- Claims in the early years of the Hayden mandate (1999-2002) were built on averages and estimates before the publication of the current guidelines. According to the current guidelines as interpreted by the State auditor, the City’s claims were uniformly overstated as were claims by virtually all local agencies. The State Controller’s Office has indicated that the State audits of local animal care agencies typically reduce the amount reimbursed to about 50% of the amount originally claimed. For example: Contra Costa County billed the State \$11,457,157 for Hayden Bill expenses. The State allowed \$5,521,096 of the amount submitted and did not allow \$5,930,661. Disallowed costs exceeded allowed costs for seven of the nine local jurisdictions audited by the State Controller’s Office where audits are posted on their web site.
- All claims were filed through a third party consultant, Maximus, who provided guidance in the formulas and claim amounts. Maximus gathered information and used templates and formulas set up based on the 2002 guidelines for the periods containing most of the questioned costs.
- A court of appeals decision in May 2010 regarding the definition of “business-day” leaves both Saturday and Sunday as non-business days for purposes of calculating the hold days. The auditors have been advised by state legal counsel to apply this standard back to 1999. This has an unknown effect on the reimbursement. Our number of eligible animals decreases if we euthanized before newly defined four-day period. This is more likely a problem in the earlier years when shelter capacity was small. On the other hand, the average-holding-days calculation increases because typically we would have to hold animals longer if Saturday, Sunday, and Monday do not count as hold days. This issue needs significant further research and discussion for the audit and for the future when Hayden is no longer suspended.
- The State is in arrears to the City for a little more than \$5 million in past claims not yet reimbursed. After further adjustment and submissions expected, the amount the auditors find to be overstated is just about \$5 million.
- Hourly rates throughout the audit period are actually higher than the City’s claim. The City used Wages and Counts averages, while auditing actual payrolls gave a slightly increased hourly rate for all classifications.
- All computer hardware, software, and data management staffing claims (related to Chameleon) must be prorated because not all of Chameleon’s modules are strictly for mandated activities of animal care (i.e. Chameleon also does licensing, citation, receipts, etc.), even though the equipment purchases were required to comply. The City claimed 100%, the auditors agreed to a 50% pro-ration.

- The City used the annual budget total attributed to animal care to calculate the per animal day cost. The State auditors pro-rated actual salaries of ACT staff only to narrowly define and ascertain care and maintenance eligibility. Department staff has submitted additional records of medical, cleaning, and animal food expenditures from the City's Financial Management Information System (FMIS) central accounting database.
- Annual animal census figures calculated by auditor are significantly different from the estimates used in claims in the first four years of reimbursement claims. The Department was not provided with any guidelines before submission of reimbursement requests and has not had an opportunity to verify that these calculations are supported by data.
- The City claimed reimbursement for dogs and cats in all of 1999 but the Hayden bill stipulated that reimbursement should not begin for dogs and cats until July 1999.
- The entire shelter staff working on Saturdays was claimed for reimbursement for the first four claim years; according to the auditors, only those staff that specifically have to be on duty because of being open to the public can be claimed, as was done in later years.
- According to State auditors, indirect costs were improperly calculated in the first years (understated) but overall were overstated because in several other findings categories the auditors are disallowing many of the overstated hours for care and medical wellness.
- State auditors were provided documentation about the Prop F Bond projects with a request to consider pro-rated reimbursement since one of the reasons for expanding the shelter system was to meet Hayden requirements. Auditors determined that because property taxes were raised to fund the bond, it was not eligible for reimbursement. The preparation of the Master Facilities Study (by a consultant) may be reimbursable.
- According to the State auditor, the City's claims included overstated medical costs. Hayden only reimburses for routine wellness checks for incoming animals, not special care, not rabies vaccination, and not emergency care, because the latter was already required of shelters by state law. The City had claimed nearly all medical supplies and a high level of medical staff. For the audit, we performed a time study to determine the actual average wellness exam time.

SCO's Comment

The first bullet point in this section refers to audits of other local agencies that the SCO has performed under the Animal Adoption Program. The purpose of this comment is unclear, since audits of other local agency claims have nothing to do with SCO's audit of claims filed by the City of Los Angeles.

The response also refers to the city's claims filed for FY 1999-2000 through FY 2001-02 and makes the statement that the claims were overstated because they were based on estimates. This statement is inconsistent with the specifics documented in the draft audit report. None of the unallowable costs for this time frame were based solely on the use of estimates. The city even notes a few bullet points later that we used employee productive hourly rates that were higher than the estimated rates used in the city's claims.

Most of the unallowable costs were for the cost component of Holding Period. For this cost component, the city's claims included costs for employee classifications that are already reimbursable under other cost components of the mandated program, as well as certain other employee classifications that performed non-mandated activities and were not

reimbursable under the mandated program just because they were working on Saturday. Another significant area of unallowable costs occurred for the Care and Maintenance of Dogs and Cats cost component. For this cost component, costs were unallowable primarily because animal census figures were understated, thereby inflating the cost per animal per day.

The city's comments point out that the audit adjustment is about the same amount that is currently owed to the city for its filed claims. This comment infers that the SCO audit process included an agenda to reduce the State's liability to zero. This comment is invalid as we increased allowable costs for the cost component of Non-Medical Records by 227% over the amount claimed by the city during the audit period.

The city also had concerns about the proration of employee classifications performing care and maintenance activities. We don't understand the comment suggesting that our analysis was narrowly defined. Instead, our proration was based on discussions held with Animal Services Department management regarding the percentage of time spent on these activities by various employee classifications. We noted the calculations in the audit report. The city is welcome to provide a more comprehensive analysis for reconsideration if the information that they already agreed was correct is actually incorrect.

We concur that the animal census figures used by the city in its claims are misstated. However, the city's statement that there was a lack of guidelines for reimbursement is incorrect. The specifics of animal census data required for reimbursement has always existed within the language of the applicable cost components within the parameters and guidelines as adopted by the CSM. The city's statement that they have not been able to verify the animal census calculations is incorrect. We conferred with the department's Senior Systems Analyst when we obtained and analyzed animal census data from the city's Chameleon system database. We explained our analysis of the animal data, including which animals were excluded and why. We were told that the animal census numbers that we were using to determine allowable costs was correct. The city is welcome to provide a more comprehensive analysis for reconsideration if the information that they already agreed was correct is actually incorrect.

The city states:

Hayden only reimburses for routine wellness checks for incoming animals, not special care, not rabies vaccination, and not emergency care, because the later was already required of shelters by state law. The City had claimed nearly all medical supplies and a high level of medical staff. . . .

This statement is incorrect. The parameters and guidelines (Section IV.B.9–Necessary and Prompt Veterinary Care) identify the following reimbursable activities:

The following veterinary procedures, if conducted, are eligible for reimbursement:

- An initial physical examination of the animal to determine the animal's baseline health status and classification as "adoptable," "treatable," or "re-habilitatable."

- A wellness vaccine administered to “treatable” or “adoptable” animals.
- Veterinary care to stabilize and/or relieve the suffering of a “treatable” animal.
- Veterinary care intended to remedy any applicable disease, injury, or congenital or hereditary condition that adversely affects the health of a “treatable” animal or that is likely to adversely affect the animal’s health in the future, until the animal becomes “adoptable.”

The language under this cost component goes on to note animal population exclusions and veterinary care exclusions. The requirements also state that reimbursement is limited to veterinary procedures performed during the holding period and is only applicable to animals that died during the holding period plus those that were euthanized after the required holding period. The city provided additional documentation for medical costs incurred within expenditure account 3190, Medical Supplies. However, reimbursable costs are co-mingled with non-reimbursable costs in the documentation provided. Therefore, we cannot make a determination at this time of the extent to which the city incurred allowable costs under the mandated program.

The city conducted a time study supporting the amount of time spent to perform the first two activities cited in the parameters and guidelines. We requested that the city also provide information relating to costs incurred for the wellness vaccines administered. While the city has supplied materials and supplies costs incurred for medical supplies in total, the city has not yet provided specific information relating to vaccine costs. The second two bullet points describe activities that are not suitable for a time study because they are not repetitive activities. The costs for salaries and benefits, and materials and supplies for these procedures must be supported by actual cost information that also notes that the procedures were performed during the required holding period. The city did not maintain or provide this kind of detailed information for the procedures performed by its medical staff.

Reimbursement and Audit Procedures

City’s Response

- The Department was not given notice at beginning of audit period and not given notice at beginning of audit periods of requirements for methods to follow or records to maintain.
- Other minor areas in which follow up will result in slight increases in the reimbursement calculations: Start-up training information has been retrieved by the Department’s systems staff and verified by the payroll section and was provided to the auditor.
- The City questions the Controller’s retroactive application of the Purifoy decision that Saturday is not a business day, and of the description of the scope of work reasonably required to be performed in accordance with the mandate on a Saturday. The City’s believes retroactive application of the Purifoy case is improper. The Commission on State Mandates was silent as to the definition of business day. The court held that although the Hayden Bill requires animal shelters to hold animals longer or be open for business on a weekday evening or Saturday, Saturday is not a business day for the purposes of calculating how long to hold an animal

before it can be released for adoption or disposal. The decision, published on March 26, 2010, is clearly applicable to all future claims. Applying the rule retroactively, as the State has done, is unfair and tends to inhibit or defeat the purpose of the Hayden Bill of extending the holding period so that animals are treated humanely (redeemed or adopted).

- The City followed all guidelines provided by the State and available at the time each request for reimbursement was filed.
- The State waited for as long as 12 years after the close of an audit period to conduct an audit of the claimed expenses incurred during that audit period, then requested a level of detailed proof (original document as proof of each line item expenditure, including name of vendor, quantity, and description of each item purchased) not previously requested or required. Many vendors have destroyed the detailed information (invoices) as the time exceeds any Statute of Limitations. The City General Services Department destroyed copies of invoices because these times exceeded the required records retention period. Requiring the City to guess in what future distant period the State may decide to audit records in any given year and be forced to retain all detailed expenditure records is a burden that is inefficient and unnecessary.
- Initially, the State accepted budgeted expenditures as sufficient proof of expenditure. However, in this audit, the State accepted only detailed proof of actual expenditures and rejected budgeted amounts. This surprise change in documentation requirements is burdensome.
- The State reimbursement process is inefficient. For example, due to the lack of prior notice as to the specific levels and form of proof required, lack of adequate prior guidelines, and delay in audit, the Department was required to allocate well over 450 hours of staff time to respond to this audit - at a time when both the State and City are undergoing significant staffing reductions and furloughs. Administration of animal care and control services depends on efficiency. Inefficiency of any type leads to fewer adoptions, less revenue, less policing, and more euthanasia. This is contrary to the intent of the Hayden Bill.
- The State process of sending the notices of the entrance conferences and exit conferences to the City of Los Angeles Department of Animal Services only, and the draft final audit to the City Controller only, and copying the Department is confusing.

SCO's Comment

The city notes its disagreement with our retroactive application of the Appellate Court decision in the case of *Purifoy et al. v. Howell*. In that case, Saturday was determined NOT to be a business day for the purposes of determining the required holding period for dogs. For the purposes of our audit, this affected the allowable cost calculations for unallowable care and maintenance costs (Finding 3), and misstated necessary and prompt veterinary care costs (Finding 7). We contend that the court decision defines the legal definition of a business day for the required holding period as of the date that the statute was enacted in 1998. The decision published in the *Purifoy vs. Howell* court case did not change the verbiage in the parameters and guidelines nor did the definition of a business day change when the court case was published on March 26, 2010. The holding period requirement per the Hayden Bill has always read "four or six 'business days' after the day of impoundment." We acknowledge that the court's decision did not take into consideration the effect that this decision would have on mandated cost claims filed by local agencies.

The city's statement that they were not given notice at the beginning of the audit period nor given notice of methods to follow or records to maintain are both incorrect. We sent a letter dated April 7, 2009, to Laura Chick, City Controller, documenting the beginning of our audit of the city's mandated cost claims for FY 1998-99 through FY 2007-08 (excluding FY 2003-04 and FY 2004-05). A copy of this letter was also sent to Edward Boks, General Manager of the city's Animal Services Department.

The requirements of methods to follow in order to compute reimbursement under the Animal Adoption Program have always been contained within the cost components of the parameters and guidelines. Parameters and guidelines section VI requires the city to maintain the supporting documentation, as no funds were appropriated for the mandated program.

However, the city goes on to state:

The State waited for as long as 12 years after the close of an audit period to conduct an audit of the claimed expenses incurred during that audit period, then requested a level of detailed proof (original document as proof of each line item expenditure, including name of vendor, quantity, and description of each item purchased) not previously requested or required. Many vendors have destroyed the detailed information (invoices) as the time exceeds any Statute of Limitations. The City General Services Department destroyed copies of invoices because these times exceeded the required records retention period. Requiring the City to guess in what future distant period the State may decide to audit records in any given year and be forced to retain all detailed expenditure records is a burden that is inefficient and unnecessary.

The city overstates the amount of time that has elapsed since their initial claims were filed. The city's Animal Adoption Program claims for FY 1998-99, FY 1999-2000, and FY 2000-01 were all filed on September 10, 2002. We initiated an audit of these claims six and one-half years after they were filed. We had statutory authority under Government Code section 17558.5 to audit these claims, as no moneys were appropriated.

We are uncertain why the city would expect its vendors to maintain supporting documentation for its mandated cost claims. The city is responsible for maintaining relevant supporting documentation. The city's statement that it would need to guess when the SCO would actually conduct an audit is meaningless in light of the requirements stated in section VI of the parameters and guidelines of the mandated program, as described above. These requirements were adopted by the CSM, not the SCO. It appears that the city's mandated cost consultant failed to clarify this information with city representatives. The city is entitled to reimbursement from the State for the increased costs that it incurred to comply with the requirements of the mandated program if it follows the provisions contained within the parameters and guidelines describing what the requirements are, and applies them accordingly. If city representatives have questions pertaining to the Animal Adoption Program, we encourage them to contact our office and we will assist them.

The city states, “. . . in this audit, the State accepted only detailed proof of actual expenditures and rejected budgeted amounts. This surprise change in documentation requirements is burdensome.” We are uncertain how the city arrived at this determination. We audit to the requirements of the adopted parameters and guidelines. These criteria require that all costs claimed be traceable to source documents. Budgeted information is not a source document that shows evidence of the validity of such costs.

Attention: James L. Spano, Chief
Mandated Cost Audits Bureau, Division of Audits

Re: Response to Draft Audit Report of the City of Los Angeles Animal Adoption Program

Dear Mr. Chiang:

Attached are the main points of the response by the Department of Animal Services to the Draft Audit of the State Controller's Office, and a rough draft response to audit finding number 8 regarding eligibility of Prop F funding for construction of animal care centers. These attachments have been provided to the City Controller, Wendy Greuel because the draft audit was addressed to Ms. Greuel.

Due to the unreasonable time constraint imposed by the State on the Department, substantial and delinquent demand made by the State that the City provide detailed documentation for audit periods as long ago as 12 years, and strong likelihood that the with sufficient and fair notice to the City the actual reimbursement to the City would be closer to the actual amounts billed, the Department of Animal Services recommends that the City of Los Angeles direct the State of California to immediately and fully reimburse all amounts claimed by the Department of Animal Services that have not been paid by the State. Full reimbursement is proper because the claims filed by the City were submitted timely (except as noted), and were properly documented according to all of the State's guidelines and rules in place at the time each request for reimbursement was submitted. If the audit must be closed to meet a statutory deadline, we additionally request that the audit be reopened to allow adequate time to consider acceptance of offset allowances for Prop F funds expended on facility construction and other expenditures to comply with the Hayden Bill.

John Chiang, California State Controller
Page 2

For all the reasons stated in the attached, the Department recommends that the City reject the State's audit as untimely, lacking proper notification, and contrary to the general purposes of good government, and as a result, reject the audit findings.

Rather than reducing the burden on local animal care and control agencies of implementing a valuable State-mandated law, the Hayden Bill, the entire audit process by the State Controller's Office is resulting in numerous large financial penalties to local jurisdictions for following the rules of the State and, therefore, for supporting the mandates of the Hayden Bill in good faith, and for reporting expenses honestly. The State Mandates reimbursement process, including the audit, should accomplish just the opposite, that is, it should support the good faith and honest efforts of local agencies to comply with the mandate.

Should you have any questions, please contact John Forland of our staff.

Thank you.

Brenda F. Barnette, General Manager
Department of Animal Services

Response to the State Controller's Office
Draft Audit of Hayden Bill Mandated Reimbursement Requests
1998-99 through 2007-08**

Bullet Points

Deadline:

- The State Controller's Office (State) extended the deadline for providing the Department's response to the by two days to allow submission of additional material when the Department has requested 30 days. The State's refusal to allow the time requested by the Department is based on the State's April 6, 2011 deadline to file the audit in order to stay within the two-year statute of limitations that an audit must be completed within two years of initiation.
- The State's refusal to allow additional time requested by the Department as allowed in the guidelines is attributable to the State's delay, not that of the Department. The Department was initially contacted by the State Controller's Office almost two years ago to schedule the audit. The entrance conference was held and for seven months the State auditors met with Department staff and documents were requested and provided. The Department provided over 200 hours to the audit. In November 2009, the State discontinued contact with the Department. In about June 2010 the Department was contacted by the State again, a new State auditor was assigned. A second entrance conference was held and the State periodically contacted the Department to request information. The Department provided at least 250 hours in support of this audit. Over 450 hours has been allocated by the Department to support the continuous audit process mostly because of the continual demand of the State auditors for exact detailed information of expenditures including vendor, year, and detailed description of each line item expenditure included in the request for reimbursement.
- The Department has acted in good faith to comply with all audit requests. In a few minor cases, the State auditor agreed to accept some samples of invoices instead of full and complete detailed verification.
- The State issued the draft audit in March, 2011. As of today, the State auditor is still determining methods to allocate various costs among what the State determines to be eligible and ineligible costs.

Additional Information Submitted or Eligible:

- The Department is providing additional detailed information to the State auditors as part of its response to the draft audit in the format and level of detail acceptable to the State auditors covering expenditures for medical supplies, cleaning supplies, animal food, staff training, and Prop F costs.
- Information for just the medical supplies, cleaning supplies, and animal food in a linked spreadsheet contains 4.5 million bits of information. These three accounts cover categories of expenditures that are essential for maintenance of animals. Additional information could be provided for other qualifying expenditures in other accounts, such as Account 4460, Private Vet Care, but there are not sufficient time or staff resources to continue to provide

millions of items of information going back 12 years for yet-to-be determined eligibility criteria. Some spay/neuter surgeries for adopted animals are required by the Hayden Bill. Also, details for purchases of eligible cleaning and maintenance supplies from accounts other than Account 6020 have not been calculated due to lack of time and staff resources.

- The Department has requested that the State consider reimbursement for medical supplies. (Account 3190) The State auditors had determined these costs were not eligible, but per our request, agreed to consider them. The State Controller has not yet developed a method to allocate these costs among their determination of what are eligible and ineligible costs. Today the Department is submitting detailed statements of expenditures by year and by line item for medical supplies for the audit period. Stray animals taken to the shelter have unknown medical conditions until they are given a check up and examined by a veterinarian. Animals are given two vaccinations, and medication for de-worming and flea control. This treatment is standard. If the animal is ill, additional treatment or medications could include IV fluid, splints, X-rays, or other treatment. The State auditors have yet to develop a formula for allocation of these costs.
- The State auditor has agreed that cleaning and other supplies (Account 6020) would be considered if expenses are determined to be eligible and if the Department is able to provide detailed records of expenditure by vendor and by invoice line item for all years audited. The Department was able to verify the largest vendors. These records are being submitted to the State Controller today.
- The State auditor has agreed that animal food (Account 4580) would be considered if the Department is able to provide detailed records of expenditure by vendor and by invoice line item for all years audited. These records are being submitted today.
- The State auditors rejected Department costs incurred in 2000 to provide initial training of staff for use of a new central database system called Chameleon purchased by the Department to comply with the requirements of the Hayden Bill. The Department was required by the State auditors to provide a list of all employees in the Department in the year 2000 who received the training in order to be reimbursed for it – a 10 years after the training was provided. No prior request to maintain these employee records was provided to the City. The Department was able to retrieve the records but only after considerable expense and time.

Response to Audit Process and Draft Audit:

- Claims in the early years of the Hayden mandate (1999-2002) were built on averages and estimates before the publication of the current guidelines. According to the current guidelines as interpreted by the State auditor, the City's claims were uniformly overstated as were claims by virtually all local agencies. The State Controller's Office has indicated that the State audits of local animal care agencies typically reduce the amount reimbursed to about 50% of the amount originally claimed. For example: Contra Costa County billed the State \$11,457,157 for Hayden Bill expenses. The State allowed \$5,521,096 of the amount submitted and did not allow \$5,930,661. Disallowed costs exceeded allowed costs for seven

of the nine local jurisdictions audited by the State Controller's Office where audits are posted on their web site.

- All claims were filed through a third party consultant, Maximus, who provided guidance in the formulas and claim amounts. Maximus gathered information and used templates and formulas set up based on the 2002 guidelines for the periods containing most of the questioned costs.
- A court of appeals decision in May 2010 regarding the definition of "business-day" leaves both Saturday and Sunday as non-business days for purposes of calculating the hold days. The auditors have been advised by state legal counsel to apply this standard back to 1999. This has an unknown effect on the reimbursement. Our number of eligible animals decreases if we euthanized before newly defined four-day period. This is more likely a problem in the earlier years when shelter capacity was small. On the other hand, the average-holding-days calculation increases because typically we would have to hold animals longer if Saturday, Sunday, and Monday do not count as hold days. This issue needs significant further research and discussion for the audit and for the future when Hayden is no longer suspended.
- The State is in arrears to the City for a little more than \$5 million in past claims not yet reimbursed. After further adjustment and submissions expected, the amount the auditors find to be overstated is just about \$5 million.
- Hourly rates throughout the audit period are actually higher than the City's claim. The City used Wages and Counts averages, while auditing actual payrolls gave a slightly increased hourly rate for all classifications.
- All computer hardware, software, and data management staffing claims (related to Chameleon) must be prorated because not all of Chameleon's modules are strictly for mandated activities of animal care (i.e. Chameleon also does licensing, citation, receipts, etc.), even though the equipment purchases were required to comply. The City claimed 100%, the auditors agreed to a 50% pro-ration.
- The City used the annual budget total attributed to animal care to calculate the per animal day cost. The State auditors pro-rated actual salaries of ACT staff only to narrowly define and ascertain care and maintenance eligibility. Department staff has submitted additional records of medical, cleaning, and animal food expenditures from the City's Financial Management Information System (FMIS) central accounting database.
- Annual animal census figures calculated by auditor are significantly different from the estimates used in claims in the first four years of reimbursement claims. The Department was not provided with any guidelines before submission of reimbursement requests and has not had an opportunity to verify that these calculations are supported by data.

- The City claimed reimbursement for dogs and cats in all of 1999 but the Hayden bill stipulated that reimbursement should not begin for dogs and cats until July 1999.
- The entire shelter staff working on Saturdays was claimed for reimbursement for the first four claim years; according to the auditors, only those staff that specifically have to be on duty because of being open to the public can be claimed, as was done in later years.
- According to State auditors, indirect costs were improperly calculated in the first years (understated) but overall were overstated because in several other findings categories the auditors are disallowing many of the overstated hours for care and medical wellness.
- State auditors were provided documentation about the Prop F Bond projects with a request to consider pro-rated reimbursement since one of the reasons for expanding the shelter system was to meet Hayden requirements. Auditors determined that because property taxes were raised to fund the bond, it was not eligible for reimbursement. The preparation of the Master Facilities Study (by a consultant) may be reimbursable.
- According to the State auditor, the City's claims included overstated medical costs. Hayden only reimburses for routine wellness checks for incoming animals, not special care, not rabies vaccination, and not emergency care, because the latter was already required of shelters by state law. The City had claimed nearly all medical supplies and a high level of medical staff. For the audit, we performed a time study to determine the actual average wellness exam time.

Reimbursement and Audit Procedures:

- The Department was not given notice at beginning of audit period and not given notice at beginning of audit periods of requirements for methods to follow or records to maintain.
- Other minor areas in which follow up will result in slight increases in the reimbursement calculations: Start-up training information has been retrieved by the Department's systems staff and verified by the payroll section and was provided to the auditor.
- The City questions the Controller's retroactive application of the Purifoy decision that Saturday is not a business day, and of the description of the scope of work reasonably required to be performed in accordance with the mandate on a Saturday. The City believes retroactive application of the Purifoy case is improper. The Commission on State Mandates was silent as to the definition of business day. The court held that although the Hayden Bill requires animal shelters to hold animals longer or be open for business on a weekday evening or Saturday, Saturday is not a business day for the purposes of calculating how long to hold an animal before it can be released for adoption or disposal. The decision, published on March 26, 2010, is clearly applicable to all future claims. Applying the rule retroactively, as the State has done, is unfair and tends to inhibit or defeat the purpose of the Hayden Bill of extending the holding period so that animals are treated humanely (redeemed or adopted).

- The City followed all guidelines provided by the State and available at the time each request for reimbursement was filed.
- The State waited for as long as 12 years after the close of an audit period to conduct an audit of the claimed expenses incurred during that audit period, then requested a level of detailed proof (original document as proof of each line item expenditure, including name of vendor, quantity, and description of each item purchased) not previously requested or required. Many vendors have destroyed the detailed information (invoices) as the time exceeds any Statute of Limitations. The City General Services Department destroyed copies of invoices because these times exceeded the required records retention period. Requiring the City to guess in what future distant period the State may decide to audit records in any given year and be forced to retain all detailed expenditure records is a burden that is inefficient and unnecessary.
- Initially, the State accepted budgeted expenditures as sufficient proof of expenditure. However, in this audit, the State accepted only detailed proof of actual expenditures and rejected budgeted amounts. This surprise change in documentation requirements is burdensome.
- The State reimbursement process is inefficient. For example, due to the lack of prior notice as to the specific levels and form of proof required, lack of adequate prior guidelines, and delay in audit, the Department was required to allocate well over 450 hours of staff time to respond to this audit - at a time when both the State and City are undergoing significant staffing reductions and furloughs. Administration of animal care and control services depends on efficiency. Inefficiency of any type leads to fewer adoptions, less revenue, less policing, and more euthanasia. This is contrary to the intent of the Hayden Bill.
- The State process of sending the notices of the entrance conferences and exit conferences to the City of Los Angeles Department of Animal Services only, and the draft final audit to the City Controller only, and copying the Department is confusing.

Draft Audit of Hayden Bill Mandated Reimbursement Requests
1998-99 through 2007-08**

Summary of Department's Response to Finding 8 - Prop F Costs

Controller Finding:

The City did not incur any increased costs to construct or remodel its animal shelters under Government Code section 17514. Government Code section 17514 states:

"Costs mandated by the state" means any increased costs which a local agency or school district is required to incur after July 1, 1980, as a result of any statute enacted on or after January 1, 1975, or any executive order implementing any statute enacted on or after January 1, 1975, which mandate a new program or higher level of service of an existing program within the meaning of Section 6 of Article XIII B of the California Constitution.

The Controller argued that Proposition F of 1990 required city's taxpayers to fund construction projects through additional levies made to their property taxes. As a result, the taxpayers and not the City incurred the cost. The Controller determined that the non-discretionary revenue source was used to build the City's animal shelters and none of the city's discretion general fund was involved.

City Response:

First, there should not seem to be any dispute whether there was a cost mandated by the State. The costs are clearly identified as reimbursable costs in the Controller's claiming instructions for the Hayden Bill which meets all the requirements of Section 17514 above.

The Controller's issue seems to be, are these local revenues or "proceeds of taxes." The state has the right to preclude the City from being reimbursed for state, federal or grant funds, but not for local revenues which are proceeds of taxes.

On January 31, 2001, the Los Angeles City Council adopted a resolution providing for the issuance and sale of the City of Los Angeles General Obligation Bonds authorized by the voters by Proposition F, in an aggregate principal amount not to exceed \$201.3 million for a variety of local projects and services. The Council identified up to \$36.5 million for animal shelter facilities. These are clearly local revenues and to the extent the funds are used to pay for state mandate programs, there should be reimbursed by the state.

A similar issue was contested in *Redevelopment Agency v. Commission on State Mandates* (1997) 55 Cal.App.4th 976. The court set forth the following analysis:

The California Supreme Court's summary of the history and substance of the law applicable to state mandates, commented: "Through adoption of Proposition 13 in 1978, the voters added article XIII A to the California Constitution, which 'imposes a limit on the power of state and local governments to adopt and levy taxes. [Citation.]' [Citation.] The next year, the voters added article XIII B to the Constitution, which 'impose[s] a complementary limit on the rate of growth in governmental spending.' [Citation.] These two constitutional articles 'work in tandem, together restricting California governments' power both to levy and to spend for public purposes.' [Citation.] Their goals are 'to protect residents from excessive taxation and government spending. [Citation.]' [Citation.]" (County of San Diego v. State of California, *supra*, 15 Cal.4th at pp. 80-81.)

* * *

In County of San Diego v. State of California, *supra*, 15 Cal.4th at page 81, the Supreme Court explained that section 6 represents recognition that together articles XIII A and XIII B severely restrict the taxing and spending powers of local agencies. The purpose of the section is to preclude the state from shifting financial responsibility for governmental functions to local agencies, which are ill equipped to undertake increased financial responsibilities because they are subject to taxing and spending limitations under articles XIII A and XIII B. (County of San Diego v. State of California, *supra*, at p. 81.)

* * *

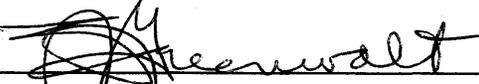

In County of Placer v. Corin (1980) 113 Cal.App.3d 443, 451 [170 Cal.Rptr. 232], the court defined "proceeds of taxes" in this way: "Under article XIII B, with the exception of state subventions, the items that make up the scope of 'proceeds of taxes' concern charges levied to raise general revenues for the local entity." "Proceeds of taxes," in addition to 'all tax revenues' includes 'proceeds ... from ... regulatory licenses, user charges, and user fees [only] to the extent that such proceeds exceed the costs reasonably borne by such entity in providing the regulation, product or service....' (§ 8, subd. (c).) (Italics added.) Such 'excess' regulatory or user fees are but taxes for the raising of general revenue for the entity. [Citations.] Moreover, to the extent that an assessment results in revenue above the cost of the improvement or is of general public benefit, it is no longer a special assessment but a tax. [Citation.] We conclude 'proceeds of taxes' generally contemplates only those impositions which raise general tax revenues for the entity." (Italics added.) (Id. at 980- 984.)

In summary, the courts have held, and the Commission will follow suit in holding, that Proposition F funds are clearly proceeds of taxes and local revenue and to the extent they

were used to pay for state mandated costs associated with the increased cost of building animal shelters due to the Hayden bill, should be reimbursed by the State.

JERRY GREENWALT
GENERAL MANAGER

August 29, 2002

Laura N. Chick
City Controller, City of Los Angeles
City Hall, Room 1220
Los Angeles, California 90012

Subject: **POLICIES AND PROCEDURES CHANGES IN SUPPORT OF SB 1785**

In 1998, the State of California passed the Hayden Bill, Senate Bill (SB) 1785 directing animal care and control agencies to hold stray animals longer to increase animal adoption and decrease animal euthanasia. As a result of SB 1785, the General Manager of the Department of Animal Services (Department) directed Department staff to review existing policies and procedures for compliance to the bill and to procure necessary supplies and equipment to house animals for the additional holding period. Changes in policies and procedures included, but were not limited to, revising shelter operations procedures and training staff on the new procedures; expenditures for the creation and implementation of a Department Wide Area Network to enable installation and operation of the Chameleon Animal Shelter Management Software operating system; and implementation of a Departmental Website to make pictures of lost animals available Citywide.

If you have any questions, feel free to call Margaret Sullivan, Chief Management Analyst, at 473-7507.

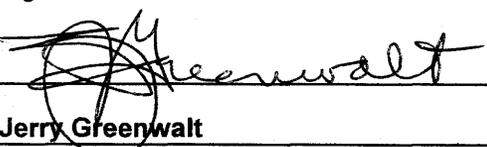

Sincerely,

JERRY GREENWALT
General Manager

COST ALLOCATION PLAN 21 (CAP 21) - INDIRECT COST RATES WITH CARRY FORWARD

The rates below are to be used to prepare grant applications, contracts and billings for grant activities, and to compute Fees for Special Services, during 1998-99. They are to be applied only to straight time, gross salaries (with CTO). When only net salaries (without CTO) are available, convert net salaries to gross salaries using the CTO rate. **Please be sure to adjust rates to deduct directly billed costs.** See list, Attachment C and Instructions, Attachment B.

JERRY GREENWALT
GENERAL MANAGER

August 29, 2002

Laura N. Chick
City Controller, City of Los Angeles
City Hall, Room 1220
Los Angeles, California 90012

Subject: **POLICIES AND PROCEDURES CHANGES IN SUPPORT OF SB 1785**

In 1998, the State of California passed the Hayden Bill, Senate Bill (SB) 1785 directing animal care and control agencies to hold stray animals longer to increase animal adoption and decrease animal euthanasia. As a result of SB 1785, the General Manager of the Department of Animal Services (Department) directed Department staff to review existing policies and procedures for compliance to the bill and to procure necessary supplies and equipment to house animals for the additional holding period. Changes in policies and procedures included, but were not limited to, revising shelter operations procedures and training staff on the new procedures; expenditures for the creation and implementation of a Department Wide Area Network to enable installation and operation of the Chameleon Animal Shelter Management Software operating system; and implementation of a Departmental Website to make pictures of lost animals available Citywide.

If you have any questions, feel free to call Margaret Sullivan, Chief Management Analyst, at 473-7507.

Sincerely,

JERRY GREENWALT
General Manager

COST ALLOCATION PLAN 21 (CAP 21) - INDIRECT COST RATES WITH CARRY FORWARD

The rates below are to be used to prepare grant applications, contracts and billings for grant activities, and to compute Fees for Special Services, during 1998-99. They are to be applied only to straight time, gross salaries (with CTO). When only net salaries (without CTO) are available, convert net salaries to gross salaries using the CTO rate. **Please be sure to adjust rates to deduct directly billed costs.** See list, Attachment C and Instructions, Attachment B.

(37) CERTIFICATION OF CLAIM

In accordance with the provisions of Government Code 17561, I certify that I am the officer authorized by the local agency to file claims with the State of California for costs mandated by Chapter 752, Statutes of 1998, and certify under penalty of perjury that I have not violated any of the provisions of Government Code Sections 1090 to 1096, inclusive.

I further certify that there was no application other than from the claimant, nor any grant or payment received, for reimbursement of costs claimed herein; and such costs are for a new program or increased level of services of an existing program mandated by Chapter 752, Statutes of 1998.

The amounts for Estimated Claim and/or Reimbursement Claim are hereby claimed from the State for payment of estimated and/or actual costs for the mandated program of Chapter 752, Statutes of 1998 set forth on the attached statements.

JERRY GREENWALT
GENERAL MANAGER

August 29, 2002

Laura N. Chick
City Controller, City of Los Angeles
City Hall, Room 1220
Los Angeles, California 90012

Subject: **POLICIES AND PROCEDURES CHANGES IN SUPPORT OF SB 1785**

In 1998, the State of California passed the Hayden Bill, Senate Bill (SB) 1785 directing animal care and control agencies to hold stray animals longer to increase animal adoption and decrease animal euthanasia. As a result of SB 1785, the General Manager of the Department of Animal Services (Department) directed Department staff to review existing policies and procedures for compliance to the bill and to procure necessary supplies and equipment to house animals for the additional holding period. Changes in policies and procedures included, but were not limited to, revising shelter operations procedures and training staff on the new procedures; expenditures for the creation and implementation of a Department Wide Area Network to enable installation and operation of the Chameleon Animal Shelter Management Software operating system; and implementation of a Departmental Website to make pictures of lost animals available Citywide.

If you have any questions, feel free to call Margaret Sullivan, Chief Management Analyst, at 473-7507.

Sincerely,

JERRY GREENWALT
General Manager

COST ALLOCATION PLAN 22 (CAP 22) - INDIRECT COST RATES WITH CARRY FORWARD

The rates below are to be used to compare grant applications, contracts and bids for grant activities, and to compute Fees for Special Services, during 1999-2000. They are to be applied only to straight time, gross salaries (with CTO). When only net salaries (without CTO) are available, convert net salaries to gross salaries using the CTO rate. For rates applicable to overtime salaries, please contact CAP staff. **Please note: You MUST adjust rates to deduct directly billed costs.** See list, Attachment C and Instructions, Attachment B.

 State Mandates

(37) CERTIFICATION OF CLAIM

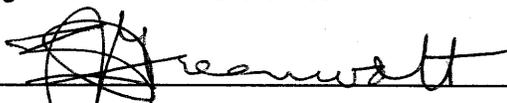

In accordance with the provisions of Government Code 17561, I certify that I am the officer authorized by the local agency to file claims with the State of California for costs mandated by Chapter 752, Statutes of 1998, and certify under penalty of perjury that I have not violated any of the provisions of Government Code Sections 1090 to 1096, inclusive.

I further certify that there was no application other than from the claimant, nor any grant or payment received, for reimbursement of costs claimed herein; and such costs are for a new program or increased level of services of an existing program mandated by Chapter 752, Statutes of 1998.

The amounts for Estimated Claim and/or Reimbursement Claim are hereby claimed from the State for payment of estimated and/or actual costs for the mandated program of Chapter 752, Statutes of 1998 set forth on the attached statements.

GENERAL MANAGER

August 29, 2002

Laura N. Chick
City Controller, City of Los Angeles
City Hall, Room 1220
Los Angeles, California 90012

Subject: **POLICIES AND PROCEDURES CHANGES IN SUPPORT OF SB 1785**

In 1998, the State of California passed the Hayden Bill, Senate Bill (SB) 1785 directing animal care and control agencies to hold stray animals longer to increase animal adoption and decrease animal euthanasia. As a result of SB 1785, the General Manager of the Department of Animal Services (Department) directed Department staff to review existing policies and procedures for compliance to the bill and to procure necessary supplies and equipment to house animals for the additional holding period. Changes in policies and procedures included, but were not limited to, revising shelter operations procedures and training staff on the new procedures; expenditures for the creation and implementation of a Department Wide Area Network to enable installation and operation of the Chameleon Animal Shelter Management Software operating system; and implementation of a Departmental Website to make pictures of lost animals available Citywide.

If you have any questions, feel free to call Margaret Sullivan, Chief Management Analyst, at 473-7507.

Sincerely,

A handwritten signature in black ink that reads "Greenwalt".

JERRY GREENWALT
General Manager

COST ALLOCATION PLAN (CAP 23) - INDIRECT COST RATE WITH CARRY FORWARD

The rates below are to be used to prepare grant applications, contracts and billings for grant activities, and to compute Fees for Special Services, during 2000-01. They are to be applied only to straight time, gross salaries (with CTO). When only net salaries (without CTO) are available, convert net salaries to gross salaries using the CTO rate. For rates applicable to overtime salaries, please contact CAP staff. **Please note: You MUST adjust rates to deduct directly billed costs.** See list, Attachment C and Instructions, Attachment B.

(37) CERTIFICATION OF CLAIM

In accordance with the provisions of Government Code 17561, I certify that I am the officer authorized by the local agency to file claims with the State of California for costs mandated by Chapter 752, Statutes of 1998, and certify under penalty of perjury that I have not violated any of the provisions of Government Code Sections 1090 to 1096, inclusive.

I further certify that there was no application other than from the claimant, nor any grant or payment received, for reimbursement of costs claimed herein; and such costs are for a new program or increased level of services of an existing program mandated by Chapter 752, Statutes of 1998.

The amounts for Estimated Claim and/or Reimbursement Claim are hereby claimed from the State for payment of estimated and/or actual costs for the mandated program of Chapter 752, Statutes of 1998 set forth on the attached statements.

**MAINTAINING NON MEDICAL RECORDS
FY 2001-02 (AMMENDED)**

MAINTAINING NON MEDICAL RECORDS

DESCRIPTION:

Maintaining non-medical records on animals that are taken up, euthanized after the holding period or impounded.

FORMULA:

Time required to input non-medical records: five (5) minutes per record

Number of animals: 13,747

COMPUTATION:

Time required to input individual record x number of records / 60 minutes = 1,145.58
total hours required to input non-medical records.

Hours to input non-medical records x hourly rate for Animal Care Technician = Total
cost.

Average salary for an Animal Care Technician is \$33,766.65 / 1,800 annual hours =
Hourly rate.

OR

5 minutes x 13,747 / 60 minutes = 1,145.58 hours

\$33,766.65 / 1,800 work hours = \$18.76

\$18.76 x 1,145.58 hours = \$21,491

EXPENSE TOTAL:

\$21,491

VETERINARY CARE
(Amended for FY 2001-02)

DESCRIPTION:

Providing necessary and prompt veterinary care for stray and abandoned animals that died during the increased holding period or were ultimately euthanized.

FORMULA:

Veterinarian annual and hourly rate: $\$65,506.09 / 1,800 = \36.39
 Veterinary Technician annual and hourly rate: $\$40,967.26 / 1,800 = \22.76

Average time to provide emergency medical treatment: 12 minutes

Cost of providing Veterinarian emergency medical treatment per animal: $\$36.39 / 60$
 minutes x 12 minutes = \$7.28

Cost of a Veterinary Technician assisting a Veterinarian in an emergency medical
 treatment per animal: $\$22.76 / 60$ minutes x 12 minutes = \$4.55

Number of animals requiring prompt medical care: 12,223

COMPUTATION:

Cost of providing emergency medical treatment x number of animals requiring prompt
 medical care = Total Expense

Medical supply use was based on a comparison between FY 1997-98, the last full fiscal
 year before SB 1785 and FY 2001-02 a post SB 1785 year.

In FY 2001-02 there were 6 Veterinarians and 24 Veterinarian Assistants. Expenses for
 Account 3190 – Animal Medical Supplies was \$196,992.

In FY 1997-98 there were 2 Veterinarians and 12 Veterinarian Assistants. Expenses for
 Account 3190 – Animal Medical Supplies was \$131,878.

Therefore $\$196,992 - \$131,878 = \$65,114$ in expenditure of Animal Medical Supplies to
 support additional Veterinary Care under SB 1785.

OR

Veterinarian:	$\$7.28 \times 12,223 = \$88,983.44$
Veterinary Technician:	$\$4.55 \times 12,223 = \$55,614.65$
<u>Animal Medical Supplies:</u>	<u>$= \\$65,114.00$</u>
Total	$\$209,712.09$

EXPENSE TOTAL:

\$209,712

JERRY GREENWALT
GENERAL MANAGER

August 29, 2002

Laura N. Chick
City Controller, City of Los Angeles
City Hall, Room 1220
Los Angeles, California 90012

Subject: POLICIES AND PROCEDURES CHANGES IN SUPPORT OF SB 1785

In 1998, the State of California passed the Hayden Bill, Senate Bill (SB) 1785 directing animal care and control agencies to hold stray animals longer to increase animal adoption and decrease animal euthanasia. As a result of SB 1785, the General Manager of the Department of Animal Services (Department) directed Department staff to review existing policies and procedures for compliance to the bill and to procure necessary supplies and equipment to house animals for the additional holding period. Changes in policies and procedures included, but were not limited to, revising shelter operations procedures and training staff on the new procedures; expenditures for the creation and implementation of a Department Wide Area Network to enable installation and operation of the Chameleon Animal Shelter Management Software operating system; and implementation of a Departmental Website to make pictures of lost animals available Citywide.

If you have any questions, feel free to call Margaret Sullivan, Chief Management Analyst, at 473-7507.

Sincerely,

JERRY GREENWALT
General Manager

The rates below are to be used to prepare grant applications, contracts and billings for grant activities, and to compute Fees for Special Services, during 2001-02. They are to be applied only to straight time, gross salaries (with CTO). When only net salaries (without CTO) are available, convert net salaries to gross salaries using the CTO rate. For rates applicable to **part time** or **overtime** salaries, please contact CAP staff. **Note: You MUST adjust rates to deduct directly billed costs.** See list-Attachment C and Instructions-Attachment B.

Notes:

* Division Overhead includes costs of division heads, section supervisors, clerical and other support staff within divisions or sections. These costs are not part of the Department Administration rate, but are legitimate costs which should be recovered if allowed by your grantor. If these costs are not charged directly to a grant, a Division Overhead indirect cost rate should be calculated. To maintain consistency and insure that Division Overhead costs do not overlap with Department Administration costs, please contact CAP staff for assistance in calculating these rates. Public Works Division Overhead rates are computed by Public Works staff and published herein as a courtesy.

(37) CERTIFICATION OF CLAIM

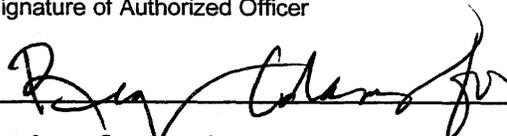

In accordance with the provisions of Government Code 17561, I certify that I am the officer authorized by the local agency to file mandated cost claims with the State of California for this program, and certify under penalty of perjury that I have not violated any of the provisions of Government Code Sections 1090 to 1098, inclusive.

I further certify that there was no application other than from the claimant, nor any grant or payment received, for reimbursement of costs claimed herein, and such costs are for a new program or increased level of services of an existing program. All offsetting savings and reimbursements set forth in the Parameters and Guidelines are identified, and all costs claimed are supported by source documentation currently maintained by the claimant.

The amounts for this Estimated Claim and/or Reimbursement Claim are hereby claimed from the State for payment of estimated and/or actual costs set forth on the attached statements. I certify under penalty of perjury under the laws of the State of California that the foregoing is true and correct.

CARE OF OTHER ANIMALS

DESCRIPTION:

Provide care and maintenance for other animals, including but not limited to rabbits, guinea pigs, hamsters, pot-bellied pigs, birds, lizards, snakes, turtles and/or tortoises, that were ultimately euthanized during the increased holding period.

FORMULA:

Total Shelter cost for all animals: \$6,257,289

Yearly census: 449,730

Number euthanized during increased holding period: 216

Number of reimbursable days: 4

COMPUTATION:

Annual shelter cost / yearly census = Daily cost per animal

Daily cost per animal x number of other animals that are euthanized x number of reimbursable days = reimbursable expense

OR

$\$6,257,289 / 449,730 = \13.91

$\$13.91 \times 216 \times 4 = \$12,018$

EXPENSE TOTAL:

\$12,018

TRAINING EXPENSES

DESCRIPTION:

Training employees (new hires) on the mandated activities

EXPENSE:

Animal Control Officers 2 hours per employee: Annual salary / 1,800 x number of employees x number of hours.

Senior Clerk Typist 3 hours per employee: Annual salary / 1,800 x number of employees x number of hours.

Clerk Typist 3 hours per employee: Annual salary / 1,800 x number of employees x number of hours.

CALCULATION:

Animal Control Officers: $\$39,318 / 1,800 = \21.84×5 New ACO Employees x 2 hours each = \$393.

Senior Clerk Typist: $\$44,744 / 1,800 = \24.86×1 New Senior Clerk Typist Employee x 3 hours each = \$74.

Clerk Typist: $\$34,190 / 1,800 = 18.99 \times 11$ New Clerk Typist Employees x 3 hours each = \$626.

OR

Animal Control Officers:	\$393
Senior Clerk Typist	\$ 74
Clerk Typists	<u>\$626</u>

EXPENSE TOTAL: **\$886**

SYSTEMS EXPENSES**DESCRIPTION:**

Develop or purchase computer software to maintain non-medical animal records as mandated.

EXPENSE:

Chameleon Licensing Expense: \$ 24,000

Prepare and monitor purchase requisitions, Purchase Orders, etc.:
10% of Sr. Systems Analyst II time. Annual salary is \$93,880 \$ 9,388

Maintenance of animal information on Website:
25% of Sr. Systems Analyst I time. Annual salary is \$75,805 \$ 18,951

Annual adoption reimbursement claim for hardware and software
Expenditures \$78,179

EXPENSE TOTAL: \$130,518

								\$ 487,484.00

Total Shelter Operating Expense

\$ 6,257,289.00

* Total Allowable Expense computed by dividing the Annual Salary Expense by the number of Authorized Positions of 308.5 and multiplying the number of eligible employees who worked on SB 1785.

** The Transportation Expense was computed using the mileage paid to the Management Analyst I who acts as the Departments Adoption Coordinator.

*** The Uniform Expense was computed by dividing the Annual Uniform Expense by the number of Employees authorized a Uniform Allowance times the number of employees receiving Uninform Allowances who worked on SB 1785.

**** More Operating Supplies are used by Shelter and Field Operations. Therefore 83% of the Operating Expense was assigned to Shelter and Field Operations. The Formula is now \$133,541 x 83% = \$110,839. \$110,839 / 257 Field and Shelter Operating Employees x 146 SB 1785 Employees = \$62,967.

LOST AND FOUND LIST

DESCRIPTION:

Provide lost and found lists for owners and rescuers of lost animals. The list includes type of animal, referrals, shelter contact information, advice on how to publish and disseminate lost animal information.

FORMULA:

Six Shelters

- North Central Shelter
- South Central Shelter
- East Valley Shelter
- West Valley Shelter
- West Los Angeles Shelter
- Harbor Shelter

Personnel:

Six Clerk Typist

Time Spent to Prepare List:

Eleven minutes per day to prepare Stray Summary Sheet for each Shelter for 365 days per year

Salary:

Clerk Typist Average Salary for FY 2002-03 = \$34,190. Work Hours = 1,800
Clerk Typist Average Hourly Salary ($\$34,190 / 1,800$) = \$18.99

COMPUTATION:

Number of Shelters x clerk x number of days x preparation time / 1 hour (60 minutes) x hourly salary = Expense

OR

6 Shelters (x) 1 Clerk Typist Each (x) 365 days x 11 minutes = 24,090 minutes per year to prepare list / 60 minutes = 67 hours per year x \$18.99 average hourly salary = \$7,624 per year to prepare lost and found list.

EXPENSE TOTAL:

\$7,624

MAINTAINING NON MEDICAL RECORDS

DESCRIPTION:

Maintaining non-medical records on animals that are taken up, euthanized after the holding period or impounded.

FORMULA:

Time required to input non-medical records: five (5) minutes per record

Number of animals: 11,960

COMPUTATION:

Time required to input individual record x number of records / 60 minutes = 997 total hours required to input non-medical records.

Hours to input non-medical records x hourly rate for Animal Care Technician = Total cost.

Average salary for an Animal Care Technician is \$35,155 / 1,800 annual hours = Hourly rate.

OR

$5 \text{ minutes} \times 11,960 / 60 \text{ minutes} = 997 \text{ hours}$

$\$35,155 / 1,800 \text{ work hours} = \19.53

$\$19.53 \times 997 \text{ hours} = \$19,471$

EXPENSE TOTAL:

\$19,471

Summary Animal Counts for Non-Medical Records for July 1, 2002 to June 30, 2003

Adopted Animals

Cats/Dogs	10,757
Others	<u>311</u>
	11,068

Non-Adopted Animals

Cats/Dogs	10,673
Others	<u>1,287</u>
	11,960

Total Animals: 23,028

VETERINARY CARE**DESCRIPTION:**

Providing necessary and prompt veterinary care for stray and abandoned animals that died during the increased holding period or were ultimately euthanized.

FORMULA:

Veterinarian annual and hourly rate: $\$70,335 / 1,800 = \39.08
 Veterinary Technician annual and hourly rate: $\$44,017 / 1,800 = \24.45

Average time to provide emergency medical treatment: 12 minutes

Cost of providing Veterinarian emergency medical treatment per animal: $\$39.08 / 60$ minutes x 12 minutes = $\$7.82$

Cost of a Veterinary Technician assisting a Veterinarian in an emergency medical treatment per animal: $\$24.45 / 60$ minutes x 12 minutes = $\$4.89$

Number of animals requiring prompt medical care: 9,183

COMPUTATION:

Cost of providing emergency medical treatment x number of animals requiring prompt medical care = Total Expense

Medical supply use was based on a comparison between FY 1997-98, the last full fiscal year before SB 1785 and FY 2002-03 a post SB 1785 year.

In FY 2002-03 there were 6 Veterinarians and 24 Veterinarian Assistants. Expenses for Account 3190 – Animal Medical Supplies was \$214,880.

In FY 1997-98 there were 2 Veterinarians and 12 Veterinarian Assistants. Expenses for Account 3190 – Animal Medical Supplies was \$131,878.

Therefore $\$214,880 - \$131,878 = \$83,002$ in expenditure of Animal Medical Supplies to support additional Veterinary Care under SB 1785.

OR

Veterinarian:	$\$7.82 \times 9,183 = \$ 71,811$
Veterinary Technician:	$\$4.89 \times 9,183 = \$ 44,904$
Animal Medical Supplies:	$= \$ 83,002$
Total	$\$199,717$

EXPENSE TOTAL:

852

\$199,717

COST ALLOCATION PLAN (CAP 25) - INDIRECT COST RATES WITH CARRY FORWARD

The rates below are to be used to prepare grant applications, contracts and billings for grant activities, and to compute Fees for Special Services, during 2002-03. They are to be applied only to straight time, gross salaries (with CTO). When only net salaries (without CTO) are available, convert net salaries to gross salaries using the CTO rate. For rates applicable to **part time** or **overtime** salaries, please contact CAP staff. **Note: You MUST adjust rates to deduct directly billed costs.** See list-Attachment C and Instructions-Attachment B.

				These seven Division Overhead rates, calculated by St. Services, assume that Equipment is billed as a direct cost and that rental costs are billed indirectly.	
RECREATION & PARKS	26.80%	25.07%	10.30%	*	24.58%
TRANSPORTATION	20.94%	30.35%	15.40%	*	21.68%
Zoo Department	21.48%	16.88%	22.06%	*	23.87%

Notes:

* Division Overhead includes costs of division heads, section supervisors, clerical and other support staff within divisions or sections. These costs are not part of the Department Administration rate, but are legitimate costs which should be recovered if allowed by your grantor. If these costs are not charged directly to a grant, a Division Overhead indirect cost rate should be calculated. To maintain consistency and insure that Division Overhead costs do not overlap with Department Administration costs, please contact CAP staff for assistance in calculating these rates. Public Works Division Overhead rates are computed by Public Works staff and published herein as a courtesy.

Instructions for Using Indirect Cost Rates

Modifying the rates. Usually departments use the CAP rates as published; however, situations may arise necessitating revision of the rates. **Your Department's CAP rate should be modified if your Department directly charges to a grant or fee payer any of the indirect costs, or if the grantor or fee payer directly provides any of the services listed on Attachment C.** This list includes charge back items. For example, if you include postage (a charge back item) as a direct cost; or if you purchase a computer and the total cost is paid directly by a fee payer or grantor, your CAP rate must be reduced to avoid double billing for the directly charged item(s). This means: if the entity you are billing provides office space, telephone service, computers, vehicles, or any other item listed on Attachment C, your rates must be adjusted to exclude those items.

An example of the necessity for rate modification is the Police Department's bill to the Airports Department. Airports provides space, utilities, telephones and equipment for Police Department staff at the Airport substation. To properly bill the Airports Department for law enforcement services at this site, the Police Department indirect cost rates are revised to exclude the building use, building lease, equipment use, and telephone line items.

Also, please see Attachment D for further explanation of using CAP rates in conjunction with charge back costs. Contact the CAP Office for adjusted rates if any cost listed in Attachment C is directly billed to grants or fees, or if any of the listed services are provided by your client.

Using the rates as published. The CAP indirect cost rates are computed based on "gross annual salaries" **excluding** overtime. (For rates applicable to overtime salaries, please contact the CAP office.) Compensated time off (CTO) is included in this gross salaries base. (See Attachment C paragraph 5 for a definition of CTO.) The CAP Fringe Benefits, Central Services, and Department Administration indirect cost rates, therefore, must be applied to salaries which include CTO and exclude overtime. Please refer to the example below, where:

Fringe Benefits Rate	=	28.10%	of Gross Salaries
Central Services Rate	=	39.77%	of Gross Salaries
Department Administration & Support Rate	=	18.87%	of Gross Salaries
Compensated Time Off Rate	=	16.26%	of Net Salaries

1. Assume Gross Salaries = \$ 1,000.00 *(Gross Salaries are salaries for straight time worked plus Compensated Time Off.)*

Given the above-listed indirect cost rates, and assuming your CTO costs are included in your salaries as billed, total indirect costs are calculated below:

a.	\$	1,000	x	28.10%	=	\$	281.00	Fringe Benefit Cost		
b.	\$	1,000	x	39.77%	=	\$	397.70	Central Service Cost		
c.	\$	1,000	x	18.87%	=	\$	188.70	Department Administration & Support Cost		
							Sum of (a + b + c)	=	\$	867.40

2. Assume Net Salaries = \$ 860.14 *(Net Salaries are salaries for straight time worked, not including Compensated Time Off. Such net salaries would typically be accumulated through direct charges in a cost accounting system.)*

Convert net salaries to gross salaries by adding CTO % of Net:

a.	Net Salary times CTO %:	\$	860.14	x	16.26%	=	\$	139.86	= CTO Amount	
b.	Net Salary plus CTO amt:	\$	860.14	+	\$	139.86	=	\$	1,000.00	= Gross Salaries

The rest of the calculation proceeds as in 1, above, using the calculated Gross Salaries figure and applying the indirect cost rates. In order to recover the CTO cost, you must either report the gross salaries that result from the computation in #2 above, or you must separately bill your CTO costs.

REMINDER: CTO rates are to be used only when paid time off such as sick and vacation time are not directly charged to a specific service or grant project. Please see Attachment C, paragraph 5 for further information.

COST ALLOCATION PLAN 25 INDIRECT COSTS INCLUDED IN RATE CALCULATIONS

1. Fringe Benefits Rate includes the department's share of the Citywide costs of:

Retirement (Civilians)	Employee Assistance	Union Sponsored Benefits
Pensions (Fire/Police Sworn)	Ordinance Life Insurance	Unused Sick/Vacation Payout
FLEX Benefit Program	Medicare	Unemployment Insurance
- Health Insurance	Social Security	Workers' Compensation
- Dental Insurance	Part Time/Seasonal/Temporary	Hiring Hall Fringe
- Basic Life Insurance	(PST) 457 Retirement Plan	

2. Central Services Rate includes the department's share of the Citywide costs of:

Building Leases [GSD & Spec. Funds]	Equipment Use Allowance (items costing \$5,000 & above)	
Building Use Allowance	Equipment Exp. Under \$5,000 (computers & equ. Costing under \$5,000)	
Computer Assets Depreciation (items costing \$5,000 & above)	Gas (Natural Gas Utility) [GSD]	Liability Claims
Communications Lease (Telephone bill)	Insurance on bond-financed assets	Petroleum Products [GSD]
	General City Purposes [League Dues and audits]	Vehicle Depreciation
		Water & Electricity

EMERGENCY OPERATIONS
ORGANIZATION

INDIRECT COSTS INCLUDED IN CAP 25 RATE CALCULATIONS (continued)**3. Department Administration and Support Rate includes costs of support functions within a department:**

The rate includes expenditures which: -- benefit the department as a whole
 -- are NOT directly charged to a grant or fee program
 -- are NOT line operations.

Expenditures include those of:

Accounting staff	Department Management (Gen. Mgr. & Asst. Gen. Mgrs)
Budget staff	Clerical Staff/word processing staff serving the entire department.
Payroll staff	Systems Staff (if serving the whole department, not a special project)
Personnel & training staff	Warehouse/inventory/stores staff
Inventory staff	Vehicle maintenance staff (Police & Fire only)

NOTE: The support costs discussed here must conform to Federal definitions of allowable overhead costs and are not necessarily the same as the City's General Administration and Support Program (GASP) in a departmental budget.

4. Division Overhead Rates include the costs of support functions within divisions:

The rate includes the salary and expenses of division heads, section supervisors, and other support within divisions which are not included in the Department Administration costs discussed above. For example, within the Bureau of Engineering, the City Engineer, Deputies, their secretaries and the Administration Division are included in the Department Administration indirect cost rate. Within operating divisions, division heads, assistant division heads, and their secretaries and division support staff are NOT included in the Department Administration rate.

To recover the overhead costs within a division, a department or bureau should directly charge the time of the division head, secretary, assistant division head, and other division support services to a project, or calculate an indirect cost rate to recover their costs. Please work with the CAP office when calculating such rates, to insure that Division Overhead costs do not overlap Department Administration costs.

5. Compensated Time Off Rate includes the salary paid to employees who are on paid leave such as:

Sick Leave	Jury Duty	Floating Holiday
Vacation	Bereavement leave	Injury on Duty
Holiday	Preventive Medicine	
Military Leave	Workers' Compensation (salary continuance	
Family Illness	paid by the employing department.)	

Special Note regarding CTO:

CTO rates are to be used only when sick, vacation, and other CTO hours are not directly charged to a fee or grant project. For employees who charge only part of their hours worked to a grant, their time off is usually not being charged to the project, so the cost of that time off must be recovered using the CTO Rate. For employees whose entire annual salary is charged to a fee or grant, CTO is recovered as they take their time off, and the CTO Rate is not to be used. When applicable, CTO costs should be billed to granting agencies or recipients of special services, either as a separate line item, or as an adjustment to salaries, increasing net salaries to gross salaries. When the CTO Rate is applied to net salaries, the amount derived is added to net salaries to create gross salaries. The derived gross salaries becomes the base against which the fringe benefit rate and other indirect cost rates described above are applied.

6. OTHER DEFINITIONS

- Gross Salaries - Total annual salaries, which include pay for time worked AND compensated time off.
- Net Salaries - Pay for time worked only, not including compensated time off.

USING INDIRECT COST RATES IN CONJUNCTION WITH CHARGE BACK

Charge back items are included in the CAP Central Services Indirect cost rates. Once a charge back cost is paid directly by a department, theoretically it would no longer need to be included with Central Services indirect cost rates. However, since most departments do not directly bill charge back costs to grants or fee payers, the charge back costs must be included in indirect cost rates.

Some departments or bureaus may need to pay some of their charge back items directly out of special funds such as the Community Development Block Grant, the Street Lighting Assessment Fund or the Sewer Construction and Maintenance Fund. This may be done, even if CAP rates still include all charge back items. When departments pay charge back items out of special funds or grants, they will adjust their CAP rates so that overheads already paid for in charge back are not double billed. CAP rates are available with sufficient detail for departments to perform this calculation.

Fee-charging departments will make similar adjustments when computing their fees for special services. Fees are determined based on anticipated direct cost plus overheads. Fee-charging departments may include some or all charge back costs among their total direct costs of services when they compute their fees. If they do, they will have to adjust their CAP rates to subtract such directly paid items. The choice of whether to include them as direct or indirect costs will depend on each department's method of computing fees. To the extent that charge back costs, or other costs listed on Attachment C, are included in direct charges for fees, the indirect cost rates must be adjusted accordingly. The simplest approach in computing fees would be to omit the charge back items from the direct cost portion of fee computation, and use the unadjusted CAP rate (which includes charge back costs) to recover the cost of charge back items.

(37) CERTIFICATION OF CLAIM

In accordance with the provisions of Government Code 17561, I certify that I am the officer authorized by the local agency to file mandated cost claims with the State of California for this program, and certify under penalty of perjury that I have not violated any of the provisions of Government Code Sections 1090 to 1098, inclusive.

I further certify that there was no application other than from the claimant, nor any grant or payment received, for reimbursement of costs claimed herein, and such costs are for a new program or increased level of services of an existing program. All offsetting savings and reimbursements set forth in the Parameters and Guidelines are identified, and all costs claimed are supported by source documentation currently maintained by the claimant.

The amounts for this Estimated Claim and/or Reimbursement Claim are hereby claimed from the State for payment of estimated and/or actual costs set forth on the attached statements. I certify under penalty of perjury under the laws of the State of California that the foregoing is true and correct.

CITY OF LOS ANGELES
Department of Animal Services
SB 90 Cost Claims For FY 2005-06

TRAINING EXPENSE

DESCRIPTION:

Training employees (new hires) on the mandated activities

EXPENSE:

Animal Control Officer, two (2) hours per employee: Annual Salary / 1,800 x number of employees x number of hours. Eight (8) new hires

Animal Care Technicians, two (2) hours per employee: Annual Salary / 1,800 x number of employees x number of hours. Twenty-nine (29) new hires.

Veterinarian, two (2) hours per employee: Annual Salary / 1,800 x number of employees x number of hours. One (1) new hires.

Veterinary Technicians, two (2) hours per employee: Annual Salary / 1,800 x number of employees x number of hours. Two (2) new hires.

CALCULATION:

Animal Control Officer: $\$45,637 / 1,800 = \25.35 x eight (8) new ACO's employees x 2 hours each = \$406

Animal Care Technician: $\$40,351 / 1,800 = \22.42 x twenty-nine (29) new ACT's x 2 hours each = \$1,300

Veterinarian: $\$78,273 / 1,800 = \43.49 x one (1) new Veterinarian x 2 hours each = \$87

Veterinary Technician: $\$51,796 / 1,800 = \28.78 x two (2) new Veterinary Technicians x 2 hours each = \$115

OR

<u>Title</u>	<u>Expense</u>
Animal Control Officer	\$ 406
Animal Care Technician	\$1,300

Department of Animal Services
SB 90 Cost Claims For FY 2005-06**

CARE OF DOGS AND CATS

DESCRIPTION:

Provide care and maintenance for dogs and cats that die during the increased holding period or were ultimately euthanized.

FORMULA:

Total shelter cost for all animals:	\$10,487,509
Yearly Census (Total animal days):	509,248
Number that died during increased holding period or were euthanized:	5,930
Number of reimbursable days:	2

CALCULATION:

Annual shelter cost / yearly census = daily cost per animal

Daily cost per animal x number of dogs and cats that die or are euthanized x number of reimbursable days = reimbursable expense

OR

$$\$10,487,509 / 509,248 = \$20.59$$

$$\$20.59 \times 5,930 \times 2 = \$244,197.40$$

EXPENSE TOTAL

\$244,197.40

**CITY OF LOS ANGELES
Department of Animal Services
SB 90 Cost Claims For FY 2005-06**

CARE OF OTHER ANIMALS

DESCRIPTION:

Provide care and maintenance for other animals, including but not limited to rabbits, guinea pigs, hamsters, pot-bellied pigs, birds, lizards, snakes, turtles and/or tortoises that die during the increased holding period or were ultimately euthanized.

FORMULA:

Total shelter cost for all animals:	\$10,487,509
Yearly Census (Total animal days):	509,248
Number that died during increased holding period or were euthanized:	452
Number of reimbursable days:	4

CALCULATION:

Annual shelter cost / yearly census = daily cost per animal

Daily cost per animal x number of other animals that die or are euthanized x number of reimbursable days = reimbursable expense

OR

$\$10,487,509 / 509,248 = \20.59

$\$20.59 \times 452 \times 4 = \$37,226.72$

EXPENSE TOTAL **\$37,226.72**

**CITY OF LOS ANGELES
Department of Animal Services
SB 90 Cost Claims For FY 2005-06**

HOLDING PERIOD

DESCRIPTION:

The Shelter are open for five (5) hours on Sunday to make animals available for owner redemption as mandated.

FORMULA:

Animal Care Technician: Annual Salary / 1,800 x number of hours = Expense for keeping shelters open on Sunday, Total hours worked = 7,488 / 8 hour day x 5 hours shelters are open. *7,488 HRS worked on Sunday / 8 = 936 B HR SUNDAYS worked x 5 eligible HRS*

Clerk Typist: Annual Salary / 1,800 x number of hours = Expense for keeping shelters open on Sunday, Total hours worked = 2,496 / 8 hour day x 5 hours shelters are open.

Clerk Typist (As Needed): Hourly rate x number of hours = Expense for keeping shelters open on Sunday, Total hours worked = 2,235 x 5 hours shelters are open.

CALCULATION:

Animal Care Technician: $\$40,351 / 1,800 = \22.42 . Total hours worked = $7,488 / 8 \times 5 = \$104,925.60$

Clerk Typist: $\$38,215 / 1,800 = \21.23 . Total hours worked = $2,496 / 8 \text{ hour day} \times 5 = \$33,188.80$.

Clerk Typist (As Needed): $\$15.24 \times 2,235 = \$34,061.40$

OR

Animal Control Officer	\$104,925.60
Clerk Typist	33,188.80
Clerk Typist (As Needed)	<u>34,061.40</u>
	\$172,175.80

EXPENSE TOTAL

\$172,175.80

**CITY OF LOS ANGELES
Department of Animal Services
SB 90 Cost Claims For FY 2005-06**

LOST AND FOUND LIST

DESCRIPTION:

Provide lost and found lists for owners and rescuers of lost animals. The list includes type of animal, referrals, shelter contact information, advice on how to publish and disseminate lost animal information.

FORMULA:

Six Shelters:

- North Central Shelter
- South Los Angeles Shelter
- East Valley Shelter
- West Valley Shelter
- West Los Angeles Shelter
- Harbor Shelter

CALCULATION:

Personnel:

- Six Clerk Typist

Time Spent to Prepare List:

- Eleven minutes per day to prepare Summary Sheet for each shelter for 365 days per year.

Salary:

- Clerk Typist Salary for Fiscal Year 2005-06 = \$38,215

- Clerk Typist Average Hourly Salary ($\$38,215 / 1,800$) = \$21.23

COMPUTATION:

Number of shelters x clerk typist x number of days x preparation time / 1hour (60 minutes) x hourly salary = Expense

Or

Six (6) shelters (x) 1 Clerk Typist each (x) 365 days (x) 11 minutes = 24090 minutes per year to prepare list / 60 minutes = 402 hours per year (x) \$21.23 average hourly salary = \$8,534.46 per year to prepare lost and found list.

EXPENSE TOTAL:

\$8,534.46

**CITY OF LOS ANGELES
Department of Animal Services
SB 90 Cost Claims For FY 2005-06**

MAINTAINING NON-MEDICAL RECORDS

DESCRIPTION:

Maintaining non-medical records on animals that are taken up, euthanized after the holding period or impound.

FORMULA:

Time required to input non-medical records = five (5) minutes per record.

Number of records: 11,135.

CALCULATION:

Time required to input individual record (x) number of records / 1hour (60 minutes) = total hours required to input non-medical records.

Average salary for animal Care Technician is \$41,572 / 1,800 annual hours = Hourly Rate.

Hours to input non-medical records (x) hourly rate for Animal Care Technician = Total cost.

OR

Five (5) minutes x 11,135 / 60 minutes – 928 hours

\$41,572 / 1800 work hours = \$23.10

928 x \$23.10 = \$21,436

EXPENSE TOTAL

\$21,436.80

CITY OF LOS ANGELES
Department of Animal Services
SB 90 Cost Claims For FY 2005-06

VETERINARY CARE

DESCRIPTION:

Providing necessary and prompt veterinary care for stray and abandoned animals that die during the increased holding period or were ultimately euthanized.

FORMULA:

Veterinarian annual and hourly rate: $\$79,636 / 1,800 = \$44.24.$

Veterinarian Technician annual and hourly rate: $\$51,725 / 1,800 = \$28.74.$

Average time to provide medical treatment: 12 minutes.

Cost of providing Veterinarian medical treatment per animal: $\$44.24 / 60 \text{ minutes} \times 12 \text{ minutes} = \8.85

Cost of a Veterinary Technician assisting Veterinarians in medical treatment per animal: $\$28.74 / 60 \text{ minutes} \times 12 \text{ minutes} = \5.75

Number of animals requiring prompt medical care: 17,989

CALCULATION:

Cost of providing medical treatment x number of animals requiring prompt medical care = Total Expense.

Medical supply use was based on a comparison between FY 1997-98, the last full fiscal year before SB 1785 and FY 2005-06, the current reporting year.

- In FY 1997-98 there were 2 Veterinarians and 12 Veterinary Technicians. Expenses for Account 3190 – Animal Medical Supplies was \$131,878.
- In FY 2005-06 there were 5 Veterinarians and 22 Veterinary Technicians. Expenses for Account 3190 – Animal Medical Supplies was \$249,156

Therefore $\$249,156 - \$131,878 = \$117,278$ in expenditure of Animal Medical Supplies to support additional Veterinary Care under SB 1785.

OR

Veterinarian:	$\$8.85 \times 17,989 = \$159,202.65$
Veterinary Technicians:	$\$5.75 \times 17,989 = \$103,436.75$
<u>Animal Medical Supplies</u>	<u>$= \\$117,278.00$</u>
Expense Total	\$379,917.40

**CITY OF LOS ANGELES
INTER-DEPARTMENTAL CORRESPONDENCE**

DATE: October 11, 2006

MEMORANDUM NO. 06-037

TO: All City Office/Department Heads

FROM: Rushmore D. Cervantes, Chief Deputy Controller *RD CS*

SUBJECT: 2005-06 INDIRECT COST RATES
COST ALLOCATION PLAN (CAP) 28

Attached are the approved Cost Allocation Plan (CAP) 28 indirect cost rates and instructions on their use. The only changes from the interim rates distributed on October 11, 2005, were Administration rates for the City Administrative Officer and Office of the Treasurer.

The rates were approved by the U.S. Department of Health and Human Services under contract with the City's cognizant federal agency, the U.S. Department of Housing and Urban Development. These rates must be used in all new applications, contracts, and billings for grant activities and to compute overhead amounts to be included with fees for special services during 2005-06.

Questions regarding the Cost Allocation Plan or indirect cost rates may be directed to the CAP staff, Lillian Sedlak at 978-7326, or Achilles Gonzales at 978-7327.

COST ALLOCATION PLAN 28 (CAP 28) - INDIRECT COST RATES WITH CARRY FORWARD

The rates below are to be used to prepare grant applications, contracts and billings for grant activities, and to compute Fees for Special Services, during 2005-06. They are to be applied only to straight time, gross salaries (with CTO). When only net salaries (without CTO) are available, convert net salaries to gross salaries using the CTO rate. For rates applicable to part time or overtime salaries, please contact CAP staff. **Note: You MUST adjust rates to deduct directly billed costs.** See list-Attachment C and Instructions-Attachment B.

Zoo Department	44.57%	18.84%	31.13%	*	27.29%

These ten Division Overhead rates, calculated by St. Services, assume that Equipment is billed as a direct cost. When such is done, the Central Services rate will be reduced to exclude the directly billed equipment.

Notes:

* Division Overhead includes costs of division heads, section supervisors, clerical and other support staff within divisions or sections. These costs are not part of the Department Administration rate, but are legitimate costs which should be recovered if allowed by your grantor. If these costs are not charged directly to a grant, a Division Overhead indirect cost rate should be calculated. To maintain consistency and insure that Division Overhead costs do not overlap with Department Administration costs, please contact CAP staff for assistance in calculating these rates. Public Works Division Overhead rates are computed by Public Works staff and published herein as a courtesy.

Instructions for Using Indirect Cost Rates

Modifying the rates. Usually departments use the CAP rates as published; however, situations may arise necessitating revision of the rates. **Your Department's CAP rate should be modified if your Department directly charges to a grant or fee payer any of the indirect costs, or if the grantor or fee payer directly provides any of the services listed on Attachment C.** For example, if you purchase a computer and the total cost is paid directly by a fee payer or grantor, your CAP rate must be reduced to avoid double billing for the directly charged item(s). This means: if the entity you are billing provides office space, telephone service, computers, vehicles, or any other item listed on Attachment C, your rates must be adjusted to exclude those items.

An example of the necessity for rate modification is the Police Department's bill to the Airports Department. Airports provides space, utilities, telephones and equipment for Police Department staff at the Airport substation. To properly bill the Airports Department for law enforcement services at this site, the Police Department indirect cost rates are revised to exclude the building use, building lease, equipment use, and telephone line items.

Contact the CAP Office for adjusted rates if any cost listed in Attachment C is directly billed to grants or fees, or if any of the listed services are provided by your client.

Using the rates as published. The CAP indirect cost rates are computed based on "gross annual salaries" excluding overtime. (For rates applicable to overtime salaries, please contact the CAP office.) Compensated time off (CTO) is included in this gross salaries base. (See Attachment C paragraph 5 for a definition of CTO.) The CAP Fringe Benefits, Central Services, and Department Administration indirect cost rates, therefore, must be applied to salaries which include CTO and exclude overtime. Please refer to the example below, where:

Fringe Benefits Rate	=	28.10%	of Gross Salaries
Central Services Rate	=	39.77%	of Gross Salaries
Department Administration & Support Rate	=	18.87%	of Gross Salaries
Compensated Time Off Rate	=	16.26%	of Net Salaries

1. Assume Gross Salaries = \$ 1,000.00 *(Gross Salaries are salaries for straight time worked plus Compensated Time Off.)*

Given the above-listed indirect cost rates, and assuming your CTO costs are included in your salaries as billed, total indirect costs are calculated below:

a.	\$ 1,000	x	28.10%	=	\$ 281.00	Fringe Benefit Cost
b.	\$ 1,000	x	39.77%	=	\$ 397.70	Central Service Cost
c.	\$ 1,000	x	18.87%	=	\$ 188.70	Department Administration & Support Cost
	Sum of (a + b + c)			=	\$ 867.40	

2. Assume Net Salaries = \$ 860.14 *(Net Salaries are salaries for straight time worked, not including Compensated Time Off. Such net salaries would typically be accumulated through direct charges in a cost accounting system.)*

Convert net salaries to gross salaries by adding CTO % of Net:

a.	Net Salary times CTO %:	\$ 860.14	x	16.26%	=	\$ 139.86	= CTO Amount
b.	Net Salary plus CTO amt:	\$ 860.14	+	\$ 139.86	=	\$ 1,000.00	= Gross Salaries
c.	\$ 1,000	x	28.10%	=	\$ 281.00	Fringe Benefit Cost	
d.	\$ 1,000	x	39.77%	=	\$ 397.70	Central Service Cost	
e.	\$ 1,000	x	18.87%	=	\$ 188.70	Department Administration & Support Cost	
	Sum of (a + b + c)			=	\$ 867.40		

REMINDER: CTO rates are to be used only when paid time off such as sick and vacation time are not directly charged to a special service or grant project. Please see Attachment C, paragraph 5 for further information.

COST ALLOCATION PLAN 28 INDIRECT COSTS INCLUDED IN RATE CALCULATIONS**1. Fringe Benefits Rate includes the department's share of the Citywide costs of:**

Retirement (Civilians)	Employee Assistance	Union Sponsored Benefits
Pensions (Fire/Police Sworn)	Ordinance Life Insurance	Unused Sick/Vacation Payout
FLEX Benefit Program	Medicare	Unemployment Insurance
- Health Insurance	Social Security	Workers' Compensation
- Dental Insurance	Part Time/Seasonal/Temporary	Hiring Hall Fringe
- Basic Life Insurance	(PST) 457 Retirement Plan	

2. Central Services Rate includes the department's share of the Citywide costs of:

Building Leases [GSD & Spec. Funds]	Equipment Use Allowance (Equipment costing \$5,000 & above)	General City Purposes [League Dues and audits]
Building Depreciation	Equipment Exp. Under \$5,000 (Equipment Costing under \$5,000)	Liability Claims
Computer Assets Depreciation (items costing \$5,000 & above)	Gas (Natural Gas Utility) [GSD]	Petroleum Products [GSD]
Communications Lease (Telephone bill)	Insurance on bond-financed assets	Vehicle Depreciation
		Water & Electricity
		Emergency Operations Organization
City Administrative Officer (CAO, formerly OARS)	COUNCIL & CLA	MAYOR
Budget		Department Liaison & Grants Citywide Coordinator
Employee Relations & Living Wage	EMPLOYEE RELATIONS BOARD	
Gen. Support (Finance, Systems, Productivity & Risk Management)		PERSONNEL
Dept Liaison/ Mgt. Analysis	ENVIRONMENTAL AFFAIRS	Workers' Compensation & Safety
Municipal Facilities Projects	Environmental Coordination	Personnel Balance of Dept.
CITY ATTORNEY	EMERGENCY PREPAREDNESS	PUBLIC WORKS
Civil Liability	Emergency Preparedness Coordination	Board Office
Employee Relations		Contract Admin:
Municipal Counsel / Legis. Svcs.		Office of Contract Compliance
Land Use	FINANCE	Engineering: General Engineering
Police Division	Citywide Collections	
CITY CLERK	GENERAL SERVICES	TREASURER
Council and Public Services	Building Services	Custody & Disbursement & Debt Administration
Records Management	Construction Division	
	Fleet Services	PENSIONS: OVERHEADS ALLOCATED
	Assets Management (Leasing & Real Estate)	TO PENSIONS. (Other Pension costs included in Fringe Benefits)
CITY ETHICS COMMISSION	Mail & Messenger	
	Parking Services	
	Supply Services	CERS: OVERHEADS ALLOCATED
CONTROLLER		TO CERS. (Other CERS costs included in Fringe Benefits)
Accounts Payable	INFORMATION TECHNOLOGY	
Budget & General Acctg.	AGENCY (ITA)	
CAP	IT Services	
FMIS	Communications Division	
Internal Audit	Telecommunications (PPEB)	
Payroll (incl. Fiscal Systems)		
Single Audit		
Workers' Compensation		

INDIRECT COSTS INCLUDED IN CAP 28 RATE CALCULATIONS (continued)

3. Department Administration and Support Rate includes costs of support functions within a department:

The rate includes expenditures which: — benefit the department as a whole
 — are NOT directly charged to a grant or fee program
 — are NOT line operations.

Expenditures include those of:

Accounting staff	Department Management (Gen. Mgr. & Asst. Gen. Mgrs)
Budget staff	Clerical Staff/word processing staff serving the entire department.
Payroll staff	Systems Staff (if serving the whole department, not a special project)
Personnel & training staff	Warehouse/inventory/stores staff
Inventory staff	Vehicle maintenance staff (Police & Fire only)

NOTE: The support costs discussed here must conform to Federal definitions of allowable overhead costs and are not necessarily the same as the City's General Administration and Support Program (GASP) in a departmental budget.

4. Division Overhead Rates include the costs of support functions within divisions:

The rate includes the salary and expenses of division heads, section supervisors, and other support within divisions which are not included in the Department Administration costs discussed above. For example, within the Bureau of Engineering, the City Engineer, Deputies, their secretaries and the Administration Division are included in the Department Administration indirect cost rate. Within operating divisions, division heads, assistant division heads, and their secretaries and division support staff are NOT included in the Department Administration rate.

To recover the overhead costs within a division, a department or bureau should directly charge the time of the division head, secretary, assistant division head, and other division support services to a project, or calculate an indirect cost rate to recover their costs. Please work with the CAP office when calculating such rates, to insure that Division Overhead costs do not overlap Department Administration costs.

5. Compensated Time Off Rate includes the salary paid to employees who are on paid leave such as:

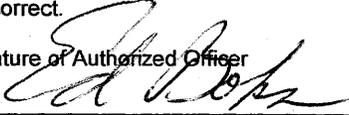

Sick Leave	Jury Duty	Floating Holiday
Vacation	Bereavement leave	Injury on Duty
Holiday	Preventive Medicine	
Military Leave	Workers' Compensation (salary continuance	
Family Illness	paid by the employing department.)	

Special Note regarding CTO:

CTO rates are to be used only when sick, vacation, and other CTO hours are not directly charged to a fee or grant project. For employees who charge only part of their hours worked to a grant, their time off is usually not being charged to the project, so the cost of that time off must be recovered using the CTO Rate. For employees whose entire annual salary is charged to a fee or grant, CTO is recovered as they take their time off, and the CTO Rate is not to be used. When the CTO Rate is applied to net salaries, the amount derived is added to net salaries to create gross salaries. The derived gross salaries becomes the base against which the fringe benefit rate and other indirect cost rates described above are applied.

6. OTHER DEFINITIONS

- a. Gross Salaries - Total annual salaries, which include pay for time worked AND compensated time off.
- b. Net Salaries - Pay for time worked only, not including compensated time off.

TRAINING EXPENSE

DESCRIPTION:

Training employees (new hires) on the mandated activities.

EXPENSE:

Animal Care Technicians, two (2) hours per employee: Annual Salary / 1,800 x number of employees x number of hours. Fifty-nine (59) new hires.

Veterinarian, two (2) hours per employee: Annual Salary / 1,800 x number of employees x number of hours. Eight (8) new hires.

Veterinary Technicians, two (2) hours per employee: Annual Salary / 1,800 x number of employees x number of hours. Seven (7) new hires.

CALCULATION:

Animal Care Technician: $\$42,421 / 1,800 = \23.57 x fifty-nine (59) new ACT's x 2 hours each = \$2,781.

Veterinarian: $\$88,199 / 1,800 = \49.00 x eight (8) new Veterinarian x 2 hours each = \$784.

Veterinary Technician: $\$53,587 / 1,800 = \29.77 x seven (7) new Veterinary Technicians x 2 hours each = \$417.

OR

<u>Title</u>	<u>Expense</u>
Animal Care Technician	\$2,781

CARE OF DOGS AND CATS

DESCRIPTION:

Provide care and maintenance for dogs and cats that die during the increased holding period or were ultimately euthanized.

FORMULA:

Total shelter cost for all animals:	\$11,585,706
Yearly Census (Total animal days):	655,576
Number that died during increased holding period or were euthanized:	5,486
Number of reimbursable days:	2

CALCULATION:

Annual shelter cost / yearly census = daily cost per animal

Daily cost per animal x number of dogs and cats that die or are euthanized x number of reimbursable days = reimbursable expense

OR

$$\$11,585,706 / 655,576 = \$17.67$$

$$\$17.67 \times 5,486 \times 2 = \$193,875$$

EXPENSE TOTAL

\$193,875

**CITY OF LOS ANGELES
Department of Animal Services
SB 90 Cost Claims For FY 2006-07**

CARE OF OTHER ANIMALS

DESCRIPTION:

Provide care and maintenance for other animals, including but not limited to rabbits, guinea pigs, hamsters, pot-bellied pigs, birds, lizards, snakes, turtles and/or tortoises that die during the increased holding period or were ultimately euthanized.

FORMULA:

Total shelter cost for all animals:	\$11,585,706
Yearly Census (Total animal days):	655,576
Number that died during increased holding period or were euthanized:	1,402
Number of reimbursable days:	4

CALCULATION:

Annual shelter cost / yearly census = daily cost per animal

Daily cost per animal x number of other animals that die or are euthanized x number of reimbursable days = reimbursable expense

OR

$$\$11,585,706 / 655,576 = \$17.67$$

$$\$17.67 \times 1,402 \times 4 = \$99,093$$

EXPENSE TOTAL

\$99,093

CITY OF LOS ANGELES
Department of Animal Services
SB 90 Cost Claims For FY 2006-07

HOLDING PERIOD

DESCRIPTION:

The Shelter are open for five (5) hours on Sunday to make animals available for owner redemption as mandated.

FORMULA:

Animal Care Technician: Annual Salary / 1,800 x number of hours = Expense for keeping shelters open on Sunday, Total hours worked = 22,402 / 8 hour day x 5 hours shelters are open.

Clerk Typist: Annual Salary / 1,800 x number of hours = Expense for keeping shelters open on Sunday, Total hours worked = 822 / 8 hour day x 5 hours shelters are open.

Relief Animal Regulation Worker: Hourly rate x number of hours = Expense for keeping shelters open on Sunday, Total hours worked = 2,812 / 8 hour day x 5 hours shelters are open..

CALCULATION:

Animal Care Technician: $\$42,421 / 1,800 = \23.57 . Total hours worked = 22,402 / 8 x 5 x $\$23.57 = \$330,009$.

Clerk Typist: $\$39,096 / 1,800 = \21.72 . Total hours worked = 822 / 8 hour day x 5 x $\$21.72 = \$11,159$.

Relief Animal Regulation Worker Relief (As needed) hourly rate = $\$15.89$. Total hours worked = 2,812 / 8 hour day x 5 x $\$15.89 = \$27,927$.

OR

Animal Control Officer	\$330,009
Clerk Typist	11,159
Relief Animal Regulation Worker (As Needed)	<u>27,927</u>
EXPENSE TOTAL	\$369,095

CITY OF LOS ANGELES
Department of Animal Services
SB 90 Cost Claims For FY 2006-07

LOST AND FOUND LIST

DESCRIPTION:

Provide lost and found lists for owners and rescuers of lost animals. The list includes type of animal, referrals, shelter contact information, advice on how to publish and disseminate lost animal information.

FORMULA:

Six Shelters:

- North Central Shelter
- South Los Angeles Shelter
- East Valley Shelter
- West Valley Shelter
- West Los Angeles Shelter
- Harbor Shelter

CALCULATION:

Personnel:

- Six Clerk Typists

Time Spent to Prepare List:

- Eleven minutes per day to prepare Summary Sheet for each shelter for 365 days per year.

Salary:

- Clerk Typist Salary for Fiscal Year 2006-07 = \$39,096
- Clerk Typist Average Hourly Salary ($\$39,096 / 1,800$) = \$21.72

COMPUTATION:

Number of shelters x clerk typist x number of days x preparation time / 1hour (60 minutes) x hourly salary = Expense

Or

Six (6) shelters (x) 1 Clerk Typist each (x) 365 days (x) 11 minutes = 24,090 minutes per year to prepare list / 60 minutes = 402 hours per year (x) \$21.72 average hourly salary = \$8,731 per year to prepare lost and found list.

EXPENSE TOTAL:

\$8,731

CITY OF LOS ANGELES
Department of Animal Services
SB 90 Cost Claims For FY 2006-07

MAINTAINING NON-MEDICAL RECORDS

DESCRIPTION:

Maintaining non-medical records on animals that are taken up, euthanized after the holding period or impound.

FORMULA:

Time required to input non-medical records = five (5) minutes per record.

Number of records: 7,127.

CALCULATION:

Time required to input individual record (x) number of records / 1hour (60 minutes) = total hours required to input non-medical records.

Average salary for animal Care Technician is \$42,421 / 1,800 annual hours = \$23.57 Hourly Rate.

Hours to input non-medical records (x) hourly rate for Animal Care Technician = Total cost.

OR

Five (5) minutes x 7,127 / 60 minutes =594 hours

\$42,421 / 1800 work hours = \$23.57

594 x \$23.57 = \$14,001

EXPENSE TOTAL

\$14,001

CITY OF LOS ANGELES
Department of Animal Services
SB 90 Cost Claims For FY 2006-07

VETERINARY CARE

DESCRIPTION:

Providing necessary and prompt veterinary care for stray and abandoned animals that die during the increased holding period or were ultimately euthanized.

FORMULA:

Veterinarian annual and hourly rate: $\$88,199 / 1,800 = \49.00 .
Veterinarian Technician annual and hourly rate: $\$53,587 / 1,800 = \29.77 .

Average time to provide medical treatment: 12 minutes.

Cost of providing Veterinarian medical treatment per animal: $\$49.00 / 60 \text{ minutes} \times 12 \text{ minutes} = \9.80

Cost of a Veterinary Technician assisting Veterinarians in medical treatment per animal: $\$29.77 / 60 \text{ minutes} \times 12 \text{ minutes} = \5.95

Number of animals requiring prompt medical care: 13,487

CALCULATION:

Cost of providing medical treatment x number of animals requiring prompt medical care
= Total Expense.

Medical supply use was based on a comparison between FY 1997-98, the last full fiscal year before SB 1785 and FY 2005-06, the current reporting year.

- In FY 1997-98 there were 2 Veterinarians and 12 Veterinary Technician. Expenses for Account 3190 – Animal Medical Supplies was \$131,878.
- In FY 2006-07 there were 5 Veterinarians and 22 Veterinary Technicians. Expenses for Account 3190 – Animal Medical Supplies was \$310,831

Therefore $\$310,831 - \$131,878 = \boxed{\$178,953}$ in expenditure of Animal Medical Supplies to support additional Veterinary Care under SB 1785.

OR

Veterinarian:	$\$9.80 \times 13,487 = \$132,173$
Veterinary Technicians:	$\$5.95 \times 13,487 = \$ 80,248$
<u>Animal Medical Supplies</u>	<u>$= \\$178,953$</u>
Expense Total	\$391,374

 Current Organization (February 2007)
OVERVIEW

COST ALLOCATION PLAN 29 (CAP 29) - INDIRECT COST RATES WITH CARRY FORWARD

The rates below are to be used to prepare grant applications, contracts and billings for grant activities, and to compute Fees for Special Services, during 2006-07. They are to be applied only to straight time, gross salaries (with CTO). When only net salaries (without CTO) are available, convert net salaries to gross salaries using the CTO rate. For rates applicable to **part time** or **overtime** salaries, please contact CAP staff. **Note: You MUST adjust rates to deduct directly billed costs.** See list-Attachment C and Instructions-Attachment B.

			27.49% b.		
			54.20% c.		
			Field Support Rate, Sworn only **		
			Combined Dept. Admin. & Support Rate, including Field Support Rate		

**NOTE: For Fire and Police, the Field Support rate (line b.) captures overhead costs that are in addition to other Administrative and Support Costs. It has been added to the Department Administration rate on this schedule. Please use this combined rate (line c.) for sworn positions in field operations. For other, non-field sworn positions, do NOT use the Field Support rate; use only the regular Department Administration rate (line a.), together with the other (Fringe, Central Service and CTO) rates.

COST ALLOCATION PLAN 29 (CAP 29) - INDIRECT COST RATES WITH CARRY FORWARD

The rates below are to be used to prepare grant applications, contracts and billings for grant activities, and to compute Fees for Special Services, during 2006-07. They are to be applied only to straight time, gross salaries (with CTO). When only net salaries (without CTO) are available, convert net salaries to gross salaries using the CTO rate. For rates applicable to **part time** or **overtime** salaries, please contact CAP staff. **Note: You MUST adjust rates to deduct directly billed costs.** See list-Attachment C and Instructions-Attachment B.

Zoo Department	48.92%	20.56%	35.65%	*	27.37%

These ten Division Overhead rates, calculated by St. Services, assume that Equipment is billed as a direct cost. When such is done, the Central Services rate will be reduced to exclude the directly billed equipment.

Notes:

* Division Overhead includes costs of division heads, section supervisors, clerical and other support staff within divisions or sections. These costs are not part of the Department Administration rate, but are legitimate costs which should be recovered if allowed by your grantor. If these costs are not charged directly to a grant, a Division Overhead indirect cost rate should be calculated. To maintain consistency and insure that Division Overhead costs do not overlap with Department Administration costs, please contact CAP staff for assistance in calculating these rates. Public Works Division Overhead rates are computed by Public Works staff and published herein as a courtesy.

Instructions for Using Indirect Cost Rates

Modifying the rates. Usually departments use the CAP rates as published; however, situations may arise necessitating revision of the rates. **Your Department's CAP rate should be modified if your Department directly charges to a grant or fee payer any of the indirect costs, or if the grantor or fee payer directly provides any of the services listed on Attachment C.** For example, if you purchase a computer and the total cost is paid directly by a fee payer or grantor, your CAP rate must be reduced to avoid double billing for the directly charged item(s). This means: if the entity you are billing provides office space, telephone service, computers, vehicles, or any other item listed on Attachment C, your rates must be adjusted to exclude those items.

An example of the necessity for rate modification is the Police Department's bill to the Airports Department. Airports provides space, utilities, telephones and equipment for Police Department staff at the Airport substation. To properly bill the Airports Department for law enforcement services at this site, the Police Department indirect cost rates are revised to exclude the building use, building lease, equipment use, and telephone line items.

Contact the CAP Office for adjusted rates if any cost listed in Attachment C is directly billed to grants or fees, or if any of the listed services are provided by your client.

Using the rates as published. The CAP indirect cost rates are computed based on "gross annual salaries" **excluding** overtime. (For rates applicable to overtime salaries, please contact the CAP office.) Compensated time off (CTO) is included in this gross salaries base. (See Attachment C paragraph 5 for a definition of CTO.) The CAP Fringe Benefits, Central Services, and Department Administration indirect cost rates, therefore, must be applied to salaries which include CTO and exclude overtime. Please refer to the example below, where:

Fringe Benefits Rate	=	28.10%	of Gross Salaries
Central Services Rate	=	39.77%	of Gross Salaries
Department Administration & Support Rate	=	18.87%	of Gross Salaries
Compensated Time Off Rate	=	16.26%	of Net Salaries

1. Assume Gross Salaries = \$ 1,000.00 *(Gross Salaries are salaries for straight time worked plus Compensated Time Off.)*

Given the above-listed indirect cost rates, and assuming your CTO costs are included in your salaries as billed, total indirect costs are calculated below:

a.	\$ 1,000	x	28.10%	=	\$ 281.00	Fringe Benefit Cost
b.	\$ 1,000	x	39.77%	=	\$ 397.70	Central Service Cost
c.	\$ 1,000	x	18.87%	=	\$ 188.70	Department Administration & Support Cost
	Sum of (a + b + c)			=	\$ 867.40	

2. Assume Net Salaries = \$ 860.14 *(Net Salaries are salaries for straight time worked, not including Compensated Time Off. Such net salaries would typically be accumulated through direct charges in a cost accounting system.)*

Convert net salaries to gross salaries by adding CTO % of Net:

a.	Net Salary times CTO %:	\$ 860.14	x	16.26%	=	\$ 139.86	= CTO Amount
b.	Net Salary plus CTO amt:	\$ 860.14	+	\$ 139.86	=	\$ 1,000.00	= Gross Salaries

c.	\$ 1,000	x	28.10%	=	\$ 281.00	Fringe Benefit Cost
d.	\$ 1,000	x	39.77%	=	\$ 397.70	Central Service Cost
e.	\$ 1,000	x	18.87%	=	\$ 188.70	Department Administration & Support Cost
	Sum of (a + b + c)			=	\$ 867.40	

REMINDER: CTO rates are to be used only when paid time off such as sick and vacation time are not directly charged to a special service or grant project. Please see Attachment C, paragraph 5 for further information.

COST ALLOCATION PLAN 29 INDIRECT COSTS INCLUDED IN RATE CALCULATIONS**1. Fringe Benefits Rate includes the department's share of the Citywide costs of:**

Retirement (Civilians)	Employee Assistance	Union Sponsored Benefits
Pensions (Fire/Police Sworn)	Ordinance Life Insurance	Unused Sick/Vacation Payout
FLEX Benefit Program	Medicare	Unemployment Insurance
- Health Insurance	Social Security	Workers' Compensation
- Dental Insurance	Part Time/Seasonal/Temporary	Hiring Hall Fringe
- Basic Life Insurance	(PST) 457 Retirement Plan	

2. Central Services Rate includes the department's share of the Citywide costs of:

Building Leases [GSD & Spec. Funds]	Equipment Use Allowance (Equipment costing \$5,000 & above)	General City Purposes [League Dues and audits]
Building Depreciation	Equipment Exp. Under \$5,000 (Equipment Costing under \$5,000)	Liability Claims
Computer Assets Depreciation (items costing \$5,000 & above)	Gas (Natural Gas Utility) [GSD]	Petroleum Products [GSD]
Communications Lease (Telephone bill)	Insurance on bond-financed assets	Vehicle Depreciation
		Water & Electricity
		Emergency Operations Organization
City Administrative Officer (CAO, formerly OARS)	COUNCIL & CLA	MAYOR
Budget		Department Liaison & Grants Citywide Coordinator
Employee Relations	EMPLOYEE RELATIONS BOARD	
Gen. Support (Finance, Systems, Productivity & Risk Management)		PERSONNEL
Dept Liaison/ Mgt. Analysis	ENVIRONMENTAL AFFAIRS	Workers' Compensation & Safety
Municipal Facilities Projects	Environmental Coordination	Personnel Balance of Dept.
CITY ATTORNEY	EMERGENCY PREPAREDNESS	PUBLIC WORKS
Civil Liability	Emergency Preparedness Coordination	Board Office
Employee Relations		Contract Admin:
Municipal Counsel / Legis. Svcs.		Office of Contract Compliance
Land Use	FINANCE	Engineering: General Engineering
Police Division	Citywide Collections	
CITY CLERK	GENERAL SERVICES	TREASURER
Council and Public Services	Building Services	Custody & Disbursement & Debt Administration
Records Management	Construction Division	
	Fleet Services	
	Assets Management (Leasing & Real Estate)	PENSIONS: OVERHEADS ALLOCATED
CITY ETHICS COMMISSION	Mail & Messenger	
	Parking Services	TO PENSIONS. (Other Pension costs included in Fringe Benefits)
CONTROLLER	Supply Services	
Accounts Payable		CERS: OVERHEADS ALLOCATED
Budget & General Acctg.		
CAP	INFORMATION TECHNOLOGY	
FMIS	AGENCY (ITA)	TO CERS. (Other CERS costs included in Fringe Benefits)
Internal Audit	IT Services	
Payroll (incl. Fiscal Systems)	Communications Division	
Single Audit	Telecommunications (PPEB)	
Workers' Compensation		

INDIRECT COSTS INCLUDED IN CAP 29 RATE CALCULATIONS (continued)**3. Department Administration and Support Rate includes costs of support functions within a department:**

The rate includes expenditures which: --- benefit the department as a whole
 --- are NOT directly charged to a grant or fee program
 --- are NOT line operations.

Expenditures include those of:

Accounting staff	Department Management (Gen. Mgr. & Asst. Gen. Mgrs)
Budget staff	Clerical Staff/word processing staff serving the entire department.
Payroll staff	Systems Staff (if serving the whole department, not a special project)
Personnel & training staff	Warehouse/inventory/stores staff
Inventory staff	Vehicle maintenance staff (Police & Fire only)

NOTE: The support costs discussed here must conform to Federal definitions of allowable overhead costs and are not necessarily the same as the City's General Administration and Support Program (GASP) in a departmental budget.

4. Division Overhead Rates include the costs of support functions within divisions:

The rate includes the salary and expenses of division heads, section supervisors, and other support within divisions which are not included in the Department Administration costs discussed above. For example, within the Bureau of Engineering, the City Engineer, Deputies, their secretaries and the Administration Division are included in the Department Administration indirect cost rate. Within operating divisions, division heads, assistant division heads, and their secretaries and division support staff are NOT included in the Department Administration rate.

To recover the overhead costs within a division, a department or bureau should directly charge the time of the division head, secretary, assistant division head, and other division support services to a project, or calculate an indirect cost rate to recover their costs. Please work with the CAP office when calculating such rates, to insure that Division Overhead costs do not overlap Department Administration costs.

5. Compensated Time Off Rate includes the salary paid to employees who are on paid leave such as:

Sick Leave	Jury Duty	Floating Holiday
Vacation	Bereavement leave	Injury on Duty
Holiday	Preventive Medicine	
Military Leave	Workers' Compensation (salary continuance	
Family Illness	paid by the employing department.)	

Special Note regarding CTO:

CTO rates are to be used only when sick, vacation, and other CTO hours are not directly charged to a fee or grant project. For employees who charge only part of their hours worked to a grant, their time off is usually not being charged to the project, so the cost of that time off must be recovered using the CTO Rate. For employees whose entire annual salary is charged to a fee or grant, CTO is recovered as they take their time off, and the CTO Rate is not to be used. When the CTO Rate is applied to net salaries, the amount derived is added to net salaries to create gross salaries. The derived gross salaries becomes the base against which the fringe benefit rate and other indirect cost rates described above are applied.

6. OTHER DEFINITIONS

- Gross Salaries - Total annual salaries, which include pay for time worked AND compensated time off.
- Net Salaries - Pay for time worked only, not including compensated time off.

**CITY OF LOS ANGELES
INTER-DEPARTMENTAL CORRESPONDENCE**

DATE: September 13, 2007 **MEMORANDUM NO. 07-028**
TO: All City Office/Department Heads
FROM: Rushmore D. Cervantes, Chief Deputy Controller *RDCS*
SUBJECT: **2006-07 INDIRECT COST RATES—COST ALLOCATION PLAN
(CAP) 29**

Attached are the approved Cost Allocation Plan (CAP) 29 indirect cost rates and instructions on their use. Please note that there are a number of changes from the interim rates distributed on September 13, 2006.

The rates were approved by the U.S. Department of Health and Human Services under contract with the City's cognizant federal agency, the U.S. Department of Housing and Urban Development. These rates must be used as follows: (a) for new billings on grant activities during fiscal year 2006-07 (you must adjust billings that were already made) and (b) to compute overhead charges, to be included with fees for special services, incurred in fiscal year 2006-07 but are going to be billed in fiscal year 2007-08.

Questions regarding the Cost Allocation Plan or indirect cost rates may be directed to the CAP staff, Lillian Sedlak at 978-7326, or Achilles Gonzales at 978-7327.

TRAINING EXPENSE

DESCRIPTION:

Training employees (new hires) on the mandated activities.

EXPENSE:

Animal Care Technicians, two (2) hours per employee: Annual Salary / 1,800 x number of employees x number of hours. Thirty-three (33) new hires.

Veterinarian, two (2) hours per employee: Annual Salary / 1,800 x number of employees x number of hours. Four (4) new hires.

Veterinary Technicians, two (2) hours per employee: Annual Salary / 1,800 x number of employees x number of hours. Nine (9) new hires.

CALCULATION:

Animal Care Technician: $\$41,246 / 1,800 = \$22.91 \times \text{thirty-three (33) new ACT's} \times 2 \text{ hours each} = \$1,512.$

Veterinarian: $\$87,312 / 1,800 = \$48.51 \times \text{four (4) new Veterinarian} \times 2 \text{ hours each} = \$388.$

Veterinary Technician: $\$53,910 / 1,800 = \$29.95 \times \text{nine (9) new Veterinary Technicians} \times 2 \text{ hours each} = \$539.$

OR

<u>Title</u>	<u>Expense</u>
Animal Care Technician	\$1,512
Veterinarian	\$ 388
Veterinary Technician	<u>\$ 539</u>
EXPENSE TOTAL	\$2,439

**CITY OF LOS ANGELES

Cost Claims for FY 2007-08**

CARE OF DOGS AND CATS

DESCRIPTION:

Provide care and maintenance for dogs and cats that die during the increased holding period or were ultimately euthanized.

FORMULA:

Total shelter cost for all animals:	\$12,856,179
Yearly Census (Total animal days):	799,326
Number that died during increased holding period or were euthanized:	6,036
Number of reimbursable days:	2

CALCULATION:

Annual shelter cost / yearly census = daily cost per animal

Daily cost per animal x number of dogs and cats that die or are euthanized x number of reimbursable days = reimbursable expense

OR

$$\$12,856,179 / 799,326 = \$16.08$$

$$\$16.08 \times 6,036 \times 2 = \$194,118$$

EXPENSE TOTAL

\$194,118

**CITY OF LOS ANGELES
Department of Animal Services
Cost Claims for FY 2007-08**

CARE OF OTHER ANIMALS

DESCRIPTION:

Provide care and maintenance for other animals, including but not limited to rabbits, guinea pigs, hamsters, pot-bellied pigs, birds, lizards, snakes, turtles and/or tortoises that die during the increased holding period or were ultimately euthanized.

FORMULA:

Total shelter cost for all animals:	\$12,856,179
Yearly Census (Total animal days):	799,326
Number that died during increased holding period or were euthanized:	688
Number of reimbursable days:	4

CALCULATION:

Annual shelter cost / yearly census = daily cost per animal

Daily cost per animal x number of other animals that die or are euthanized x number of reimbursable days = reimbursable expense

OR

$$\$12,856,179 / 799,326 = \$16.08$$

$$\$16.08 \times 688 \times 4 = \$44,252$$

EXPENSE TOTAL: \$44,252

CITY OF LOS ANGELES
Department of Animal Services
Cost Claims for FY 2007-08

LOST AND FOUND LIST

DESCRIPTION:

Provide lost and found lists for owners and rescuers of lost animals. The list includes type of animal, referrals, shelter contact information, advice on how to publish and disseminate lost animal information.

FORMULA:

Six Shelters:

- North Central Shelter
- South Los Angeles Shelter
- East Valley Shelter
- West Valley Shelter
- West Los Angeles Shelter
- Harbor Shelter

CALCULATION:

Personnel:

- Six Clerk Typists

Time Spent to Prepare List:

- Eleven minutes per day to prepare Summary Sheet for each shelter for 365 days per year.

Salary:

- Clerk Typist Salary for Fiscal Year 2007-08 = \$38,384
- Clerk Typist Average Hourly Salary ($\$38,384 / 1,800$) = \$21.30

COMPUTATION:

Number of shelters x clerk typist x number of days x preparation time / 1hour (60 minutes) x hourly salary = Expense

Or

Six (6) shelters (x) 1 Clerk Typist each (x) 365 days (x) 11 minutes = 24,090 minutes per year to prepare list / 60 minutes = 402 hours per year (x) \$21.30 average hourly salary = \$8,552 per year to prepare lost and found list.

EXPENSE TOTAL: \$8,552

CITY OF LOS ANGELES
Department of Animal Services
Cost Claims for FY 2007-08

MAINTAINING NON-MEDICAL RECORDS

DESCRIPTION:

Maintaining non-medical records on animals that are taken up, euthanized after the holding period or impound.

FORMULA:

Time required to input non-medical records = five (5) minutes per record.

Number of records: 7,175.

CALCULATION:

Time required to input individual record (x) number of records / 1hour (60 minutes) = total hours required to input non-medical records.

Average salary for animal Care Technician is \$41,246/ 1,800 annual hours = \$22.91 Hourly Rate.

Hours to input non-medical records (x) hourly rate for Animal Care Technician = Total cost.

OR

Five (5) minutes x 7,175 / 60 minutes =598 hours

\$41,246 / 1800 work hours = \$22.91

598 x \$22.91 = \$13,700

EXPENSE TOTAL

\$13,700

**CITY OF LOS ANGELES
Department of Animal Services
Cost Claims for FY 2007-08**

VETERINARY CARE

DESCRIPTION:

Providing necessary and prompt veterinary care for stray and abandoned animals that die during the increased holding period or were ultimately euthanized.

FORMULA:

Veterinarian annual and hourly rate: $\$87,312 / 1,800 = \48.51 .

Veterinarian Technician annual and hourly rate: $\$53,910 / 1,800 = \29.95 .

Average time to provide medical treatment: 12 minutes.

Cost of providing Veterinarian medical treatment per animal: $\$48.51 / 60 \text{ minutes} \times 12 \text{ minutes} = \9.70

Cost of a Veterinary Technician assisting Veterinarians in medical treatment per animal: $\$29.95 / 60 \text{ minutes} \times 12 \text{ minutes} = \5.99

Number of animals requiring prompt medical care: 18,982

CALCULATION:

Cost of providing medical treatment x number of animals requiring prompt medical care
= Total Expense.

Medical supply use was based on a comparison between FY 1997-98, the last full fiscal year before SB 1785 and FY 2007-08, the current reporting year.

- In FY 1997-98 there were 2 Veterinarians and 12 Veterinary Technician. Expenses for Account 3190 – Animal Medical Supplies was \$131,878.
- In FY 2007-08 there were 5 Veterinarians and 22 Veterinary Technicians. Expenses for Account 3190 – Animal Medical Supplies was \$296,380

Therefore $\$296,380 - \$131,878 = \$164,502$ in expenditure of Animal Medical Supplies to support additional Veterinary Care under SB 1785.

OR

Veterinarian:	$\$9.70 \times 18,982 = \$184,125$
Veterinary Technicians:	$\$5.99 \times 18,982 = \$113,702$
<u>Animal Medical Supplies</u>	<u>$= \\$164,502$</u>
Expense Total	\$462,329

COST ALLOCATION PLAN 30 (CAP 30) - INDIRECT COST RATES WITH CARRY FORWARD

The rates below are to be used to prepare grant applications, contracts and billings for grant activities, and compute Fees for Special Services, during 2007-08. They are to be applied only to straight time, gross sal (with CTO). When only net salaries (without CTO) are available, convert net salaries to gross salaries usi the CTO rate. For rates applicable to **part time** or **overtime** salaries, please contact CAP staff. **Note: Y MUST adjust rates to deduct directly billed costs.** See list-Attachment C and Instructions-Attachment

TRAINING EXPENSE

DESCRIPTION:

Training employees (new hires) on the mandated activities.

EXPENSE:

Chief Veterinarian (2) hours per employee: Annual Salary / 1,800 x number of employees x number of hours. One (1) new hire.

Veterinarian, two (2) hours per employee: Annual Salary / 1,800 x number of employees x number of hours. One (1) new hires.

Volunteer Coordinator, two (2) hours per employee: Annual Salary / 1,800 x number of employees x number of hours. One (1) new hires.

CALCULATION:

Chief Veterinarian: $\$109,871 / 1,800 = \61.00 one (1) new Chief Veterinarian's x 2 hours each = \$122.00.

Veterinarian II: $\$90,093 / 1,800 = \50.00 x one (1) new Veterinarian x 2 hours each = \$100.00.

Volunteer Coordinator: $\$65,272 / 1,800 = \36.00 x one (1) new Volunteer Coordinator x 2 hours each = \$73.00.

OR

<u>Title</u>	<u>Expense</u>
Chief Veterinarian	\$122.00
Veterinarian	\$100.00
Volunteer Coordinator	<u>\$ 73.00</u>
EXPENSE TOTAL	\$295.00

**CITY OF LOS ANGELES
Department of Animal Services
Cost Claims for FY 2008-09**

COMPUTER SOFTWARE

DESCRIPTION:

Develop and / or procure and maintain computer software for the maintenance of non-medical animal records

EXPENSE:

Sr. Systems Analyst I. Twenty-five (25) percent of Sr. Systems Analyst I annual salary for the maintenance of animal information systems and the Department's website.

CALCULATION:

Sr. System analyst I: $\$96,134 \times \text{twenty-five (25) percent} = \$24,034$

OR

Sr. Systems Analyst I	<u>\$24,034</u>
EXPENSE TOTAL	\$24,034

**CITY OF LOS ANGELES
Department of Animal Services
Cost Claims for FY 2008-09**

CARE OF DOGS AND CATS

DESCRIPTION:

Provide care and maintenance for dogs and cats that die during the increased holding period or were ultimately euthanized.

FORMULA:

Total shelter cost for all animals:	\$11,043,321
Yearly Census (Total animal days):	859,756
Number that died during increased holding period or were euthanized:	6,539
Number of reimbursable days:	2

CALCULATION:

Annual shelter cost / yearly census = daily cost per animal

Daily cost per animal x number of dogs and cats that die or are euthanized x number of reimbursable days = reimbursable expense

OR

$$\$11,043,321 / 859,756 = \$12.84$$

$$\$12.84 \times 6,539 \times 2 = \$167,922$$

EXPENSE TOTAL

\$167,922

**CITY OF LOS ANGELES
Department of Animal Services
Cost Claims for FY 2008-09**

CARE OF OTHER ANIMALS

DESCRIPTION:

Provide care and maintenance for other animals, including but not limited to rabbits, guinea pigs, hamsters, pot-bellied pigs, birds, lizards, snakes, turtles and/or tortoises that die during the increased holding period or were ultimately euthanized.

FORMULA:

Total shelter cost for all animals:	\$11,043,321
-	
Yearly Census (Total animal days):	859,756
Number that died during increased holding period or were euthanized:	219
Number of reimbursable days:	4

CALCULATION:

Annual shelter cost / yearly census = daily cost per animal

Daily cost per animal x number of other animals that die or are euthanized x number of reimbursable days = reimbursable expense

OR

$$\$11,043,321 / 859,756 = \$12.84$$

$$\$12.84 \times 219 \times 4 = \$11,248$$

EXPENSE TOTAL: \$11,248

**CITY OF LOS ANGELES
Department of Animal Services
Cost Claims for FY 2008-09**

HOLDING PERIOD

DESCRIPTION:

The Shelters are open for five (5) hours on Sunday to make animals available for owner redemption as mandated.

FORMULA:

Animal Care Technician: Annual Salary / 1,800 x number of hours = Expense for keeping shelters open on Sunday, Total hours worked = 16,228 / 8 hour day x 5 hours shelters are open.

Clerk Typist: Annual Salary / 1,800 x number of hours = Expense for keeping shelters open on Sunday, Total hours worked = 667 / 8 hour day x 5 hours shelters are open.

Relief Animal Regulation Worker: Hourly rate x number of hours = Expense for keeping shelters open on Sunday, Total hours worked = 2,886 / 8 hour day x 5 hours shelters are open.

CALCULATION:

Animal Care Technician: $\$41,921 / 1,800 = \23.29 . Total hours worked = 16,228 / 8 x 5 x $\$23.29 = \$236,219$.

Clerk Typist: $\$41,685 / 1,800 = \23.16 . Total hours worked = 667 / 8 hour day x 5 x $\$23.16 = \$9,655$

Relief Animal Regulation Worker Relief (As needed) hourly rate = $\$17.03$. Total hours worked = 2,886 / 8 hour day x 5 x $\$17.03 = \$30,718$.

OR

Animal Care Technician	\$236,219
Clerk Typist	9,655
Relief Animal Regulation Worker (As Needed)	<u>30,718</u>
EXPENSE TOTAL	\$276,592

**CITY OF LOS ANGELES
Department of Animal Services
Cost Claims for FY 2008-09**

LOST AND FOUND LIST

DESCRIPTION:

Provide lost and found lists for owners and rescuers of lost animals. The list includes type of animal, referrals, shelter contact information or advice on how to publish and disseminate lost animal information.

FORMULA:

Six Shelters:

- North Central Shelter
- South Los Angeles Shelter
- East Valley Shelter
- West Valley Shelter
- West Los Angeles Shelter
- Harbor Shelter

CALCULATION:

Personnel:

Six Clerk Typists

Time Spent to Prepare List:

Eleven minutes per day to prepare Summary Sheet for each shelter for 365 days per year.

Salary:

Clerk Typist Salary for Fiscal Year 2008-09 = \$41,685

Clerk Typist Average Hourly Salary ($\$41,685 / 1,800$) = \$23.16

COMPUTATION:

Number of shelters x clerk typist x number of days x preparation time / 1hour (60 minutes) x hourly salary = Expense

Or

Six (6) shelters (x) 1 Clerk Typist each (x) 365 days (x) 11 minutes = 24,090 minutes per year to prepare list / 60 minutes = 402 hours per year (x) \$23.16 average hourly salary = \$9,299 per year to prepare lost and found list.

EXPENSE TOTAL: \$9,299

CITY OF LOS ANGELES
Department of Animal Services
Cost Claims for FY 2008-09

MAINTAINING NON-MEDICAL RECORDS

DESCRIPTION:

Maintaining non-medical records on animals that are taken up, euthanized after the holding period or impound.

FORMULA:

Time required to input non-medical records = five (5) minutes per record.

Number of records: 7,465

CALCULATION:

Time required to input individual record (x) number of records / 1hour (60 minutes) = total hours required to input non-medical records.

Average salary for animal Care Technician is \$41,921 /1800 annual hours = \$23.29 Hourly Rate.

Hours to input non-medical records (x) hourly rate for Animal Care Technician = Total cost.

OR

Five (5) minutes x 7,465 / 60 minutes =622 hours

\$41,921 / 1800 work hours = \$23.29

622 x \$23.29 = \$14,486

EXPENSE TOTAL

\$14,486

**CITY OF LOS ANGELES
Department of Animal Services
Cost Claims for FY 2008-09**

VETERINARY CARE

DESCRIPTION:

Providing necessary and prompt veterinary care for stray and abandoned animals that die during the increased holding period or were ultimately euthanized.

FORMULA:

Veterinarian annual and hourly rate: $\$90,093 / 1,800 = \50.05 .
Veterinarian Technician annual and hourly rate: $\$55,652 / 1,800 = \30.92 .

Average time to provide medical treatment: 12 minutes.

Cost of providing Veterinarian medical treatment per animal: $\$50.05 / 60 \text{ minutes} \times 12 \text{ minutes} = \10.01

Cost of a Veterinary Technician assisting Veterinarians in medical treatment per animal: $\$30.92 / 60 \text{ minutes} \times 12 \text{ minutes} = \6.18

Number of animals requiring prompt medical care: 22,137

CALCULATION:

Cost of providing medical treatment x number of animals requiring prompt medical care = Total Expense.

Medical supply use was based on a comparison between FY 1997-98, the last full fiscal year before SB 1785 and FY 2008-09, the current reporting year.

- In FY 1997-98 there were 2 Veterinarians and 12 Veterinary Technician. Expenses for Account 3190 – Animal Medical Supplies were \$131,878.
- In FY 2008-09 there were 5 Veterinarians and 22 Veterinary Technicians. Expenses for Account 3190 – Animal Medical Supplies were \$268,573. Expenses for Fund 859-Animal Welfare Trust Fund, used to purchase medical supplies was \$112,699 for a total of \$381,272.

Therefore $\$381,272 - \$131,878 = \$249,394$ in expenditure of Animal Medical Supplies to support additional Veterinary Care under SB 1785.

OR

Veterinarian:	$\$10.01 \times 22,137 = \$221,591$
Veterinary Technicians:	$\$ 6.18 \times 22,137 = \$136,807$
Animal Medical Supplies	$= \$249,394$
Expense Total	\$607,792

COST ALLOCATION PLAN 31 (CAP 31) - INDIRECT COST RATES WITH CARRY FORWARD

The rates below are to be used to prepare grant applications, contracts and billings for grant activities, and to compute Fees for Special Services, during 2008-09. They are to be applied only to straight time, gross salaries (with CTO). When only net salaries (without CTO) are available, convert net salaries to gross salaries using the CTO rate. For rates applicable to part time or overtime salaries, please contact CAP staff. Note: You **MUST** adjust rates to deduct directly billed costs. See list-Attachment C and Instructions-Attachment B.

(Chapter 752, Statutes of 1998; and Chapter 313, Statutes of 2004)**

SUMMARY

The following is the State Controller's Office's (SCO) response to the Incorrect Reduction Claim (IRC) that the City of Los Angeles submitted on April 7, 2014. The SCO audited the city's claims for costs of the legislatively mandated Animal Adoption Program for the period of July 1, 1998, through June 30, 2008, excluding July 1, 2003, through June 30, 2005. The SCO issued its final report on April 6, 2011 (**Tab 3**).

The city submitted reimbursement claims totaling \$13,368,151—\$759,353 for fiscal year (FY) 1998-99 (**Exhibit W**), \$2,081,935 for FY 1999-2000 (**Exhibit X**), \$2,172,046 for FY 2000-01 (**Exhibit Y**), \$2,670,168 for FY 2001-02 (**Exhibit Z**), \$978,114 for FY 2002-03 (**Exhibit AA**), \$1,463,827 for FY 2005-06 (**Exhibit AB**), \$1,826,701 for FY 2006-07 (**Exhibit AC**), and \$1,416,007 for FY 2007-08 (**Exhibit AD**). Subsequently, the SCO audited these claims and determined that \$7,942,338 is allowable and \$5,425,813 is unallowable because the city claimed ineligible costs, claimed estimated costs, claimed unsupported costs, understated the number of non-medical records, understated the annual animal census data, overstated the number of eligible animals, understated productive hourly rates, and misstated indirect cost rates.

The following table summarizes the audit results:

<u>Cost Elements</u>	<u>Actual Costs Claimed</u>	<u>Allowable Per Audit</u>	<u>Audit Adjustments</u>
<u>July 1, 1998, through June 30, 1999</u>			
Direct costs:			
Training	\$ 9,468	\$ 563	\$ (8,905)
Computer Software	1,855	1,062	(793)
Care and maintenance of dogs and cats	186,383	-	(186,383)
Care and maintenance of other animals	5,510	3,156	(2,354)
Increased holding period	337,191	90,266	(246,925)
Lost and found lists	12,655	3,852	(8,803)
Non-medical records	47,236	56,834	9,598

I. ANIMAL ADOPTION PROGRAM CRITERIA

Adopted Parameters and Guidelines—February 28, 2002

Food and Agriculture Code sections 31108, 31752, 31753, 32001, and 32003 (added and amended by Chapter 752, Statutes of 1998) attempted to end the euthanasia of adoptable and treatable animals. It expressly identifies the state policy that no adoptable animal should be euthanized if it can be adopted into a suitable home, and that no treatable animal should be euthanized. The legislation also increases the holding period for stray and abandoned dogs, cats, and other specified animals. It also requires public or private shelters to:

- Verify the temperament of feral cats;
- Post lost-and-found lists;
- Maintain records for impounded animals; and
- Ensure that impounded animals receive necessary and prompt veterinary care.

The Commission on State Mandates (Commission) determined that Chapter 752, Statutes of 1998, imposed a state mandate reimbursable under Government Code section 17561.

The program's parameters and guidelines establish the state mandate and define reimbursement criteria. The Commission adopted the parameters and guidelines on February 28, 2002 (**Tab 5**) and corrected them on March 20, 2002 (**Tab 6**). In compliance with Government Code section 17558, the SCO issues claiming instructions to assist local agencies and school districts in claiming mandated-program reimbursable costs. The parameters and guidelines are applicable to the city's FY 1998-99, FY 1999-2000, FY 2000-01, FY 2001-02 and FY 2002-03 claims.

For FY 2003-04, the Legislature suspended the Animal Adoption Program.

Amended Parameters and Guidelines –January 26, 2006

On January 26, 2006, the Commission adopted amended parameters and guidelines for the Animal Adoption program (**Tab 7**). In compliance with Government Code section 17558, the SCO issues claiming instructions to assist local agencies and school districts in claiming mandated-program reimbursable costs. The amended parameters and guidelines are applicable to the city's FY 2005-06, FY 2006-07, and FY 2007-08 claims.

The amended parameters and guidelines clarify the source documentation requirements by defining the terms "actual costs" and "source documents." In addition, these parameters and guidelines state that corroborating documents cannot be substituted for source documents.

The amended parameters and guidelines also provide a specific formula for claimants to use when calculating costs under the Acquiring Space and Facilities, and the Remodeling/Renovating cost components. The eligible costs for both components take into account the increased holding period as a result of the mandate relative to the animal census (the total days an animal is impounded).

