COMMISSION ON STATE MANDATES
STATE OF CALIFORNIA

IN RE TEST CLAIM ON: Education Code Section 56523 as added by Statutes of 1990, Chapter 959; and Title 5, California Code of Regulations, Sections 3001 and 3052 Filed on September 28, 1994 By the Butte County Office of Education, San Joaquin County Office of Education, and the San Diego Unified School District, Co-Claimants.	No. CSM-4464 *Behavioral Intervention Plans* STATEMENT OF DECISION PURSUANT TO GOVERNMENT CODE SECTION 17500 ET SEQ.; TITLE 2, CALIFORNIA CODE OF REGULATIONS, DIVISION 2, CHAPTER 2.5, ARTICLE 7 *(Adopted on September 28, 2000)* *(Corrected on November 23, 2010)*

STATEMENT OF DECISION

The attached Statement of Decision of the Commission on State Mandates is hereby adopted in the above-entitled matter. This Decision shall become effective on September 29, 2000.

On November 23, 2010, this Statement of Decision was corrected to add the Butte County Office of Education and the San Joaquin County Office of Education to the caption as Co-Claimants.

COMMISSION ON STATE MANDATES

STATE OF CALIFORNIA

IN RE TEST CLAIM ON: Education Code Section 56523 as added by Statutes of 1990, Chapter 959; and Title 5, California Code of Regulations, Sections 3001 and 3052 Filed on September 28, 1994 By the Butte County Office of Education, the San Joaquin County Office of Education, and the San Diego Unified School District, Co-Claimants.	No. CSM-4464 *Behavioral Intervention Plans* STATEMENT OF DECISION PURSUANT TO GOVERNMENT CODE SECTION 17500 ET SEQ.; TITLE 2, CALIFORNIA CODE OF REGULATIONS, DIVISION 2, CHAPTER 2.5, ARTICLE 7 *(Adopted on September 28, 2000)* *(Corrected on November 23, 2010)*

STATEMENT OF DECISION

On September 30, 1999, the Commission first heard this test claim and took no action due to a 3-3 tie vote. On November 30, 1999, the Commission directed staff to hold this test claim until the appointment of the seventh Commission member. The seventh Commission member was appointed in April 2000. On August 24, 2000, the Commission heard this test claim during a regularly scheduled hearing. Therefore, the sole issue before the Commission is whether the Proposed Statement of Decision accurately reflects the vote of the Commission.[1] James Cunningham and Frank Terstegge appeared on behalf of the San Diego Unified School District, Gail Cafferata appeared on behalf of the Butte County Office of Education, and Nona Martinez and Dan Stone appeared on behalf of the Department of Finance.

The law applicable to the Commission's determination of a reimbursable state mandated program is Government Code section 17500 et seq., article XIII B, section 6 of the California Constitution and related case law.

The Commission, by a vote of 5-2, approved this test claim.

BACKGROUND AND FINDINGS

The Legislature found that the state has continually sought to provide an appropriate and meaningful educational program in a safe and healthy environment for all children regardless of

[1] Title 2, California Code of Regulations, section 1188.1, subdivision (g).

possible physical, mental, or emotional disabling conditions.[2] In addition, the Legislature declares that teachers of children with special needs require training and guidance that provides positive ways for working successfully with children who have difficulties conforming to acceptable behavior patterns in order to provide an environment in which learning can occur.[3]

The test claim legislation and the implementing regulations involve special education services for children with disabilities. It requires an IEP team[4] to develop a behavioral intervention plan whenever an individual exhibits a serious behavior problem that significantly interferes with the implementation of the goals and objectives of the individual's IEP.[5] The IEP is a written statement developed in a meeting between the school, the teacher, and the parents. The IEP includes the child's current performance, the annual goals and short-term instructional objectives, specific educational services, and the objective criteria and evaluation procedures to determine whether the objectives are being achieved.[6] Special education services include both *special education*, defined as specially designed instruction to meet the unique needs of a child with disabilities, and *related services*, defined as such developmental, corrective, and other supportive services as may be required to assist a child with disabilities to benefit from special education.[7] There is no prior state law that addresses behavioral intervention plans.

The Test Claim Legislation

Education Code section 56523 requires the Superintendent of Public Instruction and the State Board of Education to adopt regulations establishing behavioral intervention plans, which: (1) include the types of behavioral interventions that can be used; (2) require that a pupil's IEP include a description of behavior interventions that meet certain guidelines; and (3) specify standards and guidelines regarding the use of behavior interventions in emergency situations. In response to Education Code section 56523, the California Department of Education adopted sections 3001 and 3052, which detail school districts' obligations concerning the development and implementation of behavioral intervention plans.

The Commission found that Education Code section 56523 only requires the *State* Superintendent of Public Instruction and the *State* Board of Education to adopt regulations.

---

[2] Education Code section 56520.

[3] *Ibid.*

[4] Chapter 5.5, Education Code, sections 56520 et seq. Federal law requires that the IEP team's membership include the individual's parents, at least one regular education teacher of the individual, at least one special education teacher, a local agency representative who is qualified to provide or supervise the provision of special instruction to meet the individual's needs, an individual who can interpret the instructional implications of evaluation results (may be a member listed above), at the parent's or agency's discretion, other individuals who have knowledge or special expertise regarding the child, and whenever appropriate, the disabled individual. (*See* Title 20, United States Code, section 1414, subdivision (d)(1)(B); Title 34, Code of Federal Regulations, section 300.344.)

[5] Title 5, California Code of Regulations, section 3001, subdivision (h).

[6] Title 20, United States Code, section 1401, subdivision (a)(19).

[7] Title 20, United States Code, section 1401(a)(17). The IDEA includes specific services in the related services section, but the text does not limit the provision to those services. These services include transportation, early identification and assessment of disabling conditions in children, speech pathology and audiology, psychological services, physical and occupational therapy, recreation, and medical and counseling services, except those medical services that are for diagnostic and evaluation purposes only.

Section 56523, on its face, does not impose any requirements upon school districts and therefore, does not impose any reimbursable state mandated activities upon school districts. However, the Commission noted that this conclusion does not resolve the inquiry as to whether the regulations promulgated pursuant to section 56523 constitute reimbursable state mandated activities upon school districts.

The Commission found that in order for a statute, or executive order, which is the subject of a test claim, to impose a reimbursable state mandated program, the statutory and regulatory language: (1) must direct or obligate an activity or task upon local governmental entities; and (2) the required activity or task must be new, thus constituting a "new program," or it must create an increased or "higher level of service" over the former required level of service. The court has defined a "new program" or "higher level of service" as a program that carries out the governmental function of providing services to the public, or a law, which to implement a state policy, imposes unique requirements on local agencies or school districts that do not apply generally to all residents and entities in the state. To determine if a required activity is new or imposes a higher level of service, a comparison must be undertaken between the test claim legislation and the legal requirements in effect immediately before the enactment of the test claim legislation. Finally, the newly required activity or increased level of service must be state mandated.[8]

The test claim legislation involves the provision of special education to disabled students enrolled in public education. Public education in California is a peculiarly governmental function administered by local agencies as a service to the public. Moreover, the test claim legislation imposes unique requirements upon school districts that do not apply generally to all residents and entities of the state. Therefore, the Commission found that public education constitutes a "program" within the meaning of section 6, article XIII B of the California Constitution.[9]

However, the Commission continued the inquiry to determine if the activities are new or impose a higher level of service and if the activities are mandated by the state. The claimants contended that the test claim legislation and regulations impose a higher level of service by requiring school districts to perform *additional* activities not required under state or federal law.

The Test Claim Regulations

Behavioral Intervention Plans Defined

The test claim legislation and regulations define *behavioral intervention* as the systematic implementation of procedures that result in lasting positive changes in an individual's behavior.[10] Specifically, *behavioral interventions* are the design, implementation, and evaluation of instructional and environmental modifications to produce significant improvements in behavior through skill acquisition and the reduction of problematic behavior.[11] Generally, behavioral intervention plans are implemented for pupils with an IEP.

---

[8] *County of Los Angeles* v. *State of California* (1987) 43 Cal.3d 46, 56; *Carmel Valley Fire Protection Dist.* v. *State of California* (1987) 190 Cal.App.3d 521, 537; *Lucia Mar Unified School Dist.* v. *Honig* (1988) 44 Cal.3d 830, 835.

[9] *Long Beach Unified School Dist.* v. *State of California* (1990) 225 Cal.App.3d 155, 172.

[10] Title 5, California Code of Regulations, section 3001, subdivision (f).

[11] *Ibid.*

The Commission noted that the *behavioral intervention plan* is the written document developed by an IEP team and is integrated into an individual's current IEP when an individual exhibits a serious behavior problem that interferes with the implementation of the individual's IEP.[12] *Serious behavior problems* are behaviors that are self-injurious, assaultive, cause serious property damage, or other severe behavior problems that are pervasive and maladaptive for which the instructional or behavioral approaches in the individual's IEP are ineffective.[13]

SELPA Plan Requirements[14]

Under the test claim legislation's implementing regulations, each SELPA must include procedures in its local plan regarding the systematic use of behavioral interventions.[15] These procedures include training of behavioral intervention case managers, training of personnel involved with implementing behavioral intervention plans, special training for emergency interventions, and identification of approved behavioral emergency procedures.[16] SELPAs must inform all staff members and parents of these procedures whenever a behavioral intervention plan is proposed.[17]

The Commission found that these activities represent a new program or higher level of service because SELPAs were under no obligation to include such information in their local plans before the adoption of the test claim legislation's implementing regulations.[18]

Development of Behavioral Intervention Plans

An IEP team must supervise all assessment, intervention, and evaluation activities related to an individual's behavioral intervention plan.[19] When a behavioral intervention plan is being developed, the IEP team is expanded to include a behavioral intervention case manager who is trained in behavior analysis including positive behavioral interventions.[20] A *behavioral intervention case manager* is a designated certificated school/district/county staff member or other qualified personnel who has been trained in behavior analysis with an emphasis on positive

---

[12] *Id*. at subdivision (h).

[13] *Id*. at subdivision (ah).

[14] SELPA is an acronym for "Special Education Local Plan Area." Title 2, California Code of Regulations, section 60010 defines SELPA as "the service area covered by a special education local plan, and its governance structure created under any of the planning options" set forth in the Education Code.

[15] Title 5, California Code of Regulations, section 3052, subdivision (j).

[16] *Id*. at subdivision (j)(2)(A)-(D).

[17] *Id*. at subdivision (j)(1).

[18] The test claim legislation requires nonpublic schools to develop policies consistent with those specified in the emergency intervention section of the regulations. The Commission found that this requirement does not impose any activities upon public school districts. (*See* Title 5, California Code of Regulations, section 3052, subdivision (k).)

[19] *Id.* at section 3052, subdivision (a)(1).

[20] *Ibid*. Federal law does not require the inclusion of a behavioral intervention case manager in the IEP team. (*See* Title 20, United States Code, section 1414, subdivision (d)(1)(B).)

behavioral interventions.[21] The case manager is not intended to be a new staff person, but rather may be an existing staff member with the appropriate training.[22]

The Commission found that the activities of including in the IEP team and training a staff member to become a behavioral intervention case manager represents a new program or higher level of service because school districts were under no obligation to perform behavioral interventions before the adoption of the test claim legislation's implementing regulations.

Functional Analysis Assessments

A behavioral intervention plan is based on a *functional analysis assessment* of the individual.[23] A *functional analysis assessment* includes a description of the maladaptive behavior and replacement positive behavior, goals and objectives, detailed descriptions of the interventions to be used, schedules for recording the frequency of use of the interventions, how the intervention will be phased out, those interventions to be used at home or other non-educational settings, and dates for plan review.[24] A functional analysis assessment occurs when the IEP team finds that the instructional/behavioral approaches specified in an individual's IEP have been ineffective.[25] The assessment must include: (1) systematic observation of the behavior; (2) the immediate antecedent events associated with that behavior; (3) the consequences to determine the function the behavior serves for the individual;
(4) ecological analysis of the settings in which the behavior occurs most frequently; (5) review of records of health and medical factors that may influence behavior; and (6) review history of behavior including effectiveness of past interventions.[26]

The Commission found that following an assessment, a written report of the results is prepared and provided to the parent.[27] The report includes: (1) a description of the nature and severity of the targeted behavior; (2) a description of the antecedents and consequences that maintain the targeted behavior across all settings in which it occurs; (3) a description of the rate of alternative behaviors, their antecedents and consequences; and (4) recommendations for consideration by the IEP team.[28]

The Commission found that all of the activities associated with functional analysis assessments represent a new program or higher level of service because school districts were under no obligation to perform functional analysis assessments before the adoption of the test claim legislation's implementing regulations.

---

[21] Title 5, California Code of Regulations, section 3001, subdivision (g).

[22] *Ibid.*; *Id.* at section 3052, subdivision (a).

[23] *Id.* at section 3052, subdivision (a)(3).

[24] *Ibid.*

[25] *Id.* at section 3052, subdivision (b); *See also* section 3001, subdivision (ah), which provides: "serious behavior problems are behaviors that are self-injurious, assaultive, cause serious property damage, or other severe behavior problems that are pervasive and maladaptive for which the instructional or behavioral approaches in the individual's IEP are ineffective."

[26] *Id.* at subdivision (b)(1)(A)-(F).

[27] *Id.* at subdivision (b)(2).

[28] *Id.* at subdivision (b)(2)(A)-(D).

Upon completion of the functional analysis assessment, the IEP team meets to review the results and, if necessary, develop a behavioral intervention plan.[29] The Commission found that this activity represents a new program or higher level of service because school districts were under no obligation to convene an IEP team meeting specifically for review of functional analysis assessments before the adoption of the test claim legislation's implementing regulations.

Implementation of Behavioral Intervention Plans

In developing a behavioral intervention plan, the IEP team may develop positive programming strategies that address the individual's behavior. Positive programming for behavioral intervention may include: (1) altering the identified antecedent event to prevent the occurrence of the behavior (e.g., change the setting); (2) teaching the individual alternative behaviors or adaptive behaviors that produce the same consequences as the inappropriate behavior; and (3) positively reinforcing alternative and other acceptable behaviors and ignoring or redirecting unacceptable behavior.[30]

The Commission found that, to the extent these activities are required to implement an individual's behavioral intervention plan, the activities represent a new program or higher level of service because school districts were under no obligation to develop and implement behavioral intervention plans before the adoption of the test claim legislation's implementing regulations.

Once an IEP team has developed and/or modified an individual's IEP to include a behavioral intervention plan, responses to the targeted behavior shall include, but are not limited to: (1) ignoring the behavior, but not the individual; (2) verbal, or verbal and physical redirection; (3) the provision of feedback (e.g., "you are talking too loudly");
(4) the message of the behavior is acknowledged (e.g., "you are having a hard time with your work"); or (5) a brief, physical prompt to interrupt or prevent aggression, self-abuse, or property destruction.[31]

The Commission found that, to the extent these activities are required to implement an individual's behavioral intervention plan, the activities represent a new program or higher level of service because school districts were under no obligation to develop and implement behavioral intervention plans before the adoption of the test claim legislation's implementing regulations.

Once a behavioral intervention plan is implemented, it is evaluated to measure the frequency, duration, and intensity of the targeted behavior identified in the functional analysis assessment.[32] The teacher, the behavioral intervention case manager, parent or care provider, and others, as

[29] *Id*. at subdivision (c); although subdivision (c) provides that IEP teams shall develop a behavioral intervention plan *if necessary*, section 3001, subdivision (h), defines a behavioral intervention plan as a written document that *is developed* when an individual exhibits a serious behavior problem that significantly interferes with the implementation of the goals and objectives of the individual's IEP. Accordingly, the Commission found that school districts *must* develop a behavioral intervention plan once an individual exhibits a serious behavior problem.

[30] *Id*. at subdivision (d).

[31] *Id*. at subdivision (e).

[32] *Id*. at subdivision (f)(1)-(3).

appropriate, review the evaluation at scheduled intervals determined by the IEP team.[33] If the IEP team determines changes are necessary, the teacher and behavioral intervention case manager conduct additional functional analysis assessments, and based on the outcomes, propose changes to the plan.[34]

The Commission found that these activities represent a new program or higher level of service because school districts were under no obligation to evaluate the effectiveness of behavioral intervention plans or to modify them based on an additional functional analysis assessment before the adoption of the test claim legislation's implementing regulations.

Modifications and Contingent Behavioral Intervention Plans

Minor modifications to the behavioral intervention plan can be made by the behavioral intervention case manager and the parent or parent representative.[35] In addition, the IEP team may develop the behavioral intervention plan in such a way as to allow for alterations or changes to the plan without reconvening the IEP team.[36]

The Commission found that the activities of the behavioral intervention case manager and the IEP team regarding development and modification of behavioral intervention plans represent a new program or higher level of service because school districts were under no obligation to implement behavioral intervention plans before the adoption of the test claim legislation's implementing regulations.

Development and Implementation of Emergency Interventions

In instances where the individual's behavior is unpredictable or spontaneous and poses a clear and present danger of serious bodily harm, an emergency intervention approved by the SELPA may be used.[37] School districts must notify the individual's parent and residential care provider within one school day whenever an emergency intervention is used or serious property damage occurs.[38]

Anytime an emergency intervention is used, schools must complete a "Behavioral Emergency Report," place the Report in the individual's file, and immediately forward it to a responsible administrator who must review the Report.[39] The Report includes: (1) the name and age of the individual; (2) the setting/location of the incident; (3) name of staff or others involved; (4) a description of the emergency intervention used and whether the individual currently has a behavioral intervention plan; and (5) injuries sustained by the individual or others.[40]

Anytime a "Behavioral Emergency Report" is written regarding an individual who does not have a behavioral intervention plan, the designated and responsible administrator must, within two

[33] *Id*. at subdivision (f)(4).

[34] *Id*. at subdivision (f)(5).

[35] *Id*. at subdivision (g).

[36] *Id*. at subdivision (h).

[37] *Id*. at subdivision (i) and (i)(2).

[38] *Id*. at subdivision (i)(5).

[39] *Ibid.*; *Id.* at subdivision (i)(6).

[40] *Id*. at subdivision (i)(5)(A)-(E).

days, convene an IEP team meeting to review the Report, determine the necessity of a functional analysis assessment, and the necessity for an interim behavioral intervention plan.[41]

Anytime a "Behavioral Emergency Report" is written regarding an incident involving previously unseen serious behavior problems or where a previously designed intervention is ineffective for an individual who has a behavioral intervention plan, the IEP team should meet to review the Report and determine if the incident requires the need to modify the plan.[42]

SELPAs are required to collect data on "Behavioral Emergency Reports" and annually report the number of Reports to the California Department of Education and the Advisory Committee on Special Education.[43]

The Commission found that all activities associated with emergency interventions represent a new program or higher level of service because school districts were under no obligation to develop and implement emergency behavioral intervention plans before the adoption of the test claim legislation's implementing regulations.

Prohibited Behavioral Intervention Plans

Interventions that may cause physical harm, deprivation of sleep or food, humiliation or ridicule, or deprivation of one or more senses are prohibited.[44] The use of restrictive devices that limit mobility, locked seclusion, or inadequate supervision is also prohibited.[45]

The Commission found that the activity of informing school district personnel of the restrictions represents a new program or higher level of service because school districts were under no obligation to develop and implement behavioral intervention plans before the adoption of the test claim legislation's implementing regulations.

Due Process Hearings

The provisions of the test claim legislation that relate to functional analysis assessments and the development and implementation of behavioral intervention plans are subject to the due process hearing procedures specified in the Education Code.[46] Before the enactment of the test claim legislation's implementing regulations school districts were under no obligation to develop and implement behavioral intervention plans.

---

[41] *Id*. at subdivision (i)(7).

[42] *Id*. at subdivision (i)(8). Although the subdivision provides that the IEP team *should*, not *shall* or *must*, review the incident and current IEP, the Commission found that, to the extent these activities are required to implement an individual's behavioral intervention plan, the activities represent a new program or higher level of service because school districts were under no obligation to develop or implement behavioral intervention plans before the enactment of the test claim legislation and implementing regulations.

[43] *Id*. at subdivision (i)(9).

[44] *Id*. at subdivision (l).

[45] *Ibid*.

[46] *Id*. at subdivision (m). Education Code section 56501 et seq. details the state's due process procedures, due process hearings, mediation conferences, parent's access to school records, rights of parties, and the use of attorneys at due process hearings.

Therefore, the Commission found that any due process procedures associated with the development and implementation of behavioral intervention plans represents a new program or higher level of service.[47]

The Commission found that the test claim legislation's implementing regulations impose a new program upon school districts. However, the Commission noted that the inquiry must continue to determine whether behavioral intervention plans required by the regulations impose costs mandated by the state.

The Commission noted that in order for the test claim legislation to impose a reimbursable program under section 6, article XIII B of the California Constitution, the newly required activities must be state mandated.[48] Government Code section 17556, subdivision (c), provides that the Commission shall not find costs mandated by the state if the Commission finds that the test claim legislation implements a federal law or regulation and resulted in costs mandated by the federal government.[49] Therefore, if the Commission finds that federal law requires the development and implementation of behavioral intervention plans, then the Commission should deny this test claim.

DOF argued that the test claim legislation implements federal requirements as detailed in the IDEA. Specifically, DOF contended that the test claim legislation allows for the provision of a free appropriate public education and related services as required under federal statutes and case law.

Federal Special Education Law and Behavioral Management Plans[50]

The Education for All Handicapped Children Act (Act) of 1975 is the backbone of the federal statutory provisions governing special education.[51] The 1975 Act begins with findings that the special education needs of children with disabilities are not being fully met. Thus, the purpose of the Act is to assist state and local educational efforts in order to assure equal protection of the law and to assure that children with disabilities have available special education and related services designed to meet their unique needs.[52]

The Act also lists substantive definitions, which both clarify the meaning of terms and set out some of the obligations the Act creates. For example, the Act defines *free appropriate public education* as special education and related services that: (1) are provided at public expense, under public supervision and direction, and without charge; (2) meet the standards of the state

[47] To be discussed below in Issue 2.

[48] *Lucia Mar Unified School Dist*. v. *Honig* (1988) 44 Cal.3d 830, 835.

[49] Government Code section 17513 provides: "'Costs mandated by the federal government' means any increased costs incurred by a local agency or school district . . . in order to comply with the requirements of a federal statute or regulation. . . ."; In *Hayes* v. *Commission on State Mandates* (1992) 11 Cal.App.4th 1564, 1593, 1594, the appellate court stated, "the determination whether certain costs were imposed upon a local agency by a federal mandate must focus on the local agency which is ultimately forced to bear the costs and how these costs came to be imposed upon that agency."

[50] The background on federal special education law comes from, Special Education Law and Litigation Treatise, by Mark C. Weber.

[51] In 1990, Congress changed the title of the Act to the "Individuals with Disabilities Education Act."

[52] Title 20, United States Code, section 1400.

educational agency; (3) include an appropriate preschool, elementary, or secondary school education in the state involved; and (4) are provided in conformity with the individualized education program required under federal law.

The Act continues with administration and funding provisions, which include state eligibility requirements. In order to receive federal funding, the state must have a policy that assures all children with disabilities, who meet the age requirements, the right to a free appropriate public education.[53]

Moreover, the eligibility and plan requirements require a system of procedural hearing rights for parents of children with disabilities. These rights include prior written notice when the designation, evaluation, or placement of a child is initiated or changed. They also include the right of children whose parents are not known or available, or who are wards of the state, to have surrogate parents acting in their place. Furthermore, parents or guardians have the right to examine educational records and receive an independent evaluation of the child.[54]

Are Behavioral Intervention Plans Required Under the Federal Statutory Scheme?

The Commission found that the issue of whether behavioral intervention plans are a federal or state mandate relates to whether they can be defined as a *related service* under federal law. Federal law defines *related services* as supportive services required to assist a child with a disability to benefit from special education. Such supportive services include psychological services.[55] The Commission noted that the issue of whether behavioral intervention plans are a related service centers on whether they can be defined as a *psychological service*.

Before the U.S. Department of Education's March 11, 1999, amendments to the implementing regulations for the IDEA,[56] federal law defined *psychological services* as: (1) administering psychological and educational tests, and other assessment procedures; (2) interpreting assessment results; (3) obtaining, integrating, and interpreting information about child behavior and conditions relating to learning; (4) consulting with other staff members in planning school programs to meet the special needs of children as indicated by psychological tests, interviews, and behavioral evaluations; and (5) planning and managing a program of psychological services, including psychological counseling for children and parents.[57]

The Commission found three reasons why behavioral intervention plans, as defined by the test claim legislation and implementing regulations, were not a *psychological service* and therefore not a *related service* under the IDEA's implementing regulations as they existed before the U.S. Department of Education's March 11, 1999, amendments.

First, the U.S. Department of Education recently amended the definition of *related services* to *include* behavioral interventions in the implementing regulations for the IDEA.[58] Specifically, the *psychological services* definition, as amended, now provides that such services include

[53] *Id*. at section 1412(1).

[54] *Id*. at section 1415(b)(1)(A).

[55] Title 20, United States Code, section 1401(a)(18); Title 34, Code of Federal Regulations, section 300.24.

[56] The Commission addresses the March 11, 1999, amendments below.

[57] Title 34, Code of Federal Regulations, section 300.24(b)(9).

[58] Title 34, Code of Federal Regulations, section 300.24.

assisting in developing positive behavioral intervention strategies.[59] The fact that the U.S. Department of Education recently *added* behavior interventions to the related service section of the IDEA's implementing regulations is evidence that behavior interventions were not previously considered a related service or psychological service.

Second, under California law, in order to perform behavioral intervention tasks a person is not required to be a licensed psychologist as defined in the Business and Professions Code.[60] Rather, the California Department of Education provides that an individual wishing to develop behavioral intervention plans need only receive training in behavior analysis with an emphasis on positive behavioral interventions.[61] Thus, California's behavioral intervention plans would not qualify under the federal definition of psychological services.

