall maintain those facilities and ensure they continue to be effective.

4.d-P-12. Construction sites shall incorporate measures to control erosion, sedimentation, and the generation of runoff pollutants to the maximum extent practicable. The design, scope and location of grading and related activities shall be designed to cause minimum disturbance to terrain and natural features. (Title II, Chapter 13 of the Municipal Code includes requirements for control of erosion and sedimentation during grading and construction.)

Required Actions

Milpitas Urban Runoff Management Program
(Details of implementation are in Title XI, Chapter 16 of the Municipal Code and in the Milpitas Urban Runoff Management Plan.)

4.d-A-1. Inspect commercial and industrial facilities and require BMPs.

4.d-A-2. Conduct surveillance and enforcement to reduce illegal dumping to storm drains.

4.d-A-3. Implement BMPs to minimize runoff pollutants during operation and maintenance of streets, roads, storm drains, and water supply mains and facilities.

4.d-A-4. Inspect construction sites and require erosion and sedimentation control and pollution-prevention BMPs.

4.d-A-5. Publicize and promote Integrated Pest Management and use Integrated Pest Management in maintenance of City parks and other facilities.

4.d-A-6. Update the Urban Runoff Management Plan as required in accordance with the Water Quality Control Board's Stormwater NPDES Permit.

Cooperative Efforts to Protect and Enhance Water Quality

4.d-A-7. Support and participate in the Santa Clara Valley Urban Runoff Pollution Prevention Program (SCVURPPP). Through SCVURPPP, support regional organizations and efforts, including the Bay Area Stormwater Management Agencies Association, to monitor and protect water quality in San Francisco Bay and its tributaries.

4.d-A-8. Coordinate with the Santa Clara Valley Water District to plan and implement multi-objective projects to reduce flood hazards, restore stream functions, and provide recreational resources along Berryessa Creek and other Milpitas creeks.

Development Requirements
(Details of implementation are in Title XI, Chapter 16 of the Municipal Code, the Milpitas Urban Runoff Management Plan, and the Milpitas Stormwater C.3 Guidebook.)

4.d-A-9. Provide guidelines to help applicants comply with stormwater requirements for new development.

4.d-A-10. Require developers of applicable projects to submit, with application for planning and zoning approval, a Stormwater Control Plan detailing the required stormwater pollution prevention and flow control measures incorporated into the project.

4.d-A-11. Require developers of applicable projects to prepare and submit, prior to final approval of construction, a Stormwater Control Operation and Maintenance Plan detailing maintenance requirements and methods for the stormwater treatment and flow control facilities incorporated into the project.

4.d-A-12. When conducting environmental reviews of proposed projects, evaluate water quality effects and identify appropriate mitigation measures.

4.d-A-13. Adopt and revise public works standards to minimize the impacts of development on water quality, provided that the new standards would also be consistent with other City policies.

4.d-A-14. Allow access to sites for City inspection of stormwater treatment and flow control facilities.

Other Activities: Staff has inspected all sites with permanent BMPs in the City and all are in compliance.

City management has worked with other Co-permittees in the development of a Waiver Program to address site impracticability, smart growth projects, and redevelopment areas pursuant to the Community Redevelopment Law (Health & Safety Code 330000 et. seq.), affordable and senior housing projects and brownfields that were approved by the RWQCB in June 2005. A Smart Growth Project pursued by the City is the adopted Milpitas Transit Area Specific Plan. The plan consist of a mixed-use Transit Oriented Development in close proximity to the future Montague BART Station and two light rail stations. The project will consist of 7,185 dwelling units, 800,000 square feet of office, 175,000 square feet of hotel and 500,000 square feet of retail.

The City has developed a database to incorporate the O & M verification program. With this database, the City will be able to track all projects with permanent BMPs and their status including an inspection schedule. City staff have been trained to use this database.

A City consultant has also reviewed and provided guidance for preliminary identification and analysis of stormwater management options for the City's Library expansion project in November 2004.

The City is diligently working on meeting C3 requirements.

There were no specific comments from the Regional Board on the Milpitas FY 05-06, FY 06-07 or FY07-08 Annual Reports. The Regional Board has not issued comments on the FY 06-07, FY07-08, FY 08-09 or FY 09-10 Work Plans.

Additional Information – New Development Planning Procedures

BMP O & M Verification Program – C.3.e: As part of developing and implementing a program to verify that required treatment BMPs are properly maintained over the life of the project, the City has developed a database to track C.3 activities including the Operation and Maintenance Program. In this database, project information such as property address, contact person, responsible party, BMPs installed, BMPs maintenance and inspection frequency required etc. will be entered. The City will also develop criteria to inspect a subset of prioritized treatment measures for appropriate operation and maintenance on an annual basis.

The City has reviewed Program-provided examples of operation and maintenance-related ordinance, policy and agreement language and had formulated language for special conditions, O & M plans and agreements for incorporation into the City's project approval process. The approval process (for Private and Public Projects) is shown below:

C3 Procedure – Private Projects

Function	#	Activity	Description	Lead Section
Planning Approval	1	Inform applicants of C3 requirements	Provide forms: • C3 Data Form • C3 Waiver Form, if applicable. • C3 Alternative Compliance Form, if applicable.	**Planning**
	2	Receive application	Assign entitlement Project # in database.	**Planning***
	3	Review applications for completeness and applicability of C3 requirements	For projects with more than 10,000 SF of new impervious surface area (created, added, or replaced impervious surface, including roof area, streets, and sidewalk). Threshold of 10,000 SF became effective April 15, 2005.	**Planning*** **Land Development Engineering***
	4	Assign conditions of approval for permanent urban runoff controls	Permanent controls to manage storm water peak volume and quality are mandated. Site Design Measures guidelines are used to determine the appropriate BMP for the specific site conditions. BMPs may include vegetative swales, detention basins etc. In accordance with Hydromodification Management Plan, BMPs will be selected to control peak discharges.	**Land Development Engineering***
	5	Assign conditions of approval for long-term O&M of permanent controls	a. City oversight to insure proper operation and maintenance occurs is mandated. b. Approve O&M Plan. (O&M Plan not required if project has received C3 waiver.)	**Land Development Engineering***

	6	Assign conditions of approval for other C3 elements	a. Pesticide reduction (choose plantings and design landscape to minimize use and runoff of pesticides) b. Source control (includes plumbing several areas to sanitary such as restaurant mat washing, trash enclosures, swimming pools, vehicle wash areas, fire sprinkler test water, etc) c. Site design (includes minimize land disturbance, minimize impervious surface area, minimum impact street and parking lot designs, downspouts to bubble-ups, microdetention at landscapes).	**a. Planning*** **b. Land Development Engineering*** **c. Land Development Engineering* Planning***
	7	Plan check proposed permanent controls	Perform detailed plan check for hydrology, hydraulically-sized detention basins, and vegetative swales, etc. Coordinate with SWPPP, erosion control plan and grading plan. Verify conditions of approval in #4 are met. Plan check for conditions of approval in #5. May include review and recordation of CC&Rs for O&M responsibility. Plan check for conditions of approval #6a - pesticide reduction measures. Plan check conditions of approval #6b - site design measures. Plan check for conditions of approval #6c - source control measures.	**Land Development Engineering***
Construction & Inspection	8	Inspect and accept installation of permanent controls	Inspect construction of detention basins, swales, fossil filter inserts, etc. in accordance with plans. Grading, landscape and site drainage would also be inspected.	**Public Works Inspection***
Post-Construction	9	Long-term Permanent Controls O&M	Oversee and administer program to ensure that controls are annually maintained. Develop and maintain a database, coordinate inspection, and follow up with enforcement issues.	**Utility Engineering***
	10	Perform annual inspections of permanent controls	Inspect a subset annually to insure they are operated and maintained appropriately. (Annual inspection not required if project has received C3 waiver.)	**Public Works Inspection***

	11	Enforce O&M of permanent controls	Notify responsible City Department of needed O & M actions. Monitor for compliance. Elevate continuing noncompliance to City Manager if necessary.	**Public Works Inspection***
	12	Reporting	Report program status to RWQCB.	**Utility Engineering**

* Requires input into CRW database.

C3 Procedure – Public Projects

Function	**#**	**Activity**	**Description**	**Lead Section**
Planning Approval	1	Establish project requirements as part of project scope.		
	1a	Assign conditions for design including permanent urban runoff controls to project.	Permanent controls to manage storm water volume and quality are mandated. These controls might include detention basins, infiltration areas such as swales, fossil filter inserts at catch basins, etc. or offsite treatment. Hydromodification Management Plan.	**Design & Construction Engineering***
	1b	Assign conditions for long-term O&M of permanent controls to project.	c. City oversight to ensure proper operation and maintenance occurs is mandated. d. Develop O&M Plan. (O&M Plan not required if project has received C3 waiver.)	**Design & Construction Engineering***
	1c	Assign conditions for other C3 elements to project.	a. Pesticide reduction (choose plantings and design landscape to minimize use and runoff of pesticides) b. Source control (includes plumbing several areas to sanitary such as restaurant mat washing, trash enclosures, swimming pools, vehicle wash areas, fire sprinkler test water, etc) c. Site design (includes minimize land disturbance, minimize impervious surface area, minimum impact street and parking lot designs, downspouts to bubble-ups, microdetention at landscapes and cisterns).	**Design & Construction Engineering*** **Planning***

	2	Complete application upon CIP approval by City Council	For projects with more than 10,000 SF of new impervious surface area (created, added, or replaced impervious surface, including roof area, streets, and sidewalk). Review for Waiver and Alternative Compliance. Include C3 provisions even if waiver applies. Assign Urban Runoff Certification # in database. Complete forms: • C3 Data Form • C3 Waiver Form, if applicable. • C3 Alternative Compliance Form, if applicable.	**Design & Construction Engineering***
	3	Plan check proposed permanent controls	Perform detailed plan check for hydrology, hydraulically-size detention basins and vegetative swales etc. Coordination with SWPPP, erosion control plan, and grading plan. Verify scope of work items are met. Plan check for conditions of approval. Plan check for conditions of approval - pesticide measures. Plan check conditions of approval - site design measures. Plan check for conditions of approval - source control measures.	**Design & Construction Engineering***
Construction & Inspection	4	Inspect and accept installation of permanent controls	Inspect construction of detention basins, swales, etc in accordance with plans. Grading, landscape and site drainage would also be inspected.	**Public Works Inspection***
Post Construction	5	Long-term Permanent Controls O&M	Oversee and administer program to insure that controls are annually maintained. Develop and maintain a database, coordinate inspection, and follow up with enforcement issues.	**Land Development Engineering***
	6	Perform annual inspections of permanent controls	Inspect a subset annually to insure they are operated and maintained appropriately.	**Public Works Inspection***

	7	Enforce O&M of permanent controls	Notify responsible City Department of needed O & M actions. Monitor for compliance. Elevate continuing noncompliance to City Manager if necessary.	**Public Works Inspection***
	8	Reporting	Report program status to RWQCB.	**Utility Engineering***

* Requires input into CRW database.

Alternative Certification of Adherence to Design Criteria for Stormwater Treatment Measures – C.3.h: No alternative certification was approved in FY 07-08.

Site Design Measures Guidance & Standards Development – C.3.j: The City of Milpitas adopted a C.3 Guidebook in 2003 and updated it in 2005. The Stormwater C.3 Guidebook is designed for staff and developer use, outlining planning application submittal requirements, including Site Design Measures, to meet development standards for stormwater quality. This Guidebook, which is placed on the city web site, references other standard supporting documents such as BAASMA's design guidance manual for stormwater quality protection, "Start at the Source."

This Guidebook, in Step 3 of Chapter 3 addresses Design to Minimize Imperviousness through cluster development, optimizing the site layout, minimizing directly connected impervious area, detaining and retaining runoff throughout the site and through documentation of design.

General Plan – C.3.l: The General Plan was amended on January 17, 2006 to better implement the provisions of C.3.

Reporting – C.3.n: Please see attached "Development Projects Table."

Reporting Form for Planning Procedures Performance Standard – Summary Tables / Additional Information

All Significant Development Projects Reviewed and/or Approved

Private Projects

Project Name – D.R. Horton "Centria" condominium development	**Project Description -** Multi – Story condominium building with internal parking structures	**Project Type -** Residential	**Site Size (AC) -** 8.2 acres	**New Impervious Surface (AC)** – 6.09 acres	**Project Status** (Approval Date) – Approved by the Planning Commission on May 10, 2006. Completed and occupied.
Site Design: Clustering of buildings, landscape swales in open space	**Source Control**: Covered trash areas, parking structure, street sweeping by the HOA, sanitary sewer drains for swimming pools. Storm drain system stenciling, landscaped infiltration areas.	**Treatment BMPs:** Landscape infiltrating BMPs, landscape swales adjacent to pedestrian trails, structural storm water treatment units, oil-grease separators in parking structures	**Numeric Criteria:** Flow-based criteria is used to design BMPs	**O&M Responsibility:** Property owner, O & M Agreement required.	**Pesticide Reduction Meas**: Pesticide and fertilizer usage will be controlled through usage of a licensed landscape maintenance company. Pest resistance plant material will be used.
Project Name – Piercey Toyota	**Project Description -** Automobile Dealership	**Project Type -** Commercial	**Site Size (AC) –** 10 acres	**New Impervious Surface (AC) –** 8.12 acres	**Project Status** (Approval Date) – Approved by the City Council on March 21, 2006. Completed and occupied.
Site Design: The automobile dealership will consist of two buildings and concrete and asphalt paving.	**Source Control:** -Area drains in parking areas have been fitted with filter inserts. -Drains marked with "No Dumping-Drains to Creek" or similar message. -Interior floor drains and car lifts drains plumbed to the sanitary sewer. -Refuse area is covered to prevent rainwater from entering dumpsters.	**Treatment BMPs:** Vegetated swales and catch basin filter inserts.	**Numeric Criteria:** Flow-based and Volume-based criteria is used to design BMPs	**O&M Responsibility:** Property owner, O & M Agreement required.	**Pesticide Reduction Meas:** -Pest-resistant plants selected, especially for locations adjacent to hardscape. -Landscaping designed to minimize required irrigation and runoff, to promote surface infiltration, and to minimize the use of fertilizers and pesticides

	-No outdoor storage of equipment or materials allowed at this facility. -All vehicle equipment and maintenance is indoors. -Covered trash area. -Sanitary sewer connections provided to drain fire sprinkler test water. -Condensate drain lines discharge to the sanitary sewer system or to landscaped areas. -New hardscape areas drain to drain inlets with filter inserts. -Pavement is concrete and the car washing area is contained so water cannot drain into this area.				that can contribute to storm water pollution.
Project Name – D.R. Horton, The Paragon	**Project Description -** 147 unit residential condominium development	**Project Type -** Residential	**Site Size (AC) –** 4.6 acres	**New Impervious Surface (AC)** – 3.87 acres	**Project Status:** (Approval Date) – Approved by the City Council on December 15, 2005. Grading in fall 2006 and occupancy expected in 2009/10.
Site Design: Residential Planned Unit Development with a maximum density of 216 senior and multifamily units, including two, 5-story buildings for the senior development with associated site improvements which	**Source Control:** -Mark all inlets with the words 'NO DUMPING – DRAINS TO THE BAY'. -Plumb all parking garage floor drains to the sanitary sewer. -Prohibit car washing on site and use an automatic shut off on house to	**Treatment BMPs:** Grassy swales and landscaping. Two vortex hydrodynamic separators.	**Numeric Criteria**: Flow-based criteria is used to design BMPs	**O&M Responsibility:** Property owner, O & M Agreement required.	**Pesticide Reduction Meas:** -Landscaping will be designed to minimize required irrigation and runoff, to promote surface infiltration, and to minimize the use of fertilizers and pesticides that can contribute to

include development standard deviations and a use permit for a parking reduction	discourage such use. -Avoid roofing, gutter and trim made of copper or other unprotected metals that may leach into runoff. -Plaza, sidewalk and parking lots shall be swept regularly to prevent the accumulation of litter and debris. -Debris from pressure washing shall be collected to prevent entry into the storm drain system. -Wash water containing any clearing agent or degreaser shall be collected and discharged to the sanitary sewer and shall not be discharged to a storm drain.				storm water pollution. -Where possible, pest-resistant plants will be selected, especially for locations adjacent to hardscape. -Plants will be selected appropriate to site soils, slopes, climate, sun, wind, rain, land use, air movement, ecological consistency, use of recycled water (where applicable), and plant interactions.
Project Name **Venture Corporation**	**Project Description -** Demolish 125,000 + sq ft industrial building and construct 10 industrial R&D condominium buildings	**Project Type –** Industrial	**Site Size (AC) –** 12.02 acres	**New Impervious Surface (AC)** 0.1668 acres (7,269sf)	**Project Status** (Approval Date) – March 22, 2006. Grading in fall 2006, completed Phase I. Phase II being contemplated.
Site Design: The site design consists of 12 industrial buildings, driveways and 47% of the site (including the lagoon) will be pervious.	**Source Control:** -All storm drain inlets on the site painted with "NO DUMPING – DRAINS TO BAY". -All trash storage areas enclosed in a concrete paved enclosure and designed to prohibit run-on from adjoining areas. -All trash containers	**Treatment BMPs:** Filtered drain inlets and landscape areas	**Numeric Criteria:** Flow-based criteria is used to design BMPs	**O&M Responsibility:** Property Owner, O & M Agreement required.	**Pesticide Reduction Meas:** -Landscaping designed to minimize required irrigation and runoff, to promote surface infiltration, and to minimize the use of fertilizers and pesticides that can contribute to storm water pollution.

	include attached lids that exclude rain. -The timing and application methods of irrigation have been designed so as to minimize the runoff of excess irrigation water into the storm water conveyance system.				-Pest-resistant plants selected, especially for locations adjacent to hardscape.
Project Name - Humane Society of Silicon Valley	**Project Description –** New 47,990 sq. ft. multi-purpose animal facility with associated site improvements including ancillary retail shop, dog park, parking modifications & compact parking, located in the Ames Industrial Park at 901 Ames Ave	**Project Type - Commercial**	**Site Size (AC) -** 4.86 acres	**New Impervious Surface (AC) -** 148,975 sq. ft.	**Project Status** (Approval Date) – September 27, 2004. Completed and occupied.
Site Design: Reduced impermeable surface area through provision of a major vegetative filter area in the dog park in the southeast portion of the project. Decomposed granite portions of parking areas provide infiltration in parking areas. Roof downspouts drain to landscape areas to greatest extent possible. All roof drainage and parking lot drainage treated in BMPs located in multiple bio-	**Source Control:** -Covered trash containers. -Stenciled inlets. -Street sweeping. -Landscaping with native and drought tolerant species. -Irrigations systems that utilize automatic controllers to prevent over watering.	**Treatment BMPs:** -Catchment areas and treatment areas. -Landscaping curb cuts -Vegetated swales.	**Numeric Criteria:** Flow-based criteria is used to design BMPs	**O&M Responsibility:** Humane Society of Silicon Valley, O & M Agreement required.	**Pesticide Reduction Meas:** Landscape maintenance minimize use of pesticides to maximum extent practical.

swales around the site at ground elevation.					
Project Name – Aspen Family Apartments	**Project Description –** Affordable multifamily residential development with 101 units and associated site improvements located at 1666 S. Main Street	**Project Type –** Residential- 101 affordable apartments	**Site Size (AC) –** 2.69 AC	**New Impervious Surface (AC)** 117,206 sq. ft.	**Project Status:** (Approval Date) – March 28, 2007. Submitted for building permits. Expected Construction Completion and occupancy by 2009/2010.
Site Design: All building downspouts will be connected to landscaping.	**Source Control:** All locations where landscape maintenance and maintenance/washing of residents' cars (car washing is prohibited on-site), will drain to storm water treatment facilities. -On-site drain inlets have been reduced except for area drains in the landscaped area and overflows in the storm water treatment BMPs. -Interior floor drains and elevator shaft sump pumps will be plumbed to the sanitary sewer. - Refuse areas in the residential building with floors sloped to prevent drainage to exterior. -Paved parking areas drain to sewer rather than directly to storm drains.	**Treatment BMP's:** Facilities will be designed and constructed with a minimum 18" depth of sandy loam (minimum infiltration rate specified to be 5" per hour).	**Numeric Criteria:** Flow-based criteria is used to design BMPs	**O&M Responsibility:** Property owner, O & M Agreement required.	**Pesticide Reduction Meas:** All site landscaping is to be maintained by a professional landscaping contractor. Contract to state that landscaping is to be maintained using Integrated Pest Management (IPM) principles, with minimal or no use of pesticides.
Project Name – Murphy Ranch Fairfield Residential, LLC	**Project Description –** 659 residential units located on the southwest corner of Murphy Ranch	**Project Type –** Multi-Family Very High Density Residential	**Site Size (AC) –** 21.73 AC	**New Impervious Surface (AC) –**	**Project Status** Approved Fall 2007. Construction expected in FY09-10.

	Road and Technology Drive.				
Site Design: The site has been divided into five principle drainage areas. Currently storm water runoff on the site flows overland towards Murphy Ranch Road to five existing storm drain inlets located along the eastern boundary of the project site.	**Source Control:** -Area drains marked "No Dumping – Drains to Bay". -Covered trash enclosures.	**Treatment BMP's:** -Vegetated swales and landscaping areas -On-site storm drain system -Structural storm water treatment units -Oil-grease separators in the parking structure	**Numeric Criteria:** Flow-based criteria is used to design BMP's	**O&M Responsibility:** Property Owner, O & M Agreement required.	**Pesticide Reduction Meas:** Limit the use of fertilizers and/or pesticides.
Project Name - The Campus at McCarthy Ranch	**Project Description --** Adding 752,500 s.f. to existing 469,400 s.f. campus along McCarthy Boulevard, north of State Route 237.	**Project Type --** Multi-story office building campus	**Site Size (AC) --** 65 AC	**New Impervious Surface (AC) --49.96 AC**	**Project Status** Approved Spring 2009 with Development Agreement (new project).
Site Design: The project will incorporate the same stormwater treatment concepts as the existing office complex, utilizing biorention cells to treat parking lot runoff. Vault, manhole and catch basin-configured media filter devices will be used in areas that cannot drain to parking lot median or perimeter bioretention cells. The project proposes other landscaped open spaces and recreation areas that can also be used for stormwater treatment. The landscaped open spaces surrounding the	**Source Control:** -Drains will be marked with "No Dumping-Drains to Creek." -Parking garage floor drains will be plumbed to the sanitary sewer. -Interior floor drains will be plumbed to the sanitary sewer. -Landscaping will be designed to minimize required irrigation and runoff, to promote surface infiltration, and to minimize the use of fertilizers and pesticides that can contribute to stormwater pollution. - Loading docks shall be covered and/or graded to	**Treatment BMPs:** -Vegetated swales and landscaped areas. -Vault, manhole and catch basin configured media filter devices in areas that cannot drain to swales or medians. -Roof runoff will drain to landscaping or other pervious surfaces through the use of disconnected downspouts and/or splash blocks and pop-up emitters.	**Numeric Criteria:** Flow-based criteria is used to design BMP's	**O&M Responsibility:** Property owner, O & M agreement required.	**Pesticide Reduction Meas:** -Property owner will receive integrated pest management information from the City. -Minimize the use of pesticides and fertilizers.

proposed buildings will provide opportunities for treatment of roof runoff with bioretention cells.	minimize run-on to and runoff from the loading area. Roof downspouts shall be positioned to direct stormwater away from the loading area.				
Project Name-- Piper Citation Condominiums	**Project Description --** 639 residential units located at the termination of Piper Drive.	**Project Type --** Multi-Family Very High Density Residential	**Site Size (AC)** 16 AC	**New Impervious Surface (AC) --** 11.8 AC	**Project Status** Approved in Spring 2009 (new project).
Site Design: The site is divided into seven drainage areas with discharge into existing city storm drain system. Landscaped and easement areas will provide pervious surface opportunities.	**Source Control:** -Drains will be marked with "No Dumping-Flows to Creek". -Litter waste- provide trash bins. - Landscaping will be designed to minimize required irrigation and runoff, to promote surface infiltration, and to minimize the use of fertilizers and pesticides that can contribute to stormwater pollution. Where possible, pest-resistant plants will be selected, especially for locations adjacent to hardscape. Plants will be selected appropriate to site soils, slopes, climate, sun, wind, rain, land use, air movement, ecological consistency, use of recycled water and plant interactions.	**Treatment BMPs:** -Landscape areas used as bioretention. - Swales along northern boundary of site and along EVA within pedestrian corridor will be incorporated. -Structural stormwater treatment unit will be installed at the point of connection to the public storm drain system. -An oil-grease separator in the parking garage structure, which connects to the sanitary sewer system will be installed.	**Numeric Criteria:** Flow-based criteria is used to design BMP's	**O&M Responsibility:** Property owner, O & M agreement required.	**Pesticide Reduction Meas:** -All on site landscaping is to be maintained by a professional landscaping contractor. Contract to state that landscaping is to be maintained using Integrated Pest Management (IPM) principle, with minimal or not use of pesticides.
Project Name: Milpitas Station	**Project Description:** Redevelopment of	**Project Type:** Multi-Family Residential,	**Site Size (AC)** 9.40 AC	**New Impervious Surface (AC)**	**Project Status:** Approved Fall 2008

	industrial site for 318 residential units located along Milpitas Boulevard near Montague Expressway	High Density		0 AC	(new project).
Site Design: Landscape planters and landscaped areas between the buildings and paved areas help reduce impervious area.	**Source Control:** -Drains will be marked with "No Dumping-Drains to Bay." -Parking garage floor drains will be plumbed to the sanitary sewer. -If dumpsters or other receptacles are outdoors, grade and pave designated area to prevent run-on to the area and berm to prevent runoff from the area. -Prohibit car washing on site and use an automatic shut off on hose to discourage such use. -Avoid roofing, gutter and trim made of copper or other unprotected metals that may leach into runoff. -Minimize irrigation water use. -Minimize the need for fertilizers and pesticides. - Plants will be selected appropriate to site soils, slopes, climate, sun, wind, rain, land use, air movement, ecological consistency, use of recycled water and plant	**Treatment BMPs:** -Structural stormwater treatment unit will be installed at the point of connection to the public storm drain system.	**Numeric Criteria:** Flow-based criteria is used to design BMP's	**O&M Responsibility:** Property owner, O & M agreement required.	**Pesticide Reduction Meas:** Physical and mechanical horticultural measures.

	interactions.				
Project Name: **Sinclair Renaissance**	**Project Description:** 80 Single Family Residential Units adjacent to I-680	**Project Type:** Single-Family Residential	**Site Size (AC):** 9.65 AC	**New Impervious Surface (AC):** 0 AC	**Project Status:** Approved in Summer 2008 (new project).
Site Design: The site includes a single drainage area that would discharge into the existing storm drain inlet located at the southwest corner of the site. Landscaped areas include lawn, shrub, trees and swales.	**Source Control:** -Drains will be marked with "No Dumping-Flow to Creek." -Provide trash bins. - Landscaping will be designed to minimize required irrigation and runoff, to promote surface infiltration, and to minimize the use of fertilizers and pesticides that can contribute to stormwater pollution. Where possible, pest-resistant plants will be selected, especially for locations adjacent to hardscape. Plants will be selected appropriate to site soils, slopes, climate, sun, wind, rain, land use, air movement, ecological consistency, use of recycled water and plant interactions.	**Treatment BMPs:** - Vegetated buffer strip. - Structural stormwater treatment unit (media filter).	**Numeric Criteria:** Flow-based criteria is used to design BMP's	**O & M Responsibility:** Property owner, O & M agreement required.	**Pesticide Reduction Meas:** All site landscaping is to be maintained by a professional landscaping contractor. Contract to state that landscaping is to be maintained using Integrated Pest Management (IPM) principles, with minimal or use of pesticides.

