	SCVURPPP PMP (II.A.1.)	Watershed Ed. & Outreach Campaign (WE&O)[1] Attend WEO and IPM work groups. Continue to assist with development of strategy for a campaign and training program (in Spanish & English) designed for staff of very small landscape businesses (typically 1-8 employees) mainly serving homeowners.	WVCWP staff participate in WEO. WVCWP Program Manager participates in the IPM Ad Hoc Task Group on behalf of the WVC. Project implementation and projects for consideration, which are discussed in the AHTG, are presented to WVC staff for appropriate follow-through. In FY 08-09, WVCWP staff were involved in meetings aimed at developing coordination between the "Bay Friendly" program, and the "Green Gardeners" program (Green Gardeners – see below). WVCWP contributed funds to the SCVURPPP's IPM ad campaign. This allowed the IPM ad to appear in the three (3) weekly community newspapers for four (4) weeks in the spring. (Campbell Reporter, Los Gatos Weekly, Saratoga News).	WVCWP Staff

[1] Funded by all Co-permittees each year.

PESTICIDE MANAGEMENT ACTIVITES

City of Monte Sereno

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2008-2009 ANNUAL REPORT

			In addition, all ads also appeared a 2nd time in the Los Gatos Weekly "Weekend Edition", so that IPM ads appeared a total of sixteen (16) times in WV newspapers in 08-09. September 08: IPM/weeds April 09: IPM/snails June 09 (week of 6/1): IPM/Roses June 09: IPM/Yellow Jackets WVCWP was very involved with the development of the "Green Gardeners" training program for small landscape businesses --from concept, to grant proposal, to implementation of several successful class series. (See Program Report for details.) In FY 08-09, WVCWP contributed funds for 6 scholarships to reduce the cost of the Green Gardener class to attendees (enough for 6 reduced fee scholarships). Since many WV residents employ small landscape contracting firms, it is hoped that these classes will have an impact on reducing residential pesticide use in the WVC. To promote use of the trainees from the Green Gardeners program, WVCWP sent a Press Release to local newspapers in Campbell, Los Gatos & Saratoga. A 630 word article, including a photo, about the Green Gardeners program was published. The article promoted both the classes (for anyone interested in enrolling) and promoted local companies which employ Green Gardeners graduates – so that residents could contact and utilize these graduates. WVCWP also distributed "Green Gardener" class flyers to the WVC. City of Saratoga placed flyers at municipal counters. See "PI/P Section", including "Attachments" for details. XREF PIP

FY 2008-2009 ANNUAL REPORT

			Arbor Day Celebration Saratoga 4/24/09 4/24/09 – Beauchamps Park WVCWP was introduced to the attendees (appx. 40 people). Attendees visited WVCWP display where staff discussed runoff issues (including pesticides) and distributed material. Staff also circulated and distributed material. IPM information, and HHW brochures detailing proper pesticide disposal, are distributed at a variety of venues. See following row, and "PI/P Section" for further details on outreach for less toxic pest control.	
	SCVURPPP PMP (II.A.5.)	Community Material Distribution Participate in public sale events at local hardware store(s). Provide watershed protection information and reminders (gifts) to community by walking aisles of the gardening center with gift basket full of handouts during the sales.	In FY 08-09, WVCWP devoted staff time to a new campaign: creation and promotion of a new outreach product with the intent of providing material that would be desirable to residents, and which could be attached to printed information, to encourage residents to pick up and read the printed info. Envelopes of pest-resistant CA Native Seeds, which attract "Beneficial Bugs", were created to use as give-aways, and to encourage residents to pick up (and read) the attached printed info on 'less toxic' gardening. WVCWP staff purchased 4 different types of seeds in bulk. Staff created labels with graphics, planting information, and pest info for the seed envelopes (see PI/P section – Attachments). WVCWP partnered with stakeholders (local Sierra Club members) to fill the packets with the bulk seeds. A total of **600 seed** packets were distributed via WVCWP in FY 08-09. The seeds were promoted via articles in WVC municipal	WVCWP Staff

City Engineer City Manager

Pesticide Management Activities Evaluation

PESTICIDE USAGE REDUCTION MEASURES – Pest Specific

Monte Sereno is implementing IPM in the following situations:

The City of Monte Sereno has extremely limited Municipal facilities (2 small buildings with 1 parking lot in back and landscaping in front) – less than ¼ acre total of landscaped area.

A landscaping contractor cares for City property, and is instructed to avoid use of pesticides. When gopher damage appears, the gophers are trapped.

Weeds are hand-pulled.

Ants which may appear in the City buildings are cleaned up by wiping with Lysol.

NO PESTICIDES WERE USED IN FY 08-09 or FY 07-08.

To: All City of Monte Sereno Staff

From: Sue L'Heureux, Facilities Manager

Re: USE OF PESTICIDES ON CITY PROPERTY – Annual Reminder

Date: June 10, 2009

This notice is distributed to remind City staff that ONLY staff specifically designated through Public Works Dept. management may order, purchase and apply pesticides for use on City property.
THIS RESTRICTION INCLUDES OVER-THE-COUNTER PESTICIDES

Pesticide use by the City of Monte Sereno is tracked by the California Water Board as part of the City's Stormwater Permit requirements. This message is required annually by the Permit. It is important that all City staff be informed of, and comply with, the Permit's requirements concerning pesticide use.

To help meet this goal, staff members should:

1) Remember that ONLY staff designated through Public Works Dept. management may order, purchase and apply pesticides on City property, including over-the-counter pesticides.

2) To request removal of pests (such as mice, ants, wasps, etc.) from City property, please contact the Sue L'Heureux at 408-354-7635 to initiate a work request.

3) Responsibly dispose of any existing pesticide containers found on City property through the City's Hazardous Waste program. Contact Sue L'Heureux at 408-354-7635.

4) If any pesticides are currently stored in any City facilities (such as ant sprays, wasp sprays, etc.) and you are NOT a designated Public Works Dept. Pesticide Applicator, DISCONTINUE any further pesticide applications and dispose of the containers as outlined above (3)

Thank you for your help in our efforts to protect employee health and local water quality.

USE OF PESTICIDES
The City of Monte Sereno adopted an Integrated Pest Management (IPM) Policy and IPM Plans to address removing various pests from City property. The IPM Plans include strategies for removing pests (such as ants and wasps) using the least toxic methods possible.

The Calif. Water Board's Stormwater Discharge Permit requires municipalities to reduce pesticide use. One goal of the policy is to ensure that pesticides which are applied are handled only by staff who have received training in pesticide use and 'less toxic' pest control. By adhering to these plans, we meet the Permit requirements, and help provide a healthier environment for staff and the public.

If there are any questions about this procedure or the NPDES Stormwater Permit, please call:
Sue L'Heureux at 408-354-7635

Source	WP Task	Work Plan Tasks	Accomplishments	Responsible Party
	Mercury Plan (I.E.)	Reduction of Hg Containing Products Continue implementing phase-out of mercury-containing products (MCPs). Phase-out will coincide with replacement of MCPs on an as-needed basis.	Reduction of mercury-containing products is being implemented. The City's contractor is knowledgeable about replacement and safe disposal of mercury containing products. Research on alternative products has been conducted through WVCWP. Non-mercury or low-mercury replacements are being used wherever feasible e.g., thermostats and fluorescent bulbs.	City Mgr/ Facilities Mgr WVCWP to send notice
	Mercury Plan (II.B.)	Mercury Containing Product Disposal Services Provide funding and participate in County HHW collection program for residents and small businesses	The City of Monte Sereno has been able to commit the same level of funding for the County HHW program as in past years. The WVC support the County HHW collection program through funding and outreach activities (material distribution, website notices, etc.). All WVC adopted an Extended Producer Responsibility Resolution during FY 07-08. The waste collection contractor for the WVC has been supporting HHW collection through sponsorship of free E-waste events. The WVC support this through fees to the contractor, and through outreach efforts to support the collection events. Local implementation also included coordinating and participating in mercury thermometer collection events, and distribution of mercury-free thermometers, mercury outreach material distribution, and articles on mercury in municipal newsletters.	City Mgr

			FREE E-WASTE RECYCLING EVENTS Recycling of TVs, monitors and all office electronics. These events were organized by the waste contractor for the four WV Communities. **July 2008** CAMPBELL: July 19, 2008 Campbell United Church of Christ, Campbell, CA LOS GATOS: July 19, 2008 Los Gatos United Methodist Church, Los Gatos, CA SARATOGA: July 26, 2008 City of Saratoga North Campus, Saratoga, CA **RESULTS FOR 3 JULY EVENTS:** A total of **169,776 pounds** of E-Waste was collected from Campbell, Los Gatos, Saratoga and Monte Sereno residents who participated in the West Valley Collections & Recycling E-Waste Drop Off events. **April 2009** CAMPBELL: April 18th, 2009 Campbell United Church of Christ, Campbell, CA LOS GATOS: April 25th, 2009 Los Gatos United Methodist Church, Los Gatos, CA SARATOGA: April 25th, 2009 City of Saratoga North Campus, Saratoga, CA **RESULTS FOR 3 APRIL EVENTS:** weight totals for each city Los Gatos – 12,533 lbs. Campbell – 9070 lbs. Saratoga – 14,966 lbs.	

MERCURY POLLUTION PREVENTION ACTIVITES
Monte Sereno

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2008-2009 ANNUAL REPORT

			OUTREACH During Winter/early Spring of 2008/2009, WVCWP submitted articles which ran in the WVC municipal newsletters, concerning E-waste. This helped publicize the need to make use of use E-waste events. For the July 2008 events, WVCWP publicized E-waste disposal on the front page of the cleancreeks.org website.	
	Mercury Plan (II.C.)	Track Disposal of Mercury Containing Products Continue documenting the quantities of mercury-containing fluorescent bulbs disposed from City/ Town buildings and departments at hazardous waste collection facilities. The quantities of disposed product will be reported in annual report	26 x - 4 ft fluorescent lamps were collected from the City's building and taken to HHW for disposal in FY 08-09. Employees store used batteries in the City's file room for later drop-off at HHW.	City Mgr/ Facilities Mgr
	Mercury Plan (II.F)	Fluorescent Light Recycling Campaign Continue participation in the Mercury Ad Hoc Task Group and support ongoing implementation of an outreach program to about recycling fluorescent bulbs.	Mercury AHTG has now been disbanded. The Mercury AHTG developed the Mercury Plan , the Mercury Virtual Elimination Policy etc. (see http://www.scvurppp-w2k.com/mercury.htm for the list of products). The Mercury P2 Outreach Work Group was formed to implement the outreach requirements in the Mercury Plan. These included developing fact sheets, newsletter articles and media advertising. WVC support ongoing implementation by distributing info on fluorescent bulb recycling, and teaching about the issue presentations at schools and public events.	SCVURPPP & WVCWF to coordinate w/ HHW staff

MERCURY POLLUTION PREVENTION ACTIVITES
Monte Sereno

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2008-2009 ANNUAL REPORT

Mercury Pollution Prevention Activities Evaluation

MERCURY AHTG

WVCWP staff focus in FY 08-09 was on local implementation, since the Program's Mercury PP Outreach Work Group has not been meeting.

Local implementation included outreach for free E-waste Recycling Events, mercury-free thermometer distribution, mercury outreach material distribution, and articles on mercury in municipal newsletters.

THERMOMETERS

Residents have responded well to thermometer exchange events, and to receiving Mercury-free thermometers.

WVCWP, WVC and San Jose Environmental Services Dept. have begun coordinating additional events in FY 09-10 at various venues. Efforts will be made to increase publicity for these events; some will be held mid-week and increased publicity may be needed in order to generate a turnout. Staff will attempt to evaluate effectiveness of holding mid-week events.

Thermometer events in FY 08-09 included:

Audubon Wildlife Fair

Cupertino (bordering Saratoga) 10/25/08

Mercury-free thermometers, along with mercury outreach materials, were provided to parents accompanying their children to the WVCWP Enviroscape presentations at the Fair. **30** thermometers were distributed.

Residents were very pleased with the opportunity to receive a mercury-free, solar thermometer. Sierra Club member in attendance expressed strong interest in these thermometers, and an interest in distributing them, but the Club does not have funding to purchase these themselves.

Thermometer Exchange at LG Farmers Market

Los Gatos – 5/3/09

WVCWP coordinated an exchange which was staffed by Town of LG and City of San Jose Environmental Services Dept. A booth was set up at the weekly LG Farmer's Market. Residents were asked to bring in mercury thermometers, and were given mercury-free thermometers in exchange.

13 mercury thermometers were collected for proper disposal. City of SJ was impressed with the turnout by Los Gatos residents, since outreach materials had not been completed yet, so little outreach had been done. Residents attending the Farmer's Market were pleased to learn the Town was collaborating with the City of San Jose for this event.

WVCWP has coordinated with the other participants to hold this event again in FY 09-10. It will be held in conjunction with "Keep Los Gatos Beautiful" month in April 2010; this will allow for better outreach opportunities to publicize the event and encourage increased participation.

FY 2008-2009 Work Plan Self Evaluation Matrix

Activity	Source	Work Plan Tasks	Accomplishments	Responsible Party
Vehicle Washing Operations	CB-1	As part of the West Valley Industrial Commercial Inspection Program, promote improved car washing methods at auto businesses. Provide info on alternative arrangements for businesses with possible compliance problems. (Section 2.i of this work plan - Industrial Inspection Program)	City of Monte Sereno is strictly residential –does not have any commercial/ industrial facilities subject to these inspections.	WVCWP Inspector
Vehicle Washing Operations	CB-1	Place outreach material on proper vehicle/equipment washing at municipal counters, post offices, libraries and public events. Update WVCWP website to include copper information.	• WVCWP updated the "Car Wash Kit" flyer for car wash fund-raising events. The updated version was re-posted at City Halls • Car washing information is contained in the "Watershed Watch" brochure was has been distributed widely. • The WVCWP website home page (www.cleancreeks.org) features a graphic highlighting car washing, and a link to a printable PDF with information on proper car washing, and water quality degradation from improper washing: http://www.cleancreeks.org/images_new/carwashweb.pdf In July 2008, WVCWP trained Monte Sereno office staff on use of the Car Wash Kit, so that staff would be well-informed in order to deal with inquiries regarding the Kit. Staff learned about contents of the Kit, how the Kit is used, and check-out procedures from WVCWP. WVCWP also created a new brochure with info on copper and car washing, and with a Discount Card for use at local commercial car washes. The brochure included a list of participating car wash businesses. The brochure was distributed in Fall of 2008; the Discount Card expired as of Dec. 2008.	WVCWP staff

			WVCWP will discuss creation of an updated version for FY 09-10. See PI/P section for details.	
Vehicle Washing Operations & Pool/ Spa Maint.	CB-1 & CB-12	In classroom presentations, introduce impacts of copper on aquatic life; teach proper methods of car washing and pool & spa drainage using the Enviroscape watershed model.	WVCWP's classroom presentations are scripted to include hands-on activities so that students can watch pollutants, such as copper from car-washing activities & pool draining, flow directly to waterways. In addition to recommending the use of commercial carwash facilities, WVCWP encourages washing on a gravel or lawn area where wash water is captured and infiltrated. Students also learn about runoff from car wash fundraisers and the need to borrow the WVCWP Car-Wash Kit for any such event. Proper Pool Draining instruction includes photos of a Sanitary Sewer Cleanout, and other graphics about pool & spa drainage. School presentations in FY 08-09 included: St. Mary's School, Los Gatos – Presentation for 5th graders on 1-15- 09 Sedgewick Elementary, Cupertino 3-31-09 – Presentations for 2nd, 3rd, 4th, and 5th grades. St. Mary's School, Los Gatos – Presentations for Kindergartners graders on 5-21-09 In addition, children of various ages viewed Enviroscape presentations at various community events. See PI/P section for details.	WVWCP staff
Vehicle Washing Operations	CB-1	Promote use of Car Wash Kit. Provide kit; provide training to charity car wash organizers. Document use in A/R. Solicit feedback from participants.	**PROMOTING USE OF CAR WASH KIT** **Car Washing Advertising/Articles** A short article on Car Washing & the Car Wash Kit was submitted to the 3 local weekly newspapers in late June 2009. The article was printed in July 2009.	WVWCP staff

			Car Wash Kit info was also included in a separate article which covered WVCWP projects; this article ran in the 3 local weekly papers in Feb 2009. WVCWP participated in a Car Washing media campaign, developed and run by SCVURPPP. In addition, WVCWP provided extra funding for the ads to run in the 3 local weekly papers, with a total combined circulation of 69,840. **New Car Wash Outreach Material** WVCWP developed a tri-fold size flyer on the subject of car washing. The flyer features info on copper, right and wrong ways to wash a car in terms of protecting creeks, a 'commercial car wash discount card', a list of participating local commercial car washes, and information on using the WVCWP Car Wash Kit. Car Wash Kit **Training** was given to Monte Sereno office staff (3) 7/25/08 by WVCWP Program Assistant. Topics: ▪ Runoff as Illegal Discharge – Municipal Ordinance ▪ Car Wash Fundraisers need to use free Car Wash Kit ▪ How kit works **Expanded Car Wash Kit Program** WVCWP worked to develop an expanded Car Wash Kit program. Staff solicited feedback from other successful programs in 3 states. A new Car Wash Kit program was developed, which would allow loaning of Kits to more users, with less need for direct WVCWP staff involvement (due to limited staff time). The new program will allow WVCWP to more heavily promote the use of the Car Wash Kit, because staff time will not be such a limiting factor if demand for the kit(s) increases. The new Car Wash Kit Program includes: • A set of photo instructions for Kit set-up, and link to an internet video of Kit set-up	

			• Written program procedures • Budgeting to acquire a new part for the Kit, to facilitate ease of use (rubber mat to cover storm drain grate) • Budgeting to acquire another Kit, if demand justifies this **Promotion of Car Wash Kit to WVC Schools:** In FY 08-09, the Kit was promoted to ALL schools within the WVC jurisdictions. Facilities managers and front office staff were notified that anyone holding a Car Wash Event on school grounds, or students groups holding Car Wash Events at other sites, MUST use the Car Wash Kit. See PI/P section for details.	
Vehicle Washing Operations	CB-1	Within the development project permit process for Group 2 projects, require source control measures at facilities that will conduct vehicle/ equipment washing and maintenance activities (consistent with Permit requirements).	Monte Sereno is strictly residential – will not have any commercial facilities conducting vehicle washing/maintenance.	
Vehicle Washing Operations	CB-1	Include recommended source controls for vehicle washing in the City's corporation yard SWPPP and continue to train staff to use BMPs.	Monte Sereno has no Corp Yard.	
Industrial Copper Control	CB-3	Continue joint Inspections with Fire Dept., targeting industrial sources for copper, e.g. metal plating and metal finishing facilities.	Monte Sereno is strictly residential –does not have any commercial/ industrial facilities subject to these inspections.	
Reducing Traffic Congestion	CB-6/7	Within the development permit process, encourage pedestrian oriented design practices (trails) and planning that will accommodate bicyclists (paths).	The West Valley communities encourage best design practices wherever practicable. These small communities tend not to have large developments conducive to requiring alternative transportation within the permitting process. However, the cities and the Town encourage alternatives transportation through other means: For several years, the cities of Monte Sereno and	

			Saratoga, and Town of Los Gatos, have been working with CalTrans on improving bicycle and walking features along the stretch of Hwy 9 that links these 3 municipalities. The stretch is heavily used by bikers and walkers, and improvements would overcome current safety problems, thereby encouraging greater pedestrian/bicycle use of this transportation corridor. Hwy 9 – Phase II – in FY 08-09, work was conducted on planning of this phase to include pedestrian improvements along the corridor. Plan calls for filling in missing walkway gaps starting at Village in Saratoga and continuing through Monte Sereno and into Los Gatos	
			The Engineering Department worked with the Los Gatos/Monte Sereno Police, Daves Avenue School and Los Gatos Union School District to improve traffic safety and pedestrian crossings at the Daves School location. Mid-block bulb-outs were installed on Daves Ave along with a new crosswalk to facilitate safe crossing and encourage pedestrian and bicycle traffic. Construction has been completed.	City Mgr / City Planner
Water-shed assessm't and protection	CB-8	Consider watershed protection in all CEQA actions.	All WVC have adopted the CEQA review guidance from SCVURPPP, as documented in the June 2004, *C.3 Stormwater Handbook*, to address water quality as part of the C.3.m implementation.	City Mgr / City Planner/ Asst City Engr
Water-shed assessm't and protection	CB-8	Continue to receive training and develop understanding of the Hydromodification Management Plan (HMP) and implement HMP Permit requirements on qualifying projects.	WVCWP Program Manager attended May 19th & May 20th -- Water Board Workshop. See 'Watershed Mgmt Section' of this report for details.	City Engineer
Water-shed assessm't and	CB-8	Continue to Implement Guidelines & Standards developed by the Water Resources Protection Collaborative for	WVCWP members received training on this topic from a WMI Land Use Subgroup member at a WVCWP meeting. Topics included implementation of the Guidelines and Standards, and the 'top ten development tips'.	

protection		watershed protection. Support new Collaborative issues for watershed protection as they arise.	WVCWP Program Manager reviewed the WMI/ Collaborative's beta watershed resource website for each city.	
			Monte Sereno adopted the "Guidelines and Standards" in FY07-08. They are currently being incorporated into the City's new *Residential Design Guidelines.*	City Mgr
Street sweeping	CB-11	Conduct regular street sweeping, evaluate efforts and collect data for Annual Report. Ref. Street Sweeping (Section 3.B of this work plan).	See 'Public Agency Activities' section for details on Street Sweeping, including data.	
		Provide quarterly street sweeping by contract w/ the Town of Los Gatos, evaluate efforts and collect data for Annual Report. Ref. Street Sweeping (Section 3.B of this work plan).	The West Valley communities conduct street sweeping in residential areas and more frequent sweeping in commercial areas. Sweeping data is collected and noted in Public Agency Activities (Section # 3) of this report. The West Valley cities do not hesitate to change sweeping contractors if the equipment being used does not measure up to municipal standards. The City's contract with the new street sweeper is working well. All streets continue to be swept on a quarterly basis. The current contractor uses a PM10-certified regenerative air sweeper.	Facility Mgr/ LG PW Specialist for Monte Sereno
Outreach on Pool, Spa maint'nce	CB-12	Continue to distribute Pool & Spa maintenance brochure via agency counters, website and during IC/ID inspections.	Pool and Spa brochures distributed in FY 08-09: **RETAIL FACILITIES** 30 pool brochures were placed on display at to Leslie's Pools In Los Gatos 20 pool brochures were placed on display at Tradewind Spas in Los Gatos on 3/27/09. **MUNICIPAL FACILITIES** <u>CAMPBELL</u> • 50 Pool & Spa Brochures	WVCWP with Municipal Staff

			LOS GATOS • 50 Pool & Spa Brochures MONTE SERENO • 25 Pool & Spa Brochures SARATOGA • 25 Pool & Spa Brochures	
			MS featured proper pool & spa drainage as a front-page article in its municipal newsletter in 07-08.	WVCWP Staff
Use of copper architecture	CB-21	Within the development permit process, continue to limit and discourage use of copper architecture. Inform applicants about the negative water quality impacts related to the use of copper roofing, rain gutters and other copper architecture.	In FY 08-09, WVC discussed possibilities related to having an alternative BMP for copper architecture: to have runoff from these items be directed to landscape (i.e., use of an LID measure to help mitigate any use of copper architecture).	City Mgr / City Planner/ City Engr
Green Building	CB-21	Provide information about negative impacts of copper architecture and alternative materials via link on West Valley Clean Water website. Copper/Nickel Action Plan Evaluation

Car Wash Outreach Evaluation:

WVCWP initiated several new Car Wash outreach efforts this year:

-- Outreach to schools via letters and flyers to Facilities Maintenance Supervisors and Front Desk staff. This outreach was aimed at covering all schools in the WVC. The main focus was on any car wash fundraising events that might take place on school property. However, it is hoped that the information will also reach school-based groups which might initiate car wash fundraisers (such as Band, Athletics, etc.) even if they choose to hold the car wash at a non-school site.

Any chance to evaluate results of this outreach is not expected to materialize until after school starts in Fall 2009. Results will be evaluated based upon determining whether there is an increase in calls requesting the Car Wash Kit.

-- WVCWP staff created a new outreach piece concerning residential car washing. This was a double-sided piece, with info on copper and car washing, and with a Discount Card for use at local commercial car washes. The brochure included a list of participating car wash businesses which accept the Discount Card.

The Card is available on the Watershed Watch website at http://www.mywatershedwatch.org/WW_Discount.pdf, but WVCWP staff anticipated that residents would appreciate:

--being made aware of the discount card, by picking up the outreach piece

--having the card printed out, in an easy-to-use format (just cut off the top part of the flyer, in order to have a wallet-sized card.

--seeing the card alongside a list of local, participating commercial car washes.

The brochure was distributed in Fall of 2008; however, the Discount Card expired as of Dec. 2008. Since the piece was created shortly before the Discount Car expired, it was not distributed widely, and so it was not possible to evaluate how well-received it was. WVCWP will discuss creation of an updated version for FY 09-10.

-- A short article on the necessity of using the Car Wash Kit for car wash fundraising events was initiated with the 3 local weekly newspapers in late June 2009. The article ran in the papers in July 2009. The articles in the 3 newspapers did generate a number of calls to the WVCWP office to discuss the Car Wash Kit. It appears that getting information on car washing into the local weekly papers is an effective means of disseminating car wash information.

Pool and Spa Maintenance:

In FY 07-08, WVCWP initiated outreach to residents via placing literature displays in a retail pool and spa store. When WVCWP staff returned to the store in FY 08-09, it was found that this type of outreach was well-received by the store, and a number of brochures had been picked up by residents.

In March 2009, an additional 30 brochures were placed at this retailer, and a new retailer was also approached; 20 Pool & Spa brochures were placed with the new retailer (Tradewind) for pickup by residents.

Educational Outreach Evaluation:

Both Pool & Spa draining and Car Washing are covered thoroughly during Enviroscape presentations at schools and at community events. Children appear to clearly understand the messages being conveyed. They actively learn about copper and brake pads by sprinkling powder which represents copper around a toy car on the Enviroscape. They then watch the copper being washed into the 'creek' and down to the 'Bay' when the car is washed, and when 'rain' creates runoff on the watershed model. A number of Enviroscape presentations were given during FY 08-09. See PI/P section for details.

SARATOGA, MONTE SERENO, LOS GATOS:

Highway 9 upgrade (Encouraging pedestrian- and bike-oriented transportation (trails, bike lanes and paths):

Phase I has been completed (bicycle improvements).

Phase II – is in preliminary design (pedestrian improvements), and Phase III – is waiting for startup (bicycle loop installation and improvements to Austin Way intersection).

Honorable Christine Kehoe
State Capitol, Room 5050
Sacramento, CA 95814

March 30, 2009

Subject: Support of Senate Bill 346

Dear Senator Kehoe:

The City of Monte Sereno strongly supports Senate Bill 346 which would restrict the use of copper and other toxic materials in vehicle brake pads. Copper is toxic to phytoplankton, the base of the aquatic food chain, and has been shown to adversely impact salmon sensory organs, potentially compromising their ability to return to spawning streams and avoid predators.

The City of Monte Sereno and other local governments are required by National Pollutant Discharge Elimination System (NPDES) Stormwater Permits to control copper discharges to creeks, estuaries and the ocean. Through the work completed by the Brake Pad Partnership, we now identify brake pads to be the largest single source of copper to waterways, and estimate they contribute as much as 35% of the copper reaching San Francisco Bay. Local governments under NPDES Stormwater Permits are not able to effectively control brake dust and legislative action is the only viable alternative to reduce the copper loading at its source – brake pads.

The City of Monte Sereno, through its membership in the Santa Clara Valley Urban Runoff Pollution Prevention Program (SCVURPPP), is an original founding supporter of the Brake Pad Partnership, and has continually supported their efforts for over 15years. The Partnership is a collaborative group of government staff, brake pad manufacturers and environmentalists, who have been working together for a solution to this issue. The problem has been studied, quantified, and all participants now agree that an orderly phase-out of copper is in everyone's best interest. The Partnership has garnered support of brake pad manufacturers for legislative action because without more definitive restrictions, less responsible manufacturers could continue to sell high copper content brake pads in California. The Partnership also has support of environmentalists because of impacts copper has on ecosystems, and because the bill would also address lead and asbestos which still appear in brake pads sold by less responsible manufacturers.

We are encouraged by the Partnership's ability to build consensus among its stakeholders and with them strongly support Senate Bill 346 going forward to the Environmental Quality Committee. Controlling this key source of copper is of critical importance.

Thank you for your energetic leadership on so many important environmental issues like this one!
Sincerely,

Brian Loventhal
City Manager

WEST VALLEY CLEAN WATER PROGRAM

Honorable Christine Kehoe
State Capitol, Room 5050
Sacramento, CA 95814

March 30, 2009

Subject: Support of Senate Bill 346

Dear Senator Kehoe:

The West Valley Clean Water Program (WVCWP) strongly supports Senate Bill 346, which would restrict the use of copper and other toxic materials in vehicle brake pads.

WVCWP's member agencies, the Cities of Campbell, Monte Sereno, Saratoga and Town of Los Gatos, are required to control copper discharges to creeks, estuaries and the ocean under its National Pollutant Discharge Elimination System (NPDES) Stormwater Permit. Copper, an identified pollutant of San Francisco Bay, is toxic to phytoplankton, the base of the aquatic food chain, and has been shown to adversely impact salmon sensory organs, potentially compromising their ability to return to spawning streams and avoid predators. Through work completed by the Brake Pad Partnership, we now identify brake pads to be the largest single source of copper to waterways, and estimate they contribute as much as 35% of the copper reaching San Francisco Bay. Individually, or even collaboratively, local governments under NPDES Stormwater Permits are not able to effectively control brake dust, leaving legislative action as the only viable alternative to reduce the copper loadings at its source – brake pads.

As members of the Santa Clara Valley Urban Runoff Pollution Prevention Program (SCVURPPP), we are proud to be one of the original founding supporters of the Brake Pad Partnership, and have continually supported their efforts for over 15years. The Partnership is a collaborative group comprised of government staff, brake pad manufacturers and environmentalists, working together for a solution to this issue. The problem has been studied, quantified, and all participants now agree that an orderly phase-out of copper is in everyone's best interest. The Partnership garnered support of brake pad manufacturers for legislative action because without more definitive restrictions, less responsible manufacturers could continue to sell high copper content brake pads in California. The Partnership also has support of environmentalists because of impacts copper has on ecosystems, and because the bill would also address lead and asbestos which still appear in brake pads sold by less responsible manufacturers.

We are encouraged by the Partnership's ability to build consensus among its stakeholders and together with them, we strongly support Senate Bill 346 going forward to the Environmental Quality Committee. Controlling this key source of copper is of critical importance.

Thank you for your energetic leadership on so many important environmental issues like this one!

Sincerely,

Kelly J. Carroll

MONTE SERENO
Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 08-09 ANNUAL REPORT

FY 2008-2009 Work Plan Self Evaluation Matrix

Source	WPActivity	Work Plan Tasks	Accomplishments	Responsible Party
	Program's Trash Work Plan	Long-Term Management Strategy Participate in Trash Ad Hoc Task Group and assist Program staff in developing (and revising per the MRP) long-term trash management strategy for reducing trash in urban streams and waterways and other potential sources that may contribute trash to those areas.	The West Valley Clean Water Program Mgr attended the Trash AHTG meetings and provided feedback from West Valley cities on implementation strategy and tools. Program Mgr participated in SCBWMI Trash Summit (Oct 2009), and began participating in SCBWMI Trash Subgroup. See PI/P section for details.	WVCWP Mgr to participate in AHTG and coordinate WVC efforts
	Program's Trash Work Plan	Additional Task – not in 08-09 Work Plan Participate in Creek Connection Action Group developing long-term trash management strategy for reducing trash in waterways. Address other potential sources which may contribute trash to waterways.	These meetings were discontinued due to staff changes at Creek Connections Action Group.	WVCWP staff attends meetings
	Program's Trash Mgmt Strategy	Update Trash Management Strategy Revise and implement trash management strategy based on storm drain inlet inspection and cleaning reports from the WV Sanitation District. Work with SCVURPPP (Program) staff to identify the high trash impact areas within the City's jurisdiction which likely discharge trash and litter to receiving waters.	WVCWP staff, and municipal reps, met with West Valley Sanitation District to review current program status and discuss anticipated Storm Drain Cleaning Program adjustments anticipated in MRP.	WVCWP staff
	Program's Trash Work	Pilot Demonstration Support Program in implementing Pilot	WVCWP submitted letter of support for SFEP grant application for trash capture device implementation;	WVCWP Mgr to coordinate WVC

	Plan	Demonstration Projects which focus on assessing control measure effectiveness.	WVCWP is optimistic that WV Communities will be included in the final distribution pool for the capture devices, however at this time, the intended distribution scheme among Bay Area entities remains unknown and solely within the control of SFEP. At the annual WVCWP Street Maintenance Supervisors Storm drain meeting, all attendees viewed a presentation on a possible pilot program: a solar-powered trash-compacting trash can system.	efforts
	Trash Work Plan	<u>Evaluations</u> Continue to conduct trash evaluations in a subset of local trash problem areas using the Programs Urban Rapid Trash Assessment (RTA) protocol and/or the KAB Litter index.	WVCWP staff used SCVURPPP's standardized reporting forms to assess trash problems. Trash evaluations have been carried out by WVCWP staff during Creek Cleanup events and during independent visits to trash problem area sites. Trash assessment forms were completed. WVCWP staff used SCVURPPP's standardized reporting forms to assess trash problems. WVCWP staff conducted **20** assessments at the identified sites and listed problem areas in West Valley communities. The number of assessments included: Campbell **4 --** Los Gatos **3** -- Monte Sereno **5** and Saratoga **4.**	WVCWP staff
	Trash Work Plan	<u>Identify and Prioritize Problem Areas</u> Continue to identify and prioritize trash problem areas based on criteria provided by Program staff during FY 08-09.	Identification & prioritization are determined by: • monitoring previously identified problem areas • using volunteer monitoring during cleanup events at problem sites • keeping records of areas where Trash has been noted, or illegal dumping has been noted. If the site is noted repeatedly, then identifying it as a Problem Area will be considered.	WVCWP staff

	Technical Memo: *Trash Mgmt Effective-ness Strategy (FY06-07)*	Evaluate Trash Management Measures Evaluate and report on existing trash management practices. Evaluation methods may include using Urban Rapid Trash Assessments and/or the KAB Litter Index in priority trash problem areas.	WVCWP staff used SCVURPPP's standardized reporting forms to identify trash problems. When completed by staff, these forms provide data on trash monitoring and management activities at the listed problem sites.	WVCWP staff
	Program's Trash Work Plan	Management Practices Continue to identify and implement trash control measures, where practical and feasible, to reduce trash and debris.	Control measures in addition to scheduled/systematic control measures • notify Caltrans when exceptional litter or debris problems are noticed along highways/freeways and around on-ramps • conduct removal of trash and litter as needed at sites within municipal jurisdiction • remove trash (where feasible) at some sites in Caltrans' jurisdiction • monitor identified problem areas • hold volunteer cleanup events at problem sites, when feasible • highlight litter problems during classroom presentations • WVC inspectors for industrial/commercial and • construction sites watch for litter and illegal dumping. Inspectors will consider an accumulation of debris at a site to be a stormwater violation and refer such sites to the Stormwater Discharge Inspector. Systematic Control Measures • Trash collection is mandatory for WV residents - via WV Collection & Recycling (WVC&R) • WVC&R holds free, curbside Waste Collection days for items weighing up to 70 lbs, wood scraps and other items (i.e. items not usually allowed under weekly collection guidelines).	

			The City is contacted by residents to remove debris or other HHW from residential neighborhoods or the public right-of-way. The City's contractor removes items for appropriate disposal (FY 08-09: discarded couch on roadside). In recent years, the City of Monte Sereno had received grant money to put trash cans at bus stops. However, in FY 08-09, the Valley Transporation Authority discontinued their routes in Monte Sereno, so the bus stops are not being used currently. The City is making efforts to reduce the overall level of trash generated by residents. In conjunction with the Town of Los Gatos and the Santa Clara County Recycling and Waste Reduction Program the City conducts an annual "Community Garage Sale" aimed at reducing trash by promoting the theme of reuse. The event scheduled for May 2009 had to be cancelled; however the event will be held again in 2010.	
	Trash Problem Area Activity Report	Provide City/ Town Specific Information Provide Program staff with specific information on trash management practices implemented within the City's jurisdiction using program-wide standardized reporting forms.	WVCWP staff used SCVURPPP's standardized reporting forms to provide data on trash monitoring and management activities at the listed problem sites. Details can be found in the Program report.	WVCWP staff
	Program's Trash Work Plan	Submit Annual Report Data Submit Urban Rapid Trash Assessment Surveys, Trash Item Tally Sheets and any other data collection tool to Program staff for the annual rpt	Trash Assessment forms for WV cities were submitted to SCVURPPP in July 2009 for Program-wide analysis and reporting.	WVCWP staff
	SCC Trash Advisory Committee –	Support (TAC) Trash Advisory Committee	WVCWP Program Manager attends General meetings and Education sub-groups meetings. The group and sub-groups are going forward with parallel objectives:	WVCWP Staff

	Education sub-group	Continue to attend Santa Clara County TAC meetings with SC County, City of San Jose and the Office of Education. Assist in development and implementation of a five-year outreach plan targeting 16 – 24 yr-olds.	• Host clean-up events in support of 'Keep America Beautiful' campaign • Design, purchase & distribute window clings reminding drivers to report 'litterbug' sightings (SC County) • Host telephone hotline & website to accept litterbug sightings and generate a letter to vehicle owner stating their vehicle was reported as creating litter on the streets (roads & highways, parking lots, etc) • Fund/ solicit support for purchase & distribution of tarps to vehicles w/ uncovered solid waste; distribution is mainly at landfills w/ their cooperation • Begin work on 5-year plan/ strategies, including a request for needed & desired funding In Summer 2008, WVCWP staff researched a variety of topics for the TAC. Researched anti-litter logos, slogans, potential website/domain names. Researched related web sites from similar campaigns. Surveyed teenage boys from target age-group (informal). WVCWP Program Manager provided research results to TAC.	
Citizen Participation	See PI/P – Citizen Participation	<u>Monitoring/Citizen Participation</u> Continue to promote citizen participation program to monitor trash near local creeks. Transfer data to trash tally sheets (element of Creek Keeper's Program). See PI/P (Section 6 of this Work Plan)	WVCWP staff conducted 2 trash monitoring / Cleanup events with student and citizen volunteers. The volunteers at all clean-up events were taught to participate in groups and learned how to use the WVCWP trash tally forms to collect the data which helps identify trash sources. WVCWP Management attended a Training Workshop sponsored by Keep America Beautiful on March 19, 2008. Topics included "Planning for 2009 California Statewide Litter Collection, Enforcement and Beautification Day", "New Community Appearance Index", and others.	WVCWP Staff

TRASH INVENTORY & MANAGEMENT
MONTE SERENO

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 08-09 ANNUAL REPORT

Trash Inventory & Management Evaluation

General Evaluation of Trash Problems

TRASH MONITORING

After several years of monitoring trash sites, WVCWP staff is familiar with the sites and the problems that need to be addressed. Two leading trash sources in West Valley communities are "Illegal dumping" and "vehicular litter" (found along highways, freeway-on-and-off-ramps, and smaller arterial roads). The type of litter that is retrieved is predominantly snack, food, beverage and other product packaging and cigarette butts.

WVCWP staff have found that having Creek Cleanup volunteers use 'Tally Sheets' is helpful. However, it has been noted that having volunteers compute TOTAL TRASH at the end of an event tends to overstate the amount of trash collected. Perhaps due to the 'sense of accomplishment' at the end of their efforts, volunteers seem to inflate the amount of trash per bag.

Therefore, a 1/3 or 1/2 full bag becomes 'a bag', as if it is a full bag. So, for example, an event with 10 bags that are 1/2 full, plus 6 bags that are actually full, could become "16 bags of trash collected" – rather than the more accurate **5 bags** (10 bags x 0.5 – half full = **5 full bags**) + **6** full bags = **11 bags**.

Staff will make an effort to convey the importance of accurate totals to volunteers in the future.

SCHOOL INVOLVEMENT

School lunch yards can be another source of trash, and WVCWP regularly holds outreach activities at schools, including cleanups, to address this issue. However, recent litter pickup events at schools have found relatively little trash. WVCWP has found that it is more effective to have 1 class work on litter pickup (such as during an Enviroscape presentation rotation) than to have a whole school turn out – because the school yard may be too clean to generate much litter pick-up activity for a large group of students. This approach was tried at St. Mary's Elementary School (Los Gatos) in FY 08-09 and it worked well.

WVCWP TRASH ACTIVITIES EVALUATION

Creek Keeper Events – Volunteer Participation - Trash Identification, Tallying & Pick-up

WVCWP hosted 2 Clean-up events, with Trash Monitoring training and completion of tally sheets.

Coastal Cleanup Day

San Tomas Aquino Creek @ Westmont High 9/20/08

WVCWP hosted a Cleanup Event at the site where it has regularly hosted this event.

Volunteers were instructed in use of Tally sheets, and were provided with clipboards, etc. Working in groups, volunteers were able to pick up trash and carry out

trash monitoring.

15 Volunteers attended along with WVCWP and City of Saratoga staff.

Distributed 15 reusable bags (purchased from Safeway with gift card donated by Safeway to WVCWP).

Trash Totals from all events are found in Attachments (Trash Summaries)

The Cleanup Event was covered in articles appearing in 3 weekly newspapers; details are listed in the Newsletter/Press Release section (above; also see PI/P Section Attachments *(Coastal Cleanup Day article)*.

National River Cleanup Day

San Tomas Aquino Creek @ Westmont High 5/09

WVCWP hosted a Cleanup Event at the site where it has regularly hosted this event.

15 Volunteers participated in this event. Volunteers were instructed in use of Tally sheets, and were provided with clipboards, etc. Working in groups, volunteers were able to pick up trash and carry out trash monitoring.

Volunteers cleaned 1.5 miles of creek. Appx. 400 lbs of trash (including heavy metal objects) were picked up, along with appx. 80 lbs of recyclables. Most unusual items found were tires, and a baseball glove in good condition.

Trash Totals from all events are found in Attachments (Trash Summaries)

CREEK CLEANUP EVALUATION

The site usually used by WVCWP site for Creek Cleanups is being evaluated by staff. It appears that there is less trash to be picked up at the September event than at the May event. This is possibly due to the fact that a Cleanup is held in May, then school is out for 3 months; the weather during this period is not windy & rainy, so trash isn't being carried into creek – in Sept. school has just started up. This may result in there being less trash in May than in Sept.

WVCWP will investigate the possibility of hosting a Cleanup at a different site in September, where lots of summertime activity would be taking place, which might be more likely to have trash built up in Sept. Cleanup at such a site would help prevent trash from entering the creeks when rains start later in the Fall.

Low to medium presence (26-75 pieces) of transportable, persistent, buoyant litter such as: hard or soft plastics, styrofoam, balloons, cigarette butts.	Medium prevalence (76-200 pieces) of transportable, persistent, buoyant litter such as: hard or soft plastics, styrofoam, balloons, cigarette butts.	Large amount (>200 pieces) of transportable, persistent, buoyant litter such as: hard or soft plastics, balloons, styrofoam, cigarette butts;
SCORE	20 19 18 17 16	15 14 13 12 11	10 9 8 7 6	5 4 3 2 1 0
4. Biohazard, Toxic and Sharp Objects	B: Trash contains no medical waste, diapers, pet or human waste. No evidence of toxic substances such as chemical containers or batteries. Only 1 piece of broken glass or metal debris, if any, is present.	B: No toxic substances, but small presence (2-10 pieces) of sharp objects such as broken glass and metal debris.	Presence of **any one** of the following: hypodermic needles or other medical waste; used diaper, pet waste, or human feces; any toxic substance such as chemical containers, batteries, or fluorescent light bulbs. Medium to high prevalence (11-50 pieces) sharp objects.	Presence of **more than one** of the items described in the marginal condition category, and/or high prevalence of (> 50) sharp objects.
Site Accessibility	A: Access is difficult, restricted by locked gate or some other physical barrier like steep banks or thick riparian veg. Site reach does not appear to be used by people. Might be private property or protected watershed.	A: Access is limited and site reach does not appear to be used by people. No trails down to creek.	A: Public access to reach is fair to good but site does not appear to be used frequently, **or** private access is good without any public access.	A: Excellent reach access including trails down to and adjacent creek and creekside space for sitting down. Some evidence that reach is used frequently by the public (e.g. rope swings, many beer/soda cans and food wrappers left on the banks, etc.).

Urban Rapid Trash Assessment Worksheet

Santa Clara Valley Urban Runoff Pollution Prevention Program

	CONDITION CATEGORY			
Trash Assessment Parameter	**Least Disturbed (Optimal Urban)**	**Sub optimal Urban**	**Marginal Urban**	**Poor**
5. Illegal Dumping	D: No evidence of illegal dumping. No bags of trash, no yard waste, no household items placed at site to avoid proper disposal, no shopping carts.	D: Some evidence of illegal dumping. Limited vehicular access limits the amount of potential dumping, or material dumped is diffuse paper-based debris.	D: Presence of **one** of the following: furniture, appliances, shopping carts, bags of garbage or yard waste, coupled with vehicular access that facilitates in-and-out dumping of materials to avoid landfill costs.	D: Evidence of chronic dumping, with **more than one** of the following items: furniture, appliances, shopping carts, bags of garbage, or yard waste. Easy vehicular access for in-and-out dumping of materials to avoid landfill costs.
Illegal Littering	L: Any trash is incidental litter or carried downstream from another location.	L: Some evidence of litter within creek and banks originating from adjacent land uses	L: Prevalent in-stream or shoreline littering that appears to originate from adjacent land uses.	L: Large amountof litter within creek and on banks that appears to originate from adjacent land uses.
D-SCORE	10 9	8 7 6	5 4 3	2 1 0
L-SCORE	10 9	8 7 6	5 4 3	2 1 0
6. Accum-ulation of Trash	There does not appear to be a problem with trash accumulation from downstream transport. Trash, if any, appears to have been directly deposited at the stream location.	Some evidence that litter and debris have been transported from upstream areas to the location, based on evidence such as silt marks, faded colors or location near high water line.	Evidence that trash is carried to the location from upstream, as evidenced by its location near high water line, siltation marks on the debris, or faded colors.	Trash appears to have accumulated in substantial quantities at the location based on delivery from upstream areas, and is in various states of degradation based on its persistence in the waterbody. A large percentage of trash items have been carried to the location from upstream.

WEST VALLEY
CLEAN WATER PROGRAM

Charles R. Hoppin, Chair
State Water Resources Control Board
1001 I Street
Sacramento, CA 95814

June 3, 2009

Re: Support for Expanded Use Proposal No. 16877-Bay Area-wide Trash Capture Demonstration Project

Dear Mr. Hoppin,

The West Valley Clean Water Program (WVCWP) supports proposal No. 16877-Bay Area-wide Trash Capture Demonstration Project submitted by San Francisco Estuary Project (SFEP) and Association of Bay Area Governments (ABAG) for installation of trash capture devices in catch basins in Bay Area cities and counties. WVCWP represents the urban runoff program for four small south San Francisco Bay communities: Campbell, Los Gatos, Monte Sereno and Saratoga.

Over the past year we have been closely tracking the Trash Capture Pilot Demonstration Project by our county-wide urban runoff program (aka: SCVURPPP), and have contemplated, given our limited and scarce local resources, how our communities might also install such capture devices in selected areas. By funding this project and including our smaller agencies in the proposed Bay-Area Project, we could have a visible and tangible effect on reducing trash entering waterways through storm drains.

Furthermore, being at the top of the watershed, we know that even if only a few devices are installed within our communities, they will have a significant impact on trash and litter in waters downstream. We are committed to watershed approaches and support this project's effort to embrace and further watershed based solutions.

Respectfully,

Kelly Carroll
Program Manager

Training Summary: Pesticide

City of Campbell: All parks staff who hold "Qualified Applicator Certificates (QAC) or higher from the CA Dept. of Pesticide Regulation, pursue the necessary CEUs to maintain their certificates, and are currently up-to-date. Annual Department of Agriculture Pesticide Safety Training for all Parks Maintenance crew was held on June 4, 2009 at the City's Corporation yard.	June 4, 2009	City of Campbell (33) Parks and Maintenance Crews
Town of Los Gatos: The Annual Pesticide Safety Training was held on April 14, 2009. Dennis Merrill, president of *Killroy/ Sensitive Solutions Pest Control* gave the presentation. 11 Town of Los Gatos Parks & Public Works staff attended. The Training stressed Safety, Environmental Hazards and Drift – if winds are 5 mph or more, the Town will not spray any pesticide. The Safety Training covered 9 different pesticides. Topics related to runoff issues included: • Labeling • Hazards • Routes pesticides can enter the human body • Drift • Runoff • Wildlife Hazards • Laws & Regulations	April 14, 2009	Town of Los Gatos (11) Parks and Public Works Staff

Town of Los Gatos: A Tailgate Training on use of broadleaf control pesticides was held in June 2009 (Roundup, Garlon, Surflan) with emphasis on avoiding spraying (applying granules when possible), applying only on days when there will be no runoff (no rain predicted, no irrigation scheduled), and avoiding use of pesticides when possible (ie using hoes instead). .	June 2009	Town of Los Gatos Maintenance Staff (11)
CITY OF SARATOGA: The Annual Pesticide Safety Training was held on July 25, 2008. It was held at Saratoga Corp yard and all of the Parks and Streets Maintenance staff attended. The training was given by Pete Howes, Horticulturist, and covered long & short-term effects of pesticides and environmental concerns.	July 25, 2009	City of Saratoga Parks and Street Maintenance Staff
CITY OF SARATOGA: All Parks staff received IPM training in June 2009 All 9 Parks Dept employees have Qualified Applicator Certificates, and have been attending seminars for their Continuing Education hours. Some seminars include topics related to IPM and Less Toxic Pest Control.	June 2009	City of Saratoga Parks Staff (9)

Subject: City of Mountain View's Urban Runoff Management Program
FY 2008-2009 Annual Report

Dear Mr. Wolfe:

This report is submitted by the City of Mountain View, in conjunction with the Santa Clara Valley Urban Runoff Pollution Prevention Program's Annual Report, pursuant to provision C.6.a. of the Program's reissued municipal storm water NPDES Permit (Order No. 01-024). The report summarizes activities performed during FY 2008-2009 in accordance with the City of Mountain View's Urban Runoff Management Plan (URMP) submitted to the Regional Board on September 1, 1997 and updated in September 2004, and the performance standards contained therein.

Contents of Report

The goals of this Annual Report are to: 1) concisely document implementation of our URMP and FY 08-09 work plan during the past fiscal year; 2) evaluate program results for continuous improvement; 3) comply with permit requirements; and 4) share this information with other Co-permittees, municipal decision-makers, and the public. To accomplish these goals, the report contains the following sections:

I. Contents of report;
II. Program highlights and accomplishments;
III. Summary of continuous improvement activities;
IV. Attachments:
   A. Certification Statement
   B. Self-Evaluation and Work Plan Completion Matrix
      - ICID

E. Pesticide Use Evaluation for FY 08-09

Program Highlights and Accomplishments

The City's Urban Runoff Management Plan URMP describes activities that are implemented to control storm water runoff pollution. During FY 08-09, the City continued efforts to implement its URMP to the maximum extent practicable. Attachment B provides self-evaluation for each element in the City's URMP. Highlights of the City's FY 08-09 URMP accomplishments are listed below:

- The City responded to 69 ICID incidents, which resulted in the issuance of 8 warning notices, and 2 administrative actions with penalties. The penalties amounted to $1,500.
- The City continued its restaurant inspection and outreach program, conducting 86 restaurant inspections, which was an increase from last year. The City recently hired an inspector, primary responsibility will be to perform the restaurant inspections, which also include fire and life safety inspections.
- The City implemented the enhanced data collection and reporting requirements for the ICID and Industrial inspection programs.
- In addition to the restaurant inspections, the City conducted 205 industrial/commercial inspections and re-inspections (this figure does not include restaurants and hazardous materials facilities) during FY 08-09.
- The City conducted training for streets, parks, water, wastewater, fleet services, and facilities personnel, as well as Planning Division staff, and managers from Public Works, Community Development, City Manager's Office, and the City Attorney's office.
- The City implemented its PIP program, which included school outreach, publications, and public events, and multi-cultural outreach.
- The City reviewed 114 projects for storm water related items.
- The City implemented its C.3 requirements, which included approval of 5 new projects, which included bioswales, infiltration systems, tree well systems, and media filtration.
- The City implemented its treatment BMP inspection program.
- The City implemented its database that will be used to permit stormwater treatment BMPs, as well as track inspection and maintenance activities for those BMPs.
- The City conducted 109 construction site inspections, and issued 18 written notices.
- The City implemented its IPM Policy and IPM Plan.
- The City utilized a database for tracking pesticide use.

Continuous Improvement Activities

The City is committed to seeking URMP areas for improvement. The current continuous improvement items are listed below:

- The City will continue to implement its enhanced restaurant inspection program.
- The City will continue to work to improve implementation of the C.3 requirements, including use of the database to issue permits for operating and maintaining stormwater treatment BMPs.
- The City will closely monitor development of the Municipal Regional Permit to identify areas that may need to be modified to comply with any new requirements.
- The City will continue to evaluate and implement improvements to the IPM Plan, and pesticide management program.

Thank you for your review of this Annual Report. If you have any questions regarding the materials submitted, please contact me at (650) 903-6225.

Sincerely,

Eric Anderson, Urban Runoff Coordinator

Cc. Sue Ma, RWQCB

Municipality: City of Mountain View

ICID Program Evaluation

During FY 08-09, the City responded to 69 ICID incidents, which are comparable to past years' results (92 incidents in FY 02-03, 89 incidents in FY 03-04, 74 incidents in FY 04-05, 80 incidents in FY 05-06, 68 in FY 06-07, and 70 in FY 07-08). The breakdown of the types of incidents, potential source, sources of reports, and follow-up and enforcement actions are summarized in the attachment to this section of the annual report. During FY 08-09 the City responded to 1 fewer incident than during FY 07-08. Evaluation of the "Incident Type" data showed that the City responded to7 fewer "sanitary sewer spill," 9 fewer Vehicle/equipment leaking," 4 more "accidental spill," 4 more "abandoned drum," and 3 more "Food facility" incidents.

During FY 08-09, the City continued its restaurant inspection program to address restaurant-related ICID incidents. This will be discussed further in the IND section of the annual report.

During FY 08-09, the City continued using a data management system called Firehouse. Use of this new database has enabled the Environmental Protection Division to have greater access to incident records.

Review of the data does not provide useful information regarding the distribution of ICID incidents. The incidents appear to be randomly occurring throughout the City.

FY 2008-2009 ANNUAL REPORT

Municipality: City of Mountain View

Industrial/Commercial Program Evaluation

During FY 08-09, the City implemented its Industrial/Commercial inspection program. The data above summarizes the City's actions. Common types of problems found are spills and leaks, housekeeping, training requirements, secondary containment needs, and equipment washing.

The City's auto facility inspection program evaluates sanitary sewer discharges and stormwater issues at these facilities. During FY 07-08, 143 automotive facility inspections were completed. During FY 08-09, City staff conducted 138 auto facility inspections.

During FY 08-09, the City conducted 86 restaurant inspections. The restaurant inspections include Fire and Life Safety as well as Environmental inspection items. Combining the fire and environmental inspection items was implemented to provide more efficient inspection service, but requires more time to complete each inspection. The City has hired an inspector, whose primary responsibility will be to conduct restaurant inspections.

The City also conducted storm water inspections at a number of other industrial facilities, including machine shops, laboratories, and metal finishers. The types of industrial facilities in the City have changed during the past few years, and during FY 08-09, the last remaining electroplating facility in the City ceased operations and is currently going through the closure process.

During FY 08-09, The City did not collect penalties related to commercial and industrial inspections.

Public Streets, Roads & Highway O&M Program Evaluation
During FY 08-09, the City's sweeping totals were comparable to the totals for FY 07-08. A summary of the City's sweeping totals is included with this report. The City also continued to implement the Clean Sweep program, which provides access to streets that are impacted with parked cars, and the annual leaf removal program. Training during FY 08-09 (March 26, 2009) focused on incident response, preventing spills from reaching the storm drain or the sanitary sewer drain, chemical handling, and how to handle abandoned wastes. The Public Services Department's Safety and Training Manager coordinated the training, and the Urban Runoff Coordinator participated in the training presentation. Training in conjunction with the Safety and Training Manager is a good way to present multiple topics to the employees without impacting operations.

No comments	NA	NA

Corporation Yard O&M Program Evaluation

During FY 08-09, the City conducted training (March 26, 2008) for all MOC operations and maintenance employees regarding the Environmental Compliance Plan. The training mostly covered hazardous materials issues, such as storage, and incident response, spill mitigation, and reporting.

The City continued its contract for SWPPP inspections and monitoring for the MOC. Quarterly dry weather inspections and monthly wet weather inspections did not result in discoveries of new pollutant sources or new BMPs that may be needed. The project to construct a roof over the bulk storage area was completed in FY 07-08. The Annual Report for the MOC SWPPP is available for review upon request.

Rural Public Works Program Evaluation

The City of Mountain View is urbanized, so most of the Rural Public Works Performance Standards do not apply. The standards describing work performed along or across stream channels may be applicable depending on the project. The City's Public Works specifications require contractors to install erosion controls, and City contacts require contractor to obtain the necessary permits for working in and along watercourses.

FY 2008-2009 ANNUAL REPORT

Municipality: City of Mountain View

Storm Drain System O&M Program Evaluation
During FY 08-09, the City's Wastewater Section continued to maintain storm drains by cleaning catch basins using a vacuum truck. The Wastewater Section also stencils storm drains throughout the City. Wastewater conducts preventative maintenance on the City's sanitary sewer system, which reduces sewer overflow incidents. In cases where sewer overflows occur, Wastewater will unplug the sewer, and vacuum the spilled sewage. These incidents are reported in the ICID data. During FY 08-09, the City reports a decreased number of sewage overflows from 16 to 9 incidents. Wastewater also responds to other types spill incidents, when needed. Training during FY 08-09 focused on incident response, preventing spills from reaching the storm drain or the sanitary sewer drain, chemical handling, and how to handle abandoned wastes. The Public Services Department's Safety and Training Manager coordinated the training, and the urban runoff Coordinator assisted with the training presentation. Training in conjunction with the Safety and Training Manager is a good way to present multiple topics to the employees without impacting operations.

Water System O&M Program Evaluation
During FY 08-09, the City's Water System maintenance section implemented BMPs during operations. The City will continue to evaluate Water Utility operations. The City converted to using chloramines as the disinfectant, and will incorporate BMPs for mitigating chloramines when those BMPs are developed. The City also worked with a private water supply company, Cal Water, to evaluate the need for BMPs during well operations. Cal Water provides water to a small area of the City and the operations were reviewed on a case-by-case basis.

NEW DEVELOPMENT PLANNING PROCEDURES (C.3)

FY 2008-2009 Work Plan Self Evaluation Matrix

Item No.	Activity	FY0 08-09 Work Plan Tasks	FY 08-09 Accomplishments	Responsible Party
C.3.a Performance Standard Implementation Goal: To modify Mountain View's URMP to include revised model Planning Procedures Performance Standards that incorporate Provision C.3 requirements.				
NDP - all	**a.1.** Incorporate revised model Planning Procedures Performance Standards into local urban runoff management plans.	The City will review the Program-developed model Planning Procedures Performance Standards when completed. If acceptable, the City will incorporate the model Planning Procedures Performance Standard into its Urban Runoff Management Plan.	The Program's model Performance Standard and Supporting Documents for Planning Procedures for New Development and Redevelopment are adopted and included in the City's URMP.	FD
C.3.b Development Project Approval Process Goal: To modify Mountain View's development project approval processes, for both private and public development project, to incorporate the requirement of Provision C.3				
NDP – 1	**b.1.** Assess current stormwater-related requirements in Co-	1) Conditions of Approval will be revised to list Group 2 projects when the deadlines are determined.	1. The City's Conditions of Approval require stormwater treatment controls for Group 2B projects.	FD CDD PW

	permittee's development review process, for public and private projects, and identify additional steps or tools required at each stage of the process to meet C.3. requirements.	2) Develop guidance document to assist developers and City staff implement the C.3 requirements.	2. The City's guidance document outlining the C.3 requirements is updated to describe the threshold for Group 2B projects.	
NDP – 1	**b.2.** Develop new or modify existing review policies, ordinances, procedures, and/or conditions of approval to incorporate Group 1 requirements (based on results of tasks under C.3.c. through C.3.m.)	Policies, ordinances, procedures, and/or conditions of approval are required to implement the C.3 requirements. Revisions are incorporated as necessary to reflect changing requirements.	In October 2004, the Mountain View City Council adopted a new section (Sec. 35.32.23) of the ordinance, titled "Permanent stormwater pollution prevention measures." This ordinance section requires implementation of the C.3 requirements, the City's Stormwater Quality Guidelines, and inspection and maintenance responsibilities. Standard Operating Procedures are included in the URMP. The conditions of approval require C.3 controls for Group 2B projects. The guidance document outlines C.3 requirements for developers. The City's guidance document was revised to include Group 2B requirements.	FD CDD PW
NDP - 10	**b.3.** Train Co-permittee staff in planning, building, and engineering departments on the	The City will train Planning, Building, and Engineering staff on all changes to the development review process, and the use of tools, such as check sheets and updated materials. Staff training will be performed either in-house, or as	City staff attended SCVURPPP C.3 training workshops – see Staff Training Table. In March 2009, the Urban Runoff Coordinator met with Directors and Managers from Community Development Department and Public Works to discuss proposed Municipal Regional Permit requirements that may change implementation of the	FD CDD PW

	C.3. provisions and goals, the required changes in the approval process, and the use of appropriate tools.	part of a Program-wide effort.	C.3 provision. Urban Runoff Coordinator provided a C.3 training presentation to Planning division staff.	
C.3.c Requirements for Group 1 and Group 2 Projects Goal: Prepare to require proponents of Group 1 projects to design and implement stormwater treatment BMPs or reduce stormwater pollution to the maximum extent practicable. Participate in development of the proposal for an alternative Group 2 project definition and prepare to implement C.3 requirements for Group 2 projects as needed				
NDP – 12	**c.1.** Develop and implement a procedure to request and log the type, size, and impervious area of every project (and extent of redevelopment if applicable) for determination of applicability of Group 1 (and later Group 2) requirements.	1. An impervious surface data sheet was developed for preliminary information about the types of projects that occur in Mountain View. 2. The impervious surface data collection sheet may be modified for use in the guidance document as a way to determine applicability of the C.3 requirements.	Impervious surface data collection sheets are required to be submitted with the Stormwater Management Plan required by the City's guidance document. Impervious surface calculation sheets may also be required during the Planning review process to determine if the project meets the C.3 threshold.	FD CDD PW
NDP – 12	**c.2.** Develop a method for determining	1. For Group 1 projects, Community Development Applications received on or after October 15, 2003 will be	1. The City determined that group 1 project applications received on or after October 15, 2003 were subject to C.3 requirements. For	FD CDD PW

	whether a private project was "deemed complete" by 7/15/03, or documenting that a public project was funded and scheduled for construction by 10/15/03.	subject to the City's C.3 implementation program outlined in the guidance document. 2. For public projects, the City will document projects funded and scheduled for construction by 10/15/03, which will be exempted from C.3 requirements.	Group 2A, the date was October 2005, and for Group 2B, the date was August 2006. 2. For Group 1, C.3 requirements were included on public projects funded and scheduled for construction by 1/15/2004. For Group 2A, the date was October 2005, and for Group 2B, the date was August 2006.

FY 2008-2009 ANNUAL REPORT

Municipality: City of Mountain View

Item No.	Activity	FY 08-09 Work Plan Tasks	FY 08-09 Accomplishments	Responsible Party
C.3.e. Operation and Maintenance of Treatment BMPs				
Goal: To develop and implement local agency operation and maintenance (O&M) verification programs to help ensure the proper maintenance of stormwater treatment measures on public and private property.				
NDP – 8	**e.1.** Develop and implement a procedure for logging information about treatment BMPs installed at approved Group 1 projects, and for maintaining a list or database of properties, treatment BMPs, and responsible operators.	The City's Fire and Environmental Protection Division currently maintains a database of facilities that have stormwater treatment BMPs. The database is set up to print out annual letters requiring the facility contact to submit proof of BMP maintenance.	During FY 08-09, the City continued to use its BMP O&M tracking database. The database is used to track BMP inspection information and maintenance verification. Annual letters are sent requiring submittal of maintenance records, where required. The City has issued permits and tracks inspection and maintenance activities for 13 sites.	FD RBF
NDP – 8	**e.2.** Adapt model O&M agreement language to meet agency-specific needs and requirements and incorporate into the project review and	The City will review the model O&M agreement language that will be developed by the Program, and is due 12/02. If acceptable, the O&M agreement language will be incorporated into the project review and approval process as appropriate.	A final O&M agreement has been developed. Completed O&M agreements are required as part of the Stormwater Management Plan review and approval.	FD

	approval process.			
NDP – 8	**e.3.** Develop local programs for inspection of a subset of prioritized treatment BMPs to verify that the responsible party is performing required O&M.	The City will utilize the O&M verification system that is currently in place for treatment BMPs. The current system is to send annual maintenance letters to all facilities with treatment BMPs requiring submittal of maintenance certification. Additionally, treatment BMPs that are considered to be a priority for inspections will be inspected annually.	During FY 08-09, the City conducted 11 stormwater treatment BMP inspections. The results from these inspections were submitted to SCVURPPP for reporting. During FY 09-10, the City will continue inspecting stormwater treatment facilities and the inspection results will be entered into the C.3 database.	FD
NDP - 12	**e.4.** Report on BMP O&M verification program.	The City will report on the progress of the BMP O&M verification program during the Annual Reporting process. The annual reports will include effectiveness evaluation and planned program improvements.	As previously stated, the City developed a new permitting, maintenance tracking, inspection tracking, and reporting database that started implementation in FY 07-08. The City will continue to utilize the BMP tracking program during FY 09-10.	FD
C.3.f. Hydromodification Management Plan (HMP) Goal: To manage increases in runoff peak flow and volume for Group1 projects, where such increases may cause increases erosion of creek beds and banks or related impacts, through implementation of a HMP.				
NDP – 1	**f.1.** Upon adoption by the Regional Board, begin implementation of HMP requirements for Group 1 projects that may cause	The City will review the HMP requirements. If acceptable, the HMP requirements will be implemented	HMP requirements have been incorporated into the City's C.3 implementation process and into the guidance document.	FD CDD PW

	increased erosion of other related impacts.			
C.3.h. Alternative Certification Goal: To allow a professionally qualified person to certify the adequacy of design of stormwater treatment measures.				
NDP	**h.1.** Alternative certification	The City will develop an internal procedure to allow alternative certification of the adequacy of design of stormwater treatment measures.	The City requires an engineer's certification stating that the treatment controls designed for the project meet the City's Guidelines and requirements. For larger, complex projects, the City has required 3rd party engineer's certifications for plan approvals.	FD CDD PW
C.3.g. Waiver and Compensatory Mitigation Program Goal: Establish a program under which a project proponent may request a waiver from treatment BMP requirements due to impracticability, with a provision to provide an equivalent water quality benefit to the same receiving water (that allows participation in regional solutions).				
NDP – 1	**g.1.** Develop local waiver program, perform legal review, and incorporate provisions in project review process	The City will review the model waiver and compensatory mitigation program that will be developed by the Program, and is due 3/03. If acceptable, the waiver and compensatory mitigation program will be incorporated into the project review and approval process as appropriate.	At this time, the City does not have a waiver and compensatory mitigation program since there is not a system to allow for participation in regional solutions. The City will consider a waiver and compensatory mitigation program if a viable opportunity becomes available.	
NDP - 12	**g.2.** Tracking information for reporting on waivers granted, including project data, reasons for and terms of the waiver, and the	If an acceptable waiver and compensatory mitigation program is adopted, the City's Fire and Environmental Protection Division will update the new development tracking database to include the requested waiver information.	Waiver tracking program is not applicable at this time.	

	alternative benefit project and completion date.			
C.3.j. Site Design Measures Guidance and Standards Development				
Goal: To incorporate site design measures that reduce water quality impacts into local design standards and encourage their use in project designs to meet C.3. requirements.				
NDP – 4	**j.1.** Review existing local design standards and guidance, and compare them to the list of areas to address in Provision C.3.j. and other references such as "Start at the Source" and the "Development Policies Comparison" work sheet. Prepare and submit an analysis of local standards, identified opportunities for revision, and proposed revisions.	1. Review list of recommended site design measures to reduce water quality impacts using references, including the NPDES Permit and "Start at the Source." 2. Compare the list of recommended site design measures with existing City standards and guidance. 3. Identify opportunities for revisions to City standards that will incorporate site design measures to reduce water quality impacts. 4. Prepare and submit an analysis of the revisions proposed to be incorporated into the City's project review process, including schedule for revisions and implementation	The City's C.3 guidance document references site design measures. The City's C.3 guidance document also provides reference to the SCVURPPP C.3 Handbook, and the Start at the Source" Design Guidance Manual.	CDD FD

NDP – 4	**j.2.** Incorporate the revised standards and guidance into local project approval process and "fully implement" site design measures and guidance.	Site design measures are incorporated into the project design and review process.	Site design measures are encouraged during review and comments on project Stormwater Management Plans.	CDD FD
C.3.k. Source Control Measures				
Goal: Require source control measures for new redevelopment projects to limit pollutant generation, discharge and runoff to the maximum extent practicable.				
NDP – 4	**k.1.** Revise conditions of approval to include the source control measures recommended in Provision C.3.k.	The City will review the model list of source control measures that will be developed by the Program. If acceptable, the City's Conditions of Approval will be revised to include the required source control measures.	Source control measures are required in Project Planning Conditions of Approval, and are also included in plan check review sheets that are required to be completed and submitted for review during the plan review process.	FD

Item No.	Activity	FY 08-09 Work Plan Tasks	FY 08-09 Accomplishments	Responsible Party
C.3.l. Update General Plans				
Goal: Include water quality and watershed protection principles and policies in General Plans to the extent necessary to provide the basis for implementation of the measures required by Provision C.3.				
NDP - 1	**I.1.** Review current	The current City General Plan Policy has been reviewed, and pursuant to	During FY 07-08, the City started its "General Plan Visioning" process, which included public workshops to	CA FD

Regional Board Comments on New Development-Planning Procedures in FY 2007-2008 Annual Report		
Item	**RWQCB Comment**	**City of Mountain View Response**
No comment	NA	NA

New Development-Planning Procedures Program Evaluation

During FY 08-09, the City implemented the C.3 requirements using its existing development review process. Information regarding the requirements is provided to applicants early in the planning process. The City implements the requirement using Conditions of Approval, and the C.3 guidance document, titled "Stormwater Quality Guidelines Development Project," which reflect Group 2B requirements. The Fire and Environmental Protection Division places conditions of approval on projects requiring applicants to prepare and submit a Stormwater Management Plan for applicable projects. The information required in the Stormwater Management Plan is listed in the City's Stormwater Quality Guidelines document. The Stormwater Management Plan includes information about the treatment controls that will be installed or used to comply with the requirements. The Plan also describes the O&M requirements. During the plan review phase of the process, building plans and the Stormwater Management Plan are checked to verify that the conditions and requirements are met. Plans are approved and a building permit will be issued when the conditions and requirements are met.

During FY 08-09, the City placed the C.3 Planning Condition on 19 projects. Most of the projects that had the C.3 condition are still in the Planning phase and have not submitted building plans to the City. The City approved five private projects that included stormwater treatment controls. Controls for these projects included bioswales, mechanical treatment devices, bioretention, infiltration chambers, and tree wells. No public projects requiring stormwater treatment controls were formally approved in FY 08-09, though significant planning for a new Fire Station did take place, which included providing for stormwater treatment BMPs. Additionally, the City met with developers to discuss the stormwater treatment requirements for four significant projects that will most likely be formally submitted in FY 09-10. Conditions were placed on all projects that Maintenance Agreements would be entered and recorded prior to final occupancy.

Two previously reported projects were completed during FY 08-09 and the City initiated its inspections and O&M verification program. A summary of the BMP inspections is included in Attachment D. During FY 08-09, the City implemented its database that is used to issue permits to BMP operators, and to track inspection and maintenance activities.

The City reviewed 114 projects for potential stormwater related impacts and requirements.

ATTACHMENT B

SANTA CLARA VALLEY URBAN RUNOFF POLLUTION PREVENTION PROGRAM

FY 2008-2009 ANNUAL REPORT

Municipality: City of Mountain View

New Development-Construction Inspection Program Evaluation
During FY 08-09, the City continued to implement an effective construction inspection program. The City conducted 109 construction site inspections and issued 18 written notices. Most notices were for minor violations with corrective actions. The majority of the inspections were conducted at small project sites. Construction on most projects was slowed significantly due to economic factors. The City currently has a few moderately sized projects, which are the priority sites for inspections. Most of the construction inspection items identified were housekeeping issues that were corrected, such as sweeping, replacing filters, and adding rock to the construction driveway. Pre-winter inspections were conducted and information was distributed, which seemed to help maintain compliance throughout the winter. The City also developed and distributed a fact sheet to construction site supervisors describing SWPPP requirements and the major items that State staff stated that are expected to be in place at sites that are covered by the General Construction NPDES Permit. The City will continue to implement its construction inspection program. Pre-winter inspection and information distribution is important for achieving compliance, and will be conducted again in FY 09-10.

PEST MANAGEMENT
(Provision C.9.d of the Permit)

FY 2008-2009 Work Plan Self Evaluation Matrix

Item No.	Activity	FY 08-09 Work Plan Tasks	FY 08-09 Accomplishments	Responsible Party
Municpal Pesticide Use				
Goal 1.A. Eliminate all unnecessary municipal pesticide use (particularly organophoshate (OP) pesticide use) and implement Integrated Pest Management (IMP) techniques.				
I.A.1	Record Keeping and Tracking	Develop and implement a process for tracking pesticide use on municipally owned property (PS #8). Include in the process reporting and justification for the use of OP pesticides and BMPs employed during OP pesticide use.	Pesticide use tracking database was used during FY 08-09. Pesticide use data for FY 08-09 is available on request.	FD, CSD, SGL, and PCO
I.A.2	IPM Policy	Adopt an IPM policy and/or ordinance requiring the use of IPM techniques in the agency's operations, minimization of pesticide use, and the restricted use of organophosphate pesticides only when their use is justified and adverse water quality impacts are minimized (PS #2).	City's IPM Policy was adopted by the City Council on September 10, 2002.	FD, CSD, SGL
I.A.3	IPM Plan	Develop and implement standard operating procedures (SOPs) and best management practices (BMPs) for implementing the IPM policy. (PS #3).	Final IPM Plan was completed in June 2003. IPM Plan includes SOPs and BMPs. The Plan was implemented during FY 08-09.	FD, CSD, SGL, CM

		BMPs will include special precautions to reduce water quality impacts when applying pesticides.		
I.A.4	Performance Standards	Update local URMPs to incorporate/adapt the model Pest Management Performance Standard, including a description of the legal authority (IPM policy/ordinance, contract language), work plan elements, BMPs, and SOPs needed for implementation. (Program FY 01-02 Work Plan)	Program's Model PS is adopted and included in the City's URMP.	FD
I.A.5	Contract PCOs	Develop and implement a process to ensure that any contractor employed to conduct pest control and pesticide application on municipal property engages in pest control methods consistent with the IPM policy adopted by the agency (PS #5).	City's PCO contract did not go for bid during FY 08-09. City's purchasing Division was notified of the IPM Policy and will be informed that future IPM requirements will be included when new PCO Contract is solicited. IPM Policy and Plan have been provided to the City's PCO contractor.	FD, purchasing
I.A.6	Chemical storage area inspection	Conduct a periodic agency-wide search of chemical storage areas for pesticides no longer legal for application per EPA, State, and/or local requirements, and properly dispose of any such pesticides pursuant to appropriate waste disposal regulations.	During FY 08-09, the Fire Department evaluated Citywide chemical inventories. No OP pesticides were identified.	FD
MM I.A.1	Annual report	Document completion of tasks in annual reports. Use pesticide-tracking process to document pesticide use.	Pesticide use data will be used in the effectiveness evaluation section of the annual report.	FD

ATTACHMENT B

SANTA CLARA VALLEY URBAN RUNOFF POLLUTION PREVENTION PROGRAM

FY 2008-2009 ANNUAL REPORT

Municipality: City of Mountain View

Goal 1.B. Raise awareness of all municipal employees and train employees who apply pesticides for the municipality about the municipality's IPM Policy and/or IPM techniques as appropriate.

I.B.1	Employee Training	Ensure that employees who apply pesticides for the agency obtain the appropriate training as required by the County Agricultural Commissioner and the State Department of Pesticide Regulation (DPR) (PS #4a).	All City pesticide applicators receive training required by the County and State.	CSD, SGL
I.B.2	IPM Training	Provide annual training on the appropriate portions of the IPM Policy, SOPs, and BMPs, and the latest IPM techniques to employees within departments responsible for pesticide application (PS #4b).	During FY 08-09, the City's pest control operators attended various training courses as part of job requirement for continuing education. IPM techniques are included in these continuing education courses. In past years, City staff attended the regional IPM training conference, which was not offered in FY 08-09.	FD. CSD, SGL
I.B.3	Training	Periodically (at least annually) inform employees who are not authorized and trained to apply pesticides that they cannot use over-the-counter pesticides in or around the workplace, consistent with the IPM Policy (PS #4c).	Departments have been informed to contact the PCO for pest problems. Training conducted by the Safety and Training Manager and the Urban Runoff Coordinator on March 26, 2009 reviewed the Environmental Compliance Plan for the Operations and Maintenance Divisions. This training covered incident response (including spills), chemical handling, emergency response, and handling abandoned waste. The over-the-counter pesticide prohibition was also discussed.	FD, CSD, PS
I.B.4	Training Workshop	Assist with and send staff to a workshop on least-toxic pest control methods and pesticide management BMPs. (Program FY 01-02 Work Plan)	Regional IPM workshop was not held during FY 08-09.	NA

ATTACHMENT B

SANTA CLARA VALLEY URBAN RUNOFF POLLUTION PREVENTION PROGRAM

FY 2008-2009 ANNUAL REPORT

Municipality: City of Mountain View

Item No.	Activity	FY08-09 Work Plan Tasks	FY 08-09 Accomplishments	Responsible Party
Public Education and Outreach				
Goal II.A. Increase awareness of IPM so target audiences recall less toxic pest management messages and adopt IPM behaviors. Target audiences include residential and commercial users, pesticide retailers, municipal employees, and special districts (PS #6)				
II.A.1	WE&O Outreach	Assist with local implementation of the Watershed Education & Outreach (WE&O) Campaign[1], which will target the general public and include messages about less-toxic pest control and proper disposal (Program FY 01-02 Work Plan).	The City supports WE&O Outreach through Program participation. The City distributed IPM and less toxic pest control information at various public events, such as the Art and Wine Festival, Arbor Day Fair, and downtown Thursday Night Live. The Community Outreach Coordinator also distributed Pest control fact sheets in English and Spanish.	FD, CM
II.A.10	Local Outreach	Prepare and pitch IPM stories and press releases to local media.	During FY 08-09, the City did not prepare IPM articles.	FD
II.A.12	IPM Outreach	Assist with implementation of local components of a "Pesticide User Outreach" project[2] targeting residential and commercial users (see Program FY 01-02 Work Plan).	City supports this item through Program Participation.	FD
II.A.13	IPM Outreach	Provide information on less toxic pest control (e.g., IPM techniques, municipal IPM policies, model contract language, training opportunities, etc.) to neighboring special districts (e.g., open space districts, vector control districts,	The City did not provide information to neighboring special districts. City supports outreach through regional effort.	FD

[1] Funded by all Co-permittees in FY 01-02.
[2] Funded by all Co-permittees in FY 01-02.

		and school districts) as appropriate		
MM II.A.1	Annual report	Document or estimate numbers of residents reached by outreach efforts and media advertising	Through distribution of IPM materials at community events, the City educated approximately 2,500 residents.	FD
Goal II.B. Educate pesticide retailers and consumers about less toxic pest control products and promote the sale of such projects.				
II.B.1	IPM Outreach	Continue to fund and participate in the BASMAA Regional IPM Partnership[3]. (Program FY 01-02 Work Plan)	City addressed this item through Program participation.	FD
II.B.2	IPM Outreach	Continue to implement cost-effective elements of the IPM Store Partnership Program. Create and provide fact sheets and other materials to pesticide retailers to facilitate point-of-purchase outreach. Visit stores as necessary to ensure ongoing participation. (Program FY 01-02 Work Plan)	The City continued its support of the Our Water Our World program during FY 08-09. Three stores in Mountain View participated in the program.	FD
II.B.3	IPM Outreach	Assist Program to offer IPM training opportunities to pesticide retailer employees through coordination with Master Gardener-taught educational programs.	This item addressed through Program participation.	FD
MM II.B.1	IPM Outreach	Document number of participating stores, materials distributed and employees trained. Evaluate the cost-effectiveness of the IPM Store	Three stores continued participation in the OWOW program. Pest fact sheets, and shelf talkers provided at the stores.	FD

[3] Funded by all Co-permittees in FY 01-02.

		Partnership Program each year		
Pest Control Operators (PCOs) **Goal III.A.** Minimize pesticide use by PCOs contracted for structural pest control and landscape maintenance.				
III.A.4	PCO operations	Require PCOs contracted for municipal applications to use pest control methods consistent with the municipality's IPM policy (through contract specifications). Specifically, require contractors to: a) follow the agency's IPM policy, BMPs, and SOPs; b) provide evidence of current IPM training, when feasible; and c) provide documentation of pesticide use on agency property to the agency in a timely manner (PS#5).	IPM Policy and Plan was provided to the City's contract PCO, Bay Valley Pest. Bay Valley submits records of pesticide applications to the City. Another landscape contractor applies small amounts of category III herbicides in accordance with the City's IPM policy. The contractor has been notified of the IPM policy.	FD
MM III.A.1	Record keeping and tracking	Document pesticide use by PCOs on municipal property	During FY 08-09, records of pesticide applications by Bay Valley were submitted to the City. These records were included in the pesticide database. Pesticide use data for FY 08-09 is available on request. Pesticide use by a landscaping company contracted by the City to perform minor work at public Parks had not been tracked in earlier years of pesticide use tracking. The City's pesticide use tracking process has been updated to include pesticides applied by the contractor. This is a small amount of pesticide use, and is included in the FY 08-09 pesticide summary.	

ATTACHMENT B

SANTA CLARA VALLEY URBAN RUNOFF POLLUTION PREVENTION PROGRAM

FY 2008-2009 ANNUAL REPORT

Municipality: City of Mountain View

Goal III.B. Require all PCOs to implement Best Management Practices (BMPs)				
III.B.2	PCO Contracts	Require PCOs contracted by municipalities to implement BMPs through contract specifications (see Action III.A.4., PS #5)	PCO contract was not up for renewal during FY 08-09. IPM Policy was provided to City's purchasing Division for inclusion in future contracts.	
MM III.B.1	Reporting	Document efforts to complete the above actions	Purchasing Division was advised of requirement to include IPM in City pest control operations.	FD, FASD

Commercial Businesses **Goal IV.A.** Determine the extent of commercial business employees use of pesticides (I.E., pesticide applications not performed by a licensed PCO) and conduct appropriate outreach regarding less toxic pest management.				
IV.A. 1	Commercial Outreach	Develop and implement education programs that target commercial businesses, per recommendations developed in Program work plan.	No commercial outreach regarding IPM was conducted in FY 08-09. City supports regional outreach efforts.	NA
MM IV.A. 1	Commercial Outreach	Document outreach efforts targeting businesses, as recommended in the work plan to be developed by the Program	No commercial outreach regarding IPM was conducted in FY 08-09. City supports regional outreach efforts.	NA
Household Hazardous Waste Collection **Goal V.A.** Provide pesticide disposal services through household hazardous waste (HHW) collection programs for all residents and small businesses, and encourage use of these programs.				
V.A.1	HHW	Ensure that adequate pesticide disposal services exist for residents and conditionally exempt small quantity	The City participates in the Santa Clara County HHW Program. Businesses are also eligible to participate in the Palo Alto small quantity program.	PW – Solid Waste

		commercial generators.		
V.A.3	HHW	Work with HHW collection agencies to support, enhance, and help publicize programs for proper pesticide disposal (PS #7).	The Public Works Department, Solid Waste Division publicizes HHW information in the Resource newsletter.	PW – Solid Waste
V.A.5	HHW Outreach	Provide hazardous waste disposal information to residents, through distribution of materials (e.g., utility bill insert, city newsletter, community events, etc.) or advertising in local media	HHW information included in the City's Resource newsletter.	PW- Solid Waste
MM V.A.1	Reporting	Document that household hazardous waste collection programs adequately serve residents and businesses and that any exchange programs do not exchange organophosphate or banned pesticides.	The City participates in the Santa Clara County HHW Program. Documentation regarding the ability to serve the residents and the prohibition against exchanging OP pesticides or banned pesticides is available from the County HHW Program.	SC County HHW
New Development **Goal VI.A.** Minimize pesticide use at new and redevelopment sites.				
VII.A.1	New Development	Have appropriate municipal staff coordinate with Program to identify landscaping techniques less likely to attract pests, including a list of pest-resistant plants, and develop model conditions of approval for pest resistant landscaping features and practices. (Required to meet NPDES Permit Provision C.9.d.ii. and Draft Permit	During FY 08-09, the City used planning conditions to minimize irrigation runoff, which also reduces pesticide runoff. Standard condition also directs developers to select appropriate plants for the location and in accordance with the appropriate climate zones.	FD

		Provision C.3.k.)		
VII.A.2	New Development Review	Consider pest-resistant landscaping and design features in the design, landscaping, and environmental reviews of proposed development projects. (NPDES Permit Provision C.9.d.ii.)	During FY 08-09, the City used planning conditions to minimize irrigation runoff, which also reduces pesticide runoff. Standard condition also directs developers to select appropriate plants for the location and in accordance with the appropriate climate zones.	FD
VII.A.3	Training	Train staff responsible for design review on pest-resistant landscaping techniques and model conditions of approval and the importance of minimizing pesticide use in runoff from development sites (NPDES Permit Provision C.9.d.ii.).	No new pesticide reduction conditions were added, so no additional training was conducted.	FD
VII.A.4	Tracking	Develop and propose enhanced reporting format for documenting use of pesticide reduction measures at development sites. (Draft Permit Provision C.3.n.)	No action on this item during FY 08-09.	FD
MM VII.A.1	Reporting	Summarize types of pesticide reduction measures required (such as by conditions of approval) for new development and significant redevelopment projects, and the percentage of new development and significant redevelopment projects for which pesticide reduction measures were required (Draft Permit Provision C.3.n.).	During FY 08-09, the following conditions were required to control irrigation runoff, which also reduces pesticide runoff: 1. Require no steep slopes exceeding 10%; use mulch as cover; plants with low water requirements; appropriate plants for climate zone. 2. Efficient irrigation systems, including; multiprogramable timers; rain shutoff devices; drip irrigation, and flow reducers.	FD

MERCURY POLLUTION PREVENTION PROGRAM (Provision C.9.c of the Permit)

FY 2008-2009 Work Plan Self Evaluation Matrix

Item No.	Activity	FY 08-09 Work Plan Tasks	FY 08-09 Accomplishments	Responsible Party
MPP Pro-gram	Adoption of City mercury reduction policy.	The City adopted a mercury policy in FY 03-04, requiring the virtual elimination of mercury from controllable sources in urban runoff from agency operations.	In June 2004, the City finalized Administrative Instruction No: 16-01, which established a Mercury Control Program. The Mercury Control Program includes: a procedure for the elimination of mercury-containing products to the maximum extent practicable; maximum recycling of fluorescent lights; participation in a household hazardous waste collection program for residential disposal of mercury-containing products; and public outreach.	FD
MP Task I.F	Implement guidelines for mercury-containing products reduction and management	The City will implement measures to reduce the quantity of mercury-containing products, and manage essential mercury-containing products.	During FY 08-09, the City investigated using LED lights and some longer life bulbs for outdoor lighting, such as street lights and tennis court lights. Mercury-containing switches will be removed at the time of replacement. Fluorescent lights are hauled for disposal.	PW
MP Task II.D	Documentation and reporting of mercury-containing products disposal	The City will implement measures for documenting and reporting quantities of mercury-containing products disposed.	The City maintained fluorescent light disposal records. During FY 08-09, the City recycled: 85 – 2 ft tubes, 48 – 3 ft tubes, 203 – 4 ft tubes, 53 – 8 ft tubes, 502 U-tube lamps, and 311 compact lights	PW

Item	RWQCB Comment	City of Mountain View Response
No Comments.	NA	NA

Mercury Pollution Prevention Program Evaluation

During FY 08-09, the City implemented its Mercury Control Program. The Mercury Control Plan establishes a policy for reducing mercury-containing products at City facilities, through identification of mercury-containing parts and devices at City facilities, and the gradual phase-out of those parts and devices. The City's Facilities Division has made a number of changes to outdoor lighting to eliminate some mercury-containing bulbs with LED bulbs, and replace some bulbs with bulbs that have a longer life, which will reduce the number of bulbs for disposal. The City supports the County-wide HHW and small quantity generators programs.

COPPER ACTION PLAN/NICKEL ACTION PLAN

FY 2008-2009 Work Plan Self Evaluation Matrix

Item No.	Activity	FY 08-09 Work Plan Tasks	FY 08-09 Accomplishments	Responsible Party
CB-1	Vehicle Washing Operations	• Public outreach and education efforts to reduce vehicle wash discharges, including brochure distribution, and mobile cleaners information • Provide car wash kit to charity car wash organizers and educate on the use of the kits. • Inspect auto businesses regarding car wash requirements, and prohibited storm drain discharge. • Continue to maintain car wash systems for City vehicles at the Corp yard and Fire Stations. • Require vehicle wash systems draining to the sanitary sewer as source control measures for projects, where the control is applicable. • Submit data regarding vehicle washing outreach activities and	During FY 08-09, the City provided a car wash kit to local charities conducting car washes. The car wash kit is used to divert car wash water from storm drains. The City also maintained 7 City car wash facilities (2 at the Corporation Yard, 1 at the Golf Course Maintenance facility, and 4 at Fire Stations). The vehicle service facility inspection program verifies that fleet washing water is not draining into the storm drain system. Vehicle facility operators are also notified about vehicle washing requirements, including rental operations. Vehicle BMP information is provided to residents at City outreach facilities, including the Art and Wine Festival, and Arbor Day.	FD

		effectiveness evaluation in annual reports.		
CB-3	Industrial Copper Control	Continue Industrial Inspection program, including NOI sites such as plating and metal finishing facilities, vehicle service facilities, and other permitted sites.	The City conducted its industrial facility inspection program. Details are provided in the Industrial/Commercial Discharges Control Program section of this report. Inspections involve observing outdoor areas where spills or equipment discharges could release pollutants including copper and nickel into the storm drain system. The City's Environmental Protection Division also provided oversight of a metal plating facility closure. The facility had operated in Mountain View for a number of years and discontinued operations. This closure reflects a steady change in the land use and industrial community make up within the City.	FD
CB-6/7	Reducing Traffic Congestion/Promoting Alternative Transportation	Review the results of the Development Policies Comparison Project Report, particularly Section VI., Policies to Limit Auto Use/Promote Alternative Transportation, in the Policy, Code, and Ordinance Worksheet, and investigate updating local development rules to promote better transportation-related design practices and alternative modes of transportation.	The City of Mountain View has actively supported public transportation projects including and extensive bike trail system, light rail station, and promotion of transit-oriented development. During FY 08-09, the City completed another expansion of its Stevens Creek Trail system.	Community Development Department
CB-8	Watershed Protection Measures	• General Plan revisions will be considered during the next City-wide GP revision, which currently is not scheduled.	During FY 08-09, the City continued theGeneral Plan revision process.	

		• CEQA revisions related to stormwater are currently being evaluated as described in the C.3 Work Plan. Guidance from SCVURPPP and the City of San Jose addressing water quality review in CEQA will be reviewed and implemented, if acceptable. • HMP implementation will be incorporated upon completion of the document. • Continue C.3 implementation efforts	The City's existing CEQA document adequately addresses water quality review issues. The City has a condition requiring eligible projects to comply with HMP requirements. The City does not expect HMP projects to be submitted for review. See New Development – Planning Procedures.	
CB-11	Street Sweeping	• City will continue to implement street sweeping program. • City will continue "Clean Sweep" program designed to secure access to heavily impacted streets that have a lot of cars typically parked throughout the day. • Maintain effective street sweeping equipment. • Continue to collect and report street sweeping information including mile swept and material removed for annual reports. • Continue to manage street	See Streets and Roads Maintenance Section for more details.	

		sweeping solids. • Continue to maintain storm drain catch basins • Attend SCVURPPP training workshops, if provided. • Evaluate need for improvement in FY 03-04 annual report.		
CB-12	Copper from Pools and Spas	• City will respond to complaints of pool/spa discharges. • Assist Program development of pool brochure. • City will distribute outreach materials.	The City responded to 3 pool discharge incidents. The City supports regional outreach efforts. The Program completed mailing of the new Program pool brochure.	FD
CB-21	Architectural Copper	Review study and ordinance from Palo Alto and consider feasibility of limiting the use of these materials.	The City does not currently limit the use of architectural copper materials.	
NB-1	Discharges from Construction Sites	Continue to implement Construction Inspection Performance Standards and other tasks in Construction Inspection element of the Work Plan.	See the Construction Inspection section of this report for more details.	FD

FY 2008-2009 ANNUAL REPORT

Municipality: City of Mountain View

Other Water Quality & Watershed Management Programs Evaluation

Current trash control efforts include two City-sponsored creek cleanups a year. These cleanup events occurred on Stevens Creek and Permanente Creek. A local organization, Friends of Stevens Creek Trail, with some support from the City also conducted creek cleanups throughout the year. City Community Services Department personnel and Shoreline Park Rangers also patrol Stevens Creek Trail and remove trash as needed. After conducting volunteer creek clean-ups for a number of years, it appears that the amount of trash removed during these events is decreasing.

During FY 08-09, the City continued expansion of the Stevens Creek Trail system. During construction of the extended trail, some homeless encampments were removed from the bank of Stevens Creek.

City Community Services Department employees maintain City parks, including litter removal. City Public Services Department personnel also respond to trash dumping incidents that may occur throughout the City.

The City did not participate in trash assessments during FY 08-09.

PUBLIC INFORMATION/PARTICIPATION (Provision C.4)

FY 2008-2009 Work Plan Self Evaluation Matrix

Item No.	Activity	FY 08-09 Work Plan Tasks	FY 08-09 Accomplishments	Responsible Party
General Outreach				
PIP – 1-4	PIP Master Plan – General Outreach	Continue to conduct PIP General Outreach activities.	General outreach activities conducted during FY 08-09 include maintaining brochure stands at City facilities, participating in HHW program, storm drain stenciling, and articles in local publications.	FD
Targeted Outreach				
PIP – 1-4	PIP Master Plan – Targeted Outreach	Continue to conduct PIP targeted outreach activities.	Targeted outreach activities conducted during FY 08-09 include participation in the Clean Bay Business Program and continuing restaurant outreach. Targeted outreach to restaurants is explained in the Industrial/Commercial section of this report. Three Mountain View stores also participated in the Our Water, Our World Program designed to distribute pesticide alternatives. This is further explained in the Pest Management Section of the report. The City also participated hosted pharmaceutical take-back events in FY 08-09. Participation included promoting the event and staffing a drop-off location for	FD

			residents to dispose of unwanted pharmaceutical products.	
PIP – 1-4	Targeted Outreach – Multicultural Outreach	Continue to support the City's multicultural outreach program, which is designed to provide information regarding various topics to non-English speaking people.	During FY 08-09, the multicultural outreach program distributed pollution prevention information at public events. Spanish brochures and fact sheets for vehicle BMPs and pesticide information are distributed through the multi-cultural outreach program.	CM
Educational Programs				
PIP – 1-4	PIP Master Plan – Education Activities	Continue to conduct PIP education activities.	During FY 08-09, the City sponsored a school education and outreach program along with the City of Palo Alto. In total, 25 school presentations were made to 595 students in Mountain View. The presentations were made to 3rd-8th grade groups. A summary of the school outreach program is available upon request. Additionally, City staff met with a group of second grade students from Castro Middle School to talk about trash in the environment and things that kids can do to control trash. The City also conducted employee training activities, which are summarized in the Staff Training Table.	FD
Citizen Participation				
PIP – 1-4	PIP Master Plan – Citizen Participation	Continue to conduct PIP citizen participation activities.	During FY 08-09, the City sponsored two creek cleanup events, where citizens removed trash and debris from local creeks. The City also staffed information booths at the Mountain View Art and Wine Festival, the Arbor	FD

			Day Fair, and 4 downtown Thursday Night Live events. The primary messages at those events were IPM and pesticide reduction, pharmaceutical disposal, Mercury reduction, and vehicle sources.	

Regional Board Comments on Public Information/Participation Requirements in FY 2007-2008 Annual Report		
Item	**RWQCB Comment**	**City of Mountain View Response**
No Comments	NA	NA

Public Information/Participation Program Evaluation

General Outreach:

During FY 08-09, articles in the Resource newsletter advertised HHW, creek clean-up, pharmaceutical disposal, and mercury thermometer drop-off events. The City continued storm drain stenciling activities. The City also displayed BMP brochures at City facilities.

Targeted Outreach:

Three hardware and garden stores in Mountain View participated in the Our Water, Our World program, which promotes use of less toxic pesticides. The City also participated in a pharmaceutical take-back program, which allowed residents to drop off unwanted pharmaceutical products. The City also distributed information at public events, such as the Art and Wine Festival, the Arbor Day Fair, and 4 summer downtown Thursday Night Live events, which is one night per month when Castro St. in Mountain View is closed for entertainment. Stormwater pollution prevention information was also displayed at a City-wide Safety Fair, which was for City employees. City staff also worked at the Program booth for the Home Show.

The multicultural outreach program seems to be an effective method to provide information in different languages. However, limited multi-language outreach materials are available. The City supports regional efforts to produce multi-language materials.

The City also continued distribution of a fact sheet describing oil recycling options for apartment tenants. This piece was translated into a Spanish language version.

Education Activities:

The City's participation in the school education program was conducted through funding the Palo Alto Program. Mountain View commends the education consultant, and the City of Palo Alto for developing and implementing an outstanding program, and for educating students in Mountain View about water pollution issues.

A summary of employee training efforts is listed below.

Citizen Participation:

During FY 08-09, the City sponsored two volunteer creek cleanups and supported other cleanup efforts. These events successfully removed litter and debris from local waterways. The City also distributed information at public events. The effectiveness of information distribution at these public events is difficult to describe because a lot of people who visit the information booth are already informed about the issues, and some visitors seem to randomly collect free materials without considering the message.

Staff Training Evaluation
During FY 08-09, staff received training on a number of topics, including spill response, storm drain pollution prevention, industrial inspections, construction inspections, and C.3 topics. The City strongly supports regional training efforts for IPM-related issues. The City continued to train employees about stormwater pollution prevention. Stormwater pollution prevention training is coordinated and conducted with safety training assemblies, which seems to be a great method for streamlining different training requirements.

Attachment E

Pesticide Use Evaluation for FY 08-09

CITY OF MOUNTAIN VIEW
MEMORANDUM

DATE: August 15, 2009

TO: City of Mountain View's IPM Plan

FROM: Eric Anderson, Urban Runoff Coordinator

SUBJECT: Pesticide Use Evaluation for FY 08-09

The purpose of this memo is to provide an evaluation of the City of Mountain View's pesticide use data for the Fiscal Year 2008-2009 (FY 08-09). The City's FY 08-09 pesticide use data will be compared to pesticide use data from Fiscal Year 2002-2003 (FY 02-03), Fiscal Year 2003-2004 (FY 03-04), Fiscal Year 2004-2005 (FY 04-05), Fiscal Year 2005-2006 (FY 05-06), Fiscal Year 2006-2007 (FY 06-07), and Fiscal Year 2007-2008 (FY 08-09) to identify possible trends in the City's pesticide use practices. The comparison and evaluation involve both the types and quantities of pesticides used at City facilities.

The pesticide use data is used to evaluate the City's implementation of its Integrated Pest Management (IPM) Policy, and IPM Plan. The City's IPM Policy was adopted by the City Council on September 10, 2002. The IPM Plan, which outlines the method for implementing the IPM Policy, was completed in June 2003.

The result of this evaluation will be to make recommendations for implementation of the IPM Plan during fiscal Year 2009-2010. This evaluation may also identify barriers to implementation of the IPM Policy and Plan. Pesticide use reports and evaluations are conducted annually. The pesticide use data and the evaluation will be included in Appendix 4 of the IPM Plan. The evaluation will also be included in the City's annual report to the Regional Water Quality Control Board. The annual report describes the City's Urban Runoff Management Program activities, and is required in the City's NPDES storm water permit.

The evaluation includes the following sections:

1. Description of the pesticide use tracking and reporting procedure and an evaluation of the procedure.
2. An evaluation of the use of prohibited pesticides at City facilities during FY 08-09 in comparison to past years.
3. A summary of the pesticide use data for FY 02-03, FY 03-04, FY 04-05, FY 05-06, FY 06-07, FY 07-08, and FY 08-09.
4. A discussion of the pesticide use data for FY 02-03, FY 03-04, FY 04-05, FY 05-06, FY 06-07, FY 07-08, and FY 08-09.

5. A summary and evaluation of overall pesticide use at City facilities.

Pesticide Use Tracking and Reporting Procedure

Data was collected from the Forestry and Roadway Landscaping Division (FRL), Shoreline Golf Links (SGL), and the City's contract pest control operators, Bay Valley Pest Control and TruGreen Landcare. FRL monitors and administers pesticide use for both FRL and the Parks Division. FRL and Shoreline Golf Links data were tracked using the required monthly report to the State Department of Pesticide Regulation, which includes the product name, registration number, quantity used, and a general description of the area where the application occurred. Bay Valley Pest Control's use data is tracked using the service invoices, which include the application date, product used, quantity used, target pest, and location. TruGreen Landcare submits its pesticide use data to FRL for collection and tracking.

All of the data is routed to the City's Fire and Environmental Protection Division, where the data is entered into the pesticide use tracking database. The database tracks products, date of application, quantities, and active ingredients applied. A comprehensive summary of pesticide use at City facilities during FY 08-09 was produced and is included in the City's IPM Plan.
Since FY 06-07, two products that are exempt from pesticide registration requirements were used at City facilities. The system to track and report pesticide use was slightly modified to distinguish the use of this product. Tracking of this exempt product was continued during FY 08-09.

Prohibited Pesticides

The City's IPM Plan specifically prohibits use of the following pesticides: diazinon, chlorpyrifos, chlordane, dieldrin, and DDT. During FY 08-09, the City did not use or store prohibited pesticide products.

Summary of Pesticide Use Data

Summaries of pesticide use for FY 02-03, FY 03-04, FY 04-05, FY 05-06, FY 06-07, FY 07-08, and FY 08-09 are shown in the tables below. Table 1 shows a comparison of the number of different Category I, II, and III pesticides that were used during the past reporting years. Summaries of pesticide use quantities are listed in Tables 2 and 3, which are shown on pages 4 and 5 of this report. Table 2 shows a comparison of the quantity of Category I, II, III, and non-regulated pesticides that were applied during the past six reporting years. The quantities shown in Table 2 include active and inert ingredients. Inert ingredients are typically emulsifiers or carriers that aid in delivery of the active ingredient, which is the material in a pesticide formulation that destroys the target pest or performs the desired function. Table 3 shows a comparison of the quantity of Category I, II, III, and non-regulated active ingredients that were applied during the past six reporting years.

Additionally, narrative analysis of the pesticide use data is provided for Category I, II, III, and non-regulated products, as well as an analysis of overall pesticide use trends.

Table 1 - Number of Different Pesticides Used:

Pesticide Category	Number of Different Pesticides Used					
	FY 03-04	FY 04-05	FY 05-06	FY 06-07	FY 07-08	FY 08-09
I	0	0	1	0	0	0
II	8	6	5	7	5	5
III	22	22	25	29	35	38
None	0	0	0	1	1	2
Total	**30**	**28**	**31**	**37**	**41**	**45**

NOTE: "None" indicates a pesticide used that is exempt from pesticide registration requirements

Category I Pesticide Use:

The IPM Plan bans the use of Category I pesticides at City facilities, except in cases where a pest outbreak poses an immediate threat to public health or significant economic loss will result if the banned product is not applied. Use of a Category I pesticide must be approved by the Community Services Director, or his/her designee. During FY 08-09, no Category I pesticides were used at City facilities.

Category II Pesticide Use:

The IPM Plan limits the use of Category II pesticides at City facilities. Category II pesticides may be used when a Pest Control Advisor recommends their use after non-chemical controls and Category III pesticides have been ineffective, or when Category II pesticides may be needed to prevent an outbreak that may cause a threat to public health or significant economic loss.

During FY 08-09, five Category II pesticides were applied at City facilities. A discussion of the Category II pesticide use is provided below:

Forestry and Roadway Landscaping Division

- During FY 08-09, the Forestry and Roadway Landscaping Division (FRL) applied 73 pounds of the insecticide "m-pede," which is an increase from the 37 pounds applied during FY 07-08. This product is used to treat aphid infestations, primarily in trees, so amounts used will depend on yearly fluctuations in aphid populations.

Table 2 - Quantity of Pesticides Applied:

Pesticide Category	Quantity of Pesticides Applied (pounds) and Percent Change Compared to FY 08-09 and 6-Year Average									
	FY 02-03	FY 03-04	FY 04-05	FY 05-06	FY 06-07	FY 07-08	6-Year Average	FY 08-09	% Change to Previous Year	% Change to 6-Year Average
I	144	0	0	340	0	0	81	0	0	-100%

Shoreline Golf Links

- During FY 08-09, SGL applied 167 pounds of the algaecide "Symmetry," which is a product that had not been used in past years, and replaced a different Category II product called K-Tea. Symmetry is used to control algae growth on golf course ponds. 83 pounds of K-tea algaecide were applied the previous year. The amount of product that is used depends on the algae growth conditions and the amount of algae production in the ponds. During FY 08-09, maintenance of the golf course ponds required recirculation pumps to be shut down which caused excessive algae blooms and resulted in an increased use of algaecide.
- During FY 07-08, SGL applied 22 pounds of the herbicide "Reward", which is a decrease from the 17 pounds applied in FY 07-08. Increased weed growth due to damage and seed dispersal by an increased population of geese and coots has led to a historical increase in demand for the use of Reward.
- During FY 08-09, Category II fungicide, Hoist, was used to control fungus on the golf course greens. SGL applied 10 pounds of the product, which is an increase from 6 pounds of Hoist applied during FY 07-08. Hoist is a product that is used in place of the Category III formulation of Eagle which was discontinued.
- During FY 08-09, SGL also applied 12.5 pounds of Category II pesticide, Buctril, to control fungus on the golf course greens.

In past years, annual variations in the use of the Category II products Banner Maxx, Reward, Buctril, Daconil, Trimec Plus, and Eagle have occurred due to the practice of rotating pesticide use over an annual or multi-year frequency. The City has made strides towards reducing use of these category II products. First, the product Banner Maxx has not been used since 2005. Also, two Category III products have replaced the product Trimec Plus. Lastly, the Category II formulations of the fungicides, Daconil and Eagle, have been replaced by Category III formulations of the same products, though the Category III formulation of Eagle has been discontinued.

Category III Pesticide Use:

Public Services and Community Services Departments

The IPM Plan promotes the use of less toxic methods for controlling pests at City facilities. If pesticides are needed, Category III pesticides should be used, unless these pesticides are ineffective, or Category I or Category II pesticides are needed to prevent an outbreak that may cause a threat to public health or significant economic loss. During FY 08-09, 38 different Category III pesticides were used at City facilities to address specific problems or situations. Five of the Category III pesticides had not been used at City facilities in the past.

Non-regulated/Exempt Products:

Bay Valley Pest Control

During FY 08-09, the City's contract pest control operator, Bay Valley Pest Control, used 197 pounds of 2 non-regulated and exempt products to control ants at City facilities, which is an increase from 136 pounds used in FY 07-08. The products are clove oil and cedar oil based chemicals, respectively, that replaced a category III product that was previously used. Use of this exempt product is consistent with the reduced-risk pesticide use goals included in the City's IPM Plan. Although this is a non-regulated product, use of this product was tracked in the pesticide use database, as reflected in summary Tables 2 and 3. Analysis of total pesticide use in Tables 2 and 3 reflect: 1) totals including use of the non-regulated products; and 2) totals not including use of the non-regulated product.

Discussion of Pesticide Use Data

Total Pesticide Applications

For the purpose of the total pesticide use evaluation, the "Total 1" and "Total 2" in Tables 2 and 3 will be discussed. "Total 1" reflects all pest control applications, including non-regulated products. "Total 2" reflects only regulated pest control product applications, and excludes applications of exempt products. "Total 2" is the most important data set for evaluation because it reflects the amount of regulated pesticides applied during FY 07-08.

The "Total 1" amount of pesticides applied during FY 08-09 increased by 12% compared to FY 07-08, and increased 18% compared to the 6-year average. The "Total 2" amount of pesticides applied during FY 07-08 increased by 11% compared to FY 07-08, and increased 13% compared to the 6-year average. The amount of Category III pesticides applied during FY 07-08 increased by 8% compared to FY 07-08, and increased 21% compared to the 5-year average. The amount of Category II pesticides applied during FY 08-09 increased by 93% compared to FY 07-08, and decreased 26% compared to the 6-year average. No Category I pesticides were used in FY 08-09, nor were Category I pesticides used in FY 07-08. Lastly, 198 pounds of non-regulated exempt pest control product were used at City facilities in FY 08-09, which is a 46% increase compared to FY 07-08.

Active Ingredient Applications

The "Total 1" amount of active ingredient applied during FY 08-09 increased by 13% compared to FY 07-08, and increased 23% compared to the 6-year average. The "Total 2" amount of active ingredient applied during FY 08-09 increased by 13% compared to FY 07-08, and increased 23% compared to the 5-year average. The amount of Category III active ingredient applied during FY 08-09 increased 10% compared to FY 07-08, and increased 38% compared to the 6-year average. The amount of Category II active ingredient applied during FY 08-09 increased by 98% compared to FY 07-08, and decreased 44% compared to the 6-year average. No Category I pesticides were used in

FY 08-09, nor were Category I pesticides used in FY 07-08. Lastly, 12 pounds of active ingredients from a non-regulated and exempt pest control product were used at City facilities in FY 08-09, which is a 50% increase compared to FY 07-08.

Analysis of Pesticide Use Data

Review of the data for FY 08-09 shows an increase in total pesticide use and a total active ingredient applied, when compared to FY 07-08 and the average use over the past 6 years. Comparison of the pesticide use data from the past two years shows increases in Category II, Category III, and total amounts, as well as increases in the use of exempted products. The primary reason for the increased amount of total pesticide use was increased herbicide applications. Two primary causes of the increased use of herbicides were: 1) imported soils onto the portions of Shoreline Park resulted in significant growth of a thistle, and 2) new park and trail areas that are now maintained by the Community Services Department. The City attempted to control thistle at Shoreline Park mechanically but the thistle re-established to an infestation level, and the Shoreline biologist was concerned that the thistle would spread to other areas of the park, so herbicides were applied. The increased amount of Category II pesticides used related to an aphid infestation and the demand for increased use of algaecide at the golf course lakes due to algae blooms that were associated with shutdown of the pumps due to maintenance.

Comparison of the past year's pesticide use with an average of the use during the past 6 year period shows a trend of decreased use of Category II pesticides, and increased use of Category III, and total amounts, as well as increased use of exempted materials. The trend indicates that greater amounts of lower risk products are needed to control pests at the City's facilities. It is also important to note that the City has increased added new parks and median service areas over the 6-year period that is used for the evaluation.

During FY 08-09, the City's Category III and exempt pesticide use was 94% of the total pesticide use for the year, which is consistent with FY 07-08, when the City's Category III and exempt pesticide use was 96% of the total pesticide use for the year. The percentages for FY 06-07, FY 05-06, FY 04-05, and FY 03-04 had Category III percentages of 86%, 88%, 93%, and 82%, respectively. Increased use of Category III and exempt, non-regulated products data shows that the City has accomplished goals in the IPM Plan to utilize a reduced-risk pesticide use procedure.

The volume of pesticide use is heavily dependent on seasonal variations in pest and weed populations. When pesticides are needed, the City will continue to evaluate and consider the least toxic pesticide solutions. The City will also continue to seek non-chemical solutions to pest incidents. The City's primary IPM technique is to maintain healthy landscape and turf through implementation of effective cultural practices. City staff also utilizes biological and organic controls, such as nematodes in turf areas and mulch around tree basins and planting beds, as well as physical and mechanical controls to help control pest problems.

An on-going condition that has resulted in damage to Shoreline Golf Links as well as increased pesticide use is the increased bird population inhabiting the course. Geese and coots populations at the golf course have steadily increased in recent years, and have presented a management problem for the City. To address this condition, the City is investigating measures to reduce these populations, including modifications to management of the golf course ponds, which would minimize habitat for these birds.

Recommendations to address pesticide use at City facilities are listed below:

1. Continue to train employees regarding the IPM Plan requirements for using Category I and Category II pesticides.
2. Continue to seek less toxic alternatives to the Category I and Category II pesticides that may be considered for use, although the alternatives are potentially more expensive and/or labor intensive.
3. Continue to use less toxic products to control pests. If less toxic alternatives are ineffective and the pest outbreak poses a public health or economic threat, propose use of a Category II pesticide, or lastly, a Category I pesticide.
4. Continue to track regional efforts to develop a list of approved pesticides that not only considers acute toxicity, but other factors such as carcinogenicity, reproductive toxicity, and potential groundwater contaminants.

Summary

This report has provided an evaluation of the City of Mountain View's pesticide use data for FY 08-09. Data from FY 08-09 was compared to data from previous years. The comparison and evaluation involved both the types and quantities of pesticides used at City facilities. While the total amount of pesticide application increased, trends indicate that the amounts of Category II pesticide applications are decreasing. During FY 08-09, use of an exempt, non-regulated pest control product was increased City facilities to control ants. Use of this type of exempt product is an example of reduced risk chemical use that is an important component of the City's IPM program. Staff will continue to evaluate and consider alternative or least toxic pesticide solutions for application whenever possible.

Dear Mr. Wolfe:

This report is submitted by the City of Palo Alto, in conjunction with the Santa Clara Valley Urban Runoff Pollution Prevention Program's Annual Report, pursuant to provision C.6.a. of the Program's municipal storm water NPDES Permit (Order No. 01-024). The report summarizes activities performed during FY 2008-2009 in accordance with the City of Palo Alto's Urban Runoff Management Plan (URMP) submitted to the Regional Board on September 1, 2004 and the performance standards contained therein.

Contents of Report

The goals of this Annual Report are to: 1) concisely document implementation of our URMP and FY 08-09 work plan during the past fiscal year; 2) evaluate program results for continuous improvement; 3) comply with permit requirements; and 4) share this information with other Co-permittees, municipal decision-makers, and the public. To accomplish these goals, the report contains the following sections:

I. Contents of report;
II. Program highlights and accomplishments;
III. Summary of continuous improvement activities;
IV. Attachments:

A. Certification Statements
B. List of Abbreviations and Acronyms
C. Annual Report

- IC/ID Elimination Activities
- Industrial/Commercial Discharger Control Program

- Construction Inspection
- Public Information and Participation
- Pest Management Activities
- Mercury Pollution Prevention Activities
- Copper Action Plan/Nickel Action Plan
- Trash Inventory and Management
- Water Quality Monitoring
- Watershed Management Measures
- Staff Training Summary Table

Program Highlights and Accomplishments

The City of Palo Alto's Urban Runoff Pollution Prevention Program for FY 2008-09 included several notable accomplishments. The following programs and activities are described in the body of this Annual Report:

- Palo Alto has demonstrated continued leadership in the area of land development review. Staff in the Public Works, Utilities, and Planning Departments have been briefed on the C.3 requirements by the Management Committee representative and have attended Program training workshops. Presentations on C.3 design concepts and requirements have been made to the land development decision makers (Planning Commission, Architectural Review Board, City Council).

  The City of Palo Alto was the recipient of a **2009 Site Design Award** for an exemplary development project built in our jurisdiction. The Rosenberg residence features a 14,000 gallon underground rainwater cistern that harvests storm runoff from the building roof and a portion of the yard for reuse as landscape irrigation water; landscaping with native, drought-tolerant plants that minimize irrigation demand; and site grading, mulching, and an extensive tree canopy that retains rainfall on-site to recharge groundwater and minimize site storm water runoff.

The City implemented a storm water rebate program in 2008-09 which provides financial incentives for the installation of measures that reduce storm water runoff. Eligible measures include rain barrels, cisterns, permeable pavement, and green roofs. Rebates are available up to $1000 per measure for single-family residential projects, and up to $10,000 for commercial, multi-family, or industrial projects.

- Trash management was and will continue to be another high-priority area for City storm water staff. Environmental Compliance staff spent a substantial amount of time during the year implementing a single-use plastic bag ban for grocery stores and styrofoam control regulations, including extensive outreach to and coordination with the entities to be regulated. These regulations were approved by the City Council in spite of legal challenges by representatives of the plastics industry, demonstrating the Council's strong commitment to this issue. This regulatory effort is designed to reduce one of the primary sources of trash in the community. Staff also worked with the Santa Clara Valley Water District to install a trash boom across the lower reach of Matadero Creek. Installation of the boom will provide valuable information regarding the effectiveness of this trash control measure and will help staff to determine the source of trash in the downstream Flood Basin. Another recently implemented trash control measure is the City's policy of requiring truck owners to purchase tarps if they bring refuse material to the City's landfill in an uncovered vehicle.

- The City continues to implement a strong pest management program throughout varied elements of the community. Staff has a strong outreach program promoting the use of integrated pest management by City departments, residents, and businesses. Staff actively supports the EcoWise Certified, Bay Friendly Gardening, Green Gardener, and *Our Water, Our World* programs. City purchasing policies require the use of EcoWise Certified firms for City pest control contracts, and the Community Services staff initiated the City's first pesticide-free park.

- City staff has actively participated in many of the Program's Ad Hoc Task Groups (including Watershed Education & Outreach, Trash Management, and C.3 Provision Oversight (C3PO), and the Watershed Management Initiative, providing valuable input to Program endeavors and keeping informed of the current issues and policies relevant to storm water pollution prevention.

Continuous Improvement Activities

The following is a summary of the key continuous improvement activities to be pursued in the coming year:

Identified Improvement	**Status**	**Schedule for Completion**
Conduct water quality monitoring of the effluent from the San Francisquito Creek Storm Water Pump Station during dry weather, first flush, and wet weather conditions in order to characterize the quality of the water being discharged to the creek.	The pump station came online in Summer 2009. Water quality monitoring will start prior to the 2009-10 wet season.	Ongoing in FY 2009-10
Expand the single-use plastic bag ban to facilities beyond large grocery stores.	Per the terms of a settlement agreement with the plastics industry, the City must conduct a full Environmental Impact Report prior to expanding the scope of the ban to other facilities.	June 2010
Implement the new requirements in the Municipal Regional Permit and revised SWRCB General Permit for Construction Activities	Implementation of revised requirements is subject to the adoption date for the new permits and the specific deadlines contained in the permits.	Upon adoption of new permits
Consider implementation of the Water Resources Protection Collaborative's Guidelines and Standards (G&S) for Land Uses Near Streams for ministerial projects	The G&S have been incorporated into the zoning ordinance for discretionary projects; next step is to consider applying the G&S to ministerial projects.	June 2010

Thank you for your review of this Annual Report. If you have any questions regarding the materials submitted, please contact me at (650) 329-2129.

Very truly yours,

Joe Teresi

IC/ID Program Evaluation

We continue to receive illegal dumping reports from the public, other agencies, and City employees. Proactive members of the fire department, building inspection, planning code enforcement, street maintenance, storm water collection maintenance, utilities, and wastewater field operations crews have been a consistent source of referrals. We encourage these work groups to be active observers out in the field each day beyond those employed directly within our program. Improved cooperative relationships and continued open communication with other Public Works and Utilities Department inspectors ensures that construction sites are inspected with the goal of preventing illegal discharges.

Construction activities still dominate the IC/ID incidents and continue to require outreach, education, and enforcement efforts. A large percentage of construction personnel appear to comprehend the rules and regulations about pollution to the storm water system. Aggressive monitoring and enforcement as well as information provided during the planning and permitting process appear to be effective. Problems and issues with dewatering of excavations at construction sites have improved as a result of recent modifications to the public works engineering, planning and building policies and permitting processes that require effective best management practices to be implemented. Of particular note, permit applicants are no longer able to dewater basement excavations during the rainy season when groundwater levels are elevated, resulting in a marked reduction in such discharges.

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2008-2009 ANNUAL REPORT

Municipality: City of Palo Alto

Industrial/Commercial Program Evaluation

In FY 08-09 the automotive program conducted 102 inspections and the compliance rate for storm water BMPs for this category was 100%. The Automotive category ("Vehicle Service Facilities") has been very thoroughly addressed by the City's Clean Bay Business Program through outreach, positive incentives, inspections, sampling, and enforcement.

The Fats-Oils- Grease (FOG) program is in its third year of significantly expanded format with more frequent and more rigorous inspections with the use of enforcement tools to change attitudes and behaviors. Restaurants continue to be one of the more difficult facilities to educate and bring into compliance due to the high employee turnover rates and the lack of employee training. City activities included conducting 29 full inspections 379 storm water and follow-up inspections and 64 enforcement responses. The wastewater operations group has also become more proactive in sewer line cleaning and videotaping and regularly shares gathered information with the FOG program to drive inspections, corrective actions and enforcement.

The storm water inspection of industrial facilities continues to be a solid integrated part of the wastewater program with 103 inspections in FY 08-09. These inspections help increase awareness at the facilities and are an expectation of their operations. As a result, there is relatively few significant storm water issues found during inspections at permitted facilities.

FY 2008-2009 Work Plan Self Evaluation Matrix

Item No.	Activity	FY08-09 Work Plan Tasks	FY 08-09 Accomplishments	Responsible Party
	Public Streets, Roads, and Highways Operations and Maintenance	Palo Alto Public Works Operations staff is continuing to implement all the elements of the Public Streets and Highways Operations and Maintenance Performance Standard, as contained in the City's Urban Runoff Management Plan, on an ongoing basis.	Public Works Operations staff has been successful in implementing all elements of the Public Streets and Highways Operations and Maintenance Performance Standard as it applies to projects conducted in FY08-09. Maintenance projects have been completed on time and all appropriate documentation has been prepared. Any storm water pollution violations observed by field crews during the course of their work are reported to the Environmental Compliance staff for enforcement action.	Public Works Operations
	Staff Training	Provide annual training to Public Works Operations street maintenance crews.	Staff has attended training on Rural Roads BMP's and the Regional Water Quality Control Board's Construction Site Compliance for Water Quality Protection. In addition, all Public Works Operations staff has received annual training on BMPs and storm water pollution prevention from Environmental Compliance staff and Technical Services staff. On-going training and feedback also takes place at crew tailgate meetings every two weeks.	Public Works Operations
	Effectiveness Evaluation	Review and evaluate effectiveness of PW operations and maintenance program as part of Annual Report.	See effectiveness evaluation discussion below.	Public Works Operations

Public Streets, Roads & Highway O&M Program Evaluation

See attached sheet for annual street sweeping data.

Public Works Operations staff reports storm water pollution violations to Environmental Compliance staff when violations are observed by field crews in the course of our daily operations or reported by residents. Environmental Compliance staff responds when violations are reported and takes appropriate steps to follow-up with the responsible party to promote future compliance with storm water discharge regulations and BMPs. Field crews are familiar with source control BMPs described in the "California Stormwater BMP Handbook --Municipal" that are kept in the Palo Alto Municipal Services Center Storm Water Pollution Prevention Plan (SWPPP). Ongoing BMPs are reviewed by individual work crews at bi-weekly tailgate meetings and evaluated for effectiveness and potential modification. This past year, modifications have been made to the type of products the street and sidewalk crews use for BMPs. The street maintenance crews' use of saws has been drastically reduced by the acquisition of a new asphalt planer. The planer eliminates the saw cutting for most pavement base failure repairs.

FY 2008-2009 Work Plan Self Evaluation Matrix

Item No.	Activity	FY08-09 Work Plan Tasks	FY 08-09 Accomplishments	Responsible Party
	Staff Training	Conduct annual staff training for Municipal Service Center (MSC) employees.	Conducted training on 9/23/08 for all Public Works Operations crews for hazardous waste spills and uncontained materials, procedures, defensive actions (i.e. keeping the material out of storm drains), communications, etc. Also prepared a similar presentation that was given to Parks crews by Todd Macpherson (Leadman) in March of 2009.	Public Works Environmental Compliance & MSC staff.
	Facility inspection	Conduct annual inspection of Municipal Service Center facility to identify any remedial actions required to protect storm water quality.	A comprehensive stormwater inspection was conducted at all areas of the MSC on March 4, 2009. The inspection focused on stormwater issues such as cleared catch basins, improper hazardous material storage, and other BMPs. Issues were identified and all corrected by the date of re-inspection (April 7, 2009).	Public Works Engineering & Environmental Compliance & MSC staff.
	Facility upgrades	New fueling station, incorporating recommended best management practices, is scheduled for completion in mid-2009. Development of an updated MSC Master Plan, which includes new buildings and bulk material storage areas, is continuing into 2009-10.	New fueling station construction is near completion. When this station is operational, staff shall monitor area to ensure that discharges do not travel to the local storm drain system. Comments have been provided regarding optional and required design elements for the MSC upgrades. Most construction-related activities are currently on hold.	Public Works Environmental Compliance

	SWPPP	Continue to refine and implement the MSC corporation yard SWPPP, last updated in 2006.	A review of the SWPPP indicated that no significant refinements were needed at this time.	MSC Staff

Regional Board Comments on Corporation Yard O&M in FY 2007-2008 Annual Report

Item	RWQCB Comment	City Of Palo Alto Response
N/A	N/A	N/A

Corporation Yard O&M Program Evaluation

The MSC inspection during the third quarter of FY 2008-2009 revealed some minor areas of concern with respect to compliance with the SWPPP. Concerns were expressed regarding proper maintenance of filter fabric placed in storm drain inlets to capture fine sediments during construction activities. Public Works Environmental Control Hazardous Waste Division coordinated efforts to correct all concerns from the inspection for total compliance. The MSC will be inspected again in the second and third quarters of FY 2009-10.

PUBLIC AGENCY ACTIVITIES
STORM DRAIN SYSTEM O & M

FY 2008-2009 Work Plan Self Evaluation Matrix

Item No.	Activity	FY08-09 Work Plan Tasks	FY 08-09 Accomplishments	Responsible Party
	Storm Drain System Operations and Maintenance	1. Begin maintenance of new storm water pump station at San Francisquito Creek.	The new storm water pump station became operational in spring 2009. Maintenance activities shall include removing debris from the trash rack prior to the start of the rainy season and on an as-needed basis.	Public Works Operations
		2. Conduct water sampling program to characterize the influent to the pump station.	Per Regional Water Quality Control Board permit requirements, the Environmental Compliance Division shall collect between 6 and 10 grab samples of the pump station effluent to characterize 1) dry weather flows, 2) first flush flows, and 3) wet weather flows from the station for FY 09-10.	Public Works Environmental Compliance
		3. Investigate the feasibility of discharging limited amount of pump station influent to the sanitary sewer for treatment prior to discharge (if warranted by water quality testing results).	Public Works Operations will coordinate with Environmental Compliance to control pump station discharges during sampling events. A sanitary sewer clean-out was constructed adjacent to the pump station wet well in order to facilitate pumping a limited volume (limited by the capacity of the sanitary sewer main) of influent to the sanitary sewer for treatment, if necessary.	Public Works Operations & Environmental Compliance

Santa Clara Valley Urban Runoff Pollution Prevention Program

Municipality: City of Palo Alto

	Staff Training	Provide annual training to Public Works Operations storm drain maintenance crews.	Staff members have received training in emergency response, hydro-flushing operations, catch basin maintenance, pump operations, hazardous waste spill clean up, and use of BMPs on construction sites. Staff also received annual pollution prevention training from Environmental Compliance managers.	Public Works Operations
	Effectiveness Evaluation	Review and evaluate effectiveness of SD operations and maintenance program as part of Annual Report.	See effectiveness evaluation discussion below.	Public Works Operations

Regional Board Comments on Storm Drain System O&M in FY 2007-2008 Annual Report

Item	RWQCB Comment	City Of Palo Alto Response
N/A	N/A	N/A

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2008-2009 ANNUAL REPORT

Municipality: City of Palo Alto

Storm Drain System O&M Program Evaluation

STORM DRAIN MAINTENANCE DATA

Number of catch basins cleaned –2810 each
Weight of debris removed from catch basins (using hand tools) – 65580 lbs.
Weight of debris removed by vactor truck – 45832 lbs.
Linear feet of pipeline cleaned by vactor truck – 107223 lf.
Hours of maintenance on storm water pump stations –578 hours

A large percentage of street flooding complaints received during storm events continue to be generated by filter fabric or sand/aggregate-filled bags used by contractors as a construction BMP and then abandoned in-place. The abandoned materials block catch basins or cause obstructions downstream inside the pipeline. Staff must then remove filter fabric and sand bags from blocked inlets and clean sand/aggregate out of the catch basins. Contractors are being advised to use on-site BMPs such as perimeter straw wattles and stabilized construction entrances that keep sediment on site (rather than trying to capture sediment in the gutter with sand bags). A concerted effort was made in the fall to have all filter fabric and sand bags removed from the gutter unless adjacent to current construction activity. Public Works Operations staff has been successful in removing several large sediment obstructions from a large diameter storm drain leading to Matadero Pump Station, improving the flow capacity of our drainage system. A contractor was hired to remove accumulated sediment from the main line leading to the new storm water pump station on San Franciscito Creek. Staff is currently researching new pressure nozzles for the hydro-flush truck that will assist with sediment removal from large diameter storm drain pipelines.

Water System O&M Program Evaluation

Water crews continue to employ best management practices to de-chlorinate potable water prior to discharge to gutters and storm drains and to control pollutant discharges during construction/maintenance activities. During routine tailgate meetings and prior to hydrant flushing, operators are reminded to employ storm water pollution prevention measures at each job site. In addition, the daily operation worksheet contains specific instructions on the use of the de-chlorinator. The Water Operations group also uses large filter bags to filter pumped discharges from excavations that need to be dewatered during water main breaks.

New Development-Planning Procedures Program Evaluation

No major changes to the development review process for FY 2008-09. The City of Palo Alto was recognized by the Santa Clara Valley Urban Runoff Pollution Prevention Program as a recipient of a **2009 Site Design Award** for an exemplary development project within the City (see attached fact sheet). The underground rainwater cistern at the Rosenberg residence was recognized as an innovative measure that reduces storm water runoff and conserves potable water.

Description of the Organizational Structure of the City of Palo Alto's Operation and Maintenance Verification Program

Legal authority for the City of Palo Alto's Operation and Maintenance (O&M) Verification Program is contained in the Palo Alto Municipal Code. The program is implemented by staff in the Engineering and Environmental Compliance Divisions of the Public Works Department. The enforcement mechanism is a written maintenance agreement, signed by the City and the party responsible for maintenance and then recorded with the Santa Clara County Recorder's Office.

The C.3 maintenance inspection verification program continues to expand. Seven (7) additional sites may be added to list when Public Works Engineering coordinates the execution of maintenance agreements with property representatives in FY 2009-10.

2009 Site Design for Storm Water Pollution Prevention Awards Program

Project: **Rosenberg residence rainwater cistern and site landscaping**
Private Project – Residential

Project Owner:
Susan Rosenberg

Project Location:
1425 Stanford Avenue, Palo Alto, CA 94306

Completion Date:
Fall 2008

Innovations in the project:

- 14,000 gallon underground rainwater cistern harvests storm runoff from building roof and portion of yard for reuse as landscape irrigation water.
- Use of native, drought-tolerant plants minimizes irrigation needs.
- Site grading, mulching, and extensive tree canopy retains rainfall on-site to recharge groundwater and minimize site storm water runoff.

Storm water quality protection and runoff reduction benefits of the project:

- Volume of site storm water runoff is reduced significantly by 1) routing roof and site drainage to an underground cistern for reuse as landscape irrigation water, 2) using site grading and mulching techniques to retain rainfall on-site, 3) using permeable materials for site pathways, and 4) using tree canopy coverage to intercept rainfall.

Additional environmental benefits of the project:

- Rainwater harvesting conserves potable water by providing adequate water supply for site landscape irrigation needs for four to five months.
- Use of native, drought-tolerant plant materials throughout the yard reduces the landscaping irrigation demand.

Regulatory compliance:

None of the storm water runoff reduction/water conservation measures incorporated into the project was required by local ordinances. The homeowner voluntarily installed the rainwater cistern and other water-saving measures for their inherent environmental benefits.

Applicability of project design for similar developments:

As a member of the City of Palo Alto Storm Drain Blue Ribbon Committee appointed by the Mayor in 2002, Ms. Rosenberg was instrumental in advocating for a City rebate program for storm water reduction measures such as rain barrels, cisterns, permeable pavement, and vegetated (green) roofs. Although she proactively installed the cistern prior to the implementation of the City's Storm Water Rebate Program, her project serves as an example of the storm water reduction and water conservation benefits of rainwater cisterns. The cistern concept is directly applicable to any residential or commercial site in the Santa Clara Valley.

Project operation and maintenance:

The cistern is maintained by Ms. Rosenberg. There are no ongoing maintenance requirements for the installation. The cistern provides annual savings due to reduced use of potable water for landscape irrigation. The cistern was filled to capacity from this winter's rather meager rainfall.

Project photographs and site plans

The cistern was constructed using the Atlantis Rain Tank Water Storage System (www.ecosvs.com/UG_Detention_Resources/UG_Detention_Brochures/RainTank%20Brochure.pdf), a modular system for underground water storage, using plastic cubes made of recycled plastic material assembled into a matrix with a 95% void/volume ratio. After excavating the required volume of soil to accommodate the desired cistern volume, the excavation was lined with a watertight liner, and the modular units were assembled within the liner. The liner was then wrapped over the top of the assembled units to create the water storage system. The remaining excavation was filled with gravel and topsoil up to the original ground surface. The cistern is equipped with a pump to pressurize the collected water for use in the automatic landscape irrigation system. A backflow device was installed to prevent cross-contamination with the potable water system.

Measures were employed throughout the site to encourage on-site retention of storm water. For example, soil was graded to develop a wide berm around mature

trees , a mounded labyrinth was constructed to act as a swale (see attached photo), mulch was applied to more than 75% of the yard area, and porous decomposed granite was used for site pathways.