SCO Claiming Instructions

The SCO annually issues mandated cost claiming instructions, which contain filing instructions for mandated cost programs. The May 7, 2002 claiming instructions (**Exhibit C**) are believed to be, for the purposes and scope of the audit period, substantially similar to the version extant at the time the city filed its FY 1998-99, FY 1999-2000, FY 2000-01, FY 2001-02, and FY 2002-03 mandated cost claims. The SCO issued amended claiming instructions on April 3, 2006 (**Exhibit L**). These claiming

instructions are believed to be, for the purposes and scope of the audit period, substantially similar to the version extant at the time the city filed its FY 2005-06, FY 2006-07, and FY 2007-08, mandated cost claims.

II. MISAPPLICATION OF PURIFOY V. HOWELL

(Finding 3: Overstated Care and Maintenance Costs)

Issue

The SCO determined that the city overstated care and maintenance costs by \$967,883 for the audit period (Tab 10). The SCO concluded that the city claimed unallowable costs because the city incorrectly reported annual expenditures attributed to the care and maintenance function, incorrectly calculated the yearly census of dogs and cats and other animals, and subsequently overstated the claimed costs per animal per day in each fiscal period. In addition, the SCO found that the city incorrectly calculated the number of eligible stray dogs and cats and other animals that died during the increased holding period or were ultimately euthanized. The SCO also found that the city used an incorrect number of reimbursable days for this component.

In an IRC filed on April 7, 2015, the city disagreed with the SCO's application of the First District Court of Appeal decision in the matter of *Purifoy v. Howell, supra*, for the entire audit period. The court determined that Saturday was not a business day for purposes of determining the required holding period for a dog. For the purposes of determining allowable costs in our audit report, we did not consider Saturday to be a business day consistent with the Appellate Court decision cited above. However, the city believes that Saturday should be considered a business day when calculating reimbursable costs.

The following table summarizes the claimed, allowable, and audit adjustment amounts related to audit Finding 3:

Cost Elements	Actual Costs Claimed	Allowable Per Audit	Audit Adjustments	
Care and maintenance of dogs and cats	\$ 2,837,320	\$ 2,059,106	\$ (778,214)	Finding 3
Care and maintenance of other animals	272,841	83,172	(189,669)	Finding 3
	\$ 3,110,161	\$ 2,142,278	\$ (967,883)	

SCO Analysis:

The city believes that application of the Appellate Court decision in the case of *Purifoy et al v. Howell*, should not apply to the audit period. In that case, Saturday was determined **not** to be a business day for the purposes of determining the required holding period for dogs. For the purposes of our audit, this affected the allowable cost calculations for unallowable care and maintenance costs (Finding 3).

The SCO contends that the court decision clarifies the legal definition of a business day for the required holding period as of the date that the applicable statute was enacted in 1998.

City's Response

I. Misapplication Of Purifoy v. Howell

Finding 3: Overstated Care and Maintenance Costs

During the pendency of the SCO audit of the City, a decision came down from the First District Court of Appeal in the matter of *Purifoy v. Howell, supra*. At issue before the court was the definition of a business day for purposes of the animal holding period under the Hayden Bill. This holding period forms the basis for reimbursable activities under the Animal Adoption mandate. This Commission was silent as to the definition of business day. The court held that although the Hayden Bill requires animal shelters to hold animals longer or be open for business on a weekday evening or Saturday, Saturday is not a business day for the purposes of calculating how long to hold an animal before it can be released for adoption or disposal. While the decision, published on March 26, 2010, is likely applicable to all future claims, the SCO in seeking to apply the court's holding to current audits overlooks whether such application is proper. The City argues that it is not.

First, the SCO is jumping the gun. *Purifoy* is not a decision of the Commission nor is it a decision to which the Commission was a party. There has been no change to the Commission's Statement of Decision or Ps & Gs in the Animal Adoption mandate nor has there been any proposed amendment to the Ps & Gs or request for a new test claim decision, under the new test claim process. Thus, the effect of this decision on the Ps & Gs has not been addressed by this Commission and until that is the case, the 2002 and 2006 Ps & Gs remain in full force and effect. Moreover, were such a request brought before this Commission and the decision found applicable, the effective date of any change to the Ps & Gs or Statement of Decision would be the filing date of the request which would, in any case, not be retroactive back to 1998 as the SCO is now attempting.

Second, neither this Commission nor the courts would support retroactivity of *Purifoy*. In 1989, the California Supreme Court set forth the rule for retroactive application of judicial decisions in *Newman v. Emerson Radio Corp.* (1989) 48 Cal.3d 973, 978, which states: "The general rule that judicial decisions are given retroactive effect is basic in our legal tradition." The Court explains that the historic rationale for retroactivity lies in "the idea adhered to by Blackstone that "judges do not 'create,' but instead 'find' the law. A decision interpreting the law, therefore, does no more than declare what the law had always been."

This rule, however, has exceptions which favor prospective application and which reflect considerations of "fairness", "public policy" (*Newman v. Emerson Radio Corp.* (1989) 48 Cal.3d 973, 983-984 [258 Cal.Rptr. 592].), and "hardship" (*Moradi-Shalal v. Fireman's Fund Ins. Companies* (1988) 46 Cal.3d 287, 305 [250 Cal.Rptr. 116].) to the parties. As the Court defined a few years later:

Several factors are relevant in determining whether an exception to the general rule of retroactivity is warranted, including: "the reasonableness of the parties' reliance on the former rule, the nature of the change as substantive or procedural, retroactivity's effect on the administration of justice, and the purposes to be served by the new rule. [Citations.]" (*Camper v. Workers' Comp. Appeals Bd.* (1992) 3 Cal.4th 679, 688 [12 Cal.Rptr. 101].)¹

The SCO appears to have relied upon the general rule that *Purifoy* should be applied retroactively to the audit. The City argues it falls within the stated exceptions.

The parties' reliance on the old rule was reasonable: The purpose of the Hayden Bill was, in part, to ensure that shelters were open for business outside of normal working hours to allow owners to retrieve their pets. To that end, the Bill required shelters to remain open either later on a weekday or on Saturday. Thus as the shelter was open to transact business, it was reasonable to assume Saturday was a business day. Local governments filed claims for reimbursement based upon this reliance. This Commission saw no issue with the term "business day", the trial court found Saturday was a business day and SCO had presumed as much when beginning its audits. Moreover, trying to recreate what would have happened years ago if the current law had been in existence during the time the claim was filed will cause undue hardship on claimants who relied upon the old rule for calculating the date upon which an animal could be euthanized. Reliance on the old rule and the unforeseeability of change support prospective application.

The change is procedural: This new rule changes the manner in which shelters will do business by altering holding periods. Generally, substantive changes are applied retroactively while procedural changes are applied prospectively. This is due in part because procedural changes can determine the rights of the parties, especially in setting a statute of limitations. (*Camper v. Workers' Comp. Appeals Bd.*, *supra*, at p. 689.)² Although the change is substantive on its face, in this case, the retroactive application of the law will affect the rights of claimants as reimbursement can only be had for those animals euthanized after the holding period. Extending the holding period years later means that reimbursement will be unavailable to claimants complying with the law as it was understood at the time. Ensuring recovery to claimants in procedural compliance with a mandate program supports prospective application.

Retroactive application will produce unjust results: Judicial decisions are routinely applied retroactively so as to resolve pending cases where the parties are similarly situated and all unfiled cases. In this instance, however, the decision is being applied retroactively to audits of claims which may date back over a decade. The new rule will not be dispositive as to all claimants and will ensure unequal application of the rule to only those who are being audited. The administration of justice in a consistent manner supports prospective application.

The new rule will extend holding periods: The purpose of the new rule set forth in *Purifoy* is to clarify statutory provisions to ensure that the spirit of the Hayden Bill, adequate time for owner retrieval of pets, is promoted. This objective is not compromised by prospective application of the new rule. (*Woods v. Young* (1991) 53 Cal.3d 315, 331 [279 Cal.Rptr. 613].) The retroactive application will not increase the holding period for animals long ago retrieved.

Although the general rule is a judicial decision is given retroactive effect, the weighing of relevant factors balances in favor of an exception to the general rule and supports a prospective application of the *Purifoy* decision.

Were the above-stated analysis not enough to support the City's position, the Legislature has recently concurred through the enactment of AB 222³ which, *inter alia*, provided the following addition to Food and Agriculture Code section 31108:

- (d) As used in this division, a "business day" includes any day that a public or private shelter is open to the public for at least four hours, excluding state holidays.

The analysis of the Senate Agriculture Committee⁴ explained the reason for the statutory change as follows:

According to the author's office, AB 222 clarifies the definition of "business day" when determining how long a shelter holds a dog or cat. A recent court decision on *Veena Purifoy, et. al., v. Glenn Howell, et. al.*, by the First Appellate District, Court of Appeals stated that Saturday is not a "business day" when determining the holding periods. Defining a business day as any day the shelter is open for at least four hours provides clarity to shelters and the public on shelter holding periods of dogs and cats.

The City submits that the above-stated argument provides sufficient reason for the Commission to reverse the SCO as to the retroactive application of the *Purifoy* case to the instant audit and reimburse any and all attendant costs.

SCO's Comment

The city addresses the same general argument already discussed in the audit report. The city has not provided any additional support showing why Saturday should be considered a business day since the final audit report was issued.

The city disagrees with our application of the Appellate Court decision in the case of *Purifoy et al. v. Howell*. In that case, Saturday was determined *not* to be a business day for the purposes of determining the required holding period for a dog. The city also contends that enactment of Assembly Bill (AB) 222 (Saturday business day issue) and AB 12 support its position. The SCO addressed this issue in the final audit report under the "Other Issues – Audit Findings and the Audit Process" (Tab 3). The SCO's position is that the court decision clarifies the legal definition of a business day for the required holding period and that no changes to the audit findings are necessary.

Appellate Court Decision in *Purifoy et al v. Howell*

The city's IRC reiterated the following reasons as to why the SCO should not apply the court's decision retroactively:

- The Commission was not a party to the decision and there has been no change to the Commission's statement of decision or parameters and guidelines.
- While retroactive application of judicial decisions is the general rule, prospective application is warranted in this instance because the nature of the decision qualifies as an exception to the general rule.
- Claimants' assumption that Saturday was to be treated as a business day was reasonable in light of the requirements of the Hayden Bill.
- The court decision provides for a procedural change in law rather than a substantive change and procedural changes are applied prospectively.
- Retroactive application is unjust because it will be applied only to claims audited by the SCO.
- Retroactive application will not increase the holding period for animals long ago retrieved.

A considerable amount of public records are related to this mandated program, including, but not limited to, the initial test claim, statement of decision (Tab 4), the adopted parameters and guidelines (Tabs 5, 6, and 7), Commission draft and final staff analyses, and comments made by various local agencies and other interested parties. These documents did not define what specific days of the week were considered to be business days. Therefore, we followed the decision of the Appellate Court, which opined that Saturday is not to be treated as a business day for the purposes of determining the required holding period (Tab 8).

The city is correct in stating that the Commission was not a party to the *Purifoy et al. v. Howell* court case and there has been no change to the Commission's adopted statement of decision or the parameters and guidelines. However, a proposed amendment to the statement of decision or the parameters and guidelines would not be warranted in this instance. The court decision did not make changes to the test claim statutes on which the mandated program is based. The court case clarified what the statutes mean. Therefore, the clarification would apply to all of the city's Animal Adoption claims within the audit period.

We acknowledge that many animal shelters were operating under the assumption that they could count Saturday as a business day to calculate the holding period of an animal. However, the court's decision declared that this assumption was incorrect. We looked specifically at the language the court used in its opinion, which stated in part:

In short, if the Legislature, having provided an incentive for shelters to remain open on weekend days, had also intended to permit shelters to count Saturdays as "business days" (thus further shortening the total number of calendar days in the holding period), we would expect a clearer expression of such an intention in the statute. More broadly, a construction of "business days" that includes Saturdays would both (1) shorten the holding period, and (2) reduce the opportunities for redemption and adoption. It thus would fail to achieve the dual purposes reflected in the legislative findings.

Accordingly, in the absence of a clear expression of legislative intent to treat Saturdays as "business days," and in light of our obligation to choose a construction that most closely comports with the Legislature's intent and promotes, rather than defeats, the statute's general purposes (see *Smith, supra*, 39 Cal.4th at p. 83; *California Highway Patrol, supra*, 135 Cal.App.4th at pp. 496-497), we conclude that "business days" in section 31108(a) means Monday through Friday, the meaning most commonly used in ordinary discourse. (Tab 8, page 16)

The court decision did not change the audit criteria used to audit the claims; the decision clarified the legal definition of a business day for the required holding period as of the date that the applicable statute was enacted in 1998. The city did not support its opinion with any language from the administrative record related to the Animal Adoption Program that supports a definition for a "business day" other than the ordinary meaning, which excludes Saturdays, Sundays, and legal holidays.

The definition of a "business day" for the purpose of the Animal Adoption Program is clarified in Assembly Bill (AB) 222.

The usual and ordinary meaning of the term "business days" remains Monday through Friday, and excluding Saturdays, Sundays, and legal holidays. However, for the purpose of determining the holding period for the Animal Adoption Program, AB 222 (Chapter 97, Statutes of 2011) was enacted on July 25, 2011. This bill was a non-urgency bill and took effect January 1, 2012 (Tab 9). This bill states that a "business day" includes any day that a public or private animal shelter is open to the public for at least four hours, excluding state holidays.

The Legislature acknowledged the Appellate Court's interpretation of Food and Agriculture Code section 31108, subdivision (a), and made the necessary changes in AB 222 to redefine prospectively a "business day."

Calculations of allowable care and maintenance costs

The city argues that all care and maintenance costs should be reinstated. However, the city fails to address all of the elements that determine allowable costs for the Care and Maintenance cost component, aside from the definition of a business day. The city's actual expenditures and animal census data are the main components necessary to determine the allowable costs.

The city provided expenditure information for the Care and Maintenance cost component, including Animal Care Technicians and Supervisor labor and overhead costs and materials and supplies costs. These annual expenditures, along with the total annual animal census data, determine the average care and maintenance cost per animal per day. Allowable care and maintenance costs are then determined by multiplying the average care and maintenance cost per animal per day times eligible population of animals per the requirements of the parameters and guidelines times increased number of days for the required holding period per the requirements of the parameters and guidelines. The SCO used the city-provided expenditure and animal census information to calculate allowable costs for this costs component using the formula outlined in the parameters and guidelines (Tab 10). It would be

unreasonable to reinstate care and maintenance costs, as requested by the city, because allowable costs calculated during the audit represent actual allowable costs for this component calculated using the city's data and using the calculation methodology outlined per the requirements of this program.

III. MISINTERPRETATION OF THE PARAMATERS AND GUIDELINES

(Finding 4: Overstated Holding Period Costs)

Issue

The SCO determined that the city overstated increased holding period costs by \$2,045,732 for the audit period (Tab 11). The SCO concluded that the city claimed unallowable costs because the city included costs for employee classifications that were not reimbursable under this cost component, misstated the number of allowable hours per each position, and understated productive hourly rates.

In an IRC filed on April 7, 2015, the city stated that it believes that additional costs should be reimbursable under the mandated program.

SCO Analysis:

The parameters and guidelines allow reimbursement under this category for the costs associated with holding shelters open to the public on one weekend day, one weekday evening, or under certain circumstances, for costs incurred in establishing an after-hours redemption process. We believe that labor costs related to staff that did not perform the activity of making animals available for owner redemption should not be included as allowable costs under this cost component.

Costs for staff on duty during Saturdays are already reimbursable within other cost components of the mandated program. Shelter employees' time devoted to feeding animals, cleaning cages, duties related to the care of animals, performing lost-and-found list activities, processing non-medical records, performing initial physical examinations, and administering wellness vaccines are already allowable costs reimbursable in their respective components. Reimbursing the city for these same staff costs under the Holding Period cost component would constitute reimbursing the city twice for the same costs.

We believe that other animal services, such as animal control officer duties, euthanasia, spay and neutering procedures, implanting microchips, licensing, processing animal adoptions, and certain other animal services, are not reimbursable activities.

City's Response

II. Misinterpretation of the Parameters and Guidelines

Finding 4: Overstated Holding Period Costs

SCO Finding: The city claimed \$3,886,965 for increased holding period costs for the audit period. We determined that \$1,841,233 is allowable and \$2,045,732 is unallowable. The unallowable costs occurred because the city overstated allowable hours and the number of allowable positions (\$2,172,695) and understated productive hourly rates (\$126,963).

The City objects to the SCO's determination that when the shelter is open to the public on Saturdays, only a portion of its staff time and costs are reimbursable. The City contends that the Animal Adoption mandate requires the local agency to be open on Saturdays for normal business operations that are reasonably required by the Hayden Bill which is not limited to the redemption of animals.

In arguing that the City should not be reimbursed for all the staff present on Saturday, the SCO places too much emphasis on the choice of wording in the Ps & Gs concluding that the costs for only those staff members involved with making animals available for redemption should be reimbursable. The SCO mistakes the term "making the animal available for owner redemption" as a limitation on reimbursement rather than as a mere explanation for why the shelter is open for extended hours. Moreover, Food and Agriculture Code sections 31108, 31752 and 31753 set forth the requirement that the shelter be open on a weekday evening or a Saturday without any direction as to how that is to be accomplished. Finally, this Commission in its Statement of Decision left the implementation of this up the shelters. The City should be allowed to staff its shelter as it sees fit to accomplish the goals set forth in statute. If the state wishes to set limits, it should do so not through the SCO but through the Legislature.

SCO's Comments

The city is disputing the SCO's determination that only a portion of the city's staff time and costs are reimbursable under the Holding Period cost component. The city has not provided any additional information to consider since our final audit report was issued. The SCO responded to this same issue in our final audit report (Tab 3).

Section IV.B.5 of the parameters and guidelines allows reimbursement under this category for the costs associated with keeping shelters open to the public on one weekend day, one weekday evening or, under certain circumstances, for costs incurred in operating an after-hours animal redemption process. We believe that labor costs related to staff that did not perform the activity of making animals available for owner redemption should not be included as allowable costs under this cost component.

The SCO is relying on language in the parameters and guidelines stating that the reason the shelter should be open extra hours is to make animals available for owner redemption on one weekday evening until 7:00 p.m. or on one weekend day. Therefore, this is the criterion we used to determine the actual costs associated with this cost component, which is to make animals available for owner redemption. Our audit report notes the additional employee classifications that performed this activity during the audit period. All salary, benefit, and related indirect costs incurred for the employees that performed this activity at the city's animal shelters on Saturdays were allowable costs in the final audit report (Tab 3).

Our audit report addressed the fact that other shelter staff on duty during Saturdays are already reimbursable within other cost components of the mandated program. For example, the Animal Care Technicians not involved with duties under the Holding Period cost component perform activities allowable under the Care and Maintenance cost component. In addition, costs incurred for these and other employee classifications on duty during Saturdays are also reimbursable for performing lost-and-found list activities, processing non-medical records, performing initial physical examinations, and administering wellness vaccines. To conclude that costs for these employees are reimbursable under these other cost components and again under the Holding Period cost component would result in the city being reimbursed twice for the same mandated costs.

In addition, some staff on duty on Saturdays performed activities not reimbursable under the mandated program. Just because the mandated program requires agencies to be open extra hours one weekday evening or on one weekend day to make animals available for owner redemption does not make activities such as euthanasia, spay and neutering procedures, implanting microchips, licensing, processing animal adoptions, and other unallowable activities, reimbursable for that time period. These activities are not reimbursable under any cost component of the mandated program at any time. Our finding identifies allowable costs under the mandated program per the requirements of the adopted parameters and guidelines.

IV. MISINTERPRETATION OF THE PARAMATERS AND GUIDELINES

(Finding 7: Overstated Necessary and Prompt Veterinary Care Costs)

Issue

The SCO determined that the city overstated necessary and prompt veterinary care costs by \$1,827,843 for the audit period (**Tab 12**). The SCO concluded that the city claimed unallowable costs because the city claimed estimated materials and supplies costs (\$488,137), claimed unsupported materials and supplies costs (\$608,849), claimed misstated and unallowable hours (\$732,515), and understated productive hourly rates (\$1,658).

In an IRC filed on April 7, 2015, the city stated that it believes that costs the SCO determined to be unsupported were appropriate and should be allowable under this component.

SCO Analysis:

The parameters and guidelines allow reimbursement under this category for the costs associated with providing specific activities attributed to necessary and prompt veterinary care for stray and abandoned animals that die during the holding period or are ultimately euthanized during the holding period specified in Statutes of 1998, Chapter 752. The parameters and guidelines specify four reimbursable activities, population exclusions, and veterinary procedure exclusions.

The city claimed costs that were co-mingled with non-reimbursable costs in the documentation provided. The city did not provide any analysis or additional documentation to determine whether unsupported costs in question were incurred for any reimbursable activities and whether the costs took place during the holding period for the animals that died during the holding period and animals that were euthanized after the required holding period as specified in the parameters and guidelines.

We believe that the city's materials and supplies costs claimed are not allowable because the city did not determine what portion of the costs actually related to the eligible animals and allowable treatments that took place during the required holding period.

City's Response

II. Misinterpretation of the Parameters and Guidelines

Finding 7: Overstated Necessary and Prompt Veterinary Care Costs

SCO Finding: The city claimed \$2,193,011 under the cost component of Necessary and Prompt Veterinary Care during the audit period. We determined that \$365,168 is allowable and \$1,827,843 is unallowable. The costs were unallowable because the city claimed estimated materials and supplies costs (\$488,137), claimed unsupported materials and supplies costs (\$608,849), claimed misstated and unallowable hours (\$732,515), and understated productive hourly rates (\$1,658).

The City challenges the SCO's disallowance of some of the costs associated with Necessary and Prompt Veterinary Care in Finding 7. The provisions at issue are contained in original March 20, 2002, Ps & Gs which govern the reimbursement of costs for the period from January 1, 1998, to June 30, 2005. The amended Ps & Gs are not at issue here.

The City objects to the SCO's determination that it did not submit the proper documentation to support the Necessary and Prompt Veterinary Care materials and supply cost. During the audit, the SCO requested additional documentation for medical costs incurred and the City submitted expenses within expenditure account 3190 medical supplies (\$2,086,819).

SCO's Comments

The city is disputing the SCO's determination that it did not submit the proper documentation to support the necessary and prompt veterinary care materials and supplies costs. The city has not provided any additional information to consider since our final audit report was issued. The SCO responded to this same issue in our final audit report (**Tab 3**).

Section IV.B.9 of the parameters and guidelines allows reimbursement under this category for the costs associated with providing specific activities attributed to necessary and prompt veterinary care for stray and abandoned animals that die during the holding period or are ultimately euthanized during the holding period specified in Statutes of 1998, Chapter 752. The parameters and guidelines specify four reimbursable activities, population exclusions, and veterinary procedure exclusions.

Initially, the city did not provide any supporting documentation for the costs in question. Following the issuance of the SCO's draft audit report, the city submitted a summary of expenses by fiscal year and vendor for Account 3190 – Medical Supplies (**Tab 13**). However, the expense summary listed all medical supplies expenses in each fiscal year, without identification of the type of expense, what activity the costs were incurred for, and for which animals the costs were expended. Medical supplies purchased for the city's shelters are used for multitude of veterinary procedures and various populations of animals that include both reimbursable and non-reimbursable components. As we noted in our final audit report, in order for veterinary materials and supplies to be reimbursable, the city needed to show what specific materials and supplies were expended for the eligible population of animals. Further, the city needed to show that these medical expenditures took place as a result of treatments occurring during the holding period days for those eligible animals. The expenditure summaries provided showed none of those details necessary to comply with the reimbursable criteria for this cost component. Thus, the listing of all medical supplies expenses did not support whether any of those expenses were incurred as a result of complying with this mandated program.

The SCO responded to this same issue in our final audit report (**Tab 3**). The city has not provided any additional documentation since the issuance of our final audit report to support costs in question.

V. MISINTERPRETATION OF THE USE OF PROPOSITION F FUNDS

(Issue 1: Proposition F and the Construction of New Facilities)

Issue

In an IRC filed on April 7, 2015, the city stated that it believes that the SCO should have considered construction of new facilities costs as a reimbursable activity. These construction costs were funded via Proposition F bonds approved by the city's voters in November 2000 general election. The city's taxpayers have been assessed property taxes in amounts specifically for the purpose of retiring the Proposition F bonds.

The city's argument did not note that the city did not include these construction costs in any of its claims within the audit period. In addition, the city did not note that the final audit report does not include any cost reductions associated with this issue.

SCO Analysis:

The city did not claim any costs during the audit period under the Acquisition of Additional Space and/or Construction of New Facilities cost components. The city also did not amend its claims during the allowable time allotment to include these costs. During the audit, the SCO reviewed documentation associated with the construction costs of the city's shelter at the city's request. The city proposed to add the construction costs to the audit period after the deadline to amend the claims had expired. The city did not provide any analysis or calculations to show what portion of the construction costs would have been attributed to the reimbursable component.

We reviewed the Proposition F and construction of the city's shelter background information at the city's request and concluded that the costs in question were not reimbursable because the construction costs incurred were funded entirely by the city's taxpayers via property tax assessment.

City's Response

III. Misinterpretation of the Use of Proposition F Funds

Issue 1: Proposition F and the Construction of New Facilities

SCO Issue: The city provided background information of this project for our review. After reviewing the information provided, we determined that the terms of Proposition F required that the city's taxpayers would fund the construction projects through additional levies made to their property taxes. The city's taxpayers have been and are still currently assessed property taxes in amounts specifically for the purpose of retiring the Proposition F bonds. Therefore, the city's taxpayers are funding both the entire bond principal and interest amounts. Accordingly, we determined that this non-discretionary revenue source was used to build the city's animal shelters and none of the city's discretionary general fund moneys were involved.

While the city performed the required analysis to determine that additional shelter space was needed to provide additional capacity in order to comply with the provisions of the Hayden Bill, restricted resources funded the construction costs for the additional capacity, not the city's general fund. Therefore, the city did not incur any increased costs to construct/remodel its animal shelters under Government Code section 17514.

The SCO's reliance on Government Code section 17514 is misplaced. The section states:

"Costs mandated by the state" means any increased costs which a local agency or school district is required to incur after July 1, 1980, as a result of any statute enacted on or after January 1, 1975, or any executive order implementing any statute enacted on or after January 1, 1975, which mandates a new program or higher level of service of an existing program within the meaning of Section 6 of Article XIII B of the California Constitution.

There is nothing in the statute that would raise any issue as to whether the costs mandated by the state were paid out of the general fund or any other funds.

The SCO is likely relying on the language of *Redevelopment Agency of the City of San Marcos v. Commission on State Mandates* (1997) 55 Cal.App.4th 976 in which the court, after much analysis, held:

[W]e conclude the same policies which support exempting tax increment revenues from article XIII B appropriations limits also support denying reimbursement under section 6 for this particular allocation of those revenues to the Housing Fund. Tax increment financing is not within the scope of article XIII B. (*Brown v. Community Redevelopment*

Agency, supra, 168 Cal.App.3d at pp. 1016-1020.) Section 6 “requires subvention only when the costs in question can be recovered solely from tax revenues.” (County of Fresno v. State of California, supra, 53 Cal.3d at p.487, original italics.) No state duty of subvention is triggered where the local agency is not required to expend its proceeds of taxes.

(Id. At p. 987.) And while this case, at first blush, appears to support the contentions of the SCO, it is limited in its application.

As issue before the court was whether the Low and Moderate Income Housing Fund program, which required a deposit of the tax increment financing for improving the supply of affordable housing, is a state mandate, that is, as the court partially framed the question (after a discussion on the tax and spend capabilities of redevelopment agencies): are the costs incurred as a result of the state mandate paid from general fund monies? The Animal Adoption program, however, has already been found to be a state mandate. So the issue before this Commission is whether all costs associated with a state mandated program must be paid solely from the general fund. The City argues the answer is, and must be, no.

The Hayden Bill, requiring an extended holding period for shelter animals, forced local government to expand its shelter capabilities. The state provide no funding for such expansion and the City, along with other agencies, was required to come up with the funding by the best means available. For funding to cover the sizable expense of construction, the City had a bonding measure placed on the ballot. The City was free to use its general fund for construction; but nothing in the Constitution, statutes or case law says that any local government must exhaust all its general fund moneys before seeking funding elsewhere. Moreover, the state legislature passed the unfunded mandate and the state should not be able to shirk its responsibility to reimburse the City simply because the City in its management of its financial obligations chose to have a bond initiative rather than empty its general fund.

SCO's Comments

The city proposes that it be reimbursed for costs that were not included in its claims. The deadline to amend the claims had expired prior to the start of our audit. The IRC process provides the city an opportunity to dispute the SCO's findings and reductions to its claims noted in the SCO's final audit report. However, none of the findings noted in the SCO's final audit report for the Animal Adoption program (**Tab 3**) include any cost reductions associated with the construction of the city's shelter. The city did not claim these costs and the SCO did not reduce the city's claims for these costs in question. Therefore, we believe that this issue is irrelevant for the purposes of this IRC.

VI. UNREASONABLE TIME LIMITATIONS

Issue

In an IRC filed on April 7, 2015, the city stated that it was denied the necessary time to comply with the requirements of the audit. The city did not identify specific findings or reductions associated with this argument, nor did the city provide any additional documentation for our review.

SCO Analysis:

The city provides the same comments as already noted in our final audit report (**Tab 3**). The city maintains that it was denied the necessary time to comply with the requirements of the audit when the SCO placed the audit on hold for staff changes. We disagree.

Even though the SCO did change audit teams during the audit process, we maintained regular communication with the city's staff, made timely documentation requests, and held multiple status meetings with the city. The SCO has worked extensively with the city representatives throughout the audit process to determine allowable costs to the maximum extent possible.

The city has not provided any additional information to consider since our final audit report was issued. The SCO responded to this same issue in our final audit report (**Tab 3**).

City's Response

IV. Unreasonable Time Limitations

The City maintains that it was denied necessary time to comply with the requirements of the audit due to the SCO's placing the audit on hold for staffing changes for nine months which left the City having to assemble documentation for a huge operation with less time than was provided by law. The audit began with an entrance conference held on April 28, 2009. The City staff worked closely with the SCO's auditing staff for a period of 7 months providing the requested documents and spending over 200 hours of City staff time. In November 2009, work on the audit was temporarily discontinued by the SCO when their Audit Manager overseeing the project transferred to another unit within the SCO. The audit was then transferred to another Audit Manager and Auditor-in-Charge.

On July 19, 2010 a second entrance conference was held and the auditing staff resumed their fieldwork. This was a delay of 9 months stemming from the SCO auditor transition. The auditor requested documentation that required a significant amount of City resources in order to locate the information requested. The City provided an additional 250 hours of staff time to address these requests. Due to the size of the City's Animal Services Department, there were millions of line items to go through in order to locate some of the requested information that dated back as far as 12 years.

Adding to the frustration, some of the invoices had been destroyed as they exceeded the time limitations for record retention under the law. 5 The current statute that dictates how long a City must keep their records for mandated claims submitted goes directly against the record retention policies of the City. The City cannot be expected to have to hold on to records from 1998 for an indeterminate amount of time and be forced to retain all detailed expenditures records. Such a record retention requirement would cause a burden that is both inefficient and unnecessary.

While the auditors did make several requests for the same information from the end of July through November, it would not have made any difference in the City's staffing resources that it could lend to review the amount of documents requested for a department the size of the City's Animal Services. The City had already spent over 450 staff hours in total towards this audit during a time when the City was undergoing significant staffing reductions and furloughs. It could not assign any additional resources without having a disruption in the services they provide. The administration of animal care and control services depends on efficiency and any inefficiency of any type leads to fewer adoptions, less revenue, less policing, and more euthanasia.

On January 12, 2011, the SCO held an exit conference with the representatives of the Animal Services Department and addressed each audit finding. During this exit conference, the SCO stated that it would be issuing the final audit report in early April. The Department acted in good faith to comply with all audit material requests. A short time after the exit meeting, the City lost Linda Barth, the Department's Assistant General Manager, who was the main contact person for the audit causing a further setback in the City's attempt to provide the remaining information requested.

The SCO issued their draft audit report on March 10, 2011. The City requested an additional 30 day extension to submit additional material and was granted only two days so that the State could file their audit report within the two year statute of limitations. The final audit report was issued on April 6, 2011.

The City maintains that had the audit not been placed on hold for 9 months, it would have had enough time to address all of the auditor's requests for additional information which would have resulted in fewer disallowances.

SCO's Comments

The city believes the audit would have resulted in fewer disallowances had the audit not been placed temporarily on hold. However, we believe the allowable costs calculations noted in our final audit report (**Tab 3**) represent allowable costs that were properly supported by the city and allowable for reimbursement per the requirements of the parameters and guidelines.

Throughout the audit process, we worked with the city's staff to not only obtain proper supporting documentation, but also to arrange for alternative methods to support claimed costs. For example, we revised Finding 3 – Unallowable Care and Maintenance costs in our final audit report (**Tab 3**) following additional supporting documentation provided by the city after the draft report was issued. In addition, we maintained regular correspondence and held status meetings with city staff to ensure timely communication of the preliminary findings and outstanding supporting documentation. The samples of our correspondence prior to the exit meeting are presented in **Tab 14**.

We provided the city multiple opportunities to support claimed costs. It is unreasonable for the city to state that it did not have enough time to provide supporting documentation, as the city is required to maintain supporting documentation for costs claimed. The city did not provide any additional supporting documentation for our review since our final audit report was issued.

The SCO responded to these same comments in our final audit report under "Other Issues – Audit Findings and the Audit process" (**Tab 3**).

VII. CONCLUSION

The SCO audited the City of Los Angeles's claims for costs of the legislatively mandated Animal Adoption Program (Chapter 752, Statutes of 1998; and Chapter 313, Statutes of 2004) for the period of July 1, 1998, through June 30, 2008, excluding July 1, 2003, through June 30, 2005. The city claimed \$13,368,151 (\$13,390,008 less a \$21,857 penalty for filing a late claim) for the mandated program. Our audit found that \$7,942,338 is allowable and \$5,425,813 is unallowable. The costs are unallowable primarily because the city claimed unallowable costs, claimed estimated costs, claimed unsupported costs, understated the number of non-medical records, understated the annual animal census data, overstated the number of eligible animals, understated productive hourly rates, and misstated indirect cost rates.

The Commission should find that: (1) the SCO correctly reduced the city's FY 1998-99 claim by \$445,154; (2) the SCO correctly reduced the city's FY 1999-2000 claim by \$956,087; (3) the SCO correctly reduced the city's FY 2000-01 claim by \$835,043; (4) the SCO correctly reduced the city's FY 2001-02 claim by \$1,629,170; (5) the SCO correctly reduced the city's FY 2002-03 claim by \$112,613; (6) the SCO correctly reduced the city's FY 2005-06 claim by \$320,351; (7) the SCO correctly reduced the city's FY 2006-07 claim by \$760,762; and (8) the SCO correctly reduced the city's FY 2007-08 claim by \$366,633.

VIII. CERTIFICATION

I hereby certify by my signature below that the statements made in this document are true and correct of my own knowledge, or, as to all other matters, I believe them to be true and correct based upon information and belief.

CITY OF LOS ANGELES

Audit Report

ANIMAL ADOPTION PROGRAM

Chapter 752, Statutes of 1998,
and Chapter 313, Statutes of 2004

*July 1, 1998, through June 30, 2008,
excluding July 1, 2003, through June 30, 2005*

JOHN CHIANG
California State Controller

April 2011

JOHN CHIANG
California State Controller

April 6, 2011

The Honorable Antonio R. Villaraigosa
Mayor of the City of Los Angeles
200 North Main Stret, Suite 303
Los Angeles, CA 90012

Dear Mayor Villaraigosa:

The State Controller's Office audited the costs claimed by the City of Los Angeles for the legislatively mandated Animal Adoption Program (Chapter 752, Statutes of 1998, and Chapter 313, Statutes of 2004) for the period of July 1, 1998, through June 30, 2008, excluding July 1, 2003, through June 30, 2005.

The city claimed \$13,368,151 (\$13,390,008 less a \$21,857 penalty for filing a late claim) for the mandated program. Our audit disclosed that \$7,942,338 is allowable and \$5,425,813 is unallowable. The costs are unallowable primarily because the city claimed ineligible costs, claimed estimated costs, claimed unsupported costs, understated the number of non-medical records, understated the annual animal census data, overstated the number of eligible animals, understated productive hourly rates, and misstated indirect cost rates. The State paid the city \$8,303,862. The amount paid exceeds allowable costs claimed by \$361,524.

If you disagree with the audit findings, you may file an Incorrect Reduction Claim (IRC) with the Commission on State Mandates (CSM). The IRC must be filed within three years following the date that we notify you of a claim reduction. You may obtain IRC information at the CSM's Web site at www.csm.ca.gov/docs/IRCForm.pdf.

If you have any questions, please contact Jim L. Spano, Chief, Mandated Cost Audits Bureau, at (916) 323-5849.

Sincerely,

Audit Report

Summary

The State Controller's Office (SCO) audited the costs claimed by the City of Los Angeles for the legislatively mandated Animal Adoption Program (Chapter 752, Statutes of 1998, and Chapter 313, Statutes of 2004) for the period of July 1, 1998, through June 30, 2008, excluding July 1, 2003, through June 30, 2005.

The city claimed \$13,368,151 (\$13,390,008 less a \$21,857 penalty for filing a late claim) for the mandated program. Our audit disclosed that \$7,942,338 is allowable and \$5,425,813 is unallowable. The costs are unallowable primarily because the city claimed ineligible costs, claimed estimated costs, claimed unsupported costs, understated the number of non-medical records, understated the annual animal census data, overstated the number of eligible animals, understated productive hourly rates, and misstated indirect cost rates. The State paid the city \$8,303,862. The amount paid exceeds allowable costs claimed by \$361,524.

Background

Food and Agriculture Code sections 31108, 31752-31753, 32001, and 32003 (added and amended by Chapter 752, Statutes of 1998) attempted to end the euthanasia of adoptable and treatable animals. It expressly identifies the state policy that "no adoptable animal should be euthanized if it can be adopted into a suitable home" and that "no treatable animal should be euthanized." The legislation increases the holding period for stray and abandoned dogs, cats, and other specified animals. It also requires public or private shelters to:

- Verify the temperament of feral cats;
- Post lost and found lists;
- Maintain records for impounded animals; and
- Ensure that impounded animals receive necessary and prompt veterinary care.

On January 25, 1981, the Commission on State Mandates (CSM) determined that Chapter 752, Statutes of 1998, imposed a state mandate reimbursable under Government Code section 17561.

The program's parameters and guidelines establish the state mandate and define reimbursement criteria. The CSM adopted the parameters and guidelines on February 28, 2002, corrected them on March 20, 2002, and last amended them on January 26, 2006. In compliance with Government Code section 17558, the SCO issues claiming instructions to assist local agencies and school districts in claiming mandated program reimbursable costs.

For fiscal year (FY) 2003-04, the Legislature suspended the Animal Adoption Program.

Objective, Scope, and Methodology

We conducted the audit to determine whether costs claimed represent increased costs resulting from the Animal Adoption Program for the period of July 1, 1998, through June 30, 2008, excluding July 1, 2003, through June 30, 2005.

Our audit scope included, but was not limited to, determining whether costs claimed were supported by appropriate source documents, were not funded by another source, and were not unreasonable and/or excessive.

We conducted this performance audit under the authority of Government Code sections 12410, 17558.5, and 17561. We did not audit the city's financial statements. We conducted the audit in accordance with generally accepted government auditing standards. Those standards require that we plan and perform the audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides a reasonable basis for our findings and conclusions based on our audit objectives.

We limited our review of the city's internal controls to gaining an understanding of the transaction flow and claim preparation process as necessary to develop appropriate auditing procedures.

Conclusion

Our audit disclosed instances of noncompliance with the requirements outlined above. These instances are described in the accompanying Summary of Program Costs (Schedule 1) and in the Findings and Recommendations section of this report.

For the audit period, the City of Los Angeles claimed \$13,368,151 (\$13,390,008 less a \$21,857 penalty for filing a late claim) for costs of the Animal Adoption Program. Our audit disclosed that \$7,942,338 is allowable and \$5,425,813 is unallowable.

For the FY 1998-99 claim, the State paid the city \$759,353. Our audit disclosed that \$314,199 is allowable. The State will offset \$445,154 from other mandated program payments due the city. Alternatively, the city may remit this amount to the State.

For the FY 1999-2000 claim, the State paid the city \$2,081,935. Our audit disclosed that \$1,125,848 is allowable. The State will offset \$956,087 from other mandated program payments due the city. Alternatively, the city may remit this amount to the State.

For the FY 2000-01 claim, the State paid the city \$2,172,046. Our audit disclosed that \$1,337,003 is allowable. The State will offset \$835,043 from other mandated program payments due the city. Alternatively, the city may remit this amount to the State.

For the FY 2001-02 claim, the State made no payment to the city. Our audit disclosed that \$1,040,998 is allowable. The State will pay allowable costs claimed that exceed the amount paid, totaling \$1,040,998, contingent upon available appropriations.

For the FY 2002-03 claim, the State made no payment to the city. Our audit disclosed that \$865,501 is allowable. The State will pay allowable costs claimed that exceed the amount paid, totaling \$865,501, contingent upon available appropriations.

For the FY 2005-06 claim, the State paid the city \$1,463,827. Our audit disclosed that \$1,143,476 is allowable. The State will offset \$320,351 from other mandated program payments due the city. Alternatively, the city may remit this amount to the State.

For the FY 2006-07 claim, the State paid the city \$1,826,701. Our audit disclosed that \$1,065,939 is allowable. The State will offset \$760,762 from other mandated program payments due the city. Alternatively, the city may remit this amount to the State.

For the FY 2007-08 claim, the State made no payment to the city. Our audit disclosed that \$1,049,374 is allowable. The State will pay allowable costs claimed that exceed the amount paid, totaling \$1,049,374, contingent upon available appropriations.

**Views of
Responsible
Officials**

We issued a draft audit report on March 10, 2011. Brenda Barnette, General Manager, responded by letter dated March 29, 2011 (Attachment), expressing general disagreement with the audit process without responding to any specific audit findings.

Restricted Use

This report is solely for the information and use of the City of Los Angeles, the California Department of Finance, and the SCO; it is not intended to be and should not be used by anyone other than these specified parties. This restriction is not intended to limit distribution of this report, which is a matter of public record.

Findings and Recommendations

FINDING 1— Overstated training costs

The city claimed \$34,145 for training costs during the audit period. We determined that \$24,705 is allowable and \$9,440 is unallowable. The costs were unallowable because the city overstated training hours for new employees (\$15,309) and understated productive hourly rates (\$5,869).

The following table summarizes the claimed, allowable, and unallowable costs for the audit period by fiscal year:

Fiscal Year	Amount Claimed	Amount Allowable	Audit Adjustment
Salaries and Benefits:			
1998-99	\$ 9,468	\$ 563	\$ (8,905)
1999-2000	5,357	3,897	(1,460)
2000-01	3,521	2,572	(949)
2001-02	3,070	2,261	(809)
2002-03	1,130	550	(580)
2005-06	2,735	4,590	1,855
2006-07	5,936	5,625	(311)
2007-08	2,928	4,647	1,719
Total	\$ 34,145	\$ 24,705	\$ (9,440)

Overstated Training Hours

The city claimed training hours for Chameleon software for all newly hired employees within the Training Costs component. During our fieldwork, the Animal Services Department provided a sample training agenda to showcase the multitude of topics covered during the training process. The department pro-rated a portion of the training time and claimed three- and two-hour increments in different fiscal periods attributed to the portion of training related to Chameleon software. The department provided a list of all new hires throughout the audit period. We calculated allowable hours based on the list of new hires provided by the department.

We concluded that the three- and two-hour training increments claimed were reasonable. However, we noted that the number of new employees reported on the claims was misstated. Subsequently, we determined that the city overstated 39 hours spent on training activities during the first four years of the audit period and understated 24 hours spent on training activities during the last four years of the audit period. As a result, allowable costs were overstated by \$15,309 during the audit period.

Misstated Productive Hourly Rates

The city incorrectly calculated employee productive hourly rates during the audit period. The rates were calculated based on budgeted information rather than the actual payroll. We recalculated all productive hourly rates for all classifications of employees based on the actual annual payroll information.

During fieldwork, we received and were able to analyze the actual payroll summaries for all classifications of employees included in the claims for the last three years of the audit period fiscal year (FY) 2005-06 through FY 2007-08). However, the actual payroll information was not available for the earlier five years of the audit period. We used a consumer price index to deflate the amounts paid for labor in prior years. Our analysis revealed that the claimed productive hourly rates were generally understated. We used the revised rates in our calculations of allowable costs for all cost components. For the Training cost component, we determined that allowable costs were understated by \$5,869.

Summary of Productive Hourly Rate Adjustments by Reimbursable Components

The productive hourly rate calculation noted previously also affected the following reimbursable components:

<u>Reimbursable Component</u>	<u>Audit Adjustment</u>
Training	\$ 5,869
Computer software	1,707
Increased holding period	126,963
Lost and found lists	3,097
Non-medical records	35,708
Veterinary care	1,658
Total	<u>\$ 175,002</u>

The program's parameters and guidelines allow reimbursement for the one-time activity of providing training to staff on reimbursable activities.

Recommendation

We recommend that the city ensure that claimed costs include only eligible costs, are based on actual costs, and are properly supported.

City's Response

The city did not provide a response to this specific finding. However, the city did comment on the audit process and the audit findings in general. See the city's response under "Other Issues."

**FINDING 2—
Overstated computer
software costs**

The city claimed \$525,513 for computer software costs during the audit period. We determined that \$270,771 is allowable and \$254,742 is unallowable (\$56,259 for salaries and benefits and \$198,483 for materials and supplies). The material and supply costs were unallowable because the city did not pro-rate computer equipment and software costs attributed to the mandated activities (\$164,849), claimed unsupported costs (\$41,889), claimed unallowable invoices (\$37,991), and did not claim allowable costs of \$46,246. The salary and benefit costs were unallowable because the city did not pro-rate the Chameleon maintenance hours attributed to the mandated activities (\$57,966) and understated productive hourly rates (\$1,707).

The following table summarizes the claimed, allowable, and unallowable costs for the audit period by fiscal year:

Fiscal Year	Amount Claimed	Amount Allowable	Audit Adjustment
Salaries and benefits:			
1998-99	\$ 1,855	\$ 1,062	\$ (793)
1999-2000	5,237	2,997	(2,240)
2000-01	4,655	3,110	(1,545)
2001-02	5,453	3,138	(2,315)
2002-03	34,826	17,413	(17,413)
2005-06	30,522	15,261	(15,261)
2006-07	33,385	16,693	(16,692)
Total salaries and benefits	115,933	59,674	(56,259)
Materials and supplies:			
1999-2000	126,659	42,456	(84,203)
2000-01	140,538	51,203	(89,335)
2001-02	118,383	69,438	(48,945)
2002-03	24,000	12,000	(12,000)
2005-06	—	12,000	12,000
2006-07	—	12,000	12,000
2007-08	—	12,000	12,000
Total materials and supplies	409,580	211,097	(198,483)
Total	\$ 525,513	\$ 270,771	\$ (254,742)

Chameleon System Screens Analysis

The Los Angeles Animal Services Department purchased Chameleon software for FY 1999-2000. All of the city's shelters use the Chameleon system to maintain animal records. The Chameleon database has various screens that contain options for storing animal information. Some screens relate to the mandated activities and some do not.

The department performed an analysis of its Chameleon software system to determine the extent the system was used for mandated activities. In this analysis, the department identified the following 10 screens and the approximate percentages of those screens as they relate to the entire software system:

1. Animal Window – 11%
2. Kennel Window – 20%
3. Cham Cam – 4%
4. Person Window – 7%
5. Tag / Link Window – 10%

6. Receipt Window – 13%
7. Treatment and To Do Window – 15%
8. Activity and Dispatch Windows – 10%
9. Memo Window – 5%
10. Other Windows – 5%

In suggesting percentages for each of the screens, the department took into consideration how much time, on average, shelter staff spends noting information in each screen, how often these screens get updated, and the approximate amount of information contained within each screen.

Per discussions with the department's staff, we determined that 5 of the 10 screens identified above have a direct relation to the mandated activities. The mandate-related screens are as follows:

1. Animal Window
2. Kennel Window
3. Cham Cam
4. Person Window
5. Memo Window

We determined that the mandate-related windows comprise approximately 50% of the total Chameleon screens and information contained in those screens. We applied this 50% pro-rata percentage to all allowable costs in our calculations. Subsequently, we concluded that the city overstated allowable computer equipment costs totaling \$164,849 and overstated salary and benefit costs totaling \$57,966 during the audit period.

Misstated and Unsupported Computer Equipment Costs

The city was unable to provide invoices for all computer purchases claimed throughout the audit period. The unsupported portion of the costs totaled \$41,889. In addition, the city claimed unallowable costs totaling \$37,991 for FY 2000-01. The unallowable costs consisted of one license-renewal fee that was claimed twice in the same fiscal year and one invoice containing generic software licenses that were unrelated to Chameleon software. In addition, the city did not include in its claims additional costs totaling \$46,246 for FY 2001-02 and FY 2005-06 through FY 2007-08. The additional amount includes additional invoices totaling \$10,246 for computer hardware for FY 2001-02 and Chameleon licensing fees totaling \$36,000 for FY 2005-06 through FY 2007-08.

Understated Productive Hourly Rates

As identified in Finding 1, the city generally understated employee productive hourly rates. We applied the adjusted rates and determined that allowable costs for this component were understated by \$1,707.

The parameters and guidelines allow reimbursement for developing or procuring computer software for the maintenance of specified animal records. In addition, the parameters and guidelines state that if the computer software is used in a way that is not directly related to the

maintenance of animal records, then only the pro-rata portion of the activity that is used for compliance with the mandated program is reimbursable.

Recommendation

We recommend that the city ensure that claimed costs include only eligible costs, are based on actual costs, and are properly supported.

City's Response

The city did not provide a response to this specific finding. However, the city did comment on the audit process and the audit findings in general. See the city's response under "Other Issues."

**FINDING 3—
Overstated care and
maintenance costs**

The city claimed \$3,110,161 for care and maintenance costs during the audit period. We determined that \$2,142,278 is allowable and \$967,883 is unallowable. The costs were unallowable because the city incorrectly reported annual expenditures attributed to the care and maintenance function, incorrectly calculated the yearly census of dogs and cats and other animals, and subsequently overstated the claimed costs per animal per day in each fiscal period. In addition, the city incorrectly calculated the number of eligible stray dogs and cats and other animals that died during the increased holding period or were ultimately euthanized. The city also used an incorrect number of reimbursable days for this component.

The following table summarizes the claimed, allowable, and unallowable costs for the audit period by fiscal year:

Fiscal Year	Amount Claimed			Amount Allowable			Audit Adjustment
	Dogs/Cats	Other Animals	Total Claimed	Dogs/Cats	Other Animals	Total Allowable	
Care and maintenance:							
1998-99	\$ 186,383	\$ 5,510	\$ 191,893	\$ —	\$ 3,156	\$ 3,156	\$ (188,737)
1999-2000	577,369	40,450	617,819	375,062	7,031	382,093	(235,726)
2000-01	463,535	13,107	476,642	487,021	7,157	494,178	17,536
2001-02	686,106	21,184	707,290	307,530	7,358	314,888	(392,402)
2002-03	291,737	12,018	303,755	228,809	5,642	234,451	(69,304)
2005-06	244,197	37,227	281,424	233,359	15,318	248,677	(32,747)
2006-07	193,875	99,093	292,968	196,262	17,929	214,191	(78,777)
2007-08	194,118	44,252	238,370	231,063	19,581	250,644	12,274
Total	\$ 2,837,320	\$ 272,841	\$ 3,110,161	\$ 2,059,106	\$ 83,172	\$ 2,142,278	\$ (967,883)

The care and maintenance formula calculations of claimed, allowable, and unallowable costs by fiscal year are presented in Schedule 2—Summary of Care and Maintenance Costs.

During our review, we noted the following issues:

- The city did not use actual expenditure amounts relating to care and maintenance to calculate the cost per animal per day. Instead, the city used budgeted expenditure amounts that were not actual costs. In addition, the costs that the city reported were not pro-rated to the portion of the costs relating to the care and maintenance functions.
- The city did not use accurate annual animal census information to calculate the cost per animal per day.
- The city overstated the cost per animal per day in each fiscal year of the audit period.
- The city did not use the accurate number of eligible dogs and cats and other animals that died during the increased holding period or were ultimately euthanized. This error occurred primarily because the city did not account for all animal population exclusions noted in the parameters and guidelines.
- The city did not use the correct number of reimbursable increased holding period days to calculate claimed costs.

Our analysis of each issue identified in this list is presented below in the same order as listed above.

Total Annual Expenditures Related to Care and Maintenance

The city did not use the actual expenditure amounts relating to care and maintenance that it incurred to calculate the cost per animal per day. Instead, the city used budgeted expenditure amounts that were not actual costs and were not pro-rated to the portion of the costs relating to the care and maintenance functions.

The following table summarizes claimed, allowable, and unallowable expenditure amounts used for the calculation of care and maintenance costs:

Fiscal Year	Amount Claimed	Amount Allowable		Audit Adjustment
		Salaries, Benefits and Indirect Cost	Materials and Supplies	
Care and maintenance expenditures:				
1998-99	\$ 3,398,931	\$ 4,294,154	\$ 103,013	\$ 998,236
1999-2000	4,304,979	4,801,703	136,599	633,323
2000-01	4,890,106	5,299,831	74,446	484,171
2001-02	6,899,953	4,792,766	131,473	(1,975,714)
2002-03	6,257,289	4,405,861	141,952	(1,709,476)
2005-06	10,487,509	6,775,244	223,754	(3,488,511)
2006-07	11,585,706	8,687,989	329,620	(2,568,097)
2007-08	12,856,179	10,432,321	539,706	(1,884,152)
Total	\$ 60,680,652	\$ 49,489,869	\$ 1,680,563	\$ (9,510,220)

Labor Costs Related to Care and Maintenance (Salaries, Benefits, and Indirect Costs)

During the course of the audit, we requested that the city provide the actual salary amounts paid to those employee classifications directly involved with the care and maintenance function. We also requested the duty statements for such classifications to assist us in determining the percentage of daily workload that was devoted to caring and maintaining animals. The Animal Services Department provided a list of personnel who participate in the care and maintenance functions. The department also provided information relating to the involvement level of each classification and submitted job duty statements that supported the its proposed pro-rated percentages.

As proposed by the department, we used the following employee classifications and percentages of their annual salary, benefit, and related indirect costs to calculate labor costs relating to the Care and Maintenance cost component for each fiscal year:

- Animal Care Technicians (80%)
- Animal Care Technician Supervisor (40%)

We used actual annual payroll information for each employee classification for the last three years of the audit period (FY 2005-06 through FY 2007-08). However, the actual payroll information was not

available for the earlier five years of the audit period. We used a consumer price index to deflate the amounts paid for labor in these prior years.

Materials and Supplies Costs Related to Care and Maintenance

Subsequent to the issuance of the draft audit report, the city submitted documentation supporting actual materials and supplies expenditures incurred for care and maintenance activities. The city submitted summary reports containing year end expenditures by vendor for two accounts:

1. Account 4580 – Animal Food
2. Account 6020 – Shelters Operating Supplies

For the audit period, the year end expenses submitted totaled \$2,488,030 for both accounts. We examined the detailed spreadsheets with expenditures by vendor in both accounts to determine whether any of the submitted costs could be potentially included in our calculation of allowable care and maintenance costs. Of the \$2,488,030 in costs submitted, we concluded that costs totaling \$1,680,563 were allowable. Accordingly, we included these costs in the care and maintenance formula calculations.

The following table summarizes the amounts submitted, allowable, and audit adjustment by fiscal year:

<u>Fiscal Year</u>	<u>Amount Claimed</u>	<u>Amount Allowable</u>	<u>Audit Adjustment</u>
Account 4580 – Animal Food:			
1998-99	\$ 79,175	\$ 79,175	\$ —
1999-2000	118,361	112,034	(6,327)
2000-01	48,325	48,325	—
2001-02	71,335	71,335	—
2002-03	76,695	76,695	—
2005-06	115,602	107,736	(7,866)
2006-07	178,828	178,828	—
2007-08	288,067	288,067	—
Total animal food	976,388	962,195	(56,259)
Account 6020 – Operating supplies			
1998-99	148,213	23,838	(124,375)
1999-2000	89,209	24,565	(64,644)
2000-01	126,057	26,121	(99,936)
2001-02	136,362	60,138	(76,224)
2002-03	125,345	65,257	(60,088)

2006-07	325,315	150,792	(174,523)
2007-08	360,554	251,639	(108,915)
Total operating supplies	1,511,642	718,368	(793,274)
Total	\$ 2,488,030	\$ 1,680,563	\$ (807,467)

Expenses Unrelated to the function of caring and maintaining animals:

During fieldwork, we discussed with department staff the reimbursable criteria for this cost component. With the department's assistance, we identified specific types of materials and supplies expenditures that

might be allowable under the component of care and maintenance. The department's staff agreed that allowable expenditures for this component would primarily include animal food and cleaning supplies.

Upon our review of the city's additional documentation, we concluded that some expenditures were unallowable under the Care and Maintenance cost component. We excluded any expenses that were unrelated to the function of caring and maintaining the animals. The examples of unallowable expenses include the following:

- Office supplies, such, calculators, staples, office furniture, etc.
- Printing supplies, such as paper and ink
- Film processing and camera expenses
- Shooting range expenses
- Cell phone expenses
- Relocation expenses
- Expenses for animal traps
- Expenses for license tags
- Magazine subscription expenses
- Laboratory services
- Diagnostic services
- Medical waste disposal services
- Medical expenses
- Petty cash funds
- Bank card payment expenditures for the department's administrative purchases

During fieldwork and status meetings, we discussed the types of vendors and allowable expenses that could be included in our calculation of allowable care and maintenance costs. We determined that allowable expenses by vendor included the following:

- Newco Distributors – Account 4580, Vendor ID #000022807
- Empire Cleaning Supply – Account 6020, Vendor ID #000001138
- Gale Supply Co (Cleaning Supplies) – Account 6020, Vendor ID #000001313
- Animal Health and Sanitary Supply (Cleaning Supplies) – Account 6020, Vendor ID #000041889
- C Specialties Inc (Animal Care Products) – Account 6020, Vendor ID #000038437
- BJ Enterprises (food storage supplies) – Account 6020, Vendor ID #000022709
- Animal Care – Account 6020, Vendor ID #000029262

Additional Allowable Care and Maintenance Costs Resulting from New Information

We incorporated the additional materials and supplies costs identified above into our calculations of allowable care and maintenance costs. After adding the allowable materials and supplies costs into the care and maintenance formula, additional allowable care and maintenance costs total \$61,229 for the audit period.

The following table summarized the revised allowable amounts for care and maintenance expenses by fiscal year:

Fiscal Year	Previous Allowable Amount			Revised Allowable Amount			Audit Adjustment
	Dogs/Cats	Other Animals	Total Allowable Amount	Dogs/Cats	Other Animals	Total Revised Allowable Amount	
Care and maintenance:							
1998-99	\$ —	\$ 3,081	\$ 3,081	\$ —	\$ 3,156	\$ 3,156	\$ 75
1999-2000	364,573	6,834	371,407	375,062	7,031	382,093	10,686
2000-01	480,423	7,060	487,483	487,021	7,157	494,178	6,695
2001-02	299,445	7,165	306,610	307,530	7,358	314,888	8,278
2002-03	221,567	5,463	227,030	228,809	5,642	234,451	7,421
2005-06	225,970	14,833	240,803	233,359	15,318	248,677	7,874
2006-07	189,039	17,269	206,308	196,262	17,929	214,191	7,883
2007-08	219,708	18,619	238,327	231,063	19,581	250,644	12,317
Total	\$ 2,000,725	\$ 80,324	\$ 2,081,049	\$ 2,059,106	\$ 83,172	\$ 2,142,278	\$ 61,229

The revised care and maintenance formula calculations of claimed, allowable, and unallowable costs by fiscal year are also presented in Schedule 2—Summary of Care and Maintenance Costs.

Annual Animal Census Data

The yearly census refers to the total number of days that all animals were housed in the city's shelters. The Animal Services Department was able to provide the actual animal census information from its Chameleon tracking system for FY 2000-01 through FY 2007-08. For the earlier two years, for which Chameleon statistics were not available, we were able to use the average data from animal statistics available for FY 2000-01 and FY 2001-02.

Exclusions

The only two exclusions noted in this category were the animals that came in Dead on Arrival (DOA) or Missing. We did not count DOA animals as part of the annual census because no costs were incurred to care for them. In addition, we did not count Missing animals as part of the annual census because their holding period was unknown.

Input Errors

During our analysis of the annual census information, we noted some data input errors relating to dates. Some animal entries showed a negative holding period or extraordinarily long holding periods (e.g., exceeding ten years). Because these input errors were very obvious, we either eliminated these animals from the population or changed the incoming or outgoing dates.

Our review of the Chameleon animal information indicated that the city understated the annual animal census in each fiscal year of the audit period.

The following table summarizes the claimed, allowable, and revised animal census information by fiscal year:

Fiscal Year	Total Claimed	Animal Census Allowable			Total Allowable	Audit Adjustment
		Dogs/Cats	Birds	Other Animals		
Annual animal census:						
1998-99	258,420	—	—	—	476,517	218,097
1999-2000	258,420	—	—	—	476,517	218,097
2000-01	322,295	405,287	21,792	28,009	455,088	132,793
2001-02	272,290	418,756	37,926	41,263	497,945	225,655
2002-03	449,730	407,574	13,821	28,781	450,176	446
2005-06	509,248	415,652	17,307	82,353	515,312	6,064
2006-07	655,576	525,522	15,520	165,449	706,491	50,915
2007-08	799,326	695,980	34,574	86,304	816,858	17,532
Total	3,525,305	2,868,771	140,940	432,159	4,394,904	869,599

Cost Per Animal Per Day

The actual cost formula requires the eligible annual cost of care to be divided by the yearly census to arrive at an average cost per animal per day. The cost per animal per day is then multiplied by the eligible number of animals and the number of increased holding period days.

We used the audited annual expenditures and the annual animal census information to calculate the allowable cost per animal per day. We concluded that the city overstated the cost per animal per day in each fiscal period, as shown in the table below.

Fiscal Year	Cost Claimed	Cost Allowable	Audit Adjustment
Cost per animal per day:			
1998-99	\$ 13.12	\$ 9.23	\$ (3.89)
1999-2000	16.66	10.37	(6.29)
2000-01	15.17	11.81	(3.36)
2001-02	25.34	9.89	(15.45)
2002-03	13.91	10.11	(3.80)
2005-06	20.59	13.58	(7.01)
2006-07	17.67	12.77	(4.90)
2007-08	16.08	12.43	(2.65)

Eligible Animal Population

We determined the eligible animal population for dogs and cats and other animals by analyzing the Chameleon database information and taking into account all exclusions per the requirement of the mandated program. The following animals were excluded from the population of eligible animals:

- Dogs and cats and other animals that were owner-surrendered or previously owned (only stray animals were included in the eligible population);
- Dogs, cats, and other animals that were ultimately adopted, transferred, rescued, or redeemed (only those animals with the outcome of "died" or "euthanized" were reviewed);

- Dogs, cats, and other animals that went missing from their kennels, were stolen, or escaped;
- Dogs, cats, and other animals that were DOA;
- Dogs, cats, and other animals that were euthanized as requested by owners or if euthanasia was required / requested (“Dispo Req” or “Euth Req”);
- Dogs, cats, and other animals that were euthanized for humane reasons (usually on day 1);
- Dogs, cats, and other animals that were suffering from a serious illness or severe injury (usually euthanized on day 1 or died on day 1);
- Newborn animals that need maternal care and were impounded without their mothers (usually died or were euthanized within the first few days; the excluded categories included “Unweaned” or “8 weeks unsustainable”);
- Ineligible other animals such as rodents, livestock, or wild animals;
- Ineligible birds, such as pigeons, doves, ducks, chickens, owls, pheasants, mallards, and gamefowls;
- Dogs and cats that died in the shelter’s kennels outside of increased holding period (days 1, 2, 3, and day 7 and beyond), as per the requirements of the mandate. (Local agencies are eligible to receive reimbursement to care for dogs and cats that *died during the increased holding period* [days 4, 5, and 6]);
- “Other” animals that died in the shelters’ kennels on day 7 and beyond (after the increased holding period). (Local agencies are eligible to receive reimbursement to care for other animals that *died during the increased holding period* [days 2, 3 through 6]); and
- Dogs, cats, and other animals that were euthanized during the holding period as per the requirements of the mandate. The agencies are eligible to receive reimbursement to care for dogs and cats and other animals that were *euthanized after the holding period* (day 7 of the holding period and beyond).

Our review of the Chameleon database revealed that the city overstated eligible animal populations in each fiscal period.

The following table summarizes the claimed, allowable, and unallowable animals for the audit period by fiscal year:

Fiscal Year	Animals Claimed			Animals Allowable			Audit Adjustment
	Dogs/ Cats	Other Animals	Total Claimed	Dogs/ Cats	Other Animals	Total Allowable	
Eligible animals:							
1998-99	7,103	105	7,208	—	56	56	(7,152)
1999-2000	17,328	607	17,935	12,056	113	12,169	(5,766)
2000-01	15,278	216	15,494	13,746	101	13,847	(1,647)
2001-02	13,538	209	13,747	10,365	124	10,489	(3,258)
2002-03	10,484	216	10,700	7,544	93	7,637	(3,063)
2005-06	5,930	452	6,382	5,728	188	5,916	(466)
2006-07	5,486	1,402	6,888	5,123	234	5,357	(1,531)
2007-08	6,036	688	6,724	5,735	243	5,978	(746)
Total	81,183	3,895	85,078	60,297	1,152	61,449	(23,629)

Increased Holding Period Days

The parameters and guidelines identify the number of reimbursable days for dogs and cats to be the difference between three days from the day of capture and four business days from the day after impoundment. For other animals, the parameters and guidelines identify the number of reimbursable days to be four business days from the day after impoundment.

Determining the exact number of reimbursable days is often difficult. Depending on the impound day, each animal will have a different holding period requirement. For example, for a dog impounded at noon on Monday, the “old” law (prior to 1999) requires the city to hold the dog until noon on Thursday (72 hours); the current law requires the city to hold the dog until closing on Friday (which is 4 business days following impoundment). Under the current law, the holding period was increased by 1 day and 5 hours (or 29 hours). However, for the dog impounded at noon on Friday, the “old” law requires the city to hold the dog until noon on Monday (72 hours); and the current law requires the city to hold the dog until closing on Friday (which is 4 business days following impoundment). Under the current law, the holding period was increased by 4 days and 5 hours (or 101 hours).

This calculation takes into consideration that the required holding period does not include either Saturday or Sunday as a business day, which is consistent with the Appellate Court decision dated March 26, 2010, in the case of *Purifoy et al v. Howell*. We also took into consideration the operating schedules of the city’s shelters; some shelters are closed on Mondays. In such cases, we did not count Monday as a business day.

To determine the number of reimbursable days for all of the city’s shelters, we analyzed every possible impound option (e.g., Monday impound, Tuesday impound, Wednesday impound, etc.) and determined the average increased holding period for dogs and cats to be 3 days and the average increased holding period for other “eligible” animals to be 6 days.

The following chart summarizes the formula:

Care and Maintenance Formula for Dogs and Cats

$$\begin{array}{l} \text{Cost per animal} \times \text{Eligible dogs and cats} \times \text{Number of Increased Days} \\ \text{per day} \qquad \qquad \qquad \text{(died days 4,5,6)} \qquad \qquad \qquad \text{(3 days for dogs and cats)} \\ \qquad \qquad \qquad \qquad \qquad \text{(euthanized days 7 and on)} \end{array}$$

Care and Maintenance Formula for Other Animals

$$\begin{array}{l} \text{Cost per animal} \times \text{Eligible Animals} \times \text{Number of Increased Days} \\ \text{per day} \qquad \qquad \qquad \text{(died days 2,3,4,5,6)} \qquad \qquad \qquad \text{(6 days for other)} \\ \qquad \qquad \qquad \qquad \qquad \text{(euthanized days 7 and on)} \end{array}$$

The parameters and guidelines (section IV.B.3—Care and Maintenance for Impounded Stray or Abandoned Dogs and Cats that Die During the Increased Holding Period or Are Ultimately Euthanized) identify the following reimbursable activities:

Beginning July 1, 1999 – Providing care and maintenance during the increased holding period for impounded stray or abandoned dogs and cats that die during the increased holding period or are ultimately euthanized. The increased holding period shall be measured by calculating the difference between three days from the day of capture and four or six business days from the day after impoundment.

The parameters and guidelines (section IV.B.4—Care and Maintenance for Impounded Stray or Abandoned Animals Specified in Food and Agriculture Code Section 31753 that Die During the Increased Holding Period or Are Ultimately Euthanized) also state:

Beginning January 1, 1999 – For providing care and maintenance for . . . stray or abandoned rabbits, guinea pigs, hamsters, pot-bellied pigs, birds, lizards, snakes, turtles, and tortoises legally allowed as personal property that die during the increased holding period or are ultimately euthanized.

Eligible claimants are *not* entitled to reimbursement for the care and maintenance of the following population of dogs and cats and other animals:

- Stray or abandoned dogs, cats, and other animals that are irremediably suffering from a serious illness or severe injury,
- Newborn stray or abandoned dogs, cats, and other animals that need maternal care and have been impounded without their mothers,
- Stray or abandoned dogs, cats, and other animals too severely injured to move or when a veterinarian is not available and it would be more humane to dispose of the animal,
- Owner-relinquished dogs, cats, and other animals, and
- Stray or abandoned dogs, cats, and other animals that are ultimately redeemed, adopted, or released to a nonprofit animal rescue or adoption organization.

Eligible claimants may elect one of two methods, actual cost method or time study method, to claim costs for the care and maintenance of impounded stray or abandoned dogs, cats, and other animals that die during the increased holding period or are ultimately euthanized. The city elected to use the actual cost method to claim these costs.

Under the actual cost method, actual reimbursable care and maintenance costs per animal per day are computed for an annual claim period. The computation method is as follows:

1. Determine the total annual cost of care and maintenance for all dogs, cats, and other animals impounded at a facility. Total cost of care and maintenance includes labor, materials, supplies, indirect costs, and contract services.
2. Determine the average daily census of all dogs, cats, and other animals. For purposes of claiming reimbursement under IV.B.3, "average daily census" is defined as the average number of all dogs and cats at a facility housed on any given day, in 365-day period and the average number of all other animals at a facility housed on any given day, in a 365-day period.
3. Multiply the average daily census of dogs, cats, and other animals by 365 = the yearly census of dogs and cats and the yearly census of other animals.
4. Divide the total annual cost of care by the yearly census of dogs and cats = cost per dog and cat per day and yearly census of other animals = cost per other animal per day.
5. Multiply the cost per animal per day, by the number of impounded stay or abandoned dogs, cats, and other animals that die during the increase holding period or are ultimately euthanized by each reimbursable day. The reimbursable day for cats and dogs is the difference between three days from the day of capture, and four or six business days from the day after impoundment.

Care and Maintenance Formula

The parameters and guidelines provide for a formula-driven methodology to determine allowable mandated costs for the care and maintenance of dogs and cats and other animals. The use of this method requires claimants to calculate the total amount of eligible costs incurred to provide care and maintenance for the animals housed in its shelter. This total is divided by the annual census of animals housed in the shelter to determine a cost per animal per day. The next element of the formula is adding the number of stray and abandoned animals that died of natural causes during the holding period plus those animals that were euthanized after the required holding period. This total number of animals is then multiplied by the cost per animal per day. The resulting amount represents allowable costs for providing care and maintenance.

The mandate is reimbursing claimants for costs associated with animals that were not relinquished, redeemed, adopted, or released to a nonprofit agency—animals for which the local agency was unable to assess fees to recover such costs.

Recommendation

We recommend that the city ensure that claimed costs include only eligible costs, are based on actual costs, and are properly supported.

City's Response

The city did not respond to this finding. However, the city provided additional supporting documentation subsequent to the issuance of the draft audit report.

SCO's Comment

The finding amount decreased by \$61,229—from \$1,029,112 to \$967,883 based on the additional information provided. The recommendation remains unchanged.

**FINDING 4—
Overstated increased
holding period costs**

The city claimed \$3,886,965 for increased holding period costs for the audit period. We determined that \$1,841,233 is allowable and \$2,045,732 is unallowable. The unallowable costs occurred because the city overstated allowable hours and the number of allowable positions (\$2,172,695) and understated productive hourly rates (\$126,963).

The following table summarizes the claimed, allowable, and unallowable costs for the audit period by fiscal year:

Fiscal Year	Amount Claimed	Amount Allowable	Audit Adjustment
Salaries and benefits:			
1998-99	\$ 337,191	\$ 90,266	\$ (246,925)
1999-2000	754,105	201,949	(552,156)
2000-01	784,231	211,205	(573,026)
2001-02	805,160	213,025	(592,135)
2002-03	115,785	218,413	102,628
2005-06	246,783	295,417	48,634
2006-07	550,209	308,794	(241,415)
2007-08	293,501	302,164	8,663
Total	\$ 3,886,965	\$ 1,841,233	\$ (2,045,732)

Misstated Allowable Hours and Employee Positions

The city claimed hours for Animal Care Technicians, Animal Care Technician Supervisors, Animal Control Officers, and Clerk Typists for working on one of the weekend days. The city, however, did not take into account the difference between the regular staffing needs and the increased staffing needs to comply with the requirement of this component. As a result, the city overstated the number of eligible employee positions and did not properly calculate the number of reimbursable hours per each position. This resulted in overstated costs totaling \$2,172,695 during the audit period.

Hours of Operation

The city provided documentation identifying the hours of operation for its animal shelters. All shelters in the city operate on the same schedule and stay open to the public six days a week (excluding Mondays), from 8 am until 5 pm. Thus, as per the requirement of the mandate, each shelter makes animals available for owner redemption or adoption on either of the weekend days. We concluded that reimbursement is allowable for the increased and eligible staffing on Saturdays.

Staffing Requirements

For agencies using the holding period of four business days after the day of impoundment, we needed to determine the additional costs incurred to have the impounded animals available for owner redemption or adoption. In order to determine the additional staffing requirements, we inquired about the number of employees and classifications of staff members working when the shelter is closed to the public (Mondays) and the staffing needed to comply with the mandate and stay open during the increased hours (Saturdays).

When the shelter is closed to the public, animals must still be cared for and fed. Usually, most of the staff members whose duties include caring for animals would be at the shelters regardless of whether the shelters were open to the public or not. Therefore, as the main duties of these employees are to care and maintain animals, these positions are generally not reimbursable for this cost component.

However, some positions are reimbursable under this component depending on the increased staffing needs on those days when the shelter is open to the public. To demonstrate the increased staffing requirements for Saturdays, the city provided monthly working schedules for each shelter. After reviewing these schedules, we determined that the following additional employees were needed to comply with the mandate requirement and stay open during one weekend day.

- Animal Care Technicians (10 positions, 9 hours each)
- Animal Care Technician Supervisor (1 position, 9 hours)
- Front Counter Clerks (10 positions, 8 hours each)

Allowable Annual Hours

Starting with FY 1999-2000, we calculated allowable annual hours the same way for every year using the following formula:

$$\frac{\text{Allowable weekly hours per classification} \times \text{Number of positions} \times 52}{\text{weeks}}$$

The following table summarizes the annual hours per employee classification needed to perform the mandated activities:

<u>Employee Classification</u>	<u>Number of Eligible Employees</u>	<u>Allowable Weekly Hours</u>	<u>Allowable Annual Hours</u>
Animal Care Technicians	10	9	4,680
ACT Supervisor	1	9	468
Front Counter Clerks	10	8	4,160
			<u>9,308</u>

The FY 1998-99 reimbursement period for this cost component began in January 1999. Accordingly, we reduced allowable annual hours by half for this fiscal period.

Understated Productive Hourly Rates

As identified in Finding 1, the city generally understated employee productive hourly rates. We applied the adjusted rates and determined that allowable costs for this component were understated by \$126,963.

The parameters and guidelines (section IV.B.5—Using the Holding Period of Four Business Days After the Day of Impoundment) state that the following activities are reimbursable beginning January 1, 1999, for impounded animals specified in Food and Agriculture Code section 31753 (“other animals”), and beginning July 1, 1999, for impounded dogs and cats:

- Making the animal available for owner redemption on one weekday evening until at least 7:00 p.m., or one weekend day; or
- For those local agencies with fewer than three full time employees or that are not open during all regular weekday business hours, establishing a procedure to enable the owner to reclaim their animals by appointment at a mutually agreeable time when the agency would otherwise be closed.

Recommendation

We recommend that the city ensure that claimed costs include only eligible costs, are based on actual costs, and are properly supported.

City's Response

The city did not provide a response to this specific finding. However, the city did comment on the audit process and the audit findings in general. See the city's response under "Other Issues."

**FINDING 5—
Overstated lost and
found lists costs**

The city claimed \$195,493 for the Lost and Found Lists cost component during the audit period. We determined that \$79,114 is allowable and \$116,379 is unallowable. The costs were unallowable because the city claimed estimated hours in the first four years of the audit period (\$77,428), claimed unsupported Web project development costs (\$44,699), understated allowable hours due to rounding errors in the time study (\$2,651), and understated employee productive hourly rates (\$3,097).

The following table summarizes the claimed, allowable, and unallowable costs for the audit period by fiscal year:

Fiscal Year	Amount Claimed	Amount Allowable	Audit Adjustment
Salaries and benefits:			
1998-99	\$ 12,655	\$ 3,852	\$ (8,803)
1999-2000	26,185	8,615	(17,570)
2000-01	30,373	9,008	(21,365)
2001-02	54,530	9,087	(45,443)
2002-03	9,371	9,318	(53)
2005-06	12,237	12,600	363
2006-07	13,016	13,364	348
2007-08	12,206	13,270	1,064
Total salaries and benefits	<u>170,573</u>	<u>79,114</u>	<u>(91,459)</u>
Materials and supplies:			
2001-02	24,920	—	(24,920)
Total	<u>\$ 195,493</u>	<u>\$ 79,114</u>	<u>\$ (116,379)</u>

Estimated and Unsupported Costs

The city claimed estimated hours for Clerk Typists for FY 1998-99 through FY 2001-02. The estimated salary and benefit costs totaled \$77,428. Furthermore, the city also claimed unsupported costs for the creation of its Web site for FY 2001-02 totaling \$19,779 for salaries and benefits and \$24,920 for materials and supplies. The city did not provide any documentation to support claimed costs nor document the pro-rated portion of these costs attributed to the mandated activity of Lost and Found Lists.

Time Study

Starting with FY 2002-03, the city started claiming hours based on a time study that it conducted for this cost component. The time study recorded the time increments for the Clerk Typists to print out and display the stray sheets and inventory of stray animals for the public to review. The time study results showed that it takes an average of 11.63 minutes each day for Clerk Typists to perform this activity at each of the city's shelters. The city claimed 11 minutes per clerk (one clerk per each shelter) for this component starting in FY 2002-03. Our review of the time study revealed rounding errors in the city's favor. We calculated allowable hours using 11.63 minutes for one Clerk Typists per day at each of the six shelters. We applied the results of the time study for all years in the audit period.

Using the methodology described above, we calculated allowable annual hours totaling 424.50 per fiscal year, as shown in the table below. For FY 1998-99, reimbursement begins in January 1999, so we used half of total hours allowable for this fiscal year.

<u>Employee Classification</u>	<u>Number of Eligible Employees</u>	<u>Allowable Daily Minutes</u>	<u>Allowable Annual Hours</u>
Front Counter Clerks	6	11.63	424.50

The city understated allowable hours from the time study due to the rounding errors. As a result, allowable costs were understated by \$2,651 for the audit period.

Understated Productive Hourly Rates

As identified in Finding 1, the city generally understated employee productive hourly rates. We applied the adjusted rates and determined that allowable costs for this component were understated by \$3,097.

The parameters and guidelines (section IV.B.7—Lost and Found Lists) identify the following reimbursable activities:

Beginning January 1, 1999 – Providing owners of lost animals and those who find lost animals with all of the following:

- Ability to list the animals they have lost or found on “lost and found” lists maintained by the agency;
- Referrals to animals listed that may be the animals the owner or finders have lost or found;
- The telephone numbers and addresses of other pounds and shelters in the same vicinity;
- Advice as to means of publishing and disseminating information regarding lost animals; and
- The telephone numbers and addresses of volunteer groups that may be of assistance in locating lost animals.

Recommendation

We recommend that the city ensure that claimed costs include only eligible costs, are based on actual costs, and are properly supported.

City’s Response

The city did not provide a response to this specific finding. However, the city did comment on the audit process and the audit findings in general. See the city’s response under “Other Issues.”

**FINDING 6—
Understated non-medical
records costs**

The city claimed \$468,667 for the Maintaining Non-Medical Records cost component during the audit period. We determined that \$1,065,219 is allowable and the city underclaimed costs in the net amount of \$596,552. The costs were misstated because the city claimed overstated and unallowable time increments per non-medical record during the first three years of the audit period (\$237,933), understated the number of eligible animal records (\$814,940), overstated hours spent by the Systems Analyst classification performing mandated activities (\$16,163), and understated productive hourly rates (\$35,708).

The following table summarizes the claimed, allowable, and unallowable costs for the audit period by fiscal year:

<u>Fiscal Year</u>	<u>Amount Claimed</u>	<u>Amount Allowable</u>	<u>Audit Adjustment</u>
Salaries and benefits:			
1998-99	\$ 47,236	\$ 56,834	\$ 9,598
1999-2000	140,516	127,181	(13,335)
2000-01	126,793	135,995	9,202
2001-02	26,714	131,162	104,448
2002-03	23,921	124,455	100,534
2005-06	30,738	155,122	124,384
2006-07	20,871	156,162	135,291
2007-08	51,878	178,308	126,430
Total	<u>\$ 468,667</u>	<u>\$ 1,065,219</u>	<u>\$ 596,552</u>

Overstated and Unallowable Costs

In the first three years of the audit period (FY 1998-99 through FY 2000-01), the city claimed 20 minutes per animal record for Veterinary Assistants to record information relating to the health of animals. However, recording animal health information is not a reimbursable activity and is, therefore, unallowable. The unallowable costs in the first three years of the audit period totaled \$237,933.

Time Study

In the latter five years of the audit period (FY 2001-02, FY 2002-03, and FY 2005-06 through FY 2007-08), the city claimed 5 minutes per non-medical animal record for the Animal Care Technicians to input animal intake information based on the results of the time study. The city then applied the 5-minute increments from the time study to the number of records processed for euthanized animals. After reviewing the time study results, we concluded that the 5-minute increments were reasonable and well-supported. We applied the 5-minute increments per non-medical record in all fiscal years of the audit period, including the first three years during which the hours were unallowable.

Involvement Level of Various Employee Classifications

The city's time study documented that record-keeping was performed by the Animal Care Technicians. However, during audit fieldwork, the city provided intake animal statistics supporting the involvement level of

Animal Care Technicians and Animal Control Officers with this activity. These intake statistics segregated the intake procedures and record-keeping activities performed by these two employee classifications.

The intake statistics reports documented that about 23% of animals are brought in from the field, and that Animal Control Officers perform the intake record-keeping for this population of animals. The Animal Care Technicians perform intake record-keeping for the remaining 77% of the animal population. We used these statistics in our calculations of allowable costs.

Understated Non-Medical Records

Allowable animal records for this cost component include any non-medical record that was created for any animal impounded throughout the audit period. We were able to retrieve this information from the Chameleon database by checking the number of animals that came into the city's shelters during each fiscal year. After analyzing the Chameleon data, we concluded that the city understated the number of eligible records in all fiscal years of the audit period. The city understated the records because it claimed only the records for animals that died or were euthanized. However, the mandated program allows reimbursement for maintaining non-medical records for all impounded animals.

We were able to retrieve Chameleon intake information dating back to FY 2000-01. Chameleon statistics were not available for the first two years of the audit period. To determine the eligible number of records for FY 1998-99 and FY 1999-00, we calculated an average number of animal records processed during FY 2000-01 and FY 2001-02. For FY 1998-99, we used half of this average because reimbursement begins in January 1999 for this component.

After calculating the actual number of intake records, we concluded that the city under-claimed the total number of animal records processed by 356,909 during the audit period, resulting in understated allowable costs totaling \$814,940 during the audit period.

The following table summarizes the claimed, allowable, and understated records for the audit period by fiscal year:

<u>Fiscal Year</u>	<u>Records Claimed</u>	<u>Records Allowable</u>	<u>Audit Adjustment</u>
Non-Medical Records			
1998-99	7,136	32,447	25,311
1999-2000	17,935	64,893	46,958
2000-01	15,494	66,343	50,849
2001-02	13,747	63,443	49,696
2002-03	11,960	58,717	46,757
2005-06	11,135	54,102	42,967
2006-07	7,127	52,580	45,453
2007-08	7,175	56,093	48,918
Total	<u>91,709</u>	<u>448,618</u>	<u>356,909</u>

Senior Systems Analyst Time

For FY 2007-08, the city claimed 25% of the Senior Systems Analyst's total annual productive hours as time spent to maintain the Chameleon database. According to the Systems Analyst, claimed hours were spent on general oversight and maintenance of the animal database. However, claimed hours did not account for the 50% share of the Chameleon software that is used for non-mandated activities. Accordingly, we pro-rated claimed hours by 50%, which resulted in overstated costs totaling \$16,163 for FY 2007-08.

Understated Productive Hourly Rates

As stated in Finding 1, the city generally understated employee productive hourly rates. We applied the adjusted rates and determined that allowable costs for this component were understated by \$35,708.

The parameters and guidelines (section IV.B.8—Maintaining Non-Medical Records) identify the following reimbursable activities:

Beginning January 1, 1999 – Maintaining non-medical records on animals that are either taken up, euthanized after the holding period, or impounded. Such records shall include the following:

- The date the animal was taken up, euthanized, or impounded;
- The circumstances under which the animal is taken up, euthanized, or impounded;
- The names of the personnel who took up, euthanized, or impounded the animal; and
- The final disposition of the animal, including the name of the person who euthanized the animal or the name and address of the adopting party.

Recommendation

We recommend that the city ensure that claimed costs include only eligible costs, are based on actual costs, and are properly supported.

City's Response

The city did not provide a response to this specific finding. However, the city did comment on the audit process and the audit findings in general. See the city's response under "Other Issues."

**FINDING 7—
Overstated necessary
and prompt
veterinary care costs**

The city claimed \$2,193,011 under the cost component of Necessary and Prompt Veterinary Care during the audit period. We determined that \$365,168 is allowable and \$1,827,843 is unallowable. The costs were unallowable because the city claimed estimated materials and supplies costs (\$488,137), claimed unsupported materials and supplies costs (\$608,849), claimed misstated and unallowable hours (\$732,515), and understated productive hourly rates (\$1,658).

The following table summarizes the claimed, allowable, and unallowable costs for the audit period by fiscal year:

<u>Fiscal Year</u>	<u>Amount Claimed</u>	<u>Amount Allowable</u>	<u>Audit Adjustment</u>
Salaries and benefits:			
1998-99	\$ —	\$ 25,409	\$ 25,409
1999-2000	—	56,834	56,834
2000-01	—	67,504	67,504
2001-02	179,750	51,839	(127,911)
2002-03	143,387	38,753	(104,634)
2005-06	262,640	40,823	(221,817)
2006-07	212,421	40,429	(171,992)
2007-08	297,827	43,577	(254,250)
Total salaries and benefits	1,096,025	365,168	(730,857)
Materials and supplies:

2006-07	178,953	—	(178,953)
2007-08	164,502	—	(164,502)
Total materials and supplies	1,096,986	—	(1,096,986)
Total	\$ 2,193,011	\$ 365,168	\$ (1,827,843)

Salary and Benefit Costs

The city did not claim any labor costs in the first three years of the audit period (FY 1998-99 through FY 2000-01). Starting in FY 2001-02, the city began claiming costs for Veterinarians and Veterinary Technicians to perform various activities. The claimed hours were based on a time study that recorded increments of time to perform various medical procedures. We reviewed the city's initial time study and determined that it was inadequate.

The initial time study focused on recording non-routine medical procedures as opposed to repetitive activities. Non-routine procedures are not appropriate for a time study because they are unique in nature and in the duration of time spent. Furthermore, non-routine medical procedures are reimbursable only for medical services performed during the required holding period for animals that either died during the holding period or were euthanized after the required holding period. Thus, these types of non-recurring expenses would need to be examined on a case-by-case basis to determine eligibility for reimbursement.

Our review also indicated that included in the time study were some emergency treatments, microchip implantation procedures, and euthanasia procedures, all of which are excluded activities under this cost component.

The two repetitive tasks that are appropriate for a time study under this cost component are (1) performing an initial physical examination to determine the animal's baseline health status and classification as adoptable, treatable, or non-rehabilitatable and (2) administering wellness vaccines to treatable or adoptable animals. We advised the city that it should perform a new time study to capture time spent on these two repetitive and eligible procedures.

Allowable Time Study

During the course of the audit, the city performed a new time study. The new time study included the following activities (usually performed by Veterinary Technicians):

- Performing the initial physical examination;
- Administering of wellness vaccine upon animal's intake (excluding rabies vaccines);
- Administering other routine medications upon animal's intake (flea, tic, etc.); and
- Inputting animal medical statistics into the Chameleon database about animal's baseline health (not a reimbursable activity).

Out of the four activities noted above, the first two are reimbursable under this component as applied to the eligible animal population. The third activity, administering routine medications to eligible animals, is also reimbursable, but would normally be claimed under the Care and Maintenance cost component. Considering the agency's procedure that Veterinary Technicians perform all three activities at the same time, we decided to allow the third activity under this component as well.

However, the fourth activity, input of medical information into Chameleon, is outside the scope of this component. Noting the animals' baseline health and medical information in the Chameleon software is not a reimbursable activity. We worked with representatives of the city's Animal Services Department to segregate the time study results per each individual activity. We were able to calculate a 10-minute time increment per animal that accounted for time spent on the three reimbursable activities noted above. Subsequently, we used the 10-minute increments to calculate allowable costs for this component by applying it to the eligible population of animals per the Chameleon database.

Our analysis revealed that the city misstated salary and benefit costs for this component by \$732,515 during the audit period.

Materials and Supplies

During the audit period, the city claimed estimated materials and supplies costs (\$488,137) and claimed unsupported materials and supplies costs (\$608,849). The estimated costs occurred in the first three years of the audit period (FY 1998-99 through FY 2000-01), when the city estimated that 3% of the operating costs were attributable to the component of Necessary and Prompt Veterinary Care. In the latter five years of the audit period (FY 2001-02, FY 2002-03, and FY 2005-06 through FY 2007-08), the city claimed materials and supplies costs that were not supported, and we were unable to determine what portion of the cost might have been attributed to reimbursable activities.

Understated Productive Hourly Rates

As identified in Finding 1, the city generally understated employee productive hourly rates. We applied the adjusted rates and determined that allowable costs for this component were understated by \$1,658.

The parameters and guidelines (section IV.B.9–Necessary and Prompt Veterinary Care) identify the following reimbursable activities:

Beginning January 1, 1999 – For providing “necessary and prompt veterinary care” for stray and abandoned animals, other than injured cats and dogs given emergency treatment, that die during the holding period or are ultimately euthanized during the holding periods specified in Statutes of 1998, Chapter 752.

“Necessary and prompt veterinary care” means all reasonably necessary medical procedures performed by a veterinarian or someone under the supervision of a veterinarian to make stray or abandoned animals “adoptable.” The following veterinary procedures, if conducted, are eligible for reimbursement:

- An initial physical examination of the animal to determine the animal’s baseline health status and classification as “adoptable,” “treatable,” or “non-rehabilitatable.”
- A wellness vaccine administered to “treatable” or “adoptable” animals.
- Veterinary care to stabilize and or relieve the suffering of a “treatable” animal.
- Veterinary care intended to remedy any applicable disease, injury, or congenital or hereditary condition that adversely affects the health of a “treatable” animal or that is likely to adversely affect the animal’s health in the future, until the animal becomes “adoptable.”

Population Exclusions

Eligible claimants are *not* entitled to reimbursement for providing “necessary and prompt veterinary care” to the following population of animals:

- Animals that are irremediably suffering from a serious illness or severe injury . . . ;
- Newborn animals that need maternal care and have been impounded without their mothers . . . ;

- Animals too severely injured to move or where a veterinarian is not available and it would be more humane to dispose of the animal . . . ;
- Owner-relinquished animals; and
- Stray or abandoned animals that are ultimately redeemed, adopted, or released to a nonprofit animal rescue or adoption organization.

Recommendation

We recommend that the city ensure that claimed costs include only eligible costs, are based on actual costs, and are properly supported.

City's Response

The city did not directly address this audit finding in its response. However, the city submitted documentation subsequent to the issuance of the draft report, providing expenditure amounts for veterinary materials and supplies. The city submitted summary reports containing year end expenditures by vendor for Account 3190 – Medical Supplies. For the audit period, the expenses submitted totaled \$2,086,819.

SCO's Comment

The finding and recommendation remain unchanged.

We examined the detailed spreadsheets containing expenditures by vendor to determine whether any of the submitted costs were allowable costs under the Necessary and Prompt Veterinary Care cost component.

During fieldwork, we discussed with the department's staff the reimbursable criteria for this component. We specifically addressed all of the exclusions and limitations noted in the parameters and guidelines. In order for veterinary materials and supplies to be reimbursable, the department needed to show what specific materials and supplies were expended for the eligible population of animals. Further, the department needed to show that these medical expenditures took place as a result of treatments occurring during the holding period days for those eligible animals.

We concluded that we are unable to consider the medical expenses submitted for reimbursement, because the city did not determine what portion of the costs actually related to the eligible animals and allowable treatments that took place during the required holding period.

**FINDING 8—
Overstated procuring
equipment costs**

The city claimed \$78,179 for procuring equipment costs for FY 2002-03. We determined that \$12,932 is allowable and \$65,247 is unallowable. The unallowable costs occurred because the city claimed unsupported costs (\$52,316) and did not pro-rate allowable computer equipment costs proportionate to the share attributed to the mandated activities (\$12,931).

The parameters and guidelines (section IV.B.10–Procuring Equipment) state that:

If the medical, kennel, and computer equipment is utilized in some way not directly related to the mandated program or the population of animals listed in Section IV(B), only the pro rata portion of the activity that is used for purposes of the mandated program is reimbursable.

Recommendation

We recommend that the city ensure that claimed costs include only eligible costs, are based on actual costs, and are properly supported.

City's Response

The city did not provide a response to this specific finding. However, the city did comment on the audit process and the audit findings in general. See the city's response under "Other Issues."

**FINDING 9—
Overstated indirect
costs**

The city claimed \$2,897,874 for indirect costs during the audit period. We determined that \$2,162,775 is allowable and the net amount of \$735,099 is unallowable (overstated by \$1,229,323 and understated by \$494,224). The overstatement of \$1,229,322 occurred as a result of the unallowable salaries identified in audit Findings 1 through 8. The city also understated indirect costs totaling \$494,223 because it understated its indirect cost rates in FY 1998-99, FY 1999-2000, and FY 2000-01.

The following table summarizes the claimed, allowable, and unallowable costs for the audit period by fiscal year:

<u>Fiscal Year</u>	<u>Amount Claimed</u>	<u>Amount Allowable</u>	<u>Audit Adjustment</u>
Indirect costs:			
1998-99	\$ 108,071	\$ 133,057	\$ 24,986
1999-2000	276,908	299,826	22,918
2000-01	297,289	362,228	64,939
2001-02	701,641	268,017	(433,624)
2002-03	160,758	197,216	36,458
2005-06	479,470	358,986	(120,484)
2006-07	518,942	298,681	(220,261)
2007-08	354,795	244,764	(110,031)
Total	<u>\$ 2,897,874</u>	<u>\$ 2,162,775</u>	<u>\$ (735,099)</u>

Unallowable Indirect Costs Related to Unallowable Salaries

As a result of the unallowable salaries identified in Findings 1 through 8, related indirect costs totaling \$1,229,322 are also unallowable.

Understated Indirect Cost Rates

The city understated its indirect cost rates in FY 1998-99, FY 1999-2000, and FY 2000-01. The rates were understated because the city used incorrect rates from the annual citywide Cost Allocation Plans (CAP).

The City Controller prepares annual CAPs, which provide details for approved fringe benefit rates and indirect cost rates for each of the city's departments. The rates indicated in each CAP are approved by the U.S. Department of Health and Human Services under the contract with the city's cognizant federal agency, the U.S. Department of Housing and Urban Development. The city uses these approved rates to prepare claims for various programs, grants, and contracts.

As per the CAP instructions, the indirect cost rates consist of two separate rates: the central services rate and the departmental administration and support rate. Both overhead rates should be combined and applied to direct salaries, excluding fringe benefits, and overtime.

However, the Animal Services Department did not combine the two overhead rates in the first three years of the audit period, and thus understated the rates for those fiscal years, as noted in the table:

Category	Fiscal Year		
	1998-99	1999-2000	2000-01
Claimed indirect cost rates	30.82%	37.13%	39.31%
Allowable indirect cost rates:			
Central services rate	56.25%	56.14%	66.61%
Department administration and support rate	30.82%	37.13%	39.31%
Total allowable rate	87.07%	93.27%	105.92%
Audit adjustment	56.25%	56.14%	66.61%

The understated rates resulted in underclaimed indirect costs totaling \$494,223 as noted in the following table:

Category	Fiscal Year			Total
	1998-99	1999-2000	2000-01	
Rate claimed	30.82%	37.13%	39.31%	
Rate allowable	87.07%	93.27%	105.92%	
Difference	56.25%	56.14%	66.61%	
Allowable salaries	× \$ 152,816	× \$ 321,460	× \$ 341,982	
Audit adjustment	\$ 85,959	\$ 180,469	\$ 227,795	\$ 494,223

The parameters and guidelines (section V.B.—Claim Preparation and Submission, Indirect Cost Rates) state that compensation for indirect costs is eligible for reimbursement using the procedure provided in the Office of Management and Budget Circular A-87. Claimants have the option of using 10% of direct labor, excluding fringe benefits, or preparing an Indirect Cost Rate Proposal if the indirect cost rate exceeds 10%.

Recommendation

We recommend that the city ensure that claimed costs include only eligible costs, are based on actual costs, and are properly supported.

City's Response

The city did not provide a response to this specific finding. However, the city did comment on the audit process and the audit findings in general. See the city's response under "Other Issues."

OTHER ISSUES

In its response dated March 29, 2011, the city commented on the audit process and the audit findings in general.

**ISSUE 1—
Proposition F and
construction of new
facilities**

The city did not claim any costs during the audit period under the Acquisition of Additional Space and/or Construction of New Facilities cost component. During audit fieldwork, the city inquired about the eligibility of costs it incurred for the construction and renovation of animal shelters under the mandated program.

During the audit period, the city constructed new animal shelters and underwent renovation work on existing animal shelters. These improvements have been an ongoing project for the City of Los Angeles that involved a ballot measure in the November 2000 general election. In that general election, the voters passed Proposition F, which allowed the city to issue bonds for the purposes of constructing new animal shelter facilities and fire stations.

The city provided background information on this project for our review. After reviewing the information provided, we determined that the terms of Proposition F required that the city's taxpayers would fund the construction projects through additional levies made to their property taxes. The city's taxpayers have been and are still currently assessed property taxes in amounts specifically for the purpose of retiring the Proposition F bonds. Therefore, the city's taxpayers are funding both the entire bond principal and interest amounts. Accordingly, we determined that this non-discretionary revenue source was used to build the city's animal shelters and none of the city's discretionary general fund moneys were involved.

While the city performed the required analysis to determine that additional shelter space was needed to provide additional capacity in order to comply with the provisions of the Hayden Bill, restricted resources funded the construction costs for the additional capacity, not the city's general fund. Therefore, the city did not incur any increased costs to construct/remodel its animal shelters under Government Code section 17514.

City's Response

First, there should not seem to be any dispute whether there was a cost mandated by the State. The costs are clearly identified as reimbursable costs in the Controller's claiming instructions for the Hayden Bill which meets all the requirements of Section 17514 above.

The Controller's issue seems to be, are these local revenues or "proceeds of taxes." The state has the right to preclude the City from being reimbursed for state, federal or grant funds, but not for local revenues which are proceeds of taxes.

On January 31, 2001, the Los Angeles City Council adopted a resolution providing for the issuance and sale of the City of Los Angeles General Obligation Bonds authorized by the voters by Proposition F, in an aggregate principal amount not to exceed \$201.3 million for a variety of local projects and services. The Council identified up to \$36.5 million for animal shelter facilities. These are clearly local revenues and to the extent the funds are used to pay for state mandate programs, there should be reimbursed by the state.

A similar issue was contested in *Redevelopment Agency v. Commission on State Mandates* (1997) 55 Cal.App.4th 976. The court set forth the following analysis:

The California Supreme Court's summary of the history and substance of the law applicable to state mandates, commented: "Through adoption of Proposition 13 in 1978, the voters added article XIII A to the California Constitution, which 'imposes a limit on the power of state and local governments to adopt and levy taxes. [Citation.] [Citation.] The next year, the voters added article XIII B to the Constitution, which 'impose[s] a complementary limit on the rate of growth in governmental spending.' [Citation.] These two constitutional articles 'work in tandem, together restricting California governments' power both to levy and to spend for public purposes.' [Citation.] Their goals are 'to protect residents from excessive taxation and government spending. [Citation.] [Citation.]" (*County of San Diego v. State of California*, supra, 15 Cal.4th at pp. 80-81.)

In *County of San Diego v. State of California*, supra, 15 Cal.4th at page 81, the Supreme Court explained that section 6 represents recognition that together articles XIII A and XIII B severely restrict the taxing and spending powers of local agencies. The purpose of the section is to preclude the state from shifting financial responsibility for governmental functions to local agencies, which are ill equipped to undertake increased financial responsibilities because they are subject to taxing and spending limitations under articles XIII A and XIII B. (*County of San Diego v. State of California*, supra, at p. 81.)

In *County of Placer v. Corin* (1980) 113 Cal.App.3d 443, 451 [170 Cal.Rptr. 232], the court defined "proceeds of taxes" in this way: "Under article XIII B, with the exception of state subventions, the items that make up the scope of 'proceeds of taxes' concern charges levied to raise general revenues for the local entity. 'Proceeds of taxes,' in addition to 'all tax revenues' includes 'proceeds ... from ... regulatory licenses, user charges, and user fees [only] to the extent that such proceeds exceed the costs reasonably borne by such entity in providing the regulation, product or service....' (§ 8, subd. (c).) (Italics added.) Such 'excess' regulatory or user fees are but taxes for the raising of general revenue for the entity. [Citations.] Moreover, to the extent that an assessment results in revenue above the cost of the improvement or is of general public benefit, it is no longer a special assessment but a tax. [Citation.] We conclude 'proceeds of taxes' generally contemplates only those impositions which raise general tax revenues for the entity." (Italics added.) (Id. at 980- 984.)

In summary, the courts have held, and the Commission will follow suit in holding, that Proposition F funds are clearly proceeds of taxes and local revenue and to the extent they were used to pay for state mandated costs associated with the increased cost of building animal shelters due to the Hayden bill, should be reimbursed by the State.

SCO's Comment

The draft report contains our response to the city's request to consider reimbursement for animal shelter construction costs under the section entitled "Other Issues." In our response, we stated that such costs were not reimbursable because the construction costs incurred were funded entirely by the city's taxpayers via property tax assessments. However, the city attached to its draft report response a legal argument suggesting that such costs should be reimbursable under the mandated program. We submitted the city's legal arguments to SCO legal counsel for follow-up. Based upon our legal counsel's guidance, we will revisit this issue if necessary.

**ISSUE 2—
Audit findings and the
audit process**

The city provided three separate documents (Attachment) in response to the draft audit report. These documents consisted of:

- Letter to State Controller John Chiang from Brenda Barnette, General Manager of Animal Control Services
- Bullet Point List containing various comments related to the audit, and
- Summary of Department's Response to Finding 8 – Prop F costs

Our comments related to the city's response concerning Proposition F is noted above. We will address our comments to the first two responses provided by the city below.

Letter to Controller John Chiang

The letter from Animal Services Department General Manager Brenda Barnette contains a number of allegations about the SCO audit process that misrepresent what occurred during the course of audit fieldwork. Ms. Barnette was not directly involved in the audit process. We documented the actual sequence of events that transpired during the audit process, as described below. Our comments relate to the main points that appear in Ms. Barnette's letter to the Controller.

“Unreasonable time constraints imposed . . . on the Department.”

City's Response

Due to the unreasonable time constraints imposed by the State on the Department, substantial and delinquent demand made by the State that the City provide detailed documentation for audit periods as long as 12 years, and strong likelihood that the [sic] with sufficient and fair notice to the City the actual reimbursement to the City would be closer to the actual amounts billed, the Department of Animals Services recommends that the City of Los Angeles direct the State of California to immediately and fully reimburse all amounts claimed by the Department of Animal Services that have not been paid by the State.

SCO's Comment

The audit began with an entrance conference held on April 28, 2009. In November 2009, further work on the audit was temporarily discontinued when the Audit Manager overseeing the project transferred to another unit within the SCO. Subsequently, the audit was transferred to another Audit Manager and Auditor-In-Charge (AIC) for completion.

This new audit group met with Animal Services Department representatives and their mandated cost consultant on July 19, 2010, to resume fieldwork for the audit. At that time, the city was given notice that a final audit report would be issued no later than April 2011, nine months later. We provided department representatives with a status report documenting where things stood with the audit as of that date. During the next four days, the SCO Audit Manager visited four of the city's animal shelters to gather information on how the city operated its animal shelters, while the AIC worked with department employees to gather information in support of claimed costs.

Subsequent to the July 19, 2010 meeting, the city's mandated cost consultant was no longer involved in the audit process (i.e., did not participate in any audit discussions with department representatives nor had any contact with SCO auditors with questions or concerns about the audit as it progressed).

At the end of this first week (July 22, 2010), we conducted another status meeting with department representatives to address some of the issues we noted and request documents to support training costs, computer software costs, care and maintenance costs (labor as well as materials and supplies), increased holding period costs, lost-and-found lists costs, non-medical records, and necessary and prompt veterinary care costs. We then discussed each cost component in detail with the department staff and discussed which types of expenditures would be reimbursable. We addressed the criteria for reimbursement found in the program's parameters and guidelines, and possible audit findings.

We also discussed in detail the support needed for care and maintenance expenditures and even identified the city's expenditure accounts that probably contained the information (expenditure account 6020 – Operating Expenses, and account 4580 – Animal Food Expenses). When we asked about actual expenditure information, department representatives had no knowledge of any actual expenditure information that was available. We were informed that the department only worked with budgeted information. We suggested that the department contact the City Controller's Office for actual cost data.

Over the weeks that followed, we maintained constant contact with department representatives via telephone and e-mail. The AIC revisited the department during the week of October 19, 2010, for a second week of fieldwork. At that time, we provided department representatives with a detailed write-up of our preliminary findings to date. This handout also provided a list of documentation still needed to complete calculations for training, computer equipment and software license renewal, care and maintenance, lost-and-found lists, and veterinary care.

At the conclusion of this additional week of fieldwork, we conducted another status meeting with department representatives addressing the progress made that week. We provided the department another detailed handout containing information relating to the lack of documentation for some of the cost components. We again addressed the missing documents related to the care and maintenance expenses we previously requested. The department staff stated they were still working on retrieving expenditure amounts from accounts 6020 – Operating Supplies, and 4580 – Animal Food. The department stated it was still in the process of determining the proration of time attributed to the function of care and maintenance by some key employee classifications. At this point, the city still was not able to provide any supporting documentation for part of lost-and-found lists costs, all veterinary care costs, and part of the computer software costs.

On October 28, 2010, per the department's request, we sent a document containing details about our analysis of the city's Chameleon database information. We addressed that our calculations were based on the raw animal data provided by the department from its system. We provided details of our calculations for the annual census of animals and the number of eligible animals per each fiscal year in the audit period. We also provided a list of the excluded animals that we noted during our review of the animal data. To date, the city has not provided any objections to our analysis of its Chameleon data.

On November 23, 2010, we made another attempt to request documentation that had not yet been provided. This included the expenditure amounts for care and maintenance costs, veterinary expenditures relating to reimbursable activities, and the proration analysis for the Chameleon software that relates to the mandated activities. All of these items were originally requested in July 2010.

On January 12, 2011, we held an exit conference with representatives of the Animal Services Department and addressed each audit finding in detail. The city's mandated cost consultant did not attend this meeting. We discussed how we calculated the allowable costs and noted the documentation that was still needed, primarily the actual cost information supporting materials and supplies expenditures for care and maintenance. At the exit conference, we advised department representatives again that we would be issuing a final report no later than early April. We also explained that even though a final report was issued, we would still consider additional information that the city provided and adjust the final audit report as appropriate.

A short time after the exit meeting, we were advised that Linda Barth, our main contact person for the audit, and the Department's Assistant General Manager, had left the department. The department did not provide any more documentation to us after the exit meeting, up to the issuance of the draft report on March 10, 2011.

As noted above, we have worked extensively with city representatives to determine allowable costs to the maximum extent possible.

"The claims filed by the City were submitted timely and were properly documented."

City's Response

Full reimbursement is proper because the claims filed by the City were submitted timely (except as noted), and were properly documented according to all of the State's guidelines and rules in place at the time each request for reimbursement was submitted.

SCO's Comment

The city did not provide supporting documentation for all of its costs claimed, consistent with the rules in place when the claims were filed. The documentation requirements for the city's mandated cost claims are contained within the parameters and guidelines adopted by the CSM on February 28, 2002, and amended on January 26, 2006. The parameters

and guidelines require that all costs claimed be traceable to source documents that show evidence of the validity of such costs and their relationship to this mandate.

The city is responsible for maintaining documentation for the period the claims were subject to audit. However, the department representatives indicated to us that some of the supporting documentation has been destroyed, specifically invoices supporting materials and supplies costs related to animal care and maintenance activities.

“The audit [must] be reopened to [reconsider] Prop F funds.”

City’s Response

If the audit must be closed to meet a statutory deadline, we additionally request that the audit be reopened to allow adequate time to consider acceptance of offset allowance for Prop F funds expended on facility construction and other expenditures to comply with the Hayden Bill.

SCO’s Comment

As noted previously in our comments above, we advised department representatives that we would welcome any additional documentation subsequent to the issuance of the final audit report that supports additional allowable costs. We also advised that we would adjust the audit results as appropriate and reissue the audit report.

In light of the city’s legal argument related to Prop F funds, we have requested further guidance from our legal counsel. We will adjust the audit results as appropriate based on the guidance that we receive concerning this issue.

“The State’s audit [was] untimely, lack[ed] proper notification, and [is] contrary to the general purposes of good government.”

City’s Response

For all the reasons stated in the attached, the Department recommends that the city reject the State’s audit as untimely, lacking proper notification, and contrary to the general purposes of good government, and as a result, reject the audit findings.

SCO’s Comment

Our audit was conducted in accordance with *Generally Accepted Auditing Standards*. These standards require that we obtain sufficient and relevant evidence that adequately supports the audit findings and conclusions. We did this. As noted above, the audit was performed within the statutory time period and the city was provided proper notification of audit issues. As noted in our audit report, the city filed its mandate claims with significant errors and omissions.

“Audit process . . . should support the good faith and honest efforts of local agencies to comply with the mandate.”

City’s Response

Rather than reducing the burden on local animal care and control agencies of implementing a valuable State-mandated law, the Hayden Bill, the entire audit process by the State Controller’s Office is resulting in numerous large financial penalties to local jurisdictions for following the rules of the State and, therefore, for supporting the mandates of the Hayden Bill in good faith, and for reporting expenses honestly. The State Mandates reimbursement process, including the audit, should accomplish just the opposite, that is, it should support the good faith and honest efforts of local agencies to comply with the mandate.

SCO’s Comment

Our audit determined whether costs claimed represent increased costs resulting from the mandated program. The city is not entitled to mandated reimbursement for costs not allowable under the parameters and guidelines.

A city’s good faith and honest effort is not relevant in determining costs reimbursable under the mandate.

Bullet Point List of Comments Related to the Audit

The city provided a list of 31 bullet points related to our audit of its claims filed under the Animal Adoption Program for the audit period. Many of these bullet points contain comments that are unrelated to the audit findings, but rather are comments related to the audit process. Some of the city’s comments were already addressed in our comments related to the letter sent to the Controller by General Manager Barnette. Some of the bullet points have nothing to do with the audit findings; therefore we did not respond to them. The city’s bullet points are not numbered. Our responses below follow the same general headings used by the city.

Deadline

City’s Response

- The State Controller’s Office (State) extended the deadline for providing the Department’s response to the by two days to allow submission of additional material when the Department has requested 30 days. The State’s refusal to allow the time requested by the Department is based on the State’s April 6, 2011 deadline to file the audit in order to stay within the two-year statute of limitations that an audit must be completed within two years of initiation.
- The State’s refusal to allow additional time requested by the Department as allowed in the guidelines is attributable to the State’s delay, not that of the Department. The Department was initially contacted by the State Controller’s Office almost two years ago to schedule the audit. The entrance conference was held and for seven months the State auditors met with Department staff and documents were requested and provided. The Department provided over 200 hours to the audit. In November 2009, the State discontinued contact with the Department. In about June 2010 the Department was contacted by the State again, a new State auditor was assigned. A second entrance conference was held and the State periodically contacted the Department to request information. The

Department provided at least 250 hours in support of this audit. Over 450 hours has been allocated by the Department to support the continuous audit process mostly because of the continual demand of the State auditors for exact detailed information of expenditures including vendor, year, and detailed description of each line item expenditure included in the request for reimbursement.

- The Department has acted in good faith to comply with all audit requests. In a few minor cases, the State auditor agreed to accept some samples of invoices instead of full and complete detailed verification.
- The State issued the draft audit in March, 2011. As of today, the State auditor is still determining methods to allocate various costs among what the State determines to be eligible and ineligible costs.

SCO's Comment

We advised Animal Services Department representatives in July 2010 that actual cost information was needed to support materials and supplies costs for care and maintenance. We also informed the city that it would have 15 days to respond to the draft report findings and that we would issue a final audit report no later than April 2011. The city did not respond to our e-mails and telephone calls and did not take an active role in supporting these allowable costs until after the issuance of the draft audit report on March 10, 2011. All of the additional information provided by the city should have been available at the beginning of the audit in April 2009.

We also advised city representatives that even after we issued a final report, the audit findings could be updated and a revised report would be issued based upon new information that became available.

The SCO has devoted significant hours of employee time to this project, so there is a considerable amount of involvement by both parties. Contrary to the city's comments, we are not still determining methods to allocate costs for our audit findings. Instead, we were waiting for the city to supply the information that we requested long ago so that we could put it into the actual cost formula to determine allowable care and maintenance costs. We reviewed the additional documentation the city provided after the issuance of the draft report. As a result, allowable costs increased by \$61,229.

Additional Information Submitted or Eligible

City's Response

- The Department is providing additional detailed information to the State auditors as part of its response to the draft audit in the format and level of detail acceptable to the State auditors covering expenditures for medical supplies, cleaning supplies, animal food, staff training, and Prop F costs.
- Information for just the medical supplies, cleaning supplies, and animal food in a linked spreadsheet contains 4.5 million bits of information. These three accounts cover categories of expenditures that are essential for maintenance of animals. Additional information could be provided for other qualifying expenditures in other accounts, such as Account 4460, Private Vet Care, but there are not sufficient time or staff resources to continue to provide millions of items of information going back 12 years

for yet-to-be determined eligibility criteria. Some spay/neuter surgeries for adopted animals are required by the Hayden Bill. Also, details for purchases of eligible cleaning and maintenance supplies from accounts other than Account 6020 have not been calculated due to lack of time and staff resources.

- The Department has requested that the State consider reimbursement for medical supplies. (Account 3190) The State auditors had determined these costs were not eligible, but per our request, agreed to consider them. The State Controller has not yet developed a method to allocate these costs among their determination of what are eligible and ineligible costs. Today the Department is submitting detailed statements of expenditures by year and by line item for medical supplies for the audit period. Stray animals taken to the shelter have unknown medical conditions until they are given a check up and examined by a veterinarian. Animals are given two vaccinations, and medication for deworming and flea control. This treatment is standard. If the animal is ill, additional treatment or medications could include IV fluid, splints, X-rays, or other treatment. The State auditors have yet to develop a formula for allocation of these costs.
- The State auditor has agreed that cleaning and other supplies (Account 6020) would be considered if expenses are determined to be eligible and if the Department is able to provide detailed records of expenditure by vendor and by invoice line item for all years audited. The Department was able to verify the largest vendors. These records are being submitted to the State Controller today.
- The State auditor has agreed that animal food (Account 4580) would be considered if the Department is able to provide detailed records of expenditure by vendor and by invoice line item for all years audited. These records are being submitted today.
- The State auditors rejected Department costs incurred in 2000 to provide initial training of staff for use of a new central database system called Chameleon purchased by the Department to comply with the requirements of the Hayden Bill. The Department was required by the State auditors to provide a list of all employees in the Department in the year 2000 who received the training in order to be reimbursed for it – a 10 years after the training was provided. No prior request to maintain these employee records was provided to the City. The Department was able to retrieve the records but only after considerable expense and time.

SCO's Comment

We understand the eligible and ineligible activities under this mandated program. We communicated this information to Animal Services Department personnel multiple times.

During the audit process, Animal Services Department representatives had a difficult time obtaining actual cost information from the city's accounting system. As an alternative, we suggested that they prepare a list of costs expended by vendor. We noted that if the city could provide sample invoices from these vendors, we could verify that the costs incurred for these vendors were for care and maintenance activities. The city could then prepare cumulative reports of expenditures for these vendors, which we would in turn accept for the entire audit period, rather than requiring invoices or other supporting documents. This is what department representatives have now provided. Based on the additional supporting documentation provided, we revised the audit finding amount for Finding 3—Unallowable Care and Maintenance costs, as appropriate.

The city states that "The State auditors rejected Department costs incurred in 2000 to provide initial training of staff for use of a new central database system called Chameleon purchased by the Department to comply with the requirements of the Hayden Bill." However, this statement is incorrect. In the draft audit report, allowable training costs for FY 1999-2000 totaled \$3,897. This represented costs for training 51 new employees identified by the department, although no support was provided other than a training agenda being used currently within the city's animal shelters for newly hired staff. Subsequent to the issuance of the draft report, the city requested that we consider allowing 2-3 hours to train all 282 employees on payroll within the Animal Services Department. However, the city has no documentation available to support that any of these employees actually received any training concerning the requirements of the Hayden Bill.

Response to Audit Process and Draft Audit

City's Response

- Claims in the early years of the Hayden mandate (1999-2002) were built on averages and estimates before the publication of the current guidelines. According to the current guidelines as interpreted by the State auditor, the City's claims were uniformly overstated as were claims by virtually all local agencies. The State Controller's Office has indicated that the State audits of local animal care agencies typically reduce the amount reimbursed to about 50% of the amount originally claimed. For example: Contra Costa County billed the State \$11,457,157 for Hayden Bill expenses. The State allowed \$5,521,096 of the amount submitted and did not allow \$5,930,661. Disallowed costs exceeded allowed costs for seven of the nine local jurisdictions audited by the State Controller's Office where audits are posted on their web site.
- All claims were filed through a third party consultant, Maximus, who provided guidance in the formulas and claim amounts. Maximus gathered information and used templates and formulas set up based on the 2002 guidelines for the periods containing most of the questioned costs.
- A court of appeals decision in May 2010 regarding the definition of "business-day" leaves both Saturday and Sunday as non-business days for purposes of calculating the hold days. The auditors have been advised by state legal counsel to apply this standard back to 1999. This has an unknown effect on the reimbursement. Our number of eligible animals decreases if we euthanized before newly defined four-day period. This is more likely a problem in the earlier years when shelter capacity was small. On the other hand, the average-holding-days calculation increases because typically we would have to hold animals longer if Saturday, Sunday, and Monday do not count as hold days. This issue needs significant further research and discussion for the audit and for the future when Hayden is no longer suspended.
- The State is in arrears to the City for a little more than \$5 million in past claims not yet reimbursed. After further adjustment and submissions expected, the amount the auditors find to be overstated is just about \$5 million.
- Hourly rates throughout the audit period are actually higher than the City's claim. The City used Wages and Counts averages, while auditing actual payrolls gave a slightly increased hourly rate for all classifications.
- All computer hardware, software, and data management staffing claims (related to Chameleon) must be prorated because not all of Chameleon's modules are strictly for mandated activities of animal care (i.e. Chameleon also does licensing, citation, receipts, etc.), even though the equipment purchases were required to comply. The City claimed 100%, the auditors agreed to a 50% pro-ration.

- The City used the annual budget total attributed to animal care to calculate the per animal day cost. The State auditors pro-rated actual salaries of ACT staff only to narrowly define and ascertain care and maintenance eligibility. Department staff has submitted additional records of medical, cleaning, and animal food expenditures from the City's Financial Management Information System (FMIS) central accounting database.
- Annual animal census figures calculated by auditor are significantly different from the estimates used in claims in the first four years of reimbursement claims. The Department was not provided with any guidelines before submission of reimbursement requests and has not had an opportunity to verify that these calculations are supported by data.
- The City claimed reimbursement for dogs and cats in all of 1999 but the Hayden bill stipulated that reimbursement should not begin for dogs and cats until July 1999.
- The entire shelter staff working on Saturdays was claimed for reimbursement for the first four claim years; according to the auditors, only those staff that specifically have to be on duty because of being open to the public can be claimed, as was done in later years.
- According to State auditors, indirect costs were improperly calculated in the first years (understated) but overall were overstated because in several other findings categories the auditors are disallowing many of the overstated hours for care and medical wellness.
- State auditors were provided documentation about the Prop F Bond projects with a request to consider pro-rated reimbursement since one of the reasons for expanding the shelter system was to meet Hayden requirements. Auditors determined that because property taxes were raised to fund the bond, it was not eligible for reimbursement. The preparation of the Master Facilities Study (by a consultant) may be reimbursable.
- According to the State auditor, the City's claims included overstated medical costs. Hayden only reimburses for routine wellness checks for incoming animals, not special care, not rabies vaccination, and not emergency care, because the latter was already required of shelters by state law. The City had claimed nearly all medical supplies and a high level of medical staff. For the audit, we performed a time study to determine the actual average wellness exam time.

SCO's Comment

The first bullet point in this section refers to audits of other local agencies that the SCO has performed under the Animal Adoption Program. The purpose of this comment is unclear, since audits of other local agency claims have nothing to do with SCO's audit of claims filed by the City of Los Angeles.

The response also refers to the city's claims filed for FY 1999-2000 through FY 2001-02 and makes the statement that the claims were overstated because they were based on estimates. This statement is inconsistent with the specifics documented in the draft audit report. None of the unallowable costs for this time frame were based solely on the use of estimates. The city even notes a few bullet points later that we used employee productive hourly rates that were higher than the estimated rates used in the city's claims.

Most of the unallowable costs were for the cost component of Holding Period. For this cost component, the city's claims included costs for employee classifications that are already reimbursable under other cost components of the mandated program, as well as certain other employee classifications that performed non-mandated activities and were not

reimbursable under the mandated program just because they were working on Saturday. Another significant area of unallowable costs occurred for the Care and Maintenance of Dogs and Cats cost component. For this cost component, costs were unallowable primarily because animal census figures were understated, thereby inflating the cost per animal per day.

The city's comments point out that the audit adjustment is about the same amount that is currently owed to the city for its filed claims. This comment infers that the SCO audit process included an agenda to reduce the State's liability to zero. This comment is invalid as we increased allowable costs for the cost component of Non-Medical Records by 227% over the amount claimed by the city during the audit period.

The city also had concerns about the proration of employee classifications performing care and maintenance activities. We don't understand the comment suggesting that our analysis was narrowly defined. Instead, our proration was based on discussions held with Animal Services Department management regarding the percentage of time spent on these activities by various employee classifications. We noted the calculations in the audit report. The city is welcome to provide a more comprehensive analysis for reconsideration if the information that they already agreed was correct is actually incorrect.

We concur that the animal census figures used by the city in its claims are misstated. However, the city's statement that there was a lack of guidelines for reimbursement is incorrect. The specifics of animal census data required for reimbursement has always existed within the language of the applicable cost components within the parameters and guidelines as adopted by the CSM. The city's statement that they have not been able to verify the animal census calculations is incorrect. We conferred with the department's Senior Systems Analyst when we obtained and analyzed animal census data from the city's Chameleon system database. We explained our analysis of the animal data, including which animals were excluded and why. We were told that the animal census numbers that we were using to determine allowable costs was correct. The city is welcome to provide a more comprehensive analysis for reconsideration if the information that they already agreed was correct is actually incorrect.

The city states:

Hayden only reimburses for routine wellness checks for incoming animals, not special care, not rabies vaccination, and not emergency care, because the latter was already required of shelters by state law. The City had claimed nearly all medical supplies and a high level of medical staff. . . .

This statement is incorrect. The parameters and guidelines (Section IV.B.9—Necessary and Prompt Veterinary Care) identify the following reimbursable activities:

The following veterinary procedures, if conducted, are eligible for reimbursement:

- An initial physical examination of the animal to determine the animal's baseline health status and classification as "adoptable," "treatable," or "re-habilitatable."