Project Name – Senior Center **40 N. Milpitas Blvd**	**Project Description -** Redevelopment – Library (18,000 SF) to Senior Center (22,000)	**Project Type –** CIP – Building Construction	**Site Size (AC)** – 22,000 SF	**New Impervious Surface (AC)** – 4,000 SF	**Project Status** Funding approved – September 20, 2005 Project currently under construction. Completion expected in Aug 2010.
Site Design: Bicycle parking provided, adjacent to public transportation	**Source Control**: Trash enclosure plumbed to sanitary sewer	**Treatment BMPs:** Roof drains plumbed to the City Hall landscape area, since Senior Center does not have its own landscape area. Curb cuts in parking lot to landscaping.	**Numeric Criteria:** No	**O&M Responsibility:** City of Milpitas	**Pesticide Reduction Meas**: Plants selected from Planning Department approved list.
Project Name – Milpitas Main Sewage Pump Station **1425 N. McCarthy Blvd**	**Project Description -** Redevelopment – New sewage pump station	**Project Type –** CIP – Building Construction	**Site Size (AC)** – 134,204 SF	**New Impervious Surface (AC)** – 50,664 SF	**Project Status** Funding approved – November 21, 2006 Completed.
Site Design: Minimum land disturbed, preserved open space of 83,540 SF	**Source Control**: Wash area/racks drains into sanitary sewer	**Treatment BMPs:** Vegetated swale surrounds the site. There will be no runoff that is not captured by this swale.	**Numeric Criteria:** Flow-based criteria is used to design BMPs	**O&M Responsibility:** City of Milpitas	**Pesticide Reduction Meas**: Through education. Native grass mix for vegetated swale for minimal maintenance.

CITY OF MILPITAS
New Development Construction Activities – Self –Evaluation Matrix

Implem. Id.	Activity	Item Source	Tasks Identified in FY 2008-2009 Work Plan	Status / Comments	Due Date (mo/yr)	Responsible Party (Lead)/ Coordinator
F-6.B	Annual training	URMP page F-11	Provide annual training.	An Enforcement Response Plan was developed. City staff trained on revised Enforcement Response Plan in March 2006 and this is an on going effort.	Annually or more frequently	Engineering and Building Division
F-6.C	Effective BMP and stormwater regulations	URMP page F-11	Train and educate inspectors on effective BMPs and stormwater regulations through workshops, literature reviews on environmental regulations, seminars and conferences conducted by State, and Local environmental organizations.	See Staff Training Summary at the end of this Report for information.	Ongoing - Program has scheduled info-sharing & training workshops	Engineering and Building Division
F-7.B	Distribution of new requirements	URMP page F-11	Develop and distribute new materials when changes are made to the City's ordinances, conditions of approval, or other requirements for construction and post-construction BMPs.	C3 requirements were developed and information was provided to developers and contractors.	Ongoing	Engineering and Building Division

Evaluation - New Development Construction Procedures

City has been using a Construction Inspection Enforcement Response Plan since March 2006. This Plan includes newly developed documents such as Process Flow Chart, Urban Runoff Contractor Acknowledgement, Notice of Non-Compliance, Stop Work Notice, emergency Contractor Time and Materials Form, Deficiency Notice, updated SWPPP Checklist, and an updated City code.

City staff has been trained on this new Response Plan and other C3 requirements. City staff has also attended various training classes and workshops for these requirements. regulations.

The Engineering Design and Construction Section also held meetings to review the requirements and recommendations of preventing pollution from entering the storm water system, and to revise the City's "front end" specifications to reflect those principles, along with other construction practices. To that end the City's front-end specifications were revised to strengthen contractor requirements to perform in compliance with proper urban runoff practices, and to allow the City better tools to enforce contractor compliance with the specifications.

Public Works and Building inspectors coordinate to inspect and enforce construction related BMPs. They continue to improve developer and contractor understanding of requirements through education and staff's persistence. As noted on the ICID table, staff issued three citations with financial penalties to contractors. Developers and contractors have been increasingly more responsive to Storm Water Pollution Prevention Plan compliance.

There were no specific comments from the Regional Board on the Milpitas FY 05-06, FY06-07 or FY 07-08 Annual Reports. The Regional Board has not issued comments on the FY 06-07, FY 07-08, FY 08-09 or FY 09-10 Work Plans.

CITY OF MILPITAS
PUBLIC INFORMATION/PARTICIPATION-SELF-EVALUATION MATRIX

Implem. Id.	Activity	Item Source	Tasks Identified in FY 2008-2009 Work Plan	Status / Comments	Due Date (mo/yr)	Responsible Party (Lead)/ Coordinator
Public Information / Participation						
I-1	Outreach distribution	URMP Page I-4	Use of reply card on utility bills and Consumer Confidence Report as mechanism to reach residential audience for outreach material. Media advertisements, stencil storm drains, slides at movie theaters.	Pollution prevention literature was distributed at City events and made available at the following City facilities: City Hall, Senior Center, Community Center, Sports Center, Library, Police Department and Fire Department. Consumer Confidence Report was mailed to every water customer in City. In 08/09 public service announcements were continuously aired on the City's Cable TV (CTV 15 and CTV 26) stations. Staff updated announcements frequently. Stormwater pollution prevention videos were aired on CTV 26 daily.	Ongoing	Utility Engineering (Vency Woo)
I-2	Targeted Outreach	URMP Page I-5	Continue education efforts targeted towards residential customers, retail outlets, restaurants, commercial and industrial customers, new development and special interest groups.	Information provided to residential customers based on reply card requests, hotline requests, water bill messages and direct mailing of City publications including the Annual Consumer Confidence Report and the Milpitas Yellow Pages. Information is also provided at City sponsored events. The Fire Department Inspectors distribute outreach materials at the time of inspection. Construction BMPs are provided to contractors and developers by the Building Division. The Milpitas Stormwater C.3 Guidebook was distributed to developers on as needed basis. The guidebook is also available on City website.	Ongoing	Utility Engineering (Vency Woo)

Implem. Id.	Activity	Item Source	Tasks Identified in FY 2008-2009 Work Plan	Status / Comments	Due Date (mo/yr)	Responsible Party (Lead)/ Coordinator
				A letter was sent to all developers and contractors in September notifying them about measures to be taken to prevent sediment erosion into storm drains prior to the rainy season. *Keep Your Pool, Spa and Fountain Copper Free* was distributed to all pool permit applicants.		
I-3	School Education General Public Outreach	URMP Page I-5	Coordinate School volunteers for annual Creek Clean Up event, and Kids in Creeks event.	Staff coordinated the September 2008 Creek Clean Up Event. Volunteers from various schools removed a total of 1,820 pounds of debris and 430 pounds of recyclables from Coyote, Tularcitos, and Berryessa Creek. Approximately 270 students from Burnett Elementary School participated in "Kids in Creeks," a hands-on program where kids perform water quality tests in Berryessa Creek.	Ongoing	Public Works (Steve Smith)/Utility Engineering (Vency Woo)
I-4	Citizen Participation (General Public)	URMP Page I-5	Coordinate for more citizen involvement on City events such as Creek Clean Up and Household Hazardous Waste Collection, and Global Village.	Recruited volunteers using developed contact list. Coordinated with schools for volunteers for Creek Clean Up event and Make A Difference Day. Volunteers in large numbers joined in the Creek Clean Up events at Coyote, Tularcitos, and Berryessa Creeks. The June 2009 HHW event was promoted to Milpitas residents through newspaper advertisements, public service announcement, web advertisements and a citywide distribution of a door hanger.	Ongoing	Utility Engineering (Vency Woo)
I-5	Training (Municipal Employee)	URMP Page I-5	Continue employees yearly training on runoff pollution prevention. Maintain employee's awareness through workshops, newsletters and meetings.	Employees attended a variety of workshops. See Staff Training Table for more details.	Ongoing	Utility Engineering (Vency Woo)

Implem. Id.	Activity	Item Source	Tasks Identified in FY 2008-2009 Work Plan	Status / Comments	Due Date (mo/yr)	Responsible Party (Lead)/ Coordinator
I-6	Integrated Pest Management`	URMP Page I-6	Develop partnership with local hardware stores to education staff & public on less toxic choices.	IPM information is available on our website. Public Service Announcements were aired on 1620 AM and CTV 15 and CTV 26.	Ongoing	Utility Engineering (Vency Woo)
I-7	Watershed Education and Outreach	URMP Page I-6	Materials to be distributed as necessary. Pollution prevention videos to be shown on local TV channel.	Milpitas helped staff Watershed Watch outreach events whenever possible.	Ongoing	Utility Engineering (Vency Woo)
I-8	Effectiveness Evaluation	URMP Page I-6	Develop an evaluation procedure to gauge public (contractors, developers) knowledge of program goals, and effectiveness of PIP activities.	See Evaluation text.	Ongoing	Utility Engineering (Vency Woo)

Evaluation of Public Information / Participation Program Effectiveness

The City measures its outreach effectiveness by the number of outreach activities performed, the quality and quantity of materials distributed, and level of business and citizen participation in city sponsored special events.

In fiscal year 08/09, staff continued to distribute BMP guidelines to residents, developers and contractors during project planning and construction. In addition, staff performed outreach activities by means of direct mailings (such as Annual Recycling Residential Newsletter and Annual Consumer Confidence Report), literature distribution at City owned facilities, announcements through city media such as the City website, television, and placing periodic advertisements in the Milpitas Yellow Pages, Milpitas City Information Guide, and the Milpitas Post, (a local newspaper published weekly). As a result, we continued to receive a high number of literature request forms and hotline phone calls.

City sponsored events such as the Family Day, the Milpitas Art & Wine Festival, the Annual Creek Clean Up event, field trip and the County Household Hazardous Waste drop off event continued to draw exceptional public participation and were excellent opportunities to educate and interact with a large number of residents.

The Kids in Creeks program was offered to MUSD science specialists. The program provides tours of Berryessa Creek. Materials to test water samples, check water flow rates and learn about wildlife are provided by the City.

Summary of Evaluation of Public Information / Participation Program Effectiveness

Activity	Type of Outreach	Level of Implementation	Evaluation of Effectiveness
1. City facility literature distribution	General	Clean It, Grow It, Home Maintenance Tips, Keep Your Pool, Spa and Fountain Copper-free, Help Prevent Pollution of Our Creeks and Bay, Pests Bugging You, and Keeping it All in Tune	➢ 100 of each of these brochures were distributed at City facilities: City Hall, Senior Center, Community Center, Sports Center, Library, Police Department, and Fire Department. ➢ Materials available to all permanent and temporary municipal employees.
2. City Cable TV Channel 15 and 26 and Radio 1620 AM	General	Aired public service announcements on the City's Cable TV (CTV 15 and CTV 26). Topics covered include: Mercury, IPM, Copper, HHW Recycling, Car Care Tips, and Volunteer Opportunities.	➢ 10,000 households subscribe to CTV 15 and CTV 26. Each TV PSA aired an average of 30 times per day. Announcements are periodically revised throughout the year. ➢ This year we continued airing pollution prevention videos. 15-30 second spots run in normal rotation at a frequency of 30x/day. The 10-15 minute videos air daily.
3. City of Milpitas Web site	General	Provide information on Urban Runoff, pollution prevention tips and programs	➢ The website was updated in 08/09 to include information about retail outlets accepting motor oils, safe disposal for sharps & medicines, e-waste recycling centers, bottles & cans recycling center, curbside recycling with HHW referrals. This website is accessible to all City

Activity	Type of Outreach	Level of Implementation	Evaluation of Effectiveness
			employees and 69,000 Milpitas residents as well as the general public. Information is made available throughout the year.
4. City sponsored events	General	Literature distribution and promotional products; pencils, decal calendars, sponges as well as educational displays	➢ Milpitas attended the following events, staffed the URO diorama exhibit & distribute SCVURPPP materials; Celebrate Milpitas on August 16 & 17; Spooktacular on October 25; and Family Day on May 16.
5. Welcome to Milpitas-City of Milpitas City Information Catalog/ Magazine	General	Pollution Prevention Tips	➢ Placed advertisements in the Welcome to Milpitas (City Information Magazine) promoting proper disposal of fluorescent light bulbs.
6. Urban Runoff Hotline	General	Maintain hotline # (408) 586-2605 to provide pollution prevention tips and receive request for information.	➢ Staff checked the hotline periodically and responded to questions and literature requests immediately.
7. Newsletters and Newspapers	General	Milpitas Post (A local newspaper published weekly), provide advertisements on special topic issues-automotive care, home repair, gardening, street sweeping etc.	➢ Advertisements were placed in the Milpitas Post announcing volunteer opportunities and special events such as Pollution Prevention Week, and the HHW drop off event. All advertisements included pollution prevention messages. ➢ Placed advertisements in the Milpitas Yellow Pages promoting proper disposal of fluorescent light bulbs.
8. Coordinate National Pollution Prevention Week	General	Distribute literature to the general public, display pollution prevention messages on City's web page, school outreach, residential door-hangers.	➢ Aired public service announcements on the City's cable television and radio stations. ➢ Placed advertisements in the local newspaper. ➢ Distributed a door hanger containing pollution prevention messages with focus on litter prevention and recycling of mercury containing products, pesticides and other HHW items.
9. Solid Waste Activities	General	Joint effort with Solid Waste (Household Hazardous Waste Programs), messages in newsletters, etc.	➢ Combined outreach efforts with other departments whenever possible
10. Outreach Distribution	General	Use of reply card on Annual Consumer Confidence Report for residential customers, distribute BMP material and stormwater pollution prevention material to City owned facilities,	➢ The City received approximately 50 reply cards or information request forms. All calls and information request were answered expeditiously.

Activity	Type of Outreach	Level of Implementation	Evaluation of Effectiveness
		place and distribute BMP materials at Household Hazardous Waste Collection Event and the Pollution Prevention Week events.	
11. Residential	Targeted	Mass mailings, City sponsored events	➢ The City's Annual Consumer Confidence Report, including pollution prevention articles and a brochure request from, was mailed to all postal accounts in the City. ➢ Single Family residents were again advised to keep leaves out of the storm drains during fall season via mail in October 2008. ➢ Residents were mailed a newsletter in May 2009, which contained messages: about used motor oil, brake and anti-freeze recycling, both curbside and referrals to local certified businesses; help keep street and the Bay clean; use the Yard Trimming Recycling Program to keep tree and brush debris of storm drains etc.
12. Retail Outlets	Targeted	Regional IPM Store Partnership Program	➢ The local Orchard Supply Hardware Store is participating in the IPM store partnership program. IPM brochures are available in a brochure rack.
13. Commercial/ Industrial Customers	Targeted	Target mailings to vehicle service shops, restaurants etc.	➢ Information was provided on request, during inspections or on as-needed basis. ➢ Hazardous Materials inspectors distribute information in the field.
14. Special Interest Groups	Targeted	Provide information on request to target groups (garden clubs, auto enthusiasts, pool owners, handymen, construction workers, etc.)	➢ Information was provided on request, during inspections or on as-needed basis. ➢ Mailed Rainy Season letter to developers. ➢ Keep your Pool, Spa, or Fountain Copper-Free was distributed to all pool permit applicants.
15. Industrial / Commercial Discharges	Targeted	'Industrial BMPs', 'Mobile Cleaner BMPs', 'Preventing Storm Drain Pollution' and other program material	➢ Information was provided on request, during inspections or on as-needed basis.
16. New Development and Construction	Targeted	'Blueprint for a Clean Bay', 'BASMAA Recyclers and Disposal Services', 'BMPs for the construction industry (8 pamphlets)	➢ Information was provided on request, during inspections or on as-needed basis. ➢ The Milpitas Stormwater C.3 guidebook was distributed to developers as needed. It is also located on the City's website. ➢ Distributed a 24X36 blueprint with construction BMPs with all public and private project applications.
17. Illicit connection and illegal dumping	Targeted	IC/ID cards to be distributed to industrial and commercial facilities	➢ Information was provided on request, during inspections or on as-needed basis

Activity	Type of Outreach	Level of Implementation	Evaluation of Effectiveness
elimination			
18. Pesticide Discharges	Targeted	Training programs for municipal employees, public education and outreach programs for residential and commercial pesticide users and pest control operators	➢ IPM messages were placed on our website, Radio and CTV. ➢ See Staff Training Table. ➢ IPM articles were placed in various newsletters and newspapers. See numbers 5 and 8 above.
19. Municipal Employee Training	Targeted	Continue employee yearly training on runoff pollution prevention. Maintain Employee awareness through workshops, newsletters and meetings	➢ See Staff Training Table at the end of this Report.
20. School outreach program	Educational	Involve schools in creek clean up event and the Kids in Creeks education program; stipends to encourage teacher participation in Watershed Education Workshops	➢ 270 students participated in the Kids in Creeks program and were escorted on field trips to Berryessa creek where they performed water quality tests. ➢ Volunteers from various schools participated in the annual Creek Clean Up event. A total of 1,820 pound of debris and 430 pound of recyclables were removed from Coyote, Tularcitos, and Berryessa Creek.
21. Coordinate creek clean up and Household Hazardous Waste disposal events	General	Advertise in Milpitas Post, schools, jointly with Santa Clara Valley Water District Coordinate for more citizen involvement on City events	➢ Articles were placed in the Milpitas Post. The event announcements also received priority placement on our website.
22. Watershed outreach and education	Watershed Outreach and Education	Materials will be distributed as necessary	➢ The City's website contains a link to the Watershed Watch website. ➢ The City of Milpitas helped staff Watershed Watch outreach events whenever possible.

There were no specific comments from Regional Board on the Milpitas FY 05-06, FY 06-07 or FY 07-08 Annual Reports. The Regional Board has not issued comments on the FY 06-07, FY 07-08, FY 08-09 or FY 09-10 Work Plans.

Evaluation – Pest Management

In FY 08-09 the City addressed pest management issues with an integrated approach. Pesticide use was incorporated as one management tool along with the application of cultural and mechanical control practices.

City staff licensed by the State as pesticide applicators have applied pesticides for the control of weeds and insects in landscaped areas around city buildings, in parks, in street medians, right-of-way areas, and in city street trees.

The City operates a Dog Park on leased land within Ed Levin County Park. The lease prohibits the use of pesticides and herbicides.

There were no specific comments from the Regional Board on the Milpitas FY 05-06, FY 06-07 or 07-08 Annual Reports. The Regional Board has not issued comments on the FY 06-07, FY 07-08, FY 08-09 or FY 09-10 Work Plans.

Mercury Management Activities – Self Evaluation Matrix

Implem. Id.	Activity	Item Source	Tasks Identified in FY 2008-2009 Work Plan	Status / Comments	Due Date (mo/yr)	Responsible Party (Lead)/ Coordinator
L-2 Mercury Management						
L-2 I.A	Survey	URMP L-2 Exhibit 'a', pg 1	Develop a process to survey the types of mercury-containing products used by the municipalities. Identify appropriate municipal personnel to conduct survey. For those products with a potential to enter stormwater runoff, identify possible alternatives or proper disposal procedures.	The surveys were completed and results were collected in February 2003.	Completed	PW Maint Loredo/ Marilyn Nickel
L-2 I.B	Survey	URMP L-2 Exhibit 'a', pg 1	Complete and report results of survey of mercury-containing products used by the municipalities.	The surveys were completed and results were collected in February 2003.	Completed	PW Maint Loredo/ Marilyn Nickel
L-2 I.C	Mercury Policy	URMP L-2 Exhibit 'a', pg 1	Develop guidelines for mercury policy requiring the virtual elimination of mercury from controllable sources in urban runoff from agency operations.	Final draft of model policy was approved in April 2003.	Completed	PW Maint Loredo/ Marilyn Nickel
L-2 I.D	Mercury Policy	URMP L-2 Exhibit 'a', pg 1	Adopt a mercury policy or ordinance requiring the virtual elimination of mercury from controllable sources in urban runoff from agency operations.	Final draft of model policy was approved in April 2003.	Completed	PW Maint Loredo/ Marilyn Nickel
L-2 I.E	Guidelines	URMP L-2 Exhibit 'a', pg 2	Develop guidelines for mercury-containing products reduction and management. These guidelines will include a schedule for the timely phase-out of mercury-containing products identified for virtual elimination as well as reporting requirements, possibly to track recycling, replacement, and reduction in use of mercury-containing products.	Final draft of guidelines was submitted in March 2003.	Completed	PW Maint Loredo/ Marilyn Nickel
L-2 I.F	Guidelines	URMP L-2 Exhibit 'a', pg 2	Implement guidelines developed under Action I.E	Staff followed mercury disposal guidelines.	Ongoing	PW Maint Loredo/ Marilyn Nickel
L-2 II.A	Technical assistance to HHW	URMP L-2	Assist HHW collection agencies with preparation of a technical memorandum	Coordinated with County HHW Program and completed the technical memorandum	Completed	Util Engr Marilyn

Implem. Id.	Activity	Item Source	Tasks Identified in FY 2008-2009 Work Plan	Status / Comments	Due Date (mo/yr)	Responsible Party (Lead)/ Coordinator
	for Mercury disposal	Exhibit 'a', pg 2	summarizing infrastructure and budgetary concerns regarding the anticipated increase in fluorescent bulbs and other mercury-containing products to be recycled.	in June 2002.		Nickel
L-2 II.B	Mercury disposal service	URMP L-2 Exhibit 'a', pg 2	Ensure that adequate funding mechanisms exist to maintain mercury-containing product disposal services for residents and small businesses.	Financially supported the County HHW program via agreement.	Ongoing	Util Engr Marilyn Nickel
L-2 II.C	Guidelines	URMP L-2 Exhibit 'a', pg 3	Develop guidelines for documenting and reporting quantities of mercury-containing products disposed of by city.	Final draft of the guidelines was completed in March 2003.	Completed	Util Engr Marilyn Nickel
L-2 II.D	Guidelines	URMP L-2 Exhibit 'a', pg 3	Implement guidelines developed under Action II.C	Followed procedures.	Ongoing	Util Engr Marilyn Nickel
L-2 II.E	Grant Proposal	URMP L-2 Exhibit 'a', pg 3	Assist HHW collection agencies in developing a Prop 13 Program grant proposal for a HHW fluorescent light recycling program (Action II.F).	The work was completed in prior years. The grant proposal was submitted in February 2002. However, the proposal was not selected to receive grant funding. A grant proposal was submitted for 2003 funding and was approved in September 2003.	Completed Ongoing	Util Engr Marilyn Nickel
L-2 II.F	Outreach	URMP L-2 Exhibit 'a', pg 3	Work with HHW collection agencies to develop and help publicize fluorescent light recycling program.	Continued to support outreach program. Materials were developed and distributed.	Completed Ongoing	Util Engr Marilyn Nickel
L-2 III.A	Regional Monitoring Program	URMP L-2 Exhibit 'a', pg 4	Continue financial support of the Regional Monitoring Program (RMP), including the Mercury Deposition Network Pilot Study. Continue to actively participate in the RMP steering committee and technical review committee. • Supported completion of the San Francisco Bay Atmospheric Deposition	Provided support as necessary.	Ongoing Submitted 8/01	Util Engr Marilyn Nickel

Implem. Id.	Activity	Item Source	Tasks Identified in FY 2008-2009 Work Plan	Status / Comments	Due Date (mo/yr)	Responsible Party (Lead)/ Coordinator
			Pilot Study Part 1: Mercury • The City of San Jose will continue to provide in-kind services for the maintenance of the Mercury Deposition Network site near San Jose.		Ongoing	
L-2 III.B	Mercury TMDL	URMP L-2 Exhibit 'a', pg 4	Provide financial and staff support for a coordinated regional plan to collect data for the mercury TMDL.	Provided staff support to the SCVURPPP program on the TMDL effort.	Ongoing As needed	Util Engr Marilyn Nickel
L-2 III.C	Urban Sources of Mercury	URMP L-2 Exhibit 'a', pg 4 & 5	Continue financial support for the Joint stormwater Agency Project to study Urban Sources of Mercury. • Completed the Work Plan Joint Stormwater Agency Project – Year Two Investigation of Urban Sources of Mercury, PCBs and Organochlorine Pesticides • Preparing the Joint Stormwater Agency Project to Study Urban Sources of Mercury, PCBs and Organochlorine Pesticides - Year Two Report	Provided support to the SCVURPPP program.	Completed	Util Engr Marilyn Nickel
L-2 III.D	5-Year monitoring Program	URMP L-2 Exhibit 'a', pg 5	Develop and implement a five-year program of monitoring efforts	Provided support to the SCVURPPP program. Attended the Ad Hoc Monitoring Committee meetings.	Completed	Util Engr Marilyn Nickel
L-2 IV.A	BASMAA	URMP L-2 Exhibit 'a', pg 5	Participate in the BASMAA efforts.	Provided support to the SCVURPPP program.	Ongoing	Util Engr Marilyn Nickel
L-2 IV.B	WMI TMDL	URMP L-2 Exhibit 'a', pg 6	Collaborate in technical studies to support TMDL development and implementation including the WMI Guadalupe River Mercury TMDL Workgroup.	Provided support to the SCVURPPP program.	Ongoing	Util Engr Marilyn Nickel
L-2 IV.C	WMI Watershed Action Plan	URMP L-2 Exhibit 'a', pg 6	Support and participate in development of the WMI Watershed Action Plan.	The final WMI Watershed Action Plan was approved in August 2003. No further actions needed.	Completed	Util Engr Marilyn Nickel

Implem. Id.	Activity	Item Source	Tasks Identified in FY 2008-2009 Work Plan	Status / Comments	Due Date (mo/yr)	Responsible Party (Lead)/ Coordinator
L-2 IV.D	Draft Mercury Plan	URMP L-2 Exhibit 'a', pg 6	Submit the SCVURPPP draft Mercury Pollution Prevention Plan to the WMI to ensure that efforts are coordinated.	The final Mercury Pollution Prevention Plan was submitted in July 2002. No further actions needed.	Completed	Util Engr Marilyn Nickel
L-2 IV.E	Regional Collaboration	URMP L-2 Exhibit 'a', pg 6	Support, participate in, and advocate increased regional collaboration with the RWQCB and BAAQMD.	Provided support to the SCVURPPP program.	Ongoing As needed	Util Engr Marilyn Nickel
L-2 IV.F	Vision 2020 Lighting Technology Roadmap	URMP L-2 Exhibit 'a', pg 6	Support and track progress of the US dept of Energy Vision 2020 Lighting Technology Roadmap.	Provided support to the SCVURPPP program as needed.	As needed	Util Engr Marilyn Nickel
L-2 V.A	Outreach	URMP L-2 Exhibit 'a', pg 7	Develop various outreach programs to educate target audiences about proper disposal of mercury-containing products and alternative non-mercury containing products. Outreach programs will include, but may not be limited to, the following: • Develop and begin to implement a fluorescent light recycling outreach program to educate residential users and encourage proper disposal of fluorescent lights. • Develop and begin to implement a fluorescent light recycling outreach program to educate small businesses and conditionally exempt small quantity generators and encourage proper disposal of fluorescent lights. (For example, the small business outreach program might include coordination with local chapters of the Building Owners and Managers Association [BOMA] or the National Association of Industrial and Office Properties [NAIOP]). • Coordinate with municipal inspectors	See PIP Table for outreach efforts.	Ongoing Ongoing Ongoing	Util Engr Stobbe/ Marilyn Nickel