NEW DEVELOPMENT
CONSTRUCTION INSPECTION

FY 2008-2009 Work Plan Self Evaluation Matrix

Item No.	Activity	FY08-09 Work Plan Tasks	FY 08-09 Accomplishments	Responsible Party
	Site Inspections	1. Inspect construction sites before, and during the rainy season, in compliance with adopted schedule in URMP. 2. Continue inspections of sites covered by permit provision C.3 to ensure appropriate installation of permanent storm water BMPs. 3. Complete project to add construction project-related service calls and complaints to the City's Geographic Information System in order to evaluate data for patterns.	1. All construction sites with required SWPPP's were regularly inspected before, during, and after major storm events in the rainy season in compliance with adopted schedule in the URMP. 2. Four C.3 facilities were formally inspected this year. There are another 5 to 10 C.3 facilities that will finalize construction in FY 09-10 and be added to the annual inspection list. 3. This project to be developed in FY 09-10.	Public Works Environmental Compliance
	Staff Training	Provide annual training to storm water and building inspectors.	The Stormwater Investigator attended multiple training sessions during the year. Staff proposes to provide enhanced training to building inspectors and Public Works Engineering Division staff in FY 2009-10.	Public Works Environmental Compliance
	Effectiveness Evaluation	Review and evaluate effectiveness of construction inspection program as part of Annual Report.	See effectiveness evaluation discussion below.	Public Works Environmental Compliance

Regional Board Comments on New Development-Construction Inspection in FY 2007-2008 Annual Report		
Item	**RWQCB Comment**	**City Of Palo Alto Response**
N/A	N/A	N/A

New Development-Construction Inspection Program Evaluation
The continuing efforts of the storm water program investigator have improved the organization, inspection, and enforcement of new development construction locations. Job experience and knowledge of the city, City procedures, and code enforcement activities are vital to the success of the program. Further investigator and staff training will enable city personnel to continually improve the program. Proactive inspection levels are back to normal, as well as the effective response to complaints and interdepartmental referrals during the non-rainy season. Reports generated by the Building Division's Accela Permits program are an essential tool used to find all large sites over 10,000 square feet with substantial earth disturbance work as well as construction sites with approved dewatering permits. This resource is also important in the identification of the date when a permit was issued as well as the status of the permit. Public Works Engineering Division developed an Accela Permits Report to identify dewatering sites for the purpose of the storm water investigations. The rainy season was very short during this reporting period. All large construction sites were inspected on a regular basis during the year to ensure compliance with storm water regulations. The City of Palo Alto will address and respond to the new inspection and reporting aspects of the upcoming Municipal Regional Permit and SWRCB General Construction Permit.

FY 2008-2009 ANNUAL REPORT

Municipality: City of Palo Alto

PUBLIC INFORMATION/PARTICIPATION (Provision C.4)

FY 2008-2009 Work Plan Self Evaluation Matrix

Item No.	Activity	FY 08-09 Work Plan Tasks	FY 08-09 Accomplishments	Responsible Party
	Pesticide Outreach	1. Develop, prepare, and distribute appropriate outreach materials (fact sheets, brochures, etc.) regarding proper pesticide use and disposal and IPM techniques.	1. Actively participated in the IPM Regional Partnership program, including funding the BASMAA project lead. Supported local hardware stores by stocking *Our Water Our World* fact sheets and shelf talkers for less-toxic products. Locally ran print ads, movie ads and utility inserts regarding pesticide use.	Public Works Environmental Compliance
		2. Attend community events and coordinate with local gardening and environmental groups to distribute materials.	2. Set up display boards and provided handouts at numerous Earth Day fairs and similar events. Provided information on participating stores that sell and promote less toxic pesticides.	
		3. Locally promote EcoWise certified Pest Control Operators (PCOs) and work with the Program to encourage regional promotion.	3. Ran ads in early summer 2009 encouraging use of EcoWise Certified companies.	
		4. Contribute to BASMAA Regional Media Relations Campaign and pitch IPM stories to local media.	4. Monitored BASMAA Media Relations meetings contributing as appropriate and aligning local and BASMAA regional messages.	

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2008-2009 ANNUAL REPORT

Municipality: City of Palo Alto

		5. Conduct outreach to employees who do not apply pesticides during the course of their work.	5. This was not addressed in 2008-09 given other project priorities but will be considered in 2009-10.	
		6. Continue to implement IPM Partnership with hardware garden supply stores in POTW service area.	6. Stocked *Our Water Our World* fact sheets and shelf talkers for less-toxic products at all participating local stores.	
		7. Offer training to employees of IPM Partnership stores in POTW service area.	7. Training given to Palo Alto Ace Hardware and SummerWinds Garden Center stores. Rollout of a new training program from Annie Joseph given to the staff at the SummerWinds store.	
		8. Conduct one residential IPM workshop.	8. One residential IPM class was offered through the Bay Friendly program. Staff is considering if they want to rely on the Bay Friendly IPM workshop model or provide their own workshops.	
		9. Work with the Program and the regional effort to expand Bay Friendly Gardening (stopwaste.org program) to provide regionally coordinated IPM training to residents and PCOs.	9. Bay Friendly Gardening is expanding regionally. Staff has participated in Santa Clara and regional discussions regarding expansion and has held one IPM workshop.	
		10. Document and report on number of residents reached through outreach and level of IPM Partnership participation.	10. Given the variety of ways in which outreach is conducted (print ads, movie theater ads, website, newspaper articles, outreach events, etc.), the number of residents reached is not known but can be estimated to be in the thousands. Palo Alto staff participated intensively in the IPM Partnership.	

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2008-2009 ANNUAL REPORT

Municipality: City of Palo Alto

	Mercury Outreach	1. Continue to publicize the fluorescent bulb, thermometer, and thermostat drop-off programs through utility bill inserts, newspaper advertising, etc. 2. Provide digital thermometer to all residents who recycle mercury thermometers. 3. Support the Program's efforts to provide outreach and assistance regarding Universal Waste Rule (UWR) to conditionally-exempt small quantity generators. 4. Support County's program for fluorescent bulb drop-off at hardware stores and recycling centers.	1. Ongoing: • Done in partnership with SCVURPP outreach. • As part of School Outreach Campaign, 336 students in 14 fourth grade classes were reached with a presentation specific to mercury. 2. Ongoing at RWQCP and at special events. 3. RWQCP staff support outreach to small quantity generators through participation in the SCVURPPP WE&O Subgroup. The information is currently provided on the Watershed Watch website. 4. The original RWQCP program was adopted and expanded by Santa Clara County. Currently five stores and the Palo Alto Recycling Center accept fluorescent bulbs in the RWQCP service area.	Public Works Environmental Compliance
	Copper Outreach	Conduct outreach to Building/Planning staff and to developers on ban of copper roofs and gutters implemented in January 2003.	Continued using a stamp on building permit plan sets approved by the Development Center to notify residents regarding the ban on copper roofs and gutters.	Public Works Environmental Compliance
	School Outreach	Continue outreach to elementary, middle, and high schools, focusing on pesticides, mercury, and other pollutants of concern (school programs include "What's Bugging You?" and "Mercury: Past and Present")	In 2008-09, the RWQCP School Outreach Program reached 3,356 students throughout the service area. All programs include a discussion of storm water and pollution prevention. • 65 elementary school presentations • 68 middle school hands-on labs • 4 high school hands-on labs Of the 137 total presentations, 70 were conducted in Palo Alto; 67 in RWQCP partner cities.	Public Works Environmental Compliance

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2008-2009 ANNUAL REPORT

Municipality: City of Palo Alto

	Vehicle Service Facility Recognition	Continue periodic recognition (newspaper advertisement and promotional materials) of vehicle service facilities that qualify for designation as Clean Bay Businesses.	Vehicle service facilities that qualify as "Clean Bay Businesses" receive promotional materials and are listed in full-page newspaper ads paid for by the RWQCP. Shops that have been Clean Bay Businesses for 5, 10, or 15 consecutive years receive a special "Outstanding Achievement" plaque and other recognition materials.	Public Works Environmental Compliance
	Watershed Education and Outreach	1. Develop City PI/P workplan that is coordinated with the Program's Watershed Education and Outreach Campaign. 2. Implement City PI/P work plan.	Done annually and in alignment with BASMAA, BAPPG projects, and other regional outreach efforts as feasible.	Public Works Environmental Compliance & Engineering

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2008-2009 ANNUAL REPORT

Municipality: City of Palo Alto

Public Information/Participation Program Evaluation

Pesticide Outreach: See evaluation in Pest Management Program Section

Mercury Outreach: See evaluation in Mercury Program Section

Copper Outreach: The ordinance banning copper architectural materials has been effective at eliminating the installation of new copper roofs.

School Outreach: 78% of teachers returned a postage-paid evaluation postcard, with a cumulative rating of 5.0 out of 5.0 in both quality of program and clarity of presenter. 98% stated students' understanding of water pollution prevention increased, and 100% stated that students' understanding of the difference between storm drain/sewer systems increased.

Vehicle Service Facilities: Since inception of this program, the participation has increased to 98% of eligible facilities. Eighty-eight shops have participated in the Clean Bay program for at least 10 years.

Public education challenges include finding new and compelling messages to inspire the public to use less-toxic do-it-yourself and contracted pest control methods, and to recycle mercury-containing items. RWQCP will continue identifying strategies with partner agencies and its communications consultant for effective outreach via local traditional and new media. Staff also plans to provide additional funds to expand run time of ads produced by the WEO campaign that focus on mercury and pesticides. Staff continues to participate in expansion plans for the Bay Friendly Garden Project.

PEST MANAGEMENT
(Provision C.9.d of the Permit)

FY 2008-2009 Work Plan Self Evaluation Matrix

Item No.	Activity	FY08-09 Work Plan Tasks	FY 08-09 Accomplishments	Responsible Party
	Municipal Pesticide Use	1. Provide annual *Less Toxic Pest Management and Pesticide Use* report. 2. Provide annual training on SOPs, BMPs, and IPM techniques to employees responsible for pesticide application. 3. Identify least toxic controls for pest management challenges identified in Annual Report.	1. Report was completed in January 2009. 2. Two multi-jurisdictional training sessions for gophers and ground squirrels were offered in December 2008. 3. Completed. This year's focus was on gophers and ground squirrels. Palo Alto began reducing pesticide use at city-owned parks, buildings and other properties in 2001 and has announced a 77% reduction in it use of insecticides and a 75% reduction in the use of herbicides since 2003. It has also initiated the City's first pesticide-free park.	Public Works Environmental Compliance
	Public Education and Outreach	Public Education and Outreach are a major focus of Palo Alto's Pest Management Program. Work Plan tasks for this program are detailed in the Public Information/Participation section.		Public Works Environmental Compliance

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2008-2009 ANNUAL REPORT

Municipality: City of Palo Alto

	Pest Control Operators	1. Support EcoWise certification program through advertising and inclusion of their suggested contract specs into City IPM PCO contracts. Coordinate with the Program for additional regional ads. 2. Require PCO's contracted for City pest control to comply with City IPM Policy. 3. Document and report on City use of PCO's and their pesticide use.	1. Reported on in PI/P section. EcoWise Certified standing is a requirement for the current City of Palo Alto pest control contract. 2. Ongoing. 3. Completed in the City's Annual Pest Management and Pesticide Use Report.	Public Works Environmental Compliance
	New Development	Document and report on pest-resistant landscaping measures incorporated into land development projects.	Landscape design that discourages structural pests is being discussed as new municipal buildings and remodels are planned; information on landscape pest control strategies is made available to building permit applicants during the permit process.	Public Works Engineering and Utilities Water Conservation
	Regional, State, and Federal Coordination	Continue active participation in the Urban Pesticide Committee, UP3 Committee (and related programs) CASQA, and IPM Partnership to provide input and keep informed on latest pesticide management issues.	Staff currently participate in the UPC, CASQA, and IPM Partnership. UP3 has not been active.	Public Works Environmental Compliance

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2008-2009 ANNUAL REPORT

Municipality: City of Palo Alto

Pest Management Program Evaluation
The City's use of pesticides associated with ecotoxicity has been reduced over time through the use of IPM strategies. Palo Alto has made significant strides in targeting the source of pollution stemming from staff and contractor structural pest control activities currently most associated with impaired water quality. Future efforts will continue to target landscape pest control problems that lead to use of ecotoxic fungicides and rodenticides, which are currently the greatest source of ecotoxicity in City operations. For residential and business use, Palo Alto will continue to promote new and existing programs locally and regionally, such as EcoWise Certified, Bay Friendly, Green Gardener and *Our Water, Our World*. These programs are effective in providing education to non-municipal audiences that contribute to urban pesticide pollution.

2008 City of Palo Alto Pesticide Use Information

Summary Excerpt from 2008 Annual Pest Management and Pesticide Use Report

1. **Total Active Ingredient Use Trends**

   Total active ingredient use decreased by 153 pounds (36%) in 2008 due primarily to decreased fungicide applications of mancozeb and thiophanate-methyl. Smaller reductions in use of the herbicides imazypyr and oryzalin also contributed to the decrease.

Figure 1: Total Pesticide Active Ingredient Use by Year (2001 – 2008)

2. **Tier 1-3 Pesticide Use**

   The City's use of Tier 1, 2, and 3 pesticides for calendar years 2001 through 2008 is displayed in Figure 2. Figures 3 through 6 provide annual pesticide use, by tier, for controlling fungus, rodents, weeds, and insects, respectively.

   Tier 1 Pesticide Use

   In 2008, the City's total Tier 1 pesticide use decreased by 150 pounds (48%), which is attributed to:

   - A 117 pound decrease in mancozeb (fungicide)
   - A 31 pound decrease in thiophanate-methyl (fungicide)
   - A combined total decrease of 12 pounds of imazapyr and oryzalin (herbicides).

   Note that other individual Tier 1 product use increased. This accounts for the difference between the total of the individual product reductions listed above and the total Tier 1 reduction.

Of the total amount of Tier 1 active ingredient that was used, fifty-five percent was applied at the golf course to control fungus. The remainder was applied at the golf course and open space for ground squirrel and gopher control and at various City locations for weeds, grubs, and root control in sewers.

The dramatic reduction in golf course fungicide use is attributed to several factors: a cold, dry 2008 winter; a successful fall aeration; and increased cultural practices including de-thatching, topdressing, hand watering, and reel sharpening.

Figure 2: Tier 1, 2, and 3 Pesticide Use by Year (2001 – 2008)

Tier 2 Pesticide Use

Tier 2 pesticide use remained about the same in 2008 as compared to 2007. The Tier 2 fungicides Medallion (fludioxonil) and ProStar (flutolanil), and Roundup herbicide (glyphosate) comprised 98% of the Tier 2 pesticides used in 2008. The use of Roundup herbicide has decreased about 75% from the peak level of 2003 due to heavy mulching and mechanical weed removal. This reduction in Roundup use was accompanied by decreased Tier 1 herbicide use.

Tier 3 Pesticide and non-chemical controls

Tier 3 products, the least toxic category, remained at about the same levels as previous years. Non-toxic pest control measures, such as exclusion and non-chemical control measures, are difficult to quantify although their use has increased over time. Examples include increased trapping for gophers, the use of goats to consume weeds, and structural repairs that reduce ant and rodent infestations. Chemical controls may have been used if these non-chemical strategies were not used. It should be noted that higher Tier 3 pesticide use in some previous years was primarily due to the use of a glyphosate herbicide product that was reclassified to Tier 2 in 2006.

COPPER ACTION PLAN/NICKEL ACTION PLAN
(Provision C.9.a & b of the Permit)

FY 2008-2009 Work Plan Self Evaluation Matrix

Item No.	Activity	FY08-09 Work Plan Tasks	FY 08-09 Accomplishments	Responsible Party
CB-1	Vehicle Washing Operations	• Distribute outreach materials on proper vehicle/equipment washing at City department counters and public events, and post on City web site. • Provide car wash kit to charity car wash organizers and educate on the use of the kits. • Submit data regarding vehicle washing outreach activities and effectiveness evaluation in annual reports. • Require source control measures for Group 1 new development and redevelopment projects that will conduct vehicle/equipment washing and maintenance activities (consistent with Permit Provision C.3.k). • Inspect auto businesses regarding car wash requirements, and prohibited storm drain discharge.	Within CB-1, Paragraphs 1, 2, 5, 6, 7, 8, & 9 are ongoing programs which have been run by Palo Alto for a number of years, and which were run again successfully in FY 2008-09. Paragraph 3 calls for an effectiveness evaluation regarding vehicle washing outreach Utility bill stuffers, fliers, and special event displays have been used successfully to promote changes in vehicle washing practices as a means to protect storm water quality. Awareness of this issue has grown over the years, serving as a testament to the outreach program. Palo Alto does not do its own public opinion surveys, but rather relies on regional surveys to quantify and confirm the success of this and other behavior modifications. With respect to Paragraph 4, two recent multi-family residential developments constructed in Palo Alto include covered vehicle wash areas that are plumbed to the sanitary sewer.	Public Works Environmental Compliance Public Works Environmental Compliance Public Works Environmental Compliance Public Works Engineering Public Works Environmental Compliance

		• Inspect vehicle washing facilities as part of stormwater inspections for industrial and commercial businesses. • Continue to maintain car wash systems for City vehicles at the corporation yard and fire stations. • Encourage municipal staff to use certified mobile cleaners when contracting cleaning services. • Refer mobile cleaners to BASMAA's online training module for education and certification.		Public Works Environmental Compliance Public Works Fleet Mgmt. & Fire Dept. Public Works Operations & Facilities Mgmt. Public Works Environmental Compliance
CB-3	Industrial Copper Control	Continue Industrial Inspection program, including NOI sites such as plating and metal finishing facilities, vehicle service facilities, and other permitted sites.	All inspections completed in FY 2008-09.	Public Works Environmental Compliance
CB-4	Quantify Source Loadings of Copper	• Collect data on potential indicators of copper. • Prepare and submit report on potential indicators as part of Clean Bay Plan.	This item was completed again this year and submitted to the Regional Board as part of the Palo Alto Clean Bay Plan in February 2009.	Public Works Environmental Compliance
CB-6/7	Reducing Traffic Congestion/	Continue updating the City's Zoning Ordinance, based on the results of the	No changes to report.	Public Works Engineering &

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2008-2009 ANNUAL REPORT
Municipality: City of Palo Alto

	Promoting Alternative Transportation	Development Policies Comparison Project Report (particularly Section VI, Policies to Limit Auto Use/Promote Alternative Transportation) to promote better transportation-related design practices and alternative modes of transportation.		Planning
CB-8	Watershed assessment and protection	Revise City's General Plan, as needed, at next scheduled update, based on recommendations from the *Development Policies Comparison Project* and Provision C.3.l.	No changes to report.	Planning
CB-11	Street sweeping and storm drain O&M	• Follow Program guidance regarding the collection and reporting of street sweeping data. Provide data for Annual Report. • Evaluate need for improvement of current street sweeping and storm drain system O&M programs (within available budget) in Annual Report.	Street sweeping data submitted as required. No changes to report.	Public Works Operations
CB-12	Outreach on pool, spa maintenance	• Distribute outreach materials at agency department counters and public places; and placement on City website.	Due to the high percentage of pools serviced by professionals, the best approach is briefing pool service professionals. This will be done again in 2010 via their local professional association.	Public Works Environmental Compliance
CB-21	Use of architectural copper	• Perform plan checks for compliance with existing ban on copper on roofs, in roof shingles, and for gutters.		Public Works Environmental Compliance

		• Distribute fact sheet on copper ban at building counter and on web site.	Informational material is provided through the Planning and Building Inspection departments.	
NB-1	Measures to control nickel discharges from construction sites	• Continue to implement Construction Inspection Performance Standards (see Construction Inspection work plan section). • Continue to have inspectors attend Regional Board/Program workshops on construction site management and learn latest erosion/sediment control techniques • Continue to attend Program workshops on post-development stormwater BMPs (C.3.)	All components of this program continued to be implemented this year.	Public Works Environmental Compliance Public Works, Utilities, and Community Services

Regional Board Comments on Copper Action Plan/Nickel Action Plan FY 2007-2008 Annual Report

Item	RWQCB Comment	City Of Palo Alto Response
N/A	N/A	N/A

Copper Action Plan/Nickel Action Plan Program Evaluation

The Action Plans are now mature program elements that do not change from one year to the next. They have succeeded in preventing violations of the Site Specific Limits in San Francisco Bay. The "Trigger" system has not been activated by exceedances, and the control programs have been successful. The exception is the brake pad situation, in which this source remains uncontrolled. Palo Alto continues to work through the Brake Pad Partnership to bring about copper reductions from brake pads. Legislation to reduce copper in brake pads was introduced in 2009 and carried forward to 2010. Palo Alto actively supported the legislation, and local state senator Joe Simitian became a co-author of the legislation.

FY 2008-2009 ANNUAL REPORT

Municipality: City of Palo Alto

		4. Continue implementing trash control measures, where practical and feasible, to reduce trash.	4. Installation of trash boom across Matadero Creek downstream of Palo Alto Pump Station is complete.	
		5. Provide co-permittee specific information on trash management practices implemented in Palo Alto using standardized reporting format (to be used for Program –wide reporting).	5. Results posted and forwarded to program staff as required and on-time	
		6. Assist Program in developing Trash Fact Sheets, as appropriate.	6. New fact sheets on Trash were not needed this year.	
		7. Submit Urban Rapid Trash Assessment Survey Forms, Trash Item Tally Sheets and any other data collection tool to Program staff.	7. Results posted and forwarded to program staff as required and on-time.	
		8. Assist Program staff in developing an effective strategy for reducing trash in urban streams and waterways.	8. Palo Alto chaired a new WMI Subgroup on Trash to identify new control measures and coordinated a “Trash Summit” in October 2009.	
		9. Annually revise trash problems areas list on an as needed basis. Revisions should be based on trash problem area surveys and other relevant information.	9. Results posted and forwarded to program staff as required and on-time

		10. Begin implementation of long-term trash management strategy for each high priority watershed within Palo Alto identified as likely to discharge trash and litter to receiving waters.	10. Currently, a single strategy is applied to all trash hot spots within the City of Palo Alto. These sites are formally reviewed twice per year using KAB and RTA Assessment Scores which is reported back to EOA for on-going data collection and analysis. Program will create individual long-term trash management strategies for required sites based on pending implementation of MRP.

Trash Inventory & Management Program Evaluation
The program continues to make significant progress. Continual inspections of "hot spots" have allowed staff to remove sites that are no longer considered a threat to waterways. Additional sites have been added to address new areas of concern for the City of Palo Alto. The creation of the Trash BMP Tool Box Pamphlet as provided by SCVURPPP provides technical information to resolve future trash problems. The effort to coordinate City of Palo Alto Environmental Compliance Division, Public Works Engineering, Public Works Operations, Palo Alto Police Department, San Francisquito Watershed Project, and other interested environmental persons and groups will improve reporting accuracy and help increase the total number of trash items removed from local creeks and waterways. In FY 2009-10, staff shall monitor, identify sources, and remove trash items that have been captured by new boom across Matadero Creek at West Bayshore Road. This will help to identify the most effective method for screening trash and may lead to modifications to the trash racks at the Matadero Pump Station and other City pump stations that will increase the level of trash removal prior to discharge of pump effluent to local creeks. This proposal to study pump stations as trash removal devices may be the first in the region.

Oakland, CA 94612

Subject: City of San José Urban Runoff Management Plan
Fiscal Year 2008-2009 Annual Report

Dear Mr. Wolfe:

Enclosed is the City of San José Urban Runoff Management Plan Annual Report, pursuant to provision C.6.a. of the municipal storm water NPDES Permit (Order No. 01-024). The report was approved by the City Council on August 25, 2009, without changes. The report summarizes activities performed during FY 2008-2009 in accordance with the City of San Jose's Urban Runoff Management Plan (URMP) submitted to the Regional Board in September 2004, and the performance standards contained therein.

If you have questions regarding the Annual Report, please contact Michael Rhoades of my staff at 408-277-2773.

Sincerely,

Melody Tovar

Melody Tovar, P.E.
Deputy Director
Environmental Services Department
Watershed Protection Division

cc. Jill Bicknell, Santa Clara Valley Urban Runoff Pollution Prevention Program

Attachment: Annual Report

Executive Summary

The City is required to submit to the San Francisco Bay Regional Water Quality Control Board (Water Board) an Annual Report that documents the progress of the Urban Runoff Management Plan for the previous fiscal year (FY). The Annual Report is prepared pursuant to provision C.6 of the City's National Pollutant Discharge Elimination System (NPDES) permit for stormwater discharge through the City's storm sewer system to waters of the United States.

Functional and aesthetic stormwater artwork at the Roosevelt Community Center

The Report includes sections for each of the program elements included in the Urban Runoff Management Plan as required in the NPDES permit (Permit). Each section is comprised of an update on the status of the work plan, an evaluation of various performance elements, responses to Water Board feedback received during the past year, and additional tables or information to demonstrate success in implementing the program element. Summaries are also provided for the array of outreach activities and municipal training sessions that are included in various program elements.

Most program elements contain components carried out by more than one City department. The strategy for attaining compliance focuses on three different types of activities that the City conducts:

- Enforcement and monitoring to prevent, detect, and respond to incidents of illegal discharge to the storm sewer system;
- Modification of structural and business processes to implement best practices in all municipally managed projects, operations, and services; and
- Outreach and education of municipal employees, as well as the community at large, to reduce stormwater pollution, ensure that developments comply with local stormwater regulations, and provide businesses and residents with information on best management practices that can be incorporated into their daily activities to protect stormwater quality.

Although the City also contributes to activities undertaken by the Santa Clara Valley Urban Runoff Pollution Prevention Program (Program) and the Bay Area Stormwater Management Agencies Association (BASMAA), this report includes only those activities that were performed by the City. The following report provides an overview of the past year's progress toward addressing each program element.

Illicit Connection / Illegal Discharge Inspection (ICID)

The City's Environmental Services Department (ESD) responds to complaints regarding illegal discharges or threats of discharge to the storm sewer system. The City received 537 ICID complaints in FY 08-09, which was a 23 percent decrease over last fiscal year and the lowest number of complaints received since FY 92-93. This decrease in complaints may have been due to multiple years of targeted outreach in high incident areas. ESD staff have been attending Strong Neighborhood Initiative (SNI) Neighborhood Action Committee meetings for the last three years and providing pollution prevention information directly to the neighborhoods where reports of illegal discharge have been high. The increased awareness of those residents may have contributed to positive behavior changes, which in turn has led to fewer ICID complaints.

Vehicle and equipment leakage again made up the largest category of cases, representing approximately 14 percent of the ICID caseload. The City will continue to target pollution prevention outreach to neighborhoods that have had high incidents of these cases. The number of greywater (non-sewage polluted water) cases increased in FY 08-09, and the City is analyzing this trend to determine if follow-up actions will be needed.

Watershed Enforcement Inspector dye testing for illicit connections

Complaints involving residential properties have continued to be among the highest number of cases that ESD investigates, representing approximately half of the total caseload. The number of construction ICID cases has continued to decline, representing only 2 percent of the total ICID caseload in FY 08-09. The City's construction inspection program has worked proactively with construction site managers to correct site issues before they become significant problems.

In October 2008, unusual odors were identified at the pump stations in Alviso, triggering concerns about possible illegal dumping. ESD inspectors investigated the collection system to determine the problem source, but no single source could be identified. Department of Transportation (DOT) staff took corrective actions to prevent further discharge of poor quality runoff and performed extensive cleaning of the system. Traffic patterns in Alviso had worn and faded the existing painted "no dumping" inlet markings, so the City installed 181 thermoplastic storm drain markings to help increase local awareness. The new markings are highly visible and are expected to be more durable than the traditional painted stencils.

Industrial & Commercial Discharges (IND)

The goal of the IND program is to protect the storm sewer system from polluted discharges originating from commercial and industrial facilities. ESD inspected more than 4,900 facilities in FY 08-09, an eight percent increase over the previous fiscal year. Forty-seven percent of

those facilities were food service establishments. Inspections were prioritized based on a facility's potential to discharge polluted runoff. Inspections followed the protocols of the City's Enforcement Response Plan, which allowed the City to focus resources in areas with the greatest potential to discharge pollutants to the storm sewer system. While there was only an eight percent increase in facilities inspected, City Inspectors issued over thirty percent more enforcement actions. This increase is due in part to a larger number of initial inspections at new food service establishments, which are prone to have more areas of concern identified.

Watershed Enforcement Inspector speaking with a chemical manufacturing facility manager

When issues are identified at a facility, the City uses both enforcement and education to promote compliance and to protect stormwater quality. Thirty-one percent of inspections resulted in an enforcement action, which is an approximately five percent increase from last fiscal year. The remaining sixty-nine percent of facilities inspected did not require enforcement action and only received educational materials. Education is the first step in the City's Enforcement Response Plan, and the City attributes its high compliance rate to this practice.

New and Redevelopment (NRD)

This program element is driven by the New and Redevelopment (C.3) provision of the Permit, which was amended in October 2001 and most recently in July 2005. This provision requires that development projects include controls to minimize stormwater pollutants and manage the release of storm flows from a project site.

In FY 08-09, the City continued to make strides toward integrating stormwater controls into development projects. Of the sixty-two private development projects that incorporated hydraulically-sized stormwater management measures, over half used landscape-based treatment controls, either as the sole treatment or paired with mechanical treatment. The increased use of Low Impact Development (LID) stormwater management practices, such as using permeable pavement in parking areas indicates the program's success in providing outreach to and collaboration with the development community.

The City of San José has strong goals and policies that encourage Smart Growth development and redevelopment. The City has continuously strived to offer a mixture of housing densities, supportive businesses and services, jobs, community facilities, parks, and public transit, while emphasizing pedestrian and transit-oriented development. Site design, source control, and Low Impact Development (LID) have all been utilized to minimize stormwater pollution and help achieve the City's broader goals and policies. Development projects in FY 08-09 incorporated a wide range of LID strategies and, consistent with the City's Smart Growth policies, over half of

the reportable projects (regulated projects per City Policy 6-29) in FY 08-09 were located in transit-oriented development areas. Additionally, residential projects in FY 08-09 had an average of approximately 41 dwelling units per acre (DU/AC) and 68 DU/AC in transit-oriented development areas. These development patterns have a broad water quality benefit as they reduce traffic congestion and the associated air pollution.

The City conducted inspections of projects that completed construction in FY 08-09 and were subject to C.3 of the Permit. City staff inspected fourteen different project sites utilizing the Program's standard inspection data collection form. Approximately 200 approved private projects now fall under the City's BMP O&M Verification Program, and as development continues throughout the City, more resources will be needed for project tracking, initial site inspections, and re-inspections. Improvements to the City's Operation and Maintenance (O&M) Verification Program in FY 09-10 will focus on improving procedures to ensure post-construction BMPs are correctly installed and property owners and managers are maintaining BMPs.

Treatment swale between buildings of an apartment complex: a stormwater treatment control measure

With the intent of advancing greenhouse gas reduction and other sustainable strategies outlined in the City's Green Vision, the City Council adopted the Green Building Policy for New Private Sector Construction (Policy) on October 7, 2008. The Policy calls for green building certification in specified private sector development projects. There is an amendment pending before the City Council to add a new Chapter 17.84 Green Building Regulations for Private Development Establishment of the U.S. Green Building Council's (USGBC), Leadership in Energy and Environmental Design (LEED) and Build it Green's (BIG) Green Point Rated rating systems as the mandatory green building standards for the City of San Jose. The ordinance is anticipated to go into effect in September 2009.

The City continues its commitment to educating staff and increasing developers' awareness of C.3 stormwater management techniques, numeric-sizing treatment criteria, and hydromodification measures. During FY 08-09, City staff attended and sponsored a wide variety of trainings related to NRD, including Low Impact Development practices and "green" street design. Additionally, the City continued the revision process for its General Plan. Titled "Envision San José 2040," the revision provides a unique opportunity to update General Plan policies and goals, including water quality protection, as they relate to environmental protection and sustainability.

Construction Inspection (CON)

The City inspects activities at construction sites to prevent sediment and other pollutants from entering the storm sewer system, pursuant to provision C.6 of the Permit. Inspectors from Environmental Services, Public Works, and the Building Division coordinate inspections, enforcement, and outreach to the development community on BMPs, City policies addressing erosion and sediment control, and NPDES Permit requirements.

Construction activity in San José continued to slow in FY 08-09, as evidenced by a reduction in the number of grading permits issued. As a result, the City conducted 10 percent fewer inspections than the previous year. Additionally, inspectors discovered numerous inactive sites that had postponed construction activity. Still, the City continued to implement a vigilant construction site monitoring program and, in fact, documented more violations than the previous year and escalated enforcement accordingly.

Contractor installing protective BMPs around a storm drain inlet at the Edenvale Community Center

In addition to inspection and enforcement, the City focused on training and professional development for staff. In October, the City sponsored a comprehensive, two-day training on construction site management that was attended by 103 staff. An evaluation of the class indicated that the training was well received and useful. Other trainings completed by City inspectors included the Program's Annual Construction Site Management training in November; focused "refresher" trainings conducted by ESD Urban Runoff staff for 50 inspectors at their staff meetings throughout the rainy season; Stormwater Pollution Prevention Plan (SWPPP) training to 52 capital improvement project staff in May; and "Stormwater 101" training to 31 Redevelopment Agency staff in July and September that covered regulatory requirements, BMPs, and Permit updates.

San José also coordinated with the California Stormwater Quality Association and the Program to review the revised Draft State Construction General Permit, which was issued in April, and provide comments to the Board. In addition, the City hosted a regional workshop for staff, co-permittees, and developers to discuss impacts of the Draft State Construction General Permit.

Public Streets, Roads, & Highways (PSR)

This program element is pursuant to provision C.2.a of the Permit and is one of several that address municipal activities. These program elements essentially consist of incorporating BMPs into City operations, such as street repair. Training plays a key role in ensuring that staff uses the proper techniques to protect water quality. For FY 08-09, this training was completed in June 2009. Session content centered on review of the Department of Transportation's BMPs and Standard Operating Procedures (SOPs) for O&M activities. Corporation Yard Stormwater Pollution Prevention Plan training was integrated into the training in FY 08-09 for all crews utilizing the City's corporations yards. Training content was tailored to focus on the specific work groups present at each training session. Participant evaluation of the training was very

positive with an average score at 4.51 on a 5 point scale. Revisions to the training curriculum occur, as needed, to reflect new practices.

Training was also conducted for Rural Public Works BMPs in accordance with provision C.5, which requires that the City employ proper techniques when conducting maintenance activities in rural areas. This standard is integrated as part of the PSR program element. The City's Departments of Parks, Recreation, and Neighborhood Services; General Services; and Transportation are responsible for managing rural public works maintenance and support activities.

Parks, Recreation, and Neighborhood Services and Department of Transportation staff demonstrate stormwater BMPs in Alum Rock Park

The City conducted an extensive street sweeping program, involving the sweeping of the central business district; neighborhood business districts; arterials, collectors, and bicycle lanes; and residential streets. The City sent a calendar listing the annual residential street sweeping schedule to each single-family dwelling and asked the City's neighborhood associations to include reminders in their newsletters about moving parked vehicles on street sweeping days. The City expanded the areas in which parking restrictions were required and enforced to improve the effectiveness of the street sweeping program. In FY 08-09, the enforcement area increased from 266.5 to 288.5 curb miles.

Storm Drain System Operation & Maintenance (SDO)

Department of Transportation Maintenance Worker services a catch basin on El Dori Drive

Storm Drain System Operation and Maintenance is another program element implemented in accordance with provision C.2.a of the Permit. SDO includes key maintenance activities conducted to ensure the proper function of the storm sewer system to collect and convey storm runoff.

The Department of Transportation successfully implemented its annual storm drain inlet inspection and cleaning program, cleaning approximately 29,800 inlets. Data collected during inlet cleaning identified problems associated with approximately 2,200 of the City's storm drain inlets and catch basins. Review of the data indicated that approximately 1,200 of the reported problems were operational challenges, such as access to storm inlets, while only approximately 530 problems were associated with different types of debris. The fewest number of problems

(approximately 450) arose from various types of construction activities.

Water Utilities Operations & Maintenance (WUO&M)

Pumps at the Rincon II pump station

This program addresses O & M activities at the City's Municipal Water System and is implemented in accordance with provision C.2.a. The key tool for implementing this program is the Water Utility Operation and Maintenance Discharge Pollution Prevention Plan. Per the plan, water utility staff were trained to employ proper techniques to prevent stormwater pollution during maintenance activities. The annual training program covered common SOPs and BMPs and included an evaluation of current SOPs. In FY 08-09, 87 percent of staff participating in the evaluation found the current SOPs to be effective. Additionally, the evaluation found that staff regarded the current SOPs and BMPs to be clear, adequate, workable, and effective.

Pesticide Management (PM)

This program element was developed to reduce the amount of pesticides in urban runoff and is implemented in accordance with provision C.9.d. of the Permit. Activities include setting municipal policy, implementing Integrated Pest Management (IPM), training staff, providing public education, tracking City pesticide use, and City participation in regional efforts to influence regulations that affect pesticide management.

San José has incorporated the use of IPM techniques for several years. The City Council formally adopted an IPM Policy in 2003, which called for municipal operations to implement IPM techniques and to reduce, phase-out, and ultimately eliminate the use of pesticides that impair surface waters. In August 2008, San José became the first government agency to adopt a "Cities Keep it Clean" resolution, committing to work cooperatively with Save the Bay and other programs to implement an array of actions, including the use of IPM techniques to significantly reduce city use of pesticides that pollute local waterways.

San José continues to apply proven and innovative IPM techniques to address municipal pest problems. The City's current IPM methods include applying mulch in landscapes as a water-saving weed barrier, selection of native and disease-resistant plants, power washing moth cocoons from trees, release of parasitic wasps to control moths, manually trapping and removing squirrels and other rodents, and favoring tree injections over broadcast spraying when pesticides are needed.

In FY 08-09, San José expanded its weed control grazing program from 67 acres to nearly 600 acres in an effort to reduce pesticide use. Approximately 77 pounds of pesticides were avoided by using goats and sheep to graze City lands. The San José/Santa Clara Water Pollution Control Plant (WPCP) implemented a year-round grazing in an effort to reduce mowing and maintain

landscape in sensitive habits (including burrowing owl habitat). The grazing program received coverage from local and regional media and the USA Today newspaper.

Goat grazing at Zone 3 Reservoir, a chemical-free pest management strategy

San José participates in regional collaborative efforts to provide educational outreach to residential and commercial pesticide users and pesticide retailers. Our Water, Our World and the Program's Watershed Watch campaign continued to increase pesticide awareness of target audiences regarding less toxic pesticide use. Watershed Watch continued facilitating the Santa Clara Valley Green Gardener training program and received statewide awards from CASQA and the California Department of Pesticide Regulation.

Tracking of Citywide pesticide use in FY 08-09 showed significant decreases in the use of pesticides of concern that pose the most significant threat to surface water quality. However, total pesticide use increased by 3.5 percent, which is likely attributable to the addition of new City property requiring maintenance, more comprehensive tracking of pesticide use, and an increase in the use of chemicals that are used in large quantities but pose little threat to surface water quality. The City will continue to collect and evaluate pesticide use data as part of its PM program.

Mercury (M)

This program element is implemented pursuant to provision C.9.c of the Permit. The City has continued its efforts to reduce or eliminate potential mercury discharges from municipal operations. The City purchases low mercury content fluorescent lamps, and spent lamps are recycled properly. In FY 08-09, the City recycled more than 5,237 pounds of spent mercury-containing lamps. The City supports the Santa Clara County Household & Small Business Hazardous Waste Program to provide fluorescent lamp recycling services to residents.

The City also continues its support of the San Francisco Bay Regional Monitoring Program and the WMI Guadalupe River Mercury TMDL Workgroup. The City continues its commitment to work with the Water Board and stakeholders toward TMDLs that are technically defensible and feasible for implementation.

Copper & Nickel Action Plans (CNAP)

This program element is implemented pursuant to provisions C.9.a and C.9.b of the Permit, which incorporate Action Plans for copper and nickel to be implemented based on water quality monitoring results in the South Bay. The action plans include activities for which various agencies or entities assume responsibility. Only activities undertaken at the municipal level for stormwater are included in this report. Such activities have largely been integrated into other ongoing program elements but are reported as a summary for clarity. Copper and Nickel remain among the list of pollutants addressed by general and targeted outreach regarding stormwater pollution prevention.

Outreach table at a half-off car wash event. Encouraging the public to use commercial car washes instead of washing at home may reduce copper pollution in creeks.

This year, the City submitted a letter of support for AB 346 (Kehoe), sponsored by Sustainable Conservation for the Brake Pad Partnership. The City has supported the Brake Pad Partnership, a collaborative multi-stakeholder organization formed to address copper from brake pads, for many years. The bill, drafted with unanimous agreement among the Partnership's industry, stormwater agency, and environmental members would effectively eliminate copper from all automobile brakes sold in California.

In the City's Industrial and Commercial Inspection program, key activities have been implemented to address copper, either exclusively or among the array of potential pollutants. A fact sheet regarding rooftop sources of copper pollution was again distributed to select industrial facilities. The City also continued its "NOI Filers" project. This activity aimed to increase awareness among industrial facilities of their obligations under the State's General Industrial Activities Stormwater Permit (GIASP) by providing them with BMPs and information alerting them to the requirements. The City has already successfully incorporated review of this information into routine inspections and provides the Water Board with a list of facilities that have not yet filed under the GIASP.

The City provides BMP information for its residential and commercial constituents on various actions they can take to reduce or eliminate the exposure and discharge of copper from their activities. Materials were distributed during inspections, at the City's planning and permitting offices, at outreach events, and on the City's website.

Trash (TRA)

This program element is implemented pursuant to the Program's Trash Work Plan and provision C.1 of the Permit. The purpose of the Trash program is to address litter and illegal dumping that threaten to pollute urban waterways. Activities associated with the Trash program relate to prevention, removal, and pilot studies.

Volunteers removed debris from Coyote Creek at Roosevelt Park on National River Cleanup Day

The City of San José strongly advocates litter reduction and dumping prevention. In FY 08-09, the City maintained programs promoting proper disposal of waste and explored policies that could curtail the use of specific items that frequently contribute to litter. In partnership with the County Waste Reduction Commission, the City is promoting reusable bags to reduce plastic bag litter in creeks and conducting outreach to neighborhood groups and public forums. The City is also actively participating in the development of BASMAA's upcoming Regional Advertising Campaign that will focus on litter prevention.

The City of San José and the Santa Clara Valley Water District (District) continue efforts under the Memorandum of Agreement for Trash Prevention and Removal (Trash MOA). The Trash MOA includes weekly encampment cleanup activities on waterways in the City, up to ten monthly cleanups of large and active illegal encampments, as well as up to five cleanups in partnership with the District each year. In total, 190 tons of debris was removed through the Trash MOA cleanup activities. In addition to the cleanup efforts with the District, the City conducted five independent clean-ups that removed over 60 tons of debris from large illegal encampments along creekside parcels in the City.

The City has continued its collaboration with the City of Sunnyvale and the Program to pilot the use of catch basin inserts (screens) as a structural control to prevent trash and other debris from entering the City's stormwater conveyance system. Preliminary results indicate that the screens are effective at preventing material from entering the stormwater conveyance system without significantly affecting catch basin function and capacity. A more detailed report on the progress of the pilot studies is available in the Program's annual report.

Monitoring (MON)

Monitoring activities required in the stormwater permit are generally implemented at the Program level. However, the City also participates directly in region-wide monitoring activities, including the San Francisco Bay Regional Monitoring Program, through participation in the Sources, Pathways and Loadings Workgroup and Technical Committee; SCVURPPP Multi-year Monitoring Program; various regional and Program-focused investigations of pollutants and sources to the storm drain system; and special studies in support of TMDLs.

Environmental Specialist monitoring in the Guadalupe River near Trimble Road

This year, City staff actively participated in planning and review activities for the Regional Monitoring Program (RMP), serving on the RMP Technical Committee and as members of the Sources, Pathways and Loadings workgroup. Financial support for the RMP has continued since its inception. City staff also serves on the Guadalupe Mercury TMDL Workgroup, representing the City and the Watershed Management Initiative's Watershed Assessment and Monitoring Subgroup. In FY 08-09, The City reviewed RMP study reports, participated actively on RMP committees and workgroups, and participated in WMI core and subgroups.

Municipal Compliance (MC)

This program element trains City staff on pollution prevention practices to ensure that City facilities comply with stormwater requirements. In FY 08-09, the City held over seventy sessions on various topics to provide pertinent City Staff with training on procedures and issues related to stormwater programs. In March 2009, the City engaged a consultant to conduct a two-day class addressing water quality impacts resulting from public works maintenance and support activities in rural areas. Classroom training included a review of practical and effective BMPs for road maintenance to protect riparian habitat, aquatic species, and water quality. In-field training demonstrated the proper use and installation of BMPs such as inlet covers, erosion control blankets, turf reinforcement mats, silt fences, straw wattles, straw bales, and re-vegetation.

Parks, Recreation, and Neighborhood Services and Department of Transportation staff at the Rural Roads Workshop field training at Alum Rock Park

To ensure stormwater compliance at priority City properties, Corporation Yards were routinely inspected for stormwater practices by Yard staff. These were in addition to the annual inspections that ESD staff conducted at each of the five Corp Yards during February and March 2009. The Corporation Yard Stormwater Pollution Prevention Plans (SWPPPs) were revised as necessary during FY 08-09 and will be sent out for review and comment. More than 350 employees received training regarding stormwater BMPs/SOPs and were asked to evaluate the training. Out of 291 evaluations that were completed and returned, the training sessions received an overall rating of 4.51 on a scale of 1 to 5 (4 = Good, 5 = Excellent). Similar scores were received for the training's success at explaining the relevance of the BMPs/SOPs to the employees' work practices, the relationship between the BMPs/SOPs and compliance with the City's Stormwater NPDES permit, and the ways in which the employee can help the City comply with the Stormwater NPDES permit.

Public Information / Participation (PIP)

This program is implemented in accordance with provision C.4 and includes general outreach, targeted outreach, educational programs, and public participation activities. The City has a robust and broad-based public information and public participation program, utilizing many different methods to best deliver stormwater pollution prevention and watershed protection messages to a wide array of audiences. Conducting outreach to the community and providing opportunities for participation in water quality protection activities are critical to evoking the behavior changes needed to manage stormwater quality. They are also important for garnering the support needed to continue and expand services and programs.

ESD Intern demonstrating the effects of pollution on stormwater to third graders at the Water Wizards Festival at Guadalupe River Park

The City participates in and supports a wide variety of stormwater outreach and education activities, including many in collaboration with other local and regional agencies. Highlights for FY 08-09 include: participating in the expanded Go Green Schools Conference; providing access and supplies for multiple creek clean-up sites; participating in dozens of community events, partnering with retail stores to provide point-of-sale information about IPM; hosting green gardening and composting workshops, and providing training sessions for contractors and developers on construction requirements. Outreach continues to be a vital tool for inspectors, allowing for direct education of polluters and potential polluters. Education is the first step in the City's Enforcement Response Plan. Educating the youth of San José continues to be a priority, with multiple programs targeting students, teachers, administrators, and school communities with watershed education and green practices.

The City also actively supports Program-wide and Bay Area-wide outreach and education activities, including IPM outreach, mercury outreach, regional media relations, and the Watershed Watch campaign. Coordinating outreach activities with the Program and Bay Area-wide efforts enables the City to deliver pollution prevention messages more effectively, frequently and at reduced cost.

Permit Reapplication

The City's current NPDES permit was adopted in February 2001 for a five-year period. The Permit was amended in October 2001 and July 2005, with both amendments relating to the New and Redevelopment stormwater treatment and hydromodification provision, also known as Provision C.3. The Permit has been administratively extended since February 2006, pending the adoption of the Bay Area-wide Municipal Regional Permit.

In late 2005, the Water Board embarked on a multi-stakeholder process to craft an NPDES permit, called the Municipal Regional Permit (MRP), which would apply to all municipal stormwater dischargers in the Bay Area. In the past, NPDES permits have been issued separately to Bay Area stormwater programs with staggered adoption dates that often resulted in uneven and inequitable requirements.

In preparation for the MRP, City staff has dedicated numerous hours to analyzing Permit drafts, briefing stakeholders, and preparing responses to the drafts. Staff has also participated in the steering and stakeholder meetings convened by Water Board staff and will continue to participate in the MRP process through the Program, BASMAA, and individually as a City. The Water Board is expected to adopt the MRP in fall 2009.

Vertical trickling filter: a stormwater treatment control measure and art exhibit at the Roosevelt Community Center

Conclusion

With the Council-adopted Green Vision, the City of San José is a leader in promoting bold, proactive environmental policies and continues to meet or exceed its Permit-mandated obligations. The City is committed to managing and protecting stormwater quality and actively participates in many local and regional efforts designed to leverage the most value for its resources and citizens. San José is striving to position itself to swiftly implement the Municipal Regional Permit once it is adopted and will continue to focus resources to best protect water quality for the benefit of our citizens, businesses, and future generations.

Certification Statement

City of San José
FY 2008-2009 ANNUAL REPORT

Certification Statement

"I certify, under penalty of law, that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to ensure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted, is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations."

1. ICID: Illicit Connection / Illegal Discharge Inspection

1.A ICID Work Plan Self Evaluation Matrix

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 08-09 STATUS	RESPONSIBLE PARTY
ICID 1	**Response to Complaints** The City of San José will respond to complaints regarding ICID dumping activities into the storm drain system and will ensure that the activity has ceased or is on a time schedule to cease.			
ICID 1.A	Update database system to track ICID complaint information.	Done FY 02-03	Done FY 02-03.	ESD-WE
ICID 1.B.1	Document complaint activity, the number of ICID complaints that the City received, and that the activity has ceased or is an allowable discharge.	Annually	Done FY 08-09. See 1.D: ICID *Summary Tables/ Additional Information.*	ESD-WE
ICID 1.B.2	Prepare draft complaint activity data tables to review trends and to facilitate timely evaluation of the data.	Annually, Q3	Done FY 08-09.	ESD-WE
ICID 1.C	Document to the Water Board annually follow-up activities from each ICID complaint response.	Annually	Done FY 08-09. See 1.D: *ICID Summary Tables/ Additional Information.*	ESD-WE
ICID 1.D.1	Review effectiveness of standard operating procedures for responding to ICID complaints.	Ongoing	Done FY 08-09. New database was finalized in FY 07-08. Procedures were updated to reflect the new database.	ESD-WE
ICID 1.D.2	Refine and implement standard operating procedures for responding to ICID complaints/referrals.	As Needed	Done FY 08-09. All complaints responded to within five business days, per the Performance Standard.	ESD-WE
ICID 1.E	Work with SCVURPPP to refine administrative procedure for providing referrals to the Regional Board.	Pending Implementation by Program	Pending activity by Program ICID AHTG.	ESD-WE, Program
ICID 1.F	Revise standard operating procedures to incorporate results of ICID 1E.	Pending Implementation by Program	Pending completion of ICID 1E.	ESD-WE, Program
ICID 2	**Investigations** The City of San José will conduct investigations of high priority areas. High Priority is defined as areas with a high potential for non-stormwater discharges to the City's collection system.			
ICID 2.A	Target areas for monitoring by identifying high priority areas, primary types and sources of ICID pollution based on complaints, historical inspection records, inspector knowledge, and monitoring information.	Annually	Done FY 08-09. Priority areas based on complaints received. All complaints are investigated.	ESD-WE

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 08-09 STATUS	RESPONSIBLE PARTY
ICID 2.A.1	Perform GIS analysis on frequently occurring ICID sources and/or types.	Done FY 03-04	Done FY 03-04 through FY 07-08. With the majority of ICID calls coming from residential areas, the City is focusing outreach efforts on SNI Neighborhood Action Committee groups throughout the City, as well as in areas with historically high ICID cases.	ESD-UR
ICID 2.A.2	Perform outreach in targeted areas based on GIS analysis and other analyses as available. See PIP 2 for details.	Annually	Done FY 08-09. Outreach was performed in six SNI areas. See 1.B: *ICID Program Evaluation Targeted Outreach*.	ESD-UR, ESD-WE
ICID 2.B	Conduct investigations of high priority areas based on ICID 2A.	Ongoing	Done FY 08-09. See 1.D: *ICID Summary Tables/ Additional Information.*	ESD-WE
ICID 2.C	Document to the RWQCB that high priority areas have been conducted, per Table 2 in revised reporting format.	Annually	Done FY 08-09. See 1.D: *ICID Summary Tables/ Additional Information.*	ESD-WE
ICID 3	**Inspector Training** The City of San José will ensure that ICID inspectors are adequately trained in inspection procedures, documentation, and enforcement related to stormwater pollution prevention.			
ICID 3.A	Conduct annual training for ICID inspectors.	Annually, Q1	Done FY 08-09. See 13.D: *Municipal Employee Training Summary* for details.	ESD-WE
ICID 3.B	Provide and document on-the-job training and other training opportunities, such as inspection workshops.	Ongoing	Done FY 08-09. See 13.D*: Municipal Employee Training Summary* for details.	ESD-WE
ICID 3.C	Review inspection training protocols to identify new training opportunities, approaches, and materials.	Annually	Done FY 08-09.	ESD-WE
ICID 4	**Outreach and Technology Transfer** The City of San José will distribute outreach and technology transfer material containing applicable control measures and/or BMPs to target parties responsible for ICID activities.			
ICID 4.A	Determine need for new and/or revised outreach and technology transfer material by getting feedback from inspectors regarding 1) continuing problem activities; 2) discharge types; 3) monitoring and complaint data; and 4) usefulness of existing outreach and technology transfer material.	Ongoing	Done FY 08-09. See 14.D: *PIP Activities Table* for details on ICID outreach.	ESD-CommDiv ESD-UR
ICID 4.B	Develop, audit and/or modify existing outreach material, as needed, based on report developed under ICID 4A.	As Needed	Done FY 08-09. Feedback from inspectors collected during regular staff meetings. Needs are identified and prioritized as part of outreach program implementation.	ESD
ICID 4.C	Document to Water Board that outreach and technology	Annually	Done FY 08-09. See 14.D: *PIP Activities Table* for a count	ESD-UR

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 08-09 STATUS	RESPONSIBLE PARTY
	transfer material and/or BMPs have been distributed.		of outreach and technology transfer materials distributed as part of inspection activities.	
ICID 4.D	Develop and implement standard operating procedures to gather customer feedback on ICID services.	Development Done FY 02-03 Implementation Ongoing	Done FY 08-09. Customer feedback cards are distributed to ICID complainants. 98 ICID Complaint feedback cards were distributed to complainants in FY 08-09. At the time of this report, responses were still being received.	ESD-WE
ICID 5	**SOPs Effectiveness Evaluation** The City of San José's Watershed Enforcement staff will review and evaluate the effectiveness of its SOPs in responding to complaints regarding illicit connections and illegal discharge dumping activities into the storm drain system.			
ICID 5.A	Document and evaluate effectiveness of SOPs.	Annually	Done FY 08-09 and ongoing. SOPs are reviewed annually for effectiveness, and modified as needed. No SOP modifications were made in FY 08-09, pending MRP approval.	ESD-WE
ICID 5.B	In Annual Report, document and evaluate what worked well and what needs improvement.	Annually	Done FY 08-09. See 1.B: *ICID Program Evaluation*.	ESD-WE

1.B ICID Program Evaluation

The City's Environmental Services Department (ESD) responds to complaints regarding illegal discharges or threats of discharge to the storm sewer system. The City received 537 ICID complaints in FY 08-09, which is a 23 percent decrease over last fiscal year and the lowest number of complaints received since FY 92-93. This decrease in complaints may be due to multiple years of targeted outreach in high incident areas. ESD staff have been attending SNI Neighborhood Action Committee meetings for the last three years and providing pollution prevention information directly to the neighborhoods where ICID cases are high. The increased awareness of those residents may have contributed to positive behavior changes, which in turn leads to fewer ICID complaints. See *Targeted Outreach* below for more information.

Figure 1: *Number of Incidents by Category* illustrates the distribution of cases according to category type. Complaints about residential areas continue to be the highest number of cases ESD investigates, representing roughly half of the total caseload. Construction ICID cases continue to decline, representing only 2 percent of the total ICID caseload in FY 08-09. The City's proactive construction inspection program works with construction sites to correct areas of concern before they are noticed and called in as a complaint.

Figure 2: *Number of Incidents by Type* illustrates the distribution of cases by the type of pollutant or pollutant source. Vehicle and equipment leakage is again the largest category of cases, representing approximately 14 percent of the ICID caseload. The City will continue to target pollution prevention outreach to neighborhoods with high incidents of these cases, as well as to the general residential audience in the City. The number of grey water cases increased in FY 08-09, and the City is analyzing this trend to determine if follow-up actions are needed.

To make it easier to file a complaint, the City accepts illegal stormwater discharge complaints via the City's stormwater internet site at http://www.sanjoseca.gov/esd/stormwater/storm drain-complaint.asp. Complaints received from this form are entered into the system and responded to by ESD-WE Inspectors, in a way similar to phoned-in complaints. The City continues to promote this means of registering complaints through existing outreach and training programs.

Targeted Outreach

In FY 08-09, City staff conducted outreach to six neighborhoods by attending community meetings in the following Strong Neighborhood Initiative (SNI) areas: Winchester, Mayfair, Brookwood Terrace / Five Wounds, Blackford, Hoffman Via Monte, and Edenvale / Great Oaks. The SNI areas represent a partnership between the City and its

communities providing a venue for both parties to address issues and provide information important to developing and sustaining healthy neighborhoods. Staff provides outreach materials and discusses various stormwater topics such as fats oils and grease, trash, and ICID with an opportunity for Q&A during the discussion. Information about the City's SNI program can be found at http://www.strongneighborhoods.org.

Illegal Dumping Incident

In October 2008, unusual odors were identified at the pump stations in the community of Alviso in north San José that generated suspicion of illegal dumping into the storm sewer system. Extensive investigative and corrective work was done, but no definitive source was found. ESD inspectors investigated the collection system to determine the problem source, but no single source could be identified. The City's Department of Transportation took corrective actions to prevent further discharge of poor quality runoff to the Bay and performed extensive cleaning of the system. ESD conducted focused outreach to the local residential and commercial community. Letters were sent to area septic haulers, reminding them that discharges and dumping into storm drains are illegal and warning them of the consequences of any illegal discharges. Traffic patterns in Alviso had worn and faded the existing painted "no dumping" inlet markings, so the City installed 181 thermoplastic storm drain markings to help increase local awareness. The new markings are highly visible and are expected to be more durable than the traditional painted stencils.

Cross-Connection near Mabury

A City employee at the Mabury Corporation Yard reported a strong raw sewage odor in nearby Coyote Creek in October 2008. ESD investigated this complaint and discovered a sewer line plumbed to a storm drain catch basin in a residential county pocket on Mabury Road. Both DOT and ESD responded by investigating twenty-one homes and performing dye tests to determine where their sanitary waste was discharging. Two homes were identified to have been illegally plumbed to the storm sewer line. DOT then temporarily diverted the 6" PVC storm pipe to a sanitary manhole to prevent further illegal discharge to the storm system and cleaned the storm sewer line. ESD issued Official Warning Notices to the two homeowners to cease discharging and to disconnect their sanitary lines from the storm sewer. The homeowners complied, and the illegal connections were removed and repaired.

1.C ICID Response to Water Board Comments

No comments received from Water Board on this Program Element.

2. IND: Industrial & Commercial Discharges

2.A IND Work Plan Self Evaluation Matrix

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 08-09 STATUS	RESPONSIBLE PARTY
IND 1	**Notice of Intent (NOI) Filers** The City of San José will conduct inspections of those facilities that have filed an NOI with the State and appear on a list provided by the State. An NOI is required to be filed with the State by companies that are considered to have a high potential to contaminate stormwater and are classified under certain standard industrial classification (SIC) codes.			
IND 1.A	Annually, obtain NOI filer database from State with annual information, review information and identify new NOI facilities for inspection the following year.	Annually	Done FY 08-09. New facilities that file NOI with the State are inspected within one FY of their filing. If the facility is already in the City's database, then it is inspected based on the Inspection Frequency Schedule detailed in IND 3.	ESD-WE
IND 1.B	Conduct and document initial inspections of NOI Filers within one year using the inspector checklist form to determine exposure and assign a future inspection frequency to each facility accordingly. Document whether the facility had submitted an NOI, and whether a SWPPP and a SWMP were on site.	Ongoing	Done FY 08-09 and ongoing. See 2.D: *IND Summary Tables/Additional Information*.	ESD-WE
IND 1.C	Conduct and document annual inspections of facilities determined to have exposure in accordance with inspection frequency schedule.	Ongoing	Done FY 08-09 and ongoing. See 2.D: *IND Summary Tables/Additional Information.*	ESD-WE
IND 1.D	Conduct and document inspections of facilities that need to file an NOI at least once every five years and in accordance with the inspection frequency schedule identified in IND 3.	Ongoing	Done FY 08-09 and ongoing. See 2.D: *IND Summary Tables/Additional Information.*	ESD-WE
IND 1.E	Maintain the database to track the inspection information from the inspector checklist and to include all NOI filer SIC codes required by the Industrial Activities Stormwater General Permit.	Ongoing	Done FY 08-09 and ongoing.	ESD-WE
IND 2	**Non-Filer Investigations** The City of San José will inspect industrial facilities that may be subject to general permit requirements but are not found on the NOI filer list provided by the State.			
IND 2.A	Identify industrial facilities that conduct activities with the SIC codes listed in the IND SOPs.	Annually	Done FY 08-09. Determined the Inspection schedule for the year based on the IND SOP.	ESD-WE
IND 2.B	Develop a list of facilities targeted for inspection during upcoming year that may be subject to general permit	Annually	Done FY 08-09. Determined the Inspection schedule for the year based on the IND SOP.	ESD-WE

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 08-09 STATUS	RESPONSIBLE PARTY
	requirements for NOI based on business licenses, etc.			
IND 2.C	Conduct and document initial inspections of industrial facilities with the SIC codes listed referenced in IND 2A, using the inspector checklist form to document whether the facility constituted a potential threat to discharge pollutants to the storm drain collection system, whether the facility had submitted an NOI, and whether a SWPPP and a SWMP were on site. Maintain database.	Ongoing	Done FY 08-09 and ongoing. See 2.D: *IND Summary Tables/Additional Information.*	ESD-WE
IND 2.D	Conduct and document annual inspections of facilities determined to have exposure in accordance with implementation schedule. Add the facility to appropriate database(s) and assign an inspection frequency. If the facility inspected is determined to need to file an NOI and is not able to provide an NOI, SWPPP or SWMP, refer to the Water Board.	Ongoing	Done FY 08-09 and ongoing. See 2.D: *IND Summary Tables/Additional Information.*	ESD-WE
IND 2.E	Work with the Program's Industrial Inspection Ad Hoc TG on an Administrative procedure for providing referrals to the Regional Board and document providing referrals to the Regional Board for facilities with significant problems.	Pending Implementation by Program	Pending activity by Program IND AHTG.	ESD-WE, ESD-UR
IND 3	**City Regulated Facilities** The City of San José will conduct inspections of City Regulated commercial facilities as identified below: Food service facilities: 2 or more AOCs* over a rolling three year time period - Every year; 1 AOC over a rolling three year time period - Every two (2) years; 0 AOCs over a rolling three year time period - Every three (3) years All Other City Regulated facilities: 2 or more AOCs* over a rolling five year time period - Every year; 1 AOC over a rolling five year time period - Every two (2) years; 0 AOCs over a rolling five year time period but have exposure - Every five (5) years; 0 AOCs over a rolling five year time period with no exposure or potential for exposure - No further inspections Facilities for which a referral or ICID complaint is received: As soon as practicable for violations and every year until they meet the above criteria. *Area of Concern (AOC) = A violation based on the San José Municipal Code 15.14.530 issued to a facility during a stormwater inspection.			
IND 3.A	Determine industrial/commercial facilities identified in the IND SOPs for inspection in each FY.	Annually, Q1	Done, July 2008: Determined the inspection schedule for the year based on the IND SOP.	ESD-WE
IND 3.B	Conduct and document inspections of City Regulated facilities, other than food service facilities, at least once every five (5) years in accordance with the inspection	Ongoing	Done FY 08-09 and ongoing. See 2.D: *IND Summary Tables/Additional Information.*	ESD-WE

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 08-09 STATUS	RESPONSIBLE PARTY
	frequency schedule. If determined to have no impact or no potential for pollution, will not be scheduled for future inspection.			
IND 3.C	Conduct and document inspections of City Regulated food service facilities at least once every three (3) years. Initial approved performance standards require inspections every three years	Ongoing	Done FY 08-09 and ongoing. See 2.D: *IND Summary Tables/Additional Information.*	ESD-WE
IND 3.D	Conduct and document inspections for which a referral or complaint was received within five days of complaint received and second inspection within one year.	Ongoing	Done FY 08-09 and ongoing. See 2.D: *IND Summary Tables/Additional Information.*	ESD-WE
IND 3.E	Develop a database to track the inspection information from the inspector facility inspection report.	Done FY 02-03	Done FY 02-03.	ESD-WE
IND 3.E.1	Implement new Environmental Enforcement Data Management System.	Done FY 03-04	Done FY 03-04.	ESD-WE
IND 3.E.2	Prepare draft data inspection tables to review data trends and to facilitate timely evaluation of the data.	Annually, Q3	Done FY 08-09.	ESD-WE
IND 3.F	Maintain database to track inspection information from inspector facility inspection report and to include new industrial program categories.	Ongoing	Done FY 08-09.	ESD-WE
IND 3.G	For B, C, D, and E, collect information during inspections on the potential for stormwater pollution at City Regulated facilities in order to determine the appropriate inspection frequency for the various facilities.	Ongoing	Done FY 08-09 and ongoing. AOCs determine inspection frequency. AOCs are identified during inspection.	ESD-WE
IND 3.H	Develop an inspection frequency plan to track frequency of inspections. Implement and update, as needed, the inspection frequency plan.	Development: Done FY 01-02 Ongoing, Updated As Needed	Done FY 01-02 and ongoing. AOCs determine inspection frequency. AOCs are identified during inspection.	ESD-WE
IND 4	**Compliance** The City of San José will conduct industrial/commercial inspections to determine the existence of discharges or potential discharges which are illegal under local ordinances. The facility operator will be notified of observed areas of concern to be corrected and/or if official action on violations is necessary, it will take place under local enforcement procedures.			
IND 4.A	Document facilities that have enforcement actions and the type of enforcement actions conducted for the existence of discharges or threatened discharges that are illegal under local ordinances.	Ongoing	Done FY 08-09 and ongoing. See 2.D: *IND Summary Tables/Additional Information.*	ESD-WE

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 08-09 STATUS	RESPONSIBLE PARTY
IND 5	**Training** The City of San José will ensure that industrial/commercial inspectors are adequately trained in inspection procedures, documentation, and enforcement related to stormwater pollution prevention.			
IND 5.A	Conduct annual training for IND inspectors.	Annually Q1	Done FY 08-09. See 13.D: *Municipal Employee Training Summary* for details.	ESD-WE
IND 5.B	Maintain a training plan and provide and document on-the-job training and other training opportunities such as industrial/commercial inspection workshops.	Ongoing	Done FY 08-09 and ongoing. See 13.D: *Municipal Employee Training Summary* for details.	ESD-WE
IND 5.C	Review inspection training protocols to identify new training opportunities, approaches, and materials.	Annually	Done FY 08-09. See 13.D: *Municipal Employee Training Summary* for details.	ESD-WE
IND 6	**Outreach** The City of San José will help develop and distribute outreach and technology transfer material containing applicable control measures and/or BMPs to industrial/commercial facility operators responsible for IND activities.			
IND 6.A	Identify and list existing outreach and technology transfer material.	Annually	Done FY 08-09. Outreach materials are listed in Appendix A of the City's URMP.	ESD-UR
IND 6.B	Distribute applicable outreach and technology transfer material to industrial/commercial facility operators. Document to the Water Board that outreach and technology transfer material and/or BMPs have been distributed, as needed, to industrial/commercial facility operators.	Distribution: Ongoing See PIP Program Element in Annual Report	Done FY 08-09 and ongoing. See 14.D: *Outreach Materials Distributed* for a count of outreach and technology transfer materials distributed as part of Inspection activities.	ESD-UR
IND 6.C	Determine usefulness of outreach and technology transfer materials by obtaining feedback from industrial/commercial facilities. Obtain feedback from inspectors about the effectiveness of existing outreach and technology transfer material and develop and/or modify existing outreach material.	As Needed	Done FY 08-09. Feedback from inspectors collected during regular staff meetings. Needs are identified and prioritized as part of outreach program implementation.	ESD-UR
IND 7	**NOI Filers Effectiveness Evaluation** The City of San José's Watershed Enforcement staff will review and evaluate the effectiveness of its inspections procedures and database tracking system.			
IND 7.A	Document and evaluate the effectiveness of NOI Filers inspections procedures.	Annually	Done FY 08-09. NOI filers are inspected in a similar manner as all facilities. These procedures were updated in FY 04-05 to include a better mechanism for determining whether a facility needs to file for an NOI if conditional.	ESD-WE
IND 7.B	Document and evaluate the effectiveness of the NOI Filers database tracking system.	Annually	Done FY 08-09. The NOI filer database tracking system identifies whether facilities are conditional or not and includes a special button for indicating if there is any	ESD-WE

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 08-09 STATUS	RESPONSIBLE PARTY
			potential for exposure.	
IND 7.C	Document and evaluate what worked well and what needs improvement.	Annually	Done FY 08-09. See 2.D: *IND Summary Tables/Additional Information.*	ESD-WE

2.B IND Program Evaluation

The goal of the IND Program is to protect the storm sewer system from polluted discharges originating from commercial and industrial facilities. Facilities are selected for inspection and prioritized based on their potential to discharge polluted runoff and inspected using the protocols of the City's Enforcement Response Plan. The City has two sections of environmental inspectors who perform stormwater inspections: the Watershed Enforcement and Fats, Oils, and Grease (FOG) sections. The City increased the number of facilities inspected by 8 percent over last year, inspecting more than 4,900 businesses in San José in FY 08-09.

Facilities Subject to Inspection

The total inventory of facilities in the City subject to inspection in FY 08-09 continues to grow, increasing from 13,034 in FY 07-08 to 15,404 in FY 08-09. These numbers are identified at the end of the fiscal year and include new businesses imported into the database for the next year. Approximately 3,100 facilities are no longer subject to inspection as of the end of FY 08-09, due to facilities going out of business and by determination through inspection that no future inspections are required based on no areas of concern identified and no potential for exposure from those facilities. Approximately 5,300 new facilities subject to inspection will be added into the database for FY 09-10, and the City will target inspection resources at facilities with the greatest potential exposure.

Education and Enforcement

While there was only an eight percent increase in facilities inspected, City Inspectors completed over thirty percent more enforcement actions. This increase is due in part to a larger number of initial inspections at new food service establishments (FSEs) undertaken by the FOG section. New FSEs are prone to have more AOCs identified, and the City utilizes both education and enforcement tools to bring these facilities into compliance and to protect stormwater quality.

Education is the first step in the City's Enforcement Response Plan. City Inspectors distributed 13,635 pieces of education materials during facility inspections, which is an eight percent increase over last fiscal year. This coincides with the eight percent increase in facilities inspected in the fiscal year.

In addition to distributing materials, City staff hosted a training workshop and gave presentations on watershed enforcement issues at various venues in FY 08-09. The City held a workshop for FSEs in November 2008 and gave multiple presentations at the California Water Environment Association's Pretreatment, Pollution Prevention, and Stormwater (CWEA P3S) conference in Monterey, CA, and the CWEA Annual conference in Palm Springs, CA.

Fats, Oils and Grease (FOG) Inspection Program

The City's FOG section has staff dedicated to inspecting grease-generating FSEs to comply with both stormwater and sanitary NPDES permits, as well as the Sewer System Management Plan (SSMP) created in response to Board requirements issued under Waste Discharge Regulations. This report details work done to comply with the NPDES Stormwater Permit.

The FOG section nearly doubled its cases, inspecting 2,300 FSEs in San José, compared to approximately 1,300 last fiscal year. In addition to regular FSE inspections, FOG inspectors conducted 10 investigations involving 15 facilities that were potential contributors to partial sewer blockages or sanitary sewer overflows. These investigations were done at the request of the City's Department of Transportation sewer crews, or via ICID complaints at food service facilities. These investigations identified 54 AOCs. The resolution of partial sewer blockages and sanitary sewer overflows ensures that wastewater does not enter the storm sewer system.

ESD staff conducted 189 plan check reviews for FSEs in FY 08-09. In the plan check role, staff reviewed plans of proposed food service facilities submitted to the Building Division of the Planning, Building and Code Enforcement Department. ESD staff checked the plans to determine the size and type of grease control device required for the facility to capture FOG and help prevent sewer blockages and overflows which could cause pollutants to enter the storm sewer system.

The City created new and updated previous ordinances related to FSEs and FOG control, which took effect in June 2009. These ordinances apply to work done under the auspices of the WPCP's NPDES permit and the SSMP; preventing problems in the sanitary sewer system keeps them from becoming problems for the storm sewer system. These new and updated ordinances include: updated definitions in the ordinances, specific cleaning requirements, design criteria for grease interceptors, prohibition of discharging yellow grease to the sanitary sewer, and specific requirements for on-site records retention.

2.C IND Response to Water Board Comments

No comments received from Water Board on this Program Element.

2.D IND Summary Tables / Additional Information

IND Summary Tables

Facility Inspection Totals	08-09	07-08	06-07	05-06	04-05	Description of item
Facilities Subject to Inspection	15,404	13,034	8,936	9,229	6,164	All facilities in the database at the end of the fiscal year that require inspections to meet the performance standard, whether or not they are inspected in the reporting year. This includes both city-regulated and GIASP facilities, as well as new facilities imported for inspection in future fiscal years; and excludes facilities that the City has determined are not subject to future inspection based on a determination that there was no exposure, incorrect SIC, closed, etc.
Facilities Scheduled for Inspection in reporting year	4,885	4,538	3,929	3,490	3,020	All facilities that were determined to need inspection by existing schedule date and imports from the business license database, new NOI filers per State listing for reporting year.
Facilities Inspected in FY 08-09	4,912	4,551	3,930	3,506	3,029	All facilities subject to inspection that were inspected. Also described as number of cases.
Other City Regulated Facilities	69	82	67	85	51	These facilities have had an Illicit Connection/Illegal Dumping complaint filed against them, so now are scheduled to receive an industrial/commercial inspection as per IND 3D.
Facilities Scheduled for Inspection next FY	5,450	4,550	4,469	4,000	3,237	Facilities scheduled for inspection in the following FY. Includes new facilities, facilities deferred from previous FYs, reinspections per the Inspection Frequency Schedule detailed in IND 3, and facilities that have had an ICID complaint filled within the last FY per IND 3D.

GIASP Implementation Status

GIASP Implementation	08-09	07-08	06-07	05-06	04-05	Description of item
Board Referrals						
New NOI Filers	12	10	14	13	4	Total industrial facilities in San José with new NOI filed according to Water Board Database as of July 2008.

GIASP Implementation	08-09	07-08	06-07	05-06	04-05	Description of item
New NOI Filers Inspected	10	10	14	7	4	Of the facilities referred to the City by the Water Board, the number inspected during FY 08-09. Two facilities were inspected in FY 07-08, and are now inspected per the Inspection Frequency Schedule detailed in IND 3.
Inspections						
Potential NOI Facilities	1,092	902	864	840	746	Of the facilities scheduled for inspection during the FY, the number that may be subject to GIASP provisions
Have filed	123	64	45	52	96	Of the facilities inspected, the number that have filed.
SWPPP or SWMP on-site	134	81	82	81	87	Per IND 1B and IND 2C, the number of facilities having a SWPPP or SWMP on-site. Facilities may have a formal SWPPP or informal plan, even though they aren't required to file NOI.
Need to file	62	24	35	59	90	Of the facilities inspected, the number determined to need to file in accordance with the GIASP. These facilities are listed in 2.D: *Companies Requiring NOI Based on SIC But Have Not Filed* and 2.D: *Companies Requiring NOI Based on Exposure But Have Not Filed.*
Do Not Need to File (No Permit Required)	542	635	508	451	560	All facilities that were determined to need an inspection per the GIASP with findings of no NOI required.
Closed/Moved Facilities	365	179	276	278	248	NOI-potential facilities no longer in operation.

Enforcement Actions Summary

Total Enforcement Actions Taken	08-09	07-08	06-07	05-06	04-05	Description of item
AOCs	2,927	2,254	2,263	1,821	2,591	Area of concern with a compliance date and any enforcement action activity
BMPs	13,635	12,684	10,655	8,912	6,890	Number of BMPs issued as part of Enforcement
Verbal Warning	1,821	1,384	1,402	1,070	1,280	Verbal warning providing information for corrective actions. Issued as Inspection Report to facilities
Official Warning Notice	542	440	500	366	384	Written letter providing information for corrective actions (In San José this is an Official Warning Notice, the second level of enforcement.)
Administrative Action	13	18	9	0	15	Administrative actions, including fines (In San José this is an Administrative Citation.)
Criminal Action	0	0	0	0	0	Legal actions
Referral for Enforcement	0	0	0	0	0	Refer case to agency with enforcement powers

Highest Enforcement Action Taken	08-09	07-08	06-07	05-06	04-05	Description of item
No Enforcement Action	1,860	1,243	1,438	1,169	703	Cases with no Enforcement Action taken (e.g.: no AOCs, out of business, etc.)
BMPs Distributed	1,544	2,126	1,216	1,342	758	Cases with BMPs Distributed as the highest Enforcement Action to achieve compliance

Highest Enforcement Action Taken	08-09	07-08	06-07	05-06	04-05	Description of item
Verbal Warning	1,064	826	858	686	1,013	Cases with Verbal Notice as the highest Enforcement Action to achieve compliance
Warning Notice	431	341	410	306	589	Cases with Warning Notice as the highest Enforcement Action to achieve compliance
Administrative Citation	13	15	8	3	0	Cases with Administrative Citation as the h ighest Enforcement Action to achieve compliance
Criminal Action	0	0	0	0	0	Cases with Criminal Action as the highest Enforcement Action to achieve compliance
Total	**4,912**	**4,551**	**3,930**	**3,506**	**3,063**	All facilities subject to inspection that were inspected. Also described as number of cases.

IND Facility Categories for the City of San José

(Developed by AHTG to use for Program-wide Reporting, September 7, 2001 Memo's 17 categories + 4 City categories)

Cat	Program Category	Current AHTG Municipal Category	Scheduled	Actual
1	Automotive	Automotive sales, engine and body repair, gas stations, car washes, parking, vehicle services	783	792
2	Food Service	Eating and drinking establishments, including cafeterias, delis, bakeries, mobile food	2,285	2,262
3	Paint Facilities	Manufacturing and retailing	4	4
4	Dry Cleaners	Dry cleaners	0	0
5	Cleaning Services	Mobile washers, building cleaning, carpet cleaning	42	44
6	Pesticide Facilities	Manufacturing and retailing; pesticide applicators	11	11
7	Machine Shops	Industrial machinery and equipment	116	119
8	Metal Manufacturing	Metal fabricating, finishing, plating, metal work (40 CFR 413, 433)	125	129
9	Electric/Electrical Components	Manufacturing (40 CFR 469)	247	254
10	Construction/ Building	Retail, trade contractors, construction, landscape and garden businesses	328	328
11	Local Transit; Highway Transport	Electric, Gas and Sanitary Services, Trucking Industries	225	229
12	Recycling yards	Assembling, breaking up, sorting and wholesale distribution of scrap and waste materials. This includes auto wreckers engaged in dismantling automobiles for scrap.	21	25
13	Auto Dismantlers	Dismantling motor vehicles for the purpose of selling parts.	15	15
14	Concrete/Stone/Clay Products	Manufacturing cement, structural clay products, pottery, concrete and gypsum products, cut stone, abrasive and asbestos products, and other products from materials taken principally from the earth in the form of stone, clay and sand.	63	65
15	Corporation Yards	PG&E, Caltrans, School bus, VTA, Municipal	0	0
16	Landfills	Dumps; Garbage collecting, destroying and processing; Landfill; Rubbish collection and disposal.	13	14
17	Wood Furniture and Other Products	Manufacturing finished articles made entirely or mainly of wood or related materials.	39	42
18	Chemical Manufacturing	Manufacturing/producing basic chemicals, chemical products to be used in further manufacture (synthetic fibers, etc.) and finished chemical products to be used for ultimate consumption or as materials or supplies in other industries (such as cosmetics, soaps, fertilizers)	5	5
19	Misc. Manufacturing	Caskets, Furniture, Glass, Jewelry/Precious Metal, Manufacturing Industries-NEC, Medical, Office and Store Fixtures, Paper, Petroleum and Coal, Pharmaceuticals, Rubber and Plastics, Signs, Toys and Sports	164	166
20	Other	Other includes: Air Conditioning Services, Amusement Parks, Chiropractors, Commercial Areas, Florist, Hazardous Waste, Laboratories, Laundries, Medical and Dental Labs, Miscellaneous, Petroleum Pipelines, Petroleum Refining, Photographic/Printing, Property Management, Radiologists, Steam Electric Power Generation (per permit), Storage, Veterinarians, Welding/Iron Works, Welding Repair, Winery, and Underground Storage Tanks and unspecified SIC Code.	394	402
21	Airport		5	6

3. NRD: New and Redevelopment

3.A NRD Work Plan Self Evaluation Matrix

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 08-09 STATUS	RESPONSIBLE PARTY
NRD 1	**Legal Authority** The City of San José will have adequate legal authority to implement new development control measures, including all applicable requirements of Provision C.3, as part of its development plan review and approval procedures and other appropriate new development and redevelopment permitting procedures (Provision C.3.a.i).			
NRD 1.A	Revise Municipal Code to ensure adequate legal authority to implement new development control measures (C.3.a.i).	As Needed	The City currently has adequate legal authority to implement new development control measures.	PBCE, ESD, PW
NRD 2	**Guidance to Developers** The City will provide developers with information and guidance materials on site design guidelines, building permit requirements, and BMPs for stormwater pollution prevention, as appropriate for the type of project and location.			
NRD 2.A.1	Draft necessary revisions to Guidance Manual on Selection of Stormwater Quality Control Measures to allow incorporation of hydraulic sizing design criteria and provide to developers.	Done FY 02-03 Ongoing	Done FY 02-03 and ongoing. Beginning in FY 06-07 the City contracted with RBF Consulting to develop a C.3 Stormwater Control Plan Design Guidelines Manual. The intent of this manual is to provide more detailed guidance to developers, project managers, and project engineers working in San José's jurisdiction on the selection, design, implementation, and maintenance of stormwater treatment BMPs. Once the MRP is approved, this manual will be revised and distributed for use.	PBCE, ESD, PW, RDA
NRD 2.A.2	Refine Guidance Manual on Selection of Stormwater Quality Control Measures to incorporate HMP measures, as necessary.	Done FY 05-06	Done FY 05-06.	PBCE, ESD, PW, RDA, Program
NRD 2.B	Provide development community with revised information and guidance materials concerning any adopted on site design, building permit requirements, hydraulic sizing design criteria and HMP criteria, and maintenance requirements for BMPs for stormwater treatment measures.	Done FY 02-03 Ongoing	Done FY 02-03 and ongoing. In FY 08-09, revised information was provided by 1) printed status bulletin information sheets distributed by e-mail to the development community, as handouts at public information counter and at Developer's Roundtable Meetings; and 2) inviting the developement community to attend Program workshops and City sponsored Developers' Roundtable meetings. In addition, PBCE revised and updated stormwater requirements and data collection on all its applications.	PBCE, ESD, PW, RDA
NRD 2.B.1	Coordinate w/development community on proposed hydraulic sizing criteria for structural stormwater	Done FY 02-03	Done FY 02-03. See *NRD 2.B.* above.	PBCE, ESD, PW, RDA

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 08-09 STATUS	RESPONSIBLE PARTY
	treatment measures, HMP criteria and any proposed revisions to Guidance Manual and policy through workshops and regular meetings.			
NRD 2.B.2	Update guidance material regarding maintenance responsibilities for any HMP measures.	Done FY 05-06	Done FY 05-06.	PBCE, ESD, PW, RDA, Program
NRD 3	**CEQA Requirements** The City will ensure that environmental documents required for those projects that fall under CEQA and NEPA review address both significant and cumulative stormwater quality impacts during the life of the project, and relevant permit requirements. These documents include EIRs, negative declarations and initial study checklists (C.3.m).			
NRD 3.A	Review and evaluate the City's Environmental Review procedures to improve the review for water quality impacts and identification of mitigation measures. (Provision C.3.m.)	Done FY 02-03	Done FY 02-03.	PBCE, ESD, PW, RDA
NRD 3.A.1	Identify areas where new or additional water quality review processes and related documents or checklist questions are needed and propose schedule for revision.	Done FY 02-03	Done FY 02-03. See NRD 3.A.	PBCE, ESD, PW, RDA
NRD 3.A.2	Refine and update areas where new or additional water quality related mitigation measures may be needed.	Done FY 05-06	Done FY 05-06.	PBCE, ESD, PW, RDA
NRD 3.B.	Report on revisions made to environmental review process.	Done FY 02-03	Done FY 02-03. See NRD 3.A.	PBCE, ESD, PW, RDA
NRD 4	**Project Mitigation Measures and Design Requirements** The City will encourage developers of all projects subject to design review under its development plan review and approval procedures to consider incorporating appropriate source control and site design measure that minimize stormwater pollutant discharges to the maximum extent practicable.			
NRD 4.A	Revise current Policy on Post-Construction Urban Runoff Management as necessary to incorporate minimum BMP requirements for all projects.	Done FY 03-04 Ongoing	Done FY 03-04 and FY 07-08. Ongoing.	PBCE, ESD, PW, RDA
NRD 4.B.	Review and modify development permit approval procedures for adopted revisions as necessary.	Done FY 03-04	Done FY 03-04.	PBCE, ESD, PW, RDA
NRD 4.C	Review the design standards and guidance for opportunities to make revisions that would result in reduced impacts to water quality and summarize how they were incorporated into approval procedures.	Done FY 03-04	Done FY 03-04.	PBCE, ESD, PW, RDA
NRD 4.D	Review the existing source control measures contained in site design standards, guidance documents and conditions of approval for opportunities to limit	Done FY 03-04	Done FY 03-04 in coordination with the Program.	PBCE, ESD, PW, RDA

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 08-09 STATUS	RESPONSIBLE PARTY
	stormwater pollution. (Provision C.3.k.)			
NRD 4.E	Review General Plan and revise as necessary to incorporate water quality and watershed protection principles and policies, and summarize revisions made.	Done FY 02-03 Ongoing	Done FY 03-04 and ongoing. In FY 08-09, the City continued the revision process for its General Plan. Titled "Envision San José 2040," the update will incorporate environmental protection and sustainability into all the elements of the General Plan.	PBCE
NRD 4.F	Review the design standards and guidance for opportunities to make revisions as necessary that would result in reduced impacts to water quality and summarize how they were incorporated into approval procedures. Such revisions are listed in Provision C.3.j.	Done FY 03-04	Done FY 03-04.	PBCE, ESD, PW, RDA
NRD 4.F.1	Identify and document existing site design standards and guidance documents and policies.	Done FY 03-04	Done FY 03-04.	PBCE, ESD, PW, RDA
NRD 4.F.2	Revise Site Design Measures and Standards, as necessary.	Done FY 03-04 Ongoing	Done FY 03-04 and ongoing. In FY 08-09, Council amended Title 17 of the San José Municipal Code to add a new Chapter 17.84 *Green Building Regulations for Private Development* to implement Council Policy 6-32, which establishes green building standards for private development.	PBCE, ESD, PW, RDA
NRD 5	**Group 1, 2 and HMP Project Requirements** On October 15, 2003, the City began phased implementation of hydraulically-sized stormwater treatment measures in conformance with Policy 6-29, beginning with projects that created or replaced one acre or more of impervious surface area and were considered Land Uses of Concern. On February 15, 2005, all projects that created or replaced one acre or more of impervious surface were required to hydraulically size stormwater treatment measures. On May 17, 2005, the threshold changed to include all projects that created or replaced 10,000 square feet of impervious surface and were a Land Use of Concern. Effective August 15, 2006, all projects that created or replaced 10,000 square feet or more of impervious surface were required to include hydraulically-sized stormwater treatment measures in each project. Since October 18, 2005, all projects that meet the criteria described in Policy 8-14 have been required to manage increases in runoff flow, volume, and duration. The following is a brief summary of the Best Management Practices that are required in all development projects: • Site design shall include measures to minimize impervious land coverage, maximize infiltration (where appropriate and designed to protect groundwater quality), and provide detention or retention as part of landscaping where feasible (C3.b.i and C.3.j); • Source controls shall be required to limit pollution generation, discharge, and runoff as appropriate (C.3.k), including measures to discourage pesticide use (C.9.d.ii); • Stormwater treatment measures shall be designed in accordance with the numeric design criteria in Policy 6-29 (Provision C.3.d); and • Increases in runoff flow, volume and duration shall be managed in accordance with Policy 8-14 (Provision C.3.f).			
NRD 5.A.1	Propose revisions to current Policy 6-29 on Post-	Done FY 03-04	Done FY 03-04 and FY 06-07.	PBCE, ESD, PW, RDA

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 08-09 STATUS	RESPONSIBLE PARTY
	Construction Urban Runoff Management as necessary to incorporate hydraulic sizing design criteria.	Ongoing		
NRD 5.A.2	Revise current Policy 6-29 on Post-Construction Urban Runoff Management as necessary to incorporate hydraulic sizing design criteria.	Done FY 03-04 Ongoing	Done FY 03-04.	PBCE, ESD, PW, RDA
NRD 5.A.3	Revise policy as needed for Group 2 implementation	Done FY 04-05	Done FY 04-05 and FY 06-07.	PBCE, ESD, PW, RDA
NRD 5.A.4	Revise policy as needed for HMP implementation.	Done FY 05-06 & FY 06-07	Done FY 05-06.	PBCE, ESD, PW, RDA
NRD 5.B	Develop a list of Annual Reporting requirements from Provision C.3 Design data tracking needs and protocols.	Done FY 02-03	Done FY 02-03.	PBCE, ESD, PW, RDA
NRD 5.B.1	Compile a list of new development and redevelopment projects by name, type of project, site acreage or square footage, square footage of new impervious surface, treatment BMPs and numeric sizing criteria used for applicable projects. Also, the source control measures required and pesticide reduction measures.	Annually	Done FY 08-09. See Section 3.D: *Applicable Projects Reviewed and/or Approved During July 1, 2008 – June 30, 2009.*	PBCE, ESD, PW, RDA
NRD 5.B.2	Update existing data collection software for private projects to enable tracking of all projects with treatment or HMP measures.	Done FY 07-08	Continued progress during FY 08-09. Final changes to database will be made after MRP is approved.	PBCE, ESD, PW, RDA
NRD 5.C	Revise and update permitted alternatives to numeric sizing through Alternative Measures Program in Policy 6-29.	Done FY 04-05	Done FY 04-05.	PBCE, ESD, PW, RDA
NRD 5.C.1	Report to City Council on Alternative Measures Program revisions in Policy 6-29. (Provision C.3.g.)	Done FY 04-05	Done FY 04-05.	PBCE, ESD, PW, RDA
NRD 5.C.2	Track name and location of projects in the Alternative Measures Program, project type and size, percent impervious surface, reason for granting waiver, terms of waiver, equivalent benefit provided, alternative treatment project or regional project receiving the benefit and date of completion of the alternative treatment project or regional project (Provision C.3.g).	Annually	None submitted in FY 08-09.	PBCE, ESD, PW, RDA
NRD 5.C.3	Report to City Council on projects approved with numeric sizing alternatives through Alternative Measures Program. (Provision C.3.g.)	Annually	N/A in FY 08-09.	PBCE, ESD, PW, RDA
NRD 5.D	Draft post-construction treatment BMP certification	Done FY 02-03	Done FY 02-03.	PBCE, ESD, PW, RDA

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 08-09 STATUS	RESPONSIBLE PARTY
	procedures. (Provision C.3.h)			
NRD 5.D.1	Track name and location of projects subject to certification (Provision C.3.h)	Annually	Done FY 08-09. See Section 3.D: *Applicable Projects Reviewed and/or Approved During July 1, 2007 – June 30, 2008.*	PBCE, ESD, PW, RDA
NRD 5.E	Participate on SCVURPPP's Hydromodification Management Plan work group and develop procedures for limiting peak stormwater runoff discharge rates from development projects. (Provision C.3.f.)	Done FY 04-05 Ongoing	Done FY 04-05 and ongoing.	PBCE, ESD, PW, RDA
NRD 5.F.1	Review and modify development permit approval procedures and standard operating procedures as necessary to incorporate requirements for:			PBCE, ESD, PW, RDA
NRD 5.F.1	a. Group 1	Done FY 03-04	Done FY 03-04.	
NRD 5.F.1	b. Group 2	Done FY 04-05	Done FY 04-05.	
NRD 5.F.1	c. HMP	Done FY 05-06	Done FY 05-06.	
NRD 5.F.2	Update and refine criteria and checklist to aid Department of Planning, Building & Code Enforcement and Department of Public Works planners and engineers in determining whether a development project should be required to incorporate post-construction treatment control measures and their related operation and maintenance requirements.			PBCE, ESD, PW, RDA
NRD 5.F.2	a. Group 1	Done FY 03-04	Done FY 03-04.	
NRD 5.F.2	b. Group 2	Done FY 04-05	Done FY 04-05.	
NRD 5.F.2	c. HMP	Done FY 05-06	Done FY 05-06.	
NRD 5.F.3	Update and refine standard conditions of approval as necessary to ensure proper selection, design of and installation of structural stormwater treatment measures per Provision C.3.b., c., d., as necessary.	Done FY 02-03	Done FY 02-03.	PBCE, ESD, PW, RDA
NRD 5.F.3	a. Group 1	Done FY 03-04	Done FY 03-04.	
NRD 5.F.3	b. Group 2	Done FY 04-05	Done FY 04-05.	
NRD 5.F.3	c. HMP	Done FY 05-06	Done FY 05-06.	
NRD 5.G	Develop and propose enhanced reporting format for documenting use of pesticide reduction measures at development sites. (Provision C.3.n. & C.9.ii.)	Done FY 02-03	Done FY 02-03.	PBCE, ESD, PW, RDA
NRD 5.G.1	Based on City's Pesticide Management Plan, establish criteria for tracking percentage of new development projects for which pesticide reduction measures were required and begin tracking. (Provision C.3.n. & C.9.d.ii)	Done FY 03-04 Ongoing	Done FY 08-09 and ongoing. See 3.D*: NRD Summary Tables / Additional Information.*	PBCE, ESD, PW, RDA

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 08-09 STATUS	RESPONSIBLE PARTY
NRD 5.h	Implement any new adopted development conditions of approval, and procedures to developments with significant stormwater pollution potential. (Provision C.3.b.)	Done FY 02-03	Done FY 02-03.	PBCE, ESD, PW, RDA
NRD 6	**Developer Conformance with State Requirements** The City will require developers of projects that disturb a land area of one acre or more to demonstrate conformance with the State General Construction Activity Storm Water Permit including filing of NOI, development of a SWPPP, et al.			
NRD 6.A	Include as condition of approval for projects that disturb a land area of one acre or more, a requirement to demonstrate coverage under the State General Construction Activity Storm Water Permit.	Done FY 02-03	Done FY 02-03.	PBCE, PW, RDA
NRD 6.B	Track the projects that contained above condition of approval.	Done FY 02-03	Done FY 02-03. See CON Program Element in Annual Report.	PBCE, PW, RDA
NRD 7	**Developer Erosion Control Plans** The City will require developers of projects with potential for significant erosion and planned construction activity during the wet season to prepare and implement an effective erosion and/or sediment control plan or similar document prior to the start of the wet season.			
NRD 7.A	Include as a condition of approval for applicable projects a requirement to prepare and implement an erosion and sediment control plan.	Done FY 02-03	Done FY 02-03.	PBCE, PW, RDA
NRD 7.B	Track the projects that contained above condition of approval.	Done FY 02-03	Done FY 02-03. See CON Program Element in Annual Report.	PBCE, PW, RDA
NRD 8	**Operation and Maintenance for Structural Stormwater Controls** The City will implement an Operations and Maintenance (O&M) verification program that includes (C.3.e): • Compiling a list of private and public properties and responsible operators for all stormwater treatment measures; • Inspecting a subset of prioritized treatment measures for appropriate O&M, on an annual basis, with appropriate follow-up and correction; • Requiring legally enforceable agreements or other mechanisms assigning responsibility for O&M of treatment measures.			
NRD 8.A	Work with SCVURPPP to develop guidance for implementing O&M Program.	Done FY 02-03	Done FY 02-03.	PBCE, ESD, PW, RDA
NRD 8.B.1.a	Draft summary of details of operation and maintenance verification program: organizational structure, evaluation, proposed improvements, inspections and follow-up, including criteria for setting priorities. (Provision C.3.e.)	Done FY 03-04	Done FY 03-04.	PBCE, ESD, PW, RDA

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 08-09 STATUS	RESPONSIBLE PARTY
NRD 8.B.1.b	Conduct pilot inspection program to inspect treatment BMPs that were constructed prior to numeric sizing requirements. The intention of the pilot program is to assess workload impacts, data tracking and collection methods, and funding for O&M programs and to use this information to revise the O&M program.	Done FY 05-06 Ongoing	Done FY 05-06 and ongoing. Pilot is complete and work has been incorporated into overall BMP O&M Verification Program.	ESD
NRD.8.B.2	Revise and update draft summary of details of operation and maintenance verification program: organizational structure, evaluation, proposed improvements, inspections and follow-up, including criteria for setting priorities as necessary. (Provision C.3.e.)	Done FY 05-06	Done FY 05-06.	PBCE, ESD, PW, RDA
NRD 8.C.1	Include as a condition of approval a requirement that developers of projects that include installation of permanent structural stormwater controls are required to establish and provide proof of operation and maintenance of such structural controls.	Done FY 03-04	Done FY 03-04.	PBCE, ESD, PW, RDA
NRD 8.C.2	Revise and update condition of approval requirement that developers of projects that include installation of permanent structural stormwater controls are required to establish and provide proof of operation and maintenance of such structural controls as necessary.	Done FY 05-06 Ongoing	Done FY 05-06 and FY 07-08. Ongoing.	PBCE, ESD, PW, RDA
NRD 8.C.3	Develop model permit conditions with BMP fact sheets to include in use permits where appropriate.	Done FY 02-03	Done FY 02-03. In coordination with the Program.	PBCE, ESD, PW, RDA
NRD 8.C.4	Compile a list of projects and responsible operators subject to C.3.e. provision.	Done FY 03-04 Annually	Done FY 03-04 and annually.	PBCE, ESD, PW, RDA
NRD 8.D	Track and compile a list of priority properties inspected and inspection results. (Provision C.3.e.iii.)	Done FY 03-04 Annually	Done FY 03-04 and annually.	PBCE, ESD, PW, RDA
NRD 8.D.1	Determine criteria for setting priorities for inspection of structural stormwater treatment measures and inspection frequency	Done FY 02-03	Done FY 02-03.	PBCE, ESD, PW, RDA
NRD 8.D.2	Update and revise criteria for setting priorities for inspection of structural stormwater treatment measures and inspection frequency as necessary.	Done FY 05-06	Done FY 05-06.	PBCE, ESD, PW, RDA
NRD 8.D.3	Develop local inspection program for verification of proper O&M.	Done FY 02-03	Done FY 02-03.	PBCE, ESD, PW, RDA

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 08-09 STATUS	RESPONSIBLE PARTY
NRD 8.D.4	Update and revise local inspection program for verification of proper O&M as necessary.	Done FY 05-06	Done FY 05-06.	PBCE, ESD, PW, RDA
NRD 8.E.	Update inspection software to track and schedule inspections for the number of sites that installed treatment and/or HMP measures.	FY 06-07 Ongoing	Continued progress during FY 08-09. Finalization of EEDMS software updates to be completed following MRP adoption.	ESD-WE
NRD 9	**Applicability to Public Projects** The City will ensure municipal capital improvement projects include stormwater quality control measures during and after construction, appropriate for each project, and that contractors comply with stormwater quality control requirements during construction activities and maintenance activities.			
NRD 9.A	Develop and implement a process to ensure that municipal capital improvement projects install structural stormwater quality control measures as necessary.	Done FY 02-03 Ongoing	Done FY 02-03 and ongoing. In FY 08-09, ESD Urban Runoff continued to review and provide input regarding the installation of stormwater quality control measures on municipal capital improvement projects (CIP).	PBCE, ESD, PW, RDA
NRD 9.A.1	Participate on SCVURPPP work group tasked with developing a technical guidance document for use by municipal staff to ensure that the document includes standard specifications and details, sizing methodologies, and model conditions of approval acceptable for use in City projects as necessary. (Provision C.3.b. & d.)	Done FY 02-03	Done FY 02-03.	PBCE, ESD, PW, RDA
NRD 9.A.2	Review and revise Redevelopment Agency Project Request for Proposal procedures as necessary to comply with revised Provision C.3. requirements. (Provision C.3.c.)	Done FY 03-04	Done FY 03-04.	ESD,PBCE, RDA
NRD 9.A.3	Review and Revise Public Works Capital Improvement Project approval procedures and Road Improvement Project approval procedures as necessary to comply with revised Provision C.3. requirements. (Provision C.3.c.)	Done FY 02-03	Done FY 02-03.	PBCE, ESD, PW, RDA
NRD 9.B	Review, evaluate, and modify the procedures, as necessary.	Done FY 03-04	Done FY 03-04.	PBCE, ESD, PW, RDA
NRD 9.C	Begin tracking required data on public projects subject to Provision C.3. hydraulic sizing criteria requirements for Annual Report.	Done FY 03-04 Ongoing	Done FY 03-04 and ongoing.	PBCE, PW, RDA
NRD 9.C.1	Modify the existing data collection software for public projects to track new capitol improvement projects with stormwater treatment and/or HMP measures.	Done FY 07-08	Done FY 07-08. In FY 07-08, the City implemented a stormwater data tracking feature in the data collection software used by CIP project managers. Finalization of software updates to be completed following MRP	PW

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 08-09 STATUS	RESPONSIBLE PARTY
			adoption.	
NRD 9.D	Monitor development of City's Green Building program for opportunities to discourage architectural use of copper in development projects (Prov. C.9.a.) and to incorporate urban runoff considerations.	Done FY 02-03 Ongoing	Done FY 02-03 and ongoing. The City has several LEED accredited staff members who review projects and advise developers on Green Building materials and techniques, including discouraging architectural use of copper.	PBCE, ESD, PW, RDA
NRD 10	**City Staff Training** The City will provide training at least annually to its planning, building, and public works staff on planning procedures, policies, design guidelines, and BMPs for stormwater pollution prevention (C.3.a.vi).			
NRD 10.A	Provide training to Planning and Public Works staff on planning procedures, policies, design guidelines, and BMPs for stormwater pollution prevention. (Provision C.3.a.vi.)	Ongoing	Done FY 08-09 and ongoing. In FY 08-09, City staff met regularly to share information and resources on planning procedures, policies, design guidelines, and BMPs for stormwater pollution prevention. In addition, a variety of training events were conducted to educate staff on site design techniques, alternative materials, and treatment control measures. See 13.D: *Municipal Employee Training Summary* and 3.B: *NRD Program Evaluation* for details.	PBCE, ESD, PW, RDA
NRD 10.B	Provide training to Redevelopment Agency and Department of Transportation staff on planning procedures, policies, design guidelines, and BMPs for stormwater pollution prevention. (Provision C.3.a.vi.)	Ongoing	Done FY 08-09 and ongoing. In FY 08-09, City staff met regularly to share information and resources on planning procedures, policies, design guidelines, and BMPs for stormwater pollution prevention. In addition, several training events were conducted to educate staff on how to meet requirements by implementing stormwater pollution prevention strategies. See 13.D: *Municipal Employee Training Summary* and 3.B: *NRD Program Evaluation* for details.	PBCE, ESD, PW, RDA, DOT
NRD 10.C	Revise the training protocol to incorporate any newly adopted Provision C.3. permit requirements and related revised procedures.	As Needed	As needed. In coordination with the Program.	PBCE, ESD, PW, RDA
NRD 10.D	Train staff responsible for design review on pest-resistant landscaping techniques and model conditions of approval and the importance of minimizing pesticide use in runoff from development sites. (Provision C.3.n. and Provision C.9.d.ii)	Ongoing	Ongoing. Training for NRD 10.D will be provided within the first two quarters of FY 09-10.	PBCE, ESD, PW, RDA, DOT
NRD 11	**Development Plan Review and Approval Procedures Effectiveness Evaluation** The City of San José will review and evaluate the effectiveness of its development plan review and approval procedures.			

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 08-09 STATUS	RESPONSIBLE PARTY
NRD 11.A	Evaluate and incorporate any needed improvements in review and approval process.	Annually	Annually. See 3.B: *NRD Program Evaluation.*	PBCE, ESD, PW, RDA
NRD 11.B	Document and evaluate what worked well and what needs improvement.	Annually	Annually. See 3.B: *NRD Program Evaluation.*	PBCE, ESD, PW, RDA

3.B NRD Program Evaluation

The City continued to make considerable strides in implementing the NRD program in FY 08-09. Primarily due to the economic recession, the number of private NRD projects dropped from seventy-five in FY 07-08 to sixty-two in FY 08-09. The sixty-two projects were comprised of 17 residential, 37 non-residential (commercial or industrial), 7 mixed-use, and 1 public infrastructure project. Overall, this resulted in the approval of 5,149 housing units (including 320 affordable units), 951,990 square feet of commercial space, and 1,094,000 square feet of industrial/office space. Approximately 30 percent of all reportable private projects had a net reduction of impervious area, for a total of more than 670,500 square feet (15.39 acres). It is notable that out of the sixty-two projects, one large mixed-use project (Project Number PD08-001, Pepper Lane) made up almost 20 percent of the total new net impervious surface.

There was an approximately 40 percent decrease in the number of housing units approved in FY 08-09 from FY 07-08. Reportable residential projects for FY 08-09 included 4 low density (72 units averaging 2.38 Dwelling Units per Acre (DU/AC)), 13 high density (3,033 units averaging 61.16 DU/AC), and 7 mixed use projects (2,044 units averaging 45.75 DU/AC), for an overall average of 40.92 DU/AC. Consistent with the City's Smart Growth goals and policies, almost half of *all* reportable projects approved in FY 08-09 were located in Transit-Oriented Development (TOD) areas. Sixty-six percent of the residential units in reportable projects were located in TOD areas. Residential projects in TOD areas averaged 68 DU/AC. Among other benefits, Transit-Oriented Development helps to reduce the number of auto-related trips and air and water pollution associated with car travel.

The North San José Area Development Policy guides the ongoing growth and development of the North San José (NSJ) area. This primarily industrial area is home to many of the City's high-tech companies and is a very important employment center for the region. Previous NSJ policies and regulations have resulted in development patterns characterized by low-to-mid-rise office buildings, one- or two- story light manufacturing, and research and development facilities, all accompanied by large surface parking lots. The current NSJ Development Policy (adopted in 2005) encourages a higher density mix of commercial, industrial, and residential land uses. Fourteen projects approved in FY 08-09, comprising 2,888 new units of housing (averaging 70.81 DU/AC), 338,813 square feet of commercial space, and 1,088,000 square feet of office space were located within the NSJ Development Policy boundary (see North SJ Development Policy boundary on the Private Development Map). Development under the NSJ Development Policy continued to benefit water quality in FY 08-09 by locating jobs and housing together at higher densities, thereby reducing automobile trips and using land more efficiently. The projects approved in FY 08-09 in the NSJ Development Policy area yielded a net reduction of approximately 319,000 square feet (7.32 acres) of impervious surface area.

Implementing stormwater treatment and hydromodification controls on smaller, infill sites within the City's developed areas continued to present challenges. Nevertheless, over 50 percent of all projects approved in FY 08-09 used landscape-based treatment control measures. Projects relying solely on proprietary mechanical treatment devices were typically sites where the infrastructure footprint made sizing landscaped based treatment unfeasible, sites with high-water tables and/or clay soils, or where other site constraints (such as unusual topography or utility conflicts) precluded landscape-based treatment measures. Overall, development continued to use site design techniques to reduce impervious surfaces and use landscape-based treatment control measures.

Additional achievements discussed below include expansion of the C.3 O&M Verification Program, updates to the City's Municipal Code, continued training of City staff, continued coordination with the development community and City departments, and the receipt of two site design awards for exemplary development projects.

O&M Verification Program

The City conducted inspections of projects subject to provision C.3 of the Permit that completed construction in FY 08-09. The City also re-inspected projects that were classified as Land Uses of Concern or were flagged for reinspection during last year's O&M inspections due to performance and/or maintenance issues. City staff

inspected fourteen sites utilizing the Program's standard inspection data collection form. As stated in the FY 07-08 Annual Report, the increasing number of numerically-sized BMPs installed in San José has necessitated the need for additional resources and coordination among City departments to ensure appropriate installation, operation, and maintenance of BMPs. Changes to the City's Operation and Maintenance (O&M) Verification Program in FY 09-10 will focus on improving internal procedures to ensure that post-construction BMPs are correctly installed and property owners and/or managers are maintaining BMPs. See 3.D.: *BMP O&M Verification Program* and 3.D.: *BMP O&M Verification Program Map*.

Municipal Code Update

In June, 2009, the City Council amended the San José Municipal Code to establish green building standards for new private sector construction. The new ordinance (Ordinance No. 28622, *Green Building Regulations for Private Development*) implements the green building standards adopted by Council in October, 2008 through Council Policy 6-32. The City's green building standards advance the greenhouse gas reduction goal and other sustainable strategies outlined in San José's Green Vision, a ten-point strategy to make San José a sustainable city.

San José's green building standards will yield water quality benefits since the Leadership in Energy and Environmental Design (LEED) and Build it Green rating systems that are referenced offer points for stormwater management as part of each program's credit system. LEED's objective, for example, is to limit disruption of natural hydrology by encouraging projects to minimize impervious cover, increase on-site infiltration, and manage stormwater runoff through landscape-based measures.

Training

The City continues its commitment to educate staff and increase developers' awareness of C.3 numeric sizing treatment criteria and hydromodification measures. During FY 08-09, City staff attended and sponsored a wide variety of trainings related to NRD.

C.3 Post Construction Site Design Techniques and Operation and Maintenance

The City strives toward being a Smart Growth city that discourages sprawl and encourages effective and efficient development/redevelopment. Implementing site design techniques to reduce impervious surface, including the use of landscape-based treatment control measures, contributes towards the achievement of this broader goal. The City continues to emphasize landscape-based treatment control measures over proprietary mechanical units and staff recognizes the importance of training to help achieve these goals. A variety of trainings focusing on post-construction site design techniques were attended by staff from various departments. Additionally, FY 08-09 was the second year of implementing the O&M Verification Program, as described above. To support the continued development of the program, City staff attended trainings that focused on O&M and inspections of stormwater BMPs. Staff from the following departments attended the trainings:

- Environmental Services Department (ESD)
- Department of Planning, Building and Code Enforcement (PBCE)
- Public Works (PW)—this includes the Airport, Development Services, Roads and Bridges, and City Facilities Architectural Services (CFAS)
- Department of Transportation (DOT)
- Parks, Recreation and Neighborhood Services (PRNS)
- Redevelopment Agency (RDA)
- Fire Department (Fire)

The following are highlights from the various trainings in FY 08-09:

- Two sessions of ***Stormwater 101: Construction & Post Construction Stormwater Management Regulations*** for 31 staff provided background and regulatory training (C.3 provisions) on stormwater as it relates to new/redevelopment projects.

- One session of ***Stormwater 101: Stormwater Management for Surface Parking Lots*** provided staff background LID techniques and C.3 regulation as it relates to parking lots, as well as detailed site-specific examples of how landscape-based treatment control measures can be used for parking lot development.
- A webcast, ***Inspection & Maintenance of Stormwater BMPs,*** was attended by ESD staff. The training provided guidance on inspection and maintenance of stormwater best management practices and a range of strategies to implement inspection and maintenance programs.
- Twenty-one ESD staff attended the ***California Water Environment Association Annual Pretreatment, Pollution Prevention and Stormwater Conference & Exhibition*** in Monterey, California. The conference provided training on a variety of subjects relating to stormwater including policy updates and design and maintenance and inspection of post-construction BMPs.
- ***EPA's Green Infrastructure Webcast*** was attended by staff from ESD, PBCE, and PW. The training provided strategies for managing wet weather with green infrastructure and an overview of cost-estimating tools for LID BMPs.
- Staff from ESD, PBCE, and PW attended a CASQA meeting focusing on ***Stormwater Harvesting and Reuse*** via webcast. The full day training provided an overview of stormwater policy issues and regulatory barriers relating to rain water harvesting, as well as numerous case studies on successful stormwater harvesting projects.
- Fourteen staff from ESD, PBCE, and PW attended a ***Sustainable Streets Workshop***. The workshop included a presentation on the San Mateo County Sustainable Green Streets and Parking Lots Design Guidebook and a session where guidebook concepts were applied to example sites.
- Thirty-one staff from ESD, PBCE, and PW attended and/or participated in the ***Annual SCVURPPP C.3 Workshop*** held in San José. The annual conference focused on stormwater management for new and redevelopment projects and included a wide range of presentations and breakout sessions, including topics on design, maintenance and inspection of BMPs, as well as rain water harvesting and green building as it relates to stormwater.

Recurring Meetings

The foundation of information sharing in the City is the six regular monthly meeting forums. Two of these forums involve the private development and consultant communities. The focus of these interdepartmental meetings is the review and critique of current development projects for compliance with stormwater policies and policy updates. Integrating compliance review for conformance with stormwater policy as part of the comprehensive review of current development projects is the key to developing successful stormwater management plans. To do this successfully requires the regular attendance by staff from multiple departments at weekly, bi-weekly, and monthly meetings to review both public and private development projects. The six regular monthly meetings are described below:

- *Development Services Staff Review: Review and Critique of Recently Submitted Private NRD Projects* is held weekly and attended by approximately 20 staff from PBCE, PW, Fire, ESD, RDA, Police, and the Santa Clara Valley Water District. Planning project managers present project plan sets that have been submitted for development permits two weeks prior and each staff member comments verbally on behalf of their respective department or agency. Each department representative puts this information in a letter that becomes part of the initial response package due to the applicant within 30 days of application submittal. This meeting has provided countless opportunities to resolve conflicts between stormwater policy and regulations including Building Code, Fire Code, or ADA compliance.
- *Citywide Stormwater NPDES Coordination* is a bi-weekly meeting used to discuss challenges, successes, and concerns regarding the implemention of all provisions of the NPDES permit. An average of ten staff attend this meeting, which is also used to provide trainings and review particularly challenging development projects.
- *Safety Bond Program Coordination, Review, and Critique of Fire and Police Station and Other Community Building Projects* is a monthly meeting dedicated to public projects. These projects, though exempt from treatment control measure numeric-sizing requirements (funded prior to October 15, 2003), strive to provide BMPs and TCMs to act as an example for private development. Constructed Bond projects have provided useful information as the review of these projects has been the cornerstone of the City's O&M Verification Pilot Program.

- *Public and Turnkey Parks Coordination, Review, and Critique* is a monthly meeting dedicated to the review of public parks and turnkey parks, which are fully constructed before legal ownership is turned over to the City. Many of these parks are on constrained sites with limited funding for maintenance so proper design, selection, and construction of BMPs and TCMs is critical.
- *Developers' Roundtable for Design, Development, and Construction Firms* continues to serve as an important venue to provide policy updates, discuss new procedures, and answer questions related to implementation of stormwater policy. Approximately 25 people attend this meeting.
- *Developers' Industry Representative Roundtable for Civil Engineering Firms* serves as an important venue to provide BMP- and TCM-specific training, discuss the pros and cons of landscape-based and propriety treatment measures, and answer questions from the private sector firms that work with developers to design stormwater management plans. Approximately 25 people attend this meeting.

Other

- A *Residential Post-Construction Stormwater BMP Site Tour* was organized by ESD for City staff. Staff from ESD and PBCE toured residential development projects in San José that successfully implemented landscape-based stormwater BMPs. Engineers who designed the post-construction BMPs spoke about the challenges of designing the LID facilities, and answered questions on design, construction, and maintenance.
- Eleven staff from ESD, PW, PBCE, and DOT attended a tour of a residential development project featuring a bioretention system.

Awards

The City received two awards and one honorable mention from the Santa Clara Valley Urban Runoff Pollution Prevention Program (SCVURPPP) in June 2009:

- Exemplary Private Project, Residential: Casa Feliz, San José
- Exemplary Public Project: Roosevelt Community Center, San José
- Honorable Mention Private Project, Commercial: Hampton Park Phase I, San José

Summary and Implications of C.3 Implementation

Although the number of private projects implementing numerically-sized stormwater BMPs and TCMs dropped from seventy-five projects in FY 07-08 to sixty-two projects in FY 08-09, BMP inspection and O&M Verification continues to be a challenge. There are now approximately 200 approved private projects in the City's BMP O&M Verification Program, and as construction is completed and development continues throughout the City, more resources will be needed for project tracking, initial site inspections, and re-inspections. Additionally, a number of new public projects will require inspection and maintenance.

In FY 08-09, ESD staff continued to participate in the General Plan Update process through coordination with PBCE and attendance at Envision San José 2040 Task Force meetings. The General Plan Update process is a unique opportunity to update General Plan policies and goals as they relate to water quality protection.

The City of San José has ambitious goals and strong policies that encourage effective, efficient development and redevelopment with the objective of being a Smart Growth city. Site design and source control techniques continue to be important tools for reducing the impacts of development on stormwater, as well as implementing the City's goals and policies. In FY 09-10, the City will continue to emphasize Low Impact Development (LID) and effective operation and maintenance of BMPs. The City will also continue to meet the terms of the current Stormwater Permit and ensure compliance of the pending MRP through appropriate policy/code updates and ample outreach and training.

3.C NRD Response to Water Board Comments

No comments received from Water Board on this Program Element.

3.D NRD Summary Tables / Additional Information

Applicable Projects[1] Reviewed and/or Approved During July 1, 2008 – June 30, 2009

Private Development Projects							
PROJECT NAME: Story Road Retail Center PROJECT DESCRIPTION: Permit includes revisions to the Site Plan, Grading & Drainage Plan, Stormwater Control Plan and Landscape Plan as required with permit file number H08-016. The project includes the construction of 4,545 square-foot addition to an existing 10,743 square foot retail building and other site improvements.	PROJECT FILE NO. & MAP NO.: AD09-118 (See Private Projects Map, No. 56)	PROJECT LOCATION: North side of Story Road, approximately 310 feet south west of Jackson Avenue WATERSHED: Coyote		PROJECT TYPE: Commercial	SITE SIZE (AC): 1.16	NEW IMPERV. AREA (SQFT): 43,987	NET IMPERV. AREA (SQFT.): 16,254
SITE DESIGN: Perimeter landscape area.	SOURCE CONTROL: Regular sweeping of hardscape areas, covered trash enclosure plumbed to the sanitary system, stenciled inlets.	TREATMENT BMPS: Bioretention cell, media filtration system.	NUMERIC CRITERIA: Flow HMP: N/A DEEMED COMPLETE: 2/9/09 APPROVED: 5/13/09	O&M RESPONSIBILITY: The Property Owner or Site Manager shall maintain all treatment control measures in conformance with Section 20.95.120 of the Zoning Ordinance.		PESTICIDE REDUCTION MEASURES: Pesticide reduction is done through education and outreach. The SCVURPPP C3 Handbook and the Landscape Maintenance Techniques for Pest Reduction Fact Sheet are posted on the City website.	
PROJECT NAME: Tully Road Chevron PROJECT DESCRIPTION: Conditional Use Permit to allow demolition of an existing gas station and the construction of a new gas station with car wash facility.	PROJECT FILE NO. & MAP NO.: CP06-069 (See Private Projects Map, No. 1)	PROJECT LOCATION: Northwest corner of McLaughlin Avenue and Tully Road WATERSHED: Coyote		PROJECT TYPE: Commercial	SITE SIZE (AC): 0.90	NEW IMPERV. PESTICIDE REDUCTION MEASURES: Pesticide reduction is done through education and outreach. The SCVURPPP C3 Handbook and the Landscape Maintenance Techniques for Pest Reduction Fact Sheet are posted on the City website.	
PROJECT NAME: 166 Baypointe Parkway PROJECT DESCRIPTION: Planned Development Permit to demolish an existing industrial office building and to construct 229 multi-family attached residences and approximately 6,000 square feet of commercial space.	PROJECT FILE NO. & MAP NO.: PD08-023 (See Private Projects Map, No. 37)	PROJECT LOCATION: Northeast corner of Baypointe Parkway and Tasman Drive WATERSHED: Guadalupe		PROJECT TYPE: Mixed Use Commercial & High Density Residential (80.07 DU/AC)	SITE SIZE (AC): 2.86	NEW IMPERV. AREA (SQFT): 107,960	NET IMPERV. AREA (SQFT.): -7,752
SITE DESIGN: Project decreases amount of impervious area by 7,752 square feet, infill development, transit-oriented development area, LEED certified multi-story buildings, parking garage, bicycle parking, groundwater present within 10 feet of surface, tree planting.	SOURCE CONTROL: Parking garage plumbed to sanitary system, indoor trash enclosures, stenciled inlets.	TREATMENT BMPS: Media filtration systems.	NUMERIC CRITERIA: Flow HMP: N/A DEEMED COMPLETE: 3/11/08 APPROVED: 8/1/08	O&M RESPONSIBILITY: The Property Owner or Site Manager shall maintain all treatment control measures in conformance with Section 20.95.120 of the Zoning Ordinance.		PESTICIDE REDUCTION MEASURES: Pesticide reduction is done through education and outreach. The SCVURPPP C3 Handbook and the Landscape Maintenance Techniques for Pest Reduction Fact Sheet are posted on the City website.	
PROJECT NAME: 2112 Monterey Road PROJECT DESCRIPTION: Planned Development Permit to subdivide one previously developed parcel into two lots. The project includes improvements to the landscape plan and	PROJECT FILE NO. & MAP NO.: PD08-031 (See Private Projects Map, No. 40)	PROJECT LOCATION: East side of Monterey Road, approximately 700 feet northerly of Tully Road WATERSHED: Coyote		PROJECT TYPE: Existing Mixed Use Residential and Commercial	SITE SIZE (AC): 2.88	NEW IMPERV. AREA (SQFT): 117,468	NET IMPERV. AREA (SQFT.): -485

Private Development Projects							
reconfiguration of the existing parking lot.							
SITE DESIGN: Project decreases amount of impervious area by 485 square feet, preservation of existing mature landscape areas and trees.	SOURCE CONTROL: Stenciled inlets, covered trash enclosures, regular dry sweeping of parking lot and drive aisles, integrated pest management.	TREATMENT BMPS: Media filtration system.	NUMERIC CRITERIA: Flow HMP: N/A DEEMED COMPLETE: 5/5/08 APPROVED: 7/28/08	O&M RESPONSIBILITY: The Property Owner or Site Manager shall maintain all treatment control measures in conformance with Section 20.95.120 of the Zoning Ordinance.		PESTICIDE REDUCTION MEASURES: Pesticide reduction is done through education and outreach. The SCVURPPP C3 Handbook and the Landscape Maintenance Techniques for Pest Reduction Fact Sheet are posted on the City website.	
PROJECT NAME: NSJ: River Oaks Parkway PROJECT DESCRIPTION: Planned Development Permit to demolish an existing industrial/office building and to construct 297 multi-family attached residences and 1,500 square feet of retail space.	PROJECT FILE NO. & MAP NO.: PD08-036 (See Private Projects Map, No. 42)	PROJECT LOCATION: Northeast corner of River Oaks Parkway and Zanker Road WATERSHED: Guadalupe		PROJECT TYPE: Mixed Use Commercial & Residential (80.49 DU/AC)	SITE SIZE (AC): 3.69	NEW IMPERV. AREA (SQFT): 126,562	NET IMPERV. AREA (SQFT.): 28,557
SITE DESIGN: High density infill development, mixed use development, development, transit-oriented development area, clustered multi-story buildings, LEED certified buildings, pedestrian paths, parking garage, reduced parking requirement, tandem parking spaces, preservation of existing mature landscape area, perimeter landscape areas, tree planting.	SOURCE CONTROL: Stenciled inlets, covered parking, indoor trash enclosures.	TREATMENT BMPS: Media filtration systems, continuous deflection separator, flow-through planter boxes.	NUMERIC CRITERIA: Flow HMP: N/A DEEMED COMPLETE: 5/22/08 APPROVED: 8/28/08	O&M RESPONSIBILITY: The Property Owner or Site Manager shall maintain all treatment control measures in conformance with Section 20.95.120 of the Zoning Ordinance.		PESTICIDE REDUCTION MEASURES: Pesticide reduction is done through education and outreach. The SCVURPPP C3 Handbook and the Landscape Maintenance Techniques for Pest Reduction Fact Sheet are posted on the City website.	
PROJECT NAME: West San Carlos Mixed Use PROJECT DESCRIPTION: Planned Development Permit to demolish existing commercial and residential structures and to construct 218 attached multi-family	PROJECT FILE NO. & MAP NO.: PD09-006 (See Private Projects Map, No. 58)	PROJECT LOCATION: Southwest corner of West San Carlos Street and Meridian Avenue WATERSHED: Guadalupe		PROJECT TYPE: Mixed Use: Commercial and High Density Residential (52 DU/AC)	SITE SIZE (AC): 3.59	NEW IMPERV. Public Projects Map

BMP O&M Verification Results

PROJECT NAME: Stevens Creek European (File # PD06-023) APN: 303-33-067 BMP O&M Map # 1	DATE: 5/1/09	LOCATION: Southwest corner of Ardis Avenue and Stevens Creek Boulevard	PROJECT TYPE: Commercial	BMP TYPE: Mechanical unit.	REASON FOR INSPECTION: Follow-up
INSPECTION RESULTS/AREAS OF CONCERN (AOC): 1) 1. No Visible/Apparent Problems 2) 62. Other		ENFORCEMENT ACTION: Warning Notice	COMMENTS: Owner/operator of Stevens Creek European Car Dealership addressed two of the three areas of concern from the 6/12/08 inspection. 1) A runoff capture insert was installed in the storm drain inlet in the vehicle washing area. Water captured in the insert is pumped to sanitary. 2) The media filter was accessible and in working order. 3) The owner was not able to locate O&M records for the media filter (#62). City staff will follow-up with the operations manager regarding O&M records for the media filter. Priority for re-inspection is medium.		
PROJECT NAME: Story Road Home Depot (File # CP05-034) APN: 484-33-057 BMP O&M Map # 2	DATE: 5/13/09	LOCATION: Northeast corner of Story Road and McGinness Avenue	PROJECT TYPE: Commercial	BMP TYPE: Vegetated swale, mechanical unit, tree planting, and beneficial landscaping.	REASON FOR INSPECTION: Initial
INSPECTION RESULTS/AREAS OF CONCERN (AOC): 1) 1. No Visible/Apparent Problems 2) 5. Trash/Debris Accumulation 3) 15. Poor Vegetation Coverage		ENFORCEMENT ACTION: Verbal Notice	COMMENTS: Vegetation was sparse or bare on all of the swales, and trash was prevalent in the swales located between the parking isles. Vegetation damage to the swales in between the parking isles appeared to be partially due to heavy foot-traffic. The two hydrodynamic separators had no visible or apparent problems. Priority for re-inspection is high. Follow-up inspection should occur before the wet season.		
PROJECT NAME: Greenwaste Recovery Recycling Center (File # SP06-094) APN: 237-06-088 BMP O&M Map # 3	DATE: 5/21/09	LOCATION: 625 Charles Street (North side of Charles Street approximately 750 feet westerly of Oakland Road)	PROJECT TYPE: Recycling Facility	BMP TYPE: Media filtration unit.	REASON FOR INSPECTION: Routine
INSPECTION RESULTS/AREAS OF CONCERN (AOC): 1) 1. No Visible/Apparent Problems 2) 62. Other		ENFORCEMENT ACTION: Verbal Notice	COMMENTS: The media filter appeared clean and functioning. The operations manager was not able to locate the operation and maintenance records for the media filter (#62). City staff will follow-up with the operations manager regarding O&M records for the media filter. Because the facility is a greenwaste recovery recycling center the priority for re-inspection is high. The site will continue to be inspected annually.		
PROJECT NAME: Bonsai Nursery/Bollinger Retail (File # H06-077) APN: 372-26-010 BMP O&M Map # 4	DATE: 5/1/09	LOCATION: 966 S. De Anza Blvd. (Southeast corner of South De Anza Boulevard and Bollinger Road)	PROJECT TYPE: Retail commercial development	BMP TYPE: Vegetated swales.	REASON FOR INSPECTION: Initial
INSPECTION RESULTS/AREAS OF CONCERN (AOC): 1) 1. No Visible/Apparent Problems 2) 18. Standing Water/Excessive Ponding/Soggy Soil		ENFORCEMENT ACTION: Warning Notice	COMMENTS: The project incorporated pervious pavement in a majority of the parking stalls, and it appeared in good working order. The bottom of the vegetated swale was excessively soggy, particularly near the inlet from the parking lot. The soggy conditions may have been due to irrigation runoff from the parking lot. The grass at the bottom of the swale should be replanted or replaced with cobble. Priority for re-inspection is medium.		

BMP O&M Verification Results

PROJECT NAME: Cadence Seely Campus (Building 10) (File # H05-053) APN: 097-66-008 BMP O&M Map # 5	DATE: 5/21/09	LOCATION: Northerly corner of Montague Expressway and Trimble Road (2655 Seely)	PROJECT TYPE: Industrial/R&D	BMP TYPE: Mechanical unit, vegetated swales, and an infiltration trench.	REASON FOR INSPECTION: Initial
INSPECTION RESULTS/AREAS OF CONCERN (AOC): 1) 1. No Visible/Apparent Problems		ENFORCEMENT ACTION: None	COMMENTS: The infiltration trench and swales both had sufficient, lush vegetation. The hydrodynamic separator appeared clean and in working order. Priority for re-inspection is low.		
PROJECT NAME: Alma-Almaden Retail Center (File # H06-036) APN: 434-21-020 BMP O&M Map # 6	DATE: 6/25/09	LOCATION: Southeast corner of West Alma Avenue and Almaden Expressway (226 W. Alma)	PROJECT TYPE: Commercial	BMP TYPE: Vegetated swale.	REASON FOR INSPECTION: Initial
INSPECTION RESULTS/AREAS OF CONCERN (AOC): 1) 2. Significant Engineering/Design Flaws 2) 15. Poor Vegetation Coverage		ENFORCEMENT ACTION: Verbal Notice	COMMENTS: The bio-swale was not constructed as per the approved plans. Vegetation in the swale was sparse and it appeared the grade would not allow storm runoff to flow down the swale. No tenants had occupied the building at the time of inspection and the parking was vacant of automobile traffic. Priority for re-inspection is medium.		
PROJECT NAME: Kim's Plaza (File # H05-042) APN: 472-11-080 BMP O&M Map # 7	DATE: 5/13/09	LOCATION: Northwest corner of Story Road and McLaughlin Avenue	PROJECT TYPE: Commercial	BMP TYPE: Two infiltration ponds and inlet filters with oil separators.	REASON FOR INSPECTION: Initial
INSPECTION RESULTS/AREAS OF CONCERN (AOC): 1) 15. Poor Vegetation Coverage		ENFORCEMENT ACTION: Verbal Notice	COMMENTS: The vegetation in the two infiltration ponds was bare. The two infiltration ponds should be revegetated as as per approved plans or equivelant. Priority for re-inspection is medium.		
PROJECT NAME: The Plant (File # PDA05-058-01) APN: 455-05-015 BMP O&M Map # 8	DATE: 5/13/09	LOCATION: Northwest corner of the intersection of Monterey Road and Curtner Avenue	PROJECT TYPE: Commercial	BMP TYPE: Vegetated bioswales, bioretention areas, and a mechanical unit.	REASON FOR INSPECTION: Initial
INSPECTION RESULTS/AREAS OF CONCERN (AOC): 1) 1. No Visible/Apparent Problems 2) 15. Poor Vegetation Coverage 3) 52. Sediment Accumulation		ENFORCEMENT ACTION: Verbal Notice	COMMENTS: In general, the vegetated swales throughout the project site appeared to be properly constructed, operable and maintained. However, vegetation had died in some of the swales. Also, several swales had poor vegetation coverage from inadequate vegetation installation. The media filters appeared to be in working order, although there was some sediment accumulation in several of the vaults. Swales with poor vegetation cover should be vegetated appropriately. Verification of maintenance for the media filters will be requested from property management. Priority for re-

			inspection is medium.		
PROJECT NAME: Encanto (File # PD05-013) APN: 230-14-007 BMP O&M Map # 9	DATE: 6/26/09	LOCATION: Campbell Avenue/Dahlia Loop (North side of Campbell Avenue approximately 1,000 feet east of Newhall Street)	PROJECT TYPE: Residential	BMP TYPE: Vegetated swales, tree planting, and beneficial landscaping.	REASON FOR INSPECTION: Initial
INSPECTION RESULTS/AREAS OF CONCERN (AOC): 1) 1. No Visible/Apparent Problems		ENFORCEMENT ACTION: None	COMMENTS: The landscaped treatment areas appeared to be well constructed and maintained. Priority for re-inspection is low.		
PROJECT NAME: Pestana Homes/Hampton I (File # PD05-044) APN: 237-25-038 BMP O&M Map # 10	DATE: 5/21/09	LOCATION: Northwest corner of Old Oakland Road and Rock Avenue	PROJECT TYPE: Residential	BMP TYPE: Vegetated swales, infiltration basin, interlocking unit pavers, turf track grass road pavers, bioretention filters, and infiltration basin.	REASON FOR INSPECTION: Initial
INSPECTION RESULTS/AREAS OF CONCERN (AOC): 1) 1. No Visible/Apparent Problems		ENFORCEMENT ACTION: None	COMMENTS: Vegetated swales and pervious paving appeared to be properly constructed, operable and well maintained. Priority for re-inspection is low.		
PROJECT NAME: St. Elizabeth Park Condominiums (File # PD05-062) APN: 284-03-033 BMP O&M Map # 11	DATE: 5/6/09	LOCATION: Southeast corner of Curci Drive and St Elizabeth Drive	PROJECT TYPE: Residential	BMP TYPE: Tree planting, interlocking unit pavers, bioretention filter, beneficial landscaping, mechanical units, and inlet filters.	REASON FOR INSPECTION: Initial
INSPECTION RESULTS/AREAS OF CONCERN (AOC): 1) 1. No Visible/Apparent Problems		ENFORCEMENT ACTION: None	COMMENTS: Media filter unit appeared clean and functioning, and pervious paving appeared to be properly constructed. Priority for re-inspection is low.		