- A wellness vaccine administered to “treatable” or “adoptable” animals.
- Veterinary care to stabilize and/or relieve the suffering of a “treatable” animal.
- Veterinary care intended to remedy any applicable disease, injury, or congenital or hereditary condition that adversely affects the health of a “treatable” animal or that is likely to adversely affect the animal’s health in the future, until the animal becomes “adoptable.”

The language under this cost component goes on to note animal population exclusions and veterinary care exclusions. The requirements also state that reimbursement is limited to veterinary procedures performed during the holding period and is only applicable to animals that died during the holding period plus those that were euthanized after the required holding period. The city provided additional documentation for medical costs incurred within expenditure account 3190, Medical Supplies. However, reimbursable costs are co-mingled with non-reimbursable costs in the documentation provided. Therefore, we cannot make a determination at this time of the extent to which the city incurred allowable costs under the mandated program.

The city conducted a time study supporting the amount of time spent to perform the first two activities cited in the parameters and guidelines. We requested that the city also provide information relating to costs incurred for the wellness vaccines administered. While the city has supplied materials and supplies costs incurred for medical supplies in total, the city has not yet provided specific information relating to vaccine costs. The second two bullet points describe activities that are not suitable for a time study because they are not repetitive activities. The costs for salaries and benefits, and materials and supplies for these procedures must be supported by actual cost information that also notes that the procedures were performed during the required holding period. The city did not maintain or provide this kind of detailed information for the procedures performed by its medical staff.

Reimbursement and Audit Procedures

City’s Response

- The Department was not given notice at beginning of audit period and not given notice at beginning of audit periods of requirements for methods to follow or records to maintain.
- Other minor areas in which follow up will result in slight increases in the reimbursement calculations: Start-up training information has been retrieved by the Department’s systems staff and verified by the payroll section and was provided to the auditor.
- The City questions the Controller’s retroactive application of the Purifoy decision that Saturday is not a business day, and of the description of the scope of work reasonably required to be performed in accordance with the mandate on a Saturday. The City’s believes retroactive application of the Purifoy case is improper. The Commission on State Mandates was silent as to the definition of business day. The court held that although the Hayden Bill requires animal shelters to hold animals longer or be open for business on a weekday evening or Saturday, Saturday is not a business day for the purposes of calculating how long to hold an animal

before it can be released for adoption or disposal. The decision, published on March 26, 2010, is clearly applicable to all future claims. Applying the rule retroactively, as the State has done, is unfair and tends to inhibit or defeat the purpose of the Hayden Bill of extending the holding period so that animals are treated humanely (redeemed or adopted).

- The City followed all guidelines provided by the State and available at the time each request for reimbursement was filed.
- The State waited for as long as 12 years after the close of an audit period to conduct an audit of the claimed expenses incurred during that audit period, then requested a level of detailed proof (original document as proof of each line item expenditure, including name of vendor, quantity, and description of each item purchased) not previously requested or required. Many vendors have destroyed the detailed information (invoices) as the time exceeds any Statute of Limitations. The City General Services Department destroyed copies of invoices because these times exceeded the required records retention period. Requiring the City to guess in what future distant period the State may decide to audit records in any given year and be forced to retain all detailed expenditure records is a burden that is inefficient and unnecessary.
- Initially, the State accepted budgeted expenditures as sufficient proof of expenditure. However, in this audit, the State accepted only detailed proof of actual expenditures and rejected budgeted amounts. This surprise change in documentation requirements is burdensome.
- The State reimbursement process is inefficient. For example, due to the lack of prior notice as to the specific levels and form of proof required, lack of adequate prior guidelines, and delay in audit, the Department was required to allocate well over 450 hours of staff time to respond to this audit - at a time when both the State and City are undergoing significant staffing reductions and furloughs. Administration of animal care and control services depends on efficiency. Inefficiency of any type leads to fewer adoptions, less revenue, less policing, and more euthanasia. This is contrary to the intent of the Hayden Bill.
- The State process of sending the notices of the entrance conferences and exit conferences to the City of Los Angeles Department of Animal Services only, and the draft final audit to the City Controller only, and copying the Department is confusing.

SCO's Comment

The city notes its disagreement with our retroactive application of the Appellate Court decision in the case of *Purifoy et al. v. Howell*. In that case, Saturday was determined NOT to be a business day for the purposes of determining the required holding period for dogs. For the purposes of our audit, this affected the allowable cost calculations for unallowable care and maintenance costs (Finding 3), and misstated necessary and prompt veterinary care costs (Finding 7). We contend that the court decision defines the legal definition of a business day for the required holding period as of the date that the statute was enacted in 1998. The decision published in the *Purifoy vs. Howell* court case did not change the verbiage in the parameters and guidelines nor did the definition of a business day change when the court case was published on March 26, 2010. The holding period requirement per the Hayden Bill has always read "four or six 'business days' after the day of impoundment." We acknowledge that the court's decision did not take into consideration the effect that this decision would have on mandated cost claims filed by local agencies.

The city's statement that they were not given notice at the beginning of the audit period nor given notice of methods to follow or records to maintain are both incorrect. We sent a letter dated April 7, 2009, to Laura Chick, City Controller, documenting the beginning of our audit of the city's mandated cost claims for FY 1998-99 through FY 2007-08 (excluding FY 2003-04 and FY 2004-05). A copy of this letter was also sent to Edward Boks, General Manager of the city's Animal Services Department.

The requirements of methods to follow in order to compute reimbursement under the Animal Adoption Program have always been contained within the cost components of the parameters and guidelines. Parameters and guidelines section VI requires the city to maintain the supporting documentation, as no funds were appropriated for the mandated program.

However, the city goes on to state:

The State waited for as long as 12 years after the close of an audit period to conduct an audit of the claimed expenses incurred during that audit period, then requested a level of detailed proof (original document as proof of each line item expenditure, including name of vendor, quantity, and description of each item purchased) not previously requested or required. Many vendors have destroyed the detailed information (invoices) as the time exceeds any Statute of Limitations. The City General Services Department destroyed copies of invoices because these times exceeded the required records retention period. Requiring the City to guess in what future distant period the State may decide to audit records in any given year and be forced to retain all detailed expenditure records is a burden that is inefficient and unnecessary.

The city overstates the amount of time that has elapsed since their initial claims were filed. The city's Animal Adoption Program claims for FY 1998-99, FY 1999-2000, and FY 2000-01 were all filed on September 10, 2002. We initiated an audit of these claims six and one-half years after they were filed. We had statutory authority under Government Code section 17558.5 to audit these claims, as no moneys were appropriated.

We are uncertain why the city would expect its vendors to maintain supporting documentation for its mandated cost claims. The city is responsible for maintaining relevant supporting documentation. The city's statement that it would need to guess when the SCO would actually conduct an audit is meaningless in light of the requirements stated in section VI of the parameters and guidelines of the mandated program, as described above. These requirements were adopted by the CSM, not the SCO. It appears that the city's mandated cost consultant failed to clarify this information with city representatives. The city is entitled to reimbursement from the State for the increased costs that it incurred to comply with the requirements of the mandated program if it follows the provisions contained within the parameters and guidelines describing what the requirements are, and applies them accordingly. If city representatives have questions pertaining to the Animal Adoption Program, we encourage them to contact our office and we will assist them.

The city states, "... in this audit, the State accepted only detailed proof of actual expenditures and rejected budgeted amounts. This surprise change in documentation requirements is burdensome." We are uncertain how the city arrived at this determination. We audit to the requirements of the adopted parameters and guidelines. These criteria require that all costs claimed be traceable to source documents. Budgeted information is not a source document that shows evidence of the validity of such costs.

Attention: James L. Spano, Chief
Mandated Cost Audits Bureau, Division of Audits

Re: Response to Draft Audit Report of the City of Los Angeles Animal Adoption Program

Dear Mr. Chiang:

Attached are the main points of the response by the Department of Animal Services to the Draft Audit of the State Controller's Office, and a rough draft response to audit finding number 8 regarding eligibility of Prop F funding for construction of animal care centers. These attachments have been provided to the City Controller, Wendy Greuel because the draft audit was addressed to Ms. Greuel.

Due to the unreasonable time constraint imposed by the State on the Department, substantial and delinquent demand made by the State that the City provide detailed documentation for audit periods as long ago as 12 years, and strong likelihood that the with sufficient and fair notice to the City the actual reimbursement to the City would be closer to the actual amounts billed, the Department of Animal Services recommends that the City of Los Angeles direct the State of California to immediately and fully reimburse all amounts claimed by the Department of Animal Services that have not been paid by the State. Full reimbursement is proper because the claims filed by the City were submitted timely (except as noted), and were properly documented according to all of the State's guidelines and rules in place at the time each request for reimbursement was submitted. If the audit must be closed to meet a statutory deadline, we additionally request that the audit be reopened to allow adequate time to consider acceptance of offset allowances for Prop F funds expended on facility construction and other expenditures to comply with the Hayden Bill.

John Chiang, California State Controller
Page 2

For all the reasons stated in the attached, the Department recommends that the City reject the State's audit as untimely, lacking proper notification, and contrary to the general purposes of good government, and as a result, reject the audit findings.

Rather than reducing the burden on local animal care and control agencies of implementing a valuable State-mandated law, the Hayden Bill, the entire audit process by the State Controller's Office is resulting in numerous large financial penalties to local jurisdictions for following the rules of the State and, therefore, for supporting the mandates of the Hayden Bill in good faith, and for reporting expenses honestly. The State Mandates reimbursement process, including the audit, should accomplish just the opposite, that is, it should support the good faith and honest efforts of local agencies to comply with the mandate.

Should you have any questions, please contact John Forland of our staff.

Thank you.

Brenda F. Barnett, General Manager
Department of Animal Services

Draft Audit of Hayden Bill Mandated Reimbursement Requests
1998-99 through 2007-08**

Bullet Points

Deadline:

- The State Controller's Office (State) extended the deadline for providing the Department's response to the by two days to allow submission of additional material when the Department has requested 30 days. The State's refusal to allow the time requested by the Department is based on the State's April 6, 2011 deadline to file the audit in order to stay within the two-year statute of limitations that an audit must be completed within two years of initiation.
- The State's refusal to allow additional time requested by the Department as allowed in the guidelines is attributable to the State's delay, not that of the Department. The Department was initially contacted by the State Controller's Office almost two years ago to schedule the audit. The entrance conference was held and for seven months the State auditors met with Department staff and documents were requested and provided. The Department provided over 200 hours to the audit. In November 2009, the State discontinued contact with the Department. In about June 2010 the Department was contacted by the State again, a new State auditor was assigned. A second entrance conference was held and the State periodically contacted the Department to request information. The Department provided at least 250 hours in support of this audit. Over 450 hours has been allocated by the Department to support the continuous audit process mostly because of the continual demand of the State auditors for exact detailed information of expenditures including vendor, year, and detailed description of each line item expenditure included in the request for reimbursement.
- The Department has acted in good faith to comply with all audit requests. In a few minor cases, the State auditor agreed to accept some samples of invoices instead of full and complete detailed verification.
- The State issued the draft audit in March, 2011. As of today, the State auditor is still determining methods to allocate various costs among what the State determines to be eligible and ineligible costs.

Additional Information Submitted or Eligible:

- The Department is providing additional detailed information to the State auditors as part of its response to the draft audit in the format and level of detail acceptable to the State auditors covering expenditures for medical supplies, cleaning supplies, animal food, staff training, and Prop F costs.
- Information for just the medical supplies, cleaning supplies, and animal food in a linked spreadsheet contains 4.5 million bits of information. These three accounts cover categories of expenditures that are essential for maintenance of animals. Additional information could be provided for other qualifying expenditures in other accounts, such as Account 4460, Private Vet Care, but there are not sufficient time or staff resources to continue to provide

1 of 5

millions of items of information going back 12 years for yet-to-be determined eligibility criteria. Some spay/neuter surgeries for adopted animals are required by the Hayden Bill. Also, details for purchases of eligible cleaning and maintenance supplies from accounts other than Account 6020 have not been calculated due to lack of time and staff resources.

- The Department has requested that the State consider reimbursement for medical supplies. (Account 3190) The State auditors had determined these costs were not eligible, but per our request, agreed to consider them. The State Controller has not yet developed a method to allocate these costs among their determination of what are eligible and ineligible costs. Today the Department is submitting detailed statements of expenditures by year and by line item for medical supplies for the audit period. Stray animals taken to the shelter have unknown medical conditions until they are given a check up and examined by a veterinarian. Animals are given two vaccinations, and medication for de-worming and flea control. This treatment is standard. If the animal is ill, additional treatment or medications could include IV fluid, splints, X-rays, or other treatment. The State auditors have yet to develop a formula for allocation of these costs.
- The State auditor has agreed that cleaning and other supplies (Account 6020) would be considered if expenses are determined to be eligible and if the Department is able to provide detailed records of expenditure by vendor and by invoice line item for all years audited. The Department was able to verify the largest vendors. These records are being submitted to the State Controller today.
- The State auditor has agreed that animal food (Account 4580) would be considered if the Department is able to provide detailed records of expenditure by vendor and by invoice line item for all years audited. These records are being submitted today.
- The State auditors rejected Department costs incurred in 2000 to provide initial training of staff for use of a new central database system called Chameleon purchased by the Department to comply with the requirements of the Hayden Bill. The Department was required by the State auditors to provide a list of all employees in the Department in the year 2000 who received the training in order to be reimbursed for it – a 10 years after the training was provided. No prior request to maintain these employee records was provided to the City. The Department was able to retrieve the records but only after considerable expense and time.

Response to Audit Process and Draft Audit:

- Claims in the early years of the Hayden mandate (1999-2002) were built on averages and estimates before the publication of the current guidelines. According to the current guidelines as interpreted by the State auditor, the City's claims were uniformly overstated as were claims by virtually all local agencies. The State Controller's Office has indicated that the State audits of local animal care agencies typically reduce the amount reimbursed to about 50% of the amount originally claimed. For example: Contra Costa County billed the State \$11,457,157 for Hayden Bill expenses. The State allowed \$5,521,096 of the amount submitted and did not allow \$5,930,661. Disallowed costs exceeded allowed costs for seven

of the nine local jurisdictions audited by the State Controller's Office where audits are posted on their web site.

- All claims were filed through a third party consultant, Maximus, who provided guidance in the formulas and claim amounts. Maximus gathered information and used templates and formulas set up based on the 2002 guidelines for the periods containing most of the questioned costs.
- A court of appeals decision in May 2010 regarding the definition of "business-day" leaves both Saturday and Sunday as non-business days for purposes of calculating the hold days. The auditors have been advised by state legal counsel to apply this standard back to 1999. This has an unknown effect on the reimbursement. Our number of eligible animals decreases if we euthanized before newly defined four-day period. This is more likely a problem in the earlier years when shelter capacity was small. On the other hand, the average-holding-days calculation increases because typically we would have to hold animals longer if Saturday, Sunday, and Monday do not count as hold days. This issue needs significant further research and discussion for the audit and for the future when Hayden is no longer suspended.
- The State is in arrears to the City for a little more than \$5 million in past claims not yet reimbursed. After further adjustment and submissions expected, the amount the auditors find to be overstated is just about \$5 million.
- Hourly rates throughout the audit period are actually higher than the City's claim. The City used Wages and Counts averages, while auditing actual payrolls gave a slightly increased hourly rate for all classifications.
- All computer hardware, software, and data management staffing claims (related to Chameleon) must be prorated because not all of Chameleon's modules are strictly for mandated activities of animal care (i.e. Chameleon also does licensing, citation, receipts, etc.), even though the equipment purchases were required to comply. The City claimed 100%, the auditors agreed to a 50% pro-ration.
- The City used the annual budget total attributed to animal care to calculate the per animal day cost. The State auditors pro-rated actual salaries of ACT staff only to narrowly define and ascertain care and maintenance eligibility. Department staff has submitted additional records of medical, cleaning, and animal food expenditures from the City's Financial Management Information System (FMIS) central accounting database.
- Annual animal census figures calculated by auditor are significantly different from the estimates used in claims in the first four years of reimbursement claims. The Department was not provided with any guidelines before submission of reimbursement requests and has not had an opportunity to verify that these calculations are supported by data.

- The City claimed reimbursement for dogs and cats in all of 1999 but the Hayden bill stipulated that reimbursement should not begin for dogs and cats until July 1999.
- The entire shelter staff working on Saturdays was claimed for reimbursement for the first four claim years; according to the auditors, only those staff that specifically have to be on duty because of being open to the public can be claimed, as was done in later years.
- According to State auditors, indirect costs were improperly calculated in the first years (understated) but overall were overstated because in several other findings categories the auditors are disallowing many of the overstated hours for care and medical wellness.
- State auditors were provided documentation about the Prop F Bond projects with a request to consider pro-rated reimbursement since one of the reasons for expanding the shelter system was to meet Hayden requirements. Auditors determined that because property taxes were raised to fund the bond, it was not eligible for reimbursement. The preparation of the Master Facilities Study (by a consultant) may be reimbursable.
- According to the State auditor, the City's claims included overstated medical costs. Hayden only reimburses for routine wellness checks for incoming animals, not special care, not rabies vaccination, and not emergency care, because the latter was already required of shelters by state law. The City had claimed nearly all medical supplies and a high level of medical staff. For the audit, we performed a time study to determine the actual average wellness exam time.

Reimbursement and Audit Procedures:

- The Department was not given notice at beginning of audit period and not given notice at beginning of audit periods of requirements for methods to follow or records to maintain.
- Other minor areas in which follow up will result in slight increases in the reimbursement calculations: Start-up training information has been retrieved by the Department's systems staff and verified by the payroll section and was provided to the auditor.
- The City questions the Controller's retroactive application of the Purifoy decision that Saturday is not a business day, and of the description of the scope of work reasonably required to be performed in accordance with the mandate on a Saturday. The City's believes retroactive application of the Purifoy case is improper. The Commission on State Mandates was silent as to the definition of business day. The court held that although the Hayden Bill requires animal shelters to hold animals longer or be open for business on a weekday evening or Saturday, Saturday is not a business day for the purposes of calculating how long to hold an animal before it can be released for adoption or disposal. The decision, published on March 26, 2010, is clearly applicable to all future claims. Applying the rule retroactively, as the State has done, is unfair and tends to inhibit or defeat the purpose of the Hayden Bill of extending the holding period so that animals are treated humanely (redeemed or adopted).

- The City followed all guidelines provided by the State and available at the time each request for reimbursement was filed.
- The State waited for as long as 12 years after the close of an audit period to conduct an audit of the claimed expenses incurred during that audit period, then requested a level of detailed proof (original document as proof of each line item expenditure, including name of vendor, quantity, and description of each item purchased) not previously requested or required. Many vendors have destroyed the detailed information (invoices) as the time exceeds any Statute of Limitations. The City General Services Department destroyed copies of invoices because these times exceeded the required records retention period. Requiring the City to guess in what future distant period the State may decide to audit records in any given year and be forced to retain all detailed expenditure records is a burden that is inefficient and unnecessary.
- Initially, the State accepted budgeted expenditures as sufficient proof of expenditure. However, in this audit, the State accepted only detailed proof of actual expenditures and rejected budgeted amounts. This surprise change in documentation requirements is burdensome.
- The State reimbursement process is inefficient. For example, due to the lack of prior notice as to the specific levels and form of proof required, lack of adequate prior guidelines, and delay in audit, the Department was required to allocate well over 450 hours of staff time to respond to this audit - at a time when both the State and City are undergoing significant staffing reductions and furloughs. Administration of animal care and control services depends on efficiency. Inefficiency of any type leads to fewer adoptions, less revenue, less policing, and more euthanasia. This is contrary to the intent of the Hayden Bill.
- The State process of sending the notices of the entrance conferences and exit conferences to the City of Los Angeles Department of Animal Services only, and the draft final audit to the City Controller only, and copying the Department is confusing.

Summary of Department's Response to Finding 8 - Prop F Costs

Controller Finding:

The City did not incur any increased costs to construct or remodel its animal shelters under Government Code section 17514. Government Code section 17514 states:

"Costs mandated by the state" means any increased costs which a local agency or school district is required to incur after July 1, 1980, as a result of any statute enacted on or after January 1, 1975, or any executive order implementing any statute enacted on or after January 1, 1975, which mandate a new program or higher level of service of an existing program within the meaning of Section 6 of Article XIII B of the California Constitution.

The Controller argued that Proposition F of 1990 required city's taxpayers to fund construction projects through additional levies made to their property taxes. As a result, the taxpayers and not the City incurred the cost. The Controller determined that the non-discretionary revenue source was used to build the City's animal shelters and none of the city's discretion general fund was involved.

City Response:

First, there should not seem to be any dispute whether there was a cost mandated by the State. The costs are clearly identified as reimbursable costs in the Controller's claiming instructions for the Hayden Bill which meets all the requirements of Section 17514 above.

The Controller's issue seems to be, are these local revenues or "proceeds of taxes." The state has the right to preclude the City from being reimbursed for state, federal or grant funds, but not for local revenues which are proceeds of taxes.

On January 31, 2001, the Los Angeles City Council adopted a resolution providing for the issuance and sale of the City of Los Angeles General Obligation Bonds authorized by the voters by Proposition F, in an aggregate principal amount not to exceed \$201.3 million for a variety of local projects and services. The Council identified up to \$36.5 million for animal shelter facilities. These are clearly local revenues and to the extent the funds are used to pay for state mandate programs, there should be reimbursed by the state.

A similar issue was contested in *Redevelopment Agency v. Commission on State Mandates* (1997) 55 Cal.App.4th 976. The court set forth the following analysis:

The California Supreme Court's summary of the history and substance of the law applicable to state mandates, commented: "Through adoption of Proposition 13 in 1978, the voters added article XIII A to the California Constitution, which 'imposes a limit on the power of state and local governments to adopt and levy taxes. [Citation.]' [Citation.] The next year, the voters added article XIII B to the Constitution, which 'impose[s] a complementary limit on the rate of growth in governmental spending.' [Citation.] These two constitutional articles 'work in tandem, together restricting California governments' power both to levy and to spend for public purposes.' [Citation.] Their goals are 'to protect residents from excessive taxation and government spending. [Citation.]' [Citation.]" (County of San Diego v. State of California, supra, 15 Cal.4th at pp. 80-81.)

* * *

In County of San Diego v. State of California, supra, 15 Cal.4th at page 81, the Supreme Court explained that section 6 represents recognition that together articles XIII A and XIII B severely restrict the taxing and spending powers of local agencies. The purpose of the section is to preclude the state from shifting financial responsibility for governmental functions to local agencies, which are ill equipped to undertake increased financial responsibilities because they are subject to taxing and spending limitations under articles XIII A and XIII B. (County of San Diego v. State of California, supra, at p. 81.)

* * *

In County of Placer v. Corin (1980) 113 Cal.App.3d 443, 451 [170 Cal.Rptr. 232], the court defined "proceeds of taxes" in this way: "Under article XIII B, with the exception of state subventions, the items that make up the scope of 'proceeds of taxes' concern charges levied to raise general revenues for the local entity. 'Proceeds of taxes,' in addition to 'all tax revenues' includes 'proceeds ... from ... regulatory licenses, user charges, and user fees [only] to the extent that such proceeds exceed the costs reasonably borne by such entity in providing the regulation, product or service....' (§ 8, subd. (c).) (Italics added.) Such 'excess' regulatory or user fees are but taxes for the raising of general revenue for the entity. [Citations.] Moreover, to the extent that an assessment results in revenue above the cost of the improvement or is of general public benefit, it is no longer a special assessment but a tax. [Citation.] We conclude 'proceeds of taxes' generally contemplates only those impositions which raise general tax revenues for the entity." (Italics added.) (Id. at 980-984.)

In summary, the courts have held, and the Commission will follow suit in holding, that Proposition F funds are clearly proceeds of taxes and local revenue and to the extent they

were used to pay for state mandated costs associated with the increased cost of building animal shelters due to the Hayden bill, should be reimbursed by the State.

Animal Adoption

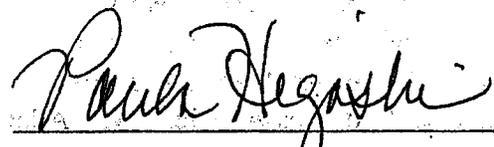

STATEMENT OF DECISION
PURSUANT TO GOVERNMENT
CODE SECTION 17500 ET SEQ.;
TITLE 2, CALIFORNIA CODE OF
REGULATIONS, DIVISION 2,
CHAPTER 2.5, ARTICLE 7

(Adopted on January 25, 2001)

STATEMENT OF DECISION

On October 26, 2000, and November 30, 2000, the Commission on State Mandates (Commission) heard this test claim during regularly scheduled hearings.

At the October 26, 2000 hearing, Mr. Leonard Kaye appeared for the County of Los Angeles. Dr. Dennis Davis, Animal Care and Control Department, Lancaster Shelter, and Mr. Robert Ballenger, Senior Manager, Animal Care and Control Department, appeared as witnesses for the County of Los Angeles. Mr. Allan Burdick and Ms. Pam Stone appeared for the City of Lindsay and County of Tulare. Lt. Ramon Figueroa, Department of Public Safety, appeared as a witness for the City of Lindsay. Ms. Pat Claerbout appeared for the Southeast Area Animal Control Authority. Ms. Meg Halloran, Deputy Attorney General, and Mr. James Apps appeared for the Department of Finance.

At the October 26, 2000 hearing, the Commission received public testimony from the following persons: Mr. Richard Ward, State Humane Association of California; Ms. Dolores Keyes, Coastal Animal Services Authority; Mr. Greg Foss, County of Mendocino; Ms. Lois Newman, The Cat and Dog Rescue Association of California; Ms. Patricia Wilcox, California Animal Control Directors Association; Ms. Kate Neiswender, on behalf of Senator Tom Hayden, author of SB 1785; Dr. Dena Mangiamele and Mr. John Humphrey, County of San Diego; Ms. Virginia Handley, The Fund for Animals; Mr. Mike Ross, Contra Costa County; Ms. Teri Barnato, Association of Veterinarians for Animal Rights; and Mr. Howard J. Davies, Mariposa County Sheriff's Department. In addition, a statement prepared by Ms. Taimie L. Bryant was read into the record by Ms. Kate Neiswender.

At the November 30, 2000, hearing, Mr. Leonard Kaye and Mr. Robert Ballenger appeared for the County of Los Angeles. Mr. Allan Burdick and Ms. Pam Stone appeared for the City of Lindsay and the County of Tulare. Mr. Hiren Patel, Deputy Attorney General, and Mr. James Apps appeared for the Department of Finance.

At the hearings, oral and documentary evidence was introduced, the test claim was submitted, and the vote was taken.

The law applicable to the Commission's determination of a reimbursable state mandated program is article XIII B, section 6 of the California Constitution, Government Code section 17500 and following, and related case law.

The Commission, by a vote of 5 to 2, partially approved this test claim.

BACKGROUND

Test Claim Legislation

In 1998, the Legislature enacted Senate Bill 1785 (Stray Animals) in an attempt to end the euthanasia of adoptable and treatable stray animals by the year 2010. The test claim legislation expressly identifies the state policy that "no adoptable animal should be euthanized if it can be adopted into a suitable home" and that "no treatable animal should be euthanized."¹ Thus, the test claim legislation provides, in part, that:

- The required holding period for stray animals is increased from three days, to four to six business days as specified.² Stray animals shall be held for owner redemption during the first three days of the holding period. If the owner has not redeemed the stray animal within the first three days, the animal shall be available for redemption or adoption during the remainder of the holding period;
- The stray animal shall be released to a nonprofit animal rescue or adoption organization if requested by the organization prior to the scheduled euthanization of that animal. In addition to the required spay or neuter deposit, the pound or shelter has the authority to assess a fee, not to exceed the standard adoption fee, for animals released;

¹ See, Civil Code section 1834.4; Food and Agriculture Code section 17005; and Penal Code section 599d.

² The stray animals subject to this legislation include dogs, cats, rabbits, guinea pigs, hamsters, pot-bellied pigs, birds, lizards, snakes, turtles, and tortoises legally allowed as personal property.

- Shelter personnel are required to verify the temperament of an apparent feral cat by using a “standardized protocol” to determine if the cat is truly feral, or simply a frightened or difficult tame cat. If the cat is determined to be tame, then the cat is required to be held for the entire holding period. If the cat is truly feral, the cat may be euthanized or relinquished to a nonprofit animal adoption organization after the first three days of the holding period;
- Animals that are relinquished to a pound or shelter by the purported owner shall be held for two full business days, not including the day of impoundment. The animal shall be available for owner redemption on the first day, and shall be available for owner redemption or adoption on the second day. After the second required day, the animal may be held longer, euthanized, or relinquished to a nonprofit animal adoption organization;
- Public entities and private entities that contract with a public entity have the “mandatory duty” to maintain lost and found lists and other information to aid owners of lost pets;
- All public pounds and private shelters shall keep and maintain accurate records for three years on each animal taken up, medically treated, and impounded; and
- Impounded animals shall receive “necessary and prompt veterinary care.”

On October 2, 2000, the claimants amended their test claim to include Business and Professions Code section 4855, enacted in 1978, and section 2032.3 of the regulations issued by the California Veterinary Medical Board. These provisions require all veterinarians to keep a written record of all animals receiving veterinary services for a minimum of three years.

History

In 1981, the Board of Control approved a test claim filed by the County of Fresno on legislation requiring a 72-hour holding period prior to the euthanasia of stray cats (*Detention of Stray Cats*, SB 90-3948).³ The Parameters and Guidelines adopted by the Board of Control authorized reimbursement for the one-time costs of building modification; feeding, water and litter receptacles; and additional cages. The Parameters and Guidelines also authorized reimbursement for ongoing personnel activities, and the purchase of food, litter and cleaning supplies. Except for the County of Los Angeles, all cities and counties were eligible for reimbursement. The County of Los Angeles sponsored the “stray cat” legislation and, thus, was not entitled to reimbursement under the former Revenue and Taxation Code. In 1982, the Board of Control adopted a statewide cost estimate. However, the Legislature elected not to fund the mandate in 1984.⁴

Claimants’ Position

The claimants contend that the test claim legislation constitutes a reimbursable state mandated program pursuant to article XIII B, section 6 of the California Constitution and Government Code section 17514. The claimants are requesting reimbursement for the initial costs to obtain

³ Food and Agriculture Code section 31752, as added by Statutes of 1980, Chapter 1060.

⁴ Statutes of 1984, Chapter 268.

new and additional facilities, to develop new policies and procedures, and to develop new protocols such as the one required for feral cats. The claimants are also requesting continuing costs to maintain records; provide veterinary services; provide services to animals, other than dogs and cats; and costs resulting from the increased holding period.

On October 2, 2000, the claimants filed a response to the Draft Staff Analysis clarifying that they are seeking reimbursement for the following activities: construction of cat housing; construction of isolation/treatment facilities; construction of additional kennel buildings; extra kennel staffing; lost and found staffing; additional medical personnel; medical equipment and supplies; emergency treatment costs; and additional administrative costs. The County of Los Angeles estimates their initial costs to implement the program at \$5,762,662.

Department of Finance Position

The Department contends that the test claim should be denied. The Department argues that the test claim legislation imposes animal control activities on both public and private sector entities. Therefore, although the test claim legislation may result in additional costs to local agencies, those costs are not reimbursable because they are not unique to local government. The Department further states the duty imposed on local agencies to accept and care for lost or abandoned animals is not a new duty and, thus, does not constitute a new program or higher level of service. Finally, the Department contends that no reimbursement is required since there are no costs mandated by the state pursuant to Government Code section 17556, subdivisions (d) and (e).

Position of Interested Party, City of Fortuna

The City of Fortuna contends that the test claim legislation constitutes a reimbursable state mandated program by increasing the length of time animals can be held before they are euthanized, by adding new requirements related to adoption services, and by adding new requirements related to veterinary care. The City contends that the test claim legislation increased the cost of its animal control program by 284 percent.

Position of Interested Party, County of Mariposa

Howard Davies, assistant sheriff of Mariposa County, testified that the test claim legislation has resulted in increased costs in the form of housing animals, building a new facility, and increased staffing. He further testified that the four to six business-day holding period required by the test claim legislation essentially forces agencies to hold animals for six or seven days, when taking weekends into account.

Position of Interested Parties, Counties of San Diego, Fresno, and Mendocino

The Counties of San Diego, Fresno, Mendocino, and Contra Costa contend that the test claim legislation constitutes a reimbursable state mandated program. Both counties filed comments on the Draft Staff Analysis. The Counties of San Diego and Contra Costa contend that local agencies are required by the test claim legislation to provide "new" veterinary care services. The County of San Diego further contends that local agencies are required to perform new activities related to the seizure of animals. The County of Fresno filed comments, and Greg

Foss of the County of Mendocino provided testimony, clarifying the list of offsetting savings to be included in the parameters and guidelines.

Position of Interested Person, Senator Tom Hayden, Author of SB 1785

Kate Neiswender, staff to Senator Tom Hayden, testified that the test claim legislation does not impose a reimbursable state mandated program. The test claim legislation seeks to increase adoptions and reduce the rate, and costs, of killing animals. If all of the pieces of the test claim legislation are fully implemented, there is a net effect of no new costs.

Position of Interested Person, Taimie L. Bryant, Ph.D., J.D.

Ms. Bryant is a Professor of Law at UCLA Law School. She assisted in the design and drafting of the test claim legislation at the request of Senator Tom Hayden. She teaches a course entitled "Animals and the Law," which has been offered at UCLA each academic year since 1995. She is also the faculty sponsor for the UCLA Animal Welfare Association.

Ms. Bryant contends that this test claim should be denied. Ms. Bryant argues that the test claim legislation applies to both public and private entities and, thus, is not unique to local government pursuant to the court's holding in *County of Los Angeles v. State of California*.⁵ She further contends that the test claim legislation authorizes local agencies to assess fees sufficient to pay for the mandated program and that the legislation "has no net negative financial impact on local government." Therefore, Ms. Bryant contends that no reimbursement is required since there are no costs mandated by the state pursuant to Government Code section 17556, subdivisions (d) and (e).

Position of Other Interested Persons

Virginia Handley of the Fund for Animals, Inc., contends that the test claim legislation constitutes a reimbursable state mandated program. Ms. Handley filed comments on the Draft Staff Analysis supporting reimbursement for the entire holding period, for owner relinquished animals, and for increased veterinary care.

Lois Newman, founder and president of The Cat and Dog Rescue, states that the test claim legislation is cost-effective. Ms. Newman contends that the claimants' argument that the costs resulting from the test claim legislation are substantial is without merit. She further argues that some local agencies decided to expend monies for capital improvements before the test claim legislation was enacted and, thus, there is no proof that the test claim legislation resulted in costs mandated by the state.

The San Francisco Society for the Prevention of Cruelty to Animals (SPCA) states that it entered into a partnership called the "Adoption Pact" with the San Francisco Animal Care and Control Department in 1994. Several provisions and incentives provided in the Adoption Pact were written into the test claim legislation. The San Francisco SPCA contends that the test claim legislation is cost-effective and can be accomplished on a revenue-neutral or revenue-positive basis without expenditures for new facilities or increased space.

⁵ *County of Los Angeles v. State of California* (1987) 43 Cal.3d 46.

B. Robert Timone, Executive Director for the Haven Humane Society, states that the test claim legislation imposes a reimbursable state mandated program by increasing civil and criminal liability, by severely increasing mandatory shelter retention time for stray and owner released animals, and by subjecting animal sheltering agencies to open-ended veterinary medical expenses. The Haven Humane Society has contracted with the City of Redding for 15 years and can no longer provide animal care services as a result of the test claim legislation.

Jeffrey E. Zinder filed comments on behalf of Animal Issues Movement (a Los Angeles/Orange County nonprofit organization) and United Activists for Animal Rights (a Riverside County nonprofit organization) contending that the test claim legislation constitutes a reimbursable state mandated program. Mr. Zinder filed comments on the Draft Staff Analysis contending that veterinary care and care and treatment for owner-relinquished animals are reimbursable activities.⁶

Richard Ward of the State Humane Association of California contends that the test claim legislation constitutes a reimbursable state mandated program and supports the positions of the County of San Diego, Mr. Jeffrey Zinder, and the claimants.

Dolores Keyes of the Coastal Animal Services Authority, a small shelter providing animal care services for the cities of Dana Point and San Clemente, testified that she has seen a definite fiscal impact that includes higher veterinarian costs, higher staffing costs, and new in-house services as a result of the test claim legislation.

Patricia Wilcox of the California Animal Control Directors Association testified that the test claim legislation has resulted in increased costs for medical care for lost, stray, abandoned, and relinquished animals.

Teri Barnato of the Association of Veterinarians for Animal Rights testified that veterinary care is not a new activity imposed by the test claim legislation since prior law required care and treatment for stray and abandoned animals. She testified that many shelters have increased their veterinary care, not because of the test claim legislation, but as a result of public pressure.

FINDINGS

In order for a statute to impose a reimbursable state mandated program under article XIII B, section 6 of the California Constitution and Government Code section 17514, the statutory language must direct or obligate an activity or task upon local governmental agencies. If the statutory language does not mandate or require local agencies to perform a task, then compliance with the test claim statute is within the discretion of the local agency and a reimbursable state mandated program does not exist.

⁶ The comments filed by Yvonne Hunter of the League of California Cities and the comments filed by the Animal Care and Control Department of the City and County of San Francisco are helpful in providing background information. However, these comments do not address the issue before the Commission as to whether the test claim legislation imposes a reimbursable state mandated program within the meaning of article XIII B, section 6 of the California Constitution and Government Code section 17514.

In addition, the required activity or task must constitute a new program or create an increased or higher level of service over the former required level of service. The California Supreme Court has defined the word "program" subject to article XIII B, section 6, of the California Constitution as a program that carries out the governmental function of providing a service to the public, or laws which, to implement a state policy, impose unique requirements on local governments and do not apply generally to all residents and entities in the state. To determine if the "program" is new or imposes a higher level of service, a comparison must be made between the test claim legislation and the legal requirements in effect immediately before the enactment of the test claim legislation. Finally, the new program or increased level of service must impose "costs mandated by the state."⁷

This test claim presents the following issues:

- Is the test claim legislation subject to article XIII B, section 6 of the California Constitution?
- Does the test claim legislation impose a new program or higher level of service on local agencies within the meaning of article XIII B, section 6 of the California Constitution?
- Does the test claim legislation impose "costs mandated by the state" within the meaning of Government Code sections 17514 and 17556?

The Commission also addresses a fourth issue raised by the claimants and interested party, County of San Diego, pertaining to seized animals under Penal Code section 597.1:

- Do the activities imposed by Penal Code section 597.1, relating to the seizure of animals, constitute a reimbursable state mandated program pursuant to article XIII B, section 6 of the California Constitution and Government Code section 17514?

These issues are addressed below.

Issue 1: Is the test claim legislation subject to article XIII B, section 6 of the California Constitution?

In order for the test claim legislation to be subject to article XIII B, section 6 of the California Constitution, the legislation must constitute a "program." The California Supreme Court, in the case of *County of Los Angeles v. State of California*⁸, defined the word "program" within the meaning of article XIII B, section 6 as a program that carries out the governmental function of providing a service to the public, or laws which, to implement a state policy, impose unique requirements on local governments and do not apply generally to all residents and entities in the state. Only one of these findings is necessary to trigger the applicability of article XIII B, section 6.⁹

⁷ Article XIII B, section 6 of the California Constitution; *County of Los Angeles v. State of California*, *supra*, 43 Cal.3d at 56; *Carmel Valley Fire Protection Dist. v. State of California* (1987) 190 Cal.App.3d 521, 537; *City of Sacramento v. State of California* (1990) 50 Cal.3d 51, 66; *Lucia Mar Unified School Dist. v. Honig* (1988) 44 Cal.3d 830, 835; Government Code section 17514.

⁸ *County of Los Angeles*, *supra*, 43 Cal.3d 46, 56.

⁹ *Carmel Valley Fire Protection Dist.*, *supra*, 190 Cal.App.3d at 537.

The Commission analyzes this issue in two parts. The first part addresses Senate Bill 1785, the stray animal legislation. The second part addresses the provisions added to the test claim by the claimants' test claim amendment; namely, Business and Professions Code section 4855 and section 2032.3 of the California Veterinary Medical Board's regulations.

Senate Bill 1785 – Stray Animals

Both the Department of Finance and Ms. Bryant contend that the test claim legislation on stray animals is not subject to article XIII B, section 6 of the California Constitution because the animal control activities required by the test claim legislation are not unique to local government. With the exception of posting lost and found lists, it is their position that the test claim activities are imposed on both public and private shelters.

The claimants disagree and contend that the test claim legislation is subject to article XIII B, section 6 of the California Constitution. The claimants argue that the Legislature has imposed a duty on local government to provide animal services in the state pursuant to Penal Code sections 597f and 597.1, Food and Agriculture Code section 31105, and Health and Safety Code section 121690, subdivision (e). Private animal shelters do not have similar duties and can refuse to accept a stray animal. Therefore, the claimants contend that the test claim legislation is unique to local government. The claimants also argue that the test claim legislation provides a service to the public and, thus, the test claim legislation qualifies as a program under article XIII B, section 6 of the California Constitution.

For the reasons stated below, the Commission finds that the test claim legislation constitutes a "program" within the meaning of article XIII B, section 6 of the California Constitution.

The purpose of the test claim legislation is to carry out the "state policy" that no adoptable animal should be euthanized if it can be adopted into a suitable home and that no treatable animal should be euthanized.¹⁰ In this respect, the test claim legislation does impose duties on both public and private animal shelters. In Section 1 of the test claim legislation, the Legislature declared that "public and private shelters and humane organizations share a common purpose in saving animals' lives" and that "public and private shelters and humane organizations should work together to end euthanasia of adoptable and treatable animals." Thus, the test claim legislation requires both public and private shelters to perform the following activities:

- keep stray animals for a longer holding period;
- provide the animal with necessary and prompt veterinary care, adequate nutrition, water, and shelter, and make reasonable attempts to notify the owner if the animal has identification;
- release the stray animal to an animal rescue and adoption organization upon request prior to the euthanization of the animal;
- determine whether an apparently feral cat is truly feral; and

¹⁰ Civil Code section 1834.4; Penal Code section 599d; and Food and Agriculture Code section 17005.

- keep and maintain accurate records on each animal for three years.¹¹

Although the test claim legislation applies to both public and private shelters, existing law, which was not amended or repealed by the test claim legislation, does *not* require private shelters to accept stray or abandoned animals. Instead, the act of accepting and caring for stray animals is within the discretion of the private shelter. Thus, the Commission finds that the requirements imposed by the test claim legislation apply to private shelters only if the private shelter decides to accept the stray or abandoned animal, and that existing law cannot be ignored.

For example, Civil Code section 1816, subdivision (a), provides that a private entity with whom a stray animal is deposited "is bound to take charge of it, *if able to do so.*"

The Department of Finance contends that Civil Code section 1816, subdivision (a), is not relevant to this analysis. Instead, the Department contends that it is subdivision (b) of section 1816 that applies and requires both public and private shelters to accept stray animals. That section states the following: "*A public agency or shelter* with whom a thing is deposited in the manner described in Section 1513 is bound to take charge of it, as provided in Section 597.1 of the Penal Code." (Emphasis added.) The Department argues that the phrase "a public agency or shelter" means *both* public and private shelters. The Department supports its position with Senate and Assembly floor analyses that state that the test claim legislation applies to both private and public shelters.¹²

The Commission disagrees with the Department of Finance's argument. When determining the intent of a statute, the first step is to look at the statute's words and give them their plain and ordinary meaning. Where the words of the statute are not ambiguous, they must be applied as written and may not be altered in any way. Moreover, the intent must be gathered from the whole of a statute, rather than from isolated parts or words, in order to make sense of the entire statutory scheme.¹³

There is no evidence that the Legislature intended the phrase "a public agency or shelter" in Civil Code section 1816, subdivision (b), to include private shelters. Such a reading ignores the plain language of Civil Code section 1816, subdivision (a), which does address private shelters by the express reference to a "private entity." In subdivision (a), the Legislature expressly stated that private entities are only required to take charge of stray animals "if able to do so."

Moreover, other statutes enacted as part of Senate Bill 1785 specifically include the word "private" when referring to private shelters.¹⁴ Thus, had the Legislature intended to apply

¹¹ Ms. Lois Newman of The Cat and Dog Rescue Association submitted a survey revealing the number of private animal shelters operating in California. There are 187 private shelters and 246 public shelters.

¹² Department of Finance's response to Draft Staff Analysis.

¹³ *City of Merced v. State of California* (1984) 153 Cal.App.3d 777; *Carrisales v. Department of Corrections* (1999) 21 Cal.4th 1132.

¹⁴ See Section 1, subdivision (a)(1) and (2), and subdivision (e), of Statutes of 1998, Chapter 752 (Legislature's Findings and Declarations); Food and Agriculture Code section 32001 (Lost and Found Lists); and Food and Agriculture Code section 32003 (Maintaining Records).

Civil Code section 1816, subdivision (b), to private shelters, they would have included the word "private" in subdivision (b).

Finally, the Senate Floor Analysis of Senate Bill 1785, dated August 27, 1998, specifically recognizes that the duties imposed by the test claim legislation are mandatory duties for public entities and only those private entities which contract with the public entity to perform *their* required governmental duties.¹⁵

Accordingly, the Commission finds that Civil Code section 1816, subdivision (a), supports the conclusion that private animal shelters are not required to perform the activities imposed by the test claim legislation since the act of accepting and caring for stray animals is within the discretion of the private shelter.

Moreover, Civil Code section 2080 states that "any person who finds a thing lost [including a stray animal] is *not* bound to take charge of it, unless the person is otherwise required to do so by contract or law." In this regard, the Department of Finance and Ms. Bryant contend that many private shelters have the legal obligation to take in stray animals because their mission statements and by-laws require them to take in strays. However, there is *no state law* requiring private shelters to accept and care for an animal. Thus, only if the private shelter decides to accept and care for an animal, or enter into a contract with a local agency to perform such services, is the private shelter required to perform the activities imposed by the test claim legislation.

Public shelters, on the other hand, have a pre-existing legal duty to accept and care for stray animals. Food and Agriculture Code section 31105 requires the county board of supervisors to take up and impound stray dogs. That section states the following:

The board of supervisors *shall* provide for both of the following:

¹⁵ The Commission notes that the Senate Floor Analysis, analyzing the same version of the bill, changed for the August 30, 1998 hearing. The August 30, 1998 analysis did not contain the paragraph recognizing that the duties imposed by the test claim legislation are mandatory duties for public entities and those private entities that contract with the public entity. The vote on the bill by the Senate occurred on August 30, 1998.

The Commission notes, however, that the Senate Floor Analysis dated August 28, 1998 is consistent with Corporations Code section 14503, which provides that the governing body of a local agency may contract with private humane societies and societies for the prevention of cruelty to animals to provide animal care or protection services. In this regard, the private entity's jurisdiction is limited to the jurisdiction of the local agency. Corporations Code section 14503 states the following:

The governing body of a local agency, by ordinance, may authorize employees of public pounds, societies for the prevention of cruelty to animals, and humane societies, who have qualified as humane officers pursuant to Section 14502, and which societies or pounds have contracted with such local agency to provide animal care or protection services, to issue notices to appear in court

... for violations of state or local animal control laws. Those employees shall not be authorized to take any person into custody even though the person to whom the notice is delivered does not give his or her written promise to appear in court. The authority of these employees is to be limited to the jurisdiction of the local agency authorizing the employees.

(a) The taking up and impounding of all dogs which are found running at large in violation of any provision of this division.

(b) The killing in some humane manner or other disposition of any dog which is impounded. (Emphasis added.)¹⁶

Health and Safety Code section 121690, subdivision (e), also requires counties and cities to maintain a pound system. That section states the following:

(e) It *shall be the duty* of the governing body of each city, city and county, or county to maintain or provide for the maintenance of a pound system and a rabies control program for the purpose of carrying out and enforcing this section. (Emphasis added.)¹⁷

The test claim legislation, in Civil Code section 1816, subdivision (b), furthers this duty by stating that public agencies or shelters with whom a thing is deposited is "bound to take charge of it, as provided in Section 597.1 of the Penal Code." Since 1991, Penal Code section 597.1 has required peace officers and animal control officers employed by local agencies to take possession of any stray or abandoned animal, and provide care and treatment for the animal.¹⁸ Penal Code section 597.1 states in relevant part the following:

Any peace officer, humane society officer, or animal control officer shall take possession of the stray or abandoned animal and shall provide care and treatment for the animal until the animal is deemed to be in suitable condition to be returned to the owner.

Although the above provision includes privately employed humane society officers, the law does *not* require humane societies and/or societies for the prevention of cruelty to animals to hire humane society officers. Rather, these private entities have the choice to hire such employees.¹⁹ Accordingly, the requirement in Penal Code section 597.1, to take possession of any stray or abandoned animal, imposes a state-mandated duty on local governmental agencies only.

Therefore, unlike private animal shelters, local agencies have no choice but to perform the activities required by the test claim legislation. Accordingly, the Commission finds that the

¹⁶ Added by Statutes of 1967, Chapter 15.

¹⁷ Added by Statutes of 1995, Chapter 415 (derived from Statutes of 1957, Chapter 1781).

¹⁸ Added by Statutes of 1991, Chapter 4.

¹⁹ Corporations Code section 14502. Pursuant to the provisions of Corporations Code section 14502, if the private entity decides to hire a humane society officer, the entity must first file an application with the court for the appointment of the prospective employee as a humane society officer. If the individual meets the requirements, then the individual will be appointed a humane society officer and possess limited peace officer powers to prevent the perpetration of any act of cruelty upon an animal. Corporations Code section 14502, subdivision (n), further states that "[a] humane society or a society for the prevention of cruelty to animals shall notify the sheriff of the county in which the society is incorporated, prior to appointing a humane officer, of the society's intent to enforce laws for the prevention of cruelty to animals."

test claim legislation does impose unique requirements on local agencies to implement the state's policy to end euthanasia of adoptable and treatable animals.

The Commission further finds that the test claim legislation satisfies the second test that triggers the applicability of article XIII B, section 6 in that it constitutes a program that carries out the governmental function of providing a service to the public. As indicated above, only local agencies are mandated by the state to accept and care for stray and abandoned animals. The courts have held that the licensing and regulation of the manner in which animals are kept and controlled are within the legitimate sphere of governmental police power.²⁰ In this respect, the Legislature recognized in Section 1 of the test claim legislation that "taking in of animals is important for public health and safety, to aid in the return of the animal to its owner, and to prevent inhumane conditions for lost or free roaming animals." Although Ms. Bryant urges the Commission to deny this test claim, she acknowledges that "collection of stray animals has been deemed a legitimate and necessary function of government as opposed to a duty to be placed on private citizens."

Based on the foregoing, the Commission finds that Senate Bill 1785 (Stray Animals) constitutes a "program" within the meaning of article XIII B, section 6 of the California Constitution.

Sections Added by the Claimants' Test Claim Amendment

On October 2, 2000, the claimants amended their test claim to add Business and Professions Code section 4855 and section 2032.3 of the Veterinary Medical Board's regulations. These provisions require all veterinarians to keep a written record of all animals receiving veterinary services for a minimum of three years.

For the reasons stated below, the Commission finds that these provisions do *not* constitute a "program" within the meaning of article XIII B, section 6 of the California Constitution.

In order for a statute or an executive order to constitute a "program" subject to article XIII B, section 6 of the California Constitution, the statute or executive order must be unique to local government or carry out the governmental function of providing a service to the public. Neither test is satisfied here.

Business and Professions Code section 4855 states the following:

A veterinarian subject to the provisions of this chapter shall, as required by regulation of the [Veterinary Medical Board], keep a written record of all animals receiving veterinary services, and provide a summary of that record to the owner of animals receiving veterinary services, when requested. The minimum amount of information which shall be included in written records and summaries shall be established by the board. The minimum duration of time for which a licensed premise shall retain the written record or a complete copy of the written record shall be determined by the board. (Emphasis added.)

²⁰ *Simpson v. City of Los Angeles* (1953) 40 Cal.2d 271, 278 (where the California Supreme Court stated that "it is well settled that the licensing of dogs and the regulation of the manner in which they shall be kept and controlled are within the legitimate sphere of the police power, and that statutes and ordinances may provide for impounding dogs and for their destruction or other disposition.")

In response to Business and Professions Code section 4855, the Veterinary Medical Board issued section 2032.3 of its regulations. That regulation provides in pertinent part the following:

(a) *Every veterinarian* performing any act requiring a license pursuant to the provisions of Chapter 11, Division 2, of the [Business and Professions Code], upon any animal or group of animals shall prepare a legible, written or computer generated record concerning the animal or animals. . . . (Emphasis added.)

Based on the express language of these provisions, the Commission finds that the record keeping requirements imposed by Business and Professions Code section 4855 and the regulation issued by the Veterinary Medical Board apply to *all* veterinarians licensed in this state. Thus, these provisions are not unique to local government. Nor does the activity to keep records constitute a peculiarly governmental function since the activity is imposed on *all* veterinarians.

Therefore, the Commission finds that Business and Professions Code section 4855 and section 2032.3 of the Veterinary Medical Board's regulations do not constitute a "program" and, thus, are not subject to article XIII B, section 6 of the California Constitution.

Accordingly, the remainder of this analysis addresses only those provisions enacted as part of Senate Bill 1785 (Stray Animals).

Issue 2: Does the test claim legislation impose a new program or higher level of service on local agencies within the meaning of article XIII B, section 6 of the California Constitution?

To determine if the "program" is new or imposes a higher level of service, a comparison must be made between the test claim legislation and the legal requirements in effect immediately before the enactment of the test claim legislation.

Holding Period for Dogs and Cats

Food and Agriculture Code sections 31108 and 31752 describe the required holding period for impounded dogs and cats. Those sections provide that an impounded dog or cat shall be held for six business days, not including the day of impoundment. The six-day holding period can be reduced to four business days if the local agency complies with one of the following provisions:

- If the pound or shelter has made the dog or cat available for owner redemption on one weekday evening until at least 7:00 p.m., or one weekend day, the holding period shall be four business days, not including the day of impoundment.
- If the pound or shelter has fewer than three full-time employees or is not open during all regular weekday business hours, and if it has established a procedure to enable owners to reclaim their dog or cat by appointment at a mutually agreeable time when the pound or shelter would otherwise be closed, the holding period shall be four business days, not including the day of impoundment.

These test claim statutes further require, that prior to euthanizing an impounded dog or cat for any reason other than irremediable suffering, the impounded dog or cat shall be released to a nonprofit animal rescue or adoption organization, if requested by the organization, before the scheduled euthanization of the impounded animal. In addition to any spay or neuter deposit, the pound or shelter, at its discretion, may assess a fee, not to exceed the standard adoption fee, for the animals released.

The holding period and adoption requirements described above do not apply to animals that are irremediably suffering from a serious illness or severe injury and newborn animals that need maternal care and have been impounded without their mothers. Such animals may be euthanized without being held for owner redemption or adoption.²¹

Before the test claim legislation was enacted, public shelters were required to hold impounded dogs and cats for 72 hours from the time of capture. The 72-hour holding period did not apply to cats that were severely injured, seriously ill, or to newborn cats unable to feed themselves.²²

In addition, there was no requirement under prior law to release impounded animals to nonprofit animal rescue or adoption organizations, upon request of the organization, prior to euthanizing the animal.

Accordingly, the Commission finds that Food and Agriculture Code sections 31108 and 31752 impose a new program or higher level of service by:

- Requiring local agencies to provide care and maintenance during the increased holding period for impounded dogs and cats. The increased holding period shall be measured by calculating the difference between three days from the day of capture, and six business days from the day after impoundment, or four business days from the day after impoundment requiring local agencies to either:
 - (1) Make the animal available for owner redemption on one weekday evening until at least 7:00 p.m., or one weekend day; or
 - (2) For those local agencies with fewer than three full-time employees or that are not open during all regular weekday business hours, establish a procedure to enable owners to reclaim their animals by appointment at a mutually agreeable time when the agency would otherwise be closed,²³ and by
- Requiring the release of the animal to a nonprofit animal rescue or adoption organization upon request by the organization prior to euthanasia.

²¹ Food and Agriculture Code section 17006.

²² Food and Agriculture Code sections 31108 (as added by Statutes of 1967, Chapter 15) and 31752 (as added by Statutes of 1980, Chapter 1060)

²³ The claimants and several commentators contend that as a result of the increased holding period, the cost of veterinary care has increased. The Commission can consider the argument, that veterinary care during the increased holding period is reimbursable, at the parameters and guidelines phase.

Holding Period for Other Animals

Food and Agriculture Code section 31753 imposes the same holding period and adoption requirements for impounded rabbits, guinea pigs, hamsters, pot-bellied pigs, birds, lizards, snakes, turtles, or tortoises legally allowed as personal property, as is required for dogs and cats. Thus, section 31753 provides that the holding period for these other animals is six business days, not including the day of impoundment. The six-day holding period can be reduced to four business days if the local agency complies with one of the following provisions:

- If the pound or shelter has made the other animals available for owner redemption on one weekday evening until at least 7:00 p.m., or one weekend day, the holding period shall be four business days, not including the day of impoundment.
- If the pound or shelter has fewer than three full-time employees or is not open during all regular weekday business hours, and if it has established a procedure to enable owners to reclaim their animals by appointment at a mutually agreeable time when the pound or shelter would otherwise be closed, the holding period shall be four business days, not including the day of impoundment.

Ms. Bryant contends that Food and Agriculture Code section 31753 does not constitute a new program or higher level of service. Ms. Bryant contends that before the enactment of the test claim legislation, Penal Code sections 597f and 597.1 required peace officers, humane society officers, and animal control officers to take possession of any abandoned or neglected animal and care for the animal until the owner redeems the animal. Under these provisions, the animal control officer is required to perform a "due search" for the owner prior to euthanizing the animal. Thus, she argues that a holding period is legally implied from the requirement that owners be given a chance to redeem their animals.

Ms. Bryant further argues that the holding period established under prior law is equivalent to a "reasonable" period that allows the owner to redeem the animal. In this respect, Ms. Bryant argues that a five-day holding period has been deemed reasonable and, thus, required under prior law. In support of her position, Ms. Bryant cites a federal regulation, governing the sale of shelter animals to research labs, that deems five days the minimum necessary to provide owners a reasonable chance to reclaim their pets. She also cites California's vicious dog law, Food and Agriculture Code section 31621, which provides that an owner must receive five days notice to contest the "vicious dog" designation in order to reclaim the dog. Finally, Ms. Bryant states that the Humane Society of the United States promotes five days as the minimum reasonable holding period. Accordingly, Ms. Bryant contends that the test claim requirement to hold other animals for four days constitutes a lower level of service.

Government Code section 17565 states that "if a local agency or school district, at its option, has been incurring costs which are subsequently mandated by the state, the state shall reimburse the local agency or school district for those costs incurred after the operative date of the mandate." The Commission finds that Government Code section 17565 applies here.

Before the enactment of the test claim legislation, Penal Code sections 597f and 597.1 required animal control officers to take possession and provide care and treatment to *any* stray or abandoned animal until the animal was deemed to be in suitable condition to be returned to the

owner. If the owner could not be found after a due search, the animal control officer could have the animal euthanized or placed in a suitable home. Thus, the Commission agrees that Penal Code sections 597f and 597.1 apply to the animals specified in the test claim statute and that *some* holding period is implied in these sections.

However, there was *no prior state or federal law* mandating local agencies to hold these specified animals for *any* time period. Rather, the appropriate time period was left up to the discretion of the local agency. With the enactment of Food and Agriculture Code section 31753, the state is now requiring local agencies, for the first time, to hold these animals for four days. Therefore, the Commission finds that the four or six day holding period is new.

Accordingly, the Commission finds that Food and Agriculture Code sections 31753 imposes a new program or higher level of service by:

- Requiring local agencies to provide care and maintenance during the increased holding period for impounded rabbits, guinea pigs, hamsters, pot-bellied pigs, birds, lizards, snakes, turtles, or tortoises legally allowed as personal property. The increased holding period shall be measured by calculating the difference between three days from the day of capture, and six business days from the day after impoundment, or four business days from the day after impoundment requiring local agencies to either:
 - (1) Make the animal available for owner redemption on one weekday evening until at least 7:00 p.m., or one weekend day; or
 - (2) For those local agencies with fewer than three full-time employees or that are not open during all regular weekday business hours, establish a procedure to enable owners to reclaim their animals by appointment at a mutually agreeable time when the agency would otherwise be closed; and by
- Requiring the release of the animal to a nonprofit animal rescue or adoption organization upon request by the organization prior to euthanasia.

Feral Cats

The test claim legislation added section 31752.5 to the Food and Agriculture Code to address feral cats. Feral cats are defined as cats without owner identification whose usual and consistent temperament is extreme fear and resistance to contact with people. A feral cat is totally unsocialized to people.

Food and Agriculture Code section 31752.5, subdivision (c), states the following:

Notwithstanding Section 31752 (establishing the holding period for stray cats), if any apparently feral cat has not been reclaimed by its owner or caretaker within the first three days of the required holding period, shelter personnel qualified to verify the temperament of the animal *shall verify whether it is feral or tame by using a standardized protocol*. If the cat is determined to be docile or a frightened or difficult tame cat, the cat shall be held for the entire required holding period specified in Section 31752. If the cat is determined to be truly feral, the cat *may* be euthanized or relinquished to a nonprofit . . . animal adoption organization that agrees to the spaying or neutering of the cat

if it has not already been spayed or neutered. In addition to any required spay or neuter deposit, the pound or shelter, at its discretion, may assess a fee, not to exceed the standard adoption fee, for the animal released. (Emphasis added.)

The claimants contend that section 31752.5 constitutes a new program or higher level of service by establishing holding periods for feral cats and by requiring local agencies to verify whether a cat is feral or tame by using a "newly developed or obtained" standardized protocol. The claimants state the following:

The mandatory holding periods for feral cats are completely new. There is no prior law on the subject. The 'standard adoption fee[s]' for feral cats shall not be exceeded. In addition, local government must now 'verify whether it is feral or tame by using a standardized protocol' in order to determine the correct holding period. Therefore, the costs of obtaining or developing such a protocol as well [as] its administration would be reimbursable 'costs mandated by the state' as claimed herein.

Regarding holding periods for feral cats, the clock starts to run after (not including) . . . the day of impoundment. Under prior law, there were no holding periods for feral cats. Now holding periods are established, mandated, and defined in terms of a number of 'business days', considerably longer than the same number of calendar days. Therefore, Chapter 752/98 explicitly increases mandatory holding periods for feral cats and related costs upon local government.

The Commission disagrees with the claimants' statement that holding periods for feral cats are completely new and that there was no prior law on the subject. Before the enactment of the test claim legislation, Food and Agriculture Code section 31752 required a 72-hour holding period from the time of capture for *all* impounded stray cats, except cats that were severely injured, seriously ill, or newborn cats unable to feed themselves. That section stated the following:

No stray cat which has been impounded by a public pound, society for the prevention of cruelty to animals shelter, or humane shelter shall be killed before 72 hours have elapsed from the time of the capture of the stray cat.

This section shall not apply to cats which are severely injured or seriously ill, or to newborn cats unable to feed themselves. (Emphasis added.)

Thus, the 72-hour holding period established under prior law applied to both feral and tame cats.

The Commission finds that the only new requirement imposed by Food and Agriculture Code section 31752.5 is the requirement to verify within the first three days of the holding period whether the cat is feral or tame by using a standardized protocol. If the cat is determined to be tame, the same holding period established by Food and Agriculture Code section 31752, as amended by the test claim legislation and described in the section above, applies; i.e., four or six business days.

Accordingly, the Commission finds that Food and Agriculture Code section 31752.5 constitutes a new program or higher level of service by requiring local agencies to verify, within the first three days of the holding period, whether a cat is feral or tame by using a standardized protocol.

Owner Relinquished Animals

The test claim legislation added Food and Agriculture Code section 31754 to address animals relinquished by their owners. That section provides in relevant part the following:

[A]ny animal relinquished by the purported owner that is of a species impounded by pounds or shelters shall be held for two full business days, not including the day of impoundment. The animal shall be available for owner redemption for the first day, not including the day of impoundment, and shall be available for owner redemption and adoption for the second day. After the second required day, the animal may be held longer, killed, or relinquished to a nonprofit . . . animal adoption organization under the same conditions and circumstances provided for stray dogs and cats. . . .

Section 31754 became operative on July 1, 1999, and sunsets on July 1, 2001.

On July 1, 2001, Food and Agriculture Code section 31754 will provide, with the exception stated below, that any animal relinquished by the purported owner that is of a species impounded by pounds or shelters shall be held for the same holding periods, and with the same requirements of care, applicable to stray dogs and cats in sections 31108 and 31752 of the Food and Agriculture Code.²⁴ However, the period for owner redemption shall be one day, not including the day of impoundment, and the period for owner redemption or adoption shall be the remainder of the holding period.

The holding period described above does not apply to relinquished animals that are irremediably suffering from a serious illness or severe injury, or newborn animals that need maternal care and have been impounded without their mothers.

Ms. Bryant contends that neither prior law, nor Food and Agriculture Code section 31754, require local agencies to take in owner-relinquished animals. Thus, she argues that taking in such animals is within the discretion of the local agency and that the holding periods established by section 31754 only apply if the local agency chooses to accept owner-relinquished animals.

The claimants contend that section 31754 imposes mandatory duties on the local agency to accept owner-relinquished pets since, in reality, owners relinquish their animals on the streets

²⁴ The Commission notes that section 31754 requires the same holding periods for owner-relinquished animals as the holding period for stray dogs and cats. The statute correctly refers to section 31108 for the holding period for stray dogs. But, the statute references section 31755, which is not the statute relating to stray cats. The statute relating to stray cats is section 31752. Accordingly, the Commission finds that there is a typographical error in section 31754 and that the Legislature intended to refer to section 31752 instead of 31755.

if the agency will not accept the animal. At that point, the animal will be deemed a stray or an abandoned animal and, thus, require the agency to take possession of the animal.²⁵

The Commission agrees with Ms. Bryant. At the time the test claim legislation was enacted, local agencies were not required to accept owner-relinquished animals. They were simply required to take possession of stray or abandoned animals.²⁶

The test claim legislation did not change existing law. Rather, based on the plain language of the test claim legislation and existing law, taking possession of owner-relinquished animals, and caring and maintaining the owner-relinquished animal during the required holding period, is within the discretion of the local agency.

Accordingly, the Commission finds that Food and Agriculture Code section 31754 does not constitute a new program or higher level of service since there are no state mandated duties imposed on local agencies.

Posting Lost and Found Lists

Food and Agriculture Code section 32001 provides the following:

All public pounds, shelters operated by societies for the prevention of cruelty to animals, and humane shelters, that contract to perform public animal control services, shall provide the owners of lost animals and those who find lost animals with all of the following:

- (a) Ability to list the animals they have lost or found on 'Lost and Found' lists maintained by the pound or shelter.
- (b) Referrals to animals listed that may be the animals the owner or finders have lost or found.
- (c) The telephone numbers and addresses of other pounds and shelters in the same vicinity.
- (d) Advice as to means of publishing and disseminating information regarding lost animals.
- (e) The telephone numbers and addresses of volunteer groups that may be of assistance in locating lost animals.

The duties imposed by this section are mandatory duties for public entities for all purposes of the Government Code and for all private entities with which a public entity has contracted to perform those duties. (Emphasis added.)

Before the enactment of the test claim legislation, the duty imposed by section 32001 to post lost and found lists was *not* mandatory. The last two sentences of former section 32001 stated the following:

²⁵ Other commentators share the claimants' view (e.g., Virginia Handley, Jeffrey Zinder, and Richard Ward.)

²⁶ Food and Agriculture Code section 31105; Penal Code section 597.1.

Notwithstanding Section 9, a violation of this section is not a misdemeanor. Furthermore, the duty imposed by this section is *not a mandatory duty* for purposes of Division 3.6 (commencing with Section 810) of Title 1 of the Government Code [entitled "Claims and Actions Against Public Entities and Public Employees"], and *no cause of action for damages is created by this section against a public entity or employee or against any other person.* (Emphasis added.)

The above sentences were repealed with the enactment of the test claim legislation. Thus, the test claim legislation created a legal duty for local agencies to post the lost and found lists required by section 32001, and at the same time, established a cause of action for an agency's failure to comply.

Accordingly, the Commission finds that Food and Agriculture Code section 32001 imposes a new program or higher level of service by requiring local agencies to provide the owners of lost animals and those who find lost animals with all of the following:

- Ability to list the animals they have lost or found on "Lost and Found" lists maintained by the pound or shelter.
- Referrals to animals listed that may be the animals the owner or finders have lost or found.
- The telephone numbers and addresses of other pounds and shelters in the same vicinity.
- Advice as to means of publishing and disseminating information regarding lost animals.
- The telephone numbers and addresses of volunteer groups that may be of assistance in locating lost animals.

Records

The test claim legislation amended Penal Code section 597.1 and added section 32003 to the Food and Agriculture Code to address the maintenance of records.

Penal Code section 597.1, subdivision (d), provides that "[a]n animal control agency that takes possession of an animal pursuant to subdivision (c) [i.e., injured cats and dogs found without their owners and conveyed to a veterinarian to determine if the animal should be euthanized or treated] shall keep records of the whereabouts of the animal from the time of possession to the end of the animal's impoundment, and those records shall be available for inspection by the public upon request for three years after the date the animal's impoundment ended."

Food and Agriculture Code section 32003 requires the maintenance of records on each animal taken up, medically treated, or impounded. That section states the following:

All public pounds and private shelters shall keep accurate records on each animal taken up, medically treated, or impounded. The records shall include all of the following information and any other information required by the California Veterinary Medical Board:

- (a) The date the animal was taken up, medically treated, euthanized, or impounded.
- (b) The circumstances under which the animal is taken up, medically treated, euthanized, or impounded.
- (c) The names of the personnel who took up, medically treated, euthanized, or impounded the animal.
- (d) A description of any medical treatment provided to the animal and the name of the veterinarian of record.
- (e) The final disposition of the animal, including the name of the person who euthanized the animal or the name and address of the adopting party. These records shall be maintained for three years after the date the animal's impoundment ends.

The claimant contends that these sections impose new and increased duties. Ms. Bryant, on the other hand, contends that no new records are required. She states that the requirement to keep records was previously required by the Public Records Act and by other areas of California law. Thus, Ms. Bryant contends that Penal Code section 597.1, subdivision (d), and Food and Agriculture Code section 32003 do not impose a new program or higher level of service.

For the reasons described below, the Commission finds that Food and Agriculture Code section 32003 imposes a partial new program or higher level of service.

Before the enactment of the test claim legislation, Penal Code section 597.1, subdivision (d), and Penal Code section 597f, subdivision (c), required animal control agencies to keep records for public inspection indicating the whereabouts of an injured dog or cat conveyed to a veterinarian for a 72-hour period from the time of possession.

In addition, pursuant to the Business and Professions Code and regulations enacted by the California Veterinary Medical Board in 1979, existing law requires all veterinarians to keep a written record of all animals receiving veterinary services. The record shall contain the following information, if available: name, address and phone number of the owner; name and identity of the animal; age, sex and breed of the animal; dates of custody (with the veterinarian); short history of the animal's condition; diagnosis or condition at the beginning of custody; medication and treatment provided; progress and disposition of the case; and surgery log. Such records shall be maintained for a minimum of three years after the last visit.²⁷

The Commission agrees that the test claim legislation imposes some of the same record-keeping responsibilities as existing law. For example, the Commission agrees that the requirements imposed by Penal Code section 597.1, subdivision (d), to keep records for three years on the whereabouts of the animal are not new. That section applies to injured cats and dogs that are conveyed to a veterinarian to determine whether the animal should be euthanized

²⁷ Business and Professions Code section 4855; California Code of Regulations, title 16, division 20, article 4, section 2032.3.

or treated. Although the test claim legislation increased the retention of the records from 72 hours to three years, existing regulations issued by the Veterinary Medical Board already require the maintenance of records describing the dates of custody, progress and disposition of the case for three years. Thus, the Commission finds that Penal Code section 597.1, subdivision (d), does not constitute a new program or higher level of service.

Similarly, the requirement imposed by Food and Agriculture Code section 32003 to maintain records for three years on animals receiving medical treatment by veterinarians is not new since the same requirement was previously imposed by the regulations issued by the Veterinary Medical Board.

However, the requirement imposed by Food and Agriculture Code section 32003 on local agencies to maintain records describing the "taking up" or "impoundment" of an animal is broader than the record keeping requirements imposed on veterinarians in prior law. Moreover, the requirement for local agencies to keep records regarding the euthanasia of an animal was not a requirement imposed in prior law. In this respect, the Commission disagrees with the arguments raised by Ms. Bryant and other commentators that euthanasia is a veterinary procedure and, thus, information regarding the euthanasia of an animal was required to be kept in the veterinarian's records.²⁸ The Commission finds that euthanasia is not a veterinary procedure since employees of animal control shelters who are *not* veterinarians or registered veterinary technicians are legally allowed to perform the procedure after eight hours of training. The training covers the following topics: history and reasons for euthanasia; humane animal restraint techniques; sodium pentobarbital injection methods and procedures; verification of death; safety training and stress management for personnel; and record keeping and regulation compliance for sodium pentobarbital.²⁹

Accordingly, the Commission finds that Food and Agriculture Code section 32003 imposes new requirements on local agencies to maintain records for three years after the date the animal's impoundment ends on animals that are *not medically treated* by a veterinarian, but are either taken up, euthanized after the end of the holding period, or impounded. Such records shall include the following:

- The date the animal was taken up, euthanized, or impounded;
- The circumstances under which the animal is taken up, euthanized, or impounded;
- The names of the personnel who took up, euthanized, or impounded the animal; and
- The final disposition of the animal, including the name of the person who euthanized the animal or the name and address of the adopting party.

The Commission agrees that making these records available to the public complies with the Public Records Act, as argued by Ms. Bryant. "Public records" are defined as any writing containing information relating to the conduct of the public's business that is prepared, owned, used or retained by any state or local agency, regardless of the physical form or characteristic

²⁸ Comments filed by Ms. Bryant and comments filed by Lois Newman of The Cat and Dog Rescue Association.

²⁹ See section 2039 of the Veterinary Medical Board's regulations.

of the writing. Local agencies are required under the Public Records Act to keep public records open for inspection at all times during the office hours of the local agency.³⁰ However, local agencies would not be compelled to make information on animals that do not receive veterinary services available to the public if the state had not created the requirement to maintain such records.

Accordingly, the Commission finds that the requirement to maintain records for three years on animals that are not medically treated by a veterinarian, but are either taken up, euthanized after the end of the holding period, or impounded constitutes a new program or higher level of service.

Veterinary Care

The claimants contend that the test claim legislation imposes a new program or higher level of service by requiring local agencies to provide veterinary care, which was not required under prior law. The claimants cite Civil Code section 1834.4, Penal Code section 599d, and Food and Agriculture Code section 17005, which expresses the state's policy that no adoptable animal should be euthanized and no treatable animal should be euthanized. All of these sections state the following:

(a) It is the policy of the state that no adoptable animal should be euthanized if it can be adopted into a suitable home. Adoptable animals include only those animals eight weeks of age or older that, at or subsequent to the time the animal is impounded or otherwise taken into possession, have manifested no sign of a behavioral or temperamental defect that could pose a health or safety risk or otherwise make the animal unsuitable for placement as a pet, and have manifested no sign of disease, injury, or congenital or hereditary condition that adversely affect the animal's health in the future.

(b) It is the policy of the state that no treatable animal should be euthanized. *A treatable animal shall include any animal that is not adoptable but that could become adoptable with reasonable efforts.* This subdivision, by itself, shall not be the basis of liability for damages regarding euthanasia. (Emphasis added.)

The claimants contend that the italicized language quoted above "requires" local agencies to provide reasonable veterinary treatment services in order to make them adoptable.

The claimants also cite Civil Code section 1834, which was amended by the test claim legislation. That section provides that:

A depositary of living animals *shall* provide the animals with *necessary and prompt veterinary care*, nutrition, and shelter, and treat them kindly. Any depositary that fails to perform these duties may be liable for civil damages as provided by law. (Emphasis added.)

³⁰ Government Code section 6253.

Similarly, Civil Code section 1846 was amended by the test claim legislation to provide in part that “[a] gratuitous depository of a living animal *shall provide the animal with necessary and prompt veterinary care.*” (Emphasis added.)

Ms. Bryant contends that veterinary care does not constitute a new program or higher level of service. She states the following:

It is important to note that veterinary care is already mandated under Penal Code Sections 597f and 597.1, which require humane officers and animal control officers to ‘take possession of [a] stray or abandoned animal and . . . **provide care and treatment** for the animal until the animal is deemed to be in suitable condition to be returned to the owner.’ (Penal Code Sec. 597.1(a)) Subsection (b) permits injured or sick animals other than cats or dogs to be killed or impounded and treated. Cats and dogs must be seen by a veterinarian before a determination is made to kill.

Accordingly, the addition of the words ‘prompt and necessary veterinary care’ to Civil Code Section 1834 does not add to shelters’ veterinary care responsibilities because of the pre-existing care provisions of Penal Code Section 597f and 597.1. (Emphasis in original.)

First, the Commission finds that the policy statements found in Civil Code section 1834.4, Penal Code section 599d, and Food and Agriculture Code section 17005 do not impose any requirements on local agencies. They simply describe the state’s policy regarding euthanasia. The Commission acknowledges that the word “shall” is used in the sentence, which provides that “a treatable animal *shall* include any animal that is not adoptable but that could become adoptable with reasonable efforts.” However, that sentence is merely defining “treatable animals.” It is not imposing the requirement to provide veterinary care for animals.

The issue of whether the requirement imposed by Civil Code sections 1834 and 1846 to provide necessary and prompt veterinary care constitutes a new program or higher level of service is more complicated, however.

Before the enactment of the test claim legislation, Penal Code section 597.1 contained a provision requiring local agencies to provide “care and treatment” for the animal until the animal is in a suitable condition to be returned to the owner. The Commission agrees that care and treatment can include necessary veterinary treatment. But, the provisions of Penal Code section 597.1 became operative *only if* the governing body of the local agency determined that it would operate under section 597.1. Penal Code section 597.1 stated in relevant part the following:

(a) . . . Any peace officer, humane society officer, or animal control officer shall take possession of the stray or abandoned animal and shall provide *care and treatment* for the animal until the animal is deemed to be in suitable condition to be returned to the owner. . . .

(l) This section *shall be operative* in a public agency or a humane society under the jurisdiction of the public agency, or both, *only if* the governing body of that public agency, by ordinance or resolution, determines that this section shall be

operative in the public agency or the humane society and that Section 597f shall not be operative. (Emphasis added.)³¹

Thus, the Commission finds that local agencies were not required to comply with the provisions of Penal Code section 597.1 before the enactment of the test claim legislation.

Before the test claim legislation was enacted, existing law, through Penal Code section 597f, also required local agencies to "care" for abandoned animals until the animal is redeemed by the owner. Penal Code section 597f further required local agencies to convey all injured dogs and cats to a veterinarian for treatment or euthanization. Local agencies had the option of providing "suitable care" for abandoned animals, other than cats and dogs, until the animal is deemed to be in a suitable condition to be delivered to the owner. Penal Code section 597f states in relevant part the following:

(a)And it shall be the duty of any peace officer, officer of the humane society, or officer of a pound or animal regulation department of a public agency, to take possession of the animal so abandoned or neglected and *care* for the animal until it is redeemed by the owner or claimant, and the cost of caring for the animal shall be a lien on the animal until the charges are paid. Every sick, disabled, infirm, or crippled animal, except a dog or cat, which shall be abandoned in any city, city and county, or judicial district, may, if after due search no owner can be found therefore, be killed by the officer; and it shall be the duty of all peace officers, an officer of such society, or officer of a pound or animal regulation department of a public agency to cause the animal to be killed on information of such abandonment. The officer may likewise take charge of any animal, including a dog or cat, that by reason of lameness, sickness, feebleness, or neglect, is unfit for the labor it is performing, or that in any other manner is being cruelly treated; and if the animal is not then in the custody of its owner, the officer shall give notice thereof to the owner, if known, *and may provide suitable care for the animal until it is deemed to be in a suitable condition to be delivered to the owner*, and any necessary expenses which may be incurred for taking care of and keeping the animal shall be a lien thereon, to be paid before the animal can be lawfully recovered.

(b) It *shall* be the duty of all officers of pounds or humane societies, and animal regulation departments of public agencies to convey, and for police and sheriff departments, to cause to be *conveyed all injured cats and dogs found without their owners in a public place directly to a veterinarian* known by the officer or agency to be a veterinarian that ordinarily treats dogs and cats for a determination of whether the animal shall be immediately and humanely destroyed or shall be hospitalized under proper care and given emergency treatment. . . . (Emphasis added.)

³¹ The Commission notes that the test claim legislation deleted subdivision (l) from Penal Code section 597.1 to codify the court's decision in *Carrera v. Bertaini* (1976) 63 Cal.App.3d 721. There, the court held that making optional the provisions on post-seizure hearings in Penal Code section 597.1 was unconstitutional. Thus, with the deletion of subdivision (l), post-seizure hearings are now required.

Based on the language of section 597f, the Commission finds that local agencies had a pre-existing duty to obtain necessary veterinary care for injured cats and dogs. Thus, the Commission finds that providing "necessary and prompt veterinary care" for injured cats and dogs given emergency treatment, as required by Civil Code sections 1834 and 1846, does *not* constitute a new program or higher level of service.

However, the Commission finds that the requirement to provide "prompt and necessary veterinary care" for abandoned animals, other than injured cats and dogs given emergency treatment, is new. The Commission acknowledges that Penal Code section 597f requires local agencies to provide "care" to other animals. The word "care" is not defined by the Legislature. Nevertheless, for the reasons stated below, the Commission finds that the word "care" in section 597f does *not* include veterinary treatment.

The courts have determined that if a statute on a particular subject contains a particular word or provision, and another statute concerning the same or related subject omits that word or provision, then a different intention is indicated.³²

Penal Code section 597f requires local agencies to "care" for the animal until it is redeemed by the owner. That section was originally added by the Legislature in 1905, and was last amended in 1989. In 1991, the Legislature added Penal Code section 597.1. That section provides that local agencies shall provide "care *and treatment*" for the animal until it is redeemed by the owner. As indicated above, "care and treatment" can include veterinary care and treatment. However, since the Legislature did *not* use the word "treatment" in Penal Code section 597f like it did in Penal Code section 597.1, the Commission finds that the Legislature did not intend Penal Code section 597f to require local agencies to treat or provide "prompt and necessary veterinary care" to these other abandoned animals.

Accordingly, the Commission finds that providing prompt and necessary veterinary care for abandoned animals, other than injured cats and dogs given emergency treatment, as required by Civil Code sections 1834 and 1846, is new and, thus, imposes a new program or higher level of service.³³

³² Volume 58, Cal. Jur., sections 127 and 172; *Kaiser Steel Corp. v. County of Solano* (1979) 90 Cal.App.3d 662.

³³ Interested party, County of San Diego, contends that the test claim legislation constitutes a new program or higher level of service by "providing veterinary care for stray or abandoned animals found and delivered by any person (other than a peace officer, humane society officer, or animal control officer) to a public animal shelter, that are ultimately euthanized." The County of San Diego contends that Penal Code sections 597f and 597.1, when read in context, only apply when animals are seized by specified officers in the field and do not apply when other individuals find such animals.

The Commission disagrees with this interpretation. Penal Code section 597f, subdivision (a), states that "it shall be the duty of any peace officer, officer of the humane society, or officer of a pound or animal regulation department of a public agency, to take possession of the animal so abandoned or neglected and care for the animal until it is redeemed by the owner. . . ." While section 597f does apply to seized animals, it does not limit the requirement to care for the animal to only those animals that are seized by an officer. The duty to care for the animal is imposed on the "animal regulation department of a public agency" once the animal comes into their possession.

Construction of New Buildings

Finally, the claimants' are requesting reimbursement for the construction of cat housing, isolation/treatment facilities, and additional kennel buildings in order to comply with the test claim legislation. The Department of Finance and other commentators contend that this request is suspect.

The Commission notes that the test claim legislation does *not* expressly require or mandate local agencies to construct new buildings. However, the Commission's regulations allow reimbursement for the most reasonable methods of complying with the activities determined by the Commission to constitute reimbursable state mandated activities under article XIII B, section 6 of the California Constitution.³⁴ Therefore, in order for the claimants to be entitled to reimbursement for construction of new buildings, the claimants will have to show at the parameters and guidelines phase that construction of new buildings occurred as a direct result of the mandated activities and was the most reasonable method of complying with the mandated activities.

Issue 3: Does the test claim legislation impose "costs mandated by the state" within the meaning of Government Code sections 17514 and 17556?

As indicated above, the Commission finds that the test claim legislation constitutes a new program or higher level of service for the following activities:

- Providing care and maintenance for impounded dogs and cats for the increased holding period established by the test claim legislation (measured by calculating the difference between three days from the day of capture, and four business days from the day after impoundment, as specified in the third bullet below, or six business days from the day after impoundment);
- Providing care and maintenance for impounded rabbits, guinea pigs, hamsters, pot-bellied pigs, birds, lizards, snakes, turtles, or tortoises legally allowed as personal property during the increased holding period established by the test claim legislation (measured by calculating the difference between three days from the day of capture, and four business days from the day after impoundment, as specified in the third bullet below, or six business days from the day after impoundment);
- For impounded dogs, cats, and other specified animals that are held for four business days after the day of impoundment, either:
 - (a) Making the animal available for owner redemption on one weekday evening until at least 7:00 p.m., or one weekend day; or
 - (b) For those local agencies with fewer than three full-time employees or that are not open during all regular weekday business hours, establishing a procedure to enable owners to reclaim their animals by appointment at a mutually agreeable time when the agency would otherwise be closed;

³⁴ Title 2, California Code of Regulations, section 1183.1, subdivision (a)(4).

- Requiring the release of the impounded animal to a nonprofit animal rescue or adoption organization upon request prior to the euthanization of the animal;
- Verifying whether a cat is feral or tame by using a standardized protocol;
- Posting lost and found lists;
- Maintaining records on animals that are not medically treated by a veterinarian, but are either taken up, euthanized after the holding period, or impounded; and
- Providing prompt and necessary veterinary care for abandoned animals, other than injured cats and dogs that receive emergency treatment.

The Commission continues its inquiry to determine if these activities impose “costs mandated by the state.”

Increased Holding Periods/ Release to Nonprofit Rescue or Adoption Organization/ Veterinary Care for Animals Other Than Cats and Dogs

The claimants contend that the longer holding periods established by the test claim legislation for impounded and owner-relinquished animals, and the veterinary care result in increased costs mandated by the state. The claimant acknowledges that, in addition to a spay or neuter deposit, the test claim legislation authorizes the local agency to assess a fee, not to exceed the standard adoption fee, for animals released to an adoption organization. However, the claimants argue that the fee authority is not sufficient to cover the “substantial new costs.”

Both the Department of Finance and Ms. Bryant, citing Government Code section 17556, subdivisions (d) and (e), contend that the test claim legislation does not impose “costs mandated by the state” since the legislation authorizes local agencies to assess fees sufficient to pay for the mandated program and that the legislation has no net negative financial impact on local government. Ms. Bryant states the test claim legislation includes a number of cost saving measures such as (a) turning over shelter animals to qualified nonprofit animal rescue and adoption groups, which saves the costs of killing and carcass disposal and brings in adoption revenues paid by the nonprofit groups; (b) waiting before automatically killing owner-relinquished pets so that they can be reunited with their real owner or adopted by a new owner or nonprofit group - - thereby bringing in revenues and saving the expense of killing and disposing of the bodies; (c) providing for lost/found listings and other information to aid owners of lost pets, which obviates the need for many animals to enter the shelters at all; (d) enabling shelters to collect freely offered rewards for the return of lost pets; and (e) creating more legal avenues for dealing with anti-cruelty statute enforcement. The Department of Finance and Ms. Bryant further contend that the costs of impoundment must be passed on to the owners under the existing authority of Penal Code sections 597f and 597.1 and Government Code section 25802.

Government Code section 17514 defines “costs mandated by the state” as *any increased cost* a local agency is required to incur as a result of a statute that mandates a new program or higher level of service.

Government Code section 17556 lists seven exceptions to reimbursement, two of which are pertinent here. That section states that the Commission shall not find "costs mandated by the state" if the Commission finds that:

- The local agency has the authority to levy service charges, fees or assessments sufficient to pay for the mandated program or increased level of service (Gov. Code, § 17556, subd. (d)); or
- The statute provides for offsetting savings to local agencies which result in no net costs to the local agencies; or includes additional revenue that was specifically intended to fund the costs of the state mandate in an amount sufficient to fund the cost of the state mandate (Gov. Code, § 17556, subd. (e)).

Government Code section 17556, subdivisions (d) and (e), are analyzed below.

Fee Authority – Government Code Section 17556, Subdivision (d). Government Code section 17556, subdivision (d), provides that there shall be no costs mandated by the state if the local agency has the authority to levy service charges, fees, or assessments sufficient to pay for the mandated program.

In the present case, local agencies do have the authority, under certain circumstances, to assess fees upon the owner of an impounded animal for the care and maintenance of the animal. For example, pursuant to Civil Code section 2080, any public agency that takes possession of an animal has the authority to charge the owner, *if known*, a reasonable charge for saving and taking care of the animal.

Similarly, Penal Code sections 597f and 597.1 also allow local agencies to pass on the costs of caring for abandoned or seized animals to their owners by providing that "the cost of caring for the animal shall be a lien on the animal until the charges are paid."

Moreover, Penal Code section 597f allows the cost of hospital and emergency veterinary services provided for impounded animals to be passed on to the owner, if known.³⁵

The fee authority granted under the foregoing authorities applies only if the owner is known. Thus, local agencies have the authority to assess a fee to care and provide treatment for animals relinquished by their owners pursuant to Food and Agriculture Code section 31754. Local agencies also have the authority to assess a fee for the care and treatment of impounded animals that are ultimately redeemed by their owners. Under such circumstances, the Commission finds that the fee authority is sufficient to cover the increased costs to care,

³⁵ Penal Code section 597f also allows the cost of such veterinary services to be *partially* paid pursuant to Food and Agriculture Code section 30652, which provides the following: "All fees for the issuance of dog license tags and all fines collected pursuant to this division shall be paid into the county, city, or city and county treasury, as the case may be, and shall be used: (a) First, to pay fees for the issuance of dog license tags; (b) Second, to pay fees, salaries, costs, expenses, or any or all of them for the enforcement of this division and all ordinances which are made pursuant to this division; (c) Third, to pay damages to owners of livestock which are killed by dogs; (d) Fourth, to pay costs of any *hospitalization or emergency care of animals pursuant to Section 597f of the Penal Code*. (Emphasis added.) The monies collected for licenses and fines can be identified as an offset in the Parameters and Guidelines.

maintain, and provide necessary veterinary treatment for the animal during the required holding period since the "cost of caring" for the animal can be passed on to the owner.

Accordingly, pursuant to Government Code section 17556, subdivision (d), the Commission finds that there are no costs mandated by the state for the care, maintenance and necessary veterinary treatment of animals relinquished by their owners or redeemed by their owners during the required holding period.

The Commission further finds that there are no costs mandated by the state under Government Code section 17556, subdivision (d), for the care, maintenance, and treatment of impounded animals that are ultimately adopted by a new owner; for the care, maintenance, and treatment of impounded animals that are requested by a nonprofit animal rescue or adoption organization; or for the administrative activities associated with releasing the animal to such organizations.

The test claim legislation gives local agencies the authority to assess a standard adoption fee, in addition to any spay or neuter deposit, upon nonprofit animal rescue or adoption organizations that request the impounded animal prior to the scheduled euthanization of the animal.³⁶

The claimant contends that the "standard adoption fee" is not sufficient to cover the costs for animals adopted or released to nonprofit animal rescue or adoption organizations. However, based on the evidence presented to date, the Commission finds that local agencies are not prohibited by statute from including in their "standard adoption fee" the costs associated with caring for and treating impounded animals that are ultimately adopted by a new owner or released to nonprofit animal rescue or adoption organizations, and the associated administrative costs. Rather, local agencies are only prohibited from charging nonprofit animal rescue or adoption organizations a higher fee than the amount charged to individuals seeking to adopt an animal.

However, the fees recovered by local agencies under the foregoing authorities do *not* reimburse local agencies for the care and maintenance of stray or abandoned animals, or the veterinary treatment of stray or abandoned animals (other than cats and dogs) during the holding period required by the test claim legislation when:

- The owner is unknown;
- The animal is not adopted or redeemed; or
- The animal is not released to a nonprofit animal rescue or adoption organization.

Thus, the fee authority is not sufficient to cover the increased costs for care, maintenance, and treatment during the required holding period for those animals that are ultimately euthanized. Under such circumstances, the Commission finds that that Government Code section 17556, subdivision (d), does not apply to deny this claim. Rather, local agencies may incur increased costs mandated by the state to care for these animals during the required holding period.

³⁶ See Food and Agriculture Code sections 31108 (dogs), 31752 (cats), 31752.5 (feral cats), 31753 (other animals), and 31754 (owner-relinquished animals).

Offsetting Savings or Additional Revenue – Government Code Section 17556,

Subdivision (e). Government Code section 17556, subdivision (e), states that the Commission shall not find costs mandated by the state if:

- The *test claim statute* provides for offsetting savings to local agencies which result in no net costs to the local agencies, or
- The *test claim statute* includes additional revenue that was specifically intended to fund the costs of the state mandate in an amount sufficient to fund the cost of the state mandate.

As indicated above, the Department of Finance and Ms. Bryant contend that Government Code section 17556, subdivision (e), applies to this claim since the legislation has no net negative financial impact on local government and includes a number of cost saving measures.

Additionally, the San Francisco SPCA contends that the test claim legislation is cost-effective and can be accomplished on a revenue-neutral or revenue-positive basis without expenditures for new facilities or increased space.

The Commission agrees that one of the purposes of the test claim legislation was to reduce the cost of euthanasia. The Legislature expressly declared in Section 1 of the test claim legislation that the “redemption of owned pets and adoption of lost or stray adoptable animals is preferable to incurring social and economic costs of euthanasia.” To reduce the rate of killing, the Legislature made it easier for owners to redeem their pets by establishing longer holding periods, mandatory record-keeping, and lost and found lists.

In this respect, both the Department of Finance and Ms. Bryant describe a hypothetical situation showing the projected cost savings to a local agency when complying with the test claim legislation. The Commission recognizes that if complying with the test claim legislation really does result in cost savings, then local agencies will not be filing claims for reimbursement with the State Controller’s Office. Government Code section 17514 only authorizes reimbursement by the state for the *increased* costs in complying with the mandate. The Commission notes that the claimants and several other commentators have filed declarations stating that local agencies have incurred increased costs as a result of the test claim legislation.

But, with regard to the legal issue of whether Government Code section 17556, subdivision (e), applies to this test claim, the only provision *in the test claim legislation* that provides for offsetting savings for the care and maintenance of the animal during the required holding period is the authorization to accept advertised rewards or rewards freely offered by the owner of the animal.³⁷ Rewards are not offered in every case, however. In addition, the rewards do not reimburse local agencies for the care and maintenance of a stray or abandoned animal when the owner cannot be found.

Thus, the Commission finds that there is no evidence that the test claim legislation provides for offsetting savings that result in *no* net costs to local agencies.

³⁷ Civil Code section 1845.

Moreover, the test claim legislation does not include additional revenue specifically intended to fund the costs of the mandate.

Accordingly, the Commission finds that Government Code section 17556, subdivision (e), does not apply to this claim.

Feral Cats, Lost and Found Lists, Maintaining Records

The Commission finds that none of the exceptions to reimbursement in Government Code section 17556 apply to deny this test claim with respect to the activities listed below. In this regard, the Commission finds that local agencies may incur increased costs mandated by the state pursuant to Government Code section 17514:

- For impounded dogs, cats, and other specified animals that are held for four business days after the day of impoundment, to either:
 - (1) Make the animal available for owner redemption on one weekday evening until at least 7:00 p.m., or one weekend day; or
 - (2) For those local agencies with fewer than three full-time employees or that are not open during all regular weekday business hours, establish a procedure to enable owners to reclaim their animals by appointment at a mutually agreeable time when the agency would otherwise be closed (Food & Agr., Code §§ 31108, 31752, and 31753);
- To verify whether a cat is feral or tame by using a standardized protocol (Food & Agr. Code, § 31752.5);
- To post lost and found lists (Food & Agr. Code, § 32001); and
- To maintain records on animals that are not medically treated by a veterinarian, but are either taken up, euthanized after the holding period, or impounded (Food & Agr. Code, § 32003).

Issue 4: Do the activities imposed by Penal Code section 597.1, relating to the seizure of animals, constitute a reimbursable state mandated program pursuant to article XIII B, section 6 of the California Constitution and Government Code section 17514?

At the hearing on October 26, 2000, interested party, the County of San Diego, testified that the activities required by Penal Code section 597.1, relating to the seizure of animals, constitutes a reimbursable state mandated program. The claimants did not request reimbursement for such activities.

However, on November 9, 2000, the claimants submitted a "Review of Transcript and Proposed Recommendation" requesting that the Commission's decision incorporate the County of San Diego request. Specifically, the claimants are requesting that the Commission find that the activities listed below constitute reimbursable state mandated activities, and that the Commission adopt the following language in the statement of decision:

For dogs, cats and other animals seized pursuant to Penal Code Section [PC] 597.1:

- A. Conducting pre-seizure hearings [PC 597.1(g)],
- B. Conducting post-seizure hearings [PC 597.1(f)], in those cases where it is determined the seizure was justified,
- C. Providing care, maintenance, and required veterinary treatment, except for emergency treatment of injured dogs and cats, during the new segment of the 14 day holding period, if not paid for by the animals' owner or on the owner's behalf [PC 597.1(h)], or, if required veterinary care is not provided by the owner and the animal is deemed to be abandoned [PC 597.1(i)].

For the reasons stated below, the Commission disagrees with the claimants and interested parties, and finds that the activities listed above do not constitute reimbursable state mandated activities pursuant to article XIII B, section 6 of the California Constitution and Government Code section 17514.

Pre-Seizure and Post-Seizure Hearings

Before the test claim legislation was enacted, Penal Code section 597.1 made it a misdemeanor to permit an animal to be in any building, street, or lot without proper care and attention. In cases where the local agency determined that prompt action was required to protect the health and safety of the animal or others, the local agency was authorized to immediately seize the animal. Under such circumstances, subdivision (f) required that the local agency provide the owner, if known, with the opportunity for a post-seizure hearing before the commencement of the criminal proceeding to determine the validity of the seizure.

In cases where the immediate seizure was not justified, the local agency was required by subdivision (g) to provide the owner, if known, with the opportunity of a pre-seizure hearing. In such cases, the owner was required to produce the animal at the time of the hearing, unless the owner made arrangements with the local agency to view the animal, or unless the owner could provide verification that the animal was euthanized. The purpose of the hearing was to determine if the animal should be seized for care and treatment.

Although, in prior law, subdivisions (f) and (g) contained language requiring agencies to conduct pre-seizure and post-seizure hearings, the provisions of Penal Code section 597.1, including subdivisions (f) and (g), became operative *only if* the governing body of the local agency determined that it would operate under section 597.1. Former Penal Code section 597.1, subdivision (l), stated the following:

(l) This section shall be operative in a public agency or a humane society under the jurisdiction of the public agency, or both, only if the governing body of that public agency, by ordinance or resolution, determines that this section shall be operative in the public agency or the humane society and that Section 597f shall not be operative.

Thus, before the test claim legislation was enacted, adherence to Penal Code section 597.1 was optional.

The test claim legislation deleted subdivision (l). With the deletion of subdivision (l), pre-seizure and post-seizure hearings are now required.

Nevertheless, for the reasons provided below, the Commission finds the requirement to conduct either a pre-seizure or post-seizure hearing does *not* constitute a new program or higher level of service, and does not impose costs mandated by the state.

In 1976, the California Court of Appeal determined, in the case of *Carrera v. Bertaini*,³⁸ that pre-seizure and post-seizure hearings are constitutionally required pursuant to Fourteenth Amendment, Due Process Clause, of the United States Constitution. In *Carrera*, the petitioner's farm animals were seized and impounded for running at large and the owner was charged with cruelty and neglect. The seizure immediately resulted in petitioner incurring several hundred dollars in fees and costs that had to be paid before she could get possession of her animals. Petitioner was not given the opportunity under either a pre-seizure or post-seizure hearing to determine if the seizure was valid. Instead, by the time she was able to institute a lawsuit and obtain a court hearing, six weeks after the seizure, the fees increased to over \$2,500. The court found that the county's procedures violated the Due Process Clause and recognized that where the government takes a person's property, the Due Process Clause requires some form of notice and hearing. The court stated the following:

As a matter of basic fairness, to avoid the incurrence of unnecessary expenses appellant was entitled to a hearing *before* her animals were seized or, if the circumstances justified a seizure without notice and a hearing, she was entitled to a *prompt hearing after* the animals were seized. Manifestly, the hearing in the superior court six weeks after the seizure cannot be said to satisfy appellant's due process rights.³⁹
(Emphasis added.)

Since pre-seizure and post-seizure hearings were *previously required* by the United States Constitution, these same activities imposed by Penal Code section 597.1 do not constitute a new program or higher level of service.

Moreover, the requirement to conduct pre-seizure and post-seizure hearings does not impose costs mandated by the state. Government Code section 17556, subdivision (b), provides that the Commission shall not find costs mandated by the state when "the statute or executive order affirmed for the state that which had been declared existing law or regulation by action of the courts." The Commission finds that Government Code section 17556, subdivision (b), applies here since before the enactment of the test claim legislation, the court in *Carrera* declared that existing law, through the Due Process Clause of the United States Constitution, required local agencies to conduct pre-seizure and post-seizure hearings when animals are seized. Moreover, bill analyses of the test claim legislation reveal that the amendment to Penal Code section 597.1 was intended to codify the court's decision in *Carrera*.

³⁸ *Carrera v. Bertaini* (1976) 63 Cal.App.3d 721.

³⁹ *Id.* at 729.

Accordingly, the Commission finds that the requirement imposed by Penal Code section 597.1 to conduct pre-seizure and post-seizure hearings does not constitute a reimbursable state mandated activity pursuant to article XIII B, section 6 of the California Constitution and Government Code section 17514.

Holding Period for Seized Animals

The claimants and interested parties also request reimbursement for the following activities as a result of the 14-day holding period for seized animals:

Providing care, maintenance, and required veterinary treatment, except for emergency treatment of injured dogs and cats, during the new segment of the 14 day holding period, if not paid for by the animals' owner or on the owner's behalf [PC 597.1(h)], or, if required veterinary care is not provided by the owner and the animal is deemed to be abandoned [PC 597.1(i)].

The Commission disagrees with the claimants' request.

Penal Code section 597.1, subdivisions (h), provides that if an animal is properly seized, the owner shall be personally liable to the local agency for the cost of the seizure and care of the animal. The owner has 14 days after the animal was seized to pay the charges and redeem the animal. The charges constitute a lien on the animal. If the owner does not pay the charges permitted under section 597.1, then the animal shall be deemed an abandoned animal and may be disposed of by the local agency.

Penal Code section 597.1, subdivision (i), further provides that if the seized animal requires veterinary care and the local agency is not assured, within 14 days of the seizure of the animal, that the owner will provide the necessary care, the animal is deemed abandoned and may be disposed of by the local agency.

The 14-day holding period does *not* apply if it has been determined that the seized animal incurred severe injuries, is incurably crippled, or is afflicted with a serious contagious disease and the owner does not immediately authorize treatment of the animal at the expense of the owner. In such cases, the seized animal may be euthanized without regard to the holding period. (Pen. Code, § 597.1, subd. (i).)

Furthermore, the Commission finds that the 14-day holding period does *not* apply when the owner is truly unknown. Under such circumstances, the animal may be euthanized if sick or injured without regard to the 14-day holding period, or is deemed an abandoned or stray animal requiring the local agency to comply with the four or six day holding period established for dogs, cats, and other animals in Food and Agriculture Code sections 31108, 31752, and 31753. For example, Penal Code section 597.1, subdivision (b), provides that "every sick, disabled, infirm, or crippled animal, except a dog or cat, that is abandoned in any city, county, city and county, or judicial district may be killed by the officer if, after a reasonable search, no owner of the animal can be found." Subdivision (b) further provides that the local agency has the duty to cause the animal to be euthanized or rehabilitated and placed in a suitable home on information that the animal is stray or abandoned. Moreover, subdivision (c) requires that all injured dogs and cats be conveyed to a veterinarian. If the owner does not redeem the injured

dog or cat "within the locally prescribed waiting period," the veterinarian may euthanize the animal.

When the 14-day holding period does apply, the Commission agrees that it constitutes a new program or higher level of service. Before the enactment of the test claim legislation, Penal Code section 597f required local agencies to take possession of animals that were abandoned, neglected, unfit for labor, or cruelly treated, and care for the animal until it is redeemed by the owner.

The Commission finds that prior law established in Penal Code section 597f implies *some* holding period for seized animals to allow the owner to redeem the animal after payment of expenses. However, there was *no prior state or federal law* mandating local agencies to hold seized animals for any specified time period. With the enactment of the test claim legislation, which deleted subdivision (l) of section 597.1 making its provisions mandatory, the state is now requiring local agencies, for the first time, to hold seized animals for 14 days before the animal may be disposed of by the local agency.

Thus, the Commission finds that providing care and maintenance for seized animals during the 14-day holding period constitutes a new program or higher level of service.

The Commission also finds the providing treatment for seized animals during the 14-day holding period, constitutes a new program or higher level of service. Penal Code section 597.1, subdivision (a), states that "any peace officer, humane society officer, or animal control officer shall take possession of the stray or abandoned animal and shall provide care *and treatment* for the animal until it is deemed in suitable condition to be returned to the owner." Subdivisions (f) and (g) of section 597.1 also require that the due process notice given to owners of seized animals contain a statement that the owner is liable for the cost of caring for *and treating* the seized animal. Thus, necessary treatment is required during this time period.

But, the Commission finds that there are *no* costs mandated by the state associated with the 14-day holding period.

Government Code section 17556, subdivision (d), provides that the Commission shall not find costs mandated by the state when the local agency has the authority to levy service charges, fees or assessments sufficient to pay for the mandated program or increased level of service.

The Commission finds that Government Code section 17556, subdivision (d), applies here. Penal Code section 597.1 authorizes the local agency to pass on the costs of the seizure and care, including veterinary care, of the animal to the owner when the seizure is upheld at the due process hearing. The charges become a lien on the animal until paid. If the owner pays all costs associated with the seizure of the animal, then the owner can redeem the animal and the local agency's costs are fully recovered. (Pen. Code, § 597.1, subd. (a).) Under such circumstances, there are no costs mandated by the state.

Even in situations where the owner abandons the seized animal, and fails or refuses to pay the costs of the seizure and care during the 14-day holding period, the local agency still has the authority to recover their costs in full from the owner. Under such circumstances, the owner becomes personally liable for the charges. For example, subdivisions (f) and (g) of section 597.1 provide that the owner's failure to request or attend the due process hearing "shall result

in liability” for the cost of caring for and treating any animal properly seized. Moreover, once the owner is found guilty of a misdemeanor under section 597.1, the costs of caring for and treating the animal become restitution to be paid by the owner to the local agency. Thus, even if the owner abandons the animal, liability for the costs of care and treatment during the 14-day holding period follow the owner and are collectible by the local agency.

The Commission further finds that Government Code section 17556, subdivision (d), applies to deny reimbursement for the costs incurred as a result of the 14-day holding period when the local agency is not able to collect the full amount of the charges from the owner. In *Santa Margarita Water District v. Kathleen Connell, as State Controller*⁴⁰ the court rejected the interpretation that authority to levy fees sufficient to cover costs under Government Code section 17556, subdivision (d), turns on economic feasibility. Rather, the court held that the plain language of subdivision (d) precludes reimbursement where the local agency has the authority, the right or the power to levy fees sufficient to cover the costs of the state-mandated program. The court stated the following:

The Districts in effect ask us to construe ‘authority,’ as used in the statute, as a practical ability in light of surrounding economic circumstances. However, this construction cannot be reconciled with the plain language of the statute and would create a vague standard not capable of reasonable adjudication. Had the Legislature wanted to adopt the position advanced by the Districts, it would have used “reasonable ability” in the statute rather than “authority”.⁴¹

Accordingly, the Commission finds that the 14-day holding period established under Penal Code section 597.1 does not constitute a reimbursable state mandated program within the meaning of article XIII B, section 6 of the California Constitution and Government Code section 17514.

CONCLUSION

The Commission concludes that the test claim legislation imposes a partial reimbursable state mandated program on local agencies pursuant to article XIII B, section 6 of the California Constitution and Government Code section 17514 for the *increased costs* in performing the following activities:

1. Providing care and maintenance during the increased holding period for impounded dogs and cats that are ultimately euthanized. The increased holding period shall be measured by calculating the difference between three days from the day of capture, and four business days from the day after impoundment, as specified below in 3(a) and 3(b), or six business days from the day after impoundment (Food & Agr. Code, §§ 31108, 31752);

⁴⁰ (1997) 59 Cal.App.4th 382.

⁴¹ *Id.* pg. 401

2. Providing care and maintenance for four business days from the day after impoundment, as specified below in 3(a) and 3(b), or six business days from the day after impoundment, for impounded rabbits, guinea pigs, hamsters, pot-bellied pigs, birds, lizards, snakes, turtles, or tortoises legally allowed as personal property that are ultimately euthanized (Food & Agr. Code, § 31753);
3. For impounded dogs, cats, and other specified animals that are held for four business days after the day of impoundment, either:
 - (a) Making the animal available for owner redemption on one weekday evening until at least 7:00 p.m., or one weekend day; or
 - (b) For those local agencies with fewer than three full-time employees or that are not open during all regular weekday business hours, establishing a procedure to enable owners to reclaim their animals by appointment at a mutually agreeable time when the agency would otherwise be closed (Food & Agr., Code §§ 31108, 31752, and 31753);
4. Verifying whether a cat is feral or tame by using a standardized protocol (Food & Agr. Code, § 31752.5);
5. Posting lost and found lists (Food & Agr. Code, § 32001);
6. Maintaining records on animals that are not medically treated by a veterinarian, but are either taken up, euthanized after the holding period, or impounded (Food & Agr. Code, § 32003); and
7. Providing "necessary and prompt veterinary care" for abandoned animals, other than injured cats and dogs given emergency treatment, that are ultimately euthanized (Civ. Code, §§ 1834 and 1846).

The Commission also concludes that all other statutes included in the test claim legislation that are not listed above do not impose a reimbursable state mandated program within the meaning of article XIII B, section 6 of the California Constitution and Government Code section 17514.

The Commission further concludes that several statutes outside the test claim legislation that provide local agencies with revenues to offset the costs of the mandated program should be included in the Parameters and Guidelines as offsetting savings to the extent they are collected and received by the local agency. For example, local agencies have the authority to attribute part of the fees collected from owners for dog license tags and fines to pay salaries, costs, and expenses for the enforcement of animal control and emergency care of impounded animals. (Food & Agr. Code, § 30652; Pen. Code, § 597f.) Local agencies also have the authority to use a portion of the unclaimed spay and neuter deposits and fines collected for not complying with spay and neuter requirements to the administrative costs incurred by a local agency. (Food & Agr. Code, §§ 30520 et seq., and 31751 et seq.)⁴² Finally, local agencies have the

⁴² The Commission recognizes that as of January 1, 2000, dogs and cats are required to be spayed or neutered before they are adopted or released. (Food & Ag. Code, §§ 30503 and 31751.3.) Thus, local agencies stopped collecting spay/neuter deposits for cats and dogs as of January 1, 2000. (See comments from County of Fresno.) The reimbursement period for this test claim will begin January 1, 1999. Accordingly, the Commission concludes

authority to use the fines imposed and collected from owners of impounded animals to pay for the expenses of operation and maintenance of the public pound and for the compensation of the poundkeeper. (Gov. Code, § 25802.)

that the spay/neuter deposits collected by local agencies for cats and dogs from January 1, 1999 to January 1, 2000, be identified as an offset.

Lindsay, County of Tulare, County of Fresno,
and Southeast Area Animal Control Authority,
Claimants.

No. 98-TC-11

Animal Adoption

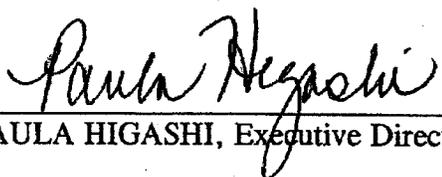

ADOPTION OF PARAMETERS AND
GUIDELINES PURSUANT TO
GOVERNMENT CODE SECTION 17557
AND TITLE 2, CALIFORNIA CODE OF
REGULATIONS, SECTION 1183.12

(Adopted on February 28, 2002)

ADOPTED PARAMETERS AND GUIDELINES

The attached Parameters and Guidelines is hereby adopted in the above-entitled matter.

This Decision shall become effective on March 6, 2002.

PAULA HIGASHI, Executive Director

PARAMETERS AND GUIDELINES

Civil Code Sections 1834 and 1846;
Food and Agriculture Code Sections 31108, 31752, 31752.5, 31753, 32001, and 32003
As Added or Amended by Statutes of 1998, Chapter 752

Animal Adoption

I. Summary of the Mandate

The test claim legislation was enacted in an attempt to end the euthanasia of adoptable and treatable animals. Generally, the test claim legislation increased the holding period for stray and abandoned dogs, cats, and other specified animals; required the verification of the temperament of feral cats; required the posting of lost and found lists; required the maintenance of records for impounded animals; and required that impounded animals receive "necessary and prompt veterinary care."

The Commission partially approved this test claim, pursuant to article XIII B, section 6 of the California Constitution and Government Code section 17514, for the *increased costs* in performing the following activities only:

1. Providing care and maintenance during the increased holding period for impounded dogs and cats that are ultimately euthanized. The increased holding period shall be measured by calculating the difference between three days from the day of capture and four business days from the day after impoundment, as specified below in 3 (a) and 3 (b), or six business days from the day after impoundment (Food & Agr. Code, §§ 31108, 31752);
2. Providing care and maintenance for four business days from the day after impoundment, as specified below in 3 (a) and 3 (b), or six business days from the day after impoundment, for impounded rabbits, guinea pigs, hamsters, pot-bellied pigs, birds, lizards, snakes, turtles, or tortoises legally allowed as personal property that are ultimately euthanized (Food & Agr. Code, § 31753);
3. For dogs, cats, and other specified animals held for four business days after the day of impoundment, either:
 - (a) Making the animal available for owner redemption on one weekday evening until at least 7:00 p.m., or one weekend day; or
 - (b) For those local agencies with fewer than three full-time employees or that are not open during all regular weekday business hours, establishing a procedure to enable owners to reclaim their animals by appointment at a

mutually agreeable time when the agency would otherwise be closed (Food & Agr., Code §§ 31108, 31752, and 31753);

4. Verifying whether a cat is feral or tame by using a standardized protocol (Food & Agr. Code, § 31752.5);
5. Posting lost and found lists (Food & Agr. Code, § 32001);
6. Maintaining records on animals that are not medically treated by a veterinarian, but are either taken up, euthanized after the holding period, or impounded (Food & Agr. Code, § 32003); and
7. Providing "necessary and prompt veterinary care" for abandoned animals, other than injured cats and dogs given emergency treatment, that are ultimately euthanized (Civ.Code, §§ 1834 and 1846).

II. Eligible Claimants

Any city, county, city and county, dependent special district, and joint powers authority comprised of a city, county, and/or city and county that incurs increased costs as a result of this reimbursable state mandated program is eligible to claim reimbursement of those costs.

III. Period of Reimbursement

Government Code section 17557, as amended by Statutes of 1998, Chapter 681 (which became effective on September 22, 1998), states that a test claim shall be submitted on or before June 30 following a fiscal year in order to establish eligibility for reimbursement for that fiscal year. On December 22, 1998, the County of Los Angeles filed the test claim for this mandated program, establishing eligibility for reimbursement beginning on or after July 1, 1997.

However, except for the amendments to Food and Agriculture Code sections 31108 and 31752, Statutes of 1998, Chapter 752 became operative and effective on January 1, 1999. Therefore, except for the amendments to Food and Agriculture Code sections 31108 and 31752, the costs incurred for Statutes of 1998, Chapter 752 are eligible for reimbursement on or after January 1, 1999.

Section 21 of Statutes of 1998, Chapter 752 establishes an operative date of July 1, 1999 for the amendments to Food and Agriculture Code section 31108 (holding period for stray dogs) and Food and Agriculture Code sections 31752 (holding period for stray cats). Therefore, costs incurred for Food and Agriculture Code sections 31108 and 31752, as amended by Statutes of 1998, Chapter 752, are eligible for reimbursement on or after July 1, 1999.

Actual costs for one fiscal year shall be included in each claim. Estimated costs for the subsequent year may be included on the same claim, if applicable. Pursuant to section 17561, subdivision (d)(1) of the Government Code, all claims for reimbursement of initial years' costs shall be submitted within 120 days of notification by the State Controller of the issuance of claiming instructions.

If the total costs for a given year do not exceed \$200, no reimbursement shall be allowed, except as otherwise allowed by Government Code section 17564.

IV. Reimbursable Activities

For each eligible claimant, all direct and indirect costs of labor, materials, supplies, fixed assets, contracted services, training and travel for the performance of the activities listed below are eligible for reimbursement.

Except as specified in Component (B)(3) and (4), reimbursement claims for the performance of the activities listed below shall be based on actual or estimated costs as provided in Government Code section 17560.

A. One Time Activities

1. Develop policies and procedures to implement the reimbursable activities listed in Section IV (B) of these parameters and guidelines.
2. Train staff on the reimbursable activities listed in Section IV (B) of these parameters and guidelines. (One-time per employee.)
3. Develop or procure computer software for the maintenance of records on animals specified in Section IV (B) (8) of these parameters and guidelines to the extent these costs are not claimed as an indirect cost under Section V (B) (8) of these parameters and guidelines. If the computer software is utilized in some way that is not directly related to the maintenance of records specified in Section IV (B) (8), only the pro rata portion of the activity that is used for compliance with Section IV (B) (8) is reimbursable.

B. Ongoing Activities

1. Acquisition of Additional Space and/or Construction of New Facilities

Beginning January 1, 1999 - Acquiring additional space by purchase or lease and/or construction of new facilities to provide appropriate or adequate shelter necessary to comply with the mandated activities during the increased holding period for impounded stray or abandoned dogs, cats, and other animals specified in Statutes of 1998, Chapter 752 that die during the increased holding period or are ultimately euthanized.

Eligible claimants are only entitled to reimbursement for the proportionate share of actual costs required to plan, design, acquire, and/or build facilities in a given fiscal year based on the pro rata representation of impounded stray or abandoned dogs, cats, and other animals specified in Statutes of 1998, Chapter 752 that are held during the *increased* holding period specified in Sections IV (B) (3) and (4) of these Parameters and Guidelines and die during the increased holding period or are ultimately euthanized, to the total population of animals housed in the facility (including those animals that are excluded from

reimbursement, as specified in Sections IV (B) (3) and (4) of these Parameters and Guidelines) during the entire holding period required by Food and Agriculture Code sections 31108, 31752 and 31753.

Supporting Documentation Submitted with the Initial and Subsequent Reimbursement Claims

Acquiring additional space and/or construction of new facilities is reimbursable only to the extent that an eligible claimant submits, with the initial and/or subsequent reimbursement claim, documentation reflecting the following:

A determination by the governing board that acquiring additional space and/or constructing new facilities is necessary for the increased holding period required by Statutes of 1998, Chapter 752 because the existing facilities do not reasonably accommodate impounded stray or abandoned dogs, cats and other specified animals that are ultimately euthanized. The determination by the governing board shall include all of the following findings:

- The average daily census of impounded stray or abandoned dogs, cats, and other animals specified in Statutes of 1998, Chapter 752 that were impounded in 1998. Average Daily Census is defined as the average number of impounded stray or abandoned dogs, cats, and other animals specified in Statutes of 1998, Chapter 752 housed on any given day, in a 365-day period;
- The average daily census of impounded stray or abandoned dogs, cats, and other animals specified in Statutes of 1998, Chapter 752 that were impounded in a given year under the holding periods required by Food and Agriculture Code sections 31108, 31752, and 31753, as added or amended by Statutes of 1998, Chapter 752;
- Existing facilities are not appropriately configured and/or equipped to comply with the increased holding period required by Statutes of 1998, Chapter 752;
- Remodeling existing facilities is not feasible or is more expensive than acquiring additional space and/or constructing new facilities; and
- Contracting with existing private or public shelters in the area to house the increase of impounded stray or abandoned dogs, cats, or other animals specified in Statutes of 1998, Chapter 752 is not feasible or is more expensive than acquiring additional space and/or constructing new facilities.

Documentation requirements may be satisfied in whole or in part by staff agenda items, staff reports, minutes of governing board

meetings, transcripts of governing board meetings, certification by the governing board describing the findings and determination, and/or a resolution adopted by the governing board pursuant to Food and Agriculture Code section 31755, as added by Statutes of 1999, Chapter 81 (Assembly Bill 1482).

2. Remodeling/Renovating Existing Facilities

Beginning January 1, 1999 - Remodeling/renovating existing facilities to provide appropriate or adequate shelter necessary to comply with the mandated activities during the increased holding period for impounded stray or abandoned dogs, cats, and other animals specified in Statutes of 1998, Chapter 752 that die during the increased holding period or are ultimately euthanized.

Eligible claimants are only entitled to reimbursement for the proportionate share of actual costs required to plan, design, remodel and/or renovate existing facilities in a given fiscal year based on the pro rata representation of impounded stray or abandoned dogs, cats, and other animals specified in Statutes of 1998, Chapter 752 that are held during the *increased* holding period specified in Sections IV (B) (3) and (4) of these Parameters and Guidelines and die during the increased holding period or are ultimately euthanized, to the total population of animals housed in the facility (including those animals that are excluded from reimbursement, as specified in Sections IV (B) (3) and (4) of these Parameters and Guidelines) during the entire holding period required by Food and Agriculture Code sections 31108, 31752 and 31753.

Supporting Documentation Submitted with the Initial and Subsequent Reimbursement Claims

Remodeling/renovating existing facilities is reimbursable only to the extent that an eligible claimant submits, with the initial and/or subsequent reimbursement claim, documentation reflecting the following:

A determination by the governing board or a delegated representative that remodeling/renovating existing facilities is necessary because the existing facilities do not reasonably accommodate impounded stray or abandoned dogs, cats and other specified animals that are ultimately euthanized for the increased holding period required by Statutes of 1998, Chapter 752. The determination by the governing board or delegated representative shall include all of the following findings:

- The average daily census of impounded stray or abandoned dogs, cats, and other animals specified in Statutes of 1998, Chapter 752 that were impounded in 1998. Average Daily Census is defined as the average number of impounded stray or

abandoned dogs, cats, and other animals specified in Statutes of 1998, Chapter 752 housed on any given day, in a 365-day period;

- The average daily census of impounded stray or abandoned dogs, cats, and other animals specified in Statutes of 1998, Chapter 752 in a given year under the holding periods required by Food and Agriculture Code sections 31108, 31752, and 31753, as added or amended by Statutes of 1998, Chapter 752;
- Existing facilities are not appropriately configured and/or equipped to comply with the increased holding period required by Statutes of 1998, Chapter 752;
- Contracting with existing private or public shelters in the area to house the increase of impounded stray or abandoned dogs, cats, or other animals specified in Statutes of 1998, Chapter 752 is not feasible or is more expensive than remodeling/renovating existing facilities.

Documentation requirements may be satisfied in whole or in part by staff agenda items, staff reports, minutes of governing board meetings, transcripts of governing board meetings, certification by the governing board or declaration from the delegated representative describing the findings and determination, and/or a resolution adopted by the governing board pursuant to Food and Agriculture Code section 31755, as added by Statutes of 1999, Chapter 81 (Assembly Bill 1482).

2. Care and Maintenance for Impounded Stray or Abandoned Dogs and Cats that Die During the Increased Holding Period or are Ultimately Euthanized (Food & Agr. Code, §§ 31108, 31752)

Beginning July 1, 1999 - Providing care and maintenance during the increased holding period for impounded stray or abandoned dogs and cats that die during the increased holding period or are ultimately euthanized. The increased holding period shall be measured by calculating the difference between three days from the day of capture, and four or six business days from the day after impoundment.

Exclusions

Eligible claimants are *not* entitled to reimbursement for the care and maintenance of the following population of dogs and cats:

- Stray or abandoned dogs and cats that are irremediably suffering from a serious illness or severe injury (Food & Agr. Code, § 17006);
- Newborn stray or abandoned dogs and cats that need maternal care and have been impounded without their mothers (Food & Agr. Code, § 17006);

- Stray or abandoned dogs and cats too severely injured to move or where a veterinarian is not available and it would be more humane to dispose of the animal (Pen. Code, §§ 597.1, subd. (e), 597f, subd. (d));
- Owner relinquished dogs and cats; and
- Stray or abandoned dogs and cats that are ultimately redeemed, adopted, or released to a nonprofit animal rescue or adoption organization.