Implem. Id.	Activity	Item Source	Tasks Identified in FY 2008-2009 Work Plan	Status / Comments	Due Date (mo/yr)	Responsible Party (Lead)/ Coordinator
			to integrate mercury outreach to industrial businesses into their existing routine pretreatment, source control, and/or hazardous materials inspection processes. • Develop and distribute "tailgate safety meeting cards" about mercury to inspectors and other municipal employees. (The Program will first review the product developed by the Fairfield-Suisin Sewer District when it is made available to the Bay Area Pollution Prevention Group [BAPPG]).			
L-2 V.B	Outreach	URMP L-2 Exhibit 'a', pg 8	Develop or adapt existing mercury outreach materials.	Provided support to the program as needed.	As needed	Util Engr Stobbe/ Marilyn Nickel
L-2 V.C	Community events	URMP L-2 Exhibit 'a', pg 8	Attend community events and distribute outreach materials.	Provided support to the program as needed	As needed	Util Engr Stobbe/ Marilyn Nickel

Trash Inventory and Management – Self-Evaluation Matrix

Implem. Id.	Activity	Item Source	Tasks Identified in FY 2008-2009 Work Plan	Status / Comments	Due Date (mo/yr)	Responsible Party (Lead)/ Coordinator
T-1	Revise and document existing trash problem areas list	URMP L-5 Page 1	Annually revise trash problem areas list on an as-needed basis. Revisions should be based on trash problem areas surveys and other relevant information.	Staff in Utility Engineering works with Public Works Dept., Neighborhood Services, and Solid Waste Sections to update and maintain a list of trash problem areas in the City. The 12 trash problem areas were inspected in 08-09 and were evaluated and reported to SCVURPPP in June 2009. As new information becomes available, staff will add to the list of trash problem areas.	Ongoing	David Gordillo, Steve Smith (Public Works), Ralph Campa (Allied Waste), Gloria Anaya (Neighborhood Services), Paramjit Uppal (Utility Engineering)
T-2	Trash evaluations using RWQCB tools	URMP L-5 Page 1	Conduct trash evaluations using RWQCB's Rapid Trash Assessment protocol (Version 1.0) and/or the KAB litter index in a subset of trash problem areas	Staff evaluated 12 trash problem areas using the KAB Litter Index. Results were submitted to SCVURPP in June 2009.	Ongoing	Dave Gordillo, Steve Smith (Public Works), Paramjit Uppal (Utility Engineering)
T-3	Identify and prioritize trash problem areas and sources	URMP L-5 Page 1	Continue identifying and prioritizing trash problem areas in urban streams and waterways and other potential sources that may contribute trash to those areas.	No new trash problem areas were identified in FY 08-09. Previously, staff has submitted information on the trash problem areas to SCVURPP. The Program has documented and converted the locations into spatial coordinates using a GIS. Maps were generated showing the distribution of trash problem areas across major Santa Clara Basin Watersheds. Utility Engineering staff is working with Public Works, Solid Waste and Neighborhood Services to continue to identify high priority trash problem areas.	Ongoing	Dave Gordillo, Steve Smith (Public Works), Ralph Campa (Allied Waste), Gloria Anaya (Neighborhood Services), Paramjit Uppal (Utility Engineering)

Implem. Id.	Activity	Item Source	Tasks Identified in FY 2008-2009 Work Plan	Status / Comments	Due Date (mo/yr)	Responsible Party (Lead)/ Coordinator
T-4	Identify and implement potential control measures	URMP L-5 Page 2	Continue identifying and implementing trash control measures, where practical and feasible, to reduce trash.	Staff is continuing identification efforts and is implementing control measures.	Ongoing	David Gordillo, Steve Smith (Public Works), Leslie Stobbe (Solid Waste), Gloria Anaya (Neighborhood Services), Paramjit Uppal (Utility Engineering)
T-5	Standardized Reporting on trash management practices	URMP L-5 Page 2	Provide specific information on trash management practices implemented within the City, using standardized reporting format (to be used for program-wide reporting)	Staff in Public Works, Neighborhood Services, and Solid Waste Sections maintains their own record system that enables them to track trash problems throughout the City.	Ongoing	David Gordillo, Steve Smith (Public Works), Leslie Stobbe (Solid Waste), Gloria Anaya (Neighborhood Services), Paramjit Uppal (Utility Engineering)
T-6	Develop long-term strategy	URMP L-5 Page 2	Assist Program staff in developing an effective strategy for reducing trash conditions in urban streams and waterways.	Staff continued to work with the SCVURPPP Program to develop an effective strategy.	Ongoing	David Gordillo, Steve Smith (Public Works), Leslie Stobbe (Solid Waste), Gloria Anaya (Neighborhood Services), Paramjit Uppal (Utility Engineering)

Evaluation – Trash Inventory and Management

This year, City of Milpitas continued the trash management activities developed in previous years. The City identified 12 trash problem areas in FY 03-04 by conducting the Identification and Documentation of Known Trash Problem Areas Survey for problem areas in creeks, streets, parks and other land uses within urban areas. Data sources included trash complaint databases, maintenance and operation records, and existing lists of trash hot spots, employees' knowledge, and creek clean-up locations. The Program mapped these locations into GIS to facilitate future evaluations.

In June 2009, Utility Engineering staff visited the 12 identified trash problem areas to assess the current status and extent of the problem. Staff used the Keep America Beautiful (KAB) Litter Index tool kit survey and checklists, including the Windshield Survey, the Trash Item Tally Worksheet, and Neighborhood Spotters Checklist to characterize the quality and quantity of trash. Four sites had KAB Index ratings of 1 (no litter), four sites had ratings between 1 and 2 (less than slightly littered), three sites had ratings between 2 and 3 (less than littered) and one site reached the top level of 4 (extremely littered).

City of Milpitas trash reduction and abatement programs and services are effectively controlling trash. City services include:

- unlimited trash collection for single family residents,
- single-stream curbside recycling and no-cost recycling for businesses,
- neighborhood clean-up events each spring and summer,
- free disposal of household items, remodeling debris, yard trims at Newby Island landfill;
- free household hazardous waste collection program;
- biweekly street sweeping;
- annual volunteer creek clean-up events;

City programs include:

- Utility Engineering - solid waste and yard waste recycling public outreach including annual promotional campaigns and school projects
- Public Works - litter control in parks, streets and right-of-way, landscaped areas, storm drain and catch basin cleaning,
- Planning - incentive programs such as the Annual Neighborhood Beautification Awards Program for residential and non-residential properties,
- Police - Abandoned Vehicle Abatement Program.
- Code enforcement - response to private property trash complaints,

The City values its neighborhood beautification efforts for their positive impacts on quality of life for the residents will continue its trash abatement efforts in the future.

There were no specific comments from Regional Board on the Milpitas FY 05-06 or FY 06-07 Annual Reports. The Regional Board has not issued comments on the FY 06-07, FY 07-08 or FY 08-09 Work Plans.

WEST VALLEY CLEAN WATER PROGRAM

September 15, 2009

Mr. Bruce Wolfe
Regional Water Quality Control Board
San Francisco Bay Region
1515 Clay St., Suite 1400
Oakland, CA 94612

Subject: FY2008-2009 Annual Report for
West Valley Communities Urban Runoff Management Program

Dear Mr. Wolfe:

This report is submitted by the West Valley Cities of Campbell, Monte Sereno, Saratoga, and the Town of Los Gatos, in conjunction with the Santa Clara Valley Urban Runoff Pollution Prevention Program's Annual Report, pursuant to provision C.6.a. of the Program's reissued municipal storm water NPDES Permit (Order No. 01-024). The report summarizes activities performed during FY2008-2009 in accordance with the West Valley Communities' Urban Runoff Management Plan (URMP) submitted to the Regional Board on September 1, 2004 and the performance standards contained therein.

Contents of Report

The goals of this Annual Report are to: 1) concisely document implementation of URMP and FY08-09 Workplan; 2) evaluate program results for continuous improvement; 3) comply with permit requirements; and 4) share this information with other Co-permittees, municipal decision-makers, and the public. This report includes the following sections:

I. Preface
   - Table of Contents
   - Transmittal Letter with Program Highlights
   - Certification Statement
   - List of Acronyms

II. Program Elements
   1. IC/ID Elimination Activities
   2. Industrial / Commercial Discharger Control Program
   3. Public Agency Activities
      - Storm Drain O & M
      - Street Sweeping
      - Corporation Yard
      - Rural Public Works
   4. New Development: Planning Procedures
   5. Construction Inspection
   6. Public Information & Participation
   7. Pesticide Management Activities
   8. Mercury Pollution Prevention Activities
   9. Copper Action Plan / Nickel Action Plan
   10. Trash Inventory and Management
   11. Water Quality Monitoring and Watershed Management

   Training Summaries are provided at the end of each element

PROGRAM HIGHLIGHTS AND ACCOMPLISHMENTS

During FY08-09, the West Valley Communities of Campbell, Los Gatos, Monte Sereno, and Saratoga continued efforts to implement their URMP to the maximum extent practicable. The West Valley Communities also continue to benefit from its collaborative efforts through West Valley Clean Water Program (WV CWP).

- WV CWP continues to receive annual requests for in-class stormwater pollution prevention presentations with its 3-D interactive 'Enviroscape' model. In addition to school presentations, this year WV CWP was invited to the Audubon Society's Annual Event, and was a big hit among both children and adults, where more than 70 people stopped to listen, play and learn ways they can help prevent stormwater pollution.
- WV CWP's Seed Packet Distribution – specifically five varieties of CA native plants which attract *beneficial bugs* listed in '10 Most Wanted: Beneficial Bug Brochure,' turned out to be a big hit. Because these particular seeds are available for purchase only in, WV CWP purchased the loose seeds, designed labels, and engaged Sierra Club volunteers to assemble seed packets. Packets were attached to the Beneficial Bug Brochures, as well as other IPM handout materials, and distributed to students at the Enviroscape presentation, through gardening classes, at a local garden center, and given to participants in creek clean up, Arbor Day and Earth Day events. Availability of seeds was also published in four City Newsletters, generating many phone and email requests from residents. Over 600 packets were distributed in less than 3 months!
- WV Communities and WV CWP hosted six clean up events, which were well attended. Three events were conducted in conjunction with well advertised national and international namesakes – International Coastal Clean-up Day, National Rivers Clean-up and Great American Litter Pick Up (GAPU), and benefitted from collaborative event advertising. WV CWP also helped secure donations from local retailers to provide Coastal Clean-up and Rivers Day Clean-up supplies and volunteer appreciation give-away items for events held in Santa Clara County.
- WV CWP responded to and followed through to resolution over 50 phone, email and inter-agency referrals for discharge incidents. Facilities which have and incident reported or an inter-agency stormwater inspection referral (SCC FD, SCC DEH, and SJ POTW/FOG programs) are placed upon a pro-active inspection list, and re-inspected within the next year.
- WV CWP continued to support SCVURPPP's Green Gardener program, promote classes and was instrumental in providing information for local newspaper coverage of recent Green Gardener Graduates working within the WV Communities.

The West Valley Communities remain committed to a watershed approach for preventing urban runoff pollution. Through the WV CWP, the WV Communities actively participate in SCVURPPP's many task groups, including Watershed Education and Outreach (WEO), C3PO and Trash Task Groups. WV CWP also participated in the SCB WMI's Trash Summit, held last October. Finally, the proposed MRP continues as a topic of discussion and staff participates in SCVURPPP update meetings regarding MRP.

Thank you in advance for your review of this Annual Report. Should there be any questions regarding the materials submitted, please contact me at (408) 354-4734.

Respectfully,

Kelly Carroll

IC/ID Program Evaluation

IC/ID Training

The multiple trainings that the WVCWP staff, and the municipal staff, attended have been quite effective in building relationships with the Fire Dept., DEH, and the Municipalities. Inspectors from the Fire Dept., DEH, and the Municipalities, continue to look for possible stormwater violations while they are on their field inspections. If the Inspectors from the Fire Dept., DEH, and the Municipalities, observe any potential stormwater violations they immediately contact the WVCWP Inspector. All interagency referrals are documented in the IC/ID reporting section.

IC/ID Program Background

Monte Sereno is a strictly residential city with about 3,700 residents. It covers 1.5 square miles and is surrounded by the Town of Los Gatos. The only non-residential sites in the City are a public elementary school and City Hall.

The IC/ID reports in the City are primarily related to new or re-development of single family homes and landscaping projects or pool discharges. The Construction Inspection Engineer note that developers and contractors are very eager to maintain a good reputation both with municipal staff and with the residents. If an incident occurs, it is often the result of an accident or it is related to a construction site. The City Engineering Inspector says that all it generally takes is one word

from municipal staff and the problem is addressed and resolved immediately.

Trend Analysis

In FY04-05 four (4) potential violations were investigated. Residential and construction sites were the incident sources for three (3) of the reported incidents. One (1) dumping report was not actually in the City's jurisdiction; it was trash noted on a median on Hwy 9, which is in Caltrans jurisdiction, although the City monitors the area because it does not have any other problem trash areas to address. The remaining three incidents were construction related. One involved a painter washing brushes where the runoff flowed to the street. Another was a result of pumping water from a hole dug for a swimming pool after it rained. Finally, a pile of dirt was left in the street during a landscaping job.

In FY05-06 the West Valley IC/ID inspector responded to eleven (11) reports of potential violations in Monte Sereno. Six (6) were considered non-incidents because one (1) was an allowable discharge and five (5) were complaints not found (although one of those was categorized as a miscellaneous incident). One miscellaneous incident was due to a broken sprinkler, which was fixed immediately. Finally the four violations that were given a verbal notice were, two (2) grey water discharges, one (1) landscape material dumping; and one (1) tracking soil discharge.

In FY06-07 the West Valley IC/ID inspector responded to five (5) reports of potential violations in Monte Sereno, of which, two (2) were considered non-incidents as they were proactive inspections where no violations were observed. Of the three remaining incidents, two active incidents were stopped and given verbal notices. For the other incident, the source could not be determined. All proactive inspections included outreach which WVCWP counts as verbal notice.

In FY07-08 the West Valley IC/ID inspector responded to seven (7) reports of potential violations in Monte Sereno. Three (3) of these were Residential, three (3) Construction Site, and one (1) Public Facility. The West valley inspector provided outreach and educational materials during each of the 7 incident responses.

Under the heading Incident Status one (1) remains open to be resolved in FY08-09. This incident, which was a house remodel project, has been resolved by the time of this report, July 2008.

In FY08-09 the West Valley IC/ID inspector responded to nine (9) reports of potential violations in Monte Sereno. Four (4) of these were Residential, one (1) Public Facility/Utility, and Two (2) other or unknown sources. The West valley inspector provided outreach and educational materials during each of the 9 incident responses.
*Note
The West Valley Clean Water Program only gave completely new incidents ICID numbers, therefore, follow-up inspections to original ICID's were not given new ICID numbers. This is the reason for the dramatic decline in ICID's for FY08-09.

ICID Date	Contact Name (Resp Party)	Facility Address	ICID Incident Report Source (Origin)	ICID Incident Source	ICID Incident Type	ICID Enforcement Action	Findings (Comments)	Status	Compliance Date
9/9/2008		15200 Villa Pinto, Monte Sereno	Citizen Complaints	Other/unknown	Misc. incidents	None	Re: Green algae in creek behind house.	Referred to Agency for Action	
12/11/2008		15116 Via Lomita, Monte Sereno	Citizen Complaints	Residential	Dewatering	Verbal Notice	12/11/08 3:30pm- Received call about large amounts of water being discharged from a residence. Talked with contractor. He was draining a Koi pond. He immediately stopped and hooked the house up to the sewer. Very cooperative. Took pics.	Incident - Resolved	12/11/2008
2/13/2009		End of Vineland Ave, Monte Sereno	Citizen Complaints	Other/unknown	Misc. incidents	Referral for Enforcement	2/13/09 Received call from resident re: runoff/erosion coming from Loma Serena Stables. Could not determine whether or not runoff/erosion was active because of private property. Referred to Monte Sereno to determine if action is necessary.	Incident - Resolved	3/16/2009
2/13/2009		18157 HWY 9, Monte Sereno	Interdepartmental	Residential	Tracking soil	Referral for Enforcement	2/13/09 WVCWP Manager reported dirt tracking on Hwy. 9 originating from the above address. WVCWP inspector went to the residence, nobody was home. Took pics. Referred to Monte Sereno to determine if action is necessary.	Referred to Agency for Action	
2/27/2009		15298 Via Palomino, Monte Sereno	Citizen Complaints	Other/unknown	Complaint not found	None	2/27/09 Responded to complaint, could not find address. Talked with Engineer at Monte Sereno. Address does not exist. Discovered complaint is actually the same location of ICID 23/0809 (refer back to ICID 23/0809 for more info)	Incident - Resolved	3/16/2009
3/17/2009		15195 Becky Lane	Interdepartmental	Residential	Pools/Spas/Fountains discharge	Warning Notice	3/17/2009 Responded to referral from WVSD. Pool water was being drained from 15195 Becky Ln. Took pics. Drove into driveway. Discharge suddenly stopped. Knocked on door, no answer. Looked around side of house, no answer. Left info/referred to MS.	Referred to Agency for Action	3/17/2009
4/20/2009		1830 Daves Ave., Monte Sereno	Citizen Complaints	Residential	Pools/Spas/Fountains discharge	Referral for Enforcement	4/20/09 Received call from City of Monte Sereno regarding a citizen complaint of water being discharged down Daves Ave., near Villa Caballero. WVCWP responded to call. Observed water being discharged from drain at 1830 Daves ave. took pics.	Referred to Agency for Action	
5/6/2009		16290 Oakhurst, Monte Sereno	Citizen Complaints	Residential	Misc. incidents	Referral for Enforcement	5/6/09 Received report from City of Monte Sereno Engineer Re: Complaint about a fence that was constructed across creek in two locations. Took pics. Fence may cause debris backup and cause erosion. City of Monte Sereno will send resident letter.	2nd Inspection Required	
5/20/2009		15162 & 15120 Alma Joe Ct., Monte Sereno	Citizen Complaints	Public facilities and Utilities	Misc. incidents	None	5/20/09 Received citizen call re: white substance in street. Talked with City of Monte Sereno Engineer, who also responded to the incident, he said it is the residue of the street base coming up through the cracks in the asphalt. Took pics	Referred to Agency for Action

Source	Task Source	FY08-09 Work Plan Tasks	FY 08-09 Accomplishments	Responsible Party
Storm Drain Operations and Maintenance				
	2004 URMP	Annual Storm Drain Cleaning Continue contract w/ WVSD. Continue schedule/cycle for inspection and cleaning of storm drain system.	WVSD performs systematic storm drain cleaning and inspection of storm drains annually. Because Monte Sereno is much smaller than the other 3 West Valley cities, and is strictly residential, all of the City's storm drain systems are inspected and cleaned each year (approximately 417 structures). The City's contractor will clean high leaf drop as called upon when needed.	City Manager & City Engineer to coordinate with WVSD per Agreement
	2004 URMP	Training - Annual WVSD/ Oper. & Maint. Meeting Annual WVSD & WVCWP / Operations & Maintenance. Supervisors meeting: evaluate status of annual storm drain cleaning and provide training on maintenance issues. Rural public works BMPs & SOPs may be reviewed as part of the annual WVCWP Street Maintenance Supervisors meeting.	The annual WV Storm Drain Op & Maintenance Supervisor's workshop was held on May 14th, 2009 at Campbell Community Center. See Training Table for staff attendance. Staff from WVSD, WVCWP, and the other WV Communities also participated. Topics included: • A speaker from the regional program presented on the current NPDES Permit requirements and BMP's, and the possible future requirements of the MRP. • A speaker from Toyota Materials Handling also presented on products which would help the municipalities reduce trash in downtown/high traffic areas. *Note The WVSD Storm Drain structure cleaning & debris findings for each city were presented at the June WVCWP meeting and will be used to help identify additional trash problem areas.	Mtg lead by WVSD; Attend by Pub Works Supt/Supvrs; Hosted by WVCWP City Engineer/Staff to attend
	C/I item -Source Control Measure	Storm Drain Stencils or Signage Continue to replace and/or upgrade storm drain stencils or signage on storm drains or catch basins, as needed. Stencils will be replaced with the type of stencil most appropriate for the location.	Monte Sereno's storm drain signage is replaced if it becomes worn, or bent (if it is metal). The City uses thermoplastic stencils on all curb-less inlets.	City Engineer

PUBLIC AGENCY ACTIVITIES: Operations and Maintenance

Monte Sereno

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2008-2009 ANNUAL REPORT

Street Sweeping/ Pavement Management				
	URMP - Street Sweeping	a. Street Sweeping Program Examine MRP to determine whether existing street sweeping schedule meets MRP requirements. Update sweeping contract as needed. High leaf drop and other noted areas cleaned more frequently and as needed (i.e., construction zones - swept by responsible party).	Monte Sereno hired a new sweeping contractor in FY07-08. The contracted street sweeper for the City of Monte Sereno uses a PM10-certified regenerative air sweeper to sweep Monte Sereno's residential streets quarterly. All residents and businesses are required to utilize large recycling bins for leaves and other yard waste as part of their trash collection service.	By Contract
		b. Street Sweeping Data Collection		
	NPDES Permit	b. Street Sweeping Data Collection Collect and review street sweeping data as required per the MRP; provide WVCWP with number of curb miles swept and cubic yards of debris collected. Solicit feedback from Sweeping contractor on effectiveness of program.	The City of Monte Sereno contracted with a new Street Sweeper during FY 07-08. Street sweeping data was collected from sweeping contractors and provided to the SCVURPPP at the end of the fiscal year. See three-year comparison table in the evaluation section (below), for curb miles swept, debris collected and yard waste recycled.	Contractor
		c. Street Sweeping Training		
	FY07-08 Work Plan, RWQCB comments	c. Training As needed for improvement and new requirements, provide training meetings for street sweeping contractor on required methods and equipment for sweeping. Provide instruction for data collection regarding street sweeping reporting.	Training for municipal staff on street sweeping data collection requirements and preferred sweeping methods, was provided at WVCWP's May 14th, 2009, Storm Drain Operation and Maintenance workshop. WVCWP Assistant informed, and provided additional Street Sweeping Data Collection Forms for the new contractor to the City of Monte Sereno's Engineer.	WVCWP to coord. w/City Engineer
Corporation Yard				
	URMP	a. SWPPP Review As needed, review and update the municipal Storm Water Management Pollution Protection Plan (SWPPP).	The City of Monte Sereno does not have a corporation yard. The City does not have any City-owned vehicles.	

	URMP	b. Staff Training Provide annual training on BMPs in Storm Water Pollution Prevention Plan w/ Corp-Yard walk-thru	The City of Monte Sereno does not have a corporation yard. The City does not have any City-owned vehicles.	

Public Agency Activities: Operations and Maintenance Evaluation

Storm Drain Maintenance In FY08-09, West Valley Sanitation District (WVSD) provided its fourth enhanced annual report to the cities on storm drain cleaning. Since June 2007 the reports have listed the structures that were inspected and cleaned with the maintenance crew's findings. A total of 417 structures were inspected.

- Of those inspected, 326 were found without any debris and were noted as "clean."
- Of those inspected, 91 had some visible debris upon inspection.
- Of the 91 storm drains that had visible debris, 5 required excessive/additional (50Lbs+) cleaning

Storm Drain Stencils: The engineering staff has continued to share feedback with the other WV cities regarding the most effective way to mark storm drain basins. All storm drain catch basins within Monte Sereno are appropriately signed for the inlet location. Because the number of storm drain inlets in Monte Sereno is small, the City was able to apply the more expensive thermoplastic stencils to all curbless drain inlets after a successful pilot was conducted. Thermoplastic signage was found to be more durable than painted stencils and it holds its color. Staff have also noted that thermoplastic stencils have endured a few years of street sweeping passes. The best feature of the thermoplastic stencils is that they are visible at night. The downside of using thermoplastic stencils is the cost (about $250 per stencil, installed) and they must be applied to a horizontal surface, preventing their visibility from a distance. Santa Clara County staff asked the WVCs for a recommendation on where to purchase metal plaques similar to those previously installed by the West Valley Cities. West Valley reported that municipal staff have discontinued application of the metal plaques because the sharp edges have a potential to get caught in street sweepers and bend, creating possible injury to pedestrians or bicyclists. Replacing the plaques was also a problem. When plaques came loose or were removed, concrete chunks crumbled from the curb with the screws (used for attaching the plaques) making replacement in the same spot impossible. If signage in Monte Sereno becomes worn, or bent (if it is metal), it is replaced with thermoplastic stencils or painted stencils depending on the location of the inlet.

Street Sweeping: The City collected **102.65** cubic yards of debris in FY08-09.

Yard Waste - Curbside Collection and Recycling: The West Valley yard waste recycling program reduces the amount of debris that gets into the storm drain, since leaves are collected in oversized bins rather than being stored in the street. In FY 08-09, the totals were given for all diverted waste. Totals for yard waste recycled were not provided.

Training Evaluation: The WVCWP Storm Drain Maintenance Workshop was held on 5/14/09 this year at the Campbell Community Center. Municipal staff generally felt that the Workshop helped them to understand the possible requirements of the future MRP. Municipal Staff also discussed the pros and cons of current BMP's and how they could address these issues in the future. It was evident that BMPs are being used by municipal staff but there was some frustration among street and park maintenance workers because they don't have enough authority to convince residents and private contractors to keep pollutants from reaching the storm drain system. The WVCWP Inspector offered his card to all attendees and requested that they report any incidents to him for immediate follow-

up. One challenge is to catch the violator in the act of allowing pollutants into the storm drain system. By the time the incident, or the result of the incident, is seen it is often too late to stop it. The maintenance crews are generally called to clean up spills. Attendees requested continued updates on the MRP requirements for storm drain maintenance and street sweeping practices. Several of the attendees stayed after the workshop for additional discussion among the cities.

Rural Public Works Activities

Rural Public Works Perf Std	Rural Public Works Perf Std	Performance Standards Implementation Evaluate the effectiveness of Rural Public Works BMPs used on applicable maintenance activities (if any) regarding: a) management and/or removal of large woody debris and live vegetation from stream channels; b) stream bank stabilization projects; c) road construction, maintenance, and repairs in rural areas to prevent and control road-related erosion; and d) environmental permitting for rural public works activities. Report on these activities in the Annual Rpt.	The model performance standard has been adopted. There were no rural public works projects (RPW) in FY 07-08. WVCWP staff developed a short PowerPoint presentation consisting of Rural Public Works (RPW) standards and BMPs for staff training. The presentation slides are sufficient at this time. The West Valley Cities have very few rural public works projects. If staff or municipal contractors begin to construct more RPW projects, WVCWP staff will take photographs of the sites and the BMPs to include in training presentations.	City Engineer
Training	FY07-08 Work Plan	Appropriate municipal staff or contracted staff will receive annual training on the use of current BMPs and SOPs, as noted in the performance standard. BMPs and SOPs may be reviewed as part of the annual WVCWP Street Maintenance Supervisors meeting.	WVCWP Assistant attended and reviewed the Rural Public Works standards at the annual Streets and Storm Drains Workshop June 20th, 2008. The WVCWP Assistant reported back to Monte Sereno's Engineer on June 25th, 2008. The City Engineer oversees all contracted rural public works and is knowledgeable about BMP's and erosion procedures for RPW; therefore, specific training on this topic was not conducted in FY07-08.	City Engineer

Rural Public Works Activities Program Evaluation

Stormwater BMPs are currently discussed in pre-construction meetings with contractors; the City inspects all contracted work for rural public works in its jurisdiction and ensures the use of stormwater quality and erosion control BMPs. The rural public works project (RPW), on Withey Rd in Monte Sereno, was contracted out to McKenna Landscaping. McKenna has been a contractor for the City of Monte Sereno for several years and is familiar with the City's stormwater requirements for RPW. The City Engineer was on-site to further discuss the stormwater BMPs and erosion control measures. The project consisted of replacing a small area of eroded soil under a pipe and covering the area with netting for vegetation. Erosion control and RPW BMPs were implemented.