Third, California Department of Consumer Affairs' Counsel to the Board of Psychology and Board of Behavioral Science concluded behavior analysts do not engage in the practice of psychology or the practice of marriage, family, and child counseling. Thus, Consumer Affairs' Counsel concluded that behavioral analysts do not engage in diagnosing mental disorders, but focus on external environmental factors that influence behavior.

Accordingly, the Commission found that behavioral intervention plans were not a *psychological service* or a *related service* under the federal statutory scheme before the March 11, 1999, U.S. Department of Education amendments to the implementing regulations for the IDEA. Further evidence that behavioral intervention plans were not part of federal law when the test claim legislation and implementing regulations were enacted is the fact that Congress made several attempts before finally *adding* such plans to the federal statutory scheme.

In 1995, Congress was unsuccessful in its attempt to amend the IDEA to include provisions relating to behavior management plans. Both the House and Senate introduced bills that were unsuccessful in adding a new section to the IDEA with the following language:

> "In developing an IEP, the IEP team shall . . . in the case of a child whose behavior impedes his or her learning or that of others, consider strategies, including *behavior management plans*, to address that behavior." (Emphasis added.)

In 1996, Congress again was unsuccessful in its attempt to amend the IDEA to include a new section with the following language:

> "An individualized education program team shall develop the IEP. . . . In developing such IEP, the IEP Team . . . shall . . . in the case of a child whose behavior impedes his or her learning or that of others, consider, when appropriate,

---

[59] Title 34, Code of Federal Regulations, section 300.24(b)(9)(vi) as amended on March 11, 1999, by the U.S. Department of Education provides: "(b) *Individual terms defined*. The terms used in this definition are defined as follows: . . . (9) *Psychological services* includes—. . . (vi) Assisting in developing positive behavioral intervention strategies."

[60] Under Business and Professions Code section 2914, an individual wishing to provide psychological services must possess a doctorate in psychology, have two years of supervised professional experience, pass a specialized examination, complete training regarding the detection of alcohol or other chemical abuse, and complete coursework in spousal or partner abuse assessment.

[61] Title 5, California Code of Regulations, section 3052, subdivision (a)(1)-(2).

strategies, including *positive behavior management interventions and strategies* to help the child behave in an appropriate and responsible manner conducive to learning." (Emphasis added.)

On June 4, 1997, Congress successfully amended the IDEA, which states in pertinent part:[62]

"(d) Individualized education programs

"....

"(3) Development of IEP

"....

"(B) Consideration of special factors – the IEP Team shall—

"(i) in the case of a child whose behavior impedes his or her learning or that of others, *consider*, when appropriate, strategies, *including positive behavioral interventions*, strategies, and supports to address that behavior."[63] (Emphasis added.)

The claimants contended that the test claim legislation and implementing regulations were not enacted to implement the IDEA Amendments of 1997. The test claim legislation was enacted in 1990 and the regulations in 1993. Thus, it is not possible to conclude that the test claim legislation and implementing regulations were adopted to implement federal requirements that did not exist at the time.

DOF contended that Congress did not view the recent amendments to the IDEA as a new extension or expansion of children's rights. Rather, DOF took the position that these amendments were meant to clarify federal policies already in place.[64] Thus, DOF concluded that behavioral interventions are not new to federal law and that such interventions have always been required under the IDEA. DOF maintained that the central purpose of the IDEA is to ensure that disabled children receive a free appropriate public education and, since public education is defined to include such related services necessary to achieve this goal, interventions that are necessary to ensure the education of a disabled child are federally mandated under the IDEA.

The Commission found that, although the IDEA paints the special education landscape with broad strokes, the specificity in the test claim legislation and implementing regulations do not fit onto the canvas. The state *requires* school districts to engage in functional analysis assessments and implement behavioral intervention plans whenever a disabled child exhibits serious behavior problems. Under the IDEA, if a disabled child exhibits such behavior, school districts are not tied to one response. Before, and even after, the IDEA Amendments of 1997, school districts are free to consider interventions as a possible approach, but are not required to use them. Furthermore, the Commission found that consideration of strategies, such as behavioral intervention plans, were not an express part of federal law before the enactment of the test claim

[62] Title 20, United States Code, section 1414.

[63] *Id*. at section 1414(d)(3)(B)(i).

[64] In the Department of Finance's May 6, 1999, response, DOF quoted the following from the House of Representatives Report on the IDEA Amendments of 1997: "It is the Committee's intent that this set of practical and balanced guidelines reinforce and clarify the understanding of Federal policy on this matter, which is currently found in statute, case law, regulations, and informal policy guidance."

legislation and implementing regulations because Congress recently amended the IDEA to *include* consideration, when appropriate, of such strategies in the federal statutory scheme.

Based on the foregoing, the Commission found that behavioral intervention plans are not required under the federal statutory scheme. However, the question remains whether the recent amendments to the IDEA's implementing regulations by the U.S. Department of Education may create a federal mandate to develop and implement behavioral intervention plans.

Are Behavioral Intervention Plans Required Under the U.S. Department of Education's Current Regulations?

Current language in the United States Code only requires an IEP team to *consider* strategies such as positive behavioral interventions when developing a child's IEP. However, regulations recently adopted by the U.S. Department of Education may *require* the inclusion of behavioral intervention strategies in a child's IEP.

The recently amended version of Title 34, Code of Federal Regulations, section 300.346, provides that IEP teams are required to *consider* behavioral interventions in instances where the child's behavior impedes his or her learning or that of others. If, upon considering the use of an intervention, the IEP team determines that intervention is necessary to ensure that the child receives a free appropriate public education, the IEP team *must* include a statement to that effect in the child's IEP.[65] Prior federal regulations did not require the inclusion of behavioral intervention plans in a child's IEP. The U.S. Department of Education adopted the amended regulations on May 11, 1999.[66]

The claimants contended that the U.S. Department of Education's regulations do not require the use of behavioral interventions under the IDEA. The regulations provide that an IEP team shall *consider* interventions, but they are not *required* to develop or implement behavioral intervention plans. Furthermore, section 300.346, subdivision (c), only requires a statement concerning interventions to be placed in a child's IEP, *if* the IEP team deems it necessary. Federal law gives IEP teams the leeway to develop IEPs as they see fit. Federal law does not *require* the development and implementation of behavioral intervention plans.

DOF contended that the new regulations only underscore the point that the U.S. Department of Education is charged with providing explanation, elaboration, and interpretation of the IDEA and the states are responsible for filling in the details. It was DOF's contention that the foregoing amendments to the IDEA's implementing regulations are nothing more than clarifying amendments to ensure special education children are receiving a free appropriate public

[65] Title 34, Code of Federal Regulations, section 300.346 provides in pertinent part: "(a) . . . (2) Consideration of Special Factors. The IEP team also shall—(i) In the case of a child whose behavior impeded his or her learning or that of others, *consider, if appropriate*, strategies, *including positive behavioral intervention*, strategies, and supports to address that behavior. . . . (c) Statement in IEP. *If*, in considering the special factors described in paragraphs (a)(1) and (2) of this section, *the IEP team determines* that a child needs a particular device or service (including an *intervention*, accommodation, or other program modification) in order for the child to receive [a free appropriate public education], the IEP team *must include a statement to that effect in the child's IEP*. . . ." (Emphasis added.)

[66] Compliance with the new regulations is not required until either the fiscal year 1998 funds that are unobligated by states and school districts become carryover funds (October 1, 1999) or, if earlier, the state receives fiscal year 1999 funding (expected to be available for obligation to states July 1, 1999.)

education in the least restrictive environment. Therefore, DOF concluded that the test claim legislation and implementing regulations are designed to fill in the interstices of the IDEA to achieve the purposes and policies of the Act. And, as such, the test claim legislation and implementing regulations must be considered part and parcel of the federal mandate and not reimbursable as a state mandate.

The Commission found that the U.S. Department of Education's regulations do not require the development and implementation of behavioral intervention plans. The plain language of section 300.346 provides that IEP teams shall *consider* using intervention strategies *if* appropriate. However, there is no language requiring teams to engage in such consideration. Furthermore, it cannot be said that state law is filling in the interstices of federal law. The Legislature has created a new program, one that was not described or outlined in federal law before the adoption of the test claim legislation's implementing regulations. Although behavioral intervention plans may aid the provision of a free appropriate public education to certain disabled children, so may other techniques or services, which IEP teams have at their disposal. The test claim legislation and implementing regulations take a step beyond federal law by *requiring* the use of a technique which, under federal law, IEP teams have *discretion* to use.

DOF further contended that "Assuming that there are in fact several alternative approaches to compliance with a federally mandated program, the fact that a given state, in implementing the mandate, selects only one or two such compliance options changes nothing: *in making that choice, obviously, the state is doing nothing more than adopting a reasonable and appropriate means of complying with the federal mandate*." (Emphasis in original.)

The Commission found that nothing in federal law requires school districts to develop and implement behavioral intervention plans. Under federal law the bottom line is simple; school districts must provide disabled children a free and appropriate public education in the least restrictive environment. If an individual exhibits serious behavior problems, federal law provides a wide array of strategies to address such behavioral problems. However, state law requires the use of one strategy, behavioral intervention plans.

Accordingly, the Commission found that the IDEA's implementing regulations do not require IEP teams to develop and implement behavioral intervention plans.

Cedar Rapids Community School District v. *Garret F.*

DOF cited *Cedar Rapids Community School District* v. *Garret F.* as support for its contention that behavioral intervention plans are required under federal law. Specifically, DOF contended that *Cedar Rapids* stands for the proposition that behavioral intervention plans help guarantee that students receive a free appropriate public education. Accordingly, it concluded that the test claim legislation and implementing regulations are not state mandated, but rather flow from requirements found in the IDEA, its purposes, and case law. The Commission disagreed.

On March 4, 1999, the United States Supreme Court decided *Cedar Rapids Community School District* v. *Garret F.*[67] The issue centered on whether the definition of "related services" in Title 20, United States Code, section 1401, subdivision (a)(17), requires a public school district to provide a ventilator-dependent student with certain nursing services during school hours. When Garret was four years old, his spinal column was severed in a motorcycle accident. As a

[67] *Cedar Rapids Community School Dist.* v. *Garret F.* (1999) 119 S.Ct. 992.

result of the accident, Garret was paralyzed from the neck down and is ventilator dependent, requires assistance with urinary bladder catheterization at least once a day, suctioning of his tracheotomy tube, getting into a reclining position for five minutes of every hour, and ambu-bagging when his ventilator is checked for proper operation. At the time the decision was entered, Garret was a sophomore in the Cedar Rapids Community School District.

The Supreme Court developed a two-part test for determining whether a particular activity falls under the "related service" portion of the IDEA in *Irving Independent School Dist*. v. *Tatro*.[68] Under this test, it must first be determined whether the requested services are included within the phrase "supportive services;" and second it must be determined whether the services are excluded as "medical services."

In *Cedar Rapids*, the District argued that the cost of providing a full-time nurse to attend to Garret's needs while in school was too costly. Therefore, the District's main contention focused on the second part of the test; whether the services Garret requires are excluded as medical services. Specifically, it was contended that Garret's needs fall under the "medical services" exclusion detailed in *Tatro*. In *Tatro*, the Court concluded that the term "medical services" referred only to services that *must* be performed by a physician. The *Tatro* court found that a specific form of health care (clean intermittent catherization) that is often, though not always, performed by a nurse is not an excluded medical service.[69] Therefore, the *Cedar Rapids* court found that it the phrase "medical services" under the IDEA does not embrace all forms of care that might loosely be described as "medical" in other contexts, such as allowable expenses for an income tax medical deduction.

The *Cedar Rapids* court concluded that under the statute, the Court's precedent in *Tatro*, and in accordance with the purposes of the IDEA, the District must fund such "related services" in order to help guarantee that students like Garret are integrated into the public schools.

DOF concluded that "from the *Cedar Rapids* case we learn that federal courts interpret the rights of disabled students very broadly under the IDEA, even when such an interpretation requires elaborate substantive services and imposes extremely burdensome costs on local school districts." The Commission agreed with this conclusion. However, the Commission found that acceptance of this conclusion does not support DOF's contention that *Cedar Rapids* stands for the proposition that federal case law requires school districts to develop and implement behavioral intervention plans.

Case Law in Other Jurisdictions

DOF contended that "it is clear that [the following] cases, though not entirely on point, shed important light on the questions here presented and support the Department's argument that the challenged state laws here are reasonably designed to ensure compliance with the federal mandate."[70] The Commission agreed. However, as discussed below, the Commission found that the following cases cited by DOF do not answer the question of whether federal case law mandates that the state require the development and implementation of behavioral intervention plans under certain circumstances.

---

[68] *Irving Independent School Dist*. v. *Tatro* (1984) 468 U.S. 883.

[69] *Cedar Rapids Community School Dist.* v. *Garret F.* (1999) 119 S.Ct. 992.

[70] *Ibid*.

In *Chris D.* v. *Montgomery County Board of Education,*[71] the court addressed Chris' need for a free appropriate public education and the school board's inability to provide such an education. For Chris to receive an appropriate education it was determined that he needed training in behavior management and anger control. The court found that Chris' behavior deteriorated to a point where intensive behavior management techniques were required due to the school board's poor response to Chris' special educational needs.

In *Oberti* v. *Board of Education,*[72] the court focused on the IDEA requirements regarding the education of disabled children in regular classroom settings. The court held that the IDEA requires disabled children to receive a free appropriate public education in the least restrictive environment. Regarding the pupil's behavior problems, the court found that the informal behavior plan developed by the school district was inadequate because it did not include the appropriate supplementary aids and services required under the IDEA. The court found that the school district failed to provide the pupil a free appropriate public education in the least restrictive environment because the district failed to provide the necessary supplementary aids and services that would allow the pupil to be educated in a regular classroom setting.

In *Cremeans* v. *Fairland Local School District*[73], the district determined that a pupil, a severely disabled autistic child, could not benefit from education in a regular classroom setting. The IEP drafted for this child stated he needed 24 hours-a-day, 7 days-a-week in-home education and behavior management training. The court held that the school district failed to provide a free appropriate public education for the child because it failed to implement the IEP.

The Commission found the foregoing cases illustrate the point that federal case law recognizes there are a variety of strategies to ensure that disabled children receive a free appropriate public education in the least restrictive environment. These strategies range from behavior management as in *Chris D.*, to 24 hours-a-day, 7 days-a-week in-home education as in *Cremeans*. Accordingly, the Commission found that federal case law does not mandate that the state require school districts to develop and implement behavioral intervention plans whenever an individual exhibits serious behavior problems.

Is the Due Process Hearing Requirement Detailed in the Test Claim Legislation's Implementing Regulations Required Under Federal Law?

The Commission found that the test claim legislation's implementing regulations provide that functional analysis assessments and the development and implementation of behavioral intervention plans are subject to the procedural protections and due process hearing procedures specified in the Education Code for special education.[74]

The 14th Amendment to the Federal Constitution provides that no state may deprive any person of life, liberty, or property without due process of law. The due process provisions of

[71] *Chris D.* v. *Montgomery County Board of Education* (M.D. Ala. 1990) 743 F.Supp. 1524.

[72] *Oberti* v. *Board of Education* (D.N.J. 1992) 801 F.Supp. 1392.

[73] *Cremeans* v. *Fairland Local School District* (Ohio App. 4th Dist.) 91 Ohio App.3d 668.

[74] Title 5, California Code of Regulations, section 3052, subdivision (m). Education Code section 56501 et seq. details the state's due process procedures, due process hearings, mediation conferences, parent's access to school records, rights of parties, and the use of attorneys at due process hearings.

California's Constitution[75] are identical in purpose and in scope with the due process clause of the 14th Amendment. The IDEA also establishes procedures for according due process to parents and guardians of a disabled child.[76]

However, as the Commission previously noted, the IDEA does not require the development and implementation of behavioral intervention plans – the state does. Therefore, although due process hearings are required under federal law and the IDEA, the provision for due process hearings relating to behavioral intervention plans remains a state mandate. In other words, the Commission found that these hearings would not be required but-for the test claim legislation's implementing regulations.

Therefore, the Commission found that providing due process hearings regarding a child subject to a functional analysis assessment or developing and implementing a behavioral intervention plan represent reimbursable state mandated activities.

Does Government Code Section 17556, Subdivision (e), Preclude the Commission from Finding that the Test Claim Legislation and Implementing Regulations Impose Costs upon School Districts?

DOF contended that:

> "The State of California has already allocated billions of dollars to fund its Special Education program, the vast majority of which is dictated by the IDEA and other federal mandates. Most of this state funding, . . . $1.4 billion, . . . was available to locals to spend on any costs they may have incurred as a result of the state behavioral intervention requirements challenged here. Accordingly, this state revenue, which was manifestly intended to fund the Special Education program, more than offsets any such costs, and leaves the claimants with an untenable, and entirely, moot, test claim."

The Commission recognized that the claimants did not have the opportunity to address DOF's section 17556, subdivision (e) argument.

Section 17556, subdivision (e), sets forth two tests for determining whether the Commission shall find that there are no costs mandated by the state. Under the first test, the Commission shall find that there are no costs mandated by the state if the statute or executive order provides for offsetting savings that result in *no net costs*. The second test of subdivision (e), provides that the Commission shall find there are no costs mandated by the state if the statute or executive order includes additional revenue *specifically intended* to fund the costs of the state mandate in an amount sufficient to fund the cost of the state mandate.

The Commission found that DOF oversimplifies the application of section 17556, subdivision (e), by concluding that if any funding has been provided for special education that school districts are not entitled to reimbursement for the behavioral intervention plans test claim, even if the Commission finds that the test claim imposes a reimbursable state mandate. The fact that an agency or school district has received funding is only the beginning of the analysis. The

[75] California Constitution, Article I, sections 7, 15.

[76] *See* Title 20, United States Code, section 1415; Title 34, Code of Federal Regulations, sections 300.482-300.487, 300.500-300.515.

Commission must then determine if either of the two tests of section 17556, subdivision (e), apply.

(1) Does the Statute or Executive Order Provide for Offsetting Savings that Result in No Net Costs?

As stated above, under the first test of Government Code section 17556, subdivision (e), the Commission shall not find costs mandated by the state if the statute or executive order provides for *offsetting savings which result in no net costs* to local agencies or school districts.

DOF did not contend that the test claim legislation provides for offsetting savings that result in no net costs to the claimants. Nor did the Commission found any language in either the test claim legislation or implementing regulations that specifically provides for *offsetting savings which result in no net costs* to the claimants. Accordingly, the Commission found that there is no evidence that the test claim legislation provides for *offsetting savings, which result in no net costs* to the claimants. However, the analysis must continue to determine whether the second test of section 17556, subdivision (e), applies.

(2) Does the Statute or Executive Order Include Additional Revenue Specifically Intended to Fund the Costs of the State Mandate in an Amount Sufficient to Fund the Cost of the State Mandate?

As stated above, the second test of Government Code section 17556, subdivision (e), provides that the Commission shall not find costs mandated by the state if the statute or executive order includes additional revenue *specifically intended* to fund the cost of the state mandate in an amount sufficient to fund the cost of the state mandate.

From the plain language of subdivision (e), the Commission looked at the test claim legislation and implementing regulations to determine if there are funds specifically intended to fund the mandate. Based on the documentation provided by the parties and the Commission's review of the test claim legislation, the Commission found that although the state has provided substantial funding for special education, school districts have not received funds *specifically intended* to fund the costs of the state mandate.

CONCLUSION

The Commission concluded that the test claim legislation and implementing regulations impose a reimbursable state mandated program upon school districts within the meaning of section 6, article XIII B of the California Constitution and Government Code section 17514 for the following activities:

- SELPA plan requirements. (Cal. Code of Regs., tit. 2, §§ 3001 and 3052, subd. (j).)
- Development and implementation of behavioral intervention plans. (Cal. Code of Regs., tit. 2, §§ 3001 and 3052, subds. (a), (c), (d), (e), and (f).)
- Functional analysis assessments. (Cal. Code of Regs., tit. 2, §§ 3001 and 3052, subds. (b), (c), and (f).)

- Modifications and contingent behavioral intervention plans. (Cal. Code of Regs., tit. 2, § 3052, subds. (g) and (h).)
- Development and implementation of emergency interventions. (Cal. Code of Regs., tit. 2, §§ 3001 and 3052, subd. (i).)
- Prohibited behavioral intervention plans. (Cal. Code of Regs., tit. 2, §§ 3001 and 3052, subd. (l).)
- Due process hearings. (Cal. Code of Regs., tit. 2, § 3052, subd. (m).)

RE: Revised Proposed Parameters and Guidelines with Reasonable Reimbursement Methodology, Comment Period, and Informal Conference

Behavioral Intervention Plans, CSM-4464
Education Code Section 56523
Statutes 1990, Chapter 959
Title 5, California Code of Regulations, Sections 3001 and 3052
Butte County Office of Education, San Joaquin County Office of Education, and San Diego Unified School District, Claimants

Dear Ms. McDonough:

The Commission on State Mandates received the co-claimants' revised proposed parameters and guidelines with reasonable reimbursement methodology (RRM) for the above-referenced program. Staff reviewed the proposal and deemed it to be complete and timely filed. The proposal is available for review on the Commission's website at: http://www.csm.ca.gov/pub_comment.shtml.

Review and Comments. All state agencies and interested parties are invited to provide written comments or recommendations on the revised proposed parameters and guidelines with RRM. Written comments and recommendations must be submitted to the Commission by **January 24, 2011**. The co-claimants and interested parties may submit written rebuttals to the Commission by **February 23, 2011**. All comments, recommendations and rebuttals will be posted on the Commission's website.

Informal Conference. An informal conference on the above-referenced matter will be set when the record closes.

Please contact Heidi Palchik at (916) 323-8218 if you have questions.

Sincerely,

Drew Bohan
Executive Director

Re: CSM-4464 - Behavioral Intervention Plans Mandate
Revised Proposed Parameters and Guidelines

Dear Ms. Higashi:

Enclosed, please find an original and seven copies of the following materials:

- Revised Proposed Parameters and Guidelines
- Declaration of Diana McDonough
- Declaration of Linda S. Grundhoffer
- Declaration of R. Michael Lenahan
- Exhibit 1: Positive Behavioral Intervention Plan/Functional Analysis Assessment Survey
- Exhibit 2: CSM-4464 Behavioral Intervention Plans Statewide Cost Survey (Due to its voluminous nature, Exhibit 2 follows these exhibits as a separate, stand-alone binder.)
- Exhibit 3: Summary Survey of Hughes Bill Costs
- Exhibit 4: Hughes Bill Survey Data
- Exhibit 5: Hughes Bill Survey with Department of Finance and Claimant Discrepancies
- Exhibit 6: Hughes Bill Survey Reconciling Discrepancies
- Exhibit 7: Summary – Survey of Hughes Bill Costs with Reimbursement Methodology Calculation

As you know, the above-referenced test claim was filed on September 28, 1994, for activities first required of schools in 1993-94. The test claim legislation required behavioral intervention plans for students with serious behavior problems. The Commission issued its Statement of Decision on September 28, 2000 finding that the subject legislation and regulations resulted in a reimbursable mandate. Co-Test Claimants San Diego Unified School District, Butte County Office of Education and San Joaquin County Office of Education

("Co-Test Claimants") filed Proposed Parameters and Guidelines on October 26, 2000.

The Department of Finance ("Finance") petitioned Sacramento Superior Court to overturn the Commission's decision in September 2003. The parties struggled to settle the matter and ultimately reached a settlement, but the Legislature refused to fund it in 2008-09 and again in 2009-10. As a result, in October 2010, seven years after filing, Finance filed to dismiss the Petition with prejudice and Sacramento Superior Court did so on October 29, 2010. Meanwhile, due to the intervening litigation, the Commission has not adopted Parameters and Guidelines – and no claimants have been paid.

In the course of seeking to resolve this matter by settlement in 2007-08, Co-Test Claimants completed a state-wide survey of costs of this mandate and the results were reviewed by Finance. The data obtained in this survey is the basis for the reasonable reimbursement methodology ("RRM") which Co-Test Claimants are proposing today as part of the Revised Proposed Parameters and Guidelines.

As explained more fully in the Declarations and Exhibits accompanying the Revised Proposed Parameters and Guidelines, we believe this is a careful and conservative assessment of the costs of the activities found reimbursable under the Statement of Decision and is reasonable, representative, and cost-effective. Further, given the number of years that have passed since the mandate took effect, it will be always difficult, and often impossible, for school agencies to provide documentation of activities and actual costs to perform the mandate. In addition, the time and effort involved in obtaining such documentation would be extensive and burdensome. Therefore we are hopeful that, with the cooperation of appropriate state agencies, the Commission will adopt the Revised Proposed Parameters and Guidelines, including the proposed RRM, and forward them to the Controller so that school agencies may begin submitting claims as soon as possible.

In addition, pursuant to title 2 of the California Code of Regulations, section 1183.131(a), we would like to propose that all parties convene in an informal conference to discuss the Revised Proposed Parameters and Guidelines and proposed RRM. We understand that an informal conference normally precedes submission of an RRM; however, we are hopeful that we can expedite this lengthy process by submitting our proposed RRM at this time. Please let us know at your earliest convenience when the parties may meet for this purpose.

If you have any questions, please do not hesitate to contact me.

Sincerely,

FAGEN FRIEDMAN & FULFROST, LLP

Diana McDonough

Revised Proposed Parameters and Guidelines

CSM-4464
REVISED PROPOSED PARAMETERS AND GUIDELINES

Chapter 959, Statues of 1990
Education Code section 56523
Title 5, California Code of Regulations section 3001 and 3052

Behavioral Intervention Plans

I. Summary of the Mandate.

On September 28, 2000, the Commission on State Mandates ("Commission") adopted its Statement of Decision finding that Education Code section 56523, as added by Chapter 959, Statutes of 1990, and regulations in Title 5, California Code of Regulations, sections 3001 and 3052 imposed a reimbursable state-mandated new program on school districts. Education Code section 56523 and the implementing regulations require school districts to develop and implement behavioral intervention plans for pupils who exhibit serious behavior problems that interfere with their education.