Methods for Claiming Costs

Eligible claimants may elect one of following two methods to claim costs for the care and maintenance of impounded stray or abandoned dogs and cats that die during the increased holding period or are ultimately euthanized:

- Actual Cost Method – Under the actual cost method, actual reimbursable care and maintenance costs per animal per day are computed for an annual claim period.
 - a) Determine the total annual cost of care and maintenance for all dogs and cats impounded at a facility. Total cost of care and maintenance includes labor, materials, supplies, indirect costs, and contract services.
 - b) Determine the average daily census of dogs and cats.
 - c) Multiply the average daily census of dogs and cats by 365 = yearly census of dogs and cats.
 - d) Divide the total annual cost of care by the yearly census of dogs and cats = cost per animal per day.
 - e) Multiply the cost per animal per day, by the number of impounded stray or abandoned dogs and cats that die during the increased holding period or are ultimately euthanized, by each reimbursable day (the difference between three days from the day of capture, and four or six business days from the day after impoundment).
- Time Study Method – Under the time study method, a random sample of impounded stray or abandoned dogs and cats are observed to determine the amount of time to provide care and maintenance during a reimbursable day.

The time study shall be developed using one representative month each quarter and be supported with actual source documentation. Time studies shall be conducted on a more frequent basis if there are significant variations of time expended from month to month. The time study shall identify hours devoted to each specific category. If the time study

supports a fixed-cost approach such as an animal day (i.e., dog-day, cat-day, etc.), the eligible claimant shall document the analysis supporting the method used.

Time records used to support the time study shall:

- a) Reflect an after-the-fact distribution of each employee's actual activity;
 - b) Account for the total activity for which each employee is compensated;
 - c) Account for the total labor hours of the month;
 - d) Be signed and dated by the employee not later than the end of the pay period that follows the pay period covered by the report; and
 - e) Document, by signature or initials and date, supervisor approval.
3. Care and Maintenance for Impounded Stray or Abandoned Animals Specified in Food and Agriculture Code Section 31753 that Die During the Increased Holding Period or are Ultimately Euthanized (Food & Agr. Code, § 31753)

Beginning January 1, 1999 - Providing care and maintenance for four or six business days from the day after impoundment for impounded stray or abandoned rabbits, guinea pigs, hamsters, pot-bellied pigs, birds, lizards, snakes, turtles, and tortoises legally allowed as personal property that die during the increased holding period or are ultimately euthanized.

Exclusions

Eligible claimants are *not* entitled to reimbursement for the care and maintenance of the following population of animals:

- Stray or abandoned animals that are irremediably suffering from a serious illness or severe injury (Food & Agr. Code, § 17006);
- Newborn animals that need maternal care and have been impounded without their mothers (Food & Agr. Code, § 17006);
- Stray or abandoned animals too severely injured to move or where a veterinarian is not available and it would be more humane to dispose of the animal (Pen. Code, §§ 597.1, subd. (e), 597f, subd. (d));
- Owner relinquished animals; and

- Stray or abandoned animals that are ultimately redeemed, adopted, or released to a nonprofit animal rescue or adoption organization.

Methods for Claiming Costs

Eligible claimants may elect one of following two methods to claim costs for the care and maintenance of impounded stray or abandoned animals specified in Food and Agriculture Code section 31753 that die during the increased holding period or are ultimately euthanized:

- **Actual Cost Method** – Under the actual cost method, actual reimbursable care and maintenance costs per animal per day are computed for an annual claim period.
 - a) Determine the total annual cost of care and maintenance for all animals specified in Food and Agriculture Code section 31753 that are impounded at a facility. Total cost of care and maintenance includes labor, materials, supplies, indirect costs, and contract services.
 - b) Determine the average daily census of the animals specified in Food and Agriculture Code section 31753.
 - c) Multiply the average daily census of the animals specified in Food and Agriculture Code section 31753 by 365 = yearly census of animals specified in Food and Agriculture Code section 31753.
 - d) Divide the total annual cost of care by the yearly census of animals specified in Food and Agriculture Code section 31753 = cost per animal per day.
 - e) Multiply the cost per animal per day, by the number of impounded stray or abandoned animals specified in Food and Agriculture Code section 31753 that die during the increased holding period or are ultimately euthanized, by each reimbursable day (four or six business days from the day after impoundment).
- **Time Study Method** – Under the time study method, a random sample of impounded stray or abandoned animals are observed to determine the amount of time to provide care and maintenance during a reimbursable day.

The time study shall be developed using one representative month each quarter and be supported with actual source documentation. Time studies shall be conducted on a more frequent basis if there are significant variations of time expended from month to month. The time study shall identify hours devoted to each specific category. If the time study supports a fixed-cost approach such as an animal day, the

eligible claimant shall document the analysis supporting the method used.

Time records used to support the time study shall:

- a) Reflect an after-the-fact distribution of each employee's actual activity;
- b) Account for the total activity for which each employee is compensated;
- c) Account for the total labor hours of the month;
- d) Be signed and dated by the employee not later than the end of the pay period that follows the pay period covered by the report; and
- e) Document, by signature or initials and date, supervisor approval.

4. Agencies Using the Holding Period of Four Business Days After the Day of Impoundment (Food & Agr. Code, §§ 31108, 31752, 31753)

Beginning January 1, 1999 - For impounded animals specified in Food and Agriculture Code section 31753, either:

- Making the animal available for owner redemption on one weekday evening until at least 7:00 p.m., or one weekend day; or
- For those local agencies with fewer than three full-time employees or that are not open during all regular weekday business hours, establishing a procedure to enable owners to reclaim their animals by appointment at a mutually agreeable time when the agency would otherwise be closed.

Beginning July 1, 1999 - For impounded dogs and cats, either:

- Making the animal available for owner redemption on one weekday evening until at least 7:00 p.m., or one weekend day; or
- For those local agencies with fewer than three full-time employees or that are not open during all regular weekday business hours, establishing a procedure to enable owners to reclaim their animals by appointment at a mutually agreeable time when the agency would otherwise be closed.

5. Feral Cats (Food & Agr. Code, § 31752.5)

Beginning January 1, 1999 - Verifying whether a cat is feral or tame by using a standardized protocol within the first three days of the required holding period if an apparently feral cat has not been reclaimed by its owner or caretaker.

6. Lost and Found Lists (Food & Agr. Code, § 32001)

Beginning January 1, 1999 - Providing owners of lost animals and those who find lost animals with all of the following:

- Ability to list the animals they have lost or found on "lost and found" lists maintained by the local agency;
- Referrals to animals listed that may be the animals the owner or finders have lost or found;
- The telephone numbers and addresses of other pounds and shelters in the same vicinity;
- Advice as to means of publishing and disseminating information regarding lost animals; and
- The telephone numbers and addresses of volunteer groups that may be of assistance in locating lost animals.

7. Maintaining *Non-Medical* Records (Food & Agr. Code, § 32003)

Beginning January 1, 1999 - Maintaining non-medical records on animals that are either taken up, euthanized after the holding period, or impounded. Such records shall include the following:

- The date the animal was taken up, euthanized, or impounded;
- The circumstances under which the animal is taken up, euthanized, or impounded;
- The names of the personnel who took up, euthanized, or impounded the animal; and
- The final disposition of the animal, including the name of the person who euthanized the animal or the name and address of the adopting party.

The cost of software license renewal contracts, to the extent these costs are not claimed as an indirect cost under these parameters and guidelines, is eligible for reimbursement under Section V (A) (2) of these parameters and guidelines. If the computer software is utilized in some way that is not directly related to the maintenance of records specified in this section, only the pro rata portion of the software license renewal contract that is used for compliance with this section is reimbursable.

8. "Necessary and Prompt Veterinary Care" (Civ. Code, §§ 1834 and 1846)

Beginning January 1, 1999 - Providing "necessary and prompt veterinary care" for stray and abandoned animals, other than injured cats and dogs given emergency treatment, that die during the holding

period or are ultimately euthanized, during the holding periods specified in Statutes of 1998, Chapter 752.

“Necessary and prompt veterinary care” means all reasonably necessary medical procedures performed by a veterinarian or someone under the supervision of a veterinarian to make stray or abandoned animals “adoptable.” The following veterinary procedures, if conducted, are eligible for reimbursement:

- An initial physical examination of the animal to determine the animal’s baseline health status and classification as “adoptable,” “treatable,” or “non-rehabilitatable.”
- A wellness vaccine administered to “treatable” or “adoptable” animals.
- Veterinary care to stabilize and/or relieve the suffering of a “treatable” animal.
- Veterinary care intended to remedy any applicable disease, injury, or congenital or hereditary condition that adversely affects the health of a “treatable” animal or that is likely to adversely affect the animal’s health in the future, until the animal becomes “adoptable.”

Population Exclusions

Eligible claimants are *not* entitled to reimbursement for providing “necessary and prompt veterinary care” to the following population of animals:

- Animals that are irremediably suffering from a serious illness or severe injury (Food & Agr. Code, § 17006);
- Newborn animals that need maternal care and have been impounded without their mothers (Food & Agr. Code, § 17006);
- Animals too severely injured to move or where a veterinarian is not available and it would be more humane to dispose of the animal. (Pen. Code, §§ 597.1, subd. (e), 597f, subd. (d));
- Owner relinquished animals; and
- Stray or abandoned animals that are ultimately redeemed, adopted, or released to a nonprofit animal rescue or adoption organization.

Veterinary Care Exclusions

Eligible claimants are *not* entitled to reimbursement for providing the following veterinary procedures:

- Emergency treatment given to injured cats and dogs (Pen. Code, § 597f, subd. (b));
- Administration of rabies vaccination to dogs (Health & Saf. Code, § 121690);
- Implantation of microchip identification;
- Spay or neuter surgery and treatment;
- Euthanasia.

10. Beginning January 1, 1999 - Procuring medical, kennel, and computer equipment necessary to comply with the reimbursable activities listed in Section IV (B) of these parameters and guidelines, to the extent these costs are not claimed as an indirect cost under Section V (B) of these parameters and guidelines. If the medical, kennel, and computer equipment is utilized in some way not directly related to the mandated program or the population of animals listed in Section IV (B), only the pro rata portion of the activity that is used for the purposes of the mandated program is reimbursable.

V. Claim Preparation and Submission

Each claim for reimbursement must be timely filed and identify each cost element for which reimbursement is claimed under this mandate. Claimed costs must be identified to each reimbursable activity identified in Section IV. of these Parameters and Guidelines.

A. Direct Costs

Direct costs are defined as costs that can be traced to specific goods, services, programs, activities, or functions and shall be supported by the following cost element information:

1. Salaries and Benefits

Identify the employee(s), and/or show the classification of the employee(s) involved. Describe the reimbursable activities performed, specify the actual time devoted to each activity by each employee, and the productive hourly rate, and related fringe benefits.

Reimbursement for personnel services includes compensation paid for salaries, wages, and employee fringe benefits. Employee fringe benefits include regular compensation paid to an employee during periods of authorized absences (e.g., annual leave, sick leave) and the employer's contributions to social security, pension plans, insurance, and worker's compensation insurance. Fringe benefits are eligible for reimbursement when distributed equitably to all job activities performed by the employee.

2. Materials and Supplies

Only expenditures that can be identified as direct costs of this mandate may be claimed. List the cost of the materials and supplies consumed specifically for the purposes of this mandate. Purchases shall be claimed at the actual price after deducting cash discounts, rebates, and allowances received by the claimant. Supplies that are withdrawn from inventory shall be charged based on a recognized method of costing, consistently applied.

3. **Contract Services**

Provide the name(s) of the contractor(s) who performed the services, including any fixed contracts for services. Describe the reimbursable activity(ies) performed by each named contractor and give the number of actual hours spent on the activities, if applicable. Show the inclusive dates when services were performed and itemize all costs for those services. Attach consultant invoices to the claim.

4. **Travel**

Travel expenses for mileage, per diem, lodging, and other employee entitlements are eligible for reimbursement in accordance with the rules of the local jurisdiction. Provide the name(s) of traveler(s), purpose of travel, inclusive dates and times of travel, destination point(s), and travel costs.

5. **Training**

The cost of training an employee to perform the mandated activities, as specified in Section IV (A) of these Parameters and Guidelines, is eligible for reimbursement. Identify the employee(s) by name and job classification. Provide the title and subject of the training session, the date(s) attended, and the location. Reimbursable costs may include salaries and benefits, registration fees, transportation, lodging, and per diem.

6. **Fixed Assets**

List the costs of the fixed assets that have been acquired specifically for the purpose of this mandate. If the fixed asset is utilized in some way not directly related to the mandated program, only the pro-rata portion of the asset that is used for the purposes of the mandated program is reimbursable.

B. Indirect Costs

Compensation for indirect costs is eligible for reimbursement. Indirect costs are those that have been incurred for common or joint purposes. These costs benefit more than one cost objective and cannot be readily identified with a particular final cost objective without effort disproportionate to the results achieved. After direct costs have been determined and assigned to other activities, as appropriate, indirect costs are those remaining to be allocated to

benefited cost objectives. A cost may not be allocated as an indirect cost if any other cost incurred for the same purpose, in like circumstances, has been claimed as a direct cost.

Indirect costs include (a) the indirect costs originating in each department or agency of the governmental unit carrying out state mandated programs and (b) the costs of central governmental services distributed through the central service cost allocation plan and not otherwise treated as direct costs.

Claimants have the option of using 10% of direct labor, excluding fringe benefits, or preparing an Indirect Cost Rate Proposal (ICRP) pursuant to the Office of Management and Budget (OMB) Circular A-87.

VI. Supporting Data

For auditing purposes, all costs claimed shall be traceable to source documents (e.g., employee time records, cost allocation reports, invoices, receipts, purchase orders, contracts, worksheets, calendars, declarations, time studies, etc.) that show evidence of the validity of such costs and their relationship to this mandate. All documentation in support of claimed costs shall be made available to the State Controller's Office, as may be requested. Pursuant to Government Code section 17558.5, these documents must be kept on file by the agency submitting the claim for a period of no less than two years after the later of (1) the end of the calendar year in which the reimbursement claim is filed or last amended, or (2) if no funds are appropriated for the fiscal year for which the claim is made, the date of initial payment of the claim.

VII. Offsetting Savings and Other Reimbursements

Any offsetting savings that the claimant experiences as a direct result of this mandate must be deducted from the costs claimed. Additionally, reimbursement for this mandate received from any source shall be identified and deducted from this claim. These sources shall include, but not be limited to, rewards received under the authority of Civil Code section 1845; licensing fees and fines received and applied pursuant to Food and Agriculture Code section 30652, Government Code section 28502, and Penal Code section 597f; other state funds, and federal funds. The fees and fines received pursuant to Food and Agriculture Code section 30652 shall be deducted from the claim according to the priority specified in the statute and stated below:

- First, to pay fees for the issuance of dog license tags pursuant to Food and Agriculture Code section 30652, subdivision (a);
- Second, in accordance with Food and Agriculture Code section 30652, subdivision (b), any excess revenue held after the payment of dog license tags shall be applied to the fees, salaries, costs, expenses, or any or all of them for the enforcement of Division 14 of the Food and Agriculture Code, including Food and Agriculture Code section 31108, and all ordinances that are made pursuant to Division 14. Costs incurred under Food and Agriculture Code section 31108 are

specified in Section IV (B) (1), (2), (3), and (5), and Section IV (A) of these parameters and guidelines. Any or all excess revenue must be applied to the costs incurred under Food and Agriculture Code section 31108 before any revenue can be applied to subdivisions (c) and (d) of Food and Agriculture Code section 30652.

VIII. State Controller's Office Required Certification

An authorized representative of the claimant shall be required to provide a certification of the claim, as specified in the State Controller's Office claiming instructions, for those costs mandated by the state contained herein.

IX. Parameters and Guidelines Amendments

Pursuant to title 2, California Code of Regulations, section 1183.2, Parameters and Guidelines amendments filed before the deadline for initial claims as specified in the Claiming Instructions shall apply to all years eligible for reimbursement as defined in the original Parameters and Guidelines. A Parameters and Guidelines amendment filed after the initial claiming deadline must be submitted on or before January 15, following a fiscal year in order to establish eligibility for reimbursement for the fiscal year.

PARAMETERS AND GUIDELINES

Civil Code Sections 1834 and 1846;
Food and Agriculture Code Sections 31108, 3 1752, 31752.5, 31753, 32001, and 32003
As Added or Amended by Statutes of 1998, Chapter 752

Animal Adoption

I. Summary of the Mandate

The test claim legislation was enacted in an attempt to end the euthanasia of adoptable and treatable animals. Generally, the test claim legislation increased the holding period for stray and abandoned dogs, cats, and other specified animals; required the verification of the temperament of feral cats; required the posting of lost and found lists; required the maintenance of records for impounded animals; and required that impounded animals receive "necessary and prompt veterinary care."

The Commission partially approved this test claim, pursuant to article XIII B, section 6 of the California Constitution and Government Code section 175 14, for the *increased* costs in performing the following activities only:

1. Providing care and maintenance during the increased holding period for impounded dogs and cats that are ultimately euthanized. The increased holding period shall be measured by calculating the difference between three days from the day of capture and four business days from the day after impoundment, as specified below in 3 (a) and 3 (b), or six business days from the day after impoundment (Food & Agr. Code, §§ 3 1108, 3 1752);
2. Providing care and maintenance for four business days from the day after impoundment, as specified below in 3 (a) and 3 (b), or six business days from the day after impoundment, for impounded rabbits, guinea pigs, hamsters, pot-bellied pigs, birds, lizards, snakes, turtles, or tortoises legally allowed as personal property that are ultimately euthanized (Food & Agr. Code, § 3 1753);
3. For dogs, cats, and other specified animals held for four business days after the day of impoundment, either:
 - (a) Making the **animal** available for owner redemption on one weekday evening until at least 7:00 p.m., or one weekend day; or
 - (b) For those local agencies with fewer than three full-time employees or that are not open during all regular weekday business hours, establishing a procedure to enable owners to reclaim their animals by appointment at a

mutually agreeable time when the agency would otherwise be closed (Food & Agr. Code §§ 31108, 31752, and 31753);

4. Verifying whether a cat is feral or tame by using a standardized protocol (Food & Agr. Code, § 3 1752.5);
5. Posting lost and found lists (Food & Agr. Code, § 32001);
6. **Maintaining** records on animals that are not medically treated by a veterinarian, but are either taken up, euthanized after the holding period, or impounded (Food & Agr. Code, §32003); and
7. Providing "necessary and prompt veterinary care" for abandoned animals, other than injured cats and dogs given emergency treatment, that are ultimately euthanized (Civ.Code, §§ 1834 and 1846).

II. Eligible Claimants

Any city, county, city and county, dependent special district, and joint powers authority comprised of a city, county, and/or city and county that incurs increased costs as a result of this reimbursable state mandated program is eligible to claim reimbursement of those costs.

III. Period of Reimbursement

Government Code section 17557, as amended by Statutes of 1998, Chapter 681 (which became effective on September 22, 1998), states that a test claim shall be submitted on or before June 30 following a fiscal year in order to establish eligibility for reimbursement for that fiscal year. On December 22, 1998, the County of Los Angeles filed the test claim for this mandated program, establishing eligibility for reimbursement **beginning** on or after July 1, 1997.

However, except for the amendments to Food and Agriculture Code sections 3 1108 and 3 1752, Statutes of 1998, Chapter 752 **became** operative and effective on January 1, 1999. Therefore, except for the amendments to Food and Agriculture Code sections 3 1108 and 3 1752, the costs incurred for Statutes of 1998, Chapter 752 are eligible for reimbursement on or after January 1, 1999.

Section 21 of Statutes of 1998, Chapter 752 establishes an operative date of July 1, 1999 for the amendments to Food and Agriculture Code section 3 1108 (holding period for stray dogs) and Food and Agriculture Code sections 3 1752 (holding period for stray cats). Therefore, costs incurred for Food and Agriculture Code sections 3 1108 and 3 1752, as **amended** by Statutes of 1998, Chapter 752, are eligible for reimbursement on or after July 1, 1999.

Actual costs for one fiscal year shall be included in each claim. Estimated costs for the subsequent year may be included on the **same** claim, if applicable. Pursuant to section 1756 1, subdivision (d)(1) of the Government Code, all claims for reimbursement of initial years' costs shall be submitted within 120 days of notification by the State Controller of the issuance of claiming instructions.

If the total costs for a given year do not exceed \$200, no reimbursement shall be allowed, except as otherwise allowed by Government Code section 17564.

IV. Reimbursable Activities

For each eligible claimant, all direct and indirect costs of labor, materials, supplies, fixed assets, contracted services, training and travel for the performance of the activities listed below are eligible for reimbursement.

Except as specified in Component (B)(3) and (4), reimbursement claims for the performance of the activities listed below shall be based on actual or estimated costs as provided in Government Code section 17560.

A. One Time Activities

1. Develop policies and procedures to implement the reimbursable activities listed in Section IV (B) of these parameters and guidelines.
2. Train staff on the reimbursable activities listed in Section IV (B) of these parameters and guidelines. (One-time per employee.)
3. Develop or procure computer software for the maintenance of records on animals specified in Section IV (B) (8) of these parameters and guidelines to the extent these costs are not claimed as an indirect cost under Section V (B)-(8) of these parameters and guidelines. If the computer software is utilized in some way that is not directly related to the maintenance of records specified in Section IV (B) (8), only the pro rata portion of the activity that is used for compliance with Section IV (B) (8) is reimbursable.

B. Ongoing Activities

1. Acquisition of Additional Space and/or Construction of New Facilities

Beginning January 1, 1999 - Acquiring additional space by purchase or lease and/or construction of new facilities to provide appropriate or adequate shelter necessary to comply with the mandated activities during the increased holding period for impounded stray or abandoned dogs, cats, and other animals specified in Statutes of 1998, Chapter 752 that die during the increased holding period or are ultimately euthanized.

Eligible claimants are only entitled to reimbursement for the proportionate share of actual costs required to plan, design, acquire, and/or build facilities in a given fiscal year based on the pro rata representation of impounded stray or abandoned dogs, cats, and other animals specified in Statutes of 1998, Chapter 752 that are held during the *increased* holding period specified in Sections IV (B) (3) and (4) of these Parameters and Guidelines and die during the increased holding period or are ultimately euthanized, to the total population of animals housed in the facility (including those animals that are excluded from

reimbursement, as specified in Sections IV (B) (3) and (4) of these Parameters and Guidelines) during the entire holding period required by Food and Agriculture Code sections 3 1108, 3 1752 and 3 1753.

Supporting Documentation Submitted with the Initial and Subsequent Reimbursement Claims

Acquiring additional space and/or construction of new facilities is reimbursable only to the extent that an eligible claimant submits, with the initial and/or subsequent reimbursement claim, documentation reflecting the following:

A determination by the governing board that acquiring additional space and/or constructing new facilities is necessary for the increased holding period required by Statutes of 1998, Chapter 752 because the existing facilities do not reasonably accommodate impounded stray or abandoned dogs, cats and other specified animals that are ultimately euthanized. The determination by the governing board shall include all of the following findings:

- The average daily census of impounded stray or abandoned dogs, cats, and other animals specified in Statutes of 1998, Chapter 752 that were impounded in 1998. Average Daily Census is defined as the average number of impounded stray or abandoned dogs, cats, and other animals specified in Statutes of 1998, Chapter 752 housed on any given day, in a 365-day period;
- The average daily census of impounded stray or abandoned dogs, cats, and other animals specified in Statutes of 1998, Chapter 752 that were impounded in a given year under the holding periods required by Food and Agriculture Code sections 31108, 31752, and 31753, as added or amended by Statutes of 1998, Chapter 752;
- Existing facilities are not appropriately configured and/or equipped to comply with the increased holding period required by Statutes of 1998, Chapter 752;
- Remodeling existing facilities is not feasible or is more expensive than acquiring additional space and/or constructing new facilities; and
- Contracting with existing private or public shelters in the area to house the increase of impounded stray or abandoned dogs, cats, or other animals specified in Statutes of 1998, Chapter 752 is not feasible or is more expensive than acquiring additional space and/or constructing new facilities.

Documentation requirements may be satisfied in whole or in part by staff agenda items, staff reports, minutes of governing board

meetings, transcripts of governing board meetings, certification by the governing board describing the findings and determination, and/or a resolution adopted by the governing board pursuant to Food and Agriculture Code section 3 1755, as added by Statutes of 1999, Chapter 8 1 (Assembly Bill 1482).

2. Remodeling/Renovating Existing Facilities

Beginning January 1, 1999 - Remodeling/renovating existing facilities to provide appropriate or adequate shelter necessary to comply with the mandated activities during the increased holding period for impounded stray or abandoned dogs, cats, and other animals specified in Statutes of 1998, Chapter 752 that die during the increased holding period or are ultimately euthanized.

Eligible claimants are only entitled to reimbursement for the proportionate share of actual costs required to plan, design, remodel and/or renovate existing facilities in a given fiscal year based on the pro rata representation of impounded stray or abandoned dogs, cats, and other animals specified in Statutes of 1998, Chapter 752 that are held during the *increased* holding period specified in Sections IV (B) (3) and (4) of these Parameters and Guidelines and die during the increased holding period or are ultimately euthanized, to the total population of animals housed in the facility (including those animals that are excluded from reimbursement, as specified in Sections IV (B) (3) and (4) of these Parameters and Guidelines) during the entire holding period required by Food and Agriculture Code sections 3 1108, 31752 and 31753.

Supporting Documentation Submitted with the Initial and Subsequent Reimbursement Claims

Remodeling/renovating existing facilities is reimbursable only to the extent that an eligible claimant submits, with the initial and/or subsequent reimbursement claim, documentation reflecting the following:

A determination by the governing board or a delegated representative that remodeling/renovating existing facilities is necessary because the existing facilities do not reasonably accommodate impounded stray or abandoned dogs, cats and other specified animals that are ultimately euthanized for the increased holding period required by Statutes of 1998, Chapter 752. The determination by the governing board or delegated representative shall include all of the following findings:

- The average daily census of impounded stray or abandoned dogs, cats, and other animals specified in Statutes of 1998, Chapter 752 that were impounded in 1998. Average Daily Census is defined as the average number of impounded stray or

abandoned dogs, cats, and other animals specified in Statutes of 1998, Chapter 752 housed on any given day, in a 365-day period;

- The average daily census of impounded stray or abandoned dogs, cats, and other animals specified in Statutes of 1998, Chapter 752 in a given year under the holding periods required by Food and Agriculture Code sections 3 1108, 3 1752, and 31753, as added or amended by Statutes of 1998, Chapter 752;
- Existing facilities are not appropriately configured and/or equipped to comply with the increased holding period required by Statutes of 1998, Chapter 752;
- Contracting with existing private or public shelters in the area to house the increase of impounded stray or abandoned dogs, cats, or other animals specified in Statutes of 1998, Chapter 752 is not feasible or is more expensive than remodeling/renovating existing facilities.

Documentation requirements may be satisfied in whole or in part by staff agenda items, staff reports, minutes of governing board meetings, transcripts of governing board meetings, certification by the governing board or declaration from the delegated representative describing the findings and determination, and/or a resolution adopted by the governing board pursuant to Food and Agriculture Code section 3 1755, as added by Statutes of 1999, Chapter 8 1 (Assembly Bill 1482).

2.3. Care and Maintenance for Impounded Stray or Abandoned Dogs and Cats that Die During the Increased Holding Period or are Ultimately Euthanized (Food & Agr. Code, §§ 3 1108, 3 1752)

Beginning July 1, 1999 - Providing care and maintenance during the increased holding period for impounded stray or abandoned dogs and cats that die during the increased holding period or are ultimately euthanized. The increased holding period shall be measured by calculating the difference between three days from the day of capture, and four or six business days from the day after impoundment.

Exclusions

Eligible claimants are *not* entitled to reimbursement for the care and maintenance of the following population of dogs and cats:

- Stray or abandoned dogs and cats that are irremediably suffering from a serious illness or severe injury (Food & Agr. Code, § 17006);
- Newborn stray or abandoned dogs and cats that need maternal care and have been impounded without their mothers (Food & Agr. Code, § 17006);

- Stray or abandoned dogs and cats too severely injured to move or where a veterinarian is not available and it would be more humane to dispose of the animal (Pen. Code, §§ 597.1, subd. (e), 597f, subd. (d));
- Owner relinquished dogs and cats; and
- Stray or abandoned dogs and cats that are ultimately redeemed, adopted, or released to a nonprofit animal rescue or adoption organization.

Methods for Claiming Costs

Eligible claimants may elect one of following two methods to claim costs for the care and maintenance of impounded stray or abandoned dogs and cats that die during the increased holding period or are ultimately euthanized:

- Actual Cost Method – Under the actual cost method, actual reimbursable care and maintenance costs per animal per day are computed for an annual claim period.
 - a) Determine the total annual cost of care and maintenance for all dogs and cats impounded at a facility. Total cost of care and maintenance includes labor, materials, supplies, indirect costs, and contract services,
 - b) Determine the average daily census of dogs and cats.
 - c) Multiply the average daily census of dogs and cats by 365 = yearly census of dogs and cats.
 - d) Divide the total annual cost of care by the yearly census of dogs and cats = cost per animal per day.
 - e) Multiply the cost per animal per day, by the number of impounded stray or abandoned dogs and cats that die during the increased holding period or are ultimately euthanized, by each reimbursable day (the difference between three days from the day of capture, and four or six business days from the day after impoundment).
- Time Study Method – Under the time study method, a random sample of impounded stray or abandoned dogs and cats are observed to determine the amount of time to provide care and maintenance during a reimbursable day.

The time study shall be developed using one representative month each quarter and be supported with actual source documentation. Time studies shall be conducted on a more frequent basis if there are significant variations of time expended from month to month. The time study shall identify hours devoted to each specific category. If the time study

supports a fixed-cost approach such as an animal day (i.e., dog-day, cat-day, etc.), the eligible claimant shall document the analysis supporting the method used.

Time records used to support the time study shall:

- a) Reflect an after-the-fact distribution of each employee's actual activity;
- b) Account for the total activity for which each employee is compensated;
- c) Account for the total labor hours of the month;
- d) Be signed and dated by the employee not later than the end of the pay period that follows the pay period covered by the report; and
- e) Document, by signature or initials and date, supervisor approval.

3.4. Care and Maintenance for Impounded Stray or Abandoned Animals Specified in Food and Agriculture Code Section 3 1753 that Die During the Increased Holding Period or are Ultimately Euthanized (Food & Agr. Code, § 3 1753)

Beginning January 1, 1999 - Providing care and maintenance for four or six business days from the day after impoundment for impounded stray or abandoned rabbits, guinea pigs, hamsters, pot-bellied pigs, birds, lizards, snakes, turtles, and tortoises legally allowed as personal property that die during the increased holding period or are ultimately euthanized.

Exclusions

Eligible claimants are *not* entitled to reimbursement for the care and maintenance of the following population of animals:

- Stray or abandoned animals that are irremediably suffering from a serious illness or severe injury (Food & Agr. Code, § 17006);
- Newborn animals that need maternal care and have been impounded without their mothers (Food & Agr. Code, § 17006);
- Stray or abandoned animals too severely injured to move or where a veterinarian is not available and it would be more humane to dispose of the animal (Pen. Code, §§ 597.1, subd. (e), 597f, subd. (d));
- Owner relinquished animals; and

- Stray or abandoned animals that are ultimately redeemed, adopted, or released to a nonprofit animal rescue or adoption organization.

Methods for Claiming Costs

Eligible claimants may elect one of following two methods to claim costs for the care and maintenance of impounded stray or abandoned animals specified in Food and Agriculture Code section 3 1753 that die during the increased holding period or are ultimately euthanized:

- Actual Cost Method -Under the actual cost method, actual reimbursable care and maintenance costs per animal per day are computed for an annual claim period.
 - a) Determine the total annual cost of care and maintenance for all animals specified in Food and Agriculture Code section 3 1753 that are impounded at a facility. Total cost of care and maintenance includes labor, materials, supplies, indirect costs, and contract services.
 - b) Determine the average daily census of the animals specified in Food and Agriculture Code section 3 1753.
 - c) Multiply the average daily census of the animals specified in Food and Agriculture Code section 3 1753 by 365 = yearly census of animals specified in Food and Agriculture Code section 3 1753.
 - d) Divide the total annual cost of care by the yearly census of animals specified in Food and Agriculture Code section 3 1753 = cost per animal per day.
 - e) Multiply the cost per animal per day, by the number of impounded stray or abandoned animals specified in Food and Agriculture Code section 3 1753 that die during the increased holding period or are ultimately euthanized, by each reimbursable day (four or six business days from the day after impoundment).
- Time Study Method -- Under the time study method, a random sample of impounded stray or abandoned animals are observed to determine the amount of time to provide care and maintenance during a reimbursable day.

The time study shall be developed using one representative month each quarter and be supported with actual source documentation. Time studies shall be conducted on a more frequent basis if there are significant variations of time expended from month to month. The time study shall identify hours devoted to each specific category. If the time study supports a fixed-cost approach such as an animal day, the

eligible claimant shall document the analysis supporting the method used.

Time records used to support the time study shall:

- a) Reflect an after-the-fact distribution of each employee's actual activity;
- b) Account for the total activity for which each employee is compensated;
- c) Account for the total labor hours of the month;
- d) Be signed and dated by the employee not later than the end of the pay period that follows the pay period covered by the report; and
- e) Document, by signature or initials and date, supervisor approval.

4.5 Agencies Using the Holding Period of Four Business Days After the Day of Impoundment (Food & Agr. Code, §§ 3 1108, 3 1752, 3 1753)

Beginning January 1, 1999 - For impounded animals specified in Food and Agriculture Code section 3 1753, either:

- Making the animal available for owner redemption on one weekday evening until at least 7:00 p.m., or one weekend day; or
- For those local agencies with fewer than three full-time employees or that are not open during all regular weekday business hours, establishing a procedure to enable owners to reclaim their animals by appointment at a mutually agreeable time when the agency would otherwise be closed.

Beginning July 1, 1999 - For impounded dogs and cats, either:

- Making the animal available for owner redemption on one weekday evening until at least 7:00 p.m., or one weekend day; or
- For those local agencies with fewer than three full-time employees or that are not open during all regular weekday business hours, establishing a procedure to enable owners to reclaim their animals by appointment at a mutually agreeable time when the agency would otherwise be closed.

5.6 Feral Cats (Food & Agr. Code, § 3 1752.5)

Beginning January 1, 1999 - Verifying whether a cat is feral or tame by using a standardized protocol within the first three days of the required holding period if an apparently feral cat has not been reclaimed by its owner or caretaker.

6.7. Lost and Found Lists (Food & Agr. Code, § 32001)

Beginning January 1, 1999 - Providing owners of lost animals and those who find lost animals with all of the following:

- Ability to list the animals they have lost or found on "lost and found" lists maintained by the local agency;
- Referrals to animals listed that may be the animals the owner or finders have lost or found;
- The telephone numbers and addresses of other pounds and shelters in the same vicinity;
- Advice as to means of publishing and disseminating information regarding lost animals; and
- The telephone numbers and addresses of volunteer groups that may be of assistance in locating lost animals.

7.8. Maintaining Non-Medical Records (Food & Agr. Code, § 32003)

Beginning January 1, 1999 - Maintaining non-medical records on animals that are either taken up, euthanized after the holding period, or impounded. Such records shall include the following:

- The date the animal was taken up, euthanized, or impounded;
- The circumstances under which the animal is taken up, euthanized, or impounded;
- The names of the personnel who took up, euthanized, or impounded the animal; and
- The final disposition of the animal, including the name of the person who euthanized the animal or the name and address of the adopting party.

The cost of software license renewal contracts, to the extent these costs are not claimed as an indirect cost under these parameters and guidelines, is eligible for reimbursement under Section V (A) (2) of these parameters and guidelines. If the computer software is utilized in some way that is not directly related to the maintenance of records specified in this section, only the pro rata portion of the software license renewal contract that is used for compliance with this section is reimbursable.

8.9. "Necessary and Prompt Veterinary Care" (Civ. Code, §§ 1834 and 1846)

Beginning January 1, 1999 - Providing "necessary and prompt veterinary care" for stray and abandoned animals, other than injured cats and dogs given emergency treatment, that die during the holding

period or are ultimately euthanized, during the holding periods specified in Statutes of 1998, Chapter 752.

“Necessary and prompt veterinary care” means all reasonably necessary medical procedures performed by a veterinarian or someone under the supervision of a veterinarian to make stray or abandoned animals “adoptable.” The following veterinary procedures, if conducted, are eligible for reimbursement:

- An initial physical examination of the animal to determine the animal’s baseline health status and classification as “adoptable,” “treatable,” or “non-rehabilitatable.”
- A wellness vaccine administered to “treatable” or “adoptable” animals.
- Veterinary care to stabilize and/or relieve the suffering of a “treatable” animal.
- Veterinary care intended to remedy any applicable disease, injury, or congenital or hereditary condition that adversely affects the health of a “treatable” animal or that is likely to adversely affect the animal’s health in the future, until the animal becomes “adoptable.”

Population Exclusions

Eligible claimants are *not* entitled to reimbursement for providing “necessary and prompt veterinary care” to the following population of animals:

- Animals that are irremediably suffering from a serious illness or severe injury (Food & Agr. Code, § 17006);
- Newborn animals that need maternal care and have been impounded without their mothers (Food & Agr. Code, § 17006);
- Animals too severely injured to move or where a veterinarian is not available and it would be more humane to dispose of the animal. (Pen. Code, §§ 597.1, subd. (e), 597f, subd. (d));
- Owner relinquished animals; and
- Stray or abandoned animals that are ultimately redeemed, adopted, or released to a nonprofit animal rescue or adoption organization.

Veterinary Care Exclusions

Eligible claimants are *not* entitled to reimbursement for providing the following veterinary procedures:

- Emergency treatment given to injured cats and dogs (Pen. Code, § 597f, subd. (b));
- Administration of rabies vaccination to dogs (Health & Saf. Code, § 121690);
- Implantation of microchip identification;
- Spay or neuter surgery and treatment;
- Euthanasia.

10. Beginning January 1, 1999 - Procuring medical, kennel, and computer equipment necessary to comply with the reimbursable activities listed in Section IV (B) of these parameters and guidelines, to the extent these costs are not claimed as an indirect cost under Section V (B) of these parameters and guidelines. If the medical, kennel, and computer equipment is utilized in some way not directly related to the mandated program or the population of animals listed in Section IV (B), only the pro rata portion of the activity that is used for the purposes of the mandated program is reimbursable.

V. Claim Preparation and Submission

Each claim for reimbursement must be timely filed and identify each cost element for which reimbursement is claimed under this mandate. Claimed costs must be identified to each reimbursable activity identified in Section IV. of these Parameters and Guidelines.

A. Direct Costs

Direct costs are defined as costs that can be traced to specific goods, services, programs, activities, or functions and shall be supported by the following cost element information:

1. Salaries and Benefits

Identify the employee(s), and/or show the classification of the employee(s) involved. Describe the reimbursable activities performed, specify the actual time devoted to each activity by each employee, and the productive hourly rate, and related fringe benefits.

Reimbursement for personnel services includes compensation paid for salaries, wages, and employee fringe benefits. Employee fringe benefits include regular compensation paid to an employee during periods of authorized absences (e.g., annual leave, sick leave) and the employer's contributions to social security, pension plans, insurance, and worker's compensation insurance. Fringe benefits are eligible for reimbursement when distributed equitably to all job activities performed by the employee.

2. Materials and Supplies

Only expenditures that can be identified as direct costs of this mandate may be claimed. List the cost of the materials and supplies consumed specifically for the purposes of this mandate. Purchases shall be claimed at the actual price after deducting cash discounts, rebates, and allowances received by the claimant. Supplies that are withdrawn from inventory shall be charged based on a recognized method of costing, consistently applied.

3. Contract Services

Provide the name(s) of the contractor(s) who performed the services, including any fixed contracts for services. Describe the reimbursable activity(ies) performed by each named contractor and give the number of actual hours spent on the activities, if applicable. Show the inclusive dates when services were performed and itemize all costs for those services. Attach consultant invoices to the claim.

4. Travel

Travel expenses for mileage, per diem, lodging, and other employee entitlements are eligible for reimbursement in accordance with the rules of the local jurisdiction. Provide the name(s) of traveler(s), purpose of travel, inclusive dates and times of travel, destination point(s), and travel costs.

5. Training

The cost of training an employee to perform the mandated activities, as specified in Section IV (A) of these Parameters and Guidelines, is eligible for reimbursement. Identify the employee(s) by name and job classification. Provide the title and subject of the training session, the date(s) attended, and the location. Reimbursable costs may include salaries and benefits, registration fees, transportation, lodging, and per diem.

6. Fixed Assets

List the costs of the fixed assets that have been acquired specifically for the purpose of this mandate. If the fixed asset is utilized in some way not directly related to the mandated program, only the pro-rata portion of the asset that is used for the purposes of the mandated program is reimbursable.

B. Indirect Costs

Compensation for indirect costs is eligible for reimbursement. Indirect costs are those that have been incurred for common or joint purposes. These costs benefit more than one cost objective and cannot be readily identified with a particular final cost objective without effort disproportionate to the results achieved. After direct costs have been determined and assigned to other activities, as appropriate, indirect costs are those remaining to be

allocated to benefited cost objectives. A cost may not be allocated as an indirect cost if any other cost incurred for the **same** purpose, in like circumstances, has been claimed as a direct cost.

Indirect costs include (a) the indirect costs originating in each department or agency of the governmental unit carrying out state mandated programs and (b) the costs of central governmental services distributed through the central service cost allocation plan and not otherwise treated as direct costs.

Claimants have the option of using 10 % of direct labor, excluding fringe benefits, or preparing an Indirect Cost Rate Proposal (ICRP) pursuant to the Office of Management and Budget (OMB) Circular A-87.

VI. Supporting Data

For auditing purposes, all costs claimed shall be traceable to source documents (e.g., employee time records, cost allocation reports, invoices, receipts, purchase orders, contracts, worksheets, calendars, declarations, time studies, etc.) that show evidence of the validity of such costs and their relationship to this mandate. All documentation in support of claimed costs shall be made available to the State Controller's Office, as may be requested. Pursuant to Government Code section 1755 8.5, these documents must be kept on file by the agency submitting the claim for a period of no less than two years after the later of (1) the end of the calendar year in which the reimbursement claim is filed or last amended, or (2) if no funds are appropriated for the fiscal year for which the claim is made, the date of initial payment of the claim.

VII. Offsetting Savings and Other Reimbursements

Any offsetting savings that the claimant experiences as a direct result of this mandate must be deducted from the costs claimed. Additionally, reimbursement for this mandate received from any source shall be identified and deducted from this claim. These sources shall include, but not be limited to, rewards received under the authority of Civil Code section 1845; licensing fees and fines received and applied pursuant to Food and Agriculture Code section 30652, Government Code section 28502, and Penal Code section 597f; other state funds, and federal funds. The fees and fines received pursuant to Food and Agriculture Code section 30652 shall be deducted from the claim according to the priority specified in the statute and stated below:

- First, to pay fees for the issuance of dog license tags pursuant to Food and Agriculture Code section 30652, subdivision (a);
- Second, in accordance with Food and Agriculture Code section 30652, subdivision (b), any excess revenue held after the payment of dog license tags shall be applied to the fees, salaries, costs, expenses, or any or all of them for the enforcement of Division 14 of the Food and Agriculture Code, including Food and Agriculture Code section 3 1108, and all ordinances that are made pursuant to Division 14.

Costs incurred under Food and Agriculture Code section 3 1108 are specified in Section IV (B) (1), (2), (3), and (5), and Section IV (A) of these parameters and guidelines. Any or all excess revenue must be applied to the costs incurred under Food and Agriculture Code section 3 1108 before any revenue can be applied to subdivisions (c) and (d) of Food and Agriculture Code section 30652.

VIII. State Controller's Office Required Certification

An authorized representative of the claimant shall be required to provide a certification of the claim, as specified in the State Controller's Office claiming instructions, for those costs mandated by the state contained herein.

IX. Parameters and Guidelines Amendments

Pursuant to title 2, California Code of Regulations, section 1183.2, Parameters and Guidelines amendments filed before the deadline for initial claims as specified in the Claiming Instructions shall apply to all years eligible for reimbursement as defined in the original Parameters and Guidelines. A Parameters and Guidelines amendment filed after the initial claiming deadline must be submitted on or before January 15, following a fiscal year in order to establish eligibility for reimbursement for the fiscal year.

AND

Amended Pursuant to Statutes 2004, Chapter 313 (AB 2224) and
Request of the State Controller's Office

Animal Adoption

I. Summary of the Mandate

The test claim legislation was enacted in an attempt to end the euthanasia of adoptable and treatable animals. Generally, the test claim legislation increased the holding period for stray and abandoned dogs, cats, and other specified animals; required the verification of the temperament of feral cats; required the posting of lost and found lists; required the maintenance of records for impounded animals; and required that impounded animals receive "necessary and prompt veterinary care."

The Commission partially approved this test claim, pursuant to article XIII B, section 6 of the California Constitution and Government Code section 17514, for the *increased costs* in performing the following activities only:

1. Providing care and maintenance during the increased holding period for impounded dogs and cats that are ultimately euthanized. The increased holding period shall be measured by calculating the difference between three days from the day of capture and four business days from the day after impoundment, as specified below in 3 (a) and 3 (b), or six business days from the day after impoundment (Food & Agr. Code, §§ 31108, 31752);
2. Providing care and maintenance for four business days from the day after impoundment, as specified below in 3 (a) and 3 (b), or six business days from the day after impoundment, for impounded rabbits, guinea pigs, hamsters, pot-bellied pigs, birds, lizards, snakes, turtles, or tortoises legally allowed as personal property that are ultimately euthanized (Food & Agr. Code, § 31753);
3. For dogs, cats, and other specified animals held for four business days after the day of impoundment, either:
 - (a) Making the animal available for owner redemption on one weekday evening until at least 7:00 p.m., or one weekend day; or

(b) For those local agencies with fewer than three full-time employees or that are not open during all regular weekday business hours, establishing a procedure to enable owners to reclaim their animals by appointment at a mutually agreeable time when the agency would otherwise be closed (Food & Agr., Code §§ 31108, 31752, and 31753);

4. Verifying whether a cat is feral or tame by using a standardized protocol (Food & Agr. Code, § 31752.5);
5. Posting lost and found lists (Food & Agr. Code, § 32001);
6. Maintaining records on animals that are not medically treated by a veterinarian, but are either taken up, euthanized after the holding period, or impounded (Food & Agr. Code, § 32003); and
7. Providing "necessary and prompt veterinary care" for abandoned animals, other than injured cats and dogs given emergency treatment, that are ultimately euthanized (Civ. Code, §§ 1834 and 1846).

II. Eligible Claimants

Any city, county, city and county, dependent special district, and joint powers authority comprised of a city, county, and/or city and county that incurs increased costs as a result of this reimbursable state mandated program is eligible to claim reimbursement of those costs.

III. Period of Reimbursement

The period of reimbursement for the activities in this parameters and guidelines amendment begins on July 1, 2005.

Pursuant to Government Code section 17560, reimbursement for state-mandated costs may be claimed as follows:

1. A local agency may file an estimated reimbursement claim by January 15 of the fiscal year in which costs are to be incurred, and, by January 15 following that fiscal year shall file an annual reimbursement claim that details the costs actually incurred for that fiscal year; or it may comply with the provisions of subdivision (b).
2. A local agency may, by January 15 following the fiscal year in which costs are incurred, file an annual reimbursement claim that details the costs actually incurred for that fiscal year.
3. In the event revised claiming instructions are issued by the Controller pursuant to subdivision (c) of section 17558 between October 15 and January 15, a local agency filing an annual reimbursement claim shall have 120 days following the issuance date of the revised claiming instructions to file a claim.

Reimbursable actual costs for one fiscal year shall be included in each claim. Estimated costs for the subsequent year may be included on the same claim, if applicable. Pursuant to Government Code section 17561, subdivision (d)(1), all claims for reimbursement of initial years' costs shall be submitted within

120 days of the issuance of the State Controller's claiming instructions. If the total costs for a given fiscal year do not exceed \$1,000, no reimbursement shall be allowed, except as otherwise allowed by Government Code section 17564.

There shall be no reimbursement for any period in which the Legislature has suspended the operation of a mandate pursuant to state law.

IV. Reimbursable Activities

To be eligible for mandated cost reimbursement for any fiscal year, only actual costs may be claimed. Actual costs are those costs actually incurred to implement the mandated activities. Actual costs must be traceable and supported by source documents that show the validity of such costs, when they were incurred, and their relationship to the reimbursable activities. A source document is a document created at or near the same time the actual cost was incurred for the event or activity in question. Source documents may include, but are not limited to, employee time records or time logs, sign-in sheets, invoices, and receipts.

Evidence corroborating the source documents may include, but is not limited to, worksheets, cost allocation reports (system generated), purchase orders, contracts, agendas, training packets, and declarations. Declarations must include a certification or declaration stating, "I certify (or declare) under penalty of perjury under the laws of the State of California that the foregoing is true and correct," and must further comply with the requirements of Code of Civil Procedure section 2015.5. Evidence corroborating the source documents may include data relevant to the reimbursable activities otherwise in compliance with local, state, and federal government requirements. However, corroborating documents cannot be substituted for source documents.

The claimant is only allowed to claim and be reimbursed for increased costs for reimbursable activities identified below. Increased cost is limited to the cost of an activity that the claimant is required to incur as a result of the mandate.

For each eligible claimant, the following activities are reimbursable:

A. One Time Activities

1. Develop policies and procedures to implement the reimbursable activities listed in Section IV (B) of these parameters and guidelines.
2. Train staff on the reimbursable activities listed in Section IV (B) of these parameters and guidelines. (One-time per employee.)
3. Develop or procure computer software for the maintenance of records on animals specified in Section IV (B) (8) of these parameters and guidelines to the extent these costs are not claimed as an indirect cost under Section V (B) (8) of these parameters and guidelines. If the computer software is utilized in some way that is not directly related to the maintenance of records specified in Section IV (B) (8), only the

pro rata portion of the activity that is used for compliance with Section IV (B) (8) is reimbursable.

B. Ongoing Activities

1. Acquisition of Additional Space and/or Construction of New Facilities

Beginning January 1, 1999 - Acquiring additional space by purchase or lease and/or construction of new facilities to provide appropriate or adequate shelter necessary to comply with the mandated activities during the increased holding period for impounded stray or abandoned dogs, cats, and other animals specified in Statutes of 1998, Chapter 752 that die during the increased holding period or are ultimately euthanized.

Eligible claimants are only entitled to reimbursement for the proportionate share of actual costs required to plan, design, acquire, and/or build facilities in a given fiscal year based on the pro rata representation of impounded stray or abandoned dogs, cats, and other animals specified in Statutes of 1998, Chapter 752 that are held during the *increased* holding period specified in Sections IV (B) (3) and (4) of these Parameters and Guidelines and die during the increased holding period or are ultimately euthanized, to the total population of animals housed in the facility (including those animals that are excluded from reimbursement, as specified in Sections IV (B) (3) and (4) of these Parameters and Guidelines) during the entire holding period required by Food and Agriculture Code sections 31108, 31752 and 31753.

Formula for Proportionate Share of Actual Costs:

Where:

(A) = Shelter square footage, 1998

(B) = Total animal average daily census (ADC), 1998

(C) = Square footage per ADC, 1998 (=A/B)

(D) = Total dog/cat ADC, 1998

(E) = Shelter square footage, claim year

(F) = Total dog/cat ADC, claim year

(G) = Eligible dog/cat ADC, claim year

(H) = Eligible other animal ADC, claim year

(I) = Eligible dog/cat square footage, claim year

For shelters that meet the conditions of to Food and Agricultural Code section 31108(a)(1) or (2) for dogs, and section 31752(a)(1) or (2) for cats:¹

$$(I) = 2/5 \times C \times F$$

For shelters that do not meet the conditions of Food and Agricultural Code section 31108(a)(1) or (2) for dogs, and section 31752(a)(1) or (2) for cats:

$$(I) = 4/7 \times C \times F$$

(J) = Reduction in eligible square footage due to decline in total dog/cat population (cannot exceed 0)

For shelters that meet the conditions of Food and Agricultural Code section 31108(a)(1) or (2) for dogs, and section 31752(a)(1) or (2) for cats:²

$$(J) = [(F/5 - D/3 \times C \times D) / (D/3)]$$

For shelters that do not meet the conditions of Food and Agricultural Code section 31108(a)(1) or (2) for dogs, and section 31752(a)(1) or (2) for cats:

$$(J) = [(F/7 - D/3) \times C \times D] / (D/3)$$

(K) = Net eligible dog/cat square footage (cannot be less than 0)

$$(K = I+J)$$

(L) = Percentage of eligible dog/cat ADC, claim year (L = G/F)

(M) = Allowable dog/cat square footage (M = K x L)

(N) = Allowable square footage for other animals specified by Food and Agricultural Code section 31573 (N = C x H)

(P) = Eligible percentage of acquisition/construction costs (cannot exceed 100%) [P = (M+N) / ((E-A))]

Statutes 2004, chapter 313 specifies that costs incurred to address preexisting shelter overcrowding or animal population growth are not reimbursable. The mandate reimburses for costs required due to the

¹ In order to select this option claimants must either make the animal available for owner redemption on one weekday evening until at least 7:00 p.m., or one weekend day; or (b) Have fewer than three full-time employees or are not open during all regular weekday business hours, establishing a procedure to enable owners to reclaim their animals by appointment at a mutually agreeable time when the agency would otherwise be closed.

² In order to select this option claimants must either make the animal available for owner redemption on one weekday evening until at least 7:00 p.m., or one weekend day; or (b) Have fewer than three full-time employees or are not open during all regular weekday business hours, establishing a procedure to enable owners to reclaim their animals by appointment at a mutually agreeable time when the agency would otherwise be closed.

increased holding period required by Statutes 1998, chapter 752. In calculating net eligible dog/cat square footage, the formula recognizes that a decline in the number of animals sheltered may offset the effect of the increased holding period. For example, if the dog/cat average daily census does not change between the 1998 base year and the claim year, there is no additional square footage required.

The mandate reimburses only for costs attributable to eligible animals. Prior to Statutes 1998, chapter 752, shelters were required to hold dogs and cats for three days, whereas there was no required holding period for other animals. Therefore, the mandate reimbursable percentage formula separately calculates allowable square footage for dogs and cats, and allowable square footage for other animals specified by Food and Agricultural Code section 31753.

Acquisition/construction costs that are less than or equal to the cost of contract services for eligible animals are reimbursable.

Claimants may recalculate the eligible percentage of acquisition/construction costs each year, based on current animal population statistics. However, claimants may only claim allowable costs that have not been claimed in previous fiscal years.

Supporting Documentation Submitted with the Initial and Subsequent Reimbursement Claims

Acquiring additional space and/or construction of new facilities is reimbursable only to the extent that an eligible claimant submits, with the initial and/or subsequent reimbursement claim, documentation reflecting the following:

A determination by the governing board that acquiring additional space and/or constructing new facilities is necessary for the increased holding period required by Statutes of 1998, Chapter 752 because the existing facilities do not reasonably accommodate impounded stray or abandoned dogs, cats and other specified animals that are ultimately euthanized. The determination by the governing board shall include all of the following findings:

- The average daily census of impounded stray or abandoned dogs, cats, and other animals specified in Statutes of 1998, Chapter 752 that were impounded in 1998. For purposes of claiming reimbursement under section IV.B.1, average Daily Census is defined as the average number of impounded stray or abandoned dogs, cats, and other animals specified in Statutes of 1998, Chapter 752 housed on any given day, in a 365-day period;
- The average daily census of impounded stray or abandoned dogs, cats, and other animals specified in Statutes of 1998, Chapter 752 that were impounded in a given year under the

holding periods required by Food and Agriculture Code sections 31108, 31752, and 31753, as added or amended by Statutes of 1998, Chapter 752;

- Existing facilities are not appropriately configured and/or equipped to comply with the increased holding period required by Statutes of 1998, Chapter 752;
- Remodeling existing facilities is not feasible or is more expensive than acquiring additional space and/or constructing new facilities to comply with the increased holding period required by Statutes 1998, chapter 752; and
- Contracting with existing private or public shelters in the area to house the increase of impounded stray or abandoned dogs, cats, or other animals specified in Statutes 1998, chapter 752 is not feasible or is more expensive than acquiring additional space and/or constructing new facilities to comply with the increased holder period required by Statutes 1998, chapter 752. This finding should include the cost to contract with existing shelters..

Documentation requirements may be satisfied in whole or in part by staff agenda items, staff reports, minutes of governing board meetings, transcripts of governing board meetings, certification by the governing board describing the findings and determination, and/or a resolution adopted by the governing board pursuant to Food and Agriculture Code section 31755, as added by Statutes of 1999, Chapter 81 (Assembly Bill 1482).

2. Remodeling/Renovating Existing Facilities

Beginning January 1, 1999 - Remodeling/renovating existing facilities to provide appropriate or adequate shelter necessary to comply with the mandated activities during the increased holding period for impounded stray or abandoned dogs, cats, and other animals specified in Statutes of 1998, Chapter 752 that die during the increased holding period or are ultimately euthanized.

Eligible claimants are only entitled to reimbursement for the proportionate share of actual costs required to plan, design, remodel and/or renovate existing facilities in a given fiscal year based on the pro rata representation of impounded stray or abandoned dogs, cats, and other animals specified in Statutes of 1998, Chapter 752 that are held during the *increased* holding period specified in Sections IV (B) (3) and (4) of these Parameters and Guidelines and die during the increased holding period or are ultimately euthanized, to the total population of animals housed in the facility (including those animals that are excluded from reimbursement, as specified in Sections IV (B) (3) and (4) of these Parameters and Guidelines) during the entire

holding period required by Food and Agriculture Code sections 31108, 31752 and 31753.

Since the remodeling/renovation will not increase square footage to address existing overcrowding or future growth issues, the mandate reimbursable percentage formula for remodeling/renovation would exclude the eligible percentage of square footage factor.

Formula for proportionate share of actual remodeling/renovation costs:

(A) = Shelter square footage

(B) = Total animal average daily census (ADC), claim year

(C) = Square footage per ADC, claim year ($C = A/B$)

(G) = Eligible dog/cat ADC, claim year

(H) = Eligible other animal ADC, claim year

(M) = Eligible dog/cat square footage, claim year

For shelters that meet the requirements of Food and Agricultural Code section 31108 (a)(1) or (2) for dogs, and section 31752 (a)(1) or (2) for cats, $M = 2/5 \times C \times G$.

For shelters that do not meet the requirements of Food and Agricultural Code section 31108(a)(1) or (2) for dogs, and section 31752(a)(1) or (2) for cats, $M = 4/7 \times C \times G$.

(N) = Allowable square footage for other animals specified by Food and Agricultural Code section 31753, claim year ($N = C \times H$)

(P) = Eligible percentage of remodeling/renovation costs

$[P = (M + N) / A]$

Claimants may recalculate the eligible percentage of remodeling/renovation costs each year, based on current animal population statistics. However, claimants may only claim allowable costs that have not been claimed in previous fiscal years.

Supporting Documentation Submitted with the Initial and Subsequent Reimbursement Claims

Remodeling/renovating existing facilities is reimbursable only to the extent that an eligible claimant submits, with the initial and/or subsequent reimbursement claim, documentation reflecting the following:

A determination by the governing board or a delegated representative that remodeling/renovating existing facilities is necessary because the existing facilities do not reasonably accommodate impounded stray or abandoned dogs, cats and other specified animals that are ultimately euthanized for the increased holding period required by Statutes of 1998, Chapter 752. The

determination by the governing board or delegated representative shall include all of the following findings:

- The average daily census of impounded stray or abandoned dogs, cats, and other animals specified in Statutes of 1998, Chapter 752 that were impounded in 1998. For purposes of claiming reimbursement under section IV.B.2, average Daily Census is defined as the average number of impounded stray or abandoned dogs, cats, and other animals specified in Statutes of 1998, Chapter 752 housed on any given day, in a 365-day period;
- The average daily census of impounded stray or abandoned dogs, cats, and other animals specified in Statutes of 1998, Chapter 752 in a given year under the holding periods required by Food and Agriculture Code sections 31108, 31752, and 31753, as added or amended by Statutes of 1998, Chapter 752;
- Existing facilities are not appropriately configured and/or equipped to comply with the increased holding period required by Statutes of 1998, Chapter 752;
- Contracting with existing private or public shelters in the area to house the increase of impounded stray or abandoned dogs, cats, or other animals specified in Statutes of 1998, Chapter 752 is not feasible or is more expensive than remodeling/renovating existing facilities to comply with the increased holding period required by Statutes 1998, chapter 752.

Documentation requirements may be satisfied in whole or in part by staff agenda items, staff reports, minutes of governing board meetings, transcripts of governing board meetings, certification by the governing board or declaration from the delegated representative describing the findings and determination, and/or a resolution adopted by the governing board pursuant to Food and Agriculture Code section 31755, as added by Statutes of 1999, Chapter 81 (Assembly Bill 1482).

3. Care and Maintenance for Impounded Stray or Abandoned Dogs and Cats that Die During the Increased Holding Period or are Ultimately Euthanized (Food & Agr. Code, §§ 31108, 31752)

Beginning July 1, 1999 - Providing care and maintenance during the increased holding period for impounded stray or abandoned dogs and cats that die during the increased holding period or are ultimately euthanized. The increased holding period shall be measured by calculating the difference between three days from the day of capture, and four or six business days from the day after impoundment.

Exclusions

Eligible claimants are *not* entitled to reimbursement for the care and maintenance of the following population of dogs and cats:

- Stray or abandoned dogs and cats that are irremediably suffering from a serious illness or severe injury (Food & Agr. Code, § 17006);
- Newborn stray or abandoned dogs and cats that need maternal care and have been impounded without their mothers (Food & Agr. Code, § 17006);
- Stray or abandoned dogs and cats too severely injured to move or where a veterinarian is not available and it would be more humane to dispose of the animal (Pen. Code, §§ 597.1, subd. (e), 597f, subd. (d));
- Owner relinquished dogs and cats; and
- Stray or abandoned dogs and cats that are ultimately redeemed, adopted, or released to a nonprofit animal rescue or adoption organization.

Methods for Claiming Costs

Eligible claimants may elect one of following two methods to claim costs for the care and maintenance of impounded stray or abandoned dogs and cats that die during the increased holding period or are ultimately euthanized:

- Actual Cost Method – Under the actual cost method, actual reimbursable care and maintenance costs per animal per day are computed for an annual claim period.
 - a) Determine the total annual cost of care and maintenance for all dogs and cats impounded at a facility. Total cost of care and maintenance includes labor, materials, supplies, indirect costs, and contract services.
 - b) Determine the average daily census of all dogs and cats impounded at a facility. For purposes of claiming reimbursement under IV.B.3, average daily census is defined as the average number of all dogs and cats at a facility housed on any given day, in a 365-day period..
 - c) Multiply the average daily census of dogs and cats by 365 = yearly census of dogs and cats.
 - d) Divide the total annual cost of care by the yearly census of dogs and cats = cost per animal per day.
 - e) Multiply the cost per animal per day, by the number of impounded stray or abandoned dogs and cats that die

during the increased holding period or are ultimately euthanized, by each reimbursable day (the difference between three days from the day of capture, and four or six business days from the day after impoundment).

- Time Study Method – Under the time study method, a random sample of impounded stray or abandoned dogs and cats are observed to determine the amount of time to provide care and maintenance during a reimbursable day.

The time study shall be developed using one representative month each quarter and be supported with actual source documentation. Time studies shall be conducted on a more frequent basis if there are significant variations of time expended from month to month. The time study shall identify hours devoted to each specific category. If the time study supports a fixed-cost approach such as an animal day (i.e., dog-day, cat-day, etc.), the eligible claimant shall document the analysis supporting the method used.

Time records used to support the time study shall:

- a) Reflect an after-the-fact distribution of each employee's actual activity;
- b) Account for the total activity for which each employee is compensated;
- c) Account for the total labor hours of the month;
- d) Be signed and dated by the employee not later than the end of the pay period that follows the pay period covered by the report; and
- e) Document, by signature or initials and date, supervisor approval.

3. Care and Maintenance for Impounded Stray or Abandoned Animals Specified in Food and Agriculture Code Section 31753 that Die During the Increased Holding Period or are Ultimately Euthanized (Food & Agr. Code, § 31753)

Beginning January 1, 1999 - Providing care and maintenance for four or six business days from the day after impoundment for impounded stray or abandoned rabbits, guinea pigs, hamsters, pot-bellied pigs, birds, lizards, snakes, turtles, and tortoises legally allowed as personal property that die during the increased holding period or are ultimately euthanized.

Exclusions

Eligible claimants are *not* entitled to reimbursement for the care and maintenance of the following population of animals:

- Stray or abandoned animals that are irremediably suffering from a serious illness or severe injury (Food & Agr. Code, § 17006);
- Newborn animals that need maternal care and have been impounded without their mothers (Food & Agr. Code, § 17006);
- Stray or abandoned animals too severely injured to move or where a veterinarian is not available and it would be more humane to dispose of the animal (Pen. Code, §§ 597.1, subd. (e), 597f, subd. (d));
- Owner relinquished animals; and
- Stray or abandoned animals that are ultimately redeemed, adopted, or released to a nonprofit animal rescue or adoption organization.

Methods for Claiming Costs

Eligible claimants may elect one of following two methods to claim costs for the care and maintenance of impounded stray or abandoned animals specified in Food and Agriculture Code section 31753 that die during the increased holding period or are ultimately euthanized:

- Actual Cost Method –Under the actual cost method, actual reimbursable care and maintenance costs per animal per day are computed for an annual claim period.
 - a) Determine the total annual cost of care and maintenance for all animals specified in Food and Agriculture Code section 31753 that are impounded at a facility. Total cost of care and maintenance includes labor, materials, supplies, indirect costs, and contract services.
 - b) Determine the average daily census of the animals specified in Food and Agriculture Code section 31753.
 - c) Multiply the average daily census of the animals specified in Food and Agriculture Code section 31753 by 365 = yearly census of animals specified in Food and Agriculture Code section 31753.
 - d) Divide the total annual cost of care by the yearly census of animals specified in Food and Agriculture Code section 31753 = cost per animal per day.
 - e) Multiply the cost per animal per day, by the number of impounded stray or abandoned animals specified in Food and Agriculture Code section 31753 that die during the increased holding period or are ultimately euthanized, by

each reimbursable day (four or six business days from the day after impoundment).

- Time Study Method – Under the time study method, a random sample of impounded stray or abandoned animals are observed to determine the amount of time to provide care and maintenance during a reimbursable day.

The time study shall be developed using one representative month each quarter and be supported with actual source documentation. Time studies shall be conducted on a more frequent basis if there are significant variations of time expended from month to month. The time study shall identify hours devoted to each specific category. If the time study supports a fixed-cost approach such as an animal day, the eligible claimant shall document the analysis supporting the method used.

Time records used to support the time study shall:

- a) Reflect an after-the-fact distribution of each employee's actual activity;
- b) Account for the total activity for which each employee is compensated;
- c) Account for the total labor hours of the month;
- d) Be signed and dated by the employee not later than the end of the pay period that follows the pay period covered by the report; and
- e) Document, by signature or initials and date, supervisor approval.

4. Agencies Using the Holding Period of Four Business Days After the Day of Impoundment (Food & Agr. Code, §§ 31108, 31752, 31753)

Beginning January 1, 1999 - For impounded animals specified in Food and Agriculture Code section 31753, either:

- Making the animal available for owner redemption on one weekday evening until at least 7:00 p.m., or one weekend day; or
- For those local agencies with fewer than three full-time employees or that are not open during all regular weekday business hours, establishing a procedure to enable owners to reclaim their animals by appointment at a mutually agreeable time when the agency would otherwise be closed.

Beginning July 1, 1999 - For impounded dogs and cats, either:

- Making the animal available for owner redemption on one weekday evening until at least 7:00 p.m., or one weekend day; or
- For those local agencies with fewer than three full-time employees or that are not open during all regular weekday business hours, establishing a procedure to enable owners to reclaim their animals by appointment at a mutually agreeable time when the agency would otherwise be closed.

5. Feral Cats (Food & Agr. Code, § 31752.5)

Beginning January 1, 1999 - Verifying whether a cat is feral or tame by using a standardized protocol within the first three days of the required holding period if an apparently feral cat has not been reclaimed by its owner or caretaker.

6. Lost and Found Lists (Food & Agr. Code, § 32001)

Beginning January 1, 1999 - Providing owners of lost animals and those who find lost animals with all of the following:

- Ability to list the animals they have lost or found on "lost and found" lists maintained by the local agency;
- Referrals to animals listed that may be the animals the owner or finders have lost or found;
- The telephone numbers and addresses of other pounds and shelters in the same vicinity;
- Advice as to means of publishing and disseminating information regarding lost animals; and
- The telephone numbers and addresses of volunteer groups that may be of assistance in locating lost animals.

7. Maintaining *Non-Medical* Records (Food & Agr. Code, § 32003)

Beginning January 1, 1999 - Maintaining non-medical records on animals that are either taken up, euthanized after the holding period, or impounded. Such records shall include the following:

- The date the animal was taken up, euthanized, or impounded;
- The circumstances under which the animal is taken up, euthanized, or impounded;
- The names of the personnel who took up, euthanized, or impounded the animal; and

- The final disposition of the animal, including the name of the person who euthanized the animal or the name and address of the adopting party.

The cost of software license renewal contracts, to the extent these costs are not claimed as an indirect cost under these parameters and guidelines, is eligible for reimbursement under Section V (A) (2) of these parameters and guidelines. If the computer software is utilized in some way that is not directly related to the maintenance of records specified in this section, only the pro rata portion of the software license renewal contract that is used for compliance with this section is reimbursable.

8. "Necessary and Prompt Veterinary Care" (Civ. Code, §§ 1834 and 1846)

Beginning January 1, 1999 - Providing "necessary and prompt veterinary care" for stray and abandoned animals, other than injured cats and dogs given emergency treatment, that die during the holding period or are ultimately euthanized, during the holding periods specified in Statutes of 1998, Chapter 752.

"Necessary and prompt veterinary care" means all reasonably necessary medical procedures performed by a veterinarian or someone under the supervision of a veterinarian to make stray or abandoned animals "adoptable." The following veterinary procedures, if conducted, are eligible for reimbursement:

- An initial physical examination of the animal to determine the animal's baseline health status and classification as "adoptable," "treatable," or "non-rehabilitatable."
- A wellness vaccine administered to "treatable" or "adoptable" animals.
- Veterinary care to stabilize and/or relieve the suffering of a "treatable" animal.
- Veterinary care intended to remedy any applicable disease, injury, or congenital or hereditary condition that adversely affects the health of a "treatable" animal or that is likely to adversely affect the animal's health in the future, until the animal becomes "adoptable."

Population Exclusions

Eligible claimants are *not* entitled to reimbursement for providing "necessary and prompt veterinary care" to the following population of animals:

- Animals that are irremediably suffering from a serious illness or severe injury (Food & Agr. Code, § 17006);

- Newborn animals that need maternal care and have been impounded without their mothers (Food & Agr. Code, § 17006);
- Animals too severely injured to move or where a veterinarian is not available and it would be more humane to dispose of the animal. (Pen. Code, §§ 597.1, subd. (e), 597f, subd. (d));
- Owner relinquished animals; and
- Stray or abandoned animals that are ultimately redeemed, adopted, or released to a nonprofit animal rescue or adoption organization.

Veterinary Care Exclusions

Eligible claimants are *not* entitled to reimbursement for providing the following veterinary procedures:

- Emergency treatment given to injured cats and dogs (Pen. Code, § 597f, subd. (b));
- Administration of rabies vaccination to dogs (Health & Saf. Code, § 121690);
- Implantation of microchip identification;
- Spay or neuter surgery and treatment;
- Euthanasia.

10. Beginning January 1, 1999 - Procuring medical, kennel, and computer equipment necessary to comply with the reimbursable activities listed in Section IV (B) of these parameters and guidelines, to the extent these costs are not claimed as an indirect cost under Section V (B) of these parameters and guidelines. If the medical, kennel, and computer equipment is utilized in some way not directly related to the mandated program or the population of animals listed in Section IV (B), only the pro rata portion of the activity that is used for the purposes of the mandated program is reimbursable.

V. Claim Preparation and Submission

Each of the following cost elements must be identified for each reimbursable activity identified in Section IV, Reimbursable Activities, of this document. Each claimed reimbursable cost must be supported by source documentation as described in Section IV. Additionally, each reimbursement claim must be filed in a timely manner.

A. Direct Cost Reporting

Direct costs are those costs incurred specifically for the reimbursable activities. The following direct costs are eligible for reimbursement.

1. Salaries and Benefits

Report each employee implementing the reimbursable activities by name, job classification, and productive hourly rate (total wages and related benefits divided by productive hours). Describe the specific reimbursable activities performed and the hours devoted to each reimbursable activity performed.

2. Materials and Supplies

Report the cost of materials and supplies that have been consumed or expended for the purpose of the reimbursable activities. Purchases shall be claimed at the actual price after deducting discounts, rebates, and allowances received by the claimant. Supplies that are withdrawn from inventory shall be charged on an appropriate and recognized method of costing, consistently applied.

3. Contracted Services

Report the name of the contractor and services performed to implement the reimbursable activities. If the contractor bills for time and materials, report the number of hours spent on the activities and all costs charged. If the contract is a fixed price, report the services that were performed during the period covered by the reimbursement claim. If the contract services are also used for purposes other than the reimbursable activities, only the pro-rata portion of the services used to implement the reimbursable activities can be claimed. Submit contract consultant and attorney invoices with the claim and a description of the contract scope of services.

4. Fixed Assets and Equipment

Report the purchase price paid for fixed assets and equipment (including computers) necessary to implement the reimbursable activities. The purchase price includes taxes, delivery costs, and installation costs. If the fixed asset or equipment is also used for purposes other than the reimbursable activities, only the pro-rata portion of the purchase price used to implement the reimbursable activities can be claimed.

5. Travel

Report the name of the employee traveling for the purpose of the reimbursable activities. Include the date of travel, destination point, the specific reimbursable activity requiring travel, and related travel expenses reimbursed to the employee in compliance with the rules of the local jurisdiction. Report employee travel time according to the rules of cost element A.1, Salaries and Benefits, for each applicable reimbursable activity.

6. Training

Report the cost of training an employee to perform the reimbursable activities, as specified in Section IV of this document. Report the name and job classification of each employee preparing for, attending, and/or conducting training necessary to implement the reimbursable activities. Provide the title, subject, and purpose (related to the mandate of the training session), dates

attended, and location. If the training encompasses subjects broader than the reimbursable activities, only the pro-rata portion can be claimed. Report employee training time for each applicable reimbursable activity according to the rules of cost element A.1, Salaries and Benefits, and A.2, Materials and Supplies. Report the cost of consultants who conduct the training according to the rules of cost element A.3, Contracted Services.

B. Indirect Cost Rates

Indirect costs are costs that are incurred for a common or joint purpose, benefiting more than one program, and are not directly assignable to a particular department or program without efforts disproportionate to the result achieved. Indirect costs may include both (1) overhead costs of the unit performing the mandate; and (2) the costs of the central government services distributed to the other departments based on a systematic and rational basis through a cost allocation plan.

Compensation for indirect costs is eligible for reimbursement utilizing the procedure provided in the Office of Management and Budget (OMB) Circular A-87. Claimants have the option of using 10% of direct labor, excluding fringe benefits, or preparing an Indirect Cost Rate Proposal (ICRP) if the indirect cost rate claimed exceeds 10%.

If the claimant chooses to prepare an ICRP, both the direct costs (as defined and described in OMB Circular A-87 Attachments A and B) and the indirect costs shall exclude capital expenditures and unallowable costs (as defined and described in OMB Circular A-87 Attachments A and B). However, unallowable costs must be included in the direct costs if they represent activities to which indirect costs are properly allocable.

The distribution base may be (1) total direct costs (excluding capital expenditures and other distorting items, such as pass-through funds, major subcontracts, etc.), (2) direct salaries and wages, or (3) another base which results in an equitable distribution.

In calculating an ICRP, the claimant shall have the choice of one of the following methodologies:

1. The allocation of allowable indirect costs (as defined and described in OMB Circular A-87 Attachments A and B) shall be accomplished by (1) classifying a department's total costs for the base period as either direct or indirect, and (2) dividing the total allowable indirect costs (net of applicable credits) by an equitable distribution base. The result of this process is an indirect cost rate which is used to distribute indirect costs to mandates. The rate should be expressed as a percentage which the total amount allowable indirect costs bears to the base selected; or
2. The allocation of allowable indirect costs (as defined and described in OMB Circular A-87 Attachments A and B) shall be accomplished by (1) separating a department into groups, such as divisions or sections,

and then classifying the division's or section's total costs for the base period as either direct or indirect, and (2) dividing the total allowable indirect costs (net of applicable credits) by an equitable distribution base. The result of this process is an indirect cost rate that is used to distribute indirect costs to mandates. The rate should be expressed as a percentage which the total amount allowable indirect costs bears to the base selected.

VI. RECORD RETENTION

Pursuant to Government Code section 17558.5, subdivision (a), a reimbursement claim for actual costs filed by a local agency or school district pursuant to this chapter³ is subject to the initiation of an audit by the Controller no later than three years after the date that the actual reimbursement claim is filed or last amended, whichever is later. However, if no funds are appropriated or no payment is made to a claimant for the program for the fiscal year for which the claim is filed, the time for the Controller to initiate an audit shall commence to run from the date of initial payment of the claim. In any case, an audit shall be completed not later than two years after the date that the audit is commenced. All documents used to support the reimbursable activities, as described in Section IV, must be retained during the period subject to audit. If an audit has been initiated by the Controller during the period subject to audit, the retention period is extended until the ultimate resolution of any audit findings.

VII. OFFSETTING SAVINGS AND OTHER REIMBURSEMENTS

Any offsetting savings that the claimant experiences as a direct result of this mandate must be deducted from the costs claimed. Additionally, reimbursement for this mandate received from any source shall be identified and deducted from this claim. These sources shall include, but not be limited to, rewards received under the authority of Civil Code section 1845; licensing fees and fines received and applied pursuant to Food and Agriculture Code section 30652, Government Code section 28502, and Penal Code section 597f; other state funds, and federal funds. The fees and fines received pursuant to Food and Agriculture Code section 30652 shall be deducted from the claim according to the priority specified in the statute and stated below:

- First, to pay fees for the issuance of dog license tags pursuant to Food and Agriculture Code section 30652, subdivision (a);
- Second, in accordance with Food and Agriculture Code section 30652, subdivision (b), any excess revenue held after the payment of dog license tags shall be applied to the fees, salaries, costs, expenses, or any or all of them for the enforcement of Division 14 of the Food and Agriculture Code, including Food and Agriculture Code section 31108, and all ordinances that are made pursuant to Division 14. Costs incurred under Food and Agriculture Code section 31108 are specified in Section IV (B) (1), (2), (3), and (5), and Section IV (A) of

³ This refers to Title 2, division 4, part 7, chapter 4 of the Government Code.

these parameters and guidelines. Any or all excess revenue must be applied to the costs incurred under Food and Agriculture Code section 31108 before any revenue can be applied to subdivisions (c) and (d) of Food and Agriculture Code section 30652.

VIII. STATE CONTROLLER'S REVISED CLAIMING INSTRUCTIONS

Pursuant to Government Code section 17558, subdivision (c), the Controller shall issue revised claiming instructions for each mandate that requires state reimbursement not later than 60 days after receiving the revised parameters and guidelines from the Commission, to assist local agencies and school districts in claiming costs to be reimbursed. The revised claiming instructions shall be derived from the test claim decision and the revised parameters and guidelines adopted by the Commission.

Pursuant to Government Code section 17561, subdivision (d)(2), issuance of the revised claiming instructions shall constitute a notice of the right of the local agencies and school districts to file reimbursement claims, based upon the revised parameters and guidelines adopted by the Commission.

IX. REMEDIES BEFORE THE COMMISSION

Upon request of a local agency or school district, the Commission shall review the claiming instructions issued by the State Controller or any other authorized state agency for reimbursement of mandated costs pursuant to Government Code section 17571. If the Commission determines that the claiming instructions do not conform to the parameters and guidelines, the Commission shall direct the Controller to modify the claiming instructions and the Controller shall modify the claiming instructions to conform to the parameters and guidelines as directed by the Commission.

In addition, requests may be made to amend parameters and guidelines pursuant to Government Code section 17557, subdivision (d), and California Code of Regulations, title 2, section 1183.2.

X. LEGAL AND FACTUAL BASIS FOR THE PARAMETERS AND GUIDELINES

The Statement of Decision is legally binding on all parties and provides the legal and factual basis for the parameters and guidelines. The support for the legal and factual findings is found in the administrative record for the test claim. The administrative record, including the Statement of Decision, is on file with the Commission.

CERTIFIED FOR PUBLICATION

IN THE COURT OF APPEAL OF THE STATE OF CALIFORNIA

FIRST APPELLATE DISTRICT

DIVISION THREE

VEENA PURIFOY et al.,

Plaintiffs and Appellants,

v.

GLENN HOWELL et al.,

Defendants and Respondents.

A123856

(Contra Costa County
Super. Ct. No. C 06-02174)

Food and Agricultural Code¹ section 31108, subdivision (a) (section 31108(a)) provides that the required “holding period” for a stray dog impounded in a public or private animal shelter is “six business days” (or, if certain exceptions apply, “four business days”), not including the day of impoundment. (§ 31108(a).) Contra Costa County Animal Services (CCCAS) operates two animal shelters, both of which are open to the public Tuesday through Saturday for owner redemption and adoption of animals. CCCAS states that it counts those days as “business days” in calculating the holding period under section 31108(a).

Plaintiffs Veena Purifoy, Lorree Lewis, and Voices for Pets filed suit against defendants Contra Costa County (County) and Glenn Howell, the director of CCCAS,² alleging that defendants violated section 31108(a) by counting Saturday as a “business day.” The trial court granted summary judgment in favor of defendants, and plaintiffs appealed.

¹ All undesignated statutory references are to the Food and Agricultural Code.

² Plaintiffs’ operative second amended complaint (SAC) names CCCAS and Howell as defendants; County answered for CCCAS.

We conclude that the term “business days” in section 31108(a) does not include Saturdays. Accordingly, we reverse the judgment and remand for further proceedings.

I. SECTION 31108(a)

Section 31108(a) provides that the required holding period for a stray dog impounded in a public or private shelter is “six business days, not including the day of impoundment[.]” (§ 31108(a).) There are two exceptions to the six-business-day holding period. (*Ibid.*) First, under section 31108, subdivision (a)(1) (section 31108(a)(1)), if the shelter “has made the dog available for owner redemption on one weekday evening until at least 7:00 p.m. or one weekend day, the holding period shall be four business days, not including the day of impoundment.” (§ 31108(a)(1).) Second, under section 31108, subdivision (a)(2) (section 31108(a)(2)), if the shelter “has fewer than three full-time employees or is not open during all regular weekday business hours, and if it has established a procedure to enable owners to reclaim their dogs by appointment at a mutually agreeable time when the public or private shelter would otherwise be closed, the holding period shall be four business days, not including the day of impoundment.” (§ 31108(a)(2).) Section 31108(a) provides that, with exceptions that are not relevant here, “stray dogs shall be held for owner redemption during the first three days of the holding period, not including the day of impoundment, and shall be available for owner redemption or adoption for the remainder of the holding period.”³ (§ 31108(a).)

³ Section 31108(a) provides in full:

(a) The required holding period for a stray dog impounded pursuant to this division shall be six business days, not including the day of impoundment, except as follows:

(1) If the public or private shelter has made the dog available for owner redemption on one weekday evening until at least 7:00 p.m. or one weekend day, the holding period shall be four business days, not including the day of impoundment.

(2) If the public or private shelter has fewer than three full-time employees or is not open during all regular weekday business hours, and if it has established a procedure to enable owners to reclaim their dogs by appointment at a mutually agreeable time when the public or private shelter would otherwise be closed, the holding period shall be four business days, not including the day of impoundment.

Except as provided in Section 17006, stray dogs shall be held for owner redemption during the first three days of the holding period, not including the day of

II. FACTUAL AND PROCEDURAL BACKGROUND

Purifoy's dog Duke was impounded by CCCAS on Thursday, October 5, 2006, and was held at the CCCAS animal shelter in Pinole. A new owner adopted Duke on Wednesday, October 11, 2006. Duke was subsequently returned to Purifoy.

As noted above, the shelters operated by CCCAS, including the Pinole shelter, are open Tuesday through Saturday for owner redemption and adoption, and CCCAS counts those days as "business days" in calculating the holding periods under section 31108(a). The shelters are closed on Sunday, Monday, and major holidays.

Because Duke was made available for owner redemption on a weekend day (Saturday, October 7, 2006), a four-business-day holding period applied pursuant to section 31108(a)(1). CCCAS states that, in calculating the four-business-day holding period for Duke, it excluded Thursday, October 5, 2006 (the day of impoundment) and Sunday and Monday, October 8 and 9, 2006 (days on which the shelter was closed). CCCAS counted the following days as "business days": (1) Friday, October 6, 2006; (2) Saturday, October 7, 2006; (3) Tuesday, October 10, 2006; and (4) Wednesday, October 11, 2006. CCCAS held Duke exclusively for owner redemption for the first three of those days, and permitted his adoption on the fourth day, i.e., Wednesday, October 11, 2006.

Purifoy, along with plaintiffs Lorree Lewis and Voices for Pets, filed suit, alleging in their SAC that CCCAS and Howell violated section 31108(a) by counting Saturday as a "business day."⁴ The SAC included four causes of action: (1) violation of section 31108 (First Cause of Action); (2) preemption of a Contra Costa County Code provision by section 31108 (Second Cause of Action); (3) trespass and damage to chattel (Third Cause

impoundment, and shall be available for owner redemption or adoption for the remainder of the holding period.

⁴ The parties state that Lewis and Voices for Pets are "taxpayer plaintiffs." The trial court granted a motion by plaintiffs to file a third amended complaint (TAC), in which different taxpayer plaintiffs would replace Lewis and Voices for Pets; however, the TAC apparently had not yet been filed when the trial court granted defendants' motion for summary judgment.

of Action); and (4) a taxpayer claim for waste of public funds (Code of Civil Procedure section 526a) (Fourth Cause of Action). The SAC requested that Purifoy be awarded special and punitive damages, prejudgment interest, costs and attorneys' fees. For the taxpayer plaintiffs, Lewis and Voices for Pets, the SAC requested a writ of mandate requiring defendants to comply with section 31108(a)(1), declaratory and injunctive relief, costs and attorneys' fees.

Defendants filed a demurrer to the SAC. Prior to the initial hearing on the demurrer, the trial judge assigned to hear the matter issued a tentative ruling, in which she stated in part: " 'Business days' in ordinary parlance is generally accepted to mean days other than a weekend (Saturday or Sunday) or public holiday." After holding a hearing, the judge issued an order sustaining the demurrer without leave to amend as to the Second Cause of Action (preemption), overruling it as to the Third and Fourth Causes of Action (the trespass and taxpayer claims), and striking the request for punitive damages. As to the First Cause of Action (violation of section 31108), the judge directed the parties to submit supplemental briefing as to the meaning of "business days" in section 31108(a).

The matter was assigned to another judge, who, after the filing of supplemental briefs and a further hearing, entered an order overruling defendants' demurrer as to the First Cause of Action. The judge stated in part: "The usual and ordinary meaning of the term 'business days' is weekdays, excluding Saturday, Sunday and public holidays. This meaning of 'business days' is also the one most frequently used in the Codes. [¶] Applying the ordinary meaning of the terms also complements the legislative intent of the statute. . . . [¶] Because the Legislature clearly knows how to define the term 'business days,' but elected not to do so, this court applies its ordinary, usual meaning, which comports with the purpose of the statute."

Defendants answered the three remaining causes of action in the SAC.

Subsequently, defendants filed a motion for summary judgment or in the alternative for summary adjudication, and plaintiffs filed a motion for summary adjudication, both of which addressed the interpretation of "business days" in section

31108(a). Defendants argued that, if the term “business days” were construed to include Saturdays, all of plaintiffs’ remaining causes of action failed. Defendants also raised other arguments in their motion, including contending that Purifoy could not establish the elements of public entity liability for a violation of section 31108, that Purifoy could not pursue a common law theory of trespass and damage to chattel against a public entity, and that the taxpayer plaintiffs could not establish a cause of action under Code of Civil Procedure section 526a.⁵ Defendants requested the entry of summary judgment, or, in the alternative, summary adjudication on five specified issues.⁶

The matter was again assigned to another judge, Judge Joyce Cram. After a hearing, Judge Cram entered a written order granting defendants’ motion for summary judgment (based on the interpretation of “business days” in section 31108(a)), and denying plaintiffs’ motion for summary adjudication. In her order, Judge Cram stated: “The term ‘business days,’ as used in [section 31108(a)] has more than one possible meaning. This court finds that Defendant’s interpretation of the term ‘business days’ to include all days on which a shelter is open, including Saturdays, is consistent with the purposes and legislative history of the statute, and ‘will best attain the purposes of the statute.[’] [Citation.]” Judge Cram also stated: “Presumably, the legislature was aware that if shelters could not count Saturdays as business days for the purpose of the holdover period, they would have no incentive to stay open on Saturdays. In fact, shelters like the Pinole shelter, which is open on Saturday but closed on a weekday, would, in effect, be

⁵ Plaintiffs’ motion for summary adjudication is not in the record, so it is not clear whether plaintiffs presented issues other than the interpretation of “business days” in section 31108(a).

⁶ In their notice of motion and motion, defendants requested “summary adjudication as follows: [¶] 1. ‘Business days’ as defined in [section 31108] includes Saturday; [¶] 2. [Section 31108] authorizes the adoption of stray dogs beginning on the fourth business day after the stray dog was impounded; [¶] 3. Defendants complied with [section 31108] by holding plaintiff Veena Purifoy’s stray dog for three business days exclusively for owner redemption prior to the dog’s adoption by a new owner on the fourth business day; [¶] 4. Plaintiff Veena Purifoy cannot prosecute a common law action for trespass to chattel against defendants; and [¶] 5. Plaintiffs cannot prove any illegal or wasteful expenditure of public funds pursuant to Code of Civil Procedure [section] 526a.”

penalized for staying open on Saturday, because neither day would count toward the holding period.” Judge Cram also ruled on the parties’ objections to evidence submitted in connection with the motions. Because she granted summary judgment on the basis of the meaning of “business days” in section 31108(a), Judge Cram did not reach the other issues defendants raised in their motion (although she suggested at oral argument that she would be inclined to rule against defendants on those issues).

Judge Cram entered judgment in favor of defendants and against plaintiffs.

Plaintiffs appealed. Plaintiffs challenge Judge Cram’s interpretation of section 31108(a), her conclusion that defendants did not violate the statute, and one of her evidentiary rulings.⁷

III. DISCUSSION

A. Standard of Review

“The rules of review [of summary judgment rulings] are well established. If no triable issue as to any material fact exists, the defendant is entitled to a judgment as a matter of law. [Citations.] In ruling on the motion, the court must view the evidence in the light most favorable to the opposing party. [Citation.] We review the record and the determination of the trial court de novo. [Citations.]” (*Shin v. Ahn* (2007) 42 Cal.4th 482, 499.) In particular, the interpretation of section 31108(a) is a question of law that

⁷ Defendants state in a footnote that the Legislature has suspended the operation of section 31108 for fiscal year 2009-2010, and that therefore “to the extent [plaintiffs] are seeking redress for alleged ongoing violations of section 31108, this action is moot.” (See Assem. Bill No. 4X 1 (2009-2010 4th Ex. Sess.) enacted as Stats. 2009, 4th Ex. Sess. 2009-2010, ch. 1, § 537, subd. (3)(c), amending Item 8885-295-0001 of the Budget Act of 2009 (Stats. 2009-2010, 3d Ex. Sess. 2009, ch. 1, § 2.00).) We need not address this undeveloped argument. (See *People v. Lucatero* (2008) 166 Cal.App.4th 1110, 1115, fn. 1 [“[a] footnote is not a proper place to raise an argument on appeal”].) In any event, even if the legislation cited by defendants affected the viability of some of plaintiffs’ underlying claims (a question we need not decide), that legislation provides no basis for dismissing this appeal as moot. Section 31108 was operative in 2006, when Purifoy’s dog was impounded. To resolve the parties’ legal arguments arising from that incident, we must interpret “business days” in section 31108. (See *Eye Dog Foundation v. State Board of Guide Dogs for the Blind* (1967) 67 Cal.2d 536, 541 [appeal will not be dismissed where there remain material questions for the court’s determination].)

we review de novo. (*People ex rel. Lockyer v. Shamrock Foods Co.* (2000) 24 Cal.4th 415, 432.)

B. The Meaning of “Business Days” in Section 31108(a)

In order to resolve the parties’ dispute over the proper construction of the term “business days,” we are guided by the time-honored principles that govern the interpretation of statutes. “In construing a statute, our fundamental task is to ascertain the Legislature’s intent so as to effectuate the purpose of the statute. [Citation.] We begin with the language of the statute, giving the words their usual and ordinary meaning. [Citation.] The language must be construed ‘in the context of the statute as a whole and the overall statutory scheme, and we give “significance to every word, phrase, sentence, and part of an act in pursuance of the legislative purpose.” ’ [Citation.] . . . If the statutory terms are ambiguous, we may examine extrinsic sources, including the ostensible objects to be achieved and the legislative history. [Citation.] In such circumstances, we choose the construction that comports most closely with the Legislature’s apparent intent, endeavoring to promote rather than defeat the statute’s general purpose, and avoiding a construction that would lead to absurd consequences. [Citation.]” (*Smith v. Superior Court* (2006) 39 Cal.4th 77, 83 (*Smith*); accord, *California Highway Patrol v. Superior Court* (2006) 135 Cal.App.4th 488, 496-497 (*California Highway Patrol*)).

1. Legal Definitions of “Business Days”

Section 31108 does not define the term “business days.” Plaintiffs argue that the usual and ordinary meaning of “business days” is weekdays (Monday through Friday), and that the term excludes Saturdays, Sundays, and legal holidays. As noted above, the assigned trial judge reached this conclusion in overruling defendants’ demurrer.

We agree that this is a common understanding of the term “business days,” as it is used in ordinary discourse. Moreover, as plaintiffs note, several California statutory provisions define “business days” (for purposes of particular statutory schemes) to include weekdays and to exclude Saturdays, Sundays and legal holidays. (See, e.g., Cal.

U. Com. Code, § 6105, subd. (b)(3) [“As used in this subdivision, ‘business day’ means any day other than a Saturday, Sunday, or day observed as a holiday by the state government”]; Ins. Code, § 1215, subd. (g) [as used in Article 4.7 of Chapter 2 of Part 2 of Division 1 of the Insurance Code, “ ‘[b]usiness day’ is any day other than Saturday, Sunday, and any other day that is specified or provided for as a holiday in the Government Code”]; Fin. Code, § 867, subd. (c)(2) [for purposes of section 867 of the Financial Code, “ ‘[b]usiness day’ means any day other than a Saturday, Sunday, or legal holiday”]; *id.*, § 1852, subd. (b) [as used in Chapter 14A of Division 1 of the Financial Code, “ ‘[b]usiness day’ means any day other than Saturday, Sunday or any other day which is specified or provided for as a holiday in the Government Code”]; *id.*, §§ 31030, 31033 [same definition governs Division 15 of the Financial Code]; *id.*, §§ 33040, 33044, subd. (a) [similar definition governs Division 16 of the Financial Code]; see also Code Civ. Proc., §§ 10, 135 [“ ‘[h]olidays’ ” within meaning of Code of Civil Procedure are Sundays and days specified as “judicial holidays,” which include Saturdays]; *id.*, §§ 12, 12a, subd. (a) [in computing time in which to perform an act, if the last day falls on a “holiday,” the time is extended to and including the next day that is not a “holiday”; “ ‘holiday[s]’ ” include Saturdays]; Cal. Rules of Court, rule 1.10(a) & (b) [if last day for performance of act falls on “a Saturday, Sunday, or other legal holiday,” the period is extended to and includes the next day that is not a holiday].)

Additionally, plaintiffs assert that courts, in numerous opinions, have used the term “business days” (in general discussions rather than in connection with particular statutory language) to mean weekdays and not Saturdays, Sundays or legal holidays. (See, e.g., *Southern California Edison Co. v. Public Utilities Com.* (2006) 140 Cal.App.4th 1085, 1106 [“Excluding the weekend and holiday, the time allowed for the parties to respond to the merits of the new proposals was only three business days”]; *Berry v. Chaplin* (1946) 74 Cal.App.2d 669, 680 [“Counsel labored on the case not only during business days but on many nights, Saturdays and Sundays including the holiday season”].)

However, just as Judge Cram found in her order granting summary judgment, a review of California code provisions also reflects that the Legislature has often defined the term “business days” in a manner that includes Saturdays.⁸ Specifically, the Civil Code includes a definition of “business days” that includes Saturdays. Civil Code section 9 states that “[a]ll other days than those mentioned in [Civil Code] Section 7 are business days for all purposes” (Civ. Code, § 9.) Section 7 of the Civil Code states that “holidays” within the meaning of the Civil Code are “every Sunday and such other days as are specified or provided for as holidays in” the Government Code. (Civ. Code, § 7.) Finally, Government Code section 6700 lists California’s state holidays, including “[e]very Sunday” and a number of specified holidays; the list does not include Saturdays. (Gov. Code, § 6700.) Accordingly, under these statutes, Saturday is not a holiday (see *Gans v. Smull* (2003) 111 Cal.App.4th 985, 989); it is instead a “business day.”⁹ (Civ. Code, § 9.)

In addition, provisions of the Civil Code and other codes incorporate (for the purposes of those provisions) the definition of “business days” in Civil Code section 9, or use similar definitions that also treat Saturday as a “business day.” (See, e.g., Civ. Code, § 2924b, subd. (h) [incorporating definition in Civ. Code, § 9]; *id.*, § 2924c, subd. (e) [same]; *id.*, § 1689.5, subd. (e) [“ ‘[b]usiness day’ ” means any calendar day except

⁸ At the summary judgment hearing, Judge Cram stated that the term “business days” in section 31108 was ambiguous. Plaintiffs’ counsel appeared to agree, stating: “What is meant [by ‘business days’] is unclear because they [the Legislature] didn’t reference the definition anywhere.”

⁹ Government Code section 6702 provides that a portion of each Saturday is considered a holiday for certain purposes. “Every Saturday from noon to midnight is a holiday as regards the transaction of business in the public offices of the state and political divisions where laws, ordinances, or charters provide that public offices shall be closed on holidays. . . .” (Gov. Code, § 6702.) However, this provision does not establish that Saturdays are holidays for all purposes (or that Saturdays are excluded from the term “business days”). (See *Lancel v. Postlethwaite* (1916) 172 Cal. 326, 330-331 [Saturday was not a holiday where statute did not specify the entire day was a holiday]; *People v. Englehardt* (1938) 28 Cal.App.2d 315, 317-318 [same].) This treatment of Saturdays contrasts with the Legislature’s categorical exclusion of Sundays and legal holidays from the term “business days.” (See Civ. Code, §§ 7, 9; Gov. Code, § 6700.)

Sunday and specified “business holidays”]; Bus. & Prof. Code, § 2546.6, subd. (a)(2) [“ ‘business day’ means each day except a Sunday or a federal holiday”]; *id.*, § 7165, subd. (h) [adopting meaning of “business day” in Civ. Code, § 9]; *id.*, § 17550.17, subd. (g) [same]; Food & Agr. Code, § 55601.4 [adopting same definition, “[f]or purposes of this section”]; Ins. Code, § 15027, subd. (k) [adopting definition of “business day” in Civ. Code, § 1689.5, subd. (e)].)

These statutory provisions illustrate that the Legislature has both excluded and included Saturdays in defining the term “business days.” We agree, therefore, with Judge Cram’s conclusion that the term “business days” in section 31108(a) is ambiguous. Accordingly, we must consider the other language in the statute, as well as the legislative purpose underlying the statute, and “choose the construction that comports most closely with the Legislature’s apparent intent[.]” (*Smith, supra*, 39 Cal.4th at p. 83; accord, *California Highway Patrol, supra*, 135 Cal.App.4th at pp. 496-497.)

2. The Legislative Intent to Lengthen the Holding Period and to Promote Owner Redemption and Adoption

a. The 1998 Amendments to Section 31108

Prior to the Legislature’s 1998 amendment of the statute, section 31108 provided that an impounded dog could not be killed before 72 hours had elapsed from the time the dog was impounded. (Former § 31108 (Stats. 1967, ch. 15, § 2, p. 358) amended by Stats. 1998, ch. 752, § 12, p. 4907; see Legis. Counsel’s Dig., Sen. Bill No. 1785, 6 Stats. 1998 (1997-1998 Reg. Sess.) Summary Dig., p. 322.) In 1998, the Legislature replaced the 72-hour holding period with the current holding periods of six or four “business days.” (Stats. 1998, ch. 752, § 12, p. 4907.) The Legislature enacted this amendment as part of Senate Bill No. 1785, which made a number of statutory changes relating to stray animals. (See Stats. 1998, ch. 752, §§ 1-22, pp. 4903-4917; Legis. Counsel’s Dig., *supra*, at pp. 322-323.) In 2000, the Legislature made further changes to section 31108, which

are not material to the issue presented in this appeal.¹⁰ (§ 31108; Assem. Bill No. 2754 (1999-2000 Reg. Sess.) enacted as Stats. 2000, ch. 567.)

b. The Statutory Language

The amended text of section 31108(a) demonstrates that the Legislature intended both to lengthen the holding period for stray dogs and to ensure that owners and potential adoptive owners have sufficient access to shelters to redeem and adopt dogs. The core mandate of the revised statute is a holding period (six or four “business days”) that is longer (and, in some cases, significantly longer) than the previous 72-hour holding period. (§ 31108(a).) The longer holding period increases opportunities for redemption and adoption. In addition, the Legislature sought to encourage shelters to provide owner access at times other than typical weekday business hours. In this regard, the statute rewards shelters that do so with a shorter holding period of four, rather than six, business days.¹¹

¹⁰ County has incorporated the provisions of section 31108 into its code. (See § 30501, subd. (a) [county or city may adopt specified state statutory provisions, including § 31108, for application within the county or city]; Contra Costa County Code § 416-4.206 [incorporating § 31108 and other provisions by reference].)

¹¹ As discussed above, the four-business-day holding period applies if (1) the shelter “has made the dog available for owner redemption *on one weekday evening until at least 7:00 p.m. or one weekend day,*” or (2) the shelter “has fewer than three full-time employees or is not open during all regular weekday business hours,” and “*has established a procedure to enable owners to reclaim their dogs by appointment at a mutually agreeable time when the [shelter] would otherwise be closed[.]*” (§ 31108(a)(1)-(2), italics added.)

In a letter printed in the Senate Daily Journal, the author of Senate Bill No. 1785, Senator Tom Hayden, stated that the shorter holding period specified in the second of these exceptions (section 31108(a)(2)) is “intended to accommodate the needs of shelters in rural areas or very small cities where shelters have limited staffing capability, and are not open during regular weekday business hours.” (Sen. Tom Hayden, letter to Sen. Secretary Gregory Schmidt, Aug. 28, 1998, 4 Sen. J. (1997-1998 Reg. Sess.) p. 6534, also reprinted at Historical & Statutory Notes, 31C, pt. 2, West’s Ann. Food & Agr. Code (2001 ed.) foll. § 31108, p. 140.)

c. Statements of Intent in the Enacting Legislation

In section 1 of Senate Bill No. 1785 (which is uncodified) (section 1), the Legislature included findings and declarations and summarized the intent of the act. (Stats. 1998, ch. 752, § 1, pp. 4903-4905.) Section 1 confirms that the central purposes of the act included lengthening holding periods and ensuring access to shelters for owner redemption and adoption.

In section 1, the Legislature stated that it sought to provide for an adequate holding period, increase opportunities for redemption and adoption of impounded stray animals, and end euthanasia of adoptable and treatable animals. (See Stats. 1998, ch. 752, §§ 1(a)(2), (b)(1)-(2), (c)(1), (h), (i), pp. 4903-4905.) The Legislature stated in section 1 that “lost animals should be held for a period of time to ensure that the owner has proper access to redeem the animal.” (*Id.*, § 1(i), p. 4905.) The Legislature also found and declared that “[r]edemption of owned pets and adoption of lost or stray adoptable animals is preferable to incurring social and economic costs of euthanasia.” (*Id.*, § 1(b)(1), p. 4904; see also *id.*, § 1(a)(2), pp. 4903-4904 [finding that “[p]ublic and private shelters and humane groups should work together to end euthanasia of adoptable and treatable animals by 2010”].)¹²

Consistent with the purpose of promoting access to shelters, the Legislature found that “[s]helters should be open during hours that permit working pet owners to redeem pets during nonworking hours.” (Stats. 1998, ch. 752, § 1(b)(2), p. 4904; accord, *id.*, § 1(i), p. 4905.) If the owner does not claim the animal, the shelter “should have the duty to make the animal available for adoption for a reasonable period of time . . .” (*Id.*, § 1(h), p. 4905.) Finally, the Legislature stated that one purpose of the act was to “[i]ncrease the focus of shelters to owner redemption and adoption by making recordkeeping mandatory to aid in owner redemption, providing owner relinquished pets

¹² Senate Bill No. 1785 also added provisions to the Food and Agricultural Code and the Civil Code specifying that it is “the policy of the state” that adoptable and treatable animals should not be euthanized. (See § 17005, subds. (a), (b), added by Sen. Bill No. 1785, § 10; Civ. Code, § 1834.4, subds. (a), (b), added by Sen. Bill No. 1785, § 5.)

the same holding period as stray animals to allow for adoption, and providing for an explicit adoption period.” (*Id.*, § 1(c)(1), p. 4904.)

d. Legislative History

The legislative history of Senate Bill No. 1785¹³ includes no direct evidence of legislative intent as to the meaning of “business days.”¹⁴ However, the committee analyses of Senate Bill No. 1785 include general statements of legislative intent (some attributed to the author of the bill, and others stated generally by the reporting committees) that are consistent with the purposes the Legislature ultimately expressed in section 1 of Senate Bill No. 1785, including lengthening the holding period, increasing opportunities for owner redemption and adoption, and reducing euthanasia. (See, e.g., Sen. Rules Com., Off. of Sen. Floor Analyses, Analysis of Sen. Bill No. 1785 (1997-1998 Reg. Sess.) as amended August 24, 1998, “ARGUMENTS IN SUPPORT”; Sen. Com. on Judiciary, Analysis of Sen. Bill No. 1785 (1997-1998 Reg. Sess.) as amended April 14, 1998, “COMMENT,” par. 1, 4; Assem. Com. on Appropriations, Analysis of Sen. Bill No. 1785 (1997-1998 Reg. Sess.) as amended June 18, 1998, “BACKGROUND,” par. 1;

¹³ We take judicial notice of the legislative history of Senate Bill No. 1785. (See *People v. Superior Court* (2005) 132 Cal.App.4th 1525, 1531-1533.)

¹⁴ Some committee reports refer to a statement by an opponent of Senate Bill No. 1785, Pat Claerbout, the Director of El Dorado County Animal Control, who stated that a holding period of six business days “would necessitate the holding of animals for a minimum of up to eight days, since weekends do not constitute business days. During the holidays, shelters could be required to hold animals for as long as eleven or twelve days.” (Sen. Rules Com., Off. of Sen. Floor Analyses, 3d reading analysis of Sen. Bill No. 1785 (1997-1998 Reg. Sess.) as amended April 29, 1998, “ARGUMENTS IN OPPOSITION”; Sen. Com. on Judiciary, Analysis of Sen. Bill No. 1785 (1997-1998 Reg. Sess.) as amended April 14, 1998, “COMMENT,” par. 2(a).) This statement by an individual opponent of the bill is not evidence of the Legislature’s collective intent. (See, e.g., *Metropolitan Water Dist. v. Imperial Irrigation Dist.* (2000) 80 Cal.App.4th 1403, 1425-1426 [in analyzing legislative history, courts generally consider only materials “indicative of the intent of the Legislature *as a whole*”; materials showing the motive or understanding of an individual legislator, including the bill’s author, or other interested persons, are generally not considered, because “such materials are generally not evidence of the Legislature’s *collective* intent”].) Judge Cram correctly declined to consider this statement in seeking to ascertain the Legislature’s intent.

Sen. Com. on Appropriations, Fiscal Summary, Analysis of Sen. Bill No. 1785 (1997-1998 Reg. Sess.) as amended April 29, 1998, "STAFF COMMENTS.")

3. "Business Days" Do Not Include Saturdays.

In light of the statutory language and the express legislative findings accompanying the 1998 amendments to section 31108(a), we conclude that the term "business days" in that statute includes weekdays (Monday through Friday), but excludes Saturdays. As we explain below, our construction of "business days" most reasonably comports with the Legislature's express findings in amending the statute.

Consideration of the legislative purposes—lengthening holding periods and ensuring access for redemption and adoption—supports a construction of "business days" that *excludes* Saturdays. Treating only weekdays, and not Saturdays, as "business days" will in many instances result in longer holding periods, at least when a holding period includes a weekend. Excluding Saturdays is also consistent with the legislative goal of access, because longer holding periods will often provide more opportunities for redemption and adoption. As the trial judge noted in his order overruling defendants' demurrer, if "business days" means weekdays, "the hold period is significantly expanded, if a weekend falls in the middle of the four business days. Impounded dogs are held longer, making owner redemption more likely and decreasing the chance of having to euthanize the dog."¹⁵

¹⁵ Defendants contend that construing "business days" to include Saturdays would not shorten holding periods. CCCAS does not count Monday as a "business day," because its shelters are closed on Monday; defendants argue that, under their interpretation, there are five "business days" in a typical calendar week, just as there are if Monday through Friday are counted as "business days." As discussed below, we need not determine in this appeal whether a weekday on which a shelter is closed (such as Monday, in CCCAS's case) is a "business day." But, under either resolution of that question, construing "business days" to exclude Saturdays results in longer holding periods — counting Tuesday through Friday (instead of Tuesday through Saturday) as "business days" results in a longer holding period; counting Monday through Friday (instead of Monday through Saturday) also results in a longer period.

In addition, as noted above, the exceptions to the six-business-day holding period promote access by providing an incentive (a shorter, four-business-day holding period) for shelters that make dogs available for owner redemption on weekend days or weekday evenings (§ 31108(a)(1)), and for smaller shelters that establish procedures for owners to reclaim their dogs by appointment at a mutually agreeable time when the shelter would otherwise be closed (§ 31108(a)(2)). This incentive applies regardless of whether Saturday is treated as a “business day.” The Legislature thus expressly addressed the significance to be given to “weekend day[s]” in determining the length of the holding period—a shelter that makes a dog available for owner redemption on a “weekend day” only needs to hold that dog for four, instead of six, business days. (§ 31108(a)(1).) Accordingly, a construction of “business days” that excludes Saturdays is consistent with the legislative goal of access, including the specific goal of encouraging shelters to “be open during hours that permit working pet owners to redeem pets during nonworking hours.”¹⁶ (Stats. 1998, ch. 752, § 1(b)(2), p. 4904.)

By contrast, a construction of “business days” that *includes* Saturdays would often result in shorter holding periods, and thus fewer opportunities for redemption or adoption. Arguably, such a construction would promote the goal of access to some degree by providing an *additional* incentive for shelters to remain open on Saturdays, i.e., a shelter that is open on Saturdays could take advantage of the shorter, four-business-day holding

¹⁶ In her order granting summary judgment, Judge Cram stated that, if shelters could not count Saturdays as “business days” in calculating the holding period, they “would have no incentive to stay open on Saturdays.” This is incorrect. As we discuss above, under any interpretation of “business days,” section 31108(a) provides an incentive for shelters to make dogs available on weekend days—the shorter holding period of four business days. (§ 31108(a)(1).)

Judge Cram also stated that shelters (like the CCCAS shelters) that are open on Saturday but closed on a weekday would be “penalized,” because “neither day would count toward the holding period.” As noted, we do not reach in this appeal the question of whether a weekday on which a shelter is closed is a “business day.” But, regardless of the answer to that question, a shelter that is open on Saturday is not penalized, but is rewarded with the shorter, four-business-day holding period; a shelter that instead is open Monday through Friday and is closed on weekday evenings and weekends must comply with the six-business-day holding period. (§ 31108(a).)

period *and* could count Saturday as a “business day” in computing that period. However, because the Legislature already provided an explicit incentive for shelters to remain open on “weekend days,” and because construing “business days” to include Saturdays would result in shorter holding periods, we conclude that this result is not reasonable in light of the legislative purposes.

In short, if the Legislature, having provided an incentive for shelters to remain open on weekend days, had also intended to permit shelters to count Saturdays as “business days” (thus further shortening the total number of calendar days in the holding period), we would expect a clearer expression of such an intention in the statute. More broadly, a construction of “business days” that includes Saturdays would both (1) shorten the holding period, and (2) reduce the opportunities for redemption and adoption. It thus would fail to achieve the dual purposes reflected in the legislative findings.

Accordingly, in the absence of a clear expression of legislative intent to treat Saturdays as “business days,” and in light of our obligation to choose a construction that most closely comports with the Legislature’s intent and promotes, rather than defeats, the statute’s general purposes (see *Smith, supra*, 39 Cal.4th at p. 83; *California Highway Patrol, supra*, 135 Cal.App.4th at pp. 496-497), we conclude that “business days” in section 31108(a) means Monday through Friday, the meaning most commonly used in ordinary discourse.

Defendants’ remaining arguments to the contrary are not persuasive. First, defendants contend that we should adopt the definition of “business days” in Civil Code section 9 (which includes Saturdays), because the different codes should be regarded as “blending” into each other, and because we must presume the Legislature was aware of Civil Code section 9 when it included the term “business days” in section 31108. Courts have stated that, “for purposes of statutory construction the codes are to be regarded as blending into each other and constituting but a single statute.” (*In re Porterfield* (1946) 28 Cal.2d 91, 100; *People v. Vassar* (1962) 207 Cal.App.2d 318, 322-323.) And, in construing section 31108, we presume the Legislature was aware of existing laws, including prior statutory and judicial constructions of the term “business

days.” (See *Bullock v. City and County of San Francisco* (1990) 221 Cal.App.3d 1072, 1096; *People v. Scott* (1987) 194 Cal.App.3d 550, 556, fn. 5.) However, neither of these principles is dispositive here, because the codes reflect differing definitions of “business days.” Neither the principle of “blending” codes together nor the Legislature’s presumed knowledge of existing definitions of “business days” serves as an interpretive aid in determining the proper construction of the term “business days” here.¹⁷

Second, defendants, citing *Yamaha Corp. of America v. State Bd. of Equalization* (1998) 19 Cal.4th 1 (*Yamaha Corp.*), argue that we should defer to CCCAS’s interpretation of “business days.” While it is often appropriate for a court to give some deference to an interpretation by a state agency charged with administering a particular statutory scheme (see *Yamaha Corp.*, 19 Cal.4th at pp. 7-8, 14-15), this principle is of little assistance in this case, because the many local public and private agencies that operate shelters may have inconsistent interpretations of “business days.” (See *California Highway Patrol, supra*, 135 Cal.App.4th at pp. 501-502 [rejecting argument that Legislature failed to modify, and thus tacitly approved, a local agency practice; “While this principle may apply when a state agency is charged with administering a particular statutory scheme, it has dubious application when numerous cities and counties are charged with applying state law, particularly when they apply the law inconsistently”].)¹⁸

¹⁷ In his order overruling defendants’ demurrer, the trial judge stated that treating the codes as “blending together” would require the court “to arbitrarily select a meaning of ‘business days’ from the many definitions in the law.”

¹⁸ Defendants note that the City of Berkeley and the County of Los Angeles have adopted local code provisions stating that Saturdays are treated as “business days” in this context. (See Berkeley Mun. Code, § 1.04.080(C) [“[f]or purposes of calculating the number of days an animal is to be held at the animal shelter pursuant to state or local law, a business day shall include any Saturday on which the shelter is open”]; Los Angeles County Code, §§ 10.08.010, 10.08.075 [for purposes of Title 10 of Code (“Animals”), “[b]usiness days’ are all days other than Sunday and legal holidays”].) These local code provisions, which were adopted after the Legislature added the term “business days” to section 31108 in 1998, are not persuasive evidence as to the Legislature’s intent. (See Berkeley Mun. Code, § 1.04.080, added by “[Berkeley] Ord. 6779-N.S. § 1, 2003:

Third, defendants assert that interpreting “business days” in section 31108(a) to exclude Saturdays would require shelters to maintain “dual calendaring systems for stray dogs: one which would determine if a stray dog was made available for owner redemption on a Saturday, thus reducing the holding period from six to four business days; and a second calendar which would calculate the overall holding period for the stray dog, yet exclude Saturday.” However, any recordkeeping burden on shelters does not result from our interpretation of “business days,” but from the structure of the statute itself. Under any interpretation of “business days,” a shelter must keep track of (1) whether an individual dog was made available for owner redemption on a weekday evening or a weekend day and thus may be held for four, rather than six, business days (see § 31108(a)(1)), and (2) how many “business days” the dog has been held (see § 31108(a)).

Finally, defendants focus on the language of section 31108(a)(2), which specifies a shorter, four-business-day holding period for a shelter that “has fewer than three full-time employees or is not open during all *regular weekday business hours*” and has a procedure for owners to reclaim dogs by appointment. (§ 31108(a)(2), italics added.) Defendants argue that if we construe “business days” to mean Monday through Friday, then the phrase “regular weekday” before “business hours” is surplusage, a result that should be avoided. However, in our view, the phrase “regular weekday business hours” is simply a reference to the usual hours of operation during weekdays. This language in section 31108(a)(2) provides an incentive (a shorter holding period) for shelters to provide a procedure for owners to redeem their dogs by appointment, just as section 31108(a)(1) provides an incentive (a shorter holding period) for shelters to make dogs available for owner redemption on weekday evenings and weekend days. The reference to “regular weekday business hours” in section 31108(a)(2) does not address or define the broader term at issue in this suit—“business days.” Accordingly, defendants’ argument based on the language of section 31108(a)(2) is not persuasive.

[Berkeley] Ord. 6511-N.S. § 1, 1999”; Los Angeles County Code, § 10.08.075, added by Los Angeles County Ord. 2000-0075 § 6, 2000.)

For the foregoing reasons, we conclude that the trial court erred by interpreting “business days” in section 31108(a) to include Saturdays.

4. The Holding Period in This Case

Because Saturday is not a “business day,” the holding period that CCCAS calculated for Purifoy’s dog Duke did not comply with section 31108(a). As noted above, Duke was impounded on Thursday, October 5, 2006, and was adopted by a new owner on Wednesday, October 11, 2006. Because Duke was made available for owner redemption on a weekend day (Saturday, October 7, 2006), the applicable holding period under section 31108(a)(1) was “four business days, not including the day of impoundment.” (§ 31108(a)(1).) In calculating the holding period, CCCAS counted the following days as “business days”: (1) Friday, October 6, 2006; (2) Saturday, October 7, 2006; (3) Tuesday, October 10, 2006; and (4) Wednesday, October 11, 2006.

For the reasons discussed above, Saturday, October 7, 2006 was not a “business day” within the meaning of section 31108(a).¹⁹ In the trial court, defendants conceded that, if Saturday is not a “business day” under section 31108, CCCAS did not hold Duke

¹⁹ In addition, the parties agree (for different stated reasons) that Monday, October 9, 2006 was not a “business day.” Defendants do not count Mondays as “business days” because the CCCAS shelters are closed on Mondays; plaintiffs argue more narrowly that Monday, October 9, 2006 was not a “business day” because it was Columbus Day, a legal holiday.

In their briefs, plaintiffs do not state a position as to whether a *non-holiday* weekday on which a shelter is closed is a “business day” under section 31108(a). Plaintiffs do argue generally that an interpretation of “business days” that depends on whether a given shelter is open on certain days (such as the interpretation adopted by Judge Cram) is inappropriate because it permits individual shelters to “decide the meaning” of the term “business days.” In a related argument, plaintiffs challenge Judge Cram’s ruling excluding evidence of the number of shelters in California, which plaintiffs introduced to support their claim that allowing a large number of shelters to “define” the term “business days” would be unworkable.

In this appeal, we need not decide whether a shelter must be open on a non-holiday weekday in order to count that day as a “business day,” because the only weekday on which the CCCAS shelters were closed during the holding period for Duke was a holiday (Monday, October 9, 2006). Accordingly, we need not address plaintiffs’ arguments on this point, or their challenge to Judge Cram’s evidentiary ruling.

for the minimum holding period. CCCAS held Duke for only three business days, not including the day of impoundment: (1) Friday, October 6, 2006; (2) Tuesday, October 10, 2006; and (3) Wednesday, October 11, 2006.²⁰

C. The Three-Day Owner Redemption Period

Plaintiffs contend that, even if “business days” in section 31108(a) includes Saturdays, CCCAS violated the statute by permitting the adoption of Purifoy’s dog Duke on the fourth business day after his impoundment. Plaintiffs claim that CCCAS was obligated to hold Duke exclusively for owner redemption for the entire four-business-day holding period. Although we need not reach this question in light of our conclusion above that Saturdays are not “business days” and that therefore CCCAS did not hold Duke for the required minimum holding period, we will address plaintiffs’ argument to provide guidance to the parties and future litigants.

Plaintiffs are incorrect in asserting that a shelter must hold a dog exclusively for owner redemption for the entire holding period. The last sentence of section 31108(a) expressly specifies that “stray dogs shall be held for owner redemption during the first *three* days of the holding period, not including the day of impoundment, and shall be available for *owner redemption or adoption* for the remainder of the holding period.” (§ 31108(a), italics added.)

Plaintiffs argue briefly that this sentence applies only to the four-business-day holding period set forth in section 31108(a)(2) (applicable to smaller shelters). This is incorrect. The last sentence of section 31108(a) applies to all of the holding periods specified in section 31108(a), i.e., the default six-business-day holding period and the four-business-day holding periods specified in sections 31108(a)(1) and 31108(a)(2). That sentence appears in a separate paragraph at the end of section 31108(a). It is not

²⁰ Plaintiffs argue in their reply brief that Contra Costa County Code § 22-2.202 requires county offices to be open Monday through Friday, and that the CCCAS shelters violate this provision by staying open on Saturday and closing on Monday. We need not address this argument, because plaintiffs did not raise it in their opening brief (see *Reichardt v. Hoffman* (1997) 52 Cal.App.4th 754, 764), and because we reverse on other grounds.

part of section 31108(a)(2), and there is no indication that it should apply only to the holding period specified in section 31108(a)(2).

Even if this result were not clear from the face of the statute, we also note that plaintiffs' interpretation would be contrary to legislative intent and would lead to absurd results. As noted above, in section 1 of Senate Bill No. 1785, the Legislature stated its intention to promote both owner redemption *and* adoption, and to reduce euthanasia. (Stats. 1998, ch. 752, §§ 1(a)(2), (b)(1)-(2), (c)(1), (h), (i), pp. 4903-4905.) To promote these goals, the Legislature stated that "the duties of shelters to properly care for an animal do not cease *if the owner of a lost animal does not claim the animal*"; in that event, the shelter "*should have the duty to make the animal available for adoption for a reasonable period of time and to care properly for the animal during this period*" (*id.*, § 1(h), p. 4905, italics added). Under plaintiffs' interpretation, a shelter would have to hold an impounded dog exclusively for owner redemption for the entire holding period (if either the default six-business-day holding period or the four-business-day holding period in section 31108(a)(1) applied); the dog could then be euthanized without ever being made available for adoption.

The legislative history of Senate Bill No. 1785 provides additional confirmation that an impounded dog is to be held exclusively for owner redemption for the first three days of the holding period, and is to be available for owner redemption *or* adoption for the remainder of the period. For example, one analysis of the bill states: "Any impounded animal that may be legally owned must be held for six business days before it may be killed. [Senate Bill No. 1785] provides that an impounded animal would be available for owner redemption during the first three business days and for adoption or owner redemption during the following three business days." (Sen. Rules Com., Off. of Sen. Floor Analyses, Analysis of Sen. Bill No. 1785 (1997-1998 Reg. Sess.) as amended August 24, 1998, "ANALYSIS," par. 1; accord, Assem. Com. on Appropriations, Analysis of Sen. Bill No. 1785 (1997-1998 Reg. Sess.) as amended June 18, 1998, "SUMMARY," par. 2.a; Assem. Com. on Judiciary, Analysis of Sen. Bill No. 1785 (1997-1998 Reg. Sess.) as amended June 18, 1998, "SUMMARY," par. 2.a; Sen. Com.

on Judiciary, Analysis of Sen. Bill No. 1785 (1997-1998 Reg. Sess.) as amended April 14, 1998, "DESCRIPTION.")

Finally, the Legislative Counsel's Digest accompanying the Legislature's subsequent amendments to section 31108 (in 2000) states: "Existing law provides that stray animals shall be held for owner redemption during the first 3 days of the holding period, not including the day of impoundment, and shall be available for owner redemption or adoption for the remainder of the holding period." (Legis. Counsel's Dig., Assem. Bill No. 2754 (1999-2000 Reg. Sess.) Stats. 2000, ch. 567, par. 1.)

IV. DISPOSITION

The judgment is reversed. The case is remanded to the trial court with directions to consider the remaining issues raised in defendants' motion for summary judgment/adjudication and in plaintiffs' motion for summary adjudication.

In addressing the above matters, the court shall treat the following as established: (1) Saturday is not a "business day" within the meaning of section 31108(a); (2) under all of the holding periods outlined in section 31108(a), a shelter must hold an impounded dog exclusively for owner redemption for the first three business days of the holding period, not including the day of impoundment, and may then make the dog available for owner redemption or adoption beginning on the fourth business day of the holding period; and (3) CCCAS did not hold Purifoy's dog for the minimum holding period specified in section 31108(a).

Plaintiffs shall recover their costs on appeal.