	Provision C.3	Review the City's Urban Runoff Management Plan. Update contact information and responsible parties for standard operating procedures. Initiate updated SOP's to meet requirements in the Municipal Regional Permit. Participate in Provision C.3 Oversight Ad Hoc Task Group (C3PO AHTG) to stay updated on current issues, respond to Program or RWQCB requests, and exchange questions, ideas or experiences, related to C.3 implementation with other Co-permittees.	WVCWP Manager participated in the C3PO AHTG meetings in order to present summarized information at West Valley monthly meetings and encourage feedback, as appropriate, from West Valley Co-permittee's.	WVCWP Mgr, for City of Monte Sereno
	Municipal Regional Permit (MRP)	Provide municipal training as needed, to prepare for implementation of Municipal Regional Permit (MRP) requirements.	WVCWP Manager attends C3PO AHTG which addresses proposed MRP requirements. WVCWP manager attended MRP Workshop to discuss the proposed requirements and prepare for implementation in the Spring of 2009. WVCWP presented/discussed guidance from the regional SCVURPPP Program with municipal staff at WV meetings in FY08-09.	City Mgr/ WVCWP Mgr
C.3.c. Requirements for Group 1 and Group 2 Projects				
Devlopmt Project Implement-ation	C.3.c.	As appropriate, revise guidance, website, procedures, and/or conditions of approval to facilitate implementation of development project requirements per the MRP.	No actions taken at this time	City Mgr

		Municipal staff will receive training and/or attend Program workshops on applicable requirements for new development projects.	**Bioretention Sizing Methodology Mini-Workshop by SCVURPPP** Mountain View City Hall Plaza Conference Room February 4, 2009 **Hydromodification 101 workshop** May 19-20, 2009 **Sustainable Streets Workshop:** Using the San Mateo County Sustainable Green Streets and Parking Lots Design Guidebook Friday, May 29, 2009 **Annual C3 Workshop (SCVURPPP) "Stormwater Management for New and Redevelopment Projects: New Challenges, New Tools and New Ideas"** June 17, 2009	City Engineer; SCVURPPP or WVCWP to provide training
C.3.e Operation and Maintenance of Treatment BMPs				
BMP Inspection Program O&M Verification	Permit C.3.e.iii	Provide details of O&M verification program in each annual report. Note organizational structure, evaluation of effectiveness, and proposed improvements. List or summarize treatment BMPs inspected during the year, inspection results, and required follow-up through resolution.	The City has not had any Group 1 or Group 2 projects to inspect. However, Monte Sereno has implemented standard operating procedures for ongoing BMP O&M inspections. The procedures are documented in the City's URMP and were attached to the City's previous annual report	Engineering staff
Training & Evaluation	Work Plan	Training & Evaluation Continue to provide training to inspectors and data managers on O&M verification program requirements. Discuss evaluation of effectiveness and planned improvement to the program	Annual C3 Workshop (SCVURPPP) "Stormwater Management for New and Redevelopment Projects: New Challenges, New Tools and New Ideas" June 17th, 2009 WVCWP Inspector met with City of Monte Sereno Engineer in June 2009, and reported on O&M verification program requirements. See Also: Training Table below for list of Workshops, Training, seminars or meetings which municipal staff attended	WVCWP to coordinate training; City Mgr to inform City Engineer

PLANNING PROCEDURES
Monte Sereno
Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2008-2009 ANNUAL REPORT

C.3.f Hydromodification Management Plan				
HMP – Hydrograph Modification Mngmt Plan	C.3.f	City staff will continue to track HMP progress and implement its requirements as applicable for qualified Group 1 projects that may cause increased erosion or other related impacts.	There were no HMP-regulated projects in Monte Sereno in FY 08-09. Due to the nature of expected developments, the City does not expect many projects will be subject to these requirements over the next several years. However, with assistance from the WVCWP, City staff will continue to track regional implementation of the HMP.	City Engineer
		Implement any revisions to the HMP requirements per the Municipal Regional Permit, for applicable projects.	There were no HMP-regulated projects in Monte Sereno in FY 08-09.	City Engineer
Training		Continue to provide incremental training on HMP requirements to City staff after adoption of the MRP via SCVURPPP workshops and/or WVCWP in-house staff training.	To stay informed of the most recent HMP developments, the WVCWP Mgr participates in the C3PO AHTG meetings. Proposed revisions to the HMP were reviewed during the West Valley Communities' round table discussions regarding the draft MRP in FY08-09. To stay informed of the most recent HMP developments, the WVCWP Manager attended the Hydromodification 101 workshop in Roseville, CA on May 19-20, 2009	SCVURPPP & WVCWP to coord; City Eng to attend
HMP Reporting	C.3.f.viii	Provide development and implementation status and a summary of projects incorporating HMP measures to WVCWP staff for Annual Report.	The City of Monte Sereno did not have any projects which meet the criteria required for HMP implementation during FY08-09.	City Engineer
C.3.g Waiver and Compensatory Mitigation Program				
Waiver Program or Alternate Compliance	Permit C.3.g.	Currently, **WV Communities** do not offer an alternate compliance option to developers of Group 1 or Group 2 projects. No changes are expected to this approach in FY 08-09 unless regional watershed projects become available to support.	All applicable projects are required to implement C3 requirements without using alternative or off-site compliance measures. The City does not foresee using a Waiver Program.	City Engineer & City Manager
C.3.h Alternate Certification				
Alternate Certification reporting	Permit C.3.h	Report on all projects that are certified by someone other than municipal staff and the mechanism for ensuring outside certifiers	Monte Sereno did not approve any Group 1 or Group 2 projects in FY08-09. The City has a consulting civil engineering company on retainer to act as its City Engineer.	City Engineer

		are qualified.	Civil engineers from this company are required to periodically attend SCVURPPP C.3 training events and perform C.3 compliance reviews for the City. They are responsible for evaluating Group 1 or Group 2 Project designs to ensure they meet C.3 requirements.	
		Monte Sereno's City Engineer (contractor) will provide all new and redevelopment project certification. The City does not plan to use Alternate Certification.	MONTE SERENO: Monte Sereno did not approve any Group 1 or 2 projects during FY 08-09.	City Engineer
C.3.j Site Design Guidance				
Site Design Guidance	Permit C.3.j	Summarize the status of revision and implementation of site design measures guidance and standards.	The City of Monte Sereno revised the site design measures guidance and standards in the Fall of 2008.	City Engineer/ City Planner
C.3.l General Plan Update				
General Plan	Permit C.3.l	At next planned update, revise General Plan to reflect principles and policies to address requirements for development projects.	The City of Monte Sereno updated the Genral Plan to reflect the principles and policies to address requirements for development projects in the Fall of 2008.	City Planner
C.3.n Reporting Requirements				
C3 Project Reporting	Permit C.3.n.i.	Report details required by the Permit for all Group 1 and Group 2 projects that received final approval for construction during FY08-09. E.g. list project name, location, type, deemed complete date, final approval date prior to grading, project size, amt impervious surface, watershed, developer name and S/W measures and treatments used.	MONTE SERENO: Monte Sereno did not approve any Group 1 or 2 projects during FY 08-09.	City Engineer to provide data to WVCWP staff

PLANNING PROCEDURES
Monte Sereno
Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2008-2009 ANNUAL REPORT

C3 Project Reporting	Permit C.3.n.ii.	For "regulated" projects provide details in the annual report on the S/W treatments used, the sizing criteria, O&M verification status, any follow-up action, site design measures used, source control measures used and pesticide reduction measures required.	MONTE SERENO: Monte Sereno did not approve any Group 1 or 2 projects during FY 08-09.	City Engineer provide data to WVCWP staff
Report Pesticide Reduction Measures	NPDES Permit Provision C.3.n.iii	For "regulated" projects, report on the percentage of projects for which pesticide reduction measures were required.	MONTE SERENO: Monte Sereno did not approve any Group 1 or 2 projects during FY 08-09.	City Engineer provide data to WVCWP staff

Planning Procedures Evaluation

Site Design and Source Control measures are being required on all new development projects via Monte Sereno's "Residential Design Guidelines" and Monte Sereno's Site Development Permit requirements. The City continues to encourage stormwater measure, including flow controls, on all projects. Developers and property owners are receptive to the suggestions, making the process run very smoothly. BMPs most often required include the following, all are for single-family residential projects:

1. Rocky swales to energy dissipaters
2. Permeable pavement
3. Drywells, which overflow to vegetated area, were required (per City Engineer) on all residential development projects, where feasible (except where the ground water levels are too high).
4. Design to show post development flow does not exceed pre-development flow.

In FY 08-9 the City of Monte Sereno participated in the Water Resources Protection Collaborative. The Collaborative was enacted in an effort to clarify and streamline local permitting for streamside activities, representatives from the water district, cities, the county and business, agriculture, streamside property owner and environmental interests created a partnership known as the Water Resources Protection Collaborative. The approach makes a clear distinction regarding governance. Municipal organizations will continue to exercise their land use authority. The Collaborative developed model Guidelines and Standards which will serve as a basis for the District and municipal organizations to implement as appropriate. Each municipal organization will develop and apply these standards as needed for their jurisdiction. In early 2008 the City of Monte Sereno adopted these guidelines.

Monte Sereno

Reporting Form for Planning Procedures Performance Standard

and Provision C.3.n.i. Reporting Requirements

Part 1
New Development and Significant Redevelopment Projects[1]
Reviewed and/or Approved During FY08-09

Project Name	Project Type[1]	Site Size (ac. or s.f.)	New Impervious Surface (s.f.)[2]	Area of Land Disturbed (Ac.)[3]	Project Status	Storm Water Control Measures Included in Project
Private Projects						
	NONE					
Public Projects	NONE					

[2] List all projects with new impervious surface area greater than 10,000 s.f.

[2] Describe project type, as defined in Provision C.3.c.

[2] "New" is defined as impervious surface created, added or replaced.

[2] If the site is a "significant redevelopment", list the area of land disturbance, if information is readily available.

FY 2008-2009 Work Plan Self Evaluation Matrix				
Source	**WP Task**	**Work Plan Tasks**	**Accomplishments**	**Responsible Party**
	URMP	Staff Training Participate in and support RWQCB and Program- sponsored workshops on erosion control and construction BMPs; support distribution of related materials. Construction inspectors must attend Erosion Control and Site Inspection Meeting every two years.	**Construction Stormwater Management Compliance Workshops** Thursday November 20th and Friday November 21st Quinlan Community Center, 10185 N. Stelling Road, Cupertino, CA, 95014 8:00 am – 3:00 pm (Attendees: City of Campbell Senior Public Works Inspector, City of Campbell Public Works Inspector, WVCWP Manager, WVCWP Assistant) **Construction General Permit Workshop** May 27, 2009 (WVCWP Manager Attended)	WVCWP to coord w/ SCVURPPP; inspectors to attend training
	URMP	Construction Inspections Continue construction site inspections and follow-up for stormwater issues (i.e., mud tracking, mat'l storage, housekeeping, etc.). Document sites inspected and note any violations through final resolution. Report violations to WVCWP for Annual Report.	Monte Sereno inspected approximately 38 sites with active grading permits from October 1, 2008 to April 15, 2009 (all single-family dwellings not part of a larger common development). Municipal Code Section 9.04.120 requires erosion and sediment control materials to be onsite by October 1st and in place before October 15th or a “stop work order” will be issued. Periodic inspections are conducted by the City engineering staff including inspections before, during, and after every major storm event. Sites with potential problems are inspected at least once a week but not more than twice a week. Residents usually call to report an issue if erosion control is not installed correctly. See the construction inspection incident spreadsheet (following this table) for details.	Eng Inspectors & Bldg Official shall maintain data & report to WVCWP

West Valley Communities

CONSTRUCTION INSPECTIONS
Monte Sereno
FY 2008-2009 ANNUAL REPORT

Construction Inspection Evaluation			
*FY08-09**		**FY 07-08**	
Erosion/sedimentation BMP's not functioning	9	Tracking Soil	1
		Grey Water Discharge	1
		Landscape Material Dumping	1
		Total Number of Incidents	3
Total Number of Incidents	*9*		
**issues observed and resolved by Municipal Inspectors.*			

Reported Incidents:
In FY08-09 The City of Monte Sereno Engineer observed and resolved nine (9) stormwater violations at construction sites. All violations were related to erosion and sedimentation BMP's. The Construction Inspection Evaluation totals do not include incidents observed by the WVCWP Inspector. Incidents observed and resolved by the WVCWP Inspector can be found in the ICID section of this report.

In FY07-08 the WVCWP Inspector responded to three (3) construction-related incident calls for Monte Sereno. All three of the incidents were proactive inspections by the WVCWP Inspector. The number of incidents in Monte Sereno has remained about the same since FY04-05 if you exclude the complaints that were not found in FY 05-06. There were three (3) incidents in FY04-05 and four (4) in FY05-06, four (4) again in FY06-07, and only three (3) in FY 07-08. Coordinated efforts between the City's Building and Engineering Inspectors and the WVCWP Inspector are working well. Engineering/erosion control inspectors have informed WVCWP staff that developers and contractors in the City are very eager to protect their good reputation with local residents and City staff. Any mention of a potential violation (verbal notice) from an inspector results in immediate action to comply. Monte Sereno, having a population of about 3,800 in a strictly residential community, has construction sites that are closely scrutinized by neighbors and inspectors. In addition, the WVCWP office is in Monte Sereno, which makes it easy for Clean Water Program staff to watch for potential problems on the way to and from work. Potential incidents are inspected and re-inspected (if necessary) until final resolution is achieved.

Construction Site Erosion Control Inspector Training:
Monte Sereno's Engineering Inspector meets annually with the WVCWP Manager to review NPDES permit requirements, the City's Construction Inspection Performance Standard, and the WVCWP IC/ID Inspection Program procedures.

Construction Inspection Program Evaluation:
Monte Sereno construction activities are well monitored and developers generally act responsibly and are aware of stormwater issues. No changes are planned for this program. Continued public outreach efforts and further training and communication between municipal inspection staff and the WV Stormwater Inspector will help maintain Mont Sereno's success in this area.

Work Plan Self Evaluation Matrix

Source	WP Task	FY08-09 Work Plan Tasks	FY 08-09 Accomplishments	Responsible Party
A. SCV PROGRAM - PROJECTS/SUPPORT				
	NPDES Permit, Provision C.4, C.9 & Pest Mgt Plan (PMP)	a. Watershed Education and Outreach Campaign Help to develop/implement ongoing watershed education and outreach campaign. WVCWP Mgr assists via WEO Ad hoc Task Group. Participate in campaign development and special projects, e.g. community events. Campaign will include funding for educational programs at the Alviso Ed Center and funding for ZunZun performances in local schools. See SCVURPPP FY 08-09 Watershed Watch Work Plan for details.	WVCWP staff participates in WEO AHTG meetings. In late FY 08-09, WVCWP staff was selected to serve as Chairperson of the WEO AHTG for FY 09-10. WVCWP staff has accepted the position. Activities include development and review of outreach and survey materials. WVCWP Staff participated in FY08-09 WW Survey Task Group: reviewed goals, scope & questions in survey against past surveys; reviewed preliminary results and draft report for submittal to AHTG and MC. **Mission College's Eco Day Event** 4/22/09 - Mission Community College, Santa Clara WVCWP staff supported Program activities by working at the Watershed Watch booth, handing out stormwater outreach material, including Watershed Watch brochures and Discount Cards.	WVCWP Staff
	NPDES Permit, Provision C.4, C.9 & Pest Mgt Plan (PMP)	b. Pesticide User Outreach Project Continue to provide funding and to participate in Our Water Our World IPM Store Partnership. Project scope will include items in Program's Pesticide Management Plan based on provision c.9.d of the Permit for outreach to residents, commercial businesses, and pest control operators.	SCVURPPP Co-permittees received CA DPR/ EPA "IPM Innovator Award". Details are available in SCVURPPP "Program" report. Award was presented to the WVC Council members at Council meetings in February (presented to Saratoga City Council in May). **IPM Store Partnership** Within the West Valley Communities, there are 3 garden centers which have elected to participate in the Store Partnership Program:	WVCWP Staff

			- Summerwinds – Campbell - Home Depot – Campbell - Ace Hardware – Los Gatos There are also 4 participating stores which border Saratoga (including 1 also bordering Campbell); these stores are patronized by WVC residents, and are supported by overall funding that WVC contribute to. These additional stores are: - Summerwinds – Cupertino - Home Depot – San Jose – (De Anza Blvd.) - Yamagami's – Cupertino - Orchard Supply Hardware – San Jose (Prospect Rd. – bordered by Saratoga & Campbell) WVCWP provides funding to support ongoing maintenance and training needs for this program. WVCWP provided IPM Fact Sheets to Home Depot in Campbell in June 09. Material was delivered to Home Depot by Program staff as part of the Pesticide User Outreach Project. Fact Sheets Delivered for Display/Distribution: 100 – Wonderful Roses 200 – Safe Use & Disposal of Pesticides 200 – Naturally Managing Pests 100 – Tips for a Healthy Beautiful Lawn 200 – Keeping Cockroaches Out of Your House 200 – Keeping Fleas Off Pets & Out of Yards 100 – *Spanish* – Fleas 500 – Controlling Ants 100 – Controlling Yellowjackets	

			300 – Controlling Aphids in Your Garden 200 – Growing a Healthy Garden to Naturally Manage Pests	
	NPDES Permit, Provision C.9.c.	c. Mercury Pollution Prevention Outreach Participate in the Program's Mercury Pollution Prevention Outreach Work Group and conduct local implementation of the Program's Mercury Pollution Prevention Plan including public education on: 1) negative health and environmental impacts of mercury, and 2) proper disposal of products containing mercury.	WVCWP staff focus in FY 08-09 was on local implementation, since the Program's Mercury PP Outreach Work Group has not been meeting. Local implementation included outreach for free E-waste Recycling Events, mercury-free thermometer distribution, mercury outreach material distribution, and articles on mercury in municipal newsletters. **FREE E-WASTE RECYCLING EVENTS** Recycling of TVs, monitors and all office electronics. These events were organized by the waste contractor for the four WV Communities. **July 2008** CAMPBELL: July 19, 2008 Campbell United Church of Christ, Campbell, CA LOS GATOS: July 19, 2008 Los Gatos United Methodist Church, Los Gatos, CA SARATOGA: July 26, 2008 City of Saratoga North Campus, Saratoga, CA **April 2009** CAMPBELL: April 18th, 2009 Campbell United Church of Christ, Campbell, CA LOS GATOS: April 25th, 2009 Los Gatos United Methodist Church, Los Gatos, CA SARATOGA: April 25th, 2009 City of Saratoga North Campus, Saratoga, CA See "Mercury" section of this AR for details on results	WVCWP Staff

			of these E-waste events. EVENT OUTREACH: During Winter/early Spring of 2008/2009, WVCWP submitted articles which ran in the WVC municipal newsletters, concerning E-waste. This helped publicize the need to make use of use E-waste events. For the July 2008 events, WVCWP publicized E-waste disposal on the front page of the cleancreeks.org website. WVC advertise E-waste events in their municipal newsletters when possible. Campbell Profile – Winter 09 – Campbelll Historical Society E-Waste event **THERMOMETERS** **Audubon Wildlife Fair** Cupertino (bordering Saratoga) 10/25/08 Mercury-free thermometers, along with mercury outreach materials, were provided to parents attending WVCWP Enviroscape presentations at the Fair. **Thermometer Exchange at LG Farmers Market** Los Gatos – 5/3/09 WVCWP coordinated an exchange which was staffed by Town of LG and City of San Jose Environmental Services Dept. See "Evaluation - *SCV Program Projects/Support* " section (below) for details and see "Mercury" section of this AR for details on results of these Thermometer events.	

			Mercury Outreach - Newsletters In Winter 2009, prior to the nationwide switch to digital television, WVCWP provided an article to all WVC municipal newsletters on proper TV disposal, and environmental impacts of mercury. The article was printed in the municipal newsletters for Campbell, Monte Sereno and Saratoga. (See 'Press Releases' row, below, for details) **Outreach Materials & Thermometers** Mercury outreach materials and solar and mercury-free thermometers were distributed at community events. See "Materials Distribution" below (B. 'General Outreach', a.) Mercury Informational Material was handed out to Corp Yard Staff in July 2008; along with a flyer reminding staff to properly dispose of mercury containing thermostats/ switches. See "Mercury" section of this report for additional details	

Public Information/Participation Program EVALUATION - *SCV Program Projects/Support*

Mercury Outreach – Local Implementation of Mercury Pollution Prevention Plan

WVCWP with Sierra Club at Audubon Wildlife Fair:

Sierra Club members in attendance expressed strong interest in helping to distribute these thermometers; however the Club does not have funding to purchase these themselves for distribution. If mercury-free thermometers could be made available to the local Sierra Club group (Guadalupe Group of the Loma Prieta chapter) they would distribute them at a variety of events: Earth Day booth, travel presentations (usually held at Saratoga Library), and club events, such as Annual Group Awards & Wine-Tasting event. This initiates the question of whether it would be effective to recruit stakeholder groups to help at thermometer exchange events, or to distribute mercury-related (i.e fluorescent bulb recycling) information at stakeholder activities/events.

WVCWP with Town of Los Gatos: Thermometer Exchange at Los Gatos Farmer's Market

Residents attending the Farmer's Market were pleased to learn the Town was collaborating with the City of San Jose for this event.

WVCWP has coordinated with the other participants to hold this event again in FY 09-10. It will be held in conjunction with "Keep Los Gatos Beautiful" month in April 2010; this will allow for better outreach opportunities to publicize the event and encourage increased participation.

Based upon positive response from residents, WVCWP, WVC and San Jose Environmental Services Dept. have coordinated additional events in FY 09-10 at various venues. Efforts will be made to increase publicity for these events; some will be held mid-week and increased publicity may be needed in order to generate a turnout. Effectiveness of holding mid-week events will be evaluated.

B. WVCWP PROJECTS

GENERAL OUTREACH

General	NPDES Permit, Provision C.4 and C.9	a. Distribute Materials. Distribute public information materials at civic centers, libraries, building and planning department counters and similar venues. Maintain a website (and phone request line) for public requests and distribution of materials.	**DISTRIBUTION AT MUNICIPAL FACILITIES** CAMPBELL • 25 Grow It Guides • 50 Pool & Spa Brochures LOS GATOS • 25 Grow It Guides • 50 Pool & Spa Brochures • 100 Watershed Watch brochures MONTE SERENO • 15 Grow It Guides • 25 Pool & Spa Brochures • 25 Watershed Watch brochures • 25 Beneficial Bugs brochures with native seed packets attached SARATOGA	WVCWP Staff

			• 25 Grow It Guides • 25 Pool & Spa Brochures **<u>'Car Wash Kit' flyers at Municipal Facilities</u>** June 2009 (updating previous flyers) • Campbell (Planning Counter) • LG City Hall (2x: 1 @ Public Works, 1 @ Planning Counter) • MS City Hall (2x: 1 @ Front Counter, 1 @ Post Office) • Saratoga City Hall (1 @ Planning Counter) **<u>Town of Los Gatos Public Works Open House</u>** <u>Town Corp Yard – May 2009</u> -----<u>St. Mary's School 3rd & 4th grade</u> 51 - Watershed Watch Brochures 9 - Anti-Litter Mugs (to adults/teachers), -----<u>Evergreen Elementary 3rd grade</u> 20 - Watershed Watch Brochures 5 - Anti-Litter Mugs (to adults/teachers) -----Town of Los Gatos and WV Sanitation District staff 10 - Anti-Litter Mugs **<u>City of Saratoga Municipal Facilities</u>** <u>January 2009</u> 80 - Anti-Litter Mugs to City of Saratoga staff. (For details on WVCWP-created **Anti-Litter Mugs**, see "WVCWP PROJECTS – Targeted Outreach – n.	