II. Eligible Claimants.

School districts and county offices of education, as defined in Government Code section 17519, are eligible to claim reimbursement where specified below. Special education local plan areas (SELPAs), whose sole constituents are school districts and county offices of education, are also eligible as specified below. Community colleges and charter schools are not eligible to claim reimbursement.

III. Period of Reimbursement.

Section 17557 of the Government Code states that a test claim must be submitted on or before December 31 following a given fiscal year to establish eligibility for that fiscal year. The test claim for this mandate was filed on September 28, 1994. Therefore, costs incurred on or after July 1, 1993 are eligible for reimbursement, pursuant to these Parameters and Guidelines.

Pursuant to section 17561(d)(1) of the Government Code, all claims for reimbursement of the initial years' costs shall be submitted within 120 days of issuance of the claiming instructions by the State Controller. If the total costs for a given fiscal year do not exceed $1000 (one thousand dollars), no reimbursement shall be allowed, except as otherwise allowed by Government Code section 17564.

IV. Reimbursable Activities.

A. One-Time Activities – SELPA Only.

The direct and indirect costs of labor, materials and supplies, contracted services, equipment and other capital assets, travel, and training incurred for the following mandate components are eligible for reimbursement on a one-time basis:

1. Preparing and Providing SELPA Procedures And Initial Training.

   Preparing procedures for the SELPA local plan regarding the systematic use of behavioral intervention, for the training of behavioral intervention case managers and personnel involved with implementing behavioral intervention plans, for special training for emergency interventions, and for identification of approved behavioral emergency procedures.

B. On-Going Activities – SELPA Only.

The direct and indirect costs of labor, materials and supplies, contracted services, equipment and other capital assets, travel, and training incurred for the following mandate components are eligible for reimbursement on an on-going basis:

1. Training.

   Providing and obtaining training in behavior analysis, positive behavioral interventions, and behavioral emergency interventions. Time spent by personnel who design and conduct the training and time spent by personnel who receive the training is reimbursable. Such personnel include behavioral intervention case managers and personnel involved with implementing behavioral intervention plans, conducting functional analysis assessments, or implementing emergency interventions.

2. Emergency Interventions.

   Preparing reports on the number of Behavioral Emergency Reports to the California Department of Education and Advisory committee on Special Education.

3. Due Process Hearings.

   Preparing for, attending, and documenting and informing appropriate staff concerning the results of any mediation or due process hearing related to functional analysis assessments or the development or implementation of behavioral intervention plans.

C. On-going Activities – Districts and COEs Only.

The direct and indirect costs of labor, materials and supplies, contracted services, equipment and other capital assets, travel, and training incurred for the following mandate components are eligible for reimbursement on an on-going basis:

1. Conducting Functional Analysis Assessments.

   Providing notice to and obtaining written consent from parents to conduct functional analysis assessments; conducting functional analysis assessments; preparing written reports of assessment results; providing copies of assessment reports to parents and the IEP Team; conducting IEP Team meetings to review assessment results.

2. Developing and Evaluating Behavioral Intervention Plans.

   Participating in IEP Team meetings in which behavioral intervention plans are developed, evaluated, or modified, or in which functional analysis assessment results are reviewed; preparing behavioral intervention plans; and developing contingency plans for altering the procedures or the frequency or duration of the procedures. Providing copies of SELPA procedures on behavioral interventions and behavioral emergency interventions to parents and staff.

3. Implementing Behavioral Intervention Plans.

   Implementing and supervising the implementation of behavioral intervention plans; measuring and documenting the frequency, duration, and intensity of targeted behavior and effectiveness of the behavioral intervention plan. Costs of employing personnel with documented training in behavioral analysis including positive behavioral interventions (whether such personnel are new staff or existing staff) to serve as behavioral intervention case managers is reimbursable under this component.

4. Modifications to Behavioral Intervention Plans.

   Providing notice to parents or parent representatives of the need to make minor modifications to the behavioral intervention plans, meeting with parents to review existing program evaluation data; and developing minor modifications to behavioral intervention plans with parents or parent representatives.

5. Emergency Interventions.

Employing emergency interventions; notifying parents and residential care providers after an emergency intervention is used; preparing and maintaining a Behavioral Emergency Report following the use of an emergency intervention; administrative review of Behavioral Emergency Reports; scheduling and conducting an IEP Team meeting to review a Behavioral Emergency Report and the need for a functional analysis assessment, interim behavioral intervention plan, or modification to an existing behavioral intervention plan.

6. Prohibited Interventions.

Training appropriate staff regarding the types of interventions that are prohibited under Title 5, California Code of Regulations section 3052, subdivision (1).

7. Due Process Hearings.

Preparing for, attending, and documenting and informing appropriate staff concerning the results of any mediation or due process hearing related to functional analysis assessments or the development or implementation of behavioral intervention plans.

V. Claim Preparation.

The Commission is adopting a reasonable reimbursement methodology to reimburse claimants for all *direct* and *indirect* costs of the mandated activities for the Behavioral Intervention Plan Mandate, as authorized by Government Code Section 17557, subdivision (b), and 17518.5, in lieu of filing detailed documentation of actual costs.

A. Reasonable Reimbursement Methodology – Definition.

The definition of reasonable reimbursement methodology is contained in Government Code section 17518.5 (as amended by Statutes 2007, Chapter 329 (A.B. 1222)) as follows:

> (a) "Reasonable reimbursement methodology" means a formula for reimbursing local agencies and school districts for costs mandated by the state, as defined in Section 17514.
>
> (b) A reasonable reimbursement methodology shall be based on cost information from a representative sample of eligible claimants, information provided by associations of local agencies and school districts, or other projections of local costs.

(c) A reasonable reimbursement methodology shall consider the variation in costs among local agencies and school districts to implement the mandate in a cost-efficient manner.

(d) Whenever possible, a reasonable reimbursement methodology shall be based on general allocation formulas, uniform cost allowances, and other approximations of local costs mandated by the state, rather than detailed documentation of actual local costs. In cases when local agencies and school districts are projected to incur costs to implement a mandate over a period of more than one fiscal year, the determination of a reasonable reimbursement methodology may consider local costs and state reimbursements over a period of greater than one fiscal year, but not exceeding 10 years.

(e) A reasonable reimbursement methodology may be developed by any of the following:

(1) The Department of Finance.
(2) The Controller.
(3) An affected state agency.
(4) A claimant.
(5) An interested party.

B. Uniform Cost Allowance.

The reasonable reimbursement methodology for the mandated activities shall consist of three uniform cost allowances, one for the one-time activities and two for the on-going activities. The RRM shall allow each eligible claimant to be reimbursed at the adopted unit cost rates per ADA per fiscal year.

1. RRM for One-time Activities – SELPA Only.

The RRM for the one-time activities shall be calculated as follows: Multiply the total number of SELPA ADA for the one fiscal year during which the one-time activities were performed, likely the 1993-94 fiscal year, by the relevant unit cost rate for one-time SELPA activities for that fiscal year. The unit cost rate for one-time SELPA activities is $.32818 for FY 2006-07. This unit cost rate shall be adjusted by the Implicit Price Deflator to the appropriate fiscal year during which the one-time activities were performed.

SELPA ADA figures shall be those found on the CDE website for AB 602, P2 ADA or a comparable source.

2. RRM for On-going Activities – SELPA Only - Training.

The RRM for the on-going activities shall be calculated as follows: Multiply the total number of SELPA ADA for the fiscal year by the relevant unit cost rate for on-going SELPA activities for the fiscal year. The unit cost rate for on-going SELPA activities is $1.18702 for FY 2006-07. This unit cost rate shall be adjusted for each prior and subsequent year by the Implicit Price Deflator.

ADA figures shall be those found on the CDE website for AB602, P2 ADA or a comparable source.

3. RRM for On-going Activities – School Districts and COEs.

The RRM for the on-going activities shall be calculated as follows: Multiply the total number of ADA per fiscal year by the relevant unit cost rate for on-going school district and COE activities for the fiscal year. The unit cost rate for on-going school district and COE activities is $9.45701 for FY 2006-07. This unit cost rate shall be adjusted for each prior and subsequent year by the Implicit Price Deflator.

ADA figures shall be those found on the CDE website for AB602, P2 ADA or a comparable source.

VI. Record Retention.

Pursuant to Government Code section 17558.5, subdivision (a), a reimbursement claim for actual costs filed by a school district pursuant to this chapter is subject to the initiation of an audit by the Controller no later than three years after the date that the actual reimbursement claim is filed or last amended, which ever is later. However, if no funds are appropriated or no payment is made to a claimant for the program for the fiscal year for which the claim is filed, the time for the Controller to initiate an audit shall commence to run from the date of initial payment of the claim. In any case, an audit shall be completed not later than two years after the date that the audit is commenced. Pursuant to Government code section 17561, subdivision (d)(2), the Controller has the authority to audit the application of a reasonable reimbursement methodology. If an audit has been initiated by the Controller during the period subject to audit, the retention period is extended until the ultimate resolution of any audit findings. Claimants must retain documentation that supports the application of the reasonable reimbursement methodology, including ADA documentation.

VII. Offsetting Savings and Other Reimbursements.

Any offsetting savings that the claimant experiences in the same program as a result of the same statutes or executive orders found to contain the mandate shall be deducted from the costs claimed. In addition, reimbursement for this mandate from any source,

including but not limited to, service fees collected, federal funds, and other state funds, shall be identified and deducted from this claim.

The Statement of Decision has not identified any existing general school, COE, or SELPA funding, or special education program funding as an offset to the reimbursable activities.

VIII. State Controller's Claiming Instructions.

Pursuant to Government Code section 17558, subdivision (b), the Controller shall issue claiming instructions for each mandate that requires state reimbursement not later than 60 days after receiving the adopted parameters and guidelines from the Commission, to assist local agencies and school districts in claiming costs to be reimbursed. The claiming instructions shall be derived from the test claim decision and the parameters and guidelines adopted by the Commission.

Pursuant to Government Code section 17561, subdivision (d)(1), issuance of the claiming instructions shall constitute a notice of the right of the local agencies and school districts to file reimbursement claims, based upon parameters and guidelines adopted by the Commission.

IX. Remedies Before the Commission.

Upon request of a local agency or school district, the Commission shall review the claiming instructions issued by the State Controller or any other authorized state agency for reimbursement of mandated costs pursuant to Government Code section 17571. If the Commission determines that the claiming instructions do not conform to the parameters and guidelines, the Commission shall direct the Controller to modify the claiming instructions and the Controller shall modify the claiming instructions to conform to the parameters and guidelines as directed by the Commission.

In addition, requests may be made to amend parameters and guidelines pursuant to Government Code section 17557, subdivision (d), and California Code of Regulations, title 2, section 1183.2.

X. Legal and Factual Basis for the Parameters and Guidelines.

The Statement of Decision is legally binding on all parties and provides the legal and factual basis for the parameters and guidelines. The support for the legal and factual findings is found in the administrative record for the test claim. The administrative record, including the Statement of Decision, is on file with the Commission.

DECLARATION OF DIANA K. MCDONOUGH

I, Diana K. McDonough, declare as follows:

I have personal knowledge of the facts stated herein. If called as a witness, I could and would testify competently to these facts under oath.

1. I am an attorney admitted to practice in California in 1978. I am employed by Fagen Friedman & Fulfrost, LLP and am the attorney of record for Co-Test Claimants, San Diego Unified School District, Butte County Office of Education, and San Joaquin County Office of Education (collectively, "Co-Test Claimants") in this matter.

2. I have represented California school districts as clients since 1979. I have represented school districts in many special education matters, including at administrative hearings, in federal and state trial courts, and in three matters at the Ninth Circuit Court of Appeals. Starting in 1995 I represented CSBA's Education Legal Alliance and associated test claimants in the Special Education Mandated Cost Claim, CSM-3986, which was successfully settled in 2000-2001.

3. In the fall of 1994 Co-Test Claimants filed a test claim with the Commission on Behavioral Intervention Plans (BIP) based on legislation passed in 1990, and regulations promulgated in April 1993; this legislation and regulations are also referred to collectively as "The Hughes Bill." The Commission adopted a Statement of Decision on September 28, 2000, CSM-4464, determining that the subject legislation and regulations constituted a reimbursable state mandate.

4. The Co-Test Claimants timely filed proposed Parameters and Guidelines thirty days later. State agencies objected to the proposed Parameters and Guidelines on various grounds. The parties later met in an attempt to establish the statewide costs of the mandate, but could not agree on a method. Ultimately, on September 26, 2003, the last day before the review period was exhausted, the Department of Finance ("Finance") filed a Petition for Administrative Mandamus in the Sacramento Superior Court, Department of Finance v. Commission on State Mandates (Case No. 03CS01432), seeking to overturn the Commission's determination.

5. On October 4, 2007, approximately one year before the expiration of the five year

statute to bring the Petition to trial, the Deputy Attorney General representing Finance wrote to the Co-Test Claimants to explore settlement again. At that point, Co-Test Claimants, with the support of CSBA's Education Legal Alliance, contacted me and my firm for representation, which we agreed to provide. The parties met and ultimately agreed that they needed cost data to reach a settlement agreement. Co-Test Claimants suggested surveying representative Special Education Local Plan Areas (SELPAs). The SELPA is the organizational unit in the state of California responsible for delivering special education services. There are approximately 120 SELPAs statewide made up of the approximately 950 school districts. Large districts may qualify as a SELPA in and of themselves, but typically a SELPA is a grouping of districts in the same geographical area/county. Every district must belong to a SELPA.

6. From October through December 2007, Co-Test Claimants worked with Finance to develop a survey of costs based on the reimbursable activities identified in the Commission's decision. The Commission had identified the following areas as reimbursable:

- SELPA plan requirements. (Cal. Code of Regs., tit. 2, §§ 3001 and 3052, subd. j).)
- Development and implementation of behavioral intervention plans. (Cal. Code of Regs., tit. 2, §§ 3001 and 3052, subds. (a), (c), (d), (e), and (f).)
- Functional analysis assessments. (Cal. Code of Regs., tit. 2, §§ 3001 and 3052, subds. (b), (c), and (f).)
- Modifications and contingent behavioral intervention plans. (Cal. Code of Regs., tit. 2, §§ 3001 and 3052, subds. (g) and (h).)
- Development and implementation of emergency interventions. (Cal. Code of Regs., tit. 2, §§ 3001 and 3052, subd. (i).)
- Prohibited behavioral intervention plans. (Cal. Code of Regs., tit. 2, §§ 3001 and 3052, subd. (l).)
- Due process hearings. (Cal. Code of Regs., tit. 2, §§ 3001 and 3052, subd. (m).)

I drafted and redrafted a survey document to accurately assess the costs of implementing these mandates and shared these drafts with Finance.

7. Ultimately we decided the survey would best measure the costs of Hughes Bill implementation by seeking information at three different levels within each SELPA: The Behavioral Intervention Case Manager ("BICM") level, the district level, and the SELPA level.

Fagen Friedman & Fulfrost, LLP
70 Washington Street, Suite 205
Oakland, California 94607
Main: 510-550-8200 • Fax: 510-550-8211

The BICM level survey collected information on services provided students. The district level survey collected information on administrative hearings, required state reports, and the district's 2006-07 salary and benefit costs. The SELPA level surveyed the development of required regulations and delivery of training. The parties agreed that the survey would collect information only on the school year just completed, 2006-07, so that school districts would have ready access to recent student Individualized Education Programs (IEPs), staff calendars, salary and benefit costs, and other relevant data. Only the SELPA level survey, which asked for the costs of the initial adoption of Hughes Bill regulations in or about 1993-94 and the initial training necessary to implement the program, collected data on costs outside of 2006-07. A true and correct copy of the final survey is labeled as Exhibit 1 and submitted with these documents.

8. In December 2007, Co-Test Claimants sought a range of volunteer SELPAs to participate in the survey. Co-Test Claimants took great care to ensure participation by both small and large SELPAs, and single district and multi-district SELPAs. However, because substantial staff time was involved to complete the survey and no funding for the effort was available, Co-Test Claimants were not in a position to require participation. Thirty SELPAs signed on to participate in the survey. By May, 2008 Co-Test Claimants had received complete data from 21 SELPAs. These 21 SELPAs represented 11.34% of state ADA in the 2006 – 2007 school year, or 674,263.55 ADA out of 5,946,121.83 total statewide ADA. The California Department of Education website for AB 602 2006-07 P-2 ADA was the source of the ADA numbers. Co-Test Claimants and Finance agreed that this was an adequate sampling.

9. Survey returns were collected in my office under the direction of Kate Parnes, an educational consultant with our firm and a retired SELPA director. Staff sent a copy of all survey returns to Finance. Ms. Parnes called and emailed various SELPA directors and staff members, birddogging many details until the surveys were complete. Our law firm retained Linda Grundhoffer and Mike Lenahan, experienced school business officials, as consultants to compile the data from the surveys. Ms. Grundhoffer and Mr. Lenahan developed a spreadsheet to collect the survey return information and to calculate costs for each of the three levels within each of the 21 SELPAs. A binder containing all of those spreadsheets is Exhibit 2 submitted with these

Fagen Friedman & Fulfrost, LLP
70 Washington Street, Suite 205
Oakland, California 94607
Main: 510-550-8200 • Fax: 510-550-8211

documents.

10. The survey results were reviewed and modified by Finance until Finance and the Co-Test Claimants agreed they were accurate. The survey results demonstrated a wide range of 2006-07 costs per ADA, from $1.3096 dollars per ADA in Inyo County to $81.9353 dollars per ADA in Modoc County. The average 2006-07 cost per ADA was $10.64403 dollars. A document developed by Ms. Grundhoffer and Mr. Lenahan entitled Summary-Survey of Hughes Bill Costs is submitted with these documents as Exhibit 3. That document shows, by SELPA, the 2006-07 costs, the 2006-07 costs per ADA, and the one time costs, as well as the relevant totals and averages. The total statewide retroactive costs from the 1993-94 to 2008-09 school years, including the total statewide extrapolated annual costs and the total statewide extrapolated one-time costs, was $1,014,605,046.17. Ms. Grundhoffer and Mr. Lenahan developed a document with that calculation entitled Hughes Bill Survey Data, a copy of which is submitted with these documents as Exhibit 4.

11. From July to November 2008, Co-Test Claimants engaged in settlement negotiations with Finance. The parties reached a final settlement, but the legislature failed to fund it in 2008-09 and again in 2009-10.

12. On October 26, 2010, Finance filed a dismissal with prejudice of its appeal in the Sacramento Superior Court. On October 29, 2010, the superior court endorsed and filed the dismissal with prejudice. As a result of the dismissal of the appeal, the Commission on State Mandates' September 28, 2000 Statement of Decision stands.

13. Co-Test Claimants filed proposed Parameters and Guidelines October 26, 2000, a little more than ten years ago. Since that time, the law has been amended to provide for a Reasonable Reimbursement Methodology under Government Code section 17518.5. The code section requires that the methodology be representative, take account of the variation in costs among school districts to implement the mandate in a cost-effective manner, and suggests it be based on a general allocation formula.

14. Co-Test Claimants are filing a Revised Proposed Parameters and Guidelines to incorporate the Reasonable Reimbursement Methodology based on information we collected from

Fagen Friedman & Fulfrost, LLP
70 Washington Street, Suite 205
Oakland, California 94607
Main: 510-550-8200 • Fax: 510-550-8211

the survey described above. We propose that districts and COEs be reimbursed for the Behavioral Intervention Plan mandates annual activities based on $9.45701 per ADA in 2006-07, adjusted by the Implicit Price Deflator for the applicable year. We propose that SELPAs be reimbursed $.32818 per 2006-07 ADA, one-time only, for the development of required regulations, adjusted by the Implicit Price Deflator for the applicable year; and at $1.18702 per 2006-07 ADA for on-going activities, adjusted by the Implicit Price Deflator for the applicable year.

15. Our survey represents 11.34% of ADA statewide in 2006-07. Participating were 21 SELPAs which included 197 school districts and 11 County Offices of Education. Districts ranged in size from Fresno Unified (71,980 ADA) to some, like Lincoln Elementary in Marin county, with fewer than 100 ADA. Some were in urban areas (South San Diego County, Fresno Unified, Tri-City Los Angeles), some in rural (Mono and Modoc Counties), and some suburban (Poway Unified, Clovis Unified). They ranged from the southern border of the state (South County San Diego) to the northern border (Modoc). We believe a review of this data will establish its representative nature.

16. In our data collection we did everything we could to collect the most reliable, non-inflated data. We stated in the survey instructions repeatedly that accuracy was important. We explained that the data could not "include any activities related to the development of behavior support plans (non-Hughes Bill)." (Survey, BICM cover sheet.) On the salary data, District Survey at p. 4, we asked for the "average" salary and benefits level, not the "actual" level, although many practitioners assured us that psychologists and BICMs involved in this mandate were likely to be much more experienced than the average and therefore placed higher on the schedule. When compiling the information, Ms. Grundhoffer, Mr. Lenahan, and I determined that it was best to eliminate the data in response to SELPA Survey question 9 on SELPA Survey at p. 2 because it was too difficult to accurately assess. When reviewing the returns totals with Finance, most of the adjustments to our totals were upward – indicating that whenever there was a question, we took a careful and pessimistic look at the data.

DECLARATION OF LINDA S. GRUNDHOFFER

I, Linda S. Grundhoffer, declare as follows:

1. I have personal knowledge of the facts stated herein. If called as a witness, I could and would competently testify to these facts.

2. I am a consultant for CSM-4464, the Behavioral Intervention Plans Test Claim before the Commission on State Mandates. Co-Test Claimants are San Diego Unified School District, Butte County Office of Education, and San Joaquin County Office of Education (collectively, "Co-Test Claimants"). I am currently employed as a State Trustee for the California Department of Education, a position I have held for four years. In my capacity as State Trustee, I oversee the fiscal recovery of West Contra Costa Unified School District, a school district that has had a state loan for the past 19 years. I am also a consultant to the Fiscal Crisis and Asset Management Team, a position I have held for six years. In that capacity I assist districts who are fiscally unstable or who have sought management assistance voluntarily. I also have approximately 10 years experience as a school business official. My most recent position with a school district was as Financial Services Officer for the Oakland Unified School District. My duties included planning, implementing, and monitoring the district budget. Previous to that, I was the Director of Business Services for the Contra Costa County Office of Education for three years. My duties included the administration of AB1200 oversight for 18 school districts. In the course of my professional duties I calculated and reviewed costs for programs, and based on those calculations, developed school district budgets involving $100 million or more. I have significant experience compiling and reviewing financial data.

3. In December 2007, Mike Lenahan and I were retained by Fagen, Friedman & Fulfrost to compile the data for the Hughes Bill Cost Survey. In December 2007 I reviewed the draft survey and told Diana McDonough, attorney for Claimants, that we could compile a reasonable cost study based on the information it would elicit. The Hughes Bill Cost Survey is based on the reimbursable activities identified in the Commission on State Mandates decision. The survey was designed to measure the costs of Hughes Bill implementation in the 2006-07 school year, at three different levels within each SELPA: The Behavioral Intervention Case

Manager ("BICM") level, the district Special Education Director level, and the Special Education Local Plan Area ("SELPA") Director level. A true and correct copy of the final survey is submitted with these Revised Proposed Parameters and Guidelines as Exhibit 1.

4. In December 2007, Co-Test Claimants sought a range of volunteer SELPAs to participate in the survey. In January and February, 2008, SELPAs submitted the survey returns. I spoke with many business and special education personnel during that period, clarifying questions and assisting them in providing the information required. In total, 30 (thirty) SELPAs attempted to complete the survey. However, we received complete data from only 21 (twenty-one) SELPAs. The final survey results include only data obtained from the 21 SELPAs that fully completed the survey. These 21 SELPAs represented 11.34% of state ADA in the 2006 – 2007 school year, or 674,263.55 ADA out of 5,946,121.83 total statewide ADA. The California Department of Education website for AB 602 2006-07 P-2 ADA was the source of the ADA numbers.

5. To compile the data collected from the surveys, Mr. Lenahan and I developed an input spreadsheet for each of the three levels of the survey: BICM, District, and SELPA. We worked with Ms. McDonough to make sure that the result would be understandable, would accurately reflect the survey information, and would reduce the services to a cost figure. While we considered using clerks to assist us in inputting the data, we ultimately decided to do it ourselves.

6. The system we developed was as follows. Survey returns were sent to Fagen Friedman & Fulfrost's office in Oakland. Kate Parnes, an educational consultant with Fagen Friedman & Fulfrost and a retired SELPA director, checked them for completeness and called school personnel to obtain missing information. Once all information was in, Fagen Friedman & Fulfrost's staff made a copy which was sent to the Department of Finance ("Finance"). Then the original was turned over to Mr. Lenahan or me for compilation. We often needed to call school personnel while compiling the data as we became aware of missing information. We always checked to obtain the actual information, and if we were unsuccessful we ultimately did not use any of that SELPA's information. We did not estimate.

7. Mr. Lenahan and I summarized our results on spreadsheets and shared the template

Fagen Friedman & Fulfrost, LLP

with the Finance personnel. A true and correct copy of the documents on which we compiled the survey results is included in a binder, submitted with these documents as Exhibit 2.

8. We entered and compared Finance's results with ours and resolved discrepancies with them by phone or email. A true and correct copy of the spreadsheet showing the Finance results and our results is submitted with these documents as Exhibit 5, "Hughes Bill Survey with Department of Finance and Claimant Discrepancies." The differences are reflected in the columns titled "DOF Hours" and "Our Hours." Hours listed are the staff hours recorded to perform the various tasks surveyed. We met with DOF personnel and ultimately agreed on the numbers on the spreadsheet in the binder as Exhibit 6, "Hughes Bill Survey Reconciling Discrepancies." That exhibit highlights the cells where changes were made based on reviewing the figures with DOF.