BMP O&M Verification Results					
PROJECT NAME: "Wind Rose" Single Family Homes (File # PD05-067) APN: 601-15-038 BMP O&M Map # 12	DATE: 6/25/09	LOCATION: South side of Fleming Avenue, approximately 1,032 feet southeast of Alum Rock Avenue	PROJECT TYPE: Residential	BMP TYPE: Mechanical unit.	REASON FOR INSPECTION: Initial
INSPECTION RESULTS/AREAS OF CONCERN (AOC): 1) 1. No Visible/Apparent Problems		ENFORCEMENT ACTION: None	COMMENTS: Hydrodynamic Separator appeared clean and functioning. Priority for re-inspection is low.		
PROJECT NAME: La Astrada (File # PD06-061) APN: 237-01-050 BMP O&M Map # 13	DATE: 6/26/09	LOCATION: North side of Rock Avenue, approximately 450 feet westerly of Oakland Road	PROJECT TYPE: Residential	BMP TYPE: Media filtration unit.	REASON FOR INSPECTION: Initial
INSPECTION RESULTS/AREAS OF CONCERN (AOC): 1) 1. No Visible/Apparent Problems		ENFORCEMENT ACTION: None	COMMENTS: Media filter unit appeared clean and functioning. Priority for re-inspection is low.		
PROJECT NAME: Merrill Gardens at Willow Glen (File # PD06-070) APN: 284-03-050 BMP O&M Map # 14	DATE: 5/6/09	LOCATION: Along the southern side of Curci Drive and at the intersection of Curci Drive and Meridian Avenue (993 Meridian Avenue)	PROJECT TYPE: Residential	BMP TYPE: Mechanical unit.	REASON FOR INSPECTION: Initial
INSPECTION RESULTS/AREAS OF CONCERN (AOC): 1) 7. BMP Access Obstructed		ENFORCEMENT ACTION: Verbal Notice	COMMENTS: Access to the Hydrodynamic Separator was obstructed by a large bolted manhole cover. City staff will contact property management to gain access and verify structural unit is clean and functioning. Priority for re-inspection is medium.		

BMP O&M Verification Program Map

4. CON: Construction Inspection

4.A CON Work Plan Self Evaluation Matrix

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 08-09 STATUS	RESPONSIBLE PARTY
CON 1	**Site Housekeeping** The City ensures through a construction inspection program that construction contractors properly store, use, and dispose of construction materials, chemicals, and wastes at construction sites and prevent illicit discharges to storm drains and watercourses.			
CON 1.A	Track and document incidents of housekeeping issues at construction sites	Ongoing	Done FY 08-09 and ongoing. City inspectors tracked and documented incidents of housekeeping issues at construction sites and these records are on file for review. Housekeeping issues were documented at 170 sites, compared to 144 last year, representing an 18 percent increase. A total of 323 housekeeping issues were documented, compared to 285 last year, representing a 13 percent increase. The majority of housekeeping issues identified by inspectors focused on erosion control, BMP maintenance, site entrance/exit stabilization, stockpile storage, street cleaning, and storm drain inlet protection.	PBCE-Bldg, PW, ESD-WE
CON 2	**Local Ordinance** For development projects with significant erosion potential and planned construction activity during the wet season, the City ensures, through a construction inspection program, that erosion and/or sediment control measures are implemented in accordance with local ordinances and project conditions of approval and maintained as needed during construction.			
CON 2.A	Maintain a program for identifying and conditioning projects with significant erosion potential and planned wet season activity.	Ongoing	Done FY 08-09 and ongoing. ESD-WE, PW, and PBCE-Building continued to implement a construction inspection program for identifying and conditioning projects with significant erosion potential and planned wet season activity. Records are on file for review.	PW, PBCE-Bldg
CON 2.B	Identify ordinance changes needed to conduct inspections.	As Needed	Done FY 08-09. No changes to existing ordinances were required.	PW, ESD-WE, PBCE-Bldg
CON 3	**Construction Inspection Frequency** The City inspects construction sites for adequacy of stormwater control measures. The frequency of inspections for active sites is at least once per month, or more frequently based on size of project, site conditions, precipitation, and project's potential impact on stormwater quality.			

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 08-09 STATUS	RESPONSIBLE PARTY
CON 3.A	Maintain and update SOPs for construction inspection program.	As Needed	Done FY 08-09. SOPs for construction inspection were maintained and implemented. No updates were required.	PW, ESD-WE, PBCE-Bldg
CON 3.B	Document inspections of active construction sites.	Ongoing	Done FY 08-09 and ongoing. The City documented inspections of active construction sites in San José that were subject to inspection during FY 08-09. These records are on file for review. 938 inspections were conducted, compared to 1039 last year (including repeat inspections of the same site), representing a 10 percent decrease. Fewer inspections can be attributable to fewer active grading permits. In addition, inspection staff capacity in PCBE-Building and PW was adjusted in response to less industry demand. ESD-WE inspection staff, however, conducted more inspections (605 in FY 08-09 compared to 359 in FY 07-08) as a result of full implementation of monthly, year round inspections.	PW, ESD-WE, PBCE-Bldg
CON 3.C	Evaluate the effectiveness of the construction inspection program and make improvements, as necessary.	Annually	Done FY 08-09. See 4.B: *CON Program Evaluation*.	PW, ESD-WE, PBCE-Bldg
CON 4	**Wet Season Preparation** Prior to the beginning of the wet season each year, the City inspects all sites requiring erosion and/or sediment control plans, to ensure that measures have been taken to minimize erosion and discharges of sediment from disturbed areas.			
CON 4.A	Review and revise procedures for construction inspection staff regarding wet season construction requirements.	As Needed	Done FY 08-09. Procedures for wet season preparation were reviewed and found to be adequate. A pre-wet season meeting was held on 9/29 amongst citywide construction inspection supervisors. In addition, inspection staff discussed wet season procedures during annual training on 10/21 and 10/22.	PW-CFAS, PW-ECS, PW-TDS, PBCE-Bldg, ESD
CON 4.B	Document pre-season inspection of construction sites to ensure adequate implementation of winterizing BMPs prior to the wet season.	Annually	Done FY 08-09 and ongoing. The City documented pre-season inspection of construction sites to ensure adequate implementation of winterizing BMPs. 172 pre-wet season inspections were conducted, compared to 111 last year, representing a 28 percent increase. This increase is attributable to more ESD-WE pre-wet season inspections, including repeat visits to the same site prior to October 15.	PW-CFAS, PW-ECS, PW-TDS

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 08-09 STATUS	RESPONSIBLE PARTY
CON 5	**Inspection and Site Evaluation Follow-up** Construction sites with inadequate erosion/sediment controls are given verbal and/or written notice of the inadequacies, according to the City's enforcement procedures, and followed up with action(s) commensurate with the risk of pollutants entering City storm drains or waterways. Written notices and follow-up actions are tracked and summarized in the City's Annual Report to the Water Board.			
CON 5.A	Implement SOPs for follow-up actions and graduated levels of enforcement for construction sites.	Ongoing	Done FY 08-09 and ongoing.	PW-CFAS, PW-ECS, PW-TDS, PBCE-Bldg, ESD
CON 5.B	Track and summarize notices and follow-up actions for annual reports.	Annually	Done FY 08-09. The City issued 481 verbal warnings, (compared to 357 last year), 50 official warning notices (compared to 23 last year), and 5 administrative actions with fines (compared to 0 last year). This increase in escalation of enforcement may be attributable to an increase in inspections performed by ESD-WE.	PW-CFAS, PW-ECS, PW-TDS, PBCE-Bldg, ESD
CON 5.B.1	Use revised erosion and sediment control checklist to better track warnings and required corrections given to construction site managers.	Done FY 06-07 Annually	Done FY 08-09. The form was developed by PW in FY 05-06 to address issues related to construction site inspections and was last revised in FY 07-08 to collect additional data and provide more guidance on tracking BMPs.	PW-TDS
CON 6	**Municipal Training** The City provides training annually to its construction inspection staff on inspection procedures, documentation, and enforcement related to stormwater pollution prevention. All inspectors receive training on the latest construction-related stormwater pollution prevention techniques and appropriate follow up actions at least once every two years. The City keeps documentation that inspectors have received training.			
CON 6.A	Develop an annual training plan for construction inspection program.	Annually, Q1	Done FY 08-09. See 13.D: *Municipal Employee Training Summary*.	ESD, PW, PBCE-Bldg
CON 6.B	Conduct annual training	Annually	Done FY 08-09. 103 staff attended annual training on October 21-22. See 13.D: *Municipal Employee Training Summary.*	ESD, PW, PBCE-Bldg
CON 6.C	Track and document that inspectors have received training.	Annually	Done FY 08-09. See 13.D: *Municipal Employee Training Summary*.	ESD-UR
CON 6.D	Evaluate the training curriculum and frequency, and improvements, as necessary.	Annually	Done FY 08-09. Written evaluations were conducted at every training event to help gauge effectiveness and target future training needs.	ESD, PW, PBCE-Bldg
CON 6.D.1	Conduct additional stormwater BMP training for all inspection groups during section meetings throughout FY 06-07 to supplement the main Fall training.	FY 06-07 Ongoing	Done FY 08-09. Focused "refresher" trainings were held at inspection group's staff meetings. 50 PW inspectors attended the training sessions. See 13.D: *Municipal Employee Training Summary.*	ESD-UR, ESD-WE

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 08-09 STATUS	RESPONSIBLE PARTY
CON 6.E	Hold coordination meetings for Building, ESD, and Public Works	Ongoing	Done FY 08-09 and ongoing. See 13.D: *Municipal Employee Training Summary.*	PW-CFAS, PW-ECS, PW-TDS, PBCE-Bldg, ESD-WE, ESD-UR
CON 6.F	City allocated funds in FY 08-09 for contractual support for two Construction Stormwater BMP Training Workshops for City staff. Ensure staff attends two funded Construction Stormwater BMP Training Workshops.	FY 08-09	Done FY 08-09. See CON 13.D *Municipal Employee Training Summary.*	ESD-UR, ESD-WE
CON 7	**Outreach** The City provides outreach materials to contractors, developers, and municipal staff on construction BMPs and compliance with the State General Construction Activity Stormwater Permit.			
CON 7.A	Review outreach and technology transfer materials and make improvements, as necessary	Annually, Q4	Done FY 08-09. Construction BMP information blueprints and tri-folds in English, Spanish, and Vietnamese were distributed as needed at trainings, inspections, and are on permanent display in City Hall. See 14.D: *Outreach Materials Distributed* for details.	ESD, PW, PBCE-Bldg
CON 7.A.1	Reprint revised Dewatering from Construction Sites and In-Ground Utilities Maintenance Projects brochure.	Pending MRP	Deferred to include any additional requirements from the MRP.	ESD-UR
CON 7.B	Conduct outreach sessions to development community.	Annually	Done FY 08-09. See 14.D: *PIP Activities Table* for details.	ESD, PW, PBCE-Bldg, Program
CON 7.C	Document outreach to development community.	Annually	Done FY 08-09. PW and ESD-WE inspectors continued to distribute BMP handouts to the development community during construction site inspections. Outreach materials were also provided to development community representatives at training sessions and at permit service counters. See 14.D: *PIP Activities Table* and 14.D: *Outreach Materials Distributed* for details.	ESD-UR
CON 7.D	Evaluate outreach program and make improvements, as necessary.	Annually	Done FY 08-09. The City's outreach program continues to make improvements as needed. With inspections, meetings, and training sessions, the outreach for this program element includes significant face-to-face contact. Inspectors also distribute materials to developers and contractors as part of inspection.	ESD, PW, PBCE-Bldg
CON 7.D.1	Print and distribute revised "Clean Bay Blueprint" to developers and City inspectors.	Done FY 06-07 As Needed	Done FY 08-09. See 14.D: *Outreach Materials Distributed* for details.	ESD, PW, PBCE-Bldg
CON 7.D.2	Explore the use of construction site signs to alert site	Done FY 06-07	Done FY 06-07.	ESD, PW, PBCE-Bldg

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 08-09 STATUS	RESPONSIBLE PARTY
	employees and the public of stormwater pollution prevention message and 945-3000 hotline information.			
CON 7.D.3	Implement, if feasible, the use of construction site signs to alert site employees and the public of stormwater pollution prevention message and 945-3000 hotline information, if feasible.	Done FY 07-08 As needed	Done FY 07-08 and ongoing. Signs were provided to PW-CFAS for public projects and ESD-WE inspectors distributed signs to projects with significant violations.	ESD, PW, PBCE-Bldg
CON 7.D.4	Evaluate use of construction site signs program and possibly expand it to other municipal construction project sites during FY 07-08.	Deferred	Deferred to FY 09-10. Not enough signs were distributed to evaluate their use. Sign distribution will be refined and increased in FY 09-10.	ESD, PW, PBCE-Bldg
CON 8	**Public Works Projects** The City will develop and implement a process to ensure that contractors hired to construct public works projects have adequate erosion control plans and use appropriate Best Management Practices (BMPs) adopted by the Department of Public Works.			
CON 8.A	Conduct training for Public Works capital improvement project staff (Architectural Engineering Design & Construction and Streets, Bridges and Sewers Design and Construction) on contract language, standard specifications, & enforcement.	Annually	Done FY 08-09. Training was developed and conducted for 52 staff on 5/18/09. See 13.D: *Municipal Employee Training Summary.*	PW-CFAS, PW-ECS, PW-TDS, ESD
CON 8.B	Track the number of Public Works projects with these requirements.	Annually	Done FY 08-09. Records are on file.	PW-CFAS, PW-ECS, PW-TDS
CON 9	**Construction Inspection Effectiveness Evaluation** The City of San José will review and evaluate effectiveness of its construction inspection SOPs and BMPs.			
CON 9.A	Evaluate and incorporate any needed improvements in construction inspection SOPs and BMPs.	Annually	Done FY 08-09. No changes required for FY 08-09.	PW-CFAS, PW-ECS, PW-TDS, PBCE-Bldg, ESD-WE, ESD-UR
CON 9.B	Document and evaluate what worked well and what needs improvement.	Annually	Done FY 08-09. See 4.B: *CON Program Evaluation.*	PW-CFAS, PW-ECS, PW-TDS, PBCE-Bldg, ESD-WE, ESD-UR
CON 9.B.1	Expand the number of sites with an inspector of record to capture more of the Type 1 and Type 2 sites (per Public Work's designation)	Ongoing	Done FY 08-09. 119 construction sites were assigned an ESD-WE inspector compared to 50 sites last year. The ESD inspection database was updated throughout the year with project data from PW to ensure that all Type 1 and Type 2 projects had an environmental inspector assigned.	PW, ESD-WE

4.B CON Program Evaluation

Construction activity continued to slow over the last year as evidenced by fewer active grading permits. As a result, the City conducted fewer construction site inspections and inspectors discovered numerous inactive projects that had postponed construction activity. Still, San José continued to implement a vigilant construction site monitoring program focused on staff training, inspection of construction sites, outreach to developers, and enforcement. In FY 08-09, ESD-WE inspectors began to monitor inactive sites monthly to ensure they were secured and maintained appropriately.

Monitoring erosion and sediment controls is part of the routine inspections of PW and PBCE-Building inspectors. ESD-WE supplements this effort with stormwater specific inspections and escalated enforcement when necessary. The "hand-off" system developed and implemented by the three inspection groups in 2004 has provided effective monitoring of construction sites. However, inspection staff capacity in PBCE-Building and PW decreased this year in response to a steep decline in development activity. To maintain an effective level of monitoring, ESD-WE fully implemented monthly, year-round inspection of all sites posing a significant threat to surface water quality (including inactive sites). More violations were documented and more verbal warnings, official warning notices, and administrative actions with fines were issued compared to last year, as shown below. This increase in enforcement activity is likely attributable to the increase in inspections performed by ESD-WE.

In FY 08-09, seven construction sites in San José were identified by the Water Board for not complying with the State Construction General Permit. ESD-WE reviewed inspection records and enforcement actions for each site. San José had issued warnings or notices to four of the seven sites. Of the remaining sites, one was inactive and

two were not on San José's inspection list because they had not received grading permits. Following the Water Board's action, San José conducted inspections, escalated enforcement as needed, and placed each project on a monthly inspection schedule.

Highlights from FY 08-09 municipal staff training include:

- 31 Redevelopment Agency project management staff attended "Stormwater 101" training facilitated by ESD-Urban Runoff July 23 and September 6;
- 103 staff attended Construction Site Management training by Scott Taylor of RBF October 21-22;
- 16 staff attended the Program's annual Construction Site Compliance Workshop for Contractors and Inspectors November 21-22;
- 54 staff attended Sediment and Erosion Control Training for Capital Improvement Project Staff May 18;
- 50 staff received a focused "refresher" training on construction site management at their respective staff meetings throughout the rainy season; and
- 21 staff attended a workshop facilitated by the Program on the revised Draft Construction General Permit May 27.

San José hosted a workshop on May 27 for staff, co-permittees, and developers to learn more about the revised Draft State Construction General Permit and discuss impacts. In addition, the City coordinated with CASQA and the Program to review the draft Permit and provide comments to the State Water Resources Control Board.

4.C CON Response to Water Board Comments

No comments received from Water Board on this Program Element.

4.D CON Summary Tables / Additional Information

Permits for Significant Development Projects[1] Reviewed and/or Approved July 1, 2008 – June 30, 2009

Project Name & Location	Project Type	Site Size (Ac)	Area of Land Disturbed (Ac)	Project Status	Stormwater Control Measures Included in Project	Requirement Mechanism
Department of Public Works, Airport Division						
Public Projects						
North Concourse Project 1661 Airport Boulevard	Airport terminal	7.5	3.9	Ongoing	Standard BMPs	SWPPP
Terminal Area Improvement Program (TAIP) 1661 Airport Boulevard	Airport terminals/roadways, utilities, bridges, parking garage	28.0	24.5	Ongoing	Standard BMPs	SWPPP
Department of Public Works, Transportation & Development Services Division						
Private Projects						

[1] Projects that have conditions created by land disturbance activities that require a grading permit, as defined by local ordinance, or by discharges of stormwater runoff over areas with erodable soils.

Project Name & Location	Project Type	Site Size (Ac)	Area of Land Disturbed (Ac)	Project Status	Stormwater Control Measures Included in Project	Requirement Mechanism
77 N. BASCOM AV (AT BAILEY AV) RETAIL: TO ALLOW GRADING FOR NEW RETAIL BUILDING AND PARKING LOT (PW # 3-18032 - Issued 07/11/08) SOUTHWEST CORNER OF NORTH BASCOM AVENUE AND BAILEY AVENUE, APPROXIMATELY 520 FEET NORTH OF WEST SAN CARLOS STREET	Non-Residential	0.16	0.16	Completed	Standard BMPs	Planning / Grading Permits. Follow BMPs
TRACT NO. 9985: TRACT NO. 9985 - GRADING PLAN FOR 4 UNIT SUBDIVISION (PW # 3-18112 - Issued 07/21/08) EAST SIDE OF BOYNTON AVENUE, APPROXIMATELY 350 FEET NORTHERLY OF WILLIAMS ROAD	Residential	0.26	0.26	Not Started	Standard BMPs	Planning / Grading Permits. Follow BMPs
HUMANITIES BLDG.: GRADING FOR BELLARMINE HUMANITIES BUILDING (PW # 3-04527 - Issued 07/22/08) AREA BOUNDED BY W HEDDING ST, CALTRAIN RIGHT-OF-WAY, STOCKTON AV, EMORY ST, AND ELM ST	Non-Residential	15.93	1.53	Under Construction (Grading Complete)	Standard BMPs	Planning / Grading Permits. Follow BMPs
3-06815G(J) - 3B PARKING GARAGE: (PW # 3-06815 - Issued 07/23/08) EAST SIDE OF WINCHESTER BOULEVARD, APPROXIMATELY 360 FEET SOUTHERLY OF STEVENS CREEK BOULEVARD	Non-Residential	3.9	0.11	Under Construction (Grading Complete)	Fiber Rolls, Inlet Protection	Planning / Grading Permits. Follow BMPs
1265 ECHO VALLEY DR: TO ALLOW GRADING FOR AN ADDITION TO EXISTING SFR (PW # 3-18378 - Issued 07/29/08) 1265 ECHO VALLEY DR	Residential	0.41	0.02	Inactive	Standard BMPs	Planning / Grading Permits. Follow SWPPP and/or Erosion Control Plan. Applicant / Developer / Consultant / Contractor attend PW Erosion and Sediment Control Training within past 2 years
TRACT NO. 9995: GRADING FOR OAK GROVE GARDEN TOWNHOMES - 1566 DUCKETT WAY (PW # 3-18090 - Issued 08/12/08) TERMINUS OF DUCKETT WAY, APPROXIMATELY 420 FEET EAST OF SOUTH DE ANZA BOULEVARD	Residential	1.8	1.2	Under Construction (Grading Complete)	Gravel Pit Entrance, Truck Washout, Silt Fence, Fiber Rolls, Gravel Inlet Protection, Straw Inlet Protection	Planning / Grading Permits. Follow SWPPP and/or Erosion Control Plan. Applicant / Developer / Consultant / Contractor attend PW Erosion and Sediment Control Training within past 2 years

Project Name & Location	Project Type	Site Size (Ac)	Area of Land Disturbed (Ac)	Project Status	Stormwater Control Measures Included in Project	Requirement Mechanism
CP07-072 - WHOLE FOODS: (PW # 3-00952 - Issued 08/13/08) GENERALLY BOUND BY BLOSSOM HILL ROAD ON THE NORTH, GALLUP DRIVE TO THE WEST, MESA DRIVE TO THE SOUTH, AND ALMADEN EXPRESSWAY TO THE EAST	Non-Residential	10	10	Under Construction (Grading Complete)	Stabilized Construction Entrance, Fiber Rolls, Gravel Bags, Sediment Filter	Planning / Grading Permits. Follow BMPs
TRACT NO. 9743 : GRADING PLANS FOR SPRINGBROOK SUBDIVISION (PW # 3-15303 - Issued 08/21/08) NORTHERLY CORNER OF SPRINGBROOK AVENUE AND CANYON RIDGE DRIVE	Residential	25.69	0.6	Inactive	Stabilized Construction Entrance, Silt Fencing, Storm Drain Inlet Protection, Flow Diversion Berm, Sediment Basin, Erosion Control Blankets, Straw Rolls	Planning / Grading Permits. Follow SWPPP and/or Erosion Control Plan
GRADING - RADIO AVENUE: ONE PARCEL INTO 15 LOTS FOR 13 ATTACHED SINGLE-FAMILY HOUSES AND 1 SINGLE-FAMILY DETACHED RESIDENCE ON A 0.71 GROSS ACRE SITE. (PW # 3-16987 - Issued 08/22/08) EAST SIDE OF RADIO AVENUE, APPROXIMATELY 160 FEET NORTH OF LINCOLN COURT,	Residential	0.71	0.71	Under Construction (Grading Complete)	Stabilized Construction Entrance, Fiber Rolls, Inlet Protection, Concrete Washout Area, Gravel Bags, Sediment Trap Filter	Planning / Grading Permits. Follow BMPs
3-16048: GRADING PERMIT FOR SBIA EVERGREEN CENTER (PW # 3-16048 - Issued 08/26/08) EAST SIDE OF RUBY AVENUE APPROXIMATELY 250 FEET NORTHERLY OF MURILLO AVENUE	Non-Residential	2.17	2.11	Not Started	Stabilized Construction Entrance, Concrete Wash-out Area, Inlet Protection, Fiber Roll, Temporary Cover on Stockpile	Planning / Grading Permits. Follow SWPPP and/or Erosion Control Plan
THE BERRY BUILDING: GRADING FOR NEW COMMERCIAL BUILDING (PW # 3-14506 - Issued 08/27/08) NORTHEAST CORNER OF WINCHESTER BOULEVARD AND WILLIAMS ROAD	Non-Residential	0.38	0.35	Under Construction (Grading Complete)	Stabilized Construction Entrance, Inlet Protection, Fiber Rolls, Concrete Washout	Planning / Grading Permits. Follow BMPs
TRACT NO. 9978: (PW # 3-16847 - Issued 08/29/08) NORTHEAST CORNER OF EAST TAYLOR STREET AND NORTH SIXTH STREET	Residential	0.26	0.26	Not Started	Standard BMPs	Planning / Grading Permits. Follow BMPs
3-02626: TO ALLOW STOCKPILING OF IMPORTED MATERIAL FOR LOWE'S @ ARCADIA (PW # 3-02626 - Issued 09/02/08) NORTHWEST CORNER OF COLEMAN AVENUE AND NEWHALL STREET	Non-Residential	20.68	20.68	Under Construction	Standard BMPs	Planning / Grading Permits. Follow BMPs

Project Name & Location	Project Type	Site Size (Ac)	Area of Land Disturbed (Ac)	Project Status	Stormwater Control Measures Included in Project	Requirement Mechanism
SMART CENTER: TO CONSTRUCT A 8,108 SF AUTO DEALERSHIP (PW # 3-18346 - Issued 09/12/08) SOUTH SIDE OF STEVENS CREEK BOULEVARD, APPROXIMATELY 300 FEET EASTERLY OF LOMA LINDA DRIVE	Non-Residential	0.94	0.94	Not Started	Standard BMPs	Planning / Grading Permits. Follow SWPPP and/or Erosion Control Plan. Applicant / Developer / Consultant / Contractor attend PW Erosion & Sediment Control Training within past 2 years
3-07005GR(B) PHASE 2 FOR CP06-011 - GROCERY OUTLET: TO ALLOW GRADING FOR PHASE 2 OF CP06-011, INCLUDING DEMOLITION OF REMAINDER OF OLD GROCERY OUTLET BUILDING, AND INSTALLATION OF ADDITIONAL PARKING LOT AREA (PW # 3-07005 - Issued 09/23/08) NORTHEAST CORNER OF OLD TULLY ROAD AND MONTEREY HIGHWAY	Non-Residential	3.26	1.2	Completed	Stabilized Construction Entrance, Straw Wattles, Dandy Curb Inlet Sack, Gravel Back Drop Inlet Sediment Barrier	Planning / Grading Permits. Follow SWPPP and/or Erosion Control Plan. Applicant / Developer / Consultant / Contractor attend PW Erosion and Sediment Control Training within past 2 years
7265 BARK LANE: TO ALLOW GRADING FOR CONSTRUCTION OF A NEW 12,290 COMMERCIAL BUILDING ON A 0.5 GROSS ACRE SITE. (PW # 3-16875 - Issued 09/24/08) NORTH SIDE OF BARK LANE, APPROXIMATELY 150 FEET EASTERLY OF SOUTH DE ANZA BOULEVARD	Non-Residential	0.52	0.52	Not Started	Stabilized Construction Entrance, Inlet Protection, Fiber Rolls	Planning / Grading Permits. Follow BMPs
TRACT NO. 9955: TO ALLOW GRADING FOR FIVE NEW SINGLE FAMILY DETACHED RESIDENCES ALONG TAFT DRIVE ON A 1.15 GROSS ACRE SITE. (PW # 3-18064 - Issued 09/30/08) EAST SIDE OF TAFT DRIVE, APPROXIMATELY 200 FEET NORTHERLY OF BLOSSOM VALLEY DRIVE	Residential	1.15	1.15	Under Construction (Grading Complete)	Stabilized Construction Entrance, Inlet Protection, Fiber Rolls, Concrete Washout	Planning / Grading Permits. Follow BMPs
3-02626G: GRADING FOR LOWE'S @ ARCADIA (PW # 3-02626 - Issued 09/30/08) NORTHWEST CORNER OF COLEMAN AVENUE AND NEWHALL STREET	Non-Residential	20.68	20.68	Under Construction	Stabilized Construction Entrance, Stone Laydown Area, Straw Rolls, Fiber at Inlets for Existing Inlets, New Inlet Protection, Concrete Wash-out Area	Planning / Grading Permits. Follow SWPPP and/or Erosion Control Plan. Applicant / Developer / Consultant / Contractor attend PW Erosion and Sediment Control Training within past 2 years

Project Name & Location	Project Type	Site Size (Ac)	Area of Land Disturbed (Ac)	Project Status	Stormwater Control Measures Included in Project	Requirement Mechanism
EXTRA SPACE SELF STORAGE - SOIL REMEDIATION: GRADING FOR APPROXIMATELY 600 CY EXCAVATION/FILL SITE SOIL REMEDIATION.... (PW # 3-16978 - Issued 10/15/08) NORTHWESTERLY CORNER OF CURTNER AVENUE AND STONE AVENUE	Non-Residential	4.4	0.5	Completed	Standard BMPs	Planning / Grading Permits. Follow BMPs
TRACT NO. 9986: NORTHPOINTE APARTMENTS: TO ALLOW GRADING FOR THE CONSTRUCTION OF 498 APARTMENTS ON A 6.71 GROSS ACRE SITE (TASMAN DR AND ZANKER RD FRONTAGES) (PW # 3-05887 - Issued 10/15/08) NORTHWEST CORNER OF ZANKER ROAD AND TASMAN DRIVE	Residential	6.71	6.71	Inactive	Stabilized Construction Entrance, Fiber Rolls, Concrete Washout, Inlet Protection, Gravel Bags in Gutter, Inlet Filter Bag, Sediment Basin, Drainage Swale. SWPPP (WDID# 243C350279)	Planning / Grading Permits. Follow SWPPP and/or Erosion Control Plan. Applicant / Developer / Consultant / Contractor attend PW Erosion & Sediment Control Training within past 2 years
GRADING FOR GLENVIEW DRIVE PATIO (PDA91-006-81) : GRADING PERMIT TO ALLOW UNCOVERED PATIO, RETAINING WALLS, AND GAZEBO TO AN EXISTING SINGLE-FAMILY RESIDENCE ON A 2.56 GROSS ACRES SITE (PW # 3-18374 - Issued 10/15/08) EAST SIDE OF GLENVIEW DRIVE APPROXIMATELY FEET 1,650 FEET FROM HOLLOW LAKE WAY	Residential	2.5	0.12	Completed	Standard BMPs	Planning / Grading Permits. Follow BMPs
TRACT NO. 10014: MORRISON PARK - EXCAVATION AND GRADING IN SUPPORT OF 250 SINGLE FAMILY ATTACHED UNITS (PW # 3-18129 - Issued 11/07/08) SOUTHWEST CORNER OF CINNABAR STREET AND STOCKTON AVENUE	Residential	4.43	4.43	Not Started	Stabilized Construction Entrance, Entrance/Outlet Tire Wash, Fiber Rolls, Concrete Washout, Inlet Protection SWPPP (WDID# 243C353465)	Planning / Grading Permits. Follow SWPPP and/or Erosion Control Plan. Applicant / Developer / Consultant / Contractor attend PW Erosion and Sediment Control Training within past 2 years
WACHOVIA BANK GRADING: GRADING FOR WACHOVIA BANK. (PW # 3-12873 - Issued 11/07/08) SOUTHERLY CORNER OF COLEMAN STREET AND WEST TAYLOR STREET	Non-Residential	1.1	1.1	Inactive	Stabilized Construction Entrance, Inlet Protection, Fiber Rolls	Planning / Grading Permits. Follow BMPs

Project Name & Location	Project Type	Site Size (Ac)	Area of Land Disturbed (Ac)	Project Status	Stormwater Control Measures Included in Project	Requirement Mechanism
GRADING MCEVOY H07-015 - AUTUMN LLC : TO DEMOLISH EXISTING BUILDINGS AND CONSTRUCT APPROXIMATELY 25,198 SQUARE FEET OF INDUSTRIAL BUILDINGS ON A 1.4 GROSS ACRES SITE (PW # 3-18139 - Issued 11/17/08) SOUTHEAST CORNER OF MCEVOY STREET AND PARK AVENUE.	Non-Residential	1.42	1.35	Under Construction (Grading Complete)	Stabilized Construction Entrance, Inlet Protection, Fiber Rolls, Gravel Bags	Planning / Grading Permits. Follow BMPs
CHURCH EXPANSION: CP07-085 ST. JULIE BILLIART PARISH: TO GRADING FOR CONSTRUCTION OF A 2,950 SF CHURCH EXPANSION (PW # 3-02268 - Issued 11/21/08) SOUTHEAST CORNER OF COTTLE ROAD AND CURIE DRIVE	Non-Residential	3.19	0.11	Not Started	Standard BMPs	Planning / Grading Permits. Follow BMPs
BESHOFF INFINITI - PARKING LOT: GRADING OF PARKING LOT FOR NEW BESHOFF INFINITI DEALERSHIP (PW # 3-06839 - Issued 12/08/08) SOUTH SIDE OF TULLY ROAD, APPROXIMATELY 700 FEET WESTERLY OF CAPITOL EXPRESSWAY	Non-Residential	5.5	1.4	Completed	Standard BMPs	Planning / Grading Permits. Follow BMPs
UMBARGER SQUARE - MONTEREY ROAD RETAIL: GRADING FOR THE RETAIL SITE (PW # 3-18253 - Issued 12/11/08) NORTHEAST CORNER OF MONTEREY ROAD AND UMBARGER ROAD	Non-Residential	2.7	2.7	Under Construction (Grading Complete)	Stabilized Construction Entrance, Fiber Rolls, Inlet Protection	Planning / Grading Permits. Follow SWPPP and/or Erosion Control Plan. Applicant / Developer / Consultant / Contractor attend PW Erosion and Sediment Control Training within past 2 years
TRACT NO. 9981: TO ALLOW GRADING FOR 9 SINGLE-FAMILY ATTACHED RESIDENCES ON 0.34 ACRE SITE. (PW # 3-18116 - Issued 12/19/08) THE NORTHEAST CORNER OF WILLOW GLEN WAY AND CROSS WAY	Residential	0.31	0.31	Inactive	Stabilized Construction Entrance, Fiber Rolls, Concrete Washout, Inlet Protection, Standard BMPs	Planning / Grading Permits. Follow BMPs
3-17335 GR - FOR T06-099: TO ALLOW GRADING FOR 4-UNIT CONDO PROJECT (PW # 3-17335 - Issued 01/07/09) WEST SIDE OF N. 2ND STREET, APPROXIMATELY 350 FEET NORTHERLY OF JACKSON STREET	Residential	0.14	0.14	Not Started	Standard BMPs	Planning / Grading Permits. Follow BMPs

5. PSR: Public Streets, Roads, & Highways

5.A PSR Work Plan Self Evaluation Matrix

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 08-09 STATUS	RESPONSIBLE PARTY
PSR 1	**Implementation of BMPs** The City of San José will implement Best Management Practices (BMPs) for street, road, and highway operation and maintenance (O&M) activities to reduce pollutants in stormwater and eliminate illicit discharges to the maximum extent practicable.			
PSR 1.A	Develop additional BMPs, as needed, when new O&M tasks are instituted.	As Needed	Not needed in FY 08-09.	DOT, ESD
PSR 1.B	Develop SOPs based on BMPs.	As Needed	Not needed in FY 08-09.	DOT, ESD
PSR 1.C	When new BMPs and SOPs are developed, integrate BMPs and standard operating procedures (SOPs) into training program.	As Needed	Not needed in FY 08-09.	DOT, ESD
PSR 1.C.1	Include SOPs listed in PSR 1.D.1 and developed in FY 05-06 into the FY 06-07 training program.	Done FY 06-07	Done FY 06-07.	ESD
PSR 1.D	Staff will review current PSR and SDO BMPs and SOPs. The annual training sessions with staff will be used as an opportunity to evaluate the effectiveness of BMPs and SOPs. BMPs and SOPs will be updated as indicated by the review.	Done FY 04-05 Annually	Done FY 08-09. The current review in the annual training indicated that no new SOPs are necessary. The street sweeping SOPs were reviewed as part of the annual training and evaluation. No revision was needed.	DOT, ESD
PSR 1.D.1	Revise or write the following SOPs: • Sidewalk/Plaza Maintenance: Cleaning, concrete installation and replacement, surface removal and repair; • Bridge and Structure Maintenance: Painting and paint removal, repair work, and graffiti removal; • Median and Road Embankment Maintenance; • Storm Drain Inlet Cleaning; • Storm Drain Line Cleaning; • Management of Storm Drain System Solid Waste; • Pump Station Inspection and Cleaning; • Drainage Ditch Cleaning.	Done FY 05-06	Done FY 05-06.	DOT, ESD, PRNS

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 08-09 STATUS	RESPONSIBLE PARTY
PSR 1.D.2	Include a check box on the WE ICID inspection report form to indicate whether the responsible party in a stormwater complaint is a City employee.	FY 08-09 Ongoing	Due to technical requirements, it was not feasible to include a check box in the WE ICID inspection report form in FY 08-09. A change order for the database WE ICID inspection report form is in the process of being written. This task will be re-evaluated based on the review of the database and carried over into the FY 09-10 work plan if applicable. Inspectors will track this information manually and forward the information to the ESD-UR section for appropriate action.	ESD
PSR 1.D.3	In response to stormwater complaints involving a City employee conducting PSR and SDO O&M activities, the supervisor for the City employee involved in the complaint will be notified.	FY 07-08 Ongoing	Done FY 08-09. The City did not receive any complaints regarding City employees conducting PSR O&M activities for the City. See 5.B*: PSR Program Evaluation* for summary of complaint.	DOT, GS, PRNS, ESD
PSR 1.D.4	Review the existing street sweeping SOP	FY 08-09	Done FY 08-09.	DOT, ESD
PSR 2	**Contractor Use of BMPs** The City of San José will develop and implement a process to ensure that contractors employed to perform street, road, and highway O&M activities use appropriate BMPs per Urban Runoff Management Plan (URMP).			
PSR 2.A	Train contract managers for public street, road, and highway O&M contracts on related stormwater BMPs annually.	Annually	Done FY 08-09. Contract manager training occurred on 06/02/09, 06/04/09, and 06/05/09.	DOT, ESD
PSR 2.A.1	Include a check box on the WE ICID inspection report form to indicate whether the responsible party in a stormwater complaint is a City contractor.	FY 08-09 Ongoing	Due to technical requirements, it was not feasible to include a check box in the WE ICID inspection report form in FY 08-09. A change order for the database WE ICID inspection report form is in the process of being written. This task will be re-evaluated based on the review of the database and carried over into the FY 09-10 work plan if applicable. Inspectors will track this information manually and forward the information to the ESD-UR section for appropriate action.	ESD
PSR 2.A.2	In response to stormwater complaints involving City contractors conducting PSR and SDO O&M activities, the contract manager for the City contract involved in the complaint will be notified.	FY 07-08 Ongoing	Done FY 08-09. The City did not receive any complaints regarding contractors conducting PSR O&M activities for the City.	DOT, GS, PRNS, ESD
PSR 2.B	Develop standard contract language for PSR maintenance activities.	Done FY 05-06	Done FY 05-06.	DOT, ESD
PSR 2.B.1	Send letters to City contractors conducting PSR and SDO O&M activities with a reminder to use appropriate	Done FY 07-08	Done FY 07-08.	DOT, GS, PRNS, ESD

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 08-09 STATUS	RESPONSIBLE PARTY
	BMPs while conducting their work.			
PSR 3	**City Staff Annual Training** The City of San José will provide annual training to its municipal staff in the use of appropriate BMPs. The City will also provide a mechanism for obtaining feedback from staff on the implementation and effectiveness of the BMPs and Control Measures.			
PSR 3.A	Identify training goals, such as improving the focus of the training on the specific BMPs used by a section; integrating new BMPs, if any; etc.	Annually, Q4	Done FY 08-09. Training goals were identified.	DOT, ESD
PSR 3.B	Identify training opportunities (which could include tailgate meetings and other existing training).	Annually	Done FY 08-09. Training opportunities were identified throughout the year for various City departments.	DOT, ESD
PSR 3.C	Create or revise training modules for affected City staff and contractors.	As needed	Done FY 07-08.	DOT, ESD
PSR 3.C.1	Add specific components from DOT Electrical Crew training module to the general DOT Street Crew training module. These components include: asphalt/concrete removal, concrete installation and repair, and mercury lamp recycling and/or disposal.	Done FY 05-06	Done FY 05-06.	ESD
PSR 3.D	Create or revise collateral material based on training modules.	As needed	Done FY 08-09. Presentations were revised as necessary.	DOT, ESD
PSR 3.E	Schedule training with affected supervisors.	Annually	Done FY 08-09. Training for DOT inlet cleaning, DOT Street Maintenance, RPW, and PRNS crews and rangers was scheduled with supervisors for the months of March, May, and June of 2009.	DOT, ESD
PSR 3.E.1	Develop and implement a new training module specifically for DOT electrician staff.	Done FY 04-05	Done FY 04-05.	DOT, ESD
PSR 4	**Notification of Public Agencies** The City of San José will inform other parties (e.g., CalTrans, the County of Santa Clara, and public utilities) conducting street, road, and highway O&M activities within its jurisdiction of the requirements to implement pollutant reduction BMPs and Control Measures in stormwater to the maximum extent practicable and eliminate illicit discharges.			
PSR 4.A	Identify conditions under which another agency will be notified regarding relevant stormwater requirements.	Done FY 02-03	Done prior to FY 02-03. The City notifies other agencies conducting street, road, and highway O&M activities within its jurisdiction of the requirements to implement BMPs and Control Measures on a complaint driven basis. When a complaint is received, a Watershed Enforcement Inspector investigates the complaint and educates the agency on proper BMPs and Control Measures; a citation is issued if necessary. For each complaint the City received involving	ESD

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 08-09 STATUS	RESPONSIBLE PARTY
			other agencies in FY 08-09, Watershed Enforcement investigated the complaint and educated the agency contacts on proper BMPs and control measures to be used when conducting PSR O&M activities within the City.	
PSR 4.A.1	Include a check box on the WE ICID inspection report form to indicate whether the responsible party in a stormwater complaint is another agency.	FY 08-09 Ongoing	Due to technical requirements, it was not feasible to include a check box in the WE ICID inspection report form in FY 08-09. A change order for the database WE ICID inspection report form is in the process of being written. This task will be re-evaluated based on the review of the database and carried over into the FY 09-10 work plan if applicable. Inspectors will track this information manually and forward the information to the ESD-UR section for appropriate action.	ESD
PSR 4.A.2	The City will send letters to other agencies that conduct PSR O&M activities within its jurisdiction informing them of the requirement to implement appropriate BMPs and control measures while conducting their work.	Done FY 06-07	Done FY 06-07.	ESD-WE
PSR 5	**BMP Effectiveness Reviews** As part of the annual review process, the City of San José will review and evaluate the effectiveness of its BMPs in reducing pollutants in stormwater and eliminating illicit discharges. The review and evaluation will include input from the municipal maintenance staff that implement the BMPs.			
PSR 5.A	Draft procedure for annual effectiveness reporting, including sub-procedures for gathering feedback from affected supervisors and for modifications to BMPs and SOPs as necessary.	Done FY 01-02	Done FY 01-02.	DOT, ESD
PSR 5.A.1	Review procedures for annual effectiveness evaluation. Consider obtaining feedback from supervisors on how to assess BMP effectiveness and the use of training sessions with staff as an opportunity to evaluate BMPs and SOPs.	Annually	Done FY 08-09. The annual DOT Stormwater BMP and SOP training was conducted in May and June 2009. Both DOT crews and supervisors attended the training. PSR & SDO BMPs and SOPs were reviewed and feedback was requested during the training sessions. Written evaluations for the training were also distributed. Feedback received in FY 08-09 indicated the existing BMPs and SOPs are effective. See 5.B PSR Program Evaluation for the summary of training evaluation data.	DOT, ESD
PSR 5.B	Conduct evaluation of BMPs and SOPs.	Annually	Done FY 08-09.	DOT, ESD
PSR 5.B.1	Revise the eight SOPs reviewed in FY 06-07 according to comments received during the review process.	Done FY 07-08	Done FY 07-08.	ESD
PSR 5.C	Expand parking restriction signage and enforcement for	Done FY 07-08	Done FY 07-08. The parking restriction signage and	DOT

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 08-09 STATUS	RESPONSIBLE PARTY
	street sweeping by 20 curb miles.		enforcement for street sweeping also expanded in FY 08-09 by 22 curb miles.	
PSR 5.D	Collect street sweeping data: volume and/or weight of debris collected, curb miles swept, and estimated percentage of leaves in yard trimmings collection program.	Ongoing	Done FY 08-09 and ongoing. The volume and/or weight of street sweeping debris collected, curb miles swept, and estimated percentage of leaves in yard trimmings collection program were collected. [See CNAP CB-11]	DOT, ESD
PSR 6	**Rural Public Works Maintenance and Support Activities** The City will extend its control measure strategy for PSR to address water quality impacts resulting from public works maintenance and support activities in rural areas.			
PSR 6.A	Identify City-owned properties that are applicable (under the RPW performance standard).	Ongoing	Done FY 08-09. No new City-owned properties were identified.	ESD, PRNS, DOT, GS
PSR 6.A.1	Re-evaluate the feasibility of using GIS information to identify additional applicable properties, if any.	Done FY 05-06	Done FY 05-06.	PRNS, GS, DOT, ESD
PSR 6.A.2	Some of the roads on the rural roads list compiled in FY 06-07 have portions that are within City limits and portions that are within Unincorporated Areas. Determine exactly which portions of these roads fall within the City's limits.	Done FY 07-08	Done FY 07-08.	DOT. ESD
PSR 6.B	Develop or adapt Standard Operating Procedures (SOPs) and Best Management Practices (BMPs) for rural public works activities.	Done FY 03-04	Done FY 03-04.	PRNS, GS, DOT, ESD
PSR 6.C	Provide annual training on appropriate SOPs/BMPs to City staff that perform rural public works operations and maintenance activities. Incorporate SOPs/BMPs evaluation into annual training.	Annually	Done FY 08-09. RPW training was conducted for PRNS staff in March, May, and June 2009.	PRNS, GS, DOT, ESD
PSR 6.C.1	Evaluate the RPW training schedule in order to coordinate more efficiently with PRNS staff schedules.	Done FY 06-07	Done FY 06-07.	PRNS, ESD
PSR 6.D	Through contract specifications, require contractors hired by the City to use appropriate SOPs/BMPs when performing rural public works construction or maintenance.	Done FY 05-06	Done FY 05-06.	PRNS, GS, DOT, ESD
PSR 6.E	Annually conduct an evaluation of the effectiveness of the rural public works program, report the results in the Urban Runoff Annual Report. Identify items for continuous improvement.	Annually	Done FY 08-09. The RPW BMP and SOP training was conducted in March, May and June 2009. Feedback was requested during the training, and evaluations were distributed. The feedback indicated no modifications to the BMPs and SOPs were necessary. See 5.B: *PSR*	PRNS, GS, DOT, ESD

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 08-09 STATUS	RESPONSIBLE PARTY
			Program Evaluation for the summary of training evaluation data.	

5.B PSR Program Evaluation

Training

The City of San José provides annual training to its municipal staff in the use of appropriate BMPs. The City also provides a mechanism for obtaining feedback from staff on the implementation and effectiveness of the BMPs and control measures. Annual municipal staff training was held between May and June 2009 for the PSR and SDO program elements. Participants completed an evaluation form. Below is a summary of the evaluations based on a 5-point scale with 1 equal to a rating of poor and 5 equal to a rating of excellent:

- Subject Appropriateness – Participants responded with an average rating of 4.40 when asked if the training subjects taught are appropriate to their work.
- BMPs/SOPs Corresponds to work practices – Participants responded with an average rating of 4.41 when asked if current BMPs/SOPs presented correspond to work practices.
- Maintains NPDES Compliance – Participants responded with an average rating of 4.53 when asked if the training adequately explained how City staff help maintain compliance with the Stormwater NPDES permit.
- BMP/SOP Relationship to NPDES – Participants responded with an average rating of 4.49 when asked if the training adequately described the relationship of BMPs/SOPs to compliance with the City's Stormwater NPDES permit.
- Material Organization – Participants responded with an average rating of 4.48 when asked if the training materials were well organized.

The City's control measure strategy for PSR also addresses water quality impacts resulting from public works maintenance and support activities in rural areas. A two-day training was held in March 2009 providing the combination of classroom and field application. Participants were positive about the content and relevance of the training session to their work and particularly appreciated the field exercises.

Classroom training included a review of practical and effective BMPs for road maintenance to protect riparian habitat, aquatic species, and water quality. Field application demonstrated the correct way to properly use and install BMPs such as inlet protection, erosion control blankets, turf reinforcement mats, silt fence, straw wattles, straw bales, and re-vegetation.

Contractor Use of BMPs

In FY 08-09, no complaints were received involving a City of San José contractor conducting PSR or SDO O&M activities. The City includes language in all contracts between the City and contractors conducting PSR and SDO O&M activities requiring the use of BMPs.

Informing Other Agencies

The City of San José makes available to other parties (e.g., San José Water Company, CalTrans, the County of Santa Clara) conducting street, road, and highway O&M activities within its jurisdiction information concerning stormwater requirements for pollutant reduction BMPs and control measures. The City's Watershed Enforcement Division investigates complaints against other agencies and provides the necessary education on proper BMPs and control measures, and issues a citation when necessary.

BMP Effectiveness Review

As part of the annual review process, the City of San José reviews and evaluates the effectiveness of its BMPs in reducing pollutants in stormwater and eliminating illicit discharges. The review and evaluation includes input from the municipal maintenance staff that implements the BMPs. BMP effectiveness is evaluated using staff feedback gathered from training sessions. See training evaluation above.

Street Sweeping Program

The City conducts an extensive Street Sweeping program, involving the sweeping of the central business district; neighborhood business districts; arterials, collectors, and bicycle lanes; and residential streets. Annually, the City sends out a calendar of the residential street sweeping schedule to each single-family dwelling, and asks neighborhood associations within the City to include reminders in their association newsletters for moving parked vehicles on street sweeping days. The City is continuing to expand the areas in which parking restrictions are required and enforced to improve the effectiveness of the street sweeping program. In FY 08-09, the enforcement area broadened from 266.5 to 288.5 curb miles. Due to the budgetary constraints, there is no plan for expansion of the areas in which parking restrictions are required and enforced for street sweeping in FY 09-10. In FY 08-09, an estimated 27,751 cubic yards of debris were collected during all street-sweeping operations. Along with street sweeping, the City has a Yard Trimmings Collection Program. The total amount of yard trimmings collected in FY 08-09 was 131,145 tons of which approximately 44,710 tons were leaves.

5.C PSR Response to Water Board Comments

No comments received from Water Board on this Program Element.

5.D PSR Summary Tables / Additional Information

Parks Included in the Rural Public Works Performance Standard

Name of Park	Location	Acreage	Type of Park
Almaden Lake Park	Almaden Expwy & Coleman	64.9	Regional
Alum Rock Park	Alum Rock & Penitencia Creek	718.0	Regional
Emma Prusch Farm Park	Story & King	43.5	Regional
Guadalupe River Park	Between Hwy 880 and 280 along Guadalupe River in downtown San José	205.0	Regional
Kelley Park	Senter & Story	138.0	Regional
Lake Cunningham Park/Raging Waters	Capitol & Tully	202.0	Regional
Montgomery Hill Park	Yerba Buena & Murillo	59.6	Neighborhood
Overfelt Gardens	Education Park & McKee	32.6	Regional

Rural Roads within the City of San José

Name of Road	Comments
Bailey Avenue	Only a portion of Bailey Road is rural - west of Santa Teresa Avenue to McKean Road.
Casa Loma Road	Casa Loma Road starts at McKean Road and heads west to Rancho Canada del Oro Open Space Preserve. It has no curbs, gutters, or storm drains. A small creek is in the vicinity of the road.
Coyote Creek Golf Course Drive	Coyote Creek Golf Course Drive is a small portion of road leading from the Hwy 101 west bound off ramp to the Coyote Creek Golf

NAME OF ROAD	COMMENTS
	Course. It has no curbs, gutters, or storm drains.
Fleming Avenue	Only a portion of Fleming Avenue is rural - east of Morrie Drive. No curb, gutter, or storm drain is on the end portion of the avenue.
Grand Boulevard	Only a portion of Grand Boulevard is rural - at Los Esteros Road (north of Spreckles Avenue) as it goes to the Don Edwards San Francisco Bay National Wildlife Refuge Environmental Education Center.
Hicks Road	Most of Hicks Road south of Guadalupe Mines Road to City limits has no curbs, gutters or storm drains. Hicks Road meanders in and out of the City limits.
Los Esteros Road	Most of Los Esteros Road has no curbs, gutters, or storm drains. Curbs and gutters are on the road in front of the San José/Santa Clara Water Pollution Control Plant Administration Building.
McKean Road	Only a portion of McKean Road is rural - south of Bailey Avenue to City limits.
Metcalf Road	East of Hwy 101 as the road goes up into the hills. Small portions of Metcalf Road have an asphalt curb. Portions of Metcalf Road are in the City limits and portions are in Unincorporated Area.
Monterey Road	Only portions of Monterey Road are rural. Most of Monterey Road between Live Oak Avenue and Forsum Road has no curbs, gutters, or storm drains. There are some curbs, gutters and storm drains at the intersection of Palm Avenue and also at the Bailey Avenue interchange.
San Felipe Road	Only portions of San Felipe Road are rural. San Felipe Road between Aborn Road and Early Morning Court has curbs, gutters and storm drains. Portions of San Felipe Road after Early Morning Court and to the City limits have an asphalt curb on one side and no curb, gutter or storm drains on the other side.
Santa Teresa Boulevard	Only a portion of Santa Teresa Boulevard is rural - south of Bailey Avenue to City limits.
Sierra Road	Only a portion of Sierra Road is rural – as the road goes up into the east hills. Portions of Sierra Road are in the City limits and portions are in Unincorporated Area.
Sweigert Road	Only a portion of Sweigert Road is rural - northeast of Geist Road there is no curb, gutter, or storm drain as Sweigert Road goes up hill toward private drives.
Zanker Road	Only a portion of Zanker Road is rural - north of the Hwy 237 off ramp to Los Esteros Road has no curbs and gutters except in front of the San José/Santa Clara Water Pollution Control Plant Environmental Services Building.

6. SDO: Storm Drain System Operation & Maintenance

6.A SDO Work Plan Self Evaluation Matrix

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 08-09 STATUS	RESPONSIBLE PARTY
SDO 1	**O&M BMP Implementation** The City of San José will implement best management practices (BMPs) for the storm drain system operation and maintenance (O&M) to reduce pollutants in stormwater to the maximum extent practicable. Specific BMPs for each type of O&M activity are those listed in the City's Urban Runoff Management Plan (URMP).			
SDO 1.A	Develop additional BMPs, as needed, when new O&M tasks are instituted (including structural controls if necessary).	As Needed	Not needed in FY 08-09.	DOT, ESD
SDO 1.B	Develop SOPs based on BMPs.	As Needed	Not needed in FY 08-09.	DOT, ESD
SDO 1.C	When new BMPs and SOPs are developed, integrate BMPs and SOPs into training program.	As Needed	Not needed in FY 08-09.	DOT, ESD
SDO 1.C.1	Include SOPs listed in SDO 1.D.1 and developed in FY 05-06 into the FY 06-07 training program.	Done FY 06-07	Done FY 06-07.	ESD
SDO 1.D	Staff will review current PSR and SDO BMPs and SOPs. The annual training sessions with staff will be used as an opportunity to evaluate the effectiveness of BMPs and SOPs. BMPs and SOPs will be updated as indicated by the review.	Done FY 04-05 Annually	Done FY 08-09. The review in the annual training indicated that no new SOPs are necessary for SDO O&M.	DOT, ESD
SDO 1.D.1	Revise or write the following SOPs: Sidewalk/Plaza Maintenance: Cleaning, concrete installation and replacement, surface removal and repair; Bridge and Structure Maintenance: Painting and paint removal, repair work, and graffiti removal; Median and Road Embankment Maintenance; Storm Drain Inlet Cleaning; Storm Drain Line Cleaning; Management of Storm Drain System Solid Waste; Pump Station Inspection and Cleaning; Drainage Ditch Cleaning. See *PSR 1.D.1*.	Done FY 05-06	Done FY 05-06.	DOT, ESD, PRNS
SDO 1.D.2	Include a check box on the WE ICID inspection report form to indicate whether the responsible party in a	FY 08-09	Due to technical requirements, it was not feasible to include a check box in the WE ICID inspection report form	ESD

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 08-09 STATUS	RESPONSIBLE PARTY
	stormwater complaint is a City employee.	Ongoing	in FY 08-09. A change order for the database WE ICID inspection report form is in the process of being written. This task will be re-evaluated based on the review of the database and carried over into the FY 09-10 work plan if applicable. Inspectors will track this information manually and forward the information to the ESD-UR section for appropriate action.	
SDO 1.D.3	In response to stormwater complaints involving a City employee conducting PSR and SDO O&M activities, the supervisor for the City employee involved in the complaint will be notified.	FY 08-09 Ongoing	Done FY 08-09. The City did not receive any complaints involving City employees conducting PSR and SDO O&M activities.	DOT, GS, PRNS, ESD
SDO 2	**Problem Tracking and Process Improvement** The City of San José will develop and implement processes for tracking problem areas and ensuring that appropriate BMPs and SOPs will be implemented for storm drain operation and maintenance activities.			
SDO 2.A	Implement an annual inspection and cleaning work plan to achieve a Tier II level review.	Ongoing	Done FY 08-09. The FY 08-09 Storm Inlet Cleaning Program was conducted October 2008 – February 2009. For inlet cleaning, DOT schedules and implements the inspection and cleaning on an annual basis. The City achieved a Tier 2 level review for FY 08-09 including follow up inspections for the Alviso area located in north San José. In FY 08-09, a total of 29,823 inlets were inspected and cleaned as needed.	DOT
SDO 2.B	Evaluate criteria for collecting data from City field personnel for the purposes of determining Problem Areas.	As Needed	Not needed FY 08-09.	DOT, ESD
SDO 2.C	Revise documentation and problem area reporting procedure, if necessary, to improve reporting performance. Documentation to include frequency, nature, and type of recurring problem. Include coordination of data from ICID and Storm Drain Management System data sources. Include analysis of data to identify trends for targeting solutions.	As Needed	Not needed FY 08-09.	DOT, ESD
SDO 2.D	Produce Problem Area report.	Annually	Done FY 08-09. FY 08-09 Storm Inlet Cleaning Program Problem Area Report was produced by DOT staff in May 2009.	DOT
SDO 2.E	Address Problem Areas through ICID enforcement/	As Needed	Not needed in FY 08-09.	DOT, ESD

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 08-09 STATUS	RESPONSIBLE PARTY
	education activities, additional BMP development, program development or retrofit.			
SDO 2.E.1	Explore purchasing additional vactor trucks.	Done FY 06-07	Done FY 06-07.	DOT
SDO 3	**Contractor Use of BMPs** The City will develop and implement, as needed, a process to ensure that contractors employed to perform storm drain O&M activities use the appropriate BMPs.			
SDO 3.A	Train contract managers for SDO O&M contracts on related stormwater BMPs.	Annually	Done FY 08-09. Contract manager training occurred on 06/02/09, 06/04/09, and 06/05/09.	DOT, ESD
SDO 3.A.1	Include a check box on the WE ICID inspection report form to indicate whether the responsible party in a stormwater complaint is a City contractor.	FY 08-09 Ongoing	Due to technical requirements, it was not feasible to include a check box in the WE ICID inspection report form in FY 08-09. A change order for the database WE ICID inspection report form is in the process of being written. This task will be re-evaluated based on the review of the database and carried over into the FY 09-10 work plan if applicable. Inspectors will track this information manually and forward the information to the ESD-UR section for appropriate action.	ESD
SDO 3.A.2	In response to stormwater complaints involving City contractors conducting PSR and SDO O&M activities, the contract manager for the City contract involved in the complaint will be notified.	FY 07-08 Ongoing	Done FY 08-09. The City did not receive any complaints regarding contractors conducting PSR O&M activities for the City. See 5.B: PSR Program Evaluation for summary of complaint.	DOT, GS, PRNS, ESD
SDO 4	**Staff Training and BMP Feedback** The City of San José will provide annual training to its municipal staff in use of appropriate BMPs and/or Control Measures. The City will also provide a mechanism for obtaining feedback from staff on implementation and effectiveness of BMPs and Control Measures.			
SDO 4.A	Provide training prior to the rainy season.	Annually, Q4	Done FY 08-09. Training conducted in May and June 2009 for Inlet Cleaning, DOT, and PRNS crews.	DOT, ESD
SDO 4.B	Create or revise training modules for affected City staff.	As Needed	Done FY 07-08. The DOT crew training was revised to reflect the closure of the Main Corp Yard and the new operations located at the Central Service Corp Yard.	DOT, ESD
SDO 4.B.1	Improve the focus of the training on the specific BMPs used by a section.	As Needed	Done FY 08-09.	DOT, ESD
SDO 4.B.2	Provide specific training to inlet cleaning crews on IMSPAR data collection in advance of inlet cleaning program implementation.	Annually	Done FY 08-09. DOT Storm Inlet Cleaning Program crew training was conducted in May and June 2009.	DOT, ESD
SDO 4.B.3	Add specific components from DOT Electrical Crew training module to the general DOT Street Crew training module. These components include: asphalt/concrete	Done FY 05-06	Done FY 05-06.	ESD

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 08-09 STATUS	RESPONSIBLE PARTY
	removal, concrete installation and repair, and mercury lamp recycling and/or disposal.			
SDO 4.C	Produce schedule for training.	Annually	Done FY 08-09. Training for DOT inlet cleaning, DOT Street Maintenance, RPW, and PRNS crews and rangers was scheduled with supervisors for the months of March, May, and June of 2009.	DOT, ESD
SDO 5	**Data Analysis** As part of the annual review process, the City of San José will evaluate data regarding cleaning activities and unusual flows observed during inspection. The review and evaluation will include consideration of storm drain structural retrofit.			
SDO 5.A	Draft procedure for annual review and evaluation of data.	Done FY 01-02	Done FY 01-02.	DOT, ESD
SDO 5.A.1	Collect data on the amount of materials removed during inlet cleaning.	Done FY 04-05 Annually	Done FY 08-09. Data was collected, by DOT crews, on the amount and type of materials removed during the FY 08-09 Storm Inlet Cleaning Program.	DOT, ESD
SDO 5.B	Implement annual data review and identify follow-up actions as appropriate.	Annually	Done FY 08-09. Storm Inlet Cleaning Program Problem Area data was reviewed and possible follow-up actions were identified. See 6.B: *SDO Program Evaluation.*	DOT, ESD
SDO 5.B.1	Re-evaluate how follow-up is conducted by crews when "cars on catch basins" is identified on the IMSPAR report, in order to better understand to what extent parked cars are a barrier to cleaning.	Done FY 06-07	Done FY 06-07.	DOT, ESD
SDO 5.B.2	Evaluate "cars on catch basins" data to see if it can be used as one of the factors in determining where future posted signage for street sweeping restrictions will be installed.	Done FY 06-07	Done FY 06-07.	DOT, ESD
SDO 5.B.3	Evaluate how to integrate the results of the IMSPAR report, regarding garbage and high debris, into scheduling additional cleaning.	Annually	Done FY 08-09. No additional cleaning was conducted in FY 08-09.	DOT, ESD
SDO 5.B.4	Re-evaluate use of hand held devices to collect data during storm drain inlet cleaning and potentially other maintenance activities.	Done FY 07-08	Done FY 07-08.	DOT, ESD
SDO 6	**BMP Effectiveness Reviews** As part of the annual review process, the City of San José will review and evaluate the effectiveness of its BMPs in reducing pollutants in stormwater and eliminating illicit discharges.			
SDO 6.A	Review with supervisors to get feedback and	As Needed	Done FY 08-09. DOT supervisors attended annual training. Evaluations were distributed to elicit information	DOT, ESD

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 08-09 STATUS	RESPONSIBLE PARTY
	information on how to assess BMP effectiveness.		on BMP and SOP effectiveness. Feedback received indicates that the BMPs and SOPs are effective.	
SDO 6.B	Use annual training sessions with staff as an opportunity to evaluate the effectiveness of BMPs and SOPs.	Annually	Done FY 08-09. The annual DOT Stormwater BMP and SOP training was conducted in May and June 2009. Both DOT crews and supervisors attended the training. PSR & SDO BMPs and SOPs were reviewed and feedback was requested during the training sessions. Written evaluations for the training were also distributed. Feedback received indicated that the existing BMPs and SOPs are effective and no modifications to SDO SOPs were necessary in FY 08-09. See 6.B: *SDO Program Evaluation* for the summary of training evaluation data.	DOT, ESD

6.B SDO Program Evaluation

Training

The City of San José provides annual training to its municipal staff in the use of appropriate BMPs. The City also provides a mechanism for obtaining feedback from staff on the implementation and effectiveness of the BMPs and control measures. Annual municipal staff training was held in May and June 2009 for the Storm Drain Inlet Cleaning program. Participants completed an evaluation form. Below is a summary of the evaluations based on a 5-point scale with 1 equal to a rating of poor and 5 equal to a rating of excellent:

- Subject Appropriateness – Participants responded with an average rating of 4.40 when asked if the training subjects taught are appropriate to their work.
- BMPs/SOPs Corresponds to work practices – Participants responded with an average rating of 4.41 when asked if current BMPs/SOPs presented correspond to work practices.
- Maintains NPDES Compliance – Participants responded with an average rating of 4.53 when asked if the training adequately explained how City staff help maintain compliance with the Stormwater NPDES permit.
- BMP/SOP Relationship to NPDES – Participants responded with an average rating of 4.49 when asked if the training adequately described the relationship of BMPs/SOPS to compliance with the City's Stormwater NPDES permit.
- Material Organization – Participants responded with an average rating of 4.48 when asked if the training materials were well organized.

Storm Inlet Cleaning Program Data Review

The City reviews data on cleaning activity via the Infrastructure Maintenance Division Storm Drain System Problem Area Report (IMSPAR), developed in FY 04-05 for the Storm Inlet Cleaning program. IMSPAR tracks inlet and catch basin problems associated with debris, access, and construction. IMSPARs increased about 4.5 percent from last year, accounting for approximately 2,200 or about 7 percent of the City's storm drain inlets and catch basins.

Review of the data indicated more than 1,200 or about 55 percent of the reported problems were operational challenges such as access to storm inlets, while only 537 or 24 percent of the problems are associated with different types of debris. Construction activities make up the fewest reported problems at 452 or 21 percent.

Key problems included:

- Vehicles parked over catch basins (41.3 percent) – Over 900 of the problems reported were attributed to access caused by vehicle obstruction. During review, the City considered options for minimizing parked cars but concluded that sign posting would be cost prohibitive at this time. Currently, staff returns to these catch basins at least once for subsequent cleaning attempts.
- Abandoned silt sacks (18.5 percent) – Construction issues related to abandoned silt sacks accounted for the second most frequent problem encountered by cleaning crews.
- Natural debris (15.5 percent) – natural debris such as leaves, roots, lawn clippings, and dirt in excess of 3 feet deep in catch basin accounted for the third most reported problems.
- Cannot locate (9.8 percent) – crews unable to locate catch basin accounted for nine percent of the reported problems.
- Garbage (7.3 percent) – crews reported 115 incidents were the volume of garbage (paper, bottles, cans, and other man-made waste) was in excess of a full grocery bag.
- Other (7.6 percent) – crews reported 84 occurrences in which they were unable to open an inlet, 44 occurrences related to various types of construction activity, and 39 combined occurrences of other types of issues reported by cleaning crews.

The City assessed nearly 30,000 inlets in FY 08-09 and removed an estimated 430 cubic yards of debris. The City has removed on average about 400 cubic yards per year over the past three years.

DOT acquired funding in FY 07-08 for the purchase of four (4) combination cleaner trucks. Combination cleaner trucks can both vacuum out and water jet catch basins and sewer lines. The order of four combination cleaner trucks was placed and received in FY 07-08. DOT ordered and received two (2) additional combination cleaner trucks in FY 08-09, increasing the total to six (6) new vehicles over the past two years.

BMP Effectiveness

As part of the annual review process, the City of San José reviews and evaluates the effectiveness of its BMPs in reducing pollutants in stormwater and eliminating illicit discharges. BMP effectiveness is evaluated using staff feedback gathered from training sessions. See 6.B PSR Program Evaluation, BMP Effectiveness Review for results.

7. WUOM: Water Utilities Operations & Maintenance

7.A WUOM Work Plan Self Evaluation Matrix

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 08-09 STATUS	RESPONSIBLE PARTY
WUOM 1	**Inventory of O&M Activities** The City of San José's Municipal Water System will conduct an inventory of all-key operations and maintenance activities, and identify routine and unplanned non-stormwater discharges from these activities. This inventory will be conducted every three years and evaluated at least once a year.			
WUOM 1.A	Review current procedures for operations and maintenance.	Annually	Done FY 08-09. The current procedures have been reviewed and no change is recommended at this time.	ESD-Muni
WUOM 1.B	Three-year update of list.	Done 3/31/06 03/31/09	Done 3/09. Next inventory due date contingent on pending MRP.	ESD-Muni
WUOM 2	**Implementation of WUPPP** The City of San José's Municipal Water System will implement the pollution control measures identified in the Water Utility Pollution Prevention Plan (WUPPP) to manage chlorine, biocides, and algaecides and prevent erosion and sedimentation.			
WUOM 2.A	Implement WUPPP/Report on activities	Ongoing	Done FY 08-09. WUPPP was implemented in 2000. Municipal Water staff and their contractors comply with the BMPs and SOPs included in the WUPPP.	ESD-Muni
WUOM 3	**Staff Training and Contractor WUPPP Compliance** The City of San José's Municipal Water System will conduct annual training for municipal staff and coordinate WUPPP elements with water utility project planning, including WUPPP elements (BMPs, conditions, specifications, etc., in contract and services agreements).			
WUOM 3.A	Implement training program.	Annually, Q2	Done December 2008. See 13.D: *Municipal Employee* Training Summary.	ESD-Muni
WUOM 4	**WUPPP Effectiveness Evaluation** The City of San José's Municipal Water System will evaluate the effectiveness of the WUPPP annually. Maintain accurate documentation and revise the WUPPP as necessary.			
WUOM 4.A	Evaluation effectiveness of program.	Annually, Q4	Done FY 08-09. Municipal Water evaluates BMPs and SOPs annually. See 7.B: *WUOM Program Evaluation*.	ESD-Muni

7.B WUOM Program Evaluation

The City's Municipal Water System evaluation process consists of reviewing BMPs and SOPs on an annual basis. Processes for BMPs and SOPs were reviewed and discussed during the annual training held in December 2008. Staff found the procedures to be satisfactory and effective for meeting the goals of the URMP. No changes were recommended at this time. Surveys conducted at the annual training indicate current BMPs and SOPs are clear, adequate, workable, and effective.

In addition to the annual BMP review and training, staff from both Municipal Water System and Environmental Services conducted a review of the City's Water Utility Operations and Maintenance Discharge Pollution Prevention Plan (WUDPPP) with that of the Santa Clara Valley Urban Runoff Pollution Prevention Program WUDPPP. It was determined that the City's WUDPPP is consistent with the guidance provided in the Santa Clara Valley Urban Runoff Pollution Prevention Program's WUDPPP.

7.C WUOM Response to Water Board Comments

No comments received from Water Board on this Program Element.

7.D WUOM Summary Tables / Additional Information

Inventory of Potential Water Utility Discharges

Instructions: This inventory is to be performed by the Municipal Water System Division at least once every three years, as required by the Water Utility O&M Discharge Performance Standard. It is modeled on the Santa Clara Valley Urban Runoff Pollution Prevention Program's model inventory. A separate inventory shall be performed in each service zone (North S.J., Evergreen, Edenvale, Coyote, South Bay Water Recycling). Not all discharge and information categories will apply (such as raw water discharges and the locations of hydrant flushing). For additional guidance on completing this inventory, see the inventory given in Appendix C-1 of the San José Water Utility Operation and Maintenance Discharge Pollution Prevention Plan.

Discharge Activity	Discharge Location	Estimated Quantity	Estimated Rate (g.p.m.)	Estimated Frequency (per year)	Planned / Unplanned	Known Chemical Additives
SJMWS – COYOTE

8. PM: Pesticide Management

8.A PM Work Plan Self Evaluation Matrix

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 08-09 STATUS	RESPONSIBLE PARTY
PM 1	**Integrated Pest Management** The City will adopt an Integrated Pest Management (IPM) policy and/or ordinance requiring use of IPM techniques in the agency's operations, and, minimization of pesticide use, particularly organophosphate and copper-based pesticides, by agency staff and contractors.			
PM 1.A	Develop a City IPM policy for inclusion in Pesticide Management Plan.	Done FY 02-03	Done FY 02-03	ESD
PM 2	**Pesticide Management Plan** The City will develop and implement a Pesticide Management Plan with the goals of minimizing pesticide use and reducing the amount of pesticides in stormwater and landscape runoff to the maximum extent practicable.			
PM 2.A	Draft a City of San José Pesticide Management Plan.	Done FY 01-02	Done FY 01-02	ESD
PM 2.B	Publish City Pesticide Management Plan in URMP.	Done FY 01-02	Done FY 01-02.	ESD
PM 3	**IPM SOPs and BMPs** The City will develop and implement standard operating procedures (SOPs) and best management practices (BMPs) for implementing the IPM Policy			
PM 3.A	Develop SOPs and BMPs for implementing IPM policy with provisions that will reduce water quality impacts from pesticide use.	Done FY 01-02	Done FY 01-02	GS, DOT, ESD, PRNS
PM 3.B	For each type of pest problem identified, seek model SOPs and BMPs from published literature.	Done FY 01-02	Done FY 01-02	GS, DOT, ESD, PRNS
PM 3.C	Incorporate or develop appropriate IPM measures into City SOPs and BMPs.	Done FY 02-03	Done FY 02-03.	GS, DOT, ESD, PRNS
PM 3.C.1	Pilot the use of additional IPM techniques, e.g., for weed control.	FY 06-07 Ongoing	Done FY 08-09 and ongoing. See 8.B: *PM Program Evaluation*	GS, DOT, ESD, PRNS
PM 3.D	Update City URMP to incorporate model Pest Management Performance Standard, including description of legal authority (IPM policy and contract language), work plan elements, BMPs, and SOPs needed for implementation.	Done FY 02-03	Done FY 02-03	ESD
PM 3.E	Review and update City SOPs and BMPs as appropriate.	As Needed	The Pesticide Management Committee determined that no updates were required for FY 08-09	GS, DOT, ESD, PRNS

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 08-09 STATUS	RESPONSIBLE PARTY
PM 3.F	Develop Approved Pesticide List for applications on City property.	FY 06-07 Ongoing	Done FY 08-09 and ongoing. The PMC developed a list in draft form and will revise as needed.	PRNS, DOT, GS, ESD
PM 3.F.1	Revise SOPs and BMPs to reflect use of Approved Pesticide List.	FY 06-07 Ongoing	Done FY 08-09 and ongoing. The PMC determined that no updates were required for FY 08-09, pending revisions to Approved Pesticide List.	PRNS, DOT, GS, ESD
PM 4	**City Employee Training** The City will ensure that employees receive pest management training by implementing the following: • Employees who apply pesticides for the City will obtain the appropriate training as required by County Agricultural Commissioner and State Department of Pesticide Regulation (DPR); • Employees within departments responsible for pesticide application will receive annual training on appropriate portions of City IPM Policy, SOPs, and BMPs, and latest IPM techniques; • Employees who are not authorized to apply pesticides will be annually trained not to use over-the-counter pesticides at workplace, consistent with IPM Policy. • Annual internal outreach will be conducted to employees, who do not necessarily purchase or apply pesticides during their course of work, on less toxic pest control and to encourage employees to use IPM techniques away from work.			
PM 4.A	Ensure that employees who apply pesticides for the agency obtain appropriate training required by County Agricultural Commissioner and State Department of Pesticide Regulation.	Annually	Done FY 08-09. Employees received training on January 27, 2009 on the specific types of pesticides used by the City. Training is provided annually and meets State DPR requirements. Additional training is done throughout the year for new employees prior to using pesticides or if new pesticides, which were not covered in the annual training, are introduced. See 13.D: *Municipal Employee Training Summary* for summary of attendance.	GS, DOT, PRNS
PM 4.B	Provide annual training on IPM Policy, SOPs and BMPs, and latest IPM techniques to employees within departments responsible for pesticide application.	Annually	Done FY 08-09. Employees received training on January 27, 2009. Training topics included safety, City IPM Policy, SOPs and BMPs, IPM techniques, and IPM pilot projects. This material was also communicated in the SWPPP, PSR/SDO, and RPW municipal compliance trainings. See 13.D: *Municipal Employee Training Summary* for summary of attendance.	GS, DOT, ESD, PRNS
PM 4.C	Annually inform employees who are not authorized/ trained to apply pesticides not to use over-the-counter pesticides at the workplace, consistent with IPM Policy.	Ongoing	Done FY 08-09. Notification that untrained staff are not to utilize over-the-counter pesticides in the workplace was provided at trainings and in a notice e-mailed to all City staff from the Director of Communications in June 2009.	GS, DOT, ESD, PRNS
PM 4.D	Monitoring Mechanism I.B.1. Document and evaluate	Annually	Done FY 08-09. The training required for certificates and	GS, DOT, ESD, PRNS

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 08-09 STATUS	RESPONSIBLE PARTY
	effectiveness of staff training conducted each year in annual report.		licenses is reviewed and approved for continuing education units by the DPR. This ensures that it is valuable and effective for applicators. The City also evaluated the effectiveness of the annual training with a post-class evaluation/survey. The results were compiled and discussed amongst training organizers and will be used to implement improvements for the next training. See 8.B: *PM Program Evaluation* for a summary of evaluation results.	
PM 4.D.1	Update class evaluation/survey for IPM training classes conducted by City staff.	As Needed	Done FY 08-09. The appropriate updates were made to the evaluation form to reflect content of training.	GS, DOT, ESD, PRNS
PM 4.E	Public Education and Outreach Task II.A.14 Conduct internal outreach on less toxic pest control to employees who do not necessarily purchase or apply pesticides during the course of their work (to encourage employees to use IPM techniques away from work).	Annually	Done FY 08-09. The annual IPM Policy notice sent to all City employees in June 2009 included less toxic pest control information. Additionally, a Stormwater/Pesticide Management page is located on the City's new Intranet site for employees.	ESD
PM 5	**Contractor Pesticide Management Requirements** The City will develop and implement a process to ensure that contractors employed to conduct pest control and pesticide application on municipal property engage in pest control methods consistent with City IPM Policy. Specifically, the City will require contractors to: • follow City IPM policy, BMPs, and SOPs; • provide evidence of current IPM training, when feasible; and • provide documentation of pesticide use on City property to the City in a timely manner.			
PM 5.A	Ensure that contractors employed to conduct pest control/pesticide application on municipal property engage in methods consistent with City IPM policy.	Ongoing	Done FY 08-09.	GS, DOT, ESD, PRNS, PW, RDA
PM 5.B	Review and update a list of all contractors employed by the City who perform pesticide application work.	Annually	Done FY 08-09.	GS, DOT, ESD, PRNS, PW, RDA
PM 5.C	Implement a procedure to provide to each contractor a copy of the City's IPM policy.	Done FY 02-03	Done FY 02-03.	GS, DOT, ESD, PRNS, PW
PM 5.D	City will supply copies of pest specific BMPs and SOPs to contractors. Contractors will self certify their compliance with the City SOPs and BMPs.	Ongoing	Done FY 08-09.	GS, DOT, ESD
PM 5.E	Require through contract specifications that PCOs contracted for municipal applications use pest control	Ongoing	Done FY 08-09.	GS, DOT, ESD, PRNS,

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 08-09 STATUS	RESPONSIBLE PARTY
	methods consistent with City's IPM Policy. Specifically, require contractors to: a) follow City IPM policy, BMPs and SOPs; b) provide evidence of current IPM training, when feasible; and c) provide documentation of pesticide use on City property to the City in a timely manner.			
PM 5.E.1	City will develop standard content for PCO contracts.	Done FY 04-05	Done FY 04-05.	GS, DOT, ESD, PRNS
PM 5.E.2	City will implement standard content for PCO contracts.	Done FY 05-06 Ongoing	Done FY 08-09.	GS, DOT, ESD, PRNS
PM 5.F	Invite contractors to participate in City training sessions on pesticide management.	FY 05-06 Ongoing	Done FY 08-09.	GS, DOT, PRNS
PM 5.G	Monitoring Mechanism III.A.1. Document number of PCOs receiving presentations and/or training on pesticide use by PCOs on municipal property.	Annually	Done FY 08-09.	GS, ESD
PM 6	**Pesticide Management Outreach** The City will identify in annual work plan outreach activities it will conduct consistent with Program Pesticide Management Plan. Work plan elements will address outreach to residential and commercial pesticide users, pesticide retailers, and special districts. Information will be provided on less-toxic pest control practices, proper disposal of pesticides, and the City's own IPM practices, as applicable.			
PM 6.A	Increase awareness of target audiences regarding proper pesticide use, disposal methods, water quality impacts, and less toxic pest management messages. Target audiences include commercial and residential pesticide users, pesticide retailers, municipal employees, and special districts.	Ongoing	Done FY 08-09. The City participates in the Our Water Our World (OWOW) campaign, and the Program's Watershed Watch campaign. Both campaigns deliver IPM messages. See 14.D: *PIP Activities Table* and Outreach Materials Distributed Table for more details.	ESD
PM 6.B	Prepare IPM stories and press releases to local media.	As Needed	Done FY 08-09. Media advisories were issued regarding IPM grazing projects. The story received coverage by local and national media. In addition, OWOW ads were placed in multiple publications. See Program Annual Report and 14.D: *PIP Activities Table* for details.	ESD
PM 6.C	In conjunction with Program, City will provide information on less toxic pest control (e.g., IPM techniques, municipal IPM policies, model contract language, training opportunities, etc.) to neighboring special districts (e.g., VTA, sanitary and utility districts, open space districts, vector control districts, and school districts) as appropriate.	As Needed	See Program Annual Report.	ESD

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 08-09 STATUS	RESPONSIBLE PARTY
PM 6.D	Create and provide fact sheets and materials to pesticide retailers to facilitate point-of-purchase outreach to support IPM Store Partnership Program.	Ongoing	Done FY 08-09 through Program and BASMAA's OWOW Campaign. See Program Annual Report and 14.D: *PIP Activities Table* for details.	ESD
PM 6.E	Monitoring Mechanism: Document or estimate numbers of residents reached by outreach efforts, including events, web promotion, municipal employee outreach, and media advertising. Monitor responses to outreach efforts by documenting calls to the Program's general and watershed campaign hotlines.	Annually	Done FY 08-09. See Program Annual Report and 14.D: *PIP Activities Table* for evaluation of outreach activities.	ESD
PM 6.F	Co-host regional IPM conference to promote implementation of IPM practices in municipal operations in the City and Bay Area region.	Done FY 06-07	Done FY 06-07.	ESD, PRNS, DOT, GS
PM 6.G	Monitoring Mechanism IV.A.1. Document outreach efforts targeting businesses, recommended in the work plan, to be developed by the Program. Implement evaluation component of the work plan.	Annually	Done FY 08-09. See Program Annual Report and 14.D: *PIP Activities Table* for evaluation of outreach activities.	ESD
PM 7	**HHW Pesticide Disposal** The City will coordinate with household hazardous waste (HHW) collection agencies to support, enhance, and help publicize programs for proper pesticide disposal.			
PM 7.A	Work with HHW collection agencies to support, enhance, and publicize programs for pesticide disposal.	Ongoing	Done FY 08-09 and ongoing. This work is done at the Program level. See Program Annual Report for details.	ESD
PM 7.B	Ensure that adequate pesticide disposal services exist for residents and conditionally exempt small quantity commercial generators.	Annually	Done FY 08-09. Adequate pesticide disposal services exist through the County's Household Hazardous Waste and Conditionally Exempt Small Quantity Generators programs. The programs collected over 283,000 pounds of poison liquids, solids, and diazinon/dursban.	ESD
PM 7.C	Provide hazardous waste disposal information to residents, through distribution of materials (e.g., utility bill insert, city newsletter, community events, etc.) or advertising in local media.	Ongoing	Done FY 08-09 and ongoing. Hazardous waste disposal information is provided on the City's website along with a link to the Santa Clara County HHW Program's website. The City's Integrated Waste Management (IWM) outreach includes the Santa Clara County HHW Program's hotline. ESD-WP staff also distributed materials on HHW at community events. See 14.D: *PIP Activities Table*	ESD
PM 7.D	Monitoring Mechanism V.A.1. Document that HHW collection programs adequately serve residents and businesses and that exchange programs do not exchange organophosphate or banned pesticides.	Annually	Done FY 08-09. The HHW Program does not exchange organophosphate or banned pesticides.	ESD
PM 8	**City Pesticide Use Tracking**			

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 08-09 STATUS	RESPONSIBLE PARTY
	The City will develop and implement a process for tracking pesticide use on municipally-owned property.			
PM 8.A	Develop and implement a pilot pesticide tracking process for Diazinon and Chlorpyriphos products.	Done FY 01-02	Done FY 01-02.	GS, DOT, ESD
PM 8.B	Track pesticide use on municipally owned property. Include reporting and justification for use of OP pesticides and BMPs employed during OP pesticide use.	Ongoing	Done FY 07-08 and ongoing. Neither the City nor its contractors purchased, used, or wrote recommendations for the use of OP pesticides on municipal property. Contracts for structural pest control include requirements for reporting and justification of use of OP pesticides and BMPs employed during OP pesticide use in the contract specifications.	GS, DOT, ESD, PRNS
PM 8.B.1	Evaluate feasibility of implementing electronic data management system for pesticide use.	Done FY 04-05	Done FY 04-05.	GS, DOT, ESD
PM 8.B.2	Implement electronic data management system for tracking pesticide use on City property.	Done FY 04-05 and Ongoing	Done FY 08-09. A database was used to track pesticide use on municipal property by City staff and contractors.	GS, DOT, ESD, PRNS
PM 8.C	Monitoring Mechanism I.A.1. Document completion of tasks in annual reports. Use pesticide tracking process to document pesticide use.	Annually	Done FY 08-09. Monthly pesticide use reports submitted by contractors were compiled and reviewed. See 8.B: *PM Program Evaluation*.	GS, DOT, ESD, PRNS, PW
PM 9	**City Pesticide Inventory Search** The City will conduct periodic Citywide search of its chemical inventory for pesticides no longer legal for application per EPA, State, and/or local requirements. These pesticides, if found, will be properly disposed pursuant to appropriate waste disposal regulations.			
PM 9.A	Conduct Citywide search of chemical storage areas for pesticides no longer legal for application per EPA, State, and/or local requirements. Properly dispose of any such pesticides pursuant to appropriate waste disposal regulations.	Annually	Done FY 08-09. Searches were conducted and no expired or illegal pesticides were found.	GS, DOT, PRNS
PM 10	**Pesticide Management Plan / IPM Policy Review** As part of annual reporting process, the City will review and evaluate, with input from municipal staff, the effectiveness of its Pest Management Plan and IPM Policy in achieving the goals of the Plan to the maximum extent practicable.			
PM 10.A	Review and continuously improve goals, actions, and monitoring mechanisms of the work plan considering results of self-evaluations, comments from Water Board staff and other interested parties, and results of local performance review meetings, if any.	Annually	Done FY 08-09. See 8.B: *PM Program Evaluation*.	GS, DOT, ESD, PRNS, PW
PM 10.B	**Monitoring Mechanism IX.A.1.** Complete revised work plan that incorporates continuous improvement items, and report on completion of work plan tasks.	Annually	Done FY 08-09.	GS, DOT, ESD, PRNS, PW

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 08-09 STATUS	RESPONSIBLE PARTY
PM 10.C	**Monitoring Mechanism VII.A.1.** Summarize types of pesticide reduction measures required (such as by conditions of approval) for new development and significant redevelopment projects, and percentage of new development/ significant redevelopment projects for which pesticide reduction measures were required. (Draft Permit Provision C.3.n.)	Annually	Done FY 08-09. See NRD 5.G in *Work Plan Self Evaluation Matrix*.	PW, ESD

8.B PM Program Evaluation

Integrated Pest Management

San José continued to apply proven and innovative IPM techniques to address municipal pest problems in FY 08-09. In August 2008, San José became the first government agency to adopt a "Cities Keep it Clean" Resolution, committing to work cooperatively with Save the Bay and other programs to implement IPM techniques to significantly reduce City use of pesticides that pollute local waterways. IPM methods employed included the application of mulch to landscapes as a water-saving weed barrier, the selection of native and disease-resistant plants, the use of power washing to remove moth cocoons from trees, the release of parasitic wasps to control moths, manually trapping and removing squirrels and other rodents, and favoring tree injections over broadcast spraying when feasible. In many instances, cosmetic pest problems were tolerated rather than addressed with pesticides. The decision to use a pesticide was determined by several factors, including: site evaluation; identification of pest; monitoring; development of threshold and tolerance level to pest; review of alternative means of control; and when necessary, selection of the least-toxic and effective pesticide.

In FY 08-09, San José expanded its grazing program from 67 acres to nearly 600 acres in an effort to avoid the use of pesticides. The use of approximately 77 pounds of pesticides was avoided in FY 08-09 by using goats and sheep to graze City lands. The San José/Santa Clara Water Pollution Control Plant (WPCP) implemented ongoing, year-round grazing in an effort to also reduce mowing and maintain landscape in sensitive habits (including burrowing owl habitat). Other grazing sites included Zone 3 Municipal Water Reservoir, three areas within Alum Rock Park, three DOT sites in the Evergreen area, and Guadalupe River Park and Gardens. See 8D: *IPM Pilot Programs Map*. Grazing efforts in FY 08-09 were estimated to cost approximately 45 percent more than traditional land management methods (herbicide application and/or mowing), but San José is committed to investing in sustainable efforts that result in water quality benefit and the City will continue to monitor and evaluate grazing as a viable strategy for maintaining property. San José's grazing projects were featured by eleven different media outlets, ranging from newspapers (the Mercury News, Sacramento Bee, Santa Cruz Sentinel, Miami Herald, and USA Today) to local television (KPIX, KRON, KTVU, and KNTV) and various internet sites.

In FY 07-08, the City installed 30 barn owl boxes and 8 bat boxes in parks and community gardens in an effort to encourage natural predation of pests. Staff continued to monitor the boxes throughout FY 08-09, documenting limited usage to date. Since the best available information recommends allowing a few years for the intended species to become accustomed to utilizing the boxes, staff will continue monitoring at least through FY 09-10 before consideration to relocate boxes. See 8D: *IPM Pilot Programs Map*.

Data Tracking

The City's pesticide tracking database was developed and implemented in FY 04-05. Pesticide use reporting is organized into four categories: City Applications; Golf Courses; Facilities; and DOT Special Districts. Since FY 04-05, the City has improved data collection methods every year to provide a more complete picture of pesticide use. For that reason, usage for some years is not directly comparable to usage for previous years, as described below:

- City Applications usage is directly comparable from FY 06-07 to FY 08-09;
- Pesticide tracking for golf courses has remained consistent since FY 04-05 and data from each FY is directly comparable;
- Facilities usage is directly comparable from FY 07-08 to FY 08-09 (chemicals used to treat fountains and pools in relatively large doses were not captured prior to FY 07-08); and
- Special Districts tracking has remained consistent since FY 06-07 and data from each FY is directly comparable.

San José will continue collecting pesticide use data from all City sources, which will increase the availability of accurate and comparable data.

Pesticide Use

While notable decreases were documented in the use of pesticides of concern (pesticides with known carcinogenic effects, reproductive toxicity, and/or CA Prop 65 listed), total Citywide pesticide use increased by 3.5 percent (211 pounds) in the last year. Utilizing total pesticide use as a pollution prevention indicator is problematic for a number of reasons. An increase in use is likely attributable to the addition of City property requiring maintenance (new parks and facilities) and more comprehensive reporting of pesticide use in FY 08-09. In addition, the City recently started tracking calcium hypochlorite and sodium hypochlorite, which are applied in large quantities (1,248 pounds in FY 08-09) to disinfect fountains and swimming pools. These chemicals pose little-to-no risk to surface water quality since they are contained in facilities that are plumbed to the sanitary sewer system. Tracking these chemicals as a part of total pesticide use complicates analysis since pesticides of greatest concern to surface water quality are used in quite small quantities.

Pesticide use highlights include:

- San José continues to avoid the use of organophosphates;
- Use of pyrethroids decreased by 78 percent in FY 08-09 in large part to the stocking of less-toxic, organic alternatives at the Central Service Warehouse;
- San José has traditionally used very limited quantities of Fipronil and use continued to decrease (by 59 percent) in FY 08-09;
- Use of glyphosphate herbicides (Roundup, Rodeo, and Aquamaster) decreased by 5 percent in FY 08-09;
- San José used Carbaryl (14 ounces) for the first time in FY 08-09 to effectively manage wasp and hornet nests.

Outreach

San José participates in regional collaborative efforts to provide educational outreach to residential and commercial pesticide users and pesticide retailers. BASMAA's OWOW campaign continued to increase pesticide awareness of target audiences regarding proper pesticide use, water quality impacts, and less-toxic pest management methods. Additionally, the Program's Watershed Watch campaign was recognized for its efforts to provide pesticide user outreach with a CASQA award and an IPM Innovator Award from the California Department of Pesticide Regulation.

The Program's Watershed Watch campaign continued facilitating the Santa Clara Valley Green Gardener training program to provide education on resource conservation, pollution prevention, and waste reduction to landscape maintenance professionals. Last year, four Green Gardener courses were offered (two English and two Spanish), with 51 participants graduating from the program. In addition, the IPM Store Partnership Program celebrated its 10th year of coordination with Orchard Supply Hardware providing point-of-purchase outreach to help customers chose less-toxic home and garden supplies. Home Depot signed on to the IPM Store Partnership Program this fiscal year and will begin providing IPM outreach to customers next fiscal year. See the Program's Annual Report for details.

Training

In January, San José held its annual pesticide safety and IPM training, which was attended by 110 staff. Evaluations, completed by 102 participants, provided the following assessment of the program:

- 91 percent indicated the overall training experience was good or excellent;
- 94 percent indicated the training adequately described the City's IPM policy;
- 87 percent indicated the BMPs/SOPs presented match their work practices;
- 87 percent indicated the training adequately described the relationship of BMPs/SOPs to compliance with the City's Stormwater NPDES permit; and
- 87 percent indicated the training adequately explained how they, as City staff, could help the City maintain compliance with the Stormwater NPDES permit.

The overall training rating continued to improve this year and additional IPM training materials, including a video, were well received. However, participants gave slightly lower scores to the segment of the training that focused on the NPDES Stormwater permit and its relation to IPM policy. This evaluation will help staff develop future trainings.

8.C PM Response to Water Board Comments

No comments received from Water Board on this Program Element.

8.D PM Summary Tables / Additional Information

IPM Pilot Programs Map

Pesticide Use at City Facilities

9. M: Mercury

9.A M Work Plan Self Evaluation Matrix

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 08-09 STATUS	RESPONSIBLE PARTY
M 1	**Municipal Use of Mercury –Containing Products** The City will eliminate all unnecessary municipal use of mercury-containing products and establish proper disposal methods for products that cannot be eliminated.			
M 1.A	Implement SCVURPPP guidelines for mercury-containing product reduction and management. These guidelines include a schedule for the timely phase-out of mercury-containing products identified for virtual elimination as well as reporting requirements, possibly to track recycling, replacement, and reduction in use of mercury-containing products.	Ongoing	Done FY 08-09 and ongoing. See 9.D: *Mercury-Containing Product Management Practices* for a listing of the City's management strategies. The City continued its municipal alkaline and rechargeable battery recycling program in all City facilities. Ten major facilities have collection directly from the vendor; the remainder deliver collected batteries to a central collection point. City facilities collected 7,852 pounds of batteries for proper disposal. See 9.B. *Program Evaluation* for details.	ESD, GS
M 1.A.1	Collect and dispose of mercury-containing lamps generated in City-owned facilities	Ongoing	Done FY 08-09 and ongoing. The City purchases low mercury fluorescent lamps, and recycled 5,237 pounds of mercury-containing lamps in FY 08-09 through its Lamp Recycling Program.	ESD, GS
M 1.A.2	Identify other mercury-containing products for virtual elimination, phase-out and/or proper disposal.	Annually, As Needed	Done FY 08-09. The City has an Environmentally Preferable Procurement Policy which guides City purchasing towards environmentally-friendly products, such as those with no mercury or with viable mercury recycling options. The City is in the process of reassessing its mercury-containing products and will identify virtual elimination practices where appropriate. See 9.D: *Mercury Containing Product Management Practices* for a listing of actions the City is taking.	ESD, GS
M 1.B	Monitoring Mechanism I. Document completion of tasks in annual reports. Use mercury-containing product reporting guidelines.	Annually	Done FY 08-09. See 9.D*: Mercury Containing Product Management Practices* for a summary of management options identified and/or implemented to date.	ESD
M 2	**Household Hazardous Waste Collection** The City will provide mercury-containing product disposal services through household hazardous waste (HHW) collection programs for residents and small businesses and encourage the use of these programs.			
M 2.A	Provide mercury-containing product disposal services for residents and small businesses.	Ongoing	Done FY 08-09 and ongoing. The City supports the County of Santa Clara Department of Environmental	ESD-IWM

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 08-09 STATUS	RESPONSIBLE PARTY
			Health's (DEH) Household and Small Business Hazardous Waste program and the in-store take-back program for Universal Wastes. These programs collected 570 pounds of elemental mercury, and 104,549 pounds of fluorescent lamps in FY 08-09. County DEH hosts weekly household and small business hazardous waste collection events. This service allows residents and small businesses in the county to properly dispose of their hazardous wastes, including mercury-containing products. See the County Annual Report for details.	
M 2.B	Work with Program and HHW collection agencies to develop and help publicize the fluorescent light recycling program.	Ongoing	Done FY 08-09 and ongoing. The City supports the County of Santa Clara Department of Environmental Health's (DEH) Household and Small Business Hazardous Waste Program. See the County's Annual Report for collection numbers and other details. The City and the Program also worked with the County to publicize its fluorescent tube drop-off program. The Program developed and implemented the "Watch Out for Mercury Pollution!" media campaign designed to encourage residents to take their spent fluorescent lamps to any of 45 official drop-off locations in Santa Clara County (up from 32 last FY), eighteen of which are in San José. The City has also begun work on a major multi-purpose facility on Las Plumas Avenue that among other things will house an additional HHW facility for Santa Clara County. Progress will continue on the facility in FY 09-10.	ESD, Program
M.2.C	Host a mercury fever thermometer exchange event for residents in San José and the Water Pollution Control Plant service area.	Done 6/30/08	Done FY 08-09. See 14.D: *PIP Activities Table* for details.	ESD
M 3	**Monitoring and Science** The City will participate in coordinated monitoring efforts to support mercury TMDL development and implementation, including assessment of air pollution sources of mercury and concentrations of mercury in sediment.			
M 3.A	Continue financial support of the Regional Monitoring Program (RMP), including the Mercury Deposition Network Pilot Study. Continue to actively participate in the RMP steering committee and technical review	Ongoing	Done FY 08-09 and ongoing. The City continues to support the RMP financially. The City provided in-kind services from December 2000 through December 2006, operating the Mercury Deposition Network station #CA72. (See M 3.B). The City continues to participate on the RMP	ESD

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 08-09 STATUS	RESPONSIBLE PARTY
	committee.		steering committee; technical committee; and the Sources, Pathways, and Loadings workgroup.	
M 3.B	Examine feasibility of enhancing stormwater pollution prevention and control activities on a watershed or sub watershed basis to focus activities in those parts of the Guadalupe River Watershed enriched in mercury from natural or mining-related causes.	Done FY 07-08	Done FY 07-08. The City used GIS to compare sensitive areas from the Guadalupe River Watershed Mercury TMDL with areas designated to receive the most stringent hydromodification management plan requirements. Generally, erosional areas within the Guadalupe River watershed within the City's jurisdiction are required to fully implement HMP requirements.	ESD
M 4	**Regional, State, and Federal Coordination** Actively participate in regional, state, and federal coordination efforts to achieve a reduction in the amount of mercury in urban runoff and air emissions.			
M 4.A	Collaborate in technical studies to support TMDL development and implementation including the Santa Clara Basin WMI Guadalupe River Mercury TMDL Workgroup, RMP, and the CEP.	Ongoing	Done FY 08-09 and ongoing. The City participates in and supports programs to reduce mercury in stormwater runoff and air emissions, including the San Francisco Bay Regional Monitoring Program, National Mercury Deposition Network, AB 982 TMDL Public Advisory Group, and the WMI Guadalupe River Mercury TMDL Workgroup.	ESD
M 4.B	Support and participate in WMI Watershed Action Plan implementation.	Ongoing	Done FY 08-09 and ongoing. The Watershed Management Initiative (WMI) continues to implement the Watershed Action Plan through the actions of its subgroups and cooperative efforts with other collaborative groups and programs, such as the Water Resources Protection Collaborative, the Habitat Conservation Plan, and the Fisheries and Aquatic Habitat Conservation Effort. City staff participates in most of the subgroups and chairs the Communications, Land Use, Product Stewardship, and the Watershed Education and Outreach Subgroups. The City continues to support the WMI through the contribution of staff time for the positions of WMI Coordinator and co-Chair as well as Steering Committee chair.	ESD
M 5	**Public Education and Outreach** Increase awareness of proper disposal of mercury-containing products and available non-mercury containing alternatives. Target audiences include residential, commercial, and industrial users and municipal employees.			
M 5.A	Coordinate with Program and HHW collection agencies to develop and implement a mercury-containing product outreach program to educate a selected target audience as well as encourage the proper use of the disposal of mercury-containing products.	Ongoing	Done FY 08-09 and ongoing. The Program maintains mercury-related information for residents on the www.MyWatershedWatch.org website. See Program Annual Report for details. Mercury and Household Hazardous Waste messages were also included at pertinent outreach events. See 14.D: *PIP Activities Table.*	ESD, Program, County HHW

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 08-09 STATUS	RESPONSIBLE PARTY
M 5.B	Coordinate with municipal inspectors to integrate mercury outreach into the existing routine pretreatment, source control, and/or hazardous materials inspection processes of industrial businesses.	Ongoing	Done FY 08-09 and ongoing. Provided proper handling and disposal information for mercury-containing products to businesses attending the Industrial Users Academy. See 14.D: *PIP Activities Table.* Inspectors also distribute the County's Universal Waste brochure for businesses as needed.	ESD
M 5.C	Attend community events and distribute outreach materials. (See Attachment A: Outreach Activities Summary)	Ongoing	Done FY 08-09 and ongoing. Messages regarding proper disposal of fluorescent tubes are included whenever the Household Hazardous Waste program is promoted. See 14.D: *PIP Activities Table* for details.	ESD
M 5.D	Monitoring Mechanism V.B. document and evaluate each outreach activity, including the target audience and number of residents and/or businesses reached.	Annually	See Program report and 14.D: *PIP Activities Table* for evaluation of outreach activities.	ESD, Program

9.B M Program Evaluation

In FY 08-09, the City focused its virtual elimination policy activities on the collection and disposal of batteries and mercury-containing lamps, with the goal of reducing the impact of mercury from City operations. The City purchases and encourages the use of low mercury fluorescent lamps in City facilities. The City recycled 5,237 pounds of mercury-containing lamps in FY 08-09 through its recycling programs. Questions regarding mercury content and alternative products are part of the City's Request for Quotation (RFQ) forms.

The City also worked to expand battery recycling in City facilities. Battery recycling is implemented at all facilities (approximately 100), making it easier for municipal employees to properly dispose of spent batteries. The batteries are collected as Universal Waste and hauled offsite by an outside contractor. Ten facilities have collection directly from the vendor; the rest bring batteries collected at their site to a central collection point. From June 2008 through May 2009, 7,343 pounds of alkaline, lithium, and rechargeable batteries were collected and recycled.

In addition to activities meant to prevent mercury from contaminating stormwater runoff, the City engages in efforts to prevent mercury from entering the sanitary sewer system. The City of San José and tributary agencies to the San José/Santa Clara Water Pollution Control Plant hosted 16 mercury thermometer take-back events for in 2008. A total of 775 mercury-containing thermometers were collected at these events and disposed of appropriately. More thermometer exchange events will take place in San José as well as at the Water Pollution Control Plant Service Area in 2009.

The City continues its commitment to work with the Water Board and stakeholders toward TMDLs that are technically defensible and feasible for implementation. City staff provided comments to Water Board staff on mercury related provisions in drafts of the upcoming Municipal Regional Permit, and serves as the WMI Watershed Assessment and Monitoring Subgroup representative to the Guadalupe Mercury TMDL project. The City expects to actively participate in the adaptive implementation of both the Baywide and Guadalupe mercury TMDLs in FY 09-10. In addition, the City supports SCVURPPP, RMP, BASMAA, and BACWA as these agencies conduct technical studies to address uncertainties regarding mercury in the watershed.

9.C M Response to Water Board Comments

No comments received from Water Board on this Program Element.

9.D M Summary Tables / Additional Information

Mercury-Containing Product Management Practices

Mercury-Containing Products	Not Found	MO #1: Replace with Alternative	MO #2: Replace upon Failure	MO #3: Reduce Use	MO #4: Recycle	MO #5: Hazardous Waste	Comments

10. CNAP: Copper / Nickel Action Plans

10.A CNAP Work Plan Self Evaluation Matrix

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 08-09 STATUS	RESPONSIBLE PARTY
CB-1	**Vehicle Washing Operations**			
CB-1.A	Have member of San José team trained to lead mobile cleaners certification seminar.	As needed	Done FY 07-08 and ongoing. City staff available to train as needed.	ESD
CB-1.B	Support Program in hosting mobile cleaners certification seminar.	Done FY 06-07	Done FY 06-07. Companies desiring training are directed to the BASMAA online training program, and offered a live training if they desire one.	ESD
CB-1.B.1	Promote list of certified mobile cleaning service providers.	Ongoing	Done FY 08-09 and ongoing. A link to the database of BASMAA-trained Recognized Mobile Surface Cleaners is posted on the City's website.	ESD
CB-1.C	Offer discount car washes through the Watershed Watch Campaign.	Annually as needed	Done FY 08-09. The Watershed Watch campaign partnered with Classic Car Wash and Capitol Premier Car Wash to offer discounted car wash services thru the end of December 2008 to customers using their Watershed Watch card, which is available for free download on www.MyWatershedWatch.org. In May 2009 this partnership restarted, and will run through December 2009. See Program Annual Report for details.	Program, ESD
CB-3	**Industrial Discharges**			
CB-3.A	Continue Distribution of information regarding copper from roof vents.	Ongoing	Done FY 08-09 and ongoing. Information is available on ESD website, and for Watershed Inspectors to distribute. The Roof Vent BMP was also distributed to 55 pertinent Industrial Users in San José, along with a cover letter informing businesses of the potential for roof runoff at their facilities. See 14.D: *PIP Activities Table* for details.	ESD
CB-3.A.1	Continue rooftop inspections. Evaluate efforts and need for any additional effort.	Done FY 05-06	Done FY 05-06.	ESD
CB-3.B	Mail NOI Package: information on the GIASP and how to comply, to targeted industrial facilities.	Done FY 05-06 Annually as needed	Done FY 07-08. See CB-3.A.	ESD
CB-8	**Watershed Assessments and New Development**			
CB-8.A	Review new and redevelopment project review procedures and update or refine procedures to minimize copper pollution. See NRD sections 3, 4, and 9 for	Done FY 02-03	See NRD sections 3, 4, and 9 for details on San José's implementation of C.3 permit provisions.	ESD, PBCE, PW, RDA

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 08-09 STATUS	RESPONSIBLE PARTY
	details on San José's implementation of C.3 permit provisions.			
CB-11	**Street Sweeping and Storm System O&M**			
CB-11.A	Track quantitative data on the tons of material removed and disposed and other relevant street sweeping program data.	Annually	Done FY 08-09. The City conducts an extensive Street Sweeping program, involving the sweeping of the central business district; neighborhood business districts; arterials, collectors, and bicycle lanes; and residential streets. Annually, the City sends out a calendar of the residential street sweeping schedule to each single-family dwelling, and asks neighborhood associations within the City to include reminders in their association newsletters to move parked vehicles on street sweeping days. The City is continuing to expand the areas in which parking restrictions are required and enforced to improve the effectiveness of the street sweeping program. In FY 08-09, the enforcement area broadened from 266.5 to 288.5 curb miles. In FY 08-09, an estimated 27,751 cubic yards of debris were collected during all street-sweeping operations. See 5.B*: PSR Program Evaluation* for details. The City also has a comprehensive storm catch basin cleaning program, where a vactor truck removes debris from all of the City's inlets. In FY 08-09, approximately 430 cubic yards of debris were removed. See 6.B*: SDO Program Evaluation* for details.	ESD-IWM, DOT
CB-12	**Pools and Spas**			
CB-12.A	Distribute outreach materials at events, public counters, and post on City website.	Ongoing	Done FY 07-08 See 14.D: *PIP Activities Table* for details.	ESD
CB-12.B	Provide guidance to residents on disposal alternatives for pool and spa water.	Ongoing	Done FY 08-09. Residents who call for guidance are directed to dispose of their pool and spa water in their sanitary sewer clean-out.	ESD
CB-21	**Architectural use of copper**			
CB-21.A	Continue to discourage architectural use of copper during Planning application review.	Ongoing	Done FY 08-09 and ongoing. As projects undergo review, comments discouraging architectural use of copper in development projects are given where appropriate. See NRD 9.	PBCE-Planning
CB-21.B	Continue to monitor progress of San José Green Building program to identify opportunities for discouraging architectural use of copper.	Ongoing	Done FY 08-09 and ongoing. San José City Council approved the Private Sector Green Building Policy (Council Policy 6-32) on October 7, 2008 and approved	PBCE-Planning ESD-UR

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 08-09 STATUS	RESPONSIBLE PARTY
			the Green Building Ordinance for New Private Sector Construction (added Article 17.84 to the San José Municipal Code) on June 23, 2009. Together the policy and ordinance establish thresholds, mandatory certification levels, and enforceable regulation for new private sector buildings in San José. In combination with the municipal Green Building Policy (effective June 9, 2001, updated March 6, 2007), these efforts have the goal of ensuring San José achieves its Green Vision Goal 4, to build or retrofit 50 million square feet of green building. The City will begin working on a policy to green existing buildings and buildings going threw minor renovations in FY 09-10. As of June 30, 2009, ESD and PBCE each have one U.S. Green Building Council LEED Accredited Professional dedicated to the development, implementation and determination of applicability of green building policies and ordinances for public and private projects in San José. These staff, along with other City staff responsible for the review and permitting of projects in San José, offer advice on building materials and techniques, including discouraging architectural use of copper. Internal green building stakeholders continue to meet monthly to discuss projects and share information.	
NB-1	**Discharges from Construction Sites**			
NB-1.A	Implement performance standards for construction inspection.	See NRD 6 and CON program element for activities that address erosion control.	See NRD 6 and CON program element for activities that address erosion control.	ESD, PBCE, PW
NB-1.B	Participate in the Water Board's regional training of construction site inspectors.	See NRD 6 and CON program element for activities that address erosion control.	See NRD 6 and CON program element for activities that address erosion control.	ESD, PBCE, PW

10.B CNAP Program Evaluation

Measures to control copper discharges at the municipal level have been integrated into ongoing City activities identified in the IND and NRD sections of the URMP. Copper and Nickel also remain among the list of pollutants addressed by general and targeted outreach regarding stormwater pollution prevention. Additionally, the City provided the monitoring and data analysis used to evaluate water quality trigger levels associated with the Copper and Nickel Action Plans for the South Bay. The City's South Bay Monitoring Program collected samples from 12 stations monthly in the Lower South San Francisco Bay to compare dry season indicator station means to trigger levels originally set out in the Copper/Nickel action plan. To date, the project has collected 1,785 samples for analysis of dissolved copper and nickel. Due to Basin Plan changes regarding the requirements for copper, the sampling plan for the San José's South Bay Studies program will be substantially modified and streamlined for FY 09-10.

The City continued its NOI Filers Project in FY 08-09. Select facilities were contacted and encouraged to comply with the State's General Industrial Activities Stormwater Permit (GIASP). The contact letter included a checklist to help determine if the facility needed to be covered by the GIASP, a flow chart detailing the development and implementation of a SWPPP, and a reprint of a previously published Tributary Tribune article with information about the GIASP and the Stormwater Enforcement Act of 1998 (AB 2019). The City sent the contact package to 55 facilities in San José. These facilities were selected based on the following criteria:

- Facilities listed in Watershed Enforcement's Industrial and Commercial database (EEDMS),
- Facilities with a GIASP Category of 8 or 10 (Based on SIC Code), and
- Facilities which fall under the SIC codes identified in the 1998 *Industrial Stormwater Quality Monitoring Pilot Project*.

Watershed Enforcement Inspectors are trained annually in GIASP requirements. They evaluate each facility for applicability of the GIASP and make recommendations to the facility owners/operators based upon their findings. These activities are fully integrated into the standard operating procedures for Watershed Enforcement inspections. Facilities found to need to file are reported to the Water Board annually in the City's URMP Annual Report. See 2.D: *Companies Requiring NOI Based on SIC But Have Not Filed* and 2.D: *Companies Requiring NOI Based on Exposure But Have Not Filed* for this information.

The City directs Mobile Cleaners to the BASMAA online Mobile Surface Cleaner Training to educate themselves on cleaning BMPs. The City promotes the list of trained service providers on the website. Live trainings are available upon request. No requests were made in FY 08-09.

TRA 6.B	Implement or refine trash management practices at high-priority areas to the maximum extent practicable.	Ongoing	Done FY 08-09 and ongoing. The City partnered with the Water District to clean up four locations with significant trash accumulations: 3 on Coyote Creek and 1 on Guadalupe River this FY as part of the Trash MOA. The City funded an additional five cleanups of sites with large encampments adjacent to creeks. The City's Anti-Litter Program has approximately 3,899 volunteers participating in litter removal throughout the City, a 13% increase over FY 07-08. See 14.D*: PIP Activities Table* for more information on litter-related Citizen Involvement activities.	ESD, PRNS, GS, DOT
TRA 6.C	Document and evaluate implementation of trash management actions.	Ongoing	Done FY 08-09 and ongoing. See 11.D: *Trash Prevention and Removal Activities undertaken by the City of San José.*	ESD

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 08-09 STATUS	RESPONSIBLE PARTY
TRA 6.D	Provide Program with information on trash management practices implemented on standardized reporting format.	Annually	Done FY 08-09. See 11 D. *Trash Prevention and Removal Activities Undertaken by the City of San José.*	ESD
TRA 6.E	Provide Program with trash assessment data forms.	Annually	Done FY 07-08. Modifications on hold pending MRP approval.	ESD
TRA 6.F	Assist Program in developing Trash Fact Sheets.	Done FY 07-08	Done FY 07-08.	ESD
TRA 7	**Review and Update Performance Standards and Develop Long-Term Strategy for Trash Management**			
TRA 7.A	Assist with the review and update of existing standards that address BMPs or control measures relevant to trash management.	Done FY 07-08	Done FY 07-08.	ESD
TRA 7.B	Assist Program staff in developing a long-term strategy for trash conditions in urban streams and waterways.	Ongoing	Done FY 08-09 and ongoing. Staff participated in Trash Ad Hoc Task Group meetings in which discussions began regarding a long-term strategy. Future developments are on hold, pending approval of the MRP.	ESD
TRA 8	**Implement a Pilot Demonstration Project**			
TRA 8.A	Assist Program in implementing a pilot project to address trash conveyed through the storm drain system.	Done FY 07-08 Ongoing as necessary	Done FY 08-09 and ongoing. The City has worked closely with the Program and other co-permittees to coordinate structural trash pilot projects in the Santa Clara Basin. The pilot began in FY 07-08 and continued into FY 08-09. See 11.B: *TRA Program Evaluation* for details.	ESD, DOT, PW
TRA 8.B	Begin piloting the use of structural controls to prevent trash from entering the storm sewer system.	Done FY 07-08	Done FY 07-08 and ongoing.	ESD, DOT, PW
TRA 8.C	Pursue grant funding to support installation of structural controls for trash management.	As Needed	Done FY 08-09. Researched NOAA Coastal and Marine Habitat Restoration Project grants under the American Recovery and Reinvestment Act and SFEP Estuary 2100 grant funding for structural trash controls, but the project funding was not pursued due to qualification and timeline constraints. Currently pursuing the EPA Bay Area Water Quality Improvement Fund grant opportunities.	ESD, DOT, PW
TRA 8.D	Evaluate the effectiveness of the pilot structural controls.	Ongoing as necessary	The evaluation of the pilot structural controls is being done in coordination with the co-permittees through the Program. See Program Annual Report for details.	Program, ESD, DOT, PW

11.B TRA Program Evaluation

Prevention

The City strongly advocates litter and illegal dumping prevention, and actively participates in efforts that promote prevention. In FY 08-09, the City maintained programs that promote proper disposal of waste, and explored policies, which could curtail specific items that frequently result in litter. The City continued its popular Neighborhood Clean-Up program that allows residents to dispose of unwanted items and provides information of proper disposal of hazardous waste. In 2008 the City approved an ordinance banning smoking in all areas owned, leased, or occupied by the City which should reduce cigarette butt litter around these facilities. Also, the City's Integrated Waste Management-Zero Waste staff has been conducting stakeholder outreach regarding a County-wide effort to address plastic bag litter, and promote reusable bags. An ordinance regarding single use shopping bags is under consideration. The City continues to be actively involved in BASMAA's upcoming Regional Advertising Campaign focusing on litter prevention.

Removal

The City has several litter removal programs, as detailed in 11.D: *Trash Prevention and Removal Activities Undertaken by the City of San José*. In FY 08-09, the City expanded on the previous year's efforts in regard to trash removal by performing five additional clean-ups that were outside of the Trash MOA with the District. These cleanups removed debris from large illegal encampments along creekside parcels in the City. The additional City clean-ups removed over 60 tons of debris from the Coyote Creek and the Guadalupe River watersheds.

The City of San José and the Santa Clara Valley Water District (District) continued efforts associated with the Memorandum of Agreement for Trash Prevention and Removal (Trash MOA), which began in FY 04-05. The Trash MOA includes weekly encampment cleanup activities on waterways in the City, up to 10 monthly cleanups of large and active illegal encampments, as well as up to five City-District partnered cleanups per year. During this reporting period, partnered clean-up projects on the Coyote Creek and the Guadalupe River removed over 5.5 tons of debris from these waterways. The weekly and monthly encampment clean-ups removed 184.6 tons of debris.

The City's Anti-litter Program has 3,899 Pick Up San José volunteers, a 13 percent increase from last FY in the number of volunteers cleaning litter from City streets, parks, and waterways. Pick Up San José volunteers collected 1,415 bags of litter in FY 08-09. The Anti-litter program also has 104 of its 150 Litter Hot Spots 'adopted.' In addition, the Anti-litter Program eliminated seven illegal dumpsites, using clean-up and enforcement to discourage additional dumping at these sites.

Structural Trash Management Pilot

The City continued its collaboration with the City of Sunnyvale and the Program to pilot the use of catch basin inserts (screens) as a structural control to prevent trash and other debris from entering the City's stormwater conveyance system and, ultimately, local creeks. Eight-four catch basin inserts were installed in FY 07-08 as part of a multi-year structural trash management pilot study. Finding inlets the screens would fit into was problematic. Many of the City's inlets are less than 24 inches wide, long, and deep, meaning that they are too small for the screens without significantly impairing their flood control capacity. City staff inspected hundreds of inlets to find 84 suitable for the pilot. Consequently, the screens could be a useful, but not universal, device for preventing litter from entering the stormwater conveyance system.

Preliminary results indicate the screens are effective at preventing material from entering the stormwater conveyance system without significantly effecting catch basin function and capacity. However, the past two winters have been relatively dry. Preliminary results also indicate the vast majority of material captured is leaves, grass, and similar debris. The City will continue to monitor the effectiveness of the inserts during a more typical wet season and how weather patterns may affect operations and maintenance. A more complete report on the progress of the pilot studies is included in the Program's annual report.

Stakeholder Involvement

On October 15, 2008, the Trash Subgroup of the Watershed Management Initiative (WMI) coordinated and hosted a one-day Trash Summit. The Trash Summit brought together over 30 participants from different agencies and organizations concerned about trash and litter issues. Participants evaluated the myriad of activities underway in

the Santa Clara Basin in response to the issue of trash in waterways, identified gaps, and considered new proposals and promoting existing initiatives to address those gaps. A group continues to meet and is planning for a mult-agency collareabation on trash control efforts and a follow-up Summit in FY 09-10.

The WMI's newly established Product Stewardship Subgroup advanced pollution prevention initiatives by encouraging local agency involvement in the California Product Stewardship Council (CPSC), a non-profit corporation supported by local governments and government entities who promote CPSC's goal of aligning public and private sectors through information, advocacy and legislation to ensure ongoing product responsibility from design to disposal. The subgroup is currently supporting product actions such as pharmaceutical take-backs and reducing the use of single-serve water bottles.

11.C TRA Response to Water Board Comments

No comments received from Water Board on this Program Element.

11.D TRA Summary Tables / Additional Information

Trash Prevention and Removal Activities Undertaken by the City of San José

Program & Description	Participating Departments/ Agencies	Details
Encampment & Illegal Dumping Activities		
Trash Prevention & Removal MOA Agreement between the City of San José and the Water District to remove illegal encampments from creekside parcels, and address up to 5 difficult-to-address sites impacted by trash.	CSJ: ESD, PD, PRNS, Housing, DOT SCVWD	Original agreement formed in 2004, revised in 2008.
Trash MOA Monthly Encampment Cleanup Program City and District cooperate to perform cleanup of homeless encampments along creeks on a monthly basis, up to 10 times per year.	CSJ – Metro PD SCVWD	Work performed under the auspices of the Trash Prevention and Removal MOA
Trash MOA Weekly Cleanup Program District uses either in-house or SJCC labor to clean up small and/or abandoned illegal homeless encampments and litter accumulations on City or District Right-of-Way creek parcels.	SCVWD Guadalupe Watershed, Coyote Watershed	Work performed under the auspices of the Trash Prevention and Removal MOA
Trash MOA Partnered Cleanups City-District partnered cleanup on up to five creek parcels that are impacted by trash and not covered by an existing O&M or cleanup program. Each agency brings specialized services and supplies to the cleanup.	CSJ SCVWD	In FY 08-09, four sites were cleared in partnership with the SCVWD under the auspices of the Trash Prevention and Removal MOA.
Expanded Trash Encampment Cleanups City provided one time fund to perform a minimum of four cleanups of large encampments along creeks.	CSJ – Metro PD CSJ – ESD	Five cleanups (instead of four) completed in the Guadalupe River and Coyote Creek watersheds. 60.07 tons removed.
Alternate Work Program City staff supervises Santa Clara County Department of Corrections labor for cleanup of encampments, illegal dumping on City parcels, as well as weed, litter, and illegal dumping removal along roadsides, vacant lots, landscaped areas, and	CSJ – DOT CSJ –- PRNS	Program goals are similar to landscaping, as AWP is responsible for a subset of the City's responsibility.

Program & Description	Participating Departments/ Agencies	Details
alleyways within the City limits.		
Illegal Dump Site Correction Corrections are made to eliminate illegal dumpsites.	CSJ-PRNS (Anti-Litter Program), ESD	In FY 08-09, eliminated seven illegal dumpsites.
Operations & Maintenance Activities		
General Complaint Trucks Crews collect illegal dumping, debris and other hazards found in or along the City streets in response to calls from the public. They also respond to requests for accident and spill cleanups in City streets.	CSJ-DOT	The primary goal is to respond to the highest percentage of calls within a stated time period.
Code Enforcement Response Debris dumped on private property is the responsibility of the property owner, even if it was not generated by the property owner. Code Enforcement inspectors direct the property owner to clean up the debris.	CSJ-PBCE-Code Enforcement	For hazardous waste dumping, it's still the property owner's responsibility. But if it's identifiable, the property owner has recourse by filing suit with the District Attorney's office.
Neighborhood Clean-ups Scheduled throughout the year, every neighborhood in the City is cycled through within three years.	PBCE-Code Enforcement, ESD	Residents can dispose of common household debris and unwanted items. Space is limited, and always reaches capacity. Information on proper hazardous waste disposal and other City resources are made available. This is a very popular program.
Storm drain Inlet Cleaning Program Between mid September and the end of the calendar year, all inlets in the City are inspected and cleaned out to remove collected debris.	CSJ-DOT CSJ-ESD	The program's goal is to prevent both fine and bulky pollutants from traveling further down the storm system.
Street Sweeping Using both contractual and City personnel, the City provides sweeping at least once per month on all streets. Arterials, collectors and selected business districts receive sweeping at least twice per month. Outreach through the City's Recycle Plus Program includes messaging to residents on the importance of moving vehicles on sweep day.	CSJ-DOT Contracts managed by ESD-IWM	The goal of the program is to reduce the impact of pollution common to city streets such as brake dust, vehicle fluids, and other forms of residue.
SJ Parks Maintenance Crews provide maintenance services and respond to illegal dumping in City parks and along trails in seven Park Maintenance Districts, with six Regional Park Facilities (Alum Rock, Almaden Lake/Edenvale, Lake Cunningham, Prusch/Overfelt, Guadalupe River Park/ Downtown Core, and Kelley Parks) within them.	CSJ-PRNS	Supplies include vehicles (for city staff), litter sticks, plastic trash bags, leather gloves (the SJCC usually bring their own supplies). Training includes protecting back, avoiding sharps, avoiding dangerous situations or confrontations.
Landscape Maintenance Crews remove litter and debris from City landscaped medians and backups.	CSJ-DOT	Primary goal is to maximize number of landscape parcels in good or better condition.
Weekend Youth Juvenile Offender Program Two vans of Youth Juvenile Offenders remove debris from Litter Hot Spots.	CSJ-PRNS (Anti-Litter Program)	In FY 08-09 The Juvenile Offenders Program performed over 4,500 hours or service and picked up 562 bags of litter.
Volunteer Clean-up Activities		
Adopt-A-Hotspot	CSJ-PRNS (Anti-Litter	See 14.D.: *PIP Activities Table for details*

Program & Description	Participating Departments/ Agencies	Details
Volunteers "adopt" and clean one or more of 150 identified Litter Hotspots a minimum of once a month.	Program)	
Adopt-A-Park Recruits and trains residents to assist in the general care and maintenance of parks and other open spaces in San José.	CSJ-PRNS	See 14.D.: *PIP Activities Table for details*
Adopt-A-Trail Recruits and trains volunteers to support management of trails, including litter removal.	CSJ-PRNS	See 14.D.: *PIP Activities Table for details*
Adopt-A-Street Recruits and trains volunteers to remove litter in City vacant lots and other properties. Focused on City-owned landscaped areas, so it is more about maintenance than just litter removal.	CSJ-DOT	City supplies vests, gloves, bags, and any equipment required for the area to maintain it, such as litter sticks, rakes, brooms, etc.
Creek Connections Action Group Volunteers remove trash from creeks, rivers and lakes in Santa Clara County twice each year on National River Cleanup Day (May) and Coastal Cleanup Day (September).	CSJ-PRNS, ESD, County Parks, SCVWD	See 14.D.: *PIP Activities Table for details*
Pick Up San José Volunteers are recruited at fairs, festivals, community meetings and other miscellaneous group meetings to pick up litter whenever they are able. Training and supplies are given to the volunteers.	CSJ-PRNS (Anti-Litter Program)	Volunteers recruited: FY 05-06: 2,859, FY 06-07: 3,143, FY 07-08: 3,426, FY 08-09 3,899
Shed Program Volunteer groups borrow anti-litter supplies from an AGLP shed and conduct a neighborhood cleanup.	CSJ-PRNS (Anti-Litter Program)	Supplies loaned to groups to conduct neighborhood cleanups: FY 06-07: 32 groups;; FY 07-08: 43 groups, FY 08-09: 40 groups.
Great American Litter Pick-up Annual volunteer clean-up at 10 locations within the City, and various locations in the County based on other agency's participation	CSJ, City of Campbell, VTA, County	See 14.D.: *PIP Activities Table for details*
Other Activities		
Ordinance Banning Smoking in City Parks. Ordinance bans smoking in any area owned leased or occupied by the City including; sidewalks, trails and pathways in or around park facilities, park strips and other grounds of any park and within twenty-five (25) feet of any entrance, exit, operable window, or intake opening of any golf course, community center or library. As per municipal codes and park ordinances, violators may be subject to citation or fine.	CSJ-PRNS	As of October 2007, smoking is banned in all San José Parks per San José Municipal Ordinance 9.44.030F and 9.44.010A and Parks Ordinance 13.44.130.
WMI Trash Subgroup Subgroup of the Santa Clara Basin Watershed Management Initiative with the following goals: 1. Bring people together who are working on the trash issue.	WMI agencies	Formed in 2008

Program & Description	Participating Departments/ Agencies	Details
2. Share information on current activities. 3. Determine what additional activities would help reduce trash in creeks. 4. Make recommendations for action by the WMI and other entities.		
WMI Product Stewardship Subgroup Subgroups of the Santa Clara Basin Watershed Management Initiative, formed to promote, implement, and track local agency activities that advance the responsible management and reduction of product-associated waste streams that can affect watershed health. Goals of this subgroup are: 1. Coordinate pilot product disposal / take back programs for pharmaceuticals. 2. Promote local agency involvement in the California Product Stewardship Council and support of relevant legislation that furthers EPR. 3. Collaborate/Coordinate on product "actions" (for example, reducing single-use shopping bags and reducing or eliminating agency use of triclosan)	WMI agencies	Formed in FY 07-08. 11 local agencies have signed the CPSC Pledge of Support (Goal 2).
BASMAA Regional Ad Campaign on Trash Media campaign targeting 18-29 yr old males who litter, with the goal of reducing littering behaviors in this audience.	Stormwater Programs in Alameda, Contra Costa, Santa Clara, San Mateo, Marin Counties, as well as the Vallejo and Fairfield/Suisun sanitary districts	Currently in development. Implementation pending MRP Adoption.

12. MON: Monitoring

12.A MON Work Plan Self Evaluation Matrix

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 08-09 STATUS	RESPONSIBLE PARTY
PCB	**PCB Control Program** Analytical characterization work to support the PCB Control Program, required under provision C.9.e, has been completed. The Program is currently working on next steps with BASMAA. Initial PCB analysis was performed on sediments found in selected urban storm drain systems. At this point, no known controllable sources of PCBs have been identified. Results of the follow-up analytical work have been reviewed and further sampling work to identify controllable sources was undertaken in October and November of 2002. The SCVURPPP Program submitted the final PCB Control Plan March 1, 2002, and the Control Program Work Plan July 1, 2002. In addition, the City continues to implement activities described in "Next Steps" from the Year Two PCB Case Study Report submitted to the Water Board in July 2003.			
PCB.A	Sample, analyze, and report on PCBs in storm drain sediments to characterize potential sources and implement controls.	Done, 6/00 through FY 01-02	Done, prior to FY 01-02.	Program, ESD
PCB.B	Begin implementation of final PCB Control Plan upon approval.	Done FY 02-03 Ongoing	Done, prior to FY 01-02. Program level activity.	ESD
Dioxin	**Dioxin-like Compound Control Program** Characterization of dioxins based on existing data has begun Program-wide. The Program is now collaborating with BASMAA and CEP to develop a conceptual model/impairment assessment document. City Staff provide comments to the Program and directly to CEP in support of this process. This Dioxin-like Compound Control Program will develop procedures to identify, assess, and manage controllable sources of Dioxin-like compounds found in urban runoff.			
Dioxin.A	Characterize distribution of Dioxin-like compounds in the urban runoff system based on existing data.	Done FY 01-02	Program level activity.	Program
Dioxin.B	Begin implementation of SCVURPPP plan to characterize distribution of Dioxins.	In Progress at Program Level	Program level activity.	Program
Dioxin.C	Submit plan that identifies control measures / management practices to eliminate or reduce discharges of Dioxins, if needed.	TBD	Program submitted draft Control Plan separately 3/1/02.	Program
Dioxin D	Explore, and implement if feasible, efforts to move toward alternative fuels for diesel vehicles in City fleet.	Done FY 06-07 & Ongoing	Done FY 06-07 and ongoing. In FY 07-08 the City's Diesel fleet switched to using B20 biodiesel from B5 in all highway diesel vehicles including fire vehicles. No significant operational problems were encountered in FY 08-09 as a result of the switch to B20.	ESD, DOT, GS
MON 1	**Industrial Stormwater Monitoring Pilot Program**			

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 08-09 STATUS	RESPONSIBLE PARTY
MON 1.A	Design and execute a sampling program to meet the project objectives, analyze results, develop guidance for industry to improve SWPPP implementation, and provide technology transfer information to industry and inspectors.	Done, FY 96-97 through 01-02 Ongoing as part of IND	Done, prior to FY 01-02.	ESD
MON 3	**First Flush Monitoring Program**			
MON 3.A	Conduct multi-year First Flush study sampling, analyze data and provide data to Program as part of Multi-year Monitoring Program.	Done, FY 96-97 through 02-03	Done, prior to FY 02-03.	ESD, Program

12.B MON Program Evaluation

Monitoring activities are conducted effectively at the Program level with participation from City staff to support collaboration with the Water Board and to provide technical review of Program products.

In FY 07-08, the City transitioned its entire highway diesel fleet to B20 biodiesel blend including fire vehicles. Among other benefits, this serves to reduce the potential for dioxin emissions from the City's diesel fleet. These efforts also further the City's Green Vision goal of ensuring that 100 percent of public fleet vehicles run on alternative fuels by 2022. No significant operational problems were encountered in FY 08-09 as a result of the use of B20 biodiesel blend.

The City continues to participate actively in SCVURPPP monitoring program field activities whenever they are conducted within the City's jurisdiction. Moreover, City staff assists in studies such as the Guadalupe loads study and portions of those regional studies conducted within the City's jurisdiction.

12.C MON Response to Water Board Comments

No comments received from Water Board on this Program Element.

12.D MON Summary Tables / Additional Information

No additional information for this Program Element.

13. MC: Municipal Compliance

13.A MC Work Plan Self Evaluation Matrix

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 08-09 STATUS	RESPONSIBLE PARTY
MC 1	**Municipal Training** Municipal Training is a critical function of the City's NPDES Permit. Municipal compliance is dependent on the level and quality of the training provided.			
MC 1.A	Identify training needs.	Annually	Done FY 08-09. No new training needs were identified in FY 08-09 in anticipation of the new Municipal Regional Permit. Only ongoing training needs were addressed.	ESD-UR
MC 1.A.1	Conduct training for City staff and City contractors that perform surface cleaning at City facilities.	Done FY 06-07 As Needed	Done FY 07-08. No additional surface cleaning training was needed in FY 08-09.	DOT, GS, ESD
MC 1.B	Develop curricula.	As Needed	Done FY 07-08. No significant changes to the curriculum were needed in FY 08-09.	ESD-UR
MC 1.C	Conduct training.	Ongoing	Done FY 08-09. See 13.D: Municipal Employee Training Summary.	ESD-UR
MC 1.D	Evaluate municipal training program and make improvements as needed.	Annually	Done FY 08-09. The City conducted municipal training for all required Program Elements. Evaluation forms were handed out, collected and reviewed by instructors. This information will be used to make improvements as needed.	ESD-UR
MC 2	**Municipal Facilities Assessment and Compliance** Municipal facilities are required to comply with stormwater regulations. Efforts to reduce contaminated discharges from City facilities must be similar to those required of private businesses. While many elements for permit compliance are in place, the City requires a systematic approach to City facilities compliance at the level of effort required in the URMP.			
MC 2.A	Conduct Corp Yard assessments and inspections.	Annually	Done FY 08-09. Annual Corporation Yard inspections were conducted in February and March 2009.	ESD-UR, GS, DOT
MC 2.A.1	Conduct Citywide meeting to discuss Hazardous Material, Safety, and Stormwater issues for City corporation yards (up to two times per year).	Annually	Done FY 08-09. A Citywide Hazardous Materials, Safety, and Stormwater Management meeting was conducted on June 29, 2009.	GS, ESD, DOT, Fire, Police, PRNS
MC 2.A.2	Revise Corporation Yard inspection form.	Done FY 05-06 As Needed	Done FY 05-06. No revisions to the form were necessary in FY 08-09.	ESD-UR
MC 2.B	Review Municipal Facilities SWPPPs.	Annually	Done FY 08-09. Municipal Facility SWPPPs were reviewed and updated as necessary.	ESD-UR, GS, DOT

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 08-09 STATUS	RESPONSIBLE PARTY
MC 2.B.1	Fully revise the five (5) remaining Corporation Yard SWPPPs (using the Main Yard revised SWPPP pilot process as a template).	Done FY 06-07	Done FY 08-09. Revisions to all five Corp Yard SWPPPs were drafted in FY 08-09 and will be sent out for review and comment.	ESD-UR, GS, DOT
MC 2.C	Conduct SWPPP training at City corporation yards.	Annually	Done FY 08-09. SWPPP training sessions were conducted at the Corp Yards in May and June 2009.	ESD-UR, GS, DOT

13.B MC Program Evaluation

Training

During FY 08-09, the City conducted municipal training for all required Program Elements. See 13.D: *Municipal Employee Training Summary*. Those who attended these trainings completed evaluation forms, and the resulting data was tracked by the City and used by the instructors to generate program improvements.