			Outreach Activities for Specific Pollutants - Additional Task – Create Outreach Materials - Mugs" below). **WV Communities E-Waste Recycling Outreach Materials Distributed** **7/19/08 & 7/26/08 E-waste Events:** Flyers were distributed by the waste contractor in all Campbell, Los Gatos, Monte Sereno, and Saratoga resident's monthly bills. **4/18/09 & 4/25/09 E-waste Events** E-Waste Events were advertised in the WV Collection & Recycling (waste contractor) newsletter, distributed to all WV Communities households. **DISTRIBUTED VIA COMMUNITY EVENTS** **LG Presbyterian Summer Camp** Los Gatos July 23rd 25 stormdrain message 'recycled' pencils were given to children & teachers **Coastal Cleanup Day – Volunteer Appreciation Party** 9/20/08 Vasona County Park – Los Gatos 5 - WVCWP Copper flyers with Car Wash Discount Card **9/20/08 WVCWP Creek Cleanup** 15 re-usable grocery bags (purchased from Safeway using their donated gift card for Coastal Cleanup Day)	

			Audubon Wildlife Education Fair 10/25/08 - Audubon McClellan Ranch site, Cupertino, (bordering Saratoga) 30 - Solar Thermometers (mercury-free) 30 - Mercury Brochures 30 - Flyers for Mercury thermometer drop-off locations **Great American Litter Clean up** Los Gatos Creek Park, Campbell 4/18/09 100 - Junk Mail Reduction Kits 100 – 'Oil Rag' printed with oil recycling and HHW info 100 – HHW brochures 100 – E-Waste/cell phone recycling brochures 100 – Mercury brochures 100 – Watershed Watch brochures (watershed pollution around your house) 100 – Beneficial Bug brochures *with* 100 – Calif. native wildflower seed packets (attract beneficial bugs - WV assembled seed packets) 100 – Re-usable Canvas Shopping Bags ("City of Campbell") **Arbor Day Celebration** Saratoga 4/24/09 6 - Watershed Watch Brochures 25 - Beneficial Bug Brochures *with* 25 - Calif native seed packets 31 - Watershed Watch Discount Cards	

			St Thomas of Canterbury Vacation Bible School SJ (between Campbell & Saratoga City boundaries) June 18, 2009 18 - "Pest or Pal?" Activity/ Coloring books **DISTRIBUTION at SCHOOLS** **St. Mary's School** Los Gatos January 15, 2009 35 - Beneficial Bug Brochures *with* 35 - Native Seed Packets 35 - WVCWP Stormwater message 'recycled' pencils, 3 - WVCWP Stainless Mugs 3 - WVCWP Cartoon T-Shirts. **Sedgwick Elementary School "Discovery Day"** Cupertino March 31, 2009 90 - Beneficial Bug Brochures *with* 90 - Native Seed Packets 50 - WVCWP Stormwater message 'recycled' pencils, 40 – Watershed Watch notepads **St. Mary's School** Los Gatos May 21, 2009 35 - Beneficial Bug Brochures *with* 35 - Native Seed Packets	

			3 - WVCWP Stainless Mugs **DISTRIBUTION at RETAIL FACILITIES** **Yamagami's Nursery** May 2009 Cupertino (bordering Saratoga) 50 – Beneficial Bug Brochures *with* 50 -- Calif native seed packets **Leslie Pools – Los Gatos** 30 -- Pool & Spa Brochures **Tradewind Spas – Los Gatos** 20 – Pool & Spa Brochures **DISTRIBUTION to/for STAKEHOLDERS** **Santa Clara County Chapter, Sierra Club** 50 – Beneficial Bug Brochures *with* 150 -- Calif native seed packets (4 different varieties) **San Francisco Estuary Project Art Contest** As requested by the SF Estuary Project, WVCWP staff helped to publicize the San Francisco Estuary Project Art Contest. The contest will provide SF Bay/wetlands-related artwork for use in outreach material and websites. The Contest Flyer, and details, were e-mailed to Recreation Depts. for distribution to art classes: -City of Campbell, -Town of Los Gatos	

			-City of Saratoga Flyer + info were sent to WV Community College, and were distributed to summer art classes at the college. Flyer + info were sent to the art teacher for Canyon Heights Academy, who has expressed interest in environmental art. The flyer was posted at: • Campbell Cmmty Ctr • Campbell Library • Los Gatos Library • Monte Sereno Post Office • Saratoga Library	
			CAMPBELL Distribution of Seed Packets 1set of seed packets mailed 4/7/09, per telephone request.	
			LOS GATOS Distribution of Seed Packets In response to a WVCWP article on Beneficial Bugs, printed in the Los Gatos “Vista” newsletter, WVCWP received calls for seeds which attract Beneficial Bugs. Calls began immediately after the newsletter was received in Los Gatos households. Seed packets for 4 different plant species were available. 1 set of packets mailed 4/7/09, per telephone request 1 set of packets mailed 4/8/09, per telephone request 1 set of packets mailed 4/9/09, per telephone request	

			2 sets of packets mailed 4/10/09, per telephone requests 2 sets of packets mailed 4/13/09, per telephone requests 1 set of packets mailed 4/15/09, per telephone request	
			MONTE SERENO Distribution of Seed Packets 1set of packets mailed 4/3/09, per telephone request 1set of packets mailed 4/7/09, per telephone request A Monte Sereno Master Gardener teaches gardening classes at the Saratoga Library. The Master Gardener distributed 30 Grow-It Guides to her class members.	
			SARATOGA Saratoga Rec. Dept offers a gardening class, including instruction on organic and low-maintenance gardening. WVCWP distributed to the classes: 100 - Beneficial Bugs Brochures *with* 100 - Calif native seed packets, (beneficial bug attractants) put together by WVCWP staff Distributed to all Saratoga City Council members during IPM Innovator Award presentation – May 2009 5 – Healthy Gardening IPM Facts sheets *with* 5 - Calif native seed packets, (beneficial bug attractants) put together by WVCWP staff Gardening Classes taught by a Master Gardener (Monte Sereno resident) are held at the Saratoga	

			Library. The Master Gardener distributed 30 Grow-It Guides to her class members.	
General	NPDES Permit, Provision C.4 and C.9	b. Participate in Local Community Events Promote watershed messages by participating in local community events (e.g., farmers market, festivals, creeks clean-ups, etc.).	**LG Presbyterian Summer Camp Enviroscape Presentation** Los Gatos July 23rd An Enviroscape watershed presentation was given for 21 children, ages 2nd – 5th grade. The presentation covered behavior change information for: Trash, Car-washing, Pesticide Use, Pet Waste, Vehicle Fluids 25 stormdrain message 'recycled' pencils were given to children & teachers. **Audubon Wildlife Education Fair – Enviroscape Presentations –** 10/25/08 at Audubon Society McClellan Ranch, Cupertino (bordering Saratoga) Partnered with local stakeholders: SC Valley Sierra Club Chapter and Audubon Society. Audubon sponsors this event, which is held at their facility. Sierra Club shares a table with WVCWP and Sierra Club volunteers assist WVCWP staff. WVCWP gave 10-12 Enviroscape watershed presentations to groups of 4-8 children (ages appx 4-10) throughout the day. Approximately 70-80 children (total) participated in, and watched, the Enviroscape activity. Presentations were also seen by parents, who attended with their children. Presentations covered behavior change information for: Trash, Car-washing, Pesticide Use, Pet Waste, Vehicle Fluids Distributed 30 Mercury Brochures, 30 Solar	WVCWP Staff and available Municipal Staff

			Thermometers (mercury-free), and 30 Flyers for Mercury thermometer drop-off locations to the adults. **Arbor Day Celebration** Saratoga 4/24/09 4/24/09 – Beauchamps Park WVCWP staff was introduced to the attendees (appx. 40 people). Attendees visited WVCWP display where staff discussed runoff issues (including pesticides) and distributed material. Staff also circulated and distributed material. **Town of Los Gatos Public Works Open House** Town Corp Yard – May 2009 WVCWP staff and Town of Los Gatos staff participated in this annual event which helps inform the public, especially students, of the Town's Public Works activities and responsibilities (such as street sweeping). WVCWP presented stormwater-related information, including distributing materials, and answering questions for attendees. Attendees included: St. Mary's School 3rd & 4th grade, 51 students plus 9 parents and teachers. Evergreen Elementary 3rd grade, 20 students plus 5 parents and teachers. **St Thomas of Canterbury Vacation Bible School Enviroscape Presentation** SJ (between Campbell & Saratoga City boundaries) June 18, 2009	

			An Enviroscape watershed presentation was given for 18 children, ages appx. 7-10. The presentation covered behavior change information for: Trash, Car-washing, Pesticide Use, Pet Waste, Vehicle Fluids Each child received a "Pest or Pal" activity/ coloring book.	
			CAMPBELL **Arbor Day** The City of Campbell held it's Arbor Day event on April 21 at Foresthill Elementary School. A tree was planted, and gardening-related material was distributed. The City included IPM and Less Toxic Pest Control in materials that were available for attendees to take home. These included: Pests Bugging You? Grow It Guides The Bay Begins at Your Front Door! IPM Fact Sheets: Tips for a Beautiful Lawn Controlling Ants in Your House Controlling Aphids in Your Garden Keeping Cockroaches Out of Your House **Great American Pick Up** The major community event organized by City of Campbell is its "Great American Pick Up". This year, the City was able to generate attendance by 160 volunteers. The City assembles a re-usable grocery bag full of stormwater/ litter-related materials for distribution to each participating family. 100 of these bags were given out (see "Materials Distributed" row – above).	

			Details of the event are in the Creek Cleanups row of this PI/P section (below) and in the "Trash - Evaluation" section of this AR.	
			LOS GATOS **Town of Los Gatos Public Works Open House** Town Corp Yard – May 2009 Town of Los Gatos staff organized its Annual Public Works Open House for 2009. This event helps inform the public, especially students, of the Town's Public Works activities and responsibilities (such as street sweeping). In addition, the Town invites WVCWP to help insure that information related to stormwater issues is distributed.	
			SARATOGA **Arbor Day Celebration** Saratoga 4/24/09 4/24/09 – Beauchamps Park City of Saratoga staff organized this event, which was held at a neighborhood park. The event was publicized in the municipal newsletter, and included information on trees as a means of preventing runoff and erosion, especially along creekbanks. City staff introduced WVCWP to the attendees (appx. 40 people). Attendees visited the WVCWP display where staff discussed runoff issues (including pesticides) and distributed material. **Creek Cleanups** City staff organized 2 Creek Cleanups (Calabazas Creek and Saratoga Creek). See Creek Cleanups row	

			(below) for details.	
General	NPDES Permit, Provision C.4 and C.9	c. Prepare Newsletter Articles/ Press Releases Prepare and contribute articles/ press releases of interest to the City newsletter and/or local media. Topics such as HHW disposal, pesticides, mercury, trash and copper/nickel will be promoted.	**COMMERCIAL WEEKLY NEWSPAPERS** **News Articles** In FY 08-09 WVCWP worked steadily on developing a good working relationship with the 3 weekly newspapers which cover the 4 WVC. These efforts resulted in 2 effective articles published in FY 2008-2009, and 1 article which was initiated in June 2009 and appeared in July 2009. Articles were printed in the: **Campbell Reporter** (circ. 15,550), the **Los Gatos Weekly** (circ. 41,050) the **Saratoga News** (circ. 13,240). **Creek Cleanup article** In Sept. 2008, WVCWP prepared a press release for California Coastal Cleanup Day and submitted it to the 3 local weekly newspapers. WVCWP worked closely with reporters for all 3 papers to develop articles tailored to each City/Town. WVCWP provided photos and interviews. Articles discussed the Stormwater Permit and the implications of trash in the creeks. Numbers were provided on lbs of trash and recycling collected at the WVCWP site (San Tomas Aquino Creek) and 2 sites in Los Gatos. The Saratoga article also publicized the upcoming Cleanup event in Saratoga Village, sponsored by WVCWP & City of Saratoga. **IPM/ "Green Gardeners" article + Car Wash Kit**	WVCWP Staff

			In February 2009, WVCWP developed a Press Release covering upcoming IPM awards presentations for the 4 WVC, including information and photos on the Green Gardeners program. The article included information on the class series (for anyone interested in enrolling). It also promoted local companies which employ Green Gardeners graduates – so that residents could contact and utilize these graduates. In addition, in the context of describing WVCWP, the article promoted use of the Car Wash Kit for fundraising events. **<u>Car Wash Kit for fundraising events</u>** In June 2009, WVCWP initiated correspondence with the 3 weekly newspapers concerning the need to promote the Car Wash Kit during the summer months. Correspondence continued into July 2009, and resulted in a 'brief', printed in the 3 newspapers, alerting fundraising groups about the need to use the Car Wash Kit. The article generated a number of calls with questions to the WVCWP office. **COMMERCIAL WEEKLY NEWSPAPERS** **Paid Advertising** WVCWP contributed funds to the SCVURPPP's Pollutants of Concern ad campaign. This allowed ads to appear in the three (3) weekly community newspapers for a total of ten (10) weeks in FY 08-09. (Campbell Reporter, Los Gatos Weekly, Saratoga News). In addition, all ads also appeared a 2nd time in the Los	

			Gatos Weekly "Weekend Edition", so that ads appeared a total of twenty (20) times in WV newspapers. September 08: IPM/weeds October 08: Mercury/HHW November 08: Mercury/HHW Dec/January (week of 12/30): Litter Jan 09: Litter February 09: Litter March 09: Litter April 09: IPM/snails June 09 (week of 6/1): IPM/Roses June 09: IPM/Yellow Jackets <u>Recap:</u> IPM 4x Mercury 2x Litter 4x **MUNICIPAL NEWSLETTERS** WVCWP prepared a variety of news articles for use by municipal newsletters in FY 08-09. Articles shared with muni newsletters included: **<u>- Car Washing</u>** An article on Car Washing & Car Wash Kit, along with a WVCWP car washing cartoon, was submitted to *The Saratogan* municipal newsletter for Summer 08. The Car Washing cartoon strip, along with brief text, was printed (July/Aug 08).	

			- **Keep Leaves And Landscaping Material Out Of The Drain** An article was prepared alerting residents that leaves and dirt, although 'organic', should be kept away from gutter, curbs and stormdrains. Graphics included a WVCWP cartoon illustrating construction materials near the gutter. This was submitted to the muni newsletters, and also the WVC waste collection contractor, for their newsletter. The article was printed in: - The Campbell Profile - The Monte Sereno Newsletter - The Saratogan **- Proper TV Disposal** (E-waste & Mercury) An article was written covering the issue of proper TV disposal (with the upcoming digital TV changeover), along with concerns about mercury. The article included details on proper disposal options. This was submitted to the muni newsletters, and also the WVC waste collection contractor, for their newsletter. The article was printed in: - The Campbell Profile - The Monte Sereno Newsletter - The Saratogan **- Arbor Day** – Trees prevent creekbank erosion At the request of the City of Saratoga, an article was developed addressing the subject of how trees help prevent creekbank erosion.	

			Portions of the article were printed in The Saratogan as part of the effort to highlight Arbor Day. **- Less Toxic Pest Control –** Attracting Beneficial Bugs WVCWP prepared an article highlighting the dangers of pesticide use in home gardens, with details and graphics on using 'beneficial bugs' as an alternative to pesticides, and on properly identifying helpful vs harmful bugs. The article and graphics were printed in: - The Campbell Profile - The Los Gatos Vista - The Monte Sereno Newsletter - The Saratogan West Valley Communities' Solid Waste Franchisor (garbage & recycle hauler) publishes a quarterly newsletter and distributes to all households. Topics in Summer 2008: Curbside collection of used motor oil, proper disposal of sharps, universal waste, e-waste, water based paints.	
			CAMPBELL The City of Campbell publicizes "Bike to Work Day" and has a good turnout of employees who participate. This generated a 400 word article on "Bike to Work Day" and City staff, in the Campbell Reporter weekly newspaper (May 27, 2009). The article was titled "City Employees Leave Cars at Home and Pedal to Work". See Attachments *(Bike to Work article)*	

			SARATOGA City of Saratoga was able to generate publication of 2 constructive articles in the local weekly newspaper (The Saratoga News). One article covered Saratoga Mayor Chuck Page's campaign to get businesses to halt use of Styrofoam containers. The article ran on April 28, 2009, and covered issues related to getting Styrofoam out of the trash stream, it's lack of biodegradability, etc. Another article targeted the subject of greener building, and covered a variety of issues, including: -the benefits of green roofs, -recycling construction materials, and -residential 'rain harvesting' systems (which reduce runoff). See Attachments ("Happy Earth Day" & "Mayor Styrofoam") Saratoga Annual Cleanup The City was able to obtain publicity in the weekly 'Saratoga News' promoting the West Valley Collection & Recycling cleanup occurring July 21st through September 26th and to encourage citizens of Saratoga to hold a garage sale to prepare for the annual cleanup. MUNICIPAL NEWSLETTER The City's municipal newsletter, "The Saratogan" makes a consistent effort to include articles related to stormwater issues. The City has included articles generated by WVCWP, and has also used the newsletter to proactively teach	

			residents about issues such as reducing pesticide use in City Parks, encouraging residents to walk and bike using city pathways - rather than driving, etc. In FY 08-09, "**The Saratogan**" municipal newspaper carried articles on: • Trails & Bike Paths: • Less-Toxic Pest Control in City parks • Planting/Preserving Trees to prevent Creekbank Erosion • E-Waste (general) • E-Waste and Mercury (digital TV transisition) • Keeping Leaves and Dirt away from Strormdrains • Beneficial Bugs/ Less Toxic Pest Control/ Proper Pesticide Disposal • Car Washing – proper Residential Washing + Car Wash Kit	
General	CI Item	d. WVCWP Web-Site Maintain and promote cleancreeks.org website; continue to expand and update the site with new educational material and up-to-date topics for the public on HHW, pest management, and other pollutant reduction activities, e.g. for mercury, trash, & copper /nickel	**E-Waste Event** WVCWP updated their website <www.cleancreeks.org> to advertise for the E-Waste event. A thumbnail link to the flyers handed out throughout the cities was posted from 7-14-08 through 7-27-08. **Waste Collection Contractor** Strengthened relationship with WV Collection & Recycle – the waste collection contractor for the WV Communities. WVCR now includes a link to the WVCWP website on the "Links" page of their website. **Car Wash Kit** Worked with Town of Los Gatos to update Car Wash Kit contact information and details on the Town's	WVCWP Staff

			website. All WVC prepared and forwarded municipal seal/logo graphics to WVCWP for use on Watershed Watch website. Received inquiry about Car Wash Kit from Incline Village, NV (Lake Tahoe) – Car Wash Kit info on cleancreeks.org website (WVCWP site) was found via a Google search. In response to inquiry, WVCWP forwarded numerous materials to help NE Lake Tahoe area start a Car Wash Kit program.	
		Municipal Web-Sites	See Sections 7 through 10 of this report for details on municipal website information related to specific pollutants of concern.	

GENERAL OUTREACH EVALUATION

Press Releases/ Media Coverage

WVCWP has been working to re-establish connections with the 3 local weekly papers which are distributed to all WV households (due to a buyout several years ago, these papers had experienced re-organization).

Creek Cleanup Coverage

For FY 08-09, WVCWP staff were able to arrange for coverage of the Coastal Cleanup Day event in all 3 papers. The articles were each tailored to the community covered by that paper. Articles included photos, interviews with staff and volunteers, data on trash collected, and coverage of the Stormwater Permit and water pollution issues related to trash.

The articles reached a total of **69,840 households**, or, all the adult population of the WV Communities (each household may include several adults, older children, etc).

IPM/ Less Toxic Pest Control Coverage

To promote use of the trainees from the Green Gardeners program, WVCWP sent a Press Release to local newspapers in Campbell, Los Gatos & Saratoga. A 630 word article, including a photo, about the Green Gardeners program was published.

The article promoted both the classes (for anyone interested in enrolling) and promoted local companies which employ Green Gardeners graduates – so that residents could contact and utilize these graduates.

This was exactly the type of coverage that WVCWP was looking to secure, because it is hoped that publicity will inspire residents to hire Landscape Design & Maintenance contractors who have been trained in IPM. Since the article included interviews with Green Gardeners graduates, and owners of participating Landscaping firms, the article will make it easy for residents to contact these companies and graduates, and hopefully make a change to less-toxic pest control at their homes.

CITIZEN PARTICIPATION

Public Partici-pation	Trash Monitoring Work Plan	e. Creek Clean-ups Continue implementation of trash monitoring activity during Creek Clean-ups. Conduct a minimum of two clean-up events per yr (i.e. on Coastal Clean-up Day and National River Cleanup Day).	**Coastal Cleanup Day** *San Tomas Aquino Creek @ Westmont High 9/20/08* WVCWP hosted a Cleanup Event at the site where it has regularly hosted this event. Volunteers were instructed in use of Tally sheets, and were provided with clipboards, etc. Working in groups, volunteers were able to pick up trash and carry out trash monitoring. 15 Volunteers attended along with WVCWP and City of Saratoga staff. Details are listed in the Evaluation section (below). The Cleanup Event was covered in articles appearing in 3 weekly newspapers; details are listed in the Newsletter/Press Release section (above). Distributed 15 reusable bags (purchased from Safeway with gift card they donated to WVCWP) **National River Cleanup Day** *San Tomas Aquino Creek @ Westmont High 5/09* WVCWP hosted a Cleanup Event at the site where it has regularly hosted this event.	WVCWP Staff

			Volunteers were instructed in use of Tally sheets, and were provided with clipboards, etc. Working in groups, volunteers were able to pick up trash and carry out trash monitoring. Details are listed in the Evaluation section (below). **Sacred Heart Schoolyard Cleanup** *Schoolyard overlooking Wildcat Creek in Saratoga 4/29/09* Sacred Heart School organized the cleanup, based upon previous events held in partnership with WVCWP. Details are listed in the "Evaluation" row at the end of this table (below).	
			CAMPBELL **Great American Litter Pickup** 4/18/09 - City of Campbell, 5 different cleanup sites Volunteers were instructed in use of Tally sheets, and were provided with clipboards, etc. Working in groups, volunteers were able to pick up trash and carry out trash monitoring. 160 Volunteers participated, working for four hours. Litter was picked up from 5 sites, including the Los Gatos Creek Trail and the Los Gatos Creek County Park. Publicizing done for the event was very successful, as shown by the fact that 160 volunteers participated. Details are listed in the "Evaluation" row at the end of this table (below).	

			SARATOGA **Calabazas Creek Cleanup** *Saratoga-3/22/09* 17 Volunteers from a local church group in Saratoga attended along with The Mayor of Saratoga, Saratoga and WVCWP Staff. **Saratoga Creek at Big Basin Way Cleanup** *Saratoga – 5/26/09* Saratoga staff organized a cleanup at this site which is has been cleaned annually. 9 volunteers from Saratoga Elementary school participated (8 students and 1 teacher). Volunteers were instructed in use of Tally sheets, and were provided with clipboards, etc. Working in groups, volunteers were able to pick up trash and carry out trash monitoring. Details are listed in the "Evaluation" row at the end of this table (below).	
Public Partici-pation	Creek Keepers Campaign started FY00-01	f. "Creek Keepers" Program training Provide training on trash tallying and highlight current trash pollution issues for students and volunteers when they participate in a cleanup event.	See preceding row (above)	WVCWP Staff
TARGETED OUTREACH & SCHOOLS				
Target Schools	Expand Outreach to Teachers and	g. Schools Outreach: Watershed Ed. Curriculum Conduct outreach to K-8 teachers to	WVCWP Staff e-mailed to a number of schools which have hosted Enviroscape presentations in past years. Only 1 school responded – they requested 2 different	WVCWP Staff

	Students	solicit invitations for classroom presentations. Develop presentations as needed based upon grade levels. Presentations will cover watershed concepts, strategies for changing behaviors which affect stormwater pollution, and related concepts and vocabulary.	Enviroscape presentations. Since this does not appear to be the most effective means of outreach, staff will investigate other methods in FY 09-10. 5 schools were contacted – Canyon Heights, Foothill, Sacred Heart, St. Mary's, Lexington WVCWP was successful in outreach to 2 Summer Camp programs held at local churches. Almost 40 students were reached through presentations at these venues. See "Community Events"	
Target Schools	Based on feedback from Teachers and Students	h. Provide Watershed Education in classrooms Conduct water quality protection education or presentations in local schools, using *Enviroscape* and/or other methods to engage students in Watershed campaign messages. Improve presentation format based on teacher/student feedback. * Please note that this section was inadvertently omitted from the FY08/09 work plan and needs to be included in this report.	**St. Mary's School** Los Gatos January 15, 2009 Enviroscape Presentation to 35 Fifth graders. WVCWP Assistant gave a watershed pollution presentation using the Enviroscape to 35 Fifth graders at St. Mary's School in Los Gatos. Topics covered included: Definition of Watershed, Storm Drain Vs. Sewer, Water Cycle, Urban Run-off, and pollutants of concern. Distributed 35 beneficial bug brochures w/native seed packets, 35 WVCWP pencils made from recycled materials, 3 WVCWP Stainless Mugs, 3 WVCWP Cartoon T-Shirts. **Sedgwick Elementary School "Discovery Day"** Cupertino March 31, 2009 4 Enviroscape Presentations WVCWP gave 4 Enviroscape Presentations to approximately 90 students in the 2nd, 3rd, 4th, and 5th grades.	WVCWP Staff by arrangement w/ Teachers

			Topics covered included: Definition of watershed, Storm Drain Vs. Sewer, Water Cycle, Urban Run-off, pollutants of concern and "How to help reduce watershed pollution". Distributed 90 beneficial bug brochures w/native seed packets, 50 WVCWP Pencils made from recycled materials, and 40 Watershed watch notepads. **St. Mary's School** Los Gatos May 21, 2009 Enviroscape Presentations WVCWP Assistant gave watershed pollution presentations, using the Enviroscape, to 30 Kindergarteners (2 classes – 15/ class) at St. Mary's School in Los Gatos. Topics covered included: Definition of watershed, Storm Drain Vs. Sewer, Water Cycle, Urban Run-off, and pollutants of concern. Groups of students were rotated through the presentations. For those not in the rotation, a "Litter Pickup" activity was supervised by the teachers. WVCWP provided litter grabbers, gloves & trash bags. Students spread throughout the school grounds, picking up litter. The school grounds were generally very clean -- hardly any litter was found and students were not able to fill 1 trash bag. Teachers pointed out storm drains, explained how litter gets into them, and flows to creeks. Distributed 35 beneficial bug brochures w/ native seed packets, 3 WVCWP Stainless Mugs,	

		Additional Outreach to Schools	**Car Wash Kit for fundraising events** Since Car Wash fundraisers are frequently held at school sites, or sometimes by school-based groups using other sites, in FY 08-09 WVCWP pursued a concentrated outreach effort to schools on this subject. A flyer (specific to each municipality, and listing the relevant muni ordinance) and a letter, were e-mailed for dissemination to all schools in the WVC. Via correspondence with 2 High School District Offices and 3 Elementary School District Offices, the flyers and letters were sent to Facilities Maintenance staff and front office staff at: **High Schools** CAMPBELL – 6 HS school sites LG-STGA – 3 HS school sites **Elementary Schools** CAMPBELL – 12 Elementary & Middle School Sites LOS GATOS – 5 Elementary & Middle School Sites SARATOGA - 4 Elementary & Middle School Sites See Attachments – (*Car Wash Flyer* and *Car Wash Letter*)	
TARGETED OUTREACH				
Targeted Business	Permit Provision C.4	i. Education – Businesses Distribute BMP materials during WVCWP inspections of food facilities and automotive businesses. Discuss relevant educational material with businesses cited for potential stormwater violations.	The WVCWP Inspector distributed BMP materials to all restaurants and food facilities that were included in pro-active IND inspections in FY 08-09. **Good Cleaning Practices' (poster & packet)** Poster depicts proper mat washing techniques,	WVCWP Inspector

			Materials distributed at other inspections (IND and IC/ID and follow-ups) included: - Vacu-Boom flyer - Watershed Watch brochures - Construction sites – "Blueprint for a Clean Bay" – BMPs for Construction Sites - Preventing Stormdrain Pollution: Guidelines for Commercial & Light Industrial Facilities" booklet (SCVURPPP) – covers painting, car-washing, chemicals, etc. WV Inspector distributed 50 Pool & Spa BMP brochures to retail outlets during FY 08-09. These will help educate retail staff, and are for distribution to retail customers. **Leslie Pools – Los Gatos** 30 -- Pool & Spa Brochures **Tradewind Spas – Los Gatos** 20 – Pool & Spa Brochures	
Reporting	NPDES Permit, Provision C.4	j. Evaluation/ Reporting Document or estimate (as feasible) numbers of residents, students, municipal staff etc. reached by outreach efforts. Provide anecdotal feedback from audiences. Report number of calls, website hits and circulation or readership for newspapers or newsletters.	**Residents Reached via Articles** **COMMERCIAL NEWSPAPERS** Creek Cleanup articles were printed in the Sept 30, 2008 issues of the 3 local weekly newspapers. An article covering Green Gardeners, how to hire graduates trained in Less Toxic Pest Control, and info on the WVCWP Car Wash Kit was printed in the Feb. 17, 2009 issue of the 3 local weekly newspapers. Circulation for local weeklies: **Campbell Reporter** (circ. 15,500) **Los Gatos Weekly** (circ. 41,050)	WVCWP Staff

			Saratoga News (circ. 13,240) WVCWP paid for ads to run in these papers as part of the SCVURPP media campaign. Campbell Reporter & Saratoga News: 1x / mo for 10 months Los Gatos Weekly: 2x/mo for 10 months **MUNICIPAL NEWSLETTERS** Circulation numbers for municipal newsletters are: 23,000 Campbell households 15,208 Los Gatos residents and businesses 1,225 Monte Sereno households 12,600 Saratoga households **WASTE CONTRACTOR** West Valley Collection & Recycling is contracted to provide waste collection services for the West Valley Communities. The contractor has been proactive in providing free E-waste recyling events and in publicizing those events through their quarterly newsletter and through bill inserts. The newsletter also include additional in on the importance of recycling batteries and e-waste and similar subjects. The newsletters and bill inserts are sent to appx. **27,000** WV households. **Students Reached via Enviroscape Presentations** WVCWP staff gave Enviroscape presentations in classrooms, at summer 'church camps', and at community events. Appx. **274 students** learned about	

			watersheds and the need for behavior changes related to water pollution via this medium.	
Training	FY 08-09 Work Plan	k. Staff Training Conduct or provide WVCWP staff training/meetings to prepare for school presentations, community events & responses to public requests.	**Enviroscape** A new WVCWP staff member was trained on use of the Enviroscape. Training covered set-up and breakdown of the watershed model, use of several curriculums and associated visuals on the Enviroscape. A similar training was provided to City of Cupertino staff. **Car Wash Kit** WVCWP provided training to City of Monte Sereno front office staff on the Car Wash Kit program, so that staff will be able to handle public inquiries on the program.	WVCWP staff
Training	Additional Task – not in Work Plan	k. Staff Training Obtain staff training on effective outreach methods and materials	2 WVCWP staff attended the EPA's National Conference for Non-Point Source & Stormwater Outreach Portland OR – May 2009. WVCWP Program Manager attended a full day of training on "An Evaluation Primer for Stormwater Programs" and "Overview of Social Indicators Evaluation System and Applied Survey Development Skills". WVCWP Program Assistant provided a training for Conference attendees, and attended 2 ½ days of training on a variety of subjects. See Training Table for details	
Training	Additional Task – not in Work Plan	k. Staff Training Provide staff training on public education to a national audience of stormwater	EPA's National Conference for Non-Point Source & Stormwater Outreach Portland OR – May 2009	

		professionals	WVCWP responded to a request for abstracts showcasing successful, low-budget public education campaigns. EPA requested that WVCWP address the conference with their presentation showcasing use of cartoons for dissemination of stormwater messages. WVCWP staff created and delivered the PowerPoint presentation, which was very well-received. It is anticipated that this method of outreach will definitely be initiated in over 6 programs throughout the country. See Evalution Section (below) for details on positive feedback, and potential implementation of presentation concepts by programs throughout the U.S.	
Target Small gardening businesses	NPDES Permit, Provision C.4, C.9 & Pest Mgt Plan (PMP)	I. Training staff of small gardening businesses (Work within Program's Watershed Education and Outreach group and sub-groups)[1] Continue to assist with development of strategy started in FY06-07 to implement a campaign & training program (in Spanish & English) designed to elicit participation of staff from very small landscape businesses (typically 1-8 employees) often serving homeowners. Help fund and/or support campaign locally.	WVCWP staff participates in WEO. WVCWP Program Manager participates in the IPM Ad Hoc Task Group on behalf of the WVC. Project implementation and projects for consideration, which are discussed in the AHTG, are presented to WVC staff for appropriate follow-through. In FY 08-09, WVCWP staff were involved in meetings aimed at developing coordination between the "Bay Friendly" program, and the "Green Gardeners" program. In FY 08-09, WVCWP offered funding for 6 scholarships to reduce the cost of the Green Gardener class to attendees (enough for 6 reduced fee scholarships). To promote use of the trainees from the Green Gardeners program, WVCWP sent a Press Release to local newspapers in Campbell, Los Gatos & Saratoga.	WVCWP Mgr in cooperation with SCVURPPP's Pi/P sub-groups

[1] Funded by all Co-permittees each year.