9. The survey results demonstrated a wide range of 2006-07 costs per ADA, from $1.3096 dollars per ADA in Inyo County to $81.9353 dollars per ADA in Modoc County. The average 2006-07 cost per ADA was $10.64403 dollars. I was not surprised by the range in cost figures among districts and SELPAs. In my experience special education costs can vary widely from year to year in the same district depending on the needs of particular students, let alone among districts which may vary substantially depending on community advocates and litigation. Further districts in remote locations may have high costs based on obtaining particular services in remote locations. The total statewide retroactive costs from the 1993-94 to 2008-09 school years was $1,014,605,046.17 dollars, including the total statewide extrapolated annual costs and the total statewide extrapolated one-time costs.

Oakland, California 94607
Main: 510-550-8200 • Fax: 510-550-8211

DECLARATION OF R. MICHAEL LENAHAN

I, R. Michael Lenahan, declare as follows:

1. I have personal knowledge of the facts stated herein. If called as a witness, I could and would competently testify to these facts.

2. I am a consultant on CSM-4464, the Behavioral Intervention Plans Test Claim before the Commission on State Mandates. The Co-Test Claimants are San Diego Unified School District, Butte County Office of Education, and San Joaquin County Office of Education (collectively, "Co-Test Claimants"). My education includes a B.S. in Accounting and an M.B.A. in Finance. I am retired after over 30 years as a school business official. When I retired in 2005, I was the Associate Superintendent of Alameda County Office of Education for Business, a position I had held for four years. My duties included the fiscal review of Alameda County school district budgets. Previous to that position, for seven years I was Deputy Superintendent for Business at Fairfield-Suisun Unified School District, approximately 20,000 ADA. Previous to that position, I worked for five other school districts as a business official. In the course of my professional duties I calculated and reviewed costs for programs and based on those calculations, developed school district budgets involving $100 million or more. I have significant experience compiling and reviewing financial data.

3. In December 2007, Linda Grundhoffer and I were retained by Fagen Friedman & Fulfrost to compile the data obtained in response to the Hughes Bill Cost Survey conducted between January and June 2008. The total statewide retroactive costs from the 1993-94 to 2008-09 school years were $1,014,605,046.17 dollars; this figure includes the total statewide extrapolated annual costs and the total statewide extrapolated one-time costs. A true and correct copy of the documents developed during this process is included in a binder submitted with these documents as Exhibit 2.

4. I reviewed the survey results with Ms. McDonough to develop the reasonable reimbursement methodology. We decided the simplest and most reliable approach would be to use a per ADA cost figure applying the appropriate deflator depending on the year. I totaled the annual ongoing costs of the 21 SELPAs. I made a separate total of the annual ongoing costs for

BICMS and Districts. Then I divided the total cost of all on-going activities at each level by the 2006-07 P-2 ADA. The resulting unit cost rate for on-going SELPA activities was $1.18702. The resulting unit cost rate for on-going school district and BICM activities was $9.45701. With respect to one-time activities, I calculated the per ADA unit cost rate for the one-time activities of developing BIP procedures at the SELPA level by dividing the total of $221.279.26 by the ADA total of surveyed SELPAs, 674,263.55, for a result of $.32818 (FY 2006-07). A true and correct copy of the spreadsheet showing the calculations of Reasonable Reimbursement Methodology unit cost rates is submitted with these documents as Exhibit 7.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct.

EXECUTED December 15, 2010 in Oakland, California.

R. Michael Lenahan, Consultant

Positive Behavioral Intervention Plan/Functional Analysis Assessment Survey

Three Levels: BICM – District Special Education Director – SELPA Director

January 2008

Dear SELPA Director:

As you know, your SELPA has volunteered to provide information on the costs of Hughes Bill implementation. This information will be used to further negotiations on possible Hughes Bill mandate reimbursement for all SELPAs, districts and County offices. The survey data sought are negotiation points in ongoing settlement discussions with the Department of Finance. The survey is not intended to signify the Department's agreement that all surveyed activities are reimbursable.

The survey is in three parts - a BICM level, a District Special Education Director level, and a SELPA Director level. The BICM and District Director surveys collect data from the **2006-07** school year only. The District director and SELPA director surveys both include spreadsheets to calculate hourly rate. The SELPA survey asks you to cumulate the District data and to provide SELPA level data from activities associated with training and Local Plan procedures. Note that each person working as a BICM in the SELPA in 2006-07, or his/her successor, should complete the survey. **As the SELPA director, you are responsible for distributing the survey to your member districts, obtaining their cooperation, and returning their data to us. Please make sure that you include County office BICMs and programs.**

We know this survey will require effort but your accuracy is important in obtaining valid data. Please remember to black out any personally identifiable student information that exists on any documents attached to the survey. Also, where you are asked to identify personnel, please list the positions, not the person's name. Finally, make sure that people completing this survey keep track of their time and provide it in the space indicated since we hope to obtain reimbursement for that.

As you know, CSBA's Education Legal Alliance has contracted with the law firm Fagen, Friedman & Fulfrost to represent school agencies in this matter. Kate Parnes, a retired SELPA director, is an educational consultant with Fagen Friedman. If you have any questions about the process or a particular part of the survey, please contact Kate at Fagen Friedman's Oakland office, 510-550-8200, by cell at 650-400-2288, or by email at kparnes@fagenfriedman.com. For questions on the calculation of the hourly rate on the spreadsheet, please contact Mike Lenahan at rmlenahan@gmail.com.

Thank you very much for your work. It is a valuable service. Return your completed surveys to Kate Parnes at Fagen, Friedman & Fulfrost, 70 Washington Street, Suite 205, Oakland, CA 94607 by Friday, February 1, 2008.

Positive Behavioral Intervention Plan/Functional Analysis Assessment Survey

BICM

Dear Behavioral Intervention Case Manager (BICM):

We need your help in determining the costs of Hughes Bill implementation by answering this survey. The purpose is to identify the costs associated with this added state requirement. The information will be used to further negotiations on possible Hughes Bill reimbursement.

The survey asks you for the number of Functional Analysis Assessments (FAA) and Positive Behavioral Intervention Plans (PBIP) you or your predecessor were involved with in the **2006-07** school year and the amount of time those efforts took. We are asking for this information for the 2006-07 school year only and only for Hughes Bill PBIP/FAA activities. This does not include any activities related to the development of behavior support plans (non-Hughes Bill).

We understand that it will require some effort to reconstruct your 2006-07 schedule, but your accuracy is very important if we are to collect valid data. We suggest that you obtain copies of all your PBIP students' 2006-07 IEPs in order to provide the information requested. **Please note that each BICM working in the district/SELPA/County office in 2006-07 should complete the survey. If a BICM has left, please have the BICM's successor or another knowledgeable person complete the form.**

Please remember to:

- black out any personally identifiable student information that exists on any documents attached to the survey;
- identify personnel by position, not name; and
- record time required in hours, or portions thereof, not in days or weeks.

If you have any questions on the survey, please contact Kate Parnes, a retired SELPA director working with the law firm Fagen, Friedman & Fulfrost. Kate can be reached at Fagen Friedman's Oakland office, 510-550-8200, by cell at 650-400-2288 or by email at kparnes@fagenfriedman.com. Feel free to annotate data to provide clarity. **Please indicate the amount of time it took for you to complete this survey in the space provided.**

Return your completed survey to your district or SELPA supervisor by January ___, 2008. Please provide a copy of your completed survey to all relevant district directors.

Thank you very much for your help in this important effort.

SELPA:_____ Date:_____
School District (if serving multiple districts, list all):_____

Positive Behavioral Intervention Plan/Functional Analysis Assessment Survey

District Level Survey – Special Education Director

Dear Special Education Director:

We need your help in determining the costs of Hughes Bill implementation by answering this survey. The purpose is to identify costs associated with the mandates generated from the Hughes Bill at the District level. BICMs and the SELPA director are also completing surveys. This information will be used to further negotiations on possible Hughes Bill mandate reimbursement for all SELPAs, districts, and County offices. For purposes of the survey, we are focusing on the 2006-07 school year.

We recognize that the survey will require effort on your part. Your district superintendent will be receiving a letter from the California School Boards Association explaining the purpose of the survey and the time commitment involved.

Please remember:

- to black out any personally identifiable student information that exists on any documents attached to the survey;
- to identify personnel by position, not name; and
- to record time required in hours, or portions thereof, not in days or weeks.

Note that a critical part of this survey is to provide the hourly rate of each district position that you list or that one of your BICMs has listed. Your district BICMs should provide you a copy of their completed surveys to allow you or your business office to do this.

When complete, return this survey, along with those completed by your BICMs, to the SELPA office by **January ___, 2008**. If you have any questions, please contact Kate Parnes, a retired SELPA director now working with the law firm Fagen, Friedman & Fulfrost. Kate can be reached at Fagen Friedman's Oakland office, 510-550-8200, by cell at 650-400-2288 or by email at kparnes@fagenfriedman.com. For questions on the calculation of hourly rate, please contact Mike Lenahan at rmlenahan@gmail.com.

Thank you so much for your help in this important endeavor.

Positive Behavioral Intervention Plan/Functional Analysis Assessment Survey

SELPA Level Survey

Dear SELPA Director:

The purpose of this survey is to collect information on the costs of implementing the Hughes Bill, including PBIPs/FAAs. The information asked for below is in two parts. Part I asks that you provide summary data on the number of survey forms returned to you and some additional information. Part II asks for data on Hughes Bill procedures, training, and data reporting which SELPA staff provide. Please be sure to report only for SELPA staff, not district staff. For questions, contact Kate Parnes at Fagen Friedman's Oakland Office at 510-550-8200, by cell at 650-400-2288, or by email at kparnes@fagenfriedman.com. For questions on the spreadsheet, contact Mike Lenahan at rmlenahan@gmail.com.

	Position	# of Hours
17. How much total actual time in hours or portions thereof was spent, by position, to lead the most recent training for PBIP implementers? a. What year did this occur? _____ b. What is the basis for your estimate? _____ c. How often does your SELPA do this? _____ d. If provided by independent contractor for SELPA, state the cost and list what is included. $_____ _____	17. _____ _____ _____	17. _____ _____ _____
18. How much total actual time in hours or portions thereof was spent, by position, to design training on emergency behavioral interventions (one time only)? a. What year did this occur? _____ b. What is the basis for your estimate? _____	18. _____ _____ _____	18. _____ _____ _____
19. How much total actual time in hours or portions thereof was spent, by position, for the most recent update of training on emergency behavioral intereventions? a. What year did this occur? _____ b. What is the basis for your estimate? _____ c. How often does your SELPA do this? _____	19. _____ _____ _____	19. _____ _____ _____
20. How much total actual time in hours or portions thereof was spent, by position, to lead the most recent training on emergency behavioral interventions? a. What year did this occur? _____ b. What is the basis for your estimate? _____ c. How often does your SELPA do this? _____ d. If provided by independent contractor for SELPA, state the cost and list what is included. $_____ _____	20. _____ _____ _____	20. _____ _____ _____

21. If you held initial BICM certification training in 2006-07, what was the cost other than any listed above – i.e., did BICMs pay a registration fee, were they paid a daily rate, were there substitute costs? Also, please state who paid the costs – i.e., individuals, district, county office, SELPA.

Cost: $_____ **For:** _____ **Paid By:** _____
Cost: $_____ **For:** _____ **Paid By:** _____
Cost: $_____ **For:** _____ **Paid By:** _____
Cost: $_____ **For:** _____ **Paid By:** _____
Cost: $_____ **For:** _____ **Paid By:** _____

	# Attdg.	District/Position	# of Hours
22. If your SELPA held a BICM training in 2006-07, list the number of BICMs/ prospective BICMs who attended by district and position, i.e., teacher, psychologist, other, and the length of the training in hours (i.e., 4 hours).	22.	22.	22.
23. If your SELPA held a training for PBIP implementers in 2006-07, list the number of persons who attended by district and position, and the length of the training in hours.	23.	23.	23.
24. If your SELPA held a training on emergency behavioral intervention in 2006-07, list the number of persons who attended by district and position, and the length of the training in hours.	24.	24.	24.

25. If your SELPA paid for training for BICMs or PBIP implementers in 2006-07 by sending them to trainings, what was the cost?
$_____
   a. Is this figure typical of annual costs and for how long has it been typical? _____
   b. If not, what have you typically done? _____
   c. What do you intend to do in the future? _____

Note: Please provide sample evidence of all trainings such as flyers, sign-in sheets, etc.

C. Other SELPA Staff Activities:

	Position	# of Hours
26. Indicate total actual time in hours or portions thereof spent in 2006-07, by SELPA position, to collect data from the "Behavioral Emergency Reports" to be reported annually to CDE.	26. _____ _____ _____ _____	26. _____ _____ _____ _____
27. Indicate the total actual time in hours or portions thereof spent in 2006-07 by SELPA position in due process hearings (including mediation) and other related due process activities solely on Hughes Bill issues. (Do not duplicate data from District directors.)	27. _____ _____ _____ _____	27. _____ _____ _____ _____

28. For each SELPA staff position listed above in Part A, B or C, please provide compensation data **for 2006-07** on the attached certificated/classified spreadsheets. For each position listed, provide the average salary and benefit level.

Please indicate the amount of time in hours or portions thereof spent to complete this document. _____

Thank you very much for taking the time to complete this survey.

Please See Binder Labeled Exhibit 2

Hughes Bill Survey Data Hughes Bill Claimants

In 2007-08, Butte County Office of Education, San Diego Unified School District, and San Joaquin County Office of Education, the school agencies who were the Claimants in the Hughes Bill Test Claim, surveyed a number of California SELPAs regarding the costs of implementing the Hughes Bill. The Claimants received complete data from 21 SELPAs representing 11.34% of state ADA and the recorded results were reviewed and modified by the Department of Finance (DOF) until DOF and the Claimants agreed they were accurate.

Below we show the survey results on the first line of each section, the statewide total extrapolated from the survey data on the second line, and the final number used in calculating the settlement numbers on the third line, where relevant. The CDE website for AB 602 2006-07 P-2 ADA is the source of the ADA numbers.

ADA

674,263.55	Survey ADA	2006-07 P-2 AB602 (11.34% of total)
5,946,121.83	Total statewide ADA	2006-07 P-2 AB602

Annual costs

$ 7,176,878.22	Surveyed SELPAs' costs, 2006-07 ($10.64403 per ADA)
63,290,670.62	Total statewide extrapolated costs, 2006-07 (ADA x $ 10.64403)
66,157,738.00	Total statewide extrapolated costs, 2007-08 (2006-07 costs + 4.53% COLA)

One time costs

$ 221,279.26	Surveyed SELPAs' one-time costs
	Total statewide extrapolated one-time costs
1,951,316.23	($221,279.26 = 11.34% of this total)

Retroactive costs

$1,012,650,729.94	Statewide retroactive costs (63,290,670.62 x 16 years, 1993-94 – 2008-09)
+ 1,951,316.23	Total statewide extrapolated one-time costs
$1,014,605,046.17	Total statewide retroactive costs

Doc 159793

January 24, 2011

Mr. Drew Bohan
Executive Director
Commission on State Mandates
980 Ninth Street, Suite 300
Sacramento, CA 95814

RE: **Revised Proposed Parameters and Guidelines with Reasonable Reimbursement Methodology, Comment Period, and Informal Conference**
Behavioral Intervention Plan, CSM-4464
Education Code Section 56523
Statutes 1990, Chapter 959
Title 5, California Code of Regulations, Sections 3001 and 3052
Butte County Office of Education, San Joaquin County Office of Education, and San Diego Unified School District, Claimants

Dear Mr. Bohan:

We reviewed the proposed Parameters and Guidelines (P's & G's) for the Behavioral Intervention Plan program as communicated by the Commission on December 27, 2010. The State Controller's Office (SCO) comments to the proposed P's & G's are as follows:

The proposed P's & G's allow the claimant to be reimbursed using three calculated reasonable reimbursement methodology (RRM) rates.

On October 4, 2007, the Department of Finance in a settlement agreement with the co-test claimants agreed to create a survey that would be administered to Special Education Local Plan Areas (SELPA) to establish representative cost data. All parties agreed that the survey would collect information only on the school year just completed, 2006-07, so that school districts would have ready access to recent student Individualized Education Programs (IEP), staff calendars, salary and benefit cost, and other relevant data. From October through December 2007, co-test claimants worked with the Department of Finance to develop a survey of cost based on the reimbursable activities identified in the Commission's decision.

The co-test claimants received 21 completed SELPA surveys from a possible 120 SELPA statewide. The surveys represented approximately 12% of the total eligible state SELPA in the 2006-07 school year. According to the Declaration of Diana K. McDonough, both the co-test claimants and the Department of Finance agreed that this was an adequate sampling. From the resulting survey, three RRM rates were calculated. According to the proposed P's and G's an

Implicit Price Deflator (IPD) would be used to adjust the 2006-07 calculated rates to the applicable fiscal year of claim.

As stated in Government Code Section 17518.5 (d), "....In cases when local agencies and school districts are projected to incur costs to implement a mandate over a period of more than one fiscal year, the determination of a reasonable reimbursement methodology may consider local costs and state reimbursements over a period of greater than one fiscal year, but not exceeding 10 years." The calculated RRM rates were derived from a single fiscal year of cost data and the reimbursement period in question is over 15 years. IPD adjustments cannot give an accurate RRM rate for such a long reimbursement period based on a single year of cost data.

The survey results for the calculation of the proposed RRM should be based on a sound methodology. Because the RRM proposed rates were based on 1) unaudited cost data; 2) cost data for only a single school year (2006-07); 3) data from only 12% of SELPA and; 4) to be utilized for over an 18 year period, the State Controller's Office cannot support the revised proposed parameters and guidelines for the Behavioral Intervention Plan (CSM-4464) program.

If you have any questions, please contact Dennis Speciale at (916) 324-0254 or email at dspeciale@sco.ca.gov.

Sincerely,

JAY LAL, Section Manager
Local Reimbursements Section

Re: **Rebuttal to SCO's Comments Regarding Revised Proposed Parameters and Guidelines with Reasonable Reimbursement Methodology**
Behavioral Intervention Plans, CSM-4464
Chapter 959, Statues of 1990
Education Code section 56523
Title 5, California Code of Regulations section 3001 and 3052

Dear Mr. Bohan:

In accordance with section 1183.131(f) of Title 2 of the California Code of Regulations, Co-Test Claimants submit the following rebuttal to the State Controller's Office ("SCO") comments dated January 24, 2011.

SCO states that it cannot support the proposed reasonable reimbursement methodology ("RRM") because the rates are based on "1) unaudited cost data; 2) cost data for only a single school year (2006-07); 3) data from only 12% of SELPA[s] and; 4) to be utilized for over an 18 year period." Co-Test Claimants respond to each of SCO's objections in turn.

1. Unaudited Cost Data

The statutory scheme governing RRMs does not require or even contemplate audited data. In fact, such a requirement at this stage is impossible and illogical. An audit requirement would directly conflict with Government Code section 17557(b) which allows the Commission, in adopting parameters and guidelines pursuant to the test claim decision, to adopt an RRM. At this RRM development stage, no audited data yet exists. Reimbursement claims are subject to audit by the Controller only after they have been filed and thus, necessarily, after the adoption of an RRM. (Gov. Code, § 17558.5.)

Commission on
State Mandates

In fact, contrary to SCO's desire for "audited" cost data, the applicable statute actually sets standards for RRM source data well below the "audited" figures the SCO seeks, - standards which Co-Test Claimants here well exceed. Government Code section 17518.5, subdivision (b) describes the data on which the RRM shall be based, none of which is required to be audited. It provides, "A reasonable reimbursement methodology shall be based on cost information from a representative sample of eligible claimants, information provided by associations of local agencies and school districts, or *other projections* of local costs." (Gov. Code, § 17518.5, subd. (b) (*emphasis added*).) Co-Test Claimants' survey is substantially more reliable than "other projections of local costs" – a standard the statute finds acceptable. Co-Test Claimants' survey information is also substantially more reliable than the RRM bases allowed in Section 17518.5(d), which provides "*Whenever possible*, a reasonable reimbursement methodology shall be based on general allocation formulas, uniform cost allowances, and *other approximations* of local costs mandated by the state, rather than detailed documentation of actual local costs." (Gov. Code, § 17518.5, subd. (d) (*emphasis added*).) "Other approximations" is hardly audited cost data. With the qualifier "whenever possible," subdivision (d) intimates that even less may be adequate although, as noted, claimants need not rely on that exception.

In this case, Co-Test Claimants used a detailed, comprehensive, and rigorous survey to obtain cost information directly from a representative sample of eligible claimants. The resulting cost data is at a level of accuracy far in excess of the statutory requirements. It meets the test of being the type of information generally relied upon by persons in the conduct of serious affairs, the Commission's own evidentiary standard. (Cal. Code Regs., tit.2, § 1186.63, subd. (b).) While audited data might be an asset, it is not one available here, - and it is not required or even contemplated by the statute.

2. Cost Data from 2006-07 School Year

There is no requirement that cost data be drawn from more than one school year. The 2006-07 school year was selected because, in January 2008 when the cost information was gathered, that was the most recent complete school year. Thus, survey respondents had ready access to current data regarding the number of students with BIPs, the identity of persons performing tasks related to each program activity, the amount of time associated with each activity, the salary and benefit costs of employees providing the service, and other relevant information. Collecting such data, data not maintained in the usual course of business, from school years previous to 2006-07 would have been difficult, if not impossible, and would have resulted in figures less accurate

Received
February 23, 2011
Commission on
State Mandates

than those obtained.[1] In short, the recency of the cost data ensured that the survey was as accurate as possible.

Additionally, the representative sample of survey respondents compensates for the fact that this was not a multi-year survey.[2] This is because the scope of the BIP mandate and its necessary activities has not changed since the 1993-94 school year when it became effective. The only variable is the needs of the students served in any particular district. As a result, though BIP mandate costs may vary from year to year for an individual school district, the average for all school districts remains constant with time. In short, the recency of the cost data at the time it was collected, the great care taken to survey a representative sample of claimants, and the unchanged mandate requirements ensure that a single year of data is sufficient.

3. Data from 12% of SELPAs

Here again, SCO suggests a requirement where none exists. There is no requirement regarding a minimum sample size, so long as the sample is large enough to be representative. Thus, the pertinent issue is not the size of the sample but its representative nature. SCO does not claim that the sample is not representative, nor could it. Here, 21 of the State's 119 SELPAs responded to the survey. The 21 SELPAs were made up of 197 school districts and 11 county offices of education, claiming 12% of ADA statewide. They were representative of all eligible SELPAs. They spanned small and large SELPAs (Calaveras County and South County San Diego), single-district and multi-district SELPAs (Fresno Unified and Butte County), rural, urban, and suburban SELPAs (Mono, Tri-City Los Angeles, and Marin County), and were geographically diverse (Poway and Modoc). The diversity of SELPAs surveyed ensures that the RRM was derived from an adequately representative sample of the eligible claimants.

---

[1] It must be noted that the various documents required to determine the cost to carry out the BIP mandate activities are not necessarily maintained by school districts for any length of time. In fact, staff calendars are not maintained at all. In addition, certain special education records that would be crucial in determining actual costs are classified as mandatory interim records, and as the name suggest, are not maintained permanently. (Cal. Code Regs., tit.5, § 432, subd. (b)(2)(C).) "Unless forwarded to another district, mandatory interim pupil records may be adjudged to be disposable when the student leaves the district or when their usefulness ceases. Destruction shall be in accordance with Section 16027 of this title during the third school year following such classification." (Cal. Code Regs., tit. 5, § 437, subd. (c).)

[2] The representative nature of the survey respondents is further discussed below, in Part 3.

4. RRM to be Utilized for over an 18-year Period

SCO's final argument is that the proposed RRM will be utilized for over an 18-year period, in violation of Government Code section 17518.5, subdivision (d). There is no clear legal basis for this claim, as discussed more fully below. Further, practicality requires that RRMs extend well beyond 10 years given the Commission's current backlog and the fact that, as a result, the typical test claim reaches the claiming process more than 10 years after filing.

SCO supports its objection to the 18-year period based on Government Code section 17518.5, subdivision (d), but the statutory language is not as straightforward as SCO suggests. It reads: "In cases when local agencies and school districts are projected to incur costs to implement a mandate over a period of more than one fiscal year, the *determination* of a reasonable reimbursement methodology may consider local costs and state reimbursements over a period of greater than one fiscal year, but not exceeding 10 years." (Gov. Code, § 17518.5, subd. (d) (*emphasis added*).)

SCO objects to the *application* of the proposed RRM for a period exceeding 10 years, a situation not clearly covered by the statute. A plain reading of the statute would suggest, rather, that the *determination*, or the development or creation of the RRM, would be subject to the 10 year limitation – not its application. In other words, in determining the RRM the Commission would be limited to the consideration of 10 years of data. Here, Co-Test Claimants fell well within that limitation, only using cost data from a one-year period to determine the proposed RRM.

If, however, this section does in fact limit the *application* of the RRM, we believe using the RRM as Co-Test Claimants propose is consistent with the statute. Section 17518.5, subd. (d) does not specify whether the application of the RRM is prospective, retroactive, or both. A logical reading of this section might be that the RRM is prospective, meaning from 2011 (assuming the Commission adopts the proposed RRM) to 2021. Or, it could apply retroactively to claims from 2001 to 2011. Another reading would be that the RRM apply from 2006 (the year of the survey cost data) to 2016. In the other direction, the RRM would apply from 1996 to 2006. None of these alternatives is patently the proper interpretation and, under the circumstances, multiple factors militate toward applying a longer time period and toward applying the RRM retroactively as well as prospectively. Here we seek to apply the RRM retroactively 18 years (1993-94 through 2010-11) and prospectively 10 years or as the Commission allows for the reasons set forth below.

Received
February 23, 2011
Commission on
State Mandates

A. The RRM should apply retroactively because actual documentation is not available for the claims through no fault of claimants.

1. Claimants had no notice of what documentation would be required because no Parameters and Guidelines were adopted and no claiming instructions issued.