Assembly Bill No. 222

CHAPTER 97

An act to amend Sections 221.1, 492, 4171, 31108, 31752, and 77067 of the Food and Agricultural Code, relating to agriculture.

[Approved by Governor July 25, 2011. Filed with
Secretary of State July 25, 2011.]

LEGISLATIVE COUNSEL'S DIGEST

AB 222, Committee on Agriculture. Food and Agriculture: omnibus bill.

(1) Existing law establishes the Department of Food and Agriculture Fund, a continuously appropriated fund used for specified purposes relating to enforcement of various provisions of law relating to various agriculture programs. Notwithstanding those provisions, existing law requires the Department of Food and Agriculture to establish all permanent positions within the department with the Controller's office pursuant to standard state administrative practices, and to report to the chairs of the fiscal committees of the Legislature, no later than January 10, 2005, on the positions established and funded, as specified.

Existing law also establishes the Food Biotechnology Task Force and authorizes the task force to request particular agencies to lead the effort to evaluate various factors related to food biotechnology. Existing law requires the task force to report the issues studied, findings, basis for their findings, and recommendations to the Governor and the Legislature by January 1, 2003.

This bill would delete the obsolete reporting requirements from these provisions.

(2) Existing law divides the state into agricultural districts, as specified, and provides for district agricultural associations, which are state institutions. Existing law authorizes the 50th District Agricultural Association, with the consent of the Secretary of Food and Agriculture, to enter into a joint powers agreement for, among other purposes, the purpose of creating a joint powers agency to operate, maintain, and improve the facilities and functions of the 50th District Agricultural Association. Existing law requires, prior to the commencement of the joint powers agreement, the parties to the agreement and the Department of Food and Agriculture to ensure that every employee in the civil service of the 50th District Agricultural Association is provided with the option of continuing his or her employment with the state. Existing law requires the joint powers agency to contract with the department for the services of the employee who chooses to continue his or her employment with the state, consistent with his or her civil service classification and status.

This bill would authorize the joint powers agency to contract with the department or the 50th District Agricultural Association for the services of an employee, consistent with his or her civil service classification and status.

(3) Existing law requires that the holding period for a stray dog or a stray cat impounded in a shelter be 6 business days, not including the day of impoundment, with exceptions, as provided.

This bill would define the term "business day" for purposes of these provisions as any day that a public or private shelter is open to the public for at least 4 hours, excluding state holidays.

(4) Existing law establishes the California Walnut Commission, composed of 8 walnut producers, 4 walnut handlers, and one member of the public. Existing law requires the commission to elect alternate members, and provides for the appointment of ex officio members.

Existing law provides that each member of the commission or each alternate member serving in place of a member, except for ex officio government members, and each member of a committee established by the commission who is a nonmember of the commission, may receive per diem not to exceed \$100 per day, as established by the commission, for each day spent in actual attendance at, or in traveling to and from, meetings of the commission or committees of the commission, or on special assignment from the commission. Existing law also authorizes members of the commission to receive necessary traveling expenses and meal allowances, as approved by the commission.

This bill would delete the provision for a \$100 per diem for members, alternate members, and committee members, and would instead provide that members of the commission may receive an amount not to exceed the reasonable and necessary traveling expenses and meal allowances, as established by the commission.

The people of the State of California do enact as follows:

SECTION 1. Section 221.1 of the Food and Agricultural Code is amended to read:

221.1. Notwithstanding Section 221, the department shall establish all permanent positions with the Controller's office, pursuant to standard state administrative practices.

SEC. 2. Section 492 of the Food and Agricultural Code is amended to read:

492. (a) The Legislature hereby creates the Food Biotechnology Task Force. The task force shall be cochaired by the Secretary of California Health and Human Services, and the Secretary of the California Department of Food and Agriculture. The task force shall consult with appropriate state agencies and the University of California. The Department of Food and Agriculture shall be the lead agency.

(b) An advisory committee shall be appointed by the task force to provide input on issues reviewed by the task force. The advisory committee shall

consist of representatives from consumer groups, environmental organizations, farmers, ranchers, representatives from the biotechnology industry, researchers, organic farmers, food processors, retailers, and others with interests in the issues surrounding biotechnology.

(c) The Department of Food and Agriculture shall make funds available to other agencies to accomplish the purposes of this article and shall contract, where appropriate, with the California Council on Science and Technology, the University of California, or other entities to review issues evaluated by the task force or support activities of the advisory committee.

(d) The task force may request particular agencies to lead the effort to evaluate various factors related to food biotechnology. As funding becomes available, the task force shall evaluate factors including all of the following:

(1) Definition and categorization of food biotechnology and production processes.

(2) Scientific literature on the subject, and a characterization of information resources readily available to consumers.

(3) Issues related to domestic and international marketing of biotechnology foods such as the handling, processing, manufacturing, distribution, labeling, and marketing of these products.

(4) Potential benefits and impacts to human health, the state's economy, and the environment accruing from food biotechnology.

(5) Existing federal and state evaluation and oversight procedures.

(e) An initial sum of one hundred twenty-five thousand dollars (\$125,000) is hereby appropriated from the General Fund for disbursement to the Department of Food and Agriculture. It is the intent of the Legislature to make further funds available to accomplish the purposes contained in this article.

SEC. 3. Section 4171 of the Food and Agricultural Code is amended to read:

4171. (a) Notwithstanding any other provision of law, the 50th District Agricultural Association, with the consent of the secretary, may enter into a joint powers agreement pursuant to Chapter 5 (commencing with Section 6500) of Division 7 of Title 1 of the Government Code for the purpose of creating a joint powers agency to operate, maintain, and improve the facilities and functions of the 50th District Agricultural Association. This joint powers agency's duties shall include planning, designing, and constructing real property improvements, including new construction, alteration, extension, betterment, and repair, and purchasing fixed and movable equipment related to the facilities and functions of the 50th District Agricultural Association.

(b) The joint powers agency may accept the donation of, acquire, own, sell, or lease real property, and may pledge its property or revenue for the sale of bonds to construct, equip, and furnish the facilities, parking facilities, and any betterments, improvements, and facilities related thereto.

(c) The joint powers agency may make and enter into contracts and employ agents and employees. The joint powers agency may manage, maintain, and operate the facilities, or may enter into management contracts for the operation of the facilities. The planning, designing, and constructing

of these improvements, and the agency's other duties, as specified in this section, shall be undertaken in accordance only with those restrictions applicable to the joint powers agency.

(d) Prior to the commencement of the joint powers agreement, the parties to the agreement and the department shall ensure that every employee in the civil service of the 50th District Agricultural Association is provided with the option of continuing his or her employment with the state, or of accepting a position as an employee of the joint powers agency.

(1) With respect to an employee who chooses to continue his or her employment with the state, the employee shall continue to be subject to all of the provisions governing civil service employees, and, additionally, all of the following shall apply:

(A) The joint powers agency shall contract with the department or the 50th District Agricultural Association for the services of the employee, consistent with his or her civil service classification and status.

(B) The employee has the right to continue to provide services to the joint powers agency pursuant to that contract during the time the employee continues in the civil service classification he or she held at the time of the employee's election.

(2) With respect to an employee who chooses to leave his or her employment with the state and become an employee of the joint powers agency, those employees are not employees of the state, and are not subject to the requirements of Chapter 10.3 (commencing with Section 3512) and Chapter 10.5 (commencing with Section 3525) of Division 4 of Title 1 of the Government Code.

(3) If a position filled by a civil service employee pursuant to contract with the department becomes vacant, the joint powers agency may fill the position with a non-civil-service employee.

(e) If the joint powers agency contracts with another entity for the operation or management of the facilities, the requirements of subdivision (d) shall apply to the new entity prior to commencement of any agreement.

(f) The State of California is not liable for any debts, liabilities, settlements, liens, or any other obligations incurred by or imposed upon the joint powers agency. The joint powers agreement executed pursuant to this section shall expressly provide that the General Fund and the Fair and Exposition Fund shall be held harmless from all debts, liabilities, settlements, judgments, or liens incurred by the joint powers agency, and that neither the state nor any agency or division thereof shall be liable for any contract, tort, action or inaction, error in judgment, mistake, or other act taken by the joint powers agency, or any of its employees, agents, servants, invitees, guests, or anyone acting in concert with, or on the behalf of, the joint powers agency.

SEC. 4. Section 31108 of the Food and Agricultural Code is amended to read:

31108. (a) The required holding period for a stray dog impounded pursuant to this division shall be six business days, not including the day of impoundment, except as follows:

(1) If the public or private shelter has made the dog available for owner redemption on one weekday evening until at least 7 p.m. or one weekend day, the holding period shall be four business days, not including the day of impoundment.

(2) If the public or private shelter has fewer than three full-time employees or is not open during all regular weekday business hours, and if it has established a procedure to enable owners to reclaim their dogs by appointment at a mutually agreeable time when the public or private shelter would otherwise be closed, the holding period shall be four business days, not including the day of impoundment.

Except as provided in Section 17006, stray dogs shall be held for owner redemption during the first three days of the holding period, not including the day of impoundment, and shall be available for owner redemption or adoption for the remainder of the holding period.

(b) Except as provided in Section 17006, any stray dog that is impounded pursuant to this division shall, prior to the euthanasia of that animal, be released to a nonprofit, as defined in Section 501(c)(3) of the Internal Revenue Code, animal rescue or adoption organization if requested by the organization prior to the scheduled euthanasia of that animal. The public or private shelter may enter into cooperative agreements with any animal rescue or adoption organization. In addition to any required spay or neuter deposit, the public or private shelter, at its discretion, may assess a fee, not to exceed the standard adoption fee, for animals adopted or released.

(c) During the holding period required by this section and prior to the adoption or euthanasia of a dog impounded pursuant to this division, a public or private shelter shall scan the dog for a microchip that identifies the owner of that dog and shall make reasonable efforts to contact the owner and notify him or her that his or her dog is impounded and is available for redemption.

(d) As used in this division, a "business day" includes any day that a public or private shelter is open to the public for at least four hours, excluding state holidays.

SEC. 5. Section 31752 of the Food and Agricultural Code is amended to read:

31752. (a) The required holding period for a stray cat impounded pursuant to this division shall be six business days, not including the day of impoundment, except as follows:

(1) If the public or private shelter has made the cat available for owner redemption on one weekday evening until at least 7 p.m. or one weekend day, the holding period shall be four business days, not including the day of impoundment.

(2) If the public or private shelter has fewer than three full-time employees or is not open during all regular weekday business hours, and if it has established a procedure to enable owners to reclaim their cats by appointment at a mutually agreeable time when the public or private shelter would otherwise be closed, the holding period shall be four business days, not including the day of impoundment.

Except as provided in Sections 17006 and 31752.5, stray cats shall be held for owner redemption during the first three days of the holding period, not including the day of impoundment, and shall be available for owner redemption or adoption for the remainder of the holding period.

(b) Except as provided in Section 17006, any stray cat that is impounded pursuant to this division shall, prior to the euthanasia of that animal, be released to a nonprofit, as defined in Section 501(c)(3) of the Internal Revenue Code, animal rescue or adoption organization if requested by the organization prior to the scheduled euthanasia of that animal. In addition to any required spay or neuter deposit, the public or private shelter, at its discretion, may assess a fee, not to exceed the standard adoption fee, for animals adopted or released. The public or private shelter may enter into cooperative agreements with any animal rescue or adoption organization.

(c) During the holding period required by this section and prior to the adoption or euthanasia of a cat impounded pursuant to this division, a public or private shelter shall scan the cat for a microchip that identifies the owner of that cat and shall make reasonable efforts to contact the owner and notify him or her that his or her cat is impounded and is available for redemption.

(d) As used in this division, a "business day" includes any day that a public or private shelter is open to the public for at least four hours, excluding state holidays.

SEC. 6. Section 77067 of the Food and Agricultural Code is amended to read:

77067. No member of the commission or of any committee established by the commission that may include nonmembers of the commission shall receive a salary. Except for ex officio government members, the members may receive an amount not to exceed reasonable and necessary traveling expenses and meal allowances, as established by the commission, for each day spent in actual attendance at, or in traveling to and from, meetings of the commission or committees of the commission, or on special assignment for the commission, as approved by the commission.

Subject: Percentage of Time - Care and Feed - Los Angeles Animal Services
Department/Hayden Mandate Reimbursement

WP H.6.3
Pg 111

In response to our discussion today on the topic above, we have completed our analysis relative to the portion of time that Animal Care Technicians and Animal Care Technician Supervisors perform care and feeding of impounded animals.

As you are aware, the position descriptions for these classifications include care and feeding of animals, a primary for both. However, our review indicates that neither classification is dedicated 100% to performing care and feed duties.

Animal Care Technicians spend some time intaking animals and assisting volunteers with adoption counseling. Our analysis estimates that **80%** of an Animal Care Technician's time is caring (including clean up) and feeding impounded animals.

Animal Care Technician Supervisors do perform care of animals, particularly aiding Animal Care Technicians in handling the more difficult animal situations, and filling in where needed. However, Supervisors also do intake of animals and help in adoption situations, but additionally they inventory and order supplies, assist in customer service matters, coordinate with vendors and volunteers, prepare work schedules, and perform general supervisory tasks. Our analysis estimates that **40%** of an Animal Care Technician Supervisor's time is directly providing care and feed to impounded animals.

Please advise if you have additional questions in this regard.

The auditee was not able to provide Chameleon data for the earliest two years of the audit period. The auditor did the following:

1. To determine the allowable annual census in the first two years of the audit period, the auditor used an average of FY's 2000-01 and 2001-02.
2. To determine the eligible dogs and cats and other animals, the auditor used an average of the same two years.
3. Reimbursement for dogs and cats begins in FY 1999-00.
4. Reimbursement for other animals begins mid year in FY 1998-99 (thus only half of costs are reimbursable)

WP H.F.1
Pg 1

Reimbursable Criteria for this component:

Reimbursement begins: 01/1999 for other animals and 07/1999 for dogs and cats
 (FY 1998-99 is reimbursed at 50%)

Allowable hours: one weekend day or one weeknight until 7 pm

Allowable staffing: Additional staffing that is required to comply with this requirement and stay open additional hours as per requirements of the mandate.

Los Angeles Shelters:

The city has 6 shelters. All shelters operate the same schedule. They are closed on Mondays and are open Tuesday through Sundays, daily, from 8 am till 5 (9 hours).

The auditor reviewed each shelter's schedule and compared staffing needs on Saturdays vs. Mondays when the shelter is closed.

The following classifications are eligible for reimbursement under this component based on schedules and staffing needs:

- * Animal Care Technicians - 9 hours each. The schedules specified that ACT's shifts vary in length.
- * Front Counter staff (Clerks) - 8 hours each. The schedules specified that Clerks work 7 or 8 hour shifts.
- * ACT Supervisor - 9 hours. The schedules for ACT classification indicated shifts of varied length.

City of Los Angeles
 Legislatively Mandated Animal Adoption Program
 Summary of Animal Data
 Eligible Dogs and Cats and Other Animals for the Vet Care Component
 FY's 1998-99 through 2007-08 (excluding FY's 2003-04 and 2004-05)
 Audit ID # S09-MCC-055

Eligible Animals for this component include those that died during the holding period (days 2 through 6) and those that were euthanized after the holding period (day 7 and forward)
 Eligible Animals also take into account all exceptions noted in the parameters and guidelines for eligible dogs and cats and other animals.

	1998-99	1999-2000	2000-01	2001-02	2002-03	2005-06	2006-07	2007-08

The auditee was not able to provide Chameleon data for the earliest two years of the audit period. The auditor did the following:

- 1 To determine the eligible dogs and cats and other animals, the auditor used an average of FY's 2000-01 and 2001-02.
- 2 Reimbursement for this component begins in January 1999, thus only half of the eligible animals can be counted for FY 1998-99

Total Account 3190 BFY 2007 - 2008												296,831.48
GRAND TOTAL FOR ACCOUNTS 4580, 6020 AND 3190 BFY 2007-2008												944,452.51

NOTES:

Account 4580 represents expenditures for Animal Food given to the animals taken care of at the shelters
Account 6020 represents expenditures for Operating Supplies and Expenses for maintenance of the animals taken care of at the shelters
Account 3190 represents expenditures for Animal Medical Supplies for the animal well being to be in good health before adoption. Stray Animals caught and brought into the shelters are administered medicines and vaccinations after diagnosis by the veterinarians in the shelters. There is deworming and flea control for dogs and cats. Medial supplies used consists of disposable gloves, thermometers sheaths and syringes. If the animal is ill, they are x-rayed, provided with anti-biotics, IV fluids and splinters (with broken bones). If the animal is beyond medical recovery, they are sedated and put to sleep.

CITY OF LOS ANGELES
LEGISLATIVELY MANDATED ANIMAL ADOPTION PROGRAM
ENTRANCE CONFERENCE INFORMATION
FISCAL YEARS 1998-99 THROUGH 2007-08
S09-MCC-055

PROGRAM: Animal Adoption

SCO Staff: John H Cobbinah Audit Manager (916) 324-6788 [jacobbinah@sco.ca.gov](mailto:jcobbinah@sco.ca.gov)
Toni Cellini Auditor-in-Charge (916) 322-7522 tcellini@sco.ca.gov

CITY Staff:
See Entrance Conference sign-in sheet at W/P _____

AUDIT PERIOD:
July 1, 1998 through June 30, 2008. Fiscal year (FY) 2004-05 will not be audited due to statutory limitations.
(The Legislature suspended the program for FY 2003-04)

AUDIT AUTHORITY:
The SCO performs audits under the authority of *Government Code (GC)* Sections 12410 and 17561.

AUDIT CRITERIA:
Parameters and guidelines
State Controller's Office's claiming instructions

CLAIMED COSTS:
The total claimed costs for the audit period is \$13,390,008, summarized in the table below:

Cost Component	Fiscal Year								Total
	1998-99	1999-2000	2000-01	2001-02	2002-03	2005-06	2006-07	2007-08

Initial payment date	08/10/2006	08/03/2006	08/03/2006	none	none	06/05/2006	03/14/2007	none	

AUDIT OBJECTIVE:
The audit objective is to determine whether costs claimed represent increased costs resulting from the Animal Adoption Program, for the period of July 1, 1998 to June 30, 2008.

AUDIT SCOPE:
The scope of the audit work will be limited to planning and performing procedures to obtain reasonable assurance that claimed costs were allowable by law for reimbursement. Accordingly, transactions will be examined, on a test basis, to determine whether the amounts claimed for reimbursement are supported.

CITY OF LOS ANGELES
LEGISLATIVELY MANDATED ANIMAL ADOPTION PROGRAM
ENTRANCE CONFERENCE INFORMATION
FISCAL YEARS 1998-99 THROUGH 2007-08
S09-MCC-055

The audit scope includes, but will not be limited to, determining whether costs claimed were supported by appropriate source documents, not funded by another source, and not unreasonable and/or excessive.

AUDIT PROCESS:

- Exit conference will be arranged at the end of the fieldwork to formally present the outcome of the audit.
- City will receive a draft audit report in approximately 8-10 weeks after the exit conference.
- A management representation letter will be completed by the city and included with city's response to the draft audit report.
- SCO will incorporate the city's response into the final audit report.

AUDIT RESOLUTION:

City may file an incorrect reduction claim (IRC) with the Commission on State Mandates (CSM) if it disagrees with the factual accuracy of our report. Information regarding the IRC process is available on the CSM web site (csm.ca.gov)

Subject: City of LA Animal Adoption Audit status review
Attachments: LA AA Initial Review.docx [14 pages]

Hi Linda

Sorry it took me a little longer to put together, but I am finally sending you my preliminary assessment of claimed costs. I hope it's not too intimidating, since it is 14 pages long. I tried to be detailed and thorough in my review and provide as much details as I could up front. Please let me know if you have any questions. And we can address them during our upcoming meeting on Monday.

Also, please keep in mind that this document is based on my initial review of claimed costs and I may be wrong in some preliminary assessments. We'll be able to address each component in detail during the course of the fieldwork stage of this audit.

My manager and I will be coming as planned on Monday 07/19/10 around 1 – 1:30 p.m. I am looking forward to meeting you and your staff in person and moving along with this audit.

Thank you in advance for your time and assistance,

Masha Vorobyova

Audit Specialist

City of Los Angeles
Legislatively Mandated Animal Adoption Program
 Fiscal Years 1998-99 through 2007-08 (excluding FY's 2003-04 and 2004-05)
 Audit ID # S09-MCC-055
 Preliminary Overview of Components and Claimed Costs

Training Costs

Reimbursement Criteria

The parameters and guidelines allow reimbursement for one time activity of providing training to staff on reimbursable activities listed in Section IV (B) of the parameters and guidelines.

Claimed Costs

The city claimed \$48,369 under the cost component of Training for the audit period. For the first four years of the audit period (FY's 1998-99 through 2001-02), the city claimed 3 hour of training per each employee every year. In the latter years of the audit period (FY's 2002-03, and 2005-06 through 2007-08), the city claimed 2 hours per each employee every year. The following table summarizes claimed costs by fiscal year:

	Fiscal Year								
Training	1998-99	1999-2000	2000-01	2001-02	2002-03	2005-06	2006-07	2007-08	Totals
Claimed Costs:									
Salaries	\$ 8,130	\$ 4,290	\$ 2,804	\$ 2,470	\$ 920	\$ 1,908	\$ 3,982	\$ 2,051	\$ 26,555
Benefits	1,338	1,067	717	600	210	827	1,954	877	7,590
Related I/C	2,505	1,593	1,102	2,005	545	1,875	3,277	1,322	14,224
Total	\$ 11,973	\$ 6,950	\$ 4,623	\$ 5,075	\$ 1,675	\$ 4,610	\$ 9,213	\$ 4,250	\$ 48,369

Auditor Questions

The auditor will review two primary elements for this component:

1. Claimed hours, and
2. The type of training provided

To support these costs, the city needs to provide training materials for each fiscal year that would support how this training related to the performance of the mandated activities. In addition, the city would need to identify which employees were new and whether they were the ones to receive one-time training that is allowable for reimbursement under this program. The auditor would also like to review time records for the training hours that were claimed.

City of Los Angeles
Legislatively Mandated Animal Adoption Program
 Fiscal Years 1998-99 through 2007-08 (excluding FY's 2003-04 and 2004-05)
 Audit ID # S09-MCC-055
 Preliminary Overview of Components and Claimed Costs

Computer Software Costs

Reimbursement Criteria

The parameters and guidelines allow reimbursement for computer software costs incurred for the maintenance of records on animals specified in Section IV (B) of the parameters and guidelines. If the computer software is utilized in some way that is not directly related to the maintenance of records specified in Section IV (B) 8, only pro rata portion that is used for compliance with this section is reimbursable.

Claimed Costs

The city claimed \$588,723 under the cost component of Computer Software for the audit period. Claimed costs primarily included amounts for computer equipment and supplies costs. In addition, claimed costs included hours for Senior Systems Analyst I position to maintain computer software for non-medical records. The following table summarizes claimed costs by fiscal year:

Comp Software	Fiscal Year								Totals
	1998-99	1999-2000	2000-01	2001-02	2002-03	2005-06	2006-07	2007-08	
Claimed Costs:									
Salaries	\$ 1,593	\$ 4,193	\$ 3,707	\$ 4,387	\$ 28,339	\$ 21,286	\$ 22,396	\$ -	\$ 85,901
Benefits	262	1,044	948	1,066	6,487	9,236	10,989	-	30,032
Related I/C	491	1,557	1,457	3,560	16,797	20,918	18,430	-	63,210
Equipment	-	126,659	140,538	118,383	24,000	-	-	-	409,580
Total	\$ 2,346	\$ 133,453	\$ 146,650	\$ 127,396	\$ 75,623	\$ 51,440	\$ 51,815	\$ -	\$ 588,723

Auditor Questions

The auditor will review two primary elements for this component:

1. Computer equipment costs, and
2. Labor costs

Computer Equipment Costs

The auditor would like to receive invoices for costs claimed and documentation supporting how these costs related to the performance of the mandated activities.

Labor Costs

The auditor would like to review time records supporting costs claimed for Senior Systems Analyst position. The city also needs to identify activities involved in the maintenance of computer software and show how these activities related to the mandated program.

City of Los Angeles
Legislatively Mandated Animal Adoption Program
Fiscal Years 1998-99 through 2007-08 (excluding FY's 2003-04 and 2004-05)
Audit ID # S09-MCC-055
Preliminary Overview of Components and Claimed Costs

Care and Maintenance Costs

Reimbursement Criteria

The parameters and guidelines allow reimbursement, beginning July 1, 1999 for providing care and maintenance during the increased holding period for impounded stray or abandoned dogs and cats that die during the increased holding period or are ultimately euthanized. The increased holding period shall be measured by calculating the difference between the days from the day of capture and four or six business days from the day after impoundment.

The parameters and guidelines also allow reimbursement beginning on January 1, 1999 for providing care and maintenance for stray or abandoned animals (specified in Food and Agriculture Code Section 31753) that die during the increased holding period or are ultimately euthanized.

Eligible claimants are not entitled to reimbursement for the care and maintenance of the following population of animals:

- Stray or abandoned dogs, cats and other animals that are irremediably suffering from a serious illness or severe injury,
- Newborn stray or abandoned dogs, cats, and other animals that need maternal care and have been impounded without their mothers,
- Stray or abandoned dogs, cats and other animals too severely injured to move or where a veterinarian is not available and it would be more humane to dispose of the animal,
- Owner relinquished dogs, cats and other animals, and
- Stray or abandoned dogs, cats and other animals that are ultimately redeemed, adopted, or released to a nonprofit animal rescue or adoption organization.

Eligible claimants may elect one of the following two methods (Actual Cost Method or Time Study Method) to claim costs for the care and maintenance of impounded stray or abandoned dogs, cats and other animals that die during the increased holding period or are ultimately euthanized. The city and county did not perform a time study and elected to use the actual cost method to claim these costs.

Under the actual cost method, actual reimbursable care and maintenance costs per animal per day are computed for an annual claim period, as follows:

1. Determine the total annual cost of care and maintenance for all dogs, cats and other animals impounded at a facility. Total cost of care and maintenance includes labor, materials, supplies, indirect costs, and contract services.

Legislatively Mandated Animal Adoption Program
Fiscal Years 1998-99 through 2007-08 (excluding FY's 2003-04 and 2004-05)
Audit ID # S09-MCC-055
Preliminary Overview of Components and Claimed Costs

2. Determine the average daily census of all dogs, cats and other animals. For purposes of claiming reimbursement under IV.B.3, average daily census is defined as the average number of all dogs and cats at a facility housed on any given day, in 365-day period and the average number of all other animals at a facility housed on any given day, in a 365-day period.
3. Multiply the average daily census of dogs, cats and other animals by 365 to calculate the yearly census of dogs and cats and the yearly census of other animals.
4. Divide the total annual cost of care by the yearly census of dogs and cats to calculate cost per dog and cat per day and yearly census of other animals = cost per other animal per day.
5. Multiply the cost per animal per day, by the number of impounded stay or abandoned dogs, cats and other animals that die during the increase holding period or are ultimately euthanized by each reimbursable day. The reimbursable day for cats and dogs is the difference between three days from the day of capture, and four or six business days from the day after impoundment.

Care and Maintenance Formula

The parameters and guidelines provide for a formula-driven methodology to determine allowable mandated costs for the care and maintenance of dogs and cats and other animals. The use of this method requires claimants to calculate the total amount of eligible costs incurred to provide care and maintenance for the animals housed in its shelter. This total is divided by the annual census of animals housed in the shelter to determine a cost per animal per day. The next element of the formula is adding the number of stray and abandoned animals that died of natural causes during the holding period plus those animals that were euthanized after the required holding period. This total number of animals is then multiplied by the cost per animal per day. The resulting amount represents allowable costs for providing care and maintenance.

What the mandate is reimbursing claimants are costs associated with animals that were not relinquished, redeemed, adopted, or released to a nonprofit agency; animals for which the local agency was unable to assess fees to recover such costs.

Claimed Costs

The city claimed \$3,110,161 under the cost component of Care and Maintenance for the audit period. The city followed the care and maintenance formula identified in the parameters and guidelines to prepare and calculate claimed costs. The following table summarizes claimed costs by fiscal year.

City of Los Angeles
Legislatively Mandated Animal Adoption Program
 Fiscal Years 1998-99 through 2007-08 (excluding FY's 2003-04 and 2004-05)

Auditor Questions

The auditor will review three primary elements for this component:

1. Portion of the city's expenditures that relate to care and maintenance of dogs and cats and other animals,
2. Annual animal census of all animals, and
3. Eligible animal populations identified in the parameters and guidelines that can be claimed for reimbursement

Expenditures Related to Care and Maintenance (Labor and Materials and Supplies Costs):

The auditor needs to identify what portion of the city's expenditures was related to care and maintenance of animals. Such expenditures would include labor costs and materials and supplies costs that the city incurred for the performance of care and maintenance activities.

Labor Costs:

The city will need to provide a list of personnel (by classification) that participated in the care and maintenance functions. The city also needs to provide information relating to the involvement level of each classification. Another words, what portion of time each classification designates to care and maintenance function as opposed to other job duties not related to this component.

City of Los Angeles
Legislatively Mandated Animal Adoption Program
 Fiscal Years 1998-99 through 2007-08 (excluding FY's 2003-04 and 2004-05)
 Audit ID # S09-MCC-055
 Preliminary Overview of Components and Claimed Costs

Materials and Supplies Costs:

The city will need to identify which materials and supplies costs related to the care and maintenance function. Furthermore, the city will need to submit documentation supporting these expenditure amounts for each of the fiscal years.

Animal Census Data

The auditor will need to work closely with the city's staff to analyze animal census information from the Chameleon tracking system for all fiscal years. The yearly census refers to the total number of days that all animals were housed in the shelter.

Eligible Animal Population

The eligible animal population for dogs and cats and other animals will be determined by manipulating the Chameleon data and taking into account all exclusions as per the requirement of the mandated program. The auditor will work with the city's staff to retrieve this information.

Increased Holding Period Days

Our calculations of allowable costs will take into consideration that the required holding period does not include Saturday as a business day. This is consistent with the Appellate Court decision dated March 26, 2010, in the case of *Purifoy v. Howell*.

Formula Summarized

Care and Maintenance Formula for Dogs and Cats			
Cost per animal per day	X	Eligible dogs and cats	X
		(died days 4,5,6)	
		(euth days 7 and on)	
Care and Maintenance Formula for Other Animals			
Cost per animal per day	X	Eligible Animals	X
		(died days 2,3,4,5,6)	
		(euth days 7 and on)	

City of Los Angeles

 Fiscal Years 1998-99 through 2007-08 (excluding FY's 2003-04 and 2004-05)
 Audit ID # S09-MCC-055
 Preliminary Overview of Components and Claimed Costs

Holding Period Costs

Reimbursement Criteria

The parameters and guidelines allow reimbursement, beginning January 1, 1999, for the impounded animals specified in Food and Agriculture Code section 31753 ("other animals"), for either:

1. Making the animal available for owner redemption on one weekday evening until at least 7:00 p.m., or one weekend day; or
2. For those local agencies with fewer than three full time employees or that are not open during all regular weekday business hours, establishing a procedure to enable owner to reclaim their animals by appointment at a mutually agreeable time when the agency would otherwise be closed.

Beginning July 1, 1999, the parameters and guidelines allow reimbursement for impounded dogs and cats, for either:

- (1) Making the animal available for owner redemption on one weekday evening until at least 7:00 p.m., or one weekend day; or
- (2) For those local agencies with fewer than three full – time employees or that are not open during all regular weekday business hours, establishing a procedure to enable owners to reclaim their animals by appointment at a mutually agreeable time when the agency would otherwise be closed.

Claimed Costs

The city claimed \$5,635,203 under the cost component of Increased Holding Period for the audit period. The claimed costs included labor costs for various shelter staff for each of the city's shelters. The following table summarizes claimed costs by fiscal year:

	Fiscal Year								
Holding Period	1998-99	1999-2000	2000-01	2001-02	2002-03	2005-06	2006-07	2007-08	Totals
Claimed Costs:									
Salaries	\$ 289,509	\$ 603,815	\$ 624,587	\$ 647,704	\$ 98,200	\$ 172,106	\$ 369,095	\$ 205,634	\$ 3,010,650
Benefits	47,682	150,290	159,644	157,456	17,585	74,677	181,114	87,867	876,315

Total	\$ 426,418	\$ 978,302	\$ 1,029,756	\$ 1,330,837	\$ 173,988	\$ 415,912	\$ 853,937	\$ 426,053	\$ 5,635,203

City of Los Angeles
Legislatively Mandated Animal Adoption Program
Fiscal Years 1998-99 through 2007-08 (excluding FY's 2003-04 and 2004-05)
Audit ID # S09-MCC-055
Preliminary Overview of Components and Claimed Costs

Auditor Questions

The auditor will review two primary elements for this component:

1. Hours of operation for each of the city's shelters, and
2. Staffing requirements for each of the shelters

Hours of Operation

The city needs to provide documentation that identifies each shelter's hours of operation. Depending on the hours that each shelter is open to the public, the auditor will determine whether each shelter makes animals available for owner redemption or adoption on either of the weekend days or one weeknight till 7 p.m.

Staffing Requirements

For agencies using the holding period of four business days after the day of impoundment, we needed to determine the additional costs incurred to have the impounded animals available for owner redemption or adoption. In order to determine the additional staffing requirements, the auditor will inquire about the number of employees and classifications of staff working when the shelter is closed to the public and the staffing needed to comply with the mandate and stay open during the increased hours.

When the shelter is closed to the public, animals must still be cared for and fed. Usually, most of the staff whose duties include caring for animals would be at the shelters regardless of whether the shelters were open to the public or not. Therefore, since the main duties of these employees are to care and maintain animals, these positions are generally not reimbursable for this cost component.

However, some positions will be in fact reimbursable under this component depending on the duties of staff whose positions directly relate to the purpose of this component to make animals available for owner redemption or adoption. The city will need to provide a listing of such positions that would be eligible for reimbursement under this component.

Lost and Found Lists Costs

Reimbursement Criteria

The program's parameters and guidelines allow reimbursement, beginning January 1, 1999, for providing owners of lost animals and those who find lost animals with all of the following:

1. Ability to list the animals they have lost or found on "lost and found" lists maintained by the agency;
2. Referrals to animals listed that may be the animals the owner or finders have lost or found;
3. The telephone numbers and addresses of other pounds and shelters in the same vicinity;
4. Advice as to means of publishing and disseminating information regarding lost animals; and

City of Los Angeles
Legislatively Mandated Animal Adoption Program
 Fiscal Years 1998-99 through 2007-08 (excluding FY's 2003-04 and 2004-05)
 Audit ID # S09-MCC-055
 Preliminary Overview of Components and Claimed Costs

5. The telephone numbers and addresses of volunteer groups that may be of assistance in locating lost animals.

Claimed Costs

The city claimed \$277,342 under the cost component of Lost and Found Lists for the audit period. For the first four years of the audit period, FY's 1998-99 through 2001-02, the city claimed hours for 6 clerk typists. Specifically, the city claimed 1 hour per day for each of the 6 clerk typists in each fiscal year. Furthermore, in FY 2001-02 claim, the city included additional hours to develop a web site for posting lost and found animals and claimed additional materials and supplies costs for the purchase and installation of this website. For the last four years for the audit period, FY's 2002-03 and 2005-06 through 2007-08, the city revised its claiming methodology and included only 11 minutes per day for each of the 6 clerk typists in every year.

The following table summarizes claimed costs by fiscal year:

Lost and Found	Fiscal Year								Totals
	1998-99	1999-2000	2000-01	2001-02	2002-03	2005-06	2006-07	2007-08	
Claimed Costs:									
Salaries	\$ 10,865	\$ 20,966	\$ 24,190	\$ 43,866	\$ 7,626	\$ 8,534	\$ 8,731	\$ 8,552	\$ 133,330
Benefits	1,790	5,219	6,183	10,664	1,745	3,703	4,285	3,654	37,243
Related I/C	3,349	7,785	9,509	35,602	4,520	8,386	7,185	5,513	81,849
Mater & Suppl	-	-	-	24,920	-	-	-	-	24,920
Total	\$ 16,004	\$ 33,970	\$ 39,882	\$ 115,052	\$ 13,891	\$ 20,623	\$ 20,201	\$ 17,719	\$ 277,342

Auditor Questions

The auditor will review two primary elements for this component:

1. Time records, and
2. Costs for materials and supplies

Time Records

The auditor would like to review time records supporting costs claimed for Clerk Typist position. If the city performed a time study for this component, the auditor will need to review the time study documentation. The city also needs to identify activities involved in the maintenance of computer software and show how these activities related to the mandated program.

Materials and Supplies Costs

The auditor would like to see invoices for costs claimed and documentation supporting how these costs related to the performance of the mandated activities.

City of Los Angeles
Legislatively Mandated Animal Adoption Program
 Fiscal Years 1998-99 through 2007-08 (excluding FY's 2003-04 and 2004-05)
 Audit ID # S09-MCC-055
 Preliminary Overview of Components and Claimed Costs

Non-Medical Records Costs

Reimbursement Criteria

The parameters and guidelines allow reimbursement, beginning January 1, 1999, for maintaining non-medical records on animals that are either taken up, euthanized after the holding period, or impounded. Such records shall include the following:

1. The date the animal was taken up, euthanized, or impounded;
2. The circumstances under which the animal is taken up, euthanized, or impounded;
3. The names of the personnel who took up, euthanized, or impounded the animal; and
4. The final disposition of the animal, including the name of the person who euthanized the animal or the name and address of the adopting party.

Claimed Costs

The city claimed \$647,632 under the cost component of Non-Medical Records for the audit period. For the first three years of the audit period, FY's 1998-99 through 2000-01, the city claimed hours for a Veterinary Assistant to input non-medical information on each animal. Specifically, the city claimed 20 minutes per each record in each fiscal year. Starting in FY 2001-02 till the end of the audit period in FY 2007-08, the city revised its claiming methodology and started claiming 5 minutes per each record for the Animal Care Technicians to input non-medical records in every year. Lastly, in the last year of the audit period FY 2007-08, the city also included time for the Sr. Systems Analyst I to maintain animal information systems and the department's website.

The following table summarizes claimed costs by fiscal year:

Non-Med Rec	Fiscal Year								Totals
	1998-99	1999-2000	2000-01	2001-02	2002-03	2005-06	2006-07	2007-08	
Claimed Costs:									
Salaries	\$ 40,556	\$ 112,512	\$ 100,982	\$ 21,490	\$ 19,465	\$ 21,437	\$ 14,001	\$ 36,347	\$ 366,790
Benefits	6,680	28,004	25,811	5,224	4,456	9,301	6,870	15,531	101,877
Related I/C	12,499	41,776	39,696	17,441	11,537	21,066	11,521	23,429	178,965
Total	\$ 59,735	\$ 182,292	\$ 166,489	\$ 44,155	\$ 35,458	\$ 51,804	\$ 32,392	\$ 75,307	\$ 647,632

Auditor Questions

The auditor will review two primary elements for this component:

1. Time increments claimed for each record, and
2. Number of eligible records

City of Los Angeles
Legislatively Mandated Animal Adoption Program
Fiscal Years 1998-99 through 2007-08 (excluding FY's 2003-04 and 2004-05)
Audit ID # S09-MCC-055
Preliminary Overview of Components and Claimed Costs

Time Records:

The auditor would like to review time records supporting costs claimed for Veterinary Assistant and Animal Care Technician positions. If the city performed a time study for this component, the auditor will need to review the time study documentation. The city also needs to identify activities involved in the maintenance of non-medical records and show how these activities related to the mandated program.

In addition, the auditor would like to review documentation supporting hours claimed for the Sr. Systems Analyst in FY 2007-08.

Eligible Records:

Eligible records usually include any non-medical record that was created for any animal throughout the audit period. The auditor will be able to retrieve this information from the Chameleon database by checking the number of eligible animals that came into the city's shelters in each fiscal year.

Necessary and Prompt Veterinary Care Costs

Reimbursement Criteria

The parameters and guidelines allow reimbursement, beginning January 1, 1999, for providing "necessary and prompt veterinary care" for stray and abandoned animals, other than injured cats and dogs given emergency treatment, that die during the holding period (through day 6) or are ultimately euthanized (after day 7) during the holding periods specified in Statutes of 1998, Chapter 752.

"Necessary and prompt veterinary care" means all reasonably necessary medical procedures performed by a veterinarian or someone under the supervision of a veterinarian to make stray or abandoned animals "adoptable." The following veterinary procedures, if conducted, are eligible for reimbursement:

- An initial physical examination of the animal to determine the animal's baseline health status and classification as "adoptable," "treatable," or "non-rehabilitatable."
- A wellness vaccine administered to "treatable" or "adoptable" animals.
- Veterinary care to stabilize and or relieve the suffering of a "treatable" animal.
- Veterinary care intended to remedy any applicable disease, injury, or congenital or hereditary condition that adversely affects the health of a "treatable" animal or that is likely to adversely affect the animal's health in the future, until the animal becomes "adoptable."

Eligible claimants are not entitled to reimbursement for providing "necessary and prompt veterinary care" to the following population of animals:

City of Los Angeles
Legislatively Mandated Animal Adoption Program
 Fiscal Years 1998-99 through 2007-08 (excluding FY's 2003-04 and 2004-05)
 Audit ID # S09-MCC-055
 Preliminary Overview of Components and Claimed Costs

- Animals that are irremediably suffering from a serious illness or severe injury,
- Newborn animals that need maternal care and have been impounded without their mothers,
- Animals too severely injured to move or where a veterinarian is not available and it would be more humane to dispose of the animal,
- Owner relinquished animals, and
- Stray or abandoned animals that are ultimately redeemed, adopted, or released to a nonprofit animal rescue or adoption organization

Eligible claimants are not entitled to reimbursement for providing the following veterinary procedures:

- Emergency treatment given to injured cats and dogs,
- Administration of rabies vaccinations to dogs,
- Implantation of microchip identification,
- Spay or neuter surgery and treatment, and
- Euthanasia

Claimed Costs

The city claimed \$3,004,399 under the cost component of Prompt and Necessary Veterinary Care for the audit period.

For the FY 1998-99, the city claimed 3% of the operating costs and included this amount under the component of Veterinary Care. For the FY's 1999-2000 through 2000-01, the city employed a similar methodology and allocated a portion of costs to provide treatments for the animals. Starting in FY 2001-02 through FY 2006-07, the city started claiming hours for a Veterinarian and a Veterinary Technician positions as well as costs for animal medical supplies. Specifically, the hours claimed included an average time to provide treatments to the animals. The city claimed 12 minutes per treatment in FY's 2001-02 through 2006-07. And lastly, for FY 2007-08, the city claimed costs based on the unit cost calculated for each animal treatment.

The following table summarizes claimed costs by fiscal year:

Vet Care	Fiscal Year								
	1998-99	1999-2000	2000-01	2001-02	2002-03	2005-06	2006-07	2007-08	Totals
Claimed Costs:									
Salaries	\$ -	\$ -	\$ -	\$ 144,598	\$ 116,679	\$ 262,640	\$ 212,421	\$ 297,827	\$ 1,034,165
Benefits	-	-	-	35,152	26,708	-	-	-	61,860

City of Los Angeles
Legislatively Mandated Animal Adoption Program
Fiscal Years 1998-99 through 2007-08 (excluding FY's 2003-04 and 2004-05)
Audit ID # S09-MCC-055
Preliminary Overview of Components and Claimed Costs

Auditor Questions

The auditor will review five primary elements for this component:

1. Claimed hours and methodology to arrive at average time increments claimed;
2. Types of medical procedures performed on animals and included in the claims;
3. Which animal populations received these treatments;
4. Animal medical supplies costs; and
5. Methodology to calculate unit cost in the last FY

Time Records:

The auditor would like to review time records supporting costs claimed for the Veterinarian and Veterinarian Technician positions. If the city performed a time study for this component, the auditor will need to review the time study documentation.

Medical Procedures

The auditor would like to review documentation identifying the types of medical procedures that were included in the claims. Specifically, the auditor will need to ensure that claimed medical treatments were in fact reimbursable under this program.

Population of Eligible Animals

As per the requirements of this program, not all animal populations that received medical treatments are eligible for reimbursement under this component. The auditor will review the eligible animal population for dogs and cats and other animals by manipulating the Chameleon data and taking into account all exclusions as per the requirement of the mandated program. The auditor will work with the city's staff to retrieve this information.

Animal Medical Supplies Costs

The auditor would like to see invoices for costs claimed and documentation supporting how these costs related to the performance of the mandated activities within this component.

Unit Costs

The auditor would like to review the documentation identifying city's methodology in calculating unit costs included in FY 2007-08 claim. Specifically, the city claimed two unit costs, \$9.70 and \$5.99 per treatment. The auditor would like to review how these costs were calculated.

City of Los Angeles
Legislatively Mandated Animal Adoption Program
Fiscal Years 1998-99 through 2007-08 (excluding FY's 2003-04 and 2004-05)
Audit ID # S09-MCC-055
Preliminary Overview of Components and Claimed Costs

Procuring Equipment Costs

Reimbursement Criteria

The parameters and guidelines allow reimbursement, beginning January 1, 1999, for procuring medical, kennel, and computer equipment necessary to comply with the reimbursable activities listed in Section IV (B) of the parameters and guidelines to the extent that these costs are not claimed as an indirect cost under Section V (B) of the parameters and guidelines. If the medical, kennel, and computer equipment utilized in some way not directly related to the mandated program or the population of animals listed in Section IV (B), only pro rata portion of the activity that is used for the purpose of the mandated program is reimbursable.

Claimed Costs

The city claimed \$78,179 under the cost component of Procuring Equipment in FY 2002-03. Claimed costs consisted of hardware and software expenditures in FY 2002-03.

Auditor Questions

The auditor would like to see invoices for costs claimed and documentation supporting how these costs related to the performance of the mandated activities.

Fringe Benefit Rates and Indirect Cost Rates

It appears from the claims that the city claimed fringe benefit rates and indirect cost rates that were specified in the city's annual Cost Allocation Plans. The auditor would like to receive a copy of the city's Cost Allocation Plan for each of the fiscal years within the audit period.

Productive Hourly Rates

The auditor would like to review the city's methodology to calculate the staff's productive hourly rates that were used in the claims. Specifically, the auditor will inquire about two key elements:

1. Productive hours used in the calculations (1,800 or other); and
2. Salary base for each employee classification included in the claims

Subject: LA city Animal Adoption audit, first week of fieldwork status meeting overview
Attachments: LA AA Status Meeting - 7-22-10.docx [5 pages]

Linda and John

As we discussed last week, we had a productive week on the field and obtained a lot of useful information while in your office. Every person we've talked to last week was very helpful. We appreciate everyone's time and input with this audit.

I am sending a little write up from last week that summarizes topics discussed during our status meeting on 07/22/10. We accomplished a lot, but we still have a lot to work on in the weeks ahead of us. For now, I will focus on reviewing the animal census data I received from Dara. I will also focus on reviewing the extensive time study that was provided to us before we left. Once I have a better understanding of both items, I will be able to assess once again what else is still needed to complete the audit.

I believe we all left a meeting last week with a pretty good understanding of what has been accomplished and what still remains for our review. I am looking forward to receiving requested documents in the upcoming few weeks. Once again, I am attaching an overview of last week's meeting. Please let me know if you have any questions.

Thank you all for your time and input!

CONFIDENTIALITY NOTICE: This communication with its contents as well as any attachments may contain confidential and/or legally privileged information. It is solely for the use of the intended recipient(s). Unauthorized interception, review, use or disclosure is prohibited and may violate applicable laws including the Electronic Communications Privacy Act. If you are not the intended recipient, please contact the sender and destroy all copies of the communication.

A discussion was held to update Animal Department management concerning the results of our testing this week, what information is still needed to properly analyze allowable costs, as well as various issues involving the mandate program. In attendance were Linda Barth and John Forland, representing the L.A. Animal Services Department and Jim Venneman and Masha Vorobyova, representing SCO.

Training

This component needs additional analysis. The department's training coordinator, Kathy Mooney, has retired and individual shelter managers provided vague information as a result. We were able to obtain an Animal Care Technician training schedule that was conducted for a group of new employees over the two-week period of 5/21/07 through 6/1/07. This schedule relates to the Chameleon system training. We need to determine whether the claims included this training or possibly another one and what training agenda was typical of all training received by new ACTs during the audit period.

Shelter managers also confirmed that their staff received additional training for Chameleon whenever system upgrades occurred. This activity would also be reimbursable.

Documentation needed

- Since one-time training is allowable for new employees, we need the hire dates for all employees during the audit period.
- Costs will be allowable to the extent that the training materials relate to the mandated program and the mandated activities.
- If formal training was conducted for system upgrades, documentation is needed as to when training occurred, how long training occurred, and the employees in attendance.

Latest update as of Monday, July 26, 2010

The city provided a training agenda this morning that relates to all newly hired employees. At this time we still need to review the hire dates for new employees so that we can determine how many employees the city can claim for reimbursement for this component.

Computer Software

The city claimed variety of costs for computer hardware and supplies for the purposes to launch Chameleon software for all the shelters. The department was able to show documents that summarized computer expenses during FY's 1999-2000 through 2001-02. We noted that the totals of these invoices were higher than the amounts claimed. Ross Pool advised the auditors that he will perform an analysis of the invoices and advise us as to what costs were included in the city's claims. At this time, we have not received copies of documentation for this component.

In addition, we determined that the city only claimed the \$24,000 annual cost for Chameleon licensing fees in one year of the audit period (FY 2002-03). This is an allowable cost to the extent that the software is used for mandated activities.

Needed

The city needs to let us know the applicable percentage that the Chameleon system is used for mandated activities. This determination would take into account various modules that are not related to the mandate (such as animal licensing, processing of revenues and fees, etc.).

In addition, the city will need to provide a copy of the contract relating to the Chameleon software installation and licensing fees.

And lastly, once Ross Pool performs his analysis, the city would need to provide documents supporting the amounts for computer hardware costs.

Care and Maintenance

We advised department management that we were able to obtain adequate animal data for auditing purposes. Dara was instrumental in providing the database information needed. Dara extracted animal data that was set up using the intake date as the starting point in each fiscal year. Obvious data entry errors were detected and corrected. We determined that the animal census data and the number of eligible animals used in the city's claims were reasonably close to the audited amounts. After our preliminary review, we concluded that the annual animal census amounts were slightly understated while the numbers of eligible animals were slightly overstated. The auditor will need review the animal data more closely in order to provide the final audited numbers.

At this time, we were unable to obtain the amounts for the actual annual cost information related to care and maintenance of animals. This annual cost information will be used in the care and maintenance formula to calculate allowable costs for this component.

Needed

- Actual cost documentation for operation of the city's animal shelters that appears in the city's expenditure ledgers, by object code or name
- Since object account 6020 was used for shelter supplies, we would like the city to provide a listing of the types of expenses that are recorded within this account.
- We were able to obtain the number of Animal Care Technicians, Animal Care Technician Supervisors, Animal Control Officers I & II, Clerk Typists, Senior Clerk Typists, Senior Systems Analysts I & II, Training Officer, Veterinarian, and Registered Veterinary Technicians employed and the amounts paid for labor for FYs 2005-06 through 2007-08. We were advised that salary information for these employees is not available for years prior to 2005-06. We can utilize a consumer price index to deflate the amounts paid for labor in prior years. Department management advised that they will provide a head-count of the number of employees within each classification for FYs 1998-99 through 2002-03.
- Job description for Animal Care Technicians
- The department needs to advise us as to the percentage of time that Animal Care Technicians spend only on the activity of animal care and maintenance. This would primarily include feeding and cleaning.

Holding Period

We determined that this will be the cost component with the biggest negative audit finding because costs were claimed for all employees working in the shelters on Saturdays versus only those additional employees that were required to work with the public. Based on our review of shelter operations, additional employees required would include 1-2 additional ACTs (except South L.A. – which needed 4-5), all clerical staff, and either one OIC (FYs 1998-99 through 2006-07) or one ACT Supervisor (FY 2007-08).

Needed

We need the July, 2010 employee schedule for ACTs and Clerks for the West Valley and Harbor shelters.

Lost and Found Lists

The city provided hard copies of time study data just after our meeting concluded. We need to sort through this data to determine what part, if any, relates to this cost component. We will perform all applicable analysis and discuss the initial results with department management.

Non-Medical Records

This cost component will contain the biggest positive audit finding for the city. That is because the city seriously under-claimed the number of records processed in each year of the audit period. Based on our discussions with Dara, we already know the number of records processed each year. Based on our review of shelter operations, we determined that the employee classifications of ACO, ACT, and Clerk Typists are all involved in the processing of non-medical records.

The city provided hard copies of time study data just after our meeting concluded. We will need to sort through this data to determine what part, if any, relates to this cost component. We will perform all applicable analysis and discuss the initial results with department management.

Needed

We would like to obtain a copy of the city's policy and procedure that documents the outcome processing of animals.

Necessary and Prompt Veterinary Care

The city provided hard copies of time study data just after our meeting concluded. We will need to sort through this data to determine what part, if any, relates to this cost component. We will perform all applicable analysis and discuss the initial results with department management.

We know that reimbursable medical treatments were provided to animals. Linda agreed to work with Dara to see if information is obtainable from Chameleon that will document eligible treatments performed on eligible animals during the required holding period.

We also discussed that two repetitive activities that are reimbursable include the initial physical exam and the administering of wellness vaccines. We still need to determine whether the time studies provided include information relating to time increments per each activity or whether another time study might be needed.

Needed

We obtained a copy of Policy and Procedure "Med 8" which describes the types of vaccines administered to animals depending on their age. The administration of a "wellness vaccine" is reimbursable (only rabies vaccines administered to dogs are excluded). While the time study should show the amount of time required to administer vaccines, we will also need to obtain documentation supporting the cost of the vaccines.

Construction of New Facilities/Remodeling of Existing Facilities

Our review of animal shelters confirmed that new shelters were constructed and opened in 2007. One existing shelter was expanded in 2007. We also noted that city voters approved Proposition F in 2000. Proposition F provided for the sale of bonds, the proceeds of which were used to construct fire stations and animal shelters.

Needed

- The documentation required by the mandate from the applicable governing board. This documentation basically confirms that new facilities were required in order to comply with the Hayden Bill. The specific documentation required is clearly spelled out in the parameters and guidelines. If the required documentation is provided, we will also need:
 - Documented construction expenditures incurred for each shelter. This would include all costs related to construction (e.g. - planning, land acquisition, labor, contract services, & materials and supplies).

Miscellaneous

After we return to our office, we will provide .pdf versions of both parameters and guidelines (adopted February 28, 2002 and amended version adopted January 26, 2006).

We will also prepare an analysis of the increased holding period required by the Hayden Bill that is specific to the hours of operation of the city's shelters. We will provide two versions – one that includes Saturday as a business day and one that excludes Saturday as a business day.

Linda

As promised, I am sending you the copies of both versions of the Parameters and Guidelines for this program. I am also including the Commission's Statement of Decision. This document provides some additional clarity on some of the components and the decision process the Commission went through with this program.

I still owe you the payment history for the audit period. I will provide it to you next week. Our support staff, who has access to these reports, is out on vacation this week. So stay tuned to your payment reports later.

Also, I still have to forward you our analysis for the increased holding period days that pertains to the specific schedule of your agency's shelters. I will be able to send it to you later this week.

Thanks,

Masha Vorobyova

Hello

We're in the process of reviewing the work schedules for all animal shelters to determine the Increased Holding Period positions. It turns out that the West Valley clerical staff schedule was for the 1st week of August. Could we please have the Clerical schedule for the month of July for the West Valley shelter to make things more consistent.

Thank you,

Thank you for your response and revised documents. I will review them shortly. I will be out on vacation from Sept 1st till 10th and will continue working on this audit upon my return. Also, we're in the process of moving to a new office location, so I will be tied up in the mid September. However, for the planning purposes, keep in mind that I might be ready to come back for another week of fieldwork in late September. I will give you a call to schedule.

Subject: City of Los Angeles Animal Adoption, 2nd week of fieldwork

Hi Linda

Just wanted to confirm my upcoming visit next week. I will be arriving some time after lunch on Monday, October 18th, and will be staying at your office through Thursday, October 21st.

Here is a brief recap of what documents I still need to complete our audit:

1. **Training:** At this time we still need to review the hire dates for new employees so that we can determine how many employees the city can claim for reimbursement for this component.
2. **Computer Software and Hardware costs:**
 - The city needs to let us know the applicable percentage that the Chameleon system is used for mandated activities. This determination would take into account various modules that are not related to the mandate (such as animal licensing, processing of revenues and fees, etc.).
 - The city also needs to provide a copy of the contract relating to the Chameleon software installation and licensing fees.
 - And lastly, as city suggested during the first week of fieldwork, the city needs to compile invoices and documents relating to computer hardware costs included in the claims.
3. **Care and Maintenance of Dogs and Cats and Other Animals:**
 - Actual cost documentation for operation of the city's animal shelters that appears in the city's expenditure ledgers, by object code or name.
 - Since object account 6020 was used for shelter supplies, we would like the city to provide a listing of the types of expenses that are recorded within this account.
 - We were able to obtain the number of Animal Care Technicians, Animal Care Technician Supervisors, Animal Control Officers I & II, Clerk Typists, Senior Clerk Typists, Senior Systems Analysts I & II, Training Officer, Veterinarian, and Registered Veterinary Technicians employed and the amounts paid for labor for FYs 2005-06 through 2007-08. We were advised that salary information for these employees is not available for years prior to 2005-06. We can utilize a consumer price index to deflate the amounts paid for labor in prior years. Department management advised that they will provide a head-count of the number of employees within each classification for FYs 1998-99 through 2002-03.
 - Job description for Animal Care Technicians
 - The department needs to advise us as to the percentage of time that Animal Care Technicians spend only on the activity of animal care and maintenance. This would primarily include feeding and cleaning.
4. **Lost and Found Lists:**
 - The city needs to provide records to support claimed hours and costs for the development of the web site for purposes of posting lost and found lists. These costs were claimed in FY 2001-02.
 - Clarification question: After the web site was created, is there any human interaction or labor involved in posting the lost and found lists?
5. **Vet Care:**

- As discussed over the phone, the initial review of the city's time study revealed that claimed vet care activities included emergency procedures that aren't eligible for reimbursement. The auditor suggested to conduct a time study that would focus on two repetitive reimbursable activities of performing initial physical examinations of animals as well as administering of wellness vaccines. The city needs to perform this time study and provide the results in order to receive reimbursement for this cost component.
- If the city has any additional invoices for the purchase of vaccines, the auditor will be glad to review them.

Let me know if I can provide more clarity to the list of requested documents. We discussed most of these during our status meeting on July 22nd, 2010. I am looking forward to working with you next week. I'll have a preliminary update ready by then with calculations for Holding Period and Non-Medical Records.

Thank you!

Hello everyone

I wanted to say thank you for everyone's assistance during the 2nd week of fieldwork that took place on October 18th through October 21st, 2010. I am sending for your review the electronic copy of the handout I provided to all of you during our status meeting on October 19th, summarizing the preliminary findings we have so far. I am also including a brief update that I prepared at the end of last week, summarizing what we were able to accomplish last week and what is still outstanding.

Please let me know if you have any questions. If the department is able to provide the rest of the documents within the next week or two, we'll be ready to hold an exit conference sometime in December.

Once again, Thank you all for your time and assistance with this audit,

Masha Vorobyova

10/25/2010

We concluded a second week of fieldwork at the Los Angeles Department of Animal Control. Here is a brief recap of the information provided to the auditor and a few outstanding items still needed to complete our audit analysis.

Training

The city provided a listing of all new employees throughout the audit period and their hiring dates. This information will be used to analyze allowable costs for the training component. The city will get reimbursement for new employees in each fiscal year for the training that relates to the performance of the mandated activities.

Computer Software and Equipment Costs

The city claimed variety of costs for computer hardware, software, and supplies for the purposes to launch Chameleon software for all the shelters. The supporting documentation did not clearly identify which specific invoices were included in the claims. Ross Pool, the department's Management Analyst, performed an analysis of the invoices and prepared schedules to showcase which hardware and software costs were part of the city's claims. Ross was able to retrieve majority of the invoices.

The auditor will review all invoices that were provided and make a determination to the extent of the costs that were not supported. In addition, the auditor will prorate the costs from allowable invoices to the extent that the Chameleon software is used for the mandated activities.

Still Needed

The city needs to let us know the applicable percentage that the Chameleon system is used for mandated activities. This determination would take into account various modules that are not related to the mandate (such as animal licensing, processing of revenues and fees, citations, dispatching, etc.).

Dara Ball, the departments Senior Systems Analyst, is currently working on her analysis to showcase the various modules and main screens in Chameleon and the extent they relate to the mandated activities. Dara has been instrumental in describing the Chameleon procedures and assisting the auditor in the retrieval and the analysis of Chameleon data.

Care and Maintenance

As we noted during our first week of fieldwork in July, 2010, we were able to retrieve and analyze the animal census data from the Chameleon software. But we were unable to obtain the amounts for the actual annual cost information related to care and maintenance of animals. This annual cost information will be used in the care and maintenance formula to calculate allowable costs for this component.

During this week of fieldwork, we were able to identify accounts that contain expenditures relating to this component. They are as follows:

- Object Code 4580 – Animal Food
- Object Code 4430 – Uniforms (will be partially reimbursable for the portion relating to Animal Care Technicians' uniforms)
- Object Code 6020 – Shelters' Operating Supplies (this account needs to be examined more closely by various vendors to determine the extent to which various expenditures relate to the care and maintenances functions).

As for the labor costs relating to the care and maintenance function, the department was able to provide the job description for the classification of Animal Care Technicians. The department also recommended a percentage of time that the ACTs and Supervisors spend on the duties of caring for animals. The department suggested that ACTs spend about 80% and ACT Supervisors about 40% of their time on the functions of care and maintenance of animals. The department provided their written analysis to support their recommendations.

Still Needed

- John Forland, the department's Senior Management Analyst, is currently working with the department's accountant on analyzing the department's expenditures relating to the care and maintenance function and extracting the actual expenditure amounts from Object Codes 4580, 4430, and 6020. John also will put together a listing of vendors from Account 6020 and the descriptions of the materials provided by those vendors. The department will need to segregate those vendors that relate to the care and maintenance functions. John will also put together a brief analysis summarizing annual expenditures incurred for this component for each fiscal year under the audit period.

Holding Period

We received monthly schedules for all shelters and classifications and calculated our preliminary finding for this component. The finding amounts were presented to the city's staff during our status meeting on October 19, 2010.

Still Needed

We are still missing one monthly schedule for July, 2010 for classification of Clerk Typists for the West Valley shelter.

Lost and Found Lists

Still Needed

During our status meeting on October 19, 2010, we briefly discussed the costs claimed under this component in FY 2001-02 for the creation and launching of the Department's Web site. The city needs to provide any documents they are able to find supporting the costs claimed for the web site project.

Non-Medical Records

We completed our analysis of this component and provided preliminary finding amounts during our status meeting on October 19, 2010. The auditor suggested for the city to provide an intake summary report identifying the number and percentage of animals that come from the field and over the counter. This percentage can be used to revise the preliminary finding.

As of now, we calculated allowable hours based on a 5 minute increment recorded in the time study that we applied to all records created in the Chameleon during our audit period. For this component, the city claimed this time for the classification of Animal Care Technicians. Because Animal Control Officers also input information into Chameleon upon intake of animals, we can revise this component according to the intake statistics so that ACO classification also gets credit for this activity in our calculations.

Needed

Dara Ball will provide a statistics report that would identify the percentage of animals brought in from the field vs. over the counter.

Necessary and Prompt Veterinary Care

The city provided a copy of the new time study that was completed recently. The new time study recorded time to examine animals upon intake and administer wellness vaccines (excluding rabies) and other routine medications (such as flea medications) if necessary. The auditor will review this time study and analyze the results.

Still Needed

The city claimed variety of costs under the category of materials and supplies that relate to the Veterinary Care. At this time, the city was unable to provide any documentation supporting these costs. We'll need to revisit this component and discuss a way to identify materials and supplies costs that might be reimbursable under this component.

Construction of New Facilities/Remodeling of Existing Facilities

Our review of animal shelters confirmed that new shelters were constructed and opened during the audit period. We also noted that city voters approved Proposition F in 2000. Proposition F provided for the sale of bonds, the proceeds of which were used to construct fire stations and animal shelters.

The city provided to us the background information on the initial analysis that was performed in order to receive the City Council approval of this project. The city also provided a package of documents containing various details relating to the approval from the City Council, construction specifics, and project costs. We will review provided documentation and will discuss this component at a later time

City of Los Angeles
Legislatively Mandated Animal Adoption Program
 Fiscal Years 1998-99 through 2007-08 (excluding FY's 2003-04 and 2004-05)

 Status Meeting, Preliminary Findings

10/19/2010

Holding Period Costs

Reimbursement Criteria

The parameters and guidelines allow reimbursement, beginning January 1, 1999, for the impounded animals specified in Food and Agriculture Code section 31753 ("other animals"), for either:

1. Making the animal available for owner redemption on one weekday evening until at least 7:00 p.m., or one weekend day; or
2. For those local agencies with fewer than three full time employees or that are not open during all regular weekday business hours, establishing a procedure to enable owner to reclaim their animals by appointment at a mutually agreeable time when the agency would otherwise be closed.

Beginning July 1, 1999, the parameters and guidelines allow reimbursement for impounded dogs and cats, for either:

- (1) Making the animal available for owner redemption on one weekday evening until at least 7:00 p.m., or one weekend day; or
- (2) For those local agencies with fewer than three full – time employees or that are not open during all regular weekday business hours, establishing a procedure to enable owners to reclaim their animals by appointment at a mutually agreeable time when the agency would otherwise be closed.

Claimed Costs

The city claimed \$5,635,203 under the cost component of Increased Holding Period for the audit period. The claimed costs included labor costs for various shelter staff for each of the city's shelters. The following table summarizes claimed costs by fiscal year:

	Fiscal Year								
Holding Period	1998-99	1999-2000	2000-01	2001-02	2002-03	2005-06	2006-07	2007-08	Totals
Claimed Costs:

Audit ID # S09-MCC-055
Status Meeting, Preliminary Findings

Allowable Costs

Hours of Operation

The city provided documentation identifying hours of operation. All shelters in the city operate on the same schedule and stay open to the public 6 days a week (excluding Mondays) from 8 am till 5 pm. Thus, as per the requirement of the mandate, each shelter makes animals available for owner redemption or adoption on either of the weekend days.

Staffing Requirements

For agencies using the holding period of four business days after the day of impoundment, we needed to determine the additional costs incurred to have the impounded animals available for owner redemption or adoption. In order to determine the additional staffing requirements, the auditor inquired about the number of employees and classifications of staff working when the shelter is closed to the public (Mondays) and the staffing needed to comply with the mandate and stay open during the increased hours (Saturdays).

When the shelter is closed to the public, animals must still be cared for and fed. Usually, most of the staff whose duties include caring for animals would be at the shelters regardless of whether the shelters were open to the public or not. Therefore, since the main duties of these employees are to care and maintain animals, these positions are generally not reimbursable for this cost component.

However, some positions are in fact reimbursable under this component depending on the increased staffing needs on those days when the shelter is open to the public. To demonstrate the increased staffing requirements for Saturdays, the city provided monthly working schedules for each shelter. After reviewing these schedules, we determined that the following additional employees were needed to comply with the mandate requirement and stay open during one weekend day.

- Animal Care Technicians (10 additional)
- Animal Care Technician Supervisor (1 additional)
- Front Counter Clerks (7 additional)

Allowable Annual Hours

Starting with FY 1999-2000, we calculated allowable annual hours the same way for every year by using the following formula:

Productive Rates X Weekly Hours (9) X 52 weeks

The following table summarizes the annual hours per employee classification needed to perform the mandated activities:

City of Los Angeles
Legislatively Mandated Animal Adoption Program
Fiscal Years 1998-99 through 2007-08 (excluding FY's 2003-04 and 2004-05)
Audit ID # S09-MCC-055
Status Meeting, Preliminary Findings

Employee Classification	# of Eligible Employees	Allowable Weekly Hours	Allowable Annual Hours
Animal Care Technicians	10	9	4,680
ACT Supervisor	1	9	468
Front Counter Clerks	7	9	3,276
			8,424

In FY 1998-99, the reimbursement period for this cost component began in January 1999. Accordingly, we reduced allowable annual hours by half for this fiscal period.

Preliminary Finding

Using calculations noted above, we arrived at the following allowable costs for this component:

Holding Period	Fiscal Year								Totals
	1998-99	1999-2000	2000-01	2001-02	2002-03	2005-06	2006-07	2007-08

Non-Medical Records Costs

Reimbursement Criteria

The parameters and guidelines allow reimbursement, beginning January 1, 1999, for maintaining non-medical records on animals that are either taken up, euthanized after the holding period, or impounded. Such records shall include the following:

1. The date the animal was taken up, euthanized, or impounded;
2. The circumstances under which the animal is taken up, euthanized, or impounded;
3. The names of the personnel who took up, euthanized, or impounded the animal; and
4. The final disposition of the animal, including the name of the person who euthanized the animal or the name and address of the adopting party.

Claimed Costs

The city claimed \$647,632 under the cost component of Non-Medical Records for the audit period. For the first three years of the audit period, FY's 1998-99 through 2000-01, the city claimed hours for a Veterinary Assistant to input non-medical information on each animal. Specifically, the city claimed 20 minutes per each record in each fiscal year. Starting in FY 2001-02 till the end of the audit period in FY 2007-08, the city revised its claiming methodology and started claiming 5 minutes per each record for the Animal Care Technicians to input non-medical records in every year. Lastly, in the last year of the audit period FY 2007-08, the city also included time for the Sr. Systems Analyst I to maintain animal information systems and the department's website.

The following table summarizes claimed costs by fiscal year:

	Fiscal Year								
Non-Med Rec	1998-99	1999-2000	2000-01	2001-02	2002-03	2005-06	2006-07	2007-08	Totals

Status Meeting, Preliminary Findings

Allowable Costs

Time Records:

We reviewed the city's time study conducted in FY 2002-03. The time study included various activities including "Initial Impound" of animals. After completion of the time study, the city started claiming 5 minutes per non-medical record keeping for Animal Care Technicians.

We reviewed the copy of the time study for this component and determined that the average time increments recorded in the time study were rounded up to the nearest minute. We recalculated the results of the time study for this component and arrived at an actual average increment of 4.40 minutes per record. This is a material difference considering that the time study results are applied to thousands of records each year.

However, we will take an adjustment from the 5 minutes per record that was claimed to the actual 4.40 minutes that was supported by the time study. In addition to the intake information, the component of non-medical records also allows for reimbursement the activity of noting the outcome of the animal. Because the time study did not record this short activity, we will allow the claimed 5 minutes per record to account for some additional time to note the animals' outcome / disposition.

Eligible Records:

Eligible records usually include any non-medical record that was created for any animal throughout the audit period. We were able to retrieve this information from the Chameleon database by checking the number of eligible animals that came into the city's shelters in each fiscal year. We concluded that the city under claimed the number of eligible records in all fiscal years of the audit period. The city only claimed records for animals that died or were euthanized, but the mandated program allows reimbursement for maintaining non-medical records on all animals regardless of the outcome.

Preliminary Findings

Eligible Records:

We were able to retrieve Chameleon intake information going back to FY 2000-01. Chameleon statistics were not available for the first two years of the audit period. To determine eligible number of records for the early years of the audit period (FY 1998-99 and 1999-00), we calculated an average number of records from FY 2000-01 and 2001-02. Furthermore, we accounted for only half of the total records in FY 1998-99, because reimbursement begins in January 1999 for this component.

The summary of eligible records is illustrated below:

Status Meeting, Preliminary Findings

Necessary and Prompt Veterinary Care Costs

Reimbursement Criteria

The parameters and guidelines allow reimbursement, beginning January 1, 1999, for providing "necessary and prompt veterinary care" for stray and abandoned animals, other than injured cats and dogs given emergency treatment, that die during the holding period (through day 6) or are ultimately euthanized (after day 7) during the holding periods specified in Statutes of 1998, Chapter 752.

"Necessary and prompt veterinary care" means all reasonably necessary medical procedures performed by a veterinarian or someone under the supervision of a veterinarian to make stray or abandoned animals "adoptable." The following veterinary procedures, if conducted, are eligible for reimbursement:

- An initial physical examination of the animal to determine the animal's baseline health status and classification as "adoptable," "treatable," or "non-rehabilitatable."
- A wellness vaccine administered to "treatable" or "adoptable" animals.
- Veterinary care to stabilize and or relieve the suffering of a "treatable" animal.
- Veterinary care intended to remedy any applicable disease, injury, or congenital or hereditary condition that adversely affects the health of a "treatable" animal or that is likely to adversely affect the animal's health in the future, until the animal becomes "adoptable."

Eligible claimants are not entitled to reimbursement for providing "necessary and prompt veterinary care" to the following population of animals:

- Animals that are irremediably suffering from a serious illness or severe injury,
- Newborn animals that need maternal care and have been impounded without their mothers,
- Animals too severely injured to move or where a veterinarian is not available and it would be more humane to dispose of the animal,
- Owner relinquished animals, and
- Stray or abandoned animals that are ultimately redeemed, adopted, or released to a nonprofit animal rescue or adoption organization

Eligible claimants are not entitled to reimbursement for providing the following veterinary procedures:

- Emergency treatment given to injured cats and dogs,
- Administration of rabies vaccinations to dogs,
- Implantation of microchip identification,
- Spay or neuter surgery and treatment, and
- Euthanasia

City of Los Angeles
Legislatively Mandated Animal Adoption Program
 Fiscal Years 1998-99 through 2007-08 (excluding FY's 2003-04 and 2004-05)
 Audit ID # S09-MCC-055
 Status Meeting, Preliminary Findings

Claimed Costs

The city claimed \$3,004,399 under the cost component of Prompt and Necessary Veterinary Care for the audit period.

For the FY 1998-99, the city claimed 3% of the operating costs and included this amount under the component of Veterinary Care. For the FY's 1999-2000 through 2000-01, the city employed a similar methodology and allocated a portion of costs to provide treatments for the animals. Starting in FY 2001-02 through FY 2006-07, the city started claiming hours for a Veterinarian and a Veterinary Technician positions as well as costs for animal medical supplies. Specifically, the hours claimed included an average time to provide treatments to the animals. The city claimed 12 minutes per treatment in FY's 2001-02 through 2006-07. And lastly, for FY 2007-08, the city claimed costs based on the unit cost calculated for each animal treatment.

The following table summarizes claimed costs by fiscal year:

	Fiscal Year								
Vet Care	1998-99	1999-2000	2000-01	2001-02	2002-03	2005-06	2006-07	2007-08	Totals

Mater & Suppl	50,984	129,149	308,004	65,114	83,002	117,278	178,953	164,502	1,096,986
Total	\$ 50,984	\$ 129,149	\$ 308,004	\$ 362,220	\$ 295,545	\$ 638,014	\$ 566,175	\$ 654,308	\$ 3,004,399

Estimated Costs and Time Records

The claims for the first three years of the audit period (FY's 1998-99 through 2000-01) included estimated costs for the component of vet care. Only actual costs can be claimed for reimbursement and thus the estimated costs are not allowable.

During the course of the audit, the department performed a time study to capture average time increments spent for eligible veterinary care procedures in order to determine the actual costs incurred for this cost component. The claims for FY's 2001-02 through 2007-08 included labor costs that were based on the average time increments per animal treatment / procedure. We reviewed the city's time study completed in FY 2002-03 and determined that the time study for this component was not adequate

Time Study

The time study focused on recording animal non-routine medical procedures as opposed to repetitive activities. These procedures were not appropriate for the time study because they were unique in nature and duration of time spent. Furthermore, any non-routine medical procedure, that might have been reimbursable, could only be

City of Los Angeles
Legislatively Mandated Animal Adoption Program
Fiscal Years 1998-99 through 2007-08 (excluding FY's 2003-04 and 2004-05)
Audit ID # S09-MCC-055
Status Meeting, Preliminary Findings

claimed for the animals that either died or were euthanized within the eligible period of time. Thus these types of expenses would need to be traced on case by case basis.

Our review also indicated that some emergency treatments were also included in the time study as well as microchip implantation procedures and euthanasia procedures, all of which are excluded activities under this component.

The two repetitive tasks that are appropriate for a time study under this cost component include performing an initial physical examination to determine the animal's baseline health status and classification as adoptable, treatable, or non-rehabilitatable and administering wellness vaccines to treatable or adoptable animals. We advised the department of the possibility to perform a new time study to capture these two repetitive and eligible procedures.

Animal Medical Supplies Costs

We need to determine to what extent the medical materials and supplies costs claimed in FY's 2001-02 through 2007-08 relate to the allowable medical procedures outlined within this component. In addition, we also need to determine to what extent these costs relate to only eligible population of animals.

We haven't seen any invoices yet to demonstrate what specific items were claimed and to what extent they relate to the reimbursable activities and population of animals.

Preliminary Finding

We determined from our preliminary review that all labor costs, including salaries, benefits, and indirect costs, totaling \$1,907,413 are not allowable for reimbursement at this time. These costs included estimated costs and ineligible costs and were partially based on the time study that was not adequate for this component. Once the department performs the new time study, we will revise our finding accordingly.

The claimed materials and supplies costs are still under review. Once the city provides invoices for claimed medical equipment and/or supplies, we will determine the extent of these costs that are reimbursable. Total vet care materials and supplies costs under review totals \$1,096,986 for the audit period.

Fringe Benefit Rates and Indirect Cost Rates

The city claimed fringe benefit rates and indirect cost rates that were specified in the city's annual Cost Allocation Plans. We received and reviewed copies of the city's Cost Allocation Plan for each of the fiscal years within the audit period. We did not note any adjustments to the fringe benefit rates. However, we noted some discrepancies with the indirect cost rates.

City of Los Angeles
Legislatively Mandated Animal Adoption Program
Fiscal Years 1998-99 through 2007-08 (excluding FY's 2003-04 and 2004-05)
Audit ID # S09-MCC-055
Status Meeting, Preliminary Findings

We noted that the claims understated indirect cost rates in the first three years of the audit period (FY 1998-99 through 2001-01). The understatement occurred because the city did not combine its Central Services Rate with Departmental Administration and Support Rate. As a result, the indirect cost rates entailed a positive adjustment in these three years of the audit period. The adjustments are noted as follows:

Indirect Cost Rates	Fiscal Year							
	1998-99	1999-2000	2000-01	2001-02	2002-03	2005-06	2006-07	2007-08

Audit Adjustment	56.25%	56.14%	66.61%	0.00%	0.00%	0.00%	0.00%	0.00%

Productive Hourly Rates

We received and were able to analyze the actual payroll summaries for all classifications of employees included in the claims for the last three years of the audit period (FY's 2005-06 through 2007-08). However, the actual pay information was not available for the earlier five years of the audit period. We were able to utilize a consumer price index to deflate the amounts paid for labor in prior years. We used our audited rates in calculation of allowable costs.

Audited Chameleon Animal Census Information

We reviewed the animal census data from Chameleon for FY's 2000-01 through 2007-08. We calculated total annual census for each year and determined the eligible number of animals per fiscal year. We excluded all exceptions noted in the parameters and guidelines and eliminated erroneous entries. For the earlier two years when Chameleon statistics was not available, we were able to use the average data from animal statistics available for FY's 2000-01 and 2001-02. The animal census data will be used to calculate allowable care and maintenance costs once the city provides other outstanding documents for this component.

The summary of animal census analysis is noted below:

Subject: RE: Clarification of Allowable Animals for Intake Report
Attachments: LA AA Chameleon Data Details - 10-28-10.docx [3 pages]

Dara

I put together a brief overview of the Chameleon data analysis. The attached word document includes a listing of the categories of animals we excluded from the eligible population. Please review the attached document and let me know if you have any follow up questions.

As for the intake report statistics, I don't think you should go to that same detail and account for all the exceptions. We will use the intake statistics for the non-medical records component to see the percentage of animals that come from the field as opposed to over the counter. And because non-medical records component is not concerned with any exceptions in the population and allows intake of information on all animals regardless of exceptions, I only need to know the percentage of all animals that come from the field or over the counter.

Let me know if that makes sense.

Thank you for all your input,

Subject: Clarification of Allowable Animals for Intake Report

Hi Masha,

Hope you had a good flight back home. I started working on separating the intake reports I sent you back in July into animals brought in by officers and those impounded at the shelters and I realized I need to exclude some animals that you are not allowing so the counts make sense. Would you please send me a list of the specific categories you excluded so, hopefully, my counts will be close to the allowable totals?

Thanks,
Dara

Details about Chameleon Data

Animal Census Data

The Animal Services Department was able to provide the actual animal census information from their Chameleon tracking system for FY's 2000-01 through 2007-08. We calculated the annual census information from the animal data provided. The yearly census refers to the total number of days that all animals were housed in the shelter.

Exclusions:

The only two exclusions noted in this category were the animals that came in DOA (Dead on Arrival or Body Disposition) and Missing. We did not count DOA animals as part of the annual census because no costs were incurred to care for them. And we did not count Missing animals as part of the annual census because their holding period was unknown.

Input Errors:

In addition, during our analysis of the annual census information, we noted some input errors relating to dates. Some animal entries showed a negative holding period or extraordinarily long holding periods (exs. 10 years). Because these input errors were very obvious, we either eliminated these animals from the population or changed the incoming or outgoing dates in those cases which were obvious to fix.

Eligible Animal Population

The eligible animal population for dogs and cats and other animals was determined by manipulating the Chameleon data and taking into account all exclusions as per the requirement of the mandated program. The following animals were excluded from the population of eligible animals:

- Dogs and cats and other animals that were owner surrendered or previously owned (only stray animals were included in the eligible population);
- Dogs and cats and other animals that were ultimately adopted, transferred, rescued, or redeemed (only those animals with the outcome of "died" or "euthanized" were reviewed);
- Dogs and cats and other animals that went missing in their kennels, were stolen, or escaped;
- Dogs and cats and other animals that were dead on arrival;
- Dogs and cats and other animals that were euthanized as requested by owners of if euthanasia was required / requested ("Dispo Req" or "Euth Req");
- Dogs and cats and other animals that were euthanized for humane reasons (usually on day 1);
- Dogs and cats and other animals that were suffering from a serious illness or severe injury (usually they were euthanized on day 1 or died on day 1);
- Dogs and cats and other animals that were babies and died as a result of not being weaned from their mothers (usually they died or were euthanized within the first few days, the excluded categories included "Unweaned" or "8 weeks unsustainable");
- Ineligible other animals such as rodents, livestock, or wild animals;
- Ineligible birds, such as pigeons, doves, ducks, chickens, owls, pheasants, mallards, gamefowls;

Audit ID # S09-MCC-055
Details about Chameleon Data

- Dogs and cats that died in the shelter's kennels outside of increased holding period (days 1, 2, 3, and day 7 and beyond), as per the requirements of the mandate. {Note - Local agencies are eligible to receive reimbursement to care for dogs and cats that *died during the increased holding period* (days 4, 5, and 6)};
- "Other" animals that died in the shelters' kennels on day 7 and beyond (after the increased holding period). {Note - Local agencies are eligible to receive reimbursement to care for other animals that *died during the increased holding period* (days 2, 3, 4, 5, and 6)}; and
- Dogs and cats as well as other animals that were euthanized during the holding period, as per the requirements of the mandate. The agencies are eligible to receive reimbursement to care for dogs and cats and other animals that were *euthanized after the holding period* (days 7 of the holding period and beyond).

Subject: RE: City of Los Angeles Animal Adoption updates

Good morning Linda, John, Dara

I just wanted to check in with you and see whether we are getting any closer in getting the rest of the documents that were requested. In particular, we are still waiting for the Materials and Supplies expenses for the Care and Maintenance portion of the claims. Furthermore, we've discussed the Chameleon software analysis to determine the portion of the software that is attributed to reimbursable activities. And lastly, I was hoping we can review documents relating to materials and supplies claimed for the Veterinary Care Component as well.

I realize that the busy holiday season is upon us. And thus we should probably have a timeline in mind. At this point, we need to set a deadline for the documents requested and then move forward to having an exit meeting. Let's set the deadline for providing documents in about 2 weeks for December 10th, 2010.

Also, let's start thinking about the tentative dates for the exit meeting. I suggest waiting till after the holidays. We can hold an exit meeting right after the New Year's holidays. Let me know what day would work best for you during the first week of January, 2011.

Thank you for everyone's assistance and input with this audit.

Hello everyone

I wanted to say thank you for everyone's assistance during the 2nd week of fieldwork that took place on October 18th through October 21st, 2010. I am sending for your review the electronic copy of the handout I provided to all of you during our status meeting on October 19th, summarizing the preliminary findings we have so far. I am also including a brief update that I prepared at the end of last week, summarizing what we were able to accomplish last week and what is still outstanding.

Please let me know if you have any questions. If the department is able to provide the rest of the documents within the next week or two, we'll be ready to hold an exit conference sometime in December.

Once again, Thank you all for your time and assistance with this audit,

Masha Vorobyova

Thanks for the update. That would be great if we can wrap it up next week.

Regarding the pro rate of Chameleon cost, yes, we'd like to receive a percentage and the reasoning. I believe Dara knows what we're looking for. We've discussed it briefly during our 2nd week of fieldwork. I think Dara is working on her analysis of the Chameleon screens and their descriptions as well as what portion of them or which screens in particular relate to the mandated activities.

Let me know if you have further questions.

Happy Thanksgiving!

Happy Thanksgiving!

We have had some logistical challenges in getting samples of material and supply invoices for both care/maintenance and veterinary but should be able to wrap that up next week.

Regarding the pro rate of Chameleon cost attributable to the mandate, are you looking for us to provide a percentage and our reasoning?

Finally, on dates. So far, the first week of January seems workable.

Subject: City of Los Angeles Animal Adoption Findings Draft
Attachments: Los Angeles AA Audit Findings, draft.doc

Linda

I'm currently working on wrapping up all the calculations and write up for the city of LA AA audit. I am sending a very rough draft of my write up for your review. You'll be able to see most of the findings that we've formulated and talked about this far. Some of the calculations have not been completed yet. In particular, the software equipment costs and procuring equipment costs have not been pro-rated due to the lack of your suggested percentage. In addition, the care and maintenance costs have been computed based on the labor expenditures and did not account for any materials and supplies related to care and maintenance. As for all other components, the numbers are fairly solid.

As for the construction and remodeling costs associated with Prop F, we'll be adding a section in our Exit Handout to address this issue.

The audit might still entail a few revisions during our review process and we might change a few minor things along the way. But I wanted to have this draft out in the open, so that you can start anticipating our up-coming discussions during the exit meeting. Keep in mind, this is my very first and very rough draft. We'll present supplemental schedules and handouts during the exit meeting along with our updated/revised handout.

I'll double check my schedule for the first week of January. Most likely, we'll be scheduling our exit meeting for Thursday of that week (1/6/11).

Let me know if you have any questions. I'm here in the office next week and might be taking a few days off before the New Year's.

Thank you and best holiday wishes!

Re: Audit of Mandated Cost Claims for Animal Adoption Program
For the Period of July 1, 1998, through June 30, 2008

Dear Ms. Chick:

This letter confirms that Toni Cellini has scheduled an audit of City of Los Angeles' legislatively mandated Animal Adoption Program cost claims filed for fiscal year (FY) 1998-99, FY 1999-2000, FY 2000-01, FY 2001-02, FY 2002-03, FY 2005-06, FY 2006-07, and FY 2007-08. Government Code sections 12410, 17558.5, and 17561 provide the authority for this audit. The entrance conference is scheduled for Tuesday, May 26, 2009, at 2:00 p.m. We will begin audit fieldwork after the entrance conference.

Please furnish working accommodations for and provide the necessary records (listed on the Attachment) to the audit staff. If you have any questions, please call me at (916) 324-6788.

Sincerely,

JOHN H. COBBINAH, Audit Manager

2006-2007, and 2007-2008

City of Los Angeles, Claimant

Dear Ms. Yutan, Mr. Burdick, and Mr. Spano:

This letter is a request that the parties supplement the record of the above-captioned Incorrect Reduction Claim by filing with the Commission on State Mandates (Commission) evidence of the payment for the *Animal Adoption* program for fiscal years 1998-1999, 1999-2000, and 2000-2001. Documentation of payments made from the state to the claimant should include the amount paid, the fiscal year which the payment is intended to satisfy, and the date of the payment. Please include any notices of payment action.

Any written representations of fact (except for records of regularly conducted activity and other public records requested above) submitted to the Commission must be signed under penalty of perjury by persons who are authorized and competent to do so and must be based upon the declarant's personal knowledge or information or belief. (Cal. Code Regs., tit. 2, 1187.5(b).)

Please provide these documents as soon as possible but not later than **Friday, June 17, 2016**.

The Commission's regulations require that written materials filed with the Commission be simultaneously served on all parties, interested parties, and interested persons on the mailing list, and accompanied by a proof of service. (Cal. Code Regs., tit. 2, 1181.3) However, this requirement may be satisfied by electronically filing your documents via the Commission's e-filing system. Please see http://www.csm.ca.gov/dropbox_procedures.php on the Commission's website. The written material will be posted on the Commission's website and the mailing list will be notified by electronic mail of the posting. This procedure will satisfy all the service requirements pursuant to section 1181.3 of the Commission's regulations.

Sincerely,

Heather Halsey
Executive Director

DECLARATION OF SERVICE BY EMAIL

I, the undersigned, declare as follows:

I am a resident of the County of Sacramento and I am over the age of 18 years, and not a party to the within action. My place of employment is 980 Ninth Street, Suite 300, Sacramento, California 95814.

On June 6, 2016, I served the:

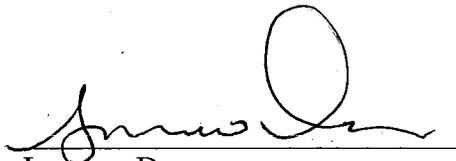

Request for Additional Information

Animal Adoption, 13-9811-I-02

Civil Code Sections 1834 and 1846; Food and Agriculture Code sections 31108, 31752, 31752.5, 31753, 32001, and 32003; As Added or Amended by Statutes 1998, Chapter 752; Amended Pursuant to Statutes 2004, Chapter 313 (AB 2224); and by Request of the State Controller's Office Fiscal Years 1998-1999, 1999-2000, 2000-2001, 2001-2002, 2002-2003; 2005-2006, 2006-2007, and 2007-2008
City of Los Angeles, Claimant

By making it available on the Commission's website and providing notice of how to locate it to the email addresses provided on the attached mailing list.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct, and that this declaration was executed on June 6, 2016 at Sacramento, California.

Dear Ms. Halsey:

The State Controller's Office (SCO) is transmitting additional information for the above-referenced IRC requested by the Commission in a letter dated June 6, 2016.

The Commission requested that the SCO provide evidence of the payment for the Animal Adoption program for fiscal year (FY) 1998-99, FY 1999-2000, and FY 2000-01. The requested information is attached.

If you have any questions, please contact me by telephone at (916) 323-5849.

Sincerely,

JIM L. SPANO, Chief
Mandated Cost Audits Bureau
Division of Audits
State Controller's Office

Dear Mr. Burdick, Ms. Yutan, and Ms. Kanemasu:

The Draft Proposed Decision for the above-captioned matter is enclosed for your review and comment.

Written Comments

Written comments may be filed on the Draft Proposed Decision by **September 15, 2016**. You are advised that comments filed with the Commission on State Mandates (Commission) are required to be simultaneously served on the other interested parties on the mailing list, and to be accompanied by a proof of service. However, this requirement may also be satisfied by electronically filing your documents. Refer to http://www.csm.ca.gov/dropbox_procedures.php on the Commission's website for electronic filing instructions. (Cal. Code Regs., tit. 2, § 1181.3.)

If you would like to request an extension of time to file comments, please refer to section 1187.9(a) of the Commission's regulations.

Hearing

This matter is set for hearing on **Friday, October 28, 2016**, at 10:00 a.m., State Capitol, Room 447, Sacramento, California. The proposed decision will be issued on or about October 14, 2016. Please let us know in advance if you or a representative of your agency will testify at the hearing, and if other witnesses will appear. If you would like to request postponement of the hearing, please refer to section 1187.9(b) of the Commission's regulations.

Sincerely,

Heather Halsey
Executive Director

City of Los Angeles, Claimant

EXECUTIVE SUMMARY

Overview

This Incorrect Reduction Claim (IRC) addresses reductions made by the State Controller's Office (Controller) to reimbursement claims made by the City of Los Angeles (claimant) for costs incurred during fiscal years 1998-1999, 1999-2000, 2000-2001, 2001-2002, 2002-2003, 2005-2006, 2006-2007, and 2007-2008, under the *Animal Adoption* program.

The following reductions are in dispute:

- Reductions of care and maintenance costs (Finding 3) based on budgeted expenditures claimed in lieu of documented actual costs, claimed expenditures unrelated to care and maintenance, and understated animal census data, resulting in an overstatement of costs per animal per day; overstatement of the population of eligible animal population, based on the exclusions from reimbursement expressed in the Parameters and Guidelines; and adjustment to the number of reimbursable days based on excluding Saturday as a business day in accordance with *Purifoy v. Howell* (2010) 183 Cal.App.4th 166;
- Reductions of salaries and benefits for the increased holding period (Finding 4) based on employee hours that the claimant did not support as being related to the mandate;
- Reductions of necessary and prompt veterinary care costs (Finding 7) based on claiming estimated materials and supplies costs, and unsupported materials and supplies costs; and based on misstated and unallowable hours.

In addition, the claimant raises two issues that do not directly relate to the Controller's audit findings. First, the claimant alleges that reimbursement is required for the construction of new facilities to comply with the mandate, which were paid for by taxpayer-approved bonds, to be repaid from local property assessments. The claimant argues that the Controller inappropriately determined that because the claimant's general fund revenues were not applied to the construction costs alleged, the claimant cannot assert "costs mandated by the state," within the

meaning of Government Code section 17514, and reimbursement is not required.¹ The Controller notes that construction or space acquisition costs were never claimed during the audit period, and only raised during the pendency of the audit report.² And second, the claimant argues that it was denied the necessary time to comply with the requirements of the audit because the Controller placed the audit on hold for nine months “which left the City having to assemble documentation for a huge operation with less time than was provided by law.”³

Staff finds, as detailed below, that some of the reductions are incorrect as a matter of law, or are arbitrary, capricious, or entirely lacking in evidentiary support and, thus, recommends that the Commission partially approve this IRC.

The Animal Adoption Program

The *Animal Adoption* program arose from amendments to the Civil Code and Food and Agriculture Code made by Statutes 1998, chapter 752 (SB 1785⁴). The purpose of the test claim statute was to carry out the state policy that “*no adoptable animal* should be euthanized if it can be adopted into a suitable home” and “*no treatable animal* should be euthanized.”⁵ Generally, the program increases the holding period to allow for the adoption and redemption of stray and abandoned dogs, cats, and other specified animals before the local agency can euthanize the animal, and requires:

- verification of the temperament of feral cats;
- posting of lost and found lists;
- maintenance of records for impounded animals; and
- that impounded animals receive “necessary and prompt veterinary care.”

On January 25, 2001, the Commission partially approved the Test Claim, for the increased costs in performing the following activities only:

1. Providing care and maintenance during the increased holding period for impounded dogs and cats that are ultimately euthanized. The increased holding period shall be measured by calculating the difference between three days from the day of capture and four business days from the day after impoundment, as specified below in 3 (a) and 3 (b), or six business days from the day after impoundment (Food & Agr. Code, §§ 31108, 31752);
2. Providing care and maintenance for four business days from the day after impoundment, as specified below in 3 (a) and 3 (b), or six business days from the day after

¹ Exhibit A, IRC, pages 15-16.

² Exhibit B, Controller’s Late Comments on the IRC, page 22.

³ Exhibit A, IRC, page 16.

⁴ Sometimes referred to as the Hayden Bill.

⁵ Civil Code section 1834.4, Penal Code section 559d, and Food and Agricultural Code section 17005 as added or amended by Statutes 1998, chapter 752.

impoundment, for impounded rabbits, guinea pigs, hamsters, pot-bellied pigs, birds, lizards, snakes, turtles, or tortoises legally allowed as personal property that are ultimately euthanized (Food & Agr. Code, § 31753);

3. For dogs, cats, and other specified animals held for four business days after the day of impoundment, either:
 - (a) Making the animal available for owner redemption on one weekday evening until at least 7:00 p.m., or one weekend day; or
 - (b) For those local agencies with fewer than three full-time employees or that are not open during all regular weekday business hours, establishing a procedure to enable owners to reclaim their animals by appointment at a mutually agreeable time when the agency would otherwise be closed (Food & Agr., Code §§ 31108, 31752, and 31753);
4. Verifying whether a cat is feral or tame by using a standardized protocol (Food & Agr. Code, § 31752.5);
5. Posting lost and found lists (Food & Agr. Code, § 32001);
6. Maintaining records on animals that are not medically treated by a veterinarian, but are either taken up, euthanized after the holding period, or impounded (Food & Agr. Code, § 32003); and
7. Providing “necessary and prompt veterinary care” for abandoned animals, other than injured cats and dogs given emergency treatment, that are ultimately euthanized (Civ. Code, §§ 1834 and 1846).

The Commission adopted the Parameters and Guidelines for this program on February 28, 2002. Those Parameters and Guidelines, in addition to the activities identified in the Test Claim Decision, as described above, provide reimbursement for one-time activities of developing policies and procedures; training; and developing or procuring computer software for maintaining records; as well as ongoing costs for:

- Acquisition of additional space or construction of new facilities, by purchase or lease, to provide appropriate or adequate shelter necessary to comply with the mandated activities during the increased holding period for impounded stray or abandoned dogs, cats, and other animals;⁶ and
- Remodeling/renovating existing facilities to provide appropriate or adequate shelter necessary to comply with the mandated activities during the increased holding period for impounded stray or abandoned dogs, cats, and other animals.⁷

On March 12, 2003, the Joint Legislative Audit Committee authorized an audit of the *Animal Adoption* mandate, which was completed by the Bureau of State Audits on October 15, 2003. The audit report recommended that the Legislature direct the Commission to amend the

⁶ Exhibit X, Parameters and Guidelines, adopted February 28, 2002, page 3.

⁷ Exhibit X, Parameters and Guidelines, adopted February 28, 2002, page 5.

Parameters and Guidelines for the *Animal Adoption* mandate to correct the formula for determining the reimbursable portion of acquiring additional shelter space. In 2004, Assembly Bill (AB) 2224 (Stats. 2004, ch. 313) was enacted to direct the Commission to amend the Parameters and Guidelines for the *Animal Adoption* program to:

1. Amend the formula for determining the reimbursable portion of acquiring or building additional shelter space that is larger than needed to comply with the increased holding period to specify that costs incurred to address preexisting shelter overcrowding or animal population growth are not reimbursable.
2. Clarify how the costs for care and maintenance shall be calculated.
3. Detail the documentation necessary to support reimbursement claims under this mandate, in consultation with the Bureau of State Audits and the Controller's office.

On January 26, 2006, the Commission adopted the amended Parameters and Guidelines, applicable to claims beginning July 1, 2005, in accordance with AB 2224, to require, among other things, contemporaneous source documents to show the validity of costs claimed and their relationship to the reimbursable activities. The 2006 amendment also amended the formula for determining the reimbursable portion of acquiring or building additional shelter space and clarified the definition of “average daily census” of dogs and cats, for purposes of the formula used to calculate care and maintenance costs; this amendment is clarifying only, and does not affect the methodology used to calculate actual costs for this component.⁸

Procedural History

On September 4, 2002, claimant signed its initial reimbursement claims for fiscal years 1998-1999, 1999-2000, and 2000-2001.⁹ On August 3, 2006, the Controller made initial payments on the fiscal years 1999-2000 and 2000-2001 claims.¹⁰ On August 10, 2006, the Controller made initial payment on the fiscal year 1998-1999 reimbursement claim.¹¹ On April 28, 2009, an audit entrance conference was held.¹² On April 6, 2011, the Controller issued the final audit report.¹³ On April 7, 2014, claimant filed the IRC.¹⁴ On September 8, 2015, the Controller filed late comments on the IRC.¹⁵ On June 6, 2016, Commission staff issued the Request for Additional

Information. On June 9, 2016, the Controller filed the response to the request for additional information.¹⁶

Commission staff issued the Draft Proposed Decision on August 25, 2016.¹⁷

Commission Responsibilities

Government Code section 17561(d) authorizes the Controller to audit the claims filed by local agencies and school districts and to reduce any claim for reimbursement of state-mandated costs that the Controller determines is excessive or unreasonable.

Government Code Section 17551(d) requires the Commission to hear and decide a claim that the Controller has incorrectly reduced payments to the local agency or school district. If the Commission determines that a reimbursement claim has been incorrectly reduced, section 1185.9 of the Commission's regulations requires the Commission to send the decision to the Controller and request that the costs in the claim be reinstated.

The Commission must review questions of law, including interpretation of parameters and guidelines, de novo, without consideration of legal conclusions made by the Controller in the context of an audit. The Commission is vested with exclusive authority to adjudicate disputes over the existence of state-mandated programs within the meaning of article XIII B, section 6.¹⁸ The Commission must also interpret the Government Code and implementing regulations in accordance with the broader constitutional and statutory scheme. In making its decisions, the Commission must strictly construe article XIII B, section 6 and not apply it as an "equitable remedy to cure the perceived unfairness resulting from political decisions on funding priorities."¹⁹

With regard to the Controller's audit decisions, the Commission must determine whether they were arbitrary, capricious, or entirely lacking in evidentiary support. This standard is similar to the standard used by the courts when reviewing an alleged abuse of discretion of a state agency.²⁰

The Commission must also review the Controller's audit in light of the fact that the initial burden of providing evidence for a claim of reimbursement lies with claimant.²¹ In addition, sections 1185.1(f)(3) and 1185.2(c) of the Commission's regulations require that any assertions of fact by

the parties to an IRC must be supported by documentary evidence. The Commission’s ultimate findings of fact must be supported by substantial evidence in the record.²²

Claims

The following chart provides a brief summary of the claims and issues raised and staff’s recommendation.

Issue	Description	Staff Recommendation
<p>The Controller’s exclusion of “ineligible animals” when auditing allowable costs for care and maintenance (Finding 3) and necessary and prompt veterinary care (Finding 7).</p>	<p>The Parameters and Guidelines authorize local agencies to claim reimbursement for the cost of care and maintenance and prompt and necessary veterinary care for impounded stray or abandoned animals that “die during the increased holding period or are ultimately euthanized.” The Controller excluded from the population of “eligible animals” several categories of animals it claims are not within the scope of the mandated program, which resulted in a reduction of costs. The exclusions include, but are not limited to, the following:</p> <ul style="list-style-type: none"> • “Ineligible other animals such as rodents, livestock, or wild animals;” and ineligible birds, such as pigeons, doves, ducks, chickens, owls, pheasants, mallards, and gamefowls.” • Animals deemed treatable upon arrival at the shelter and later euthanized during the increased holding period because they became non-rehabilitatable. • Animals that may have been euthanized during the holding period because of the claimant’s misinterpretation of the required holding period in conflict with the Court of Appeal’s decision in <i>Purifoy v. Howell</i> (2010) 183 Cal.App.4th 166, which held that Saturday is not a “business day” for purposes of 	<p>Partially Correct – The Controller’s exclusion of eligible animals is correct as a matter of law, except for the following exclusions, which are incorrect as a matter of law and are arbitrary, capricious, or entirely lacking in evidentiary support:</p> <ul style="list-style-type: none"> • The exclusion of specified “birds” and “other animals” legally allowed as personal property and, thus subject to the protection of the mandated activities. • The exclusion of animals deemed treatable upon arrival at the shelter and later euthanized during the increased holding period because they became non-rehabilitatable. • Exclusions of “eligible animals” held for the required duration under <i>Purifoy</i>, based on the Controller’s recalculation of costs using an <i>average</i> number of days.

²² Government Code section 17559(b), which provides that a claimant or the state may commence a proceeding in accordance with the provisions of section 1094.5 of the Code of Civil Procedure to set aside a decision of the Commission on the ground that the Commission’s decision is not supported by substantial evidence in the record.

	calculating the required holding period before an animal can be adopted or euthanized.	
The remaining reductions made in Finding 3 to care and maintenance costs claimed.	The Controller determined that the claimant did not support its total annual costs claimed, based on estimated or otherwise unsupported expenditures reported; claimed inaccurate animal census data; and incorrectly claimed the number of reimbursable days, based on <i>Purifoy</i> , which the Controller reexamined and calculated as an average.	Correct – The Controller’s reductions on the basis of estimated or unsupported costs claimed for care and maintenance are correct as a matter of law and not arbitrary, capricious, or entirely lacking in evidentiary support. The Controller’s adjustments to the yearly animal census data and to the number of reimbursable days do not result in a reduction of costs, and therefore the Commission does not have jurisdiction to determine these issues.
Reductions made in Finding 4 to increased holding period costs.	The Controller reduced salaries and benefits claimed for making animals available for owner redemption or adoption on Saturdays, finding that the increased staffing required to comply with the mandate is only that which exceeds the minimum level of staffing required for a day which the shelters were not open.	Correct – The approved activity is to make animals available for adoption or owner redemption; the Controller’s limitation of reimbursement is consistent with the Parameters and Guidelines and the purpose of the test claim statute. Thus, the adjustments are correct as a matter of law. In addition, there is no evidence in the record to support a finding that the Controller’s decisions were arbitrary or capricious.
The remaining reductions made in Finding 7 to necessary and prompt veterinary care.	The Controller reduced costs claimed for necessary and prompt veterinary care on the basis of an inadequate time study, estimated and unsupported materials and supplies costs, and misstated and unallowable hours claimed.	Correct – The claimant has the burden to support costs claimed by documentation that shows the validity of the costs and their relationship to the mandate; absent such a showing, the Controller’s reductions are correct as a matter of law.

Claimant's request to be reimbursed for construction and facilities acquisition costs.	The claimant sought reimbursement during the course of the audit for construction costs that were not previously claimed in the annual reimbursement claims, and which were paid for by bonds issued by the claimant and repaid by property assessments.	Deny – The costs alleged were not timely claimed and, in any case, the claimant does not experience costs mandated by the state where required activities are funded by other than proceeds of taxes.
Claimant's charge that it did not have sufficient time to respond to the audit and all reductions should be reinstated.	Claimant asserts that the Controller's change in audit staff, which resulted in a nine month hold during the pendency of the audit, denied the claimant the time required by law, and that the claimant should not be expected to maintain documentation beyond the underlying record retention requirements of the Government Code.	Deny – The two year period to complete an audit is not an entitlement of the claimant; it is a time limitation on the Controller. Moreover, the Parameters and Guidelines require claimants to maintain supporting documentation until a claim is no longer subject to audit, independent of the background record retention requirements of the Government Code.

Staff Analysis

A. The Controller's Exclusions of What It Deems "Ineligible Animals" Are Partially Incorrect as a Matter of Law, and Are Arbitrary, Capricious, or Entirely Lacking in Evidentiary Support, Resulting in Some Incorrect Reductions In Findings 3 and 7 of the Audit Report.

The Parameters and Guidelines for the *Animal Adoption* program authorize local agencies to claim reimbursement for the costs of care and maintenance during the increased holding period for impounded stray or abandoned animals that "die during the increased holding period or are ultimately euthanized," based on a formula for determining actual costs. The Parameters and Guidelines also authorize reimbursement for providing necessary and prompt veterinary care as specified in the Parameters and Guidelines during the holding period for stray and abandoned animals that "die during the increased holding period or are ultimately euthanized." Claimants are to calculate and claim their costs for these activities in part by determining the number of "stray or abandoned animals that die during the increased holding period or are ultimately euthanized." The Controller calls this factor of the calculation "eligible animals" or "eligible animal population."

The Controller, in its audit of allowable costs for care and maintenance and necessary and prompt veterinary care, states that the following animals were excluded from the population of "eligible animals":

- Dogs and cats and other animals that were owner-surrendered or previously owned (only stray animals were included in the eligible population);

- Dogs, cats, and other animals that were ultimately adopted, transferred, rescued, or redeemed (only those animals with the outcome of “died” or “euthanized” were reviewed);
- Dogs, cats, and other animals that went missing from their kennels, were stolen, or escaped;
- Dogs, cats, and other animals that were DOA [dead on arrival];
- Dogs, cats, and other animals that were euthanized as requested by owners or if euthanasia was required/requested (“Dispo Req” or “Euth Req”);
- Dogs, cats, and other animals that were euthanized for humane reasons (usually on day 1);
- Dogs, cats, and other animals that were suffering from a serious illness or severe injury (usually euthanized on day 1 or died on day 1);
- Newborn animals that need maternal care and were impounded without their mothers (usually died or were euthanized within the first few days; the excluded categories included “Unweaned” or “8 weeks unsustainable”);
- Ineligible other animals such as rodents, livestock, or wild animals;
- Ineligible birds, such as pigeons, doves, ducks, chickens, owls, pheasants, mallards, and gamefowls;
- Dogs and cats that died in the shelter’s kennels outside of increased holding period (days 1, 2, 3, and day 7 and beyond), as per the requirements of the mandate. (Local agencies are eligible to receive reimbursement to care for dogs and cats that *died during the increased holding period* [days 4, 5, and 6]);
- “Other” animals that died in the shelters’ kennels on day 7 and beyond (after the increased holding period). (Local agencies are eligible to receive reimbursement to care for other animals that *died during the increased holding period* [days 2, 3 through 6].); and
- Dogs, cats, and other animals that were euthanized during the holding period as per the requirements of the mandate. The agencies are eligible to receive reimbursement to care for dogs and cats and other animals that were *euthanized after the holding period* (day 7 of the holding period and beyond).²³

Staff finds that these exclusions are correct as a matter of law, *except* as provided below.

1. Any reduction of costs relating to the Controller’s exclusion of specified “birds” and “other animals” “legally allowed as personal property” and thus subject to the protection of the mandated activities is incorrect as a matter of law and is arbitrary, capricious, and entirely lacking in evidentiary support.

²³ Exhibit A, IRC, pages 688-689 (pages 21 and 22 of the Audit Report).

The Controller excluded “[i]neligible other animals such as rodents, livestock, or wild animals;” and “[i]neligible birds, such as pigeons, doves, ducks, chickens, owls, pheasants, mallards, and gamefowls” from reimbursement, without any findings whether these animals can legally be owned as personal property. The test claim statute, however, mandates the claimant to hold rabbits. Rabbits may be classified as livestock,²⁴ pets,²⁵ or wild animals²⁶ depending on the breed and the owner. However, there are no findings or evidence in the record whether the Controller’s exclusion of “livestock” or “wild animals” included rabbits that are legally allowed as pets. The test claim statute also protects and mandates the local agency to hold guinea pigs and hamsters, which are classified as “rodents.”²⁷ However, the Controller excluded all rodents, without evidence of the type of rodents excluded or whether the rodent can legally be allowed as a pet.

Additionally, the test claim statute expressly requires local agencies to hold stray or abandoned “birds...legally allowed as personal property” pending adoption or redemption. The statute does not distinguish between types of birds required to be held, some of which may be poultry (e.g. chickens and ducks), pets,²⁸ or wild animals,²⁹ depending on the breed and owner. However, the Controller generally excluded “birds, such as pigeons, doves, ducks, chickens, owls, pheasants, mallards, and gamefowls,” without identifying any law rendering these birds illegal to possess as pets or specifying the birds actually held by the claimant.

Therefore, the Controller’s reduction of costs for care and maintenance (Finding 3) and necessary and prompt veterinary care (Finding 7) associated with the exclusion of “[i]neligible other animals such as rodents, livestock, or wild animals;” and “[i]neligible birds, such as

²⁴ “Livestock” is undefined in California law, but rabbits are listed as “specialty livestock” by the United States Department of Agriculture, See <https://www.nal.usda.gov/afsic/specialty-livestock>.

²⁵ See California Penal Code section: (“Pet animals” means dogs, cats, monkeys and other primates, *rabbits*, birds, guinea pigs, hamsters, mice, snakes, iguanas, turtles, and any other species of animal sold or retained for the purpose of being kept as a household pet.) Emphasis added.

²⁶ See, e.g. 50 Code of Federal Regulations Part 17, listing the riparian brush rabbit as an endangered species.

²⁷ See California Code of Regulations, Title 14, section 671(c)(6)(J)(1) b. and d. *excluding* from restriction under the “*order rodentia*,” among several other rodents, “domesticated races of golden hamsters of the species *Mesocricetus auratus* and domesticated races of dwarf hamsters of the Genus *Phodopus*” and domesticated races of guinea pigs of the species *Cavia porcellus*.” Emphasis added.

²⁸ See California Penal Code section 5971(c)(1): ““Pet animals’ means dogs, cats, monkeys and other primates, rabbits, *birds*, guinea pigs, hamsters, mice, snakes, iguanas, turtles, and any other species of animal sold or retained for the purpose of being kept as a household pet.” Emphasis added.

²⁹ Title 50 Code of Federal Regulations, section 21.13.

pigeons, doves, ducks, chickens, owls, pheasants, mallards, and gamefowls,” is incorrect as a matter of law and arbitrary, capricious, and entirely lacking in evidentiary support.

2. The exclusion of animals deemed treatable upon arrival at the shelter and later euthanized during the increased holding period because they became non-rehabilitatable, is incorrect as a matter of law.

The Controller excludes from reimbursement all costs incurred for the care and maintenance and prompt and necessary veterinary care of dogs, cats, and other animals that were euthanized *during* the increased holding period. The Controller states “agencies are eligible to receive reimbursement to care for dogs and cats and other animals that were *euthanized after the holding period*.”³⁰ The Controller bases its finding to exclude these animals on the plain language of the Parameters and Guidelines, which provides that local agencies are eligible to receive reimbursement for care and maintenance costs and for necessary and prompt veterinary costs only for those animals “that die during the increased holding period or are ultimately euthanized.” The Controller maintains that these costs are only eligible for reimbursement for those animals that die of natural causes during the increased holding period or are euthanized *after* the increased holding period. Thus, the Controller argues, if an animal is euthanized during the increased holding period, then no costs for that animal are eligible for reimbursement.

The Controller’s interpretation of the Parameters and Guidelines is not correct. The Parameters and Guidelines provide that local agencies are eligible to receive reimbursement for care and maintenance and prompt and necessary veterinary costs only for those animals “that die during the increased holding period or are ultimately euthanized.” The plain language of the phrase “animals that die during the increased holding period or are ultimately euthanized” is vague and ambiguous because the word “die” can include both death by natural causes and death by euthanasia. And the Parameters and Guidelines and the analyses adopted for the Parameters and Guidelines do not define what it means to “die” during the holding period.

Nevertheless, the decisions do *not* limit reimbursement to animals that die of natural causes during the increased holding period. Such a limitation would be contrary to the statutory scheme. Food and Agriculture Code sections 17005 and 17006 expressly contemplate an animal’s health changing over the course of impoundment and require a shelter to hold an animal which is ill or injured— but not an animal which is irremediably suffering — for the relevant holding period on the ground that the animal’s health may improve. In this respect, section IV. (B)(8) of the Parameters and Guidelines allows reimbursement for the initial physical examination of a stray or abandoned animal to determine the animal’s baseline health status and classification as “adoptable, treatable, or non-rehabilitatable.” The Parameters and Guidelines further authorize reimbursement for the administration of a wellness vaccine to “treatable” or “adoptable” animals, veterinary care to stabilize and/or relieve the suffering of a “treatable” animal, and veterinary care intended to remedy any applicable disease, injury, or congenital or hereditary condition that adversely affects the health of a “treatable” animal until the animal becomes “adoptable.” Even with veterinary care, the condition of the animal can change during

³⁰ Exhibit A, IRC, page 689.

the increased holding period and the animal can become non-rehabilitatable. If that occurs, the animal is not “adoptable” or “treatable” and may be euthanized under the law.

Therefore, to deny reimbursement for the costs incurred during the increased holding period for an animal that becomes non-rehabilitatable and that has to be euthanized during, but before the end of, the increased holding period conflicts with the test claim statute and the Parameters and Guidelines. Staff finds that reimbursement is required under these circumstances.

Therefore, to the extent the Controller’s reduction includes costs incurred for the care and maintenance and prompt and necessary veterinary costs of dogs, cats, and other animals that became non-rehabilitatable and were euthanized during, but before the expiration of, the increased holding period, the reduction is incorrect as a matter of law.

3. The Commission and the Controller are bound by the *Purifoy* decision and, thus, the Controller’s exclusion of animals that were euthanized too early because Saturday was counted as a business day for the required holding period, is also correct as a matter of law. However, the Controller’s recalculation of costs using an average number of reimbursable days is incorrect as a matter of law to the extent it results in an exclusion of “eligible animals” held for the time required under *Purifoy*.

As indicated above, the Controller excluded “dogs, cats, and other animals that were euthanized during the holding period as per the requirements of the mandate. Animals may have been euthanized during the holding period because of claimant’s misinterpretation of the required holding period in conflict with the Court of Appeal’s decision in *Purifoy*, which held that Saturday is not a “business day” for purposes of calculating the required holding period under the test claim statutes before a stray or abandoned dog can be adopted or euthanized.³¹ Before the decision was issued, many local agencies were operating under the assumption that Saturday was a “business day” that could be counted as part of the holding period, which resulted in the disposal of some animals at least one day too early.³² Pursuant to the *Purifoy* decision, the Controller excluded those animals from the number of “eligible animals that die during the holding period or are ultimately euthanized,” because they were disposed of at least one day too early.

Staff finds that the court’s interpretation of “business day” in *Purifoy* is binding, and that the Controller’s exclusion of Saturday as a business day when calculating the increased holding period is correct as a matter of law. Thus, except in the circumstances described below, the Controller’s exclusion of animals that were euthanized too early because Saturday was counted as a business day for the required holding period, is also correct as a matter of law.

However, when auditing and recalculating the number of reimbursable days pursuant to *Purifoy*, the Controller calculated an *average* increased holding period for all dogs and cats to be three days, and the average increased holding period for all other “eligible” animals to be six days, and did not state the total number of reimbursable days for each eligible animal. Even if the increased holding period averages three days for dogs and cats, or six days for other animals, the Parameters and Guidelines do not provide for reimbursement based on an average number of

³¹ *Purifoy v. Howell* (2010) 183 Cal.App.4th 166.

³² Exhibit B, Controller’s Late Comments on IRC, page 18.

days. Moreover, the Controller's recalculation may result in the exclusion of eligible animals that are correctly held under the law, but are euthanized during the Controller's defined "average" holding period. For example, as explained above, the Controller applied an increased holding period for dogs and cats of three days, after which the animal may be euthanized. However, if a stray or abandoned dog or cat is impounded on a Monday or Sunday, the actual increased holding period under the law is two calendar days, and not three days, and the dog or cat may be euthanized on day three (a day before the Controller's average and, thus, as "during the holding period" as defined by the Controller). Similarly, for "other animals," the Controller applied an increased holding period of six days. However, if a stray bird or rabbit is impounded on a Monday, the actual increased holding period under the law is four calendar days, and not six days, and the bird or rabbit may be euthanized on day five (a day before the Controller's average and, thus, "during the holding period" as defined by the Controller).

Under these circumstances, the Controller's recalculation and use of the average number of reimbursable days is incorrect as a matter of law to the extent it results in an exclusion of "eligible animals" correctly held under the law.

B. Except as Determined in Section A of This Decision, The Controller's Remaining Findings That Result in a Reduction of Costs for Care and Maintenance Under Finding 3 Are Correct as a Matter of Law and Not Arbitrary, Capricious, or Entirely Lacking in Evidentiary Support.

The Parameters and Guidelines provide for reimbursement of care and maintenance costs for impounded stray or abandoned animals that die during the increased holding period or are ultimately euthanized either by claiming actual costs or by performing a time study.³³ The claimant used the actual cost method, which is a formula that requires the eligible annual cost of care to be divided by the yearly census of animals to arrive at an average cost per animal per day. The cost per animal per day is then multiplied by the eligible number of animals and the number of increased holding period days. The factors relating to the number of eligible animals was discussed above in Section A. This section addresses the remaining findings that resulted in a reduction of costs for care and maintenance.

1. The Controller's reductions on the basis of estimated or otherwise unsupported costs claimed as part of the calculation of total annual costs for care and maintenance are correct as a matter of law and not arbitrary, capricious, or entirely lacking in evidentiary support.

The Parameters and Guidelines provide that the first step in calculating actual costs for care and maintenance is to identify the total annual cost of this component, including labor, materials, supplies, indirect costs, and contract services.³⁴ The Controller states that this claimant "used budgeted expenditure amounts that were not actual costs and were not pro-rated to the portion of costs relating to the care and maintenance functions."³⁵

³³ Exhibit X, Parameters and Guidelines, adopted February 28, 2002, pages 7-10.

³⁴ Exhibit X, Parameters and Guidelines, adopted February 28, 2002, page 7.

³⁵ Exhibit A, IRC, page 684.

Staff finds that these reductions are correct as a matter of law and not arbitrary, capricious, or entirely lacking in evidentiary support. While the Parameters and Guidelines use inclusive language to describe costs for this component (“total cost of care and maintenance includes labor, materials, supplies...”) the care and maintenance costs cannot be interpreted beyond the reasonable scope of the approved activity, which is to provide care and maintenance during the increased holding period for impounded stray or abandoned animals that die during the increased holding period or are ultimately euthanized. Office supplies and printing supplies are general expenses of the animal shelter, and are beyond the scope of the mandated activity, and therefore reduction on this basis is correct as a matter of law. Moreover, the claimant agreed with the Controller that only a portion of salaries and benefits for Animal Care Technicians and Animal Care Technician Supervisor positions should be reimbursable, and the claimant proposed the proportional reimbursable share for these classifications, which the Controller accepted.³⁶ The Controller’s reduction on this basis is therefore not arbitrary, capricious, or entirely lacking in evidentiary support. And finally, the claimant filed the reimbursement claims using the actual cost method of claiming, but used “budgeted expenditure amounts,” which are not equivalent to actual costs incurred for the mandate.

2. The Controller’s adjustment of the yearly animal census data did not result in a reduction of costs claimed and therefore the Commission has no jurisdiction to determine this issue.

The Parameters and Guidelines provide that the total annual cost of care shall be divided by the total annual census of *all* animals that come to the shelter to determine the cost per animal per day. The Controller found that the claimant misstated its yearly animal census data. Specifically, the Controller found that the claimant failed to exclude animals that were deceased upon arrival at the shelter, and animals that went missing. The Controller accordingly eliminated those animals from the census.

Based on the formula in the Parameters and Guidelines for determining the costs for care and maintenance during the increased holding period, in which total annual costs are divided by the yearly animal census to arrive at a cost per animal per day, which is in turn multiplied by the remaining factors of eligible animals and reimbursable days, it appears that the adjustments made to the annual animal census data that reduced the total number of animals did not in fact result in any reduction. Because total annual costs are *divided* by the yearly animal census, any decrease in the animal census data would result in a corresponding increase in the cost per animal per day, which would then be multiplied by the remaining factors. Thus, the adjustment to the yearly animal census factor is in the claimant’s favor. Because there is no reduction of costs claimed on the basis of the adjustments to the animal census data, the Commission has no jurisdiction and need not make a finding on this point.

3. The Controller’s adjustment of reimbursable days based on an average number of reimbursable days in the holding period is inconsistent with the Parameters and Guidelines, but *increases* the number of reimbursable days claimed by the claimant.

³⁶ Exhibit A, IRC, page 684.

thereby increasing reimbursement and, thus, the Commission does not have jurisdiction to determine this issue.

The last element of the calculation of actual costs for care and maintenance is to multiply the cost per animal per day times the number of eligible animals times the number of reimbursable days. The Parameters and Guidelines expressly require multiplying by “each reimbursable day” following the day of impoundment, and do not define reimbursable days based on an average number of days.³⁷

However, the reimbursement claims at issue in this IRC, claimed two reimbursable days for all dogs and cats, and four reimbursable days for all “other animals,” and made no attempt to state the total number of reimbursable days for each eligible animal.³⁸ And, as indicated in Section A3 of this Decision, the Controller, like the claimant, calculated an *average* increased holding period for all dogs and cats to be three days, and the average increased holding period for all other “eligible” animals to be six days, and did not state the total number of reimbursable days for each eligible animal.³⁹ Because the Controller’s audit *increased* the number of reimbursable days claimed by the claimant, by which all other elements of the formula are multiplied, the Controller’s adjustment of reimbursable days results in increased reimbursement to the claimant and, thus, the Commission does not have jurisdiction to determine this issue.

C. The Controller’s Reductions in Finding 4 Relating to Unallowable Employee Hours for Making Animals Available for Adoption or Owner Redemption Are Correct as a Matter of Law and Not Arbitrary, Capricious, or Entirely Lacking in Evidentiary Support.

The Parameters and Guidelines provide that an agency desiring to apply the shortened holding period is eligible for reimbursement for making animals available for owner redemption on one weekday evening until at least 7:00 p.m., or one weekend day; or, for local agencies with fewer than three full-time employees or that are not open during all regular weekday business hours, for establishing a procedure for owners to reclaim their animals by appointment.⁴⁰ For dogs and cats, reimbursement for this activity begins July 1, 1999. For “other animals” specified in Food and Agriculture Code section 31753, reimbursement for this activity begins January 1, 1999.⁴¹

The Controller’s audit determined that the claimant overstated allowable hours and the number of allowable positions to comply with this activity. Specifically, the Controller states that the claimant “claimed hours for Animal Care Technicians, Animal Care Technician Supervisors, Animal Control Officers, and Clerk Typists for working on one of the weekend days.” However, the Controller found that the claimant did not take into account the difference between the regular staffing needs and the *increased* staffing needs to comply with the requirement of this component. The Controller further elaborates that its audit “inquired about the number of

³⁷ Exhibit X, Parameters and Guidelines, adopted February 28, 2002, page 12.