Highlights of FY 08-09 trainings included:

- DOT Inlet Cleaning and Data Collection Training on 10/3/08;
- Construction Site Management training for City inspectors held 10/21/08 & 10/22/08;
- Future Hydro Modification Management Plan (HMP) Requirements on 11/13/08;
- WUOM BMP/SOP Discharge Training on 12/19/09;
- IPM and Pesticide Safety training held 1/27/09;
- Rural Roads Maintenance BMP Workshop and Field Training on 3/26/09 and 3/27/09;
- Erosion & Sediment Control training for capital improvement project staff on 5/18/09;
- Stormwater BMP/SOP/Corporation Yard SWPPP Training on 5/26/09, 5/27/09, 5/28/09, 6/2/09, 6/3/09, 6/4/09, 6/5/09, & 6/9/09; and
- Cal/EPA Basic Inspector Academy on 6/16/09 – 6/19/09.

Municipal Facilities

Annual Corporation Yard stormwater inspections were completed in February and March 2009.

A Citywide meeting to discuss hazardous materials, safety, and stormwater issues in the corporation yards was held on June 29, 2009. These regular meetings have proven to be effective in improving the coordination between GS staff, ESD staff, and Corp Yard representatives and have provided a venue for discussing the annual stormwater assessment inspections. The concerns in the Corp Yard inspection reports have typically been minor and swiftly resolved; the frequency of more significant concerns has lessened as the program has matured at the Corp Yards.

Corp Yard SWPPP Training was included in the PSR, RPW, and SDO Stormwater BMP/SOP Training for DOT, GS, and PRNS staff that was held in May and June 2009. Of the 323 staff that participated in the training, 291 completed and returned evaluations. An additional 33 staff received training during this time on Stormwater BMPs/SOPs related to contract management and SDO. They returned 30 evaluations. The evaluations for both groups were identical and scored the training on a scale of 1 to 5 (1 = Needs Improvement, 2 = Poor, 3 = Fair, 4 = Good, and 5 = Excellent). The overall rating from 321 evaluations was 4.51. Highlights of the ratings of individual topics are summarized below:

- 4.60 out of 5 – The speakers' knowledge and response to questions;
- 4.43 out of 5 – The relevance of the BMPs/SOPs to the employees' work practices;
- 4.50 out of 5 – The explanation of the relationship between the BMPs/SOPs and compliance with the City's Stormwater NPDES permit; and
- 4.54 out of 5 – The explanation of how the employee can help the City to maintain compliance with the Stormwater NPDES permit.

SWPPP revisions for the five Corp Yards were drafted in FY 08-09 and will be sent out for review and comment.

13.C MC Response to Water Board Comments

No comments received from Water Board on this Program Element.

14. PIP: Public Information / Public Participation

14.A PIP Work Plan Self Evaluation Matrix

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 08-09 STATUS	RESPONSIBLE PARTY
PIP 1	**General Outreach** The City of San José will promote general citizen awareness of what a watershed is, the functions of the storm drain system, pathways and sources of urban runoff pollution to the South Bay watershed, and behaviors that adversely affect water quality.			
PIP 1.A	Participate in WMI Outreach, and coordinate WMI outreach with Watershed Watch and Program efforts.	Ongoing	Done FY 08-09 and ongoing. City staff supported the coordination of WMI and Program messages in the Watershed Watch campaign through the WEO AHTG. See 14.D: *PIP Activities Table.*	ESD, WMI, Program
PIP 1.A .1	Participate in Watershed Watch campaign.	Ongoing	Done FY 08-09 and ongoing. City staff assists with planning and implementation through WEO AHTG and serves as the AHTG's chair. See the Program Annual Report for complete campaign annual report.	ESD, Program
PIP 1.B	Identify, support, and participate in appropriate community events to increase general public awareness.	Ongoing	Done FY 08-09 and ongoing. See 14.D: *PIP Activities Table.*	ESD
PIP 1.B.1	Work with the Watershed Watch Events work group.	Ongoing	Done FY 08-09 and ongoing. Watershed Watch events are discussed and coordinated through the WEO AHTG. City staff assists with staffing tables at events. See the Program Annual Report for details concerning Watershed Watch events.	ESD, Program
PIP 1.C	Give presentations upon request that focus on stormwater messages to elementary through college grade levels, neighborhood groups, etc.	As Needed	Done FY 08-09 and ongoing. See 14.D: *PIP Activities Table.*	ESD
PIP 2	**Targeted Outreach** The City of San José will develop and implement targeted residential outreach and education campaigns based on high priority pollutants to effectively reduce pollutant-causing behaviors and promote Best Management Practices.			
PIP 2.A	Identify general residential practices that contribute to stormwater pollution. Identify reasonable alternatives to pollutant causing behavior.	N/A	Done FY 08-09. Messages are addressed at the Program level through the Watershed Watch Campaign, and locally through events, direct outreach, and education via inspectors. See 14.D: *PIP Activities Table.*	ESD, Program
PIP 2.A.1	Review surveys and applicable reports.	Ongoing	Done FY 08-09 and ongoing. The City has participated with the regional media and outreach campaign through	ESD

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 08-09 STATUS	RESPONSIBLE PARTY
			the Program. The Program performed a survey to gather information on the effectiveness of the ongoing media campaign and measuring outcomes of survey results against the 10-year target performance measures. See the Program Annual Report for details.	
PIP 2.A.2	Meet with inspectors to discuss and document residential outreach needs.	Ongoing	Done FY 08-09 and ongoing. Staff involved in outreach attend Inspectors' meetings and trainings and keep in contact with Inspectors on a regular basis. Outreach needs are identified and incorporated into work plans accordingly.	ESD
PIP 2.A.3	Prepare reports identifying residential outreach needs and tasks.	Annually	Done FY 08-09. Outreach staff submits a report to Watershed Protection management on projected outreach needs and recommendations.	ESD
PIP 2.B	Identify ICID practices and target audience(s) contributing to pollution.	Ongoing	Done FY 08-09. ICID Feedback cards are regularly distributed to complainants who provide contact information. How complainants hear about ICID services is also tracked.	ESD
PIP 2.B.1	Review ICID reports.	Ongoing	Done FY 08-09 and ongoing. 98 ICID Complaint feedback cards were distributed to complainants. Of 98 cards mailed, 18 have been returned. This number is insufficient for full analysis; however, the large majority have provided favorable feedback. More thorough analysis will be conducted in FY 09-10.	ESD
PIP 2.B 2	Meet with ICID inspectors to discuss and document outreach needs.	Ongoing	Done FY 08-09 and ongoing. Staff involved in outreach attend Inspectors' meetings and trainings and keep in contact with Inspectors on a regular basis. Outreach needs are identified and incorporated into work plans accordingly.	ESD
PIP 2.B.3	Prepare reports identifying ICID outreach needs and tasks.	Annually	Done FY 08-09. Outreach staff submits a report on projected outreach needs and recommendations and incorporate report findings into work plans accordingly.	ESD
PIP 2.C	Promote selected residential and ICID messages through local and regional activity (e.g. Program PIP, BASMAA PIP, BAPPG, Media Relations, etc).			
PIP 2.C.1	Report targeted residential and ICID outreach activity.	Annually	Done FY 08-09. See 14.D: *PIP Activities Table.*	ESD
PIP 2.C.2	Participate in the Program's Pesticide and Mercury ad hoc task groups.	Ongoing	Done FY 08-09 and ongoing. City staff participated in AHTG and collaborated with regional Household Hazardous Waste efforts that focused on reducing pesticide use and the proper disposal of spent fluorescent	ESD, Program

PIP 5.B	Annually review, modify and report on outreach plans based on effectiveness results.	N/A	Done FY 08-09. Work plans are evaluated and modified as needed based on evaluation results.	ESD
PIP 5.B 1	Produce a written report on the effectiveness of outreach activities conducted in the prior FY.	Annually	Done FY 08-09. *See 14.D: PIP Activities Table.*	ESD

14.B PIP Program Evaluation

Outreach Strategy

San José's outreach strategy is implemented on three levels: Local (City-wide), Program (County-wide), and Regional (Bay Area-wide).

Local target audiences are based on program, survey, and focus group work conducted by the City and the Program. Local outreach is conducted to address time-constrained and/or local (San José only) issues. Local strategies and tactics are documented in the Outreach Strategies submitted annually to the City's budget office. When possible, San José tailors its local outreach to compliment/coordinate with Program (countywide) and regional outreach efforts. Short-term tactic and strategy success is evaluated case-by-case using a variety of mechanisms, such as questionnaires for the students who participated in Water Wizards Festival. Public opinion surveys evaluate long-term outcomes in attitudes and behavior.

County-wide target audiences are based on survey and focus group work conducted through the Program and, when appropriate, the City. The City's County-wide outreach delivers stormwater and watershed messages to residential and business audiences in the Santa Clara Basin. Strategies and tactics are documented in the Watershed Watch strategy. The City advocates for and facilitates the coordination of Countywide outreach with Regional outreach workgroups. Short-term tactic and strategy success is evaluated case-by-case using a variety of mechanisms, such as feedback from workshop attendees or number of participants. Public opinion surveys evaluate long-term outcomes in attitudes and behavior.

Regional target audiences, messages, and projects are identified through a variety of processes conducted by the various regional workgroups. San José's regional audiences are specific subsets of the general business and residential audiences that occur in San José, but may also be universal in the Bay Area. Messages focus on specific behaviors or increasing awareness related to stormwater and watershed issues (e.g., Pest Control Operators for IPM messages; restaurants for FOG). Strategies and tactics for these audiences are proposed and implemented through the Regional workgroups, and they are documented in the work plans of the various groups. Short–term tactic and strategy success is evaluated and reported case-by-case using a variety of mechanisms (e.g. the Regional Media Relations workgroup's measures). For some projects (e.g., Our Water Our World Campaign, Regional Ad Campaign) public opinion surveys evaluate long-term outcomes in attitudes and behavior.

General Outreach

San José's General Outreach focused on attending community events, and maintaining up-to-date information on the City's website. There was a substantial increase in the overall distribution of materials this fiscal year compared to last, and the City attended a wider variety of community events this fiscal year, including farmer's markets and Cinco de Mayo celebrations. The City continues to reach out to the general public at selected community events that the Watershed Watch Campaign does not attend. These events are good venues to reach San José citizens, providing more extensive outreach to residents. San José's Green Vision and the outreach and media attention

it generated has provided an excellent opportunity to connect watershed and pollution prevention messages into other environmental messages such as Zero Waste and Sustainability. The residential and commercial sectors seem to be more accepting of environmental messages and behavior changes than they have in previous years.

The City works though a variety of mediums to distribute outreach materials to residents and business owners. The number of outreach materials distributed in FY 08-09 exceeded 345,000, which is comprised of BMPs disseminated by ICID, IND, and CON inspectors; City staff at outreach events; and self-serve BMPs downloaded from the City's website. Distribution of materials benefited from collaborating with other ESD divisions with intersecting interests, attending more local events than the previous year, and increased internet traffic.

The City also supported the Watershed Watch campaign by participating in the development of a new general residential stormwater and watershed brochure titled *You Are the Solution to Water Pollution*. The City also translated the piece into Spanish and Vietnamese for the Program to expand its reach to a wider array of audiences.

Targeted Outreach

FY 08-09's targeted efforts focused on reaching audiences with specific messages relating to their activities, location, or demographic. By conducting outreach to people where they were, and when they were primed to hear it – distributing tarps and explaining the importance of tarping loaded vehicles to customers hauling debris at the landfill – the message was more easily understood and the information applied to practical outcomes. At the local level, San José has successfully directed a variety of messages to a wide array of audiences through publishing articles in newsletters, hosting trainings and workshops, attending events targeting specific audiences, direct mailing, partnering with retailers for point-of-purchase education, and collaborative efforts at the regional level. Targeted outreach supplements tasks done in other elements of the URMP, such as Illicit Connection/Illegal Dumping, Industrial/Commercial Dischargers, Construction Inspection, Pesticide Management, Mercury, and the Copper and Nickel Action Plans.

Citizen Participation Activities

Citizen participation activities effectively get residents out into the Watershed to foster stewardship. The City participated in four Clean-up events, as well as two special events – Bike to Work Day and the Municipal Rose Garden Pruning – designed to promote civic participation and environmental stewardship by the citizens of San José. Tying clean-up events to pre-existing events such as Coastal Clean-up Day and the Great American Pick-up is a good way to maximize promotion. Regional promotional activities are useful for raising awareness locally. The City also organized regular participation activities through the Adopt-A-Park, Adopt-A-Trail, Anti-Litter Volunteers, and Volunteer San José programs. Through these programs, thousands of San José residents are taking an active role in watershed stewardship.

Education Outreach

Education continues to be a vital component of San José's pollution prevention plan. The City actively contributes to education both as a City and through the Program. San José commits significant resources to youth education with the goal of instilling a sense of stewardship for the environment. San José employs both in-class education and train-the-trainer approaches to Outreach. In-class presentations are more expensive per student reached, but lend themselves better to evaluation. Train-the-trainer has the potential to reach many more students, but it is extremely difficult to measure the effectiveness of this potential. Youth Watershed Education Grants provide funding for groups and educators to implement their own programs that accomplish the City's education goals.

FY 08-09 saw the continuation and expansion of the City's Go Green Schools Program. Go Green Schools fosters recycling and environmental stewardship in a parent and community-driven process, and supplies grants to schools to help them achieve their green goals. The City connects schools with free recycling supplies and other green resources, and encourages them implement the program at the level the school chooses, whether through recycling, environmental curriculum, green purchasing, or other green practices. This year the Go Green Schools Program hosted its third conference with four parallel tracks, which allowed for a wider range of topics and sessions for attendees.

Thermoplastic and Cast Metal Inlet Markers

With approximately 30,000 storm drain inlets and in anticipation of new inlet marking requirements in the future, the City piloted alternatives that could improve the longevity and legibility of painted stencil markings. In FY 08-09, the City continued to install thermoplastic inlet markers, which are more visible and durable than the traditional stencil-painted stormdrain markings. The City began installing thermoplastic markers in FY 07-08 as a pilot in areas of the City with higher incidences of ICID calls, and this

project continued in FY 08-09 with markings placed in Alviso. The pilot will track the durability of the thermoplastic stencils, to see if their longer life will offset the higher cost.

In collaboration with DOT, 180 metal inlet marker plates were installed in locations citywide where the ADA curb ramps were scheduled for replacement. Since the metal plates must be set in concrete, the ramp reconstruction provided an opportunity to test the markers with little increase in installation costs. One challenge was selecting a location to mount the plates that would result in a strong visual association between the plate and the storm drain while not obstructing the ramp. Given the logistical challenges, the City does not expect to continue the pilot but will continue to explore other options that increase the longevity and legibility of stormdrain markings.

14.C PIP Response to Water Board Comments

No comments received from Water Board on this Program Element.

14.D PIP Summary Tables / Additional Information

PIP Activities Table

Outreach Type: ❍ ***= General Outreach*** ◎ ***= Targeted Outreach*** ✋ ***= Citizen Involvement*** ✎ ***= Education***

Item No.	Activity	Outreach Type	FY 08-09 Status	Evaluation
Att. A.1	Storm Sewer Stenciling Pilot Program	❍	In FY 08-09 the City continued the pilot thermoplastic stenciling program in the Alviso neighborhood. Alviso was chosen due to reported high bacteria levels in the storm drain system. 180 thermoplastic stencils were installed in the area between June 8 and 22, 2009. All the stencils read “No Dumping Flows to Guadalupe River”.	In FY 08-09 the City continued the pilot thermoplastic stenciling program in the Alviso neighborhood. Alviso was chosen due to the combination of the potential for illegal dumping and traffic patterns that cause rapid wear and fading of the painted stencil markings. The pilot will track the durability of the thermoplastic stencils, to see if their longer life will offset the higher cost.
Att. A.1	Storm Sewer Metal Plate Pilot Program	❍	In collaboration with DOT 180 metal plates that read “No Dumping Flows to Bay” were installed in locations citywide where the ADA curb ramps were scheduled for replacement.	In collaboration with DOT, 180 metal inlet marker plates were installed in locations citywide where the ADA curb ramps were scheduled for replacement. Since the metal plates must be set in concrete, the ramp reconstruction provided an opportunity to test the markers with little increase in installation costs. One challenge was selecting a location to mount the plates that would result in a strong visual association between the plate and the storm drain while not obstructing the ramp. Given the logistical challenges, the City does not expect to continue the pilot but will continue to explore other options that increase the longevity and legibility of stormdrain markings.
PIP 1 Att. A.2 Att. A.18	Stormwater Website	❍	The website includes information on various stormwater permit elements, resources for businesses and residents, and links to key City	The site is updated on a regular basis with pertinent information for both residential and commercial audiences. See 14.D.: *Outreach Materials Distributed* for website downloads and page

Item No.	Activity	Outreach Type	FY 08-09 Status	Evaluation
			departments implementing stormwater requirements as well as local and regional pages of interest.	visits.
PIP 1.A.1 PIP 2.C PM 6.A Program	Watershed Watch Sign at Happy Hollow Park and Zoo	❍	An Interpretive Sign, installed in FY 03-04, features a photo montage of beneficial uses of creeks and the Bay, along with four pollution-prevention messages: keep your car tuned to avoid oil leaks, avoid pesticide use (especially before rains), proper disposal of household hazardous wastes, and no dumping into storm drains.	The sign is located at the bottom of the entrance walkway into the Zoo. Every visitor to the zoo passes by the sign entering and leaving. In the winter of 2007 the Park and Zoo began an expansive renovation project, which affected attendance numbers. The park and zoo both are currently closed, and are scheduled to reopen in the fall of 2009, when construction is complete.
TRA PIP1	Ordinance banning smoking in City parks.	❍	As of October 2007, smoking is banned in all San José Parks per San José Municipal Ordinance 9.44.030F and 9.44.010A and Parks Ordinance 13.44.130. The ordinance bans smoking in any area owned leased or occupied by the City including; sidewalks, trails and pathways in or around park facilities, park strips and other grounds of any park and within twenty-five (25) feet of any entrance, exit, operable window, or intake opening of any golf course, community center or library. As per municipal codes and park ordinances, violators may be subject to citation or fine.	Park signage had been installed in all San José parks citing the smoking ban. In addition, an educational program has been designed to utilize an informative strategy to induce compliance through positive approaches and interaction with the community. The program consists of series of televised public service announcements, radio public service announcements, billboards and educational cards, which are being used to help assist city staff in informing the public to enjoy smoke free parks in San José.
PIP 1 Att. A.4	Adventure on the Green	❍	July 18, 2008 at Arena Green Park. Watershed Protection hosted a booth with watershed information and water coloring activity for kids. Also gathered feedback on draft Watershed Watch Brochure.	Approximately 150 people attended, mostly parents with young children.
PIP 1	Roosevelt Community Center and Skate Park Grand Opening	❍	December 13, 2008. The Roosevelt Community Center officially opened to the public with an official ribbon cutting ceremony and information tables about the Center and its unique features. The Center features several aesthetically pleasing stormwater pollution prevention elements, including two art pieces on the exterior of the building that filter roof run-off. Other design features that naturally filter stormwater at the site are landscaped swales, detention basins, and porous asphalt. Inside the center an interpretive	Approximately 500 people attended the grand opening. ESD staff hosted a table and discussed the stormwater features of the center and the importance of litter clean-up.

Item No.	Activity	Outreach Type	FY 08-09 Status	Evaluation
			sign about Coyote Creek encourages visitors to learn more about their watershed and the things they can do to improve it. These and other green building elements are part of the new building's bid for LEED Gold certification.	
PIP 1.B	Local Foods, Community Gardens, and Urban Agriculture: Bringing Back the Valley of Heart's Delight	❍	December 13, 2008. Dr. Rachel O'Malley, Associate Professor and Chair, Department of Environmental Studies, San José State University, gave a presentation on the many opportunities to eat locally and grow our own food in Santa Clara County.	Dr. O'Malley described why "Silicon Valley" was recently known as the "Valley of Heart's Delight," because of its stunning climate, rich soils and bountiful harvests until the 1960's. She then related to the audience how the new millennium has seen a renewed interest in community gardens, backyard gardens, locally produced food, and healthy, sustainable living.
PIP 1.B	Community Input Meetings on Reducing Plastic and Paper Shopping Bags	❍	January 28-29, 2009. Meetings to collect public comment on a proposed fee designed to reduce single use bag consumption. Participants discussed concerns related to the fee amount, administration and enforcement of the fee, use of the funds, logistic for retailers and need for public outreach. Alternative ideas included instituting a ban on all single-use carry-out shopping bags, implementing a tiered-fee system with only larger stores needing to comply, and increasing public education and incentive programs for shoppers who bring their own bags.	Over 120 members from business, environmental, faith, and community based organizations and interested public attended. Gathering public input and stakeholder involvement is a key component in developing plans to reduce disposable shopping bags
PIP 2.C	Water Pollution Control Plant Tours	❍	Free tours of the San José/Santa Clara Water Pollution Control Plant, targeting residents and businesses in the treatment plant's tributary area.	A total of 2,378 people attended one of 106 public tours offered in FY 08-09. Another 300-400 persons are estimated to attend tours during the month of June. Information on watershed protection, stormwater pollution prevention, and how our everyday activities impact the Bay and its wetlands were given along with info about the Plant.
PIP 2.C	Water Pollution Control Plant Stakeholders Tours	❍	Tours of the San José/Santa Clara Water Pollution Control Plant for stakeholders and user groups. Tours were offered after the Plant Master Plan Community Meetings, BAPPG training, and IU Academy training.	Approximately 195 people attended one of four tours offered in conjunction with training and workshops in FY 08-09. Information on watershed protection, pollution prevention and the role and operation of the Plant was provided.
PIP 1.B Att. A.4	National Night Out	❍	August 5, 2008. Multiple locations throughout the City hosted community entertainment and resource fairs promoting public safety and other neighborhood issues.	ESD hosted one table at Emma Prusch Park. Provided general stormwater pollution prevention materials.

Item No.	Activity	Outreach Type	FY 08-09 Status	Evaluation
PIP 1A Att. A.4	West Coast Green	❍	September 24-27, 2008 at the San José Convention Center.	This event drew approximately 10,000 attendees.
PIP 1.A.1 PIP 1.B. Att. A.4	Pumpkins in the Park at Discovery Meadow	❍	October 11, 2008. Watershed Watch booth with games and Pollution Prevention information.	This event drew approximately 12,000 to 14,000 attendees. See the Program Annual Report for details.
PIP 1.A.1 PIP 1.B. Att. A.4	Haunt the Hollow	❍	October 26, 2008. Watershed Watch booth with Pollution Prevention information.	This event drew approximately 6,000 attendees. See the Program Annual Report for details.
PIP 1 Att. A.4	Santa Clara County Creeks Coalition Conference	❍	November 15, 2008. City booth with pollution prevention and City trash reduction information.	This event was sponsored by 31 organizations including local and regional governments, water utilities, businesses, environmental organizations and sport and recreation clubs.
PIP 1 Att. A.4	Christmas in the Park Watershed Protection Tree	❍	December 2008 in Plaza de Cesar Chavez. Sponsored a Christmas tree and decorated it with watershed and pollution prevention messages	Estimated 450,000 visitors.
PIP 1.A Att. A.4	Christmas in the Park Watershed Watch Tree	❍	December 2008 in Plaza de Cesar Chavez. Watershed Watch sponsored a Christmas tree and decorated it with watershed and pollution prevention messages	Estimated 450,000 visitors. See Program Annual Report for details.
PIP 1.A.1 PIP 1.B. Att. A.4	Spring Garden Market at History Park	❍	April 4, 2009. Plant sale and demonstration fair for homeowners and garden enthusiasts. Watershed Watch booth with IPM information.	This event drew approximately 4,000 people. See the Program Annual Report for details
TRA 6 PIP 1	Mayor's Breakfast and Pride of San José Awards	❍	January 14, 2009. The Trash Prevention and Removal MOA team won the Pride of San José award for collaboration, which involved a brief presentation on the nature of the MOA work and the program's on creeks.	Approximately 300 people attended this public breakfast and awards ceremony.
PIP 1.B PM 6.A Att. A.4	Tuesday Farmer's Market	❍	Farmer's Market held on Tuesdays from April 21-June 16 on 5th Street between San Fernando Street and City Hall. Watershed Protection had a booth at the market on April 21, May 5, May 12, May 19, June 2, and June 16, 2009. Staff provided information and answered questions about the wastewater paths and pollution prevention in the sanitary sewer and storm drains. Specific messages included IPM, HHW, Mercury and Litter.	Distributed urban runoff, and wastewater pollution prevention messages and information in English, Vietnamese and Spanish. Estimated 1,500-2,000 attendees per market day. Audience very receptive to information on IPM, less toxic home and garden products and proper disposal of HHW.

Item No.	Activity	Outreach Type	FY 08-09 Status	Evaluation
PIP 1.B Att. A.4	Children's Fair at Discovery Meadow	❍ & ✎	April 25, 2009. Park Rangers gave Creeks Come to Class presentations and utilized the EnviroScape model to teach fair participants about watersheds, stormwater, and pollution prevention.	Approximately 6000 families attended the event.
PIP 1.B Att. A.4	Spring in Guadalupe Gardens	❍	April 25, 2009. Watershed Watch had a table with information on HHW, IPM, and Green Gardening.	See Program Annual Report for additional information.
PIP 1.B Att. A.4	Univision Cinco De Mayo Festival	❍	May 3, 2009. Watershed Protection had a table at the Univision Cinco De Mayo Festival held at the Santa Clara Fairgrounds. Distributed general pollution prevention materials as well as the promotional reusable bags.	Approximately 16,000 attendees at the event. Bilingual staff answered questions and distributed materials in English and Spanish.
PIP 1.B Att. A.4	Thermometer Exchange Events	❍	Collection event for residents to exchange their mercury-containing fever thermometer for a digital thermometer free of charge. Information on safe methods for Household Hazardous Waste disposal and other related pollution prevention methods were provided. Thermometer Exchange Events in San José and WPCP tributary area: July 18, 2008, Plant Tour for Seniors August 9, 2008, Educational Park Branch Library August 23, 2008,Tully Community Branch Library September 11, 2008, Plant Tour for Seniors September 13, 2008, Cupertino Fall Festival (not in San José) September 15-19, 2008, P2 Week November 22, 2008, Blackford NAC Health Fair January 24, 2009, Vineland Branch Library February 7, 2009, Senator Alquist's Event: Women's Health Forum March 7, 2009, Shirakawa Community Center March 14, 2009, Tully Community Branch Library April 7, 2009, Barbara Lee Senior Center (not in San José) April 24, 2009, Kaiser Farmer's Market May 3, 2009, Los Gatos Farmer's Market May 20, 2009, Southside Community Center June 3, 2009, Children's Discovery Museum Employee Health Fair	861 mercury-containing thermometers were collected and disposed of appropriately. This resulted in almost one pound, 434.5 grams, of elemental mercury removed from the environment. In addition, 6 mercury containing thermostats, 3 blood pressure cuff and three candy thermometers were collected. More thermometer exchange events will take place in the WPCP service area and San José in FY 09-10.

Item No.	Activity	Outreach Type	FY 08-09 Status	Evaluation
			June 11, 2009, Northside Community Center	
PIP 1.B	A Plastic Ocean: The Hidden Cost of Plastics	❍	June 2, 2009. Marcus Eriksen PhD, Director of Research and Education of the Algalita Marine Foundation, gave a presentation on the Great Pacific Garbage Patch. Reusable bags were distributed to attendees to assist in reducing the amount of disposable plastic bags that they use.	Approximately 85 attendees. Two scientists from the Algalita Marine Foundation present their recent research on the amount of plastic debris in the North Pacific Gyre and the impacts that plastic is having on marine life and its entrance into the food chain.
Overall Evaluation of General Outreach Activities		❍	San José's General Outreach focused on attending community events and maintaining up-to-date information on the City's website. Both were used to disseminate information to the public. Downloads from the City's website increased substantially this FY compared to last, and the City attended a wider variety of community events compared to last FY. The City continues to reach out to the public at selected community events that the Watershed Watch Campaign does not attend, such as the downtown farmer's market and Univision Cinco de Mayo Festival. These events are good venues to reach San José citizens, providing more outreach to a wider variety of residents. Promoting San José's Green Vision also provided an excellent opportunity to connect watershed and pollution prevention messages into other environmental messages such as zero waste and sustainability. Residents and businesses seem to be more accepting of environmental messages and behavior changes than they have in previous years allowing outreach to build on prior knowledge.	
IND 6 CON 7	Storm Sewer Stenciling	◎: Commercial	The City provided approximately 35 "No Dumping! Flows to Neighborhood Creek" stencils to contractors and developers to stencil approximately 260 storm drain inlets. Private businesses received approximately 5 No Dumping English, and 4 No Dumping Flows to Neighborhood Creek stencils to stencil approximately 26 inlets. Santa Clara Valley Transportation Authority received approximately 8 No Dumping English stencils to stencil approximately 50 inlets at different light rail stops. Approximately 123 No Dumping stencils distributed to ESD inspectors to give to businesses and industries as follows: 85 No Dumping English, 27 No Dumping Spanish, 7 No Dumping Vietnamese, and 4 No Dumping listing the neighborhood creek.	Storm drain stencils are placed in locations that are highly visible to residents and customers of businesses. Including the neighborhood creek name gives residents and customers specific information about their connection to the local creeks. Developers are required as a condition of the permitting process to stencil all storm drain inlets on a development. ESD inspectors give out "No Dumping! Flows To Bay" stencils to commercial and industrial businesses so that they can stencil storm drain inlets on their property.
TRA 6 Att. A.9	Litterbug Hotline	◎: Littering Vehicles	Launched in September 2007 by the Silicon Valley Anti-Litter Campaign. The City's Anti-Graffiti and Litter Program sponsors the hotline, which allows people to report vehicle littering.	Calls to the hotline resulted in 688 reports in FY 08-09. The top three items reported were cigarette butts at 88%, food wrappers at 8%, and generic litter at 3%.

Item No.	Activity	Outreach Type	FY 08-09 Status	Evaluation
			Littering vehicles are then sent a letter indicating that their vehicle was spotted on a specific date littering at a specific location, details the cost of litter abatement activities, cites the California Penal Code for littering, and encourages the vehicle owner not to litter.	
PM 6 Att. A.3 Att. A.11	Green Gardener Training	◎: Landscape businesses	Winter-Spring 2009: 20-hour training course offered through Municipal Adult Education to train landscapers in watershed-friendly landscape management techniques.	See Program Annual Report for details.
CON 7.B. Att. A.6	Conduct outreach sessions to development community	◎: Contractors	Department of Public Works staffs hold meetings with developers to discuss construction project specifications, including erosion and sediment control. Five pre-construction meetings were held during FY 08-09 for municipal projects. ESD Watershed Enforcement construction inspectors were invited to discuss erosion and sediment controls required at these construction sites. The four sites and dates of the meetings were Edenvale Community Center on September 10, Evergreen Community Center on October 14, Gary Alberston Parkway on October 15, and Coyote Creek Trail on October 15 and 28, 2008.	These meetings were of extreme importance to the contractors present since ESD field inspectors provided the erosion and sediment control training.
PIP 1 PIP 2.C M 5.A PM 6.A TRA 6	Curbside Courier web page and newsletter	◎: Residential recycling customers	Web page and newsletter focused on solid waste issues. Newsletter mailed to city recycling customers in their bill. The Fall 2008 issue focused on gardening and yard maintenance practices that conserve resources and prevent water pollution. It also featured a sidebar on the importance of moving your car to allow for street sweeping to prevent stormwater pollution and advertized the Costal Clean Up Day. The Spring 2009 issue focused on the less toxic housekeeping. It listed non-toxic alternatives to using chemical cleaning products, pesticides and fertilizers and a reminder to drop off toxic house supplies at HHW sites. It also highlighted the environmental stewardship of the West Evergreen Neighborhood Action Collation for their efforts to use compost instead of herbicides to control	The curbside Courier published twice a year as a Recycle Plus utility bill insert. The Curbside Courier reaches approximately 185,000 single-family households. Additionally, the Curbside Courier was published online, with 3728 downloads in FY 08-09: 916 English versions, 1,691 Spanish versions, and 671 Vietnamese versions.

Item No.	Activity	Outreach Type	FY 08-09 Status	Evaluation
			weeds in their neighborhood.	
PIP 1.C PIP2.B	Evergreen Business Association Dinner Meeting	◎: Businesses in Evergreen	July 24, 2008. Attended and presented to the Evergreen business Association on watershed and pollution prevention information for businesses owners.	Approximately 25 businesses owners attended. The presentation was very well received, and the attendees were enthusiastic about incorporating pollution prevention into their businesses.
PIP 1.C PIP2.B	Rivera Villa Retirement Community Presentation	◎: Residents at Rivera Villa	July 31, 2008. Presented info on pollution prevention, specifically green automotive practices, to residents at the Rivera Villa retirement community	Approximately 10 people present. The group was interested in the concepts, but most do not drive or have polluting behaviors of concern. Recommend not doing presentations at this type of facility in the future.
PIP 1	Central YMCA newsletter article on permeable paving	◎: YMCA members	August 2008. E-newsletter informs readers about the Central YMCA's new parking lot, and explains how the stormwater BMPs will benefit the environment.	City staff worked with Central YMCA staff to design their renovated parking area to incorporate stormwater management BMPs such as permeable pavers and tree planting.
TRA 6 PIP 2.B Att. A.9	Tarp Giveaway	◎: Landfill customers	November 1, 2009. Coordinated with the Cities of Palo Alto, Santa Clara, Sunnyvale, Cupertino, and the Santa Clara Valley Water District to distribute tarps and anti-litter information to vehicles using one of nine landfills and transfer stations in the County. The event was publicized in the Roadshow column of the San José Mercury News.	395 tarps distributed at nine landfills and transfer stations in Santa Clara County. The heavy rain that day likely kept most people from going to the landfills.
TRA 6 PIP 2.B	Project: Homeless Connect	◎: Urban Campers	November 21, 2008. Hosted a table showing the negative environmental and health impacts of people living in the creeks.	Over 600 homeless residents received assistance and more than 300 community members volunteered their time. At the event, over 20 people were permanently housed.
PIP 1 Att. A.4	Rainbow West and Miller Neighborhood Associations Mini Green Fair	◎: Neighborhood Association and High School members	January 28, 2009. City staff and a representative from Horizon Energy Systems, a local solar installer, organized a mini-green fair. Attendees were provided information on the City's Green Vision, energy and water conservation programs, and green building. Horizon Energy Systems offered a neighborhood discount for solar installations.	Over 50 members of the Rainbow West and Miller Neighborhood Associations at Lynbrook High School attended. Approximately 10 households signed up for a solar installation evaluation for the neighborhood discount.
PM 6.D PIP 2.C Att. A.3 Att. A.8	Create and provide fact sheets and materials to pesticide retailers to facilitate point-of-purchase outreach to support IPM Store Partnership Program	◎: Consumers	There are nine stores in San José participating in the IPM store partnership. This work is done at the Program level. See the Program Annual Report for details.	This work is done at the Program level. See the Program Annual Report for details.

Item No.	Activity	Outreach Type	FY 08-09 Status	Evaluation
PM 6.A PIP 2.C	OWOW Fleas fact sheets at Animal Services Center	◎: Pet Owners	Started in April 2006, the OWOW Fact sheet for Fleas, in both English and Spanish, is available in the Animal Services Center's literature racks.	Center estimates 300 pet adoptions per month. The flea factsheets are available in a location that new pet owners are likely to see and be made aware of less toxic means to control fleas.
PIP 1 PM 6.B Att. A.11	IPM Goat and Sheep Weed Control Press Release	◎:Public via Media outlets	March 2009 ESD issued a press release detailing the use of sheep and goats to control weeds surrounding the San José/Santa Clara Water Pollution Control Plant. The article highlighted the effectiveness of the IPM method and the environmental value of avoiding thousands of pounds of herbicides to control weeds.	Ten different media outlets, ranging from newspapers (the Mercury News, Sacramento Bee, Santa Cruz Sentinel and Miami Herald) to local television (CBS 5, KRON 4, KTVU, and NBC) and various internet sites covered the press release.
PIP 1 PIP 2.C Att. A.3	Regional Media Relations	◎:Public via Media outlets	One media pitch on pharmaceuticals as a watershed pollution issue.	See Program Annual Report for details.
Att. A.4	Free E-waste drop-off event at Happy Hollow	◎: Residents	January 24, 2009. Free e-waste drop-off event	Free tickets to the upcoming grand reopening of the Zoo in Fall 2009 were offered to people bringing in monitors or televisions.
PIP 2 Att. A.4	Compost Bin Workshops and Sales	◎: Residents	Composting workshops were held on July 12, August 9, September 13, October 4 2008 and February 7, March 7, April 4, April 25, May 2, June 6 2009. Workshops teach residents how to compost. Compost bins are sold at a discount to City residents.	564 people attended the compost bin and worm composting workshops. In addition, Earth Machine Compost Bins were on sale by appointment and 125 bins were sold to San José residents.
ICID 2.A.2 ICID 4 PIP 2.C PM 6.A Att. A.9 Att. A.19	Outreach to SNI Neighborhood Action Committees	◎: Residents	Last FY the City reached out to eight SNI Neighborhood Action Committees (NACs) in regards to elevated ICID complaints for illegal dumping and vehicles dripping auto fluids. In FY 08-09, the City continued this effort in six more SNI NACs and included messages about car washing and volunteer opportunities to proactively protect the watershed.	See below
ICID 2.A.2 ICID 4 PIP 2.C PM 6.A Att. A.9 Att. A.19	Winchester SNI NAC Meeting	◎: Residents	April 15 2009. Presented and distributed info on pollution prevention, watershed awareness, the difference between storm and sanitary sewers. Explained importance of reporting dumping, preventing litter, car washing and auto maintenance, proper disposal HHW, proper disposal of thermometers and exchange opportunities, no FOG or pharmaceuticals down	Approximately 20 attendees. Community members were very receptive to the information presented and had a particular interest in FOG and car washing information.

Item No.	Activity	Outreach Type	FY 08-09 Status	Evaluation
			the drain.	
ICID 2.A.2 ICID 4 PIP 2.C PM 6.A Att. A.9 Att. A.19	Mayfair SNI NAC Meeting	◎: Residents	April 23, 2009. Presented and distributed info on pollution prevention, watershed awareness, and the difference between storm and sanitary sewers. Explained importance of reporting dumping and preventing litter, as well as recycling, proper disposal HHW, e-waste, mercury thermometers, FOG and pharmaceuticals.	56 attendees. Community was very engaged, in particular, they asked about disposal of pharmaceuticals.
ICID 2.A.2 ICID 4 PIP 2.C PM 6.A Att. A.9 Att. A.19	Brookwood Terrace/ Five Wounds SNI NAC Meeting	◎: Residents	April 28, 2009. Presented and distributed info on P2, watershed awareness, the difference between storm and sanitary sewers, whom to call if dumping occurs, proper disposal of thermometers and exchange opportunities, no FOG down the drain, and no pharmaceuticals down the drain.	31 attendees. Community members were very receptive to the information presented. The anti-dumping message was stressed.
ICID 2.A.2 ICID 4 PIP 2.C PM 6.A Att. A.9 Att. A.19	Hoffman Via Monte SNI NAC Meeting	◎: Residents	May 20, 2009. Presented and distributed info on P2, watershed awareness, the difference between storm and sanitary sewers, reporting dumping, proper disposal of HHW, IPM, car washing and auto maintenance, no FOG or pharmaceuticals down the drain, and volunteer opportunities.	15 attendees. Community members were very receptive to the information presented and had questions about less toxic home and gardening techniques, how to report clogged drains and dumping and proper disposal of pharmaceuticals.
ICID 2.A.2 ICID 4 PIP 2.C PM 6.A Att. A.9 Att. A.19	Blackford SNI NAC Meeting	◎: Residents	June 4, 2009 Presented and distributed info on P2, watershed awareness, the difference between storm and sanitary sewers, reporting dumping, proper disposal of HHW, IPM, car washing and auto maintenance, FOG or pharmaceuticals down the drain.	26 attendees. Community members were very receptive to the information presented. They were knowledgeable about the issues of litter from participating in the Adopt-A-Creek program, and were interested in the information on green gardening practices.
ICID 2.A.2 ICID 4 PIP 2.C PM 6.A Att. A.9 Att. A.19	Edenvale/ Great Oaks SNI NAC Meeting	◎: Residents	June 10, 2009. Presented and distributed info on P2, watershed awareness, the difference between storm and sanitary sewers. Gave information on reporting dumping, proper disposal of HHW, IPM, car washing and auto maintenance, no FOG or pharmaceuticals down the drain, and volunteer opportunities.	25 attendees. Community members were very receptive to the information presented and expressed that they previously were unaware of how to report storm drain pollution and were observing in their neighborhood improper waste disposal.
IND 6	FOG Presentation to Business Owners	◎: Commercial	November 6, 2008. City staff presented information on the changes to the City's FOG Ordinance to Business Owners.	70 attendees. Distributed FOG-related outreach materials.

Item No.	Activity	Outreach Type	FY 08-09 Status	Evaluation
PIP 2 Att. A.4	Earth Day at San José State	◎: SJSU Students	April 22, 2009 at San José State. Hosted an information table at Earth Day information and resource fair hosted by SJSU for their students, local residents, and local businesses.	Estimated 3,000 attendees.
PIP 1. A PIP 1.B Att. A.4	Carwash Promotion at Capital Premier Carwash	◎: Car Owners	May 6, 2009. Watershed Watch collaborated with Capital Premier Car Wash on a promotional event to encourage washing car at commercial carwashes instead of driveways. Staff discussed pollution prevention and distributed materials to car owners waiting for discount car washes.	See Program Annual Report for additional information.
IND 6 PM 6.A. M 5.B CB-3 PIP 2 Att. A.6	Industrial Users Academy	◎: Industrial	May 15, 2009. The Industrial User Academy is an all-day training workshop for permitted industrial users in the San José/Santa Clara Water Pollution Control Plant tributary area. Attendees received training on the Pretreatment Program, wastewater discharge permit applications, permit issuance and conditions, and the Inspection Program. They also completed Self Monitoring Reports, Enforcement, Sampling, and Storm-water Guidelines.	The academy was well attended by 34 representatives of 26 industrial users. An exit survey was administered and it showed that all of the attendees went away with greater knowledge of the subject matter, with 92% specifically having a better understanding of the stormwater inspection program. 100% agreed, or strongly agreed, that the workshop was useful to them
CON 7.B CON 7.C Att. A.7	Conduct outreach sessions to development community	◎: Developers	September 9, 2008. Department of Public Works and ESD staff conducted training on erosion and sediment control for private developers of type 2 projects. May 27, 2009. City hosted a workshop on the Revised Draft NPDES State Construction General Permit attended by 6 developers/contractors/engineers.	20 developers/contractors/engineers attended. Topics discussed City's Stormwater NPDES Permit, State NPDES Construction General Permit, Watershed Enforcement procedures, annual project review procedures timeline for Type 1, 2, and 3 construction projects, and stormwater management challenges and BMPs.
PIP 2.C M.5 Att. A.10	Mercury Outreach	◎	City and Program staff assisted County with Mercury-related outreach for the County's Universal Waste activities. City staff also distributed the County's 2 mercury/universal waste brochures in City literature racks, with CFL outreach, and at City events.	See Program Annual Report for details.
IND 6 ICID 4 CB-3.B Att. A.6	GIASP NOI Outreach	◎: High potential Cu and Ni dischargers	May 29, 2009. Distributed NOI Checklist, SWPPP Flow Chart, along with a contact letter informing select businesses that they may be subject to the State General Activities Stormwater Permit	Cover letter and General Industrial Activities Storm Water Permit fact sheet sent to 55 facilities, based upon their SIC code. Seven SIC codes were targeted based on the recommendations from the 1997 Industrial Stormwater Pollution Pilot.

Item No.	Activity	Outreach Type	FY 08-09 Status	Evaluation
			(GIASP.)	
IND 6 CB-1.B.	Mobile Surface Cleaner Training Workshops	◎: Commercial	Training available upon request. No requests received in FY 08-09.	Training available upon request. Companies requesting training are first referred to BASMAA's online training, and offered live training if the online version does not meet their needs.
Overall Evaluation of Targeted Outreach activities		◎	FY 08-09's targeted efforts focused on reaching audiences at the grass-roots level. By conducting outreach to people where they were, and when they were primed to hear it, the message was more easily understood and the information applied to practical outcomes. At the local level, San José has successfully directed a variety of messages to a wide array of audiences through publishing articles in newsletters, hosting trainings and workshops, attending events targeting specific audiences, direct mailing, and collaborative efforts at the Regional level. Targeted outreach supplement tasks have been done in other elements of the URMP, such as Illicit Connection/Illegal Dumping, the Industrial/Commercial Dischargers, Construction Inspection, Pesticide Management, Mercury, and the Copper and Nickel Action Plans.	
PIP 4.A.1.a Att. A.12	Coastal Clean-up Day	✋	September 20, 2008. Promoted event in the ESD newsletter, Green Schools ListServ, and on the City web site.	Approximately 1,813 volunteers countywide, a 109% increase from last year. Approximately 95,500 pounds of trash were removed, a 298% increase; and approximately 26,000 pounds of recyclables were removed, a 219% increase over last year's numbers. 11 out of 26 clean-up sites in Santa Clara County and 750 of the 1,813 volunteers were at San José sites. Volunteers were surveyed after the event. See the Santa Clara Valley Water District's Annual Report for details.
PM 6 PIP 4.A	Annual pruning of the Municipal Rose Garden	✋	January 10, 2009. Volunteers pruned the 2,700 rose bushes at the garden. PRNS staff, in collaboration with the Friends of the San José Rose Garden, provided training and demonstrations on proper rose pruning techniques, which can increase resistance to pests and prevent the need to apply pesticides.	Over 250 volunteers participated. This successful pruning event is part of the ongoing efforts between PRNS and the Friends of the San José Rose Garden to produce healthy, vibrant roses at the Municipal Rose Garden for everyone to enjoy.
PIP 4.A TRA 6	Illegal Sign Clean-up	✋	February 28, 2009. Volunteers removed illegally posted signs from streets in Council District 1. Illegal signs are a blight on neighborhoods, creating visual clutter and eventually winding up as litter on the streets	Over 80 volunteers participated. Over 300 signs were removed from District 1, as well as parts of Campbell and Cupertino that are adjacent to District 1. Due to the success of the event and the enthusiasm of its participants, future illegal sign clean-up events are being planned.
PIP 1.B PIP 4.A TRA 6	9th Annual Great American Pick Up	✋	April 25, 2009. ESD, PRNS, DOT, City Manager's Office, Mayor's Office, SJPD, City Attorney's Office, along with Caltrans, San José Conservation Corps, and the Department of Corrections planned and coordinated event in Santa Clara County	There were multiple clean-up sites in each council district in San José. 1,785 volunteers collected 634 bags of litter and 63 bags of recyclable materials, all of which are increases from the previous years. Additionally, Our City Forest planted 55 new trees at Mise Park and T.J. Martin Park.

Item No.	Activity	Outreach Type	FY 08-09 Status	Evaluation
PIP4.A.1.b Att. A.13	National River Clean-up Day	✋	May 16, 2009. Promoted event in the City employee newsletter, the Great American Litter Pick-up flyer, at community events, and on the City web site.	967 volunteers at 31 sites, a 40% increase from last year's event. Approximately 27,935 pounds of trash and 22,633 pounds of recyclables were removed from a distance 46.1 miles. Close to 60% more trash and 90% more recyclables were removed. 10 out of 31 clean-up sites in the County were in San José. Volunteers were surveyed after the event. See the Santa Clara Valley Water District's Annual Report for details.
PIP 1.B PIP 4.A Att. A.4	National Bike to Work Day (BTWD)	✋	May 14, 2009. The City hosted one "energizer station" with free food, drinks, bike helmets, bike tune-ups, promotional items and information to give out to bikers. Both stormwater and air quality benefit from the reduced number of cars on the road. Encouraging people to use alternative modes of transportation highlights this benefit and encourages public participation.	An estimated 230 bicyclists stopped at the City-sponsored energizer station. 100 of those bicyclists received helmet fittings and free bike helmets. With over 240 Energizer Stations strategically placed along major commute routes throughout the Bay Area, with 12 in San José, organizers estimate that participation numbers increased 36% from previous years.
PIP 1.B PIP 2.C PIP 4.A TRA 6 Att. A.9	Anti-Litter Program	✋	The purpose of the Anti-Litter Program (ALP) is to maintain the beauty of San José by preventing graffiti and litter through community involvement, eradication, and enforcement. ALP provides free clean-up supplies to volunteers, designates litter hot spots for adoption, does school outreach with anti-litter messages, and hosts special clean-up events like the Great American Pick-up.	In FY 08-09, the ALP has 3,899 Pick Up San José volunteers on the rolls, a 13% increase over last FY. Participants picked up 1,415 bags of litter removed from the City's streets, parks, creeks, and neighborhoods. As of June 2009, 104 of the 150 Litter Hot Spots have been adopted, and seven illegal dumpsites were eliminated.
PIP 1.B PIP 2.C PIP 4.A TRA 6 Att. A.9	Adopt-A-Park and Adopt-A-Trail	✋	Adopt-A-Park is citywide volunteer program that recruits and trains residents to assist in the general care and maintenance of neighborhood trails, neighborhood/regional parks, and open spaces in San José.	The City's Adopt-a-Park program has 187 parks eligible for adoption. The Adopt-a-Trail has 70 trail segments eligible for adoption. In FY 08-09 1,449 residents in 96 groups gave 9,284 hours to cleaning parks and trails.
PIP 1.B PIP 2.C PIP 4.A TRA 6 Att. A.9	Alum Rock Trail Days	✋	Monthly events where residents help maintain trails (e.g. weed abatement, trail repair, litter removal) in Alum Rock Park.	This program has been active for over 20 years. Average months see less than 10 volunteers showing up, but some months see dramatic turnouts of Scouts working on outdoor merit badges.

Item No.	Activity	Outreach Type	FY 08-09 Status	Evaluation
Overall Evaluation of Citizen Participation Outreach Activities			Citizen participation activities are a potent method for getting residents out into the Watershed and fostering environmental stewardship. The City participated in four Clean-up events, as well as two special events—Bike to Work Day and the Municipal Rose Garden Pruning—designed to promote participation and stewardship in the citizens of San José. Tying Clean-up events to pre-existing events such as Coastal Clean-up Day and the Great American Pick-up is a good way to maximize promotion. Advertising paid for by regional entities is useful for raising awareness locally. The City also organized regular participation activities through the Adopt-A-Park, Adopt-A-Trail, Anti-Litter Volunteers, and Volunteer San José programs. Through these programs, thousands of San José residents are taking an active role in watershed stewardship.	
PIP 3.A.3 Att. A.17	Youth Watershed Education Grants (YWEG)		Four grants were recommended to be awarded in FY 08-09 cycle, two to schools and two to non-profits working with youth. A total of $18,486 was given in grants ranging from $3000 to $5,000.	This year's cycle saw a decline in the number of proposals compared to the last three FYs. Four grants were awarded this year compared to the 10 grants awarded last FY, however this FY grants are larger in size, with the minimum being $3,000 compared to $900 last FY. An estimated 2,660 youth will be impacted by these grants, similar to last year's estimated 2,680. Grant Projects are ongoing, and are evaluated at the end of the grant cycle.
PIP 1.C PIP 3.A.3 Att. A.14	Wacky Watersheds Workshops		No workshops were held in FY 08-09 as the curriculum is under review.	Although no workshops were conducted, curriculum materials were still available by request via phone or the ESD website. Workshops will begin once the review and revision of curriculum is completed.
PIP 1.B PIP 3.A	School Worm Composting Bin and Presentation		Presentations on vermicomposting were given at 20 schools. Each school received a worm compost bin following the presentation. Presentations were made at elementary, middle and high schools. One teacher training on worm composting was held at RAFT.	951 students, teachers and staff attended the presentations and learned about the benefits and techniques of composting with worm bins. 21 teachers attended the special workshop on worm composting at RAFT.
PIP 3.A	San José Go Green Schools Program		The San José Go Green Schools Program fosters school recycling and environmental stewardship in a parent and community driven process based on the Go Green Initiative of Pleasanton. The City encourages schools to Go Green and connects them to free recycling supplies, mini-grants, site assessments, and other green resources.	The Go Green Schools steering committee has diverse members representing City, School, and Community organizations all dedicated to helping schools Go Green. To date 92 SJGGS grants have been received by schools in San José. In FY 08-09, the City awarded 28 grants totaling $47,249 to schools to help them get their Go Green Schools programs started.
PIP 3.A Att. A.4	Green Vision/Green Schools: City of San José 2009 Schools Environmental Conference		April 4, 2009. One-day workshop at the Fairmont Hotel with lectures and break-out sessions describing how schools can protect natural resources and foster environmental stewardship while saving money..	155 teachers, parents, students and other schools and community representatives from San José attended, which was double the attendance rate of the previous conference. 79 exhibitors, speakers, dignitaries contributed to the conference. Evaluations were submitted, with 96% of respondents rating the overall conference as good or excellent. The conference sessions

Item No.	Activity	Outreach Type	FY 08-09 Status	Evaluation
				reported as "most valued" were recycling 101, composting basics, and the exhibit halls.
PIP 1.B PIP 1.C PIP 3.A.3 Att. A.15	Creeks Come to Class (formerly the Water Awareness Program)		Presentations focusing on Pollution Prevention conducted in classrooms, and *It's Wet It's Wild It's Water!* curriculum distributed to teachers. See 14.D: *FY 08-09 San José School Outreach* for details.	62 class presentations were conducted, reaching 1,578 students. The number of presentations increased significantly this year and resulted in an over 200% increase in the number of students reached.
PIP 3.A.1	ZunZun Presentations of "The Musical Watershed"		See Program Annual Report for details.	See Program Annual Report for details.
PIP 3	Cupertino School District Field Trip Bussing		Paid for bussing for four San José schools in the Cupertino Union School District and to bus 3rd graders to local creeks as part of Cupertino's 3rd Grade Creek Education Program.	See Cupertino Annual Report for details.
PIP 1C	Presentation at Mission College		July 1, 2008. Gave watershed and stormwater pollution prevention presentation at Mission College Environmental Biology class.	25 students attended.
PIP 3	Job Shadow Day		February 13, 2009. Annual event during which City employees volunteer to host high school students at the work site. It is an opportunity to encourage high school students to consider a career in public service and educate them on the variety of positions within the City..	This year the City hosted over 200 high school students. ESD won the "Most Students Hosted" Award for having 13 employees, 2 from Watershed Protection, volunteer to mentor approximately 30 students. Among the projects that Watershed Staff presented to the students were the Guadalupe River Improvement Project, the Roosevelt Community Center and the Storm drain Stenciling Program. Students enjoyed spending a day shadowing City employees performing their duties, and most of the students expressed interest in joining a government agency. The event allowed employees to serve as role models to teenagers and encourage them to protect the environment and see the City responsibility to the environment that surrounds us.
PIP 3	River Glen Elementary School Earth Day Celebration		May 1, 2009. Responded to a request for water-themed activities for this school-wide event.	This request for a presentation came in too late to fill, so the City sent two educational activities for parent volunteers to lead at the event. River Glen is an English-Spanish immersion school with approximately 360 students.
PIP 1.B PIP 1.C PIP 3.A.3 Att. A.16	Slow the Flow		Grant to Don Edwards Environmental Education Center at Alviso to host 9 different types of events: special events, interpretive programs, teacher orientation, field trips, in-class presentations, outreach presentations, workshops, special visits and interpretive displays.	This program reached 6,337 residents in the SJ/SC WPCP Tributary area in FY 08-09. This was accomplished through special events (including a week-long summer camp), field trips, integrated experiences, weekend programs, offsite presentations, outreach events, workshops, and co-op programs. Additionally, visitors can view the interpretive displays at the Environmental Education Center (the number of people who do this is not

Item No.	Activity	Outreach Type	FY 08-09 Status	Evaluation
				tracked.).
PIP 1.B PIP 1.C PIP 3.A.	Water Wizards Festival		May 20, 2009. Water education festival for 3rd graders. The purpose of the festival was to increase the awareness of the importance of water and promote stewardship of water as a resource. ESD hosted three booths and taught activities related to the City's mission concerning water and watershed issues. The messages taught were pollution prevention, difference between storm and sanitary sewer systems, value of recycled water, and the value of Treatment Plant.	250 students from 2 San José public schools, and 1 Santa Clara public school. Pre- and post-testing of each student showed knowledge increases in most areas: Up 42% in knowing that we live in a watershed (32% to 74%) Up 12% in knowing that polluted water is not good to drink (77% to 89%) Up 11% in knowing that how we use water on land affects our rivers (64% to 75%) Up 3% in knowing that all living things need water (88% to 91%)
Overall Evaluation of Education Outreach Activities			Education continues to be a vital component of San José's pollution prevention plan. The City actively contributes to education both as a City and through the Program. San José commits significant resources to youth education with the goal of instilling a sense of stewardship for the environment. San José employs both in-class education and train-the-trainer approaches to Outreach. In-class presentations are more expensive per student reached, but lend themselves better to evaluation. Train-the-trainer has the potential to reach many more students, but it is extremely difficult to measure the effectiveness of this potential. Youth Watershed Education Grants provide funding for groups and educators to implement their own programs that accomplish the City's education goals. FY 08-09 saw the continuation and expansion of the City's Go Green Schools Program. Go Green Schools fosters recycling and environmental stewardship in a parent and community driven process, and supplies grants to schools to help them achieve their green goals. The City connects schools with free recycling supplies and other green resources, and encourages them to take up Go Green at the level the school chooses, whether it be recycling or environmental curriculum or green purchasing or other green practices. This year the Go Green Schools Program hosted its first full day conference, which allowed for a wider range of topics and sessions for attendees.

PRP C.	As required, develop new five-year work plan that starts the following FY upon adoption of MRP.	FY 08-09	Not required in FY 08-09 pending MRP adoption.	ESD

15.B Permit Reapplication Preparation Evaluation

The City's current NPDES permit was adopted in February 2001 for a five-year period. The Permit was amended in October 2001 and July 2005, with both amendments relating to the New and Redevelopment stormwater treatment and hydromodification provision, also known as Provision C.3. The Permit has been administratively extended since February 2006, pending the adoption of the Bay Area-wide MRP.

In late 2005, the Water Board embarked on a multi-stakeholder process to craft an NPDES permit, called the Municipal Regional Permit (MRP), that would apply to all municipal stormwater dischargers in the Bay Area. City staff has dedicated numerous hours analyzing MRP drafts, briefing stakeholders, and preparing responses to the drafts. Staff has also participated in the steering and stakeholder meetings convened by Water Board staff. City staff will continue to participate in the MRP process through the Program, BASMAA, and individually as a City.

URBAN RUNOFF POLLUTION PREVENTION PROGRAM

FY 2008-09 ANNUAL REPORT

September 15, 2009

Santa Clara
All-America City
2001
Street Department

August 25, 2009

Mr. Bruce H. Wolfe, Executive Officer
Regional Water Quality Control Board
San Francisco Bay Region
1515 Clay Street, Suite 1400
Oakland, CA 94612

Subject: City of Santa Clara Urban Runoff Management Program
FY 2008–2009 Annual Report

Dear Mr. Wolfe:

This report is submitted by City of Santa Clara in conjunction with the Santa Clara Valley Urban Runoff Pollution Prevention Program's Annual Report, pursuant to provision C.6.a. of the Program's reissued municipal stormwater NPDES Permit (Order No. 01-024). The report summarizes activities performed during FY 2008-2009 in accordance with the City of Santa Clara's Urban Runoff Management Plan (URMP) submitted to the Regional Board on September 1, 1997 and updated in January 2004, and the performance standards contained therein.

Contents of Report

The goals of this Annual Report are to: 1) concisely document implementation of our URMP and FY 08-09 Work Plan during the past fiscal year; 2) evaluate program results for continuous improvement; 3) comply with permit requirements; and 4) share this information with other Co-permittees, municipal decision-makers, and the public. The FY 2008-09 Annual Report contains the following sections:

- Certification Statement
- IC/ID Elimination Activities
- Industrial/Commercial Discharger Control Program
- Public Agency Activities
    - Public Streets, Roads and Highways O&M (including Corporation Yards)
    - Rural Public Works O&M
    - Storm Drain O&M
    - Water Utility O&M
- New Development Planning Procedures
- Construction Inspection
- Public Information and Participation
- Pesticide Management Activities
- Mercury Pollution Prevention Activities
- Copper Action Plan/Nickel Action Plan
- Trash Inventory and Management
- Staff Training Summary Table
- Performance Standard Certification Statement

Program Highlights and Accomplishments

The City of Santa Clara has been active in the Program elements and very active at the Co-permittee element level. IC/ID activity reported 62 incidents. IND/COM inspections totaled 920. Construction inspections totaled 725 (17 SWPPP inspections and 701 windshield inspections with 7 re-inspections). There were 21 construction element violations as compared to 17 violations from the previous fiscal year

Analyzing and detection of trends at the Co-permittee level continues to improve with each Annual Report. The City is alert to the various reporting information that is collected and has developed a history of adapting its resources to minimize stormwater pollution.

The City continues to retain EOA Inc. to assist with the planning and implementation of the C.3. Provisions. The assistance provided by EOA has been valuable in supporting staff on site specific C.3. Provision questions.

Continuous Improvement Activities

The City of Santa Clara takes pride in our Urban Runoff Management Program and the quality of stormwater. The IND/COM element continues to be dynamic in identifying industries with reoccurring violations. To this end, the City has identified, as in past years, automotive and food service facilities. The City's goal is to reduce stormwater pollution to the maximum extent practicable through education, targeted inspection on identified hot spots and if necessary, through vigorous enforcement of our Storm Drain Ordinances.

The City has assumed an aggressive stance with repeat violation facilities by issuing Pre-Citation/ Administrative Citations instead of repetitive Violation Notices. Violation Notices and Administrative Citations are issued to persons and businesses that are polluting or storm drain system. The City is maintaining a data base of repeat offenders.

Thank you for your review of this FY 08-09 Annual Report. If you have any questions regarding the materials submitted, please contact Rick Mauck at 408-615-2099.

ICID ELIMINATION ACTIVITIES

1. **What type of incident causes the most problem?**

   The type of incident that causes the most compliance issues are cement related washouts from smaller concrete and masonry contractors. Cement related incidents totaled 15 out of 62 (refer to page 4 "breakdown of top six violators for level of enforcement action"). Enforcement actions and BMPs are continuously distributed to cement related contractors due to the high rate of violations. The potential reason for this problem is unlicensed contractors and the belief that these individuals do not stress to their employees stormwater protection.

2. **Is a particular location or source a large part of the problem?**

   The locations where most of these types of incidents occurred were in residential neighborhoods. Cement related incidents total 15 out of 62 total incidents (see attached chart titled "ICID Elimination Activities Violation Percentage").

3. **Might it be getting better or worse?**

   Cement related incidents totaled 15 in FY 08-09 compared to 18 in FY 07-08. It appears that the problem is improving somewhat. Increased contractor education is the main reason attributed for the improvement.

4. **What might be the causes?**

   Cement related incidents still continue to be the largest violation in terms of percentage, despite the improvement in FY 08-09. The cement related businesses, given their transient nature, are either not receiving the outreach or are not passing the information on to all their employees. Unlicensed contractors further compound the issue because the permit process is often not completed, circumventing the distribution of BMP material.

5. **What, if anything, will you do differently next year?**

   The City featured an article about construction waste in the Spring 2009 edition of Inside Santa Clara, a local paper mailed to all residents and businesses quarterly. The article was

designed to educate our residents who hire cement related contractors. It included information about how to hire a reputable contractor, specific best management practices to look for, and contact information for our Code Enforcement Technician in case a violation is noticed. It is unlikely that the additional effort, over what is already occurring, will better educate all cement related contractors. In spite of storm drain inlets having the "NO Dumping" stencils, and through word-of-mouth not to dump into storm drains, the best solution is to continue to educate our residents.

City of Santa Clara

FY 08-09 Annual Report

Industrial/Commercial Discharger Control Program

CITY OF SANTA CLARA
FY 2008-09 ANNUAL REPORT
INDUSTRIAL/COMMERCIAL DISCHARGE CONTROL PROGRAM

The City of Santa Clara's Industrial/Commercial Discharge element has become well-established and efficient in monitoring the businesses of concern within the City. The City's Code Enforcement Technician and Stormwater Inspector have several years experience working with the elements of the City's stormwater pollution prevention program. Continuity in this position has provided greater efficiency, better communication within other departments and the insight to identify trends over time.

During the FY 2008-09, the City's Code Enforcement Technician and Stormwater Inspector conducted a total of 920 IND/COM mandatory and non-mandatory inspections (see attached chart titled "FY 08/09 IND/COM Number of Inspections by Category") as compared to 1491 inspections in FY 07-08. Twenty-four mandated inspections including re-inspections were conducted for FY 2008-09. Mandated inspection facilities are typically inspected bi-annually or sooner, as determined by SIC code or previous compliance issues. Non-mandated inspections required in the FY 08-09 Work Plan vary from year to year. In the FY 08-09 Work Plan there were 12 facility categories inspected with 920 inspections. The inspections conducted at these facilities resulted in a total number of violations detailed in the following graph. Note that the total number of inspections includes both initial inspections and re-inspections as necessary to confirm compliance.

FY 08-09 IND/COM
MANDATED AND NON-MANDATED OCCURING VIOLATIONS AS COMPARED TO NO VIOLATIONS

Note: A non-mandatory inspection is an inspection that occurs at a facility type designated in the current work plan. A mandatory inspection is the result of a pre-determined inspection frequency based upon SIC code.

A total of 169 violations were found in FY 08-09. Twelve of those violations were found during mandatory inspections and 157 violations during non-mandatory inspections.

All IND/COM violations in the City of Santa Clara received follow up inspections and were corrected timely as dictated by conditions. All IND/COM inspections conducted in the City are documented on a Non-Point Source IND/COM inspection sheet and kept on file.

When violations are found during inspections, proper BMPs are distributed and a follow up inspection is conducted. When a violation is minor, a letter stating that corrective action has been completed from the facility contact person with supporting dated pictures is an acceptable means of compliance.

Refer to the table on the following page for detail of the type of violations found for each respective category.

CITY OF SANTA CLARA URBAN RUNOFF POLLUTION PREVENTION PROGRAM FY 2008-09 ANNUAL REPORT

FY 2008-09
STATUS OF INSPECTIONS AND VIOLATIONS BY FACILITY CATEGORY (Includes Re-Inspections)

Mandatory Inspections

Category	Description	Status/Common Violations Found	# of Inspections	# of Violations
8	**Metal Manufacturing**	Roof equipment leaking	6	1

8	**Metal Manufacturing (Non NOI)**	Hazmat storage	5	2
17	**Other (Non NOI)**	Hazmat storage	27	8
		Total	**920**	**169**

Facilities that have had recurring stormwater related violations are issued Pre-Citation Notices and Administrative Citations. The Administrative Citations carry a penalty ranging from $50.00 to $1000.00, depending on the nature of the violation. City Staff believes that the Administrative Citation process is its best tool to ensure clean stormwater practices. The City will continue to target facilities that have the highest rate of violations with increased inspection frequency.

PUBLIC AGENCY ACTIVITIES

Rural Public Works Operation and Maintenance

Rural roads within the City are the responsibility of the Parks Department. One exception is the creek trails that have been/are being constructed along San Tomas-Aquino Creek. Reach 1 (Hwy 237 to Agnew) was completed in early 2004 and Reach 2 (Agnew to Scott Blvd.) was completed in early 2006. Reach 3 (Scott Boulevard to Monroe Street) was completed in 2008. These improvements, are maintained by the Street Department.

As with other elements, City staff is knowledgeable of applicable BMP's and are educated on Storm Water Pollution Prevention BMP's as needed. For current and future contracted projects, BMP's are required and enforced by on-site inspectors and/or Storm Water Inspectors.

General Comment: The City has a total park area of 187.5 acres, 39,375 linear feet of 8-foot wide trails, 21,600 linear feet of 12-foot wide golf trails, nearly 3 miles of paved creek trails and 1.25 acres of concrete lined ponds/fountains.

City of Santa Clara

FY 08-09 Annual Report

Public Streets, Roads, and Highways Operation and Maintenance

CITY OF SANTA CLARA
FY 2008-09 ANNUAL REPORT
PUBLIC AGENCY ACTIVITIES

Public Streets, Roads & Highways Operation and Maintenance

The Street Department is responsible for the maintenance of approximately 240 miles of streets within the City of Santa Clara. It should be noted that the following streets are not within the jurisdiction of the City:

- Central Expressway (County)
- Lawrence Expressway (County)
- San Tomas Expressway (County)
- El Camino Real (State)

In addition, some boundary streets are shared with other jurisdictions – most notably Stevens Creek Boulevard (primarily with San Jose). BMP's observed include, but are not limited to, protection of storm drain inlets, collection of sawcut slurry and routine sweeping of City streets. Contractors completing work within the City streets are contractually required to follow BMP's. Street Department staff is trained to report poor contractor activity to the Code Enforcement Technician and/or the Stormwater Inspector.

BMP effectiveness has been good due to a constant City presence and contractual responsibilities. Staff and City contractors are well educated on BMP use. The City policy on residential street sweeping is bi-weekly guaranteed (typically done every week), industrial/commercial sweeping is done every 18-20 days.

Sweeping

The City of Santa Clara employs (3) full-time Street Sweeper Operators to sweep all of its streets, which consist of 401 residential route miles and 181 industrial route miles. The City utilizes three Schwarze A7000 regenerative air sweepers as its front-line sweepers. A Schwarze

A4000 regenerative air sweeper and a Johnston suction sweeper serve as back-ups. The regenerative air sweepers are very effective at collecting fine sediments.

Residential streets are scheduled to be swept the day following the assigned garbage/recycling collection day. Residential streets are swept on a weekly basis about 80% of the time. The City guarantees bi-weekly residential street sweeping. Residential streets were swept on a bi-weekly basis 100% of the time in FY 2008-09. The City relies upon voluntary cooperation from residents to remove their vehicles from the street on their assigned street sweeping day. There are some areas in the City that are often parked in and cannot be swept. The Street Department posts temporary "No Parking" signs in these areas a few times a year to efficiently clean the gutterline.

The City has twenty-four (24) industrial routes that are swept on a continuous basis. Each Street Sweeper Operator is responsible for eight (8) routes. Each operator completes one industrial route, prior to sweeping the assigned residential route for the day. Industrial routes are typically swept 1.5 times per month. In total, 31,191 miles of sweeping occurred in fiscal year 2008-09 as compared to 28,792 miles in fiscal year 2007-08 and 7,601 yards of debris was collected. This included both residential and industrial sweeping. The industrial sweeping route map is attached for reference.

The City, beginning in fiscal year 2003-04, no longer hires contractors to perform street sweeping services during leaf season or to cover employee-scheduled absence due to budgetary constraints.

Leaf Collection

Typically, November marks the beginning of the Leaf Collection Program. For this program, the City utilizes two leaf vacuums (10 yard boxes) that are manned by a 2-man crew covering 10 routes. This program typically, depending on weather, operates for 2 months and is done in

conjunction to the normal street sweeping operation. For fiscal year 2008-09, this program collected 3,381 cubic yards as compared to 4,697 cubic yards in fiscal year 2007-08. Ground crews manually rake leaves around obstacles, allowing the leaf vacuums easier access to the leaves. Litter is generally removed prior to vacuuming. Leaves collected are treated as green waste at the landfill.

Residents also deposit leaves in their green waste container. It is not possible to distinguish between the types of green waste collected (branches, lawn clippings and leaves). For reference, 10,242 tons of green waste was picked up in fiscal year 2008-09.

Santa Clara Valley
Urban Runoff
Pollution Prevention Program

FY 2008-2009 Monthly Record Keeping Form

Month and Year: July 08 June 09

Agency: City of Santa Clara

Completed by: Ron Billingsley **Date**: 7-7-09

STREET SWEEPING	Volume of material collected (cubic yards)	Miles swept* (curb miles)
1. Sweeping		
Residential Areas:		
Broom		
Regenerative Air	5974	24,825
Vacuum	18	123
Commercial Areas:		
Broom		
Regenerative Air		
Vacuum		
Industrial Areas:		
Broom		
Regenerative Air	1391	5349
Vacuum	2	16
Other Areas Swept: (e.g., parking lots, major arterials)		
Broom		
Regenerative Air	213	869
Vacuum	3	9
TOTAL	7601	31,191

2. Have there been any changes in your street sweeping program?
(efforts to have parked cars removed, changed sweeping frequency, new equipment, significant downtime, etc.)

Leaf Vac Crews November/December 08
Clean Up Campaigns March 09

LEAF REMOVAL

Volume of leaves removed by City/Town crews: 3,381 cubic yards

Leaves bagged by residents and picked up by your City/Town: N/A bags

Check box if you have a yard waste collection program: X Volume of yard waste collected: 10,242 cubic yards

Check box if you do not have a leaf removal program other than routine street sweeping or yard waste collection: X

* Report total miles covered by sweepers including areas operated in tandem or repeated.

PUBLIC STREETS, ROADS, AND HIGHWAY OPERATION AND MAINTENANCE						
Performance Standard Identification.	**Activity**	**Continuous Improvement Source Item**	**FY 2008-09 Tasks**	**Status / Comments**	**Due Date**	**Responsible Party**
PSRH 3	Staff Training	2004 URMP	Provide in-house training to street maintenance personnel.	Use of BMPs have become well established and proven. Their use is routine and ongoing. Refer to Staff Training Table.	Ongoing	Street Dept.
PSRH 4	Third Party Contractor Compliance	2004 URMP	Improve education / compliance of BMP implementation by contractors.	City standard contract language requires contractors to reduce/eliminate stormwater pollution to the maximum extent practicable.	Ongoing	Street Dept. Water/Sewer Field Services Electrical Dept.

PUBLIC STREETS, ROADS, AND HIGHWAY OPERATION AND MAINTENANCE						
Performance Standard Identification.	**Activity**	**Continuous Improvement Source Item**	**FY 2008-09 Tasks**	**Status / Comments**	**Due Date**	**Responsible Party**
PSRH 6	Street Sweeping	2004 URMP 2008-09 Workplan	Sweep Residential Streets on a bi-weekly basis and commercial streets 1 to 2 times a month.	The City continues to have an aggressive Street Sweeping Division in the Street Department. In total they swept 31,191 miles in FY 08-09.	Ongoing	Street Dept.
	Repair & Maintenance	2004 URMP	Maintain a Minimum of a 80 Pavement Condition Index	The City has one of the best-maintained streets in the Bay Area. Our current PCI is 81 out of a possible 100 – indicating that our streets are well maintained, free of raveling.	Ongoing	Street Dept.
PSRH 7	Review and Evaluate Effectiveness	2004 URMP 2008-09 Workplan	Maintain Incident Log of NPS items on City projects.	Integrated with Construction Inspections/ICID Elements	Complete Ongoing	Street Dept.

City of Santa Clara

FY 08-09 Annual Report

Storm Drain Operation and Maintenance

CITY OF SANTA CLARA
FY 2008-09 ANNUAL REPORT
PUBLIC AGENCY ACTIVITIES

Storm Drain System Operation and Maintenance:

1. Which BMP's were evaluated formally or informally this year?

- BMP's for Storm Drain System Operation and Maintenance have become well established and are routinely used by the Storm Drain Division. Most efforts of the Storm Drain Division are focused on line/inlet cleaning and support of any clean-up efforts required of IC/ID and construction events. Placing of "No Dumping – Flows To Bay" identification markers are part of the Storm Drain Division responsibilities. For greater effectiveness, placards are enameled metal. This Division also is first response support for hazardous materials spills. For these efforts, BMP's to isolate the event may be unique for each situation. All Storm Drain Divison personnel are trained in confined space to implement BMP's as required.

2. Does your process for tracking hot spots appear to be working?

- Yes, Storm Drain personnel carry plat books that map out the entire City of Santa Clara's storm drainage system. Hot spots are indicated on these maps, periodically monitored and coordinated with the Fire Department (Hazardous Materials Unit) as events occur.

3. What were your major hot spots during the fiscal year, and how has that changed from previous years?

- The City's major hot spots were locations that received significant localized flooding during major storm events. Maintenance crews are well trained to respond and maintain those locations. There were a few areas of localized flooding for FY 2008-09, mainly due to a large volume of rainfall during a short period of time that caused surcharge.

4. What evidence do you have that contractors are/aren't fully implementing BMP's?

- Storm drain inlets and catch basins are cleaned at least twice yearly. In addition, some catch basins require clearing debris and leaves from the top of the grate on an as-needed basis. Debris collected from those structures indicates the type of activity causing the build-up. As indicated in the IC/ID element, cement contractors continue to be the major contractor causing violation. Overall, contractor violation events are recognized and cleaned up before entering the Storm Drain System. In instances where this is not the case, all efforts are made to track the debris back to the violator for enforcement action.

5. Which agencies and/or staff are receiving training and which are not?

- The City's Street Maintenance and Storm Drain Maintenance Divisions are trained on maintenance of the storm drain system and any illegal dumping into the storm drain. Please refer to the staff training summary table at the back of this report. City Utility Departments (Water, Sewer & Electric) have also been trained that only rainwater is to go down the drain. In addition, the Parks and Public Works Departments have also received stormwater related training. When a substance other than rainwater is observed, these departments are outstanding in reporting the event to the Storm Water Division.

6. What feedback has staff given about the effectiveness of BMP's?

- The implementation of BMP's has become standard operating procedure. Current efforts have been to increase effectiveness/ease of use for the BMP's. It has been noted that the most effective BMP's start at the source. Inspectors focus on these BMP's first and look at downstream BMP's as secondary protection – not as a substitution of a BMP upstream.

A Vactor Clean Out Station has been constructed at Highway 237 and Lafayette Street. The site has storm and sanitary clean out facilities. Each facility utilizes a sand/gravel media prior to a sedimentation tank for dewatering the debris bunker. This facility continues to work very well.	Complete	Street Dept.

City of Santa Clara

FY 08-09 Annual Report

Water Utility Operation and Maintenance

CITY OF SANTA CLARA
FY 2008-09 ANNUAL REPORT
PUBLIC AGENCY ACTIVITIES

Water Utility Operation and Maintenance

The Water/Sewer Department is responsible for maintenance of City's water distribution system. Key O&M activities, potentially affecting stormwater quality, include line flushing, hydrant exercising and water meter testing. These scheduled activities have all discharges tested and treated (if needed) prior to release. Contractors working for the Water Department are contractually required to follow BMP's. Water Department staff report poor contractor activity to the Code Enforcement Technician and/or the Street/Storm Drain Maintenance Foreperson.

The effectiveness of the Water Department in minimizing stormwater pollution is good. Required staff has been trained in testing/treating of planned discharges. Only emergency/unscheduled discharges go without treatment. For these events, the storm drains are protected as quickly as possible and the discharge stopped.

WATER UTILITY OPERATION AND MAINTENANCE PROGRAM						
Performance Standard Identification	**Activity**	**Continuous Improvement Source Item**	**FY 2008-09 Tasks**	**Status / Comments**	**Due Date**	**Responsible Party**
Water O & M Component 1	Inventory of Discharges	2004 URMP	Every (3) years, conduct an inventory of all key O & M activities and identify routine and unplanned non-stormwater discharges from these activities.	The Water Department had 260 routine discharges and 79 unplanned discharges during FY 08-09. Not all discharges can be controlled.	Ongoing	Water Dept.
Water O & M Component 2	Pollution Control (Line/Storage Mtce. Discharge)	2004 URMP	Control/treat planned discharges to reduce stormwater pollution to maximum extent practicable.	Routine. Discharging of mains has been curtailed due to recent water conservation efforts by the City.	Ongoing	Water Dept.
Water O & M Component 2	Pollution Control (Emergency Line Discharge)	2004 URMP	Control/treat unplanned discharges for chlorine products/sediment control.	Difficult to control in total. Promptness of Water Utility limits discharges to small volume.	Ongoing	Water Dept.

CITY OF SANTA CLARA URBAN RUNOFF POLLUTION PREVENTION PROGRAM
FY 2008-09 ANNUAL REPORT

WATER UTILITY OPERATION AND MAINTENANCE PROGRAM						
Performance Standard Identification	**Activity**	**Continuous Improvement Source Item**	**FY 2008-09 Tasks**	**Status / Comments**	**Due Date**	**Responsible Party**
Water O & M Component 3	Staff/Contractor training and coordination	2004 URMP	Conduct annual training, coordinate Water Utility Pollution Prevention Plan (WUPPP) elements with Water Utility Project Manager	Job training is constantly taking place. All Water Department field staff are aware of our responsibility to control discharges to storm drain system to the best of our ability. In FY 08-09 the water utility will continue training on dechlorination techniques and training on spill volume estimation.	Ongoing	Water Dept.
Water O & M Component 4	Review and Evaluate WUPPP	2004 URMP	Evaluate the effectiveness of the WUPPP annually.	The Water Department. is very effective in managing /treating discharges. Water conservation efforts are high. Once a month, the yard is street swept and the area adjacent to the storm drain is thoroughly cleaned.	Ongoing	Water Dept.
Water O & M Component 5	Self Evaluation Matrix Tasks	2004 URMP	Overall self-evaluation of WUPPP*.	The Water Department has been an innovator in water conservation and recycled water use, and continues to maintain BMP's for stormwater discharge.	Ongoing	Water Dept.

City of Santa Clara

FY 08-09 Annual Report

New Development Planning Procedures

City of Santa Clara
FY 2008-2009 Annual Report
NEW DEVELOPMENT PLANNING PROCEDURES

1. Self-Evaluation Matrix (based on C.3. FY 07-08 Work Plan) -- enclosed

2. NDC Summary Table – Mandatory C.3. Projects -- Significant Projects Reviewed and/or Approved During July 1, 2008 through June 30, 2009 -- enclosed

3. Response to Water Board Comments on the New Development Section of the FY 07-08 Annual Report: No comments received as of 9/15/09.

4. Evaluation of This Element

The focus of effort in this element of the City's urban runoff program during FY 08-09 included continued implementation of the C.3. provisions for Group 1 and 2 projects and the program for tracking and inspecting BMP operation and maintenance (O&M).

There were 5 Group 1 projects and 3 Group 2 projects approved this year. Description of the site design, source control and treatment control requirements for these projects are provided in the enclosed NDC Summary Tables. The City also encouraged site design measures (e.g., parking lot, driveway, and roof drainage routed to landscaping) at other sites that were below the Group 2 size threshold.

The City of Santa Clara is well prepared to implement C.3. site design, source control, and treatment requirements for Group 1 and 2 projects. Staff have implemented changes to the development application review process, and have incorporated these changes into the Standard Operating Procedures of the Planning Procedures Performance Standard in the City's URMP. A number of tools and forms have been developed to assist City staff with C.3. implementation.

In 2005, the City participated in an MS4 Program Evaluation conducted by Tetra Tech and Water Board staff that focused on implementation of the C.3. provisions and other program elements. For the New Development Program Element, there were no potential permit violations or major program deficiencies noted. The City was commended for:

1) Developing detailed guidance for developers and plan reviewers to implement the C.3. provisions;
2) Encouraging developers to consider alternatives to traditional stormwater management, such as low-impact development practices and reduction in impervious surfaces.

The City has addressed all recommendations from the evaluation, including developing a protocol to ensure that landscaped BMPs are being built and maintained as designed, and ensuring that the C.3. guidance materials are used for each project.

More detailed information about the City's accomplishments on C.3.-related tasks during FY 08-09 are provided in the Self-Evaluation Matrix.

CITY OF SANTA CLARA URBAN RUNOFF POLLUTION PREVENTION PROGRAM
FY 2008-09 ANNUAL REPORT

NEW DEVELOPMENT PLANNING PROCEDURES						
P.S. I.D.	**Activity**	**C.3. Work Plan Task**	**FY 2008-09 Tasks**	**Status / Comments**	**Due Date**	**Responsible Party**
PPPS 5.	Requirements for Group 1 and Group 2 Projects	c.9.	Continue to require proponents of Group 2 projects to design and implement stormwater treatment BMPs to reduce stormwater pollution to the maximum extent practicable.	**Completed/Ongoing –** The City has been implementing C.3. requirements for Group 2A projects since October 20, 2005 and for Group 2B projects since August 15, 2006, per the permit revisions dated July 20, 2005. There were 5 Group 1 and 3 Group 2 projects approved in FY 08-09.	Ongoing	Planning Dept.
PPPS 8.	BMP O&M Reporting	e.6.	Continue to report on the City's treatment BMPs O&M verification program in each annual report, including organizational structure, evaluation of effectiveness, and planned improvements to the program. Include a list or summary of treatment BMPs inspected during the year, inspection results, and any required follow-up and correction.	**Completed/Ongoing –** A description of the City's BMP O&M verification program is provided below: 1) Planning Dept. enters BMP information into City's Tidemark permit system. 2) Building Dept. conducts construction site inspections and verifies data in Tidemark. 3) Building Dept. generates a list from Tidemark of installed BMPs and addresses, and provides list to Street Dept.	Annually	Street Dept.

CITY OF SANTA CLARA URBAN RUNOFF POLLUTION PREVENTION PROGRAM

NEW DEVELOPMENT PLANNING PROCEDURES						
P.S. I.D.	**Activity**	**C.3. Work Plan Task**	**FY 2008-09 Tasks**	**Status / Comments**	**Due Date**	**Responsible Party**
PPPS 5.d.	HMP	f.3.	Continue to implement HMP requirements for Group 1 projects that may cause increased erosion or other related impacts.	**Completed/Ongoing As Needed –** Key provisions of the SCVURPPP HMP Report were adopted on July 20, 2005 (Order R2-2005-0035). The Order requires implementation of HMP requirements by October 20, 2005. HMP requirements for Group 1 projects will be applied, as appropriate, for City of Santa Clara situations (there were no projects subject to HMP requirements in FY 08-09). City is also encouraging site design and treatment measures that provide flow control.	Ongoing	Planning and Street Dept.
PPPS 5	Local Waiver Program	g.2	Develop a model under which a project proponent may request a waiver from treatment BMP requirements for a given project due to impracticability, with a provision to provide other equivalent water quality benefit or credits or treatment of an equivalent pollutant loading or quantity of stormwater (allowing participation in regional solutions).	**No Action Required** – This program is optional and has not been adopted in the City of Santa Clara.	N.A.	Planning and Street Dept.

CITY OF SANTA CLARA URBAN RUNOFF POLLUTION PREVENTION PROGRAM

NEW DEVELOPMENT PLANNING PROCEDURES						
P.S. I.D.	**Activity**	**C.3. Work Plan Task**	**FY 2008-09 Tasks**	**Status / Comments**	**Due Date**	**Responsible Party**
PPPS 5	Local Waiver Program	g.3.	Begin tracking information for reporting on waivers granted, including project name, location, type, percent impervious surface, reasons for and terms of waiver, and the alternative benefit project and completion date.	**No Action Required –** Will track information if City decides to implement a local waiver program (see Task g.2.).	N.A.	Planning and Street Dept.
PPPS 4	Alternative Certification	h.1.	Develop a list of qualified consultants that can provide certification that a project meets C.3. requirements (optional).	**Completed** – SCVURPPP updated its list of qualified consultants in September 2008, and the City will use that list if needed. City staff are currently conducting the reviews with consultant assistance.	Ongoing	Planning
PPPS 4	Alternative Certification	h.1.	Develop internal procedure for alternative certification using list of qualified consultants and implement procedure if needed (optional).	**In Progress –** The requirement for an applicant to obtain third-party certification is under review as a potential condition of approval for some projects.	As needed	Planning
PPPS 4, 5.a.	Site Design Standards Analysis	j.4.	Continue to incorporate any revised design standards and guidance from the 9/15/03 submittal into local project approval process and "fully implement" the revised standards and guidance.	**In Progress** – The City is the process of implementing any revisions to its design standards and evaluating site design measures at specific projects during project reviews.	Ongoing	Planning

City of Santa Clara

FY 08-09 Annual Report

Construction Inspection

CITY OF SANTA CLARA
FY 2008-09 ANNUAL REPORT
CONSTRUCTION INSPECTION

1. **Do pre-rainy season inspections appear effective in getting all construction sites to install proper BMP's before October 15?**

Pre-rainy season inspections have been effective in enforcing construction site SWPPP's prior to October 15 by insuring compliance before the first rain. The City inspected 16 sites both prior and after to October 15th. These 16 sites were the total number of sites under construction prior and after October 15 that were considered to have the greatest potential to pollute. Each site for these inspections was given a copy of the construction inspection form and proper/adequate BMP usage (see attached form) was confirmed. If a site had a violation, depending on prior enforcement, the most applicable notice was issued with a re-inspection for compliance occurring timely.

2. **Do you think your inspection coverage of construction sites is adequate: why or why not?**

The City has very adequate coverage of construction sites. All construction sites are inspected before, during and after the rainy season. In addition, due to the limited number of construction sites, each are inspected during and after major rain events. For FY 2008-09 there was a total of 725 inspections conducted at 16 sites. On average 45 inspections were completed per construction site.

Inspections include pre-rainy season SWPPP review, pre-rain event, rain event, and post rain event. All inspections are documented on an inspection form. Pre-rain SWPPP inspections include the review of site-specific SWPPP requirements. These inspections ensure that BMP's required of the SWPPP are implemented on site. Pre-rain event, rain event, and post rain event inspections are supplemented by windshield inspections. For windshield inspections the inspector drives through and around the site, already being knowledgeable of the SWPPP requirements and confirms BMP compliance. Typically, windshield survey inspections for proper BMP implementation are not documented on an inspection form unless a violation is found. Individual windshield surveys and inspections are recorded on a construction site spreadsheet. When no violations are discovered, only the date of the inspection is entered.

City employees not normally responsible for inspections, such as building inspectors, are knowledgeable of our stormwater program and report any violations they may see directly to the Code Enforcement Technician. City Building Department inspectors are trained regarding proper stormwater practices and contact the NPS Inspector as violations occur or most appropriately, prior to discharge. NPS inspectors also attend preconstruction meetings for City projects to inform the contractor that the City will be inspecting the site for proper stormwater BMP management.

3. Did your City take an unusually large or small number of enforcement actions this year, and what are the possible reasons?

In FY 2007-08 the City conducted 22 SWPPP inspections and 432 windshield inspections, for a total of 445 inspections. A SWPPP inspection is where the SWPPP site is reviewed and a walk-through inspection takes place. There were 17 violations in FY 07-08. In FY 2008-09 the City conducted 17 SWPPP inspections and 701 windshield inspections with 7 re-inspections, for a total of 718 inspections. There were 21 violations in FY 08-09. The number of violations was down slightly mainly due to a smaller number of inspections.

4. How are verbal warnings followed up to determine whether compliance is achieved?

Verbal and written warnings are given for all violations and are followed up by a re-inspection of the site. Any time a warning is given, a follow up inspection was always conducted. If the violation was not corrected, a written violation or pre-citation notice was issued. Weekly windshield inspections are conducted during the rainy season and include inspections of all areas of concern. If a violation was found, the site construction superintendent was notified immediately and a full SWPPP inspection was conducted. A total of 17 SWPPP inspections of 16 construction sites were conducted. For these 16 sites, a total of 7 re-inspections were required and completed.

5. Are there specific contractors who need repeated warnings?

Yes, there have been some contractors that have required repeated warnings. If a verbal warning was given to a contractor and the potential violation was not corrected, a violation notice was issued. If the violation was corrected and a different violation is found during a later inspection, a pre-citation notice was issued. If the contractor continues to be out of compliance, administrative citations are issued. Escalating enforcement occurred at the 555 Reed Street project. For this site, 1 administrative citation was issued. Both the administrative citation and one pre-citation were found during windshield inspections.

6. Are the contractors on Public Works projects doing a good job in erosion/sediment control?

Contractors engaged in public works projects are contractually required to follow all appropriate BMP's. Engineering Department-Field Services Division personnel are fully aware of our URMP program and do not hesitate to notify a Code Enforcement Technician as violations are seen. For most projects, inspectors are able to identify potential discharges prior to there being an event. The Code Enforcement Technician also attends pre-construction meetings with contractors to educate them on stormwater issues.

7. Are BMP's being used in your City adequately, or do you see a lot of substandard controls like sand bags and hay bails?

BMP's are being used adequately within the City. All 16 sites had the required BMP's in place either before or immediately after inspection per their approved Storm Water Pollution Prevention Plans. The prompt issuance of violations and reinspections for compliance has insured that all BMP's are in place. No hay bales or sand bags were used as a primary source of stormwater protection. The City is no longer using the "Earth-Moving Activities" brochures that advocate the use of hay bales (2002

Performance Review Comment). The type of BMP's the City encourages include those that stress controlling erosion at the source - for example, stabilizing dirt slopes, covering stockpiles of materials, proper storage of materials and education. Protection of inlets alone is not considered adequate.

8. Does outreach to contractors or City staff need to be improved?

The City continuously educates and monitors City staff and contractors regarding stormwater pollution prevention protection. This in part is completed by frequent inspections and distribution of BMP pamphlets specifying construction stormwater protection. Improvement can always be made and additional emphasis has been given to make sure contractors, when applying for permits, are given all applicable BMP information.

CITY OF SANTA CLARA
FY 2008-09 ANNUAL REPORT
CONSTRUCTION INSPECTION

FY 07-08 and 08-09 Construction Inspection Comparison

Initial inspections of construction sites are done with the site superintendent and the SWPPP is reviewed. If a violation is found, the appropriate enforcement action is given to the construction site superintendent and frequent re-inspections as are necessary are conducted to eliminate further violations. The City's Code Enforcement Technician or Stormwater Inspector performs at a minimum a windshield inspection before, during, and after a rain event. Any violations found are documented on an inspection form or the date is logged on an Excel spreadsheet if no violation is found.

CONSTRUCTION INSPECTION – NEW DEVELOPMENT						
Performance Standard Identification	**Activity**	**Continuous Improvement Source Item**	**FY 2008-09 Tasks**	**Status / Comments**	**Due Date**	**Responsible Party**
CSI 1	Construction Inspections	2004 URMP	Develop and implement a Field Inspector checklist for inspection of stormwater pollution prevention requirements.	To date, Building Inspectors refer stormwater issues to the Code Enforcement Technician. The referral system is working well. Building Inspectors typically do not check for a SWPPP but will forward problems they see to the Street Dept. Prior/during construction the Street Dept. is inspecting the site for stormwater/SWPPP compliance.	Ongoing	Street Dept. Planning Dept. Building
CSI 1	Construction Inspections	2004 URMP 2008-09 Workplan	Improve coordination with Building Department to require efficient updating of active construction sites.	Some minor projects are ongoing without the knowledge of the Code Enforcement Technician and are found by chance. This is not acceptable to this element. A list of all sites is sent to Non-Point Source inspectors quarterly from Planning.	Ongoing	Street Dept. Planning Dept. Building
CSI 2	Wet Weather Inspection	2004 URMP	Inspect construction sites during weather events.	In FY 08-09 there were 17 SWPPP inspections made on 16 sites prior to the wet weather events, and 701 windshield inspections were conducted during wet weather events.	Ongoing	Street Dept.

CSI 8	Review and Evaluate Effectiveness	2004 URMP 2008-09 Workplan 2005 Performance Review	Determine/evaluate causes of incidents resulting in non-compliance of contractors following BMP's	Early Education/Outreach along with frequent inspections and increasing enforcement action have assisted with contractor compliance.	Complete Ongoing	Street Dept.

City of Santa Clara

FY 08-09 Annual Report

Public Information and Participation

CITY OF SANTA CLARA
FY 2008-09 ANNUAL REPORT
PUBLIC INFORMATION AND PARTICIPATION

The City of Santa Clara provides information to the public during mandatory and non-mandatory inspections, IC/ID events, public events and providing BMP literature for distribution at City facilities. Measuring the effectiveness of how this information is used by the public is difficult.

In past Annual Reports our IND/COM and IC/ID elements have analyzed the number of repeat violations. The City has seen repeat violations as an indicator of poor education (not utilizing BMP information). This is open to interpretation. Some industries/businesses are volatile by nature, have high employee turnover and/or are improperly managed. These are all considerations that affect BMP education effectiveness.

Public events are a great opportunity to distribute BMP literature and interact directly with citizens in an informal way. Although a large number of BMP pamphlets are distributed, they are received by a public that may or may not be a target audience. As a result, BMP effectiveness can only be inferred.

The City of Santa Clara is committed to educating its businesses and residents in stormwater pollution prevention. Our participation in program activities will continue, as will our commitment to identify problem businesses for specialized inspection/distribution of specific BMP's.

CITY OF SANTA CLARA
SCHEDULED PIP EVENTS*

EVENT	DATE
All City Picnic	July 4, 2008
Camellia Show	March 7 & 8, 2009
Citywide Clean Up Campaign	March 9 thru April 3, 2009
Art and Wine Festival	September 13 & 14, 2008
Free Disposal Days	September 14, 2008 & January 11, 2009
Arbor Day/Earth Day	April 24, 2009
Fish Derby	April 25, 2009
Household Hazardous Waste Events	Continuous (59 events held in FY 2008-09; 2,917 participants)

***Each event has a purpose separate than PIP, however many of the events produce an outstanding opportunity for Staff to set up interactive games for children, a visual computer display for adults and to distribute BMPs.**

CITY OF SANTA CLARA URBAN RUNOFF POLLUTION PREVENTION PROGRAM
FY 2008-09 ANNUAL REPORT

PIP ACTIVITY TABLE			
PI/P Activity	**Type of Outreach**	**Level of Implementation (Description/Dates)**	**Evaluation of Effectiveness**
Libraries: Central & Mission Branch, Community Centers & various locations throughout the City.	General / Educational	BMP's: Bay Begins at Your Front Door, Pest Bugging You?, Clean It!, Grow It!, Home Maintenance Tips, Home Repair & Maintenance, Pool/Spa, Painting, and Concrete and Mortar Application. Distribution continuously.	Works well in terms of numbers distributed; difficult to measure effectiveness. Provides good exposure to Storm Water Pollution Prevention, but does not provide the opportunity for interaction.
New Resident Information	General	City calendar and annual report distributed – contains information on City meetings and events for the year. Provided yearly.	Mailed to approx. 43,000 residents and businesses. 4,000 more were distributed in other ways. Well received for general information. Informs residents of upcoming events (Disposal Days, Household Hazardous Waste Drop Offs, etc.). Includes suggestion/comment card that allows for feedback, but very few returned last year.
Public Events	General	City staff helped staff a green event booth at Watt Stoppers, Santa Clara on July 25, 2008. City staff helped staff booth at the NVIDIA Earth Day event held on Wednesday, April 22, 2009.	Event provided an excellent opportunity to educate the public about the County-wide HHW program. Good match between message and event.

CITY OF SANTA CLARA URBAN RUNOFF POLLUTION PREVENTION PROGRAM
FY 2008-09 ANNUAL REPORT

PIP ACTIVITY TABLE			
PI/P Activity	**Type of Outreach**	**Level of Implementation (Description/Dates)**	**Evaluation of Effectiveness**
Household Battery Disposal Information on TV/computer monitor disposal Fluorescent bulbs and batteries	General	Fall 2008 issue articles in City newspaper, Inside Santa Clara, about the County HHW program, curbside battery pickup provided by Mission Trail Waste Systems and battery drop off locations at all City Fire Stations. Winter 2008 article in City newspaper listed frequently asked questions about fluorescent bulbs and their proper disposal. County based public education groups sponsored bus advertisements and a Comcast Cable television commercial that educated residents to use retail recycling partners to recycle their bulbs and batteries.	Well-received program. Residents comment on convenience factor Increased requests for "battery bucket" pickup at Fire Stations. Many requests for referrals to companies who will take monitors at televisions at no charge. SB20 monies have made the "covered electronic device" market lucrative, so there are plenty of recyclers in the area taking these items at no charge from residents. The retail recycling partner program is still expanding.
Storm Drain Maintenance update & URPPP tips, hints, offer for info.	General / Educational	Fall 2008 issue of Inside Santa Clara gave clear instructions on how to dispose of fall leaves. All raked leaves are to be placed in Clean Green containers provided by Mission Trail Waste Systems- leaving gutters/storm drains free of debris. Spring 2009 article in City newspaper, Inside Santa Clara, "Keep Construction Debris Out of Storm Drain"	Mission City Scenes sent to approx. 50,000 residents in their utility bill. Timed for wet weather. Does help reduce number of blocked storm drains due to clogged leaves, debris, etc. Phone number for the Street Department is listed to provide additional information. Many calls are received. Inside Santa Clara sent to approx 55,000 residents and businesses.

CITY OF SANTA CLARA URBAN RUNOFF POLLUTION PREVENTION PROGRAM
FY 2008-09 ANNUAL REPORT

PIP ACTIVITY TABLE			
PI/P Activity	**Type of Outreach**	**Level of Implementation (Description/Dates)**	**Evaluation of Effectiveness**
Camellia Show	General / Educational	Advertised February 2009 utility bill insert, Mission City Scenes and Winter 2009, Inside Santa Clara. March 7th & 8th, 2009	Approx. 380 attended. Article in Utility insert. Brochures "Grow It, Pests, Pool, Home Maintenance" distributed at show. Audience shows interest in the above BMPs –good match of PIP activity and information provided.
City Clean-Up Campaign	General / Educational	March 9 thru April 3, 2009 Spring 2009 article in City newspaper, Inside Santa Clara Distributed info regarding proper disposal & alternative uses to pesticides & household cleaners.	About 6,800 tons gross weight collected with a significant amount of hazardous materials also collected. Very effective in terms of removing potential stormwater pollution from the City and increasing awareness.
Free Disposal Days	General	September 14, 2008 and January 11, 2009	Total of 148 residents participated in the September event, and 160 in January. Effective in terms of removing potential stormwater pollution from the City. Very well received by residents.

PIP ACTIVITY TABLE			
PI/P Activity	**Type of Outreach**	**Level of Implementation (Description/Dates)**	**Evaluation of Effectiveness**
Distributed via educational letters prompted by complaint	Targeted / Educational	Home Maintenance Tips; Home Repair & Remodeling; Pool/Spa Water; Landscape, Gardening, and Pool Maintenance; Painting & Application of Solvents & Adhesives; Roadwork & Paving; Earth Moving Activities; Heavy Equipment Operation; Fresh Concrete & Mortar Application; General Construction & Site Supervision; The Bay Begins at Your Front Door!; Blueprint for a Clean Bay; San Francisco Bay Area Recyclers & Disposal Services for Construction Sites Continuous	Distributed 64 + BMP's. Effectiveness is good – repeat offenders are greatly reduced. Information is directed to individual residents/contractors. This may have more of an impact. Accelerated rate of administrative action has increased compliance.

City of Santa Clara

FY 08-09 Annual Report

Pesticide Management Activities

PESTICIDE MANAGEMENT ACTIVITIES

The Parkways & Boulevards Division and the Parks Department staff have been using tighter matting mulches to prevent weeds in FY 08-09. In addition, better timing of pre-emergence application has occurred to achieve the goal of post-emergence herbicide reduction. Drip systems have been installed at various locations throughout the City. This improvement has improved water management and reduced the potential for weed growth.

The Parkways & Boulevards Division and the Parks Department staff have been trained to recognize plants that have become infested with pests and to trim off infected areas before a condition worsens to a point that requires chemical treatment. Pesticide application methods include soil drenching, soil injection, and fertilizing with fertilizers that contain systemic pesticides. These practices reduce the need for overhead spraying and keep the pesticide on site without the possibility of drift or run-off. We are always looking for safer, less toxic materials that are effective to replace more harmful chemicals. The City has encouraged all landscape personnel to participate in pesticide management activities by observing and contributing their thoughts with the goal to have a continuously improved pesticide management plan.

PESTICIDE MANAGEMENT ACTIVITIES

FY 08-09 PESTICIDE USE REPORTING

The Parkways & Boulevards/Tree Division is currently staffed with 19 full time employees. Of these employees, two are PCA certified (Pest Control Advisor) and 17 are QAC certified (Qualified Applicator Certificates). All full time employees are required to have a QAC card before the expiration of their probationary period (12 months). Personnel attend annual pesticide/IPM training and continuing education classes. The use of the least toxic solutions for treatment is standard operating procedure. All pesticide cardholders are required by the California Department of Pesticide Regulation to attend seminars at which they accumulate their continuing education units. PCA card holders are required to attend 40 hours of continuing education every 2 years, and our QAC card holders, 20 hours of continuing education. Both full time employees and seasonal employees receive our yearly pesticide/IPM training. The training includes all product labeling, MSDS, safety information leaflets, health safety issues, and City adopted procedures for their Integrated Pest Management Program.

Continued efforts were made in FY 08-09 evaluate the products and procedures used. This evaluation lead to the elimination of four chemicals from our yearly usage list. Of the 15 products currently being used, eight showed a decrease, and seven showed a slight increase. The Parkways and Boulevards Department has also continued to reduce the amount of large foliar spray applications. This year a new/less-toxic material for our olive fruit suppression was tested. This new bark banding applications has shown great results and has allowed the elimination of overhead spraying for this issue.

The Parkways and Boulevards/Tree/Stormdrain Divisions are continuing to expand the use of tree chippings produced by our own divisions and all of our contractors. This program has already shown a decrease in our herbicide/pre-emergent usage, along with the added benefits of water conservation.

The Tree Division is continuing to release beneficial insects (Parasitic wasps – Aphytis Melinis) to help combat tulip scale and aphids within our urban forest. This program has been in use for a couple of years and is currently being evaluated for its effectiveness.

City of Santa Clara

FY 08-09 Annual Report

Mercury/Copper/Nickel Pollution Prevention Activities

CITY OF SANTA CLARA
FY 2008-09 ANNUAL REPORT
MERCURY/COPPER/NICKEL POLLUTION PREVENTION ACTIVITIES

Copper

The City of Santa Clara has in previous workplans aggressively inspected automotive facilities and metal plating facilities. This occurred in FY 2001-02, FY 2002-03 and FY 2006-07 for automotive and FY 2002-03, FY 2004-05, and FY 2005-06 for metal plating. These facilities are inspected at least once every two years due to their SIC code but inspection frequencies are accelerated if repetitive violations are found. The targeted facility type for FY 08-09 was restaurants. In FY 09-10 the targeted facility type will be manufacturing. Our street sweeping program mandates bi-weekly sweeping of all residential streets. Industrial routes are swept on a continuous basis. Use of architectural copper is discouraged and is being eliminated from design in new public buildings.

Nickel

The City of Santa Clara, through our construction inspection element, has documented construction best management practices activity within the City for many years. In FY 2008-09, 725 construction inspections occurred on 16 sites. Inspectors also conducted 701 windshield inspections of all construction sites. Emphasis has been on increasing enforcement actions to gain compliance.

Mercury

The collection of thermostats, household batteries and fluorescent bulbs has skyrocketed since DTSC banned universal waste from landfills. The Countywide HHW Program has partnered

with several retail businesses to accept fluorescent bulbs and batteries from the public. The Countywide HHW Program then collects the bulbs and batteries from the retail establishments and recycles them along with waste collected at drop-off events. In addition, The City accepts household batteries at the curb through its single-family recycling program. The City is pursuing Extended Producer Responsibility (EPR) initiatives to remove mercury from the waste stream and to encourage producers to make a less toxic product.

CITY OF SANTA CLARA URBAN RUNOFF POLLUTION PREVENTION PROGRAM
FY 2008-09 ANNUAL REPORT

MERCURY / COPPER / NICKEL POLLUTION PREVENTION ACTIVITIES (MCNP)						
Performance Standard Identification	**Activity**	**Continuous Improvement Source Item**	**FY 2008-09 Tasks**	**Status / Comments**	**Due Date**	**Responsible Party**
MCNP P.S. #2	Municipal Use of Mercury Containing Products AKA- Prioritization of Mercury / Copper / Nickel Products	Order No. 01-024 2004 URMP 2008-09 Workplan	Develop a process to survey the types of mercury-containing products used by City departments. Identify appropriate municipal personnel to conduct survey. For those products with a potential to enter stormwater runoff, identify possible alternatives or proper disposal procedures.	Building Maintenance Department requires all mercury containing products to be properly disposed. Mercury containing products are stored in the Street Corporation Yard hazmat shed. The Countywide Household Hazardous Waste Program (CoHHWP) cleans the sheds on a quarterly basis.	Ongoing	Street Dept. Building Maintenance
MCNP P.S. #3	Municipal Use of Mercury Containing Products AKA- Identify Management Options	Order No. 01-024 2004 URMP 2008-09 Workplan	Follow Performance Standards in identifying management option for mercury-containing products reduction. These standards include a schedule for the timely phase-out of mercury-containing products identified for virtual elimination as well as reporting requirements, replacement, and reduction in use of mercury-containing products.		Ongoing	Street Dept.

MERCURY / COPPER / NICKEL POLLUTION PREVENTION ACTIVITIES (MCNP)						
Performance Standard Identification	**Activity**	**Continuous Improvement Source Item**	**FY 2008-09 Tasks**	**Status / Comments**	**Due Date**	**Responsible Party**
MCNP P.S. #3 (CB-3)	Household Hazardous Waste Collection	Order No. 01-024 2004 URMP	Provide mercury-containing products disposal services for residents and small businesses. The City began collecting household batteries from single-family residences curbside on July 1, 2006 and has drop-off locations located at its 10 Fire Stations for multi-family residents.	There were 66 Household Hazardous Waste collection events in FY 2008-09. 2,917 Santa Clara residents attended HHW drop-off events in FY 08-09.	Ongoing	Street Dept. Fire Dept.
			The Countywide HHW Program has partnered with retailers to accept fluorescent bulbs and batteries from the public.	The Countywide HHW Program is continually working to bring more retail establishments into the program.	Ongoing	Street Dept.
			City will take compact fluorescent bulbs through its single family curbside recycling program starting in December 2009.	New recycling collection agreement to be implemented in 2009.	December 2009	Street Dept.

MERCURY / COPPER / NICKEL POLLUTION PREVENTION ACTIVITIES (MCNP)						
Performance Standard Identification	**Activity**	**Continuous Improvement Source Item**	**FY 2008-09 Tasks**	**Status / Comments**	**Due Date**	**Responsible Party**
MCNP P.S. #3	Household Hazardous Waste Collection	Order No. 01-024 2004 URMP	Develop guidelines for documenting and reporting quantities of mercury-containing products disposed of by City.	Documentation is currently being conducted under Dept. of Toxic Substance Control Form 303, submitted annually by the County on behalf of the City.	Complete Ongoing	Street Dept.
MCNP P.S. #3	Public Education and Outreach AKA – Identify Management Options	Order No. 01-024 2004 URMP 2008-09 Workplan	Implement a fluorescent light recycling outreach program to educate residential users and encourage proper disposal of fluorescent lights.	Widely included in the outreach advising residents of the Household Hazardous Waste Collection events coordinated with the County. County has retail-recycling partners that accept fluorescent bulbs and batteries at no charge from residents. Television ads promoting the free drop-off were run in January 2009.	Ongoing	Street Dept.

MERCURY / COPPER / NICKEL POLLUTION PREVENTION ACTIVITIES (MCNP)						
Performance Standard Identification	**Activity**	**Continuous Improvement Source Item**	**FY 2008-09 Tasks**	**Status / Comments**	**Due Date**	**Responsible Party**
MCNP P.S. #3	Vehicle Washing Operations	2004 URMP 2008-09 Workplan	Distribute outreach materials on proper vehicle/equipment washing at City department counters and public events, and post on City website. Inspect auto businesses regarding car wash requirements, and prohibited storm drain discharge. Inspect vehicle washing facilities as part of stormwater inspections for industrial and commercial businesses. Continue to maintain car wash systems for City vehicles at the corporation yard and fire stations.	Outreach materials are distributed by our Code Enforcement Technician and Stormwater Inspector during IC/ID inspections. City website and public events are also used to disseminate information. Automobile businesses have been a target industrial of our IND/ICD program. All City Corporation Yards are equipped with car wash systems that are closed looped. Visual inspections are done every other day, cleanings done once a week and repairs are done as needed. BMP's are being implemented in the construction of two new City Fire Stations. Permanent BMP's are being developed for our existing Fire Stations.	Complete and Ongoing	Street Dept.

Review and implement guidance from SCVURPPP and San Jose on addressing water quality in the CEQA review process, as part of C.3.m. implementation.	Current general plan is effective with current language.	Complete	Planning Dept. Street Dept.
MCNP Overall Commitment	Monitoring and Science	Order No. 01-024 2004 URMP 2008-09 Workplan	Provide financial and staff support for a coordinated regional plan to collect data for the mercury TMDL, as defined in the RWQCB / BACWA / BASMAA.	Work with Program	Ongoing	Street Dept.

City of Santa Clara

FY 08-09 Annual Report

Trash Inventory and Management

CITY OF SANTA CLARA
FY 2008-09 ANNUAL REPORT
TRASH INVENTORY AND MANAGEMENT

In the City of Santa Clara the Code Enforcement Technician and Solid Waste Foreperson respond to trash complaints. Other City personnel may respond to initial response, depending on the nature of the event.

A trash "hot spot" list was generated based on the data received from complaints and catch basin cleaning crew findings. A survey was conducted using the KAB litter index and documented on a spreadsheet two times in FY 08-09. This information is updated every year. Locations that appear on our "hot spot" list on more than one occasion receive further investigation to find a source of the litter. Facilities and/or persons that can be found responsible for the trash receive a violation notice for a first violation, pre-citation notice for the second, and administrative citation for the third. If no source is found and the trash is on private property the property owner may be held responsible for clean up and the City will pick it up if its in the public right of way. Regardless of the source, trash is typically picked up within one week or sooner depending on the potential to enter the storm drain.

Attached is the table of the City's trash "hot spots" relative to the watershed affected if the trash entered the storm drain system.

Staff Training Summary Table

Staff Training Summary

Fifty-three City employees attended stormwater pollution training in FY 08-09. The list of actual training events is contained in the legend of workshops in the notes section beneath the Staff Training Table.

Most employees felt that the trainings offered were relevant to their day-to-day jobs and were helpful. The City of Santa Clara will continue to provide stormwater pollution prevention training to its employees via seminars conducted by outside consultants and in-house training provided by Street Department personnel.

WEST VALLEY CLEAN WATER PROGRAM

September 15, 2009

Mr. Bruce Wolfe
Regional Water Quality Control Board
San Francisco Bay Region
1515 Clay St., Suite 1400
Oakland, CA 94612

Subject: FY2008-2009 Annual Report for
West Valley Communities Urban Runoff Management Program

Dear Mr. Wolfe:

This report is submitted by the West Valley Cities of Campbell, Monte Sereno, Saratoga, and the Town of Los Gatos, in conjunction with the Santa Clara Valley Urban Runoff Pollution Prevention Program's Annual Report, pursuant to provision C.6.a. of the Program's reissued municipal storm water NPDES Permit (Order No. 01-024). The report summarizes activities performed during FY2008-2009 in accordance with the West Valley Communities' Urban Runoff Management Plan (URMP) submitted to the Regional Board on September 1, 2004 and the performance standards contained therein.

Contents of Report

The goals of this Annual Report are to: 1) concisely document implementation of URMP and FY08-09 Workplan; 2) evaluate program results for continuous improvement; 3) comply with permit requirements; and 4) share this information with other Co-permittees, municipal decision-makers, and the public. This report includes the following sections:

I. Preface
   - Table of Contents
   - Transmittal Letter with Program Highlights
   - Certification Statement
   - List of Acronyms

II. Program Elements
   1. IC/ID Elimination Activities
   2. Industrial / Commercial Discharger Control Program
   3. Public Agency Activities
      - Storm Drain O & M
      - Street Sweeping
      - Corporation Yard
      - Rural Public Works
   4. New Development: Planning Procedures
   5. Construction Inspection
   6. Public Information & Participation
   7. Pesticide Management Activities
   8. Mercury Pollution Prevention Activities
   9. Copper Action Plan / Nickel Action Plan
   10. Trash Inventory and Management
   11. Water Quality Monitoring and Watershed Management

   Training Summaries are provided at the end of each element

PROGRAM HIGHLIGHTS AND ACCOMPLISHMENTS

During FY08-09, the West Valley Communities of Campbell, Los Gatos, Monte Sereno, and Saratoga continued efforts to implement their URMP to the maximum extent practicable. The West Valley Communities also continue to benefit from its collaborative efforts through West Valley Clean Water Program (WV CWP).

- WV CWP continues to receive annual requests for in-class stormwater pollution prevention presentations with its 3-D interactive 'Enviroscape' model. In addition to school presentations, this year WV CWP was invited to the Audubon Society's Annual Event, and was a big hit among both children and adults, where more than 70 people stopped to listen, play and learn ways they can help prevent stormwater pollution.
- WV CWP's Seed Packet Distribution – specifically five varieties of CA native plants which attract *beneficial bugs* listed in '10 Most Wanted: Beneficial Bug Brochure,' turned out to be a big hit. Because these particular seeds are available for purchase only in, WV CWP purchased the loose seeds, designed labels, and engaged Sierra Club volunteers to assemble seed packets. Packets were attached to the Beneficial Bug Brochures, as well as other IPM handout materials, and distributed to students at the Enviroscape presentation, through gardening classes, at a local garden center, and given to participants in creek clean up, Arbor Day and Earth Day events. Availability of seeds was also published in four City Newsletters, generating many phone and email requests from residents. Over 600 packets were distributed in less than 3 months!
- WV Communities and WV CWP hosted six clean up events, which were well attended. Three events were conducted in conjunction with well advertised national and international namesakes – International Coastal Clean-up Day, National Rivers Clean-up and Great American Litter Pick Up (GAPU), and benefitted from collaborative event advertising. WV CWP also helped secure donations from local retailers to provide Coastal Clean-up and Rivers Day Clean-up supplies and volunteer appreciation give-away items for events held in Santa Clara County.
- WV CWP responded to and followed through to resolution over 50 phone, email and inter-agency referrals for discharge incidents. Facilities which have and incident reported or an inter-agency stormwater inspection referral (SCC FD, SCC DEH, and SJ POTW/FOG programs) are placed upon a pro-active inspection list, and re-inspected within the next year.
- WV CWP continued to support SCVURPPP's Green Gardener program, promote classes and was instrumental in providing information for local newspaper coverage of recent Green Gardener Graduates working within the WV Communities.

The West Valley Communities remain committed to a watershed approach for preventing urban runoff pollution. Through the WV CWP, the WV Communities actively participate in SCVURPPP's many task groups, including Watershed Education and Outreach (WEO), C3PO and Trash Task Groups. WV CWP also participated in the SCB WMI's Trash Summit, held last October. Finally, the proposed MRP continues as a topic of discussion and staff participates in SCVURPPP update meetings regarding MRP.

Thank you in advance for your review of this Annual Report. Should there be any questions regarding the materials submitted, please contact me at (408) 354-4734.

Respectfully,

Kelly Carroll

IC/ID Program Evaluation

IC/ID Training

The multiple trainings that the WVCWP staff, and the municipal staff, attended have been quite effective in building relationships with the Fire Dept., DEH, and the Municipalities. Inspectors from the Fire Dept., DEH, and the Municipalities, continue to look for possible stormwater violations while they are on their field inspections. If the Inspectors from the Fire Dept., DEH, and the Municipalities, observe any potential stormwater violations they immediately contact the WVCWP Inspector. All interagency referrals are documented in the IC/ID reporting section.

Trend Analysis

In FY06-07 the West Valley IC/ID inspector responded to sixteen (16) reports of potential violations in Saratoga. Out of the 16 reports, eight (8) were the result of interdepartmental referrals and three (3) were the result of citizen complaints. The trend in 06-07 did not indicate any commonly reported incident types. Two (2) incidents were not found and two (2) were allowable discharge. In FY 05-06, a notable trend in Saratoga was the substantial number of pool discharges (6) and construction related incidents (6). In 06-07, there was significant reduction in these types of incidents; only one (1) pool and spa discharge, and three (3) construction site related incidents.

In FY07-08 the West Valley IC/ID inspector responded to twenty (20) reports of potential violations in Saratoga and fifteen (15) follow up calls. Four (4) of these were in a Commercial area, three (3) Food Facility, eight (8) Construction Site, six (6) Residential, and fourteen (14) Public Facility. This is a slight increase in incident related violation calls, from sixteen (16) in FY06-07. The West Valley inspector provided outreach and educational materials as appropriate during each

incident response.

Enforcement action shows six (6) Referral for Enforcement. One incident was a mud slide on Hwy 9 which was referred to the SF Bay RWQCB. The other incident, raw sewage backing up into a parking garage behind a restaurant, has been referred to the City Attorney.

Under the heading Incident Status, the remaining thirty four (33) are Resolved/Closed.

In FY08-09 Nine (9) Incidents were reported to the WVCWP. Of those nine (9) incidents, two (2) complaints were not found. Incidents reported included: (1) Grey Water Discharge, (1) Sanitary Spill or Leak, (1) Saw cutting slurry discharge, (1) Soil Tracking, (1) vehicle & equipment leaking, (1) Water line break, (1) Misc. incident. The majority of the incidents were in residential areas (4), and construction sites (2). Incident reports came from a variety of sources including: interdepartmental referrals (2), other agencies (3), and citizen calls (4). Out of the nine (9) incidents in FY08-09 two (2) were referred for enforcement after the initial investigation, and three (3) were given verbal notices.

*Note

The West Valley Clean Water Program only gave completely new incidents ICID numbers, therefore, follow-up inspections to original ICID's were not given new ICID numbers. This is the reason for the dramatic decline in ICID's for FY08-09.

ICID Date	Contact Name (Resp Party)	Facility Address	ICID Incident Report Source (Origin)	ICID Incident Source	ICID Incident Type	ICID Enforcement Action	Findings (Comments)	Status	Compliance Date
8/6/2008	K. Andrew Constable	18930 Cabernet Dr., Saratoga	Citizen Complaints	Residential	Vehicle and equipment leaking	None	Resident emailed EOA complaining of oil stains in roadway in front of house. WVCWP inspector went out. No one home, left bus card. Slight stains in street. Appears to have been cleaned up. No SD problem.	Incident - Resolved	8/6/2008
12/22/2008		22217 Mt Eden Rd., Saratoga	Other Agency	Construction Sites	Tracking soil	Referral for Enforcement	12/22/08 Received referral from SCVWD re: property on Mt Eden Rd. with no erosion control. Private lot, did not appear to be currently under constrcution. Bare dirt on hillside,no vegatation. High Potential for erosion. Took pics.	Referred to Agency for Action	
3/3/2009		14831 Pierce Rd., Saratoga	Citizen Complaints	Commercial	Misc. incidents	Referral for Enforcement	3/3/09 Received call from resident re: runoff coming from Mt. Winery parking lot and flowing onto pierce rd. Took pics and referred to City of Saratoga. Discovered property was in the County's jurisdiction. 3/18/09 Referred to County.	Non-Incident	
4/15/2009		13899 & 13901 Upper Hill Dr., Saratoga	Citizen Complaints	Residential	Grey water discharge	Verbal Notice	4/15/09 Responded to email from Kristin Borel (City of Saratoga) re: citizen complaint of Landscaping runoff. WVCWP responded, did not see signs of landscape runoff. Left door hangers at 13899 & 13901 Upper Hill Dr.	2nd Inspection Required	
5/15/2009		12241 S. De Anza, Saratoga	Interdepartmental	Commercial	Water line breaks	Verbal Notice	5/15/09 Received call from WVCWP Manager re: broken sprinkler in landscaping and water being discharged into parking lot and storm drain. Talked with property owner (Kelly) said it will be fixed immediately.	Incident - Resolved	5/15/2009
5/20/2009		12874 Arroyo de Arguello, Saratoga (address does not exist)	Citizen Complaints	Residential	Complaint not found	None	5/20/09 Received email from Paul Thomas re: citizen complaint of a white, milky discharge that bubbles up from the lawn and a chalky substance remains in gutter. WVCWP Inspector could not find above address or substance in street. Took pics	Non-Incident	5/20/2009
5/29/2009		10600 Cuvilly, Saratoga	Other Agency	Residential	Sanitary spill or leak	None	5/29/09 West Valley Sanitation District responded to 500 Gallon sewage overflow at 10600 Cuvilly, Saratoga. Majority Percolated into dry creek bed, WVSD called EV Link to clean and disinfect. WVSD followed all appropriate protocol.	Incident - Resolved	5/29/2009
6/12/2009		Big Basin Way, Saratoga	Other Agency	Other/unknown	Complaint not found	None	6/12/09 Old Incident, not active, no incident observed	Non-Incident	6/12/2009

INDUSTRIAL/COMMERCIAL DISCHARGER CONTROL PROGRAMS
Saratoga
Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2008-2009 ANNUAL REPORT

Industrial/Commercial Program Evaluation

Fire Dept Inspections of Industrial / Commercial Facilities:

Of the 5 facilities inspected by the Fire Dept., no potential or actual violations were found and reported to the WVCWP for follow up. The list of violations is provided to WVCWP at the end of each fiscal year. The West Valley Inspector will schedule a training meeting with the Fire Dept Haz Mat Specialist in FY 09-10 to discuss further inspections of sites with reported violations during FY 08-09. The sites with previous violations will be prioritized for inspections at the beginning of FY 09-10

When Saratoga was added to the Fire Dept Inspection Agreement for Campbell and Los Gatos (7/1/02), all West Valley facility inspections were coordinated under one umbrella. Monte Sereno does not conduct IND inspections because it has NO industrial or commercial facilities. Since 2001, WVCWP staff has met with Fire Dept staff at least twice a year to discuss standardized reporting, documentation and follow-up.

The West Valley Inspector's pro-active vehicle shop inspection program is designed to supplement Fire Dept facility inspections. Shop owners are made to realize the City's responsibility for making sure that the sites are in compliance with water quality requirements. The Inspector has made a positive impact with his visits and the distribution of educational materials depicting the right way to keep equipment, vehicle parts, and service areas covered, and all vehicle wash water managed properly. In a few cases the Inspector's meetings with vehicle shop owners have led to the facility's purchase of a wastewater capture system (noted in previous annual reports).

Annual Food Facility Inspection Training Meeting

Of the 97 facilities inspected by the DEH, no potential or actual violations were found and reported to the WVCWP for follow up. The Supervising Environmental Health Specialist at DEH had left and DEH was not always able to make the referrals to WVCWP due to staff shortage. However DEH has hired new staff and this will improve the coordination between DEH and WVCWP in FY 09-10.

Held Annual Urban Runoff Food Facility Inspection Training/Meeting with Santa Clara County DEH supervisors and inspectors, WVCWP staff, and City of Cupertino staff on May 7th, 2009. 8 attendees. Topics included: Review DEH inspection reports from FY07-08 and discuss the inspection reports for FY08-09, Review coordination and responses to incidents, and update contact lists, Discuss new inspection requirements under the future MRP

Date	Facility Name	Facility Address	Enforcement Action	Inspection Notes	Notes
8/21/2008	Saratoga School for D	14451 Fruitvale Av., Sarato	No Action	Clean operation, waste disposed of properly. No SDs on property.	No violations.
8/25/2008	Union 76 Gas Station	14395 Big Basin Wy., Sara	No Action	No violations. Gas and food only. No repair work. No washing vehicles. Spill kit OK. Clean, no litter.	
8/25/2008	Union 76 Gas Station	12015 Saratoga-Sunnyvale	No Action	No violations. Gas only. No repairs. No vehicle washing. Spill kit OK. Clean, no litter.	
8/25/2008	Madronia Cemetary	14766 Oak St., Saratoga	No Action	No violations. SDs are clear.	
5/5/2009	City of Saratoga Corp	13777 Fruitvale Avenue	No Action	Everything looked great. Extremely clean.	WVCWP Inspector and WVCWP Manager performed annual Corp Yard Walk Thru. Topics covered: Locations and updates to SWPPP, Dry cleanup methods, storage of chemicals, and other materials, spill log records, vehicle washing, trainings, flourescent bulbs
6/29/2009	Blue Rock Shoot	14523 Big Basin Way, Sara	No Action	6/29/09 Proactive restaruant inspection. Talked with manager on duty (Enasmo). Discussed proper restaurant BMP's. Gave poster.

Storm Drain Operations and Maintenance				
	2004 URMP	Annual Storm Drain Cleaning Continue contract w/ WVSD (two year cycle for residential & one year cycle for commercial & industrial); Public Works staff will clean high leaf drop and other noted areas more frequently and as needed. Examine storm drain inspection & cleaning reports from previous years to determine areas where annual cleaning would be beneficial. Inlets with any record of debris will be inspected and cleaned once or twice annually.	West Valley Sanitation District (WVSD) performs systematic storm drain cleaning and inspection annually. Half the City's storm drains are cleaned and inspected each year. City crews assist contracted street sweeper by providing additional cleaning in high leaf drop areas and removal of storm debris from all inlets and grates as needed.	PW Analyst coord with WVSD per contract; Street Maint Spvsr coord in-field operations
	Trash Reduction Activities On-going	Trash Reduction Public Works Division will implement management actions (extra cleanup of littered catch basin inlets and surrounding areas, public outreach, and/or assessments) to address litter problem areas.	During inspection and cleaning of storm drain structures, WVSD staff notes catch basins that require additional cleaning. The data will be helpful in locating trash problem areas by storm drain location. Saratoga's report included 28 structures that received additional cleaning, totaling 2,750 Lbs., due excessive amounts of debris.	Streets Spvsr coord in-field operations; WVCWP staff
	Training (Rural PW activities)	Training - Annual WVSD/ Oper. & Maint. Meeting WVSD & WVCWP Storm Drain and Street Maintenance Operation & Maintenance Supervisors meeting. - evaluate status of annual storm drain cleaning and provide training on maintenance issues. Rural public works BMPs and Street Sweeping BMPs may be included in this workshop.	The annual WV Storm Drain Op & Maintenance Supervisor's workshop was held on May 14th, 2009 at Campbell Community Center. See Training Table for staff attendance. Staff from WVSD, WVCWP, and the other WV Communities also participated. Topics included: • A speaker from the regional program presented on the current NPDES Permit requirements and BMP's, and the possible future requirements of the MRP. • A speaker from Toyota Materials Handling also	Mtg lead by WVSD; Attend by Street Maint staff; Hosted by WVCWP

Public Agency Activities: Operations and Maintenance Evaluation				

Storm Drain Maintenance

In FY 08-09, West Valley Sanitation District (WVSD) provided its third enhanced annual report to the cities on storm drain cleaning. Since June 2008 the reports have listed the structures that were inspected and cleaned with the maintenance crew's findings. A total of 2,181 structures were inspected.

- Of those inspected, 1547 were found without any debris and were noted as "clean."
- Of those inspected, 634 had some visible debris upon inspection.
- Of those 634 that had visible debris, 28 required cleaning.
- Of the 28 storm drains that required cleaning, 27 were considered to have "Severe" amounts of debris (75 Lbs. +)

Storm Drain Stencils:

Saratoga's storm drain signage is replaced if it becomes worn, or bent (if it is metal). The City primarily uses painted stencils because they are easy to apply, they can be installed on horizontal surfaces (unlike the thermoplastic stencils) and the savings in staff time and cost of stencils is substantial. The metal plates, previously installed by the WV communities, are no longer applied because they were problematic. The Streets Supervisor considers new methods and materials for storm drain signage as they are introduced to the market. He is willing to pilot new plaques or signage materials if they are deemed practicable based on his experience and the results of previous West Valley pilots. Santa Clara County staff asked the WVCs for a recommendation on where to purchase metal plaques similar to those previously installed by the West Valley Cities. West Valley reported that municipal staff have discontinued application of the metal plaques because the sharp edges have a potential to get caught in street sweepers and bend, creating a potential to injure pedestrians or bicyclists. Replacing the plaques was also a problem. When plaques came loose or were removed, concrete chunks crumbled from the curb with the screws (used for attaching the plaques) making replacement in the same spot impossible.

Street Sweeping:

The City collected 929 cubic yards of debris in FY08-09. This total includes 717.5 cubic yards of material collected in residential areas, 171.5 cubic yards collected in commercial/arterial areas, and 40 cubic yards collected by additional City staff cleanup. All 214 curb miles of residential streets are swept every month, and all 65 curb miles of commercial/arterial streets are swept every month. The sweeping services were increased from monthly to weekly sweeping for the 4 village parking lots and Big Basin.

Sweeping Services increased in the El Quito Area from once a month to twice a month.

Yard Waste - Curbside Collection and Recycling:

The West Valley yard waste recycling program reduces the amount of debris that gets into the storm drain, since leaves are collected in oversized bins rather than being stored in the street. In FY 08-09, the totals were given for all diverted waste. Totals for yard waste recycled were not provided.