Retroactive application of the RRM should be permitted to remedy the lack of documentation for the past 18 years. Mandate documentation requirements are controlled by the parameters and guidelines and noticed in the ensuing claiming instructions from SCO, which are released to all eligible claimants after the adoption of parameters and guidelines. (Gov. Code, § 17558; Cal. Code Regs., tit.2, § 1183.1, subd. (a)(6).) After 18 years, the parties in this case remain without parameters and guidelines. Therefore, there has been no notice to eligible claimants to collect documentation for reimbursement, and no notice regarding what specific documentation should be maintained.

2. Current law does not otherwise require claimants to retain the records necessary to document their claims for the past 18 years.

In addition, records related to BIP mandate activities are not necessarily maintained permanently by school districts, or even at all. In particular, staff calendars, which are an integral part of determining the number of hours required to implement the various BIP mandate activities, are not maintained at all by claimants. As a result, a 10-year limitation could well make it impossible for claimants to seek reimbursement for the majority of the past years of the BIP mandate.

3. State agencies, not Co-Test Claimants, filed the court appeal which delayed the Parameters and Guidelines after the Commission adopted the decision in 2000.

The excessive delay in this case is not due to Co-Test Claimants, but rather the state agencies. The Commission's Statement of Decision was issued in 2000, six years after Co-Test Claimants' test claim was filed. The Department of Finance appealed the decision in 2003 but failed to move the appeal forward or to fund the settlement the parties reached in good faith. Only in October 2010, a full 10 years after the Decision was issued and seven years after the appeal, did the Department of Finance dismiss its appeal. After prolonging the already lengthy process, the state agencies should not now be able to argue that a 10-year limitation should be applied to the RRM.

Received
February 23, 2011
Commission on
State Mandates

B. Applying the RRM retroactively is consistent with the purposes of the statute in that it will enhance the accuracy of the claims and lessen the burden on the claimants and the SCO.

The very purpose of an RRM would be circumvented by restricting its application to prospective claims. RRMs are intended to serve as an alternative to the otherwise onerous requirement of submitting proof of actual costs. If eligible claimants are not able to use an RRM retroactively, one of two things will happen: either eligible claimants will not be able to claim reimbursement because they do not maintain records of actual cost, or eligible claimants will be forced to submit cost information that is little more than a guess. Neither alternative is desirable.

In addition, allowing a retroactive application of an RRM would establish a precedent useful to many claimants currently before the Commission. The Commission is currently determining claims that are almost 10 years old, so the extreme delay in this case is not all that uncommon for mandate reimbursement claims. Interpreting Government Code section 17518.5, subdivision (d) as limiting the application of the RRM to 10 years prospectively or even 10 years retroactively would have the effect of denying a remedy to many claimants before the Commission due to lack of records.

C. Applying the RRM prospectively is consistent with the purposes of the statute in that it will lessen the burden on the claimants and SCO - and promote the state's ability to predict mandate liability.

To promote the statutory requirement of balancing "accuracy with simplicity," the RRM should be applied prospectively, even following an 18-year retroactive application. (Gov. Code, § 17557, subd. (f).) As demonstrated by the details of Co-Test Claimants' thorough cost survey, Co-Test Claimants' proposed RRM is accurate, while at the same time provides for a simple and straightforward application. The only variable in the RRM formula is the number of ADA, which will not only ease the burden on claimants to collect and maintain documentation of mandate activities, but will also promote the State's ability to predict mandate liability. Thus, prospective application of the RRM is entirely consistent with statutory intent.

D. The Implicit Price Deflator may be applied to Co-Test Claimants' RRM in the manner requested.

Finally, SCO offers no justification for its assertion that "IPD adjustments cannot give an accurate RRM rate for such a long reimbursement period based on a single year of cost data." Just as there is no requirement for more than one year of source data, there is also no requirement that an implicit price deflator ("IPD") be applied only to an RRM based on more than one year of source data. As explained in detail above, we believe that the source data from the 2006-07 school year is sufficiently representative to be the basis for Co-Test Claimants' proposed RRM.

Received
February 23, 2011
Commission on
State Mandates

SCO's objection regarding the application of an IPD to Co-Test Claimants' proposed RRM is without merit.

Conclusion

The Legislature developed a process whereby claimants and state agencies can develop an RRM to alleviate the data collection burden of the claimants and the oversight burden of the Controller, and to promote the predictability of the state's mandate liability from year to year. This process reimburses the cost of the mandate program activities based on formulas, allowances, and other approximations. The time spent by claimant staff to collect data, prepare claims, and respond to audits is itself a cost reimbursed by the state and it is in the interest of all parties to reduce the time burden and cost. The Legislature's RRM process allows the Commission to adopt RRMs based on a wide variety of reasonable data, without respect to a minimum sample size or minimum number of fiscal years involved, and potentially allows the Commission to apply this RRM retroactively for any number of years. The FY 2006-07 cost data provided by the claimants is statistically representative of the variety of districts and SELPAs that implement the mandate, and qualitatively representative of the consistent scope of the program activities since the date the test claim was filed. Based on the foregoing, Co-Test Claimants respectfully request that the Commission adopt the Revised Proposed Parameters and Guidelines, including the Proposed RRM, as submitted. If you have any questions, please do not hesitate to contact us.

Sincerely,

FAGEN FRIEDMAN & FULFROST, LLP

DEPARTMENT OF FINANCE

EDMUND G. BROWN JR. ▪ GOVERNOR

915 L STREET ■ SACRAMENTO CA ■ 95814-3706 ■ WWW.DOF.CA.GOV

August 9, 2011

Mr. Drew Bohan
Executive Director
Commission on State Mandates
980 Ninth Street, Suite 300
Sacramento, CA 95814

Dear Mr. Bohan:

The Department of Finance (Finance) has reviewed the proposed parameters and guidelines with reasonable reimbursement methodology (RRM) submitted by the Butte County Office of Education, the San Joaquin County Office of Education, and the San Diego Unified School District for the *Behavioral Intervention Plans* (BIPs) program (CSM-4464), and respectfully submit the following comments.

The three RRMs proposed by the claimants are based on survey data that was collected from 21 of the 120 Special Education Local Plan Areas (SELPAs) statewide and which represented 11.34 percent of the average daily attendance (ADA) of SELPAs in 2006-07. Specifically, the three RRMs were calculated for the following: (1) one-time activities, (2) on-going activities at the SELPA level, and (3) on-going activities for county offices of education and school districts. For each RRM, the SELPA's ADA for the fiscal year of reimbursement would be multiplied by a per-ADA base rate adjusted by the Implicit Price Deflator. The base rates used in the RRMs were determined by dividing the total costs collected from the 21 surveys for the 2006-07 fiscal year by the total ADA of the participating SELPAs.

Subdivisions (b) and (f) of Government Code section 17557 authorize the inclusion of a RRM in the parameters and guidelines "that balances accuracy with simplicity." Subdivisions (b) and (c) of Government Code section 17518.5 require that the RRM be based on cost information from a representative sample of eligible claimants, and that it consider the variation of costs among local school districts to implement the mandate in a cost-efficient manner.

Finance does not believe that the RRM meets the criterion of being based on cost information from a representative sample of eligible claimants. Additionally, the proposed RRM fails to consider the variation of costs to implement the mandate in a cost efficient manner. For these reasons, it does not meet the statutory requirements for establishing an RRM. Therefore, we recommend that the Commission deny this request to amend the parameters and guidelines.

The proposed RRM does not consider the variation of costs among school districts to implement the mandate in a cost-efficient manner.

As evidenced by the survey data collected, there are two significant variations that are not considered by the proposed RRM: (1) the variation of costs reported for BIP programs, and (2) the number of BIP programs developed by school districts. In order to compare the amounts

Received
August 9, 2011
Commission on
State Mandates

reported on each of the surveys submitted by the 21 SELPAs, we divided the total amount reported by total ADA, and also divided the total amount by the number of BIPs reported. As a result, we found the following instances of very wide ranges of unit costs:

- The cost for a BIP per ADA ranged from $1.31 to $81.91 and averaged $10.17.
- The cost per BIP ranged from $2,400 to $197,000 and averaged $17,047.
- On an ADA basis, the highest cost reported is 62 times higher than the lowest while the highest cost per BIP is 82 times higher than the lowest.

The variation in the number of BIPs reported by the SELPAs was equally significant, ranging from 0 to 87. Based on the survey data, it does not appear that the frequency of a BIP nor the total cost is related to a SELPA's ADA. For instance, the Fresno County and Fresno Unified School District SELPAs have similar ADA of 73,258 and 71,980, respectively. However, Fresno Unified reported one BIP at a cost of $139,624, which equates to $1.94 per ADA, and Fresno County reported 67 BIPs with a total cost of $727,062 or $9.92 per ADA.

Overall, the survey data demonstrates that the cost per ADA, the cost per BIP, and the number of BIPs per ADA vary widely among SELPAs. There is no evidence showing a correlation between the number of students and the cost incurred by SELPAs to develop BIP programs. Therefore, we do not believe using ADA as part of the proposed RRM is appropriate.

In fact, if the proposed RRM was applied to the 21 survey participants, the reimbursement levels for 2006-07 would be significantly different than the amounts reported as expenditures in the survey. Under the proposed RRM, 18 of the SELPAs would be eligible for reimbursement that is significantly different than reported expenditures. These differences range from 88 percent below and 677 percent above reported expenditures. Only three SELPAs would receive reimbursement within 20 percent of reported costs. Reimbursement standards that would allow reimbursement for a school district in excess of that district's actual costs or overall reimbursement in excess of statewide actual costs should not be supported.

Further, the proposed RRM does not consider the relationship of the mandated activities and the mechanism that triggers the need for those activities. For instance, Emergency Interventions, Developing and Evaluating Behavioral Intervention Plans and Conducting Functional Analysis are only mandated activities if a serious behavior problem interferes with the implementation of a student's IEP. However, under the proposed RRM, all school districts would be eligible to receive reimbursement for these activities regardless of whether the activity is actually performed.

The proposed RRM would not provide reimbursement based on cost information from a representative sample of eligible claimants.

As previously mentioned, the proposed RRM is based on survey data collected from only 21 of 120 SELPAs statewide and that represents just 11.3 percent of total ADA. Additionally, the sample does not include representation from the ten largest SELPAs in the state, which accounted for over 32 percent of total ADA in 2006-07, including San Diego Unified School District. We also found that the Southern California region was underrepresented. If the state were divided into four geographical regions—North, Central, Bay Area and South, 67 percent of survey results came from SELPAs in the Northern and Central regions. However, these regions

Received
August 9, 2011
Commission on
State Mandates

only represent 21 percent of the state's total ADA. The Southern California region, on the other hand, accounts for 63 percent of the state's ADA but contributed just 20 percent of the survey results. While Los Angeles County is comprised of 17 SELPAs, only one was included in the survey—Tri-City SELPA. Los Angeles County represents 26 percent of the state's total ADA but only makes up 3 percent of the ADA surveyed. San Bernardino and Riverside Counties, who have combined ADA of 792,422 (13 percent of the statewide total), were not included in the survey.

Based on the reasons discussed above, we respectfully urge the Commission to deny the proposed RRM since it does not consider the variation of costs among school districts nor is it based on cost information from a representative sample of eligible claimants. Moreover, the data used to calculate the proposed unit rate is based on survey results from SELPAs, not on actual cost claims that have been audited. We are concerned that this data along with the proposed RRM does not accurately reflect the cost of the program, and we question whether the BIPs program is suitable for such an approach.

If you have any questions regarding this letter, please contact, Lenin Del Castillo, Principal Program Budget Analyst at (916) 445-0328.

Sincerely,

NICOLAS SCHWEIZER
Program Budget Manager

Re: **Co-Claimants' Rebuttal to Finance's Comments Regarding Revised Proposed Parameters and Guidelines with Reasonable Reimbursement Methodology**
Behavioral Intervention Plans, CSM-4464
Chapter 959, Statues of 1990
Education Code section 56523
Title 5, California Code of Regulations section 3001 and 3052

Dear Mr. Bohan:

Co-Claimants San Diego Unified School District, San Joaquin County Office of Education, and Butte County Office of Education ("Co-Claimants") submit the following rebuttal to the Department of Finance's ("Finance") comments dated August 9, 2011.

Finance's Untimely Filing of Comments has Prejudiced Co-Claimants, Wasted Time, and Should be Disregarded by the Commission.

Initially, Co-Claimants object to Finance's late filing of comments concerning the proposed reasonable reimbursement methodology ("RRM"). These comments were due on January 24, 2011 however Finance filed them on August 9, 2011, seven months late. Finance's disregard of the deadline has prejudiced Co-Claimants and wasted the time of both Co-Claimants and Commission staff, thereby driving up the costs of mandate reimbursement, the very costs it should seek to reduce.

After waiting for all comments to be submitted by the January 24, 2011 deadline, Co-Claimants filed a rebuttal on February 23, 2011 and asked for an informal conference to explain its RRM to Commission staff and the state agencies. Several individuals represented the State Controller's Office ("the Controller") at the April 25, 2011 informal conference and actively participated.

Commission on
State Mandates

Representatives of Finance attended by phone, not in person, and did not participate.

In June 2011, Commission staff issued a proposed decision on the Habitual Truants RRM stating that it did not meet the "cost-efficient" element required by statute. Commission staff convened a conference to discuss "cost-efficient" on July 27, 2011. Finance now contends that Co-Claimants' proposed RRM is not cost-efficient, aligning itself with the concerns that the Commission staff highlighted in June and July. Neither Co-Claimants nor the Controller had this benefit when they timely filed their documents in January and February.

Finance's untimely filing meant that Co-Claimants were unable to respond to this matter when they responded to the Controller's comments, that the parties were unable to take into account Finance's comments at the April 25, 2011 informal conference, and that Finance was able to benefit from its tardiness by aligning itself with the Commission staff's concerns regarding "cost-efficiency," concerns raised after Co-claimants' timely filing. This is contrary to standards of fairness, not to mention judicial economy, and has prejudiced Co-Claimants by further delaying eventual reimbursement.

Should the Commission consider the merits of Finance's comments, Co-Claimants urge the Commission to reject them. Finance makes the following assertions: 1) the proposed RRM fails to consider the variation of costs to implement the mandate in a cost-efficient manner; and 2) the proposed RRM does not meet the criterion of being based on cost information from a representative sample of eligible claimants. Co-Claimants disagree on both counts and respond to each assertion below.

1. <u>The proposed RRM appropriately considers the variation of costs among school agencies to implement the mandate in a cost-efficient manner</u>.

A. <u>Variation in costs is relevant in determining the RRM level, but not to bar an RRM</u>.

The plain meaning of the requirement to "consider the variation in costs . . . to implement the mandate in a cost-efficient manner" is that the variation provides information to the Commission on what level is "cost efficient." (Gov't Code, §17518.5(c).) In other words, if there is a wide variation in costs, it would not make sense to set the RRM at the high or the low end of the variation. Rather the variation should be "considered" to determine what the "reasonable" level of reimbursement is – and presumably that reasonable level would be one near the middle. In short, a variation is relevant as to the *level* of reimbursement proposed in an RRM, not as to *whether* an RRM is appropriate.

Received
October 14, 2011
Commission on
State Mandates

Finance ignores the plain meaning of the statute and instead argues that the variation in costs – a fact which Co-Claimants do not deny – precludes the use of an RRM. Co-Claimants do not understand the basis for Finance's claim. There is no language that suggests a variation in costs bars reimbursement. Rather, variation must be *considered* to arrive at a reasonable reimbursement level.

Co-Claimants' proposed RRM does just that – by taking into account the ADA of each SELPA reporting data. The per ADA amount proposed by the RRM was calculated by totaling all costs, totaling all ADA, and dividing those results – for a level at the middle. The highest spenders will not be reimbursed for their full costs, encouraging cost-efficiency. The lowest spenders will be reimbursed above their minimal costs, still encouraging cost-efficiency by ensuring that the mandate will be reasonably implemented, not under-implemented. We believe this is consistent with legislative intent in adopting the "cost-efficient" standard. Notably, the language the Legislature chose is not "least costly." Rather, it chose "cost-efficient," to protect against inflated costs while still promoting full program implementation.

B. <u>The cost and number of BIPs is not an accurate measure of the BIP mandate</u>.

Finance alleges that the proposed RRM fails to consider: 1) the variation of costs reported for BIPs and 2) the number of BIPs developed by school districts. As indicated above, a variation in cost in and of itself is not a bar to an RRM although it should be considered in arriving at the proper RRM. Further, focusing on the number of Behavioral Intervention Plans ("BIPs") as a measure of a district's activities for this mandate is misplaced. BIPs account for only three of the seven areas of reimbursable activities named in the Commission's 2000 decision: 1) Development and implementation of BIPs; 2) Functional analysis assessments; and 3) Modifications and contingent BIPs. The other four areas are: 1) SELPA plan requirements (which includes training); 2) Development and implementation of emergency interventions; 3) Prohibited BIPs and training in that regard; and 4) Due process hearings. The goal of Co-Claimants' RRM was to see that school agencies were reasonably reimbursed for *all* activities that the Commission found reimbursable, not simply for BIPs.

Further, the survey reports costs for one year, 2006-07. Three of the SELPAs surveyed had no BIPs for the year surveyed. This is not a surprise. Costs vary widely by SELPA from year to year because of the particular students being served in any one year. Nevertheless, the total costs state-wide from year to year are not likely to vary, and thus a per ADA approach as Co-Claimants propose is a rational and reasonable method.

Similarly, Finance's narrow focus does not acknowledge the actual manner in which the RRM is constructed. Co-Claimants developed a two-pronged RRM for ongoing activities, one primarily

Received
October 14, 2011
Commission on
State Mandates

for training activities to be distributed by SELPA, the other for all other ongoing activities, to be distributed by school district or COE. The training activities, based on survey data, amount to $1.187 per ADA, while all other activities amounted to $9.4457. Finance ignored this division when analyzing Co-Claimants' proposed RRM, lumping together the two costs.[1] As might be expected, the training costs, while varied, are closer than the service costs, as staff needs to be trained regularly regardless of the number of students with BIPs in any particular year. Because trainings often are provided SELPA-wide, Co-Claimants surveyed the training costs by SELPA and proposed reimbursement to that entity.

C. Finance's true concern is the high reimbursement level which a per ADA RRM will allow not whether such a reimbursement level is reasonable or accurate.

Co-Claimants must briefly address Finance's purported concern regarding the variation between reported expenditures and reimbursement levels. A closer review of Finance's comments reveals a much narrower issue. Finance states only: "Reimbursement standards that would allow reimbursement for a school district *in excess* of that district's actual costs . . . should not be supported." Conversely, Finance does not appear to be at all troubled that other claimants would be reimbursed *less* than actual costs under the proposed RRM.

Finance further states: "Reimbursement standards that would allow . . . overall reimbursement in excess of statewide actual costs should not be supported." We agree. We believe Co-Claimants' RRM does not support overall reimbursement in excess of actual costs – nor do we see that Finance has shown in its comments that the proposed RRM would result in such excess.

---

[1] We believe Finance made an error when it found the cost per BIP averaged $10.17 per ADA, even using its own methodology. So far as we can tell, this figure came from Exhibit 5 of Co-Claimants Revised Proposed Parameters and Guidelines, which shows costs before Co-Claimants and Finance had reconciled them. Ultimately the parties agreed to the accuracy of the figures in Exhibit 7, which shows costs of $10.64 per ADA.

We also believe Finance made an error when it found that the cost per BIP per SELPA ranged from $2,400 to $197,000. Our calculations show the BIPS ranged from $2,396.30 to $139,624.66.

Commission on
State Mandates

D. Basing an RRM on the cost of each mandated activity is not consistent with streamlining mandate process and reimbursement, and incentivizes increasing mandate costs.

Finance also objects to the RRM because it does not require that a district show, in a given year, that it has performed a specific activity. We understand the objection but we believe it is just such an approach that has mired the mandate system in minutia, concentrating on cost accounting designed to inhibit, rather than facilitate, fair reimbursement. We believe this is contrary to the spirit of the Constitutional amendment, the goal of which was to see that local agencies are reimbursed when the state requires them to do an activity. More specifically, we believe it is contrary to the spirit which animated the Legislature when it amended the law to allow a "reasonable reimbursement methodology." The goal of an RRM is to expedite mandate proof and payment, particularly given the backlog of mandates. The Legislature's liberal intent in allowing RRMs is even more evident from its 2007 amendments to Government Code section 17518.5, which eliminated the requirement that a proposed RRM *fully offset* the projected costs of 50 percent or more of eligible agencies. (Compare Gov't Code, §17518.5, subd. (a)(2) (2004) with Gov't Code, §17518.5 (2007).) In short, the Legislature has steadily progressed from requiring strict cost accounting to permitting reasonable reimbursement which contemplates cost variation.

Further, the per ADA approach has a specific cost-efficient benefit here – it does not incentivize activities required by the BIP legislation and regulations, which could be an unintended consequence of payment per activity. The per ADA approach is a familiar one in California. In 1997-98, the state chose to fund special education based on total ADA rather than per service or activity with the enactment of AB 602. Prior to this shift, which took effect in 1998-99, a district received funding based on the number of special education classes (special day class and resource specialist classes) that the district operated, as well as on designated instructional services ("DIS") units. This "instructional personnel services unit" ("IPSU") system rewarded a district for identifying and serving more special education students and, thus, operating more classes and providing more special education services. The state did not want to incentivize special education growth, not only because of the funding involved but also because it was contrary to the federal policy of keeping students in general education to the greatest extent possible. By consolidating previous special education program allocations and then distributing those dollars based on all ADA, the legislature adopted a "revenue neutral" reform that eliminated incentives for increasing the number of special education students. The AB 602 system, still in place to date, is a reasonable system.

Commission on
State Mandates

We believe Co-Claimants' proposed RRM achieves many of the same ends as AB 602. Co-Claimants concede there is a large variation between reported expenditures for the 2006-07 school year and reimbursement figures under the RRM. However, Co-Claimants believe this variation is constitutionally permissible. Co-Claimants' position on this issue will be explained in detail in its response to the Commission's request for comments to be submitted on or before December 20, 2011.

2. The proposed RRM is based on a representative sample of eligible claimants.

Finance asserts the survey sample is not representative because data was collected from "only" 21 of the state's 120 SELPAs. As previously stated in Co-Claimants' rebuttal to the Controller's comments, there is no requirement regarding a minimum sample size, so long as the sample is large enough to be representative. There is also no requirement that the sample include representation from the ten largest SELPAs in the state, as Finance implies.

The 21 SELPA survey respondents were made up of 197 school districts and 11 county offices of education, claiming 12% of ADA statewide. The survey respondents were representative of all eligible SELPAs, spanning small and large SELPAs (Calaveras County and South County San Diego), single-district and multi-district SELPAs (Fresno Unified and Butte County), rural, urban, and suburban SELPAs (Mono, Tri-City Los Angeles, and Marin County), and were geographically diverse (Poway and Modoc). The diversity of SELPAs surveyed ensures that the RRM was derived from an adequately representative sample of the eligible claimants.

In fact, the Commission has previously found that a smaller sample of eligible claimants was nonetheless representative of all eligible claimants because both large and small agencies were represented. In Municipal Storm Water and Urban Runoff Discharges (March 24, 2011 Parameters and Guidelines and Decision, 03-TC-04, 03-TC-20, 03-TC-21), the Commission found that the proposed RRM was based on a representative sample of claimants, even though the information was based on only seven of about 85 eligible claimants, approximately 8.2%. There, the survey participants represented cities and counties that had as few as nine trash receptacles (Artesia) and as many as 324-470 trash receptacles (Los Angeles County).

Finance also asserts that the survey sample is not representative because the Southern California region was underrepresented. Presumably Finance believes this is relevant because it would impact costs of implementing the mandate. The facts show this is not the case – based on two sources of data. First, certificated salaries, which drive the costs of the BIP mandate, are actually surprisingly similar in all parts of the state. If anything, salaries are higher on average in

Received
October 14, 2011
Commission on
State Mandates

Southern California than in Northern California.[2] Note, for instance, that the average scheduled salary paid statewide in unified districts was $63,323 in 2006-07, the survey year. In Los Angeles County the comparable amount was $63,673, in Riverside County $66,009, in San Diego County $62,699, in Ventura County $62,908. Contrary to Finance's theories, Co-Claimants' Northern California survey participants were not on the high end when compared to the statewide $63,323 figure. For instance, Solano County's comparable figure was $58,255, Fresno's $58,923, and San Joaquin's $59,034. A review of more current J-90s does not noticeably differ from these comparisons. (See attached Compilation of Selected Counties and Statewide Totals and Averages.)

Finally, Finance's objection to the proposed RRM on the basis that the data used to calculate the proposed RRM is based on survey results from SELPAs, not on actual cost claims that have been audited, is without merit. The very purpose of an RRM is to simplify the claiming process by bypassing actual cost claims. If actual, audited cost data existed, there would be no need for an RRM. As succinctly explained by Camille Shelton, Chief Legal Counsel, during the hearing on the proposed RRM for Municipal Stormwater and Urban Runoff, "[An RRM] is based on approximations of local costs and it is not based -- it doesn't have to be based on actual costs incurred." (Transcript of Hearing on Municipal Stormwater RRM, p.14.)

Conclusion.

Co-Claimants object to Finance's comments based on their exceptionally late filing without excuse or explanation. Should the Commission nonetheless consider them at this late date, Co-Claimants urges the Commission to find that the RRM properly considers the variation in costs to implement the mandate in a cost-efficient manner and that its sample is representative.