³⁸ See, e.g., Exhibit A, IRC, pages 741-742.

³⁹ Exhibit A, IRC, page 690.

⁴⁰ Exhibit X, Parameters and Guidelines, adopted February 28, 2002, page 10.

⁴¹ Exhibit X, Parameters and Guidelines, adopted February 28, 2002, page 10.

employees and classifications of staff members working when the shelter is closed to the public (Mondays) and the staffing needed to comply with the mandate and stay open during the increased hours (Saturdays).” The Controller was thus able to eliminate staffing and employee hours that were mainly dedicated to the general care and maintenance of the animals. Additionally, the Controller notes that for fiscal year 1998-1999 reimbursement began January 1, 1999, and therefore allowable hours were reduced by half for that fiscal year.⁴²

Staff finds that the Controller is correct that the reason to remain open on a Saturday, pursuant to the test claim statutes and the Commission’s Decision, is to promote owner redemption. Indeed, the express language of the reimbursable component at issue in Finding 4 is “Making the animal available for owner redemption...”⁴³ Therefore, the Controller’s attempt to limit reimbursement on Saturdays to those employees that are necessary to make animals available for owner redemption is consistent with the Parameters and Guidelines and the purpose of the test claim statute. Thus, the adjustments are correct as a matter of law. In addition, there is no evidence in the record to support a finding that the Controller’s decisions were arbitrary or capricious.

D. Except as Determined in Section A. of This Decision, the Controller’s Remaining Findings Supporting the Reductions in Finding 7 for Overstated Necessary and Prompt Veterinary Care Costs Are Correct as a Matter of Law and Not Arbitrary, Capricious, or Entirely Lacking in Evidentiary Support.

The Parameters and Guidelines permit reimbursement for necessary and prompt veterinary care for stray or abandoned animals, other than injured cats and dogs given emergency treatment that die during the increased holding period or are ultimately euthanized. Necessary and prompt veterinary care means all reasonably necessary medical procedures performed by a veterinarian or someone under the supervision, including an initial physical examination; a wellness vaccine administered to adoptable or treatable animals; care to stabilize or relieve the suffering of a treatable animal; and veterinary care intended to remedy an injury or disease of a treatable animal.⁴⁴

The Controller’s audit determined that the claimant claimed estimated and unsupported materials and supplies costs, and misstated and unallowable employee hours. Specifically, the Controller found that the claimant’s time study for veterinary procedures was “inadequate,” because it focused on recording time increments to perform non-routine veterinary procedures which must be examined on a case-by-case basis to determine eligibility. A new time study was conducted during the course of the audit, which the Controller found was allowable except for “[i]nputting animal medical statistics into the Chameleon database about animal’s baseline health.”⁴⁵ In addition, the Controller found that the city claimed estimated and unsupported materials and supplies costs. During the first three years of the audit period, the claimant estimated that three percent of its operating costs were attributable to the mandate component of necessary and prompt veterinary care, and in the latter five years of the audit period, the claimant failed to

⁴² Exhibit A, IRC, pages 694 and 695.

⁴³ Exhibit X, Parameters and Guidelines, adopted February 28, 2002, page 10.

⁴⁴ Exhibit X, Parameters and Guidelines, adopted February 28, 2002, page 12.

⁴⁵ Exhibit A, IRC, page 703.

support its materials and supplies costs. The Controller states that the claimant did not respond to this audit finding specifically, but during the audit “submitted summary reports containing year end expenditures by vendor for Account 3190 – Medical Supplies” totaling \$2,086,819. The Controller determined that “we are unable to consider the medical expenses submitted for reimbursement, because the city did not determine what portion of the costs actually related to eligible animals and allowable treatments that took place during the required holding period.”⁴⁶

Staff finds that the claimant inappropriately claimed estimated costs, without any evidence or documentation to support the estimate, and that the claimant’s alleged expense documentation does not constitute evidence that those costs are related to the mandated activities. The Parameters and Guidelines provide reimbursement for necessary and prompt veterinary care, but with certain limitations. For example, animals irremediably suffering from serious illness or injury and euthanized on day one, or newborn animals that cannot survive without their mother, and the mother has not also been impounded, are not included in the population of “eligible animals” for which reimbursement is required. Likewise, emergency treatment is not eligible for reimbursement, due to the requirements of prior law, nor is the administration of a rabies vaccination, or microchip implantation, or spay or neuter surgery and treatment. The exclusions are therefore substantial, and reimbursement is decidedly narrow. The claimant has the burden to show that costs claimed for materials and supplies and employee salary and benefits fall within the reimbursable higher levels of service and were provided to animals within the eligible population, and therefore the summary expense reports for medical supplies are not sufficient in themselves to support the claim.

The claimant’s time study suffers the same fault, because it included a number of non-routine veterinary procedures and costs that must be evaluated on a case-by-case basis. Absent some evidence that the procedures and costs within the time study were verified to be eligible for reimbursement, the Controller’s rejection of the time study was correct as a matter of law, and not arbitrary, capricious, or entirely lacking in evidentiary support. Ultimately, all parts of the claim must be supported by some documentation from the claimant, which, according to the Parameters and Guidelines, must “show evidence of the validity of such costs and their relationship to the mandate.”⁴⁷

Based on the foregoing, except as provided in Section A. of this Decision relating to “eligible animals,” staff finds that the Controller’s remaining findings supporting the reductions in Finding 7 of necessary and prompt veterinary care costs are correct as a matter of law and not arbitrary, capricious, or entirely lacking in evidentiary support.

E. The Controller’s Determination Not to Consider Claimant’s Request, Made During the Audit, for Reimbursement for the Construction of New Facilities Is Correct as a Matter of Law.

The Parameters and Guidelines provide for reimbursement for the construction of new facilities or acquisition of additional space to comply with the mandate beginning January 1, 1999. However, the claimant did not include costs for this component in its annual reimbursement

⁴⁶ Exhibit A, IRC, pages 702-705.

⁴⁷ Exhibit X, Parameters and Guidelines, adopted February 28, 2002, page 15.

claims for any of the years subject to audit, nor specifically state in which years such costs might have been incurred. The claimant only alleged costs for construction of new facilities during the course of the audit, which began April 28, 2009.⁴⁸ At that time, the annual claims for all fiscal years of the audit period had been filed, and only the fiscal year 2007-2008 claim could be subject to a revised claim, pursuant to the deadlines contained in Government Code section 17568. Moreover, the construction costs were funded by bonds issued pursuant to a ballot measure, Proposition F, passed by the voters in the November 2000 general election.⁴⁹

Staff finds the Controller's determination not to reimburse costs for construction of new facilities, which were not claimed in the claimant's annual reimbursement claim filings and which were funded by a local bond measure repaid by an additional assessment on real property, is correct as a matter of law. Government Code section 17560 permits a claimant by February 15 following a fiscal year, to "file an annual reimbursement claim that details the costs actually incurred for that fiscal year." Section 17568 provides that if a local agency or school district submits an otherwise valid reimbursement claim to the Controller after the deadline specified in Section 17560, the Controller shall reduce the reimbursement claim in an amount equal to 10 percent of the amount that would have been allowed had the reimbursement claim been timely filed. In addition, section 17568 states that "[i]n no case shall a reimbursement claim be paid that is submitted more than one year after the deadline specified in Section 17560." These provisions of the Government Code clearly place the burden on the claimant to timely and completely claim its mandated costs. Moreover, where a local agency has raised revenues outside its appropriations limit to cover the cost of mandated activities, funds thus expended are not reimbursable.⁵⁰

F. The Claimant's Allegation That the Controller Failed to Provide Adequate Time to Comply with the Requirements of the Audit Is Irrelevant, and Ignores the Claimant's Burden to Support Costs Claimed.

The claimant argues that it was "denied necessary time to comply with the requirements of the audit due to the SCO's placing the audit on hold for staffing changes for nine months which left the City having to assemble documentation for a huge operation with less time than was provided by law."⁵¹ The claimant asserts that "[d]ue to the size of the City's Animal Services Department, there were millions of line items to go through in order to locate some of the requested information that dated back as far as 12 years." In addition, the claimant states that "some of the invoices had been destroyed as they exceeded the time limitation for record retention under the law."⁵² The claimant argues that it "cannot be expected to have to hold on to records from 1998 for an indeterminate amount of time and be forced to retain all detailed

⁴⁸ Exhibit A, IRC, page 709.

⁴⁹ Exhibit A, IRC, page 709.

⁵⁰ *County of Fresno v. State of California* (1991) 53 Cal.3d 482, 487.

⁵¹ Exhibit A, IRC, page 16.

⁵² Exhibit A, IRC, page 17.

expenditure records.” The claimant concludes that “[s]uch a record retention requirement would cause a burden that is both inefficient and unnecessary.”⁵³

The claimant is wrong. All versions of the Parameters and Guidelines provide that all costs must be traceable to source documents. Such documents, in turn, must “show evidence of the validity of such costs and their relationship to the mandate.” And, all documentation in support of claimed costs “shall be made available to the State Controller’s Office, as may be requested.” Such documents must be kept on file during the period subject to audit, in accordance with Government Code section 17558.5.⁵⁴ Furthermore, the requirement in Government Code section 17558.5 for an audit to be completed “not later than two years after the date that the audit is commenced,” is a requirement on the Controller to complete its audits promptly; it is not intended to provide a claimant with up to two years to remedy a poorly-supported and insufficiently-documented reimbursement claim. Moreover, the undisputed evidence in the record shows that the claimant had a period of seven months, and an additional period of nine months, in which the Controller’s audit staff was actively working with the claimant to resolve the issues of the audit and to make clear the documentation necessary to support the claim.⁵⁵ And, the Controller asserts, “[t]hroughout the audit process, we worked with the city’s staff to not only obtain proper supporting documentation, but also to arrange for alternative methods to support claimed costs.”⁵⁶

Based on the foregoing, staff finds that claimant’s allegation that the Controller failed to provide adequate time to comply with the requirements of the audit is irrelevant, and ignores the claimant’s burden to support costs claimed.

Conclusion

Staff recommends that the Commission partially approve this IRC, and request, pursuant to Government Code section 17551(d) and section 1185.9 of the Commission regulations, that the Controller reinstate costs that relate to the following incorrect reductions to the extent the claimant can provide documentation to support the validity of the costs incurred. Section VI. of the Parameters and Guidelines require claimants to provide source documents that show the evidence of the validity of such costs and their relationship to the mandate. The supporting documentation must be kept on file by the agency during the audit period required by Government Code section 17558.5. In this respect, claimants are required by Food and Agriculture Code section 32003 to maintain records on animals that are taken up, euthanized, or impounded. Such records shall identify the date the animal was taken up, euthanized, or

⁵³ Exhibit A, IRC, page 17.

⁵⁴ Exhibit X, Parameters and Guidelines, adopted February 28, 2002, page 15.

impounded; the circumstances surrounding these events; and the names of the personnel performing these activities.⁵⁷

- Any reduction of costs relating to the Controller’s exclusion of specified “birds” and “other animals” “legally allowed as personal property” and thus subject to the protection of the mandated activities.
- Any reduction of costs relating to the exclusion of animals deemed treatable upon arrival at the shelter and later euthanized during the increased holding period because they became non-rehabilitatable.
- Any reduction of costs relating to the Controller’s recalculation of costs following the *Purifoy* decision and its use of an average number of reimbursable days, to the extent the recalculation resulted in an exclusion of “eligible animals” correctly held under the law.

Staff further finds that all other reductions made by the Controller are correct as a matter of law and not arbitrary, capricious, or entirely lacking in evidentiary support.

Finally, staff finds that the Controller’s determination not to consider claimant’s request, made during the audit, for reimbursement for the construction of new facilities is correct as a matter of law, and that the claimant’s allegation that the Controller failed to provide adequate time to comply with the requirements of the audit is irrelevant.

Staff Recommendation

Staff recommends that the Commission adopt the Proposed Decision to partially approve the IRC and authorize staff to make any technical, non-substantive changes following the hearing.

⁵⁷ It is not clear from the record whether the Controller actually requested these records from the claimant based on the Controller’s interpretation that such costs were not reimbursable.

Animal Adoption

DECISION PURSUANT TO
GOVERNMENT CODE SECTION 17500 ET
SEQ.; CALIFORNIA CODE OF
REGULATIONS, TITLE 2, DIVISION 2,
CHAPTER 2.5, ARTICLE 7

(Adopted October 28, 2016)

DECISION

The Commission on State Mandates (Commission) heard and decided this Incorrect Reduction Claim (IRC) during a regularly scheduled hearing on October 28, 2016. [Witness list will be included in the adopted decision.]

The law applicable to the Commission’s determination of a reimbursable state-mandated program is article XIII B, section 6 of the California Constitution, Government Code section 17500 et seq., and related case law.

The Commission [adopted/modified] the Proposed Decision to [approve/partially approve/deny] this IRC by a vote of [vote count will be included in the adopted decision] as follows:

Member	Vote
Ken Alex, Director of the Office of Planning and Research	
Richard Chivaro, Representative of the State Controller	
Mark Hariri, Representative of the State Treasurer, Vice Chairperson	
Sarah Olsen, Public Member	
Eraina Ortega, Representative of the Director of the Department of Finance, Chairperson	
Carmen Ramirez, City Council Member	
Don Saylor, County Supervisor	

Summary of the Findings

This IRC addresses reductions made by the State Controller's Office (Controller) to reimbursement claims made by the City of Los Angeles (claimant) for costs incurred during fiscal years 1998-1999, 1999-2000, 2000-2001, 2001-2002, 2002-2003, 2005-2006, 2006-2007, and 2007-2008, under the *Animal Adoption* program.

The following reductions are in dispute:

- Reductions of care and maintenance costs (Finding 3) based on what Controller found were budgeted expenditures claimed in lieu of documented actual costs, claimed expenditures unrelated to care and maintenance, and understated animal census data, resulting in an overstatement of costs per animal per day; overstatement of the population of eligible animal population, based on the exclusions from reimbursement expressed in the Parameters and Guidelines; and adjustment to the number of reimbursable days based on excluding Saturday as a business day in accordance with *Purifoy v. Howell* (2010) 183 Cal.App.4th 166;
- Reductions of salaries and benefits for the increased holding period (Finding 4) based on employee hours that the claimant did not support as being related to the mandate;
- Reductions of necessary and prompt veterinary care costs (Finding 7) based on claiming estimated materials and supplies costs, and unsupported materials and supplies costs; and based on misstated and unallowable hours.

In addition, the claimant raises two issues that do not directly relate to the Controller's audit findings. First, although the claimant did not include in its reimbursement claims costs for construction or acquisition of additional space, the claimant now alleges that reimbursement is required for such costs, which were paid for by taxpayer-approved bonds, to be repaid from local property assessments. And second, the claimant argues that it was denied the necessary time to comply with the requirements of the audit because the Controller placed the audit on hold for nine months "which left the City having to assemble documentation for a huge operation with less time than was provided by law."⁵⁸

The Commission partially approves this IRC, and requests, pursuant to Government Code section 17551(d) and section 1185.9 of the Commission's regulations, that the Controller reinstate costs that relate to the following incorrect reductions to the extent the claimant can provide documentation to support the validity of the costs incurred. Section VI. of the Parameters and Guidelines require claimants to provide source documents that show the evidence of the validity of such costs and their relationship to the mandate. The supporting documentation must be kept on file by the agency during the audit period required by Government Code section 17558.5. In this respect, claimants are required by Food and Agriculture Code section 32003 to maintain records on animals that are taken up, euthanized, or impounded. Such records shall identify the date the animal was taken up, euthanized, or

⁵⁸ Exhibit A, IRC, page 16.

impounded; the circumstances surrounding these events; and the names of the personnel performing these activities.⁵⁹

- Any reduction of costs relating to the Controller’s exclusion of specified “birds” and “other animals” “legally allowed as personal property” and thus subject to the protection of the mandated activities.
- Any reduction of costs relating to the exclusion of animals deemed treatable upon arrival at the shelter and later euthanized during the increased holding period because they became non-rehabilitatable.
- Any reduction of costs relating to the Controller’s recalculation of costs following the *Purifoy* decision and its use of an average number of reimbursable days, to the extent the recalculation resulted in an exclusion of “eligible animals” correctly held under the law.

The Commission further finds that all other reductions made by the Controller are correct as a matter of law and not arbitrary, capricious, or entirely lacking in evidentiary support.

Finally, the Commission finds that the Controller’s determination not to consider claimant’s request, made during the audit, for reimbursement for the construction of new facilities is correct as a matter of law, and that the claimant’s allegation that the Controller failed to provide adequate time to comply with the requirements of the audit is irrelevant.

COMMISSION FINDINGS

I. Chronology

09/04/2002	Claimant signed its initial reimbursement claims for fiscal years 1998-1999, 1999-2000, and 2000-2001. ⁶⁰
08/03/2006	The Controller made initial payments on the fiscal years 1999-2000 and 2000-2001 claims. ⁶¹
08/10/2006	The Controller made initial payment on the fiscal year 1998-1999 reimbursement claim. ⁶²
04/28/2009	An audit entrance conference was held. ⁶³
04/06/2011	Controller issued the final audit report. ⁶⁴

⁵⁹ It is not clear from the record whether the Controller actually requested these records from the claimant based on the Controller’s interpretation that such costs were not reimbursable.

06/06/2016 Commission staff issued the Request for Additional Information.
06/09/2016 The Controller filed the response to the request for additional information.⁶⁷
08/25/2016 Commission staff issued the Draft Proposed Decision.⁶⁸

II. Background

The Animal Adoption Program

The *Animal Adoption* program arose from amendments to the Civil Code and Food and Agriculture Code made by Statutes 1998, chapter 752 (SB 1785⁶⁹). The purpose of the test claim statute was to carry out the state policy that “no adoptable animal should be euthanized if it can be adopted into a suitable home” and “no treatable animal should be euthanized”.⁷⁰ Generally, the program increases the holding period to allow for the adoption and redemption of stray and abandoned dogs, cats, and other specified animals before the local agency can euthanize the animal, and requires:

- verification of the temperament of feral cats;
- posting of lost and found lists;
- maintenance of records for impounded animals; and
- that impounded animals receive “necessary and prompt veterinary care.”

On January 25, 2001, the Commission partially approved the Test Claim for the increased costs in performing the following activities only:

1. Providing care and maintenance during the increased holding period for impounded dogs and cats that are ultimately euthanized. The increased holding period shall be measured by calculating the difference between three days from the day of capture (prior law) and four business days from the day after impoundment, as specified below in 3 (a) and 3 (b), or six business days from the day after impoundment (Food & Agr. Code, §§ 31108, 31752);
2. Providing care and maintenance for four business days from the day after impoundment, as specified below in 3 (a) and 3 (b), or six business days from the day after

⁶⁵ Exhibit A, IRC, page 1.

⁶⁶ Exhibit B, Controller’s Late Comments on the IRC.

⁶⁷ Exhibit D, Controller’s Response to the Request for Additional Information.

⁶⁸ Exhibit C, Draft Proposed Decision.

⁶⁹ Sometimes referred to as the Hayden Bill.

⁷⁰ Civil Code section 1834.4, Penal Code section 559d, and Food and Agricultural Code section 17005 as added or amended by Statutes 1998, chapter 752.

impoundment, for impounded rabbits, guinea pigs, hamsters, pot-bellied pigs, birds, lizards, snakes, turtles, or tortoises legally allowed as personal property that are ultimately euthanized (Food & Agr. Code, § 31753);

3. For dogs, cats, and other specified animals held for four business days after the day of impoundment, either:
 - (a) Making the animal available for owner redemption on one weekday evening until at least 7:00 p.m., or one weekend day; or
 - (b) For those local agencies with fewer than three full-time employees or that are not open during all regular weekday business hours, establishing a procedure to enable owners to reclaim their animals by appointment at a mutually agreeable time when the agency would otherwise be closed (Food & Agr., Code §§ 31108, 31752, and 31753);
4. Verifying whether a cat is feral or tame by using a standardized protocol (Food & Agr. Code, § 31752.5);
5. Posting lost and found lists (Food & Agr. Code, § 32001);
6. Maintaining records on animals that are not medically treated by a veterinarian, but are either taken up, euthanized after the holding period, or impounded (Food & Agr. Code, § 32003); and
7. Providing “necessary and prompt veterinary care” for abandoned animals, other than injured cats and dogs given emergency treatment, that are ultimately euthanized (Civ. Code, §§ 1834 and 1846).

The Commission first addressed the Parameters and Guidelines for *Animal Adoption* at its August 23, 2001 hearing, but the matter was continued for further public comment and analysis.⁷¹ The Commission adopted the Parameters and Guidelines for this program on February 28, 2002.⁷² The Parameters and Guidelines were then re-issued as corrected on March 20, 2002.⁷³ Those Parameters and Guidelines, in addition to the activities identified in the Test Claim Decision, provide reimbursement for one-time activities of developing policies and procedures; training; and developing or procuring computer software for maintaining records; as well as:

- Acquisition of additional space or construction of new facilities, by purchase or lease, to provide appropriate or adequate shelter necessary to comply with the mandated activities

⁷¹ Exhibit X, Staff Analysis and Proposed Parameters and Guidelines, August 23, 2001.

⁷² Exhibit X, Staff Analysis and Proposed Parameters and Guidelines, Staff Analysis and Proposed Parameters and Guidelines, February 28, 2002. (Note that, at this time the Commission did not issue a “Decision and Parameters and Guidelines” after adoption of parameters and guidelines as it does currently.)

⁷³ Exhibit X, Corrected Parameters and Guidelines, March 20, 2002.

during the increased holding period for impounded stray or abandoned dogs, cats, and other animals.⁷⁴

- Remodeling/renovating existing facilities to provide appropriate or adequate shelter necessary to comply with the mandated activities during the increased holding period for impounded stray or abandoned dogs, cats, and other animals.⁷⁵

Section VI. of the Parameters and Guidelines also require claimants to provide source documents that show the evidence of the validity of such costs and their relationship to the mandate. The supporting documentation must be kept on file by the agency during the audit period required by Government Code section 17558.5. In this respect, claimants are required by Food and Agriculture Code section 32003 to maintain records on animals that are taken up, euthanized, or impounded. Such records shall identify the date the animal was taken up, euthanized, or impounded; the circumstances surrounding these events; and the names of the personnel performing these activities.

On March 12, 2003, the Joint Legislative Audit Committee authorized an audit of the *Animal Adoption* mandate, which was completed by the Bureau of State Audits on October 15, 2003. The audit report recommended that the Legislature direct the Commission to amend the Parameters and Guidelines for the *Animal Adoption* mandate to correct the formula for determining the reimbursable portion of acquiring additional shelter space. In 2004, AB 2224 (Stats. 2004, ch. 313) was enacted to direct the Commission to amend the Parameters and Guidelines for the *Animal Adoption* program to:

1. Amend the formula for determining the reimbursable portion of acquiring or building additional shelter space that is larger than needed to comply with the increased holding period to specify that costs incurred to address preexisting shelter overcrowding or animal population growth are not reimbursable.
2. Clarify how the costs for care and maintenance shall be calculated.
3. Detail the documentation necessary to support reimbursement claims under this mandate, in consultation with the Bureau of State Audits and the Controller's office.

On January 26, 2006, the Commission adopted the amended Parameters and Guidelines, applicable to claims beginning July 1, 2005, in accordance with AB 2224, to require, among other things, contemporaneous source documents to show the validity of costs claimed and their relationship to the reimbursable activities. The 2006 amendment also clarified the definition of “average daily census” of dogs and cats, for purposes of the formula used to calculate care and maintenance costs; this amendment is clarifying only, and does not affect the methodology used to calculate actual costs for this component.⁷⁶

⁷⁴ Exhibit X, Corrected Parameters and Guidelines, March 20, 2002, page 3.

⁷⁵ Exhibit X, Corrected Parameters and Guidelines, March 20, 2002, page 5.

⁷⁶ Exhibit X, Parameters and Guidelines, amended January 26, 2006.

The Controller's Audit and Summary of the Issues

In Finding 3, the Controller disallowed \$967,883 for care and maintenance costs during the increased holding period. The Controller determined that the claimant incorrectly reported its annual expenditures for this component, and incorrectly calculated the annual census of dogs and cats and other animals, resulting in an overstatement of the costs per animal per day in each year. That cost per animal per day, the Controller found, was then incorrectly applied to an overstated number of eligible stray or abandoned animals that died during the increased holding period or were ultimately euthanized; and finally, multiplied by an incorrect number of reimbursable days, based on the court of appeal's determination in *Purifoy*⁷⁷ that Saturday is not a business day for purposes of the Hayden Bill.⁷⁸

In Finding 4, the Controller disallowed a net \$2,045,732 over the entire audit period for costs incurred to make animals available for adoption or redemption on Saturdays, based on overstated allowable hours and the number of employees for whom hours were allowable. Specifically, the Controller found that hours for Animal Care Technicians, Animal Care Technician Supervisors, Animal Control Officers, and Clerk Typists were claimed without considering the scope and requirements of the mandate. Only the increased staffing needed to comply with the requirement of making animals available for owner redemption or adoption is reimbursable, and therefore only a portion of Saturday staffing is attributable to the increased level of service. By comparing the Saturday staff hours claimed to the staffing levels needed when the shelter is closed to the public on Mondays, and examining monthly schedules provided by the claimant, the Controller found that the hours and employees needed to comply with the mandate included:

- Animal Care Technicians (10 positions, 9 hours each);
- Animal Care Technician Supervisor (1 position, 9 hours); and
- Front Counter Clerks (10 positions, 8 hours each).⁷⁹

The Controller allowed hours for these positions for 52 weeks during each year of the audit period, except fiscal year 1998-1999, for which reimbursement began on January 1, 1999.⁸⁰ The Controller also found an understatement in productive hourly rates.⁸¹

In Finding 7, the Controller disallowed a net \$1,827,843 over the entire audit period for necessary and prompt veterinary care costs. The Controller found that the claimant estimated its materials and supplies costs (rather than documenting actual costs), claimed unsupported materials and supplies costs, claimed misstated and unallowable hours, and understated its productive hourly rates.⁸² Specifically, the Controller found that for the first three years of the

⁷⁷ *Purifoy v. Howell* (2010) 183 Cal.App.4th 166.

⁷⁸ Exhibit A, IRC, page 683.

⁷⁹ Exhibit A, IRC, page 695.

⁸⁰ Exhibit A, IRC, page 695.

⁸¹ Exhibit A, IRC, page 694.

⁸² Exhibit A, IRC, page 704.

audit the claimant estimated three percent of its operating costs were attributable to the mandate, without any documentation for actual costs. In the latter five years of the audit, the claimant did not support its materials and supplies costs for necessary and prompt veterinary care as being attributable to activities or services eligible for reimbursement.⁸³ In addition, the claimant misstated salaries and benefits by using a time study that recorded hours worked for non-routine veterinary medical procedures, as opposed to repetitive activities. The Controller found that non-routine procedures were not appropriate for a time study due to the variability of time spent, and due to the need to examine each activity on a case-by-case basis to ensure claiming of only eligible activities within the scope of the mandate.⁸⁴ And finally, the Controller determined that the claimant understated its productive hourly rates, resulting in an adjustment in the claimant's favor of \$1,658.

The claimant did not claim costs for space acquisition and facilities construction or renovation in its reimbursement claims. However, the audit report indicates that during the course of audit fieldwork the claimant "inquired about the eligibility of costs it incurred for the construction and renovation of animal shelters under the mandated program."⁸⁵ It is undisputed that during the audit period the claimant constructed new shelters and renovated existing shelters, using bond funds approved by the voters in the November 2000 general election. Proposition F provided for the issuance of bonds, for the purposes of constructing new animal shelters and fire stations, to be repaid through additional assessments on residents' property tax bills.⁸⁶ The Controller concluded that although the claimant had performed the required analysis to determine that the additional shelter space was needed in order to comply with the provisions of the mandate, the claimant funded the construction and renovation with bond funds, rather than the city's revenue-limited general fund. Additionally, costs for this construction were not included in the reimbursement claims submitted by claimant to the Controller. Therefore, the Controller determined that the costs were not reimbursable.⁸⁷ The claimant strenuously objects to that determination, and maintains that the Proposition F funds "are clearly proceeds of taxes and local revenue to the extent they were used to pay for state mandated costs associated with the increased cost of building animal shelters."⁸⁸

III. Positions of the Parties

City of Los Angeles

Section 5 of the IRC form states the total amount incorrectly reduced during the audit period as \$5,425,813.⁸⁹ However, the claimant specifically challenges only findings 3, 4, and 7, which total \$4,841,458.⁹⁰

The claimant's primary challenge to the Finding 3 reductions for care and maintenance costs is based on the assertion that the Controller incorrectly applied the *Purifoy* decision,⁹¹ which declared that Saturday is not a business day for purposes of the increased holding period. The claimant alleges that the Controller incorrectly calculated allowable costs for care and maintenance.⁹² The claimant argues that this IRC presents good policy reasons to deny retroactive application of the *Purifoy* decision to the audit period, and that any and all costs denied on this basis should be reinstated.⁹³

In addition, the claimant challenges Finding 4, arguing that the Controller is misinterpreting the Parameters and Guidelines by allowing only a portion of staff hours when the shelter is open to the public on Saturdays. The claimant asserts that the mandated program requires the local agency to open its shelter on Saturdays "for normal business operations that are reasonably required by the Hayden Bill which is not limited to the redemption of animals."⁹⁴ The claimant argues that it "should be allowed to staff its shelter as it sees fit to accomplish the goals set forth in statute."⁹⁵

And, with respect to Finding 7, the claimant argues that the Controller's interpretation of documentation requirements resulted in an incorrect disallowance of "submitted expenses within expenditure account 3190 medical supplies (\$2,086,819)."⁹⁶

The claimant also challenges the Controller's determination that funds raised through a local assessment measure, Proposition F, and used for construction or space acquisition costs do not constitute increased costs mandated by the state.⁹⁷ The claimant argues that there is nothing in Government Code section 17514 that makes a distinction between mandated activities paid for

⁸⁹ Exhibit A, IRC, page 5.

⁹⁰ Exhibit A, IRC, page 683; 694; 702.

out of a local government's general fund revenues and those paid for with restricted bond or assessment funds.⁹⁸

Finally, the claimant argues that it was denied the necessary time to comply with the requirements of the audit, because the Controller's audit staff placed the audit "on hold for staffing changes for nine months which left the City having to assemble documentation for a huge operation with less time than was provided by law."⁹⁹ The claimant alleges that the audit began with an entrance conference on April 28, 2009, and "City staff worked closely with the SCO's auditing staff for a period of 7 months providing the requested documents and spending over 200 hours of City staff time."¹⁰⁰ But in November 2009, "work on the audit was temporarily discontinued by the SCO when their Audit Manager...transferred to another unit..."¹⁰¹ The claimant states that on July 19, 2010, a second entrance conference was held and the audit resumed. The claimant states that the auditor "requested documentation that required a significant amount of City resources in order to locate the information requested."¹⁰² The claimant alleges that it then "provided an additional 250 hours of staff time to address these requests."¹⁰³ The claimant continues: "Adding to the frustration, some of the invoices had been destroyed as they exceeded the time limitation for record retention under the law."¹⁰⁴ The claimant states that it "cannot be expected to have to hold on to records from 1998 for an indeterminate amount of time and be forced to retain all detailed expenditure records."¹⁰⁵ Furthermore, the claimant states that although the audit staff did make requests for information between November 2009 and July 2010, "it would not have made any difference in the City's staffing resources that it could lend to review the amount of documents requested..."¹⁰⁶

The Controller held an exit conference on January 12, 2011, and stated the intention to issue a final audit report in April. The claimant states that it acted in good faith to comply with all audit material requests, but that "[a] short time after the exit meeting, the City lost Linda Barth, the Department's Assistant General Manager, who was the main contact person for the audit causing a further setback in the City's attempt to provide the remaining information requested."¹⁰⁷ The Controller issued its draft audit report on March 10, 2011, and the claimant requested a 30 day

extension.¹⁰⁸ The claimant states that it was granted only two days “so that the State could file their audit report within the two year statute of limitations.”¹⁰⁹ The claimant argues that had the audit not been put on hold for nine months, it would have had sufficient time to address the auditor’s request for additional information which would have resulted in fewer reductions.¹¹⁰

State Controller’s Office

The Controller acknowledges that whether Saturday is considered a business day affects the allowable cost calculations for care and maintenance costs (Finding 3).¹¹¹ And, the Controller acknowledges that many animal shelters were operating under the assumption that they could count Saturday as a business day, but the *Purifoy* decision rendered that assumption incorrect.¹¹² The Controller notes that the definition of a business day is only one of several reasons for reduction in Finding 3, and that the claimant did not address “all of the elements that determine allowable costs for the Care and Maintenance cost component.”¹¹³ The Controller does not specify what portion of the reduction is attributable to the definition of a business day.¹¹⁴

With respect to unallowable employee hours associated with making animals available for adoption or redemption on a Saturday (Finding 4), the Controller asserts that the claimant included costs for employee hours and employee positions that were not reimbursable under the Parameters and Guidelines. The Controller states that the claimant “did not take into account the difference between the regular staffing needs and the increased staffing needs to comply with the requirement of this component.”¹¹⁵ The Controller reasoned that because the mandate is to remain open on Saturdays or weekday evenings for owner redemption or adoption, only the increased staff necessary for owner redemption or adoption activities is reimbursable; staff that would be caring for animals even during the hours the shelter is closed are not reimbursable.¹¹⁶

With respect to overstated necessary and prompt veterinary care costs (Finding 7), the Controller found that the claimant claimed “estimated materials and supplies costs (\$488,137), claimed unsupported materials and supplies costs (\$608,849), claimed misstated and unallowable hours (\$732,515), and understated productive hourly rates (\$1,658).”¹¹⁷ Even though the claimant

¹¹⁷ Exhibit A, IRC, page 702.

provided additional documentation of veterinary supplies, the Controller reviewed this information and stated “[w]e concluded that we are unable to consider the medical expenses submitted for reimbursement, because the city did not determine what portion of the costs actually related to the eligible animals and allowable treatments that took place during the required holding period.”¹¹⁸

With respect to the claimant’s assertion that costs incurred for construction and renovation of its shelters should be reimbursed, the Controller first notes that the claimant “did not claim any costs during the audit period under the Acquisition of Additional Space and/or Construction of New Facilities cost component.” Only later, during the audit fieldwork, “the city inquired about the eligibility of costs it incurred for the construction and renovation of animal shelters under the mandated program.”¹¹⁹ In addition, the Controller noted that in the November 2000 general election, the city’s voters passed Proposition F, “which allowed the city to issue bonds for the purposes of constructing new animal shelter facilities and fire stations.” The Controller found that “this non-discretionary revenue source was used to build the city’s animal shelters and none of the city’s discretionary general fund moneys were involved.” Accordingly, the Controller determined that “the city did not incur any increased costs to construct/remodel its animal shelters under Government Code section 17514.”¹²⁰

Finally, in response to the claimant’s assertion that the Controller placed “unreasonable time constraints” on the claimant, and the alleged burdens involved in producing sufficient documentation of costs within those time constraints, the Controller explains that audit staff repeatedly, consistently, and in painstaking detail, discussed with the claimant the reimbursement criteria, missing documentation, and the timeline for the release of the final audit report.¹²¹ The Controller maintains that even though auditing staff changed during the course of the audit “we maintained regular communication with the city’s staff, made timely documentation requests, and held multiple status meetings...”¹²² The Controller also stated in the audit report that “[s]ubsequent to the July 19, 2010 meeting, the city’s mandated cost consultant was no longer involved in the audit process (i.e., did not participate in any audit discussions with department representatives nor had any contact with SCO auditors...”¹²³ The Controller asserts that its auditor-in-charge visited the claimant’s shelters during the week of October 19, 2010, and at that time “we provided department representatives with a detailed write-up of our preliminary findings...[including] a list of documentation still needed to complete calculations for training, computer equipment and software license renewal, care and maintenance, lost-and-found lists, and veterinary care.”¹²⁴ The Controller further stated:

¹²³ Exhibit A, IRC, page 712.

¹²⁴ Exhibit A, IRC, page 712.

On November 23, 2010, we made another attempt to request documentation that had not yet been provided. This included the expenditure amounts for care and maintenance costs, veterinary expenditures relating to reimbursable activities, and the proration analysis for the Chameleon software that relates to the mandated activities. All of these items were originally requested in July 2010.¹²⁵

The Controller also notes that the claimant's mandated cost consultant did not attend the exit conference meeting January 12, 2011. The Controller states that at that meeting, "we advised department representatives again that we would be issuing a final report no later than early April."¹²⁶ However, the Controller also states that after the report was issued, "we would still consider additional information that the city provided and adjust the final audit report as appropriate."¹²⁷ In conclusion, the Controller states that "[t]he department did not provide any more documentation to us after the exit meeting, up to the issuance of the draft report on March 10, 2011."¹²⁸

IV. Discussion

Government Code section 17561(d) authorizes the Controller to audit the claims filed by local agencies and school districts and to reduce any claim for reimbursement of state-mandated costs that the Controller determines is excessive or unreasonable.

Government Code Section 17551(d) requires the Commission to hear and decide a claim that the Controller has incorrectly reduced payments to a local agency or school district. If the Commission determines that a reimbursement claim has been incorrectly reduced, section 1185.9 of the Commission's regulations requires the Commission to send the decision to the Controller and request that the costs in the claim be reinstated.

The Commission must review questions of law, including interpretation of the parameters and guidelines, de novo, without consideration of legal conclusions made by the Controller in the context of an audit. The Commission is vested with exclusive authority to adjudicate disputes over the existence of state-mandated programs within the meaning of article XIII B, section 6.¹²⁹ The Commission must also interpret the Government Code and implementing regulations in accordance with the broader constitutional and statutory scheme. In making its decisions, the Commission must strictly construe article XIII B, section 6 and not apply it as an "equitable remedy to cure the perceived unfairness resulting from political decisions on funding priorities."¹³⁰

¹²⁵ Exhibit A, IRC, page 713.

animal population,” and determined that the claimant overstated costs by overstating the number of eligible animals for several reasons.¹³⁵

“Eligible animals” under the test claim statutes generally means any cat, dog, “rabbit, guinea pig, hamster, potbellied pig, bird, lizard, snake, turtle, or tortoise that is legally allowed as personal property.”¹³⁶ The following animals are excluded from “eligible animals” by statute or because the Commission found there were no increased costs under Government Code section 17556(d) due to fee authority sufficient to cover the costs of the program:

- “Animals that are irremediably suffering from a serious illness or severe injury.”¹³⁷
- Animals too severely injured to move or where a veterinarian is not available, in the field, and it would be more humane to dispose of the animal.¹³⁸
- “Newborn animals that need maternal care and have been impounded without their mother.”¹³⁹
- Animals for which fees sufficient to cover the costs of the program may be collected including:
 - Owner relinquished animals, and
 - Animals that are ultimately redeemed, adopted, or released to a nonprofit animal rescue or adoption organization.

Thus, “eligible animals” are any stray or abandoned cat, dog, “rabbit, guinea pig, hamster, potbellied pig, bird, lizard, snake, turtle, or tortoise that is legally allowed as personal property” that “dies during the increased holding period or is ultimately euthanized.”¹⁴⁰

The Controller, in its audit and recalculation of allowable costs for care and maintenance and necessary and prompt veterinary care, states that the following animals were excluded from the population of “eligible animals”:

- Dogs and cats and other animals that were owner-surrendered or previously owned (only stray animals were included in the eligible population);
- Dogs, cats, and other animals that were ultimately adopted, transferred, rescued, or redeemed (only those animals with the outcome of “died” or “euthanized” were reviewed);

¹⁴⁰ Exhibit X, Parameters and Guidelines, amended January 26, 2006, see pages 6-15.

- Dogs, cats, and other animals that went missing from their kennels, were stolen, or escaped;
- Dogs, cats, and other animals that were DOA [dead on arrival];
- Dogs, cats, and other animals that were euthanized as requested by owners or if euthanasia was required/requested (“Dispo Req” or “Euth Req”);
- Dogs, cats, and other animals that were euthanized for humane reasons (usually on day 1);
- Dogs, cats, and other animals that were suffering from a serious illness or severe injury (usually euthanized on day 1 or died on day 1);
- Newborn animals that need maternal care and were impounded without their mothers (usually died or were euthanized within the first few days; the excluded categories included “Unweaned” or “8 weeks unsustainable”);
- Ineligible other animals such as rodents, livestock, or wild animals;
- Ineligible birds, such as pigeons, doves, ducks, chickens, owls, pheasants, mallards, and gamefowls;
- Dogs and cats that died in the shelter’s kennels outside of increased holding period (days 1, 2, 3, and day 7 and beyond), as per the requirements of the mandate. (Local agencies are eligible to receive reimbursement to care for dogs and cats that *died during the increased holding period* [days 4, 5, and 6]);
- “Other” animals that died in the shelters’ kennels on day 7 and beyond (after the increased holding period). (Local agencies are eligible to receive reimbursement to care for other animals that *died during the increased holding period* [days 2, 3 through 6].); and
- Dogs, cats, and other animals that were euthanized during the holding period as per the requirements of the mandate. The agencies are eligible to receive reimbursement to care for dogs and cats and other animals that were *euthanized after the holding period* (day 7 of the holding period and beyond).¹⁴¹

Staff finds that some of the Controller’s exclusions of “eligible animals” are incorrect as a matter of law, and are arbitrary, capricious, or entirely lacking in evidentiary support.

1. Any reduction of costs relating to the Controller’s exclusion of specified “birds” and “other animals” “legally allowed as personal property” and thus subject to the protection of the mandated activities is incorrect as a matter of law and is arbitrary, capricious, and entirely lacking in evidentiary support.

As described below, the Commission finds that the Controller’s exclusion of eligible animals including “rodents, livestock, or wild animals or “birds, such as pigeons, doves, ducks, chickens, owls, pheasants, mallards, and gamefowls” to the extent those animals are “rabbits, guinea pigs,

¹⁴¹ Exhibit A, IRC, pages 688-689 (pages 21 and 22 of the Audit Report).

hamsters, pot-bellied pigs, birds, lizards, snakes, turtles, or tortoises legally allowed as personal property” is incorrect as matter of law. To the extent any animals so excluded were not legally allowed as personal property, the auditor provided no facts in the record and cited no law to support that determination and, therefore, such exclusions are arbitrary, capricious, and entirely lacking in evidentiary support. Additionally, the Commission finds that most of these specified animals are allowed by state law as personal property unless restricted by local ordinance and no local ordinance was cited to support such exclusions.

The Parameters and Guidelines track the statutory language in Food and Agriculture Code section 31753 and authorize reimbursement during the required holding period for the care and maintenance of “other animals” to include “impounded stray or abandoned rabbits, guinea pigs, hamsters, pot-bellied pigs, birds, lizards, snakes, turtles, or tortoises *legally allowed as personal property*.”¹⁴² Food and Agriculture Code section 31753 provides, in pertinent part:

Any rabbit, guinea pig, hamster, pot-bellied pig, bird, lizard, snake, turtle, or tortoise legally allowed as personal property impounded in a public or private shelter shall be held for the same period of time, under the same requirements of care, and with the same opportunities for redemption and adoption by new owners or nonprofit...animal rescue or adoption organizations as cats and dogs.¹⁴³

The Commission finds that the phrase “legally allowed as personal property” applies to all the animals listed in the statute. Under the rules of statutory construction, where a list of things is followed by a qualifying word or phrase, such as “legally allowed as personal property,” it is presumed that “qualifying words, phrases and clauses are to be applied to the words or phrases immediately preceding and are not to be construed as extending to or including others more remote.”¹⁴⁴ In that case, the phrase “legally allowed as personal property would apply only to its “last antecedent,” which in Section 31753 is “tortoises.” However, there is an exception, which applies in this case, that “[w]hen several words are followed by a clause which is applicable as much to the first and other words as to the last, the natural construction of the language demands that the clause be applicable to all.”¹⁴⁵ Under that construction, “legally allowed as personal property” applies to the entire list, including “...bird, lizard, snake, turtle, or tortoise...” This latter construction is consistent with Section 1(c)(3) of the test claim statute (Statutes 1998, chapter 752), which states that the intent of the act includes extending public shelter responsibilities from dogs and cats to “other legal pets.”¹⁴⁶ In addition, several of the code sections reenacted or amended by Statutes 1998, chapter 752, state that it is the policy of the

¹⁴⁶ Statutes 1998, chapter 752, section 1.

state of California “that *no adoptable animal* should be euthanized if it can be adopted into a suitable home.”¹⁴⁷

All property must be real or personal in nature,¹⁴⁸ and animals, to the extent they are legally allowed to be property, fall into the latter category.¹⁴⁹ Even many types of wild animals may be legally allowed as personal property in certain circumstances.¹⁵⁰ And whether a particular animal is “legally allowed as personal property” can be a complex issue of law and fact. The purpose of the test claim statute is to carry out the state policy that “*no adoptable animal* should be euthanized if it can be adopted into a suitable home” and “*no treatable animal* should be euthanized.”¹⁵¹ With this purpose in mind, the proper inquiry is whether the animal is “legally allowed as personal property” or, more simply put, legally allowed to be owned.

Here, the Controller excluded “[i]neligible other animals such as rodents, livestock, or wild animals;” and “[i]neligible birds, such as pigeons, doves, ducks, chickens, owls, pheasants, mallards, and gamefowls” from reimbursement, without any findings whether these animals can legally be owned as personal property.

The test claim statute mandates the claimant to hold rabbits. Rabbits may be classified as livestock,¹⁵² pets,¹⁵³ or wild animals¹⁵⁴ depending on the breed and the owner. However, there are no findings or evidence in the record whether the Controller’s exclusion of “livestock” or “wild animals” included rabbits that are legally allowed as pets. The test claim statute also protects and mandates the local agency to hold guinea pigs and hamsters, which are classified as “rodents.”¹⁵⁵ However, the Controller excluded all rodents, without evidence of the type of

¹⁴⁷ See, e.g., Civil Code section 1834.4; Food and Agriculture Code section 17005; Penal Code section 599d (as added or amended, Stats. 1998, ch. 752) (emphasis added).

¹⁴⁸ Civil Code section 657.

¹⁴⁹ See Civil Code sections 658-660, 662 (further defining real property); see also Civil Code section 663 (stating that all property which is not real is defined as personal).

¹⁵⁰ See, e.g., Civil Code section 656 and California Code of Regulations, title 14, section 671.

¹⁵¹ Civil Code section 1834.4, Penal Code section 559d, Agricultural Code section 17005, emphasis added.

¹⁵² “Livestock” is undefined in California law, but rabbits are listed as “specialty livestock” by the United States Department of Agriculture, See <https://www.nal.usda.gov/afsic/specialty-livestock>.

¹⁵³ See California Penal Code section 597l(c)(1): (“Pet animals” means dogs, cats, monkeys and other primates, *rabbits*, birds, guinea pigs, hamsters, mice, snakes, iguanas, turtles, and any other species of animal sold or retained for the purpose of being kept as a household pet.) Emphasis added.

¹⁵⁴ See, e.g. 50 Code of Federal Regulations Part 17, listing the riparian brush rabbit as an endangered species.

¹⁵⁵ See California Code of Regulations, Title 14, section 671(c)(6)(J)(1) b. and d. *excluding* from restriction under the “*order rodentia*,” among several other rodents, “domesticated races of

rodents excluded or whether the rodent can legally be allowed as a pet. Therefore, the Controller’s exclusion of rabbits, guinea pigs, and hamsters without analysis of the animals held by the claimant and whether the animal can legally be held as pets, is facially inconsistent with the law and the Parameters and Guidelines, is incorrect as a matter of law, and is arbitrary, capricious, and entirely lacking in evidentiary support.

Additionally, the test claim statute expressly requires local agencies to hold stray or abandoned “birds...legally allowed as personal property” pending adoption or redemption. The statute does not distinguish between types of birds required to be held, some of which may be poultry (e.g. chickens and ducks), pets,¹⁵⁶ or wild animals,¹⁵⁷ depending on the breed and owner. However, the Controller generally excluded “birds, such as pigeons, doves, ducks, chickens, owls, pheasants, mallards, and gamefowls,” without identifying any law rendering these birds illegal to possess as pets or specifying the birds actually held by the claimant.

Indeed, there are some animals whose ownership is restricted by state¹⁵⁸ or local ordinance.¹⁵⁹ With the exception of owls,¹⁶⁰ the animals listed as restricted in the law are not included in the list of animals “excluded” in the Controller’s audit report, however. And the restriction does not strictly prohibit ownership as personal property in all cases.¹⁶¹ Moreover, though federal law prohibits the capture or ownership of wild mallard ducks and wild migratory waterfowl generally, it authorizes the ownership of captive raised mallards and other captive raised protected migratory waterfowl under specified circumstances.¹⁶²

However, the Controller states no law which prohibits the ownership of the particular animals “excluded” in this case, and the Controller makes no findings in the audit that such excluded animals, which may be restricted by law in some cases, did not meet the requirements in law to be legally allowed in this case. Nor does the audit report state with specificity, sufficient to provide claimant with reasons for the reductions, which specific animals or how many animals are being excluded on this basis.

golden hamsters of the species *Mesocricetus auratus* and domesticated races of dwarf hamsters of the Genus *Phodopus*” and domesticated races of guinea pigs of the species *Cavia porcellus*.” Emphasis added.

¹⁵⁶ See California Penal Code section 5971(c)(1): “‘Pet animals’ means dogs, cats, monkeys and other primates, rabbits, *birds*, guinea pigs, hamsters, mice, snakes, iguanas, turtles, and any other species of animal sold or retained for the purpose of being kept as a household pet.” Emphasis added.

¹⁵⁹ Fish and Game Code section 2156; California Code of Regulations, title 14, section 671.

¹⁶⁰ See California Code of Regulations, title 14, section 671(c)(1)(J).

¹⁶¹ California Code of Regulations, title 14, section 671.

¹⁶² Title 50 Code of Federal Regulations, section 21.13.

Therefore, the Controller's reduction of costs for care and maintenance (Finding 3) and necessary and prompt veterinary care (Finding 7) associated with the exclusion of "[i]neligible other animals such as rodents, livestock, or wild animals;" and "[i]neligible birds, such as pigeons, doves, ducks, chickens, owls, pheasants, mallards, and gamefowls," is incorrect as a matter of law and is arbitrary, capricious, and entirely lacking in evidentiary support.

2. The exclusion of animals deemed treatable upon arrival at the shelter and later euthanized during the increased holding period because they became non-rehabilitatable, is incorrect as a matter of law.

The Controller excludes from reimbursement all costs incurred for the care and maintenance and prompt and necessary veterinary care of dogs, cats, and other animals that were euthanized *during* the increased holding period. The Controller states "agencies are eligible to receive reimbursement to care for dogs and cats and other animals that were *euthanized after the holding period*."¹⁶³ The Controller bases its finding to exclude these animals on the plain language of the Parameters and Guidelines, which provides that local agencies are eligible to receive reimbursement for care and maintenance costs and for necessary and prompt veterinary costs only for those animals "that die during the increased holding period or are ultimately euthanized." The Controller maintains that these costs are only eligible for reimbursement for those animals that die of natural causes during the increased holding period or are euthanized *after* the increased holding period. Thus, the Controller argues, if an animal is euthanized during the increased holding period, then no costs for that animal are eligible for reimbursement.

The Commission finds that the Controller's interpretation of the Parameters and Guidelines is not correct. The Parameters and Guidelines provide that local agencies are eligible to receive reimbursement for care and maintenance and prompt and necessary veterinary costs only for those animals "that die during the increased holding period or are ultimately euthanized." The plain language of the phrase "animals that die during the increased holding period or are ultimately euthanized" is vague and ambiguous because the word "die" can include both death by natural causes and death by euthanasia. Since the plain language is not clear, it is necessary to review the decisions adopted by the Commission on this issue and the statutory scheme of the test claim statutes.¹⁶⁴

The phrase "ultimately euthanized" was used in the Test Claim Statement of Decision only to identify those animals whose owners are unknown or are not adopted, meaning that the costs for care, treatment, and veterinary services during the holding period for this group of animals could not be recovered by fee revenue. The Statement of Decision states in relevant part:

Fee Authority – Government Code Section 17556, Subdivision (d). Government Code section 17556, subdivision (d), provides that there shall be no costs mandated by the state if the local agency has the authority to levy service charges, fees, or assessments sufficient to pay for the mandated program.

¹⁶³ Exhibit A, IRC, page 689.

¹⁶⁴ The Parameters and Guidelines are regulatory in nature (*Clovis Unified School Dist. v. Chiang* (2010) 188 Cal. App. 4th 794, 799), and, thus, must be construed in accordance with the rules of statutory and regulatory construction.

In the present case, local agencies do have the authority, under certain circumstances, to assess fees upon the owner of an impounded animal for the care and maintenance of the animal. For example, pursuant to Civil Code section 2080, any public agency that takes possession of an animal has the authority to charge the owner, *if known*, a reasonable charge for saving and taking care of the animal.

Similarly, Penal Code sections 597f and 597.1 also allow local agencies to pass on the costs of caring for abandoned or seized animals to their owners by providing that “the cost of caring for the animal shall be a lien on the animal until the charges are paid.”

Moreover, Penal Code section 597f allows the cost of hospital and emergency veterinary services provided for impounded animals to be passed on to the owner, if known. [Footnote omitted.]

The fee authority granted under the foregoing authorities applies only if the owner is known. Thus, local agencies have the authority to assess a fee to care and provide treatment for animals relinquished by their owners pursuant to Food and Agriculture Code section 31754. Local agencies also have the authority to assess a fee for the care and treatment of impounded animals that are ultimately redeemed by their owners. Under such circumstances, the Commission finds that the fee authority is sufficient to cover the increased costs to care, maintain, and provide necessary veterinary treatment for the animal during the required holding period since the “cost of caring” for the animal can be passed on to the owner.

Accordingly, pursuant to Government Code section 17556, subdivision (d), the Commission finds that there are no costs mandated by the state for the care, maintenance and necessary veterinary treatment of animals relinquished by their owners or redeemed by their owners during the required holding period.

The Commission further finds that there are no costs mandated by the state under Government Code section 17556, subdivision (d), for the care, maintenance, and treatment of impounded animals that are ultimately adopted by a new owner; for the care, maintenance, and treatment of impounded animals that are requested by a nonprofit animal rescue or adoption organization; or for the administrative activities associated with releasing the animal to such organizations.

The test claim legislation gives local agencies the authority to assess a standard adoption fee, in addition to any spay or neuter deposit, upon nonprofit animal rescue or adoption organizations that request the impounded animal prior to the scheduled euthanization of the animal. [Footnote omitted.]

The claimant contends that the “standard adoption fee” is not sufficient to cover the costs for animals adopted or released to nonprofit animal rescue or adoption organizations. However, based on the evidence presented to date, the Commission finds that local agencies are not prohibited by statute from including in their “standard adoption fee” the costs associated with caring for and treating impounded animals that are ultimately adopted by a new owner or released to

nonprofit animal rescue or adoption organizations, and the associated administrative costs. Rather, local agencies are only prohibited from charging nonprofit animal rescue or adoption organizations a higher fee than the amount charged to individuals seeking to adopt an animal.

However, the fees recovered by local agencies under the foregoing authorities do *not* reimburse local agencies for the care and maintenance of stray or abandoned animals, or the veterinary treatment of stray or abandoned animals (other than cats and dogs) during the holding period required by the test claim legislation when:

- The owner is unknown;
- The animal is not adopted or redeemed; or
- The animal is not released to a nonprofit animal rescue or adoption organization.

Thus, the fee authority is not sufficient to cover the increased costs for care, maintenance, and treatment during the required holding period for those animals that are ultimately euthanized. Under such circumstances, the Commission finds that that Government Code section 17556, subdivision (d), does not apply to deny this claim. Rather, local agencies may incur increased costs mandated by the state to care for these animals during the required holding period.¹⁶⁵

There was no discussion of animals that die during the increased holding period in the Test Claim Statement of Decision.

During the adoption of the Parameters and Guidelines, however, the County of Fresno requested reimbursement for animals that die during the increased holding period while being held pending adoption or euthanization as follows:

Fresno County recommends that reimbursements that apply to animals that are ultimately euthanized also apply to those animals that die while being held pending adoption or euthanization. If the animal dies pending adoption, obviously no adoption fees can be paid, and thus there is no revenue pertaining to that animal. If the animal dies pending euthanasia, the animal still had to be held until its untimely demise.¹⁶⁶

The staff analysis adopted for the Parameters and Guidelines agreed with the request as follows:

If a stray or abandoned animal dies during the time an agency is required to hold that animal, the agency would still be required by the state to incur costs to care and maintain the animal, and to provide “necessary and prompt veterinary care” for the animal before the animal died. The agency cannot recover those costs from the adoptive owner since the animal was never adopted or released to a

¹⁶⁵ Exhibit X, Test Claim Statement of Decision, pages 27-29. (Emphasis added.)

¹⁶⁶ Exhibit X, Staff Analysis for Item 4, February 28, 2002 Commission Hearing, page 6.

nonprofit adoption organization. Thus, staff agrees with the County that these costs are eligible for reimbursement.¹⁶⁷

Thus, the Parameters and Guidelines define the mandated population of animals for purposes of calculating reimbursement for the care and maintenance, and necessary and prompt veterinary care, as those that “die during the holding period or are ultimately euthanized.”

However, neither the Parameters and Guidelines, nor the analyses adopted for the Parameters and Guidelines, define what it means to “die” during the holding period. And the decisions do *not* limit reimbursement to animals that die of natural causes during the increased holding period. Such a limitation would be contrary to the statutory scheme.

Food and Agriculture Code section 17006 provides that the holding period does not apply to animals that are irretrievably suffering from a serious illness or severe injury or to newborn animals that need maternal care and have been impounded without their mothers. Such animals may be euthanized without being held for owner redemption or adoption. A related statute addresses the issue of a “treatable” animal’s health changing over the course of impoundment. Food and Agricultural Code section 17005 reads in its entirety:

(a) It is the policy of the state that no adoptable animal should be euthanized if it can be adopted into a suitable home. Adoptable animals include only those animals eight weeks of age or older that, at or subsequent to the time the animal is impounded or otherwise taken into possession, have manifested no sign of a behavioral or temperamental defect that could pose a health or safety risk or otherwise make the animal unsuitable for placement as a pet, and have manifested no sign of disease, injury, or congenital or hereditary condition that adversely affects the health of the animal or that is likely to adversely affect the animal's health in the future.

(b) *It is the policy of the state that no treatable animal should be euthanized. A treatable animal shall include any animal that is not adoptable but that could become adoptable with reasonable efforts.* This subdivision, by itself, shall not be the basis of liability for damages regarding euthanasia.¹⁶⁸ (Emphasis added.)

Section 17005, thus, expressly contemplates an animal’s health changing over the course of impoundment. Read together with section 17006, the two statutes require a shelter to hold an animal which is ill or injured— but not an animal which is irretrievably suffering — for the relevant holding period on the ground that the animal’s health may improve. The stated intent of the test claim statute was to require shelters to care for all pets and to shift the focus from euthanasia to owner redemption or adoption:

According to the author, the purpose of this bill is: (1) to make it clear that animal shelters and private individuals have the same responsibility to animals under their care; (2) to reduce the number of adoptable animals euthanized at shelters by shifting the focus of shelters from killing to owner redemption and adoption; (3)

¹⁶⁷ Exhibit X, Staff Analysis for Item 4, February 28, 2002 Commission Hearing, page 7.

¹⁶⁸ Emphasis added.

to give owner-relinquished pets the same chance to live as stray animals by providing for uniform holding periods; (4) to establish clearer guidelines for the care and treatment of animals in shelters; and (5) *to require shelters to care for all pets.*

The author argues that too many adoptable animals are euthanized by shelters and that the proposed changes will decrease the frequency of this tragedy.

Further, the author argues that taxpayers who own legally allowed pets other than cats and dogs should be treated the same as taxpayers who own cats and dogs.¹⁶⁹

Consistent with the statutory scheme, the Parameters and Guidelines expressly contemplate an animal's health changing over the course of impoundment from "treatable" to "adoptable." Section IV.(B)(8) of the Parameters and Guidelines allows reimbursement for the initial physical examination of a stray or abandoned animal to determine the animal's baseline health status and classification as "adoptable, treatable, or non-rehabilitatable." The Parameters and Guidelines further authorize reimbursement for the administration of a wellness vaccine to "treatable" or "adoptable" animals, veterinary care to stabilize and/or relieve the suffering of a "treatable" animal, and veterinary care intended to remedy any applicable disease, injury, or congenital or hereditary condition that adversely affects the health of a "treatable" animal until the animal becomes "adoptable."

Even with veterinary care, the condition of the animal can change during the increased holding period and the animal can become non-rehabilitatable. If that occurs, the animal is not "adoptable" or "treatable" and may be euthanized under the law. Therefore, to deny reimbursement for the costs incurred during the increased holding period for an animal that becomes non-rehabilitatable and that has to be euthanized during, but before the end of, the increased holding period conflicts with the test claim statute and the Parameters and Guidelines. The Commission finds that reimbursement is required under these circumstances.

Therefore, to the extent the Controller's reduction includes costs incurred for the care and maintenance and prompt and necessary veterinary costs of dogs, cats, and other animals that became non-rehabilitatable and were euthanized during, but before the expiration of, the increased holding period, the reduction is incorrect as a matter of law.

3. The Commission and the Controller are bound by the *Purifoy* decision and, thus, the Controller's exclusion of animals that were euthanized too early because Saturday was counted as a business day for the required holding period, is also correct as a matter of law. However, the Controller's recalculation of costs using an average number of reimbursable days is incorrect as a matter of law to the extent it results in an exclusion of "eligible animals" held for the time required under *Purifoy*.

As indicated above, the Controller excluded "dogs, cats, and other animals that were euthanized during the holding period as per the requirements of the mandate. The agencies are eligible to receive reimbursement to care for dogs and cats and other animals that were *euthanized after the*

¹⁶⁹ Senate Judiciary Committee Analysis of S.B. 1785 (1997-1998 Regular Session) (Hearing Date: April 21, 1998), page 3-4. Emphasis added.

holding period (day 7 of the holding period and beyond).”¹⁷⁰ Animals may have been euthanized during the holding period because of claimant’s misinterpretation of the required holding period in conflict with the Court of Appeal’s decision in *Purifoy*, which held that Saturday is not a “business day” for purposes of calculating the required holding period under the test claim statutes before a stray or abandoned dog can be adopted or euthanized.¹⁷¹ Before the decision was issued, many local agencies were operating under the assumption that Saturday was a “business day” that could be counted as part of the holding period, which resulted in the disposal of some animals at least one day too early.¹⁷² Pursuant to the *Purifoy* decision, the Controller excluded those animals from the number of “eligible animals that die during the holding period or are ultimately euthanized,” because they were disposed of at least one day too early.

The Commission finds that the court’s interpretation of “business day” in *Purifoy* is binding, and that the Controller’s exclusion of Saturday as a business day when calculating the increased holding period is correct as a matter of law. Thus, except in the circumstances described below, the Controller’s exclusion of animals that were euthanized too early because Saturday was counted as a business day for the required holding period, is also correct as a matter of law. However, the Controller’s recalculation of care and maintenance costs using an average number of reimbursable days is incorrect as a matter of law to the extent it results in an exclusion of “eligible animals” held for the time required under *Purifoy*.

- a) *The court’s interpretation of “business day” in Purifoy is binding and, thus, the Controller’s exclusion of Saturday as a business day when calculating the increased holding period is correct as a matter of law. Therefore, the exclusion of animals that were euthanized too early because Saturday was counted as a business day for the required holding period, is also correct as a matter of law.*

The court in *Purifoy* held that Saturday is not a “business day” for purposes of calculating the required holding period. In that case, Plaintiff Veena Purifoy’s dog Duke was impounded on a Thursday, and adopted the following Wednesday by a new owner (Duke was returned to Purifoy). The shelter, Contra Costa County Animal Services, counted the required holding period for Duke under section 31108 beginning Friday (the day after impoundment), Saturday (day 2), Tuesday (day 3), and Wednesday (day 4). The shelter was closed on Sunday and Monday, and did not count those as business days, by its own admission.¹⁷³ The court examined the meaning of “business days” elsewhere in state law and in case law, and found that sometimes “business day” includes Saturdays, but sometimes it does not. The court reasoned that the purpose of the statute was to promote a longer holding period for animal adoption and redemption, and that excluding Saturday as a business day would generally mean extending the holding period by one day. Thus, the court held “in light of our obligation to choose a construction that most closely comports with the Legislature’s intent and promotes, rather than

¹⁷⁰ Exhibit A, IRC, pages 688-689 (pages 21 and 22 of the Audit Report).

¹⁷¹ *Purifoy v. Howell* (2010) 183 Cal.App.4th 166.

¹⁷² Exhibit B, Controller’s Late Comments on IRC, page 18.

¹⁷³ *Purifoy v. Howell* (2010) 183 Cal.App.4th 166, 171-172.

defeats, the statute’s general purposes, we conclude that ‘business days’ in section 31108(a) means Monday through Friday, the meaning most commonly used in ordinary discourse.”¹⁷⁴ The court applied this interpretation to the case of Duke, and concluded that the shelter in question had not held the animal for the required number of business days before permitting his adoption to a new owner.¹⁷⁵

Here, applying the *Purifoy* decision, the Controller determined that the number of “eligible animals” was overstated, because the claimant incorrectly calculated the holding period to include Saturdays and thus euthanized at least some number of animals one day too early. For example, a dog impounded on a Thursday, in a shelter that stays open weekend hours, would be subject to a four day holding period beginning on Friday, excluding Saturday and Sunday, and through the close of business on Wednesday; if the shelter counted Saturday as a business day, the holding period for the same dog would end a day earlier. The Controller maintains that application of the *Purifoy* decision is appropriate because the decision clarified the legal definition of a business day “as of the date that the applicable statute was enacted in 1998.”¹⁷⁶ The Controller further explains:

We acknowledge that many animal shelters were operating under the assumption that they could count Saturday as a business day to calculate the holding period of an animal. However, the court’s decision declared that this assumption was incorrect.¹⁷⁷

The claimant strenuously protests the Controller’s application of the *Purifoy* holding. The claimant maintains that its calculation of the holding period was based on a reasonable interpretation of the test claim statute and the Parameters and Guidelines, and that the Controller’s application of the *Purifoy* holding to recalculate the increased holding period, and the resulting adjustment to the population of eligible animals, is an unfair and unreasonable retroactive application of the law. The claimant notes that “*Purifoy* is not a decision of the Commission nor is it a decision to which the Commission was a party.”¹⁷⁸ Additionally, the claimant notes that there has been no subsequent amendment to the Parameters and Guidelines, or request for a new test claim decision, and therefore the effect of the decision on the Parameters and Guidelines has not been analyzed by the Commission.¹⁷⁹

The claimant argues that although judicial decisions are generally given retroactive effect because the court is said to interpret the law as it always was, rather than to alter it, there are several exceptions to the general rule which apply in this instance.¹⁸⁰ Specifically, claimant

¹⁷⁴ *Purifoy v. Howell* (2010) 183 Cal.App.4th 166, 182.

¹⁸⁰ Exhibit A, IRC, page 11.

asserts that the change is procedural, not substantive; that retroactive application of *Purifoy* would produce unjust results with respect to local governments that are subject to audit; and that retroactive application cannot achieve the goal of extending the holding period for animals long since retrieved, adopted, or euthanized.¹⁸¹ Furthermore, the claimant argues that the Legislature has, by enacting Statutes 2011, chapter 97, since clarified by subsequent statute that a “business day” for purposes of the relevant Food and Agriculture Code sections “includes any day that a public or private shelter is open to the public for at least four hours, excluding state holidays.” The claimant asserts that this legislative change was an attempt to correct the interpretation of *Purifoy*.¹⁸² The claimant argues that these precedents provide “sufficient reason for the Commission to reverse the SCO as to the retroactive application of the *Purifoy* case to the instant audit and reimburse any and all attendant costs.”¹⁸³

It is undisputed that the Commission was not a party to the *Purifoy* matter, and that the court did not expressly address the effect of its decision on mandate reimbursement. And, as both the claimant and the Controller acknowledge, there has been no amendment to the Parameters and Guidelines, and no request for amendment.¹⁸⁴ It is also undisputed that the Commission did not define “business day” as used in the plain language of the test claim statutes in either the Test Claim Decision or the Parameters and Guidelines.

However, the court’s interpretation of “business day” is binding. The interpretation of a statute is an exercise of the judicial power the Constitution assigned to the courts, and constitutes the authoritative statement of what the statute meant before as well as after the decision of the case giving rise to that construction.¹⁸⁵ This is why judicial decisions are normally said to have retroactive effect, because the court is interpreting the law, rather than making new law.¹⁸⁶ Moreover, where a judicial decision is limited to prospective effect, the court will exercise equitable authority and, based on the facts of a particular case, will so state that its decision operates prospectively only. Indeed, in the principal case cited by the claimants discussing retroactivity, the court explains that “[a] *court* may decline to follow the standard rule when retroactive application of a decision would raise substantial concerns about the effects of the new rule on the general administration of justice, or would unfairly undermine the reasonable reliance of parties on the previously existing state of the law.”¹⁸⁷ “In other words,” the Court continued, “*courts* have looked to the ‘hardships’ imposed on parties by full retroactivity, permitting an

¹⁸⁷ *Newman*, *supra*, 48, Cal.3d 973, 983 [emphasis added].

exception only when the circumstances of a case draw it apart from the usual run of cases.”¹⁸⁸ Unlike the courts, the Commission’s jurisdiction is limited, as a quasi-judicial agency created by statute, and the Commission has no authority to do equity.¹⁸⁹ Absent a statement by the court that *Purifoy* should be limited in its application, the Commission and the Controller are bound to apply the court’s definition of “business day” for purposes of the test claim statute particularly where, as here, it does not conflict with the Parameters and Guidelines. Under the doctrine of stare decisis, all tribunals exercising inferior jurisdiction are required to follow decisions of courts exercising superior jurisdiction.¹⁹⁰

Furthermore, even though *Purifoy* only directly and expressly defines “business day” for purposes of section 31108 (the holding period for dogs), the court’s analysis and conclusion apply with equal force to sections 31752 and 31753 (holding periods for cats and for “other animals,” respectively). The California Supreme Court has declared that “[a] statute that is modeled on another, and that shares the same legislative purpose is in *pari materia* with the other, and should be interpreted consistently to effectuate congressional intent.”¹⁹¹ Accordingly, Food and Agriculture sections 31752 and 31753 should be interpreted consistently with section 31108, because all three code sections provide for the same holding period for different animals, and all three were enacted within the test claim statute.

Moreover, even though the Legislature amended the code after the decision in *Purifoy* was issued to state that any day that a shelter is open for four or more hours is a “business day,” this later amendment by the Legislature cannot be interpreted as the Legislature’s declaration of the original existing law. When the court “‘finally and definitively’ interprets a statute, the Legislature does not have the power to then state that a later amendment merely declared existing law.”¹⁹² The later amendment goes into effect only when the statute is operative and effective, in this case on January 1, 2012, many years after the fiscal years at issue in this IRC.

Accordingly, the Controller’s exclusion of Saturday as a business day when calculating the increased holding period is correct as a matter of law. Thus, the exclusion from the population of “eligible animals” those animals that were euthanized too early because Saturday was counted as a business day for the required holding period, is also correct as a matter of law.

b) However, the Controller’s recalculation of care and maintenance costs using an average number of reimbursable days is incorrect as a matter of law to the extent it results in an exclusion of “eligible animals” held for the duration required under *Purifoy*.

The Parameters and Guidelines provide for a formula for reimbursement of care and maintenance that requires multiplying the cost per animal per day by the number of “eligible

¹⁸⁸ *Ibid* [emphasis added].

¹⁹² *McClung v. Employment Development Department* (2004) 34 Cal.4th 467, 473; *Carter v. California Department of Veteran Affairs* (2006) 38 Cal.4th 914, 922.

animals,” and by “each reimbursable day.” But the actual number of calendar days of the holding period is not a constant, as it depends on the day of impoundment. The Parameters and Guidelines state that for dogs and cats the reimbursable holding period “shall be measured by calculating the difference between three days from the day of capture, and four or six business days from the day after impoundment” (four business days for shelters that choose to make animals available for owner redemption on a weekend day or weekday evening). For “other animals,” the reimbursable holding period is four or six business days from the day after impoundment, because prior law did not define a specific holding period.¹⁹³

Assuming a local agency, like the claimant, makes dogs and cats available for owner redemption on a weekend day or weekday evening and is thus subject to only the four business day holding period for dogs and cats, the increased holding period operates as follows (the 72 hour holding period for dogs and cats under prior law is shaded in each case, and the day of impoundment is indicated by “Imp”):

Mon	Tues	Wed	Thurs	Fri	Sat	Sun	Mon	Tues	Wed	Thurs
Imp	One	Two	Three	Four						
	Imp	One	Two	Three			Four			
		Imp	One	Two			Three	Four		
			Imp	One			Two	Three	Four	
				Imp			One	Two	Three	Four
					Imp		One	Two	Three	Four
						Imp	One	Two	Three	Four

The chart does not count Saturday as a business day, in accordance with *Purifoy*.¹⁹⁴ As it plainly appears, the *increased* holding period for dogs and cats ranges from two to four calendar days, depending on the day of the week that an animal is first impounded. An animal impounded on a Monday or Sunday would be subject to a two day increased holding period, while an animal impounded on a Thursday or a Friday would be subject to a four day increased holding period, because Saturday and Sunday cannot be counted.

For a local agency subject to the shortened four day holding period for “other animals,” the number of “reimbursable days” is as follows:

¹⁹³ Exhibit X, Parameters and Guidelines, adopted February 28, 2002, page 6.

¹⁹⁴ *Purifoy v. Howell* (2010) 183 Cal.App.4th 166.

Mon	Tues	Wed	Thurs	Fri	Sat	Sun	Mon	Tues	Wed	Thurs
Imp	One	Two	Three	Four						
	Imp	One	Two	Three			Four			
		Imp	One	Two			Three	Four		
			Imp	One			Two	Three	Four	
				Imp			One	Two	Three	Four
					Imp		One	Two	Three	Four
						Imp	One	Two	Three	Four

Again, this chart does not count Saturday and Sunday as business days, consistently with *Purifoy*. If the animal is impounded on a Monday, the reimbursable increased holding period is four calendar days. If the animal is impounded on a Tuesday, the reimbursable increased holding period is seven calendar days because Saturday and Sunday cannot be counted.

When auditing and recalculating the number of reimbursable days pursuant to *Purifoy*, the Controller did not include either Saturday, Sunday, or other days that the agency was closed as a business day. And, like the claimant,¹⁹⁵ the Controller calculated an *average* increased holding period for all dogs and cats to be three days, and the average increased holding period for all other “eligible” animals to be six days, and did not state the total number of reimbursable days for each eligible animal. The Controller’s explanation is as follows:

Determining the exact number of reimbursable days is often difficult. Depending on the impound day, each animal will have a different holding period requirement. For example, for a dog impounded at noon on Monday, the “old” law (prior to 1999) requires the city to hold the dog until noon on Thursday (72 hours); the current law requires the city to hold the dog until closing on Friday (which is 4 business days following impoundment). Under the current law, the holding period was increased by 1 day and 5 hours (or 29 hours). However, for the dog impounded at noon on Friday, the “old” law requires the city to hold the dog until noon on Monday (72 hours); and the current law requires the city to hold the dog until closing on Friday (which is 4 business days following impoundment). Under the current law, the holding period was increased by 4 days and 5 hours (or 101 hours).

This calculation takes into consideration that the required holding period does not include either Saturday or Sunday as a business day, which is consistent with the Appellate Court decision dated March 26, 2010, in the case of *Purifoy et al v. Howell*. We also took into consideration the operating schedules of the city’s

¹⁹⁵ See, e.g., Exhibit A, IRC, pages 741-742. The reimbursement claims claimed two reimbursable days for all dogs and cats, and four reimbursable days for all “other animals,” and made no attempt to state the total number of reimbursable days for each eligible animal.

shelters; some shelters are closed on Mondays. In such cases, we did not count Monday as a business day.

To determine the number of reimbursable days for all of the city's shelters, we analyzed every possible impound option (e.g., Monday impound, Tuesday impound, Wednesday impound, etc.) and determined the average increased holding period for dogs and cats to be 3 days and the average increased holding period for other "eligible" animals to be 6 days.¹⁹⁶

Thus, in an attempt to simplify the calculation of the increased holding period, the Controller applied an average number of days, rather than the actual number of increased holding days required for each stray or abandoned animal. Even if the increased holding period averages three days for dogs and cats, or six days for other animals, the Parameters and Guidelines do not provide for reimbursement based on an average number of days. While, as explained in Section B3 of this decision below, the average number of days applied by the Controller results in an increase in the number of reimbursable days claimed by the claimant, the Controller's recalculation may also result in the exclusion of animals that are euthanized during the Controller's defined "average" holding period. For example, as explained above, the Controller applied an increased holding period for dogs and cats of three days, after which the animal may be euthanized. However, if a stray or abandoned dog or cat is impounded on a Monday or Sunday, the actual increased holding period under the law is two calendar days, and not three days, and the dog or cat may be euthanized on day three (a day before the Controller's average and, thus, as "during the holding period" as defined by the Controller). Similarly, for "other animals," the Controller applied an increased holding period of six days. However, if a stray bird or rabbit is impounded on a Monday, the actual increased holding period under the law is four calendar days, and not six days, and the bird or rabbit may be euthanized on day five (a day before the Controller's average and, thus, "during the holding period" as defined by the Controller).

Under these circumstances, the Controller's recalculation and use of the average number of reimbursable days is incorrect as a matter of law to the extent it results in an exclusion of "eligible animals" correctly held under the law.

4. The remaining exclusions from the population of "eligible animals" are correct as a matter of law.

The Controller excludes from the population of "eligible animals" dogs, cats, and other animals that were owner-relinquished.¹⁹⁷ The Commission found in the Test Claim Decision that although such animals are required to be held during the holding period if accepted, the test claim statute does not require local agencies to accept owner-relinquished animals.¹⁹⁸ Accordingly, the Parameters and Guidelines provide for reimbursement only for stray or

¹⁹⁶ Exhibit A, IRC, page 690.

¹⁹⁷ Exhibit A, IRC, page 688.

¹⁹⁸ Exhibit X, Test Claim Decision, adopted January 25, 2001, page 19.

abandoned animals.¹⁹⁹ This exclusion is consistent with the Parameters and Guidelines and the test claim statute, and is therefore correct as a matter of law.

The Controller also excludes dogs, cats, and other animals that were ultimately adopted, transferred, rescued, or redeemed.²⁰⁰ This is consistent with the Test Claim Decision finding that local agencies have fee authority to recoup costs of care and maintenance for animals that are adopted or redeemed, or released to a nonprofit animal rescue organization.²⁰¹ This exclusion from “eligible animals” is therefore correct as a matter of law.

The Controller excludes from the population of eligible animals those dogs, cats, and other animals that went missing from their kennels, were stolen, or escaped.²⁰² Reimbursement is required only when a stray or abandoned animal dies during the increased holding period or is ultimately euthanized after the increased holding period.²⁰³ Moreover, costs for animals that went missing or escaped have not been substantiated with source documents in the record that show the validity of costs claimed and their relationship to the mandate.²⁰⁴ Because claimants have provided no documentation of their costs for dogs, cats, and other animals that went missing from their kennels, were stolen, or escaped, this exclusion is consistent with the Parameters and Guidelines and is correct as a matter of law.

The Controller excludes dogs, cats, and other animals that were deceased on arrival at the shelter.²⁰⁵ Such animals are expressly excluded from reimbursement by the Parameters and Guidelines since these animals did not die *during* the increased holding period and were not ultimately euthanized.²⁰⁶ Moreover, no costs for care and maintenance are incurred. This exclusion is therefore consistent with the Parameters and Guidelines, and is correct as a matter of law.

The Controller excludes dogs, cats and other animals that were euthanized as requested by owners or if euthanasia was required.²⁰⁷ As noted, the Commission found in its Test Claim Decision that local agencies were not required to accept owner-relinquished animals.²⁰⁸ And, the Parameters and Guidelines expressly prohibit reimbursement for the activity of euthanizing an

¹⁹⁹ Exhibit X, Parameters and Guidelines, adopted February 28, 2002, page 6.

²⁰⁸ Exhibit X, Test Claim Decision, adopted January 25, 2001, page 19.

animal.²⁰⁹ Therefore, this population exclusion is consistent with the Test Claim Decision and Parameters and Guidelines, and is correct as a matter of law.

The Controller excludes “Dogs, cats, and other animals that were euthanized for humane reasons (usually on day 1)” and “Dogs, cats, and other animals that were suffering from a serious illness or severe injury (usually euthanized on day 1 or died on day 1). As noted above, Food and Agriculture Code section 17006 provides that the holding period does not apply to animals that are irremediably suffering from a serious illness or severe injury or to newborn animals that need maternal care and have been impounded without their mothers. Such animals may be euthanized without being held for owner redemption or adoption. However, Food and Agricultural Code section 17005 provides, in pertinent part: “It is the policy of the state that no treatable animal should be euthanized. A treatable animal shall include any animal that is not adoptable but that could become adoptable with reasonable efforts.” And, as discussed above, the Parameters and Guidelines contemplate an animal’s treatable or adoptable status changing within the course of the holding period, even with veterinary care. Thus, to the extent an animal is initially deemed treatable but then later euthanized during the increased holding period, the law requires reimbursement for care and maintenance costs during the increased holding period. However, to the extent the exclusion includes animals euthanized prior to the increased holding period (or on day one for birds and other animals), these exclusions are consistent with the Parameters and Guidelines and therefore are correct as a matter of law.

The Controller excludes “Newborn animals that need maternal care and were impounded without their mothers (usually died or were euthanized within the first few days; the excluded categories included ‘Unweaned’ or ‘8 weeks unsustainable’).”²¹⁰ The Parameters and Guidelines expressly exclude such animals from reimbursement, referencing Food and Agriculture Code section 17006.²¹¹ This exclusion is thus correct as a matter of law.

The Controller also excludes dogs and cats that died in the shelter’s kennels *outside the increased* holding period, meaning within the first few days of the holding period required under prior law, or *after* the required holding period; and “other animals” that died in the shelter’s kennels after the increased holding period.²¹² The Commission finds that the exclusion of stray or abandoned dogs and cats that die within the holding period *required by prior law* is correct as a matter of law, since that requirement was not new and determined to be reimbursable in the Test Claim Decision. No reimbursement for the care and maintenance of a stray or abandoned dog or cat is required until *after* the first three days from the day of capture as follows:

For stray and abandoned dogs and cats, the increased holding period is the difference between three days from the day of capture, and either four or six

²⁰⁹ Exhibit X, Parameters and Guidelines, adopted February 28, 2002, page 13.

²¹⁰ Exhibit A, IRC, page 689.

²¹¹ Exhibit X, Parameters and Guidelines, adopted February 28, 2002, page 8.

²¹² Exhibit A, IRC, page 689.

business days from the day after impoundment. Eligible claimants are not entitled to reimbursement for the first three days of that period.²¹³

Thus, if a stray or abandoned dog or cat dies before the increased holding period begins, reimbursement is not required.

The Commission also finds that the Controller's exclusion of animals that died after the increased holding period is consistent with the Parameters and Guidelines and is correct as a matter of law. The Parameters and Guidelines provide for reimbursement for dogs and cats, and other animals, that died during the increased holding period or were ultimately euthanized after the increased holding period.²¹⁴ Reimbursement is limited to: stray or abandoned dogs and cats and other animals are subject to reimbursement because their owners are not known, and cannot have fees levied against them; animals that are not adopted during the holding period, but are "ultimately euthanized" when the holding period expires, are subject to reimbursement on the theory that there is no new owner or redeemed owner from whom fees could be exacted; both of these situations were contemplated in the Test Claim Decision and animals that die *during* the increased holding period.²¹⁵ And with respect to animals that die during the increased holding period, this issue arose during the consideration of Parameters and Guidelines, when the County of Fresno filed comments requesting reimbursement for the care and maintenance of stray or abandoned animals that die while being held pending adoption or euthanasia. As discussed above, the County requested reimbursement for animals that "die while being held pending adoption or euthanization [sic]."²¹⁶

The Commission approved the request, clarifying that increased costs for the care and maintenance of animals that die during the increased holding period are eligible for reimbursement as follows:

[S]taff has inserted language in Sections IV (B) (1), (2), (3), (4), and (9) of the proposed Parameters and Guidelines clarifying that increased costs for the care and maintenance of animals that die during the increased holding period, and for providing "necessary and prompt veterinary care" to animals that die during the holding period are eligible for reimbursement.²¹⁷

The Parameters and Guidelines, however, do not authorize reimbursement for animals that continue to be held by the local agency for adoption longer than the holding period and die *thereafter*. The Parameters and Guidelines are binding, and no requests to amend the Parameters and Guidelines have been filed. Thus, the Controller's interpretation is consistent with the plain language of the Parameters and Guidelines. Based on the foregoing, the Commission finds that this reduction of eligible animals on these grounds is correct as a matter of law.

B. Except as Determined in Section A of This Decision, the Controller’s Remaining Findings That Result in a Reduction of Costs for Care and Maintenance Under Finding 3 Are Correct as a Matter of Law and Not Arbitrary, Capricious, or Entirely Lacking in Evidentiary Support.

The Parameters and Guidelines provide for reimbursement of care and maintenance costs for impounded stray or abandoned animals that die during the increased holding period or are ultimately euthanized either by claiming actual costs or by performing a time study.²¹⁸ The claimant used the actual cost method, which is a formula designed to reimburse a proportion of total care and maintenance costs based on the incremental increase in service (the increased holding period) and the animals for which no fees can be collected (animals that are not adopted, redeemed, or released to a nonprofit animal rescue organization). The Parameters and Guidelines provide that actual costs for dogs and cats shall be calculated as follows:

Actual Cost Method – Under the actual cost method, actual reimbursable care and maintenance costs per animal per day are computed for an annual claim period.

- a) Determine the total annual cost of care and maintenance for all dogs and cats impounded at a facility. Total cost of care and maintenance includes labor, materials, supplies, indirect costs, and contract services.
- b) Determine the average daily census of dogs and cats.²¹⁹
- c) Multiply the average daily census of dogs and cats by 365 = yearly census of dogs and cats.
- d) Divide the total annual cost of care by the yearly census of dogs and cats = cost per animal per day.
- e) Multiply the cost per animal per day, by the number of impounded stray or abandoned dogs and cats that die during the increased holding period or are ultimately euthanized, by each reimbursable day (the difference between three days from the day of capture, and four or six business days from the day after impoundment).²²⁰

For “other animals,” the actual cost formula is essentially the same, except that the number of reimbursable days is not counted as “the difference between three days...and four or six business days.” Because there was no 72 hour holding period required under prior law for “other animals,” the “reimbursable days” multiplier is simply “four or six business days.”²²¹ Thus, as

²¹⁸ Exhibit X, Parameters and Guidelines, adopted February 28, 2002, pages 7-10.

²¹⁹ The Parameters and Guidelines, amended January 26, 2006, state also: “For purposes of claiming reimbursement under IV.B.3, average daily census is defined as the average number of all dogs and cats at a facility housed on any given day, in a 365-day period.” This amendment is clarifying only, and has no substantive effect on the methodology used to calculate actual costs. (Exhibit X, Parameters and Guidelines, amended January 26, 2006, page 11.)

²²⁰ Exhibit X, Parameters and Guidelines, adopted February 28, 2002, page 7.

²²¹ Exhibit X, Parameters and Guidelines, adopted February 28, 2002, pages 8-9.

the Controller acknowledges, the actual cost formula requires the eligible annual cost of care to be divided by the yearly census of animals to arrive at an average cost per animal per day. The cost per animal per day is then multiplied by the eligible number of animals and the number of increased holding period days.²²² The factors relating to the number of eligible animals was discussed under Section A of this Decision. This section addresses the remaining findings that resulted in a reduction of costs for care and maintenance.

The Controller states, with respect to care and maintenance costs, that the claimant used budgeted expenditure amounts to estimate its total annual costs, rather than claiming actual costs supported by documentation; and used inaccurate yearly animal census information, resulting in an incorrect calculation of costs per animal per day.²²³

Based on the analysis herein, the Commission finds that, except as determined in Section A. of this Decision, the Controller's remaining findings that support the reductions in Finding 3 for care and maintenance costs are correct as a matter of law and not arbitrary, capricious, or entirely lacking in evidentiary support.

1. The Controller's reductions on the basis of estimated or otherwise unsupported costs claimed as part of the calculation of total annual costs for care and maintenance are correct as a matter of law and not arbitrary, capricious, or entirely lacking in evidentiary support.

The Parameters and Guidelines provide that the first step in calculating actual costs for care and maintenance is to identify the total annual cost of this component, including labor, materials, supplies, indirect costs, and contract services.²²⁴ The Controller states that this claimant "used budgeted expenditure amounts that were not actual costs and were not pro-rated to the portion of costs relating to the care and maintenance functions."²²⁵ Specifically, the Controller states: "we requested that the city provide the actual salary amounts paid to those employee classifications directly involved with the care and maintenance function." The Controller continues: "We also requested the duty statements for such classifications to assist us in determining the percentage of daily workload that was devoted to caring and maintaining animals." Ultimately, the claimant and the Controller settled on including 80% of the salaries and benefits for Animal Care Technicians and 40% of Animal Care Technician Supervisor positions within the total annual costs for care and maintenance.²²⁶ Because payroll information was available only for the last three years of the audit period, the Controller states that it applied a deflator based on the consumer price index to estimate costs of labor for the earlier five years of the audit.²²⁷ In addition, the Controller states with respect to materials and supplies costs, that the claimant "[s]ubsequent to the issuance of the draft audit report...submitted summary reports containing

²²² Exhibit A, IRC, page 688.

²²³ Exhibit A, IRC, page 683.

²²⁴ Exhibit X, Parameters and Guidelines, adopted February 28, 2002, page 7.

²²⁵ Exhibit A, IRC, page 684.

²²⁶ Exhibit A, IRC, page 684.

²²⁷ Exhibit A, IRC, pages 684-685.

year end expenditures by vendor...”²²⁸ The Controller explains that “[d]uring fieldwork, we discussed with department staff the reimbursable criteria for this cost component... staff agreed that allowable expenditures for this component would primarily include animal food and cleaning supplies.”²²⁹ Accordingly, the Controller found that expenses such as “office supplies,” “printing supplies,” “cell phone expenses,” “expenses for animal traps,” and so forth, were not allowable under the care and maintenance component.

The claimant does not directly address these adjustments to the total annual costs of care and maintenance, but instead focuses its challenge to Finding 3 entirely on the application of the *Purifoy* decision, discussed below.

While the Parameters and Guidelines use inclusive language to describe costs for this component (“total cost of care and maintenance includes labor, materials, supplies...”) the care and maintenance costs cannot be interpreted beyond the reasonable scope of the approved activity, which is to provide care and maintenance during the increased holding period for impounded stray or abandoned animals that die during the increased holding period or are ultimately euthanized.²³⁰ Office supplies and printing supplies are general expenses of the animal shelter, and are beyond the scope of the mandated activity, and therefore reduction on this basis is correct as a matter of law. Moreover, the claimant agreed with the Controller that only a portion of salaries and benefits for Animal Care Technicians and Animal Care Technician Supervisor positions should be reimbursable, and the claimant proposed the proportional reimbursable share for these classifications, which the Controller accepted.²³¹ The Controller’s reduction on this basis is therefore not arbitrary, capricious, or entirely lacking in evidentiary support.

And finally, the claimant filed the reimbursement claims using the actual cost method of claiming, but used “budgeted expenditure amounts,” which are not equivalent to actual costs incurred for the mandate. Article XIII B, section 6 and the implementing Government Code provisions require reimbursement of actual costs mandated by the state, and no provision of the Parameters and Guidelines authorizes the use of “budgeted expenditure amounts” to estimate mandated costs. Thus, the reduction on this basis is correct as a matter of law.

Based on the foregoing, the Commission finds that the Controller’s reductions on the basis of estimated or otherwise unsupported costs claimed as part of the calculation for total annual costs for care and maintenance are correct as a matter of law and not arbitrary, capricious, or entirely lacking in evidentiary support.

2. The Controller’s adjustment of the yearly animal census data did not result in a reduction of costs claimed and therefore the Commission has no jurisdiction to determine this issue.

The Parameters and Guidelines provide that the total annual cost of care shall be divided by the total annual census of *all* animals that come to the shelter to determine the cost per animal per day. The Controller found that the claimant misstated its yearly animal census data.

²²⁸ Exhibit A, IRC, page 685.

²²⁹ Exhibit A, IRC, pages 685-686.

²³⁰ Exhibit X, Parameters and Guidelines, adopted February 28, 2002, pages 6-7.

²³¹ Exhibit A, IRC, page 684.

Specifically, the Controller found that the claimant failed to exclude animals that were deceased upon arrival at the shelter, and animals that went missing. The Controller stated that “[w]e did not count DOA animals...because no costs were incurred to care for them” and “we did not count missing animals as part of the annual census because their holding period was unknown.”²³² Additionally, the Controller found “some data input errors relating to dates.” The Controller noted that “[s]ome animal entries showed a negative holding period or extraordinarily long holding periods (e.g., exceeding ten years).” The Controller accordingly eliminated those animals from the census or changed the dates, where possible.²³³

Based on the formula in the Parameters and Guidelines for determining the costs for care and maintenance during the increased holding period, in which total annual costs are divided by the yearly animal census to arrive at a cost per animal per day, which is in turn multiplied by the remaining factors of eligible animals and reimbursable days, it appears that the adjustments made to the annual animal census data that reduced the total number of animals did not in fact result in any reduction. Because total annual costs are *divided* by the yearly animal census, any decrease in the animal census data would result in a corresponding increase in the cost per animal per day, which would then be multiplied by the remaining factors. Thus, the adjustment to the yearly animal census factor is in the claimant’s favor.

Because there is no reduction of costs claimed on the basis of the adjustments to the animal census data, the Commission has no jurisdiction and need not make a finding on this point.

3. The Controller’s adjustment of reimbursable days based on an average number of reimbursable days in the holding period is inconsistent with the Parameters and Guidelines, but *increases* the number of reimbursable days claimed by the claimant, thereby increasing reimbursement and, thus, the Commission does not have jurisdiction to determine this issue.

The last element of the calculation of actual costs for care and maintenance is to multiply the cost per animal per day times the number of eligible animals times the number of reimbursable days. The Parameters and Guidelines expressly require multiplying by “each reimbursable day” following the day of impoundment, and do not define reimbursable days based on an average number of days.²³⁴

However, the reimbursement claims at issue in this IRC, claimed two reimbursable days for all dogs and cats, and four reimbursable days for all “other animals,” and made no attempt to state the total number of reimbursable days for each eligible animal.²³⁵ And, as indicated in Section A.3. of this Decision, the Controller, like the claimant, calculated an *average* increased holding period for all dogs and cats to be three days, and the average increased holding period for all

²³² Exhibit A, IRC, page 687.

²³³ Exhibit A, IRC, page 687.

²³⁴ Exhibit X, Parameters and Guidelines, adopted February 28, 2002, page 12.

²³⁵ See, e.g., Exhibit A, IRC, pages 741-742.

other “eligible” animals to be six days, and did not state the total number of reimbursable days for each eligible animal.²³⁶

Even if the increased holding period averages three days for dogs and cats, or six days for other animals, the Parameters and Guidelines do not provide for reimbursement based on an average number of days. Nevertheless, because the Controller’s audit *increased* the number of reimbursable days claimed by the claimant, by which all other elements of the formula are multiplied, the Controller’s adjustment of reimbursable days results in increased reimbursement to the claimant and, thus, the Commission does not have jurisdiction to determine this issue.

C. The Controller’s Reductions in Finding 4 Relating to Unallowable Employee Hours for Making Animals Available for Adoption or Owner Redemption Are Correct as a Matter of Law and Not Arbitrary, Capricious, or Entirely Lacking in Evidentiary Support.

The Parameters and Guidelines provide that an agency desiring to apply the shortened holding period is eligible for reimbursement for making animals available for owner redemption on one weekday evening until at least 7:00 p.m., or one weekend day; or, for local agencies with fewer than three full-time employees or that are not open during all regular weekday business hours, for establishing a procedure for owners to reclaim their animals by appointment.²³⁷ For dogs and cats, reimbursement for this activity begins July 1, 1999. For “other animals” specified in Food and Agriculture Code section 31753, reimbursement for this activity begins January 1, 1999.²³⁸

The Controller’s audit determined that of \$3,886,965 claimed, \$2,045,732 was unallowable. The unallowable costs are the net result of “overstated allowable hours and the number of allowable positions (\$2,172,695) and understated productive hourly rates (\$126,963).”²³⁹ Specifically, the Controller states that the claimant “claimed hours for Animal Care Technicians, Animal Care Technician Supervisors, Animal Control Officers, and Clerk Typists for working on one of the weekend days.” However, the Controller found that the claimant “did not take into account the difference between the regular staffing needs and the *increased* staffing needs to comply with the requirement of this component.”²⁴⁰ The Controller further elaborates that its audit “inquired about the number of employees and classifications of staff members working when the shelter is closed to the public (Mondays) and the staffing needed to comply with the mandate and stay open during the increased hours (Saturdays).”²⁴¹ The Controller was thus able to eliminate staffing and employee hours that were mainly dedicated to the general care and maintenance of the animals. Reviewing the claimant’s working schedules for each shelter, the Controller

²³⁶ Exhibit A, IRC, page 690.

²³⁷ Exhibit X, Parameters and Guidelines, adopted February 28, 2002, page 10.

²³⁸ Exhibit X, Parameters and Guidelines, adopted February 28, 2002, page 10.

²³⁹ Exhibit A, IRC, page 694.

²⁴⁰ Exhibit A, IRC, page 694 [emphasis added].

²⁴¹ Exhibit A, IRC, page 694.

determined that “the following additional employees were needed to comply with the mandate requirement and stay open during one weekend day.”

- Animal Care Technicians (10 positions, 9 hours each)
- Animal Care Technician Supervisor (1 position, 9 hours)
- Front Counter Clerks (10 positions, 8 hours each)²⁴²

Additionally, the Controller notes that for fiscal year 1998-1999 reimbursement began January 1, 1999, and therefore allowable hours were reduced by half for that fiscal year.²⁴³

The claimant did not dispute the Controller’s findings in the context of the audit, nor offer additional documentation or evidence in its IRC. However, the claimant argues in its IRC that the Controller “places too much emphasis on the choice of wording in the Ps & Gs concluding that the costs for only those staff members involved with making animals available for redemption should be reimbursable.” The claimant argues “[t]he City should be allowed to staff its shelter as it sees fit to accomplish the goals set forth in statute.”²⁴⁴

The Commission finds that the Parameters and Guidelines do not expressly limit the staff and employee classifications for which reimbursement is required. However, the Controller is correct that the reason to remain open on a Saturday, pursuant to the test claim statutes and the Commission’s Decision, is to promote owner redemption. Indeed, the express language of the reimbursable component at issue in Finding 4 is “Making the animal available for owner redemption...”²⁴⁵ Therefore, the Controller’s attempt to limit reimbursement on Saturdays to those employees that are necessary to make animals available for owner redemption is consistent with the Parameters and Guidelines and the purpose of the test claim statute. Thus, the adjustments are correct as a matter of law. In addition, there is no evidence in the record to support a finding that the Controller’s decisions were arbitrary or capricious.

Based on the foregoing, the Controller’s reductions in Finding 4 relating to unallowable employee costs to make the animal available for owner redemption is correct as a matter of law, and not arbitrary, capricious, or entirely lacking in evidentiary support.

D. Except as Determined in Section A of This Decision, the Controller’s Remaining Findings Supporting the Reductions in Finding 7 for Overstated Necessary and Prompt Veterinary Care Costs Are Correct as a Matter of Law and Not Arbitrary, Capricious, or Entirely Lacking in Evidentiary Support.

The Parameters and Guidelines permit reimbursement for necessary and prompt veterinary care for stray or abandoned animals, other than injured cats and dogs given emergency treatment that die during the increased holding period or are ultimately euthanized. Necessary and prompt veterinary care means all reasonably necessary medical procedures performed by a veterinarian

²⁴² Exhibit A, IRC, page 695.

²⁴³ Exhibit A, IRC, page 695.

²⁴⁴ Exhibit A, IRC, page 14.

²⁴⁵ Exhibit X, Parameters and Guidelines, adopted February 28, 2002, page 10.

or someone under the supervision, including an initial physical examination; a wellness vaccine administered to adoptable or treatable animals; care to stabilize or relieve the suffering of a treatable animal; and veterinary care intended to remedy an injury or disease of a treatable animal.²⁴⁶

The Controller's audit determined that \$1,827,843, of a total \$2,193,011 claimed, was unallowable. The Controller found that the claimant claimed estimated and unsupported materials and supplies costs, and misstated and unallowable employee hours.²⁴⁷ Specifically, the Controller found that the claimant's time study for veterinary procedures was "inadequate," because it focused on recording time increments to perform non-routine veterinary procedures which must be examined on a case-by-case basis to determine eligibility. A new time study was conducted during the course of the audit, which the Controller found was allowable except for "[i]nputting animal medical statistics into the Chameleon database about animal's baseline health."²⁴⁸ In addition, the Controller found that the city claimed estimated and unsupported materials and supplies costs. During the first three years of the audit period, the claimant estimated that three percent of its operating costs were attributable to the mandate component of necessary and prompt veterinary care, and in the latter five years of the audit period, the claimant failed to support its materials and supplies costs.²⁴⁹ The Controller states that the claimant did not respond to this audit finding specifically, but during the audit "submitted summary reports containing year end expenditures by vendor for Account 3190 – Medical Supplies" totaling \$2,086,819. The Controller determined that "we are unable to consider the medical expenses submitted for reimbursement, because the city did not determine what portion of the costs actually related to eligible animals and allowable treatments that took place during the required holding period."²⁵⁰

The claimant "objects to the SCO's determination that it did not submit the proper documentation to support the Necessary and Prompt Veterinary Care material and supply cost."²⁵¹ The claimant states that during the audit, the Controller requested additional documentation "and the City submitted expenses within expenditure account 3190 medical supplies (\$2,086,819)."²⁵²

The Commission finds that the claimant inappropriately claimed estimated costs, without any evidence or documentation to support the estimate, and that the claimant's alleged expense documentation does not constitute evidence that those costs are related to the mandated activities. The Parameters and Guidelines provide reimbursement for necessary and prompt veterinary care, but with certain limitations. For example, as discussed in Section A above,

²⁴⁶ Exhibit X, Parameters and Guidelines, adopted February 28, 2002, page 12.

²⁴⁷ Exhibit A, IRC, page 702.

²⁴⁸ Exhibit A, IRC, page 703.

²⁴⁹ Exhibit A, IRC, page 704.

²⁵⁰ Exhibit A, IRC, page 705.

²⁵¹ Exhibit A, IRC, page 14.

²⁵² Exhibit A, IRC, page 14.

animals irremediably suffering from serious illness or injury and euthanized on day one, or newborn animals that cannot survive without their mother, and the mother has not also been impounded, are not included in the population of “eligible animals” for which reimbursement is required. Likewise, emergency treatment is not eligible for reimbursement, due to the requirements of prior law, nor is the administration of a rabies vaccination, or microchip implantation, or spay or neuter surgery and treatment.²⁵³ The exclusions are therefore substantial, and reimbursement is decidedly narrow. The claimant has the burden to show that costs claimed for materials and supplies and employee salary and benefits fall within the reimbursable higher levels of service and were provided to animals within the eligible population, and therefore the summary expense reports for medical supplies are not sufficient in themselves to support the claim.

The claimant’s time study suffers the same fault, because it included a number of non-routine veterinary procedures and costs that must be evaluated on a case-by-case basis. Absent some evidence that the procedures and costs within the time study were verified to be eligible for reimbursement, the Controller’s rejection of the time study was correct as a matter of law, and not arbitrary, capricious, or entirely lacking in evidentiary support. Ultimately, all parts of the claim must be supported by some documentation from the claimant, which, according to the Parameters and Guidelines, must “show evidence of the validity of such costs and their relationship to the mandate.”²⁵⁴

Based on the foregoing, except as provided in Section A. of this Decision relating to “eligible animals,” the Commission finds that the Controller’s remaining findings supporting the reductions in Finding 7 of necessary and prompt veterinary care costs are correct as a matter of law and not arbitrary, capricious, or entirely lacking in evidentiary support.

E. The Controller’s Determination Not to Consider Claimant’s Request, Made During the Audit, for Reimbursement for the Construction of New Facilities Is Correct as a Matter of Law.

The Parameters and Guidelines provide for reimbursement for the construction of new facilities or acquisition of additional space to comply with the mandate beginning January 1, 1999. However, the claimant did not include costs for this component in its annual reimbursement claims for any of the years subject to audit, nor specifically state in which years such costs might have been incurred. The claimant only alleged costs for construction of new facilities during the course of the audit, which began April 28, 2009.²⁵⁵ At that time, the annual claims for all fiscal years of the audit period had been filed, and only the fiscal year 2007-2008 claim could be subject to a revised claim, pursuant to the deadlines contained in Government Code section

²⁵³ Exhibit X, Parameters and Guidelines, adopted February 28, 2002, pages 12-13.

²⁵⁴ Exhibit X, Parameters and Guidelines, adopted February 28, 2002, page 15.

²⁵⁵ Exhibit A, IRC, page 709.

17568.²⁵⁶ Moreover, the construction costs were funded by bonds issued pursuant to a ballot measure, Proposition F, passed by the voters in the November 2000 general election.²⁵⁷

The Controller determined that the claimant did not incur any increased costs to construct or remodel its shelters, within the meaning of Government Code section 17514, because the “the construction costs incurred were funded entirely by the city’s taxpayers via property tax assessments.”²⁵⁸

The claimant argues that the use of bond funds does not disqualify the claimant from mandate reimbursement. The claimant states that “[t]he City was free to use its general fund for construction; but nothing in the Constitution, statutes or case law says that any local government must exhaust all its general fund monies before seeking funding elsewhere.” The claimant continues: “Moreover, the state legislature passed the unfunded mandate and the state should not be able to shirk its responsibility to reimburse the City simply because the City in its management of its financial obligations chose to have a bond initiative rather than empty its general fund.”²⁵⁹

The claimant is wrong, and the claim for reimbursement of construction costs is untimely. As the Controller points out, the claimant here never claimed the construction costs in its annual reimbursement claims.²⁶⁰ Government Code section 17560 permits a claimant by February 15 following a fiscal year, to “file an annual reimbursement claim that details the costs actually incurred for that fiscal year.”²⁶¹ Section 17568 provides that if a local agency or school district submits an otherwise valid reimbursement claim to the Controller after the deadline specified in Section 17560, the Controller shall reduce the reimbursement claim in an amount equal to 10 percent of the amount that would have been allowed had the reimbursement claim been timely filed. In addition, section 17568 states that “[i]n no case shall a reimbursement claim be paid that is submitted more than one year after the deadline specified in Section 17560.”²⁶² These provisions of the Government Code clearly place the burden on the claimant to timely and completely claim its mandated costs. Here, the claimant did not claim construction expenditures that the Controller found were part of an “ongoing project for the City of Los Angeles that involved a ballot measure in the November 2000 general election.”²⁶³ Instead, the claimant only “inquired about the eligibility of costs it incurred for the construction and renovation of animal

²⁵⁶ Government Code section 17568 provides: “In no case shall a reimbursement claim be paid that is submitted more than one year after the deadline specified in Section 17560.”

²⁵⁷ Exhibit A, IRC, page 709.

shelters under the mandated program” during the course of audit fieldwork.²⁶⁴ The claimant’s plea for reimbursement for these costs is thus made far too late.

Moreover, where a local agency has raised revenues outside its appropriations limit to cover the cost of mandated activities, funds thus expended are not reimbursable, based on the history and purpose of article XIII B, section 6, and case law interpreting it. Article XIII B was adopted by the voters less than 18 months after the addition of article XIII A to the state Constitution, and was billed as “the next logical step to Proposition 13.”²⁶⁵ The California Supreme Court, in *County of Fresno* explained:

Section 6 was included in article XIII B in recognition that article XIII A of the Constitution severely restricted the taxing powers of local governments. (See *County of Los Angeles I, supra*, 43 Cal.3d at p. 61.) The provision was intended to preclude the state from shifting financial responsibility for carrying out governmental functions onto local entities that were ill equipped to handle the task. (*Ibid.*; see *Lucia Mar Unified School Dist. v. Honig* (1988) 44 Cal.3d 830, 836, fn. 6.) Specifically, it was designed to protect the tax revenues of local governments from state mandates that would require expenditure of such revenues. Thus, although its language broadly declares that the “state shall provide a subvention of funds to reimburse ... local government for the costs [of a state-mandated new] program or higher level of service,” read in its textual and historical context section 6 of article XIII B requires subvention only when the costs in question can be recovered *solely from tax revenues*.²⁶⁶

Because reimbursement is limited to costs that are recovered solely from tax revenues, not every local agency, and not every state mandate is subject to the restrictions of article XIII B, section 6. Redevelopment agencies, in particular, have been identified by the courts as being exempt from the restrictions of article XIII B, because they are funded by additional levies in excess of the base property tax. In *Bell Community Redevelopment Agency*, the court concluded that bonds issued by a redevelopment agency and repaid with tax increment revenues are not appropriations subject to limitation.²⁶⁷ The court reasoned that to construe tax increment payments as appropriations subject to limitation “would be directly contrary to the mandate of section 7,” which provides that “Nothing in this Article shall be construed to impair the ability of the state or of any local government to meet its obligations with respect to existing or future bonded indebtedness.”²⁶⁸

Here, the Proposition F funds are substantially similar to redevelopment bond funds, in that they were authorized by the voters and are paid by a special assessment in excess of the state and

²⁶⁷ *Bell Community Redevelopment Agency v. Woolsey* (1985) 169 Cal.App.3d 24.

²⁶⁸ *Bell Community Redevelopment Agency v. Woolsey* (1985) 169 Cal.App.3d 24, 31 [quoting article XIII B, section 7].

local property taxes collected by the City. And, just as in *Bell Community Redevelopment Agency*, to hold the funds collected under Proposition F to be subject to the appropriations limit of article XIII B would be wholly inconsistent with article XIII B, section 7, which states that “[n]othing in this Article shall be construed to impair the ability of...any local government to meet its obligations with respect to existing or future bonded indebtedness.”²⁶⁹ Put simply, *County of Fresno* and *Bell Community Redevelopment Agency* make clear that reimbursement is not required when a mandate is paid for with funds other than local tax revenues.

Based on the foregoing, the Commission finds that the Controller’s determination not to reimburse costs for construction of new facilities, which were not claimed in the claimant’s annual reimbursement claim filings and which were funded by a local bond measure repaid by an additional assessment on real property, is correct as a matter of law.

F. The Claimant’s Allegation That the Controller Failed to Provide Adequate Time to Comply With the Requirements of the Audit Is Irrelevant, and Ignores the Claimant’s Burden to Support Costs Claimed.

The Parameters and Guidelines provide that all costs must be traceable to source documents. Such documents, in turn, must “show evidence of the validity of such costs and their relationship to the mandate.” And, all documentation in support of claimed costs “shall be made available to the State Controller’s Office, as may be requested.” Such documents must be kept on file during the period subject to audit, in accordance with Government Code section 17558.5.²⁷⁰

With respect to this audit and IRC, it is undisputed that the claimant filed its initial reimbursement claims for fiscal years 1998-1999, 1999-2000, and 2000-2001 on September 4, 2002.²⁷¹ Those claims were first paid in August 2006.²⁷² An entrance conference was held on April 28, 2009, and the Controller’s audit staff and the claimant’s staff worked closely until November 2009, when the audit was placed on hold due to staffing changes at the Controller’s audit bureau. It is also undisputed that on July 19, 2010, new auditing staff and a new auditor-in-charge held a new entrance conference, and requested additional documentation. An exit conference was held on January 12, 2011, at which time the Controller’s audit staff indicated that the final audit report would be issued in early April. The Controller issued the draft audit report on March 10, 2011, and issued the final audit report on April 6, 2011.²⁷³

The Controller disallowed costs claimed throughout the audit on the basis of missing or incomplete documentation, despite the Controller’s assertion that it “worked with the city’s staff to not only obtain proper supporting documentation, but also to arrange for alternative methods to support claimed costs.” The Controller argues that it attempted to provide the claimant with

²⁶⁹ California Constitution, article XIII B, section 7.

²⁷⁰ Exhibit X, Parameters and Guidelines, adopted February 28, 2002, page 15.

²⁷¹ Exhibit A, IRC, pages 737, 763, 779.

²⁷² Exhibit D, Controller’s Response to the Request for Additional Information, pages 7; 9; 13; 16.

²⁷³ Exhibit A, IRC, pages 16-18; 711-714; Exhibit B, Controller’s Late Comments on the IRC, pages 24-26.

the opportunity to support claimed costs, but “[i]t is unreasonable for the city to state that it did not have enough time to provide supporting documentation, as the city is required to maintain supporting documentation for costs claimed.”²⁷⁴

The claimant argues that it was “denied necessary time to comply with the requirements of the audit due to the SCO’s placing the audit on hold for staffing changes for nine months which left the City having to assemble documentation for a huge operation with less time than was provided by law.”²⁷⁵ The claimant asserts that “[d]ue to the size of the City’s Animal Services Department, there were millions of line items to go through in order to locate some of the requested information that dated back as far as 12 years.” In addition, the claimant states that “some of the invoices had been destroyed as they exceeded the time limitation for record retention under the law.”²⁷⁶ The claimant argues that it “cannot be expected to have to hold on to records from 1998 for an indeterminate amount of time and be forced to retain all detailed expenditure records.” The claimant concludes that “[s]uch a record retention requirement would cause a burden that is both inefficient and unnecessary.”²⁷⁷

The claimant is wrong. The record retention requirements for mandated costs are stated in the Parameters and Guidelines, which are binding on the parties. The Parameters and Guidelines adopted February 28, 2002, state: “Pursuant to Government Code section 17558.5, these documents must be kept on file by the agency submitting the claim for a period of no less than two years after the later of (1) the end of the calendar year in which the reimbursement claim is filed or last amended, or (2) if no funds are appropriated for the fiscal year for which the claim is made, the date of initial payment of the claim.”²⁷⁸ The amended Parameters and Guidelines, adopted January 26, 2006, and applicable to fiscal years 2005-2006 and following, state as follows:

Pursuant to Government Code section 17558.5, subdivision (a), a reimbursement claim for actual costs filed by a local agency or school district pursuant to this chapter is subject to the initiation of an audit by the Controller no later than three years after the date that the actual reimbursement claim is filed or last amended, whichever is later. However, if no funds are appropriated or no payment is made to a claimant for the program for the fiscal year for which the claim is filed, the time for the Controller to initiate an audit shall commence to run from the date of initial payment of the claim. In any case, an audit shall be completed not later than two years after the date that the audit is commenced. All documents used to support the reimbursable activities, as described in Section IV, must be retained during the period subject to audit. If an audit has been initiated by the Controller

²⁷⁴ Exhibit B, Controller’s Late Comments on the IRC, page 26.

²⁷⁵ Exhibit A, IRC, page 16.

²⁷⁶ Exhibit A, IRC, page 17 [citing to Government Code section 34090, requiring record retention period of two years].

²⁷⁷ Exhibit A, IRC, page 17.

²⁷⁸ Exhibit X, Parameters and Guidelines, adopted February 28, 2002, page 15.

during the period subject to audit, the retention period is extended until the ultimate resolution of any audit findings.²⁷⁹

Thus, in accordance with Government Code section 17558.5 and the Parameters and Guidelines, when claims are not paid the record retention requirement is tolled indefinitely, until two-years after payment is made. Beginning July 2005, the Parameters and Guidelines expanded that requirement to three-years after payment is made and included a requirement to retain the documents until the ultimate resolution of the audit.

Here, the Controller has documented that claims for fiscal years 1998-1999, 1999-2000, and 2000-2001 were paid in part beginning in August 2006.²⁸⁰ The claimant states that claims for fiscal years 2001-2002 and 2002-2003 were not paid as of the time of filing this IRC.²⁸¹ Thus, in accordance with the 2002 Parameters and Guidelines, “documents must be kept on file by the agency submitting the claim for a period of no less than two years after...the date of initial payment of the claim.”²⁸² That provision mirrored the requirement to initiate an audit under Government Code section 17558.5, as it read in February 2002, when the Parameters and Guidelines were adopted.²⁸³ Later that same year, and effective January 1, 2003, section 17558.5 was amended to provide that a reimbursement claim would be subject to audit for three years, beginning with either the date the claim was filed or last amended, or the date of the initial payment of the claim.²⁸⁴ The claiming instructions revised in September 2003, reflect the change to section 17558.5, and thus provide as follows:

[A] reimbursement claim for actual costs filed by a local agency or school district pursuant to this chapter is subject to the initiation of an audit by the Controller no later than three years after the date that the actual reimbursement claim is filed or last amended, whichever is later. However, if no funds are appropriated or no payment is made to a claimant for the program for the fiscal year for which the claim is filed, the time for the Controller to initiate an audit shall commence to run from the date of initial payment of the claim.²⁸⁵

In addition, the claiming instructions go on to directly link the document retention requirement to the audit period:

All documents used to support the reimbursable activities, must be retained during the period subject to audit. If an audit has been initiated by the Controller during

²⁷⁹ Exhibit X, Parameters and Guidelines, amended January 26, 2006, page 20.

²⁸⁰ Exhibit D, Controller’s Response to the Request for Additional Information, pages 7; 9; 13; 16

²⁸¹ Exhibit A, IRC, page 6.

²⁸² Exhibit X, Parameters and Guidelines, adopted February 28, 2002, page 15.

²⁸³ See Government Code section 17558.5 (Stats. 1995, ch. 945 (SB 11)).

²⁸⁴ Statutes 2002, chapter 1128 (AB 2834).

²⁸⁵ Exhibit A, IRC, page 108 [Excerpt of Claiming Instructions, Revised 09/03].

the period subject to audit, the retention period is extended until the ultimate resolution of any audit findings.²⁸⁶

Then, in January 2006, nearly eight months before any fiscal year claims had been paid, the Parameters and Guidelines were amended consistently with Government Code section 17558.5, to reflect the three year period for the Controller to initiate and audit, and to expressly require that once an audit is initiated, “the retention period is extended until the ultimate resolution of any audit findings.”²⁸⁷ Thus, while the original Parameters and Guidelines and claiming instructions stated the document retention requirements based on the state of the law as it then existed, at the time the claims were paid, the document retention requirements had been extended by virtue of the amended provisions of Government Code section 17558.5, the updated claiming instructions, and the amendment of the Parameters and Guidelines on January 26, 2006.²⁸⁸

The Commission has previously found, with respect to the 2002 amendments to Government Code section 17558.5, that to the extent the amended section promotes an expansion of the period of limitation for the Controller to initiate an audit, it applies to any pending claims or potential audits not yet time-barred.²⁸⁹ As noted above, the claimant’s fiscal year 1998-1999, 1999-2000, and 2000-2001 claims were filed in September 2002. Thus, those years were subject to the two year period of limitation to initiate the audit at the time filed. But because section 17558.5 was amended, effective September 30, 2002 which is *before* the period expired with respect to those initial claims, to expand the limitation period applicable to the Controller’s audits to three years, the Controller receives the benefit of the extra time and claimant was required to retain its documentation for three years or until the audit and any challenges to the audit are completed.²⁹⁰

Accordingly, because the document retention requirement of the Parameters and Guidelines is inextricably linked to the period of limitation for the Controller to initiate an audit, the amendment of the Parameters and Guidelines in January 2006, prior to the expiration of the audit period (and the expiration of the document retention period) applies. Moreover, the intervening update to the claiming instructions provides notice to the claimant of both the change in the Government Code, and its effect on the document retention period. To the extent the Controller’s authority to audit is expanded by extending the period of limitation, the Controller’s authority to compel the claimant to produce documentation when auditing must also be expanded.

The claimant argues that it “cannot be expected” to comply with burdensome document retention requirements that create “indeterminate” retention periods.²⁹¹ To the contrary, the retention

²⁸⁶ Exhibit A, IRC, pages 108-109 [Excerpt of Claiming Instructions, Revised 09/03].

²⁸⁷ Exhibit X, Parameters and Guidelines, amended January 26, 2006, page 20.

²⁸⁸ Exhibit A, IRC, page 108; Exhibit X, Parameters and Guidelines, amended January 26, 2006, page 20.

²⁸⁹ *Douglas Aircraft Co. v. Cranston* (1962) 58 Cal.2d 462, 465.

²⁹⁰ *Douglas Aircraft Co. Cranston* (1962) 58 Cal.2d 462, 465.

²⁹¹ Exhibit A, IRC, page 17.

periods are no less determinate than the period that the claim is subject to audit. Government Code section 17558.5 provides the Controller three years to audit a reimbursement claim, and that period begins either when the claim is filed or last amended, or if no funds are appropriated, the period is tolled until the subject claim is paid, as here.²⁹² After that, the Controller has an additional two years, once initiated, to complete its audit, during which time the 2006 Parameters and Guidelines require retention of the supporting documents, consistently with the Controller's audit authority under the Government Code and the claimant's burden to support its costs claimed.

Based on the foregoing, even though the Parameters and Guidelines adopted February 28, 2002 and the initial claiming instructions revised September 2002 provided for a two-year period to initiate an audit, and required documentation to be retained for only that same period, the period was expanded to three years by amendment of the Government Code, revision of the claiming instructions, and amendment of the Parameters and Guidelines effective July 1, 2005, before the triggering event that began the running of the statutory period (i.e., the initial payment of the claim in August 2006). As noted, the claimant had ample notice of the change, via the revised claiming instructions, and all parties are deemed to know of changes to state statute.

More importantly, all versions of the Parameters and Guidelines place the burden on the claimant to support all costs claimed with source documentation, which must be retained during the period subject to audit. In other words, it is the claimant's burden to prove the claim, and based on the foregoing analysis, the claimant was on notice of the document retention requirements.

Furthermore, the claimant complains of being denied the time "provided by law" to respond to the requirements of the audit. Government Code section 17558.5 requires an audit to be completed "not later than two years after the date that the audit is commenced." This is a requirement on the Controller to complete its audits promptly; it is not intended to provide a claimant with up to two years to remedy a poorly-supported and insufficiently-documented reimbursement claim.

Moreover, the undisputed evidence in the record shows that the claimant had a period of seven months, and an additional period of nine months, in which the Controller's audit staff was actively working with the claimant to resolve the issues of the audit and to make clear the documentation necessary to support the claim.²⁹³ And, the Controller asserts, "[t]hroughout the audit process, we worked with the city's staff to not only obtain proper supporting documentation, but also to arrange for alternative methods to support claimed costs."²⁹⁴

Based on the foregoing, the Commission finds that claimant's allegation that the Controller failed to provide adequate time to comply with the requirements of the audit is irrelevant, and ignores the claimant's burden to support costs claimed.

²⁹² Statutes 2002, chapter 1128.

²⁹³ Exhibit A, IRC, pages 16-18; 711-714; Exhibit B, Controller's Late Comments on the IRC, pages 24-26.

²⁹⁴ Exhibit B, Controller's Late Comments on the IRC, page 26.

V. Conclusion

Based on the foregoing analysis, the Commission partially approves this IRC, and requests, pursuant to Government Code section 17551(d) and section 1185.9 of the Commission regulations, that the Controller reinstate costs that relate to the following incorrect reductions to the extent the claimant can provide documentation to support the validity of the costs incurred. Section VI. of the Parameters and Guidelines require claimants to provide source documents that show the evidence of the validity of such costs and their relationship to the mandate. The supporting documentation must be kept on file by the agency during the audit period required by Government Code section 17558.5. In this respect, claimants are required by Food and Agriculture Code section 32003 to maintain records on animals that are taken up, euthanized, or impounded. Such records shall identify the date the animal was taken up, euthanized, or impounded; the circumstances surrounding these events; and the names of the personnel performing these activities.²⁹⁵

- Any reduction of costs relating to the Controller’s exclusion of specified “birds” and “other animals” “legally allowed as personal property” and thus subject to the protection of the mandated activities.
- Any reduction of costs relating to the exclusion of animals deemed treatable upon arrival at the shelter and later euthanized during the increased holding period because they became non-rehabilitatable.
- Any reduction of costs relating to the Controller’s recalculation of costs following the *Purifoy* decision and its use of an average number of reimbursable days, to the extent the recalculation resulted in an exclusion of “eligible animals” correctly held under the law.

The Commission further finds that all other reductions made by the Controller are correct as a matter of law and not arbitrary, capricious, or entirely lacking in evidentiary support.

Finally, the Commission finds that the Controller’s determination not to consider claimant’s request, made during the audit, for reimbursement for the construction of new facilities is correct as a matter of law, and that the claimant’s allegation that the Controller failed to provide adequate time to comply with the requirements of the audit is irrelevant.

²⁹⁵ It is not clear from the record whether the Controller actually requested these records from the claimant based on the Controller’s interpretation that such costs were not reimbursable.

DECLARATION OF SERVICE BY EMAIL

I, the undersigned, declare as follows:

I am a resident of the County of Sacramento and I am over the age of 18 years, and not a party to the within action. My place of employment is 980 Ninth Street, Suite 300, Sacramento, California 95814.