Training Evaluation:

The WVCWP Storm Drain Maintenance Workshop was held on 5/14/09 this year at the Campbell Community Center. Municipal staff generally felt that the Workshop helped them to understand the possible requirements of the future MRP. Municipal Staff also discussed the pros and cons of current BMP's and how they could address these issues in the future. It was evident that BMPs are being used by municipal staff but there was some frustration among street and park maintenance workers because they don't have enough authority to convince residents and private contractors to keep pollutants from reaching the storm drain system. The WVCWP Inspector offered his card to all attendees and requested that they report any incidents to him for immediate follow-up. One challenge is to catch the violator in the act of allowing pollutants into the storm drain system. By the time the incident, or the result of the incident, is seen it is often too late to stop it. The maintenance crews are generally called to clean up spills. Attendees requested continued updates on the MRP requirements for storm drain maintenance and street sweeping practices. Several of the attendees stayed after the workshop for additional discussion among the cities

Rural Public Works Activities				
Rural Public Works Perf Std	Rural Public Works Perf Std	Performance Standards Implementation Evaluate the effectiveness of Rural Public Works BMPs used on applicable maintenance activities (if any) regarding: a) management and/or removal of large woody debris and live vegetation from stream channels; b) stream bank stabilization projects; c) road construction, maintenance, and repairs in rural areas to prevent and control road-related erosion; and d) environmental permitting for rural public works activities. Report on these activities in the Annual Rpt.	No Rural Public Works construction took place this year. The model performance standard has been adopted. SOPs were updated as part of the Town's Urban Runoff Management Plan revision in 2004. WVCWP staff developed a short PowerPoint presentation consisting of Rural Public Works (RPW) standards and BMPs for staff training. The presentation slides are sufficient at this time. The West Valley Cities have very few rural public works projects. If staff or municipal contractors begin to construct more RPW projects, WVCWP staff will take photographs of the sites and the BMPs to include in training presentations.	Public Works Maint Div.
Training	FY08-09 Work Plan	Appropriate municipal staff or contracted staff will receive annual training on the use of current BMPs and SOPs, as noted in the performance standard. BMPs and SOPs may be reviewed as part of the annual WVCWP Street Maintenance Supervisors meeting.	City of Saratoga Staff attended the Streets and Storm Drains Maintenance Workshop on May 14th, 2009. Erosion control along roads was one of the topics covered. **Rural Roads Maintenance BMP Workshop** Santa Clara Valley Water District Headqaurters Jill Bicknell (SCVURPP), Tyler Ledwith (Ledwith Watershed Services) Topics: Effects of Roads on Watershed and Salmon Habitat, Regulations and Permitting, Best Management Practices for Road Maintenance, Best Management for Working Near Waterways **Rural Roads BMP Installation Training Workshop** Santa Clara Valley Water District (Camden Yard) Tyler Ledwith (Ledwith Watershed Services) and Craig Benson Topics: Proper Installation of wattles, mats, living fences, silt fences, and check damns, for construction site erosion control. Yard Waste Recycled		

FY06-07 Residents and businesses recycled 5,957.66 tons of yard waste using Waste Management garbage collection service from July '06 to the end of January '07. In March the West Valley Cities changed contractors; the total amount of yard waste recycled using West Valley Collection and Recycling from 3/1 to 6/30 2007 was reported as 3,924 tons for a combined **total of 9,881.66 tons.** City crews also picked up 240 cubic yards of leaves and tree debris.
FY07-08: An annual total of **24,898 tons** of diverted waste was picked up by garbage collection service. *

* Diverted waste totals are not representative of yard waste collected. Diverted waste totals include all waste that is diverted from landfills.

FY08-09: An annual total of **15,206 tons** of diverted waste was picked up by garbage collection service. *

* Diverted waste totals are not representative of yard waste collected. Diverted waste totals include all waste that is diverted from landfills.

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2008-2009 ANNUAL REPORT

Source	Task Source	Work Plan Tasks	Accomplishments	Responsible Party
			In FY08-09 the City of Saratoga posted SCVURPPP's Top Ten Development Tips to Protect Creeks to the City's Website. In FY06-07 Saratoga created forms for the project applicant to complete and municipal planners or the City Engineer to verify. The City of Saratoga continued to use these forms in FY 08-09. The forms were updated in May 2008. Green Building Techniques Materials and Strategies, Green Points Checklist, and the Storm Water Checklist were all added to the form. The Stormwater Treatment Measure Details form includes a check box to indicate that the applicant has prepared, signed and recorded the necessary covenant for ongoing maintenance and operation of stormwater treatment measures. The check box also conveys that the applicant has ensured that responsible public agency staff will have access to inspect the structured stormwater measures in perpetuity.	
C.3.e Operation and Maintenance of Treatment BMPs				
BMP Inspection Program O&M Verification	Permit C.3.e.iii	Provide details of O&M verification program in each annual report. Note organizational structure, evaluation of effectiveness, and proposed improvements. List or summarize treatment BMPs inspected during the year, inspection results, and required follow-up through resolution.	SARATOGA: The City has not had any Group 1 or Group 2 projects to inspect FY 08-09. However, Saratoga has implemented standard operating procedures for ongoing BMP O&M inspections. The procedures are documented in the City's URMP and were attached to the City's previous annual report. The Stormwater Treatment Measure Details form includes a check box to indicate that the applicant has prepared, signed and recorded the necessary covenant for ongoing maintenance and operation of stormwater treatment measures. The check box also conveys that the applicant has ensured that responsible public agency staff will have access to inspect the structured stormwater measures in perpetuity.	Public Works Analyst and City Engineer

		prior to grading, project size, amt impervious surface, watershed, developer name and S/W measures and treatments used.		
C3 Project Reporting	Permit C.3.n.ii.	For "regulated" projects provide details in the annual report on the S/W treatments used, the sizing criteria, O&M verification status, any follow-up action, site design measures used, source control measures used and pesticide reduction measures required.	No projects in the Group 1 or 2 categories were approved or submitted this year.	City Eng & PW Analyst provide data to WVCWP staff
Report Pesticide Reduction Measures	NPDES Permit Provision C.3.n.iii	For "regulated" projects, report on the percentage of projects for which pesticide reduction measures were required.	As part of the Group 1 and Group 2 project approval process, a Planner informs applicants that the City is implementing a "Pesticide Management Plan." Applicants must review and comply with BMPs contained in the informational document 'Landscape Maintenance Techniques for Pest Reduction,' provided to them and reviewed as part of a check-off list within the City's new Development Worksheet. As a condition of approval, applicants must not allow fertilizers or pesticides to be washed to the storm drains or to be buried in soil during construction. Applicants must reuse, recycle or properly dispose of these products as hazardous waste. Saratoga's General Plan, approved 6-6-07, states that the use of native draught-tolerant vegetation will be a condition of approval for projects that include prospective landscaping, whenever feasible	City Eng & PW Analyst provide data to WVCWP staff

Planning Procedures Evaluation

Public Works staff continued to coordinate very closely with the Community Development Department to ensure that all development projects are conditioned properly for storm water quality requirements in FY08-09. In addition, Public Works staff assists developers and their design team members with C.3 technical and legal issues (specifically bio-swale design and the BMP O&M agreement). For projects requiring bio-swales, the Associate Engineer provides the developer with design drawings. The City has received positive feedback from developers, who appreciate knowing exactly what the City wants and seeing detailed examples. Public Works and Building staff made the decision to use City Engineering staff, instead of an outside consultant, to perform BMP O&M Verification inspections (to

date, none have been needed).

Group 1 and Group 2 Projects - The City of Saratoga requires developers to design and implement the following measures to reduce stormwater pollution to the maximum extent practicable.

Site design shall include measures to minimize impervious land coverage, maximize infiltration (where appropriate and designed to protect

a. groundwater quality), and provide detention or retention as part of landscaping where feasible;
b. Source controls shall be required to limit pollution generation, discharge, and runoff as appropriate, including measures to discourage pesticide use;
c. Stormwater treatment measures shall be designed in accordance with the numeric design criteria in Provision C.3.d;
d. Continued operation and maintenance of BMP treatments shall be ensured by the developer and future property owners by legal covenant and continued O&M of BMP treatments shall be inspected by Saratoga Engineering staff.
e. Increases in peak runoff flow and volume shall be managed for appropriate projects by implementing the guidance in the Program's Hydromodification Management Plan (HMP) for the specific stream receiving the discharge~~.~~

Pesticide Reduction

1. Where feasible, landscaping shall be designed and operated to treat storm water runoff by incorporating elements that collect, detain and infiltrate runoff. In areas that provide detention of water, plants that are tolerant of saturated soil conditions and prolong exposure to water shall be specified.
2. Pest resistant landscaping plants shall be considered for use throughout the landscaped area, especially along any "hardscaped" area.
3. Plant materials selected shall be appropriate to site specific characteristics such as soil type, topography, climate, amount and timing of sunlight, prevailing winds, rainfall, air movement, patterns of land use, ecological consistency and plant interactions to ensure successful establishment.
4. Existing native trees, shrubs, and ground cover shall be retained and incorporated into the landscape plan to the maximum extent possible.
5. Proper maintenance of landscaping, with minimal pesticide use, shall be the responsibility of the property owner.

In FY08-09 the City of Saratoga participated in the Water Resources Protection Collaborative. The Collaborative was enacted in an effort to clarify and streamline local permitting for streamside activities, representatives from the water district, cities, the county and business, agriculture, streamside property owner and environmental interests created a partnership known as the Water Resources Protection Collaborative. The approach makes a clear distinction regarding governance. Municipal organizations will continue to exercise their land use authority. The Collaborative developed model Guidelines and Standards which will serve as a basis for the District and municipal organizations to implement as appropriate. Each municipal organization will develop and apply these standards as needed for their jurisdiction. The City of Saratoga adopted these guidelines in May of 2008.

Top Ten Development Tips to Protect Creeks

The scenic creeks that meander through the Santa Clara Valley can be harmed by development – unless we take precautions. If loose soil is allowed to wash into creeks, it can lead to sedimentation that harms migratory fish. Development in or near "riparian corridors" can result in excessive erosion, increased pollution, and impacts to wildlife habitat. Municipalities may require permanent stormwater treatment measures to reduce impacts. Follow these "top ten" tips to help protect local creeks for our enjoyment, native fish and wildlife, and future generations.

A "riparian corridor" is the strip of land, centered on a stream, characterized by vegetation that grows adjacent to freshwater watercourses.

In the Site Layout…

Don't: ✓ Do:

1. Maintain setbacks. Reduce impervious surfaces and keep buildings, patios, decks and other structures at least 100 feet away from the riparian corridor edge (*clustering buildings away from streams and using pervious paving reduces impact on habitat and protects property).*

2. Preserve healthy native and non-invasive trees and protect the riparian habitat through creative site plan design (*the urban forest provides shade, improved air quality, site aesthetics, and reduces noise. Visit www.canopy.org/db/ for tree selection tips in the Bay Area.*)

3. Avoid intrusive activities. Balance the need to protect riparian habitat from intrusive activities with creek-friendly recreation. *(Any human activity may generate noise and trash, but recreation opportunities help people become "stakeholders" and promotes stewardship.)*

In the Project Design…

4. Avoid night lighting, bright colors, reflective surfaces and noise near the riparian corridor (*riparian and wildlife habitat protection.*)

Don't: ✓ Do:

5. Control pollutant sources on the site (*cover debris and material storage, specify roofed trash enclosures, dispose of waste properly, and implement an effective trash removal program).*

In Landscaping…

6. Use suitable California native and drought tolerant plants, and avoid the use of invasive species. *(Visit www.cal-ipc.org for a list of invasives, www.cdfa.ca.gov/phpps/ipc/encycloweedia/encycloweedia_hp.htm for plants defined as noxious weeds in California, and www.cnps.org/cnps/nativeplants for information on native plants.)*

7. Use Integrated Pest Management techniques in design and maintenance (*learn how to promote healthy soils, conserve water, and help avoid the use of pesticides and quick-release fertilizers at www.ourwaterourworld.org and www.mywatershedwatch.org).*

PESTICIDE FREE ZONE

8. Preserve, maintain, and restore the riparian setback area with native vegetation and non-invasive adapted plants to buffer the creek from development (*protects habitat and reduces erosion, sedimentation, and excessive runoff during storms*).

Throughout the Project…

9. Determine and address all project impacts on the creek and obtain appropriate regulatory permits (*site design, impervious surfaces, activity areas, site grading, filling in floodplain areas, pollution, landscaping, and stream crossings all affect habitat*).

10. Remember that every section of a stream contributes to the habitat value of the entire stream (*even channelized sections may connect better habitat areas*).

For More Information:

Contact the municipality and see the Santa Clara Valley Water District's Guidelines and Standards at www.valleywater.org/Water/Watersheds_-_streams_and_floods/Taking_care_of_streams/Creekside_property_owners.shtm#facts

Source	WP Task	Work Plan Tasks	Accomplishments	Responsible Party
	URMP	Staff Training Participate in and support RWQCB and Program- sponsored workshops on erosion control and construction BMPs; support distribution of related materials. Construction inspectors must attend Erosion Control and Site Inspection Meeting every two years.	**Construction Stormwater Management Compliance Workshops** Thursday November 20th and Friday November 21st Quinlan Community Center, 10185 N. Stelling Road, Cupertino, CA, 95014 8:00 am – 3:00 pm (Attendees: City of Saratoga Senior Engineer, City of Saratoga Assistant Planner, WVCWP Manager, WVCWP Assistant) **Construction General Permit Workshop** May 27, 2009 (WVCWP Manager Attended)	WVCWP to coord w/ SCVURPPP; Const & Bldg Inspctrs attend
	URMP	Construction Inspections Continue construction site inspections and follow-up for stormwater issues (i.e., mud tracking, mat'l storage, housekeeping, etc.). Document sites inspected and note any violations through final resolution. Report violations to WVCWP for Annual Report.	**SARATOGA:** During FY 08-09, Saratoga's Building Department issued 1257 permits for various construction activities. City Building Inspectors attempt to ensure that all construction projects are compliant with the BMPs and guidelines specified in the City's Construction Inspection Performance Standard. Of those 1257 construction permits, roughly 300 required close monitoring by City Inspectors. These included 12 stand alone grading projects, 25 new single family dwellings and 116 significant additions to single family dwellings, as well as swimming pools demolitions, basement additions and other significant remodeling/renovation projects. It should be noted that Saratoga Inspectors also pay close attention to projects that don't require City approved permits such as landscaping projects and driveway installations. Projects that were problematic received daily drive-by spot checks by City inspectors. Projects that were clearly well controlled were inspected at least every 2 weeks during the rainy season. Construction Inspection Evaluation

Construction Site evaluation:

FY08-09

Erosion Control	10
Mud Tracking	9
Pool & Spa Discharge	1
Total Number of Incidents	20

*Note these totals come from City of Saratoga construction site inspections and are not included in the ICID section of this report.

Construction Site evaluation:

FY 07-08

Landscape	2
Slurry/Cement Discharge	5
Complaint Not Found	1
Pools & Spas Discharge	
Total number of incidents	8

The Construction Inspection Program is working well due to the continued, coordinated efforts between the City's building inspectors and the WVCWP Inspector and Manager. The City of Saratoga documented 20 stormwater violations during construction site inspections in FY08-09. The totals for stormwater violations in FY08-09 are higher because the totals came directly from the City of Saratoga construction site inspection reports. In previous years the number of stormwater violation came only from incidents that were reported to the WVCWP Inspector. Construction related incidents the WVCWP Inspector reported to in FY08-09 can be found in the ICID section of this report.

Potential incidents reported by other agency staff or citizens, are inspected and re-inspected until resolution is achieved. In FY0708, WVCWP Inspector responded to eight (8) construction-related incident calls for Saratoga. Saratoga's inspectors are always on the lookout for stormwater concerns and continue to education contractors and visit sites often. Public Outreach to residents and educational visits from the WVCWP Inspector appears to be helping to maintain a limited number of contractor violations. Generally the most common incident in Saratoga is not related to construction, but to pool drainage. However, the City made a concentrated effort in the past 3 years to distribute pool brochures to all new owners, including a mail-out to all pool owners in FY04-05. The pool brochure is also on display at the City's building counter. Building inspections also educate homeowners and contractors when issuing pool, or demo permits.

A. SCV PROGRAM - PROJECTS/SUPPORT				
	NPDES Permit, Provision C.4, C.9 & Pest Mgt Plan (PMP)	a. Watershed Education and Outreach Campaign Help to develop/implement ongoing watershed education and outreach campaign. WVCWP Mgr assists via WEO Ad hoc Task Group. Participate in campaign development and special projects, e.g. community events. Campaign will include funding for educational programs at the Alviso Ed Center and funding for ZunZun performances in local schools. See SCVURPPP FY 08-09 Watershed Watch Work Plan for details.	WVCWP staff participates in WEO AHTG meetings. In late FY 08-09, WVCWP staff was selected to serve as Chairperson of the WEO AHTG for FY 09-10. WVCWP staff has accepted the position. Activities include development and review of outreach and survey materials. WVCWP Staff participated in FY08-09 WW Survey Task Group: reviewed goals, scope & questions in survey against past surveys; reviewed preliminary results and draft report for submittal to AHTG and MC. **Mission College's Eco Day Event** 4/22/09 - Mission Community College, Santa Clara WVCWP staff supported Program activities by working at the Watershed Watch booth, handing out stormwater outreach material, including Watershed Watch brochures and Discount Cards.	WVCWP Staff
	NPDES Permit, Provision C.4, C.9 & Pest Mgt Plan (PMP)	b. Pesticide User Outreach Project Continue to provide funding and to participate in Our Water Our World IPM Store Partnership. Project scope will include items in Program's Pesticide Management Plan based on provision c.9.d of the Permit for outreach to residents, commercial businesses, and pest control operators.	SCVURPPP Co-permittees received CA DPR/ EPA "IPM Innovator Award". Details are available in SCVURPPP "Program" report. Award was presented to the WVC Council members at Council meetings in February (presented to Saratoga City Council in May). **IPM Store Partnership** Within the West Valley Communities, there are 3 garden centers which have elected to participate in the Store Partnership Program:	WVCWP Staff

			- Summerwinds – Campbell - Home Depot – Campbell - Ace Hardware – Los Gatos There are also 4 participating stores which border Saratoga (including 1 also bordering Campbell); these stores are patronized by WVC residents, and are supported by overall funding that WVC contribute to. These additional stores are: - Summerwinds – Cupertino - Home Depot – San Jose – (De Anza Blvd.) - Yamagami's – Cupertino - Orchard Supply Hardware – San Jose (Prospect Rd. – bordered by Saratoga & Campbell) WVCWP provides funding to support ongoing maintenance and training needs for this program. WVCWP provided IPM Fact Sheets to Home Depot in Campbell in June 09. Material was delivered to Home Depot by Program staff as part of the Pesticide User Outreach Project. Fact Sheets Delivered for Display/Distribution: 100 – Wonderful Roses 200 – Safe Use & Disposal of Pesticides 200 – Naturally Managing Pests 100 – Tips for a Healthy Beautiful Lawn 200 – Keeping Cockroaches Out of Your House 200 – Keeping Fleas Off Pets & Out of Yards 100 – *Spanish* – Fleas 500 – Controlling Ants 100 – Controlling Yellowjackets	

			300 – Controlling Aphids in Your Garden 200 – Growing a Healthy Garden to Naturally Manage Pests	
	NPDES Permit, Provision C.9.c.	c. Mercury Pollution Prevention Outreach Participate in the Program's Mercury Pollution Prevention Outreach Work Group and conduct local implementation of the Program's Mercury Pollution Prevention Plan including public education on: 1) negative health and environmental impacts of mercury, and 2) proper disposal of products containing mercury.	WVCWP staff focus in FY 08-09 was on local implementation, since the Program's Mercury PP Outreach Work Group has not been meeting. Local implementation included outreach for free E-waste Recycling Events, mercury-free thermometer distribution, mercury outreach material distribution, and articles on mercury in municipal newsletters. **FREE E-WASTE RECYCLING EVENTS** Recycling of TVs, monitors and all office electronics. These events were organized by the waste contractor for the four WV Communities. **July 2008** CAMPBELL: July 19, 2008 Campbell United Church of Christ, Campbell, CA LOS GATOS: July 19, 2008 Los Gatos United Methodist Church, Los Gatos, CA SARATOGA: July 26, 2008 City of Saratoga North Campus, Saratoga, CA **April 2009** CAMPBELL: April 18th, 2009 Campbell United Church of Christ, Campbell, CA LOS GATOS: April 25th, 2009 Los Gatos United Methodist Church, Los Gatos, CA SARATOGA: April 25th, 2009 City of Saratoga North Campus, Saratoga, CA See "Mercury" section of this AR for details on results	WVCWP Staff

			of these E-waste events. EVENT OUTREACH: During Winter/early Spring of 2008/2009, WVCWP submitted articles which ran in the WVC municipal newsletters, concerning E-waste. This helped publicize the need to make use of use E-waste events. For the July 2008 events, WVCWP publicized E-waste disposal on the front page of the cleancreeks.org website. WVC advertise E-waste events in their municipal newsletters when possible. Campbell Profile – Winter 09 – Campbelll Historical Society E-Waste event **THERMOMETERS** **Audubon Wildlife Fair** Cupertino (bordering Saratoga) 10/25/08 Mercury-free thermometers, along with mercury outreach materials, were provided to parents attending WVCWP Enviroscape presentations at the Fair. **Thermometer Exchange at LG Farmers Market** Los Gatos – 5/3/09 WVCWP coordinated an exchange which was staffed by Town of LG and City of San Jose Environmental Services Dept. See "Evaluation - *SCV Program Projects/Support* " section (below) for details and see "Mercury" section of this AR for details on results of these Thermometer events.	

			Mercury Outreach - Newsletters In Winter 2009, prior to the nationwide switch to digital television, WVCWP provided an article to all WVC municipal newsletters on proper TV disposal, and environmental impacts of mercury. The article was printed in the municipal newsletters for Campbell, Monte Sereno and Saratoga. (See 'Press Releases' row, below, for details) **Outreach Materials & Thermometers** Mercury outreach materials and solar and mercury-free thermometers were distributed at community events. See "Materials Distribution" below (B. 'General Outreach', a.) Mercury Informational Material was handed out to Corp Yard Staff in July 2008; along with a flyer reminding staff to properly dispose of mercury containing thermostats/ switches. See "Mercury" section of this report for additional details	

Public Information/Participation Program EVALUATION - *SCV Program Projects/Support*

Mercury Outreach – Local Implementation of Mercury Pollution Prevention Plan

WVCWP with Sierra Club at Audubon Wildlife Fair:

Sierra Club members in attendance expressed strong interest in helping to distribute these thermometers; however the Club does not have funding to purchase these themselves for distribution. If mercury-free thermometers could be made available to the local Sierra Club group (Guadalupe Group of the Loma Prieta chapter) they would distribute them at a variety of events: Earth Day booth, travel presentations (usually held at Saratoga Library), and club events, such as Annual Group Awards & Wine-Tasting event. This initiates the question of whether it would be effective to recruit stakeholder groups to help at thermometer exchange events, or to distribute mercury-related (i.e fluorescent bulb recycling) information at stakeholder activities/events.

WVCWP with Town of Los Gatos: Thermometer Exchange at Los Gatos Farmer's Market

Residents attending the Farmer's Market were pleased to learn the Town was collaborating with the City of San Jose for this event.

WVCWP has coordinated with the other participants to hold this event again in FY 09-10. It will be held in conjunction with "Keep Los Gatos Beautiful" month in April 2010; this will allow for better outreach opportunities to publicize the event and encourage increased participation.

Based upon positive response from residents, WVCWP, WVC and San Jose Environmental Services Dept. have coordinated additional events in FY 09-10 at various venues. Efforts will be made to increase publicity for these events; some will be held mid-week and increased publicity may be needed in order to generate a turnout. Effectiveness of holding mid-week events will be evaluated.

B. WVCWP PROJECTS

GENERAL OUTREACH

General	NPDES Permit, Provision C.4 and C.9	a. Distribute Materials. Distribute public information materials at civic centers, libraries, building and planning department counters and similar venues. The Master Gardener distributed 30 Grow-It Guides to her class members.	
			<u>SARATOGA</u> Saratoga Rec. Dept offers a gardening class, including instruction on organic and low-maintenance gardening. WVCWP distributed to the classes: 100 - Beneficial Bugs Brochures *with* 100 - Calif native seed packets, (beneficial bug attractants) put together by WVCWP staff Distributed to all Saratoga City Council members during IPM Innovator Award presentation – May 2009 5 – Healthy Gardening IPM Facts sheets *with* 5 - Calif native seed packets, (beneficial bug attractants) put together by WVCWP staff Gardening Classes taught by a Master Gardener (Monte Sereno resident) are held at the Saratoga	

			Library. The Master Gardener distributed 30 Grow-It Guides to her class members.	
General	NPDES Permit, Provision C.4 and C.9	b. Participate in Local Community Events Promote watershed messages by participating in local community events (e.g., farmers market, festivals, creeks clean-ups, etc.).	**LG Presbyterian Summer Camp Enviroscape Presentation** Los Gatos July 23rd An Enviroscape watershed presentation was given for 21 children, ages 2nd – 5th grade. The presentation covered behavior change information for: Trash, Car-washing, Pesticide Use, Pet Waste, Vehicle Fluids 25 stormdrain message 'recycled' pencils were given to children & teachers. **Audubon Wildlife Education Fair – Enviroscape Presentations –** 10/25/08 at Audubon Society McClellan Ranch, Cupertino (bordering Saratoga) Partnered with local stakeholders: SC Valley Sierra Club Chapter and Audubon Society. Audubon sponsors this event, which is held at their facility. Sierra Club shares a table with WVCWP and Sierra Club volunteers assist WVCWP staff. WVCWP gave 10-12 Enviroscape watershed presentations to groups of 4-8 children (ages appx 4-10) throughout the day. Approximately 70-80 children (total) participated in, and watched, the Enviroscape activity. Presentations were also seen by parents, who attended with their children. Presentations covered behavior change information for: Trash, Car-washing, Pesticide Use, Pet Waste, Vehicle Fluids Distributed 30 Mercury Brochures, 30 Solar	WVCWP Staff and available Municipal Staff

			Thermometers (mercury-free), and 30 Flyers for Mercury thermometer drop-off locations to the adults. **Arbor Day Celebration** Saratoga 4/24/09 4/24/09 – Beauchamps Park WVCWP staff was introduced to the attendees (appx. 40 people). Attendees visited WVCWP display where staff discussed runoff issues (including pesticides) and distributed material. Staff also circulated and distributed material. **Town of Los Gatos Public Works Open House** Town Corp Yard – May 2009 WVCWP staff and Town of Los Gatos staff participated in this annual event which helps inform the public, especially students, of the Town's Public Works activities and responsibilities (such as street sweeping). WVCWP presented stormwater-related information, including distributing materials, and answering questions for attendees. Attendees included: St. Mary's School 3rd & 4th grade, 51 students plus 9 parents and teachers. Evergreen Elementary 3rd grade, 20 students plus 5 parents and teachers. **St Thomas of Canterbury Vacation Bible School Enviroscape Presentation** SJ (between Campbell & Saratoga City boundaries) June 18, 2009	

			An Enviroscape watershed presentation was given for 18 children, ages appx. 7-10. The presentation covered behavior change information for: Trash, Car-washing, Pesticide Use, Pet Waste, Vehicle Fluids Each child received a "Pest or Pal" activity/ coloring book.	
			CAMPBELL **Arbor Day** The City of Campbell held it's Arbor Day event on April 21 at Foresthill Elementary School. A tree was planted, and gardening-related material was distributed. The City included IPM and Less Toxic Pest Control in materials that were available for attendees to take home. These included: Pests Bugging You? Grow It Guides The Bay Begins at Your Front Door! IPM Fact Sheets: Tips for a Beautiful Lawn Controlling Ants in Your House Controlling Aphids in Your Garden Keeping Cockroaches Out of Your House **Great American Pick Up** The major community event organized by City of Campbell is its "Great American Pick Up". This year, the City was able to generate attendance by 160 volunteers. The City assembles a re-usable grocery bag full of stormwater/ litter-related materials for distribution to each participating family. 100 of these bags were given out (see "Materials Distributed" row – above).	

			Details of the event are in the Creek Cleanups row of this PI/P section (below) and in the "Trash - Evaluation" section of this AR.	
			LOS GATOS **Town of Los Gatos Public Works Open House** Town Corp Yard – May 2009 Town of Los Gatos staff organized its Annual Public Works Open House for 2009. This event helps inform the public, especially students, of the Town's Public Works activities and responsibilities (such as street sweeping). In addition, the Town invites WVCWP to help insure that information related to stormwater issues is distributed.	
			SARATOGA **Arbor Day Celebration** Saratoga 4/24/09 4/24/09 – Beauchamps Park City of Saratoga staff organized this event, which was held at a neighborhood park. The event was publicized in the municipal newsletter, and included information on trees as a means of preventing runoff and erosion, especially along creekbanks. City staff introduced WVCWP to the attendees (appx. 40 people). Attendees visited the WVCWP display where staff discussed runoff issues (including pesticides) and distributed material. **Creek Cleanups** City staff organized 2 Creek Cleanups (Calabazas Creek and Saratoga Creek). See Creek Cleanups row	

			(below) for details.	
General	NPDES Permit, Provision C.4 and C.9	c. Prepare Newsletter Articles/ Press Releases Prepare and contribute articles/ press releases of interest to the City newsletter and/or local media. Topics such as HHW disposal, pesticides, mercury, trash and copper/nickel will be promoted.	**COMMERCIAL WEEKLY NEWSPAPERS** **News Articles** In FY 08-09 WVCWP worked steadily on developing a good working relationship with the 3 weekly newspapers which cover the 4 WVC. These efforts resulted in 2 effective articles published in FY 2008-2009, and 1 article which was initiated in June 2009 and appeared in July 2009. Articles were printed in the: **Campbell Reporter** (circ. 15,550), the **Los Gatos Weekly** (circ. 41,050) the **Saratoga News** (circ. 13,240). **Creek Cleanup article** In Sept. 2008, WVCWP prepared a press release for California Coastal Cleanup Day and submitted it to the 3 local weekly newspapers. WVCWP worked closely with reporters for all 3 papers to develop articles tailored to each City/Town. WVCWP provided photos and interviews. Articles discussed the Stormwater Permit and the implications of trash in the creeks. Numbers were provided on lbs of trash and recycling collected at the WVCWP site (San Tomas Aquino Creek) and 2 sites in Los Gatos. The Saratoga article also publicized the upcoming Cleanup event in Saratoga Village, sponsored by WVCWP & City of Saratoga. **IPM/ "Green Gardeners" article + Car Wash Kit**	WVCWP Staff

			In February 2009, WVCWP developed a Press Release covering upcoming IPM awards presentations for the 4 WVC, including information and photos on the Green Gardeners program. The article included information on the class series (for anyone interested in enrolling). It also promoted local companies which employ Green Gardeners graduates – so that residents could contact and utilize these graduates. In addition, in the context of describing WVCWP, the article promoted use of the Car Wash Kit for fundraising events. **<u>Car Wash Kit for fundraising events</u>** In June 2009, WVCWP initiated correspondence with the 3 weekly newspapers concerning the need to promote the Car Wash Kit during the summer months. Correspondence continued into July 2009, and resulted in a 'brief', printed in the 3 newspapers, alerting fundraising groups about the need to use the Car Wash Kit. The article generated a number of calls with questions to the WVCWP office. **COMMERCIAL WEEKLY NEWSPAPERS** **Paid Advertising** WVCWP contributed funds to the SCVURPPP's Pollutants of Concern ad campaign. This allowed ads to appear in the three (3) weekly community newspapers for a total of ten (10) weeks in FY 08-09. (Campbell Reporter, Los Gatos Weekly, Saratoga News). In addition, all ads also appeared a 2nd time in the Los	

			Gatos Weekly "Weekend Edition", so that ads appeared a total of twenty (20) times in WV newspapers. September 08: IPM/weeds October 08: Mercury/HHW November 08: Mercury/HHW Dec/January (week of 12/30): Litter Jan 09: Litter February 09: Litter March 09: Litter April 09: IPM/snails June 09 (week of 6/1): IPM/Roses June 09: IPM/Yellow Jackets <u>Recap:</u> IPM 4x Mercury 2x Litter 4x **MUNICIPAL NEWSLETTERS** WVCWP prepared a variety of news articles for use by municipal newsletters in FY 08-09. Articles shared with muni newsletters included: **<u>- Car Washing</u>** An article on Car Washing & Car Wash Kit, along with a WVCWP car washing cartoon, was submitted to *The Saratogan* municipal newsletter for Summer 08. The Car Washing cartoon strip, along with brief text, was printed (July/Aug 08).	

			- **Keep Leaves And Landscaping Material Out Of The Drain** An article was prepared alerting residents that leaves and dirt, although 'organic', should be kept away from gutter, curbs and stormdrains. Graphics included a WVCWP cartoon illustrating construction materials near the gutter. This was submitted to the muni newsletters, and also the WVC waste collection contractor, for their newsletter. The article was printed in: - The Campbell Profile - The Monte Sereno Newsletter - The Saratogan **- Proper TV Disposal** (E-waste & Mercury) An article was written covering the issue of proper TV disposal (with the upcoming digital TV changeover), along with concerns about mercury. The article included details on proper disposal options. This was submitted to the muni newsletters, and also the WVC waste collection contractor, for their newsletter. The article was printed in: - The Campbell Profile - The Monte Sereno Newsletter - The Saratogan **- Arbor Day** – Trees prevent creekbank erosion At the request of the City of Saratoga, an article was developed addressing the subject of how trees help prevent creekbank erosion.	

			Portions of the article were printed in The Saratogan as part of the effort to highlight Arbor Day. **- Less Toxic Pest Control –** Attracting Beneficial Bugs WVCWP prepared an article highlighting the dangers of pesticide use in home gardens, with details and graphics on using 'beneficial bugs' as an alternative to pesticides, and on properly identifying helpful vs harmful bugs. The article and graphics were printed in: - The Campbell Profile - The Los Gatos Vista - The Monte Sereno Newsletter - The Saratogan West Valley Communities' Solid Waste Franchisor (garbage & recycle hauler) publishes a quarterly newsletter and distributes to all households. Topics in Summer 2008: Curbside collection of used motor oil, proper disposal of sharps, universal waste, e-waste, water based paints.	
			CAMPBELL The City of Campbell publicizes "Bike to Work Day" and has a good turnout of employees who participate. This generated a 400 word article on "Bike to Work Day" and City staff, in the Campbell Reporter weekly newspaper (May 27, 2009). The article was titled "City Employees Leave Cars at Home and Pedal to Work". See Attachments *(Bike to Work article)*	

			SARATOGA City of Saratoga was able to generate publication of 2 constructive articles in the local weekly newspaper (The Saratoga News). One article covered Saratoga Mayor Chuck Page's campaign to get businesses to halt use of Styrofoam containers. The article ran on April 28, 2009, and covered issues related to getting Styrofoam out of the trash stream, it's lack of biodegradability, etc. Another article targeted the subject of greener building, and covered a variety of issues, including: -the benefits of green roofs, -recycling construction materials, and -residential 'rain harvesting' systems (which reduce runoff). See Attachments ("Happy Earth Day" & "Mayor Styrofoam") Saratoga Annual Cleanup The City was able to obtain publicity in the weekly 'Saratoga News' promoting the West Valley Collection & Recycling cleanup occurring July 21st through September 26th and to encourage citizens of Saratoga to hold a garage sale to prepare for the annual cleanup. MUNICIPAL NEWSLETTER The City's municipal newsletter, "The Saratogan" makes a consistent effort to include articles related to stormwater issues. The City has included articles generated by WVCWP, and has also used the newsletter to proactively teach	

			residents about issues such as reducing pesticide use in City Parks, encouraging residents to walk and bike using city pathways - rather than driving, etc. In FY 08-09, "**The Saratogan**" municipal newspaper carried articles on: • Trails & Bike Paths: • Less-Toxic Pest Control in City parks • Planting/Preserving Trees to prevent Creekbank Erosion • E-Waste (general) • E-Waste and Mercury (digital TV transisition) • Keeping Leaves and Dirt away from Strormdrains • Beneficial Bugs/ Less Toxic Pest Control/ Proper Pesticide Disposal • Car Washing – proper Residential Washing + Car Wash Kit	
General	CI Item	d. WVCWP Web-Site Maintain and promote cleancreeks.org website; continue to expand and update the site with new educational material and up-to-date topics for the public on HHW, pest management, and other pollutant reduction activities, e.g. for mercury, trash, & copper /nickel	**E-Waste Event** WVCWP updated their website <www.cleancreeks.org> to advertise for the E-Waste event. A thumbnail link to the flyers handed out throughout the cities was posted from 7-14-08 through 7-27-08. **Waste Collection Contractor** Strengthened relationship with WV Collection & Recycle – the waste collection contractor for the WV Communities. WVCR now includes a link to the WVCWP website on the "Links" page of their website. **Car Wash Kit** Worked with Town of Los Gatos to update Car Wash Kit contact information and details on the Town's	WVCWP Staff

			website. _____ All WVC prepared and forwarded municipal seal/logo graphics to WVCWP for use on Watershed Watch website. _____ Received inquiry about Car Wash Kit from Incline Village, NV (Lake Tahoe) – Car Wash Kit info on cleancreeks.org website (WVCWP site) was found via a Google search. In response to inquiry, WVCWP forwarded numerous materials to help NE Lake Tahoe area start a Car Wash Kit program.	
		Municipal Web-Sites	See Sections 7 through 10 of this report for details on municipal website information related to specific pollutants of concern.	

GENERAL OUTREACH EVALUATION

Press Releases/ Media Coverage

WVCWP has been working to re-establish connections with the 3 local weekly papers which are distributed to all WV households (due to a buyout several years ago, these papers had experienced re-organization).

Creek Cleanup Coverage

For FY 08-09, WVCWP staff were able to arrange for coverage of the Coastal Cleanup Day event in all 3 papers. The articles were each tailored to the community covered by that paper. Articles included photos, interviews with staff and volunteers, data on trash collected, and coverage of the Stormwater Permit and water pollution issues related to trash.

The articles reached a total of **69,840 households**, or, all the adult population of the WV Communities (each household may include several adults, older children, etc).

IPM/ Less Toxic Pest Control Coverage

To promote use of the trainees from the Green Gardeners program, WVCWP sent a Press Release to local newspapers in Campbell, Los Gatos & Saratoga. A 630 word article, including a photo, about the Green Gardeners program was published.

The article promoted both the classes (for anyone interested in enrolling) and promoted local companies which employ Green Gardeners graduates – so that residents could contact and utilize these graduates.

This was exactly the type of coverage that WVCWP was looking to secure, because it is hoped that publicity will inspire residents to hire Landscape Design & Maintenance contractors who have been trained in IPM. Since the article included interviews with Green Gardeners graduates, and owners of participating Landscaping firms, the article will make it easy for residents to contact these companies and graduates, and hopefully make a change to less-toxic pest control at their homes.

CITIZEN PARTICIPATION

Public Partici-pation	Trash Monitoring Work Plan	e. Creek Clean-ups Continue implementation of trash monitoring activity during Creek Clean-ups. Conduct a minimum of two clean-up events per yr (i.e. on Coastal Clean-up Day and National River Cleanup Day).	**Coastal Cleanup Day** *San Tomas Aquino Creek @ Westmont High 9/20/08* WVCWP hosted a Cleanup Event at the site where it has regularly hosted this event. Volunteers were instructed in use of Tally sheets, and were provided with clipboards, etc. Working in groups, volunteers were able to pick up trash and carry out trash monitoring. 15 Volunteers attended along with WVCWP and City of Saratoga staff. Details are listed in the Evaluation section (below). The Cleanup Event was covered in articles appearing in 3 weekly newspapers; details are listed in the Newsletter/Press Release section (above). Distributed 15 reusable bags (purchased from Safeway with gift card they donated to WVCWP) **National River Cleanup Day** *San Tomas Aquino Creek @ Westmont High 5/09* WVCWP hosted a Cleanup Event at the site where it has regularly hosted this event.	WVCWP Staff

			Volunteers were instructed in use of Tally sheets, and were provided with clipboards, etc. Working in groups, volunteers were able to pick up trash and carry out trash monitoring. Details are listed in the Evaluation section (below). **Sacred Heart Schoolyard Cleanup** *Schoolyard overlooking Wildcat Creek in Saratoga 4/29/09* Sacred Heart School organized the cleanup, based upon previous events held in partnership with WVCWP. Details are listed in the "Evaluation" row at the end of this table (below).	
			CAMPBELL **Great American Litter Pickup** 4/18/09 - City of Campbell, 5 different cleanup sites Volunteers were instructed in use of Tally sheets, and were provided with clipboards, etc. Working in groups, volunteers were able to pick up trash and carry out trash monitoring. 160 Volunteers participated, working for four hours. Litter was picked up from 5 sites, including the Los Gatos Creek Trail and the Los Gatos Creek County Park. Publicizing done for the event was very successful, as shown by the fact that 160 volunteers participated. Details are listed in the "Evaluation" row at the end of this table (below).	

			SARATOGA **Calabazas Creek Cleanup** *Saratoga-3/22/09* 17 Volunteers from a local church group in Saratoga attended along with The Mayor of Saratoga, Saratoga and WVCWP Staff. **Saratoga Creek at Big Basin Way Cleanup** *Saratoga – 5/26/09* Saratoga staff organized a cleanup at this site which is has been cleaned annually. 9 volunteers from Saratoga Elementary school participated (8 students and 1 teacher). Volunteers were instructed in use of Tally sheets, and were provided with clipboards, etc. Working in groups, volunteers were able to pick up trash and carry out trash monitoring. Details are listed in the "Evaluation" row at the end of this table (below).	
Public Partici-pation	Creek Keepers Campaign started FY00-01	f. "Creek Keepers" Program training Provide training on trash tallying and highlight current trash pollution issues for students and volunteers when they participate in a cleanup event.	See preceding row (above)	WVCWP Staff
TARGETED OUTREACH & SCHOOLS				
Target Schools	Expand Outreach to Teachers and	g. Schools Outreach: Watershed Ed. Curriculum Conduct outreach to K-8 teachers to	WVCWP Staff e-mailed to a number of schools which have hosted Enviroscape presentations in past years. Only 1 school responded – they requested 2 different	WVCWP Staff

	Students	solicit invitations for classroom presentations. Develop presentations as needed based upon grade levels. Presentations will cover watershed concepts, strategies for changing behaviors which affect stormwater pollution, and related concepts and vocabulary.	Enviroscape presentations. Since this does not appear to be the most effective means of outreach, staff will investigate other methods in FY 09-10. 5 schools were contacted – Canyon Heights, Foothill, Sacred Heart, St. Mary's, Lexington WVCWP was successful in outreach to 2 Summer Camp programs held at local churches. Almost 40 students were reached through presentations at these venues. See "Community Events"	
Target Schools	Based on feedback from Teachers and Students	h. Provide Watershed Education in classrooms Conduct water quality protection education or presentations in local schools, using *Enviroscape* and/or other methods to engage students in Watershed campaign messages. Improve presentation format based on teacher/student feedback. * Please note that this section was inadvertently omitted from the FY08/09 work plan and needs to be included in this report.	**St. Mary's School** Los Gatos January 15, 2009 Enviroscape Presentation to 35 Fifth graders. WVCWP Assistant gave a watershed pollution presentation using the Enviroscape to 35 Fifth graders at St. Mary's School in Los Gatos. Topics covered included: Definition of Watershed, Storm Drain Vs. Sewer, Water Cycle, Urban Run-off, and pollutants of concern. Distributed 35 beneficial bug brochures w/native seed packets, 35 WVCWP pencils made from recycled materials, 3 WVCWP Stainless Mugs, 3 WVCWP Cartoon T-Shirts. **Sedgwick Elementary School "Discovery Day"** Cupertino March 31, 2009 4 Enviroscape Presentations WVCWP gave 4 Enviroscape Presentations to approximately 90 students in the 2nd, 3rd, 4th, and 5th grades.	WVCWP Staff by arrangement w/ Teachers

			Topics covered included: Definition of watershed, Storm Drain Vs. Sewer, Water Cycle, Urban Run-off, pollutants of concern and "How to help reduce watershed pollution". Distributed 90 beneficial bug brochures w/native seed packets, 50 WVCWP Pencils made from recycled materials, and 40 Watershed watch notepads. **St. Mary's School** Los Gatos May 21, 2009 Enviroscape Presentations WVCWP Assistant gave watershed pollution presentations, using the Enviroscape, to 30 Kindergarteners (2 classes – 15/ class) at St. Mary's School in Los Gatos. Topics covered included: Definition of watershed, Storm Drain Vs. Sewer, Water Cycle, Urban Run-off, and pollutants of concern. Groups of students were rotated through the presentations. For those not in the rotation, a "Litter Pickup" activity was supervised by the teachers. WVCWP provided litter grabbers, gloves & trash bags. Students spread throughout the school grounds, picking up litter. The school grounds were generally very clean -- hardly any litter was found and students were not able to fill 1 trash bag. Teachers pointed out storm drains, explained how litter gets into them, and flows to creeks. Distributed 35 beneficial bug brochures w/ native seed packets, 3 WVCWP Stainless Mugs,	

		Additional Outreach to Schools	**Car Wash Kit for fundraising events** Since Car Wash fundraisers are frequently held at school sites, or sometimes by school-based groups using other sites, in FY 08-09 WVCWP pursued a concentrated outreach effort to schools on this subject. A flyer (specific to each municipality, and listing the relevant muni ordinance) and a letter, were e-mailed for dissemination to all schools in the WVC. Via correspondence with 2 High School District Offices and 3 Elementary School District Offices, the flyers and letters were sent to Facilities Maintenance staff and front office staff at: **High Schools** CAMPBELL – 6 HS school sites LG-STGA – 3 HS school sites **Elementary Schools** CAMPBELL – 12 Elementary & Middle School Sites LOS GATOS – 5 Elementary & Middle School Sites SARATOGA - 4 Elementary & Middle School Sites See Attachments – (*Car Wash Flyer* and *Car Wash Letter*)	
TARGETED OUTREACH				
Targeted Business	Permit Provision C.4	i. Education – Businesses Distribute BMP materials during WVCWP inspections of food facilities and automotive businesses. Discuss relevant educational material with businesses cited for potential stormwater violations.	The WVCWP Inspector distributed BMP materials to all restaurants and food facilities that were included in pro-active IND inspections in FY 08-09. **Good Cleaning Practices' (poster & packet)** Poster depicts proper mat washing techniques,	WVCWP Inspector

			Materials distributed at other inspections (IND and IC/ID and follow-ups) included: - Vacu-Boom flyer - Watershed Watch brochures - Construction sites – "Blueprint for a Clean Bay" – BMPs for Construction Sites - Preventing Stormdrain Pollution: Guidelines for Commercial & Light Industrial Facilities" booklet (SCVURPPP) – covers painting, car-washing, chemicals, etc. WV Inspector distributed 50 Pool & Spa BMP brochures to retail outlets during FY 08-09. These will help educate retail staff, and are for distribution to retail customers. **Leslie Pools – Los Gatos** 30 -- Pool & Spa Brochures **Tradewind Spas – Los Gatos** 20 – Pool & Spa Brochures	
Reporting	NPDES Permit, Provision C.4	j. Evaluation/ Reporting Document or estimate (as feasible) numbers of residents, students, municipal staff etc. reached by outreach efforts. Provide anecdotal feedback from audiences. Report number of calls, website hits and circulation or readership for newspapers or newsletters.	**Residents Reached via Articles** **COMMERCIAL NEWSPAPERS** Creek Cleanup articles were printed in the Sept 30, 2008 issues of the 3 local weekly newspapers. An article covering Green Gardeners, how to hire graduates trained in Less Toxic Pest Control, and info on the WVCWP Car Wash Kit was printed in the Feb. 17, 2009 issue of the 3 local weekly newspapers. Circulation for local weeklies: **Campbell Reporter** (circ. 15,500) **Los Gatos Weekly** (circ. 41,050)	WVCWP Staff

			Saratoga News (circ. 13,240) WVCWP paid for ads to run in these papers as part of the SCVURPP media campaign. Campbell Reporter & Saratoga News: 1x / mo for 10 months Los Gatos Weekly: 2x/mo for 10 months **MUNICIPAL NEWSLETTERS** Circulation numbers for municipal newsletters are: 23,000 Campbell households 15,208 Los Gatos residents and businesses 1,225 Monte Sereno households 12,600 Saratoga households **WASTE CONTRACTOR** West Valley Collection & Recycling is contracted to provide waste collection services for the West Valley Communities. The contractor has been proactive in providing free E-waste recyling events and in publicizing those events through their quarterly newsletter and through bill inserts. The newsletter also include additional in on the importance of recycling batteries and e-waste and similar subjects. The newsletters and bill inserts are sent to appx. **27,000** WV households. **Students Reached via Enviroscape Presentations** WVCWP staff gave Enviroscape presentations in classrooms, at summer 'church camps', and at community events. Appx. **274 students** learned about	

			watersheds and the need for behavior changes related to water pollution via this medium.	
Training	FY 08-09 Work Plan	k. Staff Training Conduct or provide WVCWP staff training/meetings to prepare for school presentations, community events & responses to public requests.	**Enviroscape** A new WVCWP staff member was trained on use of the Enviroscape. Training covered set-up and breakdown of the watershed model, use of several curriculums and associated visuals on the Enviroscape. A similar training was provided to City of Cupertino staff. **Car Wash Kit** WVCWP provided training to City of Monte Sereno front office staff on the Car Wash Kit program, so that staff will be able to handle public inquiries on the program.	WVCWP staff
Training	Additional Task – not in Work Plan	k. Staff Training Obtain staff training on effective outreach methods and materials	2 WVCWP staff attended the EPA's National Conference for Non-Point Source & Stormwater Outreach Portland OR – May 2009. WVCWP Program Manager attended a full day of training on "An Evaluation Primer for Stormwater Programs" and "Overview of Social Indicators Evaluation System and Applied Survey Development Skills". WVCWP Program Assistant provided a training for Conference attendees, and attended 2 ½ days of training on a variety of subjects. See Training Table for details	
Training	Additional Task – not in Work Plan	k. Staff Training Provide staff training on public education to a national audience of stormwater	EPA's National Conference for Non-Point Source & Stormwater Outreach Portland OR – May 2009	

		professionals	WVCWP responded to a request for abstracts showcasing successful, low-budget public education campaigns. EPA requested that WVCWP address the conference with their presentation showcasing use of cartoons for dissemination of stormwater messages. WVCWP staff created and delivered the PowerPoint presentation, which was very well-received. It is anticipated that this method of outreach will definitely be initiated in over 6 programs throughout the country. See Evalution Section (below) for details on positive feedback, and potential implementation of presentation concepts by programs throughout the U.S.	
Target Small gardening businesses	NPDES Permit, Provision C.4, C.9 & Pest Mgt Plan (PMP)	I. Training staff of small gardening businesses (Work within Program's Watershed Education and Outreach group and sub-groups)[1] Continue to assist with development of strategy started in FY06-07 to implement a campaign & training program (in Spanish & English) designed to elicit participation of staff from very small landscape businesses (typically 1-8 employees) often serving homeowners. Help fund and/or support campaign locally.	WVCWP staff participates in WEO. WVCWP Program Manager participates in the IPM Ad Hoc Task Group on behalf of the WVC. Project implementation and projects for consideration, which are discussed in the AHTG, are presented to WVC staff for appropriate follow-through. In FY 08-09, WVCWP staff were involved in meetings aimed at developing coordination between the "Bay Friendly" program, and the "Green Gardeners" program. In FY 08-09, WVCWP offered funding for 6 scholarships to reduce the cost of the Green Gardener class to attendees (enough for 6 reduced fee scholarships). To promote use of the trainees from the Green Gardeners program, WVCWP sent a Press Release to local newspapers in Campbell, Los Gatos & Saratoga.	WVCWP Mgr in cooperation with SCVURPPP's Pi/P sub-groups

[1] Funded by all Co-permittees each year.

			A 630 word article, including a photo, about the Green Gardeners program was published. The article promoted both the classes (for anyone interested in enrolling) and promoted local companies which employ Green Gardeners graduates – so that residents could contact and utilize these graduates.	
Target 16-24 yr-olds for Anti-litter messages & behavior changes	Trash Advisory Committee	m. Trash Advisory Committee (TAC) Continue to participate in development and implementation of a campaign targeting 16 to 24 yr-olds for anti litter messages to elicit changes in behaviors. Support and implement campaign locally. (Ref Section 7 of this work plan; Watershed Education & Outreach Campaign)	The "TAC" was renamed 'Silicon Valley Anti Litter Campaign (SVALC). WVCWP staff attended "General Core Group" and the "Education Sub-Group". In early FY 08-09, WVCWP staff were involved in developing a slogan and website for this campaign. WVCWP staff researched slogans in other states & programs, interviewed males in the target age group, and researched web site options. Notes were presented to group. A subset of the SVALC/ WMI Trash Sub-Group has been meeting to try and begin a new 'trash action group'. WVCWP staff have started attending these meetings; current goals are to develop a focus and action plan.	WVCWP staff in cooperation with SJ & SCC Trash Advisory Committee
			CAMPBELL Campbell Public Works Director has been meeting with a subset of the SVALC/ WMI Trash Sub-Group to try and begin a new 'trash action group'. City of Campbell staff attends the Great American Pick Up Implementation Group. Meetings are held leading up to the Great American Pick Up event, which Campbell participates in.	
Additional Outreach	Cross Ref. Sections 7-10 of this Work	n. Outreach Activities for Specific Pollutants See Sections 7 through 10 of this Work	**HIGHLIGHTS** **PESTICIDES** WVCWP staff developed and put together packets of	WVCWP Staff

	Plan	Plan, for additional Public Education and Outreach activities related to specific pollutants of concern.	native seeds for beneficial bugs, to partner with IPM printed material. See below: "Additional Task". Articles on elimination and disposal of diazinon/ chlorpyriphos and on less-toxic pest management were printed in the municipal newsletters for each WVC. A press release on the Green Gardeners program was submitted to local weekly papers and resulted in a 630 word article promoting less-toxic pest control. WVCWP contributed funding for IPM-message ads which ran in the weekly papers. **COPPER** Car Wash Kit flyers, and information on the need to use a Kit for car wash fundraisers, was distributed to staff at 31 schools. A pilot piece with Car Wash Discount Card was developed for residents. See below: "Additional Task". The Car Wash Kit was publicized in the context of a WVCWP article in the 3 weekly newspapers (Feb. 09). Further discussion with the paper in June 09 resulted in a short article on the Kit in July 09. **MERCURY** An article on proper TV disposal was developed and published in several of the municipal newsletters, prior to the switch to digital TV. **TRASH** WVCWP staff developed graphics and messages for an "Anti-Litter" mug. 230 mugs were purchased; 80 of these were for the City of Saratoga which distributed them to staff to help reduce litter, and to publicize the anti-litter message. The remaining 150 mugs were distributed by WVCWP through various events and outreach activities. (see Trash, "Additional Task"	

			below) WVCWP gave out 15 re-usable grocery bags, and began researching the possibility of purchasing re-usable bags, with an anti-litter message, for use as outreach pieces in FY 09-10.	
Additional Outreach	Cross Ref. Sections 7-10 of this Work Plan	n. Outreach Activities for Specific Pollutants Additional Task – Create Outreach Materials	**NEW IPM Outreach Material** In FY 08-09, WVCWP devoted staff time to a new campaign: creation and promotion of a new outreach product with the intent of providing material that would be desirable to residents, and which could be attached to printed information, to encourage residents to pick up and read the printed info. Staff purchased seeds of pest-resistant CA Native plants, which attract "Beneficial Bugs". Staff created envelope labels with graphics, planting information, and pest info for the seeds seeds – Attachments – *Seed Labels*). WVCWP partnered with stakeholders (local Sierra Club members) to apply the labels to envelopes, and fill them with the bulk seeds. A total of **599 seed** packets were distributed via WVCWP in FY 08-09. The seeds were promoted via articles in WVC municipal newsletters, including photos of beneficial bugs. The articles resulted in a total of 24 seed packets sent out due to resident requests. At events, the seed envelope/printed material packets appeared to be popular. Distribution was as follows: Sierra Club: 150 (will be distributed at events, such as Earth Day)	

			Campbell's Great American Litter Pickup: 100 Saratoga Rec Dept. Gardening Class: 100 City of Saratoga Arbor Day: 25 Yamagami's Garden Center: 50 St Mary's School (Enviroscape Presentation) 1/09: 35 St Mary's School (Enviroscape Presentation) 5/09: 30 Sedgwick School "Discovery Day" Enviroscape: 90 Calls from residents: 24 **Total: 599** Details are listed in the "Evaluation" row at the end of this table (below).	
Additional Outreach	Cross Ref. Sections 7-10 of this Work Plan	n. Outreach Activities for Specific Pollutants Additional Task – Create Outreach Materials	**NEW Copper Outreach Material** A pilot piece with Car Wash Discount Card was developed for residents. The Car Wash/ Copper brochure contained a Car Wash Discount Card (developed by Watershed Watch) and a list of participating commercial Car Washes, along with info about copper and toxicity. However, the piece was developed shortly before that particular Car Wash Discount Card was due to expire, so a minimal number were produced (via inkjet printer). WVCWP will evaluate whether to update and re-print the piece. The goal is to provide residents with printed materials that involve a useful item (such as the discount card) which will encourage people to read the attached stormwater pollution messages.	
		n. Outreach Activities for Specific Pollutants Additional Task – Create Outreach	**NEW Anti-Litter Outreach Material** WVCWP staff developed graphics and messages for an "Anti-Litter" mug. Graphics including representation	

		Materials	of a creek, and the message "Clean Creeks… It's In Our Hands – Save a Cup". WVC and WVCWP were listed on the mug, with WVCWP logo and web site address. (See Attachment – Mug Graphics) 230 mugs were purchased; 80 of these were paid for and used by the City of Saratoga which distributed them to staff to help reduce litter, and to publicize the anti-litter message. The remaining 150 mugs proved to be very popular and were distributed by WVCWP through various events and outreach activities. <u>MUGS DISTRIBUTED</u> *ICID Training March 9th- 11 mugs given to municipal staff *WVCWP hosted a SCVURPPP Training - 10 mugs given to attendees <u>*Los Gatos Open House May 2009</u> - St. Mary's School: 9 Mugs to parents & teachers -Evergreen Elementary: 5 mugs to parents & teachers - Approx. 10 mugs to Los Gatos and WV Sanitation District staff * Calabazas Creek Cleanup March 2009 (Saratoga) - 18 mugs to volunteers *5 mugs to City of Monte Sereno Employees *WVCWP Annual Streets and Storm Drains Training- 8 mugs to attendees and presenters. *National Rivers Cleanup Day- approx 18 mugs to volunteers *Watershed Presentation at Vacation Bible Camp in Campbell June 2009 - 5 mugs to teachers/ counselors	

			*St. Mary's School Enviroscape presentations – 6 mugs to teachers	

Public Information/Participation Program EVALUATION – WVCWP PROJECTS

RESULTS for WVCWP PRESENTATION "A Stormwater Campaign in Cartoons" at EPA NT'L CONFERENCE – MAY 2009

EPA's National Conference for Non-Point Source & Stormwater Outreach - Portland OR

WVCWP responded to a request for abstracts presenting successful, low-budget public education campaigns.

WVCWP's presentation showcasing use of cartoons for dissemination of stormwater messages was accepted as a training session at the conference. WVCWP staff created and delivered the PowerPoint presentation.

Attendees: Appx 80-90 stormwater professionals from around the US and US Territories chose to attend this presentation.

No feedback was solicited by, or was provided by EPA to, WVCWP – however, a number of participants made the effort to contact WVCWP and provide positive feedback:

Feedback: 11 people took the initiative to approach WVCWP staff in the 24 hours after the presentation and expressed appreciation for the information conveyed.

Implementation: 6 stormwater programs approached WVCWP staff later in the conference, and declared that they **will** try this concept in their own outreach efforts

Areas which plan on following concepts outlined in WVCWP's presentation:

- Sustainable Business Coordinator *for* Environmental Coalition of South Seattle (NGO which is contracted by municipalities to work with businesses and schools -- distributes spill kits, provides public education, etc. throughout western Washington)
- Stormwater Educator *for* Muncie Sanitary District, Delaware County Stormwater Management, IN
- Water Resource Educator *for* East Metro Water Resource Education Program (Eastern Minnesota)
- Surface Water Plan Educator *for* Washington State Univ. Extension, Jefferson County, WA
- Stormwater Education Coordinator *for* State of KY MS4s Kentucky Environmental Education Council & Kentucky Transportation Cabinet
- Community Relations Specialist *for* City and County of Honolulu, Department of Environmental Services

****

RESULTS for CREEK CLEANUPS

SAN TOMAS AQUINO CREEK CLEANUP @ WESTMONT HIGH SCHOOL EVENT SUMMARY

Saturday September 20th, 2008: In conjunction with International Coastal Cleanup Day

Summary of Survey Completed by Volunteers

(Based on 15 volunteer response sheets)

Most common pieces of trash collected: Cans, bottles, cigarette butts, paper, and food wrappers.

Least common pieces of trash collected: Plastic, rubber.

Most unusual pieces of trash collected: Home-made rocket from plastic bottles, dollar bills.

WVCWP Contributions:

WVCWP provided Trash Tally Sheets with clipboards, Litter Grabbers, and gloves & trash bags (via the Clean A Creek Action Group)

Approximately: 15 recycled shopping bags , juice drinks, and snacks (donated by Whole Foods of Campbell) 10 T-shirts (donated by WVCWP)

Results:

16 volunteers worked at the cleanup for 4 hours each. At a minimum wage of $8.00 an hour this would have cost $512 in temporary labor.

120 lbs of Trash was collected

170 lbs of Recyclables were collected

Total Collected= 290 lbs

Volunteer Feedback:

The Girl Scout troop which volunteered was made up of Scouts from other communities outside the WV area; the troop leader expressed appreciation that this site was very well-organized (compared to other sites where the troop has volunteered).

The Troop Leader stated that they hope to participate in WVCWP cleanups in the future.

CALABAZAS CREEK CLEANUP IN SARATOGA

March 22nd, 2009

A Church group approached the City, asking to do a Clean-up

WVCWP arranged the site for them w/ SCVWD, and provided litter grabbers, trash bags and gloves

WVCWP & City of Staff supervised – Saratoga's Mayor also participated

17 volunteers attended

Summary of Survey Completed by volunteers.

Most common pieces of trash collected: Plastic bottles, food wrappers, paper.

Least common pieces of trash collected: Plastic, rubber.

Most unusual pieces of trash collected: Orange construction cone, part of a car's exhaust.

WVCWP contributions: 18 Stainless WVCWP Mugs

Results: Approximately 15 bags of Trash.

Total: estimated 500lbs – includes several heavy metal objects

SACRED HEART SCHOOL CLEAN UP (K-8) – Saratoga (the school includes students from all WVC)

April 29, 2009

The cleanup took place on school grounds, inside the cyclone fencing, overlooking Wildcat Creek

Sacred Heart School organized the cleanup, based upon previous events held together with WVCWP.

WVCWP contributions: WVCWP staff provided litter grabbers, gloves and trash bags.

Results: Appx 60 lbs of trash were collected.

GREAT AMERICAN LITTER PICKUP - CITY OF CAMPBELL

April 18, 2009

Volunteers were instructed in use of Tally sheets, and were provided with clipboards, etc. Working in groups, volunteers were able to pick up trash and carry out trash monitoring.

160 Volunteers participated, working for four hours.

PW figures that at at minimum wage of $8.00 per hour that works out to $5,120 worth of temporary labor.

Litter was picked up from 5 sites, including the Los Gatos Creek Trail and the Los Gatos Creek County Park.

Results:

35 Bags of recyclables (cans/plastic/glass & paper) were collected

145 Bags of trash were collected

Publicizing done for the event was very successful, as shown by the fact that 160 volunteers participated.

SARATOGA CREEK AT BIG BASIN WAY CLEANUP – CITY OF SARATOGA

May 26, 2009

This Cleanup was organized by City of Saratoga staff

WVCWP contributions: WVCWP staff provided litter grabbers, gloves & bags.

The Cleanup involved parking lots between Big Basin Way businesses and the creek, and the top of the creekbank along Saratoga Creek

Participants included City of Saratoga Staff with the Saratoga Elementary School Student Council and a teacher (9 volunteers).

Results: 10 bags of garbage were collected; City staff evaluated the area as much cleaner than in previous years.

SAN TOMAS AQUINO CREEK CLEANUP @ WESTMONT HIGH SCHOOL EVENT SUMMARY

Saturday May 16, 2009: In conjunction with National River Cleanup Day

WVCWP hosted a Cleanup Event at the site where it has regularly hosted this event.

Volunteers were instructed in use of Tally sheets, and were provided with clipboards, etc. Working in groups, volunteers were able to pick up trash and carry out trash monitoring.

Distance cleaned was appx. 1.5 miles

Summary of Surveys Completed by Volunteers

(Based on 15 volunteer response sheets)

Most common pieces of trash collected: Plastic/styrofoam, bottles, cigarette butts, paper, and food wrappers.

Most unusual items found: Baseball glove in good condition, Tires

WVCWP Contributions:

WVCWP provided Trash Tally Sheets with clipboards, Litter Grabbers, and gloves & trash bags (via the Clean A Creek Action Group)

Results:

15 volunteers worked at the cleanup for 4 hours each.

400 lbs of Trash was collected

80 lbs of Recyclables were collected

Total Collected= 480 lbs

PUBLIC INFORMATION/PARTICIPATION

West Valley Communities: Campbell, Los Gatos, Monte Sereno, Saratoga

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2008-2009 ANNUAL REPORT

CREATE NEW OUTREACH MATERIALS

Due to problems with persuading residents to pick up printed material, WVCWP has searched for means of attracting interest in printed materials. An effort was made to find "desirable" items to incorporate with printed materials, which would encourage residents to pick up and read the information when they pick up the item.

New efforts with this theme included:

--Staff created a Car Wash/ Copper brochure, with Car Wash Discount Card and list of participating commercial Car Washes

--Staff developed graphics for, and ordered, 230 mugs with an anti-litter message: "Save a Cup – Clean Creeks, It's In Our Hands"

--Staff developed graphics for, ordered and packaged a set of seeds for 4 different pest resistant native plants, to attach to "less toxic" gardening materials and to encourage residents to take the printed information.

Response to these items has been much better than trying to distribute printed materials alone. WVCWP will continue to investigate means of incorporating this concept into outreach materials.

Following this theme, in FY 08-09, WVCWP also investigated the feasibility of purchasing re-usable grocery bags, for use in conveying information about litter/ trash problems. Minimum order requirements for this type of item are fairly large, so purchasing these bags will take a large budget commitment, or cooperation with other entities. WVCWP has been looking into cooperation with other entities, and will see whether this bears any results in FY 09-10.

The City of Saratoga invites you to attend the

Village Streetscape Improvement Meeting #2

Monday, February 2, 2009 @ 6:30 p.m.
Saratoga Senior Center – 19655 Allendale Avenue, Saratoga

The City has received a grant from the Santa Clara Valley Transportation Authority to improve patron safety along Big Basin Way, taking into account the unique and historic environment of the Village. Primarily, work will be focused on pedestrian safety improvements and beautification of the Village. This is the second meeting at which members of the public will get to share their thoughts on improvements to the Village Streetscape and review conceptual drawings developed by Gates & Associates.

Planned improvements include pedestrian bulb outs, crosswalk in-pavement lighting, hanging plant baskets, irrigation, sidewalk improvements, streetscape furniture, and more!

For more information, please contact Macedonio Nunez with the City of Saratoga at mnunez@saratoga.ca.us.

Digital Television Transition

It is hard to miss the many advertisements announcing the transition to digital television. This year, all broadcast television stations in the U.S. will switch from analog to digital broadcasts.

Residents opting to buy a new digital television rather than a converter should be aware that it is illegal to throw away a television in California. Televisions contain metals such as lead, mercury, and cadmium that leak from landfills to contaminate California's precious waterways.

Check for local E-waste events or take advantage of West Valley Collection & Recycling's (WVCR) free E-waste recycling service. For more information, call WVCR at (408) 283-9250.

Mobile Emergency Calls

Calls to 9-1-1 from mobile phones in Saratoga now go directly to the Sheriff's Office! Most 9-1-1 calls from mobile phones used to go to the California Highway Patrol emergency call center before getting routed to local law enforcement agencies, which occasionally caused delays in response times.

A Big Thank You to Monte Sereno

Saratoga residents have Monte Sereno to thank for some of the City's latest park improvements. On October 21st, the Monte Sereno City Council voted unanimously to give Saratoga $40,000 in State Park Bond funds to pay for the expense of installing a new bocce ball court at Kevin Moran Park and a petanque court at Azule Park. Local park lovers will appreciate this generous donation for years to come!

Spring 2009

Sustainable Saratoga

The City of Saratoga has made the urban canopy a top priority, which helps keep the community sustainable. Trees perform critical ecological functions, such as filtering storm water and breaking down harmful pollutants, that protect Saratoga's environment.

Last year, the City planted 50 trees and treated more than 400 trees. Additionally, Saratoga was recognized as a Tree City USA-a special award given to cities that have demonstrated dedication to the urban forest;

Trees are one of the many ways Saratoga is promoting sustainability. In this issue of *The Saratogan* learn more about what is beillg done to keep your City sustainable.

•• Garage Sale •• Residents playa critical role in diverting waste from landfills by recycling, composting, and other reduction techniques. This year, the City is making it easier to reduce waste through a community garage sale, which will help residents sell unwanted items instead of disposing them. Read more below .

•• Water Conservation •• Many California cities face the possibility of water rationing and the effects of below average rain levels. Conserving water now helps protect precious water resources. Read about water conservation tips on page 2.

•• Environmentally Friendly Park Management •• There are many ways to adopt environmentally friendly practices, including the ways in which landscaping is maintained. Turn to page 2 to see how Saratoga parks are sustainably managed.

C'ommUnity ~ Garage Sale

Springing into Summer Garage Sales

This summer residents have the opportunity to reduce waste and earn some spare change during the city-sponsored community garage sale. This event will take place on August 8, 2009 with registration starting in June 2009. The City will provide free citywide advertising, a listing of garage sale locations on the website, garage sale tips for those who register, and donation collection sites for unsold items and electronic waste.

93

The Saratoga annual cleanup is scheduled for July 13, 2009 - September 18, 2009. Specific dates and information will be mailed to residents.

Water Saving Tips

This marks the third consecutive year of drought conditions in California. Conserving water supplies is essential to the sustainability of Saratoga and other cities in the Bay Area, which is why the Santa Clara Valley Water District has called for mandatory water rationing this summer. Residents playa key role in this effort; here are a few simple changes residents can make to help preserve water resources:

- Installing water-efficient appliances and fixtures. Up to 18 gallons of water a day can be saved by using a high-efficiency washing machine.
- Replacing high-flow showerheads and toilets with low-flow fixtures will save as much as 16 gallons of water a day.
- Using drip irrigation and mulch around landscaping can save 40 - 55 gallons of water each day.

Visit http://www. valleywater.org/ conservation for more tips and information.

Savor Saratoga

Sustainability is about more than just the environment. It is important to ensure Saratoga has a sustainable business environment. Supporting the local economy is as easy as buying from Saratoga businesses. Remember—stop, shop, and savor Saratoga.

Keeping Green Parks "Green"

The City of Saratoga's Department of Public Works is doing its part to create a sustainable Saratoga. While many park management plans call for spraying entire parks with toxic chemicals, Saratoga uses less toxic products and minimizes their use by focusing control only in areas with weeds. This means residents can enjoy healthier parks throughout the City.

Azule Park in Saratoga

Grass requires constant maintenance, from regular mowing and watering to replacing worn areas with fresh turf. By replacing worn grass areas in El Quito and Congress Springs parks with decomposed granite paths, Saratoga is reducing its water usage by over 500,000 gallons a year! The new paths allow rainwater to soak through and do not require fertilizers, pesticides, weed control, or mowing.

Participating in the ceremonial planting of a tree on Arbor Day are (from left) Jim Stallman, a member of the pedestrian, equestrian, bicycle and trails committee; council members Jill Hunter, Howard Miller and Susie Nagpal; Tom Soukup, chairman of the parks and recreation commission; and Mayor Chuck Page.

City observes Arbor Day by planting a blue oak tree in Beauchamps Park

By BRIAN BABCOCK

Close to thirty small bells rang out as Saratoga residents, council members and city staff helped bless a blue oak tree, which was planted at Beauchamps Park as part of the city's Arbor Day celebration.

"My blessing for this tree is that it will receive all of the wonderful help and care and kindness from the community, so that it will grow to be a huge blue oak tree that we can dance and sing around," Saratogan Betty Peck said at the tree planting ceremony.

Guests watched as Saratoga City Council and Parks and Recreation Commission members "planted" the tree, which was donated to the city by PG&E.

This oak "is definitely a wonderful tree that will be good for many, many generations down the road," said PG&E forester Chris Hughes, adding that his company has a "love-hate" relationship with trees.

Mayor Chuck Page also unveiled a plaque that read, "Arbor Day 2009."

"One of the reasons I moved to Saratoga was because of the trees," said Page, who told a story about growing up in Oakland, N.J.

"We cherish our trees [in Saratoga]," said Page, adding that during his time on the Saratoga Planning Commission was spent at times protecting the trees that the city has. "So any chance we have to plant a new one is a wonderful thing," he told the crowd.

Those attending the event received a seedling that they could plant at home. PG&E also had a model showing what trees fit under power lines and what did not.

Councilwoman Jill Hunter, who said that people might know her as the "tree lady," said that when her children were young and had a nightmare she would calm them down by telling them to think of their grandfather's tree in Vermont that they would swing from.

"I'm so grateful for the trees we have and the joy that they bring us," Hunter said.

Fishing

Continued from page 10

What started 18 years ago as a way for youngsters to connect to an old pastime has turned into somewhat of a spectacle, Gates said.

"We're amazed at how many kids in Santa Clara County who have never fished, and that's partly because we don't really have a lot of access to fishing places," Gates said. "But now we have people coming back year in and year out."

The 18th annual Kids Free Fishing Days take place on May 2 and 3, from dawn to dusk, at the Campbell Percolation Ponds, 1250 Dell Ave. For more information, call 408.970.8578 or visit www.kidsfreefishing.com.

Saratoga Mayor Chuck Page (left) talks to Daryl Lupretta, owner of Lupretta's Delicatessen on Big Basin Way, about switching from Styrofoam takeout containers to something more environmentally friendly.

Mayor asks restaurant owners to get rid of all the Styrofoam

Page pushes the use of paper products

By Brian Babcock

Making a change for tomorrow means putting in the work today.

That's just what Saratoga Mayor Chuck Page has done as he has gone from restaurant to restaurant in the city asking businesses who use polystyrene containers to rethink their choice.

Polystyrene, better known as Styrofoam, is a popular choice for takeout containers and cups due to its cheap price. Polystyrene does not biodegrade, and most polystyrene products are not recycled due to a lack of places for consumers to discard them.

The substance has been banned in Oakland, San Francisco and Santa Cruz County. Page said he'd rather not have to put an ordinance through banning polystyrene because it can take up city staff's time and resources. He did say he will push for an ordinance in the future if he feels it's best for the city.

"It would be good to get that kind of stuff out of the waste stream," Page said. "If we don't use it at all, then we won't have to worry about it and it won't be a problem."

Page said he'll receive help from members of the West Valley Green Leaf Committee and the Saratoga Chamber of Commerce, who will assist in meeting with business owners and educating them on the negative effect the substance has on the environment.

Going from polystyrene to more environmentally friendly containers, such as those made with paper products, can cut somewhat into the businesses profits, Page said.

"It's a little difference in price, and that could mean a lot to a small business, especially today," Page said.

Daryl Lupretta, owner of Lupretta's Delicatessen on Big Basin Way, said that he will stop using Styrofoam containers once he uses up his inventory. Lupretta said he tries to keep the use of the product to a minimum and added that it would be too costly to change to another product if his restaurant used it more often.

"Going that route would mean passing that cost off to the consumer, and we don't want to do that," he said.

Tarek Eljarrari, owner of Planet Juice in the Village, said that the main thing keeping him and his business partner from switching to more "green" products is cost.

Planet Juice uses recyclable Styrofoam cups, and Eljarrari said that he lets customers know that they can bring in their own cups if they like. He said he has had only one customer refuse to use one of Planet Juice's cups.

"It was part of our plan to move away from Styrofoam," Eljarrari said. The problem is that the business is not in a financial position to make a change that would cut into its bottom line.

"We're a struggling business," he said. "We're in a survival mode right now."

Eljarrari said he is still open to speaking with Page and would try and see if there is a possibility that businesses and the city can work in collaboration on this issue.

Get Ready for Saratoga's Annual Cleanup!

West Valley Collection & Recycling (WVCR) cleanups between July 21st – September 26th, hold a garage sale to prepare!

The annual cleanups are quickly approaching, so start planning now. Have items you don't want, but are still in good or usable condition? Hold a garage sale! Here are some tips:

- *Buddy Up*—hold a joint garage sale with neighbors
- *Spread the Word*—advertise in the local paper
- *Create Curb Appeal*—clean sale items & display attractively
- *Offer Incentives*—offer a free bottle of water with a purchase or 2-for-1 deal
- *Make it Easy*—organize items by sale price & clearly mark prices
- *Keep it Clean*—take down all garage sale signs when the sale is over

Garage sales help reduce the amount of materials sent to landfills and unsold items can be donated to a charitable organization for a tax deduction. Next year, keep an eye out for a citywide garage sale organized by the City of Saratoga before the next cleanup season!

Cleanups will be conducted on a neighborhood by neighborhood basis and notices will be sent 2 weeks in advance of cleanup date. For more information, call WVCR at (408) 283-9250.

The Saratogan
Winter 2009

Finding Renewal in Saratoga

In October 2008, the City of Saratoga celebrated the groundbreaking of Joe's Trail at Saratoga DeAnza. This new 1.6 mile pedestrian and bicycle trail will run between Saratoga-Sunnyvale Road and Saratoga Road on the PG&E right-of-way located adjacent to the railroad corridor in the City. For years, residents have enjoyed walking their dogs, bicycling, and running along the path next to the railroad tracks. Thanks to a generous donation from Saratoga resident Dee Sanfilippo, who provided funding for the trail on behalf of her late husband, Joe, an official trail will be built.

Development of the trail embodies a process of renewal. This path, once cherished by Sanfilippo's husband, will be transformed into a formal trail and added to the City's expansive trail network that helps to keep Saratoga residents active and connected.

Examples of renewal can be found throughout the City. Read more about them in this issue of *The Saratogan.*

Communi tv Event Calendar: Saratoga's community events are a great way to escape the daily grind and recuperate. These wonderful events, which keep the community unified, are now a little easier to find with the City's new online community calendar. Read about this new calendar below.

Kevin Moran Park: Since the 1970s, Kevin Moran Park has been one of Saratoga's most treasured parks and is now being renovated. Turn to page 2 for more!

Community Development Block Grant (CDBG) and Community Grant Programs: Each year, CDBG and community grants are allocated to organizations that offer a new beginning to Saratoga residents during times of need. More information is on page 2.

Groundbreaking at Joe's Trail at Saratoga DeAnza

Get Connected!

Need to know what's happening in Saratoga? Just visit www.saratoga.ca.us/events.html to get the latest information about public events.

The new community calendar is powered by Artsopolis, a regional non-profit established in 2000 to promote local arts and culture events. sinceA 2000, Artsopolis has become the most widely used online event calendar in Silicon Valley.'

Saratoga's community calendar will feature events that are open to the public (whether free or for a charge) which are located within the 95070 zip code. To add events to the calendar, simply fill out the online submission form that is available on the Saratoga calendar and at www.artsopolis.com. Visit the Saratoga community calendar today to get connected with the Saratoga community!

A Helping Hand in Saratoga

Each year, the City of Saratoga has the opportunity to provide funds to organizations that help the City's neediest residents through the Community Development Block Grant (CDBG) program. This program is funded by the U.S. Department of Housing and Urban Development to address the needs of lower income and special needs residents.

The City is expected to receive close to $133,000 in CDBG funds. Approximately $32,000 is available in the public service category, which is typically allocated to social services agencies. Last year's recipients included:

- Saratoga Area Senior Coordinating Council's adult day care program
- West Valley Community Services' community assistance program that offers low income residents food, rentals, and utility services in times of need
- Catholic Charities of San Jose's Long Term Ombudsman Program that aims to improve the quality of life for residents of assisted living facilities

Saratoga Area Senior Coordinating Council luncheon

Anoth~(portion ofthe CDBG funds, about $72,000, is set aside for the non-pUblic service category. This money is used by the City to upgrade facilities to meet accessibility requirements. In past years, the City has allocated the non-pUblic service category monies to equip traffic signals with audio cues for the visually impaired and install fully accessible seating in the Civic Theater.

In addition to the CBDG Program, the City has recently created a Community Grant Program. This year, $52,000 will be available for community based non-profit organizations that serve Saratoga.

Applications for both the CDBG and Community Grant programs were due by January 20, 2009. The Council will discuss the applications in February and make a decision in early March. For more information, contact Cynthia McCormick at cmccormick@saratoga.ca.us or (408) 868-1230.

The park is named in memory of Kevin Moran, a Saratoga resident and University~of California Santa Barbara student, who was killed during a riot in Isla Vista in April of 1970. Almost forty years later Saratoga residents honor his memory every day by playing and relaxing in the park that bears his name.

The renovations are expected to be complete by summer 2009. For more information about this project, please contact the Public Works Department at (408) 868-1239.

Meet the Youth Commission

Of the six commissions in the City of Saratoga, the Youth Commission is by far the largest and its members are the youngest. This sixteen-member commission is composed of teens from a wide range of backgrounds who share an interest in government and leadership. In their roles as commissioners, they advise the City Council on teen issues, represent the interests of Saratoga's youth, and work to get teens involved in the community.

Lett to right: Statt Liaison Adam Henig, Sangita Annamalai, Kayvon Rezaii, Sammy Rao, Kia Fariba, Natalie Tkalcevic, KaiWn Finch, Corey Rateau, Elena Rees, Tara Fatemi, Jacob Baker, Justin El-Diwany, Lauren Tang, Tittany Tseng, Aditya Dev, Cynthia Zhao, and Sameer Kausar.

The Youth Commission meets on the second Tuesday of every month at 7:00 p.m. at Saratoga City Hall, located at 13777 Fruitvale Avenue. Meetings are open to the public and teens interested in youth issues or in applying to join the commission are encouraged to attend. For more information, visit www.saratoga.ca.us/boards-commissions/youth/.

Ask Jana

Got Code Enforcement questions? Ask Jana! Send your questions to Jana Rinaldi at 13777 Fruitvale Avenue, Saratoga CA 95070 or by email to jrinaldi@saratoga.ca.us.

Dear Jana,

Every Saturday, my neighbor has his yard maintained by a landscape company. When the landscapers are done with their work, they leave the yard waste bin out on the street. Our garbage collection day isn't until Wednesday. Is my neighbor allowed to leave his yard clippings out from Saturday to Wednesday?

Grass Can Gran

Dear Grass Can Gran,

There are a couple of rules related to garbage, recycling, and yard waste containers that are important to remember.

- *Garbage cans be placed at the curbside after 12:00 p.m. on the day before your garbage collection day.*
- *Garbage cans must removed from the curbside by 12:00 p.m. on the day after your garbage collection day.*
- *At all other times, garbage, recycling, and yard waste containers may not be within public view. That means containers may not be stored in the front or side yard and need to be fully screened from public view by a fence, wall, landscaping, or some other structure.*

Jana

Dear Jana,

I was at Congress Springs Park on a Tuesday afternoon and noticed a woman with two dogs that were off-leash. I thought all dogs needed to be on a leash in the City's parks. Can you tell me what the Code says about off-leash dogs?

Day Tripper

Dear Day Tripper,

You're right, dogs must be on a leash that is no more than six feet in length while in a public place-including our parks. A $75 fine can be issued to owners who have their dogs off-leash in parks and other public places.

Jana

044815

Conceptual website design

New City Website Coming Soon!

Finding important information and conducting City business online will be even easier this summer! Earlier this year, the City began working with Civica Software to develop a new website with a focus on user convenience.

Residents can expect the new City website to reflect Saratoga's natural beauty, feature easy to use navigation tools, allow users to find needed information and resources more quickly, and offer interactive tools, such as email subscriptions.

For more information, contact Crystal Morrow at cmorrow@saratoga.ca.us or (408) 868-1275.

Ask Jana

Got Code Enforcement questions? Ask Jana! Send your questions to Jana Rinaldi at 13777 Fruitvale Avenue, Saratoga CA 95070 or by email to jrinaldi@saratoga.ca.us.

Dear Jana,

There is a car parked in front of my house, which has been there for three days. I am concerned the vehicle has been abandoned. Are there any City regulations that prohibit this car form being parked in front of my house?

Parking Problem Paul

Dear Paul,

Parking on the street is open to public use, unless marked as a special parking zone. If a vehicle has been parked on a street that is not marked as a special parking zone for more than 72 hours then it can be reported to me at (408) 868-1214 or jrinaldi@saratoga.ca.us. Be sure to report the vehicle location, make, model, color, and license plate number. I will then post a notice on the vehicle indicating that it will be towed in 72 hours if not moved.

Jana

Dear Jana,

I was driving down Saratoga Avenue on a Saturday afternoon and noticed a bunch of real estate signs at the signals. I thought it looked a little ridiculous and I would like to know if there are rules that regulate open house signs.

Sign Investigator

Dear Sign Investigator,

There are several rules in the City's Municipal Code that regulate real estate signs.

- *Real estate signs are not allowed on medians.*
- *The City allows up to one sign for an open house to be displayed in any given intersection.*
- *Open house signs can be displayed until 6:00 p.m. during winter and until 8:00 p.m. from spring to fall.*

If any sign is in violation of City regulations, then I will remove it. A $20 fee is charged for retrieval of the sign. If you see any signs that are not in compliance with our Municipal Code, you can contact me at (408) 868-1214 or jrinaldi@saratoga.ca.us to report the signs.

City Business License Audit

Are you a business owner in Saratoga? Did you know Saratoga's Municipal Code requires companies doing business in Saratoga to register and obtain a business license from the City?

The City has hired MuniServices, a finance services firm, to conduct a comprehensive business license audit and contact unregistered businesses. The purpose of the audit is to apply the business license code equitably and educate business owners about the requirements of the City's ordinance.

For more information, contact the City's MuniServices representatives at their toll free number (800) 987-0999 or by fax at (559) 275-0289. Business license applications can be found on the City's website at www.saratoga.ca.us/onlineforms.html under "Business License Forms".

Attention Neighborhood Groups!

The City Council will hold the second annual Homeowner and NeighborhoodAssociations joint meeting on June 17, 2009 at 5:30 p.m. in the Joan Pisani Community Center. For more information or to register, contact Debbie Bretschneider at debbieb@saratoga.ca.us or (408) 868-1216.

Celebrate Trees, Participate in ArbopDay :: *April 24, 2009 at 1:30 p.m. in Beauchamps Park, located at Beauchamps Lane and Bowhill Court* - Residents are invited to enjoy refreshments, help plant an oak tree, learn more about how trees keep Saratoga sustainable, and take a seedling to plant at home. For more information, visit www.saratoga.ca.us.

Summer Camps Get A New Look

Even though its only spring, it's not too early to start planning for Summer Camps! The Recreation Department is excited to present a re-vamped program that offers more flexibility, affordability, and increased activities for the participants. With a new weekly format, parents can sign up for a single week rather than a two-week session. Camps include a new Discovery Camp for older children (8-10 years) that focuses on science projects and will offer a weekly field trip (e.g. the new California Academy of Sciences). The popular Nature & Camp Caterpillar Camps will be returning and will include an array of eco-friendly activities. The Adventure Camp (8-10 yrs), Teen X-treme Adventures (11-14 yrs), and Leader-in-Training program (13-16 yrs) will also be held this summer. Sign up now at www.saratoga.ca.us/recreation or call (408) 868-1249 for more information.

Happy Saratoga Summer Campers

Got ideas for The Saratogan? Send story ideas or comments to Crystal Morrow at cmorrow@saratoga.ca.us or (408) 868-1275.

Claire Water

West Valley Clean Water Program

Stop by one of Saratoga's commercial car washes where dirty water is recycled and cleaned, visit www.mywatershedwatch.org for car wash coupons or information on keeping our water clean.

Ask Jana

Got Code Enforcement questions? Ask Jana! Send your questions to Jana Rinaldi at 13777 Fruitvale Avenue, Saratoga CA 95070 or by email at jrinaldi@saratoga.ca.us.

Dear Code Enforcement,

The other day I noticed my neighbor is putting up a new fence in her front yard. Does the City allow a fence to be built in a front yard? How tall can a front yard fence be?

Sincerely,
Fenceless Next Door

Dear Fenceless,

If your neighbor lives within the city limits of Saratoga, she can install a fence in the front set back area of her property, as long as it is no taller than three (3) feet. Permits are not required for front yard fences that meet these requirements.

Jana

Dear Jana,

I just moved to Saratoga and I have a wonderful dog who's been in our family for 5 years now. Am I required to license him? What about other pets?

Signed,
To License or Not

Dear License or Not,

Welcome to Saratoga! Here in the City of Saratoga we do require licenses for dogs and cats. There are some exceptions, including:

- *Dogs & cats that are less than 120 days old;*
- *Dogs & cats that were vaccinated and licensed in another jurisdiction and the license is still in effect;*
- *Dogs & cats owned by a nonresident who is in Saratoga not more than 30 days in a 12-month period;*
- *Dogs & cats temporarily in Saratoga for an event, show, or exhibition scheduled not more than 15 days after arrival;*
- *Dogs & cats for sale in a duly licensed pet shop or kennel;*
- *Dogs used for the purpose of leading persons with defective eyesight or hearing and dogs used by law enforcement agencies.*

Licensing applications are on the City's website at www.saratoga.ca.us. Fill out the application and return it to San Jose Animal Services, the agency Saratoga contracts with for our animal services.

Jana

March 24, 2009

Kelly Carroll
West Valley Clean Water Program
18041 Saratoga - Los Gatos Road
Monte Sereno, CA 95030
Phone: 408-354-4734; E-mail: kelly.westvalley@comcast.net

Dear Ms. Carroll:

On behalf of the Conference Steering Committee, thank you for agreeing to make the presentation, ***A Stormwater Campaign in Cartoons,*** at the upcoming ***5th National Conference on Nonpoint Source and Stormwater Outreach,*** May 11-14, 2009 at the Doubletree Hotel in Portland, Oregon. The Steering Committee, as well as the expected attendees, looks forward to a productive exchange of information and ideas on developing and implementing nonpoint source and stormwater outreach strategies.

Conference Format

The conference will run for three days: Tuesday through Thursday, May 12-14. In addition, four optional pre-conference workshops will be held Monday, May 11. A draft agenda is now available on the conference Web site at www.epa.gov/nps/outreach2009/agenda.html.

Your presentation is scheduled for:

Date: Wednesday, May 13

Time: 10:30 - 12:00 p.m.

Session Title: Pictures, Toons & Beyond

Presentation Title: A Stormwater Campaign in Cartoons

The amount of time allotted for your presentation (including any co-presenters you might have) is 30 minutes. Your presentation should be no longer than **20 minutes** so that there is adequate time for speaker introductions and audience questions.

Wednesday, May 13, 2009

7:30 a.m. – 4:00 p.m. **Conference Registration**

8:15 a.m. – 9:45 a.m. **Session A4: Programs Promoting Green Development** ..... Broadway Room

Moderator: Kathy Shay, City of Austin, Texas

— **Blue Thumb—Planting for Clean Water: Using Social Marketing Techniques to Promote Native Gardens, Rain Gardens and Shoreline Plantings within Priority Watershed Areas**
Angie Hong, East Metro Water Resource Education Program, Minnesota

— **Lake Clarity Crediting Program for Lake Tahoe**
Jeremy Sokulsky, Environmental Incentives, LLC, California

— **RiverSmart Homes**
Shelby Laubhan, District of Columbia Department of the Environment

Session B4: Reaching Our Audiences Through University-Based Outreach Programs ..... Multnomah Room

Moderator: Rebecca Power, Wisconsin Cooperative Extension

— **Stormwater Management in Your Backyard: An Extension Education Initiative**
Dr. Christopher Obropta, Rutgers Agricultural Experiment Station, New Jersey

— **Changing Public Behavior: Addressing the Challenges of Applying Social Assessment to Water Management Strategies**
Elaine Andrews and Kate Reilly, Environmental Resources Center, University of Wisconsin, Madison

9:45 a.m. – 10:15 a.m. **Break**

10:15 a.m. – 11:45 a.m. **Session A5: Pictures, Toons & Beyond** ..... Broadway Room

Moderator: Jennifer McDonnell, Tetra Tech, Inc., Virginia

— **Say It with Pictures: Training Kentucky Construction Site Workers in Erosion and Sediment Control**
Barry Tonning, Tetra Tech, Inc., Kentucky

— **A Stormwater Campaign in Cartoons**
Kathy Ottenberg and Kelly Carroll, West Valley Clean Water Program, California

— **Developing and Implementing a Comprehensive Surface Water Education and Outreach Plan for a Rural County**
Pat Pearson, Washington State University Jefferson County Extension

A Stormwater Campaign in Cartoons

Small Agency Uses Cartoons for Adding
Low-Budget Fun
to the Stormwater Message

1

Why Cartoons Appealed to Us

- *BUDGET:*
  We needed a low-budget 'BRAND' image, which could be used in a variety of media
- *COMMUNITY NEWSPAPERS:*
  We wanted to use our community Weekly Newspapers -- which are mailed to every household
- *BROAD AUDIENCE:*
  We wanted an image which would appeal to residents of all types: Parents, Young Adults, Seniors, Students, Teachers, etc.

6

Making it Work: 2 Characters

- *2 Characters works well*
  --2 characters allows for information through dialogue
  --2 characters allows for one to model "WRONG" behavior, & one to model "RIGHT" behavior

Modeling 'Wrong' & 'Right'

Dialogue = "Punch line"

20

Benefits - Brand Recognition

Cartoon characters present a consistent "brand" throughout a variety of **MESSAGES**

- *VARIATION among the STRIPS*
  The strip/characters will be recognized as your "BRAND" yet, they can convey a different message, by varying:
  --the background
  and
  --the "accessories"

12

Benefits - Big Message/ Small Size

- SPEND LESS ON AD SPACE
  --When buying ad space, you need only a small area = LESS COST
- FITS EASILY INTO 8" X 11" MUNICIPAL NEWSLETTERS
  Newsletter are on a tight budget, with limited page space
  They tend to have space for a cartoon, even if not for an article

cartoon in → Municipal Newsletter

10

Benefits - Eye-Catching & Fun

Cartoons draw an audience to look at them.

- *DESIRABLE TO EDITORS:* They add Graphic Interest
  -- Various newspapers have given a 50% PSA discount, in order to include these cartoons in their papers
  -- Municipal newsletters enjoy including the cartoons

Volunteers look for trash in San Tomas Aquino Creek on International Coastal Cleanup day Sept. 20. The West Valley Clean Water Program organized the creek cleanup.

Creek gets a cleanup, thanks to volunteers

WV Clean Water organizes the day

By CHRIS VONGSARATH

Ava Hansen wasn't so much worried about why she was out picking up trash along San Tomas Aquino Creek as she was how much trash she could pick up. The 9-year-old Junior Girl Scout from Troop 60043 learned quickly the importance of keeping the environment clean and in its natural state.

"Lots of people pollute, and they don't care if they cause global warming or not," Ava said.

While not exactly reversing global warming, Ava and a handful of other scouts and volunteers did their part in an international effort to prevent trash from ending up in the planet's oceans.

As part of the International Coastal Cleanup, volunteers from around the world pitched in to pick up trash. Last year, almost 380,000 volunteers from 75 countries netted 6,075,698 pounds of trash.

Closer to home, volunteers cleared trash from Lexington Reservoir, Vasona Lake County Park and San Tomas Aquino Creek on Sept. 20.

Ava said she had a fun time learning about the creek. The scouts challenged each other to see who could find the weirdest thing, which turned out to be a live pig.

The West Valley Clean Water Program, which provides stormwater pollution prevention for Campbell, Saratoga, Los Gatos and Monte Sereno, organized the cleanup at San Tomas Aquino Creek.

Program assistant Kathy Ottenberg said cleaning up the creek goes past mere aesthetics. In addition to having an impact on wildlife, a polluted creek could directly impact residents.

Part of the group's mission is to make sure the municipalities it serves are in compliance with state-administered stormwater discharge permits, which are intended to keep California's waterways clear.

Too much pollution could prove costly to taxpayers because municipalities would have to pay to install inserts to trap trash at stormwater gutters, Ottenberg said.

"It can have a major impact on everybody, even in terms of taxes," Ottenberg said.

About 16 volunteers collected 120 pounds of trash and another 170 pounds of recyclables at San Tomas Aquino Creek, program assistant Patrick Hansen said.

Though the creek is closed off to the public, some people frequently trespass through the area, resulting in the litter. The city of Campbell and Santa Clara Valley

San Tomas Aquino Creek cleaned up by volunteers

By Chris Vongsarath
Campbell Reporter
Article Launched: 09/25/2008 02:26:24 PM PDT

Ava Hansen wasn't so much worried about why she was out picking up trash along San Tomas Aquino Creek as she was how much trash she could pick up. The 9-year-old Junior Girl Scout from Troop 60043 learned quickly the importance of keeping the environment clean and in its natural state.

"Lots of people pollute, and they don't care if they cause global warming or not," Ava said.

While not exactly reversing global warming, Ava and a handful of other scouts and volunteers did their part in an international effort to prevent trash from ending up in the planet's oceans.

As part of the International Coastal Cleanup, volunteers from around the world pitched in to pick up trash. Last year, almost 380,000 volunteers from 75 countries netted 6,075,698 pounds of trash.

Closer to home, volunteers cleared trash from Lexington Reservoir, Vasona Lake County Park and San Tomas Aquino Creek on Sept. 20.

Too much pollution could prove costly to taxpayers because municipalities would have to pay to install inserts to trap trash at stormwater gutters, Ottenberg said.

"It can have a major impact on everybody, even in terms of taxes," Ottenberg said.

About 16 volunteers collected 120 pounds of trash and another 170 pounds of recyclables at San Tomas Aquino Creek, program assistant Patrick Hansen said.

Though the creek is closed off to the public, some people frequently trespass through the area, resulting in the litter. The city of Campbell and Santa Clara Valley Water District are installing a passive-use trail.

Hansen said opening up the creek to the public could present a hidden benefit.

"If there is a lot of trash out there, they'll notice it and want to do something about it," he said.

Sunnyvale resident Grace Siu, Ava's mother and leader of the troop, said her scouts have participated in creek cleanups before, but never as part of an international campaign. She said the scouts were up to the task.

Happy Earth Day

We're celebrating another one on April 22

Photographs by GEORGE SAKKESTAD

Earth Day was something of an enigma when it was first discussed at a conference in the fall of 1969.

What was the point of this special day designated for April 22 that would "inspire awareness and appreciation for the Earth's environment?" Back in 1969, it seemed to just follow the beat of the hippie generation and the Summer of Love.

Nearly 40 years later, though, we know better.

Earth Day, first celebrated on April 22, 1970, has grown to become a time when we collectively treasure our planet and share ideas for sustaining our resources.

In the West Valley, we are thinking about the Earth in our homes and schools, in our businesses and local governments.

It starts at home

Los Gatos homeowner P.K. Karnik believes in recycling, but when it came to remodeling his home, he took the concept to another level.

"I look at recycling in a different light," Karnik said. "My whole notion is reuse."

Karnik used Craig's List to unload many of the things he no longer wanted, but thought other people could use. "I advertised free windows to a needy home," he said. "This church contacted me saying they had a home in East San Jose in shambles that they wanted to turn into a daycare center, so I gave them all to them."

He did the same thing with faucets, sinks, chandeliers, mirrors, blinds, cabinets and toilets. "The toilets were 4 years old, and they probably would have ended up in a landfill," Karnik said. "They were picked up by a gentleman that remodeled his rental homes in San Jose. Normally, the faucets would have gone to a scrap yard and melted in a furnace. They were put into the rental houses, along with the sinks."

Karnik also found new homes for his old water heater, plus 14 doors and a lot of lumber. Some of the lumber was recycled to make wooden pellets, but much of it will be reused. "Some large timber was given to my construction crew," he said. "They plan to haul the load to Mexico and assist their poor relatives to build homes."

In explaining his preference to reuse things instead of recycling them, Karnik says, "I save a lot of energy in the crushing process. And there are so many places that need to get fixed. I feel very good about it."

Saratoga resident Hari Sripadanna is also feeling good about

A rain harvesting system can provide water for landscaping and vegetable gardens. At right, Monte Sereno resident Jerry Block talks to John Lewis of Rain Harvesting Systems about the installation of a harvesting system in his back yard. Above, Lewis installs water filtering rain gutter guards at Block's home.

his new home. The architect is waiting for an important piece of paper that says his house is certified LEED Gold—meaning it shows Leadership in Energy and Environmental Design. LEED is a point system developed by the U.S. Green Building Council.

Among other things, Sripadanna installed low-flow showerheads and faucets. A typical shower can use as much as 3 gallons of water a minute, while Sripadanna's use 1.75 gallons.

"What really surprised me was the faucets because they actually feel more forceful than a regular faucet," he said.

Sripadanna also says it has become much easier to build a green home today because the industry has caught up with people's ideas. "Architects have always talked sustainability, but now a lot of things have come together and it's become easier for us to do," he said. "What I want to share with everyone is it's in economic reach for everybody."

One of the more unusual things Sripadanna did was to install a "live" roof that is planted with succulents. It helps keep the house cool in the summer and warm in the winter.

Sripadanna said things like that can quickly add to the points needed for LEED certification.

Sripadanna also designed his home to take advantage of natural sunlight. "There's a quality of ambiance," he said. "You can't describe how it feels when the sun warms the house naturally. It gets low-angle winter sun but not summer sun."

One thing Sripadanna did not do is install solar panels. "If you do small things across the plain, you can get (LEED) credit quite easily without going to solar panels," Sripadanna said. "My house is so energy efficient that it beats the California energy code by 50 percent."

Even so, Kurt Newick of Campbell is a firm believer in solar. He is a solar salesman who is also the founder of the local chapter of the Sierra Club's Global Warming Committee.

"Solar electric panels are far and away the most popular technology," Newick said. "I sell about three or four systems a month."

He said homeowners who are thinking about going solar need to select a company that is both licensed and bonded. "The main thing is for the homeowner to feel comfortable with the person they select," he said. "If the contractor can't answer questions in a timely way, that's a red flag."

Newick also praised a new program started by San Jose-based Renewable Power Solutions that certifies solar installers. "A certification program is critical, especially since solar is pretty new," he said, "And it's a big expenditure."

Newick has just completed an analysis of the fees municipalities charge for permits for solar installations and the subsequent inspections.

"Los Gatos is one of the highest in the Bay Area," he said. Newick's analysis shows that Los Gatos charges $511, while Campbell comes in at $225 and Saratoga charges $92.

"Campbell and Los Gatos are pretty easy to deal with," Newick said. "Saratoga is probably the best. They're pretty easygoing."

Newick also said that perhaps the most important thing a homeowner can do before installing a solar system is to have a roof inspection and a shading analysis done. "This is where you separate the men from the boys. In Los Gatos and Saratoga you have a lot of mature trees. Solar needs sun, and even the wispiest amount of shade impacts the system," Newick said. "A sunny location now may not be sunny later on. And you have no legal recourse if a neighbor's tree grows and shades your array if the tree was there first."

The word sustainability has become interchangeable with green building practices, and Monte Sereno's Jerry Block has taken the concept to heart.

He just installed a 20,000-gallon rain harvesting system that will water his landscaping and vegetable garden.

But Block says being able to store that much water on his property could easily serve other purposes. "In an emergency it can be used for firefighting," he said, "and it could supply the whole neighborhood if there's an earthquake."

Block's system was installed by Fremont-based Rain Harvesting Systems.

Special eaves along the front and sides of his house capture the rain, which then flows through a series of pipes and into four tanks that can hold 5,000 gallons each.

Except for the tanks, the system is invisible.

If the tanks get too full, Block can release the excess and replenish groundwater supplies.

Right now, Block doesn't plan to use the water for drinking, washing or showering because he says there are too many hoops to go through to get approval for that.

However, installing a special filter and ultraviolet light could easily purify the rainwater.

Block also has an extensive solar installation, so he uses very little power from PG&E.

Coupled with his solar panels, Block's rainwater collection system is the next step in his quest to find independence. "This is a way for the everyday American to be a hero," he said. "Make a sacrifice to free us from foreign dependency and invest in your country's infrastructure."

—Judy Peterson

Continued from page 19

Government does its part

In the past the onus was put on individuals and big businesses to help shape a more environmentally friendly future by recycling more and conserving energy and water.

But as the "going green" phenomena has sunk deeper into the consciousness of American culture, public agencies, including the cities of Campbell and Saratoga and the town of Los Gatos, have begun to do their part in the creation of a more sustainable future.

Each of the three municipalities has been certified as a green business by the Bay Area Green Business Program, which verifies and motivates businesses to meet higher standards of environmental performance. More than 1,600 businesses and public agencies have been certified since the program's inception in 1997.

The town of Los Gatos was certified as a green business two years ago but has been working steadily toward adopting greener practices for more than a decade.

The town council adopted a water efficiency ordinance in 1992 to promote the conservation and efficient use of water. Guidelines were approved in 2004 for voluntary green building standards on new construction; and in 2008, Los Gatos became the first municipality in Santa Clara County to enroll in the PG&E Climate Smart program, which will help the town offset all of its identified carbon emissions.

Just last year Los Gatos began the "Growing Green Together" campaign in an effort to educate the town's employees to be more environmentally conscious while at work. Each month has a different theme that offers tips for creating a greener workplace and home. Residents can also sign up to receive the same newsletter employees obtain.

Los Gatos High School students Olivia Warne (left) and McKenna Everett look over photographs on display at a show focused on sustainability. Los Gatos Mayor Mike Wasserman (second from right) and Los Gatos High assistant principal Scott Downs also check out the show held in conjunction with Earth Day.

"It's very important for businesses and residents to take personal responsibility. Individual action is going to be key to reducing our carbon footprint," said Regina Falkner, community services director for the town of Los Gatos.

Saratoga Mayor Chuck Page agreed and added that local governments need to do their fair share in creating positive change.

"It's important that governments show leadership and do what it's asking its citizens to do," he said.

The city of Saratoga has taken many steps to become a better steward of the environment, including going to "paperless" Saratoga City Council meetings, using biodegradable utensils and cups at city hall, replacing older light bulbs with more energy-efficient models and buying two hybrid cars to replace aging city vehicles.

This month the council approved an ordinance that amends the city code to include a compilation of existing "green" laws that promote sustainability through the reduction of greenhouse gases. Putting all the laws in one section makes it easier for residents to find out what ordinances the city has passed that promotes a greener Saratoga, Page said.

But no matter what efforts cities try to make to be better stewards of the environment, they will inevitably be constrained by time and money.

But, thanks to the federal stimulus package, the city of Campbell is entitled to a $163,000 grant that must go toward energy-efficient programs. The money could go toward a number of things, but the city might look into using the funds for a solar panel analysis, said Dan Rich, city manager for Campbell.

Like Saratoga, the city of Campbell also plans on going to "paperless" city council meetings. Many other city commissions have already gone paperless.

Although city council and staff are currently looking into what the city can do in the future to reduce its carbon footprint, the city has always been "pretty aggressive" about looking into greener programs before it became fashionable, Rich said.

Rich said there has always been a desire by elected officials and residents to look into creating green policies and adopting environmentally friendly business practices. Not only have the greener policies helped out the environment, they have also helped Campbell's bottom line.

"It also made good business sense," Rich said.

—Brian Babcock

A photograph of bicycles by Fisher Middle School seventh-grader Natasha Cougoule is part of the Earth Day photo show in Los Gatos.

Education is the key

Community members realize that teaching the youth of today is an important part of shaping the leaders of tomorrow. Educators, parents and students from around the West Valley used their own skills, expertise and passion to coordinate a number of different activities on and around April 22 with one shared goal—to promote the understanding and protection of Mother Earth.

From kindergarten to college, no grade level went unnoticed.

A used book sale was scheduled April 22 to emphasize going green through recycling in and around the campus center at West Valley College, 14000 Fruitvale Ave.

"Whether you call it reducing your carbon imprint or just saving a tree, the idea is there are many popular books that trade hands anyway," said George Mageles, community resource coordinator for student health services at West Valley College.

There will be hard- and soft-bound books for sale throughout the day, and the funds raised will benefit the school's classified staff scholarship.

Mageles anticipates selling the books will be a success because faculty and administration offered such generous support preparing for the event. They offered a wide array of donations after clearing bookshelves in their homes and offices.

Students and parents from Louise Van Meter Elementary School also used a book setting as inspiration for a project.

Third-graders from the school worked on art pieces from April 14 to 16, using objects they found while spring cleaning in their homes earlier this month, including VHS tapes and old toys.

"It was junk, but all of a sudden it was shiny and new. It was just a major shift of perspective," said Daniella Simon, a parent of a student attending Van Meter. "The whole idea was don't look at things in terms of throwaway."

The students will dedicate their eco-art projects on April 22 to the Los Gatos Library's Green Section. Simon said this is a natural setting to display the work since "the library is all about the three Rs—reduce, reuse, recycle."

Simon was inspired to lead the project a year ago after first reading about eco-artists who use such materials as bottle caps to make beautiful mosaics.

The project grew into a collaboration of Art Docents of Los Gatos, Los Gatos Library, the West Valley Green Leaf Committee and Van Meter.

Simon said there were different benefits in working on the artwork.

"There seems to be gap in terms of getting information to kids," Simon said, "and this is one of the big issues that is driving me at this point. They're inheriting everything. We have a very short period of time to retrain ourselves and retrain our children."

Students from Los Gatos High School, Fisher Middle School, Blossom Hill and Lexington elementary schools are also putting their artwork on display during a photography show focused on sustainability. The exhibit is scheduled for April 25 at the Los Gatos Civic Center, 110 E. Main St., from noon to 4 p.m.

The idea was for students to take pictures to "show us the world through their eyes," said Nate Donovan, Los Gatos High photography teacher. Students ventured into different parts of the community, including local businesses, to capture the environmental effects we all have during our day-to-day lives.

No matter who you are, eventu-

ally "we are going to run out of resources," said freshman McKenna Everett.

She took 200 photos for the project, one she said is important to raise community awareness. The photographs submitted varied in styles, from scenic to abstract to photojournalism.

A picture alone is worth 1,000 words, but the photos displayed together will allow residents to "see how it all feeds into the story," said Nicole Williams, a parent volunteer for the event. "When you look at them all collectively, it makes a fantastic impact."

—Shannon Barry

Green means business

Ungdo Shin cares about what he puts in his customers, so much so that he is willing to pay more for it.

The owner of Big Basin Café in Saratoga runs an all-organic shop, meaning everything from the products to how they are served come naturally from the earth.

"In order to serve organic coffee, the delivery system also has to be non-chemical," Shin says. "We couldn't use a so-called recyclable cup, which is cost-effective but is chemically infested. So, we use a biodegradable cup instead, or else there is no use in serving organic coffee."

The cost of using biodegradable materials can be up to three times more expensive, Shin says, but it allows him to be able to call his café a truly organic coffee shop. Biodegradable—as opposed to recyclable—materials can be mixed in with other waste without contaminating the soil. Recyclable materials, meanwhile, can only be recycled, as the chemicals to make them are not natural.

For its efforts, Big Basin Café, 14471 Big Basin Way, received high marks on ecovian.com, a site featuring green business reviews and topics. The coffee shop earned five-star ratings in both organic coffee and tea served and biodegradable containers used.

In addition to tasting better, the organic coffee and natural foods at Big Basin Café, as well as the containers they're served in, benefit the customers in the long run, too. Biodegradable means all-natural, and that reduces the amount of dioxins, known to be cancer causing agents, the body absorbs, Shin said.

"Some customers are aware of what organic really means and some customers just like the taste of our coffee. But knowledgeable people know about the advantages of having biodegradable coffee and materials," Shin said.

While some businesses are going green themselves, others are helping people become more eco-friendly. Campbell-based Coulomb Technologies has been quickly rising as the leading producer of electric vehicle charging stations.

A construction worker sorts through the lumber at the home of Los Gatos resident P.K. Karnik. The lumber will be recycled to make wooden pellets, or re-used on homes in Mexico.

A mattress floats in Lexington Reservoir. It's just one of the many such items volunteers will target at a Lexington cleanup day on May 16.

Many drivers of electric vehicles can only charge their cars at home, but Coulomb allows them to refuel at the workplace or when they're out and about. The company has stations up and running in San Jose and San Francisco and as far away as Amsterdam.

And with just about every major automaker shifting toward more fuel-efficient and eco-friendly cars, Coulomb's smart-charging stations may be popping up in more cities.

"All of the automakers are doing electric cars, and we'll see them emerge between now and 2012," said Richard Lowenthal, Coulomb's founder and CEO. "So, we're out there selling stations and creating interest, and it's a worldwide thing."

Because it takes anywhere from four to eight hours to fully charge a vehicle, stations must be strategically placed. Right now, Coulomb is targeting the workplace and downtown areas, places where people tend to be for an extended period of time. But as more electric vehicles begin to hit the road, Coulomb may be looking to add stations at recreational venues, such as ballparks and arenas, Lowenthal said.

Lowenthal projects that in the next five years there will be remarkable advances in the industry, with more electric cars, charging stations and technology streamlining the two. Electric vehicles could be charging in a matter of minutes and drivers could be recharging at service stations, the way how most people do now at gas stations.

Most of these initiatives, Lowenthal says, will be made possible through the stimulus package.

"It's a good time to be doing green programs, especially green transportation," Lowenthal said. "It's good for cities to say, 'We're going to be electric vehicle-welcoming.' "

Also getting a boost from the stimulus package is Akeena Solar in Los Gatos. It may be nothing new to see solar panels on residential and commercials roofs these days, as property owners are beginning to invest in renewable energy. But Akeena is preparing for the next phase of clean technology: mixing aesthetics with being eco-friendly.

The latest solar panel from Akeena comes with a non-bulky, sleek design, but still has the reliability to last over time. The jet-black panels can be installed closer to the surface of the roof, limiting their visibility to onlookers.

When consumers begin looking for beauty to go with the brains, it's a sign that new technology has caught on.

"Without a doubt, as solar becomes more mainstream, you see that families are looking for panels that will reduce electricity bills and plus will also look well on a person's home," said Jose Tengco of Akeena Solar. "We've worked hard to ensure that we can provide the best looking and most reliable panels on the market."

The hardest part for those thinking about going solar is making the investment, but even that is starting to change. With solar power becoming more available, the price to make the switch is getting cheaper, Tengco said.

According to a study by the California Public Utilities Commission, Californians in 2008 "installed twice as many megawatts of solar power than the year before, and demand for new solar projects continues to hit record levels." Moreover, the California Solar Initiative led to more than $5 billion worth of private investment in solar projects.

"Clearly, with the going green movement and climate change, people are turning to renewable energy. And from an economic view, they find they are getting a strong return on the money invested today, so it becomes a win-win," Tengco said. "Families get to reduce electricity costs and at the same time address climate change."

—Chris Vongsarath

Series of local events related to Earth Day

Although Earth Day is officially April 22, many Earth Day-related activities will be held throughout the week and are listed below:

Life lab—On April 22 staff and students from Saratoga Elementary School will honor Earth Day with the official opening of their Life Lab Garden. There will be different displays and presentations from 9 a.m. to 2:30 p.m. in the outdoor classroom of the school, 14592 Oak St., including water filtration systems, insects of the garden, worm composting and solar cooking.

Used book sale—A used book sale is being held April 22 to emphasize going green through recycling in and around the campus center at West Valley College, 14000 Fruitvale Ave. in Saratoga. The event is a fundraiser for the school's classified staff scholarship.

Arbor Day—A tree-planting ceremony takes place April 24 at 10 a.m. at La Rinconada Park, Wedgewood Drive and Granada Way.

Another Arbor Day celebration— The city of Saratoga will celebrate trees on Arbor Day with a community gathering at Beauchamps Park, between Beauchamps Lane and Bowhill Court. The event will be held on April 24 at 3:30 p.m. Residents can help plant a tree, learn more about the trees in Saratoga and can take a seedling home that they can plant themselves.

Highway 9 clean-up—Five local Rotary Clubs, including those from Saratoga, Los Gatos, Campbell and Cupertino, are sponsoring the "Great Highway 9 Cleanup" on April 25. Volunteers for the cleanup are asked to meet at the La Hacienda Inn, 18840 Los Gatos-Saratoga Blvd., at 9 a.m. for a free breakfast. Volunteers and Rotarians will then pick up trash along Highway 9 for a couple of hours before being treated to a barbecue.

VOLUME 126, NUMBER 7 LOS GATOS, CALIFORNIA FEBRUARY 17, 2009

Photograph by Neal Waters

Gardener Arthur Ragan, raking leaves in front of the Wells Fargo building on N. Santa Cruz Avenue in downtown Los Gatos, is among the Allied Landscape Services employees to be certified a Green Gardener in the West Valley Clean Water Program. The program serves Los Gatos, Monte Sereno, Saratoga and Campbell.

Class helps gardeners join the green team

Program has been winning awards

By JUDY PETERSON

A green gardening program that was developed in part by the West Valley Clean Water Program has been winning awards for its innovative ideas.

The clean water program, which serves Los Gatos, Monte Sereno, Saratoga and Campbell, was created to control pollution being dumped into creeks, streams and stormwater drains.

Recently, the California Stormwater Quality Association honored the Green Gardener program with an outreach award for the work it has done with small landscaping contractors.

"It was a 10-week course to educate landscape professionals on what type of environmentally safe practices are out there in place of the norm," Tito Fonseca of Allied Landscape Services said.

Fonseca and two other Allied employees were among the first to become certified Green Gardeners.

"It taught us simple gardening practices like pruning techniques, composting and minimizing water use," he said.

The latter will become even more important as water rationing is expected to be mandated in Santa Clara County beginning next month.

"We learned to use mulch over bare soil to keep water in the ground," Fonseca said.

The program also focused on minimizing the use of herbicides. "The chemical industry does a very good job advertising their products," he added, "but they don't touch on the environmental impact chemicals have."

Fonseca works with clients in both Los Gatos and Campbell.

"Green gardening is becoming more and more important to clients. Customers want to see that contractors are educated and doing what we can to preserve, protect and not pollute their property," Fonseca said.

114 Solutions Gardening Service owner Abel Yanez agrees.

"We wanted to separate ourselves from regular gardeners to see how we could help customers save water," Yanez said.

Yanez is using his newfound skills at customers' properties in Campbell, Saratoga and elsewhere.

"We're trying to re-layout sprinkler systems, and we're changing to organic fertilizer to help with the environment," he said.

One of the important things Yanez learned was how to test soil so that the right plants are properly placed. "You plant here and there," he said. "Now we know exactly what to do."

Yanez described the Green Gardener program as very beneficial. "We are planning to send five more people," he added.

"inadequate community facilities: e.g. the lack of a performing arts center and an inadequate library." This was 18 years ago.

Redevelopment money has funded a wide variety of improvements, including the town plaza, street reconstruction and a contribution to the high school pool.

We support the use of redevelopment funds for a new library.

ANN ROBERTS, PRESIDENT
LWV of Southwest Santa Clara Valley

More support for a library in Los Gatos

I support Los Gatos building a new public library. I *do not* support cleverly worded, misleading petitions.

ALICE H. HANSEN
Los Gatos

Blanket ban at concerts is ridiculous

Banning blankets at the local summer concerts—now I have heard everything. You either have concerts and have a fun atmosphere or you don't. The grass recovers after the concert season. It has looked fine for months.

this town that I would fight for their park.

It was another member of the skateboard park committee who decided to use paid petitioners and paid them. Steve Glickman did not hire the petitioners. They got the job done. Yes, we were beaten in the election due to dirty politics and a dirtier press. I would be happy to expound upon that at another time. The residents voted, and for whatever reason, they voted against building the park.

You talk about money wasted on elections. The town council spent more than $500,000 on surveys that concluded if the construction of a new library went to a vote, it would be turned down. Don't get me wrong; I am in support of a new library. However, there are more efficient plans and ideas that will cost far less. That is why it is so important to allow the voters to decide how the town spends taxpayer money on major projects. Why have this and other extreme expenditures pushed down our collective throats?

If you, the voter, decide to spend $18 million on a library, then I'm all for it. We have been told that the money is coming from redevelopment funds, but that is only $12 million. The rest will come out of the town gener-

worked with the developer on the First Republic building was interesting. Look at the building. It has Tuscan columns holding up arches here, Mission-like but fake Corbel-looking shapes holding up straight openings over there, windows with wood shutters, palladium windows with and without columns, straight windows without adornment, Craftsman-style exposed knee braces and an oversized tile roof. That it came out OK is testament to the developer, but stylistically it's a Tuscan, Mission, Monterey, Craftsman mess—definitely the kind of thing a committee would produce.

Let's let some originality happen. Look at what's going on in other places, countries, cities. Curious juxtapositions of color, shape and style create visual interest, not discord. Designing harmonious sameness will give us a look that one can understand easily in one pass. Los Gatos can be a much more interesting place than that. Let's allow some creativity, expressiveness, even oddness to happen here. We don't want to be known as a city of conformity, do we?

GEORGE HAVELKA
Los Gatos

Yellowjackets?

Use less toxic ways to control pests and prevent polluted runoff from entering our creeks and the Bay.

Fill yellowjacket traps with apple juice.

Participating sponsors: Santa Clara Valey Water District, City of San Jose, Santa Clara County Parks, and Watershed Watch.
Participating agencies: Lockheed Martin SSC Leadership Association, San Francisquito Watershed Council, San Francisquito Watershed Project, Santa Clara Valley Urban Runoff Pollution Prevention Program, West Valley Clean Water Program, and the cities of Cupertino, Gilroy, Mountain View, Palo Alto and Sunnyvale.
Participating groups: Apollo High School, Blackford Neighborhood Action Coalition, Forest Hills Elementary School, Friends of Los Alamitos Watershed, San Tomas West Neighborhood Association, Save the Bay, and Silicon Valley NAACP.
Participating companies: Bianchi-Amaker Construction, Callahan Real Estate Group - Coldwell, and Intel Corporation.
Participating donors: Children's Discovery Museum of San Jose, City of San Jose Parks, Recreation, and Neighborhood Services (Happy Hollow Park and Zoo), Classic Carwash, Hobee's California Restaurants, In-N-Out Burger, San Jose Repertory Theatre, San Francisco 49ers

Subject: "Enviroscape" at Audubon Society Wildlife Education Day
Date: Tuesday, October 28, 2008 10:52 AM
From: Marj Ottenberg <marjott@yahoo.com>
To: <kelly.westvalley@comcast.net>

Kelly Carroll
West Valley Clean Water Program,
18041 Saratoga-Los Gatos Rd., Monte Sereno, CA 95030

Dear Ms. Carroll--first, let me say I wanted to send this by U.S. Mail--and have been trying for 3 days--but my printer refuses to accept my requests! So, I fall back on electronic mail!

Our Sierra Club group was THRILLED to have Patrick Hansen bring your Enviro-scape to share our space at Santa Clara Valley Audubon Society's annual Wildlife Education Day! It was the HIT of our corner of the affair! We especially appreciate the fact that it educates parents along with the kids-- who are enjoying squirting and sprinkling the various "contaminants" on the "environment"--and watching it wash into gutter to creek to Bay. Hopefully, these kids will CONTINUE to prod parents and friends, NOT to thoughtlessly discard stuff, because they now KNOW what harm such actions can cause! Patrick did an outstanding job, relating to the kids and "telling his story". I don't have a count of attendees--but everyone had to park at Monte Vista High School, about a mile up McClellan Road, and SCVAS hired school buses to ferry people from parking lot to the "party", and back again throughout the day (no cost to riders!); that parking lot was almost
completely full all day--so we know LOTS of people came! SCVAS covers the south half (and perhaps more) of Santa Clara County; they have active programs for kids as well as adults, including classroom sessions in local schools; (their monthly lecture meetings--in Palo Alto and Campbell-- draw several hundred members! I wish our Sierra Club Group could do as well!)
I was quite interested in your "mercury-free" thermometers--FAR superior to the old glass ones in many ways! I'd like to buy a few of them, to show to Sierra Club trip leaders--who are responsible for health care for trip participants. Next time I'm in Monte Sereno, I may stop by----
meanwhile, you and Patrick have our sincere THANKS! for helping us educate (and entertain) a LOT of local residents!
Marjorie Ottenberg, Program Chair, Guadalupe Regional Group, Loma Prieta Chapter, Sierra Club.

Discovery Day Enviroscape Presentation Outline

Intro: Hello My name is…

Background on the West Valley Clean Water Program….

Questions:

1. What is nonpoint source pollution?
2. What is point source pollution?
3. What is a watershed and water cycle?
4. What is the difference between a sanitary sewer system and a storm drain system?

Provide background information to audience:

What is a coastal zone? Answer Page 7. Give examples of local SF bay.

Importance of coastal wetlands.

How coastal zones are affected by water pollution.

a. Car Washing (Talk about Car Wash Kit)
b. Pet Waste
c. Hazardous Materials
d. Paint
e. Swimming Pools
f. Trash
g. Pesticides

What the West Valley Clean Water Program does and how you can help.

a. Take car to carwash, or ask about carwash kit for fundraisers
b. Reuse mugs, canvas bags etc., wrapping paper..
c. Participate in creek cleanups, pick up trash if you see it.

Play on Enviroscape model.

Dear Patrick, Kelly, and Christine,

The Sedgwick PTA, Sedgwick Staff, students and parents would like to say "Thank You" for participating in Discovery Day 2009! The students thoroughly enjoyed your presentation on Preventing Watershed Pollution. This important presentation made an impact on the students, including my 3rd grader who came home talking about how he can keep the waterways cleaner by picking up garbage by the drains and by the sidewalks.

Discover Day is a proud Sedgwick tradition that our children enjoy very much. We sincerely appreciate you taking time out of your schedule to help educate our kids. I am enclosing thank-you letters written by the children of Sedgwick Elementary.

Sincerely,
Tracey Trimeloni
PTA volunteer

WVCWP School Presentation Feedback

Thank you for inviting the West Valley Clean Water Program to give our watershed presentation. We ask you to please take the time to fill out this form. Your feedback will help us to deliver better presentations in the future. Please circle the number that corresponds with your opinion for each category. Circle 5 if you strongly agree with the statement, 4 if you agree, 3 if you are neutral, 2 if you disagree, and 1 if you strongly disagree.

A. OVERALL	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree
1. Setting/Room was pleasant	1	2	3	4	5
2. Materials used were useful	1	2	3	4	5
3. Content was interesting	1	2	3	4	5
4. Participants learned a lot	1	2	3	4	5
B. Speakers					
1. Speakers were knowledgeable	1	2	3	4	5
2. Speakers able to answer questions	1	2	3	4	5
3. Speakers kept audience interested/engaged	1	2	3	4	5
C. Results					
1. Presentation improved the students understanding of watersheds and urban run-off	1	2	3	4	5
2. I would consider having the WVCWP present at future events.	1	2	3	4	5

Comments:

Patrick was good with kids. He was on time and even got through everything he needed to do with the kids with the shorter time frame. The kids really enjoyed the hands on. Thank you so much. Sincerely Chris Daly

Created 7/23/08 PH

Annual Cleanup Program

West Valley Collection & Recycling (WVC&R) will collect an unlimited number of items from your curb at no additional cost for one day only.

Please have your items, containers and bundles curbside by

6 AM on Wednesday, August 27, 2008

WVC&R will collect:

- Items weighing up to 70 pounds (except as described below)
- Garbage in 32 gallon plastic bags, 32 gallon cans, and sturdy cardboard boxes (all small items must be contained)
- Tree prunings, branches and scrap wood up to 3" in diameter and 3' long in tied bundles weighing up to 70 pounds

WVC&R will not collect:

- 35, 65 or 95 gallon wheeled carts (they are awkward to lift manually)
- Concrete or Dirt (call Guadalupe Landfill 408.268.1670)
- Tires (call Guadalupe Landfill 408.268.1670)
- Items containing CFC's such as refrigerators (call WVC&R 408.283.9250)
- Household Hazardous Waste (call 408.299.7300 or visit www.hhw.org)
- E-Waste, Universal Waste, Motor Oil and Water Based Paints:
    - You can drop off TV's, Computers, household batteries, motor oil and water based paints at WVC&R's processing facility by appointment. For more information call customer service at 408.283.9250 or visit www.westvalleyrecycles.com
- Large items or containers over 70 pounds:
    - WVC&R will collect large items such as sofas and refrigerators for a fee. To schedule an appointment please call customer service at 408.283.9250

WVC&R makes it easy for you to donate your reusable items. For assistance locating local charitable organizations, visit www.westvalleyrecycles.com or call 408.283.9250.

Please remember to place recyclables in your recycling cart for your regular weekly collection.

To learn more about any of these programs visit www.westvalleyrecycles.com or call customer service at 408.283.9250.

West Valley Recycles! Summer 2008

BILL PAY THE EASY WAY

West Valley Collection & Recycling has made it easier than ever to pay your bill. Choose the method that works best for you.

Mail it: Make your check payable to West Valley Collection & Recycling. Be sure to include the payment stub to get credit for your payment right away. Use the pre-addressed envelope included with your bill.

Drop it off: We accept payments at our office Monday through Friday from 8 AM – 4:30 PM

Deliver checks to:
West Valley
Collection & Recycling
1333 Oakland Road,
San Jose, CA 95112

Pay / View Your Bill Online: Visit our new online payment system at www.wasteconnections.com; click on "Online Bill-Pay" and follow a few simple instructions. You must have your current invoice and credit card or debit card information available.

Home banking customers continue to use the remit address:

West Valley
Collection & Recycling
Dept. 1433
Los Angeles, CA 90084-1433

You must have your current invoice available.

Have questions about your recycling service?

Ask Randy

Q: What do I do with my used charcoal?

A: You can recycle charcoal. When you finish cooking, pour water on the briquettes. Let them dry thoroughly. Next time you grill, mix half new charcoal with half used.

The absolute safest way to dispose of ashes, regardless of whether they're red-hot or seemingly stone-cold, is to put them in a small, galvanized metal trash can that is dedicated to the purpose of ash storage. Keep the can away from any flammable materials, like your house, wood pile, dry grass, or weeds. Once ashes are completely cold bag them before placing into your garbage cart. If a dedicated ash container is not an option, stir through the ashes to make sure they are absolutely cold before placing them in the your garbage cart.

Remember, even ashes that seem cold on the surface may still be hot deep inside, even after sitting for two days, so wait at least 48 hours before disposing of them in the garbage.

AT YOUR SERVICE: Curbside Collection for Used Motor Oil

Summer's here and time to get the car in tip-top shape. West Valley Collection & Recycling provides FREE containers for your used motor oil so you can keep your car running smoothly, and help our collection go smoothly, too.

Call customer service at **(408) 283-9250** to order your FREE OIL JUGS AND OIL FILTER BAGS and WVC&R will deliver them curbside on your next collection day.

Schedule a drop off appointment for the items listed below by calling (408) 283-9250:

- ✓ Used motor oil and oil filters
- ✓ Water based paints
- ✓ Universal Waste = batteries, fluorescent tubes and bulbs and other mercury containing lamps, thermostats, electronic devices, electrical switches and relays, pilot light sensors, mercury gauges, mercury added novelties, mercury thermostats and non-empty aerosol cans that contained hazardous materials.
- ✓ E-Waste = televisions and computer monitors, CPUs, laptop computers, external computer hard drives, computer keyboards, computer mice, computer printers, DVDs and VCRs.

E-Waste Drop Off Event

E-Waste Drop Off Events will be taking place in West Valley cities soon. Please go to www.westvalleyrecycles.com to find the event in your community. Drop off E-waste such as computers, computer monitors, hard drives, TV's and VCR's absolutely FREE.

Clean Yard Trimmings

Keep your yard trimmings "Green" and your recyclables clean by keeping all garbage out of your yard trimmings and recycling cart. Garbage contaminates recyclable materials.

00061674
044842

West Valley Recycles! Summer 2008

SPLIT BODY TRUCKS: Keeping Your Yard Trimmings and Garbage Separate

It's been more than a year since West Valley Collection & Recycling began the single-stream recycling program and rolled out our new split body trucks.

Our split body trucks have made a big difference in the neighborhoods they serve on trash day, because now in most neighborhoods one truck collects all garbage and yard trimmings, where previously two were needed.

Look for new labels on the back of the trucks identifying the material in each side. The collection compartment of these trucks are completely separate with garbage occupying 40% of the capacity, and yard waste filling the other 60%. The driver maneuvers the hydraulic arm to lift and empty the contents of your garbage and yard waste cart into the chute. After tipping the cart, the driver uses a toggle switch to direct the flow of material into the appropriate chamber, keeping the two materials completely separate. The result of using split body trucks: fewer trucks moving through our neighborhoods on collection day, fewer trips to the landfill, less wear and tear on our roads, less pollution, and fewer greenhouse gasses. Next time you see these trucks on collection day, they may appear to be white, but now you know, they are really pretty green.

Remember, Keep your yard trimmings "Green" and your recyclables clean by keeping all garbage out of your yard trimmings and recycling cart. Garbage contaminates recyclable materials.

KEEP UP THE GOOD WORK!

West Valley Collection & Recycling customers are loving single-stream recycling. The use of split body trucks mean less noise and pollution and the single-stream system means more efficient collection. Everyone is doing a great job.

Here are a few reminders to ensure collection days keep running smoothly and our neighborhood streets stay clean and neat too. Remember:

- Place carts with the wheels against the curb, at least two feet apart.
- Situate carts at least five feet away from vehicles and other obstructions such as basketball hoops.
- Secure light items such as plastic grocery bags and packing peanuts in bags to eliminate litter.
- Flatten and breakdown all cardboard. This will maximize the capacity available in your recycling carts.
- Do NOT overstuff carts.
- Please be sure lids are closed.
- Keep Recycling.

Don't Get Stuck with Your Sharps–Dispose of Them Properly

PROPERLY AND SAFELY DISPOSE OF YOUR SHARPS–HERE'S HOW:

✦ **Pharmacies, Doctor's Offices or Clinics:** Place your used home-generated sharps in a biohazard commercial sharps container and contact your Pharmacist, Clinic Administrator, or personal Physician, and ask if they have a take back program in effect. Sharps containers can be purchased at your local pharmacy.

✦ **Mail Back Services:** If you purchase sharps on-line, please remember to request a pre-addressed, prepaid mail-back box for your used sharps. A list of mail back services approved by the California Department of Public Health can be found at the following website: www.cdph.ca.gov/certlic/medicalwaste

✦ **Santa Clara County Household Hazardous Waste (HHW) Program:** The HHW Program accepts sharps waste, pharmaceuticals (No Controlled Substances), and other household hazardous waste from Santa Clara County residents (except Palo Alto residents). For more information on pharmacies and other locations that accept used sharps or to make an appointment to dispose of your sharps, visit **www.hhw.org** or call **(408) 299-7300**. Remember, residents must place their used sharps in a biohazard commercial sharps container.

Home generated sharps are needles, syringes, and lancets that assist people who use sharps or syringes at home to manage an illness. When sharps are improperly disposed of they pose a threat to sanitation workers, adults, children, and even pets with needle-stick injuries. Because of the high risk to the community and environment, Senate Bill 1305 was passed and will take effect on September 1, 2008. This law makes it illegal to place home generated sharps in the trash or recyclable containers.

West Valley Recycles!

Spring 2009

THEY'RE COMING, THEY'RE FREE!

Electronic Waste Drop-off Events are the Place to Be

West Valley Collection & Recycling is sponsoring three FREE e-Waste Drop Off Events this spring.

HERE'S WHY:

Toxic substances in electronic waste include lead, mercury, and cadmium. A typical computer monitor may contain more than 6% lead by weight. Capacitors, transformers, PVC-insulated wires, and PVC-coated components are loaded with toxins and carcinogens. In the U. S., an estimated 70% of heavy metals in landfills come from discarded electronics. Electronics do not belong in the trash!

HERE'S WHERE & WHEN:

April 25th, 2008 9:00 AM - 2:00 PM
City of Saratoga, North Campus
19848 Prospect Road, Saratoga, CA

April 25th, 2008 9:00 AM - 2:00 PM
Los Gatos United Methodist Church
111 Church Street, Los Gatos, CA

April 18th, 2008 9:00 AM - 2:00 PM
Campbell United Church of Christ
400 West Campbell Ave, Campbell, CA

HERE'S WHAT:

Unlimited amount of TVs, Computers, Monitors, Electronic Toys, Fax Machines, Phones, Copiers, HDTVs, LCDs, typewriters and Stereos including speakers will be accepted at these events.