Co-Claimants highlight Finance's delay to show that its true concern is not to reach a fair reimbursement level, but to indefinitely delay or deny reimbursement. Co-Claimants understand the state is presently without resources. That is not an excuse for failing to work with Co-Claimants in good faith to reach a reasonable reimbursement methodology, one that will actually promote, rather than block, reimbursement. If Finance does not believe the system Co-claimants have proposed is a good one, let it propose its own. A critical part of any such system will be to allow SELPAs, districts, and county offices to recoup their costs retroactively without providing item-by-item proof. Such proof is not available, since the mandate commenced in 1993-94 but

[2] Certificated salary information is based on "2006-2007 Salary and Benefit Schedule for the Certificated Bargaining Unit (Form J-90)" from the California Department of Education School Fiscal Services Division (http://www.cde.ca.gov/ds/fd/cs/).

no claiming instructions have been issued and no claims filed or reimbursed. With notice, different standards of proof might be possible for future years, although given the time and expense of maintaining and auditing such information, one might believe Finance, the Controller, and Co-Claimants could agree that a per ADA RRM approach makes much more sense.

Sincerely,

RE: **Request for Comments**
Regarding Reasonable Reimbursement Methodologies
in Relation to the Following Claims:

Behavioral Intervention Plans, CSM 4464
San Diego Unified School District, San Joaquin County Office of Education and Butte County Office of Education, Claimants

Habitual Truants, 09-PGA-01, 01-PGA-06 (CSM-4487 and CSM-4487A)
San Jose Unified School District, Requestors

Voter Identification Procedures, 03-TC-23
County of San Bernardino, Claimant

Dear Mr. Petersen, Ms. McDonough, and Ms. Gmur:

Thank you for your participation on July 27, 2011 at the prehearing conference conducted by the Commission on State Mandates (Commission) to discuss reasonable reimbursement methodologies (RRMs) as they relate to the above-named matters, and to future requests for RRMs. Staff sought input regarding how "cost efficient," as that term is used in Government Code section 17518.5, should be applied to proposed RRMs. The participants in the prehearing conference provided helpful input on this issue and into the draft staff analysis on the proposed parameters and guidelines amendment for the *Habitual Truants* program. The draft staff analysis was issued on June 9, 2011. Subsequent to the prehearing, Commission staff reviewed the draft staff analysis based on the input received and now seeks briefing on the following questions:

1. Government Code section 17518.5(a) states: "Reasonable reimbursement methodology" means a formula for reimbursing local agencies and school districts for costs mandated by the state, as defined in Section 17514." Section 17514 states: "'costs mandated by the state' means any increased costs which a local agency or school district is required to incur" to fulfill the requirements of a state mandate.

   The California Constitution and section 17514 require that each local agency be reimbursed for its mandated costs. An RRM is a tool to facilitate the reimbursement process. Staff believes it is constitutionally permissible to develop an RRM unit cost that reasonably reimburses each local agency even if

some local agencies receive more and some local agencies receive less than the RRM unit cost. The Commission recently found in the *Municipal Stormwater* program that the RRM unit cost of $6.74 was reasonable even though the unit costs used to develop that figure ranged from a low of $2.02 to a high of $14.46. The Commission implicitly found that $6.74 was a constitutionally permissible figure even though one claimant whose figures were used to calculate the RRM figure had actual costs of $14.46. Under the RRM, that claimant would be entitled to less than half of its actual costs.

Question: At some point is the range of figures used to develop the unit cost so wide that it violates the constitutional requirement that local agencies be reimbursed for their mandate-related costs?

2. Government Code section 17518.5(c) states: "A reasonable reimbursement methodology shall consider the variation in costs among local agencies and school districts to implement the mandate in a cost-efficient manner."

   Question 1: How should "cost-efficient" be defined?

   Question 2: What does this section require be cost-efficient? Stated another way, what does a requestor need to show to demonstrate that its proposed RRM unit cost meets the requirement of section 17518(c)?

We invite all parties, interested parties, and interested persons to submit comments on these questions or any related issues by Wednesday, **September 2, 2011**.

Please contact me at (916) 323-3562 if you have questions.

Sincerely,

Drew Bohan
Executive Director

Re: **Co-Claimants' Response to the Commission on State Mandates' August 12, 2011 Request for Comments**
Behavioral Intervention Plans, CSM 4464
Chapter 959, Statutes of 1990
Education Code Section 56523
Title 5, California Code of Regulations section 3001 and 3052

Dear Ms. Patton:

This letter is in response to the Commission on State Mandates' ("Commission") correspondence dated August 12, 2011, in which the Commission invited Behavioral Intervention Plans Claimants San Diego Unified School District, San Joaquin County Office of Education, and Butte County Office of Education (collectively, "Co-Claimants") to submit comments to three questions related to reasonable reimbursement methodologies ("RRM") under Government Code section 17518.5. Co-Claimants respectfully request that this response also be included in the record of CSM 4464. We respond to each question in turn.

Question 1: *At some point is the range of figures used to develop the unit cost so wide that it violates the constitutional requirement that local agencies be reimbursed for their mandate-related costs?*

The Constitution requires that the State reimburse local agencies for their mandated costs. The Legislature has enacted a scheme to implement this constitutional provision which includes empowering the Commission to adopt an RRM when it adopts parameters and guidelines for reimbursement. If the Commission adopts an RRM, it is required to consult with the affected

Commission on
State Mandates

parties to consider an RRM that balances accuracy with simplicity. The RRM must be based on representative cost information and consider variation in costs to implement the mandate in a cost efficient manner. If those requirements are met, the resulting RRM is presumed constitutional.

1. The Constitution requires reimbursement of state mandates. Under the California Constitution, local agencies *must* be reimbursed for their mandate-related costs. Article XIII B, section 6, subdivision (a) of the California Constitution provides: "Whenever the Legislature or any state agency mandates a new program or higher level of service on any local government, the State shall provide a subvention of funds to reimburse that local government for the costs of the program or increased level of service . . .[.]" In *California School Boards Association v. State*, the California Court of Appeal recently considered this provision, stating, "This reimbursement obligation was 'enshrined in the Constitution . . . to provide local entities with the assurance that state mandates would not place additional burdens on their increasingly limited revenue resources.'" (*California Sch. Boards Assn. v. State* (2011) 192 Cal.App.4th 770, 785 (*CSBA*), citing *Lucia Mar Unified Sch. Dist. v. Honig* (1988) 44 Cal.3d 830, 836, fn. 6, 244; *County of Sonoma v. Commission on State Mandates* (2000) 84 Cal.App.4th 1264, 1282.)

2. The Legislature created a statutory scheme to implement the constitutional requirement of mandate reimbursement and courts presume that scheme is consistent with the Constitution. In 1984, the Legislature enacted Government Code sections 17500 and following to implement the constitutional requirement of reimbursing local agencies and school districts for state mandates.

> * * *
>
> It is the intent of the Legislature in enacting this part to provide for the implementation of Section 6 of Article XIII B of the California Constitution. Further, the Legislature intends that the Commission on State Mandates, as a quasi-judicial body, will act in a deliberative manner in accordance with the requirements of Section 6 of Article XIII B of the California Constitution. (Gov. Code, § 17500.)

The action of the Legislature in creating this scheme is presumed to be constitutional and to date, no court has found to the contrary:

> [A] court must presume the Legislature acts consistent with the Constitution when enacting legislation, and we must adopt an interpretation that upholds the statute's constitutionality, if the interpretation is consistent with the statutory language and purpose. (*CSBA*, *supra*, 192 Cal.App.4th at 795.)

Received
December 20, 2011
Commission on
State Mandates

In *CSBA*, the California Court of Appeal considered section 6 of Article XIII B and one of the statutes enacted to implement it. (*CSBA, supra*, 192 Cal.App.4th 770.) There the Court of Appeal held that the State's practice of nominally funding state mandates with the intention to defer full payment with interest to a later, unspecified date, does not satisfy the applicable constitutional and statutory provisions. (*Id.* at 790.) Rather the court found that "section 17561, subdivision (a)'s statement that 'all' costs must be reimbursed by the State is a clear statutory directive requiring full payment once a mandate is determined by the Commission . . . An interpretation of section 17561 that would allow partial payments would render the word 'all' superfluous." (*Id.* at 789.) In reaching this decision, the court gave weight to the presumption discussed above – namely that the "court must presume that the Legislature acts consistent with the Constitution when enacting legislation" – "and uphold[] the statute's constitutionality, if the interpretation is consistent with the statutory language and purpose." (*Id.* at 795.)

3. The Legislature's authorization of use of an RRM with minimal requirements is presumed to be constitutional. The Legislature has chosen to permit reimbursement through use of an RRM with minimal requirements. An RRM, 1) is a formula, 2) is based on representative cost information, 3) considers variation in costs, and 4) balances accuracy with simplicity, as follows:

--1) The RRM is "a formula for reimbursing local agencies and school districts for costs mandated by the state, as defined in Section 17514." (Gov. Code, § 17518.5, subd.(a).)

--2) An RRM "shall be based on cost information from a representative sample of eligible claimants, information provided by associations of local agencies and school districts, or other projections of local costs." (Gov. Code, § 17518.5, subd.(b).)

--3) An RRM "shall consider the variation in costs among local agencies and school districts to implement the mandate in a cost-efficient manner." (Gov. Code, § 17518.5, subd.(c).)

--4) The Commission "shall consult with the Department of Finance, the affected state agency, the Controller, the fiscal and policy committees of the Assembly and Senate, the Legislative Analyst, and the claimants to consider a reasonable reimbursement methodology that balances accuracy with simplicity." (Gov. Code, §17557, subd.(f).)

This minimal list of requirements makes it clear that the Legislature has authorized standardized reimbursement for a broad range of costs based on the particular mandate and the particular sources of cost information available. As long as the statutory requirements listed above are met there is no range of figures so wide as to violate constitutional requirements. In fact, no doubt with an eye towards expediting the process, "[W]henever possible" an RRM "shall be based on

Received
December 20, 2011
Commission on
State Mandates

general allocation formulas, uniform cost allowances, and other approximations of local costs . . . rather than detailed documentation of actual local costs." (Gov. Code, § 17518.5, subd.(d).)

By allowing local agencies to use RRMs, the Legislature contemplates that some local agencies will receive more than their actual costs, and some local agencies will receive less. As the Commission's August 12, 2011 letter notes, the Commission has already determined an RRM reasonably reimburses each local agency even if, when applied, some local agencies receive more and some local agencies receive less than the actual costs incurred. Specifically, in Municipal Stormwater and Urban Runoffs, the Commission found $6.74 was a reasonable level of reimbursement under an RRM even though actual costs ranged from $2.02 to $14.46. Applying the approved RRM, some agencies were entitled to over three times their actual costs while others received less than half their actual costs.

Does a standardized reimbursement level, an RRM, contradict the statutory mandate discussed by the Court of Appeal above that "all costs" be reimbursed by the state? We believe the answer is no. Rather the RRM is to be interpreted consistent with the rules of statutory construction which require harmonization of all parts of a legislative scheme to achieve the overall purpose – here the expeditious reimbursement of local agencies and school districts for mandated costs. As the Court of Appeal quoted with approval in *CSBA*:

> "The words of the statute must be construed in context, keeping in mind the statutory purpose, and statutes or statutory sections relating to the same subject must be harmonized, both internally and with each other, to the extent possible. (CSBA, supra, 192 Cal.App.4th at 795, citing *Los Angeles Unified Sch. Dist. v. County of Los Angeles* (2010) 181 Cal App.4th 414, 423.)

One good faith method of harmonization is to adopt an RRM that will reimburse the estimated total costs of all school districts and agencies statewide to implement the mandate in a cost efficient manner although it will not necessarily reimburse the actual costs of each individual entity.

4. The initial enactment of the RRM language and its subsequent amendment evidence the Legislature's conclusion that levels of mandate reimbursement may range widely and still be constitutional. Prior to 2004, RRMs did not exist. In 2004, the Legislature amended Section 17557 subdivision (b) to substitute "reasonable reimbursement methodology" for "allocation

Received
December 20, 2011
Commission on
State Mandates

formula" or "uniform allowance."[1] Amended Section 17557, subdivision (b) reads: "In adopting parameters and guidelines, the commission may adopt a reasonable reimbursement methodology." At the same time, Section 17518.5 was added to the Government Code, which required RRMs to meet certain conditions, including the following: "The total amount to be reimbursed statewide is *equivalent* to total estimated local agency and school district costs to implement the mandate in a cost-efficient manner;" and "For *50 percent or more* of eligible local agency and school district claimants, the amount reimbursed is estimated to *fully offset their projected costs* to implement the mandate in a cost-efficient manner." (Gov. Code, § 17518.5, subd.(a)(1)&(2) (2004), *emphasis added.*)

The 50% requirement makes it clear that in 2004 the Legislature had authorized reimbursement that would be quite different from actual costs for claimants – allowing for the possibility that 50% of claimants would be over-reimbursed and 50% would be under-reimbursed. However, in 2007 both of these requirements were eliminated and replaced by subdivisions (b) and (c).

Since 2007, the current requirements for RRMs are considerably less specific and more flexible than the former requirements. Now, there is *no* requirement that a minimum percentage of claimants' projected costs be fully offset or that the total amount to be reimbursed statewide covers the total of local estimated costs. Since 2007, Section 17518.5 requires only that RRMs "be based on cost information from a representative sample of eligible claimants, information provided by associations of local agencies and school districts, or other projections of local costs," and that the RRM "consider the variation in costs among local agencies and school districts to implement the mandate in a cost-efficient manner." (Gov. Code, § 17518.5, subds.(b)&(c) (2007).) In other words, the statute expressly contemplates variation and leaves open the possibility for a potentially large degree of variation in the costs offset.

Not only does Section 17518.5 subdivision (c) intentionally leave open the possibility for cost variation underlying the RRM, it also only requires that the RRM *consider* the variation in costs. The Legislature's amendment of Section 17518.5 to impose less stringent requirements coupled with the fact that variation of costs is assumed in the section's language, demonstrates legislative intent to allow RRMs even when the underlying costs reflect significant variation. Cost variation

---

[1] We believe the term "reasonable reimbursement methodology" should be given special attention. "Reasonable reimbursement methodology" is frequently interchanged with "unit cost" which we believe is inconsistent with current law. An RRM is a "formula" and while it may include a unit cost, it suggests a system that is much more general and flexible than one based on "unit cost." (Gov. Code, § 17518.5, subd.(a).)

Received

Commission on
State Mandates

is not a bar to the use of RRMs nor is there any provision requiring that cost variation be within certain limits. As set out in Co-Claimants' Rebuttal to Finance's Comments, variation is only relevant to determine what a reasonable *level* of reimbursement is for an RRM – presumably one at or near the average, as Co-Claimants propose in the BIP context – not *whether* the use of an RRM is appropriate in the first place.[2]

5. The Legislature's timing in enacting the statute which authorizes RRMs shows its intent to apply RRMs to claims that require extensive retroactive reimbursement. As noted above, in 2004, the Legislature amended Section 17557 subdivision (b) to substitute "reasonable reimbursement methodology" for "allocation formula" or "uniform allowance." This amendment closely followed, and was likely spurred by, the 2003 change in law which limited test claims to mandates going back only three years and prompted a large number of filings in 2002 and 2003. (See Commission on State Mandates Backlog Reduction Plan, p.2, May 25, 2011, excerpts attached hereto as Exhibit A.) As a result local agencies and school districts filed 51 test claims in 2002 and 23 test claims in 2003 to preserve claims for mandates going as far back as 1975. (*Id.*) These larger and more complicated test claims contributed to the Commission's backlog, the effects of which are still felt today. Out of the Commission's backlog of 51 test claims (as of May 2011), 12 are from 2002 and 12 are from 2003. (*Id.*) The introduction of RRMs into the mandate process simplified the onerous task of reimbursement for large claims involving many years of retroactivity. The fact that the Legislature enacted the process just when such claims were filed suggests that it saw the RRM as a tool in those cases.

Why does an RRM make particular sense in cases where the claim goes back a number of years? In such a case, local agencies and districts do not have records to show actual costs. However, an RRM, based on costs incurred in a recent year, can be developed with accuracy. Without an RRM, local agencies and school districts would be forced to forgo reimbursement, to base claims on pure speculation or undertake a burdensome, likely fruitless, effort to substantiate claims. In such a case, an RRM, which may be based on a wide range of costs but meets the statutory requirements, furthers the constitutional intent of reimbursing school districts and local agencies for state-imposed mandates in a rational way.

---

Commission on
State Mandates

Question 2: *How should "cost-efficient" be defined?*

"A reasonable reimbursement methodology shall consider the variation in costs among local agencies and school districts to implement the mandate in a cost efficient manner." (Gov. Code, § 17518.5(c).) The Legislature did not define "cost-efficient." The Commission has the power to determine what "cost-efficient" means. As the agency charged with interpreting and implementing the statutes and regulations governing state mandates and RRMs, the Commission's interpretation of "cost-efficient" "is entitled to consideration and respect by the courts." (*Yamaha Corp. of America v. State Bd. Of Equalization* (1998) 19 Cal.4th 1, 6, 7.)

Since the Legislature stated that an RRM shall consider the "variation in costs" "to implement the mandate in a cost efficient manner," we can conclude that it believed variation in costs provides information regarding what is cost efficient. Considering variation, we believe, means that the Legislature concluded that a mandate implemented at a middle cost, not at a high cost and not at a low cost, was a mandate implemented with cost efficiency. This approach allows for mandate implementation in an adequate, but not extravagant, manner. If the state reimbursed at the average cost level it would be meeting its constitutional obligation.

Question 3: *What does this section require be cost-efficient? Stated another way, what does a requestor need to show to demonstrate that its proposed RRM unit cost meets the requirement of section 17518.5(c)?*

Government Code section 17518.5, subdivision (c) states: "A reasonable reimbursement methodology shall consider the variation in costs among local agencies and school districts to implement the mandate in a cost-efficient manner." The express language of the statute assumes that "cost-efficient" implementation for one local agency will vary from "cost-efficient" implementation for another. As we do not believe there can be one definition for "cost-efficient" with respect to mandate implementation, it follows that there is no single way for a requestor to show that its proposed RRM meets the requirement of Section 17518.5(c).

However, we believe one straightforward manner to use variation to ensure cost-efficiency is to base an RRM on an average weighted by ADA. With this approach, 1) the average cost per item in a given district or agency is multiplied by the number of students, or other relevant multiplier, 2) the products of these calculations are totaled, and 3) the sum is divided by the total number of students (or other relevant multiplier) to reach the RRM. In this manner the RRM is neither set at the top, nor the bottom. Thus the highest cost districts are reimbursed below their costs requiring them to be more efficient if possible and the lowest cost districts are reimbursed above their costs encouraging their fuller implementation of the mandate.

Commission on State Mandates
Backlog Reduction Plan

A Comprehensive Plan Prepared by Staff
to Complete All Pending Claims

May 25, 2011

I. Executive Summary

As of May 25, 2011, the Commission on State Mandates (Commission) has a backlog of 51 test claims and 163 incorrect reduction claims. The Commission has pledged to develop a strategy to reduce the backlog of incorrect reduction claims. This document sets forth staff's plan to reduce the backlog of both test claims and incorrect reduction claims. The plan describes several tools Commission staff plan to employ to reduce the backlog as expeditiously as possible. The plan contemplates presenting all of the most complicated test claims (the 2002 and 2003 claims) to the Commission for decision by the end of fiscal year 2011-2012, and all backlogged test claims by 2014. Of the 163 pending incorrect reduction claims, 102 involve just two programs. Commission staff believe by working closely with the State Controller's Office and the claimant community, the backlog of IRCs could also be eliminated by 2014.

II. Overview

Local agencies and school districts are authorized by law to file test claims with the Commission alleging that a statute or executive order imposes a reimbursable state-mandated program within the meaning of article XIII B, section 6 of the California Constitution. If the Commission finds that there is a reimbursable state-mandated program, the Commission is required to determine the amount to be subvened by adopting parameters and guidelines for the program. The State Controller's Office (Controller) then prepares and issues claiming instructions to local agencies and school districts to notify them of the right to file reimbursement claims for the fiscal years eligible for reimbursement.

Local agencies and school districts may then file reimbursement claims with the Controller for the reimbursement of state-mandated costs. The Controller is authorized to reduce reimbursement claims it deems excessive or unreasonable. If the Controller reduces a reimbursement claim, a local agency or school district may file an incorrect reduction claim (IRC) with the Commission alleging that the Controller incorrectly reduced the claim. The Commission is required to hear these claims and determine if they were incorrectly reduced.

Despite having a small staff of only about 11 employees, the Commission over the last decade has completed a substantial amount of work. Between fiscal years 2003-2003 and 2009-2010, the Commission decided a total of 146 test claims, reconsidered another 17 test claims, adopted or set aside184 parameters and guidelines (and parameters and guidelines amendments), adopted 55 statewide cost estimates, and decided 86 incorrect reduction claims. In addition, Commission staff during this time worked on numerous litigation matters and on a host of special projects such as the mandate reform process and the audits performed by the Bureau of State Audits.

Received
December 20, 2011
Commission on
State Mandates

Nevertheless, over time, a backlog of claims has accumulated. Preparing staff analyses for test claims and IRCs is the most time-consuming activity for Commission staff and is the primary area the Commission needs to focus on in order to reduce the backlog. The oldest test claims were filed in 2002 and 2003. Collectively, those claims are much larger and more complicated than claims from any subsequent year because in 2003 the law was amended to only allow claimants to allege mandates going back three years. Prior to this amendment, claimants could allege mandates going all the way back to 1975. This amendment caused local agencies and school districts to file 51 test claims for 2002 and 23 for 2003. These test claims allege that nearly 500 statutes and 400 regulatory sections and executive orders are mandated programs. As of May25, 2011, 12 test claims from 2002 and 12 from 2003 are still pending with the Commission.

The Commission also has 163 pending IRCs. In October 2009, the Bureau of State Audits published a report (BSA 2009 Report[1]) regarding the Commission on State Mandates. The BSA paid particular attention to IRCs and recommended that the Commission accelerate its efforts to complete IRCs. The report stated:

> Until the incorrect reduction claims are resolved, the Controller may continue to make similar field-audit reductions that are reversed later by the Commission. Conversely, if the Commission ultimately finds the Controller's reductions to be correct, local entities will have continued to submit inappropriate claims until the time the Commission makes its decision. Either way, speedier resolution of outstanding incorrect reduction claims would allow the Controller to conduct audits with an awareness of the Commission's decisions and to incorporate those results into its audit findings and outreach efforts. (BSA 2009 Report, p. 40.)

In its September 15, 2010 Report[2] to the Director of the Department of Finance, the Commission stated that it would prepare a plan to reduce and ultimately eliminate the backlog of IRCs. Because the Commission has limited staff resources, if staff shifts its efforts from test claims to IRCs, the time it will take to reduce the test claim backlog will increase, and vice versa. Accordingly, Commission staff decided to assemble a plan to comprehensively address the problem by focusing both on IRCs and test claims. This document represents that plan, and is divided into three sections. The first section describes the nature of the backlog, with tables that illustrate the types of claims before the Commission. The second section describes the challenges Commission staff faces in trying to reduce this backlog. The third section articulates Commission staff's plan to reduce and ultimately eliminate the backlog.

III. Backlog of Claims

The Commission's pending caseload consists of matters filed by claimants and state agencies, including test claims, incorrect reduction claims, parameters and guidelines and proposed

Sacramento, CA 95814

Re: Comments to Draft Staff Analysis and Proposed Parameters and Guidelines
Voter Identification Procedures 03-TC-23

Dear Ms. Patton:

Behavioral Intervention Plans (CSM 4464) Claimants San Diego Unified School District, San Joaquin County Office of Education, and Butte County Office of Education (collectively, "BIP Claimants") hereby submit comments to the Commission on State Mandates' February 3, 2012 draft staff analysis and proposed parameters and guidelines (hereafter, "DSA") regarding Voter Identification Procedures (03-TC-23) (hereafter, "VIP").

BIP Claimants have not reviewed the declarations and spreadsheets which are the subject of the DSA regarding the RRM for VIP and therefore do not speak authoritatively as to how staff's analysis should apply in the VIP case. However, the DSA is troubling regarding RRMs in general because: 1) the emphasis and focus on *actual* costs incurred exceeds the statutory and regulatory standards allowing "projections" and "other approximations" of costs based on surveys and letters of support "rather than detailed documentation of actual costs"; 2) an evidentiary standard that would require each and every survey respondent to submit statements under oath of actual costs incurred is inconsistent with principals of fundamental fairness; 3) the rigid evidentiary standard proposed impedes the Commission's mission of implementing the constitutional requirement that local agencies be reimbursed for costs mandated by the State.

BIP Claimants also request guidance regarding the evidence required to support a finding that an RRM reasonably represents an agency's actual costs, as well as an opportunity to amend filings to provide conforming evidence.

Recycled
Cert no. SCS-COC-001482
© 1996 FSC

1. An RRM is required to reasonably represent actual costs.

The RRM statutes which staff are applying are replete with references to "approximations," "projections of local costs," and "accuracy balanced with simplicity." These references all support the view that the Legislature specifically intended to base reasonable reimbursement methodologies on items such as surveys, and not on sworn statements of actual costs, as the DSA suggests. The actual statutory wording runs counter to the DSA's exacting interpretation.

The DSA states, "The proposed unit cost must ... result in a reasonable representation of the actual costs incurred by any eligible claimant to comply with the mandated program." (DSA, p.16.) In focusing on "actual costs" to the exclusion of other relevant language – that is, "reasonably represents" – the DSA holds claimants to a higher standard than that required by Government Code section 17518.5. In so doing, the DSA has opted for the Legislature's interest – continuing to require mandates which it does not fund – rather than the Constitution's interest of seeing that costs are actually paid for.

Although an RRM must reasonably represent actual costs, what in fact constitutes an agency's "actual cost" may be ascertained by approximations and other projections. Indeed, the Legislature's own language – that an RRM balance accuracy with simplicity – means that it anticipated and authorized reimbursement that was not for "actual" costs. (Gov. Code, §17557(f).) Government Code section 17518.5 only requires that the RRM be "based on cost information from a representative sample...or projections of other local costs," and further provides that "whenever possible," the RRM "shall be based on general allocation formulas, uniform cost allowances, and other approximations of local costs...rather than detailed documentation of actual costs." (Gov. Code, §17518.5, emphasis added.)