			A 630 word article, including a photo, about the Green Gardeners program was published. The article promoted both the classes (for anyone interested in enrolling) and promoted local companies which employ Green Gardeners graduates – so that residents could contact and utilize these graduates.	
Target 16-24 yr-olds for Anti-litter messages & behavior changes	Trash Advisory Committee	m. Trash Advisory Committee (TAC) Continue to participate in development and implementation of a campaign targeting 16 to 24 yr-olds for anti litter messages to elicit changes in behaviors. Support and implement campaign locally. (Ref Section 7 of this work plan; Watershed Education & Outreach Campaign)	The "TAC" was renamed 'Silicon Valley Anti Litter Campaign (SVALC). WVCWP staff attended "General Core Group" and the "Education Sub-Group". In early FY 08-09, WVCWP staff were involved in developing a slogan and website for this campaign. WVCWP staff researched slogans in other states & programs, interviewed males in the target age group, and researched web site options. Notes were presented to group. A subset of the SVALC/ WMI Trash Sub-Group has been meeting to try and begin a new 'trash action group'. WVCWP staff have started attending these meetings; current goals are to develop a focus and action plan.	WVCWP staff in cooperation with SJ & SCC Trash Advisory Committee
			CAMPBELL Campbell Public Works Director has been meeting with a subset of the SVALC/ WMI Trash Sub-Group to try and begin a new 'trash action group'. City of Campbell staff attends the Great American Pick Up Implementation Group. Meetings are held leading up to the Great American Pick Up event, which Campbell participates in.	
Additional Outreach	Cross Ref. Sections 7-10 of this Work	n. Outreach Activities for Specific Pollutants See Sections 7 through 10 of this Work	**HIGHLIGHTS** **PESTICIDES** WVCWP staff developed and put together packets of	WVCWP Staff

	Plan	Plan, for additional Public Education and Outreach activities related to specific pollutants of concern.	native seeds for beneficial bugs, to partner with IPM printed material. See below: "Additional Task". Articles on elimination and disposal of diazinon/ chlorpyriphos and on less-toxic pest management were printed in the municipal newsletters for each WVC. A press release on the Green Gardeners program was submitted to local weekly papers and resulted in a 630 word article promoting less-toxic pest control. WVCWP contributed funding for IPM-message ads which ran in the weekly papers. **COPPER** Car Wash Kit flyers, and information on the need to use a Kit for car wash fundraisers, was distributed to staff at 31 schools. A pilot piece with Car Wash Discount Card was developed for residents. See below: "Additional Task". The Car Wash Kit was publicized in the context of a WVCWP article in the 3 weekly newspapers (Feb. 09). Further discussion with the paper in June 09 resulted in a short article on the Kit in July 09. **MERCURY** An article on proper TV disposal was developed and published in several of the municipal newsletters, prior to the switch to digital TV. **TRASH** WVCWP staff developed graphics and messages for an "Anti-Litter" mug. 230 mugs were purchased; 80 of these were for the City of Saratoga which distributed them to staff to help reduce litter, and to publicize the anti-litter message. The remaining 150 mugs were distributed by WVCWP through various events and outreach activities. (see Trash, "Additional Task"	

			below) WVCWP gave out 15 re-usable grocery bags, and began researching the possibility of purchasing re-usable bags, with an anti-litter message, for use as outreach pieces in FY 09-10.	
Additional Outreach	Cross Ref. Sections 7-10 of this Work Plan	n. Outreach Activities for Specific Pollutants Additional Task – Create Outreach Materials	**NEW IPM Outreach Material** In FY 08-09, WVCWP devoted staff time to a new campaign: creation and promotion of a new outreach product with the intent of providing material that would be desirable to residents, and which could be attached to printed information, to encourage residents to pick up and read the printed info. Staff purchased seeds of pest-resistant CA Native plants, which attract "Beneficial Bugs". Staff created envelope labels with graphics, planting information, and pest info for the seeds seeds – Attachments – *Seed Labels*). WVCWP partnered with stakeholders (local Sierra Club members) to apply the labels to envelopes, and fill them with the bulk seeds. A total of **599 seed** packets were distributed via WVCWP in FY 08-09. The seeds were promoted via articles in WVC municipal newsletters, including photos of beneficial bugs. The articles resulted in a total of 24 seed packets sent out due to resident requests. At events, the seed envelope/printed material packets appeared to be popular. Distribution was as follows: Sierra Club: 150 (will be distributed at events, such as Earth Day)	

			Campbell's Great American Litter Pickup: 100 Saratoga Rec Dept. Gardening Class: 100 City of Saratoga Arbor Day: 25 Yamagami's Garden Center: 50 St Mary's School (Enviroscape Presentation) 1/09: 35 St Mary's School (Enviroscape Presentation) 5/09: 30 Sedgwick School "Discovery Day" Enviroscape: 90 Calls from residents: 24 **Total: 599** Details are listed in the "Evaluation" row at the end of this table (below).	
Additional Outreach	Cross Ref. Sections 7-10 of this Work Plan	n. Outreach Activities for Specific Pollutants Additional Task – Create Outreach Materials	**NEW Copper Outreach Material** A pilot piece with Car Wash Discount Card was developed for residents. The Car Wash/ Copper brochure contained a Car Wash Discount Card (developed by Watershed Watch) and a list of participating commercial Car Washes, along with info about copper and toxicity. However, the piece was developed shortly before that particular Car Wash Discount Card was due to expire, so a minimal number were produced (via inkjet printer). WVCWP will evaluate whether to update and re-print the piece. The goal is to provide residents with printed materials that involve a useful item (such as the discount card) which will encourage people to read the attached stormwater pollution messages.	
		n. Outreach Activities for Specific Pollutants Additional Task – Create Outreach	**NEW Anti-Litter Outreach Material** WVCWP staff developed graphics and messages for an "Anti-Litter" mug. Graphics including representation	

		Materials	of a creek, and the message "Clean Creeks… It's In Our Hands – Save a Cup". WVC and WVCWP were listed on the mug, with WVCWP logo and web site address. (See Attachment – Mug Graphics) 230 mugs were purchased; 80 of these were paid for and used by the City of Saratoga which distributed them to staff to help reduce litter, and to publicize the anti-litter message. The remaining 150 mugs proved to be very popular and were distributed by WVCWP through various events and outreach activities. <u>MUGS DISTRIBUTED</u> *ICID Training March 9th- 11 mugs given to municipal staff *WVCWP hosted a SCVURPPP Training - 10 mugs given to attendees <u>*Los Gatos Open House May 2009</u> - St. Mary's School: 9 Mugs to parents & teachers -Evergreen Elementary: 5 mugs to parents & teachers - Approx. 10 mugs to Los Gatos and WV Sanitation District staff * Calabazas Creek Cleanup March 2009 (Saratoga) - 18 mugs to volunteers *5 mugs to City of Monte Sereno Employees *WVCWP Annual Streets and Storm Drains Training- 8 mugs to attendees and presenters. *National Rivers Cleanup Day- approx 18 mugs to volunteers *Watershed Presentation at Vacation Bible Camp in Campbell June 2009 - 5 mugs to teachers/ counselors	

			*St. Mary's School Enviroscape presentations – 6 mugs to teachers	

Public Information/Participation Program EVALUATION – WVCWP PROJECTS

RESULTS for WVCWP PRESENTATION "A Stormwater Campaign in Cartoons" at EPA NT'L CONFERENCE – MAY 2009

EPA's National Conference for Non-Point Source & Stormwater Outreach - Portland OR

WVCWP responded to a request for abstracts presenting successful, low-budget public education campaigns.

WVCWP's presentation showcasing use of cartoons for dissemination of stormwater messages was accepted as a training session at the conference. WVCWP staff created and delivered the PowerPoint presentation.

Attendees: Appx 80-90 stormwater professionals from around the US and US Territories chose to attend this presentation.

No feedback was solicited by, or was provided by EPA to, WVCWP – however, a number of participants made the effort to contact WVCWP and provide positive feedback:

Feedback: 11 people took the initiative to approach WVCWP staff in the 24 hours after the presentation and expressed appreciation for the information conveyed.

Implementation: 6 stormwater programs approached WVCWP staff later in the conference, and declared that they **will** try this concept in their own outreach efforts

Areas which plan on following concepts outlined in WVCWP's presentation:

- Sustainable Business Coordinator *for* Environmental Coalition of South Seattle (NGO which is contracted by municipalities to work with businesses and schools -- distributes spill kits, provides public education, etc. throughout western Washington)
- Stormwater Educator *for* Muncie Sanitary District, Delaware County Stormwater Management, IN
- Water Resource Educator *for* East Metro Water Resource Education Program (Eastern Minnesota)
- Surface Water Plan Educator *for* Washington State Univ. Extension, Jefferson County, WA
- Stormwater Education Coordinator *for* State of KY MS4s Kentucky Environmental Education Council & Kentucky Transportation Cabinet
- Community Relations Specialist *for* City and County of Honolulu, Department of Environmental Services

****

RESULTS for CREEK CLEANUPS

SAN TOMAS AQUINO CREEK CLEANUP @ WESTMONT HIGH SCHOOL EVENT SUMMARY

Saturday September 20th, 2008: In conjunction with International Coastal Cleanup Day

Summary of Survey Completed by Volunteers

(Based on 15 volunteer response sheets)

Most common pieces of trash collected: Cans, bottles, cigarette butts, paper, and food wrappers.

Least common pieces of trash collected: Plastic, rubber.

Most unusual pieces of trash collected: Home-made rocket from plastic bottles, dollar bills.

WVCWP Contributions:

WVCWP provided Trash Tally Sheets with clipboards, Litter Grabbers, and gloves & trash bags (via the Clean A Creek Action Group)

Approximately: 15 recycled shopping bags , juice drinks, and snacks (donated by Whole Foods of Campbell) 10 T-shirts (donated by WVCWP)

Results:

16 volunteers worked at the cleanup for 4 hours each. At a minimum wage of $8.00 an hour this would have cost $512 in temporary labor.

120 lbs of Trash was collected

170 lbs of Recyclables were collected

Total Collected= 290 lbs

Volunteer Feedback:

The Girl Scout troop which volunteered was made up of Scouts from other communities outside the WV area; the troop leader expressed appreciation that this site was very well-organized (compared to other sites where the troop has volunteered).

The Troop Leader stated that they hope to participate in WVCWP cleanups in the future.

CALABAZAS CREEK CLEANUP IN SARATOGA

March 22nd, 2009

A Church group approached the City, asking to do a Clean-up

WVCWP arranged the site for them w/ SCVWD, and provided litter grabbers, trash bags and gloves

WVCWP & City of Staff supervised – Saratoga's Mayor also participated

17 volunteers attended

Summary of Survey Completed by volunteers.

Most common pieces of trash collected: Plastic bottles, food wrappers, paper.

Least common pieces of trash collected: Plastic, rubber.

Most unusual pieces of trash collected: Orange construction cone, part of a car's exhaust.

WVCWP contributions: 18 Stainless WVCWP Mugs

Results: Approximately 15 bags of Trash.

Total: estimated 500lbs – includes several heavy metal objects

SACRED HEART SCHOOL CLEAN UP (K-8) – Saratoga (the school includes students from all WVC)

April 29, 2009

The cleanup took place on school grounds, inside the cyclone fencing, overlooking Wildcat Creek

Sacred Heart School organized the cleanup, based upon previous events held together with WVCWP.

WVCWP contributions: WVCWP staff provided litter grabbers, gloves and trash bags.

Results: Appx 60 lbs of trash were collected.

GREAT AMERICAN LITTER PICKUP - CITY OF CAMPBELL

April 18, 2009

Volunteers were instructed in use of Tally sheets, and were provided with clipboards, etc. Working in groups, volunteers were able to pick up trash and carry out trash monitoring.

160 Volunteers participated, working for four hours.

PW figures that at at minimum wage of $8.00 per hour that works out to $5,120 worth of temporary labor.

Litter was picked up from 5 sites, including the Los Gatos Creek Trail and the Los Gatos Creek County Park.

Results:

35 Bags of recyclables (cans/plastic/glass & paper) were collected

145 Bags of trash were collected

Publicizing done for the event was very successful, as shown by the fact that 160 volunteers participated.

SARATOGA CREEK AT BIG BASIN WAY CLEANUP – CITY OF SARATOGA

May 26, 2009

This Cleanup was organized by City of Saratoga staff

WVCWP contributions: WVCWP staff provided litter grabbers, gloves & bags.

The Cleanup involved parking lots between Big Basin Way businesses and the creek, and the top of the creekbank along Saratoga Creek

Participants included City of Saratoga Staff with the Saratoga Elementary School Student Council and a teacher (9 volunteers).

Results: 10 bags of garbage were collected; City staff evaluated the area as much cleaner than in previous years.

SAN TOMAS AQUINO CREEK CLEANUP @ WESTMONT HIGH SCHOOL EVENT SUMMARY

Saturday May 16, 2009: In conjunction with National River Cleanup Day

WVCWP hosted a Cleanup Event at the site where it has regularly hosted this event.

Volunteers were instructed in use of Tally sheets, and were provided with clipboards, etc. Working in groups, volunteers were able to pick up trash and carry out trash monitoring.

Distance cleaned was appx. 1.5 miles

Summary of Surveys Completed by Volunteers

(Based on 15 volunteer response sheets)

Most common pieces of trash collected: Plastic/styrofoam, bottles, cigarette butts, paper, and food wrappers.

Most unusual items found: Baseball glove in good condition, Tires

WVCWP Contributions:

WVCWP provided Trash Tally Sheets with clipboards, Litter Grabbers, and gloves & trash bags (via the Clean A Creek Action Group)

Results:

15 volunteers worked at the cleanup for 4 hours each.

400 lbs of Trash was collected

80 lbs of Recyclables were collected

Total Collected= 480 lbs

PUBLIC INFORMATION/PARTICIPATION

West Valley Communities: Campbell, Los Gatos, Monte Sereno, Saratoga

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2008-2009 ANNUAL REPORT

CREATE NEW OUTREACH MATERIALS

Due to problems with persuading residents to pick up printed material, WVCWP has searched for means of attracting interest in printed materials. An effort was made to find "desirable" items to incorporate with printed materials, which would encourage residents to pick up and read the information when they pick up the item.

New efforts with this theme included:

--Staff created a Car Wash/ Copper brochure, with Car Wash Discount Card and list of participating commercial Car Washes

--Staff developed graphics for, and ordered, 230 mugs with an anti-litter message: "Save a Cup – Clean Creeks, It's In Our Hands"

--Staff developed graphics for, ordered and packaged a set of seeds for 4 different pest resistant native plants, to attach to "less toxic" gardening materials and to encourage residents to take the printed information.

Response to these items has been much better than trying to distribute printed materials alone. WVCWP will continue to investigate means of incorporating this concept into outreach materials.

Following this theme, in FY 08-09, WVCWP also investigated the feasibility of purchasing re-usable grocery bags, for use in conveying information about litter/ trash problems. Minimum order requirements for this type of item are fairly large, so purchasing these bags will take a large budget commitment, or cooperation with other entities. WVCWP has been looking into cooperation with other entities, and will see whether this bears any results in FY 09-10.

18041 SARATOGA-LOS GATOS ROAD, MONTE SERENO, CA 95030 April Issue, 2009

TELEVISION AS WE KNOW IT CHANGES ON JUNE 12 ARE YOU READY?

THE DIGITAL TV SWITCH

If you watch TV at all, you should be aware by now that on June 12th old analog TVs will no longer accept a signal from an antenna. Some viewers will buy a TV with a "digital tuner" which will allow them to receive the new signal through their antenna. Viewers who use cable, satellite or other pay TV service may not be affected by this changeover. **In addition to the FCC transition, Comcast is updating their equipment. If you are a Comcast subscriber you will need to receive a digital converter box to ensure reception of channels above number 34. The date of this transition varies depending on customer location. Comcast can provide a date upon request. Please contact Comcast directly at 1.877.634.4444 for up to 3 free converter boxes. Or register online at www.comcast.com/digitalnow.** The company will send a technician to install the boxes.

What's Inside

Disposal of old TVs

If you've decided to buy a new TV for this Digital TV Transition, what will you do with your old television? Everyone should be aware that it's **illegal to just throw out a TV.** California law designates televisions as hazardous waste; they cannot be disposed of with regular trash. The television needs to be recycled, and that means dropping it off at an E-waste facility or special event.

This is illegal. You can't just toss old TV sets away.

Why?

About 40% of the heavy metals in landfills come from previous dumping of electronic items. These metals include lead, mercury and cadmium. Over time, waste leaks from landfills, and then these metals can enter our water systems.

Mercury is already an issue in the SF Bay, so local agencies are making special efforts to prevent release of mercury into our environment.

Where?

Where can you go in order to do the right thing and give your TV to a responsible recycler? Your local waste collection service will accept TVs for **no charge** at their drop-off facility. **West Valley Collection & Recycling will be hosting FREE and Easy E-Waste Drop OFF Events at three nearby locations in April.**

Electronics accepted will be TVs, monitors, laptops, DVD and CD players, printers, scanners, vacuum cleaners, electronic toys and games. (No kitchen appliances or light bulbs.)

April 18th (Saturday): Campbell United Church of Christ, 400 West Campbell Avenue, between Winchester and San Tomas.

April 25th (Saturday): City of Saratoga North Campus, 19848 Prospect Road. Located between Miller Road and Saratoga-Sunnyvale Road.

April 25th (Saturday): Los Gatos United Methodist Church, 111 Church Street off Main.

You will need a photo ID with your home address to prove that you are a West Valley Resident. Please call **408.283.9250** for directions and additional information. See information on additional free drop off events at **www. westvalleyrecycles.com**

Thanks for helping to keep Santa Clara Valley healthy!

A SAFE GARDEN: PROTECTING KIDS & PETS

If you use pesticides in your yard, it may not be the healthy green oasis that you have in mind. Children and pets can absorb pesticide residues while playing in the grass and landscaping. Pesticides also get tracked inside to the carpet, where children and pets play. Pesticide residue can even end up on children's toys. In addition, pesticides are carried by rain and yard runoff into our creeks, where they affect local wildlife and enter our water supply.

Who are these Bugs?

One point to keep in mind is that you may not need to be spraying for pests. Many of the bugs you see in your garden are harmless, or even 'beneficial bugs', which can help you control the harmful bugs. These helpful bugs are often killed when gardeners mistake them for pests. For example, this Ladybug larva will eat aphids, but might not be recognized as a ladybug.

If you saw this Lacewing in your garden, would you know it was eating aphids and mealybugs?

To see photos of all forms of various beneficial bugs, visit the UC Davis IPM website at **http://www.ipm.ucdavis.edu/**

One alternative to pesticides is to utilize these beneficial bugs to kill your garden pests. Beneficial bugs can be attracted to your garden by planting foliage that they like such as White Yarrow.

West Valley Clean Water Program (WVCWP) has free seed packets for some of this foliage. The seeds come with a full-color brochure showing photos of the 'good' bugs that you want in your garden.

Free Seeds & Brochure

For your free seeds e-mail WVCWP at: **info.westvalley@comcast.net** or call **408.354.4734.**

Dispose Of Banned Pesticides

And, a last word about Pesticides. Sometimes pesticides are taken off the market as unsafe, and should be properly disposed of. All pesticides containing DIAZINON or CHLORPYRIFOS have been banned from residential use. Check your storage shelves for products with these chemicals, and take them to a Household Hazardous Waste (HHW) site.

Monte Sereno, CA 95030
Phone: 408-354-4734; E-mail: kelly.westvalley@comcast.net

Dear Ms. Carroll:

On behalf of the Conference Steering Committee, thank you for agreeing to make the presentation, ***A Stormwater Campaign in Cartoons,*** at the upcoming ***5th National Conference on Nonpoint Source and Stormwater Outreach,*** May 11-14, 2009 at the Doubletree Hotel in Portland, Oregon. The Steering Committee, as well as the expected attendees, looks forward to a productive exchange of information and ideas on developing and implementing nonpoint source and stormwater outreach strategies.

Conference Format

The conference will run for three days: Tuesday through Thursday, May 12-14. In addition, four optional pre-conference workshops will be held Monday, May 11. A draft agenda is now available on the conference Web site at www.epa.gov/nps/outreach2009/agenda.html.

Your presentation is scheduled for:

Date: Wednesday, May 13

Time: 10:30 - 12:00 p.m.

Session Title: Pictures, Toons & Beyond

Presentation Title: A Stormwater Campaign in Cartoons

The amount of time allotted for your presentation (including any co-presenters you might have) is 30 minutes. Your presentation should be no longer than **20 minutes** so that there is adequate time for speaker introductions and audience questions.

Wednesday, May 13, 2009

7:30 a.m. – 4:00 p.m. **Conference Registration**

8:15 a.m. – 9:45 a.m. **Session A4: Programs Promoting Green Development** ..... Broadway Room

Moderator: Kathy Shay, City of Austin, Texas

— **Blue Thumb—Planting for Clean Water: Using Social Marketing Techniques to Promote Native Gardens, Rain Gardens and Shoreline Plantings within Priority Watershed Areas**
Angie Hong, East Metro Water Resource Education Program, Minnesota

— **Lake Clarity Crediting Program for Lake Tahoe**
Jeremy Sokulsky, Environmental Incentives, LLC, California

— **RiverSmart Homes**
Shelby Laubhan, District of Columbia Department of the Environment

Session B4: Reaching Our Audiences Through University-Based Outreach Programs ..... Multnomah Room

Moderator: Rebecca Power, Wisconsin Cooperative Extension

— **Stormwater Management in Your Backyard: An Extension Education Initiative**
Dr. Christopher Obropta, Rutgers Agricultural Experiment Station, New Jersey

— **Changing Public Behavior: Addressing the Challenges of Applying Social Assessment to Water Management Strategies**
Elaine Andrews and Kate Reilly, Environmental Resources Center, University of Wisconsin, Madison

9:45 a.m. – 10:15 a.m. **Break**

10:15 a.m. – 11:45 a.m. **Session A5: Pictures, Toons & Beyond** ..... Broadway Room

Moderator: Jennifer McDonnell, Tetra Tech, Inc., Virginia

— **Say It with Pictures: Training Kentucky Construction Site Workers in Erosion and Sediment Control**
Barry Tonning, Tetra Tech, Inc., Kentucky

— **A Stormwater Campaign in Cartoons**
Kathy Ottenberg and Kelly Carroll, West Valley Clean Water Program, California

— **Developing and Implementing a Comprehensive Surface Water Education and Outreach Plan for a Rural County**
Pat Pearson, Washington State University Jefferson County Extension

A Stormwater Campaign in Cartoons

Small Agency Uses Cartoons for Adding
Low-Budget Fun
to the Stormwater Message

1

Why Cartoons Appealed to Us

- *BUDGET:*
  We needed a low-budget 'BRAND' image, which could be used in a variety of media
- *COMMUNITY NEWSPAPERS:*
  We wanted to use our community Weekly Newspapers -- which are mailed to every household
- *BROAD AUDIENCE:*
  We wanted an image which would appeal to residents of all types: Parents, Young Adults, Seniors, Students, Teachers, etc.

6

Making it Work: 2 Characters

- *2 Characters works well*
  --2 characters allows for information through dialogue
  --2 characters allows for one to model "WRONG" behavior, & one to model "RIGHT" behavior

Modeling 'Wrong' & 'Right'

Dialogue = "Punch line"

20

Benefits - Brand Recognition

Cartoon characters present a consistent "brand" throughout a variety of **MESSAGES**

- *VARIATION among the STRIPS*
  The strip/characters will be recognized as your "BRAND" yet, they can convey a different message, by varying:
  --the background
  and
  --the "accessories"

12

Benefits - Big Message/ Small Size

- SPEND LESS ON AD SPACE
  --When buying ad space, you need only a small area = LESS COST
- FITS EASILY INTO 8" X 11" MUNICIPAL NEWSLETTERS
  Newsletter are on a tight budget, with limited page space
  They tend to have space for a cartoon, even if not for an article

cartoon in → Municipal Newsletter

10

Benefits - Eye-Catching & Fun

Cartoons draw an audience to look at them.

- *DESIRABLE TO EDITORS:* They add Graphic Interest
  -- Various newspapers have given a 50% PSA discount, in order to include these cartoons in their papers
  -- Municipal newsletters enjoy including the cartoons

Volunteers look for trash in San Tomas Aquino Creek on International Coastal Cleanup day Sept. 20. The West Valley Clean Water Program organized the creek cleanup.

Creek gets a cleanup, thanks to volunteers

WV Clean Water organizes the day

By CHRIS VONGSARATH

Ava Hansen wasn't so much worried about why she was out picking up trash along San Tomas Aquino Creek as she was how much trash she could pick up. The 9-year-old Junior Girl Scout from Troop 60043 learned quickly the importance of keeping the environment clean and in its natural state.

"Lots of people pollute, and they don't care if they cause global warming or not," Ava said.

While not exactly reversing global warming, Ava and a handful of other scouts and volunteers did their part in an international effort to prevent trash from ending up in the planet's oceans.

As part of the International Coastal Cleanup, volunteers from around the world pitched in to pick up trash. Last year, almost 380,000 volunteers from 75 countries netted 6,075,698 pounds of trash.

Closer to home, volunteers cleared trash from Lexington Reservoir, Vasona Lake County Park and San Tomas Aquino Creek on Sept. 20.

Ava said she had a fun time learning about the creek. The scouts challenged each other to see who could find the weirdest thing, which turned out to be a live pig.

The West Valley Clean Water Program, which provides stormwater pollution prevention for Campbell, Saratoga, Los Gatos and Monte Sereno, organized the cleanup at San Tomas Aquino Creek.

Program assistant Kathy Ottenberg said cleaning up the creek goes past mere aesthetics. In addition to having an impact on wildlife, a polluted creek could directly impact residents.

Part of the group's mission is to make sure the municipalities it serves are in compliance with state-administered stormwater discharge permits, which are intended to keep California's waterways clear.

Too much pollution could prove costly to taxpayers because municipalities would have to pay to install inserts to trap trash at stormwater gutters, Ottenberg said.

"It can have a major impact on everybody, even in terms of taxes," Ottenberg said.

About 16 volunteers collected 120 pounds of trash and another 170 pounds of recyclables at San Tomas Aquino Creek, program assistant Patrick Hansen said.