However, we do *not* accept light bulbs, kitchen appliances or hazardous waste.

Congratulations, 2008 E-Waste Recyclers!

COLLECTIONS WERE A SMASHING SUCCESS.

Last year, a total of 169,776 pounds of E-Waste was collected from Campbell, Los Gatos, Saratoga and Monte Sereno residents who participated in our E-Waste Drop Off events. That's 169,776 pounds of dead monitors, outdated cellphones and ancient fax machines. This year, let's work together to set a new standard for the collection of Electronic waste.

Clutter Busting

Here comes spring! Let's enjoy the many reasons to get outside and enjoy the outdoors: great weather, flowering trees, tulip bulbs pushing their way towards the sun. The fact that our houses are filled to the brim with clutter—the aftermath of a long, cold, winter is another reason to get out of the house. Here are some ideas to de-clutter the house and enjoy the outdoors too. These tips make the job easy. First, organize what is not trash into three labeled piles: sell, donate, or recycle. Next, get to work:

Have a garage sale or even better, organize a neighborhood garage sale. Better yet, get your *neighbor* to organize it!.

Donate your gently used clothing, books, furniture and working appliances to a local thrift store benefiting charity. Some organizations provide pick-up service, and all of them should provide you with a donation receipt to use as a write off on your income taxes.

Create a compost pile with your tree trimmings and lawn clippings. (Remember, May flowers are right around the corner-this compost will come in handy later.)

Participate in the West Valley Collection and Recycling Clean Up Event. It's free and it's easy. We'll collect an unlimited amount of your items at the curb on your neighborhood's designated day. Items weighting over 70 pounds will not be accepted. Look for our flyer in the mail two weeks prior to the event.

Request a bulky item pick-up. We'll pick things up from your curb for a small fee. Just call customer service at **(408) 283-9250**, we'll be right over.

Recycle items that can't be reused.

Put hazardous waste in its place. Batteries, light bulbs and water based paints do not belong in our landfill. They can be dropped off along with electronic devices at our facility. Check out www.westvalleyrecycles.com ewaste and universal drop off for more information.

Drop off your e-waste. The televisions, computers stuff, and vintage VCRs that didn't get picked up at the big garage sale can be dropped at the ewaste events coming up. Check out the e-waste article in this issue for what to bring, our hours and directions.

You must have your current invoice available.

Have questions about your recycling service?

Ask Randy

Q: I am going to bring my old video cameras to an e-waste drop-off location this spring. May I also bring my bottles of pesticides that I no longer use?

A: No. The Electronic Waste Events are computers, monitors, mice, keyboards, cellphones, cameras, old fax machines, and the like, not hazardous materials. Automotive fluids, lawn and garden chemicals, and household cleaners and poisons, can be disposed through the Santa Clara County Hazardous Waste Recycling and Disposal Program. For details, call **(408) 299-7300** or visit **www.hhw.org**. *To submit a question for "Ask Randy" send him an e-mail at customerservice@westvalleyrecycles.com with "Ask Randy" in the subject line.*

Greening your Cleaning

Get all of the dirt on how to clean your home in a planet-friendly way. Just in time for spring! Make your mother proud. Mother Earth, that is.

Floors: Vinegar is an excellent cleaner for ceramic tile or linoleum. Used straight or mixed with water, vinegar and a sturdy mop are all you need for a green, squeaky-clean kitchen floor.

Sinks: One part vinegar, four parts baking soda and several drops of your favorite essential oil(s) makes for a pleasant, earth-friendly sink scrub. Just like the store bought kind, apply the paste with a sponge, let sit for a few minutes then rinse for a sparkling clean sink.

Windows: Vinegar again, this time in a spray bottle. Wiping vinegar-sprayed glass with crumpled newspaper will make your windows shine bright. Don't clean windows when they're in direct sunlight, because they will dry too fast and look "streaky."

Rugs: Shake baking soda over the carpeting before vacuuming to help to absorb odors. For spot cleaning, rely on your old friend, vinegar. Spray it on, scrub out the spot with a clean cloth. Don't worry; the vinegar smell is gone in no time.

Furniture: Sprinkle stale cushions and chairs with baking soda, then vacuum after letting it sit for a while.

Toilet and Tub: Spray with vinegar first, then sprinkle on baking soda for natural, fizzy cleaning power. Scrub with a sponge or toilet brush, then rinse clean or flush.

Garbage cans: Borax is a mineral that will prevent mold and fungus, and keep away insects. Just sprinkle on the bottom of your carts or household cans.

Bad Smells: Zeolite* is a natural mineral that absorbs odors and also controls excess moisture in the air. Use it as a general deodorizer and to combat mildew or mold.

***Bonus!** When used in refrigerators and freezers, Zeolite can reduce electricity cost by up to 12% by maintaining optimum humidity, and it helps keep food fresher.

More Green Cleaning is Just a Click Away

Environmental Home Center is an online source for green building supplies, including people-friendly cleaning supplies, non-toxic paint, natural carpets, sustainable wood products, and energy-efficient insulation. (www.environmentalhomecenter.com).

Seventh Generation (www.seventhgeneration.com), the leading seller of green cleaning products in North America, offers tips on green cleaning.

The Green Guide (www.thegreenguide.com) provides consumers with practical, everyday household- and market-level actions that can yield system-wide environmental, health, and social change.

West Valley Recycles!

Fall 2008

DON'T GET STUCK WITH YOUR SHARPS: Dispose Of Them Properly!

On September 1, 2008, a new law has taken effect, which will make it illegal to place home generated sharps in trash or recycling receptacles. Home generated sharps are needles, syringes, and lancets that assist people who use sharps or syringes at home to manage an illness. When sharps are improperly disposed of they pose a threat to children, adults, sanitation workers, and even pets. Here's how to properly and safely dispose of your sharps:

Note: Residents MUST place sharps in a biohazard sharps container, which are available for purchase at your local pharmacy, before bringing to any of the approved sharps drop-off locations.

✦ **Pharmacies, Doctor's Offices or Clinics:** Contact your local Pharmacy, Medical Clinic, or personal Physician and ask if they can start a take back program.

✦ **Mail Back Services:** If you purchase sharps on-line, please remember to request a pre-addressed, prepaid mail-back box for your used sharps. A list of mail back services can be found at **http://www.cdph.ca.gov/certlic/medicalwaste**

✦ **Santa Clara County Household Hazardous Waste (HHW) Program:** For more information on pharmacies and other locations that accept used sharps, or if there is not a location near you to take back your sharps, contact The Household Hazardous Waste Program at **www.hhw.org** or call 408-299-7300.

SHARPS TAKE-BACK LOCATIONS IN THE WEST VALLEY AREA

Call for packaging requirements before you bring used household syringes, needles, and lancets to the following drop off locations:

CAMPBELL

Kaiser Permanente
Campbell Medical Offices
220 E. Hacienda Avenue, Campbell
(408) 871-6500
(for Kaiser Members only)

LOS GATOS

Shannon Road Fire Station
16565 Shannon Rd, Los Gatos
Biohazard Sharps Container Size Requirement: One quart or one and half quart size for drop off box

Community Hospital, Los Gatos
815 Pollard Road, Los Gatos
(408) 378-6131

B M A Dialysis
14651 S. Bascom, Los Gatos
(408) 358-3791
(for B M A Patients only)

Mission Oaks Campus of Good Samaritan
15891 Los Gatos Almaden Rd
Los Gatos **(408) 356-4111**

SARATOGA

West Valley Fire Station
19800 Cox Avenue, Saratoga
Biohazard Sharps Container Size Requirement: One quart or one and half quart size for drop off box

COUNTY OF SANTA CLARA, HOUSEHOLD HAZARDOUS WASTE (HHW) PROGRAM

Deposit used home-generated sharps into a biohazard sharps container, when the container is ¾ full permanently seal shut and make an appointment through our website at **www.hhw.org** or call **(408)-299-7300**

HOLIDAY SCHEDULE

Collection occurs on all holidays except December 25th and January 1st.

Both December 25th 2008 and January 1st 2009 fall on Thursday. During these weeks, if your regular collection day is Thursday collection will occur on Friday. If your regular collection day is Friday collection will occur on Saturday. No other collection days will be affected.

HOLIDAY TREE COLLECTION

Beginning December 26th 2008 and continuing through January 25th 2009, WVC&R will collect up to two Holiday trees per residence as part of your regular collection.

- Undecorated natural or flocked holiday trees are acceptable.
- Please remove stands, tinsel and decorations.
- All trees must be cut into 5-foot or preferably shorter lengths.
- Place the tree at least one foot away from WVC&R carts.

To receive your FREE recycling "How-to Guide," call Customer Service at (408) 283-9250 or visit www.westvalleyrecycles.com

Have questions about your recycling service?

Ask Randy

Q: With the Holidays around the corner, I'm very interested in finding a way to eliminate waste and complete the recycling loop by giving to others. I just don't know where to begin.

A: Re-using an item is far better than recycling. Donating heavy coats, sweatshirts, beanies or blankets can make for a warm Holiday to a family in need. Also, if you have household electronics such as TVs, phones or computers you don't want to go to waste check out donation alternatives before you recycle using the links below.

Goodwill: **http://www.goodwill.org**
Salvation Army: **http://www.salvationarmyusa.org**
RecycleWorks Reuse Center: **http://www.recycleworks.org**

If you have clothing that is shredded or not in "wearable" condition, you can always recycle them! Tie fabrics in a clear plastic bag and place in your recycling cart for collection. We'll do the rest. **Acceptable Items:** Clean cotton, linen, polyester, rayon and wool fabrics (e.g. blankets, clothes, cloth diapers, rags, sheets) **NO** rags or textiles soiled with chemicals, oil or paint. NO Shoes, Carpets, Disposable diapers, Down-filled items, Leather, Nylon, Pillows, Rubber, Stuffed animals, Vinyl.

MAKE IT A GREEN HOLIDAY

Thinking green begins long before you determine which item goes into your garbage cart and which one goes in your recycling cart. It starts with knowing which materials to buy at the store that reduce waste in your household. So remember to always look for the recycle triangle when you buy.

When picking up gift-wrap this Holiday season remember to buy wrapping paper made from recyclable materials. YOU CANNOT RECYCLE METALLIC OR FOIL GIFT-WRAP.

For those of you that want to get really creative. You can use recyclable materials to wrap and personalize a gift using old magazines, sections of the newspaper and even a brown grocery bag. Wrapping and decorating giftsusing a grocery bag only takes a few minutes of your time to better the environment and make a memory.

Follow these easy steps:

- You will need a brown grocery bag, scissors, colorful pens or markers and tape.
- Cut down the seam of the bag from top to bottom.
- Turn inside out to hide all store advertisements and give yourself a blank canvas.
- Wrap gift.
- Decorate with personalized greetings and drawings of your choice.

Coastal Art and Poetry Contest

By encouraging youth to reflect on the beauty and spirit of California's beaches and ocean, we hope to inspire a greater sense of stewardship for these natural places. A population that cares about the coast is more likely to work to conserve and protect it.

View winning artwork and poetry from previous contests (some of which will open in a new window): 2008, 2007, 2006, 2005, 2004, 2003, 2002, 2001, 2000, and 1999.

A selection of Coastal Art & Poetry Contest winners and honorable mentions will be on exhibit at the following locations during 2008:

- Coyote Point Museum of Environmental Education in San Mateo, May 6 through June 15, 2008.
- Peter and Mary Muth Interpretive Center, Newport Beach, September 2 through September 30, 2008
- Cabrillo Marine Aquarium, San Pedro, October 21, 2008 through January 11, 2009

2009 California Coastal Art & Poetry Contest

WHO: All California residents in kindergarten through 12th grades are invited to participate. There are four categories for awards in both art and poetry: K-3rd, 4th-6th, 7th-9th, and 10th-12th grade.

WHAT: Entries must have a **California** coastal or **California** marine theme. (For help with California species, click here.) Poetry and artwork must be original. Art should be no larger than 11 inches by 17 inches. Acceptable art media are paint, pencil, markers, ink, crayon, chalk or pastel (fixed), and collage. Three-dimensional pieces, computer printouts, or photocopies are not eligible. All entries must include a completed contest Entry Form.

Winners will be selected in each of four grade-level categories (K-3rd, 4th-6th, 7th-9th, and 10th-12th) in both art and poetry to receive a gift certificate for $100 to an art supply store (for winners in art, courtesy of Blick Art Materials) or book store (for winners in poetry). Each sponsoring teacher will receive a gift certificate for $40 for educational materials. Winners and honorable mentions will also receive tickets to the Aquarium of the Pacific in Long Beach, courtesy of the Aquarium.

WHEN: Entries must be postmarked by January 31, 2009.

HOW: Review and complete the Guidelines and Entry Form and submit it with your art or poetry to:

I see the waves.

JURIED ART CONTEST:

Your View of The Estuary

How do you see the San Francisco Bay Estuary, that unique place where land, ocean, and fresh waters meet? Do you have a favorite view or scene that "means" the estuary to you? The San Francisco Estuary Project is seeking art for possible use in a postcard, our web site, and other materials depicting the San Francisco Estuary—we are looking for scenes or impressions of the Bay, its marshes, and/or streams or rivers entering the Bay. All media are acceptable—oil, water color, pastel, pen and ink, block prints of all types, and photos. A $1,000 cash prize will be awarded to the first prize winner, $500 to the second place winner, and $250 to the third. The Estuary Project retains the right to use the artwork (credited) in print and on-line.

Please submit your entry either as a slide labled with title of piece and your name (to the address below) or as a jpg—no larger than 2 MB—emailed to lowensvi@sbcglobal.net no later than August 1, 2009. Slides cannot be returned.

We will contact the top 20 winners for possible use in a display at this year's State of the Estuary Conference at the downtown Oakland Marriott, Sept. 29-Oct. 1. No more than three entries per artist, please. Original art pieces must be no larger than 24" by 36"; artists will be responsible for delivering and retrieving their art. Digital entries may also appear on our web site, and contest submission is considered permission to use.

FY 2008-2009 ANNUAL REPORT

FY 2008-2009 Work Plan Self Evaluation Matrix

Source	Task Source	Work Plan Tasks	Accomplishments	Responsible Party
	SCVURPPP PMP (I.A.1.)	Summary of Use Track and report use of pesticides on municipally owned property. *Municipal Staff* to report to WVCWP for: 1) pesticides applied by staff 2) pesticides applied by contractors *Reports to include:* -name of pesticide used -active chemical in pesticide -purpose of pesticide -amount used in each application -date of each application WVCWP to present pesticide use data in Annual Report.	Pesticides applied by municipal staff are reported monthly to the State of CA Dept. of Pesticide Regulation with copies of monthly reports forwarded to WVCWP for tracking purposes. Pesticide use reports by the municipal Pest Control contractor (PCO) have also been forwarded to WVCWP. Per Annual Report Guidance from Water Board, actual pesticide use data is not included in this Annual Report, but is on file for future reference and analysis as needed.	Parks, Facilities & Street Maint Supervisors
	SCVURPPP PMP (I.A.3.) PS #3	Implement BMPS Continue to Implement IPM practices as Best Management Practices (BMPs) for any pesticide used by staff or contractors. Report on use of IPM practices on municipal property.	During FY 08-09, the WVC continued to implement the Pest Management Performance Standard (PMPS). "IPM Policy" and "Standard Operating Procedures for Pesticide Management" are being followed by staff and contractors. BMPs in general continue to be effective. WVC work with contractors to find the least-toxic method to treat resistant pest problems. The WVC use less-toxic pest management methods in municipal facilities (parks & buildings) whenever practicable, based upon budget and effectiveness. *See "Evaluation" section below for details on IPM implementation.*	PW Analyst & WVCWP coord w/ Parks, Street, Facilities Maint Supervisors

	SCVURPPP PMP (I.A.6.)	Banned Pesticides Inventory If any pesticides have been banned w/in the past FY (per EPA, State &/or local requirements), conduct an agency-wide search of chemical for these pesticides. Properly dispose of these banned substances pursuant to appropriate waste disposal regulations.	**CITY OF SARATOGA:** All storage areas are cleaned annually, and any pesticides that are no longer legal or no longer used are disposed of according to State regulations. Staff reviewed the list of banned pesticides for the FY and found none of the pesticides used by the City were identified on the list. No further action was required.	Parks, Street, Facilities Maint Supervisors
	SCVURPPP PMP (I.B.1.) PS#5.a	Training for Applicators Ensure that employees who apply pesticides for the agency obtain the appropriate training as required by the County Agricultural Commissioner and the State Department of Pesticide Regulation (DPR)	**CITY OF SARATOGA:** All parks staff hold "Qualified Applicator Certificates (QAC) from the CA Dept. of Pesticide Regulation, and pursue the necessary CEUs to maintain their certificates. Knowledge required for the QAC includes: "Potential phytotoxicity due to: o A wide variety of plant material; o Drift; and o Persistence beyond intended period of pest control. Applicators must demonstrate competency, practical knowledge, and an understanding of application methods that will minimize or prevent hazards to: · Humans; · Pets; and · Other domestic animals" The Annual Pesticide Safety Training was held on July 25, 2008. It was held at Saratoga Corp yard and all of the Parks and Streets Maintenance staff attended. The training was given by Pete Howes, Horticulturist, and	Parks Supvr

	SCVURPPP PMP (II.A.1.)	Watershed Ed. & Outreach Campaign (WE&O)[1] Attend WEO and IPM work groups. Continue to assist with development of strategy for a campaign and training program (in Spanish & English) designed for staff of very small landscape businesses (typically 1-8 employees) mainly serving homeowners.	WVCWP staff participate in WEO. WVCWP Program Manager participates in the IPM Ad Hoc Task Group on behalf of the WVC. Project implementation and projects for consideration, which are discussed in the AHTG, are presented to WVC staff for appropriate follow-through. In FY 08-09, WVCWP staff were involved in meetings aimed at developing coordination between the "Bay Friendly" program, and the "Green Gardeners" program (Green Gardeners – see below). WVCWP contributed funds to the SCVURPPP's IPM ad campaign. This allowed the IPM ad to appear in the three (3) weekly community newspapers for four (4) weeks in the spring. (Campbell Reporter, Los Gatos Weekly, Saratoga News). In addition, all ads also appeared a 2nd time in the Los Gatos Weekly "Weekend Edition", so that IPM ads appeared a total of sixteen (16) times in WV newspapers in 08-09. September 08: IPM/weeds April 09: IPM/snails June 09 (week of 6/1): IPM/Roses June 09: IPM/Yellow Jackets WVCWP was very involved with the development of the "Green Gardeners" training program for small landscape businesses --from concept, to grant proposal, to	WVCWP Staff

[1] Funded by all Co-permittees each year.

			implementation of several successful class series. (See Program Report for details.) In FY 08-09, WVCWP contributed funds for 6 scholarships to reduce the cost of the Green Gardener class to attendees (enough for 6 reduced fee scholarships). Since many WV residents employ small landscape contracting firms, it is hoped that these classes will have an impact on reducing residential pesticide use in the WVC. To promote use of the trainees from the Green Gardeners program, WVCWP sent a Press Release to local newspapers in Campbell, Los Gatos & Saratoga. A 630 word article, including a photo, about the Green Gardeners program was published. The article promoted both the classes (for anyone interested in enrolling) and promoted local companies which employ Green Gardeners graduates – so that residents could contact and utilize these graduates. WVCWP also distributed "Green Gardener" class flyers to the WVC. City of Saratoga placed flyers at municipal counters. See "PI/P Section", including "Attachments" for details. XREF PIP	
	SCVURPPP PMP (II.A.4.)	<u>Community & School Opportunities</u> Identify opportunities and attend community events/school classrooms to demonstrate reasons for, and methods of, less toxic pest control.	Information on the importance of reducing pesticide use, and the toxic effects of pesticide runoff, is included in all WVCWP Enviroscape presentation. This includes presentations at schools and at community events. Events in FY 08-09 included:	WVCWP Staff

			4/24/09 – Beauchamps Park WVCWP was introduced to the attendees (appx. 40 people). Attendees visited WVCWP display where staff discussed runoff issues (including pesticides) and distributed material. Staff also circulated and distributed material. IPM information, and HHW brochures detailing proper pesticide disposal, are distributed at a variety of venues. See following row, and "PI/P Section" for further details on outreach for less toxic pest control.	
	SCVURPPP PMP (II.A.5.)	Community Material Distribution Participate in public sale events at local hardware store(s). Provide watershed protection information and reminders (gifts) to community by walking aisles of the gardening center with gift basket full of handouts during the sales.	In FY 08-09, WVCWP devoted staff time to a new campaign: creation and promotion of a new outreach product with the intent of providing material that would be desirable to residents, and which could be attached to printed information, to encourage residents to pick up and read the printed info. Envelopes of pest-resistant CA Native Seeds, which attract "Beneficial Bugs", were created to use as give-aways, and to encourage residents to pick up (and read) the attached printed info on 'less toxic' gardening. WVCWP staff purchased 4 different types of seeds in bulk. Staff created labels with graphics, planting information, and pest info for the seed envelopes (see PI/P section – Attachments). WVCWP partnered with stakeholders (local Sierra Club	WVCWP Staff

herbicides.

Hand hoeing/pulling of weeds is used where possible. Weekly walk-throughs with lots of hand weeding are done. Weeds are spot-sprayed, as opposed to blanket spraying of large areas; the emphasis is on catching the problem early in an attempt to avoid having to spray larger areas later.

RODENTS:

A contractor is engaged to trap rodents in order to avoid poisonous baits; this is done when there is an outbreak of a number of rodents at once.

MEDIAN LANDSCAPING:

Saratoga's policy is to install pest resistant shrubs and landscaping and avoid high-maintenance, low-pest resistance turf and greenery.

RESULTS OF PESTICIDE USE REVIEW

The City is making an effort to stress prevention (prevent weed growth, prevent pest infestations) where possible. Saratoga is using IPM and engineered, rather than chemical, controls as much as possible given budget and staff limitations.

Over the past several years, the Public Works Dept. has worked on landscape design and improved irrigation systems which will reduce need for pesticide/herbicide use, and reduce any potential runoff which could carry pesticides. Natural insect controls include use of traps for wasp control, and soapy water for ant control. Through these types of efforts, Saratoga is progressively reducing chemical pesticide use.

FACILITIES MAINTENANCE

The City's Facilities Maintenance Dept. continues to avoid use of any pesticides, through stressing sanitation (prevention).

Subject:	Reminder about Pesticides
Date:	Monday, August 11, 2008 10:43:26 AM
Attachments:	image002.gif

Hi All,
Here is the yearly reminder about trying to use less toxic pesticides.
Kristin

TO ALL STAFF:

The City's Stormwater Permit with the State of California Water Board requires the City to encourage reductions in pesticide use, including informing employees about **less-toxic methods of pest control.**

As part of this effort, the City's Stormwater staff is sending you the following information:

It's Gardening Season !

Protect your family's health

Use Less Toxic Pest Control Methods

Many PESTICIDES have been shown to be harmful to our health.

CHILDREN & PETS **are especially at risk**
since they tend to have the closest contact with lawns and landscaping.

For information you can use, go to:

Our Water – Our World:
http://www.ourwaterourworld.org/

University of California Extension, Davis :
http://www.ipm.ucdavis.edu/PMG/menu.homegarden.html

Curious about the chemicals you use in your home & garden?

Universities' Pesticide Network:
http://extoxnet.orst.edu/pips/ghindex.html

Pesticides Action Network – Pesticides Database:
http://www.pesticideinfo.org/

To: City of Saratoga Staff
From: Kristin Borel
Re: USE OF PESTICIDES ON CITY PROPERTY – Annual Reminder
Date: June 2009

This notice is distributed to remind City staff that ONLY staff specifically designated through the Public Works Department or the Maintenance Department may order, purchase and apply pesticides for use on City property.

THIS RESTRICTION INCLUDES OVER-THE-COUNTER PESTICIDES

Pesticide use by the City of Saratoga is tracked by the California Water Board as part of the City's Stormwater Permit requirements. This message is required annually by the Permit. It is important that all City staff be informed of, and comply with, the Permit's requirements concerning pesticide use.

To help meet this goal, staff members should:

1) Remember that ONLY staff designated through Public Works or the Maintenance Department may order, purchase and apply pesticides on City property, including over-the-counter pesticides.

2) To request removal of pests (such as mice, ants, wasps, etc.) from City property, please contact the Francisco Alvarez at x293 to initiate a work request.

3) Responsibly dispose of any existing pesticide containers found on City's property through the City's Hazardous Waste program. Contact Francisco Alvarez at x293

4) If any pesticides are currently stored in any City facilities (such as ant sprays, wasp sprays, etc.) and you are NOT a designated Public Works Dept. Pesticide Applicator, DISCONTINUE any further pesticide applications and dispose of the containers as outlined above (3)

Thank you for your help in our efforts to protect employee health and local water quality.

USE OF PESTICIDES

The City of Saratoga adopted an Integrated Pest Management (IPM) Policy and IPM Plans to address removing various pests from City property. The IPM Plans include strategies for removing pests (such as ants and wasps) using the least toxic methods possible.

The Calif. Water Board's Stormwater Discharge Permit requires municipalities to reduce pesticide use. One goal of the policy is to ensure that pesticides which are applied are handled only by staff who have received training in pesticide use and 'less toxic' pest control. By adhering to these plans, we meet the Permit requirements, and help provide a healthier environment for staff and the public.

If there are any questions about this procedure or the NPDES Stormwater Permit, please call:
Kristin Borel x258.

		facilities. The quantities of disposed product will be reported in annual report	• 18 x U-shape Fluorescent lamps: • 47 x 4 ft Fluorescent lamps: • 12 x 8 ft Fluorescent lamps	
	Mercury Plan (II.F)	Fluorescent Light Recycling Campaign Continue participation in the Mercury Ad Hoc Task Group and support ongoing implementation of an outreach program to about recycling fluorescent bulbs.	Mercury AHTG has now been disbanded. The Mercury AHTG developed the Mercury Plan , the Mercury Virtual Elimination Policy etc. (see http://www.scvurppp-w2k.com/mercury.htm for the list of products). The Mercury P2 Outreach Work Group was formed to implement the outreach requirements in the Mercury Plan. These included developing fact sheets, newsletter articles and media advertising. WVC support ongoing implementation by distributing info on fluorescent bulb recycling, and teaching about the issue presentations at schools and public events.	SCVURPPP & WVCWP to coordinate w/ HHW staff

Mercury Pollution Prevention Activities Evaluation

MERCURY AHTG

WVCWP staff focus in FY 08-09 was on local implementation, since the Program's Mercury PP Outreach Work Group has not been meeting.

Local implementation included outreach for free E-waste Recycling Events, mercury-free thermometer distribution, mercury outreach material distribution, and articles on mercury in municipal newsletters.

THERMOMETERS

Residents have responded well to thermometer exchange events, and to receiving Mercury-free thermometers.

WVCWP, WVC and San Jose Environmental Services Dept. have begun coordinating additional events in FY 09-10 at various venues. Efforts will be made to increase publicity for these events; some will be held mid-week and increased publicity may be needed in order to generate a turnout. Staff will attempt to evaluate effectiveness of holding mid-week events.

Thermometer events in FY 08-09 included:

MERCURY POLLUTION PREVENTION ACTIVITES
SARATOGA
Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2008-2009 ANNUAL REPORT

Source	WP Task	Work Plan Tasks	Accomplishments	Responsible Party

Audubon Wildlife Fair

Cupertino (bordering Saratoga) 10/25/08

Mercury-free thermometers, along with mercury outreach materials, were provided to parents accompanying their children to the WVCWP Enviroscape presentations at the Fair. **30** thermometers were distributed.

Residents were very pleased with the opportunity to receive a mercury-free, solar thermometer. Sierra Club member in attendance expressed strong interest in these thermometers, and an interest in distributing them, but the Club does not have funding to purchase these themselves.

Thermometer Exchange at LG Farmers Market

Los Gatos – 5/3/09

WVCWP coordinated an exchange which was staffed by Town of LG and City of San Jose Environmental Services Dept. A booth was set up at the weekly LG Farmer's Market. Residents were asked to bring in mercury thermometers, and were given mercury-free thermometers in exchange.

13 mercury thermometers were collected for proper disposal. City of SJ was impressed with the turnout by Los Gatos residents, since outreach materials had not been completed yet, so little outreach had been done. Residents attending the Farmer's Market were pleased to learn the Town was collaborating with the City of San Jose for this event.

WVCWP has coordinated with the other participants to hold this event again in FY 09-10. It will be held in conjunction with "Keep Los Gatos Beautiful" month in April 2010; this will allow for better outreach opportunities to publicize the event and encourage increased participation.

MERCURY OUTREACH - NEWSLETTERS

In Winter 2009, prior to the nationwide switch to digital television, WVCWP provided an article to all WVC municipal newsletters on proper TV disposal, and environmental impacts of mercury.

The article was printed in the municipal newsletters for Campbell, Monte Sereno and Saratoga.

For additional details on outreach related to Mercury, see "Public Information/ Participation" section of this report.

FY 2008-2009 ANNUAL REPORT

FY 2008-2009 Work Plan Self Evaluation Matrix

Activity	Source	Work Plan Tasks	Accomplishments	Responsible Party
Vehicle Washing Operations	CB-1	As part of the West Valley Industrial Commercial Inspection Program, promote improved car washing methods at auto businesses. Provide info on alternative arrangements for businesses with possible compliance problems. (Section 2.i of this work plan - Industrial Inspection Program)	The Stormwater Discharge Inspector distributes vehicle washing outreach materials during pro-active inspections and in relation to any actual or suspected vehicle washing incident. The Inspector is able to answer questions and offer suggestions with the help of visuals. A WVCWP-created fact sheet provides information on wastewater capture systems for automotive facilities. The fact sheet was designed to provide small-scale automotive facilities (those that find installing a full-fledged wash rack cost-prohibitive) with examples of inexpensive treatment technologies and distributor information. This method of outreach has been very effective.	WVCWP Inspector
Vehicle Washing Operations	CB-1	Place outreach material on proper vehicle/equipment washing at municipal counters, post offices, libraries and public events. Update WVCWP website to include copper information.	• WVCWP updated the "Car Wash Kit" flyer for car wash fund-raising events. The updated version was re-posted at City Halls. The Carwash Flyers were also posted on the City of Saratoga's website. • Car washing information is contained in the "Watershed Watch" brochure was has been distributed widely. • The WVCWP website home page (www.cleancreeks.org) features a graphic highlighting car washing, and a link to a printable PDF with information on proper car washing, and water quality degradation from improper washing: http://www.cleancreeks.org/images_new/carwashweb.pdf WVCWP also created a new brochure with info on copper and car washing, and with a Discount Card for use at local commercial car washes. The brochure included a list of participating car wash businesses. The brochure was distributed in Fall of 2008; the Discount Card expired as of Dec. 2008.	WVCWP staff

			WVCWP will discuss creation of an updated version for FY 09-10. See PI/P section for details.	
Vehicle Washing Operations & Pool/ Spa Maint.	CB-1 & CB-12	In classroom presentations, introduce impacts of copper on aquatic life; teach proper methods of car washing and pool & spa drainage using the Enviroscape watershed model.	WVCWP's classroom presentations are scripted to include hands-on activities so that students can watch pollutants, such as copper from car-washing activities & pool draining, flow directly to waterways. In addition to recommending the use of commercial carwash facilities, WVCWP encourages washing on a gravel or lawn area where wash water is captured and infiltrated. Students also learn about runoff from car wash fundraisers and the need to borrow the WVCWP Car-Wash Kit for any such event. Proper Pool Draining instruction includes photos of a Sanitary Sewer Cleanout, and other graphics about pool & spa drainage. School presentations in FY 08-09 included: St. Mary's School, Los Gatos – Presentation for 5th graders on 1-15- 09 Sedgewick Elementary, Cupertino 3-31-09 – Presentations for 2nd, 3rd, 4th, and 5th grades. St. Mary's School, Los Gatos – Presentations for Kindergartners graders on 5-21-09 In addition, children of various ages viewed Enviroscape presentations at various community events. See PI/P section for details.	WVWCP staff
Vehicle Washing	CB-1	Promote use of Car Wash Kit. Provide kit; provide training to charity car wash	**PROMOTING USE OF CAR WASH KIT** **Car Washing Advertising/Articles**	WVWCP staff

COPPER ACTION PLAN/NICKEL ACTION PLAN
FY 2008-2009 ANNUAL REPORT

Activity	Source	Work Plan Tasks	Accomplishments	Responsible Party
Operations		organizers. Document use in A/R. Solicit feedback from participants.	An short article on Car Washing & the Car Wash Kit was submitted to the 3 local weekly newspapers in late June 2009. The article was printed in July 2009. Car Wash Kit info was also included in a separate article which covered WVCWP projects; this article ran in the 3 local weekly papers in Feb 2009. WVCWP participated in a Car Washing media campaign, developed and run by SCVURPPP. In addition, WVCWP provided extra funding for the ads to run in the 3 local weekly papers, with a total combined circulation of 69,840. **New Car Wash Outreach Material** WVCWP developed a tri-fold size flyer on the subject of car washing. The flyer features info on copper, right and wrong ways to wash a car in terms of protecting creeks, a 'commercial car wash discount card', a list of participating local commercial car washes, and information on using the WVCWP Car Wash Kit. Car Wash Kit **Training** was given to Monte Sereno office staff (3) 7/25/08 by WVCWP Program Assistant. Topics: ▪ Runoff as Illegal Discharge – Municipal Ordinance ▪ Car Wash Fundraisers need to use free Car Wash Kit ▪ How kit works **Expanded Car Wash Kit Program** WVCWP worked to develop an expanded Car Wash Kit program. Staff solicited feedback from other successful programs in 3 states. A new Car Wash Kit program was developed, which would allow loaning of Kits to more users, with less need for direct WVCWP staff involvement (due to limited staff time). The new program will allow WVCWP to more heavily promote the use of the Car Wash Kit, because staff time will not be such a limiting factor if	

WEST VALLEY COMMUNITIES
SARATOGA
COPPER ACTION PLAN/NICKEL ACTION PLAN

Industrial Copper Control	CB-3	Continue joint Inspections with Fire Dept., targeting industrial sources for copper, e.g. metal plating and metal finishing facilities. **Saratoga** does not have any industrial facilities subject to inspection for this pollutant.	**Saratoga** does not have any industrial facilities subject to inspection for this pollutant.	SCVC Fire Dept.
Reducing Traffic Congestion	CB-6/7	Within the development permit process, encourage pedestrian oriented design practices (trails) and planning that will accommodate bicyclists (paths).	The West Valley communities encourage best design practices wherever practicable. These small communities tend not to have large developments conducive to requiring alternative transportation within the permitting process. However, the cities and the Town encourage alternatives transportation through other means: For several years, the cities of Monte Sereno and Saratoga, and Town of Los Gatos, have been working with CalTrans on improving bicycle and walking features along the stretch of Hwy 9 that links these 3 municipalities. The stretch is heavily used by bikers and walkers, and improvements would overcome current safety problems, thereby encouraging greater pedestrian/bicycle use of this transportation corridor. Hwy 9 – Phase II – in FY 08-09, work was conducted on planning of this phase to include pedestrian improvements along the corridor. Plan calls for filling in missing walkway gaps starting at Village in Saratoga and continuing through Monte Sereno and into Los Gatos _____ In FY 07-08 Saratoga completed improvements to bike lanes on Herriman Ave. and created a pedestrian walkway for the length of this road. Planners and Engineers work with project owners during

Copper/Nickel Action Plan Evaluation				

<u>Car Wash Outreach Evaluation:</u>

WVCWP initiated several new Car Wash outreach efforts this year:

-- Outreach to schools via letters and flyers to Facilities Maintenance Supervisors and Front Desk staff. This outreach was aimed at covering all schools in the

WEST VALLEY COMMUNITIES
SARATOGA
COPPER ACTION PLAN/NICKEL ACTION PLAN
FY 2008-2009 ANNUAL REPORT

Activity	Source	Work Plan Tasks	Accomplishments	Responsible Party

WVC. The main focus was on any car wash fundraising events that might take place on school property. However, it is hoped that the information will also reach school-based groups which might initiate car wash fundraisers (such as Band, Athletics, etc.) even if they choose to hold the car wash at a non-school site.

Any chance to evaluate results of this outreach is not expected to materialize until after school starts in Fall 2009. Results will be evaluated based upon determining whether there is an increase in calls requesting the Car Wash Kit.

-- WVCWP staff created a new outreach piece concerning residential car washing. This was a double-sided piece, with info on copper and car washing, and with a Discount Card for use at local commercial car washes. The brochure included a list of participating car wash businesses which accept the Discount Card.

The Card is available on the Watershed Watch website at http://www.mywatershedwatch.org/WW_Discount.pdf, but WVCWP staff anticipated that residents would appreciate:

--being made aware of the discount card, by picking up the outreach piece

--having the card printed out, in an easy-to-use format (just cut off the top part of the flyer, in order to have a wallet-sized card.

--seeing the card alongside a list of local, participating commercial car washes.

The brochure was distributed in Fall of 2008; however, the Discount Card expired as of Dec. 2008. Since the piece was created shortly before the Discount Car expired, it was not distributed widely, and so it was not possible to evaluate how well-received it was. WVCWP will discuss creation of an updated version for FY 09-10.

-- A short article on the necessity of using the Car Wash Kit for car wash fundraising events was initiated with the 3 local weekly newspapers in late June 2009. The article ran in the papers in July 2009. The articles in the 3 newspapers did generate a number of calls to the WVCWP office to discuss the Car Wash Kit. It appears that getting information on car washing into the local weekly papers is an effective means of disseminating car wash information.

Pool and Spa Maintenance:

In FY 07-08, WVCWP initiated outreach to residents via placing literature displays in a retail pool and spa store. When WVCWP staff returned to the store in FY 08-09, it was found that this type of outreach was well-received by the store, and a number of brochures had been picked up by residents.

In March 2009, an additional 30 brochures were placed at this retailer, and a new retailer was also approached; 20 Pool & Spa brochures were placed with the new retailer (Tradewind) for pickup by residents.

Educational Outreach Evaluation:

Both Pool & Spa draining and Car Washing are covered thoroughly during Enviroscape presentations at schools and at community events. Children appear to clearly understand the messages being conveyed. They actively learn about copper and brake pads by sprinkling powder which represents copper around a toy

WEST VALLEY COMMUNITIES
SARATOGA
COPPER ACTION PLAN/NICKEL ACTION PLAN
FY 2008-2009 ANNUAL REPORT

Activity	Source	Work Plan Tasks	Accomplishments	Responsible Party

car on the Enviroscape. They then watch the copper being washed into the 'creek' and down to the 'Bay' when the car is washed, and when 'rain' creates runoff on the watershed model. A number of Enviroscape presentations were given during FY 08-09. See PI/P section for details.

CITY OF SARATOGA:

Encouraging pedestrian- and bike-oriented transportation (trails, bike lanes and paths):

In FY 08-09, Saratoga created the "Oak Street Task Force" at which residents, parents and the administrators of Saratoga Elementary School are working to improve traffic flow around the school and on neighboring streets.

Bike rack installation – The City received 10 bicycle racks thru a grant program from VTA – The City installed them at Parks, trailheads and at bus stops in the City.

SARATOGA, MONTE SERENO, LOS GATOS:

Highway 9 upgrade (Encouraging pedestrian- and bike-oriented transportation (trails, bike lanes and paths):

Phase I has been completed (bicycle improvements).

Phase II – is in preliminary design (pedestrian improvements), and Phase III – is waiting for startup (bicycle loop installation and improvements to Austin Way intersection).

Hello,
I'm writing to you from the West Valley Clean Water Program (WVCWP).

We are the stormwater/ runoff pollution prevention agency for the Cities of Campbell, Monte Sereno, Saratoga and the Town of Los Gatos.

We're writing to you concerning any **Car Wash Events** (i.e. fundraisers) that might be held on school grounds.

Please forward this e-mail to any appropriate staff who might handle approval, scheduling, etc. for Car Wash Events -- including staff at each different school site.

Attached is a flyer that can be posted in relevant offices, detailing requirements for Car Wash Events.

For any questions about this e-mail, contact me at:

kottenberg@wvcwp.org

Here are points related to this issue:

1) Runoff from Car Wash Events is prohibited from entering stormdrains by Municipal Ordinance, pursuant to CA State Water Board regulations.

2) Runoff can be diverted from stormdrains by use of our agency's FREE Car Wash Kit.

3) In order to hold a Car Wash Event, the school should direct event organizers that they **MUST** contact WVCWP and schedule use of the Car Wash Kit.

4) Contact the WVCWP Inspector at: 408. 354. 4734 or by e-mail at office@wvcwp.org

Thank you for your cooperation in complying with this Municipal Ordinance.

Kathy Ottenberg
Program Assistant
West Valley Clean Water Program
18041 Saratoga-Los Gatos Rd.
Monte Sereno, CA 95030
408. 354. 4734

Protect Our Creeks during your next

Car Wash

Fundraising Event

Anyone organizing a **Car Wash Event**

in Campbell, Los Gatos, Monte Sereno or Saratoga

MUST borrow the **FREE Car Wash Kit** from

West Valley Clean Water Program *(WVCWP)*

The *State Water Board* requires municipalities to prevent Car Wash Event runoff from flowing into Storm Drains.

(Saratoga Municipal Code 6-15.070)

All Car Wash Events MUST use the ***Car Wash Kit***, which keeps runoff out of Storm Drains.

To schedule use of the Car Wash Kit, CONTACT

West Valley Clean Water Program at **408-354-4734** *or* **office@wvcwp.org**

- Copper washes off of car brake pads – and it's toxic to aquatic life
- Oil, coolant & other pollutants are also carried in car wash runoff
- Without the Car Wash Kit runoff flows straight into our creeks. With a Kit, dirty water is sent to the Wastewater Treatment plant.

WEST VALLEY CLEAN WATER PROGRAM

Honorable Christine Kehoe
State Capitol, Room 5050
Sacramento, CA 95814

March 30, 2009

Subject: Support of Senate Bill 346

Dear Senator Kehoe:

The West Valley Clean Water Program (WVCWP) strongly supports Senate Bill 346, which would restrict the use of copper and other toxic materials in vehicle brake pads.

WVCWP's member agencies, the Cities of Campbell, Monte Sereno, Saratoga and Town of Los Gatos, are required to control copper discharges to creeks, estuaries and the ocean under its National Pollutant Discharge Elimination System (NPDES) Stormwater Permit. Copper, an identified pollutant of San Francisco Bay, is toxic to phytoplankton, the base of the aquatic food chain, and has been shown to adversely impact salmon sensory organs, potentially compromising their ability to return to spawning streams and avoid predators. Through work completed by the Brake Pad Partnership, we now identify brake pads to be the largest single source of copper to waterways, and estimate they contribute as much as 35% of the copper reaching San Francisco Bay. Individually, or even collaboratively, local governments under NPDES Stormwater Permits are not able to effectively control brake dust, leaving legislative action as the only viable alternative to reduce the copper loadings at its source – brake pads.

As members of the Santa Clara Valley Urban Runoff Pollution Prevention Program (SCVURPPP), we are proud to be one of the original founding supporters of the Brake Pad Partnership, and have continually supported their efforts for over 15years. The Partnership is a collaborative group comprised of government staff, brake pad manufacturers and environmentalists, working together for a solution to this issue. The problem has been studied, quantified, and all participants now agree that an orderly phase-out of copper is in everyone's best interest. The Partnership garnered support of brake pad manufacturers for legislative action because without more definitive restrictions, less responsible manufacturers could continue to sell high copper content brake pads in California. The Partnership also has support of environmentalists because of impacts copper has on ecosystems, and because the bill would also address lead and asbestos which still appear in brake pads sold by less responsible manufacturers.

We are encouraged by the Partnership's ability to build consensus among its stakeholders and together with them, we strongly support Senate Bill 346 going forward to the Environmental Quality Committee. Controlling this key source of copper is of critical importance.

Thank you for your energetic leadership on so many important environmental issues like this one!

Sincerely,

Kelly J. Carroll

Kelly J. Carroll, PE

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2008-2009 ANNUAL REPORT

Source	WPActivity	Work Plan Tasks	Accomplishments	Responsible Party
	Program's Trash Work Plan	Management Practices Continue to identify and implement trash control measures, where practical and feasible, to reduce trash and debris.	Control measures in addition to scheduled/systematic control measures • notify Caltrans when exceptional litter or debris problems are noticed along highways/freeways and around on-ramps • conduct removal of trash and litter as needed at sites within municipal jurisdiction • remove trash (where feasible) at some sites in Caltrans' jurisdiction • monitor identified problem areas • hold volunteer cleanup events at problem sites, when feasible • highlight litter problems during classroom presentations • WVC inspectors for industrial/commercial and construction sites watch for litter and illegal dumping. Inspectors will consider an accumulation of debris at a site to be a stormwater violation and refer such sites to the Stormwater Discharge Inspector. Systematic Control Measures • Trash collection is mandatory for WV residents - via WV Collection & Recycling (WVC&R) • WVC&R holds free, curbside Waste Collection days for items weighing up to 70 lbs, wood scraps and other items (i.e. items not usually allowed under weekly collection guidelines).	
			SARATOGA: • City of Saratoga now ensures that recycling bins are placed at (& picked up from) all events held in the City. • City crews cleaned up 6 trash situations which were found/reported (couch, refrigerator, TV, paint, car battery, trash)	Parks & Streets Spvsrs WVCWP staff to assist

TRASH INVENTORY & MANAGEMENT
Saratoga
Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2008-2009 ANNUAL REPORT

Source	WPActivity	Work Plan Tasks	Accomplishments	Responsible Party
			• Notified CalTrans 3 times in FY 08-09 concerning dumping of woods chips observed in CalTrans jurisdiction. • Two creekside clean-up events were sponsored by the City in FY 08-09: Calabazas Creek and Big Basin Way. See 'Evaluation' section for details. • WVC&R holds free, curbside Waste Collection days for items weighing up to 70 lbs, wood scraps and other items (i.e. items not usually allowed under weekly collection guidelines). The City is making efforts to reduce the overall level of trash generated by residents. In conjunction with the WVC&R 'extra collections' day (unlimited curbside pick-up for residents). the City is promoting 'garage sales' prior to waste collection event. The "Citywide Community Garage Sale" is promoted in the municipal newsletter (The Saratogan) which is delivered to all households.	
	Trash Problem Area Activity Report	Provide City/ Town Specific Information Provide Program staff with specific information on trash management practices implemented within the City's jurisdiction using program-wide standardized reporting forms.	WVCWP staff used SCVURPPP's standardized reporting forms to provide data on trash monitoring and management activities at the listed problem sites. Details can be found in the Program report. 			City of Saratoga sponsored 2 Creek Cleanups in FY 08-09. Volunteers were provided with tally sheets and were trained in trash monitoring at these events. See "Evaluation" section below for details.	

Trash Inventory & Management Evaluation

General Evaluation of Trash Problems

TRASH MONITORING

After several years of monitoring trash sites, WVCWP staff is familiar with the sites and the problems that need to be addressed. Two leading trash sources in West Valley communities are "Illegal dumping" and "vehicular litter" (found along highways, freeway-on-and-off-ramps, and smaller arterial roads). The type of litter that is retrieved is predominantly snack, food, beverage and other product packaging and cigarette butts.

WVCWP staff have found that having Creek Cleanup volunteers use 'Tally Sheets' is helpful. However, it has been noted that having volunteers compute TOTAL TRASH at the end of an event tends to overstate the amount of trash collected. Perhaps due to the 'sense of accomplishment' at the end of their efforts, volunteers seem to inflate the amount of trash per bag.

Therefore, a 1/3 or 1/2 full bag becomes 'a bag', as if it is a full bag. So, for example, an event with 10 bags that are 1/2 full, plus 6 bags that are actually full, could become "16 bags of trash collected" – rather than the more accurate **5 bags** (10 bags x 0.5 – half full = **5 full bags**) + **6** full bags = **11 bags**.

Staff will make an effort to convey the importance of accurate totals to volunteers in the future.

SCHOOL INVOLVEMENT

School lunch yards can be another source of trash, and WVCWP regularly holds outreach activities at schools, including cleanups, to address this issue. However, recent litter pickup events at schools have found relatively little trash. WVCWP has found that it is more effective to have 1 class work on litter pickup (such as during an Enviroscape presentation rotation) than to have a whole school turn out – because the school yard may be too clean to generate much litter pick-up activity for a large group of students. This approach was tried at St. Mary's Elementary School (Los Gatos) in FY 08-09 and it worked well.

WVCWP TRASH ACTIVITIES EVALUATION

Creek Keeper Events – Volunteer Participation - Trash Identification, Tallying & Pick-up

WVCWP hosted 2 Clean-up events, with Trash Monitoring training and completion of tally sheets.

Coastal Cleanup Day

San Tomas Aquino Creek @ Westmont High 9/20/08

WVCWP and City of Saratoga Staff hosted a Cleanup Event at the site where it has regularly hosted this event.

Volunteers were instructed in use of Tally sheets, and were provided with clipboards, etc. Working in groups, volunteers were able to pick up trash and carry out trash monitoring.

15 Volunteers attended along with WVCWP and City of Saratoga staff.

Distributed 15 reusable bags (purchased from Safeway with gift card donated by Safeway to WVCWP).

Trash Totals from all events are found in Attachments (Trash Summaries)

The Cleanup Event was covered in articles appearing in 3 weekly newspapers; details are listed in the Newsletter/Press Release section (above; also see PI/P Section Attachments *(Coastal Cleanup Day article)*.

National River Cleanup Day

San Tomas Aquino Creek @ Westmont High 5/09

WVCWP and City of Saratoga Staff hosted a Cleanup Event at the site where it has regularly hosted this event.

Volunteers were instructed in use of Tally sheets, and were provided with clipboards, etc. Working in groups, volunteers were able to pick up trash and carry out trash monitoring. Trash Totals from all events are found in Attachments (Trash Summaries)

CREEK CLEANUP EVALUATION

The site usually used by WVCWP site for Creek Cleanups is being evaluated by staff. It appears that there is less trash to be picked up at the September event than at the May event. This is possibly due to the fact that a Cleanup is held in May, then school is out for 3 months; the weather during this period is not windy & rainy, so trash isn't being carried into creek – in Sept. school has just started up. This may result in there being less trash in May than in Sept.

WVCWP will investigate the possibility of hosting a Cleanup at a different site in September, where lots of summertime activity would be taking place, which might be more likely to have trash built up in Sept. Cleanup at such a site would help prevent trash from entering the creeks when rains start later in the Fall.

CITY OF SARATOGA

Saratoga Creek at Big Basin Way and Sunnyvale-Saratoga Road is a heavily vegetated area with a steep bank that tends to be used for illegal dumping. Saratoga Creek lies adjacent to the parking lot of businesses along Big Basin Way; the buildings shield the parking lot from view, making it easy for perpetrators to dump into the creek without being seen. The Sheriff has been notified of the problem, and deputies patrol the area when possible.

This area of Saratoga Creek has received attention from the City of Saratoga and WVCWP, along with volunteers, for the past several years. Cleanups have been conducted along the parking lot and down the bank, where possible. The banks of the creek are very steep with litter lodged between trees and vegetation about 25 feet from the high-water line.

The City continues to work with the Sheriff's Dept to try to monitor Big Basin Way parking lots at night, for illegal dumping. During daylight hours, the City Code Enforcement Officer and Street crews are also driving through and monitoring for trash. The Code Enforcement Officer also monitors the dumpsters and makes sure that lids are on and no trash is being dumped at the sites.

These efforts appear to be having a positive impact on reducing trash in this area. A creekside cleanup held in May 2009 found the site to be noticeably cleaner that it has been during previous cleanup events.

City of Saratoga staff have been making a pro-active effort to organize, and to participate in, creek cleanup events. In FY 08-09, City staff organized 2 City of Saratoga events, and also served as sponsoring staff at 2 events organized by WVCWP.

City of Saratoga Creek Cleanup Events results:

City staff worked to organize and sponsor 2 Creek Cleanup events in FY 08-09. Staff worked with WVCWP to obtain gloves, trash bags, litter grabbers, etc. for the events. A local church, and a local elementary school were found to be good sources of volunteers for these events.

Calabazas Creek

3/22/09 - City of Saratoga

Volunteers were instructed in use of Tally sheets, and were provided with clipboards, etc. Working in groups, volunteers were able to pick up trash and carry out trash monitoring.

17 Volunteers participated (all from Saratoga Presbyterian Church)

Appx. 25 bags of trash were collected

Saratoga Creek at Big Basin Way

5/26/09 - City of Saratoga

Volunteers were instructed in use of Tally sheets, and were provided with clipboards, etc. Working in groups, volunteers were able to pick up trash and carry out trash monitoring.

Appx. 10 bags of trash were collected

City of Saratoga Trash Outreach/ Public Education

The City has attempted to provide public education through use of the local weekly newspaper (Saratoga News) and the municipal newsletter (The Saratogan).

Styrofoam Food Containers

The City was able to generate an article in the Saratoga News, covering Saratoga Mayor Chuck Page's campaign to get businesses to halt use of Styrofoam containers. The article ran on April 28, 2009, and covered issues related to getting Styrofoam out of the trash stream, it's lack of biodegradability, etc. The article may be viewed in the PI/P section, Attachments *(Styrofoam pdf)*.

Construction Waste Recycling

Another article, featuring topics for Earth Day (April 2009), covered the viability of recycling construction waste from home remodeling projects (which are numerous in the City of Saratoga). The article may be viewed in the PI/P section, Attachments *(Earth Day pdf)*.

Saratoga Annual Cleanup

The City was able to obtain publicity in the weekly 'Saratoga News' promoting the West Valley Collection & Recycling 'cleanup days' and encouraging residents to participate in the city-wide garage sale to prepare for the annual cleanup.

"The Saratogan" sent this information to all Saratoga households:
"This summer residents have the opportunity to reduce waste and earn some spare change during the city-sponsored community garage sale. This event will take place on August 8, 2009 with registration starting in June 2009. The City will provide free citywide advertising, a listing of garage sale locations on the website, garage sale tips for those who register, and donation collection sites for unsold items and electronic waste.

The Saratoga annual cleanup is scheduled for July 13, 2009 – September 18, 2009. Specifi c dates and information will be mailed to residents."

WEST VALLEY
CLEAN WATER PROGRAM

Charles R. Hoppin, Chair
State Water Resources Control Board
1001 I Street
Sacramento, CA 95814

June 3, 2009

Re: Support for Expanded Use Proposal No. 16877-Bay Area-wide Trash Capture Demonstration Project

Dear Mr. Hoppin,

The West Valley Clean Water Program (WVCWP) supports proposal No. 16877-Bay Area-wide Trash Capture Demonstration Project submitted by San Francisco Estuary Project (SFEP) and Association of Bay Area Governments (ABAG) for installation of trash capture devices in catch basins in Bay Area cities and counties. WVCWP represents the urban runoff program for four small south San Francisco Bay communities: Campbell, Los Gatos, Monte Sereno and Saratoga.

Over the past year we have been closely tracking the Trash Capture Pilot Demonstration Project by our county-wide urban runoff program (aka: SCVURPPP), and have contemplated, given our limited and scarce local resources, how our communities might also install such capture devices in selected areas. By funding this project and including our smaller agencies in the proposed Bay-Area Project, we could have a visible and tangible effect on reducing trash entering waterways through storm drains.

Furthermore, being at the top of the watershed, we know that even if only a few devices are installed within our communities, they will have a significant impact on trash and litter in waters downstream. We are committed to watershed approaches and support this project's effort to embrace and further watershed based solutions.

Respectfully,

Kelly Carroll
Program Manager

FY 08-09 ANNUAL REPORT

Training Summary: Pesticide

City of Campbell: All parks staff who hold "Qualified Applicator Certificates (QAC) or higher from the CA Dept. of Pesticide Regulation, pursue the necessary CEUs to maintain their certificates, and are currently up-to-date. Annual Department of Agriculture Pesticide Safety Training for all Parks Maintenance crew was held on June 4, 2009 at the City's Corporation yard.	June 4, 2009	City of Campbell (33) Parks and Maintenance Crews
Town of Los Gatos: The Annual Pesticide Safety Training was held on April 14, 2009. Dennis Merrill, president of *Killroy/ Sensitive Solutions Pest Control* gave the presentation. 11 Town of Los Gatos Parks & Public Works staff attended. The Training stressed Safety, Environmental Hazards and Drift – if winds are 5 mph or more, the Town will not spray any pesticide. The Safety Training covered 9 different pesticides. Topics related to runoff issues included: • Labeling • Hazards • Routes pesticides can enter the human body • Drift • Runoff • Wildlife Hazards • Laws & Regulations	April 14, 2009	Town of Los Gatos (11) Parks and Public Works Staff

Town of Los Gatos: A Tailgate Training on use of broadleaf control pesticides was held in June 2009 (Roundup, Garlon, Surflan) with emphasis on avoiding spraying (applying granules when possible), applying only on days when there will be no runoff (no rain predicted, no irrigation scheduled), and avoiding use of pesticides when possible (ie using hoes instead). .	June 2009	Town of Los Gatos Maintenance Staff (11)
CITY OF SARATOGA: The Annual Pesticide Safety Training was held on July 25, 2008. It was held at Saratoga Corp yard and all of the Parks and Streets Maintenance staff attended. The training was given by Pete Howes, Horticulturist, and covered long & short-term effects of pesticides and environmental concerns.	July 25, 2009	City of Saratoga Parks and Street Maintenance Staff
CITY OF SARATOGA: All Parks staff received IPM training in June 2009 All 9 Parks Dept employees have Qualified Applicator Certificates, and have been attending seminars for their Continuing Education hours. Some seminars include topics related to IPM and Less Toxic Pest Control.	June 2009	City of Saratoga Parks Staff (9)

San Francisco Bay Region
Regional Water Quality Control Board
1515 Clay St., Suite 1400
Oakland, CA 94612

Subject: Sunnyvale Urban Runoff Management Program FY 2008-2009 Annual Report

Dear Mr. Wolfe:

This report is submitted by the City of Sunnyvale, in conjunction with the Santa Clara Valley Urban Runoff Pollution Prevention Program's Annual Report, pursuant to provision C.6.a. of the Program's municipal storm water NPDES Permit. The report summarizes activities performed during FY 2008-2009 in accordance with the City of Sunnyvale's Urban Runoff Management Plan (URMP) submitted on September 1, 2005, which contains modifications to the performance standards from the original URMP first submitted in 1997.

The goals of this Annual Report are to: 1) concisely document implementation of the URMP during the past fiscal year; 2) evaluate program results for continuous improvement; and 3) share this information with other Co-permittees, municipal decision-makers, and the public. To accomplish these goals, the report contains the following Attachments:

A. Certification statement
B. ICID Elimination Activities
C. Industrial/Commercial Discharger Control Program
D. Public Agency Activities
   1. Public Streets, Roads, and Highways O&M
   2. Rural Public Works O&M
   3. Storm Drain O&M
   4. Water Utility O&M
   5. Corp Yard O&M
E. New Development Planning Procedures
F. Construction Inspection
G. Public Information and Participation
   - General Outreach
   - Targeted Outreach
   - Educational Programs
   - Citizen Participation
H. Pesticide Management Activities
I. Mercury Pollution Prevention Activities
J. Copper Action Plan/Nickel Action Plan

ADDRESS ALL MAIL TO: P.O. BOX 3707 SUNNYVALE, CALIFORNIA 94088-3707
TDD (408) 730-7501
Printed on Recycled Paper

K. Trash Inventory and Management
L. Water Quality Monitoring
M. Staff Training Summary Table
N. Watershed Management Activities
O. PCB Plan Development
P. Watershed Measures: Sediment Impairment Studies
Q. Storm Water Permit Renewal Activities

No comments were received from Regional Water Quality Control Board Staff on the FY 07-08 annual report submitted by the City, consequently, the report is substantially the same format as past years.

A summary of the City of Sunnyvale's Urban Runoff Program highlights and accomplishments are described below:

1) A significant amount of staff time and effort is dedicated to implement the C.3 provisions of the permit for applicable projects (i.e., those that add or replace 10,000 square feet or more of impervious area), construction inspection, and implementation of post-construction inspections as C.3 applicable projects are completed. A number of initial projects approved under the C.3 requirements are now complete and have undergone post-construction inspections this year. Reports on the post-construction inspections of those projects are included in this report in Attachment E, Appendix 1 Table 2.

2) In previous years, Sunnyvale completed a number of trash assessments using both the Keep America Beautiful on a variety of land uses and the Urban Rapid Trash Assessment (URTA) methodology in several local waterways. Rather than continue devoting resources to assessing trash in areas around Sunnyvale using the URTA methods, more actions were initiated to help remove and prevent litter from entering waterways. Only two locations were assessed on the Sunnyvale East and West Channels in FY 08-09 using the URTA, which are storm water conveyances for a significant portion of the city.

The efforts that were initiated in FY 08-09 to address the trash/litter accumulation in storm drains and waterways issue were:

- Sunnyvale hosted a site for the Coastal Clean Up Day event in September 2009 along the Guadalupe Slough, where it surrounds the Sunnyvale Water Pollution Control Plant's oxidation ponds. The Slough receives flow from San Tomas Aquino Creek, Calabazas Creek, Sunnyvale East Channel and Sunnyvale West Channel, as well as being tidally influenced by South San Francisco Bay. The event was very successful and plans are underway to support the event at the same location again this September.
- Sunnyvale participated in the Great American Litter Pick Up event held in April 2009, that focused on removing litter from three Sunnyvale neighborhoods (approximately 3 square miles- an increase over last year's efforts)
- Sunnyvale participated in the National River Clean-Up Day in May 2009 coordinating volunteers who picked up litter and debris from banks of the Sunnyvale East Channel and one side of Calabazas Creek, where it surrounds Sunnyvale Baylands Park.

- In cooperation with SCVURPPP and the City of San Jose, Sunnyvale continued participating in the pilot storm drain retrofit project. A total of thirteen storm drain inlet inserts that have been certified to meet the "full capture" criteria established by the Los Angeles area Regional Board were installed in areas around the city. The sites selected were based on data collected from inlet cleaning and on observations of adjacent land uses that may contribute to accumulations of litter. Preliminary data regarding the types and quantities of materials captured by these devices are included in this report in Attachment K, Appendix 1. Operations and maintenance requirements for the units as well as costs associated with them will be a major focus of this pilot project, with the information to be reported at the end of the pilot which will be made available in the fall of 2009.

- Additional outreach efforts, including media litter pollution prevention messages and litter pollution prevention education in schools were accomplished in FY 08-09. See Attachment G for details.

3) The PI/P Program continued with its effective outreach to local residents at the Sunnyvale Farmer's Market, school presentations, neighborhood and corporate fairs, pancake breakfasts, and many other community events, providing a good venue for distribution of literature and 1:1 discussions with residents on the importance of and ways to prevent storm water pollution. A significant effort was made to successfully increase the number of presentations at schools, which has been very successful and well received by teachers. Descriptions of these activities and their effectiveness are included in Attachment G.

4) City staff continues to play a significant role in implementing the Santa Clara Valley Green Gardener Training/Certification program, in cooperation with other co-permittees, the Metropolitan Adult Education Program in San Jose, and the Santa Clara County Master Gardeners. Four classes of this training program for landscape maintenance workers, landscape contractors, and professional gardeners was held in FY 08-09, with over 50 individuals successfully completing the attendance and final exam requirements for the class.

The Green Gardener program originated in Santa Barbara and has been successfully implemented there, as well as in Monterey and Santa Cruz counties. The main focus of the training is to reduce urban stormwater pollution resulting from landscape management practices, to use resources wisely, and to practice the key principles of ecological landscaping. Students received 20 hours of training in the following topics: promoting healthy soils, Integrated Pest Management (IPM), fertilizer use and application, irrigation techniques, scheduling, and troubleshooting, selecting the right plants for the right place, proper pruning, the beneficial uses of mulch and compost, and issues related to air quality from maintenance equipment.

Two awards were received for Santa Clara Valley Green Gardener program's implementation in FY 08-09. One was received from the California Storm Water Quality Association for their 2008 Outstanding Regional Stormwater News, Information, Outreach and Media Project. The other award received was IPM Innovator Award for 2008 from the Department of Pesticide Regulation.

Thank you for your review of this Annual Report. We look forward to receiving any comments you may have. If you have any questions regarding the materials submitted, please contact Kristy McCumby Hyland at (408) 730-7274.

Sincerely,

Lorrie B. Gervin, P.E.
Environmental Division Manager

Performance Standard Completion Certification Statement

"I certify, under penalty of law, that the City of Sunnyvale has implemented all elements of the following performance standards, except as described in the Self-Evaluation Matrix in Attachments B - Q of this FY 08-09 Annual Report, according to the policies and procedures described in the City of Sunnyvale's Urban Runoff Management Plan dated September 1, 2004:

- Illicit Connection and Illegal Discharge Elimination Activities
- Industrial/Commercial Discharger Control Program
- Public Streets and Roads Operations and Maintenance
- Storm Drain Operation and Maintenance
- Water Utility Operation and Maintenance
- Corporation Yard Operation and Maintenance
- Rural Public Works Operation and Maintenance
- New and Redevelopment Planning Procedures
- New and Redevelopment Construction Inspection Procedures
- Public Information and Participation
- Integrated Pest Management

Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, this information is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations."

FY 08 - 09 Annual Report

Attachment B

IC/ID Elimination Activities

P.S. Id.	Activity	CI Item Source[1]	FY 08-09 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
	Illicit Connection & Illegal Dumping Elimination Activities					
	Effectiveness Evaluation of Enhanced Illicit Connection/Illegal Discharge (ICID) Reporting	Permit Prov. c.6.a.ii	Compile results recorded on the IC/ID standard reporting form for Type of Incident and Source of Incident. Identify new public outreach efforts and improve on existing materials. Continue to collect data for enhanced IC/ID reporting.	• The Pretreatment Program continues to compile results on the IC/ID standard reporting form for the Type of Incident and Source of Incident. • Efforts to identify new public outreach materials and venues continue. Residential sources continue to be the most prevalent sources of incidents, and among those, pools / spas / and fountain discharges, along with leaky vehicles are the most common type of incident.. • These types of incidents are being reported at a higher frequency much in part due to outreach efforts including articles in the Sunnyvale Quarterly report, and utility bill inserts. The public is becoming increasingly aware of the potential threats from these types of discharges, and is reporting them more frequently.	Annually Report 09/09	Sarah Scheidt, Sr. Ind. Waste Insp. & Steve Schmidt, Laboratory/ Pretreatment Mgr.
ICID-3a	Annual Training	URMP	Continue annual training for staff regarding IC/ID storm water inspection procedures, enhanced reporting requirements for ICID incidents, effectiveness evaluation and public outreach.	• Five staff members attended the CWEA Annual P3S Conference in Monterey, March 2009. One session attended was how to measure effectiveness of a pollution prevention program. • ICID storm water inspection procedures and inspection / enforcement results are discussed during weekly tailgate meetings.	Annually Report 09/09	Steve Schmidt, Laboratory/ Pretreatment Mgr., Sarah Scheidt, Sr. Ind. Waste Insp. & Kristy McCumby.

[1] Place where continuous improvement item is identified: e.g. Urban Runoff Management Plan (URMP); **WP 08-09** (last year's Sunnyvale work plan); **Permit Provision** from Order No. 01-024 and Revised Order No. 01-119; Program Work Plan (**PWP**) task number submitted to the Regional Board and identified for inclusion into co-permitees in work plans; or **Program** (task approved by the Management Committee for all co-permittees). The **P.S. Id.** column refers to the specific performance standard in the Sunnyvale URMP.

P.S. Id.	Activity	CI Item Source[1]	FY 08-09 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
				• Topics of discussion include proper categorization of source and types of incidents in accordance with enhanced reporting requirements, enforcement and consistency with our ERP, and potential outreach opportunities. • Annual staff training is provided to other city employees regarding the reporting of incidents observed as they perform their work in different locations within the city. The "Discharge Response Card" is provided to employees with instructions as to numbers to call the types of incidents that should be reported.		
Illicit Connection and Illegal Dumping Elimination Activities (cont.)						
ICID-3.b	Restaurant IC/ID Reporting	URMP	Continue to review the effectiveness of Restaurant BMP materials. Note problem practices observed. Follow up with appropriate changes to educational materials and/or enforcement actions, as needed.	• The Pretreatment Program continues to evaluate the effectiveness of Restaurant BMP materials in use. Participation in regional groups such as BAPPG has given additional insight to new educational materials that may benefit the City's program and be implemented within restaurants. • Problem practices within restaurants are recorded on inspection forms, and will be used to evaluate educational materials provided in the future; and are used to justify enforcement actions.	Annually Report 09/09	Sarah Scheidt, Sr. Ind. Waste Insp. & Steve Schmidt, Laboratory/ Pretreatment Mgr.

Illicit Connection and Illegal Dumping Elimination Activities (cont.)						
ICID-5a	Effectiveness Evaluation	URMP	Evaluate responses to reported incidents and complaints. Determine effectiveness of program through review of ICID incident responses and resolution efforts. Identify areas for improvement.	• All responses to reported incidents and complaints occur within the time allotted in our performance standard (5 business days), and in a majority of cases are responded to within one day of the complaint. • The program follows through with each incident until it is resolved, usually through education and communication, and rarely resulting in increased enforcement actions.	Annually Report 09/09	Sarah Scheidt, Sr. Ind. Waste Insp. & Steve Schmidt, Laboratory/ Pretreatment Mgr.
ICID-5b	Performance Standard revision	URMP	Review the IC/ID Performance Standards with staff. Draft new performance standards, as necessary, to meet the needs identified in the effectiveness evaluation of the enhanced IC/ID program. Implement changes, as needed.	In anticipation of the new Municipal Regional Permit, no new Performance Standards have been drafted. Sunnyvale staff is participating in a newly created ad-hoc committee to address specific local and regional approaches and program development for the IC / ID standards.	Annually Report 09/09	Sarah Scheidt, Sr. Ind. Waste Insp. & Steve Schmidt, Laboratory/ Pretreatment Mgr.

Industrial/Commercial Discharger Control Program

044955

P.S. Id.	Activity	CI Item Source	FY 08-09 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
Industrial/Commercial Discharger Control Programs						
ICD-3(a-d)	General Industrial Permit Facilities	URMP	Complete annual inspection of all industries regulated under Industrial Permit (NOI Filers).	• 96% of the current NOI filer list for Sunnyvale was inspected during FY 08/09. One facility not inspected because they recently filed for NOTs and do not have any outdoor process or storage that are exposed to stormwater. • The NOI list was reviewed and revised at the beginning of FY 08/09 and will be reevaluated for FY 09/10.	Annually Report 09/09	Sarah Scheidt / Senior Industrial Waste Insp. & Steve Schmidt,, Lab./ Pretreatment Mgr.
ICD-4	Field Investigation	URMP and Program Task	Review SWID location lists from SCVWD and facility inspections by Sunnyvale staff. Evaluate known SWIDs for potential pollutant sources that could impact groundwater.	There were no SWIDS identified during FY 08/09.	Annually Report 09/09	Sarah Scheidt / Senior Industrial Waste Insp. & Steve Schmidt,, Lab./ Pretreatment Mgr.
ICD-7.a	Record Keeping	URMP	Continue efforts to improve record keeping activities. Discuss progress at staff meetings.	• During each bi-weekly tailgate meeting, the Pretreatment Program addresses all threatened and actual discharge events to ensure that enforcement and related documentation is maintained and consistent. • The internally developed commercial database provides extensive capabilities for generating customized reports per inspector, street, facility type, or by inspection date. These features increase our capability to document effectiveness, trends and to fulfill the program standards.	Annually Report 09/09	Sarah Scheidt / Senior Industrial Waste Insp. & Steve Schmidt,, Lab./ Pretreatment Mgr.

Industrial/Commercial Discharger Control Programs (cont.)						
ICD-7.a	Performance Standard revision	URMP	Review existing performance standards and draft new performance standards, as necessary as a part of continuous improvement.	The Pretreatment Program did not make any changes to the Performance Standards in FY 08-09. The issuance of the new Municipal Regional Storm Water Permit will direct changes in future performance standards. Sunnyvale Pretreatment staff will be participating in a regional ad-hoc committee to address future ICD / IND permit requirements and program implementation through a consistent regional approach, yet specific to Sunnyvale's regulatory customers.	Annually Report 09/09	Sarah Scheidt / Senior Industrial Waste Insp. & Steve Schmidt,, Lab./ Pretreatment Mgr.
ICD-7.a	Annual Training	URMP	Continue annual training for staff regarding industrial/commercial storm water inspection procedures, enhanced reporting requirements for ICD inspections, effectiveness evaluation and public outreach.	Personnel attended the CWEA Annual P3S conference in Monterey. See Attachment M for specific training completed by City personnel.	Annually Report 09/09	Sarah Scheidt / Senior Industrial Waste Insp. & Steve Schmidt,, Lab./ Pretreatment Mgr.
	Enhanced Industrial/Commercial Discharger (ICD) Reporting	Permit Prov. C.6.a.i	Continue to collect data for enhanced ICD reporting. Coordinate with Program staff and share ICD information on a regular basis.	• Enhanced reporting data continues to be submitted to the SCVURPPP on a quarterly basis. IND report information is discussed at staff meetings to assess outreach or enforcement needed and program effectiveness. Communications with Public Works Sewer and Water Division includes sewer line blockage reporting for data input and related follow up. • See Appendix 1 of this Attachment for the IND/ICID Reporting tables.	Annually Report 09/09	Sarah Scheidt / Senior Industrial Waste Insp. & Steve Schmidt,, Lab./ Pretreatment Mgr.

Street Sweeping Data Collected for FY 08 - 09

Santa Clara Valley
Urban Runoff
Pollution Prevention Program

FY 2008-2009 Annual Record Keeping Form

Year: FY 08-09

Agency: City of Sunnyvale

Completed by: Brendan McCarthy, Administrative Aide **Date:** June 30, 2009

STREET SWEEPING	Volume of material collected (cubic yards)	Miles swept* (curb miles)
1. Sweeping		
Residential Areas:		
Broom		
Regenerative Air	6946	10,478
Vacuum		
Commercial Areas:		
Broom		
Regenerative Air	1966	(1) 4290
Vacuum		
Industrial Areas:		
Broom		
Regenerative Air		(1)
Vacuum		
Other Areas Swept: (e.g., parking lots, major arterials)		
Broom		
Regenerative Air		
Vacuum		(1)
TOTAL	8912	14,768

2. Have there been any changes in your street sweeping program?
(efforts to have parked cars removed, changed sweeping frequency, new equipment, significant downtime, etc.)
Sweeping is scheduled once per month in residential areas, more frequently in commercial areas. When requested, staff will post "No Parking" signs to remove parked cars in problem areas. Frequency is increased during heavy leaf drop season, and returned to reduced schedule during other seasons.

LEAF REMOVAL

Volume of leaves removed by City/Town crews: 994 **cubic yards**

Leaves bagged by residents and picked up by your City/Town: N/A bags

Check box if you have a yard waste collection program: X Volume of yard waste collected: 14,280 tons (2) ~~cubic yards~~

Check box if you do not have a leaf removal program other than routine street sweeping or yard waste collection: ☐

- Report total miles covered by sweepers including areas operated in tandem or repeated.

(1) These areas are all swept together (commercial, industrial, parking lots, arterials, no individual numbers are available.
(2) This is the total of yard waste trimmings collected from single family homes in FY 08-09

Rural Public Works Operation and Maintenance

044968

P.S. Id.	Activity	CI Item Source	FY 08-09 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
	Rural Public Works					
	Rural Public Works Activities	Permit Prov. C.5	Implement applicable Rural Public Works Performance standards and BMPs. Continue education of Parks and Rec. and Field Services staff regarding rural PW BMPs and performance standards.	• Rural PW Performance standards apply to limited areas within the Sunnyvale Baylands. No grading or maintenance work that required moving earth was performed this year. • Vegetation management was performed in this FY. Mechanical means were used for vegetation (weed) removal for trail maintenance needs and BMPs were followed. • Field Services staff maintains a log to have maintenance or corrective activities for rural areas separate from regular street or storm work. • A Parks staff representative attended the Rural Public Works training provided by SCVURPPP this year. Rural Public Works BMPs are covered as part of the training for Public Works Field Services staff annually. • Staff training on Rural PW Performance Standards and BMPs is included in Streets and Roads Division and Parks and Rec. Dept. annual training. See Attachment M for staff training information.	Ongoing Report 08/09	Kristy McCumby, Environmental Specialist, Parks / Rec. (Scott Russell) & Public Works (Tony Pineda)

Storm Drain Operation and Maintenance

P.S. Id.	Activity	CI Item Source	FY 08-09 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
Storm Drain System Operation and Maintenance						
SD-1	Storm Drain O&M Pollution Control Measures	URMP	Continue program to re-label storm drain inlets with identification tags or stenciling with "No Dumping, Flows to Bay" messages.	A database was created in FY 06-07 and is the basis for ID tag replacement program. The tag replacement program continued in 08-09 with 100 SDI's labeled in the Moffett Park area of the City	Report in 09-09	Jim Craig/ Tony Pineda, PW/ Field Services
SD-2	Reporting of Observed ICID Evidence	URMP and Permit Prov. C.6.a.ii	Continue to train maintenance staff on procedures to notify Pretreatment Inspectors about observed ICID incidents and assist with the collection of data needed for enhanced reporting.	Training was provided to Field Services staff from October 6-8, 2008. Staff was provided with ICID response cards and contact information to report ICID incidents. Annual review of enhanced ICID reporting requirements was conducted involving Pretreatment Staff. ICID response card has instructions as to what problems to look for and who to call for a response.	Annually Report in 09/09	Steve Schmidt, Laboratory/ Pretreatment Mgr., Sarah Schiedt, Sr. Ind. Waste Insp. & Jim Craig, Superintendent of Field Services
SD-3	Effectiveness Evaluation	URMP	Include O&M Performance Standard Implementation discussion in staff training; summarizing feedback in written form.	Feedback is provided to URMP Coordinator, Lorrie Gervin. Staff discussed implementation of O&M during regular trainings.	Annually Report 09/09	Jim Craig, Superintendent of Field Services
SD-4	Structural Retrofit Evaluation	URMP	Participate with SCVURPPP in pilot project to identify effective methods of reducing litter from entering storm drain system through the use of catch basin screens or other mechanisms. Evaluate costs associated with operations and maintenance needed to maintain effectiveness of mechanisms.	Field Services staff provided support for retrofitted inlet clean out activities and O&M data related to the Pilot Trash Retrofit project with SCVURPPP. Costs and maintenance requirements are undergoing evaluation and will be provided in the Pilot project report being prepared by SCVURPPP with the assistance of Sunnyvale staff. See Attachment K for details on the pilot project.	Report in 09-09	Kristy McCumby/ PW/Env. Spec. & Jim Craig/ Tony Pineda, PW/ Field Services
SD-5	Storm Drain O&M	URMP	Annually review and evaluate effectiveness of O&M pollution control measures	Implementation of O&M measures: • Annual drain inlet and flap gate (outfall) inspections • Weekly storm pumping station inspections and maintenance	Annually Report 09/09	Jim Craig, Superintendent of Field Services

FY 08 - 09 Annual Report

Attachment D-4

Water Utility Operation and Maintenance

P.S. Id.	Activity	CI Item Source	FY 08-09 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
Water Utility Operation and Maintenance						
WU-1	Inventory of Key O&M Activities	URMP	Inventory all key water utility O&M activities to identify routine and unplanned non-storm water discharges every three years. Modify as needed, in alternate years.	Inventory is to be performed every three years. Inventory was performed in 08/09 and is scheduled to be performed again in 10/11. Any needed revisions made at that time. Staff documents/reports any planned or unplanned discharges in excess of 50,000 gallons	Ongoing Report O9/09	Jim Craig, Sup. of Field Services & Val Conzet, Water PW Supervisor
WU-2	Pollution Control Measures Implementation	URMP	Review and update SOPs	No SOPs were revised this year. SOPs will be updated to meet the requirements of the MRP, once issued.	Report 09/09	Val Conzet, Water PW Supervisor Support: Kristy McCumby, Env. Specialist.
WU-3	Staff Training	URMP	Provide staff training on the regulatory requirements of the URMP and the use of the WUPPP.	Annual staff training was conducted in October 2008. Additional training is provided as needed. See Attachment M for staff training details.	Ongoing Report 09/09	Jim Craig, Sup. of Field Services & Val Conzet, Water PW Supervisor
WU-5	WUPPP	URMP	• Annually review and evaluate effectiveness of Water Utility Pollution Prevention Plan. • Update contact lists in the plan. • Use both staff and contractor (if appropriate) feedback.	The WUPPP was reviewed and no changes were required. The contact list is still appropriate, with the addition of some minor staff title changes.	Annually Report 09/09	Jim Craig, Superintendent of Field Services & Val Conzet, Water PW Supervisor
	Performance Standard Review and Revision	URMP	Participate in SCVURPPP Work Group that will be formed to update the Water Utility Operation and Maintenance Performance Standards	No work group was formed in FY 08-09, due to the work on the MRP. It is anticipated that revisions to the Performance Standards will be needed to meet the requirements of theMRP, once issued.	TBD Report 09/09	Val Conzet, Water PW Supervisor Support: Kristy McCumby, Env. Specialist.

Public Agency Activities: Corp Yard

P.S. Id.	Activity	CI Item Source	FY 08-09 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
Corporation Yards Operation and Maintenance (Including Parks Division)						
Corp Yard SWPP	Staff Training	URMP	Hold annual Public Works staff training regarding the SWPPP for Corporation Yard.	• Provided one-hour training sessions to all Corp. Yard employees (See Attachment M for details); • Reviewed operational improvements as needed based on facility inspections and updated Plan; • Implemented annual review session at tailgate meetings. • Staff will continue to have yearly training and SOPs will be reviewed and updated as needed going forward.	Annually Report 09-09	Jim Craig, Superintendent of Field Services
Corp Yard SWPP	Staff Training	URMP	Hold annual Parks and Recreation staff training regarding the SWPPP for the Corporation Yard	Annual staff training on the Corp Yard SWPPP requirements was held on 3/26/09. See Attachment M for details on numbers attending.	Annually Report 09/09	Scott Morton, Interim Parks Superintendent With assistance from the Environmental Division of Public Works
Corp Yard SWPP	Annual Meetings with O&M Supervisor	URMP	Meet annually with URMP Coordinator /staff and CY supervisors on progress and problems in implementing BMPs at the Corporation Yard.	Meeting was not held in FY 08-09 as no BMP issues were identified. Annual meeting will take place before FY 09-10 wet season starts (October) to discuss appropriate implementation measures and any potential changes as the MRP moves forward toward adoption.	Annually Report 09/09	Jim Craig, Superintendent of Field Services

New Development Planning Procedures

044976

P.S. Id.	Activity	CI Item Source	FY 08-09 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
New Development and Construction Controls -- Planning Procedures						
PL-2	Site Design Guidance to Developers	URMP	Provide information and guidance material to developers early in the project development process regarding site design requirements for stormwater pollution prevention and treatment.	Information on the requirements for site designs to meet storm water permit C.3 provision requirements are provided either on CD or as hard copies to project proponents. The City's Stormwater BMP Guidance Manual was revised in January 2007 and continues to be provided upon request. Access to the manual is also available from the city's website in the Planning Department section at http://sunnyvale.ca.gov/Departments/Community+Development/Planning+Division/Commercial-Industrial+Planning/Stormwater.htm	Ongoing Report 09/09	Shaunn Mendrin, Senior Planner Support: Kristy McCumby, Env. Spec.
PL-10	Staff Training	URMP	Provide staff training (PW and CDD) on policies, design guidelines, and pre- and post construction BMPs and control measures.	• Staff is updated on a quarterly basis on any changes in the program and staff received annual refresher training September 10, 2008. • New staff members are provided with a one-on-one SWMP training as part of their orientation. • Staff training year included a refresher on the City's BMP Guidance Manual, as well as information on potential changes to the amount of impervious surface triggering the requirement for a SWMP. • Public Works staff attended the SCVURPPP C.3 workshop in June 2009 for post-construction inspection training. See Attachment M for training details.	Annually Report 09-09	Shaunn Mendrin, Senior Planner Support: Kristy McCumby, Env. Spec.

New Development and Construction Controls -- Planning Procedures (cont.)						
PL-11	Planning Procedure Performance Measures	URMP	Review performance measures in order to evaluate effectiveness and identify any changes that are needed.	Performance measures are reviewed on an annual basis to determine program effectiveness and opportunities from improvement. No changes were identified for this year.	Annually Report 09-09	Shaunn Mendrin, Senior Planner
PL-8b	Effectiveness Evaluation	URMP	Include Planning Procedures Performance Standard Implementation discussion in staff training; summarize feedback in written form.	Annual staff training includes information on any program changes related to enhancing program implementation. Feedback was received verbally and no changes were needed.	Annually Report 09-09	Shaunn Mendrin, Senior Planner
C.3 b Development Project Approval Process						
	Revise URMP Planning Procedures Perf. Standards	Order 01-119 PWP C.3 b.1	Review Program Guidance as it becomes available. Identify new Planning Procedures Performance Standards and/or revise existing standards as needed, based on Program guidance.	• New program guidance is reviewed when received, and the program procedures and materials are revised as appropriate. • SMWP manual was updated in 2007 to reflect changes in program and program improvements. No new guidance on the revision of existing performance standards was received in FY 08-09. • Current performance standards are being implemented.	Ongoing Report 09/09	Shaunn Mendrin, Senior Planner and Kristy McCumby, Env. Spec.
	Project Review Process Training	Order 01-119 PWP C.3 b.3	Annually train Planning and Public Project staff on C.3 provisions, goals, and changes in the approval process and use of appropriate tools.	Planning and Building staff, Public Works CIP staff, and Pretreatment inspectors who do post-construction BMP inspections received refresher training on the Sunnyvale Storm Water BMP Guidance manual. This included the C.3 provision requirements, the City's project approval process, HMP applicability areas, coordination between departments and divisions, and ways improve communication. Planning staff training occurred in September 2008. Pretreatment	Annually Report 09/09	Lead Shaunn Mendrin, Senior Planner & Gordon Blancher Bldg. Insp. Support: Nasser Fakih & Kristy McCumby

				staff received training through SCVURPPP in June 2009 (See Attachment M for details.) No changes to the approval process or the BMP Guidance Manual were identified for this fiscal year.		
C.3.c Requirements for Group 1 and Group 2 Projects						
	Collect information for "Enhanced Reporting"	Order 01-119 PWP C.3 c.1	Collect information on each project (both public and private projects) covered by the enhanced performance standard for enhanced annual reporting requirements. Projects that add or replace over 10,000 sq ft of impervious area are now reported.	Data is collected on projects covered by the enhanced performance standard for annual reporting requirements. All relevant projects (adding or replacing over 10,000 sq ft of impervious area) are reported. (See Table 1, Parts 1 and 2, of this Attachment for data collected in FY 08-09	Ongoing Report 09/09	Shaunn Mendrin, Senior Planner (Private Projects) & Nasser Fakih PW (Public Projects)
C.3.e Operation and Maintenance of Treatment BMPs						
	Operation and Maintenance of Treatment BMPs	Order 01-119 PWP C.3 e.1	Continue to track information about treatment BMPs installed at approved projects that add or replace 10,000 sq. ft. of impervious area. Lists of properties, type of treatment BMP, and operators responsible for BMP maintenance will be tracked.	• The required information is tracked for treatment BMPs installed on approved projects applicable projects. The FY 08-09 data is included in Attachment E, Appendix Table 1 of this report. Information is provided to Pretreatment staff to assist with post-construction inspections. • The Pretreatment Program finds this information most useful when determining when and where to perform O&M verification inspections. Continuing to have up to date and accurate information is beneficial.	Ongoing Report 09/09	Lead: Shaunn Mendrin, Senior Planner & Gordon Blancher Building Insp. Support: PW Env. Division

C.3.e Operation and Maintenance of Treatment BMPs (cont.)						
	Long-term Maintenance of Treatment BMPs	Order 01-119 PWP C.3 e.3	Implement model agreement language for O&M of treatment BMPs to meet Sunnyvale needs. Incorporate requirements for long-term maintenance for all applicable projects (those that add or replace more than 10,000 sq. ft of impervious area).	• SMC 12.60 was amended to include all projects that add or replace 10,000 square feet of impervious area for C.3 compliance in October 2005. • Long-term maintenance requirements are included as Conditions of Approval and will continue to be incorporated as part of the project approval process. • Continuing improvements may include revisions to current practices of ensuring the O&M responsibilities are clearly communicated during the transition from the developer to the responsible owner operator.	Ongoing Report 09/09	Lead: Steve Schmidt/Sarah Scheidt, Sr. Ind. Waste Insp., Support Shaunn Mendrin, Senior Planner & Gordon Blancher, Bldg Insp. Coord.
	Effectiveness Evaluation of Inspection of Treatment BMPs	Order 01-119 PWP C.3 e.4	Incorporate long term Operations and Maintenance requirements into project approval process per SMC12.60.200.	Community Development and the Environmental Division continue to require applicable projects to incorporate long term BMP Operations and Maintenance agreements per SMC 12.60.200. The long-term O&M requirements are incorporated through the Storm Water Management Plan review process.	Ongoing Report 09/09	Steve Schmidt, Laboratory/ Pretreatment Mgr./Sarah Scheidt/Sr. Ind. Waste Inspector
	Annual report of treatment BMPs and ongoing verification program	Order 01-119 PWP C.3 e.6	Review and evaluate the effectiveness of the Operations and Maintenance Verification Program. This includes evaluating O/M Verification procedures, BMP inspection procedures, and evaluating and summarizing any improvements to the Program.	• The Environmental Division continues to coordinate with CDD to ensure the most effective methods of incorporating long term maintenance agreement requirements into applicable projects. • We continue to work with the Program to revise information collected from post-construction inspections as needed. • A Development Process Improvement Committee Core Team has been developed that includes Planning, Building, Engineering, Environmental,	Ongoing Report 09/09	Sarah Scheidt, Sr. Ind. Waste Insp. & Steve Schmidt, Laboratory/ Pretreatment Mgr.

				and other departments. The Committee will focus on streamlining the development approval process within the City, and will include process improvements to enhance the C3 regulatory process.		
C.3.f Hydromodification Management Plan						
	Implementation of HMP as required for projects that add or replace one-acre or more of impervious surface.	Order 01-119 PWP C.3 f.3	Implement HMP requirements for projects located in the HMP applicability areas identified in Sunnyvale. Projects must meet the impervious surface size threshold of the HMP and have the potential to cause increased erosion or other related impacts to non-exempt waterways.	• The parcels that meet HMP implementation criteria within Sunnyvale's jurisdiction have been identified and are limited to two specific areas that drain into portions of Calabazas Creek or Stevens Creek. • HMP actions for these parcels will be applied, if the sites are redeveloped. • No HMP – applicable projects were identified in FY 08-09	Ongoing Report 09/09	Lead: Planning and PW/ PW Env. Division staff
C.3.g Waiver and Compensatory Mitigation Program						
	Local waiver program	Order 01-119 PWP C.3 g.2	Continue tracking information on any projects with a Compensatory Mitigation Program approved by the City. Include project name, location, type, percent impervious surface, reasons for and terms of the waiver, and the alternative benefit project and completion date	No waiver requests have been received to date. CDD Planning and PW Engineering will continue to track any approvals granted under this program and provide them to PW Environmental staff for inclusion in the Annual report.	Ongoing Report 09/09	Lead: Planning, and PW Staff (TBD) Support: Lorrie Gervin/PW Env. Div. staff
C.3.j Site Design Measures Guidance and Standards Development						
	Modify local project approval process	Order 01-119 PWP C.3 j.4	Report on the status of review, revision and implementation of site design guidance and standards changed as a part of the City's project approval process to address the Development Policy - Compare and Contrast document. The proposed changes submitted with September 2004 annual report are used as a guide.	Site design guidance from the Development Policy Review project document has been implemented and staff incorporated issues of environmental concern (e.g., avoiding the use of ornamental copper) into the information provided to developers and in the recommended Conditions of Approval attached to conditionally approved permits. Most of the guidance is already	Ongoing Report 09/09	Lead: Shaunn Mendrin, Senior Planner Support: PW engineering, PW Env. Div.

				formally included in the Zoning Code, General Plan Elements, and/or other City documents. However, the ornamental use of copper has not yet been formally incorporated. Staff will formally incorporate this when the relevant documents are next updated (expected early 2010). In the meantime, Planning staff practice is to prohibit ornamental use of copper in exterior applications.		
	C.3.h Alternate Certification					
	Identify projects that have been certified by other parties	Order 01-119 PWP C.3.h	Summarize those stormwater management plans certified by a firm listed on the Qualified Consultants List the City developed in the Annual Report.	• Qualified Consultant list was updated in FY 06-07 and is used for projects. The next scheduled update of the list will occur in FY 09-10, pending the adoption of the MRP. • Training was provided to new staff from Nolte & Assoc. who had not received the consultant training in FY 06-07. • All projects where C.3 requirements are applicable (as listed in Attachment E, Appendix Table 1) must prepare a Storm Water Management Plan (SWMP). All SWMPs must be certified as meeting the requirements of SMC 12.60 by a Qualified Consultant from the City's list.	Ongoing Report 09/09	Lead: Shaunn Mendrin, Senior Planner Support: Kristy McCumby, PW/Env.
	C.3.k Source Control Measures					
	Implement conditions of approval for source control measures for applicable projects.	Order 01-119 PWP C.3 k.3	Continue Implementation of source control measure requirements by including appropriate conditions for approval for projects that add or replace 10,000 sq ft. of impervious area. Report status and provide examples of the application of these conditions in annual reports.	The City adopted source control requirements for all projects that add or replace 10,000 sq .ft. of impervious area in October 2005. Conditions of approval are reported in Attachment E, Appendix Table 1; Parts 1 & 2.	Ongoing Report 09/09	Lead Shaunn Mendrin, Senior Planner Support: Hira Raina/Nasser Fakih

044982

C.3.l Update General Plans						
	Update General Plans	Order 01-119 PWP C.3 l.3	Review current General Plan policies regarding watershed protection and water quality. Identify changes or additional policies that need to be developed in order to implement the C.3 provisions of the permit.	• Current Surface Runoff Sub Element of the City's General Plan does not need any change in order to implement current C.3 provisions. • Council annually reviews and prioritizes potential study issue items. The Surface Water Sub-element has not received a high enough priority to be considered on their calendar over the last few years. Adoption of the Municipal Regional Permit may provide impetus to increase the priority of this item.	Revise after 10/15/04 at next scheduled time	General Plan Workgroup: Lead: Lorrie Gervin, Env. Div. Mgr. with assistance from Community Development, Public Works , and Office of the City Attorney staff to be determined as needed.
C.3.m Environmental Review Process						
	Environmental Review Process	Order 01-119 PWP C.3. m	Summarize revisions to the Environmental Review process, if any are made.	Legal review has not identified any changes needed to the existing process. No changes were made in FY 08-09	Annually Report 09/09	Lead: Shaunn Mendrin, Senior Planner Support: Hira Raina/Nasser Fakih
C.3.n Reporting Requirements						
	Reporting Requirements	Order 01-119 PWP C.3n.1	Provide information described in Table 1 in annual reports (Annual and One-time Reporting Requirements) of provision C.3) based on guidance from the Program.	This is an ongoing effort and will be continued annually, as required. This information is provided in Attachment E, Appendix Table 1.	Annually Report 09/09	Lead: , Shaunn Mendrin, Senior Planner (PW) Hira Raina/ Nasser Fakih
	Reporting Requirements	Order 01-119 PWP C.3 n.4	Collect and report the following for all projects that must implement treatment measures: -BMPs and Site Design -Source control measures used -sizing criteria -O&M responsibility mechanism -O&M responsible party	This is an ongoing effort. Information is collected by CDD and PW staff for projects implementing treatment BMPs. Information collected is reported in the Annual Report. This information is provided in Attachment E, Appendix Table 1. The post-construction inspection information is included in Appendix Table 2	Ongoing Report 09/09	Lead Shaunn Mendrin, Senior Planner Hira Raina/ Nasser Fakih Support: Public Works Env. Div. Staff (report writing)

C.3.n Reporting Requirements (cont.)						
	Reporting Requirements	Order 01-024 C.9.d.1 & Order 01-119 PWP C.3. n.5	- Ensure consideration of the use of pest-resistant landscaping and design features in the design, landscaping, and environmental review of development projects -Train staff on pest-resistant landscaping techniques and importance of minimizing pesticides in potential runoff from development sites -Collect and report a summary of pesticide reduction measures that are required for development projects and the percentage of projects that required pesticide reduction measures as conditions for their approval.	The IPM handout provided to all developers is used as an educational tool and summarizes the types of pesticide reduction measures required for new development and significant redevelopment projects. This is included in the Storm Water Management Plan development for the project. City staff receives training on the City's IPM policy and the importance of employing techniques that minimize impacts to storm water. All projects that must prepare a SWMP include pesticide reduction measures as COAs and are reported in Attachment E.	Ongoing Report 09/09	Lead: Shaunn Mendrin, Senior Planner Support: Kristy McCumby, Env. Spec.

FY 08 - 09 Annual Report

Attachment E –

Appendix 1 Table 1, Parts 1 & 2

Applicable Projects
Adding or replacing 10,000 sq ft of impervious area

New Development Planning Procedures

044985

Applicable Projects (Part 1)
Significant Development Projects[1]
Reviewed and/or Approved July 1, 2008 – June 30, 2009

Project Name	Project Type[1]	Site Size (sq. ft.)	New Impervious Surface (sq. ft.)[3]	Area of Land[2] Disturbed (sq. ft.)	Project Status (incl. Date Deemed Complete)	Project Storm Water Control Measures
Private Projects – Applicable Projects						
1. Industrial Project at 384 Santa Trinita Avenue. Project No.: 2008-0407 **Description:** Remove existing buildings and construct office building.	Significant Redevelopment (Total rebuild)	198,634	83,292 sq.ft. increased to 135,094 sq.ft.	198,634	Deemed complete 7/2/09, approved by City Council on 8/8/08.	SWMP in progress. Expected to include: - Storm Water Treatment Measures - Source Control Measures
2. Retail Project at 112 El Camino Real Project No.: 2008-0456 Description: Remove existing building and construct new retail building.	Significant Redevelopment (Total rebuild)	264,845 sq.ft. or 6.08 acres	751,670 sq.ft. increased to 758,730 sq.ft. (when combined with 2008-0457)	306,630 sq.ft. (when combined with 2008-0457)	Deemed complete 7/7/08, approved by Planning Commission on 8/25/08	SWMP in progress. Expected to include: - Storm Water Treatment Measures - Source Control Measures - Site Design Measures
3. Retail Project at 150 E El Camino Real Project No.: 2008-0457 Description: Remove existing building and construct new retail building.	Significant Redevelopment (Total rebuild)	446,925 sq.ft. or 10.2 acres	751,670 sq.ft. Increased to 758,730 sq.ft. (when combined with 2008-0456)	306,630 sq.ft. (when combined with 2008-0456)	Deemed complete 7/7/08, approved by Planning Commission on 8/25/08	SWMP in progress. Expected to include: - Storm Water Treatment Measures - Source Control Measures - Site Design Measures

[1] For projects approved as of October 15, 2005, applicable projects are those that add or replace 10,000 square feet of impervious area.
[2] As defined in C.3.c If the site is a "significant redevelopment", list the area of land disturbance.
[3] "New" is defined as impervious surface added, created, or replaced.

044986

Municipality: Sunnyvale

Project Name	Project Type[1]	Site Size (sq. ft.)	New Impervious Surface (sq. ft.)[3]	Area of Land[2] Disturbed (sq. ft.)	Project Status (incl. Date Deemed Complete)	Project Storm Water Control Measures
Private Projects – Applicable Projects						
4. Commercial Project at 399 W Java Drive. Project No.: 2008-0459 **Description:** Construction of new office building and parking structure.	Significant Redevelopment (Total rebuild)	143,269	108,134 sq.ft. increased to 217,004 sq.ft.	143,269	Deemed complete 5/5/08, approved by Planning Commission on 8/11/08	SWMP in progress. Expected to include: - Storm Water Treatment Measures - Source Control Measures
5. Commercial Project at 1010 Sunnyvale Saratoga Road. Project No.: 2007-0306 **Description:** Remove existing building and construct new retail building for Rite-Aid.	Significant Redevelopment (Total rebuild)	66,558	46,463 sq.ft. increased to 51,902 sq.ft.	66,558	Deemed complete 12/17/09, approved by City Council on 2/24/09.	SWMP in progress. Expected to include: - Storm Water Treatment Measures - Source Control Measures - Site Design Measures
6. Mixed Use Project at 401 Town and Country. Project No.: 2008-0399 **Description:** Remove existing buildings and construct new mixed use building.	Significant Redevelopment (Total rebuild)	360,223	333,556 sq.ft. increased to 345,113 sq.ft.	356,670	Deemed complete 5/27/09, denied by Planning Commission on 6/22/09. Appeal Filed 6/25/09, hearing will occur in FY 09-10.	SWMP in progress. Expected to include: - Storm Water Treatment Measures - Source Control Measures
7. Mixed Use Project at 1287 Lawrence Station Road. Project No.: 2006-0712 **Description:** Remove existing buildings and construct new mixed use buildings.	Significant Redevelopment (Total rebuild)	288,585	204,732 sq.ft. increased to 216,928 sq.ft.	288,585	Deemed complete 9/17/08, approved by City Council on 11/18/08.	SWMP in progress. Expected to include: - Storm Water Treatment Measures - Source Control Measures

8. Mixed Use Project at 660 S. Fairoaks Avenue. Project No.: 2008-1245 **Description:** Remove existing buildings and construct new residential buildings.	Significant Redevelopment (Total rebuild)	120,079	102,209 sq.ft. increased to 84,795 sq.ft.	88,210	Deemed complete 2/11/09, approved by City Council on 6/6/09.	SWMP in progress. Expected to include: - Storm Water Treatment Measures
9. Residential Project at 585 Old San Francisco Road. Project No.: 2008-1259 **Description:** Remove existing buildings and construct new residential building.	Significant Redevelopment (Total rebuild)	12,086	1,600 sq.ft. increased to 4,200 sq.ft.	12,086	Deemed complete 3/12/09, approved by City Council on 6/6/09.	SWMP in progress. Expected to include: - Storm Water Treatment Measures
10. Residential Project at 127 W. California Avenue. Project No.: 2008-0238 **Description:** Remove existing buildings and construct residential building.	Significant Redevelopment (Total rebuild)	12,280	10,011 sq.ft. decreased to 8,393 sq.ft.	12,280	Deemed complete 5/14/08, approved by City Council on 1/27/09.	SWMP in progress. Expected to include: - Storm Water Treatment Measures - Source Controls -Site Design

FY 2008-2009 Annual Report
Municipality: Sunnyvale

Project Name	Project Type[1]	Site Size (sq. ft.)	New Impervious Surface (sq. ft.)[3]	Area of Land[2] Disturbed (sq. ft.)	Project Status (incl. Date Deemed Complete)	Project Storm Water Control Measures
Private Projects – Applicable Projects						
11. Commercial Project at 301 & 410 Old San Francisco Road. Project No.: 2007-1293 **Description:** Remove existing buildings and construct new medical facility.	Significant Redevelopment (Total rebuild)	213,444	181,457 sq.ft. decreased to 113,129 sq.ft.	213,444	Deemed complete 6/8/09, approved by City Council on 6/23/09.	SWMP in progress. Expected to include: - Storm Water Treatment Measures
12. Industrial Project at 1450 Kifer Road Project No.: 2008-0744 **Description:** Remove existing accessory buildings, add architectural elements and site modifications.	Significant Redevelopment (Total rebuild)	234,575	206,280 sq.ft. decreased to 202,950 sq.ft.	38,728	Deemed complete 8/13/08, approved by Community Development Director on 8/25/08.	SWMP in progress. Expected to include: - Storm Water Treatment Measures - Site Design Measures
Public Projects – Applicable projects						
1. Borregas Ave POCs at Routes 101 and 237 Bicycle/pedestrian overpass over Routes 101 and 237	New Construction	81,000	19,600	53,000	Project funding was approved by City Council in 1999, prior to current stormwater permit requirements.	Project is for non-motorized vehicles only (pedestrian and bicycle route) so provision C.3.(c) i. (2) did not apply to this project

044989

Applicable Projects (Part 2)
Significant Development Projects[2]
Reviewed and/or Approved July 1, 2008 – June 30, 2009

Project Name	Treat-ment BMPs	Numeric Sizing Criteria Used	O&M Responsibility Mechanism and Responsible Party	Site Design Measures	Source Control Measures	Pesticide Reduction Measures
Private Projects – Applicable projects						
1. Industrial Project at 384 Santa Trinita Avenue. Project No.: 2008-0407 **Description:** Remove existing buildings and construct office building.	Hydro-dynamic devices (CDS Unit)	Flow Hydraulic Design Basis using '03 CA Stormwater Quality BMP Handbook, and local rainfall data.	Formalized through Conditions of Approval, 3rd party certification, and recording SWMP with the Deed. Property owner responsible for O&M.	All runoff flows through site conveyance system to CDS unit.	Maintenance (street sweeping, catch-basin cleaning).	Education, COAs
2. Retail Project at 112 El Camino Real Project No.: 2008-0456 Description: Remove existing building and construct new retail building.	Hydro-dynamic devices (CDS Unit) & Biofilter	Flow Hydraulic Design Basis using '03 CA Stormwater Quality BMP Handbook, and local rainfall data.	Formalized through Conditions of Approval, 3rd party certification, and recording SWMP with the Deed. Property owner responsible for O&M.	SWMP is still in progress. Tentatively: All runoff either flows through Biofiltration or through site conveyance system to CDS unit.	SWMP is still in progress. Tentatively: Maintenance (street sweeping, catch-basin cleaning).	Education, COAs
3. Retail Project at 150 E El Camino Real Project No.: 2008-0457 Description: Remove existing building and construct new retail building.	Hydro-dynamic devices (CDS Unit) & Biofilter	Flow Hydraulic Design Basis using '03 CA Stormwater Quality BMP Handbook, and local rainfall data.	Formalized through Conditions of Approval, 3rd party certification, and recording SWMP with the Deed. Property owner responsible for O&M.	SWMP is still in progress. Tentatively: All runoff either flows through Biofiltration or through site conveyance system to CDS unit.	SWMP is still in progress. Tentatively: Maintenance (street sweeping, catch-basin cleaning).	Education, COAs

[1] For Projects approved as of October 15, 2005, reporting applicable projects – those that add or replace 10,000 square feet of impervious area.
[2] As defined in C.3.c If the site is a "significant redevelopment", list the area of land disturbance.
[3] "New" is defined as impervious surface added, created, or replaced.

044990

Project Name	Treat-ment BMPs	Numeric Sizing Criteria Used	O&M Responsibility Mechanism and Responsible Party	Site Design Measures	Source Control Measures	Pesticide Reduction Measures
Private Projects – Applicable projects						
4. Commercial Project at 399 W Java Drive. Project No.: 2008-0459 **Description:** Construction of new office building and parking structure.	Hydro-dynamic devices (CDS Unit) & Biofilter	Flow Hydraulic Design Basis using '03 CA Stormwater Quality BMP Handbook, and local rainfall data.	Formalized through Conditions of Approval, 3rd party certification, and recording SWMP with the Deed. Property owner responsible for O&M.	SWMP is still in progress. Tentatively: All runoff either flows through Biofiltration or through site conveyance system to CDS unit.	SWMP is still in progress. Tentatively: Maintenance (street sweeping, catch-basin cleaning).	Education, COAs
5. Commercial Project at 1010 Sunnyvale Saratoga Road. Project No.: 2007-0306 **Description:** Remove existing building and construct new retail building for Rite-Aid.	Biofilter	Flow Hydraulic Design Basis using '03 CA Stormwater Quality BMP Handbook, and local rainfall data.	Formalized through Conditions of Approval, 3rd party certification, and recording SWMP with the Deed. Property owner responsible for O&M.	SWMP is still in progress. Tentatively: All runoff flows through Biofiltration, disconnected downspouts, limited impervious surface, use of beneficial landscaping and covered dumpster area.	SWMP is still in progress. Tentatively: Maintenance (street sweeping, catch-basin cleaning).	Education, COAs
6. Mixed Use Project at 401 Town and Country. Project No.: 2008-0399 **Description:** Remove existing buildings and construct new mixed use building. **Denied pending appeal FY 09-10	Hydro-dynamic devices (CDS Unit)	Volume Hydraulic Design Basis using '03 CA Stormwater Quality BMP Handbook, and local rainfall data.	Formalized through Conditions of Approval, 3rd party certification, and recording SWMP with the Deed. Property owner responsible for O&M.	SWMP is still in progress. Tentatively: All runoff through site conveyance system to CDS unit.	SWMP is still in progress. Tentatively: Maintenance (street sweeping, catch-basin cleaning).	Education, COAs

044991

Project Name	Treat-ment BMPs	Numeric Sizing Criteria Used	O&M Responsibility Mechanism and Responsible Party	Site Design Measures	Source Control Measures	Pesticide Reduction Measures
Private Projects – Applicable projects						
7. Mixed Use Project at 1287 Lawrence Station Road. Project No.: 2006-0712 **Description:** Remove existing buildings and construct new mixed use buildings.	Hydro-dynamic devices (CDS Unit) & Biofilter	Flow Hydraulic Design Basis using '03 CA Stormwater Quality BMP Handbook, and local rainfall data.	Formalized through Conditions of Approval, 3rd party certification, and recording SWMP with the Deed. Property owner responsible for O&M.	SWMP is still in progress. Tentatively: All runoff either flows through Biofiltration or through site conveyance system to CDS unit.	SWMP is still in progress. Tentatively: Maintenance (street sweeping, catch-basin cleaning).	Education, COAs
8. Mixed Use Project at 660 S. Fairoaks Avenue. Project No.: 2008-1245 **Description:** Remove existing buildings and construct new residential buildings.	Hydro-dynamic devices (CDS Unit) & Biofilter	Flow Hydraulic Design Basis using '03 CA Stormwater Quality BMP Handbook, and local rainfall data.	Formalized through Conditions of Approval, 3rd party certification, and recording SWMP with the Deed. Property owner responsible for O&M.	SWMP is still in progress. Tentatively: All runoff either flows through Biofiltration or through site conveyance system to CDS unit.	SWMP is still in progress. Tentatively: Maintenance (street sweeping, catch-basin cleaning).	Education, COAs
9. Residential Project at 585 Old San Francisco Road. Project No.: 2008-1259 **Description:** Remove existing buildings and construct new residential building.	Biofilter & Hydro-dynamic devices (CDS Unit)	Flow Hydraulic Design Basis using '03 CA Stormwater Quality BMP Handbook, and local rainfall data.	Formalized through Conditions of Approval, 3rd party certification, and recording SWMP with the Deed. Property owner responsible for O&M.	SWMP is still in progress. Tentatively: All runoff either flows through Biofiltration or beneficial landscaping	SWMP is still in progress. Tentatively: Maintenance (street sweeping, catch-basin cleaning).	Education, COAs
10. Residential Project at 127 W. California Avenue. Project No.: 2008-0238 **Description:** Remove existing buildings and construct residential building.	Biofilter & Hydro-dynamic devices (CDS Unit)	Flow Hydraulic Design Basis using '03 CA Stormwater Quality BMP Handbook, and local rainfall data.	Formalized through Conditions of Approval, 3rd party certification, and recording SWMP with the Deed. Property owner responsible for O&M.	SWMP is still in progress. Tentatively: All runoff either flows through Biofiltration or beneficial landscaping	SWMP is still in progress. Tentatively: Maintenance (street sweeping, catch-basin cleaning).	Education, COAs

Project Name	Treat-ment BMPs	Numeric Sizing Criteria Used	O&M Responsibility Mechanism and Responsible Party	Site Design Measures	Source Control Measures	Pesticide Reduction Measures
Private Projects – Applicable projects						
11. Commercial Project at 301 & 410 Old San Francisco Road. Project No.: 2007-1293 **Description:** Remove existing buildings and construct new medical facility.	Hydro-dynamic devices (CDS Unit) & Biofilter	Flow Hydraulic Design Basis using '03 CA Stormwater Quality BMP Handbook, and local rainfall data.	Formalized through Conditions of Approval, 3rd party certification, and recording SWMP with the Deed. Property owner responsible for O&M.	SWMP is still in progress. Tentatively: All runoff either flows through Biofiltration or through site conveyance system to CDS unit.	SWMP is still in progress. Tentatively: Maintenance (street sweeping, catch-basin cleaning).	Education, COAs
12. Industrial Project at 1450 Kifer Road Project No.: 2008-0744 **Description:** Remove existing accessory buildings; add architectural elements and site modifications.	Biofilter	Flow Hydraulic Design Basis using '03 CA Stormwater Quality BMP Handbook, and local rainfall data.	Formalized through Conditions of Approval, 3rd party certification, and recording SWMP with the Deed. Property owner responsible for O&M.	SWMP is still in progress. Tentatively: All runoff either flows through Biofiltration, planter boxes, minimize change in runoff and minimal land disturbance.	SWMP is still in progress. Tentatively: Maintenance (street sweeping, catch-basin cleaning).	Education, COAs
Public Projects – Applicable projects						
1. Borregas Ave POCs at Routes 101 and 237 **Description:** Bicycle/pedestrian overpass over CA Routes 101 and 237 connecting to North Borregas Ave bicycle lanes	Not ap-plicable to this project	Not applicable to this project	Not applicable to this project	Not applicable to this project	Litter control, street sweeping and catch-basin cleaning at access points to city streets.	Not applicable to this project.

FY 08 - 09 Annual Report

Attachment F

Construction Inspection

044996

P.S. Id.	Activity	CI Item Source	FY 08-09 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
	New Development and Construction Controls – Construction Site Inspection					
CI-1-4	Construction Inspection Performance Standards	URMP	Conduct annual staff review of performance measures in order to evaluate their effectiveness.	CDD- Building Division: All performance standards are being implemented and are effective. Staff provides outreach materials to contractors and developers by attaching copies of construction tri-folds "Preventing Pollution, It's up to Us" or the "Sunnyvale Blueprint for a Clean Bay" to plans and/or job card before permits are issued. 48 written Erosion/sediment Control Correction Notices and Re-inspection Notices were issued this F Y for private projects.	08/09	Gordon Blancher, Building Inspector /Coordinator
CI-2 - CI-5	Inspection of sites with significant erosion potential and construction planned for the wet season	URMP	Conduct inspections of sites (public and private) with significant erosion potential and/or construction planned during the wet season. Ensure that erosion and sediment control measures are implemented in accordance with SMC, the SWPPP, and any conditions of approval for the project.	CDD- Building Division: Inspections of project were done to ensure that the projects erosion and sediment control measures are maintained, as needed during construction. Enforcement for compliance with SMC requirements was done, as needed. PW – Capital Projects: The inspection staff inspected capital projects and encroachment permit projects daily, before storms and after storms.	Ongoing Report 09/09	Gordon Blancher, Building Inspector /Coordinator Nasser Fakih, PW Inspector

	New Development and Construction Controls – Construction Site Inspection (cont.)					
CI-4	Effectiveness Evaluation: Private Development and Public Works Inspection Program	URMP	Annually review and evaluate effectiveness of inspection programs using staff and/or contractor feedback	CDD- Building Division: Staff and contractor feedback indicate that the inspection programs are effective and meeting goals. Using the "FIELD INSPECTION – BMP'S" notices helps with documenting violations and corrective actions. PW – Capital Projects: The evaluation and effectiveness of the inspections programs are being implemented without any problems.	Annually Report 09/09	Gordon Blancher, Building Inspector /Coordinator Nasser Fakih, PW Inspector
	Construction Inspection Performance Standards	Permit Prov. C.3.a. (vi)	• Annually train Construction Inspection staff (both Community Development and Public Works) on current Construction Inspection Performance Standards and any changes to BMPs and SOP's. Also include training on construction inspection procedures, documentation, and enforcement. • Every two years, all inspectors will receive training on the latest construction BMPs and techniques. Implementation of BMPs and SOP's will be discussed, as needed, at regular staff meetings.	CDD- Building Division: Information on training activities for all CDD-Building Division staff is presented in Attachment M of this report. Training DVD "Hold on to your Dirt" was used at one of the training sessions. PW – Capital Projects: The inspection staff has been undergoing inspection training at least once every 2 years. Staff viewed "Keep it Clean" training DVD at on of their sessions. See Attachment M for training details.	Annually, before October 1 Report 09/09	Gordon Blancher, Building Inspector /Coordinator Nasser Fakih, PW Inspector

	New Development and Construction Controls – Construction Site Inspection (cont.)					
	Erosion and Sediment Control Plans by Contractors for Public Projects	Permit Prov. C.3.a. (iv)	CDD Building Inspection staff and PW Construction staff to ensure that developers/contractors of projects with significant erosion potential and planned construction during the wet season have prepared an effective erosion and/or sediment control plan prior to the start of the wet season.	CDD- Building Division: Compliance with erosion and/or sediment control plans was required for projects prior to the start of the wet season. Inspectors checked to make sure the plans were done and BMPs in place. There was good cooperation from developers and contractors to meet these requirements. PW – Capital Projects: Construction inspection staff has complied with these requirements.	Ongoing Report 09/09	Gordon Blancher, Building Inspector /Coordinator Nasser Fakih, PW Inspector
	Municipal capital improvement project stormwater quality control measures	Permit Prov. C.3.a. (v)	Perform and document inspections of contractors on capital improvement projects to ensure their compliance with stormwater quality control requirements during construction and maintenance activities. Initiate enforcement actions, as needed. Report annually on results of inspection program.	Inspections are performed daily and reported in the inspector's daily reports. Enforcement actions and any violations observed are provided in Table 1 of this Attachment..	Ongoing Report 09/09	Hira Raina, Nasser Fakih

City of Sunnyvale

FY 08 - 09 Annual Report

Attachment G

Public Information and Participation

	Activity	CI Item Source	FY 08-09 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
Public Information / Participation						
PIP-1	Identification of pollution issues/problems	URMP	Continue to discuss water pollution prevention, conservation, and watershed education with regional co-permittees, pretreatment staff, and urban runoff staff to determine current issues and pollutants of concern.	Regional, local and internal discussions are centered on water pollution prevention, conservation, and watershed education. Projects implemented by Sunnyvale in FY 08-09 were consistent with the issues and pollutants of concern discussed. • See Attachment G Table 1 - Detailed Descriptions PIP Activities and Self-Evaluation Matrix for FY 08-09.	Ongoing Report 09/09	Jackie Besoyan, Environmental Outreach Coordinator
PIP-2	Implementation of strategy to address issues	URMP	In order to insure efficient and effective use of resources, we will continue to select projects that automatically send behavior change messages to the greatest number of people without requiring staff to be present. In addition, we will lend support to regional projects and events that endeavor to increase behavioral change thorough public education.	When large audience reach must be achieved, mass media can play a key role in its effectiveness. Sunnyvale successfully utilizes mass media to send public education and behavior change messages regarding water pollution prevention to our target audiences. Media projects implemented in FY 08-09 included on-screen theater ads, bus back ads, utility bill inserts, newspaper articles and ads, website postings, flyers, community cable TV, poster distributions and literature kiosks. • See Attachment G Table 1 - Detailed Descriptions PIP Activities and Self-Evaluation Matrix for FY 08-09.	Ongoing Report 09/09	Jackie Besoyan, Environmental Outreach Coordinator

Public Information / Participation (cont.)						
PIP-3	Dissemination of outreach/education materials	URMP	Continue to update and develop new materials and information, and disseminate material to targeted audiences through participation in school and youth programs, industry-related events, presentations, community requests, plant tours, Farmers' Markets, and regional events.	Outreach material is monitored for restock and edited for content as necessary. New materials are developed as needed (a new Green Gardener piece was developed in FY 08/09), and literature is disseminated as described in Attachment G Table 1 - Detailed Descriptions PIP Activities and Self-Evaluation Matrix for FY 08-09.	Ongoing Report 09/09	Jackie Besoyan Environmental Outreach Coordinator
PIP-4	Municipal Employee Training	URMP and Permit Prov. C.9	Provide annual training to Community Development, Parks and Recreation, and Public Works Department staff related to URMP Performance Standards, BMPs, and Watershed Outreach and Education campaign. (See IPM Policy and Hg Policy outreach sections for similar tasks)	Annual training as identified in the City's URMP is performed annually. See Attachment M for a list of training provided and numbers attending for CDD, Parks & Rec., and Public Works Field Services staff in FY 08-09. Additional city-wide staff training on specific issues is provided through staff newsletters and articles.	Ongoing Report 09/09	Kristy McCumby, Environmental Specialist & Steve Schmidt, Laboratory/ Pretreatment Mgr.
PIP-5	Evaluation of effort and strategy	URMP	Use various feedback methods to determine public evaluation of materials, events and workshops, and when possible, evaluate level of increased awareness of pollution prevention issues. In an ongoing effort, staff will use public feedback to evaluate strategies used in selected projects.	Evaluation forms are distributed and reviewed. The evaluation forms are not used to measure differences in usage patterns or behavior change, but to determine satisfaction with the presentation or activity. Feedback is used to modify and fine tune projects, presentations, and workshops. Currently, the level of increased awareness is chiefly established through the number of individuals reached.	Ongoing Report 09/09	Jackie Besoyan, Environmental Outreach Coordinator

Public Information / Participation (cont.)						
PIP-5	Work Plan Revision	URMP	As a result of ongoing evaluation and discussions as listed in PIP-1, determine projects to be continued, deleted or added.	Outreach provides a wide-range of education to targeted and general audiences through participation in various events and activities in Sunnyvale, through use of media, and in project collaborations with other agencies and partners both regional and local. Projects Added: Thermometer Exchanges, Bus Back Ads, Library Presentations, Community Kids Workshops, Muslim Green Team event Projects Deleted: Earth Day Event at Laurelwood School and Global Sunnyvale Projects Continued: for a listing of activities and events. • See Attachment G Table 1- Detailed Descriptions PIP Activities and Self-Evaluation Matrix for FY 08-09	Ongoing Report 09/09	Jackie Besoyan, Environmental Outreach Coordinator
	Mercury Outreach	Permit Prov. C.9.c	In coordination with the Program and County-wide efforts, develop and continue to implement an educational outreach program to residential audiences regarding recycling of fluorescent lights, the proper disposal of other mercury-containing products, and the availability of non-mercury containing alternatives. Monitor and document results in the Annual Report. (Also see Control Program for Mercury for additional Outreach tasks.)	Through ongoing collaboration and effort, Sunnyvale continues to develop and implement educational outreach to residential audiences regarding non-mercury alternative devices, recycling and proper disposal of mercury containing products, retail stores program for fluorescent disposal options, and water pollution prevention. • See Attachment G Table 1 - Detailed Descriptions PIP Activities and Self-Evaluation Matrix for FY 08-09.	Ongoing Report 09/09	Jackie Besoyan, Environmental Outreach Coordinator and HHW/SMaRT station staff

Public Information / Participation (cont.)						
	Integrated Pest Management Outreach	Permit Prov. C.9.d	Provide local public outreach on proper use and disposal of pesticide products and use of less toxic pest control methods. Support the Program on local IPM Store Partnership activities. Participate in Regional outreach events. (Also see Control Program for Pesticides for additional Outreach tasks.)	Sunnyvale supports the IPM store partnership program, participates in Regional outreach events, and consistently provides local public outreach on proper use and disposal of pesticides, and use of less toxic pest control methods. • See Attachment G Table 1 - Detailed Descriptions PIP Activities and Self-Evaluation Matrix for FY 08-09. • See Attachment H, Apdx. 2 for a discussion on Sunnyvale's participation in the Santa Clara Valley Green Gardener program and its outreach to both the public and to potential students for the training program.	Ongoing Report 09/09	Jackie Besoyan, Environmental Outreach Coordinator
	Trash Management	Program Task RWQCB Letter	Continue to promote litter reduction as a key pollution prevention element. Provide local education on what the public can do to reduce and eliminate litter. This includes outreach through articles and ads in newsletters, and presentations at local schools events. (Also see Control Program for Trash for additional outreach tasks.)	Sunnyvale's litter reduction and public awareness outreach promotes litter as a key source of water pollution. The focus of the program is to raise litter awareness through education and community events. Resources for our public education campaign include community newsletters, employee newsletters, theater billboard advertising, bus back ads, clean up events, as well as demonstrations in school classrooms and at community events. The message identifies litter as a key water pollution element, and provides education on what the public can do to reduce and eliminate litter. • See Attachment G Table 1 - Detailed Descriptions PIP Activities and Self-Evaluation Matrix for FY 08-09	Ongoing Report 09/09	Jackie Besoyan, Environmental Outreach Coordinator

Response to Regional Water Quality Control Board Comments on ICD Activities Section to FY 07-08 Annual Report:
No comments were received from RWQCB2 on this section.

Table 1. Detailed Description of FY 08- 09 PI/P Activities and Self Evaluation Matrix

PI/P Activity[1]	Type of Outreach [2]	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Community			
Health & Resources Fair - Thermometer Exchange	Event – Targeted	A bi-annual event sponsored by the City of Sunnyvale Community Services Department and is held at the Sunnyvale Senior Center. The focus is to connect the senior community with resources that can be of a benefit to them and to provide information on optimizing their health and well being. September 08	During this event, outreach staff hosted a thermometer exchange where 198 mercury-containing thermometers were collected for proper disposal.
Health & Resources Fair – Pharmaceutical Disposal Talk	Event – Targeted	A bi-annual event sponsored by the City of Sunnyvale Community Services Department and is held at the Sunnyvale Senior Center. The focus is to connect the senior community with resources that can be of a benefit to them and to provide information on optimizing their health and well being. September 08	Along with the above activity, outreach staff presented a talk on the correct way to dispose of pharmaceuticals. Approximately 25 individuals attended this discussion and Q & A session.
Coastal Clean Up	Event – Targeted	Sunnyvale participated in this annual event which focuses on cleaning up California's coasts and waterways. September 08	The event in Sunnyvale had 43 volunteers that collected approximately 1875 pounds of litter and 60 pounds of mostly plastic recyclable materials from Sunnyvale West Channel and approximately one mile of the bank along the Guadalupe Slough.
State of the City Event	Event – General	This is an annual one-day event sponsored by the City. The event features activities and exhibits providing community information for residents. September 08	The Outreach booth featured water pollution prevention information. Literature distributed included IPM information, less-toxic options for pest control, and proper disposal information on both pesticides and mercury. Approximately 100 individuals stopped by the booth to ask questions and/or receive information.

[1] Reference FY 08-09 PI/P Work Plan
[2] General, Targeted, Educational, or Citizen Participation types of outreach activities

PI/P Activity	Type of Outreach	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Community (cont.)			
Sunnyvale Pancake Breakfast	Event – Targeted	This event features a community breakfast, activities for kids, and exhibit booths providing public service information to the community. October 08	This event offers a venue for Outreach to focus on one of our short term goals - to inform individuals that indoor/outdoor daily activities impact the health of our watershed. Approx. 60 children/parents stopped by the booth for literature, information and/or to complete an art project on beneficial bugs for gardens.
Muslim Green Team Event	Event – General	This was the first time this event was held. The organization that hosted it extended an invitation to attend to SCVURPPP and Sunnyvale staff was able to fulfill the need. This event consisted of a variety of "green" exhibits and exhibitors. October 08	The Outreach exhibit highlighted the difference between sanitary sewers and storm drains, leading to information about water pollution prevention. This is primarily done through discussion, literature distribution, and presentations featuring the Enviroscape, which focuses on preventing water pollution from sources such as pesticides, fertilizers, dog waste, automotive fluids and car wash. Approx. 80 children/parents stopped by the booth for literature, information and/or to view an Enviroscape presentation.
Tarp Giveaway at the Landfill	Event - Targeted	This event was held in cooperation with the Silicon Valley Anti-Litter campaign, a collaborative effort for litter control in Santa Clara County. The event was conducted at the SMaRT Station in Sunnyvale November 08	A fact sheet, a free tarp and a brief reminder about litter prevention was given to drivers of vehicles arriving at the SMaRT Station with uncovered loads. At this event, 40 free tarps were given away.
Santa Clara County Creeks & Watershed Conference	Event – Targeted	This event was held by the Santa Clara County Creeks & Watershed Council and consisted of various booths and exhibits on related to county creeks, watershed issues and/or concerns and local government. November 08	This event offered a venue for Outreach to focus on how indoor/outdoor daily activities impact the health of our watershed. We used the exhibit that showed the difference between sanitary sewers and storm drains and handed out information on pollution prevention. During this event, we spoke to approximately 25 individuals.

PI/P Activity	Type of Outreach	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Community (cont.)			
SNAIL Neighborhood Association Meeting	Event – Targeted	Outreach staff was invited to speak at the monthly SNAIL Neighborhood Association meeting. March 09	Staff gave a presentation on the upcoming neighborhood litter clean up volunteer event and pollution prevention. Various brochures related to stormwater pollution prevention were distributed. Approximately 20 residents were in attendance.
Leadership Sunnyvale	Event – General	Leadership Sunnyvale is a community education program that provides it members with training on the fundamentals of leadership and classes in community awareness. The intention is to broaden participant awareness of complex community issues, strengthen leadership skills, and increase effectiveness in the community. During this annual event Public Works hosts an Environmental Awareness Day. April 09	This event presents a key opportunity to provide awareness to potential community leaders about watershed issues. Topics included wastewater treatment overview, a tour of the WPCP, and discussion on public outreach and education efforts regarding water pollution and its prevention. For this reporting year, 28 individuals participated in the event.
Earth Day Event – Thermometer Exchange	Event – Targeted	Sunnyvale hosted a week-long series of community events in celebration of Earth Day this year. Outreach staff participated in three events, which started on April 18 at the Farmers Market and concluded on April 25 with the Great American Litter Pick Up event. April 09	During the event at the Farmers Market, outreach staff hosted a Thermometer Exchange where 98 mercury containing thermometers were collected for proper disposal.
Great American Litter Pick Up	Event - Targeted	A county-wide event that focuses on cleaning up litter throughout Santa Clara County. This event wrapped up Sunnyvale's week on celebrating Earth Day. April 09	Nearly 60 volunteers participated and collected litter from neighborhoods within a one-mile radius of three different locations in Sunnyvale. Almost three cubic yards of trash and more than one-half cubic yard of recyclables were collected.
Columbia Health and Safety Fair	Event – General	Although the main emphasis is on fun, the city teams up once a year with local organizations to inform and educate area residents about health, safety, and community services. The event is held at the Columbia Neighborhood Center and provides opportunities for residents to educate and inform themselves about issues affecting their daily lives. May 09	The outreach exhibit highlighted the difference between sanitary sewers and storm drains. Literature about water pollution prevention was distributed and five Enviroscape demonstrations were presented during the event. Approximately 143 individuals (adults, students and children) visited the exhibit for information, literature and to view the presentations.

PI/P Activity	Type of Outreach	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Community (cont.)			
National River Clean Up Day	Event – Targeted	Sunnyvale participated in this annual event which focuses on cleaning up California's creeks and waterways. May 09	The event in Sunnyvale had 46 volunteers that cleaned 2.5 miles of Sunnyvale's East Channel and part of Calabazas Creek. Approximately 338 pounds of trash and 34 pounds of recyclables were collected in three hours.
Orchard Gardens Neighborhood Association Meeting	Event – Targeted	Outreach staff was invited to speak at the monthly Orchard Gardens Neighborhood Association meeting. June 09	Staff gave a half-hour presentation covering sustainable landscaping, including water conservation and IPM. Along with the presentation, various brochures and toilet tank leak detector tablets were distributed. Seventeen residents attended.
Compost workshops	Event - Targeted	Registrants learn that at-home composting turns organic material into valuable product for gardens and landscaping. Applying compost to gardens and landscaping reduces the need to apply fertilizer resulting in healthier plants, thus reducing the need for pesticide applications Ongoing	Workshops are held once per month, 10 times during the year. Attendance is sporadic, depending on the season. Generally, anywhere between 12 and 40 individuals attend each new workshop session.
Sunnyvale Farmers Market	Event - Targeted	The Sunnyvale Farmers Market is held every Saturday all year round. The Environmental Outreach exhibit promotes pesticide reduction through IPM practices during the Spring and Summer months, and highlights the difference between sanitary sewers and storm drains and pollution prevention during the Fall and Winter. Literature and fact sheets on less-toxic pest control are distributed. Other water pollution prevention literature is available, including the HHW mercury brochure and surplus utility bill inserts that target water pollution concerns. July – November 2008, February, March, and June 2009	The market draws 2-3000 people each Saturday and provides an effective way to interface with shoppers in a venue that promotes healthy food and pesticide free gardening. Everyone visiting the booth is in search of information about less-toxic pest control and/or water pollution prevention. For this reporting year, we spoke to approximately 253 individuals.

045013

PI/P Activity	Type of Outreach	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Community (cont.)			
Plant Tours	Event – Educational	Plant Tours are conducted year round. Treatment stages and processes are discussed, and attendees learn the function and importance of the wastewater treatment plant and its role of preventing water pollution from wastewater discharge. Both stormwater and wastewater pollution issues are discussed. Ongoing	The Plant conducted 7 adult tours in FY 08-09, reaching 91 individuals. Discussions about water pollution and issues impacting the watershed and the environment help tour attendees gain a better understanding of the problem. At the completion of the tour, attendees are given educational materials that promote environmentally responsible behaviors. Section for *Schools and Youth* lists additional outreach information. By the end of the tour, all participants know the difference between sanitary sewers and storm sewers.
Theater Billboards	Media – Targeted	Sunnyvale produced water pollution prevention advertising for on-screen viewing at the Mercado 20 and Cupertino 16 Theaters. Pollution prevention messages are selected according to priority and season. The advertisement for this FY focused on IPM and pesticides. April – May 2009	These 15-second animated/audio ads are viewed by movie audiences two times during a 15-minute timeframe prior to every movie shown in the theaters on a total of 36 screens. This is a beneficial method, albeit extremely expensive way to reach large groups of people with targeted pollution prevention messages.
Bus Back Ads	Media – Targeted	Sunnyvale produced water pollution prevention advertising for ads that were placed on the tail of a minimum of 50 VTA buses that have routes that are in Sunnyvale. The advertisement focused on the importance of keeping litter out of storm drains and was titled: *"If it flows down the street … it ends up in the creek".* May – June 2009	Sunnyvale received several positive comments on the ads from residents and others. The ads are viewed by many and encompassed most of the bus routes in Sunnyvale and Mountain View, along with areas in Santa Clara, Cupertino, Stanford, Los Altos and Loyola. Like theater ads, this is a beneficial yet expensive way to reach large groups with targeted messages.
Utility Bill Inserts	Media - General	Four pollution prevention advertisements were utilized as a bill inserts this reporting year. *How to Recycle Yard Trimmings (Sept-Oct 08)* *Have Fluorescent Bulbs or E-waste to Get Rid Of (Jan-Feb 09)* *Protect Our Waterways – Please Don't Litter (Mar-Apr 09)* *Keeping Our Creeks & Bay Clean (May-June 09)*	Stuffing utility bills with advertising inserts reaches approximately 30,000 account customers for each two-month mailing. This is an ongoing outreach effort, and we will continue to use this venue as a cost effective way to reach a large number of people.