On August 25, 2016 I served the:

Draft Proposed Decision, Schedule for Comments, and Notice of Hearing

Animal Adoption, 13-9811-I-02

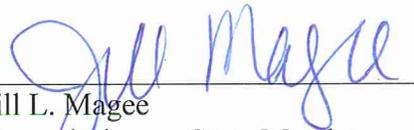

Civil Code Sections 1834 and 1846; Food and Agriculture Code Sections 31108, 31752, 31752.5, 31753, 32001, and 32003; As Added or Amended by Statutes 1998, Chapter 752 (SB 1785)

Fiscal Years 1998-1999, 1999-2000, 2000-2001, 2001-2002, 2002-2003; 2005-2006, 2006-2007, and 2007-2008

City of Los Angeles, Claimant

by making it available on the Commission's website and providing notice of how to locate it to the email addresses provided on the attached mailing list.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct, and that this declaration was executed on August 25, 2016 at Sacramento, California.

City of Los Angeles, Claimant

Dear Ms. Halsey:

The State Controller's Office (SCO) is transmitting our response to the Commission's Draft Proposed Decision dated August 25, 2016, for the above IRC.

The Commission partially approved the IRC and recommended that the SCO reinstate a portion of the costs to the extent the claimant can provide documentation to support the validity of the costs incurred. The SCO would like to provide its comments in relation to the issues addressed in the Draft Proposed Decision.

If you have any questions, please contact me by telephone at (916) 323-5849.

Sincerely,

A handwritten signature in black ink, appearing to read "Jim L. Spano".

TO THE COMMISSION DRAFT PROPOSED DECISION
DATED AUGUST 25, 2016
RELATED TO AN INCORRECT REDUCTION CLAIM BY
THE CITY OF LOS ANGELES**

Animal Adoption Program

Commission's Analysis

In its Draft Proposed Decision (DPD), dated August 25, 2016, the Commission partially approved the IRC and requested that the SCO reinstate costs that relate to the following incorrect reductions to the extent the claimant can provide documentation to support the validity of the costs incurred. The Commission identified three categories of incorrect reductions:

1. Any reduction of costs relating to the SCO's exclusion of specified "birds" and "other animals" "legally allowed as personal property" and thus subject to the protection of the mandated activities;
2. Any reduction of costs relating to the exclusion of animals deemed treatable upon arrival at the shelter and later euthanized during the increased holding period because they became non-rehabilitatable; and
3. Any reduction of costs relating to the SCO's recalculation of costs following the *Purifoy* decision and its use of an average number of reimbursable days, to the extent the recalculation resulted in an exclusion of "eligible animals" correctly held under the law.

The Commission further found that all other reductions made by the SCO were correct.

SCO's Comments

The SCO maintains that the reductions in costs identified above were consistent with the intent of the mandated program and the reimbursable criteria. The SCO would like to offer comments relating to each one of the reductions.

1. **Reduction of costs relating to the SCO's exclusion of specified "birds" and "other animals" "legally allowed as personal property"**

The SCO analyzed a significant number of animal data obtained from the claimant's Chameleon Database system. The table on the following page represents the total number of animal records the city provided and the SCO reviewed and analyzed during the course of the audit.

Fiscal Year	Animal Record Type			Total
	Dogs and Cats	Other Animals	Birds	
2000-2001	63,392	1,358	1,593	66,343
2001-2002	58,688	2,061	2,637	63,386
2002-2003	54,386	2,590	1,741	58,717
2005-2006	46,910	4,266	2,926	54,102
2006-2007	46,311	4,254	2,015	52,580
2007-2008	50,391	3,255	2,447	56,093
Total	320,078	17,784	13,359	351,221

The city ran a query from its Chameleon system during the course of the audit and provided the SCO with a listing of all animals by intake date for consistency. The city provided the data via Excel spreadsheets that allowed the SCO to analyze and sort the animal statistical information. The animal data contained the following fields:

- Animal ID number
- Intake Date
- Intake Type (primarily Stray, Owner Surrendered, Wildlife, Foster, Evidence, etc.)
- Intake Sub-Type (primarily Over the Counter, Return, Caught, Left at Shelter, Pick up, Humane, etc.)
- Animal Type (dog, cat, bird, other animal)
- Primary Breed (such as dove, duck, pigeon, chicken, mallard, parakeet, etc for birds; rabbit, turtle, slider, guinea pig, rat, hamster, snake, etc. for other animals; and various breed names for dogs and cats)
- Outcome Date
- Outcome Type (Adoption, Redeemed, Missing, Escaped, Released, Body Disposition, Died, Euthanized)
- Outcome Subtype (Irremediably Suffering, In Kennel, Medical, 8 Weeks [for newborn animals], Behavior Observation, Owner New, Rescue Group, etc.)

The SCO calculated total days held for each animal record using the intake and outcome dates.

The line items of the animal data contained a multitude of variable possibilities for each record including the fields identified above. The SCO analyzed this data by sorting various fields and grouping the population into subgroups, from which the SCO determined which animals met the requirements of the mandated program to be counted for reimbursement. Any animal record excluded from the reimbursement potentially contained multiple fields with non-reimbursable components.

This analysis was not arbitrary. The SCO staff conducted extensive interviews at various animal shelters at the City of Los Angeles and across the State, as many local agencies use the same animal tracking database system, and used animal shelter staff expertise to properly understand the animal data, categorize various animal populations without bias, and determine allowable animal populations that meet the criteria of the parameters and guidelines for this program.

The SCO's analysis of the claimant's Chameleon animal data is extensive. For example, the listing of all animal records for FY 2007-2008, including dogs and cats, other animals, and birds, would contain about 700 pages. This does not include pages containing the various analysis and data sorting activities performed to arrive at the end result. The SCO is providing a listing of animals for categories of Other Animals (Tab 3) and Birds (Tab 4) for FY 2007-2008 as an example.

The Commission made distinct comments in its DPD about the SCO excluding "ineligible other animals such as rodents, livestock, or wild animals" and "ineligible birds, such as pigeons, doves, ducks, chickens, owls, pheasants, mallards, and gamefowls" from reimbursement. The SCO wishes to point out that the list of exclusions noted in the Final Audit Report dated April 6, 2011, included all examples of excluded animals or birds, regardless of the materiality level. These exclusions were immaterial relative to all other exclusions that the Commission agreed with. For example, for FY 2007-2008, the exclusions in question for categories of other animals and birds combined totaled about 1.8% relative to all other exclusions that are not disputed.

The SCO excluded animals categorized as wildlife largely due to the fact that wild animals or wild birds are very unlikely to become personal property and they do not meet the definition of a stray or abandoned animal. The claimant's database specifically identified an intake type as "wildlife" and did not categorize wild animals primarily as "stray" or "abandoned" because in the vast majority of cases, these animals are not adoptable. The vast majority of wild animals are taken in injured at the shelters. Many of them die, are euthanized shortly after arrival, or are released if they become well. Therefore, the vast majority of these animal categories automatically are not allowable due to other factors. The actual exclusions of wild animal or wild bird categories just for the wildlife status alone were not only immaterial, but also appeared consistent with the intent of the mandate to keep stray or abandoned animals longer to increase their chances of becoming adoptable.

The Commission made some assumptions in its analysis of the SCO's exclusions related to "other animals" and "birds." The Commission used the example of rodents that were excluded as "other ineligible animals." The Commission writes "the Controller excluded all rodents, without evidence of the type of rodents excluded or whether the rodent can legally be allowed as a pet. Therefore, the Controller's exclusion of rabbits, guinea pigs, and hamsters.... is incorrect." The Commission's statement is factually inaccurate. It relies on the assumption that the claimant classified rabbits, guinea pigs, and hamsters as rodents in its animal records. The claimant classified those animals as separate categories or primary breeds. The SCO has deemed all stray rabbits, guinea pigs, and hamsters allowable, if those animals died during the increased holding period or were ultimately euthanized, per the requirements of the parameters and guidelines. The SCO considered rodents excluded only if they were categorized as wildlife upon intake. Such instances were extremely rare. The SCO's listing of excluded animals was an all-inclusive list of all exclusions regardless of how incidental those might have been. For example, for FY 2007-2008, the exclusions in question for category of "other animals" comprised only 0.2% relative to other proper exclusions noted for that fiscal year.

The Commission also pointed out the SCO's exclusion of "birds, such as pigeons, doves, ducks, chickens, owls, pheasants, mallards, and gamefowls." These exclusions were also immaterial relative to other proper exclusions, totaling about 3.7% for FY 2007-2008. For those excluded, the two most frequent material categories included pigeons and gamefowls. The pigeons were taken in as predominantly "wildlife." Many were injured and died, were euthanized shortly after arrival, or were released. The gamefowls were typically impounded under intake type

“evidence” and predominantly included fighting birds that were confiscated for humane reasons and were euthanized either because of their injuries or aggressive behavior. These birds were not stray or abandoned and did not meet the reimbursable criteria of making animals adoptable.

The Merriam-Webster Dictionary defines the word “stray” as: a) an animal (such as a cat or dog) that is lost or has no home or b) a domestic animal that is wandering at large or is lost. It is reasonable to categorize some wild animals as wildlife rather than stray or abandoned. It is also reasonable to conclude that wild animals may not meet the definition of adoptable animal as well.

Civil Code section 1834.4, subdivision (a), states:

It is the policy of the state that no adoptable animal should be euthanized if it can be adopted into a suitable home. Adoptable animals include only those animals eight weeks of age or older that, at or subsequent to the time the animal is impounded or otherwise taken into possession, have manifested no sign of a behavioral or temperamental defect that could pose a health or safety risk or otherwise make the animal unsuitable for placement as a pet, and have manifested no sign of disease, injury, or congenital or hereditary condition that adversely affects the health of the animal that is likely to adversely affect the animal’s health I the future.

The intent of this mandate was to increase the holding period for stray or abandoned animals that could potentially be adopted or redeemed. The SCO’s exclusion of wild animals or various species consistent with wildlife, fighting birds impounded as “evidence” with aggressive behavior, or other birds considered wild took into account the fact that the animals were not stray nor abandoned, they were unlikely to be adopted, and did not meet the definition of an “adoptable” and “treatable” animal.

The SCO’s methodology to exclude these animals was not random or arbitrary. The SCO’s staff conducted extensive interviews at various animal shelters in the City of Los Angeles and across the State and used shelter staff expertise to properly understand the animal data, categorize various animal populations without bias, and determine allowable animal populations that meet the criteria of the parameters and guidelines for this program.

To demonstrate the relative immateriality of this issue at hand, the SCO revisited its analysis of the “other animals” and “birds” animal census data for FY 2007-2008. Because this process is time-consuming, the SCO will demonstrate only one year’s example. The table on the following page represents the data statistics for categories of Other Animals and Birds for FY 2007-2008.

Description / Category of Animal Record	Number of Records		
	Other Animals	Birds	Total
Total number of records FY 2007-2008	3,255	2,447	5,702
Body Disposition (found dead)	(58)	(35)	(93)
Missing animals or escaped	(5)	(28)	(33)
Data input errors (negative holding period days)	(6)	(2)	(8)
Owner surrendered / relinquished	(901)	(313)	(1,214)
Ultimately adopted	(402)	(276)	(678)
Ultimately redeemed	(19)	(15)	(34)
Foster care	(20)	(2)	(22)
Ultimately released	(635)	(505)	(1,140)
Euthanized newborns (less than 8 weeks old)	(163)	(6)	(169)
Irremediably suffering (euthanized)	(121)	(238)	(359)
Euthanized same day (either on the field or upon arrival)	(136)	(539)	(675)
Euthanized following day for suffering and medical reasons	(101)	(233)	(334)
Euthanized days 3-6 (predominantly medical reasons)	(55)	(57) ¹	(112)
Died same day upon arrival	(12)	(47)	(59)
Died after the increased holding period	(383)	(50)	(433)
Allowable per audit report	(232)	(11)	(243)
Difference	6	90	96 ²

¹ 48 out of 57 birds euthanized on days 3-6, were euthanized on day 3 for aggressive behavior and belonged to Evidence intake type and Humane sub-type.

² 96 previously excluded other animals and birds comprise 1.8% of total exclusions of other animals and birds in FY 2007-2008.

The addition of 96 unallowable animals previously excluded from reimbursement for various reasons addressed above would result in additional \$7,356 in care and maintenance costs for FY 2007-2008.

2. Exclusion of animals deemed treatable upon arrival at the shelter and later euthanized during the increased holding period because they became non-rehabilitatable

The Commission found that the SCO's interpretation of the plain language of the parameters and guidelines was incorrect. The SCO relied on the phrase "animals that die during the increased holding period or are ultimately euthanized" as a judgement criteria to determine eligible animals for reimbursement. The Commission stated that this phrase was "vague and ambiguous" and needed further interpretation.

The SCO used the language in the parameters and guidelines as its primary judgement criteria. The SCO conducts its audits to the plain language of the criteria to avoid any bias. The Animal Adoption program's parameters and guidelines contain very detailed descriptions of the reimbursable activities, including very specific calculation steps, formulas, and animal population exclusions. The SCO used the criteria set forth by the Commission without exercising subjective interpretations, especially when the criteria was written with such specificity and detail. The SCO had no reason to treat this phrase as vague and in need of interpretation, when all other phrases, descriptions of activities, exclusions, and formulas contained very specific language and appeared to be intentional. Specifically, the use of the

word “or” indicated the distinct separation between words “die” and “ultimately euthanized” as two unique categories.

Moreover, the statement “die during the increased holding period or are ultimately euthanized” was also consistent with the type of details captured in the claimant’s Chameleon database for all animal records. The animal records contained brief explanation categories if the animal was euthanized for medical reasons, behavioral reasons, time and space constraints, etc. The data did not provide further detail as to the health status of the animal from arrival to demise. However, the DPD described a hypothetical scenario of an animal coming in sick being deemed treatable, then non-rehabilitatable, and ultimately euthanized within the increased holding period as a result of its health changing. This scenario is simply impossible to track with the data being captured. The vast majority of animals that were euthanized within the first few days after impoundment were recorded as either irremediably suffering or having medical issues. If the animal record showed an animal being euthanized on day three for medical reasons, the shelter staff made a humane decision to relieve that animal of its suffering. Shelters across the State will delay euthanizing animals prematurely, as required by this mandate. This was evident from reviewing the animal records and statistics during the course of the audits for the Animal Adoption program. However, it is impossible to determine whether the animals euthanized for medical reasons would fit in the hypothetical scenario described in the DPD.

The recorded reasons for disposition of the animals are brief descriptions from the drop-down menu per the design of the claimant’s Chameleon system and its fields. The animals that were euthanized in the first few days after coming into the shelters predominantly suffered from serious medical conditions and therefore were not considered treatable or adoptable. The exclusion of these animals contained no bias from the SCO and was consistent with the plain language in the parameters and guidelines, for the lack of any other judgement criteria.

For those animals euthanized during the increased holding period, the level of detail necessary to review each individual animal’s health status and progression of their disease prior to euthanasia simply isn’t available from the animal data statistics maintained in the claimant’s Chameleon database.

Hypothetically, the shelters’ vets could have records with such specific analysis as whether the animal was initially considered treatable and then changed to non-rehabilitatable. However, this task would be most time-consuming, without the potential of leading to any material results. We believe that such an exercise would be impractical and would include subjective bias.

3. SCO’s recalculation of costs following the *Purifoy* decision and its use of an average number of reimbursable days

The SCO’s use of the average increased holding period days was the most reasonable and appropriate methodology to compute allowable costs for this mandate. This methodology was derived by performing a detailed analysis of all possible animal intake scenarios for each day of the week. This methodology is also unbiased and mathematically sound. The claimant clearly agreed, as the claimed information also used the average increased holding period days as well to compute claimed costs.

The Commission suggested in its DPD that the SCO should evaluate each animal’s intake information to determine the actual increased holding period of each animal. However, this suggestion assumes that an infinite amount of detail exists in each animal record and also assumes a practical ease of performing such calculations. In reality, it is practically impossible.

The claimant's animal data averaged between 50,000 and 60,000 line items per fiscal year, as noted in our comments above. The animal census data contains each animal's date of impoundment and the date of outcome. The Controller computed each animal's total number of holding period days, but used an average number of reimbursable days to determine the allowable population of animals and to compute allowable costs.

In order to compute the actual increased holding period days for every animal on an individual basis, we would need to know what day of the week the animal was impounded. In order to do so, someone would have to manually open each animal record and check what day of the week an animal came into the shelter. They would then need to evaluate, based on the calendar of the specific week and year, the actual number of days in the increased holding period. Once the animal's eligibility was established, someone would need to compute each animal's allowable costs using the reimbursable days. This task would be impractical and most likely would not produce results materially different from using an average calculation.

The Commission suggested that using an average reimbursable days potentially excludes a marginal amount of "eligible animals." We concur. However, we believe that it is equally possible that the use of this average also includes an equal number of non-eligible animals as well. The use of a mathematical average assumes some outliers. But in this case, it provides the most reasonable and cost-effective way to analyze unusually large quantities of animal data. In fact, the large size of the animal population (as noted above) makes the use of an average value statistically more accurate and decreases the probability of error.

DECLARATION OF SERVICE BY EMAIL

I, the undersigned, declare as follows:

I am a resident of the County of Sacramento and I am over the age of 18 years, and not a party to the within action. My place of employment is 980 Ninth Street, Suite 300, Sacramento, California 95814.

On September 15, 2016, I served the:

SCO Comments on the Draft Proposed Decision

Animal Adoption, 13-9811-I-02

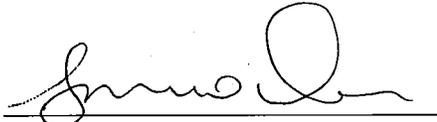

Civil Code Sections 1834 and 1846; Food and Agriculture Code Sections 31108, 31752, 31752.5, 31753, 32001, and 32003; As Added or Amended by Statutes 1998, Chapter 752 (SB 1785)

City of Los Angeles, Claimant

Dear Mr. Burdick, Ms. Yutan, and Ms. Kanemasu:

The Proposed Decision for the above-captioned matter is enclosed for your review.

Hearing

This matter is set for hearing on **Friday, October 28, 2016**, at 10:00 a.m., State Capitol, Room 447, Sacramento, California. Please let us know in advance if you or a representative of your agency will testify at the hearing, and if other witnesses will appear. If you would like to request postponement of the hearing, please refer to section 1187.9(b) of the Commission's regulations.

Special Accommodations

For any special accommodations such as a sign language interpreter, an assistive listening device, materials in an alternative format, or any other accommodations, please contact the Commission Office at least five to seven *working* days prior to the meeting.

Sincerely,

Heather Halsey
Executive Director

13-9811-I-02

City of Los Angeles, Claimant

EXECUTIVE SUMMARY

Overview

This Incorrect Reduction Claim (IRC) addresses reductions made by the State Controller's Office (Controller) to reimbursement claims made by the City of Los Angeles (claimant) for costs incurred during fiscal years 1998-1999, 1999-2000, 2000-2001, 2001-2002, 2002-2003, 2005-2006, 2006-2007, and 2007-2008, under the *Animal Adoption* program.

The following reductions are in dispute:

- Reductions of care and maintenance costs (Finding 3) based on budgeted expenditures claimed in lieu of documented actual costs, claimed expenditures unrelated to care and maintenance, and understated animal census data, resulting in an overstatement of costs per animal per day; overstatement of the population of eligible animal population, based on the exclusions from reimbursement expressed in the Parameters and Guidelines; and adjustment to the number of reimbursable days based on excluding Saturday as a business day in accordance with *Purifoy v. Howell* (2010) 183 Cal.App.4th 166;
- Reductions of salaries and benefits for the increased holding period (Finding 4) based on employee hours that the claimant did not support as being related to the mandate; and
- Reductions of necessary and prompt veterinary care costs (Finding 7) based on claiming estimated materials and supplies costs, and unsupported materials and supplies costs; and based on misstated and unallowable hours.

In addition, the claimant raises two issues that do not directly relate to the Controller's audit findings. First, the claimant alleges that reimbursement is required for the construction of new facilities to comply with the mandate, which were paid for by taxpayer-approved bonds, to be repaid from local property assessments. The claimant argues that the Controller inappropriately determined that because the claimant's general fund revenues were not applied to the

construction costs alleged, the claimant cannot assert “costs mandated by the state,” within the meaning of Government Code section 17514, and reimbursement is not required.¹ The Controller notes that construction or space acquisition costs were never claimed during the audit period, and only raised during the pendency of the audit report.² And second, the claimant argues that it was denied the necessary time to comply with the requirements of the audit because the Controller placed the audit on hold for nine months “which left the City having to assemble documentation for a huge operation with less time than was provided by law.”³

Staff finds, as detailed below, that some of the reductions are incorrect as a matter of law, or are arbitrary, capricious, or entirely lacking in evidentiary support and, thus, recommends that the Commission partially approve this IRC.

The Animal Adoption Program

The *Animal Adoption* program arose from amendments to the Civil Code and Food and Agriculture Code made by Statutes 1998, chapter 752 (SB 1785⁴). The purpose of the test claim statute was to carry out the state policy that “*no adoptable animal* should be euthanized if it can be adopted into a suitable home” and “*no treatable animal* should be euthanized.”⁵ Generally, the program increases the holding period to allow for the adoption and redemption of stray and abandoned dogs, cats, and other specified animals before the local agency can euthanize the animal, and requires:

- verification of the temperament of feral cats;
- posting of lost and found lists;
- maintenance of records for impounded animals; and
- that impounded animals receive “necessary and prompt veterinary care.”

On January 25, 2001, the Commission partially approved the Test Claim, for the increased costs in performing the following activities only:

1. Providing care and maintenance during the increased holding period for impounded dogs and cats that are ultimately euthanized. The increased holding period shall be measured by calculating the difference between three days from the day of capture and four business days from the day after impoundment, as specified below in 3 (a) and 3 (b), or six business days from the day after impoundment (Food & Agr. Code, §§ 31108, 31752);

¹ Exhibit A, IRC, pages 15-16.

² Exhibit B, Controller’s Late Comments on the IRC, page 1010.

³ Exhibit A, IRC, page 16.

⁴ Sometimes referred to as the Hayden Bill.

⁵ Civil Code section 1834.4, Penal Code section 559d, and Food and Agricultural Code section 17005 as added or amended by Statutes 1998, chapter 752.

2. Providing care and maintenance for four business days from the day after impoundment, as specified below in 3 (a) and 3 (b), or six business days from the day after impoundment, for impounded rabbits, guinea pigs, hamsters, pot-bellied pigs, birds, lizards, snakes, turtles, or tortoises legally allowed as personal property that are ultimately euthanized (Food & Agr. Code, § 31753);
3. For dogs, cats, and other specified animals held for four business days after the day of impoundment, either:
 - (a) Making the animal available for owner redemption on one weekday evening until at least 7:00 p.m., or one weekend day; or
 - (b) For those local agencies with fewer than three full-time employees or that are not open during all regular weekday business hours, establishing a procedure to enable owners to reclaim their animals by appointment at a mutually agreeable time when the agency would otherwise be closed (Food & Agr., Code §§ 31108, 31752, and 31753);
4. Verifying whether a cat is feral or tame by using a standardized protocol (Food & Agr. Code, § 31752.5);
5. Posting lost and found lists (Food & Agr. Code, § 32001);
6. Maintaining records on animals that are not medically treated by a veterinarian, but are either taken up, euthanized after the holding period, or impounded (Food & Agr. Code, § 32003); and
7. Providing “necessary and prompt veterinary care” for abandoned animals, other than injured cats and dogs given emergency treatment, that are ultimately euthanized (Civ. Code, §§ 1834 and 1846).

The Commission adopted the Parameters and Guidelines for this program on February 28, 2002. Those Parameters and Guidelines, in addition to the activities identified in the Test Claim Statement of Decision, as described above, provide reimbursement for one-time activities of developing policies and procedures; training; and developing or procuring computer software for maintaining records; as well as ongoing costs for:

- Acquisition of additional space or construction of new facilities, by purchase or lease, to provide appropriate or adequate shelter necessary to comply with the mandated activities during the increased holding period for impounded stray or abandoned dogs, cats, and other animals;⁶ and

⁶ Exhibit G, Proposed Parameters and Guidelines and Analysis, Hearing Item 4, February 28, 2002, pages 1607-1608.

- Remodeling/renovating existing facilities to provide appropriate or adequate shelter necessary to comply with the mandated activities during the increased holding period for impounded stray or abandoned dogs, cats, and other animals.⁷

On March 12, 2003, the Joint Legislative Audit Committee authorized an audit of the *Animal Adoption* mandate, which was completed by the Bureau of State Audits on October 15, 2003. The audit report recommended that the Legislature direct the Commission to amend the Parameters and Guidelines for the *Animal Adoption* mandate to correct the formula for determining the reimbursable portion of acquiring additional shelter space. In 2004, Assembly Bill (AB) 2224 (Stats. 2004, ch. 313) was enacted to direct the Commission to amend the Parameters and Guidelines for the *Animal Adoption* program to:

1. Amend the formula for determining the reimbursable portion of acquiring or building additional shelter space that is larger than needed to comply with the increased holding period to specify that costs incurred to address preexisting shelter overcrowding or animal population growth are not reimbursable.
2. Clarify how the costs for care and maintenance shall be calculated.
3. Detail the documentation necessary to support reimbursement claims under this mandate, in consultation with the Bureau of State Audits and the Controller's office.

On January 26, 2006, the Commission adopted the amended Parameters and Guidelines, applicable to claims beginning July 1, 2005, in accordance with AB 2224, to require, among other things, contemporaneous source documents to show the validity of costs claimed and their relationship to the reimbursable activities. The 2006 amendment also amended the formula for determining the reimbursable portion of acquiring or building additional shelter space and clarified the definition of “average daily census” of dogs and cats, for purposes of the formula used to calculate care and maintenance costs; this amendment is clarifying only, and does not affect the methodology used to calculate actual costs for this component.⁸

Procedural History

On September 4, 2002, the claimant signed its initial reimbursement claims for fiscal years 1998-1999, 1999-2000, and 2000-2001.⁹ On August 3, 2006, the Controller made initial payments on the fiscal years 1999-2000 and 2000-2001 claims.¹⁰ On August 10, 2006, the Controller made initial payment on the fiscal year 1998-1999 reimbursement claim.¹¹ On April 28, 2009, an audit

entrance conference was held.¹² On April 6, 2011, the Controller issued the final audit report.¹³ On April 7, 2014, claimant filed the IRC.¹⁴ On September 8, 2015, the Controller filed late comments on the IRC.¹⁵ Claimant did not file rebuttal to the Controller's comments.

On June 6, 2016, Commission staff issued a Request for Additional Information.¹⁶ On June 9, 2016, the Controller filed its Response to the Request for Additional Information.¹⁷ The claimant did not respond to the Request for Additional Information.

Commission staff issued the Draft Proposed Decision on August 25, 2016.¹⁸ On September 15, 2016, the Controller filed comments on the Draft Proposed Decision.¹⁹ Claimant did not file comments on the Draft Proposed Decision.

Commission Responsibilities

Government Code section 17561(d) authorizes the Controller to audit the claims filed by local agencies and school districts and to reduce any claim for reimbursement of state-mandated costs that the Controller determines is excessive or unreasonable.

Government Code Section 17551(d) requires the Commission to hear and decide a claim that the Controller has incorrectly reduced payments to the local agency or school district. If the Commission determines that a reimbursement claim has been incorrectly reduced, section 1185.9 of the Commission's regulations requires the Commission to send the decision to the Controller and request that the costs in the claim be reinstated.

The Commission must review questions of law, including interpretation of parameters and guidelines, de novo, without consideration of legal conclusions made by the Controller in the context of an audit. The Commission is vested with exclusive authority to adjudicate disputes over the existence of state-mandated programs within the meaning of article XIII B, section 6.²⁰ The Commission must also interpret the Government Code and implementing regulations in accordance with the broader constitutional and statutory scheme. In making its decisions, the Commission must strictly construe article XIII B, section 6 and not apply it as an "equitable

¹² Exhibit A, IRC, page 16.

remedy to cure the perceived unfairness resulting from political decisions on funding priorities.”²¹

With regard to the Controller’s audit decisions, the Commission must determine whether they were arbitrary, capricious, or entirely lacking in evidentiary support. This standard is similar to the standard used by the courts when reviewing an alleged abuse of discretion of a state agency.²²

The Commission must also review the Controller’s audit in light of the fact that the initial burden of providing evidence for a claim of reimbursement lies with claimant.²³ In addition, sections 1185.1(f)(3) and 1185.2(c) of the Commission’s regulations require that any assertions of fact by the parties to an IRC must be supported by documentary evidence. The Commission’s ultimate findings of fact must be supported by substantial evidence in the record.²⁴

Claims

The following chart provides a brief summary of the claims and issues raised and staff’s recommendation.

Issue	Description	Staff Recommendation
The Controller’s exclusion of “ineligible animals” when auditing allowable costs for care and maintenance (Finding 3) and necessary and prompt	The Parameters and Guidelines authorize local agencies to claim reimbursement for the cost of care and maintenance and prompt and necessary veterinary care for impounded stray or abandoned animals that “die during the increased holding period or are ultimately euthanized.” The Controller excluded from the population of “eligible animals” several categories of animals it claims are not within the scope of the mandated program, which resulted in a reduction of costs. The exclusions include, but are not limited to, the following:	<p><i>Partially Correct</i> – The Controller’s exclusion of eligible animals is correct as a matter of law, except for the following exclusions, which are incorrect as a matter of law and arbitrary, capricious, or entirely lacking in evidentiary support:</p> <ul style="list-style-type: none"> • The exclusion of animals deemed treatable upon arrival at the shelter and later euthanized during the increased holding period

²¹ *County of Sonoma v. Commission on State Mandates* (2000) 84 Cal.App.4th 1264, 1280, citing *City of San Jose v. State of California* (1996) 45 Cal.App.4th 1802, 1817.

²² *Johnston v. Sonoma County Agricultural Preservation and Open Space District* (2002) 100 Cal.App.4th 973, 983-984. See also *American Bd. of Cosmetic Surgery, Inc. v. Medical Bd. of California* (2008) 162 Cal.App.4th 534, 547.

²³ *Gilbert v. City of Sunnyvale* (2005) 130 Cal.App.4th 1264, 1274-1275.

²⁴ Government Code section 17559(b), which provides that a claimant or the state may commence a proceeding in accordance with the provisions of section 1094.5 of the Code of Civil Procedure to set aside a decision of the Commission on the ground that the Commission’s decision is not supported by substantial evidence in the record.

<p>veterinary care (Finding 7).</p>	<ul style="list-style-type: none"> • “Ineligible other animals such as rodents, livestock, or wild animals;” and ineligible birds, such as pigeons, doves, ducks, chickens, owls, pheasants, mallards, and gamefowls.” • Animals deemed treatable upon arrival at the shelter and later euthanized during the increased holding period because they became non-rehabilitatable. • Animals that may have been euthanized during the holding period because of the claimant’s misinterpretation of the required holding period in conflict with the Court of Appeal’s decision in <i>Purifoy v. Howell</i> (2010) 183 Cal.App.4th 166, which held that Saturday is not a “business day” for purposes of calculating the required holding period before an animal can be adopted or euthanized. 	<p>because they became non-rehabilitatable.</p> <ul style="list-style-type: none"> • Exclusions of “eligible animals” held for the required duration under <i>Purifoy</i>, based on the Controller’s recalculation of costs using an <i>average</i> number of days. <p>Any reduction of costs based on the incorrect exclusion of animals should be reinstated to the claimant to the extent the claimant can provide documentation to support the validity of the costs incurred.</p>
<p>The remaining reductions made in Finding 3 to care and maintenance costs claimed.</p>	<p>The Controller determined that the claimant did not support its total annual costs claimed, based on estimated or otherwise unsupported expenditures reported; claimed inaccurate animal census data; and incorrectly claimed the number of reimbursable days, based on <i>Purifoy</i>, which the Controller reexamined and calculated as an average.</p>	<p><i>Correct</i> – The Controller’s reductions on the basis of estimated or unsupported costs claimed for care and maintenance are correct as a matter of law and not arbitrary, capricious, or entirely lacking in evidentiary support.</p> <p>The Controller’s adjustments to the yearly animal census data and to the number of reimbursable days do not result in a reduction of costs, and therefore the Commission does not have jurisdiction to determine these issues.</p>
<p>Reductions made in Finding 4 to increased holding period costs.</p>	<p>The Controller reduced salaries and benefits claimed for making animals available for owner redemption or adoption on Saturdays, finding that the increased staffing required to comply with the mandate is only that which exceeds the minimum level of</p>	<p><i>Correct</i> – The approved activity is to make animals available for adoption or owner redemption; the Controller’s limitation of reimbursement is consistent</p>

	staffing required for a day which the shelters were not open.	with the Parameters and Guidelines and the purpose of the test claim statute. Thus, the adjustments are correct as a matter of law. In addition, there is no evidence in the record to support a finding that the Controller's decisions were arbitrary or capricious.
The remaining reductions made in Finding 7 to necessary and prompt veterinary care.	The Controller reduced costs claimed for necessary and prompt veterinary care on the basis of an inadequate time study, estimated and unsupported materials and supplies costs, and misstated and unallowable hours claimed.	<i>Correct</i> – The claimant has the burden to support costs claimed by documentation that shows the validity of the costs and their relationship to the mandate; absent such a showing, the Controller's reductions are correct as a matter of law.
Claimant's request to be reimbursed for construction and facilities acquisition costs.	The claimant sought reimbursement during the course of the audit for construction costs that were not previously claimed in the annual reimbursement claims, and which were paid for by bonds issued by the claimant and repaid by property assessments.	<i>Deny</i> – The costs alleged were not timely claimed and, in any case, the claimant does not experience costs mandated by the state where required activities are funded by other than proceeds of taxes.
Claimant's charge that it did not have sufficient time to respond to the audit and all reductions should be reinstated.	Claimant asserts that the Controller's change in audit staff, which resulted in a nine month hold during the pendency of the audit, denied the claimant the time required by law, and that the claimant should not be expected to maintain documentation beyond the underlying record retention requirements of the Government Code.	<i>Deny</i> – The two year period to complete an audit is not an entitlement of the claimant; it is a time limitation on the Controller. Moreover, the Parameters and Guidelines require claimants to maintain supporting documentation until a claim is no longer subject to audit, independent of the background record retention requirements of the Government Code.

Staff Analysis

- A. The Controller's Exclusions of What It Deems "Ineligible Animals" Are Partially Incorrect as a Matter of Law, and Are Arbitrary, Capricious, or Entirely Lacking in Evidentiary Support, Resulting in Some Incorrect Reductions in Findings 3 and 7 of the Audit Report.**

The Parameters and Guidelines for the *Animal Adoption* program authorize local agencies to claim reimbursement for the costs of care and maintenance during the increased holding period for impounded stray or abandoned animals that “die during the increased holding period or are ultimately euthanized,” based on a formula for determining actual costs. The Parameters and Guidelines also authorize reimbursement for providing necessary and prompt veterinary care as specified in the Parameters and Guidelines during the holding period for stray and abandoned animals that “die during the increased holding period or are ultimately euthanized.” Claimants are to calculate and claim their costs for these activities in part by determining the number of “stray or abandoned animals that die during the increased holding period or are ultimately euthanized.” The Controller calls this factor of the calculation “eligible animals” or “eligible animal population.”

The Controller, in its audit of allowable costs for care and maintenance and necessary and prompt veterinary care, states that the following animals were excluded from the population of “eligible animals”:

- Dogs and cats and other animals that were owner-surrendered or previously owned (only stray animals were included in the eligible population);
- Dogs, cats, and other animals that were ultimately adopted, transferred, rescued, or redeemed (only those animals with the outcome of “died” or “euthanized” were reviewed);
- Dogs, cats, and other animals that went missing from their kennels, were stolen, or escaped;
- Dogs, cats, and other animals that were DOA [dead on arrival];
- Dogs, cats, and other animals that were euthanized as requested by owners or if euthanasia was required/requested (“Dispo Req” or “Euth Req”);
- Dogs, cats, and other animals that were euthanized for humane reasons (usually on day 1);
- Dogs, cats, and other animals that were suffering from a serious illness or severe injury (usually euthanized on day 1 or died on day 1);
- Newborn animals that need maternal care and were impounded without their mothers (usually died or were euthanized within the first few days; the excluded categories included “Unweaned” or “8 weeks unsustainable”);
- Ineligible other animals such as rodents, livestock, or wild animals;
- Ineligible birds, such as pigeons, doves, ducks, chickens, owls, pheasants, mallards, and gamefowls;
- Dogs and cats that died in the shelter’s kennels outside of increased holding period (days 1, 2, 3, and day 7 and beyond), as per the requirements of the mandate. (Local agencies are eligible to receive reimbursement to care for dogs and cats that *died during the increased holding period* [days 4, 5, and 6]);

- “Other” animals that died in the shelters’ kennels on day 7 and beyond (after the increased holding period). (Local agencies are eligible to receive reimbursement to care for other animals that *died during the increased holding period* [days 2, 3 through 6].); and
- Dogs, cats, and other animals that were euthanized during the holding period as per the requirements of the mandate. The agencies are eligible to receive reimbursement to care for dogs and cats and other animals that were *euthanized after the holding period* (day 7 of the holding period and beyond).²⁵

Staff finds that most of these exclusions are correct as a matter of law. However, the Controller continues to dispute the findings and conclusions on the following exclusion of animals.

1. The Controller’s exclusion of animals that the claimant categorized as wildlife, evidence, or otherwise non-adoptable at intake, is correct as a matter of law and not arbitrary, capricious, or entirely lacking in evidentiary support.

The Controller excluded “[i]neligible other animals such as rodents, livestock, or wild animals;” and “[i]neligible birds, such as pigeons, doves, ducks, chickens, owls, pheasants, mallards, and gamefowls” from reimbursement, without any findings whether these animals can legally be owned as personal property. The test claim statute, however, mandates the claimant to hold birds and rabbits, both of which can be wild or domestic, and guinea pigs, and hamsters, both of which are “rodents,” and therefore the Draft Proposed Decision concluded that the Controller’s exclusion was too broad, and incorrect as a matter of law, absent findings or evidence in the record whether the Controller’s exclusion of “rodents,” “livestock,” or “wild animals” were animals not legally allowed as personal property. Additionally, the test claim statute expressly requires local agencies to hold stray or abandoned “birds...legally allowed as personal property” pending adoption or redemption. The statute does not distinguish between types of birds required to be held, some of which may be poultry (e.g. chickens and ducks), pets,²⁶ or wild animals,²⁷ depending on the breed and owner. However, the Controller stated in the audit report that it excluded “birds, such as pigeons, doves, ducks, chickens, owls, pheasants, mallards, and gamefowls,” without identifying any law rendering these birds illegal to possess as pets or specifying the birds actually held by the claimant.

In comments filed on the Draft Proposed Decision, the Controller explained that it relied on the claimant’s classification of animals at intake, which differentiated between animals that were stray or abandoned, and thus required to be held under the test claim statute, and those that were not adoptable. The Controller stated that animals classified by the claimant as “wildlife” or “evidence,” which usually included fighting birds that were not adoptable due to aggressive

²⁵ Exhibit A, IRC, pages 688-689 (pages 21 and 22 of the Audit Report).

²⁶ See California Penal Code section 5971(c)(1): “‘Pet animals’ means dogs, cats, monkeys and other primates, rabbits, *birds*, guinea pigs, hamsters, mice, snakes, iguanas, turtles, and any other species of animal sold or retained for the purpose of being kept as a household pet.” (Emphasis added.)

²⁷ Title 50 Code of Federal Regulations, section 21.13.

behavior, were excluded, and that these exclusions were based on the claimant's data, and not on any analysis or discretionary sorting by the Controller.

The claimant did not respond to the Controller's comments. Therefore, based on the evidence in the record, the Controller's exclusion of animals identified by claimant as not adoptable was correct as a matter of law, and there is no evidence in the record that the reduction is arbitrary or capricious.

2. The exclusion of animals deemed treatable upon arrival at the shelter and later euthanized during the increased holding period because they became non-rehabilitatable, is incorrect as a matter of law. Any reduction of costs on this basis should be reinstated to the extent the claimant can provide source documents to show the the validity of such costs and their relationship to the mandate.

The Controller excludes from reimbursement all costs incurred for the care and maintenance and prompt and necessary veterinary care of dogs, cats, and other animals that were euthanized *during* the increased holding period. The Controller states "agencies are eligible to receive reimbursement to care for dogs and cats and other animals that were *euthanized after the holding period*."²⁸ The Controller bases its finding to exclude these animals on the plain language of the Parameters and Guidelines, which provides that local agencies are eligible to receive reimbursement for care and maintenance costs and for necessary and prompt veterinary costs only for those animals "that die during the increased holding period or are ultimately euthanized." The Controller maintains that these costs are only eligible for reimbursement for those animals that die of natural causes during the increased holding period or are euthanized *after* the increased holding period. Thus, the Controller argues, if an animal is euthanized during the increased holding period, then no costs for that animal are eligible for reimbursement.

The Controller's interpretation of the Parameters and Guidelines is not correct. The Parameters and Guidelines provide that local agencies are eligible to receive reimbursement for care and maintenance and prompt and necessary veterinary costs only for those animals "that die during the increased holding period or are ultimately euthanized." The plain language of the phrase "animals that die during the increased holding period or are ultimately euthanized" is vague and ambiguous because the word "die" can include both death by natural causes and death by euthanasia. And the Parameters and Guidelines and the analyses adopted for the Parameters and Guidelines do not define what it means to "die" during the holding period.

Nevertheless, the decisions do *not* limit reimbursement to animals that die of natural causes during the increased holding period. Such a limitation would be contrary to the statutory scheme. Food and Agriculture Code sections 17005 and 17006 expressly contemplate an animal's health changing over the course of impoundment and require a shelter to hold an animal which is ill or injured— but not an animal which is irremediably suffering — for the relevant holding period on the ground that the animal's health may improve. In this respect, section IV. (B)(8) of the Parameters and Guidelines allows reimbursement for the initial physical examination of a stray or abandoned animal to determine the animal's baseline health status and classification as "adoptable, treatable, or non-rehabilitatable." The Parameters and Guidelines

²⁸ Exhibit A, IRC, page 689.

further authorize reimbursement for the administration of a wellness vaccine to “treatable” or “adoptable” animals, veterinary care to stabilize and/or relieve the suffering of a “treatable” animal, and veterinary care intended to remedy any applicable disease, injury, or congenital or hereditary condition that adversely affects the health of a “treatable” animal until the animal becomes “adoptable.” Even with veterinary care, the condition of the animal can change during the increased holding period and the animal can become non-rehabilitatable. If that occurs, the animal is not “adoptable” or “treatable” and may be euthanized under the law.

Therefore, to deny reimbursement for the costs incurred during the increased holding period for an animal that becomes non-rehabilitatable and that has to be euthanized during, but before the end of, the increased holding period conflicts with the test claim statute and the Parameters and Guidelines. Staff finds that reimbursement is required under these circumstances.

In response to the Draft Proposed Decision, the Controller argues that “the level of detail necessary to review each individual animal’s health status and progression of their disease prior to euthanasia simply isn’t available from the animal data statistics maintained in the claimant’s Chameleon database.” Accordingly, the Controller maintains that “it is impossible to determine whether the animals euthanized for medical reasons would fit in the hypothetical scenario described [above].”²⁹

As indicated above, the Controller’s interpretation of the mandate is incorrect as a matter of law and claimants are eligible to receive reimbursement to provide care and maintenance to an animal during the increased holding period if the animal was deemed treatable and adoptable at intake, but became non-rehabilitatable and was euthanized *during* the increased holding period. *However*, in order to receive reimbursement, section VI. of the Parameters and Guidelines requires claimants to provide source documents that show the evidence of the validity of such costs and their relationship to the mandate. The supporting documentation must be kept on file by the agency during the audit period required by Government Code section 17558.5. In this respect, claimants are required by Food and Agriculture Code section 32003 to maintain records on animals that are taken up, euthanized, or impounded. Such records shall identify the date the animal was taken up, euthanized, or impounded; the circumstances surrounding these events; and the names of the personnel performing these activities.³⁰ The Parameters and Guidelines are regulatory in nature and are binding on the parties.³¹

The Controller’s comments on the Draft Proposed Decision suggest that the claimant’s database does not contain source documents that show the evidence of the validity of these costs. However, the claimant’s IRC generally contends that it was denied the necessary time to submit additional material or else “it would have had enough time to address all of the Controller’s requests for additional information”.³²

²⁹ Exhibit F, Controller’s Comments on the Draft Proposed Decision, page 13.

³⁰ It is not clear from the record whether the Controller actually requested these records from the claimant based on the Controller’s interpretation that such costs were not reimbursable.

³¹ *Clovis Unified School Dist. v. Chiang* (2010) 188 Cal.App.4th 794, 799.

³² Exhibit A, IRC, pages 16-18.

Accordingly, any reduction of costs relating to the exclusion of animals deemed treatable upon arrival at the shelter and later euthanized during the increased holding period because they became non-rehabilitatable is incorrect as a matter of law. Such costs are reimbursable *to the extent* the claimant can provide source documents to prove the validity of such costs.

3. The Commission and the Controller are bound by the *Purifoy* decision and, thus, the Controller’s exclusion of animals that were euthanized too early because Saturday was counted as a business day for the required holding period, is also correct as a matter of law. However, the Controller’s recalculation of costs using an average number of reimbursable days is incorrect as a matter of law, and is arbitrary, capricious, and entirely lacking in evidentiary support, to the extent it results in an exclusion of “eligible animals” held for the time required under *Purifoy*.

As indicated above, the Controller excluded “dogs, cats, and other animals that were euthanized during the holding period as per the requirements of the mandate.”³³ The Controller determined that animals may have been euthanized during the holding period because of claimant’s misinterpretation of the required holding period, as clarified by the Court of Appeal’s decision in *Purifoy*, which held that Saturday is not a “business day” for purposes of calculating the required holding period under the test claim statutes before a stray or abandoned dog can be adopted or euthanized.³⁴ Before the decision was issued, many local agencies were operating under the assumption that Saturday was a “business day” that could be counted as part of the holding period, which resulted in the disposal of some animals at least one day too early.³⁵ Pursuant to the *Purifoy* decision, the Controller excluded those animals from the number of “eligible animals that die during the holding period or are ultimately euthanized,” because they were disposed of at least one day too early.

Staff finds that the court’s interpretation of “business day” in *Purifoy* is binding, and that the Controller’s exclusion of Saturday as a business day when calculating the increased holding period is correct as a matter of law. Thus, except in the circumstances described below, the Controller’s exclusion of animals that were euthanized too early because Saturday was counted as a business day for the required holding period, is also correct as a matter of law.

However, when auditing and recalculating the number of reimbursable days pursuant to *Purifoy*, the Controller calculated an *average* increased holding period for all dogs and cats to be three days, and the average increased holding period for all other “eligible” animals to be six days, and did not state the total number of reimbursable days for each eligible animal. Even if the increased holding period averages three days for dogs and cats, or six days for other animals, the Parameters and Guidelines do not provide for reimbursement based on an average number of days. Moreover, the Controller’s recalculation may result in the exclusion of eligible animals that are correctly held under the law, but are euthanized during the Controller’s defined “average” holding period. For example, if a stray or abandoned dog or cat is impounded on a Monday or Sunday, the actual increased holding period under the law is two *calendar* days, and

³³ Exhibit A, IRC, page 689.

³⁴ *Purifoy v. Howell* (2010) 183 Cal.App.4th 166.

³⁵ Exhibit B, Controller’s Late Comments on the IRC, page 1001.

not three days, and the dog or cat may be euthanized on day three (a day before the Controller's average and, thus, "during the holding period" as defined by the Controller). Similarly, for "other animals," the Controller applied an increased holding period of six days. However, if a stray bird or rabbit is impounded on a Monday, the actual increased holding period under the law is four calendar days, and not six days, and the bird or rabbit may be euthanized on day five (a day before the Controller's average and, thus, "during the holding period" as defined by the Controller). Therefore, the Controller's recalculation and use of the average number of reimbursable days results in an exclusion of "eligible animals" correctly held under the law.

The Controller agrees that the methodology excludes some eligible animals, but argues that a mathematical average provides the most reasonable and cost-effective way to analyze large quantities of data:

The Commission suggested that using an average reimbursable days potentially excludes a marginal amount of "eligible animals." We concur. However, we believe that it is equally possible that the use of this average also includes an equal number of non-eligible animals as well. The use of a mathematical average assumes some outliers. But in this case, it provides the most reasonable and cost-effective way to analyze unusually large quantities of animal data. In fact, the large size of the animal population (as noted above) makes the use of an average value statistically more accurate and decreases the probability of error.³⁶

The Controller does not express how much more accurate the use of an average number of days might be, but does explain that "claimant's animal data averaged between 50,000 and 60,000 line items per year..." and "[i]n order to compute the actual increased holding period days for every animal on an individual basis, we would need to know what day of the week the animal was impounded...manually open each animal record...[and] evaluate, based on the calendar of the specific week and year, the actual number of days in the increased holding period." Then, "[o]nce the animal's eligibility was established, someone would need to compute each animal's allowable costs using reimbursable days." The Controller concludes that this "would be impractical and most likely would not produce results materially different from using an average calculation."³⁷

Staff finds that the Controller's averaging method to calculate the increased holding period for all animals is incorrect as a matter of law, and arbitrary, capricious, and entirely lacking in evidentiary support.

The Parameters and Guidelines do not provide for reimbursement based on an average number of days in the increased holding period, but requires the determination of the actual increased holding period for each animal. And based on the *Purifoy* decision, the increased holding period must be calculated from the day of the week the animal was impounded to ensure that Saturday and Sunday are not counted as business days. As the Controller acknowledges, "[i]n order to compute the actual increased holding period days for every animal on an individual basis, we would need to know what day of the week the animal was impounded...manually open each

³⁶ Exhibit F, Controller's Comments on the Draft Proposed Decision, page 1453.

³⁷ Exhibit F, Controller's Comments on the Draft Proposed Decision, page 1453.

animal record...[and] evaluate, based on the calendar of the specific week and year, the actual number of days in the increased holding period.” As indicated above, the Controller’s methodology results in an exclusion of any “eligible animal” properly held under the law, but euthanized during the Controller’s average holding period. To the extent the Controller reduced costs for care and maintenance and necessary and prompt veterinary care because the Controller incorrectly excluded an animal under these circumstances, the reduction is incorrect as a matter of law.

Moreover, the methodology is arbitrary, capricious, and without any evidentiary support. Although the Controller states that it is “equally *possible* that the use of this average also includes an equal number of non-eligible animals,” which makes the methodology “reasonable,” there is no evidence in the record that the Controller’s three or six day average number of reimbursable days accurately reflects or is representative of the actual increased holding period for all stray or abandoned animals held by the claimant during the audit period, or representative of the mandated costs incurred by the claimant. Government Code section 17559 and section 1187.5 of the Commission’s regulations require that all assertions of fact be based on substantial evidence in the record. Substantial evidence has been defined by the courts as follows:

“Substantial” is a term that clearly implies that such evidence must be of ponderable legal significance. Obviously the word cannot be deemed synonymous with “any” evidence. It must be reasonable in nature, credible, and of solid value; it must actually be “substantial proof” of the essentials which the law requires in a particular case.³⁸

And a “possibility” of a fact does not constitute substantial evidence in the record.

Accordingly, staff finds that the Controller’s recalculation of the increased holding period using an average number of reimbursable days is incorrect as a matter of law, and is arbitrary, capricious, and entirely lacking in evidentiary support, to the extent the recalculation results in an exclusion of “eligible animals” properly held for the duration required under *Purifoy*.

B. Except as Determined in Section A. of This Decision, the Controller’s Remaining Findings That Result in a Reduction of Costs for Care and Maintenance Under Finding 3 Are Correct as a Matter of Law and Not Arbitrary, Capricious, or Entirely Lacking in Evidentiary Support.

The Parameters and Guidelines provide for reimbursement of care and maintenance costs for impounded stray or abandoned animals that die during the increased holding period or are ultimately euthanized either by claiming actual costs or by performing a time study.³⁹ The claimant used the actual cost method, which is a formula that requires the eligible annual cost of care to be divided by the yearly census of animals to arrive at an average cost per animal per day. The cost per animal per day is then multiplied by the eligible number of animals and the number of increased holding period days. The factors relating to the number of eligible animals was

³⁸ *People v. Olmsted* (2000) 84 Cal.App.4th 270, 277.

³⁹ Exhibit G, Proposed Parameters and Guidelines and Analysis, Hearing Item 4, February 28, 2002, pages 1611-1614.

discussed above in Section A. This section addresses the remaining findings that resulted in a reduction of costs for care and maintenance.

1. The Controller's reductions on the basis of estimated or otherwise unsupported costs claimed as part of the calculation of total annual costs for care and maintenance are correct as a matter of law and not arbitrary, capricious, or entirely lacking in evidentiary support.

The Parameters and Guidelines provide that the first step in calculating actual costs for care and maintenance is to identify the total annual cost of this component, including labor, materials, supplies, indirect costs, and contract services.⁴⁰ The Controller states that this claimant “used budgeted expenditure amounts that were not actual costs and were not pro-rated to the portion of costs relating to the care and maintenance functions.”⁴¹

Staff finds that these reductions are correct as a matter of law and not arbitrary, capricious, or entirely lacking in evidentiary support. While the Parameters and Guidelines use inclusive language to describe costs for this component (“total cost of care and maintenance includes labor, materials, supplies...”) the care and maintenance costs cannot be interpreted beyond the reasonable scope of the approved activity, which is to provide care and maintenance during the increased holding period for impounded stray or abandoned animals that die during the increased holding period or are ultimately euthanized. Office supplies and printing supplies are general expenses of the animal shelter, and are beyond the scope of the mandated activity, and therefore reduction on this basis is correct as a matter of law. Moreover, the claimant agreed with the Controller that only a portion of salaries and benefits for Animal Care Technicians and Animal Care Technician Supervisor positions should be reimbursable, and the claimant proposed the proportional reimbursable share for these classifications, which the Controller accepted.⁴² The Controller's reduction on this basis is therefore not arbitrary, capricious, or entirely lacking in evidentiary support. And finally, the claimant filed the reimbursement claims using the actual cost method of claiming, but used “budgeted expenditure amounts,” which are not equivalent to actual costs incurred for the mandate.

2. The Controller's adjustment of the yearly animal census data did not result in a reduction of costs claimed and therefore the Commission has no jurisdiction to determine this issue.

The Parameters and Guidelines provide that the total annual cost of care shall be divided by the total annual census of *all* animals that come to the shelter to determine the cost per animal per day. The Controller found that the claimant misstated its yearly animal census data. Specifically, the Controller found that the claimant failed to exclude animals that were deceased upon arrival at the shelter, and animals that went missing. The Controller accordingly eliminated those animals from the census.

⁴⁰ Exhibit G, Proposed Parameters and Guidelines and Analysis, Hearing Item 4, February 28, 2002, page 1611.

⁴¹ Exhibit A, IRC, page 684.

⁴² Exhibit A, IRC, page 684.

Based on the formula in the Parameters and Guidelines for determining the costs for care and maintenance during the increased holding period, in which total annual costs are divided by the yearly animal census to arrive at a cost per animal per day, which is in turn multiplied by the remaining factors of eligible animals and reimbursable days, it appears that the adjustments made to the annual animal census data that reduced the total number of animals did not in fact result in any reduction. Because total annual costs are *divided* by the yearly animal census, any decrease in the animal census data would result in a corresponding increase in the cost per animal per day, which would then be multiplied by the remaining factors. Thus, the adjustment to the yearly animal census factor is in the claimant's favor. Because there is no reduction of costs claimed on the basis of the adjustments to the animal census data, the Commission has no jurisdiction and need not make a finding on this point.

3. The Controller's adjustment of reimbursable days increases the number of reimbursable days claimed by the claimant, thereby increasing reimbursement and, thus, the Commission does not have jurisdiction to determine this issue.

The last element of the calculation of actual costs for care and maintenance is to multiply the cost per animal per day times the number of eligible animals times the number of reimbursable days. The Parameters and Guidelines expressly require multiplying by "each reimbursable day" following the day of impoundment, and do not define reimbursable days based on an average number of days.⁴³

However, the reimbursement claims at issue in this IRC, claimed two reimbursable days for all dogs and cats, and four reimbursable days for all "other animals," and made no attempt to state the total number of reimbursable days for each eligible animal.⁴⁴ And, as indicated in section A.3. of this Decision, the Controller, like the claimant, calculated an *average* increased holding period for all dogs and cats to be three days, and the average increased holding period for all other "eligible" animals to be six days, and did not state the total number of reimbursable days for each eligible animal.⁴⁵ Because the Controller's audit *increased* the number of reimbursable days claimed by the claimant, by which all other elements of the formula are multiplied, the Controller's adjustment of reimbursable days results in increased reimbursement to the claimant and, thus, the Commission does not have jurisdiction to determine this issue.

C. The Controller's Reductions in Finding 4 Relating to Unallowable Employee Hours for Making Animals Available for Adoption or Owner Redemption Are Correct as a Matter of Law and Not Arbitrary, Capricious, or Entirely Lacking in Evidentiary Support.

The Parameters and Guidelines provide that an agency desiring to apply the shortened holding period is eligible for reimbursement for making animals available for owner redemption on one weekday evening until at least 7:00 p.m., or one weekend day; or, for local agencies with fewer than three full-time employees or that are not open during all regular weekday business hours,

⁴³ Exhibit A, IRC, pages 71-73.

⁴⁴ See, e.g., Exhibit A, IRC, pages 741-742.

⁴⁵ Exhibit A, IRC, page 690.

for establishing a procedure for owners to reclaim their animals by appointment.⁴⁶ For dogs and cats, reimbursement for this activity begins July 1, 1999. For “other animals” specified in Food and Agriculture Code section 31753, reimbursement for this activity begins January 1, 1999.⁴⁷

The Controller’s audit determined that the claimant overstated allowable hours and the number of allowable positions to comply with this activity. Specifically, the Controller states that the claimant “claimed hours for Animal Care Technicians, Animal Care Technician Supervisors, Animal Control Officers, and Clerk Typists for working on one of the weekend days.” However, the Controller found that the claimant did not take into account the difference between the regular staffing needs and the *increased* staffing needs to comply with the requirement of this component. The Controller further elaborates that its audit “inquired about the number of employees and classifications of staff members working when the shelter is closed to the public (Mondays) and the staffing needed to comply with the mandate and stay open during the increased hours (Saturdays).” The Controller was thus able to eliminate staffing and employee hours that were mainly dedicated to the general care and maintenance of the animals. Additionally, the Controller notes that for fiscal year 1998-1999 reimbursement began January 1, 1999, and therefore allowable hours were reduced by half for that fiscal year.⁴⁸

Staff finds that the Controller is correct that the reason to remain open on a Saturday, pursuant to the test claim statutes and the Commission’s Decision, is to promote owner redemption. Indeed, the express language of the reimbursable component at issue in Finding 4 is “Making the animal available for owner redemption...”⁴⁹ Therefore, the Controller’s attempt to limit reimbursement on Saturdays to those employees that are necessary to make animals available for owner redemption is consistent with the Parameters and Guidelines and the purpose of the test claim statute. Thus, the adjustments are correct as a matter of law. In addition, there is no evidence in the record to support a finding that the Controller’s decisions were arbitrary or capricious.

D. Except as Determined in Section A. of This Decision, the Controller’s Remaining Findings Supporting the Reductions in Finding 7 for Overstated Necessary and Prompt Veterinary Care Costs Are Correct as a Matter of Law and Not Arbitrary, Capricious, or Entirely Lacking in Evidentiary Support.

The Parameters and Guidelines permit reimbursement for necessary and prompt veterinary care for stray or abandoned animals, other than injured cats and dogs given emergency treatment that die during the increased holding period or are ultimately euthanized. Necessary and prompt veterinary care means all reasonably necessary medical procedures performed by a veterinarian or someone under the supervision, including an initial physical examination; a wellness vaccine administered to adoptable or treatable animals; care to stabilize or relieve the suffering of a

⁴⁶ Exhibit A, IRC, page 74.

⁴⁷ Exhibit A, IRC, page 74.

⁴⁸ Exhibit A, IRC, pages 694 and 695.

⁴⁹ Exhibit A, IRC, page 74.

treatable animal; and veterinary care intended to remedy an injury or disease of a treatable animal.⁵⁰

The Controller's audit determined that the claimant claimed estimated and unsupported materials and supplies costs, and misstated and unallowable employee hours. Specifically, the Controller found that the claimant's time study for veterinary procedures was "inadequate," because it focused on recording time increments to perform non-routine veterinary procedures which must be examined on a case-by-case basis to determine eligibility. A new time study was conducted during the course of the audit, which the Controller found was allowable except for "[i]nputting animal medical statistics into the Chameleon database about animal's baseline health."⁵¹ In addition, the Controller found that the city claimed estimated and unsupported materials and supplies costs. During the first three years of the audit period, the claimant estimated that three percent of its operating costs were attributable to the mandate component of necessary and prompt veterinary care, and in the latter five years of the audit period, the claimant failed to support its materials and supplies costs. The Controller states that the claimant did not respond to this audit finding specifically, but during the audit "submitted summary reports containing year end expenditures by vendor for Account 3190 – Medical Supplies" totaling \$2,086,819. The Controller determined that "we are unable to consider the medical expenses submitted for reimbursement, because the city did not determine what portion of the costs actually related to eligible animals and allowable treatments that took place during the required holding period."⁵²

Staff finds that the claimant inappropriately claimed estimated costs, without any evidence or documentation to support the estimate, and that the claimant's alleged expense documentation does not constitute evidence that those costs are related to the mandated activities. The Parameters and Guidelines provide reimbursement for necessary and prompt veterinary care, but with certain limitations. For example, animals irremediably suffering from serious illness or injury and euthanized on day one, or newborn animals that cannot survive without their mother, and the mother has not also been impounded, are not included in the population of "eligible animals" for which reimbursement is required. Likewise, emergency treatment is not eligible for reimbursement, due to the requirements of prior law, nor is the administration of a rabies vaccination, or microchip implantation, or spay or neuter surgery and treatment. The exclusions are therefore substantial, and reimbursement is decidedly narrow. The claimant has the burden to show that costs claimed for materials and supplies and employee salaries and benefits fall within the reimbursable higher levels of service and were provided to animals within the eligible population, and therefore the summary expense reports for medical supplies are not sufficient in themselves to support the claim.

The claimant's time study suffers the same fault, because it included a number of non-routine veterinary procedures and costs that must be evaluated on a case-by-case basis. Absent some evidence that the procedures and costs within the time study were verified to be eligible for reimbursement, the Controller's rejection of the time study was correct as a matter of law, and

⁵⁰ Exhibit A, IRC, pages 74-75.

⁵¹ Exhibit A, IRC, page 703.

⁵² Exhibit A, IRC, pages 702-705.

not arbitrary, capricious, or entirely lacking in evidentiary support. Ultimately, all parts of the claim must be supported by some documentation from the claimant, which, according to the Parameters and Guidelines, must “show evidence of the validity of such costs and their relationship to the mandate.”⁵³

Based on the foregoing, except as provided in section A. of this Decision relating to “eligible animals,” staff finds that the Controller’s remaining findings supporting the reductions in Finding 7 of necessary and prompt veterinary care costs are correct as a matter of law and not arbitrary, capricious, or entirely lacking in evidentiary support.

E. The Controller’s Determination Not to Consider Claimant’s Request, Made During the Audit, for Reimbursement for the Construction of New Facilities Is Correct as a Matter of Law.

The Parameters and Guidelines provide for reimbursement for the construction of new facilities or acquisition of additional space to comply with the mandate beginning January 1, 1999. However, the claimant did not include costs for this component in its annual reimbursement claims for any of the years subject to audit, nor specifically state in which years such costs might have been incurred. The claimant only alleged costs for construction of new facilities during the course of the audit, which began April 28, 2009.⁵⁴ At that time, the annual claims for all fiscal years of the audit period had been filed, and only the fiscal year 2007-2008 claim could be subject to a revised claim, pursuant to the deadlines contained in Government Code section 17568. Moreover, the construction costs were funded by bonds issued pursuant to a ballot measure, Proposition F, passed by the voters in the November 2000 general election.⁵⁵

Staff finds the Controller’s determination not to reimburse costs for construction of new facilities, which were not claimed in the claimant’s annual reimbursement claim filings and which were funded by a local bond measure repaid by an additional assessment on real property, is correct as a matter of law. Government Code section 17560 permits a claimant by February 15 following a fiscal year, to “file an annual reimbursement claim that details the costs actually incurred for that fiscal year.” Section 17568 provides that if a local agency or school district submits an otherwise valid reimbursement claim to the Controller after the deadline specified in Section 17560, the Controller shall reduce the reimbursement claim in an amount equal to 10 percent of the amount that would have been allowed had the reimbursement claim been timely filed. In addition, section 17568 states that “[i]n no case shall a reimbursement claim be paid that is submitted more than one year after the deadline specified in Section 17560.” These provisions of the Government Code clearly place the burden on the claimant to timely and completely claim its mandated costs. Moreover, where a local agency has raised revenues outside its appropriations limit to cover the cost of mandated activities, funds thus expended are not reimbursable.⁵⁶

⁵⁵ Exhibit A, IRC, page 709.

⁵⁶ *County of Fresno v. State of California* (1991) 53 Cal.3d 482, 487.

F. The Claimant’s Allegation That the Controller Failed to Provide Adequate Time to Comply with the Requirements of the Audit Is Irrelevant, and Ignores the Claimant’s Burden to Support Costs Claimed.

The claimant argues that it was “denied necessary time to comply with the requirements of the audit due to the SCO’s placing the audit on hold for staffing changes for nine months which left the City having to assemble documentation for a huge operation with less time than was provided by law.”⁵⁷ The claimant asserts that “[d]ue to the size of the City’s Animal Services Department, there were millions of line items to go through in order to locate some of the requested information that dated back as far as 12 years.” In addition, the claimant states that “some of the invoices had been destroyed as they exceeded the time limitation for record retention under the law.”⁵⁸ The claimant argues that it “cannot be expected to have to hold on to records from 1998 for an indeterminate amount of time and be forced to retain all detailed expenditure records.” The claimant concludes that “[s]uch a record retention requirement would cause a burden that is both inefficient and unnecessary.”⁵⁹

The claimant is wrong. All versions of the Parameters and Guidelines provide that all costs must be traceable to source documents. Such documents, in turn, must “show evidence of the validity of such costs and their relationship to the mandate.” And, all documentation in support of claimed costs “shall be made available to the State Controller’s Office, as may be requested.” Such documents must be kept on file during the period subject to audit, in accordance with Government Code section 17558.5.⁶⁰ Furthermore, the requirement in Government Code section 17558.5 for an audit to be completed “not later than two years after the date that the audit is commenced,” is a requirement on the Controller to complete its audits promptly; it is not intended to provide a claimant with up to two years to remedy a poorly-supported and insufficiently-documented reimbursement claim. Moreover, the undisputed evidence in the record shows that the claimant had a period of seven months, and an additional period of nine months, in which the Controller’s audit staff was actively working with the claimant to resolve the issues of the audit and to make clear the documentation necessary to support the claim.⁶¹ And, the Controller asserts, “[t]hroughout the audit process, we worked with the city’s staff to not only obtain proper supporting documentation, but also to arrange for alternative methods to support claimed costs.”⁶²

Based on the foregoing, staff finds that claimant’s allegation that the Controller failed to provide adequate time to comply with the requirements of the audit is irrelevant, and ignores the claimant’s burden to support costs claimed.

⁵⁷ Exhibit A, IRC, page 16.

⁵⁸ Exhibit A, IRC, page 17.

⁵⁹ Exhibit A, IRC, page 17.

⁶⁰ Exhibit A, IRC, page 79.

⁶¹ Exhibit A, IRC, pages 16-18; 711-714; Exhibit B, Controller’s Late Comments on the IRC, pages 24-26.

⁶² Exhibit B, Controller’s Late Comments on the IRC, page 1013.

Conclusion

Staff recommends that the Commission partially approve this IRC, and request, pursuant to Government Code section 17551(d) and section 1185.9 of the Commission regulations, that the Controller reinstate costs that relate to the following incorrect reductions to the extent the claimant can provide documentation to support the validity of the costs incurred. Section VI. of the Parameters and Guidelines require claimants to provide source documents that show the evidence of the validity of such costs and their relationship to the mandate. The supporting documentation must be kept on file by the agency during the audit period required by Government Code section 17558.5. In this respect, claimants are required by Food and Agriculture Code section 32003 to maintain records on animals that are taken up, euthanized, or impounded. Such records shall identify the date the animal was taken up, euthanized, or impounded; the circumstances surrounding these events; and the names of the personnel performing these activities.⁶³

- Any reduction of costs relating to the exclusion of animals deemed treatable upon arrival at the shelter and later euthanized during the increased holding period because they became non-rehabilitatable.
- Any reduction of costs relating to the Controller's recalculation of costs following the *Purifoy* decision and its use of an average number of reimbursable days, to the extent the recalculation resulted in an exclusion of "eligible animals" correctly held under the law.

Staff further finds that all other reductions made by the Controller are correct as a matter of law and not arbitrary, capricious, or entirely lacking in evidentiary support.

Finally, staff finds that the Controller's determination not to consider claimant's request, made during the audit, for reimbursement for the construction of new facilities is correct as a matter of law, and that the claimant's allegation that the Controller failed to provide adequate time to comply with the requirements of the audit is irrelevant.

Staff Recommendation

Staff recommends that the Commission adopt the Proposed Decision to partially approve the IRC and authorize staff to make any technical, non-substantive changes following the hearing.

⁶³ It is not clear from the record whether the Controller actually requested these records from the claimant based on the Controller's interpretation that such costs were not reimbursable.

Animal Adoption

DECISION PURSUANT TO
GOVERNMENT CODE SECTION 17500 ET
SEQ.; CALIFORNIA CODE OF
REGULATIONS, TITLE 2, DIVISION 2,
CHAPTER 2.5, ARTICLE 7

(Adopted October 28, 2016)

DECISION

The Commission on State Mandates (Commission) heard and decided this Incorrect Reduction Claim (IRC) during a regularly scheduled hearing on October 28, 2016. [Witness list will be included in the adopted Decision.]

The law applicable to the Commission’s determination of a reimbursable state-mandated program is article XIII B, section 6 of the California Constitution, Government Code section 17500 et seq., and related case law.

The Commission [adopted/modified] the Proposed Decision to [approve/partially approve/deny] this IRC by a vote of [vote count will be included in the adopted Decision] as follows:

Member	Vote
Ken Alex, Director of the Office of Planning and Research	
Richard Chivaro, Representative of the State Controller	
Mark Hariri, Representative of the State Treasurer, Vice Chairperson	
Sarah Olsen, Public Member	
Eraina Ortega, Representative of the Director of the Department of Finance, Chairperson	
Carmen Ramirez, City Council Member	
Don Saylor, County Supervisor	

Summary of the Findings

This IRC addresses reductions made by the State Controller's Office (Controller) to reimbursement claims made by the City of Los Angeles (claimant) for costs incurred during fiscal years 1998-1999, 1999-2000, 2000-2001, 2001-2002, 2002-2003, 2005-2006, 2006-2007, and 2007-2008, under the *Animal Adoption* program.

The following reductions are in dispute:

- Reductions of care and maintenance costs (Finding 3) based on what Controller found were budgeted expenditures claimed in lieu of documented actual costs, claimed expenditures unrelated to care and maintenance, and understated animal census data, resulting in an overstatement of costs per animal per day; overstatement of the population of eligible animal population, based on the exclusions from reimbursement expressed in the Parameters and Guidelines; and adjustment to the number of reimbursable days based on excluding Saturday as a business day in accordance with *Purifoy v. Howell* (2010) 183 Cal.App.4th 166;
- Reductions of salaries and benefits for the increased holding period (Finding 4) based on employee hours that the claimant did not support as being related to the mandate;
- Reductions of necessary and prompt veterinary care costs (Finding 7) based on claiming estimated materials and supplies costs, and unsupported materials and supplies costs; and based on misstated and unallowable hours.

In addition, the claimant raises two issues that do not directly relate to the Controller's audit findings. First, although the claimant did not include in its reimbursement claims costs for construction or acquisition of additional space, the claimant now alleges that reimbursement is required for such costs, which were paid for by taxpayer-approved bonds, to be repaid from local property assessments. And second, the claimant argues that it was denied the necessary time to comply with the requirements of the audit because the Controller placed the audit on hold for nine months "which left the City having to assemble documentation for a huge operation with less time than was provided by law."⁶⁴

The Commission partially approves this IRC, and requests, pursuant to Government Code section 17551(d) and section 1185.9 of the Commission's regulations, that the Controller reinstate costs that relate to the following incorrect reductions to the extent the claimant can provide documentation to support the validity of the costs incurred. Section VI. of the Parameters and Guidelines require claimants to provide source documents that show the evidence of the validity of such costs and their relationship to the mandate. The supporting documentation must be kept on file by the agency during the audit period required by Government Code section 17558.5. In this respect, claimants are required by Food and Agriculture Code section 32003 to maintain records on animals that are taken up, euthanized, or impounded. Such records shall identify the date the animal was taken up, euthanized, or

⁶⁴ Exhibit A, IRC, page 16.

impounded; the circumstances surrounding these events; and the names of the personnel performing these activities.⁶⁵

- Any reduction of costs relating to the exclusion of animals deemed treatable upon arrival at the shelter and later euthanized during the increased holding period because they became non-rehabilitatable.
- Any reduction of costs relating to the Controller’s recalculation of costs following the *Purifoy* decision and its use of an average number of reimbursable days, to the extent the recalculation resulted in an exclusion of “eligible animals” correctly held under the law.

The Commission further finds that all other reductions made by the Controller are correct as a matter of law and not arbitrary, capricious, or entirely lacking in evidentiary support.

Finally, the Commission finds that the Controller’s determination not to consider claimant’s request, made during the audit, for reimbursement for the construction of new facilities is correct as a matter of law, and that the claimant’s allegation that the Controller failed to provide adequate time to comply with the requirements of the audit is irrelevant.

COMMISSION FINDINGS

I. Chronology

09/04/2002	Claimant signed its initial reimbursement claims for fiscal years 1998-1999, 1999-2000, and 2000-2001. ⁶⁶
08/03/2006	The Controller made initial payments on the fiscal year 1999-2000 and 2000-2001 claims. ⁶⁷
08/10/2006	The Controller made initial payment on the fiscal year 1998-1999 reimbursement claim. ⁶⁸
04/28/2009	An audit entrance conference was held. ⁶⁹
04/06/2011	Controller issued the final audit report. ⁷⁰
04/07/2014	The claimant filed this IRC. ⁷¹

⁶⁵ It is not clear from the record whether the Controller actually requested these records from the claimant based on the Controller’s interpretation that such costs were not reimbursable.

- 06/06/2016 Commission staff issued the Request for Additional Information.⁷³
- 06/09/2016 The Controller filed the Response to the Request for Additional Information.⁷⁴
- 08/25/2016 Commission staff issued the Draft Proposed Decision.⁷⁵
- 09/15/2016 The Controller filed comments on the Draft Proposed Decision.⁷⁶

II. Background

The Animal Adoption Program

The *Animal Adoption* program arose from amendments to the Civil Code and Food and Agriculture Code made by Statutes 1998, chapter 752 (SB 1785⁷⁷). The purpose of the test claim statute was to carry out the state policy that “no adoptable animal should be euthanized if it can be adopted into a suitable home” and “no treatable animal should be euthanized.”⁷⁸ Generally, the program increases the holding period to allow for the adoption and redemption of stray and abandoned dogs, cats, and other specified animals before the local agency can euthanize the animal, and requires:

- verification of the temperament of feral cats;
- posting of lost and found lists;
- maintenance of records for impounded animals; and
- that impounded animals receive “necessary and prompt veterinary care.”

On January 25, 2001, the Commission partially approved the Test Claim for the increased costs in performing the following activities only:

1. Providing care and maintenance during the increased holding period for impounded dogs and cats that are ultimately euthanized. The increased holding period shall be measured by calculating the difference between three days from the day of capture (prior law) and four business days from the day after impoundment, as specified below in 3 (a) and 3 (b), or six business days from the day after impoundment (Food & Agr. Code, §§ 31108, 31752);

⁷² Exhibit B, Controller’s Late Comments on the IRC.

⁷³ Exhibit C, Request for Additional Information.

⁷⁴ Exhibit D, Controller’s Response to the Request for Additional Information.

⁷⁵ Exhibit E, Draft Proposed Decision.

⁷⁶ Exhibit F, Controller’s Comments on the Draft Proposed Decision.

⁷⁷ Sometimes referred to as the Hayden Bill.

⁷⁸ Civil Code section 1834.4, Penal Code section 559d, and Food and Agricultural Code section 17005 as added or amended by Statutes 1998, chapter 752.

2. Providing care and maintenance for four business days from the day after impoundment, as specified below in 3 (a) and 3 (b), or six business days from the day after impoundment, for impounded rabbits, guinea pigs, hamsters, pot-bellied pigs, birds, lizards, snakes, turtles, or tortoises legally allowed as personal property that are ultimately euthanized (Food & Agr. Code, § 31753);
3. For dogs, cats, and other specified animals held for four business days after the day of impoundment, either:
 - (a) Making the animal available for owner redemption on one weekday evening until at least 7:00 p.m., or one weekend day; or
 - (b) For those local agencies with fewer than three full-time employees or that are not open during all regular weekday business hours, establishing a procedure to enable owners to reclaim their animals by appointment at a mutually agreeable time when the agency would otherwise be closed (Food & Agr., Code §§ 31108, 31752, and 31753);
4. Verifying whether a cat is feral or tame by using a standardized protocol (Food & Agr. Code, § 31752.5);
5. Posting lost and found lists (Food & Agr. Code, § 32001);
6. Maintaining records on animals that are not medically treated by a veterinarian, but are either taken up, euthanized after the holding period, or impounded (Food & Agr. Code, § 32003); and
7. Providing “necessary and prompt veterinary care” for abandoned animals, other than injured cats and dogs given emergency treatment, that are ultimately euthanized (Civ. Code, §§ 1834 and 1846).

The Commission first addressed the Parameters and Guidelines for *Animal Adoption* at its August 23, 2001 hearing, but the matter was continued for further public comment and analysis.⁷⁹ The Commission adopted the Parameters and Guidelines for this program on February 28, 2002.⁸⁰ The Parameters and Guidelines were then re-issued as corrected on March 20, 2002.⁸¹ Those Parameters and Guidelines, in addition to the activities identified in the Test Claim Statement of Decision, provide reimbursement for one-time activities of developing policies and procedures; training; and developing or procuring computer software for maintaining records; as well as:

- Acquisition of additional space or construction of new facilities, by purchase or lease, to provide appropriate or adequate shelter necessary to comply with the mandated activities

⁷⁹ Exhibit G, Minutes of Commission Hearing, August 23, 2001, pages 1689-1692.

⁸⁰ Exhibit G, Proposed Parameters and Guidelines and Analysis, Hearing Item 4, February 28, 2002. (Note that, at this time the Commission did not issue a “Decision and Parameters and Guidelines” after adoption of parameters and guidelines as it does currently.)

⁸¹ Exhibit A, IRC, page 65 [Parameters and Guidelines, issued February 28, 2002; corrected March 20, 2002].

during the increased holding period for impounded stray or abandoned dogs, cats, and other animals.⁸²

- Remodeling/renovating existing facilities to provide appropriate or adequate shelter necessary to comply with the mandated activities during the increased holding period for impounded stray or abandoned dogs, cats, and other animals.⁸³

Section VI. of the Parameters and Guidelines also require claimants to provide source documents that show the evidence of the validity of such costs and their relationship to the mandate. The supporting documentation must be kept on file by the agency during the audit period required by Government Code section 17558.5. In this respect, claimants are required by Food and Agriculture Code section 32003 to maintain records on animals that are taken up, euthanized, or impounded. Such records shall identify the date the animal was taken up, euthanized, or impounded; the circumstances surrounding these events; and the names of the personnel performing these activities.

On March 12, 2003, the Joint Legislative Audit Committee authorized an audit of the *Animal Adoption* mandate, which was completed by the Bureau of State Audits on October 15, 2003. The audit report recommended that the Legislature direct the Commission to amend the Parameters and Guidelines for the *Animal Adoption* mandate to correct the formula for determining the reimbursable portion of acquiring additional shelter space. In 2004, AB 2224 (Stats. 2004, ch. 313) was enacted to direct the Commission to amend the Parameters and Guidelines for the *Animal Adoption* program to:

1. Amend the formula for determining the reimbursable portion of acquiring or building additional shelter space that is larger than needed to comply with the increased holding period to specify that costs incurred to address preexisting shelter overcrowding or animal population growth are not reimbursable.
2. Clarify how the costs for care and maintenance shall be calculated.
3. Detail the documentation necessary to support reimbursement claims under this mandate, in consultation with the Bureau of State Audits and the Controller's office.

On January 26, 2006, the Commission adopted the amended Parameters and Guidelines, applicable to claims beginning July 1, 2005, in accordance with AB 2224, to require, among other things, contemporaneous source documents to show the validity of costs claimed and their relationship to the reimbursable activities. The 2006 amendment also clarified the definition of “average daily census” of dogs and cats, for purposes of the formula used to calculate care and maintenance costs; this amendment is clarifying only, and does not affect the methodology used to calculate actual costs for this component.⁸⁴

⁸² Exhibit A, IRC, page 67 [Parameters and Guidelines, corrected March 20, 2002, page 3].

⁸³ Exhibit A, IRC, page 69 [Parameters and Guidelines, corrected March 20, 2002, page 5].

⁸⁴ Exhibit G, Final Staff Analysis and Proposed Parameters and Guidelines Amendment, January 26, 2006.

The Controller's Audit and Summary of the Issues

In Finding 3, the Controller disallowed \$967,883 for care and maintenance costs during the increased holding period. The Controller determined that the claimant incorrectly reported its annual expenditures for this component, and incorrectly calculated the annual census of dogs and cats and other animals, resulting in an overstatement of the costs per animal per day in each year. That cost per animal per day, the Controller found, was then incorrectly applied to an overstated number of eligible stray or abandoned animals that died during the increased holding period or were ultimately euthanized; and finally, multiplied by an incorrect number of reimbursable days, based on the court of appeal's determination in *Purifoy*⁸⁵ that Saturday is not a business day for purposes of the Hayden Bill.⁸⁶

In Finding 4, the Controller disallowed a net \$2,045,732 over the entire audit period for costs incurred to make animals available for adoption or redemption on Saturdays, based on overstated allowable hours and the number of employees for whom hours were allowable. Specifically, the Controller found that hours for Animal Care Technicians, Animal Care Technician Supervisors, Animal Control Officers, and Clerk Typists were claimed without considering the scope and requirements of the mandate. Only the increased staffing needed to comply with the requirement of making animals available for owner redemption or adoption is reimbursable, and therefore only a portion of Saturday staffing is attributable to the increased level of service. By comparing the Saturday staff hours claimed to the staffing levels needed when the shelter is closed to the public on Mondays, and examining monthly schedules provided by the claimant, the Controller found that the hours and employees needed to comply with the mandate included:

- Animal Care Technicians (10 positions, 9 hours each);
- Animal Care Technician Supervisor (1 position, 9 hours); and
- Front Counter Clerks (10 positions, 8 hours each).⁸⁷

The Controller allowed hours for these positions for 52 weeks during each year of the audit period, except fiscal year 1998-1999, for which reimbursement began on January 1, 1999.⁸⁸ The Controller also found an understatement in productive hourly rates.⁸⁹

In Finding 7, the Controller disallowed a net \$1,827,843 over the entire audit period for necessary and prompt veterinary care costs. The Controller found that the claimant estimated its materials and supplies costs (rather than documenting actual costs), claimed unsupported materials and supplies costs, claimed misstated and unallowable hours, and understated its productive hourly rates.⁹⁰ Specifically, the Controller found that for the first three years of the

⁸⁵ *Purifoy v. Howell* (2010) 183 Cal.App.4th 166.

⁸⁶ Exhibit A, IRC, page 683.

⁸⁹ Exhibit A, IRC, page 694.

⁹⁰ Exhibit A, IRC, page 704.

audit the claimant estimated three percent of its operating costs were attributable to the mandate, without any documentation for actual costs. In the latter five years of the audit, the claimant did not support its materials and supplies costs for necessary and prompt veterinary care as being attributable to activities or services eligible for reimbursement.⁹¹ In addition, the claimant misstated salaries and benefits by using a time study that recorded hours worked for non-routine veterinary medical procedures, as opposed to repetitive activities. The Controller found that non-routine procedures were not appropriate for a time study due to the variability of time spent, and due to the need to examine each activity on a case-by-case basis to ensure claiming of only eligible activities within the scope of the mandate.⁹² And finally, the Controller determined that the claimant understated its productive hourly rates, resulting in an adjustment in the claimant's favor of \$1,658.

The claimant did not claim costs for space acquisition and facilities construction or renovation in its reimbursement claims. However, the audit report indicates that during the course of audit fieldwork the claimant "inquired about the eligibility of costs it incurred for the construction and renovation of animal shelters under the mandated program."⁹³ It is undisputed that during the audit period the claimant constructed new shelters and renovated existing shelters, using bond funds approved by the voters in the November 2000 general election. Proposition F provided for the issuance of bonds, for the purposes of constructing new animal shelters and fire stations, to be repaid through additional assessments on residents' property tax bills.⁹⁴ The Controller concluded that although the claimant had performed the required analysis to determine that the additional shelter space was needed in order to comply with the provisions of the mandate, the claimant funded the construction and renovation with bond funds, rather than the city's revenue-limited general fund. Additionally, costs for this construction were not included in the reimbursement claims submitted by claimant to the Controller. Therefore, the Controller determined that the costs were not reimbursable.⁹⁵ The claimant strenuously objects to that determination, and maintains that the Proposition F funds "are clearly proceeds of taxes and local revenue to the extent they were used to pay for state mandated costs associated with the increased cost of building animal shelters."⁹⁶

⁹⁶ Exhibit A, IRC, page 710.

Section 5 of the IRC form states the total amount incorrectly reduced during the audit period as \$5,425,813.⁹⁷ However, the claimant specifically challenges only findings 3, 4, and 7, which total \$4,841,458.⁹⁸

The claimant's primary challenge to the Finding 3 reductions for care and maintenance costs is based on the assertion that the Controller incorrectly applied the *Purifoy* decision,⁹⁹ which declared that Saturday is not a business day for purposes of the increased holding period. The claimant alleges that the Controller incorrectly calculated allowable costs for care and maintenance.¹⁰⁰ The claimant argues that this IRC presents good policy reasons to deny retroactive application of the *Purifoy* decision to the audit period, and that any and all costs denied on this basis should be reinstated.¹⁰¹

In addition, the claimant challenges Finding 4, arguing that the Controller is misinterpreting the Parameters and Guidelines by allowing only a portion of staff hours when the shelter is open to the public on Saturdays. The claimant asserts that the mandated program requires the local agency to open its shelter on Saturdays "for normal business operations that are reasonably required by the Hayden Bill which is not limited to the redemption of animals."¹⁰² The claimant argues that it "should be allowed to staff its shelter as it sees fit to accomplish the goals set forth in statute."¹⁰³

And, with respect to Finding 7, the claimant argues that the Controller's interpretation of documentation requirements resulted in an incorrect disallowance of "submitted expenses within expenditure account 3190 medical supplies (\$2,086,819)."¹⁰⁴

The claimant also challenges the Controller's determination that funds raised through a local assessment measure, Proposition F, and used for construction or space acquisition costs do not constitute increased costs mandated by the state.¹⁰⁵ The claimant argues that there is nothing in Government Code section 17514 that makes a distinction between mandated activities paid for out of a local government's general fund revenues and those paid for with restricted bond or assessment funds.¹⁰⁶

Finally, the claimant argues that it was denied the necessary time to comply with the requirements of the audit, because the Controller's audit staff placed the audit "on hold for

⁹⁷ Exhibit A, IRC, page 5.

¹⁰⁶ *Ibid.*

staffing changes for nine months which left the City having to assemble documentation for a huge operation with less time than was provided by law.”¹⁰⁷ The claimant alleges that the audit began with an entrance conference on April 28, 2009, and “City staff worked closely with the SCO’s auditing staff for a period of 7 months providing the requested documents and spending over 200 hours of City staff time.”¹⁰⁸ But in November 2009, “work on the audit was temporarily discontinued by the SCO when their Audit Manager...transferred to another unit...”¹⁰⁹ The claimant states that on July 19, 2010, a second entrance conference was held and the audit resumed. The claimant states that the auditor “requested documentation that required a significant amount of City resources in order to locate the information requested.”¹¹⁰ The claimant alleges that it then “provided an additional 250 hours of staff time to address these requests.”¹¹¹ The claimant continues: “Adding to the frustration, some of the invoices had been destroyed as they exceeded the time limitation for record retention under the law.”¹¹² The claimant states that it “cannot be expected to have to hold on to records from 1998 for an indeterminate amount of time and be forced to retain all detailed expenditure records.”¹¹³ Furthermore, the claimant states that although the audit staff did make requests for information between November 2009 and July 2010, “it would not have made any difference in the City’s staffing resources that it could lend to review the amount of documents requested...”¹¹⁴

The Controller held an exit conference on January 12, 2011, and stated the intention to issue a final audit report in April. The claimant states that it acted in good faith to comply with all audit material requests, but that “[a] short time after the exit meeting, the City lost Linda Barth, the Department’s Assistant General Manager, who was the main contact person for the audit causing a further setback in the City’s attempt to provide the remaining information requested.”¹¹⁵ The Controller issued its draft audit report on March 10, 2011, and the claimant requested a 30 day extension.¹¹⁶ The claimant states that it was granted only two days “so that the State could file their audit report within the two year statute of limitations.”¹¹⁷ The claimant argues that had the

audit not been put on hold for nine months, it would have had sufficient time to address the auditor's request for additional information which would have resulted in fewer reductions.¹¹⁸

State Controller's Office

The Controller acknowledges that whether Saturday is considered a business day affects the allowable cost calculations for care and maintenance costs (Finding 3).¹¹⁹ And, the Controller acknowledges that many animal shelters were operating under the assumption that they could count Saturday as a business day, but the *Purifoy* decision rendered that assumption incorrect.¹²⁰ The Controller notes that the definition of a business day is only one of several reasons for reduction in Finding 3, and that the claimant did not address "all of the elements that determine allowable costs for the Care and Maintenance cost component."¹²¹ The Controller does not specify what portion of the reduction is attributable to the definition of a business day.¹²²

With respect to unallowable employee hours associated with making animals available for adoption or redemption on a Saturday (Finding 4), the Controller asserts that the claimant included costs for employee hours and employee positions that were not reimbursable under the Parameters and Guidelines. The Controller states that the claimant "did not take into account the difference between the regular staffing needs and the increased staffing needs to comply with the requirement of this component."¹²³ The Controller reasoned that because the mandate is to remain open on Saturdays or weekday evenings for owner redemption or adoption, only the increased staff necessary for owner redemption or adoption activities is reimbursable; staff that would be caring for animals even during the hours the shelter is closed are not reimbursable.¹²⁴

With respect to overstated necessary and prompt veterinary care costs (Finding 7), the Controller found that the claimant claimed "estimated materials and supplies costs (\$488,137), claimed unsupported materials and supplies costs (\$608,849), claimed misstated and unallowable hours (\$732,515), and understated productive hourly rates (\$1,658)."¹²⁵ Even though the claimant provided additional documentation of veterinary supplies, the Controller reviewed this information and stated "[w]e concluded that we are unable to consider the medical expenses submitted for reimbursement, because the city did not determine what portion of the costs

actually related to the eligible animals and allowable treatments that took place during the required holding period.”¹²⁶

With respect to the claimant’s assertion that costs incurred for construction and renovation of its shelters should be reimbursed, the Controller first notes that the claimant “did not claim any costs during the audit period under the Acquisition of Additional Space and/or Construction of New Facilities cost component.” Only later, during the audit fieldwork, “the city inquired about the eligibility of costs it incurred for the construction and renovation of animal shelters under the mandated program.”¹²⁷ In addition, the Controller noted that in the November 2000 general election, the city’s voters passed Proposition F, “which allowed the city to issue bonds for the purposes of constructing new animal shelter facilities and fire stations.” The Controller found that “this non-discretionary revenue source was used to build the city’s animal shelters and none of the city’s discretionary general fund moneys were involved.” Accordingly, the Controller determined that “the city did not incur any increased costs to construct/remodel its animal shelters under Government Code section 17514.”¹²⁸

Finally, in response to the claimant’s assertion that the Controller placed “unreasonable time constraints” on the claimant, and the alleged burdens involved in producing sufficient documentation of costs within those time constraints, the Controller explains that audit staff repeatedly, consistently, and in painstaking detail, discussed with the claimant the reimbursement criteria, missing documentation, and the timeline for the release of the final audit report.¹²⁹ The Controller maintains that even though auditing staff changed during the course of the audit “we maintained regular communication with the city’s staff, made timely documentation requests, and held multiple status meetings...”¹³⁰ The Controller also stated in the audit report that “[s]ubsequent to the July 19, 2010 meeting, the city’s mandated cost consultant was no longer involved in the audit process (i.e., did not participate in any audit discussions with department representatives nor had any contact with SCO auditor...”¹³¹ The Controller asserts that its auditor-in-charge visited the claimant’s shelters during the week of October 19, 2010, and at that time “we provided department representatives with a detailed write-up of our preliminary findings...[including] a list of documentation still needed to complete calculations for training, computer equipment and software license renewal, care and maintenance, lost-and-found lists, and veterinary care.”¹³² The Controller further stated:

On November 23, 2010, we made another attempt to request documentation that had not yet been provided. This included the expenditure amounts for care and maintenance costs, veterinary expenditures relating to reimbursable activities, and

¹³² Exhibit A, IRC, page 712.

the proration analysis for the Chameleon software that relates to the mandated activities. All of these items were originally requested in July 2010.¹³³

The Controller also notes that the claimant's mandated cost consultant did not attend the exit conference meeting January 12, 2011. The Controller states that at that meeting, "we advised department representatives again that we would be issuing a final report no later than early April."¹³⁴ However, the Controller also states that after the report was issued, "we would still consider additional information that the city provided and adjust the final audit report as appropriate."¹³⁵ In conclusion, the Controller states that "[t]he department did not provide any more documentation to us after the exit meeting, up to the issuance of the draft report on March 10, 2011."¹³⁶

In response to the Draft Proposed Decision, the Controller "maintains that the reductions in costs identified above were consistent with the intent of the mandated program and the reimbursable criteria."¹³⁷ More specifically, the Controller argues that its analysis of eligible animals, and the exclusion of certain "birds" and "other animals" was not arbitrary, but was based on "extensive interviews at various animal shelters...and used animal shelter staff expertise to properly understand the animal data, categorize various animal populations without bias, and determine allowable animal populations that meet the criteria of the parameters and guidelines for this program."¹³⁸ Further, the Controller states that the audit report "included all examples of excluded animals or birds, regardless of the materiality level."¹³⁹ The Controller also explained that "[t]he claimant's database specifically identified an intake type as 'wildlife' and did not categorize wild animals primarily as 'stray' or 'abandoned' because in the vast majority of cases, these animals are not adoptable."¹⁴⁰ With respect to "rodents," which the Draft Proposed Decision analyzed as being too broad a category for disallowance, the Controller states that it "considered rodents excluded only if they were categorized as wildlife upon intake."¹⁴¹ Similarly, with respect to "birds, such as pigeons, doves, ducks, chickens, owls, pheasants, mallards, and gamefowls," the Controller states that "pigeons were taken in as predominantly 'wildlife,'" while "gamefowls were typically impounded under intake type 'evidence' and predominantly included fighting birds that were confiscated for humane reasons and were euthanized either because of their injuries or aggressive behavior."¹⁴² Thus, the Controller

asserts that its exclusions were based primarily on the categorization of animals as non-adoptable made at intake by shelter staff, and that these exclusions constituted less than two percent of the total animal records.¹⁴³

With respect to the exclusion of animals deemed treatable on arrival at the shelter but later euthanized before the end of the increased holding period because they became non-treatable or non-rehabilitatable, the Controller argues that the phrase “die during the increased holding period or are ultimately euthanized,” as it applies to the eligibility of animals for reimbursement, is not vague or in need of interpretation.¹⁴⁴ The Controller states that this phrase “was also consistent with the type of details captured in the claimant’s Chameleon database for all animal records.”¹⁴⁵ The Controller states that “the DPD described a hypothetical scenario of an animal coming in sick being deemed treatable, then non-rehabilitatable, and ultimately euthanized within the increased holding period as a result of its health changing.”¹⁴⁶ The Controller asserts that “[t]his scenario is simply impossible to track with the data being captured.” The Controller states that “the level of detail necessary to review each animal’s health status and progression of their disease prior to euthanasia simply isn’t available from the animal data statistics maintained in the claimant’s Chameleon database.”¹⁴⁷

Finally, with respect to the determination that the Controller’s use of an average number of holding period days may have resulted in the improper exclusion of animals that were held the correct number of days prior to euthanasia, the Controller argues that its audit “methodology is unbiased and mathematically sound...[and] claimant clearly agreed, as the claimed information also used the average increased holding period days as well to compute claimed costs.”¹⁴⁸ The Controller further states:

The Commission suggested in its DPD that the SCO should evaluate each animal’s intake information to determine the actual increased holding period of each animal. However, this suggestion assumes that an infinite amount of detail exists in each animal record and also assumes a practical ease of performing such calculations. In reality, it is practically impossible.

The claimant’s animal data averaged between 50,000 and 60,000 line items per fiscal year, as noted in our comments above. The animal census data contains each animal’s date of impoundment and the date of outcome. The Controller computed each animal’s total number of holding period days, but used an average number of reimbursable days to determine the allowable population of animals and to compute allowable costs.

¹⁴⁷ Exhibit F, Controller’s Comments on the Draft Proposed Decision, page 1452.

¹⁴⁸ Exhibit F, Controller’s Comments on the Draft Proposed Decision, page 1452.

In order to compute the actual increased holding period days for every animal on an individual basis, we would need to know what day of the week the animal was impounded. In order to do so, someone would have to manually open each animal record and check what day of the week an animal came into the shelter. They would then need to evaluate, based on the calendar of the specific week and year, the actual number of days in the increased holding period. Once the animal's eligibility was established, someone would need to compute each animal's allowable costs using the reimbursable days. This task would be impractical and most likely would not produce results materially different from using an average calculation.

The Commission suggested that using an average reimbursable days potentially excludes a marginal amount of "eligible animals." We concur. However, we believe that it is equally possible that the use of this average also includes an equal number of non-eligible animals as well. The use of a mathematical average assumes some outliers. But in this case, it provides the most reasonable and cost-effective way to analyze unusually large quantities of animal data. In fact, the large size of the animal population (as noted above) makes the use of an average value statistically more accurate and decreases the probability of error.¹⁴⁹

IV. Discussion

Government Code section 17561(d) authorizes the Controller to audit the claims filed by local agencies and school districts and to reduce any claim for reimbursement of state-mandated costs that the Controller determines is excessive or unreasonable.

Government Code Section 17551(d) requires the Commission to hear and decide a claim that the Controller has incorrectly reduced payments to a local agency or school district. If the Commission determines that a reimbursement claim has been incorrectly reduced, section 1185.9 of the Commission's regulations requires the Commission to send the decision to the Controller and request that the costs in the claim be reinstated.

The Commission must review questions of law, including interpretation of the parameters and guidelines, de novo, without consideration of legal conclusions made by the Controller in the context of an audit. The Commission is vested with exclusive authority to adjudicate disputes over the existence of state-mandated programs within the meaning of article XIII B, section 6.¹⁵⁰ The Commission must also interpret the Government Code and implementing regulations in accordance with the broader constitutional and statutory scheme. In making its decisions, the Commission must strictly construe article XIII B, section 6 and not apply it as an "equitable

¹⁴⁹ Exhibit F, Controller's Comments on the Draft Proposed Decision, pages 1452-1453.

remedy to cure the perceived unfairness resulting from political decisions on funding priorities.”¹⁵¹

With regard to the Controller’s audit decisions, the Commission must determine whether they were arbitrary, capricious, or entirely lacking in evidentiary support. This standard is similar to the standard used by the courts when reviewing an alleged abuse of discretion of a state agency.¹⁵² Under this standard, the courts have found that:

When reviewing the exercise of discretion, “[t]he scope of review is limited, out of deference to the agency’s authority and presumed expertise: ‘The court may not reweigh the evidence or substitute its judgment for that of the agency. [Citation.]’”...“In general...the inquiry is limited to whether the decision was arbitrary, capricious, or entirely lacking in evidentiary support...” [Citations.] When making that inquiry, the “ ‘ ‘court must ensure that an agency has adequately considered all relevant factors, and has demonstrated a rational connection between those factors, the choice made, and the purposes of the enabling statute.’ ”¹⁵³

The Commission must review the Controller’s audit in light of the fact that the initial burden of providing evidence for a claim of reimbursement lies with claimant.¹⁵⁴ In addition, section 1185.1(f)(3) and 1185.2(c) of the Commission’s regulations requires that any assertions of fact by the parties to an IRC must be supported by documentary evidence. The Commission’s ultimate findings of fact must be supported by substantial evidence in the record.¹⁵⁵

A. The Controller’s Exclusions of What It Deems “Ineligible Animals” Are Partially Incorrect as a Matter of Law, and Are Arbitrary, Capricious, or Entirely Lacking in Evidentiary Support, Resulting in Some Incorrect Reductions in Findings 3 and 7 of the Audit Report.

The Parameters and Guidelines for the *Animal Adoption* program authorize local agencies to claim reimbursement for the costs of care and maintenance during the increased holding period for impounded stray or abandoned animals that “die during the increased holding period or are ultimately euthanized,” based on a formula for determining actual costs. The Parameters and Guidelines also authorize reimbursement for providing necessary and prompt veterinary care as

¹⁵⁵ Government Code section 17559(b), which provides that a claimant or the state may commence a proceeding in accordance with the provisions of section 1094.5 of the Code of Civil Procedure to set aside a decision of the Commission on the ground that the Commission’s decision is not supported by substantial evidence in the record.

specified in the Parameters and Guidelines during the holding period for stray and abandoned animals that “die during the increased holding period or are ultimately euthanized.” Claimants are to calculate and claim their costs for these activities in part by determining the number of “stray or abandoned animals that die during the increased holding period or are ultimately euthanized.” The Controller calls this factor of the calculation “eligible animals” or “eligible animal population,” and determined that the claimant overstated costs by overstating the number of eligible animals for several reasons.¹⁵⁶

“Eligible animals” under the test claim statute means any stray or abandoned cat, dog, “rabbit, guinea pig, hamster, potbellied pig, bird, lizard, snake, turtle, or tortoise that is legally allowed as personal property.”¹⁵⁷ The following animals are excluded from “eligible animals” by statute or because the Commission found there were no increased costs under Government Code section 17556(d) due to fee authority sufficient to cover the costs of the program:

- “Animals that are irremediably suffering from a serious illness or severe injury.”¹⁵⁸
- Animals too severely injured to move or where a veterinarian is not available, in the field, and it would be more humane to dispose of the animal.¹⁵⁹
- “Newborn animals that need maternal care and have been impounded without their mother.”¹⁶⁰
- Animals for which fees sufficient to cover the costs of the program may be collected including:
 - Owner relinquished animals, and
 - Animals that are ultimately redeemed, adopted, or released to a nonprofit animal rescue or adoption organization.¹⁶¹

The Controller, in its audit and recalculation of allowable costs for care and maintenance and necessary and prompt veterinary care, states that the following animals were excluded from the population of “eligible animals”:

- Dogs and cats and other animals that were owner-surrendered or previously owned (only stray animals were included in the eligible population);

¹⁵⁶ Exhibit A, IRC, pages 688, 690, and 703 (Final Audit Report).

¹⁵⁷ Food and Agriculture Code sections 31108, 31752 and 31753. See also Parameters and Guidelines, amended January 26, 2006, pages 6-15.

¹⁵⁸ Food and Agriculture Code section 17006.

¹⁵⁹ Penal Code sections 597.1(e) and 597f(d).

¹⁶⁰ Food and Agriculture Code section 17006.

¹⁶¹ Exhibit G, Final Staff Analysis and Proposed Parameters and Guidelines Amendment, January 26, 2006, see pages 1630-1640.

- Dogs, cats, and other animals that were ultimately adopted, transferred, rescued, or redeemed (only those animals with the outcome of “died” or “euthanized” were reviewed);
- Dogs, cats, and other animals that went missing from their kennels, were stolen, or escaped;
- Dogs, cats, and other animals that were DOA [dead on arrival];
- Dogs, cats, and other animals that were euthanized as requested by owners or if euthanasia was required/requested (“Dispo Req” or “Euth Req”);
- Dogs, cats, and other animals that were euthanized for humane reasons (usually on day 1);
- Dogs, cats, and other animals that were suffering from a serious illness or severe injury (usually euthanized on day 1 or died on day 1);
- Newborn animals that need maternal care and were impounded without their mothers (usually died or were euthanized within the first few days; the excluded categories included “Unweaned” or “8 weeks unsustainable”);
- Ineligible other animals such as rodents, livestock, or wild animals;
- Ineligible birds, such as pigeons, doves, ducks, chickens, owls, pheasants, mallards, and gamefowls;
- Dogs and cats that died in the shelter’s kennels outside of increased holding period (days 1, 2, 3, and day 7 and beyond), as per the requirements of the mandate. (Local agencies are eligible to receive reimbursement to care for dogs and cats that *died during the increased holding period* [days 4, 5, and 6]);
- “Other” animals that died in the shelters’ kennels on day 7 and beyond (after the increased holding period). (Local agencies are eligible to receive reimbursement to care for other animals that *died during the increased holding period* [days 2, 3 through 6].); and
- Dogs, cats, and other animals that were euthanized during the holding period as per the requirements of the mandate. The agencies are eligible to receive reimbursement to care for dogs and cats and other animals that were *euthanized after the holding period* (day 7 of the holding period and beyond).¹⁶²

The Commission finds that some of the Controller’s exclusions of “eligible animals” are incorrect as a matter of law, and are arbitrary, capricious, or entirely lacking in evidentiary support.

1. The Controller’s exclusion of animals that the claimant categorized as wildlife, evidence, or otherwise non-adoptable at intake, is correct as a matter of law and not arbitrary, capricious, or entirely lacking in evidentiary support.

¹⁶² Exhibit A, IRC, pages 688-689 (pages 21 and 22 of the Audit Report).

The Parameters and Guidelines authorize reimbursement to provide care and maintenance for impounded “stray or abandoned” rabbits, guinea pigs, hamsters, pot-bellied pigs, birds, lizards, snakes, turtles, and tortoises legally allowed as personal property that die during the increased holding period or are ultimately euthanized, pursuant to Food and Agriculture Code section 31753 as follows:

Care and Maintenance for Impounded Stray or Abandoned Animals Specified in Food and Agriculture Code Section 31753 that Die During the Increased Holding Period or are Ultimately Euthanized (Food & Agr. Code, § 31753)

Beginning January 1, 1999 - Providing care and maintenance for four or six business days from the day after impoundment for impounded stray or abandoned rabbits, guinea pigs, hamsters, pot-bellied pigs, birds, lizards, snakes, turtles, and tortoises legally allowed as personal property that die during the increased holding period or are ultimately euthanized.

Exclusions

Eligible claimants are not entitled to reimbursement for the care and maintenance of the following population of animals:

- a. Stray or abandoned animals that are irremediably suffering from a serious illness or severe injury (Food & Agr. Code, § 17006);
- b. Newborn animals that need maternal care and have been impounded without their mothers (Food & Agr. Code, § 17006);
- c. Stray or abandoned animals too severely injured to move or where a veterinarian is not available and it would be more humane to dispose of the animal (Pen. Code, §§ 597.1, subd. (e), 597f, subd. (d));
- d. Owner relinquished animals; and
- e. Stray or abandoned animals that are ultimately redeemed, adopted, or released to a nonprofit animal rescue or adoption organization.¹⁶³

The Parameters and Guidelines also authorize reimbursement to provide prompt and necessary veterinary care for these animals.

The Controller’s audit report states, without explanation, that the following animals were excluded from the list of “eligible animals” for which reimbursement is allowed:

- Ineligible other animals such as rodents, livestock, or wild animals; and
- Ineligible birds, such as pigeons, doves, ducks, chickens, owls, pheasants, mallards, and gamefowls.¹⁶⁴

The Draft Proposed Decision concluded that the Controller’s stated exclusion of eligible animals was incorrect as matter of law, because some of these specified animals are allowed by state law

¹⁶³ Exhibit A, IRC, pages 72-73.

¹⁶⁴ Exhibit A, IRC, page 689.

as personal property unless restricted by local ordinance, and the Controller cited no law and made no findings specifying why the specific animals were excluded.

Food and Agriculture Code section 31753 provides, in pertinent part:

Any rabbit, guinea pig, hamster, pot-bellied pig, bird, lizard, snake, turtle, or tortoise legally allowed as personal property impounded in a public or private shelter shall be held for the same period of time, under the same requirements of care, and with the same opportunities for redemption and adoption by new owners or nonprofit...animal rescue or adoption organizations as cats and dogs.¹⁶⁵

The phrase “legally allowed as personal property” applies to all the animals listed in the statute. Under the rules of statutory construction, where a list of things is followed by a qualifying word or phrase, such as “legally allowed as personal property,” it is presumed that “qualifying words, phrases and clauses are to be applied to the words or phrases immediately preceding and are not to be construed as extending to or including others more remote.”¹⁶⁶ In that case, the phrase “legally allowed as personal property would apply only to its “last antecedent,” which in Section 31753 is “tortoises.” However, there is an exception, which applies in this case, that “[w]hen several words are followed by a clause which is applicable as much to the first and other words as to the last, the natural construction of the language demands that the clause be applicable to all.”¹⁶⁷ Under that construction, “legally allowed as personal property” applies to the entire list, including “...bird, lizard, snake, turtle, or tortoise...” This latter construction is consistent with Section 1(c)(3) of the test claim statute (Statutes 1998, chapter 752), which states that the intent of the act includes extending public shelter responsibilities from dogs and cats to “other legal pets.”¹⁶⁸ In addition, several of the code sections reenacted or amended by Statutes 1998, chapter 752, state that it is the policy of the state of California “that *no adoptable animal* should be euthanized if it can be adopted into a suitable home.”¹⁶⁹

All property must be real or personal in nature,¹⁷⁰ and animals, to the extent they are legally allowed to be property, fall into the latter category.¹⁷¹ Even many types of wild animals may be legally allowed as personal property in certain circumstances.¹⁷² And whether a particular

¹⁶⁸ Statutes 1998, chapter 752, section 1.

¹⁶⁹ See, e.g., Civil Code section 1834.4; Food and Agriculture Code section 17005; Penal Code section 599d (as added or amended, Stats. 1998, ch. 752) (emphasis added).

¹⁷⁰ Civil Code section 657.

¹⁷¹ See Civil Code sections 658-660, 662 (further defining real property); see also Civil Code section 663 (stating that all property which is not real is defined as personal).

¹⁷² See, e.g., Civil Code section 656 and California Code of Regulations, title 14, section 671.

animal is “legally allowed as personal property” can be a complex issue of law and fact. For example, the test claim statute mandates the claimant to hold rabbits. Rabbits may be classified as livestock,¹⁷³ pets,¹⁷⁴ or wild animals¹⁷⁵ depending on the breed and the owner. The test claim statute also protects and mandates the local agency to hold guinea pigs and hamsters, which are classified as “rodents,” which the Controller’s audit report states were excluded. Additionally, the test claim statute expressly requires local agencies to hold stray or abandoned “birds...legally allowed as personal property” pending adoption or redemption. The statute does not distinguish between types of birds required to be held, some of which may be poultry (e.g. chickens and ducks), pets,¹⁷⁶ or wild animals,¹⁷⁷ depending on the breed and owner. However, the Controller’s audit report excluded “birds, such as pigeons, doves, ducks, chickens, owls, pheasants, mallards, and gamefowls,” without identifying any law rendering these birds illegal to possess as pets or specifying the birds actually held by the claimant.

Therefore, the Draft Proposed Decision found that the Controller’s reduction of costs for care and maintenance (Finding 3) and necessary and prompt veterinary care (Finding 7) associated with the exclusion of “[i]neligible other animals such as rodents, livestock, or wild animals;” and “[i]neligible birds, such as pigeons, doves, ducks, chickens, owls, pheasants, mallards, and gamefowls,” was incorrect as a matter of law, and arbitrary, capricious, or entirely lacking in evidentiary support.

On September 15, 2016, the Controller filed comments on the Draft Proposed Decision arguing that the exclusion of these other animals was correct as a matter of law and not arbitrary or capricious or without evidentiary support. The Controller states that it analyzed 351,221 animal records kept by the claimant on its Chameleon Database system for the audit period.¹⁷⁸ During the audit, the claimant provided a listing of all animals from the Database, which included the following fields: animal ID number, intake date, intake type (primarily stray, owner surrendered,

¹⁷³ “Livestock” is undefined in California law, but rabbits are listed as “specialty livestock” by the United States Department of Agriculture, See <https://www.nal.usda.gov/afsic/specialty-livestock>.

¹⁷⁴ See California Penal Code section 597l(c)(1): (“Pet animals” means dogs, cats, monkeys and other primates, *rabbits*, birds, guinea pigs, hamsters, mice, snakes, iguanas, turtles, and any other species of animal sold or retained for the purpose of being kept as a household pet.) (Emphasis added.)

¹⁷⁵ See, e.g. 50 Code of Federal Regulations Part 17, listing the riparian brush rabbit as an endangered species.

¹⁷⁶ See California Penal Code section 597l(c)(1): “‘Pet animals’ means dogs, cats, monkeys and other primates, rabbits, *birds*, guinea pigs, hamsters, mice, snakes, iguanas, turtles, and any other species of animal sold or retained for the purpose of being kept as a household pet.” (Emphasis added.)

¹⁷⁷ Title 50 Code of Federal Regulations, section 21.13.

¹⁷⁸ Exhibit F, Controller’s Comments on the Draft Proposed Decision, pages 1448-1449.

wildlife, foster, evidence, etc.), primary breed, and outcome date and type.¹⁷⁹ The Controller analyzed the data by sorting various fields and grouping the population into subgroups, from which the Controller determined which animals met the requirements of the mandated program.¹⁸⁰ Any animal record excluded from reimbursement “potentially contained multiple fields with non-reimbursable components.”¹⁸¹ From this review, the Controller made the following findings:

- The Controller excluded animals (including rodents and pigeons) categorized by the claimant as “wildlife” (as distinguished from the claimant’s other intake type of stray or owner surrendered) since these animals do not meet the definition of “stray or abandoned.”
- The Controller excluded gamefowls that were impounded under intake type “evidence” (as distinguished from the claimant’s other intake type of stray or owner surrendered). These birds predominately included fighting birds that were confiscated for humane reasons and were euthanized because of their injuries or aggressive behavior. These birds were not stray or abandoned.
- The Controller allowed all “stray and abandoned” animals, including rabbits, guinea pigs, and hamsters, if the animal died during the increased holding period or was ultimately euthanized.¹⁸²

The claimant has not responded to the Controller’s comments or sought to further clarify this issue.

The Commission finds, absent evidence to the contrary, that the Controller’s exclusion of animals based on the claimant’s categorization as non-adoptable at intake was correct as a matter of law and not arbitrary, capricious, or entirely lacking in evidentiary support. The Legislature enacted the test claim statute (Senate Bill 1785) in an attempt to end the euthanasia of adoptable and treatable stray animals by the year 2010. In this respect, the test claim statute expressly identifies the state policy that “no adoptable animal should be euthanized if it can be adopted into a suitable home” and that “no treatable animal should be euthanized.”¹⁸³ Civil Code section 1834.4(a) states that:

It is the policy of the state that no adoptable animal should be euthanized if it can be adopted into a suitable home. Adoptable animals include only those animals eight weeks of age or older that, at or subsequent to the time the animal is impounded or otherwise taken into possession, have manifested no sign of behavioral or temperamental defect that could pose a health or safety risk or

¹⁸¹ Exhibit F, Controller’s Comments on the Draft Proposed Decision, page 1448.

¹⁸² Exhibit F, Controller’s Comments on the Draft Proposed Decision, pages 1449-1450.

¹⁸³ See, Civil Code section 1834.4; Food and Agriculture Code section 17005; and Penal Code section 599d.

otherwise make the animal unsuitable for placement as a pet, and have manifested no sign of disease, injury, or congenital or hereditary condition that adversely affects the health of the animal that is likely to adversely affect the animal's health in the future.

Consistent with this purpose, the Parameters and Guidelines authorize reimbursement for the "Care and Maintenance for Impounded *Stray or Abandoned* Animals Specified in Food and Agriculture Code Section 31753."

Here, based on the Controller's comments, the claimant identified animals that were wildlife or evidence, based on its determination that these animals were not stray or abandoned as pets and, thus, not suitable for adoption. This exclusion is correct as a matter of law. In addition, there is no evidence in the record that the Controller's interpretation of the claimant's records is wrong and claimant has not submitted any comments contradicting the Controller's comments on the Draft Proposed Decision.

Accordingly, the exclusion of animals based on the claimant's categorization of wildlife, evidence, or otherwise non-adoptable animals at intake was correct as a matter of law and not arbitrary, capricious, or entirely lacking in evidentiary support.

2. The exclusion of animals deemed treatable upon arrival at the shelter and later euthanized during the increased holding period because they became non-rehabilitatable, is incorrect as a matter of law. Any reduction of costs on this basis should be reinstated to the extent the claimant can provide source documents that shows the evidence of the validity of such costs and their relationship to the mandate.

The Controller excludes from reimbursement all costs incurred for the care and maintenance and prompt and necessary veterinary care of dogs, cats, and other animals that were euthanized *during* the increased holding period. The Controller states "agencies are eligible to receive reimbursement to care for dogs and cats and other animals that were *euthanized after the holding period.*"¹⁸⁴ The Controller bases its finding to exclude these animals on the plain language of the Parameters and Guidelines, which provides that local agencies are eligible to receive reimbursement for care and maintenance costs and for necessary and prompt veterinary costs only for those animals "that die during the increased holding period or are ultimately euthanized." The Controller maintains that these costs are only eligible for reimbursement for those animals that die of natural causes during the increased holding period or are euthanized *after* the increased holding period. Thus, the Controller argues, if an animal is euthanized during the increased holding period, then no costs for that animal are eligible for reimbursement.

The Commission finds that the Controller's interpretation of the Parameters and Guidelines is not correct. The Parameters and Guidelines provide that local agencies are eligible to receive reimbursement for care and maintenance and prompt and necessary veterinary costs only for those animals "that die during the increased holding period or are ultimately euthanized." The plain language of the phrase "animals that die during the increased holding period or are ultimately euthanized" is vague and ambiguous because the word "die" can include both death by natural causes and death by euthanasia. Since the plain language is not clear, it is necessary

¹⁸⁴ Exhibit A, IRC, page 689.

to review the decisions adopted by the Commission on this issue and the statutory scheme of the test claim statutes.¹⁸⁵

The phrase “ultimately euthanized” was used in the Test Claim Statement of Decision only to identify those animals whose owners are unknown or are not adopted, meaning that the costs for care, treatment, and veterinary services during the holding period for this group of animals could not be recovered by fee revenue. The Statement of Decision states in relevant part:

Fee Authority – Government Code Section 17556, Subdivision (d). Government Code section 17556, subdivision (d), provides that there shall be no costs mandated by the state if the local agency has the authority to levy service charges, fees, or assessments sufficient to pay for the mandated program.

In the present case, local agencies do have the authority, under certain circumstances, to assess fees upon the owner of an impounded animal for the care and maintenance of the animal. For example, pursuant to Civil Code section 2080, any public agency that takes possession of an animal has the authority to charge the owner, *if known*, a reasonable charge for saving and taking care of the animal.

Similarly, Penal Code sections 597f and 597.1 also allow local agencies to pass on the costs of caring for abandoned or seized animals to their owners by providing that “the cost of caring for the animal shall be a lien on the animal until the charges are paid.”

Moreover, Penal Code section 597f allows the cost of hospital and emergency veterinary services provided for impounded animals to be passed on to the owner, if known. [Footnote omitted.]

The fee authority granted under the foregoing authorities applies only if the owner is known. Thus, local agencies have the authority to assess a fee to care and provide treatment for animals relinquished by their owners pursuant to Food and Agriculture Code section 31754. Local agencies also have the authority to assess a fee for the care and treatment of impounded animals that are ultimately redeemed by their owners. Under such circumstances, the Commission finds that the fee authority is sufficient to cover the increased costs to care, maintain, and provide necessary veterinary treatment for the animal during the required holding period since the “cost of caring” for the animal can be passed on to the owner.

Accordingly, pursuant to Government Code section 17556, subdivision (d), the Commission finds that there are no costs mandated by the state for the care, maintenance and necessary veterinary treatment of animals relinquished by their owners or redeemed by their owners during the required holding period.

¹⁸⁵ The Parameters and Guidelines are regulatory in nature (*Clovis Unified School Dist. v. Chiang* (2010) 188 Cal. App. 4th 794, 799), and, thus, must be construed in accordance with the rules of statutory and regulatory construction.

The Commission further finds that there are no costs mandated by the state under Government Code section 17556, subdivision (d), for the care, maintenance, and treatment of impounded animals that are ultimately adopted by a new owner; for the care, maintenance, and treatment of impounded animals that are requested by a nonprofit animal rescue or adoption organization; or for the administrative activities associated with releasing the animal to such organizations.

The test claim legislation gives local agencies the authority to assess a standard adoption fee, in addition to any spay or neuter deposit, upon nonprofit animal rescue or adoption organizations that request the impounded animal prior to the scheduled euthanization of the animal. [Footnote omitted.]

The claimant contends that the “standard adoption fee” is not sufficient to cover the costs for animals adopted or released to nonprofit animal rescue or adoption organizations. However, based on the evidence presented to date, the Commission finds that local agencies are not prohibited by statute from including in their “standard adoption fee” the costs associated with caring for and treating impounded animals that are ultimately adopted by a new owner or released to nonprofit animal rescue or adoption organizations, and the associated administrative costs. Rather, local agencies are only prohibited from charging nonprofit animal rescue or adoption organizations a higher fee than the amount charged to individuals seeking to adopt an animal.

However, the fees recovered by local agencies under the foregoing authorities do *not* reimburse local agencies for the care and maintenance of stray or abandoned animals, or the veterinary treatment of stray or abandoned animals (other than cats and dogs) during the holding period required by the test claim legislation when:

- The owner is unknown;
- The animal is not adopted or redeemed; or
- The animal is not released to a nonprofit animal rescue or adoption organization.

Thus, the fee authority is not sufficient to cover the increased costs for care, maintenance, and treatment during the required holding period for those animals that are ultimately euthanized. Under such circumstances, the Commission finds that that Government Code section 17556, subdivision (d), does not apply to deny this claim. Rather, local agencies may incur increased costs mandated by the state to care for these animals during the required holding period.¹⁸⁶

There was no discussion of animals that die during the increased holding period in the Test Claim Statement of Decision.

¹⁸⁶ Exhibit G, Test Claim Statement of Decision, adopted January 25, 2001, pages 1574-1576. (Emphasis added.)

During the adoption of the Parameters and Guidelines, however, the County of Fresno requested reimbursement for animals that die during the increased holding period while being held pending adoption or euthanization as follows:

Fresno County recommends that reimbursements that apply to animals that are ultimately euthanized also apply to those animals that die while being held pending adoption or euthanization. If the animal dies pending adoption, obviously no adoption fees can be paid, and thus there is no revenue pertaining to that animal. If the animal dies pending euthanasia, the animal still had to be held until its untimely demise.¹⁸⁷

The staff analysis adopted for the Parameters and Guidelines agreed with the request as follows:

If a stray or abandoned animal dies during the time an agency is required to hold that animal, the agency would still be required by the state to incur costs to care and maintain the animal, and to provide “necessary and prompt veterinary care” for the animal before the animal died. The agency cannot recover those costs from the adoptive owner since the animal was never adopted or released to a nonprofit adoption organization. Thus, staff agrees with the County that these costs are eligible for reimbursement.¹⁸⁸

Thus, the Parameters and Guidelines define the mandated population of animals for purposes of calculating reimbursement for the care and maintenance, and necessary and prompt veterinary care, as those that “die during the holding period or are ultimately euthanized.”

However, neither the Parameters and Guidelines, nor the analyses adopted for the Parameters and Guidelines, define what it means to “die” during the holding period. And the decisions do *not* limit reimbursement to animals that die of natural causes during the increased holding period. Such a limitation would be contrary to the statutory scheme.

Food and Agriculture Code section 17006 provides that the holding period does not apply to animals that are irremediably suffering from a serious illness or severe injury or to newborn animals that need maternal care and have been impounded without their mothers. Such animals may be euthanized without being held for owner redemption or adoption. A related statute addresses the issue of a “treatable” animal’s health changing over the course of impoundment. Food and Agricultural Code section 17005 reads in its entirety:

(a) It is the policy of the state that no adoptable animal should be euthanized if it can be adopted into a suitable home. Adoptable animals include only those animals eight weeks of age or older that, at or subsequent to the time the animal is impounded or otherwise taken into possession, have manifested no sign of a behavioral or temperamental defect that could pose a health or safety risk or otherwise make the animal unsuitable for placement as a pet, and have manifested

¹⁸⁷ Exhibit G, Proposed Parameters and Guidelines and Analysis, Hearing Item 4, February 28, 2002, page 1590.