Though the creek is closed off to the public, some people frequently trespass through the area, resulting in the litter. The city of Campbell and Santa Clara Valley

San Tomas Aquino Creek cleaned up by volunteers

By Chris Vongsarath
Campbell Reporter
Article Launched: 09/25/2008 02:26:24 PM PDT

Ava Hansen wasn't so much worried about why she was out picking up trash along San Tomas Aquino Creek as she was how much trash she could pick up. The 9-year-old Junior Girl Scout from Troop 60043 learned quickly the importance of keeping the environment clean and in its natural state.

"Lots of people pollute, and they don't care if they cause global warming or not," Ava said.

While not exactly reversing global warming, Ava and a handful of other scouts and volunteers did their part in an international effort to prevent trash from ending up in the planet's oceans.

As part of the International Coastal Cleanup, volunteers from around the world pitched in to pick up trash. Last year, almost 380,000 volunteers from 75 countries netted 6,075,698 pounds of trash.

Closer to home, volunteers cleared trash from Lexington Reservoir, Vasona Lake County Park and San Tomas Aquino Creek on Sept. 20.

"It can have a major impact on everybody, even in terms of taxes," Ottenberg said.

About 16 volunteers collected 120 pounds of trash and another 170 pounds of recyclables at San Tomas Aquino Creek, program assistant Patrick Hansen said.

Though the creek is closed off to the public, some people frequently trespass through the area, resulting in the litter. The city of Campbell and Santa Clara Valley Water District are installing a passive-use trail.

Hansen said opening up the creek to the public could present a hidden benefit.

"If there is a lot of trash out there, they'll notice it and want to do something about it," he said.

Sunnyvale resident Grace Siu, Ava's mother and leader of the troop, said her scouts have participated in creek cleanups before, but never as part of an international campaign. She said the scouts were up to the task.

Happy Earth Day

We're celebrating another one on April 22

Photographs by GEORGE SAKKESTAD

Earth Day was something of an enigma when it was first discussed at a conference in the fall of 1969.

What was the point of this special day designated for April 22 that would "inspire awareness and appreciation for the Earth's environment?" Back in 1969, it seemed to just follow the beat of the hippie generation and the Summer of Love.

Nearly 40 years later, though, we know better.

Earth Day, first celebrated on April 22, 1970, has grown to become a time when we collectively treasure our planet and share ideas for sustaining our resources.

In the West Valley, we are thinking about the Earth in our homes and schools, in our businesses and local governments.

It starts at home

Los Gatos homeowner P.K. Karnik believes in recycling, but when it came to remodeling his home, he took the concept to another level.

"I look at recycling in a different light," Karnik said. "My whole notion is reuse."

Karnik used Craig's List to unload many of the things he no longer wanted, but thought other people could use. "I advertised free windows to a needy home," he said. "This church contacted me saying they had a home in East San Jose in shambles that they wanted to turn into a daycare center, so I gave them all to them."

He did the same thing with faucets, sinks, chandeliers, mirrors, blinds, cabinets and toilets. "The toilets were 4 years old, and they probably would have ended up in a landfill," Karnik said. "They were picked up by a gentleman that remodeled his rental homes in San Jose. Normally, the faucets would have gone to a scrap yard and melted in a furnace. They were put into the rental houses, along with the sinks."

Karnik also found new homes for his old water heater, plus 14 doors and a lot of lumber. Some of the lumber was recycled to make wooden pellets, but much of it will be reused. "Some large timber was given to my construction crew," he said. "They plan to haul the load to Mexico and assist their poor relatives to build homes."

In explaining his preference to reuse things instead of recycling them, Karnik says, "I save a lot of energy in the crushing process. And there are so many places that need to get fixed. I feel very good about it."

Saratoga resident Hari Sripadanna is also feeling good about

A rain harvesting system can provide water for landscaping and vegetable gardens. At right, Monte Sereno resident Jerry Block talks to John Lewis of Rain Harvesting Systems about the installation of a harvesting system in his back yard. Above, Lewis installs water filtering rain gutter guards at Block's home.

his new home. The architect is waiting for an important piece of paper that says his house is certified LEED Gold—meaning it shows Leadership in Energy and Environmental Design. LEED is a point system developed by the U.S. Green Building Council.

Among other things, Sripadanna installed low-flow showerheads and faucets. A typical shower can use as much as 3 gallons of water a minute, while Sripadanna's use 1.75 gallons.

"What really surprised me was the faucets because they actually feel more forceful than a regular faucet," he said.

Sripadanna also says it has become much easier to build a green home today because the industry has caught up with people's ideas. "Architects have always talked sustainability, but now a lot of things have come together and it's become easier for us to do," he said. "What I want to share with everyone is it's in economic reach for everybody."

One of the more unusual things Sripadanna did was to install a "live" roof that is planted with succulents. It helps keep the house cool in the summer and warm in the winter.

Sripadanna said things like that can quickly add to the points needed for LEED certification.

Sripadanna also designed his home to take advantage of natural sunlight. "There's a quality of ambiance," he said. "You can't describe how it feels when the sun warms the house naturally. It gets low-angle winter sun but not summer sun."

One thing Sripadanna did not do is install solar panels. "If you do small things across the plain, you can get (LEED) credit quite easily without going to solar panels," Sripadanna said. "My house is so energy efficient that it beats the California energy code by 50 percent."

Even so, Kurt Newick of Campbell is a firm believer in solar. He is a solar salesman who is also the founder of the local chapter of the Sierra Club's Global Warming Committee.

"Solar electric panels are far and away the most popular technology," Newick said. "I sell about three or four systems a month."

He said homeowners who are thinking about going solar need to select a company that is both licensed and bonded. "The main thing is for the homeowner to feel comfortable with the person they select," he said. "If the contractor can't answer questions in a timely way, that's a red flag."

Newick also praised a new program started by San Jose-based Renewable Power Solutions that certifies solar installers. "A certification program is critical, especially since solar is pretty new," he said, "And it's a big expenditure."

Newick has just completed an analysis of the fees municipalities charge for permits for solar installations and the subsequent inspections.

"Los Gatos is one of the highest in the Bay Area," he said. Newick's analysis shows that Los Gatos charges $511, while Campbell comes in at $225 and Saratoga charges $92.

"Campbell and Los Gatos are pretty easy to deal with," Newick said. "Saratoga is probably the best. They're pretty easygoing."

Newick also said that perhaps the most important thing a homeowner can do before installing a solar system is to have a roof inspection and a shading analysis done. "This is where you separate the men from the boys. In Los Gatos and Saratoga you have a lot of mature trees. Solar needs sun, and even the wispiest amount of shade impacts the system," Newick said. "A sunny location now may not be sunny later on. And you have no legal recourse if a neighbor's tree grows and shades your array if the tree was there first."

The word sustainability has become interchangeable with green building practices, and Monte Sereno's Jerry Block has taken the concept to heart.

He just installed a 20,000-gallon rain harvesting system that will water his landscaping and vegetable garden.

But Block says being able to store that much water on his property could easily serve other purposes. "In an emergency it can be used for firefighting," he said, "and it could supply the whole neighborhood if there's an earthquake."

Block's system was installed by Fremont-based Rain Harvesting Systems.

Special eaves along the front and sides of his house capture the rain, which then flows through a series of pipes and into four tanks that can hold 5,000 gallons each.

Except for the tanks, the system is invisible.

If the tanks get too full, Block can release the excess and replenish groundwater supplies.

Right now, Block doesn't plan to use the water for drinking, washing or showering because he says there are too many hoops to go through to get approval for that.

However, installing a special filter and ultraviolet light could easily purify the rainwater.

Block also has an extensive solar installation, so he uses very little power from PG&E.

Coupled with his solar panels, Block's rainwater collection system is the next step in his quest to find independence. "This is a way for the everyday American to be a hero," he said. "Make a sacrifice to free us from foreign dependency and invest in your country's infrastructure."

—Judy Peterson

Coulomb Technologies president Praveen Mandal charges his car at a station in front of the company's Campbell headquarters.

Continued from page 19

Government does its part

In the past the onus was put on individuals and big businesses to help shape a more environmentally friendly future by recycling more and conserving energy and water.

But as the "going green" phenomena has sunk deeper into the consciousness of American culture, public agencies, including the cities of Campbell and Saratoga and the town of Los Gatos, have begun to do their part in the creation of a more sustainable future.

Each of the three municipalities has been certified as a green business by the Bay Area Green Business Program, which verifies and motivates businesses to meet higher standards of environmental performance. More than 1,600 businesses and public agencies have been certified since the program's inception in 1997.

The town of Los Gatos was certified as a green business two years ago but has been working steadily toward adopting greener practices for more than a decade.

The town council adopted a water efficiency ordinance in 1992 to promote the conservation and efficient use of water. Guidelines were approved in 2004 for voluntary green building standards on new construction; and in 2008, Los Gatos became the first municipality in Santa Clara County to enroll in the PG&E Climate Smart program, which will help the town offset all of its identified carbon emissions.

Just last year Los Gatos began the "Growing Green Together" campaign in an effort to educate the town's employees to be more environmentally conscious while at work. Each month has a different theme that offers tips for creating a greener workplace and home. Residents can also sign up to receive the same newsletter employees obtain.

Los Gatos High School students Olivia Warne (left) and McKenna Everett look over photographs on display at a show focused on sustainability. Los Gatos Mayor Mike Wasserman (second from right) and Los Gatos High assistant principal Scott Downs also check out the show held in conjunction with Earth Day.

"It's very important for businesses and residents to take personal responsibility. Individual action is going to be key to reducing our carbon footprint," said Regina Falkner, community services director for the town of Los Gatos.

Saratoga Mayor Chuck Page agreed and added that local governments need to do their fair share in creating positive change.

"It's important that governments show leadership and do what it's asking its citizens to do," he said.

The city of Saratoga has taken many steps to become a better steward of the environment, including going to "paperless" Saratoga City Council meetings, using biodegradable utensils and cups at city hall, replacing older light bulbs with more energy-efficient models and buying two hybrid cars to replace aging city vehicles.

This month the council approved an ordinance that amends the city code to include a compilation of existing "green" laws that promote sustainability through the reduction of greenhouse gases. Putting all the laws in one section makes it easier for residents to find out what ordinances the city has passed that promotes a greener Saratoga, Page said.

But no matter what efforts cities try to make to be better stewards of the environment, they will inevitably be constrained by time and money.

But, thanks to the federal stimulus package, the city of Campbell is entitled to a $163,000 grant that must go toward energy-efficient programs. The money could go toward a number of things, but the city might look into using the funds for a solar panel analysis, said Dan Rich, city manager for Campbell.

Like Saratoga, the city of Campbell also plans on going to "paperless" city council meetings. Many other city commissions have already gone paperless.

Although city council and staff are currently looking into what the city can do in the future to reduce its carbon footprint, the city has always been "pretty aggressive" about looking into greener programs before it became fashionable, Rich said.

Rich said there has always been a desire by elected officials and residents to look into creating green policies and adopting environmentally friendly business practices. Not only have the greener policies helped out the environment, they have also helped Campbell's bottom line.

"It also made good business sense," Rich said.

—Brian Babcock

A photograph of bicycles by Fisher Middle School seventh-grader Natasha Cougoule is part of the Earth Day photo show in Los Gatos.

Education is the key

Community members realize that teaching the youth of today is an important part of shaping the leaders of tomorrow. Educators, parents and students from around the West Valley used their own skills, expertise and passion to coordinate a number of different activities on and around April 22 with one shared goal—to promote the understanding and protection of Mother Earth.

From kindergarten to college, no grade level went unnoticed.

A used book sale was scheduled April 22 to emphasize going green through recycling in and around the campus center at West Valley College, 14000 Fruitvale Ave.

"Whether you call it reducing your carbon imprint or just saving a tree, the idea is there are many popular books that trade hands anyway," said George Mageles, community resource coordinator for student health services at West Valley College.

There will be hard- and soft-bound books for sale throughout the day, and the funds raised will benefit the school's classified staff scholarship.

Mageles anticipates selling the books will be a success because faculty and administration offered such generous support preparing for the event. They offered a wide array of donations after clearing bookshelves in their homes and offices.

Students and parents from Louise Van Meter Elementary School also used a book setting as inspiration for a project.

Third-graders from the school worked on art pieces from April 14 to 16, using objects they found while spring cleaning in their homes earlier this month, including VHS tapes and old toys.

"It was junk, but all of a sudden it was shiny and new. It was just a major shift of perspective," said Daniella Simon, a parent of a student attending Van Meter. "The whole idea was don't look at things in terms of throwaway."

The students will dedicate their eco-art projects on April 22 to the Los Gatos Library's Green Section. Simon said this is a natural setting to display the work since "the library is all about the three Rs—reduce, reuse, recycle."

Simon was inspired to lead the project a year ago after first reading about eco-artists who use such materials as bottle caps to make beautiful mosaics.

The project grew into a collaboration of Art Docents of Los Gatos, Los Gatos Library, the West Valley Green Leaf Committee and Van Meter.

Simon said there were different benefits in working on the artwork.

"There seems to be gap in terms of getting information to kids," Simon said, "and this is one of the big issues that is driving me at this point. They're inheriting everything. We have a very short period of time to retrain ourselves and retrain our children."

Students from Los Gatos High School, Fisher Middle School, Blossom Hill and Lexington elementary schools are also putting their artwork on display during a photography show focused on sustainability. The exhibit is scheduled for April 25 at the Los Gatos Civic Center, 110 E. Main St., from noon to 4 p.m.

The idea was for students to take pictures to "show us the world through their eyes," said Nate Donovan, Los Gatos High photography teacher. Students ventured into different parts of the community, including local businesses, to capture the environmental effects we all have during our day-to-day lives.

No matter who you are, eventu-

ally "we are going to run out of resources," said freshman McKenna Everett.

She took 200 photos for the project, one she said is important to raise community awareness. The photographs submitted varied in styles, from scenic to abstract to photojournalism.

A picture alone is worth 1,000 words, but the photos displayed together will allow residents to "see how it all feeds into the story," said Nicole Williams, a parent volunteer for the event. "When you look at them all collectively, it makes a fantastic impact."

—Shannon Barry

Green means business

Ungdo Shin cares about what he puts in his customers, so much so that he is willing to pay more for it.

The owner of Big Basin Café in Saratoga runs an all-organic shop, meaning everything from the products to how they are served come naturally from the earth.

"In order to serve organic coffee, the delivery system also has to be non-chemical," Shin says. "We couldn't use a so-called recyclable cup, which is cost-effective but is chemically infested. So, we use a biodegradable cup instead, or else there is no use in serving organic coffee."

The cost of using biodegradable materials can be up to three times more expensive, Shin says, but it allows him to be able to call his café a truly organic coffee shop. Biodegradable—as opposed to recyclable—materials can be mixed in with other waste without contaminating the soil. Recyclable materials, meanwhile, can only be recycled, as the chemicals to make them are not natural.

For its efforts, Big Basin Café, 14471 Big Basin Way, received high marks on ecovian.com, a site featuring green business reviews and topics. The coffee shop earned five-star ratings in both organic coffee and tea served and biodegradable containers used.

In addition to tasting better, the organic coffee and natural foods at Big Basin Café, as well as the containers they're served in, benefit the customers in the long run, too. Biodegradable means all-natural, and that reduces the amount of dioxins, known to be cancer causing agents, the body absorbs, Shin said.

"Some customers are aware of what organic really means and some customers just like the taste of our coffee. But knowledgeable people know about the advantages of having biodegradable coffee and materials," Shin said.

While some businesses are going green themselves, others are helping people become more eco-friendly. Campbell-based Coulomb Technologies has been quickly rising as the leading producer of electric vehicle charging stations.

A construction worker sorts through the lumber at the home of Los Gatos resident P.K. Karnik. The lumber will be recycled to make wooden pellets, or re-used on homes in Mexico.

A mattress floats in Lexington Reservoir. It's just one of the many such items volunteers will target at a Lexington cleanup day on May 16.

Many drivers of electric vehicles can only charge their cars at home, but Coulomb allows them to refuel at the workplace or when they're out and about. The company has stations up and running in San Jose and San Francisco and as far away as Amsterdam.

And with just about every major automaker shifting toward more fuel-efficient and eco-friendly cars, Coulomb's smart-charging stations may be popping up in more cities.

"All of the automakers are doing electric cars, and we'll see them emerge between now and 2012," said Richard Lowenthal, Coulomb's founder and CEO. "So, we're out there selling stations and creating interest, and it's a worldwide thing."

Because it takes anywhere from four to eight hours to fully charge a vehicle, stations must be strategically placed. Right now, Coulomb is targeting the workplace and downtown areas, places where people tend to be for an extended period of time. But as more electric vehicles begin to hit the road, Coulomb may be looking to add stations at recreational venues, such as ballparks and arenas, Lowenthal said.

Lowenthal projects that in the next five years there will be remarkable advances in the industry, with more electric cars, charging stations and technology streamlining the two. Electric vehicles could be charging in a matter of minutes and drivers could be recharging at service stations, the way how most people do now at gas stations.

Most of these initiatives, Lowenthal says, will be made possible through the stimulus package.

"It's a good time to be doing green programs, especially green transportation," Lowenthal said. "It's good for cities to say, 'We're going to be electric vehicle-welcoming.' "

Also getting a boost from the stimulus package is Akeena Solar in Los Gatos. It may be nothing new to see solar panels on residential and commercials roofs these days, as property owners are beginning to invest in renewable energy. But Akeena is preparing for the next phase of clean technology: mixing aesthetics with being eco-friendly.

The latest solar panel from Akeena comes with a non-bulky, sleek design, but still has the reliability to last over time. The jet-black panels can be installed closer to the surface of the roof, limiting their visibility to onlookers.

When consumers begin looking for beauty to go with the brains, it's a sign that new technology has caught on.

"Without a doubt, as solar becomes more mainstream, you see that families are looking for panels that will reduce electricity bills and plus will also look well on a person's home," said Jose Tengco of Akeena Solar. "We've worked hard to ensure that we can provide the best looking and most reliable panels on the market."

The hardest part for those thinking about going solar is making the investment, but even that is starting to change. With solar power becoming more available, the price to make the switch is getting cheaper, Tengco said.

According to a study by the California Public Utilities Commission, Californians in 2008 "installed twice as many megawatts of solar power than the year before, and demand for new solar projects continues to hit record levels." Moreover, the California Solar Initiative led to more than $5 billion worth of private investment in solar projects.

"Clearly, with the going green movement and climate change, people are turning to renewable energy. And from an economic view, they find they are getting a strong return on the money invested today, so it becomes a win-win," Tengco said. "Families get to reduce electricity costs and at the same time address climate change."

—Chris Vongsarath

Series of local events related to Earth Day

Although Earth Day is officially April 22, many Earth Day-related activities will be held throughout the week and are listed below:

Life lab—On April 22 staff and students from Saratoga Elementary School will honor Earth Day with the official opening of their Life Lab Garden. There will be different displays and presentations from 9 a.m. to 2:30 p.m. in the outdoor classroom of the school, 14592 Oak St., including water filtration systems, insects of the garden, worm composting and solar cooking.

Used book sale—A used book sale is being held April 22 to emphasize going green through recycling in and around the campus center at West Valley College, 14000 Fruitvale Ave. in Saratoga. The event is a fundraiser for the school's classified staff scholarship.

Arbor Day—A tree-planting ceremony takes place April 24 at 10 a.m. at La Rinconada Park, Wedgewood Drive and Granada Way.

Another Arbor Day celebration— The city of Saratoga will celebrate trees on Arbor Day with a community gathering at Beauchamps Park, between Beauchamps Lane and Bowhill Court. The event will be held on April 24 at 3:30 p.m. Residents can help plant a tree, learn more about the trees in Saratoga and can take a seedling home that they can plant themselves.

Highway 9 clean-up—Five local Rotary Clubs, including those from Saratoga, Los Gatos, Campbell and Cupertino, are sponsoring the "Great Highway 9 Cleanup" on April 25. Volunteers for the cleanup are asked to meet at the La Hacienda Inn, 18840 Los Gatos-Saratoga Blvd., at 9 a.m. for a free breakfast. Volunteers and Rotarians will then pick up trash along Highway 9 for a couple of hours before being treated to a barbecue.

VOLUME 126, NUMBER 7 LOS GATOS, CALIFORNIA FEBRUARY 17, 2009

Photograph by Neal Waters

Gardener Arthur Ragan, raking leaves in front of the Wells Fargo building on N. Santa Cruz Avenue in downtown Los Gatos, is among the Allied Landscape Services employees to be certified a Green Gardener in the West Valley Clean Water Program. The program serves Los Gatos, Monte Sereno, Saratoga and Campbell.

Class helps gardeners join the green team

Program has been winning awards

By JUDY PETERSON

A green gardening program that was developed in part by the West Valley Clean Water Program has been winning awards for its innovative ideas.

The clean water program, which serves Los Gatos, Monte Sereno, Saratoga and Campbell, was created to control pollution being dumped into creeks, streams and stormwater drains.

Recently, the California Stormwater Quality Association honored the Green Gardener program with an outreach award for the work it has done with small landscaping contractors.

"It was a 10-week course to educate landscape professionals on what type of environmentally safe practices are out there in place of the norm," Tito Fonseca of Allied Landscape Services said.

Fonseca and two other Allied employees were among the first to become certified Green Gardeners.

"It taught us simple gardening practices like pruning techniques, composting and minimizing water use," he said.

The latter will become even more important as water rationing is expected to be mandated in Santa Clara County beginning next month.

"We learned to use mulch over bare soil to keep water in the ground," Fonseca said.

The program also focused on minimizing the use of herbicides. "The chemical industry does a very good job advertising their products," he added, "but they don't touch on the environmental impact chemicals have."

Fonseca works with clients in both Los Gatos and Campbell.

"Green gardening is becoming more and more important to clients. Customers want to see that contractors are educated and doing what we can to preserve, protect and not pollute their property," Fonseca said.

Solutions Gardening Service owner Abel Yanez agrees.

"We wanted to separate ourselves from regular gardeners to see how we could help customers save water," Yanez said.

Yanez is using his newfound skills at customers' properties in Campbell, Saratoga and elsewhere.

"We're trying to re-layout sprinkler systems, and we're changing to organic fertilizer to help with the environment," he said.

One of the important things Yanez learned was how to test soil so that the right plants are properly placed. "You plant here and there," he said. "Now we know exactly what to do."

Yanez described the Green Gardener program as very beneficial. "We are planning to send five more people," he added.

"inadequate community facilities: e.g. the lack of a performing arts center and an inadequate library." This was 18 years ago.

Redevelopment money has funded a wide variety of improvements, including the town plaza, street reconstruction and a contribution to the high school pool.

We support the use of redevelopment funds for a new library.

ANN ROBERTS, PRESIDENT
LWV of Southwest Santa Clara Valley

More support for a library in Los Gatos

I support Los Gatos building a new public library. I *do not* support cleverly worded, misleading petitions.

ALICE H. HANSEN
Los Gatos

Blanket ban at concerts is ridiculous

Banning blankets at the local summer concerts—now I have heard everything. You either have concerts and have a fun atmosphere or you don't. The grass recovers after the concert season. It has looked fine for months.

this town that I would fight for their park.

It was another member of the skateboard park committee who decided to use paid petitioners and paid them. Steve Glickman did not hire the petitioners. They got the job done. Yes, we were beaten in the election due to dirty politics and a dirtier press. I would be happy to expound upon that at another time. The residents voted, and for whatever reason, they voted against building the park.

You talk about money wasted on elections. The town council spent more than $500,000 on surveys that concluded if the construction of a new library went to a vote, it would be turned down. Don't get me wrong; I am in support of a new library. However, there are more efficient plans and ideas that will cost far less. That is why it is so important to allow the voters to decide how the town spends taxpayer money on major projects. Why have this and other extreme expenditures pushed down our collective throats?

If you, the voter, decide to spend $18 million on a library, then I'm all for it. We have been told that the money is coming from redevelopment funds, but that is only $12 million. The rest will come out of the town gener-

worked with the developer on the First Republic building was interesting. Look at the building. It has Tuscan columns holding up arches here, Mission-like but fake Corbel-looking shapes holding up straight openings over there, windows with wood shutters, palladium windows with and without columns, straight windows without adornment, Craftsman-style exposed knee braces and an oversized tile roof. That it came out OK is testament to the developer, but stylistically it's a Tuscan, Mission, Monterey, Craftsman mess—definitely the kind of thing a committee would produce.

Let's let some originality happen. Look at what's going on in other places, countries, cities. Curious juxtapositions of color, shape and style create visual interest, not discord. Designing harmonious sameness will give us a look that one can understand easily in one pass. Los Gatos can be a much more interesting place than that. Let's allow some creativity, expressiveness, even oddness to happen here. We don't want to be known as a city of conformity, do we?

GEORGE HAVELKA
Los Gatos

Yellowjackets?

Use less toxic ways to control pests and prevent polluted runoff from entering our creeks and the Bay.

Fill yellowjacket traps with apple juice.

Subject: "Enviroscape" at Audubon Society Wildlife Education Day
Date: Tuesday, October 28, 2008 10:52 AM
From: Marj Ottenberg <marjott@yahoo.com>
To: <kelly.westvalley@comcast.net>

Kelly Carroll
West Valley Clean Water Program,
18041 Saratoga-Los Gatos Rd., Monte Sereno, CA 95030

Dear Ms. Carroll--first, let me say I wanted to send this by U.S. Mail--and have been trying for 3 days--but my printer refuses to accept my requests! So, I fall back on electronic mail!

Our Sierra Club group was THRILLED to have Patrick Hansen bring your Enviro-scape to share our space at Santa Clara Valley Audubon Society's annual Wildlife Education Day! It was the HIT of our corner of the affair! We especially appreciate the fact that it educates parents along with the kids-- who are enjoying squirting and sprinkling the various "contaminants" on the "environment"--and watching it wash into gutter to creek to Bay. Hopefully, these kids will CONTINUE to prod parents and friends, NOT to thoughtlessly discard stuff, because they now KNOW what harm such actions can cause! Patrick did an outstanding job, relating to the kids and "telling his story". I don't have a count of attendees--but everyone had to park at Monte Vista High School, about a mile up McClellan Road, and SCVAS hired school buses to ferry people from parking lot to the "party", and back again throughout the day (no cost to riders!); that parking lot was almost
completely full all day--so we know LOTS of people came! SCVAS covers the south half (and perhaps more) of Santa Clara County; they have active programs for kids as well as adults, including classroom sessions in local schools; (their monthly lecture meetings--in Palo Alto and Campbell-- draw several hundred members! I wish our Sierra Club Group could do as well!)
I was quite interested in your "mercury-free" thermometers--FAR superior to the old glass ones in many ways! I'd like to buy a few of them, to show to Sierra Club trip leaders--who are responsible for health care for trip participants. Next time I'm in Monte Sereno, I may stop by----
meanwhile, you and Patrick have our sincere THANKS! for helping us educate (and entertain) a LOT of local residents!
Marjorie Ottenberg, Program Chair, Guadalupe Regional Group, Loma Prieta Chapter, Sierra Club.

Discovery Day Enviroscape Presentation Outline

Intro: Hello My name is…

Background on the West Valley Clean Water Program….

Questions:

1. What is nonpoint source pollution?
2. What is point source pollution?
3. What is a watershed and water cycle?
4. What is the difference between a sanitary sewer system and a storm drain system?

Provide background information to audience:

What is a coastal zone? Answer Page 7. Give examples of local SF bay.

Importance of coastal wetlands.

How coastal zones are affected by water pollution.

a. Car Washing (Talk about Car Wash Kit)
b. Pet Waste
c. Hazardous Materials
d. Paint
e. Swimming Pools
f. Trash
g. Pesticides

What the West Valley Clean Water Program does and how you can help.

a. Take car to carwash, or ask about carwash kit for fundraisers
b. Reuse mugs, canvas bags etc., wrapping paper..
c. Participate in creek cleanups, pick up trash if you see it.