PI/P Activity	Type of Outreach	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Community (cont.)			
Sunnyvale ReNews	Media – General	The Sunnyvale ReNews Newsletter is focused on reduce, reuse, recycle messages with a heavy focus on HHW. Articles and informational pieces relating to pollution prevention through proper disposal were published in the newsletter. *Household Hazardous Waste (Summer 08)* *Compost Workshop (Summer & Fall 08)* *Recycling Drop-Off Center (Summer 08)* *Thermometer Exchange (Fall 08)* *P2 Week Calendar Listing (Fall 08)* *Recycling at the SMaRT Station (Spring 09)* *Earth Day Events (Spring 09)* *Choice Collect (Spring 09)* *New! Med Drop Program (Spring 09)*	This newsletter is mailed quarterly to approximately 29,000 single family residents and 24,000 residents living in multi-family units. Copies are also available in key locations throughout the city. Considering the reach, we will continue to use this newsletter for outreach as it serves a productive method to continually remind the community about proper disposal of HHW products.
Quarterly Report Articles	Media - General	Pollution prevention articles targeting priority pollutants of concern and other messages were published in the city's quarterly community newsletter. *Compost Workshops (Summer 08)* *Plant Tours (Fall 08)* *Pollution Prevention Week (Fall 08)* *No Drugs Down the Drain (Fall 08)* *Did You Know ...(Fall 08)* *Trash & Recycling (Winter 09)* *Old Batteries Taking Over Your House? (Winter 09)* *Leaves, Leaves – Love Those Leaves (Winter 09)* *Plant Tours (under ongoing events) (Winter 09)* *Sunnyvale Celebrates Earth Day (Spring 09)* *We Must All Pitch in to Conserve Water (Spring 09)* *National River Cleanup Day (Spring 09)* *Thermometer Exchange Ad (Spring 09)* *Pilot Storm Drain Retrofit Project (Spring 09)*	The Quarterly Report is mailed to approx. 60,000 residents and businesses in Sunnyvale each every three months. In addition, 2000 copies of the report are distributed to reception and outreach areas around Sunnyvale. The Quarterly Report as it has proven to be a cost effective way to reach people who live, work and/or go to school in Sunnyvale with information on water pollution prevention.
Yahoo! Groups	Media – Targeted	Sunnyvale Cool City is group of Sunnyvale, California, residents and friends organized to act to reduce the emissions of greenhouse gases in their community.	This site calendared and promoted several of our events this year: Mercury Thermometer Exchange, Earth Week and Great American Litter Pickup.

PI/P Activity	Type of Outreach	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Community (cont)			
City of Sunnyvale Community e-News List	Media – General	Emails promoting the following events were sent out to a list of individuals interested in upcoming activities/events and City news: *Pollution Prevention Week (Aug 08)* *Mercury Thermometer Exchange (Aug 08)* *Coastal Cleanup Day (Aug-Sept 08)* *What Do You Do with Expired Meds (Jan 09)* *SV Urges Reduction in Water Use (Mar 09)* *Mercury Thermometer Exchange (Mar-Apr 09)* *Great American Litter Pick-up (Mar-Apr 09)* *National River Cleanup Event (Apr –May 09)*	These emails were sent to approximately 220 community members.
KSUN Community Cable TV	Media - General	Messages promoting certain events are developed and advertised on KSUN community cable TV. The following were ran during this FY: *Pollution Prevention Week Tips (Sept 08)* • *Tip #1 – Pesticides* • *Tip #2 – Auto Fluids* • *Tip #3 – Fluorescent Bulbs / Batteries* • *Tip #4 – Yard Waste* • *Tip #5 – Car Washes* *Mercury Thermometer Exchange (Sept 08)* *No Drugs Down the Drain (Oct 08)* *Mercury Thermometer Exchange (Apr 09)*	KSUN reaches approximately 20,000 Sunnyvale residents with cable TV of whom 20% watch KSUN at least once a month.
Flyers and Posters	Media - General	Posters were placed at various key locations throughout the city promoting the following events: *Coastal Cleanup Event (Sept 08)* *Mercury Thermometer Exchange (Sept 08)* *P2 Week Posters (Sept 08)* *No Drugs Down the Drain (Oct 08)* *Mercury Thermometer Exchange (Mar-Apr 09)* *Great American Litter Pick-up (Mar-Apr 09)* *Earth Week Activities (Apr 09)* *National River Cleanup (Apr-May 09)*	Any person living, working, going to school in Sunnyvale who used the library, community center, senior center or city hall could view the posters.

Santa Clara Valley Urban Runoff Pollution Prevention Program
Attachment G- Public Information and Participation (PI/P) Table 1
FY 2008-2009 Annual Report
Municipality: Sunnyvale

PI/P Activity	Type of Outreach	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Community (cont)			
Website	Media - General	Sunnyvale provides pollution prevention messaging on three different web sites in the City as well as on green.insunnyvale.com. - The Solid Waste and Recycling website provides HHW information regarding proper disposal of pesticides, fertilizers, and mercury containing products. - The Water Pollution Control Plant Pretreatment section includes specific business related BMPs for painting, concrete, facility, equipment, cleaning, and vehicle maintenance. The Water Pollution Control Plant web site has been revised and includes extensive water pollution prevention information and upcoming event information.	The City's website does not have the ability to count number of hits.
Press Releases – City of Sunnyvale	Media – General	Sunnyvale provided the following press releases on pollution prevention: *- Mercury Thermometer Exchange (Sept 08)* *- SV Fire Stations Provide Safe Disposal for Old Meds (Jan 09)* *- Earth Week Activities (Apr 09)*	All press releases are listed on the City's web site and may be picked up and run by other media agencies as well.
Sunnyvale Sun	Media – General & Targeted	Sunnyvale ran the following ads, articles and/or calendar listings in the Sunnyvale Sun during the last fiscal year: *Mercury Thermometer Exchange Print Ad & Calendar listing (Sept 08 & Apr 09)* *Watch Out for Toxic Pesticides (Sept 08 & Mar, Apr & June 09)Topics: Weeds, Roses, Snails & Yellowjackets* *Watch Out for Mercury Pollution (Sept & Nov 08)* *Litter is Water Pollution (Dec 08 & Jan-Feb 09)* *Fire Stations Will Collect Medicines (Jan 09)* *Earth Week Calendar of Activities/ Article (Apr 09)* *Reduce Water Usage Article (Apr 09)* *Compost Print Ad (Apr 09)* *National River Cleanup Day (May 09)*	The Sunnyvale Sun has a readership of approximately 36,824 and a circulation of 17,963. Several people who took part in the thermometer exchange event(s) brought a copy of the ad with them, indicating that was the source of their information about the event..

PI/P Activity	Type of Outreach	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Community (cont)			
San Jose Mercury News	Media – General & Targeted	The following ads and/or calendar listings(paper and/or zVents calendar) ran during FY 08/09: *Mercury Thermometer Exchange - print ad (BAPPG AD) & zVents listing (Sept 08)* *Coastal Cleanup (Sept 08) – countywide ad* *No Drugs Down the Drain (Oct 08) – BAPPG Ad* *Mercury Thermometer Exchange - zVents listing (Mar-Apr 09)* *Great American Litter Pickup - zVents listing (Mar-Apr 09)* *National River Cleanup Day - zVents listing (Mar-May 09)* *National River Cleanup Day – Sunnyvale site mentioned in article on event (May 09)*	An evaluation of media mentions is not feasible due to difficulties gathering data from widespread advertising.
San Francisco Chronicle	Media – Targeted	The following ads were developed by BAPPG and ran during FY 08/09: *Mercury Thermometer Exchange (Sept 08)* *No Drugs Down the Drain (Oct 08)*	An evaluation of media mentions is not feasible due to difficulties gathering data from widespread advertising.
Broadcast News Community Announcement	Media – Targeted	Thermometer Exchange –The morning show on KTVU (channel 2) announced the event and explained the dangers of mercury thermometers (Sept 08)	An evaluation of media mentions is not feasible due to difficulties gathering data from widespread advertising.
Employees			
Flyers & Posters	Media – General & Targeted	The following flyers & posted were posted in employee break rooms and/or building this FY: *Coastal Cleanup Event (Sept 08)* *Mercury Thermometer Exchange (Sept – Oct 08)* *P2 Week (Sept 08)* *No Drugs Down the Drain (Oct 08)* *Mercury Thermometer Exchange (Mar – Apr 09)* *Great American Litter Pick-Up (Mar – Apr 09)* *National River Clean-Up Event (Apr – May 09)*	Posters are distributed to city offices and displayed for employee viewing in the lunchrooms at city hall, library, corporation yard and community center. Reach cannot be determined.

045018

PI/P Activity	Type of Outreach	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Employees (cont)			
The Harbinger	Media – General	The Harbinger is the newsletter for employees of the city of Sunnyvale. The following water pollution prevention articles were published in reporting year 08/09: *Helping the Community to Protect the Environment (Jul-Aug 08)* *Coastal Cleanup (Sept-Oct 08)* *The Ants Come Marching In (Jan-Feb 09)* *Great American Litter Pick-up – calendar listing (Mar-Apr 09)* *National River Cleanup Day - Save the Date (Mar-Apr 09)* *Upcoming Events: National River Cleanup (May-Jun 09)* *Spring Cleaning (May-Jun 09)* *Tour the WPCP (May-Jun 09)*	Articles and information contained in the Harbinger reach approx. 900 municipal employees. This effort will be ongoing, as publishing in this newsletter provides a cost effective way to reach all employees with specific water pollution information and suggestions for behavioral change that could be useful both on the job and at home.
Poop Scoop	Media – General	Several articles targeting both general pollutants and specific pollutants of concern were published in this employee newsletter. *Pollution Prevention Week (Sept 08)* *Pilot Storm Drain Retrofit (Sept 08)* *As Rains Hit, Pollution Gets Swept Through Bay Area (June 09)*	Approximately 65 employees at the Water Pollution Control Plant read the Poop Scoop, the employee newsletter published periodically.
Water Conservation for Staff	Training – Targeted	An hour and a half workshop for employees on what actions one can take both at work and at home to conserve water. Sponsored through the citywide training program and presented by various city employees. Apr 09	Approximately 30 employees attended this training.
Environmental Procurement Policy for Staff	Training - Targeted	A 15 minute Power Point presentation is given at staff meetings throughout the city. Three presentations were held this year. Topics covered include purchasing recycled material, the City's IPM policy, and identification/proper disposal of mercury-containing products. May – June 09	Approximately 30 employees have received training in FY 08-09, with additional sessions planned for FY 09-10, pending staff meeting schedules. This is an effective way to provide 1:1 training and address staff questions about proper selection of materials, the IPM policy, and handling of wastes.

045019

PI/P Activity	Type of Outreach	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Business and Industry			
Sunnyvale Rotary Club	Event – General	Outreach staff was invited to speak at the Rotary Club's morning meeting during P2 Week. Sept 08	Staff spoke on the difference between and a sanitary sewer and a storm drain, the importance of pollution prevention and talked abut the Santa Clara Valley Green Gardener training program to approximately 10 members.
Life and Wellness Fairs Health and Safety Fairs	Event – General	Exhibitor booths offered free information to company employees that focused on helping them live a safer and healthier lifestyle. Business events attended this reporting year include: *Quicklogic Corporation (Aug 08)* *Lockheed (Sept 08)* *Aruba Networks (Apr 09)* *Network Appliances (Apr 09)* *Northrup Gruman (Apr 09)*	Staff attended Health and Safety Fairs at five Sunnyvale businesses this reporting year. The exhibit portrays the difference between sanitary sewer and storm drains and general water pollution prevention literature about mercury, pesticides, car wash, FOG, automotive fluids, etc is available. Approximately 600 company employees received water pollution prevention information at the events held this fiscal year.
Business E-Mail Blasts	Media - General	The following opportunities for community action/involvement was sent this FY: *Great American Litter Pickup (Apr 09)* *National River Cleanup Day (May 09)*	This e-mail blast goes out to businesses in Sunnyvale that have opted to receive messages from the Recycling division.
Schools and Youth			
Creek Education Program	Event – Targeted and Educational	Water and Structures of Life. After studying the course in class, students take a creek education trip to McClellan Ranch Park as a supplement to their water studies course. This program is produced in partnership with the Cupertino School District. School year 08-09	This reporting year, Sunnyvale provided funding to cover the transportation cost of (4) buses, reaching approximately 381 students.
Classroom Presentations	Event – Targeted and Educational	In this water pollution education program, staff provides and presentation and demonstration on water pollution and prevention. Students learn the forms of water, the water cycle, what a watershed is, how water pollution happens, how to prevent water pollution, and how to conserve water. School year 08-09	Outreach conducted 38 classroom presentations this school year, reaching approx. 886 children. These numbers reflect an increase of 130% in the number of students reached and an increase of 140% in the number of classrooms participating. Feedback from teachers indicated the information greatly improved student understanding of storm drains and water pollution caused by human activities. Teachers felt the program reinforced and supplemented their own curriculum.

045020

PI/P Activity	Type of Outreach	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Schools and Youth			
Plant Tours School Groups and Boy/Girl Scouts	Event – Educational	Students / scouts learn the stages of treatment by viewing the various processes, equipment, and tanks. Taking a tour of the plant helps students gain a better understanding of how human actions impact water in the sanitary sewer. School year 08-09	Outreach conducts student tours of the Water Pollution Control Plant to educate youth about how the treatment plant functions and the importance of providing wastewater treatment. Youth also learn the different between sanitary and storm drain collection systems. The plant hosted 19 youth tours this reporting year, reaching over 378 students/scouts.
Sunnyvale Farmers Market	Event - Targeted	At the market, staff from Environmental Outreach passed out water conservation stickers to children accompanied with a verbal reminder about how they should be careful not to waste water.	Approximately 200 children received the stickers with a brief, verbal water conservation message during this reporting year.
Community Kidz Workshop	Event – Targeted and Educational	Sponsored by the City twice a year during Winter and Spring school breaks. Through fun games and activities, camp participants learn about living a healthy lifestyle and how they can contribute to the welfare of the community they live in. Feb & Apr 09	This was the first year for outreach staff to participate in this program. Presentations focused on the difference between sanitary sewers and storm drains, leading to information about water pollution prevention. This was primarily done through discussion, student participation in an "Environmental Jeopardy" game, and a demonstration using the Enviroscape. In cooperation with Solid Waste staff who presented recycling information, Earth Care Kidz cards were given to participants. February's session had 28 children attending and April's had 50. We have been asked to participate in future workshops scheduled in FY 09-10.
Library Presentation	Event – General	A joint venture between Solid Waste and WPCP staff. This presentation was held during Earth Week, was titled Pollution Solutions and focused on water pollution prevention and recycling. The ages for the attendees were 3-5 years. Apr 09	This was a first time event. Presentations focused on the difference between sanitary sewers and storm drains, leading to information about water pollution prevention. This was primarily done through discussion and a presentation featuring the Enviroscape. Thee event was attended by 27 people (15 children and 12 adults). A presentation at another joint venture is planned for the Summer of 2009.

Santa Clara Valley Urban Runoff Pollution Prevention Program
Attachment G- Public Information and Participation (PI/P) Table 1
FY 2008-2009 Annual Report
Municipality: Sunnyvale

PI/P Activity	Type of Outreach	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Regional (Events that Sunnyvale helped Staff)			
Spring Garden Market – Santa Clara County Master Gardeners event	Event - Targeted	A weekend event in San Jose related to gardening and sponsoring exhibits that educate the public on how to protect the environment using sustainable gardening practices. Various vendors participate, selling plants and offering gardening tips. Apr 09	Sunnyvale supported Program efforts by helping to staff the exhibit at this event. See SCVURPPP section for additional information.
Mission College Eco / Earth Day Fair	Event - Targeted	Inaugural event at Mission College in Santa Clara that featured Green community organizations, eco friendly vendors, interactive activities and demonstrations. Apr 09	Sunnyvale supported Program efforts by helping to staff the exhibit at this event. The goal of the outreach was to inform the public on watersheds and water pollution prevention.
Festival in the Park	Event – Targeted	A weekend event in San Jose related to health and wellness, sponsoring exhibits that educate the public on how to protect the environment. Various vendors participate, promoting health, wellness and sustainable environment practices June 09	Sunnyvale supported Program efforts by helping to staff the exhibit at this event. The goal of the outreach was to inform the public through interaction and providing literature and "fly swatter" give-aways to promote IPM practices. Outreach was provided on the Santa Clara Valley Green Gardener program for landscape maintenance needs for the public.
Ad Hoc Task Group Mercury	Targeted	SCVURPPP work plan activities include developing a mercury virtual elimination policy for the City, educating employees, public outreach to residents and commercial businesses on fluorescent light recycling and other mercury containing products, and working with the County Household Hazardous Waste Program.	Sunnyvale is a participating and contributing member of the Ad Hoc Task Group for Mercury, and will continue to work with co-permittees, SCVURPPP staff, and the consultant to approve region-wide campaign action plans, implement strategies and activities, and to develop promotional materials.
Ad Hoc Task Group Pesticides	Targeted	Sunnyvale is a participating and contributing partner in the IPM Pesticide Outreach Work Group.	The goal of the campaign is to educate residents of Santa Clara County about watershed protection through water pollution prevention awareness and appreciation, to promote public involvement in watershed stewardship through behavioral changes, and to change behaviors that negatively impact the watershed.

045022

PI/P Activity	Type of Outreach	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Regional (cont)			
Watershed Education and Outreach Workgroup Participation	Targeted	The goal of regional workgroup participation is to share information and discuss watershed education with co-permittees.	Several times a year, Sunnyvale attends meetings with regional co-permittees to discuss watershed issues and determine current workgroup issues. In an ongoing effort, Sunnyvale is a participating member of the following workgroups sponsored by SCVURPPP Alviso Ed Center, Schools Group and update of Public Participation list.
Our Water Our World	Targeted	Sunnyvale has been active in the OWOW campaign by writing and publishing articles in newsletters, editing and producing PSAs, organizing local events, participating in regional events and presenting classroom programs.	Outreach activities at local community and regional events promote less toxic alternatives to common pesticides. Outreach staff met with Management at Home Depot located at 690 Kifer Road in Sunnyvale in June to discuss and welcome them to the campaign.
Retail Stores Program	Targeted	Sunnyvale worked with the co-permittees to ensure that retail nurseries/hardware stores in Sunnyvale continue their participation in the IPM campaign at the point of sale.	The program works with retail hardware and nursery stores in a partnership effort to educate customers about the danger of pesticides, to offer, promote less toxic options for pest control and an agreement to display IPM literature. See the Program's section of this report for a region-wide evaluation of the program's effectiveness.

Pollution Prevention Week

What Can you Do to Protect Your Bay Today?

This year, Sunnyvale will team up with state and federal agencies, businesses and communities nationwide to promote the benefits of pollution prevention during National Pollution Prevention Week, starting September 15. The Bay is closer than you think, since our City storm drains connect to outfalls in creeks and channels that flow directly to San Francisco Bay. Practicing pollution prevention in the garden or during indoor and outdoor chores can be easy. By simply adopting some of the alternative practices listed below you too can protect your bay today.

Gardening Tips

Various techniques can be used in your garden that will contribute to a cleaner, safer and pollution-free environment:

- Do not fertilize or apply pesticides when rain is forecast within 24 hours. Runoff from rain or over-watering can carry fertilizer and pesticide residues into the storm drain system, degrading water quality in local creeks and the Bay.
- To rid your garden of uninvited pests, consider including plants that attract beneficial insects and introduce "good bugs," such as ladybugs, that will consume insect pests. Visit *www.mywatershedwatch.org* and click on the *Got Bugs* tab for more information.
- Do not blow or rake leaves or lawn clippings into the street, or place yard waste in gutters. Use a broom or rake, not a hose, to clean up leaves, lawn and garden clippings and place them in your green yard waste container for recycling. This will protect storm drains from clogging and reduce the amount of pesticides and fertilizers that may be present on green waste from entering our creeks and the Bay.

Green Gardener Program

Is your gardener a Green Gardener? Started in spring 2008, the Santa Clara Valley Green Gardener training program offers education and training to landscape maintenance professionals in the key principles of ecological landscaping. In the 10-week, 20-hour series of classes, individuals are taught to conserve water through good irrigation practices, protect and nourish the soil, and to reduce the need for pesticide use through integrated pest management practices. For information on classes being offered or to find a trained Green Gardener visit *www.mywatershedwatch.org* and click on the Green Gardener logo.

Around the House

- Chores and activities around the house can cause water pollution. For a cleaner Bay and environment, try incorporating the following tips:
- Avoid using toxic chemicals to clear a drain. Instead, clear your drains by pouring 1/4 cup baking soda into the drain, followed by 1/4 cup vinegar. Later, flush the drain with boiling water.
- Repair leaking vehicles promptly to help keep auto fluids off the street. Soak up spills with an absorbent such as kitty litter or sand. If you change your own oil or antifreeze, recycle it. Never dump oil or any automotive fluid on the dirt or in the storm drain.
- House repairs? Keep all construction debris, materials, and dirt piles covered and away from the street, gutter and storm drain. If a dumpster is used, be sure it is securely covered with a lid or tarp when not in use.
- Encourage family and friends to try some of the above suggestions. Working together and incorporating pollution prevention techniques, we can protect our shared environments and the Bay.

DID YOU KNOW?

The City offers composting workshops to its residents so they can learn how to use their own yard trimmings to make compost at home.

The workshops are led by experienced gardeners and master composter volunteers. The events are held one Saturday per month from 10 a.m. to noon at the City's Orchard Heritage Center, next to the Sunnyvale Community Center at 550 E. Remington Drive. The next workshop is scheduled for October 18.

Registration is requested. Sign up online at *CompostWorkshop.InSunnyvale.com* or by phone at (408) 730-7262, TDD (408) 730-7501.

TAKE A TOUR OF THE PLANT

Want to learn what happens to the water after it's sent down the drain? Take a free tour of Sunnyvale's Water Pollution Control Plant. Tours are fun for kids and adults, and provide environmental education to help better understand the water we so often take for granted. During the 90-minute tour, visitors will learn the various stages of treatment, how the plant uses alternative fuel sources to conserve energy and how Sunnyvale conserves by using recycled water on the landscaping at corporate business parks and City facilities.

Tours can be adapted to meet specific curriculum needs and are conducted Monday through Friday between 9 a.m. and 3 p.m. Call (408) 730-7738, TDD (408) 730-7501, to make a reservation. For more information about the Water Pollution Control Plant, visit *wpcp.sunnyvale.ca.gov.*

FOR ALL CITY SERVICES, TDD ACCESS (408) 730-7501

City Of Sunnyvale Awarded Urban Forestry Management Grant

Volunteers Needed

Street trees are an important part of the character of our City. The state Department of Forestry and Fire Protection (CAL FIRE) has awarded a $33,000 grant to assist the City of Sunnyvale in developing an Urban Forestry Management Plan. The plan will include a community participation and education program, encouraging collaboration between City council, City staff, businesses and residents, as well as assistance from state and federal agencies to help manage our urban forest.

Sunnyvale is looking for volunteers to participate in this process. Community volunteers will evaluate the condition of our street trees and their impact on neighborhoods, as well as giving input to staff on the components of the proposed plan. Even if you think you know little about trees but are interested in our community trees, you are invited to participate.

For more information, or to volunteer, contact Leonard Dunn, Street Tree Services Manager, at *ldunn@ci.sunnyvale.ca.us* or call (408) 730-7505, TDD (408) 730-7501.

Old Batteries Taking Over Your House?

Don't put them in the trash. Recycle them.

Batteries from toys, games and other household cordless products contain hazardous materials that do not belong in the landfill.

If batteries are disposed of in the garbage, they end up in the landfill where the hazardous materials can eventually leak into and pollute our groundwater.

Here are some options for proper disposal:

- Residents with curbside collection service may put household batteries in a clear plastic bag and place it on top of the recycling cart on collection day.
- Recycle the rechargeable batteries that power most common household cordless products at your local Radio Shack, Orchard Supply Hardware or the SMaRT® Recycling Center Station.
- Bring batteries to a scheduled HHW drop-off event: the third Saturday of every month (except December), at 164 Carl Road, from 8 a.m. to 1 p.m.

For more information, contact the City of Sunnyvale Recycling Program (408) 730-7262, TDD (408) 730-7501 or visit *Recycling.inSunnyvale.com*.

SUNNYVALE CELEBRATES EARTH DAY

The community is invited to join Sunnyvale in celebrating Earth Day with community events and activities starting Saturday, April 18. Events planned for Earth Day week include:

- April 18 – Sunnyvale Farmers Market: exchange your old mercury thermometer, get bicycle and transit maps, and see how Sunnyvale is growing greener
- April 18 – Composting Workshop
- April 20 – Children's activities about water and recycling at the Library
- April 22 – The Future is Here! Featured Earth Day workshop on current and emerging green technologies developing right here in the Sunnyvale area
- April 25 – Citywide Garage Sale
- April 25 – Great American Litter Pick-up

For a complete list of Earth Week activities visit *Green.inSunnyvale.com* or call (408) 730-2783, TDD (408) 730-7501.

045028

Helping the community to protect the environment

Although community groups often use car washes to raise money, they can have a tremendous impact on water pollution and can negatively effect the environment. Washing cars on a paved surface can send pollution such as oil, grease, exhaust fume residue, rust, benzene and chromium through the storm drain system to our local creeks and Bay. That's why Sunnyvale's Environmental Services loans Sudsafe Car Wash kits to non-profit organizations. The kits prevent soapy, contaminated car wash water that can harm fish and other wildlife from entering the storm drain system and polluting our water.

If you receive a call from a member of the public looking for information on car wash events, refer the caller to Environmental Services at the Water Pollution Control Plant at (408) 730-7260. As you travel around the community on City business, be on the lookout for car wash events or other activities causing storm water pollution. To report incidents of water pollution, call (408) 730-7270 during normal business hours and an inspector will be dispatched to speak to the individual about water pollution prevention.

Mark Your Calendar

24th Annual California Coastal Clean-up Day

Mark your calendar for September 20 and take part in California Coastal Cleanup Day. Join together with others and take action in an effort to clean-up the environment. The best part is you don't have to travel to the coast to participate! Although events will take place at beaches and local waterways around the state, our local clean-up event will focus on Sunnyvale's West Channel waterway and a part of the Guadalupe Slough. Activities begin at 9 a.m. and the clean-up will continue until noon. Gloves, pick-up sticks, safety vests, trash and recycling bags will be distributed.

This event offers a great opportunity to support clean and healthy waterways in Sunnyvale by removing the debris that can threaten the marine environment in San Francisco Bay. For more details or to sign up to participate in Sunnyvale's California Coastal Cleanup Day, call Environmental Outreach at (408) 730-7717.

The Ants Come Marching In

Has the local ant colony invaded your office or break room this winter demanding food and shelter? Before you reach for that can of household pesticide to combat the armies of unwanted pests, remember the City of Sunnyvale has an Integrated Pest Management Policy for all City employees. The policy asks us to use less-toxic pest control methods and to leave the use of applying pesticides to specially trained city staff or contractors. A copy of this policy can be found at *http://jasmine/ipm-policy.pdf.*

To prevent ant invasions:

- Store food only in tightly sealed containers or in the refrigerator.
- Keep areas clean of food debris and wiped dry. Crumbs and open food or water containers are an invitation to these pests.

Quick fixes for ant invasions:

- Find out what the ants want and where they are entering into your space. Mark their entry area.
- Don't remove the food or water source they want until you have started the ant clean-up process. If you do, they will scatter and then become more difficult to clean up.
- Use a vacuum to clean up lines of ants or spray ants with soapy water and wipe them up with a sponge. Using soapy water has the advantage of washing away the chemical trail that other ants will follow.
- If possible, temporarily block their entryway using a smear of petroleum jelly or a piece of tape.
- If you can't find the exact entry point, clean up the ants the best you can to the area where you think they are coming from and one that is away from your immediate work area.
- If ants are nesting in a potted plant, move it outdoors. Water the pot thoroughly and place it in a bucket filled with water to an inch below the rim of the pot. Lean a stick or pencil from the edge of the pot and the rim of the bucket (like a drawbridge over the moat) so ants have an exit pathway without getting into the water. Ants will soon begin evacuating the pot, carrying their white-colored eggs to safety. When ants stop emerging, drain the pot and return it to your office.

If you continue to have ant or other insect or rodent problems, contact Facilities Management at ext. 7761 to arrange for a pest control contractor to apply the appropriate control measures.

Spring Cleaning

Litter in our creeks is not only unsightly – it also impacts water quality and harms local wildlife. You can join other City staff to participating in National River Cleanup Day 2009, Saturday, May 16, from 9 a.m. – noon.

National River Cleanup Day is sponsored by the Creek Connections Action Group, a consortium of public agencies and nonprofit organizations that share a common goal of protecting Santa Clara County's waterways. This year's event in will focus on picking up litter and debris from the Sunnyvale East Channel and areas around Baylands Park.

This event is open to everyone, but may not be suitable for young children. Youth under the age of 18 must have parental approval, and anyone age 16 and under must be accompanied by an adult. To find parental approval forms, visit *www.cleanacreek.org.*

Gloves, pickup sticks, safety vests and trash and recycling bags will be provided. Volunteers are encouraged to wear long pants, sturdy shoes, hats and lots of sunscreen. To register or receive further information, call the Environmental Outreach division at ext. 7717, or e-mail *wpcp@ci.sunnyvale.ca.us.* Registered participants will receive additional instruction on the morning of the event.

VOLUME 8 ISSUE 12 THE POOP SCOOP

ENVIRONMENTAL OUTREACH

National Pollution Prevention Week
September 15-21

National Pollution Prevention Week originated in California in 1992, and as the name suggests, the goal of the program is to promote pollution prevention through public awareness.

This year, the theme for National Pollution Prevention Week is

Protect Your Bay – Today!

During this week especially, an opportunity exists for everyone to be more aware of their own habits and actions that may impact the environment in a negative way.

Did you know that in past studies the U.S. EPA determined that contaminants in urban runoff are the main reason that approximately ***40 percent*** of surveyed rivers, lakes, and estuaries in the U.S. are not clean enough for fishing or swimming?

Some of these contaminants include: garden and lawn chemicals, automobile fluids, pet waste, yard waste and litter. The Bay is closer than you think. By simply adopting some of the alternative practices listed below you can ***Protect Your Bay—Today!***

- Do not fertilize or apply pesticides when rain is forecast within 24 hours. Runoff from rain or over-watering can carry fertilizer and pesticide residues into the storm drain system, degrading water quality in local creeks and the Bay.

- Avoid using toxic chemicals to clear a drain. Instead, clear your drains by pouring ¼ cup baking soda into the drain, followed by ¼ cup vinegar. Later, flush the drain with boiling water.

- Repair leaking vehicles promptly to help keep auto fluids off the street. Soak up spills with an absorbent such as kitty litter or sand. If you change your own oil or antifreeze, recycle it. Never dump oil or any auto fluid on the dirt or in the storm drain.

Working together and incorporating pollution prevention techniques, we can protect our shared environments and the Bay.

If you'd like more information on water pollution prevention and solutions, please see Jackie.

045033

Page 4 **Environmental Outreach** Volume 9, Issue 13

As Rains Hit, Pollution Gets Swept Through Bay Area Watersheds

The rains of the season have hit the Bay Area, bringing more than just gloomy skies and traffic problems. Heavy rains also bring an upsurge in water pollution as trash and other pollutants that build up during the dry season are picked up from Bay Area watersheds and washed into storm drains and waterways.

As parking lots and houses increasingly replace vegetation and open space in the Bay Area, fast moving runoff from these water-resistant surfaces carries everything in its path into local storm drains, which flow directly to local waterways. During heavy storms, trash, organic matter, and automotive pollutants end up in creeks and the Bay, threatening water quality, recreation, and wildlife in our local watersheds.

Storms flush large amounts of pollutants from Bay Area watersheds down into creeks, destroying habitat, depleting oxygen levels, and poisoning fish. Even leaves and grass clippings carried into creeks with rainy weather can disrupt the ecological health of our waterways.

You can help protect the watershed by doing any or all of the following things:

-Set an example for others by not littering. If you do see litter, pick it up and put it in a trash can or recycling bin.

-Carry a litterbag in your car or on your bicycle.

-Keep trash containers covered securely to prevent wind or animals from spreading litter.

-Keep leaves and yard clippings picked up around your home and recycle as green waste.

-Regularly maintain your vehicle to avoid auto fluid leaks that build-up on roadway surfaces.

-Use non-toxic or less toxic methods of pest control in your yard and garden, and use only amounts recommended on the label.

If you'd like more information on how you can help prevent water pollution, please see Jackie.

Pollution Prevention Tip:

It's against the law to throw flourescent bulbs or batteries in the trash. Dispose of them properly at the Sunnyvale SMaRT Station or at a Household Hazardous Waste drop-off event.

FY 08 - 09 Annual Report

Attachment H

Pesticide Management Activities

P.S. Id.	Activity	CI Item Source	FY 08-09 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
	Control Program for Pesticides					
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Continue to track OP pesticide usage and other pesticides identified as creating potential water quality problems on City-owned property. Report types and quantities used in Annual Report for the previous calendar year. Track quantities of the top five pesticides by the City. Report quantities of active ingredients and locations used.	• All pesticides applied by City staff, including OP (Organophosphate Pesticides) to City-owned property are tracked via the monthly Summary Pesticide Use Report (Form PR-ENF-060) that are submitted to the County Agriculture Commissioner • The data from these forms as well as data provided by any contractors who apply pesticides to city-owned property are tracked in Excel tables • Reports on the top-five (greatest quantities of active ingredient) applied for both solid and liquid formulations are included in Appendix 1 of this Attachment.	Annually Report 09/09	Kristy McCumby Env. Spec.
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Hold an annual meeting for Department /Division staff involved in implementing the City's IPM Policy to identify issues and suggestions for enhancements to the current IPM practices.	Discussed possible changes to the City's current IPM policy, in light of potential MRP requirements. No changes in the current policy were identified for this time and once the MRP is adopted, the current policy will be reviewed and revised per the MRP requirements.	Report 09/09	Kristy McCumby Env. Spec. & Scott Morton, Parks Supervisor.
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Hold annual training for Parks Division to educate staff regarding pesticide and turf product applications, Integrated Pest Management Policy, and irrigation water run off	Annual Training was held on November 19, 2008 and on March 26, 2009 for Parks Division Staff. See Attachment M for details.	Annually Report 09-09	Scott Morton, Parks Supervisor
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Train other staff (e.g., Public Works) who apply pesticides as a regular part of their job duties as to the requirements of the Plan and Policy. Provide information and training on the contents of the plan to all City employees	Annual training for PW staff (Boulevard Landscaping was held on February 26, 2009. See Attachment M for details.	Annually Report 09/09	Kristy McCumby Env. Spec.

Control Program for Pesticides (cont.)						
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Modify Pest Control Vendor's contracts as they come up for renewal, to include requirements that they 1) Follow the City's IPM Plan/Policy, BMPs and SOPs. 2) Provide evidence of current IPM training for contractor employees working on City property. 3) Contractors to annually provide copies of State of California Monthly Summary Pesticide Use Report (Form PR-ENF-060 Rev. 4/92) or the equivalent to Environmental Division staff	• Standard language is included in contracts for firms providing pest control services to the city, requiring that they follow the city's IPM Policy and that they provide information as to the types, quantities and locations of the pesticide applications and any control measures that were needed. • This information is included in Appendix 1 of Attachment. This information is tracked in an Excel table based on Invoice Service slips provided by the contractors. • The City's structural pest control contractor provided copies of certifications for hours of training this FY, including training received on IPM practices. These are kept on file in the Environmental Division.	Annually Report 09/09	Kristy McCumby Env. Spec. and City Finance Manager (TBD)
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Inform new leaseholders of the City's IPM policy	The city's contractor for property management annually includes a flyer on the city's IPM policy that is mailed to the leaseholders.	Annually Report 09/09	Kristy McCumby, & Mike Chan, City Pro. Mgr.
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Document training city staff that applies pesticides to ensure compliance with training requirements established by the County Agriculture Commissioner and the State Dept. of Pesticide Regulation. Provide annual training to staff who apply pesticides on the City's Pest Management Plan, IPM Policy, SOPs, BMPs, and IPM techniques appropriate to the pests	• All city staff who apply pesticides as a regular part of their job duties hold all appropriate certifications from DPR. • Records of training and certification status are kept by the departments that those staff work in • Staff is provided annual training on the City's IPM Policy as part of their Pesticide Safety and Use Annual Training (See Attachment M for details).	Annually Report 09/09	Lead: Kristy McCumby Env. Spec. Support: Mike Eccles, Sr. PW Leader and Scott Morton, Parks Supervisor

Control Program for Pesticides (cont.)						
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Work with SCVURPPP IPM Pesticide Outreach Work Group to coordinate with regional efforts to provide training to small businesses that perform landscape maintenance to residences and commercial entities.	Staff continues to work with IPM Pesticide Outreach ad hoc work group of SCVURPPP. Staff continues to be significantly involved with the implementation of and teaching IPM topics for the Santa Clara Valley Green Gardener program, sponsored by SCVURPPP. Various outreach efforts were coordinated with SCVURPPP as well as providing information about the SV GG training program at events in Sunnyvale, encouraging residents to hire trained Green Gardeners. See the Program's section of the Annual Report for Details about the Green Gardener Training Program.	Annually Report 09/09	McCumby Env. Spec. and Jackie Besoyan, Environmental Outreach Coord.
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Document education provided on the City's IPM Plan/Policy for staff who do not apply pesticides and on the prohibition for use of over-the-counter pesticides by untrained staff in and around the workplace (consistent with the City's IPM Plan/Policy). Report on activities/ numbers reached in Annual Report.	• Information about the City's IPM Policy is available on the City's intranet Website, Jasmine, as well as published in the Administrative Policy Manual • The need for annual staff training has become less essential over the past 6 years, since the policy was first enacted. Employees have learned at part of their job, to utilize the City's Pest Control Contractor who follows the City's IPM Policy, to deal with pest issues that may arise in their work areas, rather than purchasing over-the-counter products for pest control and applying pesticides themselves. • An article was published In the Jan /Feb 09 issue of the employee newsletter, the Harbinger. The article, entitled *The Ants Come Marching In* reminded employees about the prohibition for use of over the counter pesticides , the Cities IPM policy and how coached employees on how to	Annually Report 09/09	Kristy McCumby Env. Spec. Support: Jackie Besoyan, Environmental Outreach Coord.

				use IPM and less toxic options for pest control in and around ones work area. See Attachment G, Table 1 for numbers reached through the Harbinger.		
Control Program for Pesticides (cont.)						
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Evaluate effectiveness of training. Report on progress in Annual Report.	The effectiveness of the training and information sharing on IPM practices as well as the City's policy can be shown by the positive changes in the continuing use of less toxic options for dealing with pest problems, significant reductions in the use of OP pesticides (rarely any used in the last 4 years), and the overall good management practices (e.g. proper irrigation and mulching) that help reduce the need for pesticide or herbicide use on city property. Also, the contractor for structural applications has also moved toward using reduced risk chemicals and baits versus more toxic options used in the past.	Annually Report 09/09	Kristy McCumby Env. Spec.
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Conduct annual citywide search of chemical storage areas for pesticides that are no longer legal for application per EPA, State, and/or local requirements. Properly dispose of any such pesticides pursuant to appropriate waste disposal regulations.	Public Works, Boulevard Landscaping inventoried the Public Works Chemical Storage Room in February 2009. No OP pesticides or other older "illegal" were found. There were some product found that are no longer used by the City and they will be disposed of by a hazardous waste contractor as funds become available. Parks Division staff inspected their chemical storage area and found no OP pesticides or other older "illegal" pesticides – completed on 5/1/09	Annually Report 09/09	(Report) Kristy McCumby, Env. Spec. (Support) Mike Eccles, PW, Scott Morton, Parks Supervisor

Control Program for Pesticides (cont.)						
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Continue to assist with local implementation of the Watershed Education and Outreach (WE&O) Campaign. Distribute literature and other outreach materials at sponsored events; disperse articles and ads about less-toxic pest control and proper disposal techniques to media venues such as newsletters, utility bills, and movie ads. Support Program events in coordination with Watershed Watch.	Sunnyvale has been active both in the local implementation of the WE&O Campaign and is a participating member of the Pesticides Ad Hoc task group. Outreach activities include distribution of literature at sponsored events, and classroom Enviroscape demonstrations explaining water pollution from pesticide and fertilizer runoff. Media sources for outreach include theater ads, newsletter articles, newspaper ads, community cable TV ads, and information provided to the public via the website. Subjects covered include prevention of water pollution from pesticides and fertilizers, integrated pest management, proper disposal of pesticide products, and sources of additional information. See Attachment G Table 1 – Detailed Descriptions PI/P Activities and Self-Evaluation Matrix for FY 08-09.	Annually Report 09/09	Jackie Besoyan, Environmental Outreach Coordinator
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Continue to help business and community members to say current with the City's IPM Policy by editing the document posted on the web page as updates become available. Include updates to IPM techniques for pests.	Information regarding the City's IPM Plan and Policy, general IPM techniques, and links to IPM fact sheets is posted for public review on the Water Pollution Control Plant web page and is reviewed and updated on an as needed basis.	Annually Report 09/09	Jackie Besoyan, Environmental Outreach Coordinator
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Continue to provide at least one story on IPM practices/ successes and/or the City's Pest Management Plan and IPM Policy to local newspapers and/or citywide newsletters.	Articles and/or ads regarding IPM, pesticide reduction and proper disposal of pesticides were published in a variety of newsletters and the local community paper. See Attachment G Table 1 – Detailed Descriptions PI/P Activities and Self-Evaluation Matrix for FY 08-09.	Ongoing Report 09/08	Jackie Besoyan, Environmental Outreach Coordinator

Control Program for Pesticides (cont.)						
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	1) Continue to assist with the local components of a "Pesticide User Outreach" as proposed by the program. Target residential and commercial users. 2) Based on recommendations from the Program's research reports and surveys of business pesticide usage, develop and implement education that will target specific businesses.	The City of Sunnyvale continues to assist the Program by implementing pesticide user outreach components targeting residential and commercial users, by participating in business events, and by providing literature to retail stores and nurseries. • Sunnyvale's Pretreatment Program has pesticide BMP brochures which are regularly distributed during inspections to landscaping facilities, nurseries and home retail stores. • See Attachment G Table 1 – Detailed Descriptions PI/P Activities and Self-Evaluation Matrix for FY 08-09. • To target commercial pesticide use, Sunnyvale continues to participate in the Santa Clara Valley Green Gardener Training program to provide landscape maintenance workers and professionals with training to learn practices that conserve water, protect the soil, and reduce the need to use pesticides. See the Program's section of the annual report for a description of the class activities and Sunnyvale's participation.	Annually Report 09/09	Jackie Besoyan, Environmental Outreach Coordinator
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Continue work with the Program to provide information on less toxic pest control (e.g., IPM techniques, municipal IPM policies, model contract language, and training opportunities) to neighboring special districts (e.g., open space districts, vector control districts, and school districts) as appropriate.	Promotion to special districts in Sunnyvale (school districts) was conducted by the Program in FY04-05 and has not been repeated to date. The City Parks Division has maintenance agreements for outside grounds with some schools within the City's jurisdiction. All pertinent laws are followed regarding posting and public notification.	Annually Report 09/09	Jackie Besoyan, Environmental Outreach Coordinator

Control Program for Pesticides (cont.)						
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Track and/or estimate the numbers of Sunnyvale residents and staff reached through outreach efforts (including advertising) regarding the City's IPM policy, pesticide use reduction, and related topics.	Estimated numbers of Sunnyvale residents and staff reached through outreach efforts are recorded on Attachment G Table 1 – Detailed Descriptions PI/P Activities and Self-Evaluation Matrix for FY08-09 and Attachment H, Appendix 1, Table 2.	Annually Report 09/09	John Pilger, Com Officer & Jackie Besoyan, Environmental Outreach Coordinator

Response to Regional Water Quality Control Board Comments on ICD Activities Section to FY 07-08 Annual Report:

Contrac Blox Rodenticide/Bell Laboratories Inc.	8.5	lbs (blocks)	Bromadiolone	0.005%	0.004 lbs (blocks)	All City Buildings

Pesticide Use and Integrated Pest Management Policy Implementation in the City of Sunnyvale

Quantities of Diazinon and Chlopyrifos-Containing Compounds Applied:

- No pesticides containing Diazinon were applied on City of Sunnyvale Properties from 2001 through June 2009

- From 2001-2005, only a few applications of products that contained Chlorpyrifos were used by City staff in very small amounts. From 2006 through June 2009, no applications of Chlorpyrifos-containing products have occurred.

The use of chlorpyrifos-containing pesticides is very low and infrequent. The choice to use this pesticide is made only after the City's IPM policy is followed and there is specific written justification for its use by a Pest Control Advisor. The quantity and location of its use depends on the specific need to control an insect problem.

Pesticide Removals:

- Annual searches of pesticide storage areas in Public Works, Parks and Recreation, and the Golf Course have not turned up any pesticides that were prohibited for current use. In FY 04-05, some pesticides containing Diazinon, Dursban, and chlorpyrifos were found by Public Works staff during their storage area inventory. These were disposed of in FY 05-06 as hazardous wastes, following all appropriate state and federal regulations. Storage area searches in FY 08-09did not find any pesticides that were prohibited for current use and only a few that were identified as no longer being used by staff. Some were disposed of per State and Federal requirements in FY 08-09 and others will be disposed of in accordance with appropriate State and Federal law in FY 09-10.

Sunnyvale's IPM Policy:

- A copy of the IPM Policy that was placed in the City's Administrative Policy Manual (APM) – Chapter 6, Article 12. The public also has access to the policy through the Water Pollution Control Plant website at http://wpcp.sunnyvale.ca.gov The IPM Policy information is also available on the City's Intranet website for access by all City staff.

- Outreach to the City's trained/licensed pesticide application staff about the IPM policy continued in FY 08-09 (See Attachment M for staff training information.) Outreach to all other city staff (those who are not approved to apply pesticides) about the policy occurs through two mechanisms: articles in the city staff newsletter the Harbinger reminding them of the policy; and in targeted outreach with presentations on the Environmental Procurement Policy at staff meetings. A revises presentation on the policy was prepared and discussed at three different staff meetings in FY 08-09 with the presentations will continue through FY 09-10.

Contractors and the City's IPM Policy:

- Parks Division has engaged contractors since FY 06-07 for ground squirrel and gopher control. A total of 12 ounces of Aluminum phosphide Fumitoxin and 15 lbs of Rozol pocket gopher bait were used within the gopher/ground squirrel tunnels. Another contractor was also used for broadleaf weed control by the Parks Division since FY 07-08. These contractors are made aware of the City's IPM Policy and are required to follow it.

  No contractors were used by PW/Boulevard landscaping in FY 08-09.

  The Water Pollution Control Plant (WPCP) is in the process of selecting a contractor to perform aquatic weed management in the WPCP oxidation ponds as part of pond maintenance. The contractor selected will be following the City's IPM policy for work that will begin in FY 09-10 and the requirements to follow the policy are included in the Scope of Work.

- The City employs one structural pest control contractor, who is required to abide by the IPM policy since their contract that became effective July 1, 2003 and was renewed through 2009. Data on types and quantities of pesticides used in structural pest control activities from July 2003 – December 2003, and calendar years 2004 through 2008 are included in Table 1 above. The current structural pest control contractor uses a very limited number of "caution" labeled products and follows IPM practices such as monitoring and pest identification prior to application of a pesticide. Traps (e.g., glue boards) and bait stations are often used prior to any application of pest control sprays or granular materials to try to control a pest problem through less-toxic means.

- Copies of contractor IPM training received are kept on file and provided to the City upon request. Current copies of training in FY 08-09 were provided and showed that contractor staff attended on-line education courses entitled "IPM for the PMP" and "Going Green and Organic" in addition to pest specific, legal, and safety training required for their Structural Pest Control certifications.

IPM and City Property Leaseholders:

- Lease holders were notified of the City's IPM policy in June 2003 by the City's property manager. Periodic updated have been provided through a flyer that was prepared for distribution by the contract property manager since that time. This brochure is sent out to new tenants and leaseholders as needed.

FY 2008-2009 Annual Report
Municipality: Sunnyvale

Sunnyvale Targeted Outreach for the Pest Management Plan			
Pest Management Plan/Policy Implementation	Track and/or estimate the numbers of Sunnyvale residents and staff reached through outreach efforts (including advertising) regarding the City's IPM policy, pesticides use reduction, and related topics.	Media Sunnyvale Quarterly Report	The Quarterly Report is mailed to approximately 60,000 Sunnyvale residents and businesses each quarter. Additionally, 2000 copies of the report are distributed to the Library, City Hall, Community Center, Senior Center, Public Safety and Columbia Neighborhood Center. The Quarterly Report is also posted on the City's web page.
		Media Outreach to City staff through employee newsletters	The *Harbinger* is Sunnyvale's internal newsletter for employees. Articles and information contained in the *Harbinger* reach approximately 900 municipal employees. The *Poop Scoop* is the staff newsletter for the Water Pollution Control Plant and is read by approximately 65 employees.
		Media KSUN Community Cable TV Ads	KSUN advertising reaches about 13% of all cable subscribers in Sunnyvale, who say they tune in once or twice a month.
		Media Theater Billboards	These 15-second animated/audio ads are viewed by movie audiences two times during a 15-minute timeframe prior to every movie shown in the theaters on a total of 36 screens.
		Media IPM via Sunnyvale Website	Information regarding proper disposal of mercury containing products is listed on both the Solid Waste and Water Pollution Control Plant websites. Reach is unknown. The City of Sunnyvale does not have the ability to count number of hits to the website
		Media Sunnyvale ReNews Newsletter	This newsletter addresses pollution prevention concerns with a focus on reduce, reuse, and recycle and is mailed to approximately 29,000 single family residents and 24,000 multi-family residents quarterly. An additional 500 copies are printed and distributed from various locations.
		Media City of Sunnyvale Community e-News	This email list reaches approximately 220 community members.

Santa Clara Valley Urban Runoff Pollution Prevention Program
Attachment H – Appendix 1 – Table 2
PI/P Pesticide Management Activities – Estimated Numbers Reached
FY 2008-2009 Annual Report
Municipality: Sunnyvale

		Media Sunnyvale Sun	The Sunnyvale Sun has a readership of approximately 36,824 and a circulation of 17,963. Several ads titled *"Watch Out for Toxic Pesticides"* and focused on different pests ran in 08-09.
		Event – Community Sunnyvale Farmers Market	Outreach distributes IPM and less toxic pesticide information at the Sunnyvale Farmers Market each month. Approximately 253 individuals visited the booth in FY08-09 for general water pollution prevention information.
		Event - Community SC County Creeks and Watershed Conference	This event offered a venue for Outreach to focus on how indoor/outdoor daily activities impact the health of our watershed. We used the exhibit that showed the difference between sanitary sewers and storm drains and handed out information on pollution prevention, as well as literature. During this event, we spoke to 25 people.
		Event - Community Muslim Green Team Event	The Outreach exhibit highlighted the difference between sanitary sewers and storm drains, leading to information about water pollution prevention. This is primarily done through discussion, literature distribution, and presentations featuring the Enviroscape, which focuses on water pollution from pesticides, fertilizers, dog waste, automotive fluids and car wash. Approx. 80 children/parents stopped by the booth for literature, information and/or to view the Enviroscape presentation(s).
		Event – Schools/Youth Sunnyvale Schools Outreach	Sunnyvale uses the Enviroscape as a teaching tool for classroom presentations. The presentation focuses on watershed education and water pollution from urban runoff. Pesticides, beneficial insects, IPM and less-toxic lawn and garden care is introduced and discussed. Sunnyvale conducted 38 classroom presentations this school year, reaching a total of 886 students.
		Event – Community Compost Workshops	Workshops are held once per month 10 times during the year. Generally, approximately 12 to 40 individuals attend each new workshop session.

Attachment H – Appendix 1 – Table 2
PI/P Pesticide Management Activities – Estimated Numbers Reached
FY 2008-2009 Annual Report
Municipality: Sunnyvale

		Event – Business Corporate Health and Safety Fairs	Outreach exhibited at (5) corporate health and safety fairs this reporting year, reaching over 600 company employees.
		Event – Community Columbia Health and Safety Fair	The outreach exhibit highlighted the difference between sanitary sewers and storm drains. Literature about water pollution prevention was distributed and five Enviroscape demonstrations were presented during the event. Approximately 143 individuals (adults, students and children) visited the exhibit for information, literature and to view the presentations.
		Event – Schools/Youth Creek Education Program	This program is targeted to 3rd graders who attend Sunnyvale Schools located in the Cupertino School District. Approximately 381 Sunnyvale students participated in the program this reporting year.
		Event – Schools/Youth Community Kidz	Our portion focused on the difference between sanitary sewers and storm drains, leading to information about water pollution prevention. This was primarily done through discussion, student participation through Environmental Jeopardy, and a presentation featuring the Enviroscape. A total of 78 youth attended these sessions this year.
		Event – Schools/Youth Library Presentation	Our portion focused on the difference between sanitary sewers and storm drains, leading to information about water pollution prevention. This was primarily done through discussion and a presentation featuring the Enviroscape. Event was attended by 27 people (15 children and 12 adults).
		Event – Community State of the City	The Outreach booth featured water pollution prevention information and literature distributed included IPM activities, less-toxic pesticide use, and proper disposal information on both pesticides and mercury. Approximately 100 individuals stopped by the booth to ask questions and/or receive information.

Santa Clara Valley Urban Runoff Pollution Prevention Program
Attachment H – Appendix 1 – Table 2
PI/P Pesticide Management Activities – Estimated Numbers Reached
FY 2008-2009 Annual Report
Municipality: Sunnyvale

		Event – Community Orchard Gardens Neighborhood Assn Meeting	Sustainable landscaping and IPM were covered during this presentation. Along with the presentation, various brochures were distributed. Seventeen residents were in attendance.
		Event – Community SNAIL Neighborhood Association Meeting	Neighborhood litter clean up volunteer event discussed and various brochures related to stormwater pollution prevention were distributed. Approximately 20 residents attended.
		Event – Community Spring Garden Market – Kelley Park/San Jose	Sunnyvale staff assisted with SCVURPPP-sponsored booth at Santa Clara County Master Gardeners Event. See SCVURPPP section of annual report for details
		Event – Community Festival in the Park – San Jose	Sunnyvale staff assisted with SCVURPPP-sponsored booth at the event. See SCVURPPP section of annual report for details.
		Event – Community Sunnyvale Pancake Breakfast	City exhibit booths provided general and educational information. A craft promoting the importance of beneficial insects and how we should all work to protect them was provided for children attending the event. The art project is always a hit. Approximately 60 children/parents stopped by the booth.
		Event – Community & Schools / Youth Plant Tours	Discussions about water pollution and its issues impacting the watershed and the environment help tour attendees gain a better understanding of the problem. At the completion of the tour, attendees are given educational materials that promote environmentally responsible behaviors. Approximately 460 individuals took a tour of the plant this fiscal year.
		Event - Business Rotary Talk	Staff spoke on the difference between and a sanitary sewer and a storm drain, the importance of pollution prevention and talked abut the Santa Clara Valley Green Gardener training program to approximately 10 members.

Santa Clara Valley Green Gardener

Training Program

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2009-2009 Annual Report
Municipality: Sunnyvale
Attachment H- Appendix 2

Santa Clara Valley Green Gardener Program Implementation

Introduction:

In FY 07-08, Sunnyvale staff and members of the SCVURPPP- PI/P Pesticide Outreach Ad Hoc Task Group and contacted the Metropolitan Adult Education Program in San Jose and the Master Gardeners of Santa Clara County to offer the first Green Gardener Training Program in the Santa Clara Valley. This program had been successfully implemented in Santa Barbara, Monterey, and Santa Cruz cities and counties, and was based on a 20-hour (10 classes, 2 hours each) curriculum that was developed and provided though Water Board grant funding.

The training and certification program covered topics related to promoting the principles of ecological/sustainable landscaping practices that reduce stormwater pollution resulting from landscape maintenance activities. Training was included on promoting healthy soils, integrated pest management approaches, appropriate fertilizer usage, irrigation system scheduling, maintenance, and troubleshooting, selecting the right plant for the right place, pruning techniques, the use of mulches and compost to reduce weeds and support good soil development, and the use of appropriate types of garden equipment to reduce impacts to air quality. Providing information and training on good management practices that promote and support the use of IPM techniques are an integral part of this training program.

Sunnyvale's Participation:

Two sessions were offered in the fall of 2008 and the spring of 2009, both in English and in Spanish, for a total of four classes in FY 08-09. Sunnyvale provided in-kind staff time to assist with the development, preparation and implementation of the classes. Sections of the curriculum and final examination were modified to reflect issues for the local climate and soils. Staff provided assistance with class operations, technical assistance, and promotion.

Sunnyvale staff time was also provided to assist with the preparation and grading of the final class exam and the preparation certificates of completion for those successful students who attended 80% of the classes and passed the final exam. Four different Sunnyvale staff members taught 2-hour sessions of the class in there particular areas of expertise.

Sunnyvale staff also assisted with the re-certification of students who had completed the first class of FY 07-08 in providing reviews of recertification information provided by the students and the renewal of their cards

Success of the Program:

A total of 53 individuals from small landscape maintenance businesses have received their Santa Clara Valley Green Gardener certification. Another 20 individuals who were private home owners or who work for municipalities have also successfully completed the class. These individuals are currently being promoted as "Santa Clara Valley Green Gardeners" though outreach efforts on the part of the Program, at events, and via the www.mywatershedwatch.org website.

The classes offered were successful, especially the Spanish language class.
Given that each individual trained in the Green Gardener program may provide services to between 10– 60 clients, outreach to this group of landscape maintenance professionals can have a significant impact on reducing the impacts to water quality from current landscaping practices. This includes reduction of pesticides and fertilizers in urban runoff and the wise use of existing resources to improve the health, appearance, and value of landscapes for their customers.

Also, approximately 50% of the FY 07-08 graduates submitted information needed for the renewal of their Green Gardener card in FY 08-09. Several more individuals have indicated that their renewal information is still forthcoming.

Outreach to the public, promoting the hiring of trained Green Gardeners was accomplished in Sunnyvale by including information about the GG program and the benefit of hiring a Green Gardener at all the community events attended by staff. In addition, staff included an article entitled *Pollution Prevention Week: What can you do to protect your bay today? - Green Gardener* in the Sunnyvale Fall Quarterly Report that is mailed to all City residents and businesses. A copy of this article is included in Attachment G, Appendix 1 of this report. See the Program's section on the Green Gardener for more details on the regional outreach efforts in its section of this report.

Preparations are underway to offer the English and Spanish introductory classes in the fall of 2009.

Spring 2009 Green Gardener students visiting Sunnyvale SMaRT Station compost/green waste processing area as part of their Compost and Mulch class

FY 08 - 09 Annual Report

Attachment I

Mercury Pollution Prevention Activities

FY 2008-2009 Annual Report
Municipality: Sunnyvale
Attachment I

P.S. Id.	Activity	CI Item Source	FY 08-09 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
	Control Program for Mercury					
Hg Work Plan I.A	Mercury Plan Development	Permit Prov. C.9c	Sunnyvale staff to continue to work with SCVURPPP Mercury Pollution Prevention Plan work group	Staff continued to participate in the SCVURPPP Mercury outreach group and in the region-wide mercury product recycling and reduction outreach efforts. See Appendix 1, Table 2 for a listing of efforts in this FY.	Ongoing Report 09/09	Kristy McCumby Env. Specialist
I.D &, I.F	Mercury Plan Implementation	Permit' Prov. C.9c	Sunnyvale Mercury Work Group to continue to meet and determine how Program-provided guidelines for the "virtual" elimination of mercury in urban runoff will be implemented to address controllable City sources.	The Sunnyvale "Mercury Work Group" evolved into a work group to address product stewardship and environmentally preferable procurement practices. The "virtual elimination of mercury" program is addressed using the city's EPP - Environmental Procurement Policy.	Ongoing Report 09/09	K. McCumby & Sunnyvale Mercury Work Group (PW, Env., Sustainability & Solid Wst.)
I.F & MM 1	Mercury Plan Implementation	Permit Prov. C.9.c	Continue improving current recycling programs for fluorescent lamps and Hg-containing products, as needed. Other products (e.g., thermometers/thermostats) may be included as appropriate to a particular City Department.	Fluorescent, HID, and mercury vapor lamps generated by Public Works, Parks & Rec., and Facilities management continue to be collected and shipped off-site for recycling. As thermostats, switches, or other mercury-containing products become wastes, they are collected and shipped off for recycling, as well. See Appendix 1, Table 1 showing quantities of mercury-containing wastes that were shipped off for recycling in FY 08-09.	Ongoing Report 09/ 09	Kristy McCumby, Environmental Specialist & Sunnyvale Mercury Work Group
II.B	Mercury Plan Implementation	Permit Prov. C,9.c	Continue with existing Hg-containing product disposal services offered through the City's Household Hazardous Waste collection program, through support of the Santa Clara County HHW program.	Funding for the collection of Hg-containing wastes continued for the City's HHW collection program, in addition to the wastes collected during County HHW activities.	Ongoing Report 09/ 09	Kristy McCumby, Env. Spec.& Mark Bowers, Solid Waste Prog. Manager

Control Program for Mercury (Cont.)						
II.C	Mercury Plan Implementation	Permit Prov. C.9.c	Annually document quantities disposed or recycled by the City divisions/ departments.	See Appendix 1, Table 1 of this Attachment for information on the quantities of Hg-containing wastes that were collected and shipped for recycling or proper disposal by the various departments in the city in FY 80-09.	Ongoing, Report 09/09	Kristy McCumby Env. Spec. with support from Bob Van Heusen, Jim Craig, & Scott Morton
II.C	Mercury Plan Implementation	Permit Prov. C.9.c	Collect and report information on quantities of fluorescent lamps collected by City HHW collection program at the SMaRT Station from residential customers. Provide this information to the Program, as needed, to add to County data for HHW collected from residents and CESQG business collection programs.	Quantities of fluorescent lamps collected by the SMaRT Station are included in Appendix 1, Table 1 of this Attachment. All other data collected on quantities of Hg-containing waste collected at the HHW events are tabulated by the county and the information is not available for the individual cities.	Ongoing Report 09/09	Kristy McCumby Env. Spec. and Mark Bowers, Solid Waste Program Manager
II.F	Mercury Plan Implementation	Permit Prov. C.9.c	Continue working with regional HHW programs to develop and help publicize fluorescent lamp and other mercury-containing products recycling programs and efforts.	• Sunnyvale continues to support HHW programs that encourage proper disposal of fluorescent lamps and other mercury-containing devices through public education, outreach and participation programs designed to reach residential, commercial and industrial users. • Sunnyvale is a contributing member of the Mercury Ad Hoc Task Group. Activities include a media campaign through print, radio and transit ads that encourages residents to dispose of fluorescents at participating store locations. Task group members assist	Ongoing Report 09/09	Jackie Besoyan, Env. Outreach Coordinator & Rich Gurney, SW Recycling Coordinator

				in developing mercury work plans, budget review and activity planning and implementation. • Sunnyvale developed outreach material such as articles on mercury pollution prevention, and attended community and business events to educate individuals, distribute literature, and promote safe disposal of mercury containing devices. • For detailed information on mercury outreach see Attachment G Table 1 – Detailed Descriptions PI/P Activities and Self-Evaluation Matrix for FY 08-09.		
Control Program for Mercury (Cont.)						
III.A	Mercury Plan Implementation	Permit Prov. C.9.c	Continue financial support of Regional Monitoring Program through SCVURPPP funding.	Financial support of the Regional Monitoring Program continued through SCVURPPP via the city's assessment fees to the Program.	Ongoing Report 09/09	Lorrie Gervin, Env. Div. Mgr.
IV.C	Mercury Plan Implementation	Permit Prov. C.9.c	Support and participate in the implementation of the WMI Watershed Action Plan.	Staff continued participation in the WMI and the Action Plan implementation. The city continues to financially support the California Product Stewardship Council and its efforts to effect producer responsibility for the reuse or disposal of products that contain mercury or other potential environmental contaminants.	Ongoing Report 09/09	Lorrie Gervin, Env. Div. Manager

Control Program for Mercury (Cont.)						
V.A.3	Mercury Plan Implementation	Permit Prov. C.9.c	Pretreatment inspectors will continue to integrate distribution of Mercury Outreach materials and provide outreach to industries and businesses during routine inspections of facilities for source control measures.	The Pretreatment Program distributed Mercury Outreach materials during inspections of facilities that use mercury. The Pretreatment Program inspected and distributed Mercury Outreach materials and ADA Guidelines for Dental practices to 52 dental facilities during the timeframe of this reporting year. The Pretreatment Program will continue inspections of facilities with sources of mercury on site, to integrate the distribution of Mercury Outreach materials and brochures during inspections, and to update outreach materials when appropriate	Ongoing Activities Report 09/09	Sarah Scheidt, Senior Insp. Pretreatment Program
V.A.3	Mercury Plan Implementation	Permit Prov. C.9.c	Continue distribution of brochure "Is Mercury Hiding in Your Construction/ Demolition Project" by Building Division staff as requests for Building Demolition Permit are received.	The brochure is made available to those who apply for permits for demolition projects.	Ongoing Activities Report 09/09	Gordon Blancher, CDD/Building & Kristy McCumby, Env. Spec.
V.B	Mercury Plan Implementation	Permit Prov. C.9.c	Document and evaluate each outreach activity, including the target audience and number of businesses and/or residents reached.	The Pretreatment Program inspected and distributed Mercury Outreach materials and ADA Guidelines for Dental practices to 52 dental facilities during the timeframe of this reporting year. • For documentation of outreach activities, target audience and number of individuals reached please see Attachment H-Appendix 1-Table 2 for PI/P Mercury Management Activities	Annually Report 09/09	Jackie Besoyan, Env. Outreach Coord. & Sarah Scheidt Sr. Ind. Waste Insp.

Control Program for Mercury (Cont.)						
V.C	Mercury Plan Implementation	Permit Prov. C.9.c	Assist with the project to determine local attitudes and behaviors to evaluate the success of the outreach efforts and saturation of outreach messages in coordination with the Watershed Watch Campaign Survey	Under direction from the Program, Sunnyvale was an active participant in all activities related to the Watershed Watch campaign survey. See the Program's section of the annual report for Watershed Watch survey information.	To be deter-mined Report 09/09	Jackie Besoyan, Env. Outreach Coord.

Response to Regional Water Quality Control Board Comments on ICD Activities Section to FY 07-08 Annual Report:
No comments were received from RWQCB2 on this section.

City of Sunnyvale

Mercury Pollution Prevention Activities

Appendix 1

Table 1 – Quantities of Mercury Recycled

Table 2 – Mercury Management Activities – Estimates of Numbers Reached

Table 1:
Quantities of Hg-containing wastes recycled from City Facilities in FY 08-09.

CITY DEPARTMENT/ LOCATION	TYPE OF WASTE	QUANTITY OF WASTE
SMaRT Station (Wastes from residences and small businesses)	Fluorescent Lamps (4 ft or less length) (> 4 ft length) Compact, Circ, U-tube Hg-containing wastes (e.g., thermometers and switches)	 9,886 units 1,458 units 4,038 units 15 lbs
Water Pollution Control Plant (City-owned property)	Fluorescent Lamps (4 ft length) Misc. shaped lamps and HID, Metal Halide Hg-containing wastes (e.g., thermometers and switches)	84 units 24 units 5 lbs
Corp Yard - Public Works (City-owned Property	HID, metal halide, & Mercury vapor lamps (shipped)	612 units
Parks and Recreation Dept.	Fluorescent Lamps HID, metal halide, & Mercury vapor lamps (shipped)	93 units 36 units
Facilities Management	Fluorescent Lamps (Tubes, U-bend, & compact fluorescent HID, Metal Halide, or mercury vapor lamps, Ballasts	4019 units 27 units

Total Fluorescent Recycled/collected (all sized tubes):
Approximately 15,540 fluorescent and compact fluorescent lamps were recycled from residents and city operations in FY 08-09

Total HID, Mercury Vapor, & Metal Halide:
Approximately 699 HID, Metal Halide and mercury vapor lamps were recycled from city operations in FY 09-08

Other Hg-containing wastes:
20 lbs of laboratory waste and x mercury switches from city operations were recycled or properly disposed of in FY 08-09

Santa Clara Valley Urban Runoff Pollution Prevention Program
Attachment I – Appendix 1 – Table 2
PI/P Mercury Management Activities – Estimated Numbers Reached
FY 2008-2009 Annual Report
Municipality: Sunnyvale

Sunnyvale Targeted Outreach for Mercury Pollution Prevention Activities			
Mercury Management Plan/Policy Implementation	Track and/or estimate the numbers of Sunnyvale residents, staff, and businesses reached through outreach efforts (including advertising) regarding mercury pollution prevention, proper disposal and other related topics.	Media Sunnyvale Quarterly Report	The Quarterly Report is mailed to approximately 60,000 Sunnyvale residents and businesses every three months. Several articles related to Mercury and safe disposal were published last fiscal year. Approximately 2000 additional copies of the report are provided to various public distribution points around the city. The newsletter is also posted on the City's web page.
		Media Outreach to City staff Harbinger newsletter	The Harbinger is Sunnyvale's internal newsletter for employees. Articles and information contained in the *Harbinger* reach approximately 900 municipal employees.
		Media Sunnyvale ReNews	This newsletter addresses pollution prevention concerns with a focus on reduce, reuse, and recycle and is mailed to approximately 29,000 single family residents and 24,000 multi-family residents quarterly. An additional 500 copies are printed and distributed from various locations.
		Media Flyers and Posters	Flyers for the Mercury Thermometer were distributed throughout the City at various locations as well as several Sunnyvale pharmacies. Any person living, working, going to school in Sunnyvale who used the library, community center, senior center or city hall could view the posters. The number of people whom viewed the flyers or posters at the various pharmacies is undetermined.
		Media KSUN Community Cable TV Ads	KSUN advertising reaches about 13% of all cable subscribers in Sunnyvale, who say they tune in once or twice a month.
		Media Websites	Information regarding proper disposal of mercury containing products is listed on both the Solid Waste and Water Pollution Control Plant websites. Reach is unknown. The City of Sunnyvale does not have the ability to count number of hits to the website.
		Media Utility Bill Inserts	Stuffing utility bills with advertising inserts reaches approximately 30,000 account customers for each two-month mailing.
		Media Sunnyvale Sun	The Sunnyvale Sun has a readership of approximately 36,824 and a circulation of 17,963

		Media City of Sunnyvale Community e-News	This email list reaches approximately 220 community members.
		Media Yahoo! Groups	The group has approximately 80 members that potentially viewed the information; however the actual number this reached is unknown as others passed the info onto others.
		Media City of Sunnyvale Press Releases	All press releases are listed on the City's web site and may be picked up and used by other media agencies as well.
		Media Broadcast News: KTVU (channel 2) Community Announcement San Jose Mercury News San Francisco Chronicle	An evaluation of media mentions is not feasible due to the difficulties in gathering data from widespread advertising.
		Event – Community Farmers Market	Outreach distributed the mercury brochure produced by HHW titled *What You Didn't Know….* at the Sunnyvale Farmers Market each month during FY 08-09. This popular brochure contains information regarding the location of retail stores where individuals can properly dispose of fluorescents. Approximately 253 individuals visited the booth in FY 08-09 for general water pollution prevention information.
		Event – Community State of the City	At this community event the Outreach exhibit distributed water pollution prevention information that also featured proper disposal of mercury containing devices as household hazardous waste. Approximately 100 individuals stopped by the booth to ask questions and/or receive information.
		Event - Community Sunnyvale Pancake Breakfast	This annual event features a community breakfast, activities for kids, and exhibits that provide community information. The mercury brochure is always a popular item. Approximately 60 children/parents stopped by the booth.
		Event - Community Columbia Health and Safety Fair	General water pollution prevention literature was distributed to approximately 75 community members attending the event.

		Event - Community SC County Creeks and Watershed Conference	This event offered a venue for Outreach to focus on how indoor/outdoor daily activities impact the health of our watershed. We used the exhibit that showed the difference between sanitary sewers and storm drains and handed out information on pollution prevention, as well as literature. During this event, we spoke to 25 people.
		Event - Community Mercury Thermometer Exchanges	Two events were hosted by outreach staff during FY08-09. A total of 296 mercury containing thermometers were collected.
		Event – Business Corporate Health and Safety Fairs	Outreach exhibited at (5) corporate health and safety fairs this reporting year, reaching over 600 company employees.

P.S. Id.	Activity	CI Item Source	FY 08-09 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
	Copper/Nickel Baseline Activities					
CB-1 (1 &4)	Measures to reduce copper discharges from vehicle washing operations	Permit Prov. C.9.a (CAP)	• Continue to inform the public by distributing materials, brochures, and other information at city offices, public places, and events. • Promote methods to reduce copper discharges from vehicle washing by placing articles or ads in various media (e.g., the Quarterly, KSUN, websites, theater ads and utility bill inserts).	Sunnyvale continues to educate the public about water pollution caused by residential car wash activities. At the following annual events, car wash literature is always distributed, and at some events the Enviroscape is used to demonstrate how residential car wash activities cause pollution in creeks and the bay. EVENTS *Sunnyvale* • Columbia Health and Safety Fair • Farmers Markets • State of the City • Sunnyvale Pancake Breakfast • Plant Tours • Orchard Gardens Neighborhood Association Meeting *Business Environmental Fairs* • Quicklogic, Lockheed, Aruba Networks, NetApp and Northrop Grumman • Rotary Talk *Regional* • Car Wash Events (3 for FY08-09) MEDIA Outreach *Sunnyvale Quarterly Report articles* • Pollution Prevention Week *City of Sunnyvale Community e-News* • Pollution Prevention Week *KSUN Community Cable TV* • An advertisement advising residents	Ongoing Report 09/09	Jackie Besoyan, PW Env. Outreach Coord.

				about water pollution from residential car washing ran on KSUN during National Pollution Prevention Week *Harbinger* • Helping the Community to Protect the Environment *Regional* • Radio advertising on car wash events and live spots during events YOUTH Outreach *Schools* • Outreach presented the Enviroscape demonstration to 16 classes in Sunnyvale Elementary Schools. A large portion of the demonstration is storm drain pollution from washing vehicles in driveways. • During the Community Kidz workshops a portion of the presentation talks about storm drain pollution from washing vehicles in driveways. • During the library presentation a portion of the presentation talks about storm drain pollution from washing vehicles in driveways. *Creek Education Program* • This creek and storm drain education program teaches 3rd graders about pollution in creeks from urban runoff See Attachment G Table 1 PIP Activity details for more information.		

	Copper/Nickel Baseline Activities cont.					
CB-1 (1 &4)	Measures to reduce copper discharges from vehicle washing operations	Permit Prov. C.9.a (CAP)	Continue implementation of Charity Car Wash Kit program. • Expand on initial outreach on kit availability • Assess implementation of program – any issues with kit use and pollution prevention • Evaluate the success of the program by tracking frequency of use	• Outreach continued through articles in the Quarterly and Harbinger. • The number of requests to use the kits remains small, possibly due to the water conservation messages that promote taking vehicles to a car wash that recycles the wash water. • Those who have used the kits responded positively toward their use. • Outreach to local schools about the availability of the kits will continue, as these seem to have the greatest number of events planned for volunteer fund-raisers.	Ongoing Report 09/09	Kristy McCumby, PW, Env. Spec.
CB-1 (1 &4)	Measures to reduce copper discharges from vehicle washing operations	Permit Prov. C.9.a (CAP)	Require source control measures for new and redevelopment projects (those adding or replacing 10,000 sq ft of impervious area) that conduct vehicle/equipment washing and maintenance activities (Consistent with Provision C.3.k)	• As new and redevelopment projects are reviewed and vehicle washing facilities are identified on the project plans. If they are present, BMPs must be instituted that address the wash water. Depending on the circumstances, connection of a vehicle wash area to the sanitary sewer with appropriate pretreatment may be required. Otherwise, vehicle washing areas are not approved on the project plans. • The Environmental Division continues to review applicable projects and require source control measures for projects that conduct vehicle / equipment washing and maintenance activities.	Ongoing Report 09/09	Shaunn Mendrin & Sarah Scheidt, Sr. Ind. Waste Insp.

Copper/Nickel Baseline Activities cont.						
CB-1 (2 & 4)	Measures to reduce copper discharges from vehicle washing operations	Permit Prov. C.9.a (CAP)	• Continue to inspect commercial/ industrial facilities that have vehicle washing activities occurring on site (this includes auto-related businesses). • Ensure BMPs for vehicle washing are employed. • Distribute new vehicle washing BMP information that is available in three languages during inspections. • Provide an effectiveness evaluation of inspection/compliance with BMPs. • Continue to inspect vehicle-washing areas for City vehicles at the Corp Yard.	• 151 Automotive related facilities were inspected for BMP compliance during the reporting period including sales, repair, fleet, car washes, and gas stations. • In addition, the City Corp Yard was inspected this year and found to be in compliance. • Automotive BMPs, including washing BMP information, were distributed to all facilities that were inspected. • Sixteen verbal notices and 3 warning notices were issued for minor stormwater violations, all of which corrected the violations in compliance with required BMPS. • Facilities will continue to be inspected bi-annually	Ongoing Report 09/09	Sarah Scheidt, Sr. Ind. Waste Insp.
CB-1 (3 & 4)	Measures to reduce copper discharges from vehicle washing operations	Permit Prov. C.9.a (CAP)	• Encourage new mobile cleaners and those who are renewing their certification to use the BASMAA website for on-line mobile cleaner training and be recognized on the area wide certification list. • Continue to provide training (as requested) to new mobile cleaners and those seeking recertification in Sunnyvale. • Evaluate effectiveness of the training program and BASMAA on-line training. • Encourage municipal staff to use certified mobile cleaners when contracting for cleaning services Maintain records on who has been trained by City staff and report on numbers trained in the annual report.	• The Pretreatment Program continues to promote the use of the BASMAA on-line training program for Surface Cleaners. Additionally, we continue to utilize the Surface Cleaners Training Kit developed by the Program to provide training to new mobile cleaners, as needed. • The City did not certify or recertify any mobile cleaners during this reporting period.	Ongoing Report 09/09	Sarah Scheidt Sr. Ind. Waste Insp.

	Copper/Nickel Baseline Activities cont.					
CB-3	Measures to control copper discharges to storm water from targeted industrial sources	Permit Prov. C.9.a (CAP)	• Industrial Waste Inspection staff will continue specific outreach to all printed circuit board manufacturers and metal plating facilities using copper and having the potential to discharge copper into storm water. • Distribute and discuss BMPs/ Information to minimize copper discharges. • Continue inspections of all commercial/industrial facilities, including NOI sites using copper.	Industrial Waste Inspection staff continues to inspect and permit all metal plating facilities yearly based upon their regulatory category. During inspections BMP's are provided and a storm water inspection is conducted to identify any potential discharges. Staff inspects NOI filers on a yearly basis and is typically incorporated with the wastewater discharge permitting and inspection process.	Ongoing Report 09/09	Sarah Scheidt, Sr. Ind. Waste Insp.
CB-6/7	Reducing Traffic Congestion/ Promoting Alternative Transportation	Permit Prov. C.9.a (CAP)	• Continue implementation of site design standards related to transportation to meet the requirement of C.3.j of the permit. • Report on significant projects where traffic congestion reductions were included in design plans.	• In Attachment E, Appendix Table 1; Parts 1 & 2 projects #1, 4, 7, and 11 included requirements for Transportation Demand Management Plans as part of their conditions of approval as a means to reduce potential traffic congestion. Projects # 2 & 3 included pedestrian access improvements as part of the site design for the projects. Also, Project #11 was required to include traffic calming measures as part of the development. The following public projects were completed in FY 08-09 to help reduce traffic congestion through the promotion of alternative transportation: • Borregas Avenue Bicycle and Pedestrian bridges • Mary Avenue lighted crosswalk • Hollenbeck Road lighted crosswalk • Blair Avenue Traffic Calming • Kifer Road lighted cross walk • Arques Avenue lighted crosswalk	Ongoing Report 09//09	Lead: Jack Witthaus, Transportation Program Mgr, Support: Shaunn Mendrin, Sr. Planner

Copper/Nickel Baseline Activities cont.						
CB-8	Measures to classify and assess watersheds and to improve institutional arrangements for watershed protection	Permit Prov. C.9.a (CAP)	• Continue to implement HMP requirements for projects that meet the size threshold criteria in HMP applicability areas as identified by maps included in the City's BMP Guidance Manual. • Continue to review EIRs and complete CEQA reviews to ensure watershed protection is considered in CEQA actions. • Continue participation in SCBWMI activities as it implements the Watershed Action Plan. • Revise Sunnyvale's General Plan (Surface Water Sub Element), as needed, at the next scheduled update. Include recommendations based on the review of the Development Policies Comparison Project and Provision C.3.I of Order 01-119 as determined to be appropriate. • Continue participation in the Water Resources Protection Collaborative (WRPC). Council approved adoption of the Guidelines and Standards applicable to Sunnyvale in 2007.	• No projects that met the HMP thresholds in the HMP applicability areas identified by the City were submitted in FY 08-09 • As EIRs are submitted, they are reviewed to consider watershed protection, where needed. • Staff continues to participate in the SCBWMI as elements of the Watershed Action Plan are implemented. • The Surface Runoff Sub Element of the City's General Plan was not updated this year. Depending on the requirements that evolve from the Municipal Regional Permit when it is approved, the City will review this Sub-Element and determine changes that may need to be incorporated. The WRPC was not active in FY 08-09. The City adopted sections of the Guidelines and Standards that were applicable to Sunnyvale for development near creeks and waterways in May 2007. The Guidelines and Standards continue to be implemented as required.	Ongoing Report 09/09	Lead: Lorrie Gervin, Env. Div. Manager and Kristy McCumby, Env. Spec. Support for WRPC activities: Shaunn Mendrin, Sr. Planner

Copper/Nickel Baseline Activities cont.						
CB-11	Measures to improve street sweeping controls and storm water system operation and maintenance	Permit Prov. C.9.a, (CAP)	• Implement (as appropriate) improvements identified for current sweeping program and storm drain system O&M (within available City Budgets). • Evaluate the effectiveness of street sweeping and storm drain O&M in the annual report (See Streets and Roads and Storm Drain sections of this work plan).	• The street sweeping program continued this year as in past years, with no significant changes. There was no change in the funding available for street sweeping in FY 08/09. The regular schedule was maintained throughout the year. • Annual storm drain catch basin cleaning occurred and additional clean outs are done on an as-needed basis to prevent flooding. Collected debris is taken to the SMaRT Station for disposal. Better tracking of inlet cleaning activities through the use of an inlet cleaning form continues. Street sweeping data on curb miles swept and quantities of debris are reported in Attachment D-1, Appendix 1.	Ongoing Report 09/09	Tony Pineda Maintenance. Supervisor & Jim Craig, Field Services Superintendant.
CB-11	Measure to Track Street Sweeping Data	Permit Prov. C.9.a (CAP)	• Continue to follow Program guidance regarding the collection and reporting of street sweeping data. • Provide information periodically to the program. Information for reporting includes: quantity of waste collected (cubic yards), number of miles swept, and frequency of sweeping as required.	Data were tabulated from PW Streets maintenance daily logs and this information was reported to the Program, as requested. Street Sweeping data collected for this year are included in Attachment D-1, Appendix 1 of this report.	Ongoing Report 09/09	Tony Pineda, Maint. Supv. & Kristy McCumby, Env. Spec.

Copper/Nickel Baseline Activities cont.						
CB-12	Measures to Control Copper Discharges from Pools and Spas	Permit Prov. C.9.a, (CAP)	• Continue to inform the public by distributing materials, brochures, and other information at city offices, public places, and through on-site distribution at presentations and events. • Continue to provide proper pool and spa water discharge information to the public by placing ads in various media (e.g., The Quarterly, KSUN, City website, theater ads, and utility bill inserts.	Public outreach activities related to water pollution from pool and spa discharge is described below: Events *Community* At the following events, the *Draining Pools and Spas* brochure was distributed • Columbia Health and Safety Fair • Farmers Markets • State of the City • Sunnyvale Pancake Breakfast • Orchard Gardens Neighborhood Association Meeting *Business* At the following environmental events sponsored by Sunnyvale businesses, the *Draining Pools and Spas* brochure was distributed to employees: • Quicklogic, Lockheed, Aruba Networks, NetApp, and Northrup Gruman MEDIA OUTREACH *Sunnyvale Quarterly Report articles* • Pollution Prevention Week *WPCP Website* • The **Draining Pools and Spas** brochure is posted for viewing and downloading on the website at the Water Pollution Control Plant. See Attachment G Table 1 PIP Activity details for more information.	Ongoing Report 09/09	Jackie Besoyan, PW Env. Outreach Coord.

Copper/Nickel Baseline Activities cont.						
CB-21	Measures to Discourage the Architectural Use of Copper	Permit Prov. C.9.a (CAP)	• The ornamental/architectural use of copper in building designs is discouraged in practice, but not prohibited by Sunnyvale ordinance. • The City is in the process of changing its Design Guidelines to not allow the ornamental use of copper for roofs, cutters, or other architectural/ ornamental exterior uses.	Staff have incorporated issues of environmental concern (e.g., avoiding the use of ornamental copper) into the information provided to developers and into the recommended Conditions of approval attached to conditionally approved permits. The use of ornamental copper has not yet been formally incorporated. Staff will formally incorporate this when the relevant documents are next updated (expected in early 2010). In the mean time, Planning staff's practice is to prohibit the use of ornamental copper in exterior applications.	Ongoing Report 09/09	Shaunn Mendrin, Senior Planner & Kristy McCumby Env. Spec.
NB-1	Measures to Implement Metals Controls Measures: Erosion 1) Implement perf. Stds for Const. Inspect. Erosion 2) Participate in training & cert. of site inspectors	Permit Prov. C.9.b (NAP)	• Continue to implement Construction Inspection Performance Standards • Continue to have Inspectors attend Regional Board/Program workshops on Construction Site Management and erosion controls to learn erosion and sediment control techniques. • Continue to attend Program-sponsored workshops on post-development storm water control BMPs	Both Building Inspection staff and Capital Projects Administration staff implement the Construction Inspection Performance Standards in the City's URMP. See Attachment F, Appendix Table 1 for a list of inspections and corrective actions required. Staff attends training as it becomes available. See Attachment M for staff training details by division.	Ongoing Report 09/09	Gordon Blancher, Building Insp./ Coord. Hira Raina/ Nasser Fakih

Trash Inventory and Management

P.S. Id.	Activity	CI Item Source	FY 08-09 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
Trash Investigations and Plan Development						
	Trash Investigations and Plan Development	Program Task RWQCB Letter	Assist Program in implementing Pilot Demonstration Projects to focus on assessing trash control measures effectiveness.	13 inlets were retrofitted with full capture devices as part of the pilot project in Sunnyvale with SCVURPPP. See Appendix 1 of this Attachment for details on the pilot project and preliminary data discussions.	Report 09/09	Kristy McCumby/ Env. Specialist
	Trash Investigations and Plan Development	Program Task RWQCB Letter	• Continue to identify and prioritize actions for trash problem areas in urban streams and waterways. • Identify other potential sources of trash. • Use criteria provided by Program staff in FY 07-08 to identify and prioritize the areas.	Staff continues to work with SCVURPPP to identify problem areas in urban waterways. Staff assisted SCVURPP in performing an URTA in Stevens Creek near one Sunnyvale stormwater pipe outfall near Remington Drive in October 2008 and will continue to work with them as plans are developed to address litter issues in Stevens Creek with multiple city jurisdictions. This will likely become a priority area for the City to look for opportunities for enhanced litter control actions in the future, in addition to continuing on with current litter prevention actions in other areas of the city.	Ongoing Report 09/09	Kristy McCumby/ Env. Specialist
	Trash Investigations and Plan Development	Program Task RWQCB Letter	• Continue to identify and implement trash control measures, as appropriate, to address high priority trash problem areas within Sunnyvale's jurisdiction, • Provide specific information on trash management practices implemented.	A description of trash control measures and management efforts currently in place within Sunnyvale is provided in Appendix 1 of this Attachment. Actions included multiple volunteer clean up events as well as participation in the Pilot Trash Retrofit project.	Ongoing Report 09/09	Kristy McCumby/Env. Spec & community volunteers (TBD)

Trash Investigations and Plan Development (cont.)						
	Trash Investigations and Plan Development	Program Task RWQCB Letter	Track existing trash management practices used by the City and evaluate their effectiveness, based on guidance provided by SCVURPPP. The Effectiveness Evaluation may include the use of the Urban Rapid Trash Assessment protocol and/or the KAB litter index in a subset of the high priority trash problem areas.	A discussion of existing trash management practices and evaluations is included in Appendix 1 of this Attachment. The URTA was performed in two locations in FY 08-09 where there had been some efforts to removed trash through volunteer clean up events. URTA data is provided in Appendix 2 of this Attachment.	Report 09/09	Kristy McCumby, Env. Specialist
	Trash Investigations and Plan Development	Program Task RWQCB Letter	Provide Program staff with trash management practices information from within Sunnyvale's jurisdiction, using a standardized reporting format.	Program staff was provided with requested information using URTA data forms and providing information on the Pilot Trash Retrofit project. See Appendix 2 for data table.	Ongoing Report 09/09	Kristy McCumby/ Env. Specialist
	Trash Investigations and Plan Development	Program Task RWQCB Letter	Submit Urban Rapid Trash Assessment Survey Forms, Trash Item Tally Sheets, and any other data collected to the Program staff, as appropriate.	Program staff was provided with copies of the URTA forms, as requested. Copies of the URTA results for the two sites assessed are included in Appendix 2.	Ongoing Report 09/09	Kristy McCumby/ Env. Specialist
	Trash Investigations and Plan Development	Program Task RWQCB Letter	Continue to assist Program to develop Trash Fact Sheets, as appropriate.	Staff provided assistance in the review of trash fact sheets, when requested and in providing information/photos as needed.	Ongoing Report 09/09	Kristy McCumby/ Env. Spec.
	Trash Investigations and Plan Development	Program Task RWQCB Letter	Assist program staff in developing a long-term strategy for reducing trash in urban streams and waterways, and identify other sources that may contribute trash to those areas	Staff continues to participate in the SCVURPPP Trash Ad Hoc task group and provide input/information regarding strategies for trash reduction in creeks and waterways as requested.	Ongoing Report 09/09	Kristy McCumby/Env. Spec

Trash Investigations and Plan Development (cont.)						
	Trash Plan Implementation	Program Task RWQCB Letter	Continue to build trash awareness by providing outreach to residents and to students in Sunnyvale schools in an effort to increase behavioral changes through public education.	Sunnyvale continues to provide public outreach by publishing articles, by developing and advertising through bus back ads, by promoting litter pollution prevention at events, by hosting cleanup events, and by conducting demonstrations for residents and students in order to build trash and litter pollution prevention awareness. • For detailed information on trash outreach see Attachment G Table 1 – Detailed Descriptions PI/P Activities and Self-Evaluation Matrix for FY 08-09.	Ongoing Report 09/09	Jackie Besoyan, Env. Outreach Coordinator

Response to Regional Water Quality Control Board Comments on this Section for FY 07-08 Annual Report:

City of Sunnyvale

FY 08- 09 Annual Report

Attachment K

Trash Inventory and Management

Appendix 1

Trash Assessment Results, Pilot Project, and Management Actions Initiated

City of Sunnyvale
Attachment K, Appendix 1
Trash Assessment Results and Management Actions Initiated
FY 08-09

Introduction:

In FY 08-09 the City was not able to obtain a community volunteer to assist with Urban Rapid Trash Assessments (URTA), so only one assessment was done at the Sunnyvale East and Sunnyvale West Channel sites in February 2009. The URTAs were completed in locations had been previously assessed and where upstream trash management actions had been or would be implemented. Due to the lack of volunteer staff and the screening level nature of the Keep America Beautiful (KAB) assessment methodology, no further assessments using this approach were initiated. Resources were used to promote and accomplish volunteer clean up events instead.

Ongoing trash/litter pick up activities continue by both the Public Works and the Parks and Recreation Departments. Street-sweeping, litter pick up at parks and after city-sponsored events, and during landscape maintenance operations all help to reduce the accumulation of litter in storm drain inlets or that could be wind-blown into adjacent waterways.

Public outreach and education about litter and its impact to creeks and the Bay are included in classroom presentations about watersheds using the Enviroscape model. Litter prevention messages are included in local advertising efforts. The City also helped distribute tarps to cover loads and informational flyers to residents coming in to the SMaRT Station for waste disposal during the county-wide event. See Attachment G-P/IP for a description of outreach activities related to litter prevention.

The city completed three litter clean up events in FY 08-09, rather that conducting multiple URTAs and any KAB assessments. Sunnyvale sponsored sites for the Coastal Clean Up day along the Guadalupe Slough, an area that is tidally influenced from the Bay and that receives flow from San Thomas Aquino and Calabazas Creek, as well as the Sunnyvale East and West Channels. Sunnyvale sponsored three locations in neighborhoods around the city (approximately 1 square mile for each neighborhood site) as part of the Great American Litter Pick Up event. Portions of the Sunnyvale East Channel and Calabazas Creek were cleaned of litter as part of the National River Clean-Up Day event. See sections below for a description of the numbers of participants and quantities of debris removed during these events.

The city continued with the implementation of the Pilot Storm Drain Inlet (SDI) Retrofit project, in cooperation with San Jose and with the assistance of SCVURPPP. An analysis of the debris collected in each retrofitted inlet at the end of the rainy season was completed to identify the quantities and types of trash and leafy debris collected in each retrofitted inlet.

Results from these trash management initiatives are reported below, as well as an evaluation of their effectiveness.

Assessments:

URTA – Sunnyvale East and Sunnyvale West Channels

URTA assessments were performed on the Sunnyvale East and West Channels in February 2009. The SCVURPPP assessment reporting table, assessment forms, and photographs for these two sites are included at the end of this Appendix.

URTA scores for the Sunnyvale East Channel assessments have ranged from a low of 59 to a high of 98. Scores for the Sunnyvale West Channel ranged from a low of 81 to a high of 100. (See Table 1 below.)

Table 1: URTA scores for Sunnyvale East and West Channels FY 04-05 to FY 08-09

	FY 04-05 Fall	FY 05-06 Winter	FY 05-06 Spring	FY 06-07 Winter	FY 06-07 Spring	FY 07-08 Winter	FY 08-09 Winter
Sunnyvale East Channel	59	67	83	85	98	73	72
Sunnyvale West Channel	81	100	100	93	100	90	94

In general, scores are lower for assessments completed in the winter months after rain events during the wet season. Scores were higher in the spring, since the area had been cleaned up one time previously that year. The assessments completed this year had rankings very similar to those observed in FY 07-08.

The scores for the Sunnyvale East Channel, in general, are lower than those observed for the West Channel. This may partly be due to differences in the drainage area size for each channel. Sunnyvale West Channel drains 4.1 square miles and is 3.2 miles in length. Sunnyvale East Channel drains 6.35 square miles of Sunnyvale and part of Cupertino and is 6.4 miles in length. Trash that is conveyed to the Sunnyvale East Channel via the storm drain outfalls is coming from approximately a 35% larger drainage area than that of the Sunnyvale West Channel.

Also, there may be more litter entering the Sunnyvale East Channel from highway sources, as it is crossed by bridges for Highway 237. Litter pick up during the National River Clean-Up Event collected debris from the area adjacent to the bridge crossings over the East Channel in May 2009. The Sunnyvale West Channel is underground where Highway 237 crosses.

The majority of the trash observed at both channels appears to have been accumulated at the assessment location from upstream water transport sources. There is some wind blown accumulation from vehicles using Caribbean Drive and Highway 237 where

bridges or the roadways are adjacent to the channels and next to the URTA assessment area.

Both Sunnyvale East and West channels drain highly urbanized portions of the City with a mixture of residential, commercial, and industrial land uses. The impacts from land use activities directly adjoining the channels appear to be small. Walking surveys along the banks of the channels from Baylands to Mathilda Avenue for the Sunnyvale West Channel(where the channel undergrounds in a box culvert) and from Baylands to Fair Oaks/ Hetch-Hetchy Green Belt for the Sunnyvale East channel(where the channel undergrounds for a long distance) did not identify significant impacts from properties bordering the channels. The land use in these portions of the channel is predominantly industrial for technology-related businesses. Some minor "homeless" and "Graffiti" impacts on the Sunnyvale East Channel near the Hetch-Hetchy Green Belt crossing area were observed.

City Department Litter Control/Clean Up Activities in FY 08/09:

Public Works Department

The Street Maintenance Division continues to perform street sweeping on a monthly basis in residential areas (See street sweeping schedule with dates for each street on Sunnyvale's website at http://sunnyvale.ca.gov/Departments/Public+Works/Street+Maintenance/Street+Maint+Schedule.htm).

Weekly sweeping occurs for the downtown core area (Murphy Street) and the surrounding city-owned parking lots. Additional sweeping for leaf pick-up is done in the late fall, as well as extra sweeping for storm debris, as needed. (See Attachment D-1, Appendix 1 of this report for details on the quantity of materials collected during street sweeping activities and the number of curb miles swept.)

Public Works, Street Maintenance Division staff also assist the Public Safety Department on an as-needed basis to collect and dispose waste at homeless encampments at the City's solid waste facility. Although these encampments are not located on waterways, the collection and removal of this debris helped prevent resulting litter or small debris from entering any storm drain inlets near the encampment areas.

The Boulevard Landscaping Division is responsible for maintaining landscape along City-owned rights-of-way. In their landscape maintenance activities, they also collect litter that accumulates on street medians and roadsides that are maintained by these crews. The litter from these areas is removed 13 times per year (roughly on a monthly basis).

City of Sunnyvale
Attachment K, Appendix 1
Trash Assessment Results and Management Actions Initiated
FY 08-09

Solid Waste Division and Contractor: SMaRT Station litter control efforts along Caribbean Drive

Garbage transfer trucks hauling wastes to the SMaRT station in Sunnyvale use Caribbean Drive as their access to the City's materials recovery facility. As a result, windblown litter from the vehicles after they have off-loaded has been identified a chronic problem along the site access route. The contractor operating the SMaRT station is periodically reminded to ensure that drivers take necessary precautions to prevent litter from blowing out of trucks after having deposited their loads at the facility.

Two of the pilot SDI full capture devices identified in the SDI retrofit pilot project description below were installed along Caribbean Drive and will be monitored as one method determine the effectiveness of efforts to reduce the litter coming from solid waste transport vehicles utilizing the SMaRT Station.

Parks and Recreation Department

Parks and Recreation Department, Parks and Open Space Division staff perform weekly clean-ups of public parks and trails, as well as some school athletic facilities to prevent litter accumulations. Over 17,000 hours of staff time is used annually for litter control efforts at parks, school sports fields, and open spaces maintained by the City.

Litter Clean-up Events in FY 08-09:
The City coordinated sites for three litter clean up events in FY 08-09 and is planning to continue with these three events in FY 09-10.

Coastal Clean Up Day Event: September 20, 2008

A Coastal Clean Up Day Event location was sponsored by Sunnyvale in cooperation with the Creek Connections Action Group.. Approximately 1875 lbs of trash and 60 lbs of recyclables were collected by 43 volunteers from a 1-mile reach from one side of the Guadalupe Slough that was accessible from the Sunnyvale Water Pollution Control Plant oxidation ponds access road.

Great American Litter Pick-Up Event (GALP):
On April 25, 2009, the City coordinated three neighborhood locations for the county-wide Great American Litter Pick-up event sponsored by the Silicon Valley Anti-Litter Campaign. Neighborhoods were selected that drained into the Sunnyvale East and Sunnyvale West Channels with an area of approximately three square miles. Land use was mostly residential, with some commercial and public schools/parks. The City had 60 volunteers that picked up approximately three cubic yards of trash and one half cubic yard of recyclables from these neighborhoods before they entered the storm drain collection system.

National River Clean Up Day Event:
On May 16, 2009, in cooperation with the Creek Connections Action Group, the City coordinated a clean up of the Sunnyvale East Channel from the point where it enters the Guadalupe Slough near Baylands Park to the Highway 237 crossing. An additional area along Calabazas Creek north of Highway 237 and bordering Sunnyvale Baylands Park was also cleaned. Land use in the areas is a mixture of residential and industrial, with some public parks, trails, and rights-of-way near the channel. A total of 46 volunteers picked up approximately 338 pounds of trash and 34 pounds of recyclables from the channel banks and one side of the creek bank.

Litter Prevention Efforts

Tarp Give-Away: November 2008
At the November 1, 2008 event held at the Sunnyvale "SMaRT" station, 40 tarps were distributed to residents who brought in vehicle loads of waste for disposal. Flyers were also distributed to participants that reminded them of city ordinances and state laws regarding the transport of wastes or materials on public roads requiring that loads be covered and littering be prevented.

Public Education and Outreach Articles/Advertising
Sunnyvale continues to provide public outreach by publishing articles, theater ads, and bus-back ads promoting the prevention of litter pollution. Also, staff conducted demonstrations for residents and students at events and in schools using the Enviroscape to demonstrate sources of litter pollution and how it is transported to waterways to help increase litter prevention awareness.

For detailed information on trash outreach see Attachment G Table 1 – Detailed Descriptions PI/P Activities and Self-Evaluation Matrix for FY 08-09.

Pilot Studies Continued in FY 08-09

Pilot Trash Structural Treatment Control Study – With SCVURPPP and City of San Jose

As reported in our FY 07-08 Annual Report, thirteen storm drain inlets were selected for the installation of the StormTek ® full capture devices. Completion of the installation of the last two devices was completed in September 2008, so all units were operational at the beginning of the rainy season of FY 08-09.

All units were cleaned by Field Services staff prior to October 1, 2008. Staff inspected the units in mid-December after the first rain events to ensure the accumulation of debris would not cause overflows of the units or potential flooding. Five SDIs were identified as being approximately 50% full and Field Services was notified that clean out of the retrofitted units was required. Four of the units were cleaned in late December and the fifth was cleaned in early January.

In mid-February, two of the units along Maude Ave that had been cleaned in December had flooding incidents during a significant rainstorm that occurred on February 13 and 14. Emergency crews were dispatched and the units were removed and cleaned of debris. During the emergency removal, one of the units was damaged and had to be repaired before it could be replaced into the SDI. It was replaced into the unit the first week of March. Street flooding also occurred at the unit installed at the corner of Caribbean Drive and Borregas Ave after a storm on February 6, 2009. Approximately 11 cubic yards of leafy debris was removed from the SDI at that time.

Inspections of the all retrofitted SDIs occurred on February 26, 2009 and none were identified as needing to be cleaned out.

The 13 retrofitted inlets were cleaned on May 18, 2009 and June 5, 2009 after the end of the rainy season. All debris was removed with a clamshell shovel, bagged, labeled, and taken to a processing area where litter was sorted from the leaf debris, weighed (wet weight), and approximate volumes for both leaf debris and litter were measured. The process was similar to that which was done for the eleven units reported on in our FY 07-08 annual report. Table 2 below shows the weights and volumes of litter and leaf debris collected from each of the 11 retrofitted SDIs. Also, footnotes are provided showing the additional quantities of debris that were removed during the rainy season to prevent flooding or if there were emergency cleanings needed during flood events.

Of the 13 inlets cleaned in May 2009, a total 1601 pounds of leafy debris and approximately 38 pounds of trash were removed at that time. This was approximately 46.7 cubic ft of leafy debris and 5.5 cubic feet of litter. An additional 80 cubic ft of leafy debris and trash were removed from seven of the SDIs to prevent or as the result of street flooding before the annual clean out occurred in May 2009.

The leafy debris (deciduous leaves, conifer needles, and twigs) appeared to be from the local street trees and was not from material being dumped or discarded by residents or businesses. Sunnyvale requires the use of green-waste carts by residents for yard debris pick-up.

The most common types of litter categories observed in the retrofitted inlets were the plastics. Plastic food wrappers *(e.g., candy bar wrappers, chip bags, snack food wrappers) cellophane (cigarette packs and candy), plastic cups, lids and straws, and Styrofoam packing materials were frequently observed (especially at the two SDIs along Caribbean Drive). Paper was also very common, in some areas. Cigarette butts were frequently found, especially in inlets that were close to stop lights and on roadways with higher traffic flows. Very few glass or metal items were observed in the litter. A more detailed description of the types of trash observed will be available in the final report for the pilot project.

*Polyethylene tetraphthalate (PET) that is biaxially oriented or boPET film used for food packaging.

Table 2. Quantities of leaf debris and trash collected in Retrofitted SDIs at end of rainy season in 2009

[2] Additional debris removed by Cupertino Field Services staff on 10/13 2009 (~5 cubic ft)
[3] Additional debris removed by Sunnyvale Field Services staff on Dec. 16, 2008 (~6 cubic ft)
[4] Additional debris removed by Sunnyvale Field Services staff on Dec. 16, 2008 (~10 cubic ft)
[5] Additional debris removed by Sunnyvale Field Services staff on Dec. 22, 2008 (~12 cubic ft)
[6] Additional debris removed during flood incident by Field Services staff on Feb, 16, 2009 (2 cubic ft)
[7] Additional debris removed by Sunnyvale Field Services staff on Dec. 22, 2008 (~12 cubic ft)
[8] Additional debris removed during flood event by Sunnyvale Field Services staff on Feb. 16, 2009 (~12 cubic ft)
[9] Additional debris removed during flood event by Sunnyvale Field Services staff on Feb. 6, 2009 (~11 cubic ft)

The final report on the pilot project will be produced in cooperation with SCVURPPP in the fall of 2009. More detailed information regarding the site selection and installation, including photographs of the installations is provided in the Program's section of the annual report regarding trash management actions.

Effectiveness Evaluations:

City Department Litter Clean Up and Prevention Efforts:
Both Public Works and Parks and Recreation Departments within the city continue with their efforts to control litter in public areas and rights-of-way. Litter/trash pick up is a normal part of the job for staff in both of these departments as they maintain public facilities. In areas that are known to be problematic (e.g., along routes to the SMaRT Station) the City requires contractors to pick up wind-blown debris from the truck routes. This is an effective method to help reduce litter from entering SDIs, but it is very labor intensive and can be expensive.

The City continues with street sweeping efforts to collect debris. Over 8912 cubic yards of litter, leaves, and street debris were collected in FY 08-09, which is a small increase previous years (FY 07-08 and FY 06-07), based on the same number of curb miles swept in residential, commercial, and industrial areas of the city. This number varies each year, partly due to quantities of leaves accumulating on streets. Street sweeping continues to be an effective means to help reduce leafy debris and trash from entering SDIs

Litter pick up after public events on city property is an integral part of the event planning effort. Litter remaining on-site after events has not been an issue in Sunnyvale.

Coastal Clean-Up Day, Great American Litter Clean-up and National River Clean–Up Day Events

All of these volunteer events were very successful. The number of volunteers needed for the event was met and the quantity of litter picked up, although not huge, was still proactive in keeping the wastes from entering the storm drain system (for the GALP) or into the Bay from the Coastal Clean Up Day and National Rivers Clean-up Day events. The events are popular for volunteers as they feel that they are doing something to help reduce visible pollution problems. It also provided an opportunity for outreach to the people in the neighborhoods who saw the volunteers picking up litter, helping make them more aware of litter issues. Participation by the public has continued to increase with each event.

Tarp Give-Away Event
This event was less effective this year, as it was not done on an "Extra Dump Day" event as it had been last year. However, it is still effective at providing the facility users with the appropriate covers for their loads coming in to the SMaRT Station for disposal,. It also provides them with education materials about the litter problems coming from uncovered loads and the legal requirements for covering their loads. Only 40 people received the tarp on the day of the event this year.

Public Education and Outreach Articles/Advertising
A combination of articles, theater advertisements, bus-back advertising, and promotion through demonstrations such as the Enviroscape continue to build trash and litter pollution prevention awareness levels with the public. See Attachment G, Table 1 for a detailed analysis of the effectiveness of the various outreach tools used for trash and litter outreach.

Pilot Trash Structural Treatment Control Study
The effectiveness of the pilot program is still being determined. Preliminary results indicate that the units work well as "full-capture" devices and collected significant amounts of leafy debris along with smaller quantities of litter.

Part of the pilot project was to determine the operational and maintenance costs for these units. Based on the flooding issues that occurred in some locations, despite the units being cleaned less than six weeks before the flood event occurred, it will be essential for Field Services staff to increase their inspection frequency of inlets in certain areas, due to the quantity of leafy debris that accumulates at those locations. This adds to the overall cost for maintenance of the units. In about half the units installed, the annual cleaning may be sufficient, due to the size of the SDI itself. The smaller SDIs fill up more quickly with leafy debris in some locations, whereas others, especially the larger units will only need their annual cleaning.

The maintenance and determination of the trash loading rates and costs per quantity of trash removed will not be available until the final report is prepared in the fall of 2009.

Potential Next Steps:

Caribbean Drive-

- Continue contractor efforts to collect windblown debris from trucks leaving the facility.
- Continue to work with contractor to minimize the amount of debris falling off the transport vehicles.
- Monitor full-capture, retrofitted SDIs to see if litter control efforts are helping reduce the amount of litter entering the inlets.

Sunnyvale East Channel-

- Plan for a clean-up event on National River Clean-Up day, spring 2010.
- Continue to expand number of Great American Litter Pick Up event sites for spring of 2010, pending volunteer availability and interest.

Sunnyvale West Channel-

- Plan for a clean-up event on Coastal Clean-Up Day, fall 2009
- Continue to expand the number of Great American Pick Up event sites for spring of 2010, pending volunteer availability and interest.

City Department Actions-

- Work with department staff to collect data on current level of litter control efforts, such as quantities of debris collected, to assist with effectiveness assessments of litter control efforts.
- Working with Neighborhood Preservation Division of Community Development, develop Neighborhood Litter Pick up kit (safety vests, litter grabbers, gloves, and bags) to loan out to neighborhood associations for local litter clean up efforts sponsored by residents/volunteers.

Date:2/12/2009 135

I. Site Information

1. **Site ID# SU16A** **Watershed: Sunnyvale West** **Location: Sunnyvale West @ Caribbean**

II. Assessment Information

1. Which assessment tool was used? (Check one)
   ☒**Creek**-RWQCB Version 7.0 ☐**Non-Creek**-Windshield Survey
   ☐**Non-Creek**-KAB Litter Index ☐Other _____
2. **Total Score** (RWQCB Version 7.0 or KAB Litter Index) 94
3. Windshield Survey Results-Trash Priority: ☐ **NA** ☐**High** ☐**Medium** ☐**Low**
4. What percentage or length of the area is impacted with trash (e.g. 5%, five feet, etc.)? <5%
5. This assessment is ☐ **Initial** ☒**Follow-up** (Check one)
6. If applicable, how many follow-up assessments have been conducted at this site?6

III. Trash Information

1. Describe trash type (Check five most prevalent types):

☐Rubber products	☐Metal products	☐Construction debris
☐Plastic bags	☒Cigarette butts	☐Fabric and cloth
☒Styrofoam products	☒Plastic/Synthetic items	☐Toxic substances
☐Aluminum cans	☐Tires	☐Appliances
☒Bottles (plastic and glass)	☐Woody debris	☐Furniture
☐Convenience/Fast Food wrappers	☐Yard waste	☐Biohazards
☐Man-made wood products	☐Batteries	☒Other paper

2. Potential trash source (Check all that apply):
   ☒Trash accumulation (water-borne) ☐Homeless encampments ☐Outfall _____
   ☒Trash accumulation (wind-borne) ☐Illegal dumping ☐Other _____
   ☒Litter-Vehicular ☐Litter-Dumpster/Receptacle (describe) _____
   ☐Litter-Commercial business (name)_____
   ☐Litter-School/Institution (name)_____
   ☒Litter-Other (describe) from upstream SDIs and land uses – pedestrian trails
3. Was trash observed near (Check one): ☐**Storm drain inlets** ☐**Storm drain outfalls** ☐**Creek** ☒**N/A**
4. Identify adjacent land uses to the trash areas assessed (if possible):Industrial, Public access trails

IV. Trash Management Actions

1a. Are trash management actions planned for the site? **Yes** ☒ **No** ☐
1b. If trash was removed, provide total weight or volume (if known): <1 lb
1c. Photographic documentation: ☒**Yes No**☐
2a. Other Trash Management Actions Taken (describe): Cleaned up as part of Coastal Clean Up day event in September 2008 and on "adopt a creek" list with SCVWD
3a. Follow-up action needed: **Yes** ☒ **No**☐
3b. Future trash management actions needed (Please describe): Keep on list for local creek clean up activities for a least an annual cleaning of accessible areas
3c. Is trash routinely removed from this site? **Yes**☒ **No** ☐ If yes, at what frequency annual- at least
3d. Is a future assessment needed? **Yes**☒ **No** ☐
3e. If Yes, which tool? ☒**Creek**-RWQCB Version 7.0 ☐**Non-Creek**-Windshield Survey ☐Other_____ ☐**Non-Creek**-KAB Litter Index

Notes: Vegetation growth on side banks makes debris pick up difficult. Most waste found appears to come from upstream sources. Keep on list for clean up for local annual creek and beach clean up events.

Staff Training Summary Table

STAFF TRAINING BY DEPARTMENT/DIVISION FOR FY 08-09

1) Staff Training Table

TRAINING DATE	SUBJECT	APPROXIMATE NUMBER OF STAFF ATTENDING
Public Works Field Services: Street Maintenance, Water, Sewer, Stormwater, and Boulevard Landscaping		
7/15/2008	Sunnyvale Trash SDI Retrofit Pilot Project	20
10/6/2008	Street Maintenance – URMP and Rainy Season BMPs for Preventing Pollution	38
10/7/2008	Storm Drain Maintenance - URMP and Rainy Season BMPs for Preventing Pollution	30
10/7/2008	Boulevard Landscaping - URMP and Rainy Season BMPs for Preventing Pollution	10
10/8/2008	Water Utility - URMP and Rainy Season BMPs for Preventing Pollution	12
10/8/2008	Street Trees & Concrete	6
2/26/2009	Boulevard Landscaping: Annual Pesticide Training Day, including legal, safety, and City's IPM policy	13
Public Works - Environmental Division		
Env. Division Manager, Outreach Coordinator and Env. Specialist		
11/21/2008	Creeks Coalition Conference - Stream stewardship and restoration	2
5/27/2009	Stormwater General Construction Permit training	2
5/29/2009	SCVURPPP – Sustainable Streets workshop/training	1
6/17/2009	SCVURPPP annual C.3 workshop/training	1
12/17/2008	Sustainability in Sunnyvale	1
3/220/09 – 3/42009	CWEA P3S Conference	1
4/29/2009	Water Conservation for Employees	1
Pretreatment Program		
3/2/09	P3S conference - Monterey	4
5/22/09	Hazwoper Refresher Awareness – 8 hr.	7
6/17/09	Annual C3 Training by SCVURPPP	7
January 2009	Environmentally responsible Dentistry	2
Public Works - Engineering Division and Project Administration		
Weekly	Discussed needed water pollution measures on construction projects during all conducted construction progress meetings. These meetings occurred weekly for each capital improvement project and one City inspector attended each progress meeting. For the whole year, SWPP was discussed for an approximate total of 13 hours (52 weeks x 3 progress meetings per week x 5 minutes per meeting)	4
9/24/2008	PW Project Administration – Construction Inspection and Compliance Notification	6
5/29/2009	SCVURPPP – Sustainable Green Streets and Parking Lots- workshop/training	1

6/17/2009	PW Project Administration – Construction Site BMPs – "Keeping it Clean" DVD presentation and discussion.	8
6/17/2009	SCVURPPP annual C.3 workshop/training - "Stormwater Management for New and Redevelopment Projects: New Challenges, New Tools and New Ideas	1
Parks and Rec. - Parks Division, Baylands Park, and Golf Services		
9/25/2008	Rural Roads/PW maintenance BMP training (SCVURPPP)	1
11/18/2008	Staff IPM training – City IPM policy and alternatives to herbicide use	55
3/26/2008	Staff stormwater pollution prevention training and Corp Yard SWPPP, Annual City IPM policy training, & annual training for pesticide applicators	55
Community Development Department (CDD) - Planning		
9/10/2008	Yearly stormwater permit update training – contents of BMP guidance manual and potential changes from MRP	11
12/10/2008	Quarterly update for planning staff	11
3/25/2009	Quarterly update for planning staff	11
6/10/2009	Quarterly update for planning staff	11
CDD - Building Inspection		
10/8/2008	Yearly Storm Water Training (City Staff Training)	9
2/18/2009	Construction Site BMPs – Hold on to your dirt.	9
5/27/2009	Stormwater General Construction Permit training	1
Training provided by City staff to contractors and others:		
2/17/2009	Qualified Consultant Training – 3rd Party Certification Process	3
3/25/2009	San Mateo County-wide Stormwater Program, Municipal Maintenance Subcommittee Presentation – Pilot Trash Retrofit project in Sunnyvale	40
6/3/2009	Alameda Co. Clean Water Program Training, Presentation – Pilot Trash Retrofit project in Sunnyvale	~50

Subject: County Of Santa Clara Clean Water Program FY 09 Annual Report

Dear Mr. Wolfe:

This report is submitted by the County of Santa Clara, in conjunction with the Santa Clara Valley Urban Runoff Pollution Prevention Program's Annual Report, pursuant to provision C.6.(a) of its reissued municipal storm water discharge National Pollutant Discharge Elimination System Permit (Orders No. 01-024, 01-119, and R2-2005-0035).

This report summarizes activities performed during FY 09 in accordance with the County's Urban Runoff Management Plan (URMP), which was submitted to the Regional Board in September 1997 and updated subsequently, the performance standards contained therein, and the 2001 NPDES Storm Water Discharge Permit, as amended.

The County unincorporated area has a population of about 100,000 persons, with about 80,000 living within the Phase I NPDES Storm Water Discharge Permit jurisdiction. Community physical characteristics include mountains, forests, grasslands, chaparral, farms, suburbs, foothills, valley floor areas, watersheds, reservoirs, and bay frontage. There is no urban downtown core area; rather there is a large acreage of low-density land area surrounding existing suburbs and municipalities.

The County has a few urban pockets, few commercial sites, and few industrial sites. The County is pursuing a program of annexation, so that these urban pockets will become a part of the cities that surround them. The restrictive zoning and general plan policies for the unincorporated areas do not promote urban growth or subdivisions. In addition, the Parks and Recreation Department has obtained large land holdings that will never be developed, but rather will be used primarily for open space and for low impact recreation. The largest "commercial" site in the unincorporated area is Stanford University.

Board of Supervisors: Donald F. Gage, George Shirakawa, Dave Cortese, Ken Yeager, Liz Kniss
County Executive: Jeffrey V. Smith

Goals and Contents of the Report:

The goals of this Annual Report are to: 1) document implementation of the URMP and the FY 09 work plan during the past fiscal year; 2) evaluate program results for continuous improvement; 3) comply with NPDES Storm Water Discharge Permit requirements; and 4) share this information with other Co-permittees, jurisdiction decision-makers, and the public. A table of contents is included with the report.

Program Highlights:

1). The County's Clean Water Program continues to be funded directly from the County General Fund. As stated in previous annual reports, Proposition 218 eliminated the storm water fee that supported Clean Water Program activities in 1997. Additional tax funding can only be obtained by a 2/3 vote of the people. Last year, the Clean Water Program consisted of one full time junior civil (environmental) engineer with additional guidance from a senior civil engineer. In January of 2009 the senior civil engineer resumed his original duties and the program is now a staff of one. Staff members of the involved departments coordinate compliance and reporting activities as they relate to each involved department, with guidance from the Clean Water Program Coordinator as well as the Santa Clara Valley Urban Runoff Pollution Prevention (SCVURPPP) program staff.

2). The County is located within two regional water quality control boards. The northern portion of the County is under the San Francisco Bay Regional Water Quality Control Board and the southern portion is under the Central Coast Regional Water Quality Control Board (CCRWQCB). In December 2008, the County began the enrollment process to obtain coverage under the NPDES Storm Water Discharge Phase II Permit for the southern portion of the County. Since December, the County, Morgan Hill and Gilroy have been working together to develop and then revise the Draft Regional Storm Water Permit (SWMP). With only one staff member from the County devoted to the clean water program, drafting the SWMP was the primary focus for the program this year. For this reason, there were no significant changes made to the existing clean water program.

3). The County continues to move forward with implementation of the 2001 NPDES Permit, as amended. The County is interested in how the provisions of the proposed Municipal Regional Permit will affect the existing Clean Water Program functions.

4). The involved departments include Capital Programs (now a part of the Fleet and Facilities Department), Roads and Airports, Parks and Recreation, Planning and Development (Planning Office, Development Services Office, Clean Water Program, Surveyor), Agriculture and Environmental Management (Integrated Waste Management, Pollution Prevention, Graffiti and Litter Abatement, Green Business Program, Master Composter Education Project), Environmental Health (Consumer Protection, Hazardous Materials, Solid Waste, Household Hazardous Waste, Vector Control), the County Executive's Office (Special Construction Projects, and Integrated Pest Management).

5). County staff members from the various involved departments have continued to be active this fiscal year in attending informational presentations regarding implementing the requirements of the NPDES Permit and preventing nonpoint source pollution.

1). The County Department of Environmental Health continues to provide enhanced reporting for IC/ID and IND/COMM activities within the unincorporated area.

2). The involved County departments continue to take direct responsibility for implementation of performance standards and reporting on NPDES Permit compliance activities.

3). Training events have been well received by the involved departments.

4). The County's full time IPM Program Manager is continuing to work with the Department of Parks and Recreation pursuant to its new Pesticide Use Reduction Plan, and with Department of Roads and Airports to reduce and eliminate pesticides where practicable, including the new landscaping and roadside vegetation management plan. The County was the first jurisdiction in SCVURPPP to adopt an IPM ordinance. Also, the County IPM Program Manager now has the benefits of an online pesticide use requesting and reporting database on the County's intranet.

5). The Household Hazardous Waste, Green Business, Integrated Waste Management, Graffiti and Litter Abatement, and Master Composting Education Programs have all been active in spreading the pollution prevention message, including prevention of storm water pollution.

6). The Household Hazardous Waste (HHW) Program has been very active in the recycling of mercury containing materials, in the Mercury Education Project, and in promoting E-Waste recycling. The HHW Program supports legislation to require sellers of mercury containing products to provide for collection and recycling.

7) The Office of Planning has been putting together a BMP O&M Verification Program. The BMP O&M Agreement has been written and is currently awaiting approval from County council before asking the Board of Supervisors to authorize the program. Implementation is expected to begin in FY 10.

Thank you in advance for your review of this Annual Report for FY 09. If you or your staff members have any questions regarding the materials submitted, please contact me at (408) 299-5737.

Sincerely,

Clara Spaulding

- **Solid Waste Local Enforcement Agency (SW-LEA)**

The Solid Waste Program supports and implements the storm water pollution prevention efforts to minimize impacts on our waterways in several of our countywide programs, including solid waste facility inspections, refuse vehicle and septage pumper vehicle inspections, and refuse accumulation and dumping cases. Every complaint received and investigated is approached with the consideration of what is needed to remove the threat of pollution. This sometimes leads to a referral to another agency having jurisdiction over the location or the actions of the responsible person for the run-off water degradation. Sometimes our actions directly reduce or eliminate threatened or actual pollution sources. Our staff continually look for and report potential polluting situations and conditions to the appropriate stormwater protection enforcement agencies for follow-up or directly enforces cases in our scope of authority.

In many cases, the solid waste program confirms the threat or actual pollution and issues written orders to abate the violation. Usually the threat of legal action leads to abatement of the violation, but occasionally cases are referred to the District Attorney's Environmental Crimes Unit for legal action.

The complaint investigations are widely varied in scope, but are nonetheless related to preventing pollution of the environment and are backed by the County Ordinances relating to waste and refuse accumulations, illegal dumping, refuse collection vehicles, and the septage or grease pumper vehicles. The renewed County refuse collection contract had a change and the yard waste is now collected from toters instead of on the streets as it had been allowed in the past. This change was significant in reducing organic debris potentially entering the storm drains.

Abatement of pollution threats at facilities that are routinely inspected, include solid waste collection and septage pumper vehicle storage yards. We also inspect and regulate solid waste facilities, operations such as landfills, transfer stations, composting facilities, and closed landfills. These facilities are under the jurisdiction of state laws and the state-designated local enforcement program. We work closely with the Regional Water Quality Control Board and forward our monthly inspection reports directly to them.

The program staff inspects all large or small facilities that generate medical or bio-hazardous wastes and ensure that their waste stream handling does not result in biohazardous or other waste contamination of the storm water systems. Program staff also conduct inspections of waste tire handling facilities to ensure proper handling, storage and manifesting of waste and used tires.

It is stressed at SW-LEA staff meetings and in training that one of the principal goals of our inspections is to identify and investigate any and all critical control points of the programs promoting clean water. The SW-LEA program is effective in reducing or

eliminating storm water pollution because it keeps illegally dumped materials out of the storm water system and watersheds.

Training: All staff are State Registered Environmental Health Specialists (REHS). Solid waste staff attended a CIWMB/LEA conference promoting coordination between various state oversight boards, such as air, water and solid waste. The topics centered on solid waste facilities and how the public and the environment can be better protected from the impacts of these facilities and the improper or illegal disposal of solid waste. There were presentations relating to illegal dumping abatement as well as coordinating efforts with the Water Boards or Fish and Game, since local inspectors are their eyes and ears out in the field. Additional training is received in hazardous waste recognition and load checking procedures at our solid waste facilities. Program staff also attend the Solid Waste Technical Advisory Committee meetings addressing a wide range of issues regarding solid waste and recycling including storm water run-off and public education. Also, Senior staff from DEH attend the DA Task Force for abating nuisance properties covering several jurisdictions.

Memorandum

July 28, 2009

To: Stormwater/Urban Runoff P2 Staff

From: Wendy Fong
Household Hazardous Waste Program
County of Santa Clara

Re: Fiscal Year 2008-2009 HHW Program Update

Participation
The HHW Program served 30,037 residents from July 1, 2008 through June 30, 2009. Over 3 million (3,243,242 lbs) pounds of hazardous waste was managed safely and legally. There were a total of 59 collection events: 43 at two permanent facilities and 16 at temporary sites strategically located throughout the County. In addition, the Program served 464 small business drop-offs including local governments, Goodwill Industries, and the Salvation Army.

Paint
Latex paint accounted for 1,093,060 pounds and other paint related materials (including oil paint) accounted for approximately 1,026,380 pounds. Together, paint represents 65% of the hazardous waste collected.

Pesticides
The HHW Program collected 170,250 pounds of poison liquids, and 112,250 pounds of poison solids, and 1,000 pounds of Diazinon/Durasban.

UNIVERSAL WASTE

The County of Santa Clara Department of Environmental Health Household Hazardous Waste Program provides residents with opportunities to recycle mercury-containing products (fluorescent lights, batteries, and thermometers) at retail locations, community centers and special outreach events. These products contain varying amounts of mercury, a heavy metal, which is a U.S. Environmental Protection Agency waste minimization priority chemical. A community-based collection system is convenient, cost-effective and combined with an aggressive educational outreach program, will increase awareness and participation. Outreach includes the use of consistent educational messages through the media and the development and distribution of brochures, flyers and posters as well as literature and event attendance.

Mercury containing products collected in FY 2008-2009

Recycling partners were established at retail and community drop-off locations. These partners agreed to allow customers to drop-off household batteries and fluorescent lamps. To date 32 retail stores serve

as fluorescent lamp drop-offs and 66 locations serve as battery drop-offs. The HHW Program picks up and recycles the waste.

Elemental Mercury—570 pounds (includes thermostats, thermometers and other products)
Fluorescent Lamps – 104,549 pounds
Household batteries –113,490 pounds

For more than half of FY 2008-2009, we piloted a project where the recycling partners recycled on their own the compact fluorescent lamps (CFLs) collected from residents. This may explain the drop in volume of fluorescent lamps collected and recycled through the HHW Program in FY 2008-2009

Public Outreach

A total of 362 thermometers were collected from 5 thermometer exchange events where residents exchanged their mercury-containing thermometer for a free mercury-free one.

Participated in 27 community events.

December 30, 2008

Mr. Gary Rudholm
Senior Planner
SANTA CLARA COUNTY
70 West Hedding Street
San Jose, CA 95110

Re: 2008 SMARA Mine Inspection
Stevens Creek Quarry, #91-43-0007
Cupertino, California

Dear Mr. Rudholm:

This letter report summarizes the findings of Pacific Municipal Consultants' (PMC) annual SMARA site inspection of Stevens Creek Quarry, in Cupertino, CA Mine ID #91-43-0007 that was conducted on November 21, 2008. PMC was retained by Santa Clara County to assist County staff with the annual SMARA mine inspections, to provide written documentation of our observations, issues of concern and recommendations.

The 2008 annual SMARA inspection was conducted for 5 hours on the morning of November 21, 2008. In attendance along with myself were representatives of Stevens Creek Quarry and the Santa Clara County Planning and Engineering Departments. The disturbed acreage remained the same as before, approximately 47.8 acres on Parcel A and 75.3 acres on parcel B. The mine was active during the inspection (A). Reclamation (R) has begun in some areas. The weather during the inspection was clear (CR) and cool. The mine's office is located near latitude 37^0 17.785'N and longitude 122^0 05.071'W.

BACKGROUND

The Stevens Creek Quarry has operated since before the 1950's in the Stevens Canyon area to the southwest of the Town of Cupertino. The mine lies in a northwest trending canyon on the northeast of Monte Bello Ridge in the Santa Cruz Mountains. The access to the mine is off of Stevens Canyon Road, which runs along the west side of the Stevens Creek Reservoir and Stevens Creek County Park. Drainage from the mine flows east into Swiss Creek, which discharges into the reservoir.

The current mining operations encompasses two parcels, "Parcel A" on the southeast side and "Parcel B" on the northeast. In 1983 the County approved the Reclamation Plan that encompassed the mining areas on both Parcel A and Parcel B, this plan is still in effect. Most of the quarrying is now done on Parcel B where the crushing, screening and sorting operations occupy the floor of the pit. The land to the north, east and west side of Parcel B is undeveloped land owned by Lehigh (formerly Hanson) Cement's Permanente Quarry.

A recent amendment to the reclamation plan has been submitted and is still being processed by the County at the time of this 2008 annual inspection.

Parcel A is the southeastern portion of the mine and was the earliest mined portion and today contains most of the operations offices, shops and maintenance facilities. The County issued a Use Permit in 1990 for a concrete, asphalt, and soil recycling facility within Parcel A. The recycling operations are north of the main office.

A portion of the slopes along the northern mine boundary in Parcel A are cut to final grade consistent with the 1983 reclamation plan. These slopes have not been vegetated as required by the reclamation plan in part because stockpiles of recycled material are placed over the slope and partly because of the poor nutrient condition of the materials exposed in the cuts. Portions of the northern Parcel A slopes are vegetated with grasses for control of erosion. Active mining still takes place within Parcel A along with the approved recycling operations.

On October 10, 2006 the County issued a combined Notice of Violation/Order to Comply that required the operator address mining related disturbance outside the approved reclamation plan. This OTC required the operator to (1) provide the County with a plan drawn by a licensed surveyor or civil engineer identifying the boundaries of Parcels A and B; (2) begin the process of re-vegetating the 2.4-acre site referred to in a 15-day notice issued by the State's Office of Mine Reclamation; and (3) submit an application to amend its reclamation plan to incorporate all areas of disturbance.

The operator has submitted an amended reclamation plan that encompasses all currently disturbed areas, as well as addresses an apparent encroachment into the setback along the eastern boundary in Parcel B. This encroachment issue is being resolved in the amended reclamation plan through the incorporation of additional parcel of land which may be purchased from the adjacent property owner.

Re-vegetation of the 2.4 acre of slope along the northern boundary of Parcel A is ongoing. Two re-vegetation test plots are being established on the slopes to identify the most effective treatment for the soils and which plants will be most successful.

The boundaries of the mine operations in Parcels A and B have been identified and ground staked with flagging by a licensed surveyor.

SITE CONDITIONS

The northeastern portion of Parcel A is used for recycling concrete, asphalt and topsoil. Large stockpiles of these material are placed along the northern portion of the parcel boundary and partially bury the finished mine slope. A large stockpile of topsoil made from various soils brought onto the mine from offsite projects is being utilized at the northeast corner of Parcel A (Photo 1). The northern edge of the topsoil stockpile is naturally re-vegetated and partially overlies the edge of the previous Parcel A quarry (Photo 2).

The partially buried final cut slope along the northeastern boundary of Parcel A is exposed in the area adjacent to the gun club. The placement of recycled material against this slope has changed somewhat from the 2006 inspection, but still covers a portion of the toe (Photo 3). Seasonal grasses cover part of the exposed final slope and provide some erosion control. A small area at the west end of this slope has been disturbed and will require repair to create a finish grade (Photo 4). A recently set boundary marker can be seen near the post for the gate between the mine and the gun club (Photo 5).

There are a number of stormwater drains spaced throughout the recycling material operations area (Photo 6). These drains discharge into several small collection basins (Photos 7 and 9) and eventually discharge offsite from a southeastern basin adjacent to the mine entrance (Photo 8). A series of small stormwater basins runs along the northern edge of the main mine access road to collect and filter runoff from the road and western portions of Parcel A. These basins eventually drain into the southeastern basins shown in Photo 8. The southeastern basin discharges south off site into a small creek that drains directly into the Stevens Creek Reservoir (Photo 11).

Two re-vegetation test plots are being created in a 2.4 acre area of the northern finished slope northeast of the main lower lake in Parcel A (Photos 12, 13, 14 and 15). Process water for the operations is stored in a series of basins that run along the southern boundary of Parcel A and B. Two of these are in Parcel A, the lowermost lake being the largest (Photos 16 and 17).

The main active mining is being conducted in the western Parcel B in a northwest trending quarry that excavates bedrock. Most of the equipment for crushing and sorting rock materials is located on the floor of the quarry (Photos 18 and 29). Past annual inspections have noted a number of slope failures along the eastern highwall. Some of these failures have apparently encroached into the boundary setback (Photo 19). A recent purchase of a small parcel of land along the eastern boundary will alleviate this encroachment problem and will be included in the amended reclamation plan.

A thick layer of reddish brown overburden material is exposed in the upper slopes of the quarry (Photo 20). This material is less stable than the underlying bedrock

and is the source of many of the slope failures. Past inspections have noted placement of fill material in a drainage outside of the approved mine boundary above the western slope of the quarry (Photo 21). This fill material will be removed and the area re-vegetated as part of the amended reclamation plan.

To help alleviate the problem of overburden slope failures, the operator is removing the overburden soils in the northwest corner of the quarry and placing it in an engineered buttress that is being constructed in the northeastern corner of the quarry (Photos 22 and 23). This buttress will help support the quarry highwall and to provide temporary storage for the overburden materials. The final thickness of the buttress will be sufficient to meet stability requirements, but the amount of overburden available may require overbuilding this fill.

A perimeter road runs along the east and north edges of the Parcel B above the quarry highwall. This road provides access to the mining operations and also provides Pacific Gas and Electric Company access to its power lines. Maintenance of the road is jointly shared. The northern portion of the road running along the high tension tower lines appears to have been recently re-graded and the road now running on the east side of a small hill (Photo 28). This road is graveled and has high soil berms along the edges as a safety measure. A low point was made in the road just south of the small hill and a small break in the road berm allows runoff to drain to the east. This drainage runs down an unarmored slope and has caused slope erosion (Photos 24 and 25).