One of Section 17518.5's implementing regulations confirms that an RRM may be based on something less than evidence of *actual* costs: "An interested party may submit cost information or other cost projections that can be the basis of a reasonable reimbursement methodology, and letters in support of a draft reasonable reimbursement methodology...[.]" 2 C.C.R. §1183.13(b)(2). This same regulation also contemplates the use of surveys to gather data to "develop a formula." 2 C.C.R. §1183.13(b)(3). Both the statutes and the regulation cited would be nullities if the Commission requires local agencies to first determine *actual* costs before proposing an RRM.

In requiring a determination of actual costs before determining what constitutes a reasonable representation of mandated costs, the DSA ignores the very reason the Legislature enacted Government Code section 17518.5 – "to reduce local costs to file claims, reduce state costs to process and audit claims, and reduce disputes regarding mandate claims and appeals to the Commission regarding State Controller claim reductions." (DSA, p.12, citing "State-Local Working Group Proposal to Improve the Mandate Process," Legislative Analyst's Office, June 21, 2007, p.3.) Requiring evidence of *actual* costs rather than reasonable representations of actual costs – determined by approximations or projections – would have the opposite effect of reducing local and state costs related to the filing of claims.

2. **The standard which the DSA announces - that survey evidence shall not be admissible to support an RRM unless each agency participating in the survey submitted its information under oath - is inconsistent with fundamental fairness.**

There is nothing in the Commission's regulations to give notice to claimants that submissions regarding the RRM must be based on sworn statements of costs. Notice is an essential component of fairness, particularly here where the Commission's interpretation is so different from the statutory wording and from the LAO discussions which the Commission itself cites. At this late date, claimants are woefully prejudiced if held to such a standard.

We believe public agencies have spent increasingly scarce resources developing and executing detailed surveys of costs to support reasonable reimbursement methodologies. Many of these surveys, including the survey completed by the BIP claimants over five years ago and which took months to complete and analyze, cannot be replicated. It may also prove very difficult to locate survey respondents after the fact to request declarations under penalty of perjury – some individuals may no longer work for the same agency or they may have retired or moved out of state. Thus in our view if the Commission plans to require documentation of actual costs under oath to support RRMs, it should propose a regulation to that effect and apply the rule only prospectively.

3. **The DSA's narrow interpretation of permissible evidence impedes, rather than facilitates, the Commission's mission.**

The Commission's mission -- its constitutional mandate -- is to see that the state reimburses each local agency and school district for all costs mandated by the state. The more labored and exacting the Commission's decisions are, the longer this process takes and the more likely it is that local agencies will never be reimbursed at all. The purpose of the RRM was to expedite reimbursement of expenses to local agencies. Evidentiary determinations which the Commission makes should be reached with an eye to accomplishing that goal, unless inconsistent with law.

Here the DSA requires evidence under oath contrary to a plain reading of the statute because the staff fears that courts will overturn an RRM based on a lesser standard. In defense the staff cites a number of recent lawsuits where the courts overturned Commission decisions because the decision was not based on appropriate evidence. (p. 18, note 30.) The only reported case cited, *Department of Finance v. Commission on State Mandates* (2009) 170 Cal.App.4th 1355, does not apply to an RRM, a statute which specifically authorizes "information from associations, projections of local costs, and "approximations of local costs..., rather than detailed documentation of actual costs...." The Commission risks challenge whenever it acts. It would seem preferable to err in an effort to implement the statute rather than in one to impede it.

Conclusion

The duty of the Commission is to make difficult decisions and to move along the business of the government. Imposing standards that exceed statutes and regulations does precisely the opposite. The VIP DSA sends a strong message that reimbursement for claimants who have been waiting for years, sometimes decades, to be reimbursed for costs mandated by the state, will continue to remain elusive.

Therefore, BIP Claimants respectfully request further guidance from the Commission regarding the evidence required for a finding that an RRM reasonably represents actual costs, as well as an opportunity to amend its filings to provide declarations or otherwise conform to the newly-announced evidentiary standard.

Sincerely,

FAGEN FRIEDMAN & FULFROST, LLP

Heather Halsey
Executive Director
Commission on State Mandates
980 Ninth Street, Suite 300
Sacramento, CA 95814

Re: CSM-4464 - Behavioral Intervention Plans
Amended Exhibit 2 of Co-Claimants' December 16, 2010
Revised Proposed Parameters and Guidelines

Dear Ms. Halsey:

Co-Claimants San Diego Unified School District, Butte County Office of Education, and San Joaquin County Office of Education ("Co-Claimants") hereby amend Exhibit 2 ("CSM 4454 Behavioral Intervention Plans Statewide Cost Survey") of its December 16, 2010 Revised Proposed Parameters and Guidelines.[1]

Co-Claimants have amended Exhibit 2 to meet the standard described in the Commission on State Mandates' March 23, 2012 decision on the parameters and guidelines in Voter Identification Procedures ("VIP") (03-TC-23). In that decision, the Commission rejected the VIP claimant's proposed reasonable reimbursement methodology ("RRM") for failure to meet the evidentiary requirements of Government Code sections 17557 and 17518.5. Specifically, the Commission determined that the summaries of survey responses were hearsay because they were out-of-court statements that were not provided under oath or affirmation from the responder. Without sworn survey responses, staff determined there was no evidence to support the proposed RRM.

As you know, Co-Claimants' proposed RRM in the behavioral intervention plans ("BIP") test claim is based on survey data collected in 2007-2008. In its Revised Proposed Parameters and

[1] Amended Exhibit 2 replaces the existing Exhibit 2 in its entirety.

Guidelines, Co-Claimants included detailed spreadsheet summaries of the survey responses in Exhibit 2. Co-Claimants also included a copy of the blank survey forms in Exhibit 1. However, Co-Claimants did not provide copies of the original survey responses or sworn declarations from the survey respondents, nor did we include the final reconciled spreadsheet summaries to which claimants and the Department of Finance ("Finance") agreed.[2] Amended Exhibit 2 includes both of these, 1) the actual survey responses with declarations wherever possible, and 2) the final reconciled spreadsheets summarizing the data from the survey responses.

Discussion

In light of the Commission's analysis in VIP, BIP Co-Claimants set out to obtain sworn declarations from each of its survey respondents. Recognizing the logistical difficulty of obtaining declarations from individuals who had completed the survey four to five years ago and who may no longer be employed by the same agency, we nonetheless sought to obtain as many declarations as possible. We sent to each of the 21 SELPA directors a large packet containing individual survey responses and form declarations. We provided instructions regarding completion of the declarations, as well as contact information for questions. (See Declaration of Diana McDonough for more details, attached as Amended Exhibit 2A.)

Of the 388 original survey responses, 308 of them were returned accompanied by signed declarations, a 79% return rate. Thus, 79% of survey respondents swore under penalty of perjury that the survey responses were accurate and complete to the best of their ability at the time. One person corrected an error in her survey. We were unable to locate the persons responsible for the remaining 80 survey responses.[3]

As stated in several filings with the Commission, the survey was developed with the knowledge of Finance as part of negotiations towards an ultimately unsuccessful settlement agreement. Finance received all the survey responses and worked with Co-Claimants' consultants to compile the data, analyze it, and prepare its own spreadsheet analysis. Any inconsistencies between Co-Claimants' figures and those of Finance were examined and modified until both parties agreed that the figures were as accurate as possible. The agreed-upon figures representing the data in the survey responses were documented in "reconciled spreadsheets." (See Declarations of R.

---

[2] Failing to include the final reconciled spreadsheet summaries was an unintentional omission in our December 16, 2010 filing.

[3] Note, this does not necessarily mean 80 persons, as some individuals completed multiple surveys in their multiple professional capacities.

Received
August 15, 2012
Commission on
State Mandates

Michael Lenahan and Linda Grundhoffer, attached as Amended Exhibit 2C.) These were the figures that Co-Claimants used to calculate its proposed RRM.

In short, the actual survey responses and the reconciled spreadsheets (which summarize the survey responses and were agreed upon by Finance) are only new to the Commission. This Amended Exhibit 2 does not introduce any new information that Finance has not already seen, save the accompanying declarations. Co-Claimants are not proposing changes to our revised proposed parameters and guidelines with RRM; we merely provide evidence in support of the same. As a result, we do not anticipate that this amendment should delay the Commission's timelines by necessitating a response and rebuttal period.

Amended Exhibit 2 includes the following:

Amended 2A: Declaration of Diana McDonough with attachments:

i: Cover letter to SELPA Directors regarding declarations

ii: Cover letter to survey respondents regarding declarations

iii: Blank form declaration provided to survey respondents

Amended 2B: Original survey responses and declarations (organized first by SELPA; organized within each SELPA by survey "level": SELPA, District, and BICM. Within each survey level, we first provide the survey responses with declarations, then those without declarations.)

Amended 2C: Declarations of R. Michael Lenahan and Linda Grundhoffer.

Amended 2D: Reconciled Spreadsheets summarizing data in survey responses and agreed upon by Finance (organized by SELPA; organized within each SELPA by "level": SELPA, District, and BICM.)

Based on the foregoing, Co-Claimants respectfully submit Amended Exhibit 2, which replaces former Exhibit 2 of Co-Claimants' December 16, 2010 Revised Proposed Parameters and Guidelines.

DECLARATION OF DIANA K. MCDONOUGH

I, Diana K. McDonough, declare as follows:

I have personal knowledge of the facts stated herein. If called as a witness, I could and would testify competently to these facts under oath:

1. I am an attorney admitted to practice in California in 1978. I am employed by Fagen Friedman & Fulfrost, LLP and am the attorney of record for Co-Claimants San Diego Unified School District, Butte County Office of Education, and San Joaquin County Office of Education (collectively, "Co-Claimants") in this matter.

2. In January 2008, our office surveyed 21 SELPAs regarding the costs of implementing the BIP/Hughes Bill mandate during the 2006-07 school year. I was responsible for overseeing that survey. The procedures we followed in writing this survey, identifying the respondents, and compiling the results are described fully in the declarations submitted as part of Co-Claimants' December 16, 2010 Revised Proposed Parameters and Guidelines.

3. In brief, we obtained 388 original individual survey responses from the 21 SELPAs in early 2008 and sent a copy of each of those responses to the Department of Finance ("Finance") at that time. Based on those responses, we compiled spreadsheets summarizing the costs. Ultimately, Co-Claimants and Finance agreed that the figures in the "reconciled spreadsheets" (see Amended Exhibit 2D) represent the figures reported in the survey responses. Co-Claimants' proposed RRM was calculated using the figures from the reconciled spreadsheets.

4. After reviewing the Commission's March 23, 2012 decision in Voter Identification Procedures, which required non-hearsay evidence as the basis for a Reasonable Reimbursement Methodology, this office set out to obtain sworn declarations from the original survey respondents to meet the non-hearsay standard.

5. On April 16, 2012, this office sent packages to the current SELPA directors of each of the 21 SELPAs that participated in the 2007-2008 BIP Survey: Butte, Calaveras, Clovis, Fresno County, Fresno Unified, Glenn, Inyo/Mono, Lodi, Marin, Modoc, Poway, San Joaquin, Solano, Sonoma, South County-San Diego, Tehama, Tri-City, Tuolumne County, West Orange, and Yolo SELPAs. In a cover letter (**Exhibit i**, attached hereto), we asked the SELPA directors to distribute

State Mandates

the individual packets to each of the original survey respondents.

6. Each individual packet contained a cover letter with instructions (**Exhibit ii**, attached hereto), the respondent's original survey responses (Amended Exhibit 2B), and a blank declaration form for each respondent to date and sign (**Exhibit iii**, attached hereto).

7. Of the 388 original survey responses, 308 were returned to our office with the signed declaration. Below we show a table listing each SELPA, the number of declarations sent, and the number returned signed. One declaration (see pages 1333 – 1334 of Amended Exhibit 2B) noted a typographical error in the original response.

SELPA	Number of Survey Responses	Number of Declarations
Butte	21	20
Calaveras	4	3
Clovis	10	10
Fresno County	83	63

RE: Hughes Bill/PBIP Mandate – Declarations from Survey Respondents in your SELPA, 2007-08

As Penny Valentine shared at the most recent State SELPA Directors' meeting, once again we are in need of your assistance. We continue working on obtaining reimbursement for the Hughes Bill/PBIP mandate. This has been a multi-year project as you know and we thank you for your ongoing support.

We have developed a reimbursement formula based on survey data that we collected from your SELPAs in 2007-08. Now, due to a recent ruling, we believe we would have the best chance to succeed if the survey returns were verified, under penalty of perjury, by the **original respondents**. So we would like you to obtain signatures from as many of those educators who completed the surveys as you can find, even if they have since retired or left your SELPA. We recognize that you yourself may be new to your SELPA and you may not have been involved in the survey; if this is the case, we are hoping that you will nonetheless be the "point person" for your current SELPA and assist in distributing the enclosed packets.

The **person who actually completed the survey** should sign the declaration – not the person who may now hold the position. For example, if your predecessor completed a survey, your predecessor should sign the declaration; similarly, if you or your predecessor hired a consultant to complete the survey, the consultant should sign the declaration. However, if you compiled the data and merely directed your assistant to fill out the survey, you should sign the declaration. Another way to think about this is as follows: the person who was responsible for making judgment calls should sign the declaration, even if that person didn't physically write down the data on the survey return.

Received
August 15, 2012
Commission on
State Mandates

To help you in this task, enclosed in this mailing you will find:

- A yellow list of all the persons who completed surveys in your SELPA. In some cases, because the name was difficult to read or no name was filled in, a name may be listed as "x". We apologize if some names are spelled incorrectly. To the extent you are able, please locate all persons who completed the survey, including those whose names we were not able to identify. Note that some respondents completed more than one survey, and thus will have more than one declaration to sign.

- Individual packets for you to distribute to each survey respondent containing:
  - a green cover letter to survey respondents explaining the declaration,
  - a form declaration for each original respondent to sign in **blue or black ink,** and
  - a copy of the respondent's survey return.

Please distribute these individual packets to each survey respondent and request that they sign the declaration and return the **complete packet** with **ORIGINAL** signatures back to you not later than **May 10**. Once you collect the packets, please mail them to this office not later than **May 15**. Please also enclose the yellow list of respondents included in this mailing, showing current contact information available for educators no longer in your SELPA and whom you were unable to reach. Mail these items to:

Fagen Friedman & Fulfrost
ATTN: Kate Parnes
70 Washington Street, Suite 205
Oakland, CA 94607-3795

If you have questions, or if you will be unable to return this by May 15, please contact Kate Parnes, consultant with Fagen Friedman, at kparnes@fagenfriedman.com or cell (650) 400-2288.

As ever, thank you so much for your help. We are always so grateful for you "can do" SELPA directors!

Commission on
State Mandates

Dear PBIP Survey Respondents:

Once again we need your help – but it's only for a signature! We apologize for asking you at this busy end of year time. Please read on!

You may recall completing a Positive Behavioral Intervention Plan (PBIP) survey at some point during the 2007-08 school year. The purpose of the survey was to identify costs associated with the PBIP (or Hughes Bill) mandate. Depending on your job position at the time, we asked you to complete a BICM level, District level, and/or SELPA level survey.

In the years since you completed the survey, we developed a reimbursement formula based on survey data we collected and we have been working to obtain reimbursement from the State. Now, due to a recent ruling, we believe we would have the best chance to succeed if the survey returns were signed, under penalty of perjury, by the **original respondents**. This means you – and we thank you in advance.

We understand that you may not remember your survey responses from four or five years ago. Therefore, we are providing you with a copy of your survey responses for your review. If you completed more than one survey (for example, if you completed both the District level and the BICM level surveys), you will receive more than one of these packets and your signed declaration is required for each survey you completed.

After you review your survey responses, **please review and sign the attached declaration in blue or black ink**. Do not detach the declaration from this packet. You may be wondering what this declaration means, legally. By signing "under penalty of perjury," you are swearing that you are telling the truth. In other words, you are swearing that you completed the survey in 2007-08 accurately and completely to the best of your ability. Note, you do not need to be able to reconstruct your survey responses in order to truthfully sign the declaration. You are simply swearing that your survey responses were accurate and complete to the best of your ability **at the time you completed the survey**.

After you sign your declaration, please return this complete packet, including this letter, your **ORIGINAL** signed declaration in ink and your survey responses, to your SELPA director not later than **May 10**.

If you have any questions or concerns, please contact your SELPA director for guidance. Thank you again for your continued help in this matter.

*Notes on Organization:

- Within each SELPA, the surveys are organized by survey "level" as follows: SELPA, District, BICM. While most SELPAs contain all three levels, some contain only one or two levels. This is intentional, accurately reflecting the survey returns.
- When available, each survey is preceded by the corresponding declaration. Within each survey level, we first provide the survey responses with declarations, then those without declarations.

Positive Behavioral Intervention Plan/Functional Analysis Assessment Survey

SELPA Level Survey

Dear SELPA Director:

The purpose of this survey is to collect information on the costs of implementing the Hughes Bill, including PBIPs/FAAs. The information asked for below is in two parts. Part I asks that you provide summary data on the number of survey forms returned to you and some additional information. Part II asks for data on Hughes Bill procedures, training, and data reporting which SELPA staff provide. Please be sure to report only for SELPA staff, not district staff. For questions, contact Kate Parnes at Fagen Friedman's Oakland Office at 510-550-8200, by cell at 650-400-2288, or by email at kparnes@fagenfriedman.com. For questions on the spreadsheet, contact Mike Lenahan at rmlenahan@gmail.com.

DECLARATION

I, Eric Snedeker, hereby declare as follows:
Print Name

1. In the 2007-2008 school year, I was employed as a Principal
Title of Position
by Chico Unified School District.
Employer (Name of District, County Office of Education, or SELPA)

2. In the 2007-2008 school year, I completed the attached Positive Behavioral Intervention Plan (PBIP) survey regarding the Hughes Bill mandate. When answering the survey questions, I consulted various records and sources.

3. I have reviewed my attached survey responses. When I responded to the survey my responses were accurate and complete to the best of my ability.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct.

Executed May 9th, 2012, at Chico, California.

DECLARATION

I, Eric Snedeker, hereby declare as follows:
Print Name

1. In the 2007-2008 school year, I was employed as a Principal
Title of Position
by Chico Unified School District.
Employer (Name of District, County Office of Education, or SELPA)

2. In the 2007-2008 school year, I completed the attached Positive Behavioral Intervention Plan (PBIP) survey regarding the Hughes Bill mandate. When answering the survey questions, I consulted various records and sources.

3. I have reviewed my attached survey responses. When I responded to the survey my responses were accurate and complete to the best of my ability.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct.

Executed May 9th, 2012, at Chico, California.

DECLARATION

I, Lily Terstegge, hereby declare as follows:
Print Name

1. In the 2007-2008 school year, I was employed as a School Psychologist
Title of Position
by Butte County Office of Education.
Employer (Name of District, County Office of Education, or SELPA)

2. In the 2007-2008 school year, I completed the attached Positive Behavioral Intervention Plan (PBIP) survey regarding the Hughes Bill mandate. When answering the survey questions, I consulted various records and sources.

3. I have reviewed my attached survey responses. When I responded to the survey my responses were accurate and complete to the best of my ability.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct.

Executed 5/8, 2012, at Oroville, California.

1. a. How many students did you serve in 2006-07 who had PBIPs? Of this total, please specify the number of: b. new cases (PBIP for first time), and c. preexisting cases (entered 2006-07 with PBIP). Please ensure that the total is an unduplicated count.	1a. 3 1b. 2 1c. 1
2. How many students with PBIPs also received AB3632 mental health services in 2006-07?	2. 1
3. How much total actual time in hours or portions thereof did you spend in 2006-07 on the following **initial FAA activities:** a. Providing parent notice and obtaining consent for assessment. b. Information gathering and assessment (including direct observation, interviews with significant others, and review of available data such as assessment reports; conducting ecological inventory of settings where behavior occurs; review of health and medical factors; review of records showing effectiveness of previously used behavioral interventions; developing baseline of frequency, duration, and intensity of the targeted behavior.) c. Writing FAA. d. Total of answers to 3a, 3b, and 3c. e. What was the average time you spent on initial FAAs for new cases (divide total from line 3d by number of new cases on line 1b.)? **Note: This question addresses only the students who were new cases in 2006-07 (line 1b).**	3a. 2 3b. 60 3c. 20 3d. 82 3e. 41

		0		$

For each district employee listed on this survey, for all district BICMs, and for every district position listed on district BICM surveys, please provide compensation data **for 2006-07** on the attached certificated and classified spreadsheets. For each position listed, provide the average salary and benefits level.

Please Note: Please indicate the source(s) of the information provided above; examples might include calendars, datebooks, day planners etc. Please include copies of mediation agreements, due process decisions, or other documents supporting claimed due process and independent contractor expenses. Remember to black out all personally identifiable student information.

Please indicate the amount of time it took to complete this document: 1 hour

Thank you for taking the time to complete this survey

DECLARATION

I, KATHY NORTHINGTON, hereby declare as follows:
Print Name

1. In the 2007-2008 school year, I was employed as a SELPA DIRECTOR by Calaveras County Office of Ed.
Title of Position
Employer (Name of District, County Office of Education, or SELPA)

2. In the 2007-2008 school year, I completed the attached Positive Behavioral Intervention Plan (PBIP) survey regarding the Hughes Bill mandate. When answering the survey questions, I consulted various records and sources.

3. I have reviewed my attached survey responses. When I responded to the survey my responses were accurate and complete to the best of my ability.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct.

Executed 5/16, 2012, at Angels Camp, California.

Positive Behavioral Intervention Plan/Functional Analysis Assessment Survey

SELPA Level Survey

Dear SELPA Director:

The purpose of this survey is to collect information on the costs of implementing the Hughes Bill, including PBIPs/FAAs. The information asked for below is in two parts. Part I asks that you provide summary data on the number of survey forms returned to you and some additional information. Part II asks for data on Hughes Bill procedures, training, and data reporting which SELPA staff provide. Please be sure to report only for SELPA staff, not district staff. For questions, contact Kate Parnes at Fagen Friedman's Oakland Office at 510-550-8200, by cell at 650-400-2288, or by email at kparnes@fagenfriedman.com. For questions on the spreadsheet, contact Mike Lenahan at rmlenahan@gmail.com.

SELPA: Calaveras County Date: 2/12/08
Person Completing Survey: Kathy Northington
Title: Associate Supt. Curriculum + Instruction/Special Ed
Phone Number(s): 209-736-6012
Email Address: knorthington@ccoe.k12.ca.us

Part 1: SELPA DATA SUMMARY:	
Please review all surveys returned to you and verify that they are complete. Please send us copies of all completed BICM and district surveys.	
1. How many total BICMs are in your SELPA?	3
2. How many BICM surveys have been returned to you?	3
3. If not all BICM surveys have been returned, please indicate reason.	
4. How many districts are in your SELPA?	4
5. How many district level surveys have been returned to you?	0
6. If not all district surveys have been returned, please indicate reason.

Positive Behavioral Intervention Plan/Functional Analysis Assessment Survey

SELPA Level Survey

Dear SELPA Director:

The purpose of this survey is to collect information on the costs of implementing the Hughes Bill, including PBIPs/FAAs. The information asked for below is in two parts. Part I asks that you provide summary data on the number of survey forms returned to you and some additional information. Part II asks for data on Hughes Bill procedures, training, and data reporting which SELPA staff provide. Please be sure to report only for SELPA staff, not district staff. For questions, contact Kate Parnes at Fagen Friedman's Oakland Office at 510-550-8200, by cell at 650-400-2288, or by email at kparnes@fagenfriedman.com. For questions on the spreadsheet, contact Mike Lenahan at rmlenahan@gmail.com.

SELPA: Clovis Unified School District **Date:** 2-1-08

10. For each district employee listed on this survey, for all district BICMs, and for every district position listed on district BICM surveys, please provide compensation data **for 2006-07** on the attached certificated and classified spreadsheets. For each position listed, provide the <u>average</u> salary and benefits level.

Please Note: Please indicate the source(s) of the information provided above; examples might include calendars, datebooks, day planners etc. Please include copies of mediation agreements, due process decisions, or other documents supporting claimed due process and independent contractor expenses. Remember to black out all personally identifiable student information.

Please indicate the amount of time it took to complete this document: 2 hrs.

Thank you for taking the time to complete this survey.

DECLARATION

I, Kathy Wandler, hereby declare as follows:
Print Name

1. In the 2007-2008 school year, I was employed as a Behavior Analyst
Title of Position
by Clovis Unified School District.
Employer (Name of District, County Office of Education, or SELPA)

2. In the 2007-2008 school year, I completed the attached Positive Behavioral Intervention Plan (PBIP) survey regarding the Hughes Bill mandate. When answering the survey questions, I consulted various records and sources.

3. I have reviewed my attached survey responses. When I responded to the survey my responses were accurate and complete to the best of my ability.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct.

Executed 5/1, 2012, at Clovis, California.

DECLARATION

I, Kristine Lachs, hereby declare as follows:
Print Name

1. In the 2007-2008 school year, I was employed as a School Psychologist by Clovis Unified School District.
Title of Position
Employer (Name of District, County Office of Education, or SELPA)

2. In the 2007-2008 school year, I completed the attached Positive Behavioral Intervention Plan (PBIP) survey regarding the Hughes Bill mandate. When answering the survey questions, I consulted various records and sources.

3. I have reviewed my attached survey responses. When I responded to the survey my responses were accurate and complete to the best of my ability.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct.

Executed May 2, 2012, at Clovis, California.

Positive Behavioral Intervention Plan/Functional Analysis Assessment Survey

SELPA Level Survey

Dear SELPA Director:

The purpose of this survey is to collect information on the costs of implementing the Hughes Bill, including PBIPs/FAAs. The information asked for below is in two parts. Part I asks that you provide summary data on the number of survey forms returned to you and some additional information. Part II asks for data on Hughes Bill procedures, training, and data reporting which SELPA staff provide. Please be sure to report only for SELPA staff, not district staff. For questions, contact Kate Parnes at Fagen Friedman's Oakland Office at 510-550-8200, by cell at 650-400-2288, or by email at kparnes@fagenfriedman.com. For questions on the spreadsheet, contact Mike Lenahan at rmlenahan@gmail.com.