Play on Enviroscape model.

Dear Patrick, Kelly, and Christine,

The Sedgwick PTA, Sedgwick Staff, students and parents would like to say "Thank You" for participating in Discovery Day 2009! The students thoroughly enjoyed your presentation on Preventing Watershed Pollution. This important presentation made an impact on the students, including my 3rd grader who came home talking about how he can keep the waterways cleaner by picking up garbage by the drains and by the sidewalks.

Discover Day is a proud Sedgwick tradition that our children enjoy very much. We sincerely appreciate you taking time out of your schedule to help educate our kids. I am enclosing thank-you letters written by the children of Sedgwick Elementary.

Sincerely,
Tracey Trimeloni
PTA volunteer

WVCWP School Presentation Feedback

Thank you for inviting the West Valley Clean Water Program to give our watershed presentation. We ask you to please take the time to fill out this form. Your feedback will help us to deliver better presentations in the future. Please circle the number that corresponds with your opinion for each category. Circle 5 if you strongly agree with the statement, 4 if you agree, 3 if you are neutral, 2 if you disagree, and 1 if you strongly disagree.

A. OVERALL	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree
1. Setting/Room was pleasant	1	2	3	4	5
2. Materials used were useful	1	2	3	4	5
3. Content was interesting	1	2	3	4	5
4. Participants learned a lot	1	2	3	4	5
B. Speakers					
1. Speakers were knowledgeable	1	2	3	4	5
2. Speakers able to answer questions	1	2	3	4	5
3. Speakers kept audience interested/engaged	1	2	3	4	5
C. Results					
1. Presentation improved the students understanding of watersheds and urban run-off	1	2	3	4	5
2. I would consider having the WVCWP present at future events.	1	2	3	4	5

Comments:

Patrick was good with kids. He was on time and even got through everything he needed to do with the kids with the shorter time frame. The kids really enjoyed the hands on. Thank you so much. Sincerely Chris Daly

Created 7/23/08 PH

Annual Cleanup Program

West Valley Collection & Recycling (WVC&R) will collect an unlimited number of items from your curb at no additional cost for one day only.

Please have your items, containers and bundles curbside by

6 AM on Wednesday, August 27, 2008

WVC&R will collect:

- Items weighing up to 70 pounds (except as described below)
- Garbage in 32 gallon plastic bags, 32 gallon cans, and sturdy cardboard boxes (all small items must be contained)
- Tree prunings, branches and scrap wood up to 3" in diameter and 3' long in tied bundles weighing up to 70 pounds

WVC&R will not collect:

- 35, 65 or 95 gallon wheeled carts (they are awkward to lift manually)
- Concrete or Dirt (call Guadalupe Landfill 408.268.1670)
- Tires (call Guadalupe Landfill 408.268.1670)
- Items containing CFC's such as refrigerators (call WVC&R 408.283.9250)
- Household Hazardous Waste (call 408.299.7300 or visit www.hhw.org)
- E-Waste, Universal Waste, Motor Oil and Water Based Paints:
    - You can drop off TV's, Computers, household batteries, motor oil and water based paints at WVC&R's processing facility by appointment. For more information call customer service at 408.283.9250 or visit www.westvalleyrecycles.com
- Large items or containers over 70 pounds:
    - WVC&R will collect large items such as sofas and refrigerators for a fee. To schedule an appointment please call customer service at 408.283.9250

WVC&R makes it easy for you to donate your reusable items. For assistance locating local charitable organizations, visit www.westvalleyrecycles.com or call 408.283.9250.

Please remember to place recyclables in your recycling cart for your regular weekly collection.

To learn more about any of these programs visit www.westvalleyrecycles.com or call customer service at 408.283.9250.

You must have your current invoice available.

Have questions about your recycling service?

Ask Randy

Q: What do I do with my used charcoal?

A: You can recycle charcoal. When you finish cooking, pour water on the briquettes. Let them dry thoroughly. Next time you grill, mix half new charcoal with half used.

The absolute safest way to dispose of ashes, regardless of whether they're red-hot or seemingly stone-cold, is to put them in a small, galvanized metal trash can that is dedicated to the purpose of ash storage. Keep the can away from any flammable materials, like your house, wood pile, dry grass, or weeds. Once ashes are completely cold bag them before placing into your garbage cart. If a dedicated ash container is not an option, stir through the ashes to make sure they are absolutely cold before placing them in the your garbage cart.

Remember, even ashes that seem cold on the surface may still be hot deep inside, even after sitting for two days, so wait at least 48 hours before disposing of them in the garbage.

AT YOUR SERVICE: Curbside Collection for Used Motor Oil

Summer's here and time to get the car in tip-top shape. West Valley Collection & Recycling provides FREE containers for your used motor oil so you can keep your car running smoothly, and help our collection go smoothly, too.

Call customer service at **(408) 283-9250** to order your FREE OIL JUGS AND OIL FILTER BAGS and WVC&R will deliver them curbside on your next collection day.

Schedule a drop off appointment for the items listed below by calling (408) 283-9250:

- ✓ Used motor oil and oil filters
- ✓ Water based paints
- ✓ Universal Waste = batteries, fluorescent tubes and bulbs and other mercury containing lamps, thermostats, electronic devices, electrical switches and relays, pilot light sensors, mercury gauges, mercury added novelties, mercury thermostats and non-empty aerosol cans that contained hazardous materials.
- ✓ E-Waste = televisions and computer monitors, CPUs, laptop computers, external computer hard drives, computer keyboards, computer mice, computer printers, DVDs and VCRs.

E-Waste Drop Off Event

E-Waste Drop Off Events will be taking place in West Valley cities soon. Please go to www.westvalleyrecycles.com to find the event in your community. Drop off E-waste such as computers, computer monitors, hard drives, TV's and VCR's absolutely FREE.

Clean Yard Trimmings

Keep your yard trimmings "Green" and your recyclables clean by keeping all garbage out of your yard trimmings and recycling cart. Garbage contaminates recyclable materials.

West Valley Recycles! Summer 2008

SPLIT BODY TRUCKS: Keeping Your Yard Trimmings and Garbage Separate

It's been more than a year since West Valley Collection & Recycling began the single-stream recycling program and rolled out our new split body trucks.

Our split body trucks have made a big difference in the neighborhoods they serve on trash day, because now in most neighborhoods one truck collects all garbage and yard trimmings, where previously two were needed.

Look for new labels on the back of the trucks identifying the material in each side. The collection compartment of these trucks are completely separate with garbage occupying 40% of the capacity, and yard waste filling the other 60%. The driver maneuvers the hydraulic arm to lift and empty the contents of your garbage and yard waste cart into the chute. After tipping the cart, the driver uses a toggle switch to direct the flow of material into the appropriate chamber, keeping the two materials completely separate. The result of using split body trucks: fewer trucks moving through our neighborhoods on collection day, fewer trips to the landfill, less wear and tear on our roads, less pollution, and fewer greenhouse gasses. Next time you see these trucks on collection day, they may appear to be white, but now you know, they are really pretty green.

Remember, Keep your yard trimmings "Green" and your recyclables clean by keeping all garbage out of your yard trimmings and recycling cart. Garbage contaminates recyclable materials.

KEEP UP THE GOOD WORK!

West Valley Collection & Recycling customers are loving single-stream recycling. The use of split body trucks mean less noise and pollution and the single-stream system means more efficient collection. Everyone is doing a great job.
Here are a few reminders to ensure collection days keep running smoothly and our neighborhood streets stay clean and neat too. Remember:

- Place carts with the wheels against the curb, at least two feet apart.
- Situate carts at least five feet away from vehicles and other obstructions such as basketball hoops.
- Secure light items such as plastic grocery bags and packing peanuts in bags to eliminate litter.
- Flatten and breakdown all cardboard. This will maximize the capacity available in your recycling carts.
- Do NOT overstuff carts.
- Please be sure lids are closed.
- Keep Recycling.

Don't Get Stuck with Your Sharps–Dispose of Them Properly

PROPERLY AND SAFELY DISPOSE OF YOUR SHARPS–HERE'S HOW:

✦ **Pharmacies, Doctor's Offices or Clinics:** Place your used home-generated sharps in a biohazard commercial sharps container and contact your Pharmacist, Clinic Administrator, or personal Physician, and ask if they have a take back program in effect. Sharps containers can be purchased at your local pharmacy.

✦ **Mail Back Services:** If you purchase sharps on-line, please remember to request a pre-addressed, prepaid mail-back box for your used sharps. A list of mail back services approved by the California Department of Public Health can be found at the following website: www.cdph.ca.gov/certlic/medicalwaste

✦ **Santa Clara County Household Hazardous Waste (HHW) Program:** The HHW Program accepts sharps waste, pharmaceuticals (No Controlled Substances), and other household hazardous waste from Santa Clara County residents (except Palo Alto residents). For more information on pharmacies and other locations that accept used sharps or to make an appointment to dispose of your sharps, visit **www.hhw.org** or call **(408) 299-7300**. Remember, residents must place their used sharps in a biohazard commercial sharps container.

Home generated sharps are needles, syringes, and lancets that assist people who use sharps or syringes at home to manage an illness. When sharps are improperly disposed of they pose a threat to sanitation workers, adults, children, and even pets with needle-stick injuries. Because of the high risk to the community and environment, Senate Bill 1305 was passed and will take effect on September 1, 2008. This law makes it illegal to place home generated sharps in the trash or recyclable containers.

West Valley Recycles!

Spring 2009

THEY'RE COMING, THEY'RE FREE!

Electronic Waste Drop-off Events are the Place to Be

West Valley Collection & Recycling is sponsoring three FREE e-Waste Drop Off Events this spring.

HERE'S WHY:

Toxic substances in electronic waste include lead, mercury, and cadmium. A typical computer monitor may contain more than 6% lead by weight. Capacitors, transformers, PVC-insulated wires, and PVC-coated components are loaded with toxins and carcinogens. In the U. S., an estimated 70% of heavy metals in landfills come from discarded electronics. Electronics do not belong in the trash!

HERE'S WHERE & WHEN:

April 25th, 2008 9:00 AM - 2:00 PM
City of Saratoga, North Campus
19848 Prospect Road, Saratoga, CA

April 25th, 2008 9:00 AM - 2:00 PM
Los Gatos United Methodist Church
111 Church Street, Los Gatos, CA

April 18th, 2008 9:00 AM - 2:00 PM
Campbell United Church of Christ
400 West Campbell Ave, Campbell, CA

HERE'S WHAT:

Unlimited amount of TVs, Computers, Monitors, Electronic Toys, Fax Machines, Phones, Copiers, HDTVs, LCDs, typewriters and Stereos including speakers will be accepted at these events.

However, we do *not* accept light bulbs, kitchen appliances or hazardous waste.

Congratulations, 2008 E-Waste Recyclers!

COLLECTIONS WERE A SMASHING SUCCESS.

Last year, a total of 169,776 pounds of E-Waste was collected from Campbell, Los Gatos, Saratoga and Monte Sereno residents who participated in our E-Waste Drop Off events. That's 169,776 pounds of dead monitors, outdated cellphones and ancient fax machines. This year, let's work together to set a new standard for the collection of Electronic waste.

Clutter Busting

Here comes spring! Let's enjoy the many reasons to get outside and enjoy the outdoors: great weather, flowering trees, tulip bulbs pushing their way towards the sun. The fact that our houses are filled to the brim with clutter—the aftermath of a long, cold, winter is another reason to get out of the house. Here are some ideas to de-clutter the house and enjoy the outdoors too. These tips make the job easy. First, organize what is not trash into three labeled piles: sell, donate, or recycle. Next, get to work:

Have a garage sale or even better, organize a neighborhood garage sale. Better yet, get your *neighbor* to organize it!.

Donate your gently used clothing, books, furniture and working appliances to a local thrift store benefiting charity. Some organizations provide pick-up service, and all of them should provide you with a donation receipt to use as a write off on your income taxes.

Create a compost pile with your tree trimmings and lawn clippings. (Remember, May flowers are right around the corner-this compost will come in handy later.)

Participate in the West Valley Collection and Recycling Clean Up Event. It's free and it's easy. We'll collect an unlimited amount of your items at the curb on your neighborhood's designated day. Items weighting over 70 pounds will not be accepted. Look for our flyer in the mail two weeks prior to the event.

Request a bulky item pick-up. We'll pick things up from your curb for a small fee. Just call customer service at **(408) 283-9250**, we'll be right over.

Recycle items that can't be reused.

Put hazardous waste in its place. Batteries, light bulbs and water based paints do not belong in our landfill. They can be dropped off along with electronic devices at our facility. Check out www.westvalleyrecycles.com ewaste and universal drop off for more information.

Drop off your e-waste. The televisions, computers stuff, and vintage VCRs that didn't get picked up at the big garage sale can be dropped at the ewaste events coming up. Check out the e-waste article in this issue for what to bring, our hours and directions.

You must have your current invoice available.

Have questions about your recycling service?

Ask Randy

Q: I am going to bring my old video cameras to an e-waste drop-off location this spring. May I also bring my bottles of pesticides that I no longer use?

A: No. The Electronic Waste Events are computers, monitors, mice, keyboards, cellphones, cameras, old fax machines, and the like, not hazardous materials. Automotive fluids, lawn and garden chemicals, and household cleaners and poisons, can be disposed through the Santa Clara County Hazardous Waste Recycling and Disposal Program. For details, call **(408) 299-7300** or visit **www.hhw.org**. *To submit a question for "Ask Randy" send him an e-mail at customerservice@westvalleyrecycles.com with "Ask Randy" in the subject line.*

Greening your Cleaning

Get all of the dirt on how to clean your home in a planet-friendly way. Just in time for spring! Make your mother proud. Mother Earth, that is.

Floors: Vinegar is an excellent cleaner for ceramic tile or linoleum. Used straight or mixed with water, vinegar and a sturdy mop are all you need for a green, squeaky-clean kitchen floor.

Sinks: One part vinegar, four parts baking soda and several drops of your favorite essential oil(s) makes for a pleasant, earth-friendly sink scrub. Just like the store bought kind, apply the paste with a sponge, let sit for a few minutes then rinse for a sparkling clean sink.

Windows: Vinegar again, this time in a spray bottle. Wiping vinegar-sprayed glass with crumpled newspaper will make your windows shine bright. Don't clean windows when they're in direct sunlight, because they will dry too fast and look "streaky."

Rugs: Shake baking soda over the carpeting before vacuuming to help to absorb odors. For spot cleaning, rely on your old friend, vinegar. Spray it on, scrub out the spot with a clean cloth. Don't worry; the vinegar smell is gone in no time.

Furniture: Sprinkle stale cushions and chairs with baking soda, then vacuum after letting it sit for a while.

Toilet and Tub: Spray with vinegar first, then sprinkle on baking soda for natural, fizzy cleaning power. Scrub with a sponge or toilet brush, then rinse clean or flush.

Garbage cans: Borax is a mineral that will prevent mold and fungus, and keep away insects. Just sprinkle on the bottom of your carts or household cans.

Bad Smells: Zeolite* is a natural mineral that absorbs odors and also controls excess moisture in the air. Use it as a general deodorizer and to combat mildew or mold.

***Bonus!** When used in refrigerators and freezers, Zeolite can reduce electricity cost by up to 12% by maintaining optimum humidity, and it helps keep food fresher.

More Green Cleaning is Just a Click Away

Environmental Home Center is an online source for green building supplies, including people-friendly cleaning supplies, non-toxic paint, natural carpets, sustainable wood products, and energy-efficient insulation. (www.environmentalhomecenter.com).

Seventh Generation (www.seventhgeneration.com), the leading seller of green cleaning products in North America, offers tips on green cleaning.

The Green Guide (www.thegreenguide.com) provides consumers with practical, everyday household- and market-level actions that can yield system-wide environmental, health, and social change.

West Valley Recycles!

Fall 2008

DON'T GET STUCK WITH YOUR SHARPS: Dispose Of Them Properly!

On September 1, 2008, a new law has taken effect, which will make it illegal to place home generated sharps in trash or recycling receptacles. Home generated sharps are needles, syringes, and lancets that assist people who use sharps or syringes at home to manage an illness. When sharps are improperly disposed of they pose a threat to children, adults, sanitation workers, and even pets. Here's how to properly and safely dispose of your sharps:

Note: Residents MUST place sharps in a biohazard sharps container, which are available for purchase at your local pharmacy, before bringing to any of the approved sharps drop-off locations.

✦ **Pharmacies, Doctor's Offices or Clinics:** Contact your local Pharmacy, Medical Clinic, or personal Physician and ask if they can start a take back program.

✦ **Mail Back Services:** If you purchase sharps on-line, please remember to request a pre-addressed, prepaid mail-back box for your used sharps. A list of mail back services can be found at **http://www.cdph.ca.gov/certlic/medicalwaste**

✦ **Santa Clara County Household Hazardous Waste (HHW) Program:** For more information on pharmacies and other locations that accept used sharps, or if there is not a location near you to take back your sharps, contact The Household Hazardous Waste Program at **www.hhw.org** or call 408-299-7300.

SHARPS TAKE-BACK LOCATIONS IN THE WEST VALLEY AREA

Call for packaging requirements before you bring used household syringes, needles, and lancets to the following drop off locations:

CAMPBELL

Kaiser Permanente
Campbell Medical Offices
220 E. Hacienda Avenue, Campbell
(408) 871-6500
(for Kaiser Members only)

LOS GATOS

Shannon Road Fire Station
16565 Shannon Rd, Los Gatos
Biohazard Sharps Container Size Requirement: One quart or one and half quart size for drop off box

Community Hospital, Los Gatos
815 Pollard Road, Los Gatos
(408) 378-6131

B M A Dialysis
14651 S. Bascom, Los Gatos
(408) 358-3791
(for B M A Patients only)

Mission Oaks Campus of Good Samaritan
15891 Los Gatos Almaden Rd
Los Gatos **(408) 356-4111**

SARATOGA

West Valley Fire Station
19800 Cox Avenue, Saratoga
Biohazard Sharps Container Size Requirement: One quart or one and half quart size for drop off box

COUNTY OF SANTA CLARA, HOUSEHOLD HAZARDOUS WASTE (HHW) PROGRAM

Deposit used home-generated sharps into a biohazard sharps container, when the container is ¾ full permanently seal shut and make an appointment through our website at **www.hhw.org** or call **(408)-299-7300**

HOLIDAY SCHEDULE

Collection occurs on all holidays except December 25th and January 1st.

Both December 25th 2008 and January 1st 2009 fall on Thursday. During these weeks, if your regular collection day is Thursday collection will occur on Friday. If your regular collection day is Friday collection will occur on Saturday. No other collection days will be affected.

HOLIDAY TREE COLLECTION

Beginning December 26th 2008 and continuing through January 25th 2009, WVC&R will collect up to two Holiday trees per residence as part of your regular collection.

- Undecorated natural or flocked holiday trees are acceptable.
- Please remove stands, tinsel and decorations.
- All trees must be cut into 5-foot or preferably shorter lengths.
- Place the tree at least one foot away from WVC&R carts.

To receive your FREE recycling "How-to Guide," call Customer Service at (408) 283-9250 or visit www.westvalleyrecycles.com

Have questions about your recycling service?

Ask Randy

Q: With the Holidays around the corner, I'm very interested in finding a way to eliminate waste and complete the recycling loop by giving to others. I just don't know where to begin.

A: Re-using an item is far better than recycling. Donating heavy coats, sweatshirts, beanies or blankets can make for a warm Holiday to a family in need. Also, if you have household electronics such as TVs, phones or computers you don't want to go to waste check out donation alternatives before you recycle using the links below.

Goodwill: **http://www.goodwill.org**
Salvation Army: **http://www.salvationarmyusa.org**
RecycleWorks Reuse Center: **http://www.recycleworks.org**

If you have clothing that is shredded or not in "wearable" condition, you can always recycle them! Tie fabrics in a clear plastic bag and place in your recycling cart for collection. We'll do the rest. **Acceptable Items:** Clean cotton, linen, polyester, rayon and wool fabrics (e.g. blankets, clothes, cloth diapers, rags, sheets) **NO** rags or textiles soiled with chemicals, oil or paint. NO Shoes, Carpets, Disposable diapers, Down-filled items, Leather, Nylon, Pillows, Rubber, Stuffed animals, Vinyl.

MAKE IT A GREEN HOLIDAY

Thinking green begins long before you determine which item goes into your garbage cart and which one goes in your recycling cart. It starts with knowing which materials to buy at the store that reduce waste in your household. So remember to always look for the recycle triangle when you buy.

When picking up gift-wrap this Holiday season remember to buy wrapping paper made from recyclable materials. YOU CANNOT RECYCLE METALLIC OR FOIL GIFT-WRAP.

For those of you that want to get really creative. You can use recyclable materials to wrap and personalize a gift using old magazines, sections of the newspaper and even a brown grocery bag. Wrapping and decorating giftsusing a grocery bag only takes a few minutes of your time to better the environment and make a memory.

Follow these easy steps:

- You will need a brown grocery bag, scissors, colorful pens or markers and tape.
- Cut down the seam of the bag from top to bottom.
- Turn inside out to hide all store advertisements and give yourself a blank canvas.
- Wrap gift.
- Decorate with personalized greetings and drawings of your choice.

Coastal Art and Poetry Contest

By encouraging youth to reflect on the beauty and spirit of California's beaches and ocean, we hope to inspire a greater sense of stewardship for these natural places. A population that cares about the coast is more likely to work to conserve and protect it.

View winning artwork and poetry from previous contests (some of which will open in a new window): 2008, 2007, 2006, 2005, 2004, 2003, 2002, 2001, 2000, and 1999.

A selection of Coastal Art & Poetry Contest winners and honorable mentions will be on exhibit at the following locations during 2008:

- Coyote Point Museum of Environmental Education in San Mateo, May 6 through June 15, 2008.
- Peter and Mary Muth Interpretive Center, Newport Beach, September 2 through September 30, 2008
- Cabrillo Marine Aquarium, San Pedro, October 21, 2008 through January 11, 2009

2009 California Coastal Art & Poetry Contest

WHO: All California residents in kindergarten through 12th grades are invited to participate. There are four categories for awards in both art and poetry: K-3rd, 4th-6th, 7th-9th, and 10th-12th grade.

WHAT: Entries must have a **California** coastal or **California** marine theme. (For help with California species, click here.) Poetry and artwork must be original. Art should be no larger than 11 inches by 17 inches. Acceptable art media are paint, pencil, markers, ink, crayon, chalk or pastel (fixed), and collage. Three-dimensional pieces, computer printouts, or photocopies are not eligible. All entries must include a completed contest Entry Form.

Winners will be selected in each of four grade-level categories (K-3rd, 4th-6th, 7th-9th, and 10th-12th) in both art and poetry to receive a gift certificate for $100 to an art supply store (for winners in art, courtesy of Blick Art Materials) or book store (for winners in poetry). Each sponsoring teacher will receive a gift certificate for $40 for educational materials. Winners and honorable mentions will also receive tickets to the Aquarium of the Pacific in Long Beach, courtesy of the Aquarium.

WHEN: Entries must be postmarked by January 31, 2009.

HOW: Review and complete the Guidelines and Entry Form and submit it with your art or poetry to:

Do you see what I see?

I see the waves.

JURIED ART CONTEST:

Your View of The Estuary

How do you see the San Francisco Bay Estuary, that unique place where land, ocean, and fresh waters meet? Do you have a favorite view or scene that "means" the estuary to you? The San Francisco Estuary Project is seeking art for possible use in a postcard, our web site, and other materials depicting the San Francisco Estuary—we are looking for scenes or impressions of the Bay, its marshes, and/or streams or rivers entering the Bay. All media are acceptable—oil, water color, pastel, pen and ink, block prints of all types, and photos. A $1,000 cash prize will be awarded to the first prize winner, $500 to the second place winner, and $250 to the third. The Estuary Project retains the right to use the artwork (credited) in print and on-line.

Please submit your entry either as a slide labled with title of piece and your name (to the address below) or as a jpg—no larger than 2 MB—emailed to lowensvi@sbcglobal.net no later than August 1, 2009. Slides cannot be returned.

For more information, contact:
Lisa Owens Viani
San Francisco Estuary Project
1515 Clay Street, 14th Floor
Oakland, CA 94612
(510) 622-2337

Courtesy of Hiroko Kusuda

We will contact the top 20 winners for possible use in a display at this year's State of the Estuary Conference at the downtown Oakland Marriott, Sept. 29-Oct. 1. No more than three entries per artist, please. Original art pieces must be no larger than 24" by 36"; artists will be responsible for delivering and retrieving their art. Digital entries may also appear on our web site, and contest submission is considered permission to use.

FY 2008-2009 Work Plan Self Evaluation Matrix

Source	Task Source	Work Plan Tasks	Accomplishments	Responsible Party
	SCVURPPP PMP (I.A.1.)	Summary of Use Track and report use of pesticides on municipally owned property. *Municipal Staff* to report to WVCWP for: 1) pesticides applied by staff 2) pesticides applied by contractors *Reports to include:* -name of pesticide used -active chemical in pesticide -purpose of pesticide -amount used in each application -date of each application WVCWP to present pesticide use data in Annual Report.	Monte Sereno did not apply ANY pesticides on municipal property in FY 08-09, so no usage reports were filed.	City Manager/ Facility Mgr
	SCVURPPP PMP (I.A.3.) PS #3	Implement BMPS Continue to Implement IPM practices as Best Management Practices (BMPs) for any pesticide used by staff or contractors. Report on use of IPM practices on municipal property.	During FY 08-09, the WVC continued to implement the Pest Management Performance Standard (PMPS). "IPM Policy" and "Standard Operating Procedures for Pesticide Management" are being followed by staff and contractors. BMPs in general continue to be effective. WVC work with contractors to find the least-toxic method to treat resistant pest problems. The WVC use less-toxic pest management methods in municipal facilities (parks & buildings) whenever practicable, based upon budget and effectiveness. *See "Evaluation" section below for details on IPM implementation.*

City of Monte Sereno

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2008-2009 ANNUAL REPORT

			Monte Sereno did not apply ANY pesticides on municipal property in FY 08-09. See "Evaluation" row at end of this table for details on IPM methods used by the City.	City Manager/ Facility Mgr
	SCVURPPP PMP (I.A.6.)	Banned Pesticides Inventory If any pesticides have been banned w/in the past FY (per EPA, State &/or local requirements), conduct an agency-wide search of chemical for these pesticides. Properly dispose of these banned substances pursuant to appropriate waste disposal regulations.	City Of Monte Sereno does not purchase or store its own pesticides.	City Manager/ Facility Mgr
	SCVURPPP PMP (I.B.1.) PS#5.a	Training for Applicators Ensure that employees who apply pesticides for the agency obtain the appropriate training as required by the County Agricultural Commissioner and the State Department of Pesticide Regulation (DPR)	No employees apply pesticides. In case of the need for pest control, a licensed Pest Control Operator will be called in.	City Manager
	SCVURPPP PMP (I.B.2.) PS#5.b	Staff Training for Applicators Attend and/or conduct annual training which reviews appropriate portions of the IPM Policy, BMPs, and relevant IPM techniques for employees within departments responsible for pesticide application.	Monte Sereno has limited staff (9 including part-time personnel). Other than 2 buildings for City Hall, Monte Sereno does not have public buildings or parks. The City does not regularly use pesticides, and no pesticides are ever applied by staff. In case of the need for pest control, a licensed Pest Control Operator will be called in. Staff responsible for dealing with contractors are careful to follow the City's IPM Policy. In FY 08-09, no staff or contractors applied any pesticides.	WVCWP to coord with Facilitiy Mgr