Past annual inspections noted offsite runoff over the northwestern slope in Parcel B. Recent grading of the perimeter road has corrected the offsite site runoff from the roadway (Photo 26). The small prism of road fill that has failed into the adjacent creek has not yet been mitigated due to the difficulty in getting equipment into the site (Photo 27). Removal of the overburden material in the northwest corner of the quarry will eventually lower the elevation of the perimeter road such that equipment can access the past slope failure.

VIOLATIONS

As discussed above in the background section, the October 10, 2006 Notice of Violation/Order to Comply identified four SMARA violations. At the time of this 2008 annual inspection three of the violations have been corrected to the County's satisfaction. The one outstanding violations is the continued disturbance outside of the approved mine boundary. This violation is being corrected through the operator's submittal of an amended reclamation plan and the purchase of an adjacent parcel of land that extends the mine lands further to the east. This SMARA violation will continue to be noted under the Other category of the annual inspection report until the amended reclamation plan is approved.

AREAS OF CONCERN AND ISSUES TO MONITOR

Re-vegetation of the final 2.4-acre slopes in Parcel A needs to be completed. The re-vegetation test plots should be monitored to evaluate what methods and which plants can be successfully established. Repair of the disturbed area in the northern Parcel A slope need to be undertaken.

Slope failures will likely continue in the upper portions of the quarry due to the overburden materials. Monitoring of the stability of the quarry highwalls should continue. The County should be notified immediately if new failures develop that might result in encroachment of the mining into or beyond the property line setback.

The County engineering department should inspect correction measures taken to control erosion from the runoff at the low point in the eastern perimeter/tower line road. Periodic inspection by the operator's representative should be done as part of the ongoing stormwater management plan.

FINANCIAL ASSURANCE

At the County's request, the mine operator submitted a revised financial assurance cost estimate (FACE) on December 17, 2008, following the 2008 annual field inspection. The FACE is under review. Following certification of the 2008 FACE the County will forward the calculations to OMR for review. The County expects this process to be complete by February 2009.

CONCLUSIONS AND RECOMMENDATIONS

Stevens Creek Quarry is in general compliance with SMARA, except for the ongoing disturbance of lands outside of the approved mine boundary. This issue is being addressed in the amended reclamation plan. The operator has taken steps to either correct the other violations (staking boundaries and revising FACE), or is beginning the process to remedy the violation (establishing re-vegetation test plots). The following tasks should be undertaken to control potential erosion on the site.

Erosion control mitigations are needed in the area where the runoff from the low point in the eastern perimeter road discharges. It is recommended that either (1) straw bale(s) be placed at the break in the east-side road berm in order to trap large size particles and a rock lined chute be constructed down the slope that direct runoff into a natural swale; or (2) a drainage structure, or similar device, be placed at the low point that directs runoff into the quarry taking care to prevent erosion of the quarry slope. In addition, silt fencing should be place at the base of the side cast material to trap raveling soils.

The buttress fill being placed in the northeast corner of the quarry should be hydroseeded as soon as possible to prevent erosion of the slope. The operator should also hydroseed the road berms along the eastern and northern perimeter road as well as any areas along the roadway that drain outward from the mine where bare sidecast soils still occur from re-grading of the road.

LIMITATIONS

Our services are limited to providing professional opinions and recommendations made in accordance with generally accepted engineering geology principles and practices. No warranty, expressed or implied, of merchantability or fitness, is made or intended in connection with out work, by our proposal for consulting or other services, or by our oral or written reports or findings. Our services have been limited to review of the reclamation plan as provided by the County, review of previous available annual SMARA inspection reports, visual field inspections, discussions with the County and operator staff, and the preparation of this letter report.

If you have any questions please feel free to contact me at (530) 750-7076 or e-mail me at kcustis@pmcworld.com.

Re: 2008 SMARA Mine Inspection
Serpa Quarry, 91-43-0002
Milpitas, California

Dear Mr. Rudholm:

This letter report summarizes the findings of Pacific Municipal Consultants' (PMC) annual SMARA site inspection of Raisch Products' Serpa Quarry, CA Mine ID #91-43-0002 that was conducted on November 17, 2008. PMC was retained by Santa Clara County to assist County staff with the annual SMARA mine inspections, to provide written documentation of our observations, issues of concern and recommendations.

The 2008 annual SMARA inspection was conducted for 2.5 hours on morning of November 17, 2008. In attendance along with myself were representatives of Raisch Products and the Santa Clara County Planning and Engineering Departments. The disturbed acreage remained the same as before, approximately 51.8 acres. Mining has essentially been completed at the site and the site was not active during the inspection (AD), but stockpiled material will be sold if there is a need. Reclamation (R) has been ongoing for several years. The weather during the inspection was clear (CR) and cool. The mine is located around latitude 37^0 26.957'N and longitude 121^0 52.263'W.

BACKGROUND

This surface mine was operational prior to the 1970's, and mining has continued through 2006. It appears that the entire excavated portion of the site has been worked since 1976. The final grades shown in the approved Reclamation Plan (Ruth and Going, 1984) have not been achieved, and significant additional excavation would be required to achieve them. The operator advised the County that the property owner is preparing to shut the mine down in the near future to pursue other uses of the land. The current land use for the reclamation plan is open space.

The County issued a Use Permit to allow a recycling facility to process concrete, soil, asphalt, and glass on the site. Locating this type of recycling facility at existing quarries is in keeping with County policy and zoning regulations. The property abuts the western boundary of Ed Levin County Park.

SITE CONDITIONS

The mine site is located on the north side of Old Calaveras Road east of the Town of Milpitas. The entrance to the mine operations is near the nearly level southern portion of the operations with the office and two stormwater ponds (Photos 1 to 3). North of the mine entrance is a fill slope that has recently been graded and seeded for erosion control (Photo 1). The two stormwater ponds receive runoff from the northern portion of the mine through a series of drains, culverts and open ditches. The smaller final stormwater pond has recently been cleaned out (Photo 3). The primary stormwater pond receives periodic cleanouts and at the time of our inspection was adequately maintained (Photo 2). The primary stormwater pond is partially full and used as a water source for the water trucks. The final stormwater pond discharges to the south into an adjacent creek that runs between the south edge of the mine and the county road.

Reclamation of the mine has begun, but the final grade of the mine will be altered from the approved plan because much of the site will no longer be excavated. The two previous annual inspection reports noted over steepened slopes in the quarry. A geotechnical report by Cleary Consultants designed a buttress fill that will be placed to support the over steepened quarry slopes. The keyway for the fill has been placed (Photo 4). A back drain was placed behind the keyway and tied into an additional drain that extends uphill to the former spring area. Material being used to create the buttress consists of onsite stockpiles, some of which are mixed with broken recycled glass (Photo 5), and soils to be brought on site in the future. There is ongoing fill placement to create the final slopes as material becomes available along with engineering compaction testing. Both backdrains discharge into a storm water collection box that eventually leads to the primary stormwater pond (Photo 6). The mixed crushed recycled glass and soil is placed within the interior buttress.

The final grading of the mine will require that portion of the slopes along the northern boundary be graded back to a slope of 2H:1V (Photo 7), and compacted fill will be place between the two existing knobs to create a uniform slope face (Photo 8).

VIOLATIONS AND ISSUES OF CONCERN

No SMARA violations were noted during the 2008 annual site inspection, which is consistent with the 2007 and 2006 inspections.

AREAS OF CONCERN AND ISSUES TO MONITOR

Issues of concern from 2007 annual inspections have been either fully mitigated (sedimentation pond cleanout, haul road removed, mixing of recycled glass with soil) or mitigation is ongoing (placement of buttress fill).

The slope that runs along the southern boundary of the mine site and south of the office and stormwater ponds appears to be made of fill. The grade of the slope is steeper than 2H:1V, measure in one location at 1.5H:1V (Photo 9). The approximate date of placement of this slope should be determined to decide whether it is pre-SMARA or not. If it is not a pre-SMARA slope, the operator

should have their geotechnical consultant evaluate the stability of the slope and provide a report documenting that the long-term stability is suitable for the end land use.

FINANCIAL ASSURANCE

The mine operator submitted a FACE to the County on November 20, 2008. The calculations show the financial assurance should be $287,074.05, which is less than the amount currently provided through the mine operator's bond of $288,288,821.00. This FACE is under review and the County will consult with OMR regarding the adequacy of the calculations.

CONCLUSIONS AND RECOMMENDATIONS

The Raisch Products Serpa Quarry reclamation effort is ongoing. Oversight of the buttress construction should continue by the geotechnical consultant. Maintenance work on the stormwater ponds should continue as needed to maintain capacity and free flow. Research should be done by July 1, 2009 into the age of the fill slope adjacent to the office to determine whether the slope is pre-SMARA. If the slope is post-SMARA, then an analysis of the long-term stability should be conducted by the operator's geotechnical consultant and submitted to the County for review before the 2009 annual inspection.

LIMITATIONS

Our services are limited to providing professional opinions and recommendations made in accordance with generally accepted engineering geology principles and practices. No warranty, expressed or implied, of merchantability or fitness, is made or intended in connection with out work, by our proposal for consulting or other services, or by our oral or written reports or findings. Our services have been limited to review of the reclamation plan as provided by the County, review of previous available annual SMARA inspection reports, visual field inspections, discussions with the County and operator staff, and the preparation of this letter report.

If you have any questions please feel free to contact me at (530) 750-7076 or e-mail me at kcustis@pmcworld.com.

Re: 2008 SMARA Mine Inspection
Polak Serpa Quarry, 91-43-0005
Morgan Hill, California

Dear Mr. Rudholm:

This letter report summarizes the findings of Pacific Municipal Consultants' (PMC) annual SMARA site inspection of Graniterock Company's Polak Quarry, CA Mine ID #91-43-0005 that was conducted on November 20, 2008. PMC was retained by Santa Clara County to assist County staff with the annual SMARA mine inspections, and to provide written documentation of our observations, issues of concern and recommendations.

The 2008 annual SMARA inspection was conducted for two hours on morning of November 20, 2008. In attendance along with myself were representatives of Graniterock, Rand Creek Habitat Restoration, Santa Clara County Parks and Recreation and the Santa Clara County Planning Department. The disturbed acreage remained the same as before, approximately 64.9 acres. Mining has been completed at the site (MC) and reclamation (R) has been ongoing for several years. The weather during the inspection was clear and cool. The mine is located around latitude 37^0 10.585'N and longitude 121^0 41.093'W.

BACKGROUND

The Polak mine is located adjacent to Coyote Creek in the Coyote Valley area of southern Santa Clara County. The site has been mined since the 1950's. Santa Clara County Parks Department has purchased the property and leased the quarry to Graniterock. West side of the mine site, Phase I, was reclamation in 1992. The reclaimed area suffered damage by storm runoff on Coyote Creek in the late 1990's. Bank repairs, stabilization and re-vegetation to repair Phase I storm impacts were done under a FEMA grant.

The eastern area, Phase II, was mined until 1995. An amended reclamation plan for Phase II was approved in 2003. This amendment changed the mine's end use from recreational park land to primarily habitat preservation. The purpose of the ponds is to provide high quality wildlife habitat. Ongoing reclamation on the Phase II includes vegetation monitoring and site cleanup.

Reclamation of Phase II included re-grading of the site to create fill slopes along the edges of the eastern ponds, Ponds B, C, and D. The reclamation plan called for slopes to be 2H:1V, but actual grading created mostly 2.5H:1V, in according with a permit issued by the Army Corp of Engineers. At the water line of the ponds, which fluctuates with the amount of underflow, slopes are locally near vertical due to wave erosion. The reclamation of the pond shoreline slopes has placed vegetation that once mature will create a dense riparian barrier and prevent easy access to the shore. A wooden fence has also been placed along the visitor paths to help control access to the ponds.

SITE CONDITIONS

The Polak Quarry Phase II area appears ready to be beginning the approval process for being deemed reclaimed. Issues of concern raised during previous annual inspections have been mitigated. Specifically, the two open test pits in the seasonal wetlands area have been filled, the cracks in the bike trail are sealed and show no signs of widening (Photo 1), and all unnecessary equipment has been removed from the site.

As noted in previous site inspections, areas surrounding the Phase II mining operations have been previously mined, but they are being left to reclaim naturally in part because of environmental restrictions by the Army Corp of Engineers, Fish and Game and the County. These areas have in general re-vegetated naturally and now provide habitat for wildlife, some of which is endangered. Pond A on the west side of the access road was reclaimed by filling in the mined pit and re-vegetating (Photo 2). The other pits that were excavated below the level of the groundwater underflowing the Coyote Creek valley are now ponds providing habitat (Photos 3 and 4).

The inclination of the slopes surrounding the ponds above the waterline appears to conform to the specifications of reclamation plan, being 2H:1V or shallower. As noted in previous annual inspections, Fish and Game prohibited reducing the grade of slopes below the water line. The over steepened slopes present a minor erosion problem whenever the water level drops to expose the slopes due to wave erosion (Photo 5). As the shoreline willows mature they will eventually mitigate most of this erosion. Fencing now prevents public access to the shoreline (Photo 6) and eventually the mature willows will thicken creating a riparian barrier.

The vegetation established across the Phase II mining area and along the perimeter of Ponds B, C and D met the success criteria required by the 2002 Final Revegetation Plan according to a September 2, 2008, *Final Monitoring Report for the Polak Quarry Reclamation Site, San Jose, CA*, prepared by Rana Creek Habitat Restoration. The area northwest of Pond D was the borrow area for fill placed in Pond A and is re-vegetated with grasses and trees (Photo 7). The Rana Report recommends extending the irrigation of several plants through next summer, sycamores, and more recently planted oaks and many willows. The manifolds and belowground portions of the irrigation system will be left in place for future use by County Parks Department. Manifolds are marked with T-bar posts to prevent vehicle damage and ease of locating (Photo 8).

A seasonal wetlands area was created in the northeastern portion of the mine and several stockpiles were left in place rather than re-graded because they had become established habitat (Photo 9). Wetland flood seasonally as the level of groundwater rises and then dries out during the summer months.

The Rana Creek report notes that nearly all of the maintenance requirements have been met and provide recommendations for alternative maintenance procedures for those that can no longer be applied. Specifically, the control of yellow star-thistle that occurs within most of the planting areas. The initial proposal for control was to use recurring mowing during the summer, but due to a fire prevention agreement between Santa Clara County and the California Department of Forestry and Fire Protection, this practice was ceased. The Rana Creek report recommends as an alternative that the Graniterock work with the County Department of Parks and Recreation, the landowner, to include the site in their biological control program as control of star-thistle will be an ongoing maintenance requirement following completion of reclamation.

Graniterock has upgraded the wellhead on the site by improving the tanks and fencing (Photo 10). This equipment feeds the irrigation system that will be left in place for use by the County Department of Parks and Recreation, the landowner.

The larvae of a metallic wood-boring beetle are attacking willows and coyote brush in the reclaimed area (Photo 11). The damage is widespread and there is no practical chemical control at this time. A parasitic wasp that preys on the larvae may eventually provide control.

VIOLATIONS AND ISSUES OF CONCERN

No SMARA violations were noted during the annual site inspection, which is consistent with the 2007 and 2006 inspections. Issues of concern from previous inspections have been essentially mitigated.

FINANCIAL ASSURANCE

A 2008 financial assurance cost estimate (FACE) was submitted to the County on November 21, 2008 for the fifth and final year of reclamation. This FACE shows that reclamation tasks are complete and the cost estimate is zero dollars. Although the 2008 FACE is not yet certified, the County will schedule a field review with OMR staff in 2009 to discuss consideration of deeming the mine reclaimed. The 2008 FACE will be certified or revised following the County's meeting with OMR.

CONCLUSIONS AND RECOMMENDATIONS

The Graniterock's Phase II Polak Quarry reclamation effort appears to be nearing completion. Some additional maintenance work is needed in continuing the irrigation of some plant species. Coordination is needed with the County Parks and Recreation Department to include the site in their yellow star-thistle control program.

LIMITATIONS

Our services are limited to providing professional opinions and recommendations made in accordance with generally accepted engineering geology principles and practices. No warranty,

expressed or implied, of merchantability or fitness, is made or intended in connection with out work, by our proposal for consulting or other services, or by our oral or written reports or findings. Our services have been limited to review of the reclamation plan as provided by the County, review of previous available annual SMARA inspection reports, visual field inspections, discussions with the County and operator staff, and the preparation of this letter report.

Re: 2008 SMARA Mine Inspection
Permanente Quarry, 91-43-0004
Cupertino, California

Dear Mr. Rudholm:

This letter report summarizes the findings of Pacific Municipal Consultants' (PMC) annual SMARA site inspection of the Permanente Quarry in Cupertino, CA Mine ID #91-43-0004 that was conducted on December 9, 2008. PMC was retained by Santa Clara County to assist County staff with the annual SMARA mine inspections, to provide written documentation of our observations, issues of concern and recommendations.

The 2008 annual SMARA inspection was conducted for 6 hours on the morning and afternoon of December 9, 2008. In attendance along with myself were representatives of Lehigh Southwest Cement Company (Lehigh) and the Santa Clara County Planning and Development Department. The disturbed acreage remained the same as the 2007 inspection, approximately 523.4 acres. The mine was active during the inspection (A). Reclamation (R) has begun in some areas. The weather during the inspection was clear (CR) and cool. The mine's office is located near latitude 37^0 18.945'N and longitude 122^0 05.454'W.

BACKGROUND

The Permanente Quarry is a limestone and aggregate mining operation located on the north side of Permanente Creek west of the Town of Cupertino. The Permanente Quarry is owned by Hanson Permanente Cement, Inc. (HPC) and operated under contract with HPC by Lehigh. Mining began in the area around 1903, with the most recent operations beginning in 1939 on a 1300-acre site by Kaiser Cement Corporation (then known as The Permanente Corporation), HPC's predecessor in interest. In 1987, Hanson PLC acquired Kaiser Cement Corporation. The name of the operating company was changed in 1999 from Kaiser Cement Corporation to Hanson Permanente Cement, Inc. HeidelbergCement Group acquired HPC and its affiliates in 2007, and in 2008 Lehigh assumed operational responsibilities for the Permanente Quarry and the associated cement plant.

The County adopted the currently approved reclamation plan for the quarry site in 1985. The reclamation plan covers the open pit and the material storage area, an area of approximately 330 acres. The approved reclamation plan does not include all areas of past mining disturbance. For example, the 1985 reclamation plan does not include a rock plant to the southeast of the mining pit or access roads throughout the site. The reclamation plan also does not extend to the nearby cement plant operations. The cement plant was, and continues to be, operated under a Use Permit originally issued on May 8, 1939 by the County that authorizes the "erection, construction and operation of a cement mill and the storage of cement… " The permit was issued consistent with 1937 zoning, under which commercial and manufacturing uses were allowed. The permit has no termination date. According to Lehigh, the cement plant has operated continuously since its inception and is estimated to account for approximately 70 percent of the cement used in Santa Clara County and 50 percent used in the San Francisco Bay Area. The County considers the exclusion of these areas to be consistent with SMARA's requirements as they were interpreted at the time the 1985 reclamation plan was approved. An August 23, 2007 letter from the Department of Conservation's Office of Mine Reclamation confirmed that the cement plant is not part of the Permanente mining.

In 1972, the County recorded a "Ridgeline Protection Easement" (RPE) along the ridgeline above the northern pit highwall to mitigate potential visual impacts by maintaining a natural slope appearance without disturbance of the natural vegetation. The operator at that time, Kaiser Cement, agreed that they "would not lower the ridgeline … for mining, quarrying or other purposes," and that they would install four fixed monuments on the ridgeline. The easement would also include a 25-foot wide planting strip.

The northern highwall of the open pit has developed three large rockslides. "Main Rockslide" the oldest area of slope instability is located on the northwest pit slope and is approximately 500 to 1000 feet wide. This rockslide was called the "1987 Rockslide" in the 2006 and 2007 annual SMARA inspection reports. Following a period of increased movement in 1987, this slide was considered a safety hazard for workers and threatened to disturb the RPE. The County has allowed corrective grading to remove material at the head of the slide. A second slide began in January 2001 with the failure of an approximately 350 foot wide section of the northwest pit slope to the east of the Main Rockslide. This slide is known as the "Scenic Easement Rockslide." A third slide occurred at the end of 2001 in the northeast portion of the pit slope that was approximately 400 to 500 feet wide and extended head ward into a portion of the adjoining Midpeninsula Regional Open Space District's Rancho San Antonio Preserve. According to the operator, a land swap has been negotiated (but not yet closed) that will allow the mine to take possession of the impacted land. This slide is known as the "Mid-Pen Rockslide."

In October 2006, the County issued an Order to Comply and Notice of Violation to the operator for mining related disturbances outside of the approved reclamation plan with the exception of the cement plant. The NOV required that the operator submit an amended reclamation plan that addresses the instability in the pit, encompasses all mining-related areas including the rock processing facility south of the cement plant. In January 2007, the operator submitted the required amendment to the County, which is being processed. The reclamation plan amendment is designed to address mining activity over the next 25-years. As part of this amendment, the operator's geotechnical consultant is evaluating the stability of the pit walls and the overburden disposal sites. The County has agreed to allow the operator's consultant 24 months to complete the geotechnical work. Parties anticipated that the amended reclamation plan would be approved in 2011. Until the CEQA process for the amended

reclamation plan is complete and the reclamation plan approved, SMARA violation for slope stability and disturbances outside of the reclamation plan will continue to be noted in the annual report.

SITE CONDITIONS

Overburden material from the quarry is being deposited in the western portion of the mine site on what is called the West Material Storage Area (WMSA), identified as Area A in the approved reclamation plan. The overburden slopes are undergoing re-grading to flatten their gradient to less than 2H:1V. The northern portions of the WMSA that are visible to the urban area below are being re-graded and re-vegetated (Photos 1 through 5). The easternmost portion of the northern slope has recently been re-graded and hydroseeded for erosion control. At the toe of this area there appears to be a small closed depression that may trap runoff. This depression should be evaluated and if necessary re-graded to prevent ponding. The portion of the overburden designated as the topsoil storage area has now been signed to warn drivers not to disturb the area, which corrects a previous violation.

The southern slopes of the WMSA abut a portion of the mine that is considered pre-SMARA (Photo 6). The operator's geotechnical consultant is evaluating the final slope configuration in this area and is aware that the post-SMARA stockpiles should not cause the pre-SMARA slopes to fail or erode. A horizontal setback from the top of the pre-SMARA slope will likely be needed to ensure their stability. Running across the pre-SMARA slopes is an old unpaved road that is not used in the current operations. A low point in this road causes runoff to discharge over the slope and appears to create a sedimentation problem for Permanente Creek (Photo 7).

In order to address the issue of the lack of topsoil for re-vegetation of the site, the operator is beginning a series of re-vegetation test plots to evaluate various soil treatments to determine what procedures are necessary for successful re-vegetation. One of these test plots is located in a flat area southeast of the WMSA (Photos 8 and 9). On the slope to the south of this flat test plot is a water distribution box and pipe that takes water pumped out of the pit and discharges it to a pond adjacent to Permanente Creek where it infiltrates (Photo 10). The infiltration pond is within an area of pre-SMARA disturbance. However, the current activities related to ongoing mining will bring a portion of this area into SMARA and this area is included in the amended reclamation plan, which is being processed by the County.

As discussed above, the northern highwall of the pit has had three large rockslides. The northeastern slide is called the Mid-Pen Rockslide and extends approximately half way down the highwall (Photo 11). The other slides are on the northwestern portion of the highwall. The easternmost slide, the Scenic Easement Rockslide, extends down slope approximately as far as the Mid-Pen Rockslide (Photo 12). This rockslide lowered the ridgeline contrary to the 1972 RPE and is being addressed in the reclamation plan amendment. The largest slide, the Main Rockslide, appears to extend across most of the current height of the northwestern highwall. During the 2008 inspection, the County geologist, James Baker, noted ongoing movement of a landslide on the western side of the pit. This area of movement was noted by Golder and Associates in their November 2007 Slope Stability Evaluation report and may extend below the toe of the eastern slope of the WMSA overburden stockpile (in the background area of Photo 9). Mr. Baker referred to this landslide as the "Haul Road Slide."

Rain that falls in the pit area collects in the bottom and is pumped out using a series of pumps, and this water is then used for dust control or discharged to the infiltration pond along the north side of Permanente Creek (Photos 13 and 10).

Past practices for handling overburden material included disposal in an area to the east of the pit that is outside of the reclamation plan boundary. This is called the East Material Storage Area (EMSA) and lies east of the previous Area C overburden area. The operator has created a lined drainage ditch to convey stormwater runoff into existing holding ponds in the cement plant site (Photos 14 and 15). A second re-vegetation test plot has been established on the north face of the EMSA to evaluate various soil treatments necessary for re-vegetation of slopes (Photo 16). Other slope areas of the EMSA have been recently hydroseeded for erosion control (Photo 17). The previous Area C overburden disposal site is visible to the west of the test plots and appears to have re-vegetated consistent with the surrounding native vegetation (Photo 18).

VIOLATIONS

As discussed above in the background section, violations of SMARA continue for slope stability, both the pit highwalls and the overburden stockpiles, and disturbances outside of the reclamation plan, the EMSA and the south rock processing area. At the time of this 2008 annual inspection, the violation for not signing the topsoil storage pile has been corrected to the County's satisfaction. The slope stability violation is partially being corrected through the re-grading of a portion of the WMSA slopes to a grade of approximately 3H:1V and re-vegetating. Re-grading of the slopes is ongoing. The operator's geotechnical consultant's study will address the final slope angle and stability of these fill slopes. Disturbances outside of the reclamation plan are being addressed in the amended reclamation plant, but until the amended plan is approved, these SMARA violations will continue to be noted.

AREAS OF CONCERN AND ISSUES TO MONITOR

Continue monitoring the WMSA for stability and erosion control. Evaluation of the potential ponding area at the toe of the easternmost portion of the WMSA's northern slope to ensure that it properly drains.

Monitor rockslides in pit's northern highwall, notify county if new landslides occur or the existing rockslides enlarge, particularly further into the RPE

Monitor re-vegetation test plots and report regularly to the County.

Evaluate runoff from the roadway running across the southern pre-SMARA area and implement mitigation measures, if necessary, under the mine's SWPPP to prevent sediment discharge to Permanente Creek.

FINANCIAL ASSURANCE

The operator submitted a financial assurance cost estimate (FACE) to the County in April 2008. The County certified this FACE and forwarded the calculations to the State Office of Mine Reclamation (OMR) for review. The County received an increased financial assurance (FA) from the operator for the amount of $9,208,771.00. In a letter dated June 27, 2008, the OMR determined the amount required under the FACE to be appropriate and requested a copy of the increased FA. The County forwarded a copy of the FA to OMR with a letter dated July 7, 2008. No further calculations are required of the operator at this time.

CONCLUSIONS AND RECOMMENDATIONS

Permanente Quarry is in general compliance with SMARA, except for the stability of the rockslides in the pit and rock storage piles, and disturbance of lands outside of the approved mine boundary. These issues are being addressed in the amended reclamation plan. The operator has taken steps to either correct the other violations (beginning the re-grading and re-vegetating the WMSA rock storage, signing the topsoil stockpile, and erosion control measures in EMSA), or is beginning the process to remedy the lack of topsoil by establishing re-vegetation test plots. The following tasks should be undertaken to control potential erosion and maintain slope stability on the site.

Re-grading and re-vegetation of the perimeter slope of the WMSA rock storage pile should continue.

Re-grading of the toe of the slope in the easternmost portion of the northern WMSA rock storage pile to prevent potential ponding of runoff.

The operator's geotechnical consultant should evaluate the long-term stability of the south side of the WMSA rock storage pile giving consideration the to presence of the pre-SMARA waste piles along the toe of the slope.

The potential sedimentation to Permanente Creek from the road across the southern pre-SMARA waste piles should be evaluated and mitigated if necessary. The operator should contact the California Department of Fish and Game for consultation, as well as the San Francisco Bay Regional Water Quality Control Board, to determine whether the issue falls under their jurisdictions.

The progress of the re-vegetation test plots should be regularly reported to the County.

The drainage ditches constructed in EMSA rock storage area should be monitored and repaired as necessary.

The operator's geotechnical consultant should provide a letter that evaluates the status of the Haul Road Slide, describes any future studies that will be undertaken to assess the extent and condition of the slide, and makes recommendations, as necessary, for modification of the slide mass or the WMSA to ensure long-term stability.

LIMITATIONS

Our services are limited to providing professional opinions and recommendations made in accordance with generally accepted engineering geology principles and practices. No warranty, expressed or implied, of merchantability or fitness, is made or intended in connection with out work, by our proposal for consulting or other services, or by our oral or written reports or findings. Our services have been limited to review of the reclamation plan as provided by the County, review of previous available annual SMARA inspection reports, visual field inspections, discussions with the County and operator staff, and the preparation of this letter report.

If you have any questions please feel free to contact me at (530) 750-7076 or e-mail me at kcustis@pmcworld.com.

San Jose, CA 95110

Re: 2008 SMARA Mine Inspection
Lexington Quarry, 91-43-0006
Los Gatos, California

Dear Mr. Rudholm:

This letter report summarizes the findings of Pacific Municipal Consultants' (PMC) annual SMARA site inspection of West Coast Aggregates' Lexington Quarry, in Los Gatos, CA Mine ID #91-43-0006 that was conducted on November 20, 2008. PMC was retained by Santa Clara County to assist County staff with the annual SMARA mine inspections, and to provide written documentation of our observations, issues of concern and recommendations.

The 2008 annual SMARA inspection was conducted for 2.5 hours on the afternoon of November 20, 2008. In attendance along with myself were representatives of West Coast Aggregates, and the Santa Clara County Planning and Development Department. The disturbed acreage remained the same as before, approximately 47.6 acres. The mine was active during the inspection (A). Reclamation (R) has occurred in some areas. The weather during the inspection was cloudy (CL) and cool. The mine's scale house is located near latitude 37^0 12.125'N and longitude 121^0 57.821'W.

BACKGROUND

Lexington Quarry is located south of the town of Los Gatos and straddles a northeast tributary of Limekiln Creek in the Santa Cruz Mountains. Mining at the Lexington Quarry began in 1962 and has been operated continuously since then by several mining companies. West Coast Aggregates took over the operation in 1989. Mining started with the northwest side or "west face." The mine has expanded across the canyon to the "east face" creating benched highwalls on both sides. The mining is complete on the upper eight benches of the west face and the County accepted reclamation of this portion in 1995. Today mining is active only on the east face, although the lower two benches of the west face, 9 and 10, will be mined in the future as the depth of the pit progresses.

The California Department of Conservation's, Office of Mine Reclamation (OMR) identified in 2005 several SMARA violations and issues of concern regarding Lexington Quarry. OMR noted that the mine has disturbed areas outside of the reclamation plan boundaries, there might be a potential impact

1590 Drew Ave, Suite 120 • Davis, CA 95618 • P: (530) 750-7076 • F: (530) 750-2811

of mining on local groundwater supply, the financial assurances were inadequate, several slopes within the reclaimed and active mining areas appeared unstable, and poor re-vegetation in the reclaimed areas.

Following these findings by OMR, Santa Clara County issued an Order to Comply/Notice of Violation to West Coast Aggregates on October 10, 2006. In this order the operator was directed to complete the following:

1. Prepare and submit a revised, comprehensive, detailed, engineered reclamation plan.

2. Provide an engineered site plan with staking of the site to be monitored in future inspections.

3. Modify the Use Permit and Reclamation plan to address (a) potential impacts to ground water, (b) slope stability, and (c) an evaluation of the extent of reclamation on the west face.

4. Provide an increased Financial Assurance mechanism related to reclamation that includes financial assurances for mitigating the potential effect of mining on an adjacent property owner's domestic well.

The County of Santa Clara is processing an application for an amendment to the existing reclamation plan, along with renewal of the Lexington Quarry Use Permit. The permit and reclamation plan proposals include the existing and expanded mine area and evaluate the potential groundwater impacts from mining, stability of the mine slopes, evaluation of the extent of reclamation on the west face.

Increased Financial Assurances were submitted to the County prior to the 2007 annual inspection. The Financial Assurance Cost Estimate was revised to cover expansion of the mining area, and potential effects of mining on adjacent property owner's domestic well.

As part of the amended reclamation plan, the operator's engineering consultant, Ruth and Going, Inc., has provided an up to date site plan, dated August 2006, and staked the site's boundaries.

A geotechnical report was prepared by the operator's consultant, Cleary Consultants, dated August 2006, that addressed the issue of the mine's slopes. The report recommended that additional benches and a reduction in slope angle are necessary in the slope above drainage basin no. 2 at the southwest corner of the mine site to create a stable slope.

A "lot line adjustment" was required to move the existing mine boundary in order to obtain sufficient lands to allow for the required re-grading to the southwestern slope above basin no. 2. The process for making the lot line adjustment has been completed and a final action regarding the adjustment will be taken when a final action regarding the use permit is made.

The 2007 annual SMARA inspection report ordered the operator to stop moving loose, processed fines over the edge of the benches on the east face because this process is not part of the approved reclamation plan. During the 2008 annual inspection it appears that the operator has complied with this requirement, and has hydroseeded the slope surfaces as an erosion control measure.

The 2007 annual report also required that the operator's geotechnical consultant evaluate the stability of the loose, processed fines on the slopes and provide recommendations regarding this material. A report was submitted by Cleary Consultants, Inc., dated May 27, 2008, that stated the process fines were no longer being placed over the slopes, that a program for removal of material that slid down the slopes is being implemented, and will continue throughout and five years following cessation of active mining.

The 2007 annual report also noted that portions of the cut slopes in the east face area exceed the maximum slope angle specified in the approved reclamation plan and required that the operator's geotechnical consultant evaluate and provide recommendations for the portion of the east face that locally exceed the approved 1H:1V inter-bench slope angle, and to include recommendations for reducing the slope angles. Cleary Consultants submitted a geotechnical report, dated January 12, 2009, that evaluated the stability of the oversteepened east face slopes. Cleary's report concludes that the stability of these east face slopes has not been significantly affected and that the slopes meet the required minimum factors of safety. The County has review this report, and finds that it adequately addresses the issue and satisfies the 2007 annual inspection requirement.

SITE CONDITIONS

Lexington Quarry is sited in a northeast trending tributary canyon of Limekiln Canyon south of the town of Los Gatos. Mining on the northwest side of the canyon, called the "west face" is completed down to the current operating elevation. A series of benches with approximately 1H:1V inter-bench slopes have been cut into the west face bedrock. The upper eight benches on the west face are considered reclaimed by the County. The lower two benches, 9 and 10 are still considered part of the active mining operation. The main area of mining is on the southeast side, called the "east face" where quarrying above the upper three benches is complete and reclamation has begun (Photo 1).

The reclaimed slopes and benches of the west face appear to have remained grossly stable, but there are a number of localized slope failures that include rockfalls, wedge failures, topples and rock slides (Photo 2). The southwest portion of the west face is an over-steepened, un-benched slope that is outside of the currently approved mine boundary (Photo 3). Several patches of pampas grass, which should be considered a noxious weed, were observed on the west face slope. The amended reclamation plan provides additional measures that will be taken on the southwest portion of the west face and for the lower west face benches during final reclamation.

At the southwestern end of the west face the quarrying has extended outside of the approved mine area creating a high and steep cut in bedrock next to the three stormwater basins that are across from the scale house. Talus from small rockfalls and soil slips continues to build up at the toe of this slope (Photo 4), which is contained by the stormwater basins. Basin no. 2 was recently reconstructed using engineered fill (Cleary Consultants, September 6, 2007). Some distress in the re-constructed basin embankment was observed during the 2008 inspection. The embankment between basin no. 2 and the upper basin no. 1 has slid or washed out in several places on the basin no. 2 face, mostly on the west side nearest the cut slope (Photo 5). It does not appear that this is being caused by overtopping of the berm, but instead may be caused by runoff from the adjacent cut slope discharging over the face of the fill. Following the 2008 annual inspection, the operator took corrective measures to mitigate this erosion by placing a temporary diversion berm to control runoff and large stones around the overflow

pipe, see December 12, 2008 letter from R. DeAtley. This effort was overseen by the Cleary Consultants and documented in a January 12, 2009 letter.

The embankment on the east side of the basin no. 2 has a linear crack running along the top of the basin side suggesting that there has been some settlement or movement in the fill (Photo 6). This condition should be watched for sign of increased movement. The last of these three basins, no. 3, was dry during the site inspections with a minor amount of sediment deposited, but appears adequate for the current season.

On the east side of the quarry floor behind the scale house is another series of sediment control basins. The fill embankment between the uppermost and next basin shows signs of erosion and slips on the downstream embankment. (Photos 8 and 9). Following the 2008 annual inspection, the operator took corrective measures to mitigate this erosion and placed granular material on the damaged slopes, a clay slurry trench was created to stop seepage, and large stones around the overflow pipe, see December 12, 2008 letter from R. DeAtley. This effort was overseen by the Cleary Consultants and documented in a January 12, 2009 letter.

Fine-grained materials obtained from washing the crushed rock are deposited in the northern portion of the quarry floor around the south and east sides of a sedimentation basin (Photo 10). The material is placed in a wet condition and allowed to drain (Photo 11). This material was previously placed on the upper three benches and faces of the east slopes as they were being reclaimed. As a result of the 2007 annual inspection the practice of placing these fines on the face of the slopes has ceased.

The watershed that lies north of the quarry drains through the quarry floor through by way of buried culverts. At the north end of the quarry floor there is a stormwater basin that combines runoff from an eastern tributary and the main canyon channel. During the 2008 inspection, there was some standing water in this basin and a number of large and small branches and twigs (Photo 12). Some of this debris is sufficiently large in length and diameter that it may hang up on the entrance to the discharge culverts creating a potential that they might clog. This condition was mitigated by the operator with removal of all floating debris as documented in the December 12, 2008 letter by R. DeAtley.

Phased reclamation has begun on the upper benches of the east face and is extended as far down as the bench 3. Plants with deer cages were observed during the inspection on benches 2 and 3 (Photos 13 and 15). Plants on the benches and the slope faces are being irrigated. Inter-bench slopes have been recently hydroseeded in preparation for winter (Photo 14).

Previous annual inspections have noted that the toes of the cut slopes on the east face have been cut in places steeper than the 1H:1V gradient prescribed in the reclamation plan. The toe of the slope between east face bench 3 and 2 is over-steepened in places to a height of 5 to 6 feet and exposes both bedrock, weathered bedrock and soils (Photo 16). The toe of the slope above bench 2 is similarly over-steepened, but cut exposes mostly bedrock (Photo 17). There are areas in the slope above bench 2 that have had rockslides and wedge failures along bedding planes and fractures. These failures have been noted in previous annual inspections.

At the northern end of bench 3 there is a series of small cracks that suggest settlement or movement of the underlying fill (Photos 18 and 19). This condition should be monitored and mitigation measures developed if it expands. Also at the northern end of bench 3, runoff from the bench discharges over the face of the slope into the eastern tributary drainage below (Photo 20). During the 2008 inspection it did not appear that this runoff is concentrating and developing an erosion gully, but the condition at the edges of the benches should be monitored for erosion from runoff.

VIOLATIONS

Only one violation from the 2007 annual report continues, and there are no additional SMARA violations in 2008. The one ongoing violations include the disturbance outside of the approved mine boundary that is being corrected with the amended reclamation plan.

AREAS OF CONCERN AND ISSUES TO MONITOR

The embankments of the stormwater basins on both the west and east side of the quarry floor showed signs of excessive erosion and settlement in the embankment fill. Corrective measures have been taken, but the condition of the basins needs to be monitored. The County should re-inspect these basins by March 2009 to observe their condition and performance with winter runoff.

The wash fines that are stockpiled around the northwestern stormwater basin should be monitored to ensure that they do not erode. Cleary Consultants evaluated this material and provided a letter report, dated January 12, 2009, that recommended that plastic sheeting be placed over the material during the rainy season, and that in next year's dry season the plastic be removed to allow the material to dry out. Cleary recommended reworking the material once it is sufficiently dried out. The County has reviewed this letter and finds that it addresses the issue. The Counry should re-inspect this condition to ensure that the material will provide a stable embankment for the sediment basin.

The northeastern stormwater basin shown in Photo 11 should be periodically monitored for large debris that might clog the outlet culverts and cause overtopping of the basin. The large tree limbs and vegetation debris should be removed as needed to ensure free outflow of stormwater.

The operator's geotechnical consultant should continue to monitor the over-steepened toes of the east face cut slopes, and notify the County if there is any significant change in the stability of the slopes.

The operator's geotechnical consultant should monitor the cracks observed at the northern end of the east face bench 3 as well as inspect other benches for signs of settlement or instability. If the cracks expand or the condition otherwise deteriorates, the operator should notify the County and the geotechnical consultant should prepare a report documenting the conditions and make recommendations for mitigating the instability. This report should be made available to the County prior to the next annual SMARA inspection.

The operator's geotechnical consultant should monitor the slopes where stormwater runoff discharges from the benches to ensure that erosion of the slopes is prevented. If mitigation measures

are needed to correct slope erosion or instability, the operator shall submit them in writing to the County for review and approval.

FINANCIAL ASSURANCE

The financial assurance cost estimate (FACE) has not been formally submitted at the time of this report, but is in preparation.

CONCLUSIONS AND RECOMMENDATIONS

Lexington Quarry is in general compliance with SMARA except for the one ongoing violations noted in previous annual inspections. The County is processing an amended reclamation plan that will address the issues at the mine. A geotechnical report on the impact of the over-steepening of the toes of the east face cut slopes has been submitted and is acceptable to the County.

The operator has indicated that he has corrected the erosion and instability problems of the stormwater basins. A re-inspection by the County of these corrections should be done by March 2009 to confirm their condition.

The operator should take steps to eradicate the pampas grass that is beginning to take hold on the mine site. This plant is not native to North America and should be placed in the mine's noxious weed abatement program. This plant can be very difficult to control, once it gets established. Eradication is easiest and most cost effective if done at the first sign of that this plant.

San Jose, CA 95110

Re: 2008 SMARA Mine Inspection
Freeman Quarry, 91-43-0010
Gilroy, California

Dear Mr. Rudholm:

This letter report summarizes the findings of Pacific Municipal Consultants' (PMC) annual SMARA site inspection of Granite Construction's Freeman Quarry, near Gilroy, CA Mine ID #91-43-0010 that was conducted on November 18, 2008. PMC was retained by Santa Clara County to assist County staff with the annual SMARA mine inspections, to provide written documentation of our observations, issues of concern and recommendations.

The 2008 annual SMARA inspection was conducted for 3 hours on the morning of November 18, 2008. In attendance along with myself were representatives of Granite Construction, and the Santa Clara County Planning and Development Department. The disturbed acreage remained the same as before, approximately 55 acres. The mine was active during the inspection (A). Reclamation (R) has occurred in some areas. The weather during the inspection was clear (CR) and cool. The mine is located near latitude 36^0 56.928'N and longitude 121^0 33.482'W.

BACKGROUND

The Freeman Quarry is located in the southern portion of Santa Clara County south of Gilroy. The mine site is a leased parcel that lies within the Castro Valley Ranch. The quarry is underlain by Franciscan assemblage bedrock including greenstone which is the primary material mined. The upper portions of the quarry slopes have a thick soil cover that's underlain by weathered and fractured bedrock while the lower slopes exposed relatively unfractured rock.

West Coast Aggregates originally operated the mine under the name of Blue Stone Quarry. West Coast Aggregates obtained a Use Permit and an approved Reclamation Plan in 1998, and began mining in 2000. In 2002, Granite Construction bought the lease and began operating the mine.

The County directed Granite Construction to file for an amendment of its reclamation plan to modify its boundaries and include the quarry access road and the office and scale house, making the

reclamation plan consistent with the Use Permit boundary. The operator submitted revised documents to its initial application in March 2008. After reviewing the proposed amendment the State Office of Mine Reclamation wrote to the County in April 2008, stating that the amendment was a minor revision to the approved reclamation plan, and that OMR had no further comments. The County subsequently approved the reclamation plan amendment in June 2008.

The 2008 Reclamation Plan amendment provides for placement of compacted fill against a portion of the southeastern highwall. Placement of this compacted fill is being observed by Cleary Consultants following recommendations made in their February 25, 2003 report that creates final 2H:1V slopes with 10-foot benches at 40-foot vertical intervals. A portion of this fill has been placed, but a wedge of loose material overlies the toe of the slope. This loose material will eventually be removed when the final slope grade is established.

The 1998 Reclamation Plan on page 22 states that the portions of the upper slope will be flattened to a 2H:1V gradient in areas of weathered greenstone. The Cleary Consultants' June 1997 report also notes that the upper portions of the quarry cut slopes may need to be flattened or rounded because of the weathered greenstone and soil materials. Mining has not yet reached the extent where this flattening requirement would be required, except in the southeastern portion of the quarry where 2H:1V compacted fill is being placed against the highwall.

SITE CONDITIONS

Fill has been placed north of the entrance road to provide a visual screen for the quarry (Photo 1). Additional fill will be placed in the area of this berm as per the design of Cleary Consultants in their June 30, 2004 report to increase the visual screen and store additional overburden material (Photo 2). The operations area of the mine is in the central and southern portion of the mine site where the stockpiles, crushing and screening equipment are placed. Stockpiles are also placed along the southwestern mine boundary (Photo 3).

Linear cracks were observed in the southern embankment of the stormwater sedimentation basin that lies east of the stockpiles along the southwestern boundary (Photos 5 and 6). This condition was also noted in previous annual inspections. The County required the operator to submit a report on these cracks. A letter by Granite Construction, dated June 13, 2007, was submitted that concludes the maximum water level in the basin is sufficiently low that the cracks do not present a problem for stability of the embankment. The County accepted this letter as sufficient response with the condition that the operator continues to monitor the embankment at least annually.

A 2H:1V engineered fill has been placed along the over-steepened cut slopes in the eastern central portion of the quarry. A road runs across this fill and provides perimeter access. Several small linear cracks approximately 1-inch wide were observed in this fill along the outside edge of the roadway (Photos 7 and 8), which suggests some settlement of the fill. The operator has indicated that this portion of the fill is loose material that is not at final grade and will eventually be removed when final grade of the fill slope is cut. There is a low point in the roadway near the northern edge of the engineered fill area that ponds runoff and then discharges it over the slope eroding a gully down the face of the fill (Photo 9).

Other tension cracks were observed at the top of the near vertical eastern highwall indicating potential instability (Photos 10 and 11). These slopes will be stabilized in the future by either reducing their angle or by placing engineered fill placed against them.

A previously noted area of disturbance outside the approved mine boundary was a prism of fill placed by the previous operator on the top of the hill east of the central mine area. Removal of the fill material began in October 2007. Jerry Guevara, Supervising Construction Inspector in Development Services Office of the County of Santa Clara, did a final inspection of the fill removal and reclamation on November 7, 2007. Mr. Guevara's inspection confirmed the removal of the material and that the original ground was re-established and re-vegetated (Photo 12).

The quarry limits are currently marked in the field with white stakes placed along the inside boundary of the twenty-foot wide setback zone between the mined area and the established quarry boundary. The current mining operations are contained within the marked setback line (Photo 13 and 14).

The previous operator placed fill in the drainage north of the mine pit outside of the approved mine boundary (Photo 15). This off-site fill was illegally placed over an existing wetland. Granite Construction has approval to mitigate this violation with work at the Pajaro Mitigation Bank under a U. S. Army Corps of Engineers 404 permit (No. 28591S), San Francisco District). According to the operator, approximately one-third of this mitigation work has been completed. In addition to the Pajaro mitigation effort, on-site wetlands mitigation was done in the area south of the mine boundary as per the requirements of a USFWS Biological Opinion (1-1-99-F-106) issued on September 14, 1999 and a DFG 1603 Permit (Notification Number #0858-99). These wetlands have been fenced to restrict livestock (Photo 4). The area of wetland mitigation achieved has exceeded that required, as described in the May 1, 2008 letter by ESR, Inc. This issue is not considered a SMARA violation because it was mitigated under a permit from a responsible federal agency.

Current operations have a series of ponds in the central portion of the pit that serve to provide dust control water and clarify process water (Photo 16).

VIOLATIONS

The inspection noted no SMARA violations.

AREAS OF CONCERN AND ISSUES TO MONITOR

The linear cracks in the southern embankment of the southwestern stormwater sedimentation basin should continue to be monitored and inspected as part of the annual report. If additional movement is observed, the operator's geotechnical consultant should evaluate and make additional written recommendations, and a copy of the evaluation submitted to the County.

Rock riprap should be placed in the gully being formed by drainage from the low point on the north side of the eastern-engineered fill in perimeter roadway to prevent erosion of the fill slope. This point of runoff should be monitored to ensure drainage and erosion control.

The area to the east where fill placed outside of the approved mine area was removed and re-vegetated should continue to be monitored to determine whether erosion is taking place and vegetation is becoming established.

FINANCIAL ASSURANCE

As part of the 2008 SMARA inspection the operator submitted a revised FACE, which the County received on December 1, 2008. This FACE is under review by the County. Following certification the County will forward the calculations to OMR for review and approval.

CONCLUSIONS AND RECOMMENDATIONS

The Freeman Quarry mining operation is in general conformance with SMARA. The operator's geotechnical engineer should continue to monitor the site and propose additional mitigations, if necessary, to address the cracking in the southern sedimentation basin embankment. Unstable, near vertical highwalls should also be monitored and measures taken to stabilize them if the instability increases. As the highwalls approach the mine boundary, the operator's geotechnical consultant should evaluate the condition of the uppermost slope and make recommendations, as necessary, to ensure a stable final slope.

LIMITATIONS

Our services are limited to providing professional opinions and recommendations made in accordance with generally accepted engineering geology principles and practices. Re: 2008 SMARA Mine Inspection
Curtner Quarry, 91-43-0001
Milpitas, California

Dear Mr. Rudholm:

This letter report summarizes the findings of Pacific Municipal Consultants' (PMC) annual SMARA site inspection of Oliver DeSilva, Inc.'s Curtner Quarry, CA Mine ID #91-43-0001 that was conducted on November 17, 2008. PMC was retained by Santa Clara County to assist County staff with the annual SMARA mine inspections, to provide written documentation of our observations, issues of concern and recommendations.

The 2008 annual SMARA inspection was conducted for 3 hours on afternoon of November 17, 2008. In attendance along with myself were representatives of Oliver DeSilva, Inc., and Santa Clara County's Planning and Engineering Departments. The disturbed acreage remained the same as before, approximately 129 acres. Mining is ongoing and active during the past year, but was not active during the inspection (AD). Some areas of reclamation have occurred, primarily at the western edge of Phase 1 where the overburden stockpile was pulled back and re-graded (R). The weather during the inspection was clear (CR) but hazy, and cool. The mine is located near latitude 37^0 27.957'N and longitude 121^0 53.392'W.

BACKGROUND

The Curtner quarry has been operated since before 1976, beginning on the west side. Except for a small area near the mine entrance, mining in the pre-SMARA area continues. The mine has not achieved the final grades shown in the currently approved Reclamation Plan, a modified plan prepared by HMH, Inc. in 1997. Currently approved reclamation plan has a termination date of 2020. Two parks lie adjacent to the mine. The Ed Levin County Park to the east, and the Mission Peak Regional Park to the north. An easement for the South Bay Aqueduct pipeline runs along the western boundary of the mine. The Hayward fault lies near by to the west of the mine.

The mining operations are divided into two phases. The Phase 1 area in the western portion of the mine site was quarried out years ago and is now used for mine operations. Phase 2 is in the eastern

portion of the mine site and is divided into sub-areas. The westernmost area, also called Phase 2, was quarried out in the early 1980's and is now used along with Phase 1 area for mine operations. The second sub-area, Phase 2A, is the easternmost portion of the mine and is the current active quarrying area.

In 2006, the California Department of Conservation's Office of Mine Reclamation (OMR) conducted a site inspection and identified several issues of concern including: (1) the continued operations in what had been described as the reclaimed Phase 1 area; (2) failure to control noxious weeds; and (3) failure to properly maintain sedimentation basins.

The Director of the County's Dept. of Planning & Development issued a letter with a Notice of Violation (NOV) on September 1, 2006. The NOV was based on the operator not filing for an interim management plan for time during which the mine was idle. This NOV was withdrawn when it was determined the mine was idle less than 12 consecutive months the statutory timeframe that trigger idle mine status. To address the remaining violations the operator needed to: (1) modify the reclamation plan to indicate areas within Phase 1 that will remain an active part of the mine's operation; (2) provide a program for control of noxious weeds; and (3) provide a program for cleaning and maintaining the mine's sedimentation ponds. An amended reclamation plan was filed in August 2006. The amendment was approved by the County on August 14, 2008. A maintenance plan for the sedimentation ponds was submitted in August 2006 and a weed abatement program was submitted in September 2006, satisfying those violations.

During 2007 the operator's geotechnical consultant, Berlogar Geotechnical Consultants (BGC), investigated the stability of the large stockpile in the western portion of the Phase 1 area. They reported on February 12, 2007 that a portion of the western stockpile had been place on the head of a landslide that extends to the west off the mine site. BGC exploration work exposed landslide debris and found the basal rupture surface of the landslide at a depth of 15 feet. BGC recommended that the stockpile be set back 100 feet from the top of the mine boundary and that the west-facing slope of the stockpile be inclined at a maximum angle of 2H:1V. Re-grading work on the western stockpile was competed in time for the 2007 annual SMARA inspection and found to be incompliance with BGC's recommendations. BGC also issued a letter dated November 13, 2008 that states that the re-grading of the western stockpile's perimeter slope was performed in substantial conformance with their March 31, 2008 geotechnical report.

SITE CONDITIONS

There are four stormwater sedimentation basins on the Curtner Quarry site. The main pond, basin #1 is located in the northwest portion of the site east of the entrance road and drains northwest into smaller basin #4 before overflow is discharged to Scott Creek (Photos 1, 2 and 6). The other two stormwater sedimentation basins, basin #2 and #3, are at the southern boundary of the site and discharge to Calera Creek. Sediment basin #3 is inside of the elevated perimeter roadway (Photo 3) and discharges to basin #2 located outside of the roadway (Photo 4). The roadway fill has a slope that is steeper than 2H:1V and if this perimeter embankment will remain after reclamation it should be evaluated for its long-term stability.

In addition to the storm water basins, there are a series of cascading basins that run along the northern perimeter roadway (Photo 5). These basins are used to clarify the wash water from the operations area.

As noted above the mine is generally divided into two areas, the non-quarrying western operations area (Photos 6 and 7) and the active quarry in the east (Photos 8 through 12). The active quarrying area for the mine is in the eastern portion of the site where a highwall is present. Mined material is transported via conveyor down to the operations area for processing. Stockpiles of large rock are also maintained in the floor of the active quarrying area. Previous annual inspections noted an area on the northeastern slope of the active quarry where large rock and boulders have rolled downslope towards adjacent drainage (Photo 13). These boulder appear to have been dislodged during grading of a perimeter haul road. A tension crack was observed at the top of the side cast road fill suggesting that the slope is potentially unstable (Photo 14).

The western portion of the mine has the crushing and screening operations as well as equipment storage and maintenance (Photos 15 and 16). Re-vegetation test plots have been established on the southern perimeter of the western area (Photo 17). The western stockpile that was recently re-graded was observed to have been recently hydroseeded as an erosion control measure for this winter (Photo 18). The re-graded western toe of this stockpile was also hydroseeded and straw waddles installed for winterization (Photos 19 and 20).

VIOLATIONS

No SMARA violations were noted during the 2008 inspection. All previous violations were corrected by the mine operator to the satisfaction of the County.

AREAS OF CONCERN AND ISSUES TO MONITOR

Previous annual inspections noted that rocks and large boulders have rolled over the slope and down into the drainage that runs along the northeastern boundary of the mine site. The 2008 inspection also noted a tension crack in the fill prism that runs along the perimeter road above this area of rolled boulders. This tension crack indicates that the fill prism is unstable and mitigation measures to stabilize the slope are needed now to prevent any discharge of sediment to the adjacent drainage. The operator should have their geotechnical engineer investigate this area and submit to the County before the next annual inspection a mitigation plan for stabilizing the slope. This plan should consider the removal of the unstable fill prism as an option for stabilization, as well as the removal of any boulders that are reachable from the perimeter road with an excavator.

The mine operator has implemented a program for control of noxious weeds. The 2008 inspection noted a small clump of pampas grass in the active quarry area. This plant should be considered undesirable and eradicated as soon a possible before it becomes unmanageable. Removal of pampas grass should be incorporated in the mine's noxious weed program.

The fill that makes the southern perimeter roadway embankment is steeper than 2H:1V. If this perimeter embankment will remain after reclamation it should be evaluated and analyzed to

demonstrate that its long-term stability is acceptable for the end land use. If it will not remain in place following reclamation, then the slope should be inspected annually to document its temporary stability. If there is an indication of instability, mitigation measures should be implemented to prevent off site discharge of sediment.

FINANCIAL ASSURANCE

The financial assurance cost estimate (FACE) has not been formally submitted at the time of this report, but is in preparation.

CONCLUSIONS AND RECOMMENDATIONS

The Curtner Quarry mining operation is in general conformance with SMARA. Implementation of the noxious weed and sedimentation basin maintenance should be continued. The operator's geotechnical engineer should evaluate and propose mitigations for the unstable road fill along the northern boundary in the area where the boulders have rolled down to the adjacent drainage. The geotechnical engineer should also evaluate the stability of the fill embankment that underlies the southern perimeter roadway.

LIMITATIONS

Our services are limited to providing professional opinions and recommendations made in accordance with generally accepted engineering geology principles and practices. No warranty, expressed or implied, of merchantability or fitness, is made or intended in connection with out work, by our proposal for consulting or other services, or by our oral or written reports or findings. Our services have been limited to review of the reclamation plan as provided by the County, review of previous available annual SMARA inspection reports, visual field inspections, discussions with the County and operator staff, and the preparation of this letter report.

Re: 2008 SMARA Mine Inspection
Calaveras Quarry, 91-43-0008
Milpitas, California

Dear Mr. Rudholm:

This letter report summarizes the findings of Pacific Municipal Consultants' (PMC) annual SMARA site inspection of C.W. Swenson, Inc.'s, Calaveras Quarry, CA Mine ID #91-43-0008 that was conducted on November 19, 2008. PMC was retained by Santa Clara County to assist County staff with the annual SMARA mine inspections, and to provide written documentation of our observations, issues of concern and recommendations.

The 2008 annual SMARA inspection was conducted for 2 hours on morning of November 19, 2008. In attendance along with myself were representatives of C.W. Swenson, and the Santa Clara County Planning and Engineering Departments. The disturbed acreage remained the same as before, approximately 46 acres. Mining has been completed at the site (MC). Reclamation (R) commenced in 2007. The weather during the inspection was clear (CR) to hazy, and cool. The mine is located around latitude 37^0 26.629'N and longitude 121^0 52.072'W.

BACKGROUND

Calaveras Quarry is located on the north side of Calaveras Road, between Evans Road and Ed Levin County Park in an unincorporated area of Santa Clara County near the City of Milpitas. The Calaveras Quarry began operations in 1955. The current owner, C.W. Swenson, Inc., operated the mine beginning in 1955 and extracted bedrock for use as fill for construction projects throughout the Bay Area.

In 1955 the Calaveras property was granted a Use Permit for a rock and aggregate quarry. At that time, the only reclamation requirement was the condition that 1H:1V slopes be maintained on the boundaries of the property. No mining occurred on the site from the early 1970's until 1984. In the early 1980's, the quarry owners developed a plan to extensively mine the property, and in 1984 submitted a reclamation plan developed by Ruth and Going, Inc. The reclamation plan was approval in April 1984.

Following the approval of the 1984 reclamation plan, the operator mined only small quantities of material and eventually halted operations in 1986. Most of the mining contemplated in the 1984 reclamation plan never occurred with some areas never being disturbed. Thus, the final grades shown in the 1984 reclamation plan were not achieved. The areas used or disturbed during the 1984 to 1986 period are now referred to as the "disturbed/reclamation area."

In 1986 the operator submitted an Interim Management Plan (IMP) as the mine had become idle as defined by SMARA. The IMP was approved by the County Planning Commission on July 1, 1993 and renewed five years later in 1998. The quarry has remained idle under the 1998 IMP until 2003 when the plan expired. When the 1998 IMP expired the original Use Permit also expired. The 2004 and 2005 annual SMARA inspection reports incorrectly identified the mine as "vested." This error in status has been corrected with the 2006 report. On May 25, 2006, the operator submitted a plan that revises the 1984 plan to reclaim the site given the existing conditions at the mine.

A wild fire in the summer of 2006 severely burned a large portion of the mine causing damage to vegetation within and outside the 1984 reclamation plan boundary. A post fire inspection by the County found, in the inspector's opinion, a danger of increased erosion on the hillside property, which might cause increased sediment transport to the downhill stream. A Notice of Violation (NOV) issued by the County on November 13, 2006 required an erosion control plan and determination of whether an increase in the financial assurance was necessary. In response to the NOV, the operator submitted and implemented an erosion control plan. The erosion control measures taken combined with natural re-vegetation successfully prevented erosion during the 2006-2007 winter.

To remedy the fact that the mine no longer had a valid Use Permit or IMP, the County issued an Order to Comply on October 12, 2007 that required the operator begin reclamation of the site. To date reclamation has been limited to removal of asphalt surface on the entrance road, installation of erosion control measures, removal of most of the scattered trash and debris, and re-grading of the central portion of the site to reduce the angle of the final slopes and collecting the larger rocks into one island to provide habitat.

SITE CONDITIONS

Access to the mine is through a southern entrance off of Calaveras Road on a now unpaved road that switch backs through the area mined during early operations up to the top of the ridge where the more recent mining took place (Photos 1, 2 and 3). About midway up the southern slope a second older access road breaks off to the north and eventually rejoins the newer road on the north side of a prominent knob shown in Photo 3. The newer, useable access road was once paved but this surface has been removed. As a result the road is now experiencing some areas of gullying (Photo 3). The grading of the new road created a gap in the knob shown in Photo 3 whose over-steepened slopes are now raveling and presents a potential for rock falls. West of the second switch back in the new road is a benched slope that is a repair to a previous landslide on the adjacent property. Drainage culverts from the benches run across portions of the Calaveras mine site and eventually discharge to the mine's lower stormwater basin that lies next to Calaveras Road.

At the western end of the ridge top where the most recent mining occurred is a small stormwater basin (Photo 4). This basin discharges through a 1-foot diameter culvert into the drainage that runs along the northern boundary of the mine. This drainage was noted in previous annual inspections because a number of large boulders have rolled down the northern mine slope and settled in the drainage (Photo 5).

The two previous annual inspection reports, 2006 and 2007, noted over-steepened slopes in the quarry pit that were out of compliance with the 1984 reclamation plan. The operator has recently re-graded these slopes to lower their angle to 2H:1V or less (Photo 6). A number of large boulders were generated during this recent grading and these rocks have been collected into a area in the center of the pit (Photo 6). This collection of boulders will become part of the amended reclamation plan to provide habitat. Similar older collections of boulders exist in the pit and appear to provide good habitat once vegetation matures within and around the rocks.

During the 2008 inspection, several areas of the upper northeastern portion of the quarry still had metal and trash debris (Photos 7 an 8). The operator's representative indicated that a contractor was suppose to have remove all of this material and would contact them again to compete the job. The recently active pit area and adjacent portions of the ridge appears to be re-vegetated well with grasses (Photos 4 through 8).

One of the outstanding issue with the reclamation of the Calaveras Quarry is determining what portion of the mined lands were mined before 1976, pre-SMARA, and therefore do not have to be reclaimed. This is particularly important along the southern portion of the mine where there is a steep, southwest facing slope that appears to be a cut. Whether this cut is pre-SMARA still needs to be determined. Talus from this over-steepened slope has piled up at the toe of the slope adjacent to the older, abandoned access road (Photo 9). Several of the larger rocks that fallen from the slope have come to rest on the older road whose outside berm now functions as a barrier to catch rock falls (Photo 10). The older, abandoned access road has naturally re-vegetated with chaparral except at the areas where it joins the newer access road (Photo 11).

VIOLATIONS

Two SMARA violations listed below are a continuation of those noted during the 2007 annual site inspection. The operator submitted an amended reclamation grading plan prepared by Ruth and Going, Inc., dated November 13, 2007, that reduced the grade of the final slopes in the central pit to 2H:1V. This re-grading within the pit area was implemented in 2007 along with re-vegetated (Photo 6), which has removed the over-steepened pit slopes as a violation. The remaining two violations occur in part because the mining as proposed in 1984 was not completed as planned, and because portions of the site were mined before 1976.

1. A portion of the slopes along the access roads continues with the over-steepened slopes that represent an ongoing potential for rock falls. Most of this area was apparently mined pre-SMARA, before 1976. The 2007 annual report required that the operator submit a geotechnical report on these slopes that provides recommendations for mitigations, if necessary. A geotechnical report by Cleary Consultants, Inc., dated November 19, 2007. Cleary recommends that the oversteepened cutslopes above the access road between stations 12+50 and 14+00 be flattened to 2H:1V as indicated on the

Ruth and Going November 13, 2007 plan. Cleary's report concluded that the overall mass stability of the steep slopes east of the access roads, which they indicated were pre-SMARA, is satisfactory based on the favorable bedding inclination, and that the 40 to 50 foot wide bench at the toe of the slope makes it unlikely that rocks that fall would reach Calaveras Road. Once the oversteppened access road slopes are re-graded this violation will cease.

2. Areas disturbed outside of the approved mine boundary were previously noted. These disturbances are of two types. The first is a large number of boulders outside of the northern edge of the mined area into the adjacent drainage. The second is the issue of identifying areas disturbed since 1976 from pre-SMARA disturbances.

a. The boulders in the drainage north of the mine have landed in an area that is environmentally sensitive. They have been in place for at least 20 years. Removal of this rock would likely create more environmental damage than improvement and would require a permit from at least Fish and Game. Some of the boulders sit on the slope adjacent to the mine. Based on field observations, some of these boulders may be unstable and will roll again, particularly during a large storm or earthquake event. The operator's geotechnical consultant should identify which of these boulders that may pose a hazard for rolling off site into inhabited areas and make recommendations for stabilizing them. Consideration should be given to breaking those boulders in place as to minimizing both the rock fall hazard and the potential environmental impact from any mitigation effort. Consideration should be given to using a non-explosive demolition agent such as Dexpan to break up the rocks.

b. The Cleary Consultants' November 19, 2007 report evaluated historic aerial photos from 1939 to 2002 and provides their determination of the areas disturbed only prior to the 1976 enactment of SMARA. The County is reviewing this determination and the findings will be included in the reclamation plan amendment. Stabilization of pre-SMARA disturbed lands will likely be limited to mitigating public safety hazards.

AREAS OF CONCERN AND ISSUES TO MONITOR

The current haul road shows evidence of erosion with the formation of gullies due to the removal in 2007 of the pavement. This impact was also noted in the 2007 annual inspection. The road way should be modified to prevent erosion and control the flow of runoff. A method that is commonly used on unpaved roads is strategic placement of rolling dips that redirect runoff into a non-eroding conveyance, such as an existing drainage or a lined inside road ditch (see http://oep.berkeley.edu/pdf/FireProjects/OtherDocs/RoadBMPs.pdf). As part of the amended reclamation plan the operator's geotechnical consultant should prepare an erosion control plan for the roadways in the mine site.

Abandonment of the current access road has not yet occurred because the reclamation is ongoing. The older, abandoned haul road has generally self re-vegetated except in areas where the two roads meet. The amended reclamation plan should address the scarification and re-vegetation of the short portions of the older haul road that have not yet re-vegetated as part of the mitigating potential surface erosion.

A small volume of scrap steel and trash still remain in the upper areas of the mine pit. This material should be removed before the next annual inspection.

The two sedimentation basins should be regularly inspected during the winter months to ensure that they are functioning properly. Maintenance cleanouts should be done as needed. Continued cleanout of the lower basin that takes runoff from the south side of the mine and apparently the adjacent lands will need to continue throughout the post-reclamation monitoring period.

FINANCIAL ASSURANCE

The financial assurance cost estimate (FACE) has not been formally submitted at the time of this report, but is in preparation.

CONCLUSIONS AND RECOMMENDATIONS

The C.W. Swenson's Calaveras Quarry reclamation effort is ongoing. There are two continuing violations of SMARA that the amended reclamation plan will address and remedy. The re-grading of the access road cutslopes should be done as recommended in the 2007 Cleary Consultant's geotechnical report with followup inspection by the County. Mitigation of the offsite boulders should be addressed as part of the amended reclamation plan. Maintenance of roads and stormwater basins should continue.

LIMITATIONS

San Jose, CA 95110

Re: 2008 SMARA Mine Inspection
Azevedo Quarry, 91-43-0003
San Jose, California

Dear Mr. Rudholm:

This letter report summarizes the findings of Pacific Municipal Consultants' (PMC) annual SMARA site inspection of Raisch Products' Azevedo Quarry, CA Mine ID #91-43-0003 that was conducted on November 18, 2008. PMC was retained by Santa Clara County to assist County staff with the annual SMARA mine inspections, to provide written documentation of our observations, issues of concern and recommendations.

The 2008 annual SMARA inspection was conducted for 4 hours on the afternoon of November 18, 2008. In attendance along with myself were representatives of Raisch Products and the Santa Clara County Planning Department. The disturbed acreage remained the same as before, approximately 255 acres. Mining has essentially been completed at the site and the site was not active during the inspection (AD), but recycled material stockpiles are scattered throughout the industrial southeastern portion of the site and are part of the ongoing recycling operation. Reclamation (R) has been ongoing for several years. The weather during the inspection was clear (CR) to hazy and cool. The mine is located around latitude 37^0 17.398'N and longitude 121^0 51.034'W.

BACKGROUND

The Azevedo mine is located in the central portion of the Santa Clara Valley on the eastern flank of "Communications Hill." Mining began before 1976 and continued until 2006 processing serpentinite and ultramafic rock materials. The mine currently only recycles concrete, asphalt, and soil. This recycling operation is located in the flatter northern portion of mine which is consistent with the County's industrial policy and zoning regulations. At reclamation the recycling operation will be entirely in the southeast corner of the property on an industrial parcel. The operator submitted an amendment to the reclamation plan because the final slopes of the approved plan will not be achieved. This amendment is being processed.

The landowner (Bettencourt) intends to develop the property for residential and commercial use after reclamation and annexation by the City of San Jose. There is an existing residential development along the western boundary of the mine as well as communications tower facilities, for which the hill is named. HMH Engineers prepared a grading plan, dated October 28, 2008, for the Communication Hill Project that shows the general layout of this future development. These plans show the existing quarry elevations along with the proposed final developed grades for the Communication Hill Project.

SITE CONDITIONS

The two previous annual inspection reports noted over-steepened slopes in the quarry. One slope is the near vertical rock slope near the southeastern mine entrance behind the scale house (Photos 1 and 2), and two others are the slopes surrounding the rock columns supporting two utility poles within a PG&E easement running across the central portion of the mine site (Photos 3 and 4). In addition, linear cracks were found in the fill on the northeast side of the northern sedimentation pond and thought to indicate instability of the pond's berm. Most of the mine is now at the final reclamation grade and re-vegetation with grasses has been successful (Photos 5 through 8).

A geotechnical report by Cleary Consultants (Cleary), dated June 13, 2008, described the existing and likely final conditions of the quarry slopes. Cleary's report concluded that the final cut slopes along the south margin of the quarry are performing satisfactorily and do not show evidence of deep-seated instability. A small spring, 1 to 2 gallons per minute, was identified in a dormant landslide in the slope south of the northern sedimentation pond; see Cleary's Drawing 1. Several small active landslides and a half a dozen small dormant were also observed across the site.

Cleary found the northeast berm of the northern sedimentation pond had random oriented shrinkage crack and a shallow slump on the upper inside berm face near an area of rodent activity. During the 2008 inspection, the upper foot or so of the fill in the northeast berm of the northern sedimentation pond that was recently re-compacted by the operator did not show signs of linear or random cracks (Photos 9 and 10). It was noted that this side of the pond abuts the railroad grade that runs along the northeastern property boundary, and that a wide drainage swale lays between these two fills (Photo 11). Our inspection also observed the silt fencing that was installed east of the pond to control the migration of salamanders (Photo 12).

Cleary found that the over steepened slope behind the scale house at the southeastern mine entrance exposed altered silica-carbonate rock in a serpentinite matrix. The slope was not actively failing but did have small piles of talus at the base. Due to the slopes' steepness a rock fall hazard was present and larger slope failures might occur during a severe winter or seismic event.

The two PG&E utility poles that site on columns of bedrock in the central portion of site were found to have significantly over-steepened serpentinite bedrock slopes on three sides. Active landsliding is occurring along several areas of the slopes below these two utility poles.

Cleary's report also identified several areas where uncontrolled, non-engineered, fill have been placed on the mine site; see Cleary's Drawing 1.

During the 2008 annual site inspection, the slope in the southeastern mine entrance was observed as well as the slopes around the two PG&E utility poles. Our observations found that conditions of the over-steepened slopes had not changed significantly from those documented by the June 13, 2008 Cleary report.

Several areas of fill that were recently graded and re-vegetated were observed in the southern portion of the site (Photos 13 and 14). The fills appear to be performing satisfactorily and re-vegetation has begun to establish. Vegetation has become well established on other reclaimed areas of the quarry.

VIOLATIONS

No SMARA violations were noted during the 2008 annual site inspection, which is consistent with the 2007 and 2006 inspections.

AREAS OF CONCERN AND ISSUES TO MONITOR

Issues of concern from 2007 annual inspections that involve the over-steepened slopes continue during the 2008 annual inspection. There has been some discussion on how to mitigate the steepness of the slopes, either by re-grading, placing buttressing fills or in the case of the utility poles relocating them. However, what has yet to be considered is the impact of the proposed future development of the quarry on these slopes.

The intent of the reclamation plan is to leave the quarry in a condition that can be developed. The landowner, Bettencourt, has a development plan for the quarry that includes re-grading the southern hillside portion of the quarry to develop residential lots, parks and roadways. This development plan calls for the area surrounding the two utility poles to be filled, except that the higher existing grade of the bedrock columns surrounding these two utility poles will need to be lowered; see HMH Sheet 1 proposed grading plan. At the lower, northernmost pole it appears that the grade at the base of the pole will have to be dropped approximately 40 feet, from 310 to 272 feet. In addition, the pole's current location will be in the middle of a new road. Therefore, development of the site will require this pole be moved laterally. The grade at the base of the upper, southernmost pole will need to be lowered by approximately 17 feet and the current location will be at the base of a slope and just above a 5-foot high retaining wall. This pole will also likely have to be moved. A shift of 40 feet to the north would place the pole on the level surface of a new park. The operator indicates that PG&E is not concerned about the current stability of the utility poles. While the Cleary report indicates that the long-term stability of the slopes surrounding these utility poles is unsatisfactory, although temporary stability may be acceptable for the proposed end land use, that is the period of time needed to re-grade the site according to the development plan.

The Cleary report indicates that the near vertical bedrock cut slope at the southeastern entrance to the quarry presents a rock fall hazard although is not currently grossly unstable, but may have a problem with long-term stability. This slope is in a similar situation as those surrounding the utility poles. That is, the proposed development of the site will re-grade this slope according to the note on the October 4, 2007 version of the Reclamation Plan; see Nolte and Associates' Sheet 6 of 10

of job no. 0181-83-10. The current, temporary stability of this slope may be acceptable for the end land use, that is the period of time needed to re-grade the site according to the development plan.

The other areas of known or potential instability on the quarry, the small active and dormant landslides, will also be graded out during development because the placement of any new engineered fill requires that the base of the fills be placed on firm material. Likewise the area of uncontrolled fill noted by Cleary Consultants will likely be graded out during development.

Area of instability and potential erosion should continue to be monitored by the operator and their consultants.

FINANCIAL ASSURANCE

A revised financial assurance cost estimate (FACE) was submitted to the County on November 20, 2008. The County has not yet certified the revised FACE. When the 2008 cost estimate is certified it will be sent to OMR for review and approval. They anticipate that the 2008 FACE will be certified by February 2009.

CONCLUSIONS AND RECOMMENDATIONS

The Raisch Products Azevedo Quarry reclamation effort is ongoing. The future development of the southern portion of the quarry is also proceeding. Additional time is needed for the vegetation on the recently graded fill to mature, but the development of the site will likely remove and replace this fill so that full re-vegetation may not be necessary to achieve a productive end use of the site.

The issue of the acceptability of the areas of instability for the future development of the site should be resolved with the landowner. That is, are the over-steepened slopes, active and dormant landslides, and uncontrolled fills acceptable in their current condition to the landowner? If they are acceptable, then the operator should obtain a letter from the landowner acknowledging that the current conditions are acceptable for the quarry's future land use, and that if the land is not developed within a set period of time, perhaps 5 years, the over-steepened slopes will be brought to a condition of acceptable stability. In addition, the areas at the base of the over-steepened slopes should be temporarily fenced off to prevent anyone from standing there and signs placed to note the rock fall danger.

LIMITATIONS

MEMORANDUM

TO: **Clara Spaulding**
FROM: **Jim Blamey**
DATE: **July 2009**

SUBJECT: **Clean Water Program Annual Report (Non-Point Source Program)**

NOTE: *A majority of this report is identical to last years report.*

Training:

The Hazardous Materials Compliance Division did not receive any training directly related to the protection of surface water or storm water quality from the Clean Water Program during FY 09.

Hazardous Materials Specialists (HMS) receives on-going training in a variety of hazardous materials program areas that indirectly are related to the Clean Water Program. The first Tuesday of every month the Santa Clara County Fire Chief's Hazardous Materials Subcommittee provides a training forum for inspectors from different programs and geographic areas. In addition, HMS staff receives training from other sources (State, Local Agencies, private companies, etc.) as the training becomes available. Some of the training staff has received this year includes:

Hazwoper Refresher:	Required safety training	8 hours
Conducting Effective Interviews	Professional development	8 hours
Safety Seminar:	Variety of different safety subjects	4 hours
Hazardous Waste Laws	Review of new laws and regulations	4 hours
Bloodborne Pathogen	Required safety training	1.5 hours
Respiratory Protection	Required safety training	2 hours
Sub-atmospheric gas systems	Professional development	3 hours

Annually, the Hazardous Materials Specialist's attend the Certified Unified Program Agency (CUPA) conference. This conference is attended by jurisdiction from all over the State and is used to promote consistency, coordination and consolidation of regulatory matters related to hazardous materials and hazardous waste. This week long training typically has tracks/topics related to enforcement, underground storage tanks, hazardous materials/waste, and other relevant subjects. Staff also participated in roundtable discussions where state, federal and local regulators scrutinize current practices and propose improvement on how the laws and regulations can be implemented.

Program Evaluation:

The Department of Environmental Health, along with other County government agencies and the District Attorneys office have worked together in a task force to correct illegal activities (zoning, building, illegal disposal, etc.) that have occurred at particular sites throughout the county. This task force has been successful in correct many violations and protecting the environment from contamination. This task force meets monthly to discuss individual sites and methods for obtaining compliance. Although in the past many of the task force efforts were delegated to south county area, the task force focus has modified and we have worked on many cases in the northern part of the county, with great success (zoning issues, old build violations and other typical code violations)

Businesses that failed to comply with applicable environmental laws or regulations were prosecuted either through the Hazardous Materials Program - Administrative Enforcement program or the cases were referred to the District Attorneys Hazardous Materials Unit. Over the past year, the Department has successfully prosecuted several individuals or corporations for repeated violations of applicable laws or regulations.

The single biggest issue for the Hazardous Materials Program inspection staff continues to be adequate training in the issues, laws, regulations, etc. related to the Clean Water Program. The lack of training in this program continues to hamper the ability of the inspectors to provide the program with detailed inspection data and to assist the businesses in complying with program requirements.

Illicit Connection & Illegal Dumping Elimination Activities					
ICID PS-2	Staff training	Document annual training for DEH inspectors	DEH receives training as appropriate for their postion. However, training on CWP and how to protect water quality was not provided last year. Additional training will be developed and offered in FY10.	6/30/09	DEH
ICID PS-4	Field Investigations	DEH will continue to respond to ICID Complaints	Ongoing. Results of complaints are located in Attachment C.	Ongoing	DEH
ICID PS-6	Enhanced reporting requirements	Provide quarterly reports to SCVURPPP.	Ongoing	Quarterly Ongoing	DEH
ICID PS-7	Effectiveness Evaluation	Review and evaluate the effectiveness of County efforts.	DEH continues to compile results on IC/ID using std reporting forms for the type of incident and the source. DEH has been successful at correcting violations. All responses to reported incidents have been responded to. How quickly each incident is responded to depend on the threat the incident has on the environment. All incidents are inspected immediate or within 3, 5, or 10 business days based on the priority. DEH follows through with each incident until it is resolved.	7/15/09	DEH
Industrial/Commercial Discharger Control Programs					
IND PS-3	Check for new industrial businesses.	Automatic, as part of regulatory pe process.	(1) Unincorporated area has few industrial facilities. (2) New facilities apply for County	Ongoing	DEH

P.S. Id.	*Activity*	*FY 09 Tasks*	*Status / Comments*	*Due Date*	*Responsible Party*
			Hazmat Storage Permits, and Hazmat Generator Permits. In that way they are automatically included in the inspection inventory. (3) SWRCB NOI List does not differentiate between unincorporated or incorporated areas, only by the city mailing address of the location. Therefore, the SWRCB NOI List of little use in uninc. area.		
IND PS-3	Commercial Inspections	Inspect 1/3 automotive and service stations in FY 08 • Inspect all facilities determined to be potentially significant contributors to stormwater pollution annually ("Category A" and "NOI Filers" List). • Inspect one-third of all non-significant facilities annually. • Review the lists of significant and non-significant facilities, and revise as necessary (NOI List not helpful in uninc. area). • Inspect (non-NOI filers) with SICs 5015 (auto dismantlers); 5093 (other recycling industries); 3200 (trucking facilities that repair, wash, or maintain vehicles), and state the frequency of these inspections in the Annual Report (1/3 annually).	• See attachment B and C for inspection results. There were 264 IND inspections. Five results in a level 1 enforcement. • There were no reported violations at any "Category A" and "NOI Filers" List" (which are not helpful). • All Category A facilities and "NOI Filers" are listed in Attachment C. • All complaints are prioritized and inspected based on the threat it has on the environment. Complaints are inspected either immediately or within 3,5 or 10 business days, depending on the priority.	During FY 09	DEH

P.S. Id.	*Activity*	*FY 09 Tasks*	*Status / Comments*	*Due Date*	*Responsible Party*
		• Inspect (1/3) of all vehicle service facilities annually (URMP-1997) • Inspect one-third or more of all food service facilities annually. • Inspect all facilities promptly for which a complaint is received. • Evaluate the effectiveness of the County's storm water inspection efforts and of its enforcement actions in correcting any problems found (see below).			
IND PS-4	Staff training	Document annual training for Hazmat and Food Facilities Inspectors.	See attachment B and C. Discussed training with DEH and they have indicated that additional training in reporting, enforcement and identifying violations for the CWP is needed. Training will be provided in the FY10.	6/30/09	DEH
IND PS-4	Enhanced reporting requirements	Continue to track all non-compliance, follow-up enforcement actions and final resolutions resulting from inspections. Submit data to the Program quarterly.	See attachment C.	Ongoing	DEH
IND PS-4	Effectiveness Evaluation	Review and evaluate the effectiveness of County efforts.	DEH continues to inspect Industrial/commercial facilities and to investigate incidents and follow through each incident until it is resolved.	7/15/09	DEH

FY 09 Annual Report

Attachment D1A – NPDES Permit section C.3 Reporting Forms for Involved County Departments and C.3 Maintenance Forms

FY 09 Summary

1. Private C.3 Group 1, 2A, and 2B Projects approved are reported on by the Department of Planning and Development in this section.

2. Two new Public C.3 Projects were approved and commenced construction for Parks.

3. No new private/public C.3 projects were approved for Capital Programs/Fleets and Facilities

4. No new private/public C.3 projects were approved for Roads and Airports.

5. No public or private Hydromodification Plan Projects were approved or constructed by any County department.

Note:

1) The BMP O&M Verification Program was developed and submitted to County Council for review before asking the Board of Supervisors to approve the Program. Currently, County Council is reviewing the Operation and Maintenance Agreement. It is expected to have the O&M program approved and implemented in 2010.

Information Certification for the
FY 2008-2009 NPS Program Annual Report

Certification Statement

"I certify, under penalty of law, that the Department of Roads and Airports information contained in this document was prepared under my direction or supervision in accordance with a system designed to ensure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted, is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

This department has received, reviewed, and accepted the 1997 County of Santa Clara Urban Runoff Management Plan (revised 2004) and the included Performance Standards."

COUNTY OF SANTA CLARA
Department of Roads and Airports

Self-Evaluation Document for the FY09 NPS Program Annual Report

The County Department of Roads and Airports participates in the Nonpoint Source Pollution Control Program in a number of ways:

1) The Department follows Maintenance Yard and field work BMPs, and has adopted SOPs.

2) Storm Water Pollution Prevention Plans (SWPPPs) have been written and are referenced in the departmental maintenance yards. (The East and West Yards are within the NPDES Permit zone.)

3) The Department is using NPDES Permit C3 requirements to design storm water treatment for C3-eligible new and replacement impervious areas included in Department projects, such as expressway widening within the NPDES Permit area. Effective 8/15/06, the C3 requirements were reduced to 10,000 square feet of new or replacement impervious area for Group 2B projects. Projects vary, but each project is carefully evaluated as to whether or not C3 requirements apply.

4) The Department coordinates between design, construction, and maintenance staffs to ensure C3 mitigations are properly monitored and maintained. The first required C3 mitigation improvements for a Department project were accepted for completion and passed from the contractor to department maintenance in September 2007. The mitigations installed consist of bioswales along Montague Expressway. In addition, two vortex separators were installed upstream of pump stations along Central Expressway. The separators were not required for C3 compliance, but will provide additional water quality benefit. The Department inspected the bioswales along Montague Expressway in FY 09. The bioswales were found to be in good condition and no follow-up other than routine inspection is required.

5) The Department is utilizing additional water quality questions in CEQA review, as required by the NPDES Permit.

6) The Department is working with the County IPM Coordinator to reduce and eliminate pesticides where practicable, including in new landscaping and roadside vegetation management. No pesticides or herbicides are applied

without the prescription of a Licensed Pest Control Operator. None are purchased without approval of the County IPM Program Coordinator.

7) NOIs and SWPPPs are prepared and filed when the disturbed area of a proposed project will be 1 acre or more. Further, for those Group 1 projects in sensitive watersheds, hydrograph modification plan mitigations to control flow and prevent creek scour are included.

8) The Department is observing the Rural Public Works Performance Standards and with the assistance of the NPS Coordinator did develop specific SOPs.

9) Litter and trash are removed from public rights of way to a permitted sanitary landfill. Observed illegal dumping problems when not in the public right of way are referred to the DEH.

10) Street sweeping and storm drain maintenance records have been maintained for many years. These records are now made available annually in the form of a spread sheet.

11) The Department provides water quality related training for its employees.

Summary and Evaluation:

The Department of Roads and Airports believes that its staff members and their actions are effective in preventing storm water pollution in both the maintenance yard and construction site environments.

During FY08, the Department conducted an internal review of its procedures for addressing C3 requirements in Department projects and implemented improvements. The Department revised and clarified its design review process, updated its C3 data collection and certification forms, developed a customized version of the SCVURPPP Standard Storm Water Treatment BMP Inspection Data Collection Form, and improved coordination with its maintenance staff for implementing ongoing inspection and maintenance of installed C3 mitigations. In FY 09, the Department began using the customized versions of the C.3. Data Form and the BMP Inspection Data Collection Form. The latter form was used to inspect the bioswales along Montague Expressway.

Managers, engineers, and maintenance staff have an increasing awareness of the need to prevent storm water pollution, the BMPs necessary to support that goal, and also of the C3 requirements for storm water treatment for certain impervious areas. Procedures are in place to ensure permit compliance and to give full consideration to storm water elements in each individual project. On September

10, 2008, Department staff received the following trainings on the recent improvements in the C.3. certification process:

- "Project Development, Review and Design Certification for Compliance with Stormwater Treatment Requirements" – Planning and Engineering staff attended this training. The agenda is included later in this section.
- "Inspection and Maintenance of Stormwater Treatment Measures" – Maintenance staff attended this training. The agenda is included later in this section.

The Department is pleased to work cooperatively toward these goals with the County NPS Coordinator and the County IPM Coordinator. It is understood that continuous improvement in these areas is expected, to the maximum extent practicable.

The Department has benefited from a variety of training resources, but especially appreciates the SCVURPPP-sponsored workshops. In FY 09, Department staff attended the "Rural Roads Maintenance Workshop", the "Rural Roads BMP Installation Training Workshop", the "Construction Site Management Workshop", the "Sustainable Streets Workshop: Using San Mateo County Sustainable Green Streets & Parking Lots Design Guidebook", and the "Annual C.3 Workshop". The "Training Information" section of this Report includes training details and the list of staff that attended these trainings.

In FY10, the Department looks forward to the challenges that may be encountered, and the satisfaction of achieving full compliance with stormwater regulations.

County of Santa Clara Roads and Airports Department
Stormwater Pollution Prevention ("C.3.") Requirements

Project Development, Review, and Design Certification for Compliance with Stormwater Treatment Requirements

September 10, 2008, 1:30 – 4:00 p.m.
Agenda

1:30	Welcome and Introductions	*Tong Hong, County of Santa Clara*
1:35	Why are we doing this? • Regulatory background	*Jill Bicknell, EOA, Inc.*
1:50	How do we work together? • Department's internal process for development/road improvement projects	*Tong Hong*

2:05	What do we do?
	• C.3. data form
	  ○ Applications/exemptions
	  ○ Definitions: ROW vs. footprint
	  ○ Water Board Regions
	  ○ Impervious surface data
	  ○ Construction general permit
	• Design certification form
	• Overview of stormwater treatment BMPs

Attachment D2A- Rural Public Works O&M

Note: A Sr. Civil Engineer from the Department of Roads and Airports and a Sr. Project Manager from the Department of Parks and Recreation both actively participated in the committee that wrote the SCVURPPP Rural Public Works Performance Standard.

The two involved departments, Roads and Parks, have since adopted and incorporated the Performance Standards into their maintenance routines.

The Standard Operating Procedures (SOPs) for this performance standard have been written by both of the involved departments, and submitted to SFB-RWQCB staff previously. The involved departments have reported no difficulties with implementing and observing the standards.

Subject: County Nonpoint Source Pollution Control Annual Report FY09
Parks and Recreation Department Self Evaluation

The County of Santa Clara Parks and Recreation Department (Department) is pleased to offer this brief summary of our progress toward the goal of stormwater pollution prevention as it has been implemented thus far in our operations.

In addition to extensive staff training some of which is detailed below, the Department has initiated and reinforced several program elements to assure that potential sources of stormwater pollution are reduced to the maximum extent possible.

Daily Maintenance Operations

All large-scale maintenance activities involving heavy equipment, parts cleaning and repairs are consolidated in the Department's Central Yard facility. There, most major activities take place indoors and every effort is made to eliminate any discharges to the environment that could reach or affect storm water. The equipment wash pad utilizes covered zero discharge wastewater recycling technology. Five storm drains at Central Yard are protected by oil ands sediment filters and these filters are inspected annually and changed if necessary and oil is skimmed and collected for recycling. The Department purchased a sweeping machine in FY07 which is in use both at Central Yard and on our paved trails. Central Yard parking lot is swept bi-weekly to prevent sediment runoff. The rock pad, installed to prevent mud from being tracked onto the hard surface was refreshed.

The parts washer is a closed loop, hot water and detergent based system, and solvents are eliminated from the parts cleaning process on a department wide basis. In addition, a large capacity spill cleanup station is located adjacent to the fuel dispensing inlands with a filter fabric on the storm drain that serves the central parking lot area of the facility. A new zero discharge wastewater recycling machine is being purchased as the current machine is malfunctioning and is in need of replacement. A CL-304B Waste Water Treatment System, capable of 5 gpm certified to UL-73 Safety Standard will replace the old machine.

An upgraded storage facility has also been completed and the Department is now able to store equipment and supplies in a secure facility. This facility will enable staff to collect any waste fluids that may weep from machinery effectively.

The Rural Public Works Performance Standards have been shared and embraced by

the Department's field staff, which now brings stormwater pollution prevention strategies to assigned tasks as one of the "tools of the trade" necessary for being a Parks professional.

Project Planning and Construction

Careful consideration is given to all environmental impacts that could be created or impacted by project related activities. As stewards of the land, the Department is serious about and proud of its roles related to resource conservation and preservation. In particular, efforts are made to minimize grading, integrate tree planting and seeding, preserving heritage trees, utilizing drip irrigation systems, and ensuring that remediation and new trail construction methodologies conform to modern standards. Some of the trails standards practiced by the Department include out sloping, rolling dips and use of bio-technical methods for erosion control.

During project construction, the Department complies with RWQCB guidelines for soil erosion and stability and continuously monitors all construction activities. The Department will complete a project identified in the 2004 Harvey Bear Ranch Coyote Lake Natural resource Management and Master Plan. The project was completed in April, 2008 under a Notice of Intent, issued by CRWQCB, Waste Discharger Identification # 3 43C347428, dated 06/07/2007, and a Notice of Termination was filed and certified on May 8, 2009.

A restoration of a national historic landmark, owned by Santa Clara County Parks, located in New Almaden, began in February 2009 and a Notice of Intent was filed for the Rehabilitation of the Casa Grande. The project is under construction and is to be completed in January 2010.

Community Involvement

The Department has a very active Volunteer Program which facilitates creek clean-up, watershed education and trail maintenance programs.

The Department's Volunteer Program works with other local agencies and volunteers for creek clean up activities, including garbage removal from parklands and streams, to enhance the natural experience and promote cleaner waterways. This past year, the Parks volunteer program participated in the National River Cleanup Day on May 18, 2009, drawing 884 volunteers, removing 25,505 lbs of trash and 22,540 lbs of recyclables along 39 miles of creek banks and shorelines.

The Parks Volunteer and Interpretive Programs also work with the California Department of Fish and Game in facilitating the Fishing in the City Program. The event includes a ten minute clinic station focusing on Watershed Education with a watershed diorama covering storm drainage, urban run-off, agriculture and man-made pollution. This past year, the program served approximately 1,200 children between the ages of 5 and 15.

As part of our Volunteer Program, the Department has instituted an "Adopt a Trail" program, which employs the aforementioned trail management techniques. For every

trail adopted under this program there is a "volunteer crew lead" assigned and as head volunteer must go through a rigorous training program to learn the proper techniques for trail building and maintenance. Careful attention is given in these training programs to learning about protection our waterways. These volunteer crew leads impart this information to the "Adopt-a-Trail" volunteers.

Staff Training

IPM: The Department held four training sessions on Integrated Pest Management (IPM): One was on 11/18/08, 11/19/08, 11/20/08 and 11/21/08 attended by 65 park maintenance workers and supervisors. Each training session involved 3 contact hours.

Natural Resource Management: The Department requires Pesticide Applicator Safety Training for all Maintenance Workers as part of the County's Integrated Pest Management Program. Between November 18th and 21st 57 Park Maintenance and four Natural Resource Technicians completed the 2008 Pesticide Applicator Safety Training refresher course.

Stormwater: Three Planners, two Park Development and two Park Maintenance staff attended the SCVURPPP Construction Site Management Workshops on November 20 and 21, 2008. The Park Development Manager also attended the Erosion and Sediment Control for Construction Projects Workshop in Pacific Grove on 3/25/09. Two Park Development staff attended the 5/27/09 Construction General Permit:Part2 "What are the Changes and Impacts on SCVURPPP Co-permitees?" workshop on 5/27/09, and the Park Development Manager attended the Sustainable Streets Workshop in Cupertino on 5/29/09 and Annual C.3 Stormwater Workshop on 6/17/09.

Park Acquisitions Fiscal Year 2008

Project Name: Town of Los Gatos Property Exchange
Recording Date: November 25, 2008
Address or APN: 529-12-005
Property Interest: Fee Title
Approximate Acreage: 13.3

Project Name: Lexington-Beatty Conservation Easement
Recording Date: *Note that recorded documents were not received in advance of 2008 reporting period, so acquisition is reported this year: 4/18/08
Address or APN: 558-35-001, 558-36-011, 558-36-012
Property Interest: Conservation Easement – MROSD Owner
Approximate Acreage: 56.88

Project Name: USFWS Easement
Project: Alviso Marina Phase 2
APN: 15-01-027
Property Interest: Easement (50 year)
Approximate Acreage: 0.9 acres

Closing

The Santa Clara County Parks and Recreation Department is an active partner in protecting streams, creeks and waterways. We are proud of the efforts we undertake on a daily basis to minimize impacts to the environment, while we protect and preserve the lands that the public entrusts us to maintain, on their behalf, for current and future enjoyment.

Should you have any additional comments or questions on this report, please feel free to contact me at (408) 355-2210 or Bill Grimes, Environmental Health & Safety Compliance Specialist, at (408) 355-2273.

Respectfully Submitted,

Mark Frederick.

SUBJECT: **NPS Annual Report**

This report is submitted to meet the annual reporting requirements of the County's Phase I NPDES Storm Water Discharge Permit.

In FY 2009 we initiated no new projects subject to NPDES permit.

Capital Programs Division continues to emphasize compliance with NPDES requirements, and the need to control storm water discharge from construction activity. Capital Programs currently has one project under construction which requires a SWPPP plan, the Valley Health Center at Milpitas. We have received and are monitoring the implementation of this plan.

With regards to Best Management Practices for storm water treatment, four projects have been completed within the past 12 months that implement BMPs: The New Crime Lab at Guadalupe Parkway; Valley Health Center at Gilroy; Valley Health Center at Sunnyvale; and Valley Specialty Center at Bascom Avenue in San Jose.

COUNTY OF SANTA CLARA
CLEAN WATER PROGRAM
ANNUAL REPORT FY 09

CONSTRUCTION INSPECTION

The following report is based on the County Performance Standard for Construction Inspections:

1) The County ensures through a construction inspection program that construction contractors properly store, use, and dispose of construction materials, chemicals, and wastes at construction sites and prevent illicit discharges to storm drains and watercourses.

Building and Grading inspectors include these items in their inspection routine. If Building or Grading inspectors observed a violation outside of their jurisdiction the proper department is notified. Hazardous materials violation referrals are made to DEH--HMCD as appropriate.

2) For development projects with significant erosion potential and planned construction activity during the wet season the County ensures, through a construction inspection program, that erosion and/or sediment control measures are implemented in accordance with local ordinances and project conditions of approval and maintained as needed during construction.

The County Grading ordinance and Construction Inspectors require winterization and implementation of erosion control BMPs of projects that will continue into or start in the rainy season (after 10/15 through 4/15 each year). Ongoing inspections evaluate the effectiveness of control measures, and require changes and/or additions to BMPs where needed. Throughout the rainy season, inspectors continue to monitor construction sites, and shut down any projects where erosion control measures are inadequate. Grading Ordinance violators are also required to "winterize" their illegally graded sites.

3) The County inspects construction sites for adequacy of storm water quality control measures on a regular basis, with the frequency of inspections based on the size of the project and its potential impact on storm water quality.

Grading Inspectors continue to inspect all projects on a continuing basis, and endeavor to inspect sites with a high potential for erosion more frequently.

4) Prior to the beginning of the wet season each year, the County inspects all sites requiring erosion and/or sediment control plans, to ensure that measures have been taken to minimize discharges of sediment from disturbed areas.

This is the normal procedure for grading inspectors, and they have continued to require this throughout the past rainy season. Typically, in the beginning of September, verbal warnings are given to contractors informing them that all their erosion control measures should be in place. In October, if the contractor is not in

compliance a warning letter is sent. If the contactor continues to be out of compliance a stop-work order is issued.

5) During the wet season of each year, the County inspects all construction sites requiring erosion and/or sediment control plans following each major storm event or series of events.

Grading inspectors inspect each active approved grading site with high erosion potential frequently, which includes the days following any major storm. In cases where they cannot get to every site, they prioritize and inspect those sites with the greatest erosion potential as soon after the rain as possible. On sites that do not require a grading permit, Building inspectors inform grading inspectors if there is an erosion violation.

6) The County provides training annually to its construction inspection staff on inspection procedures, documentation, and enforcement related to storm water pollution prevention.

The County's Clean Water Program staff has worked closely with the grading inspectors and their supervisor, and problems are discussed as they arise. The inspectors are familiar with the goals of the NPS Program and refer problems to the NPS inspector when appropriate, and carry out enforcement action where necessary. The Construction Inspectors meet informally several times per week with the CWP Program Coordinator regarding enforcement needs and problems. Construction Inspectors have attended several erosion prevention and law enforcement classes.

7) The County provides outreach materials to contractors, developers, and County staff on construction BMPs and compliance with the State General Construction Activity Storm Water Permit.

Blueprint for a Clean Bay is available to applicants for building permits, and a county prepared handbook on erosion control measures is available from the CWP office. Trifolds for individuals and the construction trades are available near the building counter. NOI filing information and forms, as well as C3. and HMP handouts, are available at the Planning and Building Lobby.

8) The County investigates and follows up thoroughly on grading violations, especially the ones with a high potential for erosion and sediment transport.

The County of Santa Clara developed a code enforcement database that helps to keep track of complaints, investigations and grading violations. The database has significantly help to track, investigate and follow through with violation. In FY 09, twenty-one properties were cited with grading ordinance violations. Official notices were sent to the property owners as orders to abate the violation, and notices of grading ordinance violation were recorded with the County Recorder.

9) Official Notice Forms

Inspectors report no problems with the newly developed official notice forms for grading violations, grading warnings, and erosion violations. Typically these forms are laminated before being posted onsite.

County Integrated Waste Management Division Activities Related to Reduction of Nonpoint Source Pollution FY 2009

Type of Activity	Description
Residential Garbage Collection Services	Weekly garbage collection services were provided to approximately 18,000 unincorporated area households and all unincorporated area businesses.
Residential Recycling Collection Services	Provided weekly (13,854 households) or bi-weekly (4,902 households) recycling collection services. Beginning 1/1/10, South Valley residents will change from source spearated recycling to single stream recycling bi-weekly in covered rolling carts. Recycling services provided to unincorporated area businesses vary per customer request.
Residential Yard Waste Services	Provided weekly yard waste collection services to 13,854 households and bi-weekly services to 1,691 households. In South County unincorporated area, 3,211 residences received yard waste vouchers to provide for monthly drop off of yard waste at a local Transfer Station. Beginning 1/1/2010 South County residents will receive 12 yard waste vouchers and have bi-weekly containerized yard waste collection.
Residential used oil & used oil filter and household battery collection	Collected used oil & used oil filters and household batteries at curbside on a weekly basis from all unincorporated area neighborhoods (18,000 households served).
Vouchers	Beginning 1/1/2010, Soutn County's 3,211 households will received two vouchers annually for no cost drop-off of large items at a local Transfer Station. These vouchers are in addition to the 12 annual yard waste vouchers
Special Cleanup Services and Events	6,021 households were served by special community cleanup events in their neighborhoods (different neighborhoods are served by this program each year). A total of 177.41 tons of waste and recyclable metals were collected.

Public Outreach Campaigns	A number of countywide public outreach campaigns were conducted through IWM including fluorescent bulb disposal education, "bring your own bag", reusable bag campaign and a source reduction, "Give the Experience" campaign encouraging people to reduce waste by giving tickets, gift cards, and experience type gifts for special occasions to reduce wrapping and other waste.
Public Outreach Events	Information on waste prevention, recycling, household hazardous waste management, home composting, and other environmental topics was provided at many local public events, fairs and home and garden shows.
Public Outreach Information	The Countywide Recycling Hotline (1-800-533-8414) and Recycling Website (ReduceWaste.org) provided a wide range of waste reduction and recycling information to the public. This Hotline and the website were upgraded in Fiscal Year 2008 to be more user friendly.
Newsletters	Unincorporated area residents received quarterly newsletters providing information on a variety of waste and recycling-related topics as well as bill inserts from haulers with pertinent information. The documents are produced collaboratively with hauler and IWM input.
Litter	Litter reduction and management information and tips are provided through various outreach materials. Additionally, IWM participates in the annual Great American Litter Pick Up which rotates annually through the Supervisorial districts. IWM is also addressing the issue of litter from single-use carryout bags through outreach and education and various reusable bag campaigns.

COUNTY OF SANTA CLARA
NONPOINT SOURCE POLLUTION CONTROL PROGRAM
ANNUAL REPORT FY 2008-09

This report summarizes Graffiti and Litter Abatement (GALA) Program activities from July 1, 2008 through June 30, 2009.

Eradication

The Sunday Route Program, a collaborative effort between Integrated Waste Management and the Juvenile Probation Department, has been successful this past year in both graffiti and litter removal. GALA Program staff administers the program. The Juvenile Probation Department provides a group counselor to supervise a team of probationers in the removal of graffiti and litter most Sundays. In FY 2008-09, the Sunday Route crew painted out a total of 98 graffiti tags, accounting for 6,535 square feet of graffiti removal. Additionally, the crew collected 877 bags of litter and 194 bags of recyclable materials from County roads. As a result of this program, 215 probationers were able to perform their community service hours. Due to budgetary constraints, the Sunday Route Program has been cut from the Juvenile Probation Department for the coming year. Staff will take a more active role in the recruitment of volunteers to assist in both graffiti and litter abatement.

Great American Litter Pick-Up

This year's Great American Litter Pick-Up took place April 25, 2009, and focused exclusively in the Burbank area. Fifty-three participants collected 30 bags of litter and 5 bags of recyclable items. The clean-up was followed by a celebratory pizza luncheon at Luther Burbank School. This successful event came together through the collaborative efforts of Integrated Waste Management staff, the Office of the District Attorney, Office of the Sheriff, Luther Burbank School and members from the Lions Club.

Clean-Up Events

There were seven hauler-sponsored clean-ups that took place in FY 2008-09. Following is a table showing the results of these clean-up events. All collected materials were taken back to the Materials Recovery Facility (MRF) and sorted, removing all recyclable materials before being landfilled.

Date	Garbage District/ Supervisorial District	Households Served	Tons Collected
September 20, 2008	3	450	21.82
November 8, 2008	3A	1180	31.14
May 2, 2009	1, 3	966	17.34
May 9, 2009	4, 4	741	27.86
May 16, 2009	3	720	14.12
June 6, 2009	1, 2	1304	45.54
June 13, 2009	3	660	19.59
	TOTAL	**6,021**	**177.41**

In FY 2009-2010, there are additional clean-up events scheduled for all Garbage Districts beginning in August and running through the spring. Staff continues to coordinate with Board offices to confirm clean-up dates, and will distribute information to residents at the bin sites.

Per the current franchise agreement, South County residents are provided with twelve yard waste vouchers and one disposal voucher per year. There is also an annual "recycling days" event in which residents may bring unlimited quantities of wood and metal items to be recycled.

Santa Clara County Litter Technical Advisory Committee (Litter TAC)

Staff attends quarterly meetings of the Santa Clara County Litter TAC and is a member of the Litter Control and Removal subcommittee. The members of the Litter TAC include multiple stakeholders and include representatives from local government and law enforcement, VTA, CalTrans, the District Attorney's Office, local media, school districts, Santa Clara Valley Water District, and more. The goals of the Litter TAC are:

- Establish Countywide goals to decrease the amount of litter
- Establish a communication framework amongst the cities within the County to address litter hot spots
- Establish uniform enforcement standards among law enforcement agencies
- Establish a Countywide education/media program
- Establish a communication framework with private companies (solid waste companies, Union Pacific, etc.)
- Establish a Countywide volunteer network

The Litter TAC rarely met in the past year and there has been some discussion that it may be dissolved. More information will be provided as it becomes available.

Enforcement

Staff continues to maintain a database of graffiti tags and shares information with the Sheriff's Office and the District Attorney's Office when requested.

Interagency Partnerships

IWM staff continues to work with the District Attorney's Office, the Probation Department and the Roads and Airports Department to address any litter and graffiti issues as they arise.

Staff serves on the Burbank Weed and Seed Steering Committee and attends monthly meetings. Weed and Seed is a federal grant for the Burbank community to weed out criminal activity and seed the area with resources and services that benefit the community.

The partnerships with the Probation Department and the Roads and Airports Department continue to be the most efficient way of abating graffiti and litter in unincorporated pocket areas. The Roads and Airports Department is responsive to calls for service, and the Sunday Route Program provides abatement services on a weekly basis when their schedule permits. As noted above, the Sunday Route Program will no longer be available to the Program.

Outcome of FY 2008-09 Performance Goals

Goal 1: Coordinate a minimum of five graffiti and litter abatement events.
Outcome: Coordinated eight events (including the Great American Litter Pick-Up).

Goal 2: Coordinate 450 participants for graffiti and litter abatement.
Outcome: Coordinated 268 participants

Goal 3: Abate 5,000 square feet of graffiti
Outcome: Abated 6,535 square feet

Goal 4: Abate 375 graffiti tags
Outcome: Abated 98 graffiti tags

Goal 5: Collect 1,500 bags of litter and recycled materials

Outcome: Collected 1,106 bags of litter and recycled materials

Performance Goals for FY 2009-10

Goal 1: Coordinate a minimum of five graffiti and litter abatement events.
This goal remains the same as last year.

Goal 2: Coordinate 50 volunteers for graffiti and litter abatement.
This goal has changed since the Probation Department had to cut the Sunday Route Program. Graffiti and litter abatement will utilize community volunteers for future activities.

Goal 3: Abate 500 square feet of graffiti.
This goal has decreased significantly due to the lack of the Sunday Route Program. Graffiti abatement will utilize community volunteers for future activities. Roads and Airports department staff will maintain county-owned roads, bridges and right-of-way, while Fleet and Facilities will respond to graffiti at County-owned/operated facilities.

Goal 4: Abate 100 graffiti tags.
This goal has decreased significantly due to the lack of the Sunday Route Program and based on the decrease of graffiti over the last fiscal year.

Goal 5: Collect 100 bags of litter and recycled materials.
This goal has decreased due to the lack of the Sunday Route Program.

COUNTY OF SANTA CLARA
NONPOINT SOURCE POLLUTION CONTROL PROGRAM
ANNUAL REPORT FY 2008-09

This report summarizes the Santa Clara County Green Business Program activities from July 2008 through June 30, 2009.

Partners
All fifteen cities within Santa Clara County, the Santa Clara Valley Water District (SCVWD), Pacific Gas & Electric (PG&E), Association of Bay Area Governments (ABAG), Department of Toxic Substance Control (DTSC) and the Bay Area Air Quality Management District (BAAQMD)

Noteworthy Accomplishments
- 147 businesses certified/recertified in FY 2008-09 bringing total certified to 411 in Santa Clara County
- 224 newly enrolled businesses in FY 2008-09
- Participants have undertaken numerous actions to reduce energy and water use and prevent waste and pollution

Local Accomplishments:
- Participating businesses are influencing employees, vendors and clients by demonstrating that businesses and consumers can make smart environmental choices in their everyday operations
- Public agencies certified: City of Saratoga, Congresswoman Anna Eshoo's Office, and the following County of Santa Clara departments: Parks and Recreation, Office of Human Relations, Environmental Health, Office of Planning and Development, Controller- Treasurer, ASAP-HARP, Office of Supervisor Liz Kniss, Office of Supervisor Ken Yeager and Office of Supervisor Dan Cortese
- Businesses certified in previous fiscal year were recognized by Board of Supervisors at recognition event held September 11, 2008

Regional Accomplishments:
- All nine counties in the Bay Area are now participating in the Bay Area Green Business Program
- More than 1,800 businesses have been certified in the Bay Area Green Business Program
- The Association of Bay Area Governments (ABAG) will recognize certified Public Agencies in the Bay Area on July 16, 2009
- The California Green Business Program Network received a grant from the Department of Toxics and Substance Control to develop a measurement tool to better quantify impact of program and collect more data. First phase is expected to be completed in Summer 2009
- Continue to update checklists as new rules and regulations arise and develop new industry-specific checklists

Pollution Prevention:
Assessments identified potential pollution sources and ways to reduce use of toxic materials. Businesses are now required to stencil "No Dumping - Flows to Bay" signage on storm drain inlets on their property.

Next Steps
- Develop Steering Committee for Santa Clara County Green Business Program
- Leverage regional resources to enhance local efforts
- Conduct research on factors motivating business participation to support development of outreach and recruitment strategies
- Enhance website resources

- Simplify/streamline Green Business certification process
- Continue to nurture partnerships with cities, regulatory agencies, etc. to assist in implementation and business certifications
- Develop a measurement tool to quantify the impacts of implementing Green Business measures

Implementation Priorities

1. Increase the number of certified businesses countywide
2. Continue to conduct local outreach to educate the public on the GBP and the importance of patronizing certified green businesses
3. Host a recognition event September 29, 2009

COUNTY OF SANTA CLARA

Home Composting Education Program (HCEP)

ANNUAL REPORT FY 09

This report summarizes the Home Composting Education Program activities from July 2008 through June 30, 2009.

Experts estimate that the average household that composts both yard and food waste will divert 579 pounds of waste per year. Home composting is a cost-effective way to recycle organic debris. We encourage participation in home composting with a flexible and diverse education program. The Master Composter volunteers share their knowledge to help residents be successful in making compost in their own yards.

Activities that have helped to prevent storm water pollution include:

- Distribution of *Bay-Friendly Homeowner Guide, Soil Matters, The Mulch Guide, Bay-Friendly Gardening Guides and Our Water Our World Publications.* These publications encourage sustainable landscapes which reduce the amount of water, pesticides and herbicides use. Grasscycling also keeps grass clippings from washing into storm drains.
- Began a new workshop series called "Bay-Friendly Gardening" which includes one Integrated Pest Management workshop.
- Distribution at compost workshops and table displays *basic composting* and *worm composting* brochures encourage healthy soils which reduce water runoff.
- At San Jose compost workshops the City of San Jose distributes the Bay-Friendly Gardening Guides to attendees.
- Compost use (commercially made and homemade) in the garden is encouraged to improve soil and less water and pesticide run-off.
- Worm composting classes encourage using redworms to recycle kitchen wastes instead of using the kitchen sink disposal or landfilling organics.
- School outreach program to encourage food waste recycling.

PROGRAM HIGHLIGHTS

- **Volunteers**
  To date, 329 Master Composter (MC) volunteers have been certified to teach home composting. About 65 volunteers are currently active contributing through workshops and monthly meetings. (The ten-week training consists of 50 hours of classroom time and field trips). MCs are asked to perform at least 50 hours of outreach and education within Santa Clara County within one year of graduation. Total reported volunteer hours to date since the program began in 1995 are 31,687 hours. 1,818 volunteer hours were reported in FY09. There was not a volunteer training in 2009.

- **Workshops and Other Outreach**
  Workshops, worm composting classes, and events such as fairs, garden shows, special lectures, table displays and City Compost Bin Sales. Presentations on worm composting have been given at schools. Each participating classroom received a pound of redworms, a worm bin, and educational materials. New in 2009 we trained Bay-Friendly Instructors to teach 3 Bay-Friendly workshop topics. The first 3 topics were: Bay-Friendly Basics, From the Ground Up and Gardening to Manage Pests Naturally. Nine classes were for scheduled for the calendar year 2009 in the Cities of San Jose, Palo Alto, Cupertino and Campbell.

  In FY09 there were participants at our events as follows:
  - 18 special lectures with attendance of 296
  - 110 school presentations with attendance of 2,531
  - 61 compost workshops with attendance of 1,586 (up 24% from FY08)
  - 1 teacher training with attendance of 21

- 39 table displays with attendance of 8,259
- 1,818 volunteer hours were donated during FY09

- **Rotline**
  One of the most important services that the program provides is staffing the compost rotline (408 918-4640) which is used to answer composting questions, troubleshooting with compost bins and worm bins, workshop registration, and Master Composter volunteer sign-ups. The Rotline takes on average 75 calls a week.

- **Compost Bin Sales**
  Earth Machine compost bins, kitchen containers, compost thermometers, worm bins, worms and wing-digger compost turning tools are for sale by appointment at the HCEP office at the County Service Center at 1553 Berger Drive and at most compost workshops.

  Master Composter Volunteers assist cities with their bin sales. The Cities of Sunnyvale and Palo Alto offer residents the *Bio Stack* compost bin at a reduced price. The City of San Jose sells the *Bio Stack* and *Home Composter* compost bins and the *Wriggly Wranch* worm bin at a reduced price.

- **Continuing Education for Master Composters**
  Education by expert guest speakers at Monthly Meetings
  Monthly Email/Print Newsletter
  Research / Resource Library
  Network with other counties programs
  Skills Survey

- **Demonstration Site**
  The MCs maintain a composting demonstration site at Prusch Park in San Jose with about a dozen different working compost bins that have been donated by manufacturers. MC volunteers also maintain a *Bio Stack* compost bin at the Sunnyvale Community Center.

- **Advertising / Public Relations**
  The ReduceWaste.org website lists upcoming workshops. City Contacts help to promote HCEP workshops by purchasing advertising space in local papers. The program buys some advertising.

PI/P	On-going public Information program	Staff will continue to use a variety of outreach avenues to educate the variety of audiences in the County. See following PI/P table for detail of activities.	Green business program is ongoing. GBP and IWM and P2 and GALA have been included, as well as DEH, within the Dept. of Agriculture and Environmental Resource Management	Ongoing	IWM Coord., P2 Coord., GALA Coord., DEH, CWP Prgm. Coord.

General Outreach

Activity	Communication Vehicle	Goal
CWP literature distribution to the general public at County facilities: • Govt. Center • Planning/ Building Dept. counter • Events	**CWP Prgm. literature:** Pests Bugging You?, Home Maintenance Tips, eight construction tri-folds, Blueprint For a Clean Bay booklet, IPM pest-specific fact sheets, Grow-It!, pool water brochure. **HHW Prgm literature:** HHW brochures, small business hazardous waste brochure, (and any new Mercury-products literature as it becomes available)	Keep stocked in view of public
HHW Collection Events	Handouts	Ongoing throughout the year
Website: Include new information in County CWP Prgm. website. Include CWP Ordinance C3. changes when	County web site	On-going

adopted.		
Watershed Education & Outreach Campaign: Conduct or participate in local activities that are coordinated with the Watershed Education & Outreach campaign. Evaluate the effectiveness of PI/P projects by direct or indirect means as appropriate.	Any ed. materials developed by the WE&O campaign. Continue handing out Watershed Watch.	Educate public, especially school age children

Targeted Outreach

Activity	Communication Vehicle	Goal
County staff: • Building inspectors • Construction Inspectors and Engineer/Plan Checkers • Planning Office: Planners • Maint. Yard& Roads Maint. staff • Roads staff and GSA staff managing facilities pesticide spraying contract • County employees for general info on less-toxic alternatives for their own home use, and info on not using pesticides on the job, if unauthorized (detail in the Pesticide Workplan)	CWP literature, as appropriate In-house and Program trainings E-mails	Internal training at least once/yr, for each listed group of employees (except the general County employee info on IPM) In addition, building inspectors, construction inspectors, planners, and engineers are encouraged to attend SCVURPPP-sponsored training events.
County Contractors: Require PCOs, contracted for work on	Contract specifications. IPM Ordinance. SCVURPPP sponsored IPM workshops as	Adequate contract specifications. Appropriate contractor & GSA staff

County facilities, to use pest control methods consistent with our IPM policy and demonstrate adequate training (IPM Coord.) (See Pesticide workplan for details.)	they occur.	attendance at Program workshops. (IPM Coord., Parks, Roads, GSA)

Auto Repair Shops	Education of shop mgrs. during tri-annual inspections by DEH; use SCVURPPP lit., when necessary	Ongoing
Restaurant education	Restaurant poster distr. at inspections by County health inspectors as needed, when not present in facility, when wall space allows.	Posters left at restaurants at routine inspections by DEH as appropriate.
Development community	Literature distr. at Planning/Bldg Lobby *Blueprint for a Clean Bay* manual; eight construction tri-folds; storm drain stencils are available.	Restock as needed, check regularly
Problem contractors in the field	2nd Outreach letter to problem contractors (154 on database). Illegal dumping of soil: targeted letters to swimming pool contractors. Verbal and Written notices and follow up. Improve written notices for erosion problems.	Send to problem contractors when needed. Constr Insp. Perf. Std.
Residents living near creeks	Water District's Stream Care Guide	Display, restock as needed
Gardening community—IWM Coord. contacts and coordinates with local gardening clubs to provide them with IPM info. through composting program	IPM fact sheets from SCVURPPP and others	As opportunities arise. (IWM Coord.)

Outreach to local restaurants (working with DEH inspectors) to encourage less-toxic control (Program Pesticide Workplan for details.)		Arrange for distribution as the new materials become available. (DEH--CPD)

Public Participation

Activity	Communication Vehicle	Goal
Encourage participation in regional creek cleanup event. Help publicize cleanup.	Email, hang posters in Govt. Center	Involve public and county work force

School/Education Outreach

Activity	Communication Vehicle	Goal
Public Schools N/A [Students primarily attend schools within the incorporated cities; therefore this is not a priority for the County]	The Cities' existing and planned outreach programs.	Present storm water pollution prevention message to youth

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 09 Annual Report

Attachment H- Pesticide Management Activities (Integrated Pest Management Program)

Notes:

1) The County of Santa Clara was the first local jurisdiction to hire a full time IPM Program Manager, and the first local jurisdiction to adopt an IPM Ordinance

2) The IPM Program submits quarterly reports to the Housing Land use and Transportation (HLUET) subcommittee of the Board of Supervisors

3) The IPM Ordinance is available on the internet at

http://www.sccgov.org/SCC/docs/scc_ordinance/TOC074.HTM

4) The Abstract from the County of Santa Clara Integrated Pest Management Program Progress Report 2002-08 is include in this Annual Report, more information is available in the Progress Report.

5) In 2008, no pesticides use reported in fifteen regional parks(out of 27). Dependence upon and use of non-chemical alternatives has increased significantly since 2002. In effect this has also decreased the total application, volume and toxicity of pesticides used.

County of Santa Clara
Clean Water Program

Abstract

Developing & managing a multijurisdictional sustainable pest management program requires an integrated operational management approach. Santa Clara County, the largest county in San Francisco Bay Area of California passed IPM & pesticide use ordinance in May 2002 and started the process of promoting reduced risk pest management practices. The multi-jurisdictional program has several components and implementation priority areas such as structural, turf & landscape, nuisance wildlife, right of way, aquatic and invasive vegetation management, development of IPM tool-kit and system automation, research, trials and demonstrations aiming at pesticide use reduction, training and outreach.

The report demonstrates how County's IPM program addressed wide spectrum program needs necessary for an effective, low-risk, sustainable and affordable outcome. The successful outcome, since 2002, not only reflects maintaining pest free status but also significant achievement in pesticide use reduction in all sectors of structural and non agricultural IPM projects. Total number of pesticides, applications, pesticide volume and toxicity pesticides has significantly reduced. Pesticide use in invasive weed management projects (~45,000 acres), urban turf and landscapes (~78 acres), recreational turf (~200 acres) and structures (~188 plus) can be stated as statistically insignificant. In right of way vegetation management, there is 80% reduction in acreage under herbicide management. Since 2002, no aquatic herbicides are used in ponds and lakes. In 2008, no pesticide use reported in fifteen regional parks (out of 27). Dependence upon and use of non-chemical alternatives have increased significantly. The management tool-kit, research and outreach components have also provided a foundation for continued success, improved employee and stakeholder participation, setting an example for other government/non-government agencies and industry.

Key Words Integrated Pest Management, IPM, Pest Control, Urban Pest Management, Urban IPM Systems, Non Ag Pest Management, Pesticide Use Reporting, IPM System Automation, Quality Management Systems, IPM Management Tool-kit, Pest management standards, IPM Evaluation, IPM Outreach

FY 09 Work Plan—INTEGRATED PEST MANAGEMENT

COUNTY OF SANTA CLARA

Program Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Responsible Party
I. Municipal Pesticide Use ***Goal I.A.*** *Eliminate all unnecessary municipal pesticide use (particularly organophosphate (OP) pesticide use) and implement Integrated Pest Management (IPM) techniques.*				
I.A.1	Track pesticide use on County owned property. (PS #9). The results are reported in the AR.	County Of Santa Clara Integrated Pest Management Program Progress report 2002-08 reports on pesticide use on County owned property.	Ongoing	County IPM Program Coordinator in County Exec's Office, FAF
I.A.3	Continue to refine and implement SOPs and BMPs for implementing the IPM policy. (PS #3).	when necessary.	Ongoing	County IPM Coord., FAF
I.A.4	Update URMP with Pest Mgmt. changes	Done	IPM Ord.	CWP Prgm Coord., IPM Mgr.
I.A.5	Continue to ensure that any contractor employed to conduct pest control and pesticide application on County property engages in pest control methods consistent with the IPM policy adopted by the agency (PS #6).	ongoing	Ongoing	County IPM Coordinator, FAF
I.A.6	Arrange annual, County facility search of chemical storage areas for pesticides no longer legal for application, and properly dispose of them. (PS #10)	ALL pesticide purchase goes through IPM Coord.	Conducted once.	County IPM Coord.

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 09 Work Plan—INTEGRATED PEST MANAGEMENT

COUNTY OF SANTA CLARA

Program Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Responsible Party
MM I.A.1.	Document completion of tasks in annual reports. Use pesticide-tracking process to document pesticide use.	ongoing	Ongoing	County IPM Coord.

Program Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Responsible Party
Goal I.B. *Raise awareness of all municipal employees and train employees who apply pesticides for the jurisdiction about the IPM Policy and/or IPM techniques as appropriate.*				
I.B.1	Ensure that employees who apply pesticides for the agency continue to obtain the appropriate County Ag and DPR- required training (PS #5a).	Training included regional IPM conference, Green Gardener training program, bay friendly landscaping and gardening training, facility managers, safety coordinators, and building occupants education and awareness,IPM-pesticide applicator safety education, participate in workshops, symposiums, conferences, conventions and outreach materials.	Annually	County IPM Coord. FAF, Parks, Roads
I.B.2	Provide for annual training on the IPM Policy, SOPs, and BMPs, and the latest IPM techniques to employees within departments responsible for pesticide application (PS #5b).	The SCC Annual pesticide Applicator Safety Education (IPM-PASE) is designed to educate pesticide applicators. Training is focused on IPM policy, the Departments IPM Program and specific maintenance	Annually	County IPM Coordinator

Program Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Responsible Party
		standards and IPM strategies. The training strives to educate all pesticide applicators, maintenance workers, and users about pest management alternatives, including the safe, proper and legal use of pesticdes.		
I.B.3	Annually inform employees who are not authorized to apply pesticides, that they cannot use over-the-counter pesticides in the workplace (PS #5c)	Ongoing	Annually, by e-mail or county newsletter	County IPM Coordinator
MM I.B.1.	Document and evaluate effectiveness of annual staff training.	Quarterly HLUET Committee reports also.	Annually for AR	County IPM Coordinator
II. Public Education and Outreach *Goal II.A. Increase awareness of IPM so target audiences recall less toxic pest management messages and adopt IPM behaviors. Target audiences include residential pesticide users, professional pest control businesses, customers of professional pest control businesses, & pesticide retailers, school districts (PS # 7).*				
II.A.1	Support local implementation of the Watershed Education & Outreach (WE&O) Campaign[1], which will target the general public and include messages about less-toxic pest control and proper disposal. Support SCVURPPP as requested	Continue to support SCVURPP and WE&O.	Ongoing and as requested	CWP Prgm. Coord.

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 09 Work Plan—INTEGRATED PEST MANAGEMENT

COUNTY OF SANTA CLARA

Program Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Responsible Party
II.A.2	Assist SCVURPPP in developing targeted messages regarding proper pesticide use and disposal, effects on water quality, and IPM.	The County participates in SCVURPPP pesticide outreach committee, a diverse group that can collectively address all aspects of Green Gardener training (landscape maintenance worker and professionals IPM training and certification).	Review new pieces as developed by SCVURPPP	CWP Prgm. Coord.
II.A.4	Identify and attend local community events and distribute outreach material. Distribute literature at Backyard Compost or Master Composter workshops.	Besides the Green Gardener Training, the pesticide outreach group also promotes pesticide use reduction strategies through various outreach projects e.g. promoting IPM education at commercial nursery outlets, media campaigns etc.	ongoing	IWM Prgm. Coord., P2 Coord.
II.A.5	Maintain contact with local gardening groups and offer them literature.	ongoing	Ongoing	IWM Prgm Coord., P2
II.A.9	Continue to support BASMAA Regional Media Relations Campaign featuring pitches to Bay Area media and responses to breaking news on pesticide-related topics.	SCVURPPP funds BASMAA baseline projects, including Regional Media Relations Campaign.	Ongoing	CWP Prgm. Coord.
II.A.10	IPM coord. to provide IPM-related press releases to local media as appropriate—using SCVURPPP generated materials when appropriate	As appropriate.	Intermittently, as needed	IPM Coord.
II.A.12	Continue to assist with implementation of local components of a "Pesticide User Outreach" project targeting residential and commercial users	Will assist as needed.	As requested by SCVURPPP	CWP Prgm. Coor., IPM Coord.

COUNTY OF SANTA CLARA

Program Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Responsible Party
II.A.14	Internal outreach on IPM to encourage employees to use IPM techniques away from work: Distribute IPM fact sheets electronically to involved County employees through e-mail or web site or newsletter.	As needed.	Intermittently	IPM Prgm. Coord., IWM Coord.
MM II.A.1.	Document or estimate numbers of residents reached by outreach efforts and media advertising	More info in County of Santa Clara integrated pest management program	Annually, for AR	IPM Prgm. Coord., IWM Coord.
Goal II.B. *Educate pesticide retailers and consumers about less toxic pest control products and promote the sale of such products.*				
II.B.1	Continue to fund and participate in the BASMAA Regional IPM Partnership	SCVURPPP funds BASMAA baseline projects, including Regional IPM Partnership.	Ongoing	CWP Prgm. Coord.
II.B.2	Continue to support the IPM Store Partnership Program. (Nurseries)	Support through SCVURPPP	Ongoing	CWP Prgm. Coord.
MM II.B.1.	Assist Program when requested in documenting number of participating stores, materials distributed, employees trained, and cost-effectiveness of the IPM Store Partnership Program.	Few stores in uninc. area.	As requested.	SCVURPPP

Program Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Responsible Party
III. Pest Control Operators (PCOs)				
Goal III.A. *Minimize pesticide use by PCOs contracted for structural pest control and landscape maintenance.*				
III.A.4	Require PCOs contracted for municipal applications to use pest control methods consistent with the County's IPM policy (through contract specifications). Specifically, require contractors to: a) follow the agency's IPM policy, BMPs, and SOPs; b) provide evidence of current IPM training, when feasible; and c) provide documentation of pesticide use on agency property to the agency in a timely manner (PS#6).	IPM-specific specifications are included in the contracts.	Ongoing	Maint. Yard Supervisor & Parks FAF IPM Prgm. Coord.
MM III.A.1.	Document pesticide use by PCOs on County property.	More info in County of Santa Clara integrated pest management program	Avail. on request	IPM Prgm. Coord., FAF
Goal III.B. *Require all PCOs to implement Best Management Practices (BMPs).*				
III.B.2	Require PCOs contracted by County to implement BMPs through contract specifications.	More info in County of Santa Clara integrated pest management program	Ongoing	Roads and Airports Fleet and Ops Mgr. Parks Sr. Env. Compliance Specialist Park & Rec

COUNTY OF SANTA CLARA

				IPM Prgm. Coord.
MM III.B.1.	Document efforts to complete the above actions.	More info in County of Santa Clara integrated pest management program	In the Annual Report	Roads and Airports Fleet and Ops Mgr. Parks Sr. Env. Compliance Specialist Park & Rec IPM Prgm. Coord.

Program Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Responsible Party
IV. Commercial Businesses ***Goal IV.A.*** *Determine the extent of commercial business employees' use of pesticides (i.e., pesticide applications not performed by a Licensed PCO) and conduct appropriate outreach regarding less toxic pest management.*				
IV.A.2	Support implementation of education programs that target commercial businesses, per recommendations developed in SCVURPPP work plan. IPM Mgr. assists in area-wide IPM	Few commercial businesses in uninc. area.	Ongoing through SCVURPPP	SCVURPPP, DEH--CPD

Program Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Responsible Party
	conference, when scheduled			
MM IV.A.1.	Document outreach efforts targeting businesses.	Rely on SCVURPPP	Annually in AR	SCVURPPP , IPM Coord., DEH
V. Household Hazardous Waste Collection ***Goal V.A.*** *Provide pesticide disposal services through household hazardous waste (HHW) collection programs for all residents and small businesses, and encourage use of these programs.*				
V.A.1	Ensure that adequate pesticide disposal services exist for residents and conditionally exempt small quantity commercial generators.	HHW sites take pesticides.	Ongoing	DEH--HHW, Ag. Commis-sioner's Office
V.A.3	Support, enhance, and help publicize programs for proper pesticide disposal (PS #7).	These audiences include: • Inner-city residents- • Health care professionals-. • Garden center clientele at point of purchase • Children- Kindergarten to K interest and get the message across at "kid level". **Public Service Announcements (PSA)** - SCC IPM Program is working	Ongoing	DEH, Ag. Commis-sioner's Office

Santa Clara Valley Urban Runoff Pollution Prevention Program

		on an IPM PSA project. The PSA will be packaged with cover letter, storyboard and background information and pitched to the top 20 radio stations across the Bay Area. Periodic promotions will follow an initial mailing in pursuit of continued usage. These PSA will run throughout Santa Clara County that describe simple IPM techniques public can use in their home and yard to manage common pests.		
V.A.5	Provide hazardous waste disposal information to residents through DEH website and handouts at collection centers.	ongoing	Ongoing	DEH— HMCD, DEH--HHW

Program Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Responsible Party
MM	Document that household hazardous waste collection programs adequately serve	See section on HHW.	Annually	DEH--HHW

Program Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Responsible Party
V.A.1.	residents and businesses and that any exchange programs do not exchange organophosphate or banned pesticides.			
VII. New Development ***Goal VII.A*** *Minimize pesticide use at new and redevelopment sites.*				
VII.A.2	Consider pest-resistant landscaping and design features in the design, landscaping, and environmental reviews of proposed development projects. (C.9.d.ii.)	Certification will required for Grp. 1 Projects	Ongoing	CWP Prgm. Coord., Planning Office, Development Services Office
VII.A.4	Collect information and report a summary of types of pesticide reduction measures required for development projects and the percentage of projects for which pesticide reduction measures were required. (C.3.n.5)	County to require LLA certification for Grp. 1 projects.	Ongoing	CWP Prgm. Coord., Planning Office, Development Services Office
MM VII.A.1.	Summarize types of pesticide reduction measures required (such as by conditions of approval) for new development and significant redevelopment projects, and the percentage of new development and significant redevelopment projects for which pesticide reduction measures were required. (C.3.n.)	See Attachment D for more information. Projects did not report on the specific pesticide reduction measures. Will need to revise C.3 Questionnaire and train staff and public on how to report this.	Annually, in AR	CWP Prgm. Coord., Planning Office, Development Services Office