DECLARATION

I, DAVE HALPERN, hereby declare as follows:
Print Name

1. In the 2007-2008 school year, I was employed as a PROGRAM MANAGER
Title of Position
by FRESNO COE.
Employer (Name of District, County Office of Education, or SELPA)

2. In the 2007-2008 school year, I completed the attached Positive Behavioral Intervention Plan (PBIP) survey regarding the Hughes Bill mandate. When answering the survey questions, I consulted various records and sources.

3. I have reviewed my attached survey responses. When I responded to the survey my responses were accurate and complete to the best of my ability.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct.

Executed 4/30/12, 2012, at FRESNO, California.

DECLARATION

I, Cinde Abbate, hereby declare as follows:
Print Name

1. In the 2007-2008 school year, I was employed as a Program Manager by Fresno County Office of Ed.
Title of Position
Employer (Name of District, County Office of Education, or SELPA)

2. In the 2007-2008 school year, I completed the attached Positive Behavioral Intervention Plan (PBIP) survey regarding the Hughes Bill mandate. When answering the survey questions, I consulted various records and sources.

3. I have reviewed my attached survey responses. When I responded to the survey my responses were accurate and complete to the best of my ability.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct.

Executed 4/20/12, 2012, at Fresno, California.

DECLARATION

I, Gary Eisley, hereby declare as follows:
Print Name

1. In the 2007-2008 school year, I was employed as a Director of Support Services
Title of Position
by Caruthers Unified School District.
Employer (Name of District, County Office of Education, or SELPA)

2. In the 2007-2008 school year, I completed the attached Positive Behavioral Intervention Plan (PBIP) survey regarding the Hughes Bill mandate. When answering the survey questions, I consulted various records and sources.

3. I have reviewed my attached survey responses. When I responded to the survey my responses were accurate and complete to the best of my ability.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct.

Executed April 26, 2012, at Fresno, California.

Positive Behavioral Intervention Plan/Functional Analysis Assessment Survey

District Level Survey – Special Education Director $50.78

Dear Special Education Director:

We need your help in determining the costs of Hughes Bill implementation by answering this survey. The purpose is to identify costs associated with the mandates generated from the Hughes Bill at the District level. BICMs and the SELPA director are also completing surveys. This information will be used to further negotiations on possible Hughes Bill mandate reimbursement for all SELPAs, districts, and County offices. For purposes of the survey, we are focusing on the 2006-07 school year.

We recognize that the survey will require effort on your part. Your district superintendent will be receiving a letter from the California School Boards Association explaining the purpose of the survey and the time commitment involved.

Please remember:

- to black out any personally identifiable student information that exists on any documents attached to the survey;
- to identify personnel by position, not name; and
- to record time required in hours, or portions thereof, not in days or weeks.

Note that a critical part of this survey is to provide the hourly rate of each district position that you list or that one of your BICMs has listed. Your district BICMs should provide you a copy of their completed surveys to allow you or your business office to do this.

When complete, return this survey, along with those completed by your BICMs, to the SELPA office by **January ___, 2008.** If you have any questions, please contact Kate Parnes, a retired SELPA director now working with the law firm Fagen, Friedman & Fulfrost. Kate can be reached at Fagen Friedman's Oakland office, 510-550-8200, by cell at 650-400-2288 or by email at kparnes@fagenfriedman.com. For questions on the calculation of hourly rate, please contact Mike Lenahan at rmlenahan@gmail.com.

Thank you so much for your help in this important endeavor.

9. If the district employed attorneys or other independent contractors for due process or Hughes Bill activities – such as developing FAAs, PBIPs or attending IEP team meetings – please provide information to the extent possible regarding the number of students for whom the activity was performed, the activity performed, the hours of work and by whom, and the fees which the district paid.

# of Students	Activity Performed	# of Hrs	Provider Name/Profession	Fees
n/a	n/a	n/a	n/a	$ n/a
				$
				$
				$
				$
				$
				$
				$

10. For each district employee listed on this survey, for all district BICMs, and for every district position listed on district BICM surveys, please provide compensation data **for 2006-07** on the attached certificated and classified spreadsheets. For each position listed, provide the <u>average</u> salary and benefits level.

Please Note: Please indicate the source(s) of the information provided above; examples might include calendars, datebooks, day planners etc. Please include copies of mediation agreements, due process decisions, or other documents supporting claimed due process and independent contractor expenses. Remember to black out all personally identifiable student information.

Please indicate the amount of time it took to complete this document: 5 minutes

Thank you for taking the time to complete this survey.

DECLARATION

I, Cindy Schreiner, hereby declare as follows:
Print Name

1. In the 2007-2008 school year, I was employed as a Assistant Principal
Title of Position
by Kingsburg Joint Union High School District.
Employer (Name of District, County Office of Education, or SELPA)

2. In the 2007-2008 school year, I completed the attached Positive Behavioral Intervention Plan (PBIP) survey regarding the Hughes Bill mandate. When answering the survey questions, I consulted various records and sources.

3. I have reviewed my attached survey responses. When I responded to the survey my responses were accurate and complete to the best of my ability.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct.

Executed 4-27, 2012, at Kingsburg, California.

DECLARATION

I, Alfredo Ponce, hereby declare as follows:
Print Name

1. In the 2007-2008 school year, I was employed as a School Psychologist
Title of Position
by Fresno County Office of Education.
Employer (Name of District, County Office of Education, or SELPA)

2. In the 2007-2008 school year, I completed the attached Positive Behavioral Intervention Plan (PBIP) survey regarding the Hughes Bill mandate. When answering the survey questions, I consulted various records and sources.

3. I have reviewed my attached survey responses. When I responded to the survey my responses were accurate and complete to the best of my ability.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct.

Executed 4/27/12, 2012, at Fresno, California.

DECLARATION

I, Susannah Amezquita hereby declare as follows:
Print Name

1. In the 2007-2008 school year, I was employed as a School Psychologist
Title of Position
by Fresno County Office of Education.
Employer (Name of District, County Office of Education, or SELPA)

2. In the 2007-2008 school year, I completed the attached Positive Behavioral Intervention Plan (PBIP) survey regarding the Hughes Bill mandate. When answering the survey questions, I consulted various records and sources.

3. I have reviewed my attached survey responses. When I responded to the survey my responses were accurate and complete to the best of my ability.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct.

Executed 4-23, 2012, at Fresno, California.

11. How much total actual time in hours or portions thereof did you spend in 2006-07 on the following activities related to emergency behavioral interventions?	11.
a. Performing emergency behavioral interventions.	a. 1.5
b. Notifying parent and/or residential care providers within one school day of use of emergency interventions.	b. .5
c. Completing a "Behavioral Emergency Report" for file; forwarding copy to administrator for review.	c. 1.0
d. Scheduling and holding IEP team meetings for students without a PBIP solely to review the behavioral emergency report, determine necessity for FAA and determine necessity for interim PBIP.	d. 4.5
e. Scheduling and holding IEP team meetings for students with PBIPs solely to determine if PBIP modifications were required due to behavioral emergency.	e. 4.0
f. Reporting data in "Behavioral Emergency Reports" to administrator for annual report to CDE.	f. Ø

12. Please provide three (3) FAAs/PBIPs (black out all personally identifiable student information) from 2006-07 which represent various levels of complexity and intensity. Also, please provide three (3) IEPs for students who have both PBIPs and AB3632 services with all attachments. – only one included. Other student was Central Unified. I did not receive copy of IEP.

Please provide the sample template for FAAs and PBIPs that you use.

PLEASE NOTE: For questions such as #3 which request data related to time, please list below the sources of information used. Examples might be calendars, day planners etc.

Sources of Information

P-BIPs — File info. — calendar
memory

Please indicate the time it took for you to complete this survey: 4 hours — much too long. + time taken to gather repts - block out info, Not sure info is accurate, etc. Would have been easier to keep data for this year had we been asked to.

Thank you very much for taking the time to complete this survey.

I, Lori Wray, hereby declare as follows:
Print Name

1. In the 2007-2008 school year, I was employed as a SDC 7-8th teacher
Title of Position
by Sanger Unified School District.
Employer (Name of District, County Office of Education, or SELPA)

2. In the 2007-2008 school year, I completed the attached Positive Behavioral Intervention Plan (PBIP) survey regarding the Hughes Bill mandate. When answering the survey questions, I consulted various records and sources.

3. I have reviewed my attached survey responses. When I responded to the survey my responses were accurate and complete to the best of my ability.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct.

Executed _____, 2012, at _____, California.
Date *City*

I did not fill out anything except Selpa Info & boxes 1a-3a on page 2.

1. a. How many students did you serve in 2006-07 who had PBIPs?	1a. 0
Of this total, please specify the number of: b. new cases (PBIP for first time), and c. preexisting cases (entered 2006-07 with PBIP). Please ensure that the total is an unduplicated count.	1b. 1c.
2. How many students with PBIPs also received AB3632 mental health services in 2006-07?	2.
3. How much total actual time in hours or portions thereof did you spend in 2006-07 on the following **initial FAA activities**: a. Providing parent notice and obtaining consent for assessment. b. Information gathering and assessment (including direct observation, interviews with significant others, and review of available data such as assessment reports; conducting ecological inventory of settings where behavior occurs; review of health and medical factors; review of records showing effectiveness of previously used behavioral interventions; developing baseline of frequency, duration, and intensity of the targeted behavior.) c. Writing FAA. d. Total of answers to 3a, 3b, and 3c. e. What was the average time you spent on initial FAAs for new cases (divide total from line 3d by number of new cases on line 1b.)? **Note: This question addresses only the students who were new cases in 2006-07 (line 1b).**	3a. 3b. 3c. 3d. 3e.

11. How much total actual time in hours or portions thereof did you spend in 2006-07 on the following activities related to emergency behavioral interventions?	11.
a. Performing emergency behavioral interventions.	a. 4 hrs
b. Notifying parent and/or residential care providers within one school day of use of emergency interventions.	b. N/A teacher performs
c. Completing a "Behavioral Emergency Report" for file; forwarding copy to administrator for review.	c. 3.0 hrs
d. Scheduling and holding IEP team meetings for students without a PBIP solely to review the behavioral emergency report, determine necessity for FAA and determine necessity for interim PBIP.	d. 1.0
e. Scheduling and holding IEP team meetings for students with PBIPs solely to determine if PBIP modifications were required due to behavioral emergency.	e. 1.0
f. Reporting data in "Behavioral Emergency Reports" to administrator for annual report to CDE.	f. 1.0
12. Please provide three (3) FAAs/PBIPs (black out all personally identifiable student information) from 2006-07 which represent various levels of complexity and intensity. Also, please provide three (3) IEPs for students who have both PBIPs and AB3632 services with all attachments. Please provide the sample template for FAAs and PBIPs that you use.	

PLEASE NOTE: For questions such as #3 which request data related to time, please list below the sources of information used. Examples might be calendars, day planners etc.

DECLARATION

I, Heidi Haley, hereby declare as follows:
Print Name

1. In the 2007-2008 school year, I was employed as a School Psychologist
Title of Position
by Fresno Unified School District.
Employer (Name of District, County Office of Education, or SELPA)

2. In the 2007-2008 school year, I completed the attached Positive Behavioral Intervention Plan (PBIP) survey regarding the Hughes Bill mandate. When answering the survey questions, I consulted various records and sources.

3. I have reviewed my attached survey responses. When I responded to the survey my responses were accurate and complete to the best of my ability.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct.

Executed July 2, 2012, at Fresno, California.

Positive Behavioral Intervention Plan/Functional Analysis Assessment Survey

SELPA Level Survey

Dear SELPA Director:

The purpose of this survey is to collect information on the costs of implementing the Hughes Bill, including PBIPs/FAAs. The information asked for below is in two parts. Part I asks that you provide summary data on the number of survey forms returned to you and some additional information. Part II asks for data on Hughes Bill procedures, training, and data reporting which SELPA staff provide. Please be sure to report only for SELPA staff, not district staff. For questions, contact Kate Parnes at Fagen Friedman's Oakland Office at 510-550-8200, by cell at 650-400-2288, or by email at kparnes@fagenfriedman.com. For questions on the spreadsheet, contact Mike Lenahan at rmlenahan@gmail.com.

Positive Behavioral Intervention Plan/Functional Analysis Assessment Survey

SELPA Level Survey

Dear SELPA Director:

The purpose of this survey is to collect information on the costs of implementing the Hughes Bill, including PBIPs/FAAs. The information asked for below is in two parts. Part I asks that you provide summary data on the number of survey forms returned to you and some additional information. Part II asks for data on Hughes Bill procedures, training, and data reporting which SELPA staff provide. Please be sure to report only for SELPA staff, not district staff. For questions, contact Kate Parnes at Fagen Friedman's Oakland Office at 510-550-8200, by cell at 650-400-2288, or by email at kparnes@fagenfriedman.com. For questions on the spreadsheet, contact Mike Lenahan at rmlenahan@gmail.com.

SELPA: Glenn County ✓ **DATE:** 2/1/08

GLENN COUNTY SPECIAL EDUCATION LOCAL PLAN AREA

IEP TEAM AMENDMENTS PAGE

Student: [redacted] **Birthdate:** *March 5, 1997* **Date:** 5/15/07

☐**Parents have agreed that a meeting is not needed for this amendment. Written consent attached.**

Purpose of Meeting: *To review the finding of the Funcional Analysis Assessment with the IEP team and write a Positive Behavior Support Plan.*

Changes to the IEP dated *3/13/2007* **:**

1- Behaviors assultive and non-compliant.

2- BSP not effective, so FAA was chosen to help shape behavior.

3- Frequency, Intensity and Duration taken from summaries and / or examples of behavior incidents. Rate of occurance = physical 2.3 per month, non-compliance leading to tantrum 2.8 per month, Average duration of academic time lost = 33%

4- Lorna's concern is that more physical behaviors may be related to [redacted]s restrictive program, and that she gets more compliance at home with peer interaction.

5- Read through and discussed all pages of FAA and BSP.

6- Lorna reports that [redacted] eats mostly top ramen at home.

7- Lorna met with Rich Gordon and discussed giving consequences for non-compliance. Kirsten Gray is [redacted]s probation officer. More compliance at home since the visit with probation. Grandma is no longer fiving him the opportunity to argue. He is less explosive. Grandma is not giving into his argumants.

8- [redacted] argues with grandma about going over to SDC peer's house (Mike). Mike and his mom don't want [redacted] over there.

9- Lorna thinks because of all the "Hamilton stuff" that [redacted] doesn't make friends well any more. [redacted] is "stuck" in being a victim and is unable to help himself make positive choices because he focuses on things that he cannot control. Our goal is to help [redacted] learn to make positive choices despite all that has happened to him. He is sensitive about things that people say to him.

10- According to Rich Gordon, [redacted] has difficulyt moderaating his reaction when he has stron emotions. He also has had difficulty picking up social skills through observation and direct instruction.

11- TOVA given 1 1/2 years ago was inconclusive due to a lack of responses during stimulating part of test - couldn't handle the amount of stimulation given. Maystruggle now at school due to amount of stimulation.

12- Grandma reports from court documentation that [redacted] was pre-natally exposed to drugs and alchohol.

13- Behavior is unpredictable with out behavioral signs that indicate escalation. Police will only be called in emergency situations when safety of self or others are of concern.

14- Based upon the data, the frequency of [redacted]s non-compliant and aggressive behavior is so high that he requires increased adult supervision to provide structure during all activities including academic, recess and lunch. He requires a reduced adult to student ratio ti increase his success with social interactions. He will continue to spend 100% of his school day with in the SDC program to reduce stimulation and increase structure to ensure safety to self and others.

Positive Behavioral Intervention Plan/Functional Analysis Assessment Survey

SELPA Level Survey

Dear SELPA Director:

The purpose of this survey is to collect information on the costs of implementing the Hughes Bill, including PBIPs/FAAs. The information asked for below is in two parts. Part I asks that you provide summary data on the number of survey forms returned to you and some additional information. Part II asks for data on Hughes Bill procedures, training, and data reporting which SELPA staff provide. Please be sure to report only for SELPA staff, not district staff. For questions, contact Kate Parnes at Fagen Friedman's Oakland Office at 510-550-8200, by cell at 650-400-2288, or by email at kparnes@fagenfriedman.com. For questions on the spreadsheet, contact Mike Lenahan at rmlenahan@gmail.com.

25. If your SELPA paid for training for BICMs or PBIP implementers in 2006-07 by sending them to trainings, what was the cost?
$_____
a. Is this figure typical of annual costs and for how long has it been typical? _____
b. If not, what have you typically done? _____
c. What do you intend to do in the future? _____

Note: Please provide sample evidence of all trainings such as flyers, sign-in sheets, etc.

C. Other SELPA Staff Activities:

	Position	# of Hours
26. Indicate total actual time in hours or portions thereof spent in 2006-07, by SELPA position, to collect data from the "Behavioral Emergency Reports" to be reported annually to CDE.	26.	26.
27. Indicate the total actual time in hours or portions thereof spent in 2006-07 by SELPA position in due process hearings (including mediation) and other related due process activities solely on Hughes Bill issues. (Do not duplicate data from District directors.)	27.	27.

28. For each SELPA staff position listed above in Part A, B or C, please provide compensation data **for 2006-07** on the attached certificated/classified spreadsheets. For each position listed, provide the average salary and benefit level.

Please indicate the amount of time in hours or portions thereof spent to complete this document. 0

Thank you very much for taking the time to complete this survey.

DECLARATION

I, Suzanne Roepke, hereby declare as follows:
Print Name

1. In the 2007-2008 school year, I was employed as a School Psychologist
Title of Position
by Inyo County Superintendent of Schools.
Employer (Name of District, County Office of Education, or SELPA)

2. In the 2007-2008 school year, I completed the attached Positive Behavioral Intervention Plan (PBIP) survey regarding the Hughes Bill mandate. When answering the survey questions, I consulted various records and sources.

3. I have reviewed my attached survey responses. When I responded to the survey my responses were accurate and complete to the best of my ability.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct.

Executed 5-9, 2012, at Bishop, California.

	# of Hours
11. How much total actual time in hours or portions thereof did you spend in 2006-07 on the following activities related to emergency behavioral interventions?	11.
a. Performing emergency behavioral interventions.	a. 0
b. Notifying parent and/or residential care providers within one school day of use of emergency interventions.	b. 0
c. Completing a "Behavioral Emergency Report" for file; forwarding copy to administrator for review.	c. 0
d. Scheduling and holding IEP team meetings for students without a PBIP solely to review the behavioral emergency report, determine necessity for FAA and determine necessity for interim PBIP.	d. 0
e. Scheduling and holding IEP team meetings for students with PBIPs solely to determine if PBIP modifications were required due to behavioral emergency.	e. 0
f. Reporting data in "Behavioral Emergency Reports" to administrator for annual report to CDE.	f. 0
12. Please provide three (3) FAAs/PBIPs (black out all personally identifiable student information) from 2006-07 which represent various levels of complexity and intensity. Also, please provide three (3) IEPs for students who have both PBIPs and AB3632 services with all attachments. Please provide the sample template for FAAs and PBIPs that you use.	

PLEASE NOTE: For questions such as #3 which request data related to time, please list below the sources of information used. Examples might be calendars, day planners etc.

DECLARATION

I, Catherine Conrado, hereby declare as follows:
Print Name

1. In the 2007-2008 school year, I was employed as a SELPA Director
Title of Position
by Lodi Unified School District, ALL for Lodi Area Special Education Region
Employer (Name of District, County Office of Education, or SELPA)

2. In the 2007-2008 school year, I completed the attached Positive Behavioral Intervention Plan (PBIP) survey regarding the Hughes Bill mandate. When answering the survey questions, I consulted various records and sources.

3. I have reviewed my attached survey responses. When I responded to the survey my responses were accurate and complete to the best of my ability.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct.

Executed 6-4-12, 2012, at Santa Rosa, California.

Positive Behavioral Intervention Plan/Functional Analysis Assessment Survey

SELPA Level Survey

Dear SELPA Director:

The purpose of this survey is to collect information on the costs of implementing the Hughes Bill, including PBIPs/FAAs. The information asked for below is in two parts. Part I asks that you provide summary data on the number of survey forms returned to you and some additional information. Part II asks for data on Hughes Bill procedures, training, and data reporting which SELPA staff provide. Please be sure to report only for SELPA staff, not district staff. For questions, contact Kate Parnes at Fagen Friedman's Oakland Office at 510-550-8200, by cell at 650-400-2288, or by email at kparnes@fagenfriedman.com. For questions on the spreadsheet, contact Mike Lenahan at rmlenahan@gmail.com.

SELPA: Lodi Area SELPA **Date:** February 29, 2008
Person Completing Survey: Catherine Conrado, Ed.D.
Title: Administrative Director of Student Services/SELPA
Phone Number(s): (209) 331-7061
Email Address: cconrado@lodiusd.k12.ca.us

Part 1: SELPA DATA SUMMARY:	
Please review all surveys returned to you and verify that they are complete. Please send us copies of all completed BICM and district surveys.	
1. How many total BICMs are in your SELPA?	27
2. How many BICM surveys have been returned to you?	3
3. If not all BICM surveys have been returned, please indicate reason.	Lodi SELPA trains and funds personnel.
4. How many LEAs are in your SELPA?	6
5. How many district level surveys have been returned to you?	0
6. If not all district surveys have been returned, please indicate reason.	1 District provides BICM support to other districts.

Lodi questions below. T here are 27 BICMs and only 3 responded and they included 3 of the 6 districts. Is there a reason for this? That's how many returned the survey.

On the SELPA Survey:

#16 What position The training is for teachers.
#17 What position led training The behavior specialist
#18 What were the positions of the three staff? The staff were Behavior Specialist, Program Specialist and School Psychologist

#19 Positions are listed but no hours, need hours

19.	19.	
	Hrs.	$ Amt.
2007-08		
a. Clerical time to arrange, schedule, set up and monitor.	a. 15	$300
b. Resource Specialist 63	b. 270	$11,656
c. School Psychologist 14	c. 92	$4,128
d. Administration 28	d. 136	$8,172
e. Counselors 15	e. 60	$2,826
f. Nurses 5	f. 20	$952
g. Program Specialists 1	g. 4	$180
h. Speech Therapist 14	h. 56	$2,638
i. Community Liaison 1	i. 4	$68
j. Custodial 1	j. 18	$306
k. Paraeducators 91	k. 484	$7,520
l. Campus Security 5	l. 20	$340
m. Clerk 1	m. 4	72

#20 Does the CPI trained persons list (attachment #1) listed on #20 belong under this question?? It does contain most of the hourly rates that are needed and quite a bit of costs. Yes.

Positive Behavioral Intervention Plan/Functional Analysis Assessment Survey

SELPA Level Survey

Dear SELPA Director:

The purpose of this survey is to collect information on the costs of implementing the Hughes Bill, including PBIPs/FAAs. The information asked for below is in two parts. Part I asks that you provide summary data on the number of survey forms returned to you and some additional information. Part II asks for data on Hughes Bill procedures, training, and data reporting which SELPA staff provide. Please be sure to report only for SELPA staff, not district staff. For questions, contact Kate Parnes at Fagen Friedman's Oakland Office at 510-550-8200, by cell at 650-400-2288, or by email at kparnes@fagenfriedman.com. For questions on the spreadsheet, contact Mike Lenahan at rmlenahan@gmail.com.

Part 1: SELPA DATA SUMMARY:	
Please review all surveys returned to you and verify that they are complete. Please send us copies of all completed BICM and district surveys.	
1. How many total BICMs are in your SELPA?	24
2. How many BICM surveys have been returned to you?	24
3. If not all BICM surveys have been returned, please indicate reason.	
4. How many districts are in your SELPA?	20
5. How many district level surveys have been returned to you?	19
6. If not all district surveys have been returned, please indicate reason. See note below.

MARIN SPECIAL EDUCATION LOCAL PLAN AREA

To: District Directors
From: Penny Valentine
Date: April 24, 2012
Re: Signatures Needed

In 2007-08, Marin SELPA took part in completing a survey that gathered information about Positive Behavior Intervention Plans and the amount of time that was spent either completing plans for students or FAAs. This data was gathered as part of an unfunded mandated cost lawsuit that was being brought forward on behalf of the districts in California, claiming that the districts were required to complete PBIPs and were not being funded to do so.

We recently received notice from Fagen, Friedman & Fullfrost that in order for the data collected to be considered by the court, there needs to be a signed declaration by the person who completed the survey. **These declarations along with the packet must be submitted by to the SELPA by May 10th.**

Included with this letter are the surveys that must be signed. Please ask you staff to sign the attached declaration and send the entire packet back to the SELPA. If several staff members completed a single survey, then anyone for those individuals may sign the declaration. You will find the name of the staff member highlighted on the top of the survey (page 3 of the packet)

If the person who completed the survey is no longer employed by your District, please attach a note indicating this, along with current contact information if you have it and return the packet to the SELPA.

If you have any questions, please contact me at 415-499-5850. Thank you for your time and efforts.

Mary Jane Burke, Marin County Superintendent of Schools

DECLARATION

I, Julie Lucero, hereby declare as follows:
Print Name

1. In the 2007-2008 school year, I was employed as a School Psychologist
Title of Position
by Marin County Office of Education.
Employer (Name of District, County Office of Education, or SELPA)

2. In the 2007-2008 school year, I completed the attached Positive Behavioral Intervention Plan (PBIP) survey regarding the Hughes Bill mandate. When answering the survey questions, I consulted various records and sources.

3. I have reviewed my attached survey responses. When I responded to the survey my responses were accurate and complete to the best of my ability.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct.

Executed May 4, 2012, at San Rafael, California.