¹⁸⁸ Exhibit G, Proposed Parameters and Guidelines and Analysis, Hearing Item 4, February 28, 2002, page 1591.

no sign of disease, injury, or congenital or hereditary condition that adversely affects the health of the animal or that is likely to adversely affect the animal's health in the future.

*(b) It is the policy of the state that no treatable animal should be euthanized. A treatable animal shall include any animal that is not adoptable but that could become adoptable with reasonable efforts. This subdivision, by itself, shall not be the basis of liability for damages regarding euthanasia.*¹⁸⁹

Section 17005, thus, expressly contemplates an animal's health changing over the course of impoundment. Read together with section 17006, the two statutes require a shelter to hold an animal which is ill or injured— but not an animal which is irremediably suffering — for the relevant holding period on the ground that the animal's health may improve. The stated intent of the test claim statute was to require shelters to care for all pets and to shift the focus from euthanasia to owner redemption or adoption:

According to the author, the purpose of this bill is: (1) to make it clear that animal shelters and private individuals have the same responsibility to animals under their care; (2) to reduce the number of adoptable animals euthanized at shelters by shifting the focus of shelters from killing to owner redemption and adoption; (3) to give owner-relinquished pets the same chance to live as stray animals by providing for uniform holding periods; (4) to establish clearer guidelines for the care and treatment of animals in shelters; and (5) *to require shelters to care for all pets.*

The author argues that too many adoptable animals are euthanized by shelters and that the proposed changes will decrease the frequency of this tragedy.

Further, the author argues that taxpayers who own legally allowed pets other than cats and dogs should be treated the same as taxpayers who own cats and dogs.¹⁹⁰

Consistent with the statutory scheme, the Parameters and Guidelines expressly contemplate an animal's health changing over the course of impoundment from "treatable" to "adoptable." Section IV.(B)(8) of the Parameters and Guidelines allows reimbursement for the initial physical examination of a stray or abandoned animal to determine the animal's baseline health status and classification as "adoptable, treatable, or non-rehabilitatable." The Parameters and Guidelines further authorize reimbursement for the administration of a wellness vaccine to "treatable" or "adoptable" animals, veterinary care to stabilize and/or relieve the suffering of a "treatable" animal, and veterinary care intended to remedy any applicable disease, injury, or congenital or hereditary condition that adversely affects the health of a "treatable" animal until the animal becomes "adoptable."

Even with veterinary care, the condition of the animal can change during the increased holding period and the animal can become non-rehabilitatable. If that occurs, the animal is not "adoptable" or "treatable" and may be euthanized under the law. Therefore, to deny

¹⁸⁹ Emphasis added.

¹⁹⁰ Senate Judiciary Committee Analysis of S.B. 1785 (1997-1998 Regular Session) (Hearing Date: April 21, 1998), page 3-4. (Emphasis added.)

reimbursement for the costs incurred during the increased holding period for an animal that becomes non-rehabilitatable and that has to be euthanized during, but before the end of, the increased holding period conflicts with the test claim statute and the Parameters and Guidelines. The Commission finds that reimbursement is required under these circumstances.

However, in response to the Draft Proposed Decision, the Controller continues to contend that this audit exclusion is correct as a matter of law. The Controller further argues that “the level of detail necessary to review each individual animal’s health status and progression of their disease prior to euthanasia simply isn’t available from the animals data statistics maintained in the claimant’s Chameleon database.” Accordingly, the Controller maintains that “it is impossible to determine whether the animals euthanized for medical reasons would fit in the hypothetical scenario described [above].”¹⁹¹

As indicated above, the Commission finds the Controller’s interpretation of the mandate is incorrect as a matter of law and that claimants are eligible to receive reimbursement to provide care and maintenance to an animal during the increased holding period if the animal was deemed treatable and adoptable at intake, but became non-rehabilitatable and was euthanized *during* the increased holding period. *However*, to receive reimbursement, section VI. of the Parameters and Guidelines requires claimants to provide source documents that show the evidence of the validity of such costs and their relationship to the mandate. The supporting documentation must be kept on file by the agency during the audit period required by Government Code section 17558.5. In this respect, claimants are required by Food and Agriculture Code section 32003 to maintain records on animals that are taken up, euthanized, or impounded. Such records shall identify the date the animal was taken up, euthanized, or impounded; the circumstances surrounding these events; and the names of the personnel performing these activities.¹⁹² The Parameters and Guidelines are regulatory in nature and are binding on the parties.¹⁹³

The Controller’s comments on the Draft Proposed Decision suggest that the claimant’s database does not contain source documents that show the evidence of the validity of these costs. However, since the Controller took the position that reimbursement was not legally required for any animal euthanized during the increased holding period, it is unclear whether the Controller specifically requested documents to support the costs incurred for these animals. The claimant did not file comments on the Draft Proposed Decision and has not sought to further clarify this issue. Instead, the claimant’s IRC generally contends that it was denied the necessary time to submit additional material or else “it would have had enough time to address all of the Controller’s requests for additional information.”¹⁹⁴

Accordingly, any reduction of costs relating to the exclusion of animals deemed treatable upon arrival at the shelter and later euthanized during the increased holding period because they

¹⁹¹ Exhibit F, Controller’s Comments on the Draft Proposed Decision, page 1452.

¹⁹² It is not clear from the record whether the Controller actually requested these records from the claimant based on the Controller’s interpretation that such costs were not reimbursable.

¹⁹³ *Clovis Unified School Dist. v. Chiang* (2010) 188 Cal.App.4th 794, 799.

¹⁹⁴ Exhibit A, IRC, pages 16-18.

became non-rehabilitatable is incorrect as a matter of law. Such costs are reimbursable to the extent the claimant can provide source documents to prove the validity of such costs.

3. The Commission and the Controller are bound by the *Purifoy* decision and, thus, the Controller’s exclusion of animals that were euthanized too early because Saturday was counted as a business day for the required holding period, is also correct as a matter of law. However, the Controller’s recalculation of costs using an average number of reimbursable days is incorrect as a matter of law, and is arbitrary, capricious, and entirely lacking in evidentiary support to the extent it results in an exclusion of “eligible animals” held for the time required under *Purifoy*.

As indicated above, the Controller excluded “dogs, cats, and other animals that were euthanized during the holding period as per the requirements of the mandate. The agencies are eligible to receive reimbursement to care for dogs and cats and other animals that were *euthanized after the holding period* (day 7 of the holding period and beyond).”¹⁹⁵ Animals may have been euthanized during the holding period because of claimant’s misinterpretation of the required holding period in conflict with the Court of Appeal’s decision in *Purifoy*, which held that Saturday is not a “business day” for purposes of calculating the required holding period under the test claim statutes before a stray or abandoned dog can be adopted or euthanized.¹⁹⁶ Before the decision was issued, many local agencies were operating under the assumption that Saturday was a “business day” that could be counted as part of the holding period, which resulted in the disposal of some animals at least one day too early.¹⁹⁷ Pursuant to the *Purifoy* decision, the Controller excluded those animals from the number of “eligible animals that die during the holding period or are ultimately euthanized,” because they were disposed of at least one day too early. Thus, no reimbursement for the costs for care and maintenance or necessary and prompt veterinary care was allowed for those animals that were euthanized during the increased holding period.

The Commission finds that the court’s interpretation of “business day” in *Purifoy* is binding, and that the Controller’s exclusion of Saturday as a business day when calculating the increased holding period is correct as a matter of law. Thus, except in the circumstances described below, the Controller’s exclusion of animals that were euthanized too early because Saturday was counted as a business day for the required holding period, is also correct as a matter of law. However, the Controller’s recalculation of care and maintenance costs using an average number of reimbursable days is incorrect as a matter of law, and is arbitrary, capricious, and entirely lacking in evidentiary support, to the extent it results in an exclusion of “eligible animals” held for the time required under *Purifoy*.

- a) The court’s interpretation of “business day” in *Purifoy* is binding and, thus, the Controller’s exclusion of Saturday as a business day when calculating the increased holding period is correct as a matter of law. Therefore, the exclusion of animals that

¹⁹⁵ Exhibit A, IRC, pages 688-689 (pages 21 and 22 of the Audit Report).

¹⁹⁶ *Purifoy v. Howell* (2010) 183 Cal.App.4th 166.

¹⁹⁷ Exhibit B, Controller’s Late Comments on the IRC, page 1005.

were euthanized too early because Saturday was counted as a business day for the required holding period, is also correct as a matter of law.

The court in *Purifoy* held that Saturday is not a “business day” for purposes of calculating the required holding period. In that case, Plaintiff Veena Purifoy’s dog Duke was impounded on a Thursday, and adopted the following Wednesday by a new owner (Duke was returned to Purifoy). The shelter, Contra Costa County Animal Services, counted the required holding period for Duke under section 31108 beginning Friday (the day after impoundment), Saturday (day 2), Tuesday (day 3), and Wednesday (day 4). The shelter was closed on Sunday and Monday, and did not count those as business days, by its own admission.¹⁹⁸ The court examined the meaning of “business days” elsewhere in state law and in case law, and found that sometimes “business day” includes Saturdays, but sometimes it does not. The court reasoned that the purpose of the statute was to promote a longer holding period for animal adoption and redemption, and that excluding Saturday as a business day would generally mean extending the holding period by one day. Thus, the court held “in light of our obligation to choose a construction that most closely comports with the Legislature’s intent and promotes, rather than defeats, the statute’s general purposes, we conclude that ‘business days’ in section 31108(a) means Monday through Friday, the meaning most commonly used in ordinary discourse.”¹⁹⁹ The court applied this interpretation to the case of Duke, and concluded that the shelter in question had not held the animal for the required number of business days before permitting his adoption to a new owner.²⁰⁰

Here, applying the *Purifoy* decision, the Controller determined that the number of “eligible animals” was overstated, because the claimant incorrectly calculated the holding period to include Saturdays and thus euthanized at least some number of animals one day too early. For example, a dog impounded on a Thursday, in a shelter that stays open weekend hours, would be subject to a four day holding period beginning on Friday, excluding Saturday and Sunday, and through the close of business on Wednesday; if the shelter counted Saturday as a business day, the holding period for the same dog would end a day earlier. The Controller maintains that application of the *Purifoy* decision is appropriate because the decision clarified the legal definition of a business day “as of the date that the applicable statute was enacted in 1998.”²⁰¹ The Controller further explains:

We acknowledge that many animal shelters were operating under the assumption that they could count Saturday as a business day to calculate the holding period of an animal. However, the court’s decision declared that this assumption was incorrect.²⁰²

¹⁹⁸ *Purifoy v. Howell* (2010) 183 Cal.App.4th 166, 171-172.

¹⁹⁹ *Purifoy v. Howell* (2010) 183 Cal.App.4th 166, 182.

²⁰⁰ *Purifoy v. Howell* (2010) 183 Cal.App.4th 166.

²⁰¹ Exhibit B, Controller’s Late Comments on the IRC, page 1005.

²⁰² Exhibit B, Controller’s Late Comments on the IRC, page 1005.

The claimant strenuously protests the Controller’s application of the *Purifoy* holding. The claimant maintains that its calculation of the holding period was based on a reasonable interpretation of the test claim statute and the Parameters and Guidelines, and that the Controller’s application of the *Purifoy* holding to recalculate the increased holding period, and the resulting adjustment to the population of eligible animals, is an unfair and unreasonable retroactive application of the law. The claimant notes that “*Purifoy* is not a decision of the Commission nor is it a decision to which the Commission was a party.”²⁰³ Additionally, the claimant notes that there has been no subsequent amendment to the Parameters and Guidelines, or request for a new test claim decision, and therefore the effect of the decision on the Parameters and Guidelines has not been analyzed by the Commission.²⁰⁴

The claimant argues that although judicial decisions are generally given retroactive effect because the court is said to interpret the law as it always was, rather than to alter it, there are several exceptions to the general rule which apply in this instance.²⁰⁵ Specifically, claimant asserts that the change is procedural, not substantive; that retroactive application of *Purifoy* would produce unjust results with respect to local governments that are subject to audit; and that retroactive application cannot achieve the goal of extending the holding period for animals long since retrieved, adopted, or euthanized.²⁰⁶ Furthermore, the claimant argues that the Legislature has, by enacting Statutes 2011, chapter 97, since clarified by subsequent statute that a “business day” for purposes of the relevant Food and Agriculture Code sections “includes any day that a public or private shelter is open to the public for at least four hours, excluding state holidays.” The claimant asserts that this legislative change was an attempt to correct the interpretation of *Purifoy*.²⁰⁷ The claimant argues that these precedents provide “sufficient reason for the Commission to reverse the SCO as to the retroactive application of the *Purifoy* case to the instant audit and reimburse any and all attendant costs.”²⁰⁸

It is undisputed that the Commission was not a party to the *Purifoy* matter, and that the court did not expressly address the effect of its decision on mandate reimbursement. And, as both the claimant and the Controller acknowledge, there has been no amendment to the Parameters and Guidelines, and no request for amendment.²⁰⁹ It is also undisputed that the Commission did not define “business day” as used in the plain language of the test claim statutes in either the Test Claim Statement of Decision or the Parameters and Guidelines.

However, the court’s interpretation of “business day” is binding. The interpretation of a statute is an exercise of the judicial power the Constitution assigned to the courts, and constitutes the

²⁰³ Exhibit A, IRC, page 11.

²⁰⁴ Exhibit A, IRC, page 11.

²⁰⁵ Exhibit A, IRC, page 11.

²⁰⁶ Exhibit A, IRC, page 12 (citing *Camper v. Workers’ Comp. Appeals Bd.* (1992) 3 Cal.4th 679).

²⁰⁷ Exhibit A, IRC, page 13.

²⁰⁸ Exhibit A, IRC, page 13.

²⁰⁹ Exhibit A, IRC, page 11; Exhibit B, Controller’s Late Comments on the IRC, page 17.

authoritative statement of what the statute meant before as well as after the decision of the case giving rise to that construction.²¹⁰ This is why judicial decisions are normally said to have retroactive effect, because the court is interpreting the law, rather than making new law.²¹¹ Moreover, where a judicial decision is limited to prospective effect, the court will exercise equitable authority and, based on the facts of a particular case, will so state that its decision operates prospectively only. Indeed, in the principal case cited by the claimants discussing retroactivity, the court explains that “[a] *court* may decline to follow the standard rule when retroactive application of a decision would raise substantial concerns about the effects of the new rule on the general administration of justice, or would unfairly undermine the reasonable reliance of parties on the previously existing state of the law.”²¹² “In other words,” the Court continued, “*courts* have looked to the ‘hardships’ imposed on parties by full retroactivity, permitting an exception only when the circumstances of a case draw it apart from the usual run of cases.”²¹³ Unlike the courts, the Commission’s jurisdiction is limited, as a quasi-judicial agency created by statute, and the Commission has no authority to do equity.²¹⁴ Absent a statement by the court that *Purifoy* should be limited in its application, the Commission and the Controller are bound to apply the court’s definition of “business day” for purposes of the test claim statute particularly where, as here, it does not conflict with the Parameters and Guidelines. Under the doctrine of stare decisis, all tribunals exercising inferior jurisdiction are required to follow decisions of courts exercising superior jurisdiction.²¹⁵

Furthermore, even though *Purifoy* only directly and expressly defines “business day” for purposes of section 31108 (the holding period for dogs), the court’s analysis and conclusion apply with equal force to sections 31752 and 31753 (holding periods for cats and for “other animals,” respectively). The California Supreme Court has declared that “[a] statute that is modeled on another, and that shares the same legislative purpose is in *pari materia* with the other, and should be interpreted consistently to effectuate congressional intent.”²¹⁶ Accordingly, Food and Agriculture sections 31752 and 31753 should be interpreted consistently with section 31108, because all three code sections provide for the same holding period for different animals, and all three were enacted within the test claim statute.

Moreover, even though the Legislature amended the code after the decision in *Purifoy* was issued to state that any day that a shelter is open for four or more hours is a “business day,” this later amendment by the Legislature cannot be interpreted as the Legislature’s declaration of the

²¹⁰ *McClung v. Employment Development Department* (2004) 34 Cal.4th 467, 473; *Carter v. California Department of Veteran Affairs* (2006) 38 Cal.4th 914, 922.

original existing law. When the court “‘finally and definitively’ interprets a statute, the Legislature does not have the power to then state that a later amendment merely declared existing law.”²¹⁷ The later amendment goes into effect only when the statute is operative and effective, in this case on January 1, 2012, many years after the fiscal years at issue in this IRC.

Accordingly, the Controller’s exclusion of Saturday as a business day when calculating the increased holding period is correct as a matter of law. Thus, the exclusion from the population of “eligible animals” those animals that were euthanized too early because Saturday was counted as a business day for the required holding period, is also correct as a matter of law.

b) However, the Controller’s recalculation of the increased holding period using an average number of reimbursable days is incorrect as a matter of law, and is arbitrary, capricious, and entirely lacking in evidentiary support, to the extent the recalculation results in an exclusion of “eligible animals” held for the duration required under Purifoy.

The Parameters and Guidelines provide for a formula for reimbursement of care and maintenance that requires multiplying the cost per animal per day by the number of “eligible animals,” and by “each reimbursable day” in the increased holding period. The Parameters and Guidelines further allow reimbursement for the necessary and prompt veterinary care for each “eligible animal” during the increased holding period. But the actual number of calendar days of the holding period is not a constant, as it depends on the day of impoundment. The Parameters and Guidelines state that for dogs and cats the reimbursable holding period “shall be measured by calculating the difference between three days from the day of capture, and four or six business days from the day after impoundment” (four business days for shelters that choose to make animals available for owner redemption on a weekend day or weekday evening). For “other animals,” the reimbursable holding period is four or six business days from the day after impoundment, because prior law did not define a specific holding period.²¹⁸

Assuming a local agency, like the claimant, makes dogs and cats available for owner redemption on a weekend day or weekday evening and is thus subject to only the four business day holding period for dogs and cats, the increased holding period operates as follows (the 72 hour holding period for dogs and cats under prior law is shaded in each case, and the day of impoundment is indicated by “Imp”):

Mon	Tues	Wed	Thurs	Fri	Sat	Sun	Mon	Tues	Wed	Thurs
Imp	One	Two	Three	Four						
	Imp	One	Two	Three			Four			
		Imp	One	Two			Three	Four		
			Imp	One			Two	Three	Four	

²¹⁷ *McClung v. Employment Development Department* (2004) 34 Cal.4th 467, 473; *Carter v. California Department of Veteran Affairs* (2006) 38 Cal.4th 914, 922.

²¹⁸ Exhibit G, Proposed Parameters and Guidelines and Analysis, Hearing Item 4, February 28, 2002, page 1591.

				Imp			One	Two	Three	Four
					Imp		One	Two	Three	Four
						Imp	One	Two	Three	Four

The chart does not count Saturday as a business day, in accordance with *Purifoy*, or Sunday.²¹⁹ As it plainly appears, the *increased* holding period for dogs and cats ranges from two to four calendar days, depending on the day of the week that an animal is first impounded. An animal impounded on a Monday or Sunday would be subject to a two day increased holding period, while an animal impounded on a Thursday or a Friday would be subject to a four day increased holding period, because Saturday and Sunday cannot be counted.

For a local agency subject to the shortened four day holding period for “other animals,” the number of “reimbursable days” is as follows:

Mon	Tues	Wed	Thurs	Fri	Sat	Sun	Mon	Tues	Wed	Thurs
Imp	One	Two	Three	Four						
	Imp	One	Two	Three			Four			
		Imp	One	Two			Three	Four		
			Imp	One			Two	Three	Four	
				Imp			One	Two	Three	Four
					Imp		One	Two	Three	Four
						Imp	One	Two	Three	Four

Again, this chart does not count Saturday and Sunday as business days, consistently with *Purifoy*. If the animal is impounded on a Monday, the reimbursable increased holding period is four calendar days. If the animal is impounded on a Tuesday, the reimbursable increased holding period is seven calendar days because Saturday and Sunday cannot be counted.

When auditing and recalculating the number of reimbursable days pursuant to *Purifoy*, the Controller did not include either Saturday, Sunday, and additionally excluded days that the agency was closed as a business day. And, like the claimant,²²⁰ the Controller calculated an *average* increased holding period for all dogs and cats to be three days, and the average increased holding period for all other “eligible” animals to be six days, and did not calculate the total number of reimbursable days for each eligible animal based on the day the animal was impounded. The Controller’s audit report provides the following explanation:

²¹⁹ *Purifoy v. Howell* (2010) 183 Cal.App.4th 166. Note though that the shelter is open all day Saturday and for five hours on Sunday.

²²⁰ See, e.g., Exhibit A, IRC, pages 741-742. The reimbursement claims claimed two reimbursable days for all dogs and cats, and four reimbursable days for all “other animals,” and made no attempt to state the total number of reimbursable days for each eligible animal.

Determining the exact number of reimbursable days is often difficult. Depending on the impound day, each animal will have a different holding period requirement. For example, for a dog impounded at noon on Monday, the “old” law (prior to 1999) requires the city to hold the dog until noon on Thursday (72 hours); the current law requires the city to hold the dog until closing on Friday (which is 4 business days following impoundment). Under the current law, the holding period was increased by 1 day and 5 hours (or 29 hours). However, for the dog impounded at noon on Friday, the “old” law requires the city to hold the dog until noon on Monday (72 hours); and the current law requires the city to hold the dog until closing on Friday (which is 4 business days following impoundment). Under the current law, the holding period was increased by 4 days and 5 hours (or 101 hours).

This calculation takes into consideration that the required holding period does not include either Saturday or Sunday as a business day, which is consistent with the Appellate Court decision dated March 26, 2010, in the case of *Purifoy et al v. Howell*. We also took into consideration the operating schedules of the city’s shelters; some shelters are closed on Mondays. In such cases, we did not count Monday as a business day.

To determine the number of reimbursable days for all of the city’s shelters, we analyzed every possible impound option (e.g., Monday impound, Tuesday impound, Wednesday impound, etc.) and determined the average increased holding period for dogs and cats to be 3 days and the average increased holding period for other “eligible” animals to be 6 days.²²¹

Thus, in an attempt to simplify the calculation of the increased holding period, the Controller applied an average number of days, rather than the actual number of increased holding days required for each stray or abandoned animal. Even if the increased holding period averages three days for dogs and cats, or six days for other animals, the Parameters and Guidelines do not provide for reimbursement based on an average number of days. While the average number of days applied by the Controller results in an *increase* in the number of reimbursable days claimed by the claimant, the Controller’s recalculation also results in the exclusion of animals that are euthanized during the Controller’s defined “average” holding period but which have been held for the period of time required under *Purifoy* and, thus, no reimbursement would be allowed for the costs of care and maintenance and necessary and prompt veterinary care for the excluded animal. For example, if a stray or abandoned dog or cat is impounded on a Monday or Sunday, the actual increased holding period under the law is two calendar days, and not three days, and the dog or cat may be euthanized on day three (a day before the Controller’s average and, thus, as “during the holding period” as defined by the Controller). Similarly, for “other animals,” the Controller applied an increased holding period of six days. However, if a stray bird or rabbit is impounded on a Monday, the actual increased holding period under the law is four calendar days, and not six days, and the bird or rabbit may be euthanized on day five (a day before the Controller’s average and, thus, “during the holding period” as defined by the Controller).

²²¹ Exhibit A, IRC, page 690.

Therefore, without taking into account the day of the week a stray or abandoned animal is impounded and calculating the actual number of days in the increased holding period for that animal, the Controller's recalculation and use of the average number of reimbursable days results in an exclusion of "eligible animals" correctly held under the law.

In comments on the Draft Proposed Decision, the Controller agrees that its methodology excludes some eligible animals, but argues that a mathematical average provides the most reasonable and cost-effective way to analyze large quantities of data:

The Commission suggested that using an average reimbursable days potentially excludes a marginal amount of "eligible animals." We concur. However, we believe that it is equally possible that the use of this average also includes an equal number of non-eligible animals as well. The use of a mathematical average assumes some outliers. But in this case, it provides the most reasonable and cost-effective way to analyze unusually large quantities of animal data. In fact, the large size of the animal population (as noted above) makes the use of an average value statistically more accurate and decreases the probability of error.²²²

The Controller does not express how much more accurate the use of an average number of days might be, but does explain that "claimant's animal data averaged between 50,000 and 60,000 line items per year..." and "[i]n order to compute the actual increased holding period days for every animal on an individual basis, we would need to know what day of the week the animal was impounded...manually open each animal record...[and] evaluate, based on the calendar of the specific week and year, the actual number of days in the increased holding period." Then, "[o]nce the animal's eligibility was established, someone would need to compute each animal's allowable costs using reimbursable days." The Controller concludes that this "would be impractical and most likely would not produce results materially different from using an average calculation."²²³

The Commission disagrees with the Controller. The Parameters and Guidelines do not provide for reimbursement based on an average number of days in the increased holding period, but requires the determination of the actual increased holding period for each animal. And based on the *Purifoy* decision, the increased holding period must be calculated from the day of the week the animal was impounded in order to ensure that Saturday and Sunday are not counted as business days. As the Controller acknowledges, "[i]n order to compute the actual increased holding period days for every animal on an individual basis, we would need to know what day of the week the animal was impounded...manually open each animal record...[and] evaluate, based on the calendar of the specific week and year, the actual number of days in the increased holding period." As indicated above, the Controller's methodology results in an exclusion of any "eligible animal" properly held under the law, but euthanized during the Controller's average holding period. To the extent the Controller reduced costs for care and maintenance and necessary and prompt veterinary care because the Controller incorrectly excluded an animal under these circumstances, the reduction is incorrect as a matter of law.

²²² Exhibit F, Controller's Comments on the Draft Proposed Decision, page 1453.

²²³ Exhibit F, Controller's Comments on the Draft Proposed Decision, page 1453.

Moreover, the methodology is arbitrary, capricious, and without any evidentiary support. Although the Controller states that it is “equally *possible* that the use of this average also includes an equal number of non-eligible animals,” which makes the methodology “reasonable,” there is no evidence in the record that the Controller’s three or six day average number of reimbursable days accurately reflects or is representative of the actual increased holding period for all stray or abandoned animals held by the claimant during the audit period, or representative of the mandated costs incurred by the claimant. Government Code section 17559 and section 1187.5 of the Commission’s regulations require that all assertions of fact be based on substantial evidence in the record. Substantial evidence has been defined by the courts as follows:

“Substantial” is a term that clearly implies that such evidence must be of ponderable legal significance. Obviously the word cannot be deemed synonymous with “any” evidence. It must be reasonable in nature, credible, and of solid value; it must actually be “substantial proof” of the essentials which the law requires in a particular case.²²⁴

And a “possibility” of a fact does not constitute substantial evidence in the record.

Accordingly, the Commission finds that the Controller’s recalculation of the increased holding period using an average number of reimbursable days is incorrect as a matter of law, and is arbitrary, capricious, and entirely lacking in evidentiary support, to the extent the recalculation results in an exclusion of “eligible animals” properly held for the duration required under *Purifoy*.

4. The remaining exclusions from the population of “eligible animals” are correct as a matter of law.

The Controller excludes from the population of “eligible animals” dogs, cats, and other animals that were owner-relinquished.²²⁵ The Commission found in the Test Claim Statement of Decision that although such animals are required to be held during the holding period if accepted, the test claim statute does not require local agencies to accept owner-relinquished animals.²²⁶ Accordingly, the Parameters and Guidelines provide for reimbursement only for stray or abandoned animals.²²⁷ This exclusion is consistent with the Parameters and Guidelines and the test claim statute, and is therefore correct as a matter of law.

The Controller also excludes dogs, cats, and other animals that were ultimately adopted, transferred, rescued, or redeemed.²²⁸ This is consistent with the Test Claim Statement of Decision finding that local agencies have fee authority to recoup costs of care and maintenance

²²⁴ *People v. Olmsted* (2000) 84 Cal.App.4th 270, 277.

²²⁵ Exhibit A, IRC, page 688.

²²⁶ Exhibit G, Test Claim Statement of Decision, adopted January 25, 2001, page 1564.

²²⁷ See, e.g., Exhibit A, IRC, page 70 [Parameters and Guidelines, page 6].

²²⁸ Exhibit A, IRC, page 688.

for animals that are adopted or redeemed, or released to a nonprofit animal rescue organization.²²⁹ This exclusion from “eligible animals” is therefore correct as a matter of law.

The Controller excludes from the population of eligible animals those dogs, cats, and other animals that went missing from their kennels, were stolen, or escaped.²³⁰ Reimbursement is required only when a stray or abandoned animal dies during the increased holding period or is ultimately euthanized after the increased holding period.²³¹ Moreover, costs for animals that went missing or escaped have not been substantiated with source documents in the record that show the validity of costs claimed and their relationship to the mandate.²³² Because claimants have provided no documentation of their costs for dogs, cats, and other animals that went missing from their kennels, were stolen, or escaped, this exclusion is consistent with the Parameters and Guidelines and is correct as a matter of law.

The Controller excludes dogs, cats, and other animals that were deceased on arrival at the shelter.²³³ Such animals are expressly excluded from reimbursement by the Parameters and Guidelines since these animals did not die *during* the increased holding period and were not ultimately euthanized.²³⁴ Moreover, no costs for care and maintenance are incurred. This exclusion is therefore consistent with the Parameters and Guidelines, and is correct as a matter of law.

The Controller excludes dogs, cats, and other animals that were euthanized as requested by owners or if euthanasia was required.²³⁵ As noted, the Commission found in its Test Claim Statement of Decision that local agencies were not required to accept owner-relinquished animals.²³⁶ And, the Parameters and Guidelines expressly prohibit reimbursement for the activity of euthanizing an animal.²³⁷ Therefore, this population exclusion is consistent with the Test Claim Statement of Decision and Parameters and Guidelines, and is correct as a matter of law.

The Controller excludes “Dogs, cats, and other animals that were euthanized for humane reasons (usually on day 1)” and “Dogs, cats, and other animals that were suffering from a serious illness or severe injury (usually euthanized on day 1 or died on day 1). As noted above, Food and Agriculture Code section 17006 provides that the holding period does not apply to animals that are irremediably suffering from a serious illness or severe injury or to newborn animals that need

²³⁷ Exhibit A, IRC, page 77 [Parameters and Guidelines, page 13].

maternal care and have been impounded without their mothers. Such animals may be euthanized without being held for owner redemption or adoption. However, Food and Agricultural Code section 17005 provides, in pertinent part: “It is the policy of the state that no treatable animal should be euthanized. A treatable animal shall include any animal that is not adoptable but that could become adoptable with reasonable efforts.” And, as discussed above, the Parameters and Guidelines contemplate an animal’s treatable or adoptable status changing within the course of the holding period, even with veterinary care. Thus, to the extent an animal is initially deemed treatable but then later euthanized during the increased holding period, the law requires reimbursement for care and maintenance costs during the increased holding period. However, to the extent the exclusion includes animals euthanized prior to the increased holding period (or on day one for birds and other animals), these exclusions are consistent with the Parameters and Guidelines and therefore are correct as a matter of law.

The Controller excludes “Newborn animals that need maternal care and were impounded without their mothers (usually died or were euthanized within the first few days; the excluded categories included ‘Unweaned’ or ‘8 weeks unsustainable’).”²³⁸ The Parameters and Guidelines expressly exclude such animals from reimbursement, referencing Food and Agriculture Code section 17006.²³⁹ This exclusion is thus correct as a matter of law.

The Controller also excludes dogs and cats that died in the shelter’s kennels *outside the increased* holding period, meaning within the first few days of the holding period required under prior law, or *after* the required holding period; and “other animals” that died in the shelter’s kennels after the increased holding period.²⁴⁰ The Commission finds that the exclusion of stray or abandoned dogs and cats that die within the holding period *required by prior law* is correct as a matter of law, since that requirement was not new and determined to be reimbursable in the Test Claim Statement of Decision. No reimbursement for the care and maintenance of a stray or abandoned dog or cat is required until *after* the first three days from the day of capture as follows:

For stray and abandoned dogs and cats, the increased holding period is the difference between three days from the day of capture, and either four or six business days from the day after impoundment. Eligible claimants are not entitled to reimbursement for the first three days of that period.²⁴¹

Thus, if a stray or abandoned dog or cat dies before the increased holding period begins, reimbursement is not required.

The Commission also finds that the Controller’s exclusion of animals that died after the increased holding period is consistent with the Parameters and Guidelines and is correct as a matter of law. The Parameters and Guidelines provide for reimbursement for dogs and cats, and other animals, that died during the increased holding period or were ultimately euthanized after

²³⁸ Exhibit A, IRC, page 689.

²³⁹ Exhibit A, IRC, page 72 [Parameters and Guidelines, page 8].

²⁴⁰ Exhibit A, IRC, page 689.

²⁴¹ Exhibit A, IRC, page 71 [Parameters and Guidelines, page 7].

the increased holding period.²⁴² Reimbursement is limited to: stray or abandoned dogs and cats and other animals are subject to reimbursement because their owners are not known, and cannot have fees levied against them; animals that are not adopted during the holding period, but are “ultimately euthanized” when the holding period expires, are subject to reimbursement on the theory that there is no new owner or redeemed owner from whom fees could be exacted; both of these situations were contemplated in the Test Claim Statement of Decision and animals that die *during* the increased holding period.²⁴³ And with respect to animals that die during the increased holding period, this issue arose during the consideration of Parameters and Guidelines, when the County of Fresno filed comments requesting reimbursement for the care and maintenance of stray or abandoned animals that die while being held pending adoption or euthanasia. As discussed above, the County requested reimbursement for animals that “die while being held pending adoption or euthanization [sic].”²⁴⁴

The Commission approved the request, clarifying that increased costs for the care and maintenance of animals that die during the increased holding period are eligible for reimbursement as follows:

[S]taff has inserted language in Sections IV (B) (1), (2), (3), (4), and (9) of the proposed Parameters and Guidelines clarifying that increased costs for the care and maintenance of animals that die during the increased holding period, and for providing “necessary and prompt veterinary care” to animals that die during the holding period are eligible for reimbursement.²⁴⁵

The Parameters and Guidelines, however, do not authorize reimbursement for animals that continue to be held by the local agency for adoption longer than the holding period and die *thereafter*. The Parameters and Guidelines are binding, and no requests to amend the Parameters and Guidelines have been filed. Thus, the Controller’s interpretation is consistent with the plain language of the Parameters and Guidelines. Based on the foregoing, the Commission finds that this reduction of eligible animals on these grounds is correct as a matter of law.

B. Except as Determined in Section A. of This Decision, the Controller’s Remaining Findings That Result in a Reduction of Costs for Care and Maintenance Under Finding 3 Are Correct as a Matter of Law and Not Arbitrary, Capricious, or Entirely Lacking in Evidentiary Support.

The Parameters and Guidelines provide for reimbursement of care and maintenance costs for impounded stray or abandoned animals that die during the increased holding period or are ultimately euthanized either by claiming actual costs or by performing a time study.²⁴⁶ The

²⁴² Exhibit A, IRC, page 70; 72 [Parameters and Guidelines, page 6; 8].

²⁴⁵ Exhibit A, IRC, page 71-72 [Parameters and Guidelines, pages 7-8].

²⁴⁶ Exhibit G, Proposed Parameters and Guidelines and Analysis, Hearing Item 4, February 28, 2002, pages 7-10.

claimant used the actual cost method, which is a formula designed to reimburse a proportion of total care and maintenance costs based on the incremental increase in service (the increased holding period) and the animals for which no fees can be collected (animals that are not adopted, redeemed, or released to a nonprofit animal rescue organization). The Parameters and Guidelines provide that actual costs for dogs and cats shall be calculated as follows:

Actual Cost Method – Under the actual cost method, actual reimbursable care and maintenance costs per animal per day are computed for an annual claim period.

- a) Determine the total annual cost of care and maintenance for all dogs and cats impounded at a facility. Total cost of care and maintenance includes labor, materials, supplies, indirect costs, and contract services.
- b) Determine the average daily census of dogs and cats.²⁴⁷
- c) Multiply the average daily census of dogs and cats by 365 = yearly census of dogs and cats.
- d) Divide the total annual cost of care by the yearly census of dogs and cats = cost per animal per day.
- e) Multiply the cost per animal per day, by the number of impounded stray or abandoned dogs and cats that die during the increased holding period or are ultimately euthanized, by each reimbursable day (the difference between three days from the day of capture, and four or six business days from the day after impoundment).²⁴⁸

For “other animals,” the actual cost formula is essentially the same, except that the number of reimbursable days is not counted as “the difference between three days...and four or six business days.” Because there was no 72 hour holding period required under prior law for “other animals,” the “reimbursable days” multiplier is simply “four or six business days.”²⁴⁹ Thus, as the Controller acknowledges, the actual cost formula requires the eligible annual cost of care to be divided by the yearly census of animals to arrive at an average cost per animal per day. The cost per animal per day is then multiplied by the eligible number of animals and the number of increased holding period days.²⁵⁰ The factors relating to the number of eligible animals was discussed under section A. of this Decision. This section addresses the remaining findings that resulted in a reduction of costs for care and maintenance.

²⁴⁷ The Final Staff Analysis and Proposed Parameters and Guidelines Amendment, January 26, 2006, states also: “For purposes of claiming reimbursement under IV.B.3, average daily census is defined as the average number of all dogs and cats at a facility housed on any given day, in a 365-day period.” This amendment is clarifying only, and has no substantive effect on the methodology used to calculate actual costs. (Exhibit G, Final Staff Analysis and Proposed Parameters and Guidelines Amendment, January 26, 2006, page 1635.)

²⁴⁸ Exhibit A, IRC, page 71 [Parameters and Guidelines, page 7].

²⁴⁹ Exhibit A, IRC, page 72-73 [Parameters and Guidelines, page 8-9].

²⁵⁰ Exhibit A, IRC, page 688.

The Controller states, with respect to care and maintenance costs, that the claimant used budgeted expenditure amounts to estimate its total annual costs, rather than claiming actual costs supported by documentation; and used inaccurate yearly animal census information, resulting in an incorrect calculation of costs per animal per day.²⁵¹

Based on the analysis herein, the Commission finds that, except as determined in section A. of this Decision, the Controller's remaining findings that support the reductions in Finding 3 for care and maintenance costs are correct as a matter of law and not arbitrary, capricious, or entirely lacking in evidentiary support.

1. The Controller's reductions on the basis of estimated or otherwise unsupported costs claimed as part of the calculation of total annual costs for care and maintenance are correct as a matter of law and not arbitrary, capricious, or entirely lacking in evidentiary support.

The Parameters and Guidelines provide that the first step in calculating actual costs for care and maintenance is to identify the total annual cost of this component, including labor, materials, supplies, indirect costs, and contract services.²⁵² The Controller states that this claimant "used budgeted expenditure amounts that were not actual costs and were not pro-rated to the portion of costs relating to the care and maintenance functions."²⁵³ Specifically, the Controller states: "we requested that the city provide the actual salary amounts paid to those employee classifications directly involved with the care and maintenance function." The Controller continues: "We also requested the duty statements for such classifications to assist us in determining the percentage of daily workload that was devoted to caring and maintaining animals." Ultimately, the claimant and the Controller settled on including 80 percent of the salaries and benefits for Animal Care Technicians and 40 percent of Animal Care Technician Supervisor positions within the total annual costs for care and maintenance.²⁵⁴ Because payroll information was available only for the last three years of the audit period, the Controller states that it applied a deflator based on the consumer price index to estimate costs of labor for the earlier five years of the audit.²⁵⁵ In addition, the Controller states with respect to materials and supplies costs, that the claimant "[s]ubsequent to the issuance of the draft audit report...submitted summary reports containing year end expenditures by vendor..."²⁵⁶ The Controller explains that "[d]uring fieldwork, we discussed with department staff the reimbursable criteria for this cost component... staff agreed that allowable expenditures for this component would primarily include animal food and cleaning supplies."²⁵⁷ Accordingly, the Controller found that expenses such as "office supplies,"

²⁵¹ Exhibit A, IRC, page 683.

²⁵² Exhibit A, IRC, page 71 [Parameters and Guidelines, page 7].

²⁵³ Exhibit A, IRC, page 684.

²⁵⁴ Exhibit A, IRC, page 684.

²⁵⁶ Exhibit A, IRC, page 685.

²⁵⁷ Exhibit A, IRC, pages 685-686.

“printing supplies,” “cell phone expenses,” “expenses for animal traps,” and so forth, were not allowable under the care and maintenance component.

The claimant does not directly address these adjustments to the total annual costs of care and maintenance, but instead focuses its challenge to Finding 3 entirely on the application of the *Purifoy* decision.

While the Parameters and Guidelines use inclusive language to describe costs for this component (“total cost of care and maintenance includes labor, materials, supplies...”) the care and maintenance costs cannot be interpreted beyond the reasonable scope of the approved activity, which is to provide care and maintenance during the increased holding period for impounded stray or abandoned animals that die during the increased holding period or are ultimately euthanized.²⁵⁸ Office supplies and printing supplies are general expenses of the animal shelter, and are beyond the scope of the mandated activity, and therefore the reduction on this basis is correct as a matter of law. Moreover, the claimant agreed with the Controller that only a portion of salaries and benefits for Animal Care Technicians and Animal Care Technician Supervisor positions should be reimbursable, and the claimant proposed the proportional reimbursable share for these classifications, which the Controller accepted.²⁵⁹ The Controller’s reduction on this basis is therefore not arbitrary, capricious, or entirely lacking in evidentiary support.

And finally, the claimant filed the reimbursement claims using the actual cost method of claiming, but used “budgeted expenditure amounts,” which are not equivalent to actual costs incurred for the mandate. Article XIII B, section 6 and the implementing Government Code provisions require reimbursement of actual costs mandated by the state, and no provision of the Parameters and Guidelines authorizes the use of “budgeted expenditure amounts” to estimate mandated costs. Thus, the reduction on this basis is correct as a matter of law.

Based on the foregoing, the Commission finds that the Controller’s reductions on the basis of estimated or otherwise unsupported costs claimed as part of the calculation for total annual costs for care and maintenance are correct as a matter of law and not arbitrary, capricious, or entirely lacking in evidentiary support.

2. The Controller’s adjustment of the yearly animal census data did not result in a reduction of costs claimed and therefore the Commission has no jurisdiction to determine this issue.

The Parameters and Guidelines provide that the total annual cost of care shall be divided by the total annual census of *all* animals that come to the shelter to determine the cost per animal per day. The Controller found that the claimant misstated its yearly animal census data. Specifically, the Controller found that the claimant failed to exclude animals that were deceased upon arrival at the shelter, and animals that went missing. The Controller stated that “[w]e did not count DOA animals...because no costs were incurred to care for them” and “we did not count missing animals as part of the annual census because their holding period was unknown.”²⁶⁰ Additionally, the Controller found “some data input errors relating to dates.” The

²⁵⁸ Exhibit A, IRC, pages 70-71 [Parameters and Guidelines, page 6-7].

²⁵⁹ Exhibit A, IRC, page 684.

²⁶⁰ Exhibit A, IRC, page 687.

Controller noted that “[s]ome animal entries showed a negative holding period or extraordinarily long holding periods (e.g., exceeding ten years).” The Controller accordingly eliminated those animals from the census or changed the dates, where possible.²⁶¹

Based on the formula in the Parameters and Guidelines for determining the costs for care and maintenance during the increased holding period, in which total annual costs are divided by the yearly animal census to arrive at a cost per animal per day, which is in turn multiplied by the remaining factors of eligible animals and reimbursable days, it appears that the adjustments made to the annual animal census data that reduced the total number of animals did not in fact result in any reduction. Because total annual costs are *divided* by the yearly animal census, any decrease in the animal census data would result in a corresponding increase in the cost per animal per day, which would then be multiplied by the remaining factors. Thus, the adjustment to the yearly animal census factor is in the claimant’s favor.

Because there is no reduction of costs claimed on the basis of the adjustments to the animal census data, the Commission has no jurisdiction and need not make a finding on this point.

3. The Controller’s adjustment of reimbursable days *increases* the number of reimbursable days claimed by the claimant, thereby increasing reimbursement and, thus, the Commission does not have jurisdiction to determine this issue.

The last element of the calculation of actual costs for care and maintenance is to multiply the cost per animal per day times the number of eligible animals times the number of reimbursable days. The Parameters and Guidelines expressly require multiplying by “each reimbursable day” following the day of impoundment, and do not define reimbursable days based on an average number of days.²⁶²

However, the reimbursement claims at issue in this IRC, claimed two reimbursable days for all dogs and cats, and four reimbursable days for all “other animals,” and made no attempt to state the total number of reimbursable days for each eligible animal.²⁶³ And, as indicated in section A.3. of this Decision, the Controller, like the claimant, calculated an *average* increased holding period for all dogs and cats to be three days, and the average increased holding period for all other “eligible” animals to be six days, and did not state the total number of reimbursable days for each eligible animal.²⁶⁴

Nevertheless, because the Controller’s audit *increased* the number of reimbursable days claimed by the claimant, by which all other elements of the formula are multiplied, the Controller’s adjustment of reimbursable days results in increased reimbursement to the claimant and, thus, the Commission does not have jurisdiction to determine this issue.²⁶⁵

C. The Controller’s Reductions in Finding 4 Relating to Unallowable Employee Hours for Making Animals Available for Adoption or Owner Redemption Are Correct as a Matter of Law and Not Arbitrary, Capricious, or Entirely Lacking in Evidentiary Support.

The Parameters and Guidelines provide that an agency desiring to apply the shortened holding period is eligible for reimbursement for making animals available for owner redemption on one weekday evening until at least 7:00 p.m., or one weekend day; or, for local agencies with fewer than three full-time employees or that are not open during all regular weekday business hours, for establishing a procedure for owners to reclaim their animals by appointment.²⁶⁶ For dogs and cats, reimbursement for this activity begins July 1, 1999. For “other animals” specified in Food and Agriculture Code section 31753, reimbursement for this activity begins January 1, 1999.²⁶⁷

The Controller’s audit determined that of \$3,886,965 claimed, \$2,045,732 was unallowable. The unallowable costs are the net result of “overstated allowable hours and the number of allowable positions (\$2,172,695) and understated productive hourly rates (\$126,963).”²⁶⁸ Specifically, the Controller states that the claimant “claimed hours for Animal Care Technicians, Animal Care Technician Supervisors, Animal Control Officers, and Clerk Typists for working on one of the weekend days.” However, the Controller found that the claimant “did not take into account the difference between the regular staffing needs and the *increased* staffing needs to comply with the requirement of this component.”²⁶⁹ The Controller further elaborates that its audit “inquired about the number of employees and classifications of staff members working when the shelter is closed to the public (Mondays) and the staffing needed to comply with the mandate and stay open during the increased hours (Saturdays).”²⁷⁰ The Controller was thus able to eliminate staffing and employee hours that were mainly dedicated to the general care and maintenance of the animals. Reviewing the claimant’s working schedules for each shelter, the Controller determined that “the following additional employees were needed to comply with the mandate requirement and stay open during one weekend day.”

- Animal Care Technicians (10 positions, 9 hours each)
- Animal Care Technician Supervisor (1 position, 9 hours)
- Front Counter Clerks (10 positions, 8 hours each)²⁷¹

Additionally, the Controller notes that for fiscal year 1998-1999 reimbursement began January 1, 1999, and therefore allowable hours were reduced by half for that fiscal year.²⁷²

²⁶⁹ Exhibit A, IRC, page 694 (emphasis added).

²⁷⁰ Exhibit A, IRC, page 694.

²⁷¹ Exhibit A, IRC, page 695.

²⁷² Exhibit A, IRC, page 695.

The claimant did not dispute the Controller’s findings in the context of the audit, nor offer additional documentation or evidence in its IRC. However, the claimant argues in its IRC that the Controller “places too much emphasis on the choice of wording in the Ps & Gs concluding that the costs for only those staff members involved with making animals available for redemption should be reimbursable.” The claimant argues “[t]he City should be allowed to staff its shelter as its sees fit to accomplish the goals set forth in statute.”²⁷³

The Commission finds that the Parameters and Guidelines do not expressly limit the staff and employee classifications for which reimbursement is required. However, the Controller is correct that the reason to remain open on a Saturday, pursuant to the test claim statutes and the Commission’s Decision, is to promote owner redemption. Indeed, the express language of the reimbursable component at issue in Finding 4 is “Making the animal available for owner redemption...”²⁷⁴ Therefore, the Controller’s attempt to limit reimbursement on Saturdays to those employees that are necessary to make animals available for owner redemption is consistent with the Parameters and Guidelines and the purpose of the test claim statute. Thus, the adjustments are correct as a matter of law. In addition, there is no evidence in the record to support a finding that the Controller’s decisions were arbitrary or capricious.

Based on the foregoing, the Controller’s reductions in Finding 4 relating to unallowable employee costs to make the animal available for owner redemption is correct as a matter of law, and not arbitrary, capricious, or entirely lacking in evidentiary support.

D. Except as Determined in Section A. of This Decision, the Controller’s Remaining Findings Supporting the Reductions in Finding 7 for Overstated Necessary and Prompt Veterinary Care Costs Are Correct as a Matter of Law and Not Arbitrary, Capricious, or Entirely Lacking in Evidentiary Support.

The Parameters and Guidelines permit reimbursement for necessary and prompt veterinary care for stray or abandoned animals, other than injured cats and dogs given emergency treatment that die during the increased holding period or are ultimately euthanized. Necessary and prompt veterinary care means all reasonably necessary medical procedures performed by a veterinarian or someone under their supervision, including an initial physical examination; a wellness vaccine administered to adoptable or treatable animals; care to stabilize or relieve the suffering of a treatable animal; and veterinary care intended to remedy an injury or disease of a treatable animal.²⁷⁵

The Controller’s audit determined that \$1,827,843, of a total \$2,193,011 claimed, was unallowable. The Controller found that the claimant claimed estimated and unsupported materials and supplies costs, and misstated and unallowable employee hours.²⁷⁶ Specifically, the Controller found that the claimant’s time study for veterinary procedures was “inadequate,” because it focused on recording time increments to perform non-routine veterinary procedures

²⁷³ Exhibit A, IRC, page 14.

²⁷⁴ Exhibit A, IRC, page 74 [Parameters and Guidelines, page 10].

²⁷⁵ Exhibit A, IRC, page 76 [Parameters and Guidelines, page 12].

²⁷⁶ Exhibit A, IRC, page 702.

which must be examined on a case-by-case basis to determine eligibility. A new time study was conducted during the course of the audit, which the Controller found was allowable except for “[i]nputting animal medical statistics into the Chameleon database about animal’s baseline health.”²⁷⁷ In addition, the Controller found that the city claimed estimated and unsupported materials and supplies costs. During the first three years of the audit period, the claimant estimated that three percent of its operating costs were attributable to the mandate component of necessary and prompt veterinary care, and in the latter five years of the audit period, the claimant failed to support its materials and supplies costs.²⁷⁸ The Controller states that the claimant did not respond to this audit finding specifically, but during the audit “submitted summary reports containing year end expenditures by vendor for Account 3190 – Medical Supplies” totaling \$2,086,819. The Controller determined that “we are unable to consider the medical expenses submitted for reimbursement, because the city did not determine what portion of the costs actually related to eligible animals and allowable treatments that took place during the required holding period.”²⁷⁹

The claimant “objects to the SCO’s determination that it did not submit the proper documentation to support the Necessary and Prompt Veterinary Care material and supply cost.”²⁸⁰ The claimant states that during the audit, the Controller requested additional documentation “and the City submitted expenses within expenditure account 3190 medical supplies (\$2,086,819).”²⁸¹

The Commission finds that the claimant inappropriately claimed estimated costs, without any evidence or documentation to support the estimate, and that the claimant’s alleged expense documentation does not constitute evidence that those costs are related to the mandated activities. The Parameters and Guidelines provide reimbursement for necessary and prompt veterinary care, but with certain limitations. For example, as discussed in section A. above, animals irremediably suffering from serious illness or injury and euthanized on day one, or newborn animals that cannot survive without their mother, and the mother has not also been impounded, are not included in the population of “eligible animals” for which reimbursement is required. Likewise, emergency treatment is not eligible for reimbursement, due to the requirements of prior law, nor is the administration of a rabies vaccination, or microchip implantation, or spay or neuter surgery and treatment.²⁸² The exclusions are therefore substantial, and reimbursement is decidedly narrow. The claimant has the burden to show that costs claimed for materials and supplies and employee salary and benefits fall within the reimbursable higher levels of service and were provided to animals within the eligible

²⁷⁷ Exhibit A, IRC, page 703.

²⁷⁸ Exhibit A, IRC, page 704.

²⁷⁹ Exhibit A, IRC, page 705.

²⁸⁰ Exhibit A, IRC, page 14.

²⁸¹ Exhibit A, IRC, page 14.

²⁸² Exhibit A, IRC, pages 76-77 [Parameters and Guidelines, pages 12-13].

population, and therefore the summary expense reports for medical supplies are not sufficient in themselves to support the claim.

The claimant's time study suffers the same fault, because it included a number of non-routine veterinary procedures and costs that must be evaluated on a case-by-case basis. Absent some evidence that the procedures and costs within the time study were verified to be eligible for reimbursement, the Controller's rejection of the time study was correct as a matter of law, and not arbitrary, capricious, or entirely lacking in evidentiary support. Ultimately, all parts of the claim must be supported by some documentation from the claimant, which, according to the Parameters and Guidelines, must "show evidence of the validity of such costs and their relationship to the mandate."²⁸³

Based on the foregoing, except as provided in section A. of this Decision relating to "eligible animals," the Commission finds that the Controller's remaining findings supporting the reductions in Finding 7 of necessary and prompt veterinary care costs are correct as a matter of law and not arbitrary, capricious, or entirely lacking in evidentiary support.

E. The Controller's Determination Not to Consider Claimant's Request, Made During the Audit, for Reimbursement for the Construction of New Facilities Is Correct as a Matter of Law.

The Parameters and Guidelines provide for reimbursement for the construction of new facilities or acquisition of additional space to comply with the mandate beginning January 1, 1999. However, the claimant did not include costs for this component in its annual reimbursement claims for any of the years subject to audit, nor specifically state in which years such costs might have been incurred. The claimant only alleged costs for construction of new facilities during the course of the audit, which began April 28, 2009.²⁸⁴ At that time, the annual claims for all fiscal years of the audit period had been filed, and only the fiscal year 2007-2008 claim could be subject to a revised claim, pursuant to the deadlines contained in Government Code section 17568.²⁸⁵ Moreover, the construction costs were funded by bonds issued pursuant to a ballot measure, Proposition F, passed by the voters in the November 2000 general election.²⁸⁶

The Controller determined that the claimant did not incur any increased costs to construct or remodel its shelters, within the meaning of Government Code section 17514, because the "the construction costs incurred were funded entirely by the city's taxpayers via property tax *assessments*."²⁸⁷

The claimant argues that the use of bond funds does not disqualify the claimant from mandate reimbursement. The claimant states that "[t]he City was free to use its general fund for

²⁸³ Exhibit A, IRC, page 79 [Parameters and Guidelines, page 15].

²⁸⁴ Exhibit A, IRC, page 709.

²⁸⁵ Government Code section 17568 provides: "In no case shall a reimbursement claim be paid that is submitted more than one year after the deadline specified in Section 17560."

²⁸⁶ Exhibit A, IRC, page 709.

²⁸⁷ Exhibit A, IRC, page 710 (emphasis added).

construction; but nothing in the Constitution, statutes or case law says that any local government must exhaust all its general fund monies before seeking funding elsewhere.” The claimant continues: “Moreover, the state legislature passed the unfunded mandate and the state should not be able to shirk its responsibility to reimburse the City simply because the City in its management of its financial obligations chose to have a bond initiative rather than empty its general fund.”²⁸⁸

The claimant is wrong, and the claim for reimbursement of construction costs is untimely. As the Controller points out, the claimant here never claimed the construction costs in its annual reimbursement claims.²⁸⁹ Government Code section 17560 permits a claimant by February 15 following a fiscal year, to “file an annual reimbursement claim that details the costs actually incurred for that fiscal year.”²⁹⁰ Section 17568 provides that if a local agency or school district submits an otherwise valid reimbursement claim to the Controller after the deadline specified in Section 17560, the Controller shall reduce the reimbursement claim in an amount equal to 10 percent of the amount that would have been allowed had the reimbursement claim been timely filed. In addition, section 17568 states that “[i]n no case shall a reimbursement claim be paid that is submitted more than one year after the deadline specified in Section 17560.”²⁹¹ These provisions of the Government Code clearly place the burden on the claimant to timely and completely claim its mandated costs. Here, the claimant did not claim construction expenditures that the Controller found were part of an “ongoing project for the City of Los Angeles that involved a ballot measure in the November 2000 general election.”²⁹² Instead, the claimant only “inquired about the eligibility of costs it incurred for the construction and renovation of animal shelters under the mandated program” during the course of audit fieldwork.²⁹³ The claimant’s plea for reimbursement for these costs is thus made far too late.

Moreover, where a local agency has raised revenues outside its appropriations limit to cover the cost of mandated activities, funds thus expended are not reimbursable, based on the history and purpose of article XIII B, section 6, and case law interpreting it. Article XIII B was adopted by the voters less than 18 months after the addition of article XIII A to the state Constitution, and was billed as “the next logical step to Proposition 13.”²⁹⁴ The California Supreme Court, in *County of Fresno* explained:

Section 6 was included in article XIII B in recognition that article XIII A of the Constitution severely restricted the taxing powers of local governments. (See *County of Los Angeles I, supra*, 43 Cal.3d at p. 61.) The provision was intended to preclude the state from shifting financial responsibility for carrying out

²⁹⁴ *County of Placer v. Corin* (1980) 113 Cal.App.3d 443, 446 (*County of Placer*).

governmental functions onto local entities that were ill equipped to handle the task. (*Ibid.*; see *Lucia Mar Unified School Dist. v. Honig* (1988) 44 Cal.3d 830, 836, fn. 6.) Specifically, it was designed to protect the tax revenues of local governments from state mandates that would require expenditure of such revenues. Thus, although its language broadly declares that the “state shall provide a subvention of funds to reimburse ... local government for the costs [of a state-mandated new] program or higher level of service,” read in its textual and historical context section 6 of article XIII B requires subvention only when the costs in question can be recovered *solely from tax revenues*.²⁹⁵

Because reimbursement is limited to costs that are recovered solely from tax revenues, not every local agency, and not every state mandate is subject to the restrictions of article XIII B, section 6. Redevelopment agencies, in particular, have been identified by the courts as being exempt from the restrictions of article XIII B, because they are funded by additional levies in excess of the base property tax. In *Bell Community Redevelopment Agency*, the court concluded that bonds issued by a redevelopment agency and repaid with tax increment revenues are not appropriations subject to limitation.²⁹⁶ The court reasoned that to construe tax increment payments as appropriations subject to limitation “would be directly contrary to the mandate of section 7,” which provides that “Nothing in this Article shall be construed to impair the ability of the state or of any local government to meet its obligations with respect to existing or future bonded indebtedness.”²⁹⁷

Here, the Proposition F funds are substantially similar to redevelopment bond funds, in that they were authorized by the voters and are paid by a special assessment in excess of the state and local property taxes collected by the City. And, just as in *Bell Community Redevelopment Agency*, to hold the funds collected under Proposition F to be subject to the appropriations limit of article XIII B would be wholly inconsistent with article XIII B, section 7, which states that “[n]othing in this Article shall be construed to impair the ability of ... any local government to meet its obligations with respect to existing or future bonded indebtedness.”²⁹⁸ Put simply, *County of Fresno* and *Bell Community Redevelopment Agency* make clear that reimbursement is not required when a mandate is paid for with funds other than local tax revenues.

Based on the foregoing, the Commission finds that the Controller’s determination not to reimburse costs for construction of new facilities, which were not claimed in the claimant’s annual reimbursement claim filings and which were funded by a local bond measure repaid by an additional assessment on real property, is correct as a matter of law.

F. The Claimant's Allegation That the Controller Failed to Provide Adequate Time to Comply with the Requirements of the Audit Is Irrelevant, and Ignores the Claimant's Burden to Support Costs Claimed.

The Parameters and Guidelines provide that all costs must be traceable to source documents. Such documents, in turn, must “show evidence of the validity of such costs and their relationship to the mandate.” And, all documentation in support of claimed costs “shall be made available to the State Controller’s Office, as may be requested.” Such documents must be kept on file during the period subject to audit, in accordance with Government Code section 17558.5.²⁹⁹

With respect to this audit and IRC, it is undisputed that the claimant filed its initial reimbursement claims for fiscal years 1998-1999, 1999-2000, and 2000-2001 on September 4, 2002.³⁰⁰ Those claims were first paid in August 2006.³⁰¹ An entrance conference was held on April 28, 2009, and the Controller’s audit staff and the claimant’s staff worked closely until November 2009, when the audit was placed on hold due to staffing changes at the Controller’s audit bureau. It is also undisputed that on July 19, 2010, new auditing staff and a new auditor-in-charge held a new entrance conference, and requested additional documentation. An exit conference was held on January 12, 2011, at which time the Controller’s audit staff indicated that the final audit report would be issued in early April. The Controller issued the draft audit report on March 10, 2011, and issued the final audit report on April 6, 2011.³⁰²

The Controller disallowed costs claimed throughout the audit on the basis of missing or incomplete documentation, despite the Controller’s assertion that it “worked with the city’s staff to not only obtain proper supporting documentation, but also to arrange for alternative methods to support claimed costs.” The Controller argues that it attempted to provide the claimant with the opportunity to support claimed costs, but “[i]t is unreasonable for the city to state that it did not have enough time to provide supporting documentation, as the city is required to maintain supporting documentation for costs claimed.”³⁰³

The claimant argues that it was “denied necessary time to comply with the requirements of the audit due to the SCO’s placing the audit on hold for staffing changes for nine months which left the City having to assemble documentation for a huge operation with less time than was provided by law.”³⁰⁴ The claimant asserts that “[d]ue to the size of the City’s Animal Services Department, there were millions of line items to go through in order to locate some of the requested information that dated back as far as 12 years.” In addition, the claimant states that “some of the invoices had been destroyed as they exceeded the time limitation for record

²⁹⁹ Exhibit A, IRC, page 79 [Parameters and Guidelines, page 15].

³⁰⁰ Exhibit A, IRC, pages 737, 763, 779.

³⁰³ Exhibit B, Controller’s Late Comments on the IRC, page 1013.

³⁰⁴ Exhibit A, IRC, page 16.

retention under the law.”³⁰⁵ The claimant argues that it “cannot be expected to have to hold on to records from 1998 for an indeterminate amount of time and be forced to retain all detailed expenditure records.” The claimant concludes that “[s]uch a record retention requirement would cause a burden that is both inefficient and unnecessary.”³⁰⁶

The claimant is wrong. The record retention requirements for mandated costs are stated in the Parameters and Guidelines, which are binding on the parties. The Parameters and Guidelines adopted February 28, 2002, state: “Pursuant to Government Code section 17558.5, these documents must be kept on file by the agency submitting the claim for a period of no less than two years after the later of (1) the end of the calendar year in which the reimbursement claim is filed or last amended, or (2) if no funds are appropriated for the fiscal year for which the claim is made, the date of initial payment of the claim.”³⁰⁷ The amended Parameters and Guidelines, adopted January 26, 2006, and applicable to fiscal years 2005-2006 and following, state as follows:

Pursuant to Government Code section 17558.5, subdivision (a), a reimbursement claim for actual costs filed by a local agency or school district pursuant to this chapter is subject to the initiation of an audit by the Controller no later than three years after the date that the actual reimbursement claim is filed or last amended, whichever is later. However, if no funds are appropriated or no payment is made to a claimant for the program for the fiscal year for which the claim is filed, the time for the Controller to initiate an audit shall commence to run from the date of initial payment of the claim. In any case, an audit shall be completed not later than two years after the date that the audit is commenced. All documents used to support the reimbursable activities, as described in Section IV, must be retained during the period subject to audit. If an audit has been initiated by the Controller during the period subject to audit, the retention period is extended until the ultimate resolution of any audit findings.³⁰⁸

Thus, in accordance with Government Code section 17558.5 and the Parameters and Guidelines, when claims are not paid the record retention requirement is tolled indefinitely, until two-years after payment is made. Beginning July 2005, the Parameters and Guidelines expanded that requirement to three-years after payment is made and included a requirement to retain the documents until the ultimate resolution of the audit.

³⁰⁵ Exhibit A, IRC, page 17 (citing to Government Code section 34090, requiring record retention period of two years).

³⁰⁶ Exhibit A, IRC, page 17.

³⁰⁷ Exhibit A, IRC, page 79 [Parameters and Guidelines, page 15].

³⁰⁸ Exhibit G, Final Staff Analysis and Proposed Parameters and Guidelines Amendment, January 26, 2006, page 1649.

Here, the Controller has documented that claims for fiscal years 1998-1999, 1999-2000, and 2000-2001 were paid in part beginning in August 2006.³⁰⁹ The claimant states that claims for fiscal years 2001-2002 and 2002-2003 were not paid as of the time of filing this IRC.³¹⁰ Thus, in accordance with the 2002 Parameters and Guidelines, “documents must be kept on file by the agency submitting the claim for a period of no less than two years after...the date of initial payment of the claim.”³¹¹ That provision mirrored the requirement to initiate an audit under Government Code section 17558.5, as it read in February 2002, when the Parameters and Guidelines were adopted.³¹² Later that same year, and effective January 1, 2003, section 17558.5 was amended to provide that a reimbursement claim would be subject to audit for three years, beginning with either the date the claim was filed or last amended, or the date of the initial payment of the claim.³¹³ The claiming instructions revised in September 2003, reflect the change to section 17558.5, and thus provide as follows:

[A] reimbursement claim for actual costs filed by a local agency or school district pursuant to this chapter is subject to the initiation of an audit by the Controller no later than three years after the date that the actual reimbursement claim is filed or last amended, whichever is later. However, if no funds are appropriated or no payment is made to a claimant for the program for the fiscal year for which the claim is filed, the time for the Controller to initiate an audit shall commence to run from the date of initial payment of the claim.³¹⁴

In addition, the claiming instructions go on to directly link the document retention requirement to the audit period:

All documents used to support the reimbursable activities, must be retained during the period subject to audit. If an audit has been initiated by the Controller during the period subject to audit, the retention period is extended until the ultimate resolution of any audit findings.³¹⁵

Then, in January 2006, nearly eight months before any fiscal year claims had been paid, the Parameters and Guidelines were amended consistently with Government Code section 17558.5, to reflect the three year period for the Controller to initiate and audit, and to expressly require that once an audit is initiated, “the retention period is extended until the ultimate resolution of

³⁰⁹ Exhibit D, Controller’s Response to the Request for Additional Information, pages 1350; 1352; 1356; 1359.

³¹⁰ Exhibit A, IRC, page 6.

³¹¹ Exhibit A, IRC, page 79 [Parameters and Guidelines, page 15].

³¹² See Government Code section 17558.5 (Stats. 1995, ch. 945 (SB 11)).

³¹³ Statutes 2002, chapter 1128 (AB 2834).

³¹⁴ Exhibit A, IRC, page 108 (excerpt of claiming instructions, revised 09/03).

³¹⁵ Exhibit A, IRC, pages 108-109 (excerpt of claiming instructions, revised 09/03).

any audit findings.”³¹⁶ Thus, while the original Parameters and Guidelines and claiming instructions stated the document retention requirements based on the state of the law as it then existed, at the time the claims were paid, the document retention requirements had been extended by virtue of the amended provisions of Government Code section 17558.5, the updated claiming instructions, and the amendment of the Parameters and Guidelines on January 26, 2006.³¹⁷

The Commission has previously found, with respect to the 2002 amendments to Government Code section 17558.5, that to the extent the amended section promotes an expansion of the period of limitation for the Controller to initiate an audit, it applies to any pending claims or potential audits not yet time-barred.³¹⁸ As noted above, the claimant’s fiscal year 1998-1999, 1999-2000, and 2000-2001 claims were filed in September 2002. Thus, those years were subject to the two year period of limitation to initiate the audit at the time filed. But because section 17558.5 was amended, effective September 30, 2002 which is *before* the period expired with respect to those initial claims, to expand the limitation period applicable to the Controller’s audits to three years, the Controller receives the benefit of the extra time and claimant was required to retain its documentation for three years or until the audit and any challenges to the audit are completed.³¹⁹

Accordingly, because the document retention requirement of the Parameters and Guidelines is inextricably linked to the period of limitation for the Controller to initiate an audit, the amendment of the Parameters and Guidelines in January 2006, prior to the expiration of the audit period (and the expiration of the document retention period) applies. Moreover, the intervening update to the claiming instructions provides notice to the claimant of both the change in the Government Code, and its effect on the document retention period. To the extent the Controller’s authority to audit is expanded by extending the period of limitation, the Controller’s authority to compel the claimant to produce documentation when auditing must also be expanded.

The claimant argues that it “cannot be expected” to comply with burdensome document retention requirements that create “indeterminate” retention periods.³²⁰ To the contrary, the retention periods are no less determinate than the period that the claim is subject to audit. Government Code section 17558.5 provides the Controller three years to audit a reimbursement claim, and that period begins either when the claim is filed or last amended, or if no funds are appropriated, the period is tolled until the subject claim is paid, as here.³²¹ After that, the Controller has an additional two years, once initiated, to complete its audit, during which time the 2006 Parameters

³¹⁶ Exhibit G, Final Staff Analysis and Proposed Parameters and Guidelines Amendment, January 26, 2006, page 1649.

³¹⁷ Exhibit A, IRC, page 108; Exhibit G, Final Staff Analysis and Proposed Parameters and Guidelines Amendment, January 26, 2006, page 1649.

³¹⁸ *Douglas Aircraft Co. v. Cranston* (1962) 58 Cal.2d 462, 465.

³²⁰ Exhibit A, IRC, page 17.

³²¹ Statutes 2002, chapter 1128.

and Guidelines require retention of the supporting documents, consistently with the Controller's audit authority under the Government Code and the claimant's burden to support its costs claimed.

Based on the foregoing, even though the Parameters and Guidelines adopted February 28, 2002 and the initial claiming instructions revised September 2002 provided for a two-year period to initiate an audit, and required documentation to be retained for only that same period, the period was expanded to three years by amendment of the Government Code, revision of the claiming instructions, and amendment of the Parameters and Guidelines effective July 1, 2005, before the triggering event that began the running of the statutory period (i.e., the initial payment of the claim in August 2006). As noted, the claimant had ample notice of the change, via the revised claiming instructions, and all parties are deemed to know of changes to state statute.

More importantly, all versions of the Parameters and Guidelines place the burden on the claimant to support all costs claimed with source documentation, which must be retained during the period subject to audit. In other words, it is the claimant's burden to prove the claim, and based on the foregoing analysis, the claimant was on notice of the document retention requirements.

Furthermore, the claimant complains of being denied the time "provided by law" to respond to the requirements of the audit. Government Code section 17558.5 requires an audit to be completed "not later than two years after the date that the audit is commenced." This is a requirement on the Controller to complete its audits promptly; it is not intended to provide a claimant with up to two years to remedy a poorly-supported and insufficiently-documented reimbursement claim.

Moreover, the undisputed evidence in the record shows that the claimant had a period of seven months, and an additional period of nine months, in which the Controller's audit staff was actively working with the claimant to resolve the issues of the audit and to make clear the documentation necessary to support the claim.³²² And, the Controller asserts, "[t]hroughout the audit process, we worked with the city's staff to not only obtain proper supporting documentation, but also to arrange for alternative methods to support claimed costs."³²³

Based on the foregoing, the Commission finds that claimant's allegation that the Controller failed to provide adequate time to comply with the requirements of the audit is irrelevant, and ignores the claimant's burden to support costs claimed.

V. Conclusion

Based on the foregoing analysis, the Commission partially approves this IRC, and requests, pursuant to Government Code section 17551(d) and section 1185.9 of the Commission's regulations, that the Controller reinstate costs that relate to the following incorrect reductions *to the extent* the claimant can provide documentation to support the validity of the costs incurred. Section VI. of the Parameters and Guidelines require claimants to provide source documents that show the evidence of the validity of such costs and their relationship to the mandate. The

³²² Exhibit A, IRC, pages 16-18; 711-714; Exhibit B, Controller's Late Comments on the IRC, pages 24-26.

³²³ Exhibit B, Controller's Late Comments on the IRC, page 1013.

supporting documentation must be kept on file by the agency during the audit period required by Government Code section 17558.5. In this respect, claimants are required by Food and Agriculture Code section 32003 to maintain records on animals that are taken up, euthanized, or impounded. Such records shall identify the date the animal was taken up, euthanized, or impounded; the circumstances surrounding these events; and the names of the personnel performing these activities.³²⁴

- Any reduction of costs relating to the exclusion of animals deemed treatable upon arrival at the shelter and later euthanized during the increased holding period because they became non-rehabilitatable.
- Any reduction of costs relating to the Controller's recalculation of costs following the *Purifoy* decision and its use of an average number of reimbursable days, to the extent the recalculation resulted in an exclusion of "eligible animals" correctly held under the law.

The Commission further finds that all other reductions made by the Controller are correct as a matter of law and not arbitrary, capricious, or entirely lacking in evidentiary support.

Finally, the Commission finds that the Controller's determination not to consider claimant's request, made during the audit, for reimbursement for the construction of new facilities is correct as a matter of law, and that the claimant's allegation that the Controller failed to provide adequate time to comply with the requirements of the audit is irrelevant.

³²⁴ It is not clear from the record whether the Controller actually requested these records from the claimant based on the Controller's interpretation that such costs were not reimbursable.

DECLARATION OF SERVICE BY EMAIL

I, the undersigned, declare as follows:

I am a resident of the County of Sacramento and I am over the age of 18 years, and not a party to the within action. My place of employment is 980 Ninth Street, Suite 300, Sacramento, California 95814.

On October 13, 2016, I served the:

Proposed Decision

Animal Adoption, 13-9811-I-02

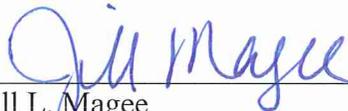

Civil Code Sections 1834 and 1846; Food and Agriculture Code Sections 31108, 31752, 31752.5, 31753, 32001, and 32003; As Added or Amended by Statutes 1998, Chapter 752 (SB 1785)

Fiscal Years 1998-1999, 1999-2000, 2000-2001, 2001-2002, 2002-2003; 2005-2006, 2006-2007, and 2007-2008

City of Los Angeles, Claimant

by making it available on the Commission's website and providing notice of how to locate it to the email addresses provided on the attached mailing list.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct, and that this declaration was executed on October 13, 2016 at Sacramento, California.

City of Los Angeles, Claimant

Dear Ms. Halsey:

The State Controller's Office (SCO) is transmitting our comments to the Commission's Proposed Decision dated October 13, 2016, for the above IRC.

The Commission partially approved the IRC and recommended that the SCO reinstate a portion of the costs to the extent the claimant can provide documentation to support the validity of the costs incurred. The SCO would like to provide its comments in relation to one of the issues addressed in the Proposed Decision.

If you have any questions, please contact me by telephone at (916) 323-5849.

Sincerely,

JIM L. SPANO, Chief
Mandated Cost Audits Bureau
Division of Audits
State Controller's Office

TO THE COMMISSION PROPOSED DECISION
DATED OCTOBER 13, 2016
RELATED TO AN INCORRECT REDUCTION CLAIM BY
THE CITY OF LOS ANGELES**

Animal Adoption Program

Commission's Analysis

In its Proposed Decision, dated October 13, 2016, the Commission partially approved the IRC and requested that the SCO reinstate costs that relate to two categories of incorrect reductions to the extent the claimant can provide documentation to support the validity of the costs incurred. The Commission identified the following two categories of incorrect reductions in its Proposed Decision:

1. Any reduction of costs relating to the exclusion of animals deemed treatable upon arrival at the shelter and later euthanized during the increased holding period because they became non-rehabilitatable; and
2. Any reduction of costs relating to the SCO's recalculation of costs following the *Purifoy* decision and its use of an average number of reimbursable days, to the extent the recalculation resulted in an exclusion of "eligible animals" correctly held under the law.

The Commission further found that all other reductions made by the SCO were correct.

SCO's Comments

The SCO submitted comments in response to the Commission's Draft Proposed Decision. The letter, dated September 15, 2016, articulated the SCO's views on the two issues listed above. However, in light of the Commission's evaluation of the SCO's comments in its Proposed Decision, the SCO would like to express additional comments for Issue 2—the use of the *average* number of reimbursable days.

The SCO maintains that the reductions in costs identified above were consistent with the intent of the mandated program and the reimbursable criteria and did not adversely affect the claimant's allowable costs.

Impact of Using Average Values

The SCO performs its audits to the plain language of the parameters and guidelines and ensures that only actual costs are allowable for reimbursement. Even when supporting documentation is absent or weak, we work closely with claimants to determine the reimbursable costs as close to the actual costs as possible. We concur that the parameters and guidelines requires computation of *actual* costs for all components of the Animal Adoption program. We also concur that computing *actual* increased holding period days would be most accurate. However, circumstances often may not allow the SCO or the claimant to compute actual costs. For example, the claimants and the SCO often use *average* productive hourly rates per employee classification to determine allowable salaries and benefits costs. Also, *average* time increments

per activity often are computed to determine allowable hours for reimbursable components. The use of *average* values in computation of mandated costs allows for efficiency while providing close approximation of actual costs.

As we noted in our comments dated September 15, 2016, the SCO reviewed and analyzed a substantial number of animal records for the audit period. The animal records averaged between 50,000 and 60,000 line items per fiscal year. To put things in perspective, we will demonstrate the difficulty in approximating the time required to compute the *actual* increased holding period for each animal in one given fiscal year. We used FY 2007-08 as an example year in our responses; therefore, we will use the statistics for FY 2007-08 to demonstrate our example. FY 2007-08 data contained 50,000 animal records, rounded to the nearest thousand. We will assume one full-time staff member and devote this person to the activity of determining the *actual* increased holding period for the claimant's animal population. Considering that each animal record would need to be evaluated manually to determine the *actual* increased holding period depending on the day of the week the animal was impounded, we also will assume that one staff member can perform 20-25 such calculations in one hour. At this rate, the staff member would be able to review 200 animal records per day and about 1,000 animal records per week. Therefore, the thorough review of the animal data for just one fiscal year would take approximately an entire calendar year to complete, assuming no breaks, no holidays, and no vacation days. The animal data would have to be sorted first and proper exclusions of adopted or redeemed or owner surrendered animals would have to be accounted for. Therefore, the number of animal records subject to an *actual* increased holding period computation would be reduced. However, the task of computing the *actual* increased holding period for each potentially eligible animal record would take months and possibly longer.

Average Increased Holding Period Days

The Commission's Proposed Decision, dated October 13, 2016 states:

The controller's recalculations of the increased holding period using an average number of reimbursable days is incorrect as a matter of law, and is arbitrary, capricious, and entirely lacking in evidentiary support....

We disagree. The SCO maintains that using an *average* of increased holding period days in the computation of allowable costs was not detrimental to the claimant and was the only reasonable and practical methodology to approximate actual costs as close as possible.

Increased Holding Period for Dogs and Cats

As the Commission pointed out in its Proposed Decision, the claimant is subject to the four-business-day holding period for dogs and cats, consistent with the claimant making dogs and cats available for owner redemption on a weekend day. The increased holding period days for dogs and cats is computed by the difference between the 72-hour holding period under prior law and the four business days after the day of impoundment. In order to properly compute the *actual* increased holding period days for dogs and cats, one would need to know not only the day of the week the animal came in, but also the exact hour, which would make a difference in computing the *actual* increased holding period for dogs and cats. The animals are impounded or are dropped off 24-hours per day regardless of the shelters' operating schedules. The exact hour of animal impoundment is not recorded anywhere.

Therefore, aside from being an unreasonably time-consuming task, computing an accurate increased holding period for dogs and cats is impossible in the absence of a recorded time of day that the animal was impounded. One would need to make assumptions on whether animals were impounded in the morning, mid-day, or afternoon, which would change the computation of the *actual* increased holding period. Making such assumptions would inherently bring an element of approximation to the computation and would defeat the purpose of attempting to compute an *actual* increased holding period for these animals.

In its Proposed Decision, the Commission presented an example table showing how the holding period days are computed. Consistent with *Purifoy* decision and the SCO's methodology, the Commission's chart did not account for Saturdays or Sundays as business days and accounted for Mondays, Tuesdays, Wednesdays, Thursdays, and Fridays as business days. The Commission's chart also made an assumption (as noted in the paragraph above) that the animals were impounded first thing in the morning, which started the holding period computation immediately on the day of impoundment. Also, the Commission's analysis did not take into account the correct working schedule for the claimant's animal shelters, which affects the computation of the increased holding period for the claimant's shelters. Assuming a morning impoundment and counting Monday as a business day creates differences between the SCO's analysis performed during the audit and the Commission's comments presented in the Proposed Decision.

The Commission correctly noted that the SCO's analysis to compute *average* increased holding period days excluded Saturdays, Sundays, and other "days that the agency was closed." The SCO computed an *average* increased holding period for all dogs and cats to be three days, and the *average* increased holding period for other animals to be six days.

The SCO presented a sample of its computation table in response to the claimant's IRC. The SCO's response letter, dated September 4, 2015, included Tab 10, which presented the SCO's computations for Care and Maintenance costs and the SCO's analysis for computing the *average* increased holding period days for dogs and cats. Per the claimant's animal shelters' schedules and the claimant's own admission during fieldwork, the city's shelters were open to the public Tuesdays through Saturdays during the audit period. Therefore, the SCO's analysis excluded Saturdays, Sundays, and Mondays as business days. Also, with the absence of information pertaining to the time of the day the animals were impounded, the SCO's analysis originally assumed a noon impound in order to compute the 72-hour holding period under prior law.

For demonstration purposes, the SCO would like to present a simplified analysis, consistent with the chart contained in the Commission's Proposed Decision, which assumes a morning impound and excludes Mondays as business days per the claimant's animal shelters' schedules during the audit period. Accounting for Mondays as non-business days will produce different results from the Commission's examples, when computing the *increased* holding period days for dogs and cats and other animals.

The increased holding period for dogs and cats is as follows:

Mon	Tue	Wed	Thur	Fri	Sat	Sun	Mon	Tue	Wed	Thur	Fri	increased holding period
imp	1	2	3	4								2 days
	imp	1	2	3				4				5 days
		imp	1	2				3	4			5 days
			imp	1				2	3	4		5 days
				imp				1	2	3	4	5 days
					imp			1	2	3	4	4 days
						imp		1	2	3	4	3 days

As it appears in this chart, the *increased* holding period for dogs and cats would range between two and five calendar days, depending on the day of the week the animal was impounded. Using a similar analysis, and assuming a noon impound, the SCO computed its *average* three-day increased holding period during the audit. The Commission notes in its Proposed Decision that using this average may potentially exclude eligible animals from the population of eligible animals, as with a Monday impound, for example. However, the SCO maintains that the scenarios of including potentially ineligible animals are far more frequent and make the use of this average value a fair and reasonable methodology.

Only a Monday impound scenario would potentially exclude some eligible animals if they were euthanized on proper days, but were counted as outside the SCO's *average* three-day increased holding period. However, using the *average* three-day increased holding period in the scenarios of Tuesday, Wednesday, Thursday, Friday, and Saturday impound days for dogs and cats would be advantageous and produce results in the city's favor. In those instances, if the dogs and cats were euthanized sooner than the *actual* increased period (for example on day four of the increased period and calendar day eight), such animals were counted as eligible animals in the SCO's analysis, but should have been excluded. For example, using the chart above, for a dog impounded on Wednesday or Thursday, the *actual* increased holding period is five days, and not three days, as in the SCO's *average*. Therefore, if a dog was euthanized on calendar day seven (because Saturday, Sunday, and Monday are excluded), it would have been counted as an eligible animal in the audit, when in reality it should have been held until calendar day eight and excluded from the eligible animal population, if the SCO had followed the *actual* increased holding period requirement of five days.

Increased Holding Period for Other Animals and Birds

For other animals, the required holding period is four days after the day of impoundment. The number of reimbursable days is as follows:

Mon	Tue	Wed	Thur	Fri	Sat	Sun	Mon	Tue	Wed	Thur	Fri	increased holding period
imp	1	2	3	4								5 days
	imp	1	2	3				4				8 days
		imp	1	2				3	4			8 days
			imp	1				2	3	4		8 days
				imp				1	2	3	4	8 days
					imp			1	2	3	4	7 days
						imp		1	2	3	4	6 days

Consistent with *Purifoy*, this chart does not count Saturdays and Sundays as business days, and also does not count Mondays as business days, consistent with claimant's animal shelters' schedules.

The animals are impounded throughout the year, seven days a week. As shown above, with the scenarios of Tuesday, Wednesday, Thursday, and Friday impound days for category of "other animal" or "bird," the animal should not be euthanized until calendar day eight, because Saturdays, Sundays, and Mondays are excluded, as noted above.

The SCO used an *average* six-day increased holding period in its determination of eligible animals for categories of "other animal" and "bird." If an animal was euthanized on day seven, the SCO counted such animals as allowable for reimbursement, consistent with the *average* six-day period. However, the *actual* increased holding period for animals impounded on Tuesdays, Wednesdays, Thursdays, and Fridays would be eight days.

Contrary to the Commission's assertion that the SCO did not show evidence that the use of the *average* reimbursable days allows non-eligible animals to be included for reimbursement, the evidence of such scenarios is in fact contained in the record. In its comments to the Draft Proposed Decision, dated September 15, 2016, the SCO submitted Tab 3 – City of Los Angeles' Chameleon Database Animal Listing for Other Animals for FY 2007-08 and Tab 4 – City of Los Angeles' Chameleon Database Animal Listing for Birds for FY 2007-08. We will refer to the listing of "other animal" category in Tab 3 as an example.

Referring to PDF page 51 of 105 of that document posted on the Commission's website, the listing of other animals on that page contains records for four turtles impounded on March 13, 2008 (animal identification numbers A0933507, A0933508, A0933509, and A0933510). March 13, 2008, is a Thursday. Excluding Saturday, Sunday, and Monday as business days, the *actual* required holding period for these turtles is through Thursday of the following week, or eight calendar days. Those turtles were euthanized on day seven and therefore prior to the required *actual* holding period. However, the SCO included these animals in the allowable population of animals, consistent with the use of the *average* six-day period, but inconsistent with the *actual* required holding period of eight days.

Referring to PDF page 57 of 105 of the same document posted on the Commission's website, the listing of other animals on that page contains records for two domestic rats impounded on May 9, 2008 (animal identification numbers A0946170 and A0946172.) May 9, 2008, is a Friday.

Excluding Saturday, Sunday, and Monday as business days, the *actual* required holding period for these rats is through Friday of the following week or eight calendar days. Those rats were euthanized on day seven and therefore prior to the required *actual* holding period. However, the SCO included these animals in the allowable population of animals, consistent with the use of the *average* six-day period, but inconsistent with the *actual* required holding period of eight days.

The examples described in the two paragraphs above demonstrate that the use of the *average* increased holding period days includes ineligible animals and produces results favorable to the city.

Summary

When summarizing all possible impound scenarios for the category of dogs and cats, using an *average* increased three-day holding period benefits the claimant in a Tuesday, Wednesday, Thursday, Friday, and Saturday impound scenario. For a Sunday impound, it's neither advantageous nor disadvantageous to use the *average* three-day increased holding period. A Monday impound is the only day of the week that may produce disadvantageous results when determining the eligible population of animals. However, a Monday impound would not occur more frequently than impounds occurring on all the other days of the week combined. Therefore, the probability of excluding eligible animals, as with a Monday impound scenario, is far less than the probability of including non-eligible animals, as with a Tuesday, Wednesday, Thursday, Friday, or Saturday impound.

When summarizing all possible impound scenarios for the category of "other animal" and "bird," using an *average* required six-day holding period benefits the claimant in a Tuesday, Wednesday, Thursday, Friday, and Saturday impound scenario. For Sunday impound, the result is neutral when using the *average* required six-day holding period. Once again, a Monday impound is the only day of the week that may produce disadvantageous results when determining the eligible population of animals. However, a Monday impound would not occur more frequently than impounds occurring on all the other days of the week combined. Therefore, the potential probability of excluding eligible animals, as with a Monday impound scenario, is far less than the probability of including non-eligible animals, as with a Tuesday, Wednesday, Thursday, Friday, or Saturday impound.

Therefore, the SCO maintains that any reductions in costs associated with using an *average* increased holding period did not adversely affect accurate computation of allowable costs and were not arbitrary, capricious, and entirely lacking in evidentiary support. The SCO also maintains that using an *average* of increased holding period days in determining allowable costs is the only practical methodology available to execute the requirements outlined in the parameters and guidelines. We are asking the Commission to reconsider its position on this subject in light of the examples contained in this letter.

DECLARATION OF SERVICE BY EMAIL

I, the undersigned, declare as follows:

I am a resident of the County of Sacramento and I am over the age of 18 years, and not a party to the within action. My place of employment is 980 Ninth Street, Suite 300, Sacramento, California 95814.

On October 21, 2016, I served the:

SCO Late Comments on the Proposed Decision

Animal Adoption, 13-9811-I-02

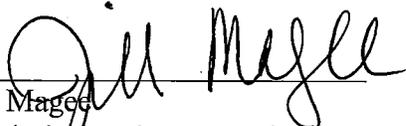

Civil Code Sections 1834 and 1846; Food and Agriculture Code Sections 31108, 31752, 31752.5, 31753, 32001, and 32003; As Added or Amended by Statutes 1998, Chapter 752 (SB 1785)

Fiscal Years 1998-1999, 1999-2000, 2000-2001, 2001-2002, 2002-2003; 2005-2006, 2006-2007, and 2007-2008

City of Los Angeles, Claimant

by making it available on the Commission's website and providing notice of how to locate it to the email addresses provided on the attached mailing list.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct, and that this declaration was executed on October 21, 2016 at Sacramento, California.

NO. CSM 98-TC-11

Animal Adoption

**STATEMENT OF DECISION
PURSUANT TO GOVERNMENT
CODE SECTION 17500 ET SEQ.;
TITLE 2, CALIFORNIA CODE OF
REGULATIONS, DIVISION 2,
CHAPTER 2.5, ARTICLE 7**

(Adopted on January 25, 2001)

STATEMENT OF DECISION

On October 26, 2000, and November 30, 2000, the Commission on State Mandates (Commission) heard this test claim during regularly scheduled hearings.

At the October 26, 2000 hearing, Mr. Leonard Kaye appeared for the County of Los Angeles. Dr. Dennis Davis, Animal Care and Control Department, Lancaster Shelter, and Mr. Robert Ballenger, Senior Manager, Animal Care and Control Department, appeared as witnesses for the County of Los Angeles. Mr. Allan Burdick and Ms. Pam Stone appeared for the City of Lindsay and County of Tulare. Lt. Ramon Figueroa, Department of Public Safety, appeared as a witness for the City of Lindsay. Ms. Pat Claerbout appeared for the Southeast Area Animal Control Authority. Ms. Meg Halloran, Deputy Attorney General, and Mr. James Apps appeared for the Department of Finance.

At the October 26, 2000 hearing, the Commission received public testimony from the following persons: Mr. Richard Ward, State Humane Association of California; Ms. Dolores Keyes, Coastal Animal Services Authority; Mr. Greg Foss, County of Mendocino; Ms. Lois Newman, The Cat and Dog Rescue Association of California; Ms. Patricia Wilcox, California Animal Control Directors Association; Ms. Kate Neiswender, on behalf of Senator Tom Hayden, author of SB 1785; Dr. Dena Mangiamele and Mr. John Humphrey, County of San Diego; Ms. Virginia Handley , The Fund for Animals; Mr. Mike Ross, Contra Costa County; Ms. Teri Barnato, Association of Veterinarians for Animal Rights; and Mr. Howard J. Davies, Mariposa County Sheriff’s Department. In addition, a statement prepared by Ms. Taimie L. Bryant was read into the record by Ms. Kate Neiswender.

At the November 30, 2000, hearing, Mr. Leonard Kaye and Mr. Robert Ballenger appeared for the County of Los Angeles. Mr. Allan Burdick and Ms. Pam Stone appeared for the City of Lindsay and the County of Tulare. Mr. Hiren Patel, Deputy Attorney General, and Mr. James Apps appeared for the Department of Finance.

At the hearings, oral and documentary evidence was introduced, the test claim was submitted, and the vote was taken.

The law applicable to the Commission’s determination of a reimbursable state mandated program is article XIII B, section 6 of the California Constitution, Government Code section 17500 and following, and related case law.

The Commission, by a vote of 5 to 2, partially approved this test claim.

BACKGROUND

Test Claim Legislation

In 1998, the Legislature enacted Senate Bill 1785 (Stray Animals) in an attempt to end the euthanasia of adoptable and treatable stray animals by the year 2010. The test claim legislation expressly identifies the state policy that “no adoptable animal should be euthanized if it can be adopted into a suitable home” and that “no treatable animal should be euthanized.”¹ Thus, the test claim legislation provides, in part, that:

- ⌘ The required holding period for stray animals is increased from three days, to four to six business days as specified.’ Stray animals shall be held for owner redemption during the first three days of the holding period. If the owner has not redeemed the stray animal within the first three days, the animal shall be available for redemption or adoption during the remainder of the holding period;
- ⌘ The stray animal shall be released to a nonprofit animal rescue or adoption organization if requested by the organization prior to the scheduled euthanization of that animal. In addition to the required spay or neuter deposit, the pound or shelter has the authority to assess a fee, not to exceed the standard adoption fee, for animals released;

¹ See, Civil Code section 1834.4; Food and Agriculture Code section 17005; and Penal Code section 599d.

² The stray animals subject to this legislation include dogs, cats, rabbits, guinea pigs, hamsters, pot-bellied pigs, birds, lizards, snakes, turtles, and tortoises legally allowed as personal property.

- ⊘ Shelter personnel are required to verify the temperament of an apparent feral cat by using a “standardized protocol” to determine if the cat is truly feral, or simply a frightened or difficult tame cat. If the cat is determined to be tame, then the cat is required to be held for the entire holding period. If the cat is truly feral, the cat may be euthanized or relinquished to a nonprofit animal adoption organization after the first three days of the holding period;
- ⊘ Animals that are relinquished to a pound or shelter by the purported owner shall be held for two full business days, not including the day of impoundment. The animal shall be available for owner redemption on the first day, and shall be available for owner redemption or adoption on the second day. After the second required day, the animal may be held longer, euthanized, or relinquished to a nonprofit animal adoption organization;
- ⊘ Public entities and private entities that contract with a public entity have the “mandatory duty” to maintain lost and found lists and other information to aid owners of lost pets;
- ⊘ All public pounds and private shelters shall keep and maintain accurate records for three years on each animal taken up, medically treated, and impounded; and
- ⊘ Impounded animals shall receive “necessary and prompt veterinary care.”

On October 2, 2000, the claimants amended their test claim to include Business and Professions Code section 4855, enacted in 1978, and section 2032.3 of the regulations issued by the California Veterinary Medical Board. These provisions require all veterinarians to keep a written record of all animals receiving veterinary services for a minimum of three years.

History

In 1981, the Board of Control approved a test claim filed by the County of Fresno on legislation requiring a 72-hour holding period prior to the euthanasia of stray cats (*Detention of Stray Cats*, SB 90-3948).³ The Parameters and Guidelines adopted by the Board of Control authorized reimbursement for the one-time costs of building modification; feeding, water and litter receptacles; and additional cages. The Parameters and Guidelines also authorized reimbursement for ongoing personnel activities, and the purchase of food, litter and cleaning supplies. Except for the County of Los Angeles, all cities and counties were eligible for reimbursement. The County of Los Angeles sponsored the “stray cat” legislation and, thus, was not entitled to reimbursement under the former Revenue and Taxation Code. In 1982, the Board of Control adopted a statewide cost estimate. However, the Legislature elected not to fund the mandate in 1984.⁴

Claimants’ Position

The claimants contend that the test claim legislation constitutes a reimbursable state mandated program pursuant to article XIII B, section 6 of the California Constitution and Government Code section 17514. The claimants are requesting reimbursement for the initial costs to obtain

³ Food and Agriculture Code section 31752, as added by Statutes of 1980, Chapter 1060.

⁴ Statutes of 1984, Chapter 268.

new and additional facilities, to develop new policies and procedures, and to develop new protocols such as the one required for feral cats. The claimants are also requesting continuing costs to maintain records; provide veterinary services; provide services to animals, other than dogs and cats; and costs resulting from the increased holding period.

On October 2, 2000, the claimants filed a response to the Draft Staff Analysis clarifying that they are seeking reimbursement for the following activities: construction of cat housing; construction of isolation/treatment facilities; construction of additional kennel buildings; extra kennel staffing; lost and found staffing; additional medical personnel; medical equipment and supplies; emergency treatment costs; and additional administrative costs. The County of Los Angeles estimates their initial costs to implement the program at \$5,762,662.

Department of Finance Position

The Department contends that the test claim should be denied. The Department argues that the test claim legislation imposes animal control activities on both public and private sector entities. Therefore, although the test claim legislation may result in additional costs to local agencies, those costs are not reimbursable because they are not unique to local government. The Department further states the duty imposed on local agencies to accept and care for lost or abandoned animals is not a new duty and, thus, does not constitute a new program or higher level of service. Finally, the Department contends that no reimbursement is required since there are no costs mandated by the state pursuant to Government Code section 17556, subdivisions (d) and (e).

Position of Interested Party, City of Fortuna

The City of Fortuna contends that the test claim legislation constitutes a reimbursable state mandated program by increasing the length of time animals can be held before they are euthanized, by adding new requirements related to adoption services, and by adding new requirements related to veterinary care. The City contends that the test claim legislation increased the cost of its animal control program by 284 percent.

Position of Interested Party, County of Mariposa

Howard Davies, assistant sheriff of Mariposa County, testified that the test claim legislation has resulted in increased costs in the form of housing animals, building a new facility, and increased staffing. He further testified that the four to six business-day holding period required by the test claim legislation essentially forces agencies to hold animals for six or seven days, when taking weekends into account.

Position of Interested Parties, Counties of San Diego, Fresno, and Mendocino

The Counties of San Diego, Fresno, Mendocino, and Contra Costa contend that the test claim legislation constitutes a reimbursable state mandated program. Both counties filed comments on the Draft Staff Analysis. The Counties of San Diego and Contra Costa contend that local agencies are required by the test claim legislation to provide “new” veterinary care services. The County of San Diego further contends that local agencies are required to perform new activities related to the seizure of animals. The County of Fresno filed comments, and Greg

Foss of the County of Mendocino provided testimony, clarifying the list of offsetting savings to be included in the parameters and guidelines.

Position of Interested Person, Senator Tom Havden, Author of SB 1785

Kate Neiswender, staff to Senator Tom Hayden, testified that the test claim legislation does not impose a reimbursable state mandated program. The test claim legislation seeks to increase adoptions and reduce the rate, and costs, of killing animals. If all of the pieces of the test claim legislation are fully implemented, there is a net effect of no new costs.

Position of Interested Person, Taimie L. Bryant, Ph.D., J.D.

Ms. Bryant is a Professor of Law at UCLA Law School. She assisted in the design and drafting of the test claim legislation at the request of Senator Tom Hayden. She teaches a course entitled “Animals and the Law,” which has been offered at UCLA each academic year since 1995. She is also the faculty sponsor for the UCLA Animal Welfare Association.

Ms. Bryant contends that this test claim should be denied. Ms. Bryant argues that the test claim legislation applies to both public and private entities and, thus, is not unique to local government pursuant to the court’s holding in *County of Los Angeles v. State of California*.⁵ She further contends that the test claim legislation authorizes local agencies to assess fees sufficient to pay for the mandated program and that the legislation “has no net negative financial impact on local government.” Therefore, Ms. Bryant contends that no reimbursement is required since there are no costs mandated by the state pursuant to Government Code section 17556, subdivisions (d) and (e).

Position of Other Interested Persons

Virginia Handley of the Fund for Animals, Inc., contends that the test claim legislation constitutes a reimbursable state-mandated program. Ms. Handley filed comments on the Draft Staff Analysis supporting reimbursement for the entire holding period, for owner relinquished animals, and for increased veterinary care.

Lois Newman, founder and president of The Cat and Dog Rescue, states that the test claim legislation is cost-effective. Ms. Newman contends that the claimants’ argument that the costs resulting from the test claim legislation are substantial is without merit. She further argues that some local agencies decided to expend monies for capital improvements before the test claim legislation was enacted and, thus, there is no proof that the test claim legislation resulted in costs mandated by the state.

The San Francisco Society for the Prevention of Cruelty to Animals (SPCA) states that it entered into a partnership called the “Adoption Pact” with the San Francisco Animal Care and Control Department in 1994. Several provisions and incentives provided in the Adoption Pact were written into the test claim legislation. The San Francisco SPCA contends that the test claim legislation is cost-effective and can be accomplished on a revenue-neutral or revenue-positive basis without expenditures for new facilities or increased space.

⁵ *County of Los Angeles v. State of California* (1987) 43 Cal.3d 46.

B. Robert Timone, Executive Director for the Haven Humane Society, states that the test claim legislation imposes a reimbursable state mandated program by increasing civil and criminal liability, by severely increasing mandatory shelter retention time for stray and owner released animals, and by subjecting animal sheltering agencies to open-ended veterinary medical expenses. The Haven Humane Society has contracted with the City of Redding for 15 years and can no longer provide animal care services as a result of the test claim legislation.

Jeffrey E. Zinder filed comments on behalf of Animal Issues Movement (a Los Angeles/Orange County nonprofit organization) and United Activists for Animal Rights (a Riverside County nonprofit organization) contending that the test claim legislation constitutes a reimbursable state mandated program. Mr. Zinder filed comments on the Draft Staff Analysis contending that veterinary care and care and treatment for owner-relinquished animals are reimbursable activities.⁶

Richard Ward of the State Humane Association of California contends that the test claim legislation constitutes a reimbursable state mandated program and supports the positions of the County of San Diego, Mr. Jeffrey Zinder, and the claimants.

Dolores Keyes of the Coastal Animal Services Authority, a small shelter providing animal care services for the cities of Dana Pointe and San Clemente, testified that she has seen a definite fiscal impact that includes higher veterinarian costs, higher staffing costs, and new in-house services as a result of the test claim legislation.

Patricia Wilcox of the California Animal Control Directors Association testified that the test claim legislation has resulted in increased costs for medical care for lost, stray, abandoned, and relinquished animals.

Teri Barnato of the Association of Veterinarians for Animal Rights testified that veterinary care is not a new activity imposed by the test claim legislation since prior law required care and treatment for stray and abandoned animals. She testified that many shelters have increased their veterinary care, not because of the test claim legislation, but as a result of public pressure.

FINDINGS

In order for a statute to impose a reimbursable state mandated program under article XIII B, section 6 of the California Constitution and Government Code section 17514, the statutory language must direct or obligate an activity or task upon local governmental agencies. If the statutory language does not mandate or require local agencies to perform a task, then compliance with the test claim statute is within the discretion of the local agency and a reimbursable state mandated program does not exist.

⁶ The comments filed by Yvonne Hunter of the League of California Cities and the comments filed by the Animal Care and Control Department of the City and County of San Francisco are helpful in providing background information. However, these comments do not address the issue before the Commission as to whether the test claim legislation imposes a reimbursable state mandated program within the meaning of article XIII B, section 6 of the California Constitution and Government Code section 17514.

In addition, the required activity or task must constitute a new program or create an increased or higher level of service over the former required level of service. The California Supreme Court has defined the word “program” subject to article XIII B, section 6, of the California Constitution as a program that carries out the governmental function of providing a service to the public, or laws which, to implement a state policy, impose unique requirements on local governments and do not apply generally to all residents and entities in the state. To determine if the “program” is new or imposes a higher level of service, a comparison must be made between the test claim legislation and the legal requirements in effect immediately before the enactment of the test claim legislation. Finally, the new program or increased level of service must impose “costs mandated by the state.”⁷

This test claim presents the following issues:

- ⊘ Is the test claim legislation subject to article XIII B, section 6 of the California Constitution?
- ⊘ Does the test claim legislation impose a new program or higher level of service on local agencies within the meaning of article XIII B, section 6 of the California Constitution?
- ⊘ Does the test claim legislation impose “costs mandated by the state” within the meaning of Government Code sections 17514 and 17556?

The Commission also addresses a fourth issue raised by the claimants and interested party, County of San Diego, pertaining to seized ‘animals under Penal Code section 597.1:

- ⊘ Do the activities imposed by Penal Code section 597.1, relating to the seizure of animals, constitute a reimbursable state mandated program pursuant to article XIII B, section 6 of the California Constitution and Government Code section 17514?

These issues are addressed below.

Issue 1: Is the test claim legislation subject to article XIII B, section 6 of the California Constitution?

In order for the test claim legislation to be subject to article XIII B, section 6 of the California Constitution, the legislation must constitute a “program.” The California Supreme Court, in *the case of County of Los Angeles v. State of California*, defined the word “program” within the meaning of article XIII B, section 6 as a program that carries out the governmental function of providing a service to the public, *or* laws which, to implement a state policy, impose unique requirements on local governments and do not apply generally to all residents and entities in the state. Only one of these findings is necessary to trigger the applicability of article XIII B, section 6.⁹

⁷ Article XIII B, section 6 of the California Constitution; County of *Los Angeles v. State of California*, *supra*, 43 Cal.3d at 56; *Carmel Valley Fire Protection Dist. v. State of California* (1987) 190 Cal.App.3d 521, 537; *City of Sacramento v. State of California* (1990) 50 Cal.3d 51, 66; *Lucia Mar Unified School Dist. v. Honig* (1988) 44 Cal.3d 830, 835; Government Code section 17514.

⁸ *County of Los Angeles*, *supra*, 43 Cal.3d 46, 56.

⁹ *Carmel Valley Fire Protection Dist.*, *supra*, 190 Cal.App.3d at 537.

The Commission analyzes this issue in two parts. The first part addresses Senate Bill 1785, the stray animal legislation. The second part addresses the provisions added to the test claim by the claimants' test claim amendment; namely, Business and Professions Code section 4855 and section 2032.3 of the California Veterinary Medical Board's regulations.

Senate Bill 1785 – Stray Animals

Both the Department of Finance and Ms. Bryant contend that the test claim legislation on stray animals is not subject to article XIII B, section 6 of the California Constitution because the animal control activities required by the test claim legislation are not unique to local government. With the exception of posting lost and found lists, it is their position that the test claim activities are imposed on both public and private shelters.

The claimants disagree and contend that the test claim legislation is subject to article XIII B, section 6 of the California Constitution. The claimants argue that the Legislature has imposed a **duty** on local government to provide animal services in the state pursuant to Penal Code sections 597f and 597.1, Food and Agriculture Code section 31105, and Health and Safety Code section 121690, subdivision (e). Private animal shelters do not have similar duties and can refuse to accept a stray animal. Therefore, the claimants contend that the test claim legislation is unique to local government. The claimants also argue that the test claim legislation provides a service to the public and, thus, the test claim legislation qualifies as a program under article XIII B, section 6 of the California Constitution.

For the reasons stated below, the Commission finds that the test claim legislation constitutes a “program” within the meaning of article XIII B, section 6 of the California Constitution.

The purpose of the test claim legislation is to carry out the “state policy” that no adoptable animal should be euthanized if it can be adopted into a suitable home and that no treatable animal should be euthanized.¹⁰ In this respect, the test claim legislation does impose duties on both public and private animal shelters. In Section 1 of the test claim legislation, the Legislature declared that “public and private shelters and humane organizations share a common purpose in saving animals’ lives” and that “public and private shelters and humane organizations should work together to end euthanasia of adoptable and treatable animals.” Thus, the test claim legislation requires both public and private shelters to perform the following activities:

- keep stray animals for a longer holding period;
- provide the animal with necessary and prompt veterinary care, adequate nutrition, water, and shelter, and make reasonable attempts to notify the owner if the animal has identification;
- release the stray animal to an animal rescue and adoption organization upon request prior to the euthanization of the animal;
- determine whether an apparently feral cat is truly feral; and

¹⁰ Civil Code section 1834.4; Penal Code section 599d; and Food and Agriculture Code section 17005.

keep and maintain accurate records on each animal for three years.¹¹

Although the test claim legislation applies to both public and private shelters, existing law, which was not amended or repealed by the test claim legislation, does *not* require private shelters to accept stray or abandoned animals. Instead, the act of accepting and caring for stray animals is within the discretion of the private shelter. Thus, the Commission finds that the requirements imposed by the test claim legislation apply to private shelters only if the private shelter decides to accept the stray or abandoned animal, and that existing law cannot be ignored.

For example, Civil Code section 1816, subdivision (a), provides that a private entity with whom a stray animal is deposited “is bound to take charge of it, *if able to do so.*”

The Department of Finance contends that Civil Code section 1816, subdivision (a), is not relevant to this analysis. Instead, the Department contends that it is subdivision (b) of section 1816 that applies and requires both public and private shelters to accept stray animals. That section states the following: “A *public agency or shelter* with whom a thing is deposited in the manner described in Section 1513 is bound to take charge of it, as provided in Section 597.1 of the Penal Code.” (Emphasis added.) The Department argues that the phrase “a public agency or shelter” means *both* public and private shelters. The Department supports its position with Senate and Assembly floor analyses that state that the test claim legislation applies to both private and public shelters.¹²

The Commission disagrees with the Department of Finance’s argument. When determining the intent of a statute, the first step is to look at the statute’s words and give them their plain and ordinary meaning. Where the words of the statute are not ambiguous, they must be applied as written and may not be altered in any way. Moreover, the intent must be gathered from the whole of a statute, rather than from isolated parts or words, in order to make sense of the entire statutory scheme.¹³

There is no evidence that the Legislature intended the phrase “a public agency or shelter” in Civil Code section 1816, subdivision (b), to include private shelters. Such a reading ignores the plain language of Civil Code section 1816, subdivision (a), which does address private shelters by the express reference to a “private entity.” In subdivision (a), the Legislature expressly stated that private entities are *only* required to take charge of stray animals “if able to do so.”

Moreover, other statutes enacted as part of Senate Bill 1785 specifically include the word “private” when referring to private shelters.¹⁴ Thus, had the Legislature intended to apply

¹¹ Ms. Lois Newman of The Cat and Dog Rescue Association submitted a survey revealing the number of private animal shelters operating in California. There are 187 private shelters and 246 public shelters.

¹² Department of Finance’s response to Draft Staff Analysis.

¹³ *City of Merced v. State of California* (1984) 153 Cal.App.3d 777; *Carrisales v. Department of Corrections* (1999) 21 Cal.4th 1132.

¹⁴ See Section 1, subdivision (a)(1) and (2), and subdivision (e), of Statutes of 1998, Chapter 752 (Legislature’s Findings and Declarations); Food and Agriculture Code section 32001 (Lost and Found Lists); and Food and Agriculture Code section 32003 (Maintaining Records).

Civil Code section 1816, subdivision (b), to private shelters, they would have included the word “private” in subdivision (b).

Finally, the Senate Floor Analysis of Senate Bill 1785, dated August 27, 1998, specifically recognizes that the duties imposed by the test claim legislation are mandatory duties for public entities and only those private entities which contract with the public entity to perform *their* required governmental duties.¹⁵

Accordingly, the Commission finds that Civil Code section 1816, subdivision (a), supports the conclusion that private animal shelters are not required to perform the activities imposed by the test claim legislation since the act of accepting and caring for stray animals is within the discretion of the private shelter.

Moreover, Civil Code section 2080 states that “any person who finds a thing lost [including a stray animal] is *not* bound to take charge of it, unless the person is otherwise required to do so by contract or law.” In this regard, the Department of Finance and Ms. Bryant contend that many private shelters have the legal obligation to take in stray animals because their mission statements and by-laws require them to take in strays. However, there is *no state law* requiring private shelters to accept and care for an animal. Thus, only if the private shelter decides to accept and care for an animal, or enter into a contract with a local agency to perform such services, is the private shelter required to perform the activities imposed by the test claim legislation.

Public shelters, on the other hand, have a pre-existing legal duty to accept and care for stray animals. Food and Agriculture Code section 3 1105 requires the county board of supervisors to take up and impound stray dogs. That section states the following:

The board of supervisors *shall* provide for both of the following:

¹⁵ The Commission notes that the Senate Floor Analysis, analyzing the same version of the bill, changed for the August 30, 1998 hearing. The August 30, 1998 analysis did not contain the paragraph recognizing that the duties imposed by the test claim legislation are mandatory duties for public entities and those private entities that contract with the public entity. The vote on the bill by the Senate occurred on August 30, 1998.

The Commission notes, however, that the Senate Floor Analysis dated August 28, 1998 is consistent with Corporations Code section 14503, which provides that the governing body of a local agency may contract with private humane societies and societies for the prevention of cruelty to animals to provide animal care or protection services. In this regard, the private entity’s jurisdiction is limited to the jurisdiction of the local agency. Corporations Code section 14503 states the following:

The governing body of a local agency, by ordinance, may authorize employees of public pounds, societies for the prevention of cruelty to animals, and humane societies, who have qualified as humane officers pursuant to Section 14502, and which societies or pounds have contracted with such local agency to provide animal care or protection services, to issue notices to appear in court

. . . . for violations of state or local animal control laws. Those employees shall not be authorized to take any person into custody even though the person to whom the notice is delivered does not give his or her written promise to appear in court. The authority of these employees is to be limited to the jurisdiction of the local agency authorizing the employees.

(a) The taking up and impounding of all dogs which are found running at large in violation of any provision of this division.

(b) The killing in some humane manner or other disposition of any dog which is impounded. (Emphasis added.)¹⁶

Health and Safety Code section 121690, subdivision (e), also requires counties and cities to maintain a pound system. That section states the following:

(e) It *shall be the duty* of the governing body of each city, city and county, or county to maintain or provide for the maintenance of a pound system and a rabies control program for the purpose of carrying out and enforcing this section. (Emphasis added.)¹⁷

The test claim legislation, in Civil Code section 1816, subdivision (b), furthers this duty by stating that public agencies or shelters with whom a thing is deposited is “bound to take charge of it, as provided in Section 597.1 of the Penal Code. ” Since 1991, Penal Code section 597.1 has required peace officers and animal control officers employed by local agencies to take possession of any stray or abandoned animal, and provide care and treatment for the animal.¹⁸ Penal Code section 597.1 states in relevant part the following:

Any peace officer, humane society officer, or animal control officer shall take possession of the stray or abandoned animal and shall provide care and treatment for the animal until the animal is deemed to be in suitable condition to be returned to **the** owner.

Although the above provision includes privately employed humane society officers, the law does *not* require humane societies and/or societies for the prevention of cruelty to animals to hire humane society officers. Rather, these private entities have the choice to hire such employees.¹⁹ Accordingly, the requirement in Penal Code section 597.1, to take possession of any stray or abandoned animal, imposes a state-mandated duty on local governmental agencies only.

Therefore, unlike private animal shelters, local agencies have no choice but to perform the activities required by the test claim legislation. Accordingly, the Commission **finds that the**

¹⁶ Added by Statutes of 1967, Chapter 15.

¹⁷ Added by Statutes of 1995, Chapter 415 (derived from Statutes of 1957, Chapter 1781).

¹⁸ Added by Statutes of 1991, Chapter 4.

¹⁹ Corporations Code section 14502. Pursuant to the provisions of Corporations Code section 14502, if the private entity decides to hire a humane society officer, the entity must first file an application with the court for the appointment of the prospective employee as a humane society officer. If the individual meets the requirements, then the individual will be appointed a humane society officer and possess limited peace officer powers to prevent the perpetration of any act of cruelty upon an animal. Corporations Code section 14502, subdivision (n), further states that “[a] humane society or a society for the prevention of cruelty to animals shall notify the sheriff of the county in which the society is incorporated, prior to appointing a humane officer, of the *society’s intent* to enforce laws for the prevention of cruelty to animals. ”

test claim legislation does impose unique requirements on local agencies to implement the state's policy to end euthanasia of adoptable and treatable animals.

The Commission further finds that the test claim legislation satisfies the second test that triggers the applicability of article XIII B, section 6 in that it constitutes a program that carries out the governmental function of providing a service to the public. As indicated above, only local agencies are mandated by the state to accept and care for stray and abandoned animals. The courts have held that the licensing and regulation of the manner in which animals are kept and controlled are within the legitimate sphere of governmental police power.²⁰ In this respect, the Legislature recognized in Section 1 of the test claim legislation that "taking in of animals is important for public health and safety, to aid in the return of the animal to its owner, and to prevent inhumane conditions for lost or free roaming animals. " Although Ms. Bryant urges the Commission to deny this test claim, she acknowledges that "collection of stray animals has been deemed a legitimate and necessary function of government as opposed to a duty to be placed on private citizens. "

Based on the foregoing, the Commission finds that Senate Bill 1785 (Stray Animals) constitutes a "program" within the meaning of article XIII B, section 6 of the California Constitution.

Sections Added by the Claimants' Test Claim Amendment

On October 2, 2000, the claimants amended their test claim to add Business and Professions Code section 4855 and section 2032.3 of the Veterinary Medical Board's regulations. These provisions require all veterinarians to keep a written record of all animals receiving veterinary services for a minimum of three years.

For the reasons stated below, the Commission finds that these provisions do *not* constitute a "program" within the meaning of article XIII B, section 6 of the California Constitution.

In order for a statute or an executive order to constitute a "program" subject to article XIII B, section 6 of the California Constitution, the statute or executive order must be unique to local government or carry out the governmental function of providing a service to the public. Neither, test is satisfied here.

Business and Professions Code section 4855 states the following:

A veterinarian subject to the provisions of this chapter shall, as required by regulation of the [Veterinary Medical Board], keep a written record of all animals receiving veterinary services, and provide a summary of that record to the owner of animals receiving veterinary services, when requested. The minimum amount of information which shall be included in written records and summaries shall be established by the board. The minimum duration of time for which a licensed premise shall retain the written record or a complete copy of the written record shall be determined by the board. (Emphasis added.)

²⁰ *Simpson v. City of Los Angeles* (1953) 40 Cal.2d 271, 278 (where the California Supreme Court stated that "it is well settled that the licensing of dogs and the regulation of the manner in which they shall be kept and controlled are within the legitimate sphere of the police power, and that statutes and ordinances may provide for impounding dogs and for their destruction or other disposition.")

In response to Business and Professions Code section 4855, the Veterinary Medical Board issued section 2032.3 of its regulations. That regulation provides in pertinent part the following:

(a) *Every veterinarian* performing any act requiring a license pursuant to the provisions of Chapter 11, Division 2, of the [Business and Professions Code], upon any animal or group of animals shall prepare a legible, written or computer generated record concerning the animal or animals. . . . (Emphasis added.)

Based on the express language of these provisions, the Commission finds that the record keeping requirements imposed by Business and Professions Code section 4855 and the regulation issued by the Veterinary Medical Board apply to *all* veterinarians licensed in this state. Thus, these provisions are not unique to local government. Nor does the activity to keep records constitute a peculiarly governmental function since the activity is imposed on *all* veterinarians.

Therefore, the Commission finds that Business and Professions Code section 4855 and section 2032.3 of the Veterinary Medical Board's regulations do not constitute a "program" and, thus, are not subject to article XIII B, section 6 of the California Constitution.

Accordingly, the remainder of this analysis addresses only those provisions enacted as part of Senate Bill 1785 (Stray Animals).

Issue 2: Does the test claim legislation impose a new program or higher level of service on local agencies within the meaning of article XIII B, section 6 of the California Constitution?

To determine if the "program" is new or imposes a higher level of service, a comparison must be made between the test claim legislation and the legal requirements in effect immediately before the enactment of the test claim legislation.

Holding Period for Dogs and Cats

Food and Agriculture Code sections 31108 and 31752 describe the required holding period for impounded dogs and cats. Those sections provide that an impounded dog or cat shall be held for six business days, not including the day of impoundment. The six-day holding period can be reduced to four business days if the local agency complies with one of the following provisions:

- ⊖ If the pound or shelter has made the dog or cat available for owner redemption on one weekday evening until at least 7:00 p.m., or one weekend day, the holding period shall be four business days, not including the day of impoundment.
- ⊖ If the pound or shelter has fewer than three full-time employees or is not open during all regular weekday business hours, and if it has established a procedure to enable owners to reclaim their dog or cat by appointment at a mutually agreeable time when the pound or shelter would otherwise be closed, the holding period shall be four business days, not including the day of impoundment.

These test claim statutes further require, that prior to euthanizing an impounded dog or cat for any reason other than irremediable suffering, the impounded dog or cat shall be released to a nonprofit animal rescue or adoption organization, if requested by the organization, before the scheduled euthanization of the impounded animal. In addition to any spay or neuter deposit, the pound or shelter, at its discretion, may assess a fee, not to exceed the standard adoption fee, for the animals released.

The holding period and adoption requirements described above do not apply to animals that are irremediably suffering from a serious illness or severe injury and newborn animals that need maternal care and have been impounded without their mothers. Such animals may be euthanized without being held for owner redemption or adoption.²¹

Before the test claim legislation was enacted, public shelters were required to hold impounded dogs and cats for 72 hours from the time of capture. The 72-hour holding period did not apply to cats that were severely injured, seriously ill, or to newborn cats unable to feed themselves.²²

In addition, there was no requirement under prior law to release impounded animals to nonprofit animal rescue or adoption organizations, upon request of the organization, prior to euthanizing the animal.

Accordingly, the Commission finds that Food and Agriculture Code sections 31108 and 31752 impose a new program or higher level of service by:

- Requiring local agencies to provide care and maintenance during the increased holding period for impounded dogs and cats. The increased holding period shall be measured by calculating the difference between three days from the day of capture, and six business days from the day after impoundment, or four business days from the day after impoundment requiring local agencies to either:
 - (1) Make the animal available for owner redemption on one weekday evening until at least 7:00 p.m., or one weekend day; or
 - (2) For those local agencies with fewer than three full-time employees or that are not open during all regular weekday business hours, establish a procedure to enable owners to reclaim their animals by appointment at a mutually agreeable time when the agency would otherwise be closed;²³ and by
- Requiring the release of the animal to a nonprofit animal rescue or adoption organization upon request by the organization prior to euthanasia.

²¹ Food and Agriculture Code section 17006.

²² Food and Agriculture Code sections 31108 (as added by Statutes of 1967, Chapter 15) and 31752 (as added by Statutes of 1980, Chapter 1060)

²³ The claimants and several commentators contend that as a result of the increased holding period, the cost of veterinary care has increased. The Commission can consider the argument, that veterinary care during the increased holding period is reimbursable, at the parameters and guidelines phase.

Holding Period for Other Animals

Food and Agriculture Code section 31753 imposes the same holding period and adoption requirements for impounded rabbits, guinea pigs, hamsters, pot-bellied pigs, birds, lizards, snakes, turtles, or tortoises legally allowed as personal property, as is required for dogs and cats. Thus, section 31753 provides that the holding period for these other animals is six business days, not including the day of impoundment. The six-day holding period can be reduced to four business days if the local agency complies with one of the following provisions:

- ⚡ If the pound or shelter has made the other animals available for owner redemption on one weekday evening until at least 7:00 p.m., or one weekend day, the holding period shall be four business days, not including the day of impoundment.
- ⚡ If the pound or shelter has fewer than three full-time employees or is not open during all regular weekday business hours, and if it has established a procedure to enable owners to reclaim their animals by appointment at a mutually agreeable time when the pound or shelter would otherwise be closed, the holding period shall be four business days, not including the day of impoundment.

Ms. Bryant contends that Food and Agriculture Code section 31753 does not constitute a new program or higher level of service. Ms. Bryant contends that before the enactment of the test claim legislation, Penal Code sections 597f and 597.1 required peace officers, humane society officers, and animal control officers to take possession of any abandoned or neglected animal and care for the animal until the owner redeems the animal. Under these provisions, the animal control officer is required to perform a “due search” for the owner prior to euthanizing the animal. Thus, she argues that a holding period is legally implied from the requirement that owners be given a chance to redeem their animals.

Ms. Bryant further argues that the holding period established under prior law is equivalent to a “reasonable” period that allows the owner to redeem the animal. In this respect, Ms. Bryant argues that a five-day holding period has been deemed reasonable and, thus, required under prior law. In support of her position, Ms. Bryant cites a federal regulation, governing the sale of shelter animals to research labs, that deems five days the minimum necessary to provide owners a reasonable chance to reclaim their pets. She also cites California’s vicious dog law, Food and Agriculture Code section 3 1621, which provides that an owner must receive five days notice to contest the “vicious dog” designation in order to reclaim the dog. Finally, Ms. Bryant states that the Humane Society of the United States promotes five days as the minimum reasonable holding period. Accordingly, Ms. Bryant contends that the test claim requirement to hold other animals for four days constitutes a lower level of service.

Government Code section 17565 states that “if a local agency or school district, at its option, has been incurring costs which are subsequently mandated by the state, the state shall reimburse the local agency or school district for those costs incurred after the operative date of the mandate, ” The Commission finds that Government Code section 17565 applies here.

Before the enactment of the test claim legislation, Penal Code sections 597f and 597.1 required animal control officers to take possession and provide care and treatment to any stray or abandoned animal until the animal was deemed to be in suitable condition to be returned to the

owner. If the owner could not be found after a due search, the animal control officer could have the animal euthanized or placed in a suitable home. Thus, the Commission agrees that Penal Code sections 597f and 597.1 apply to the animals specified in the test claim statute and that some holding period is implied in these sections.

However, there was *no prior state or federal law* mandating local agencies to hold these specified animals for any time period. Rather, the appropriate time period was left up to the discretion of the local agency. With the enactment of Food and Agriculture Code section 31753, the state is now requiring local agencies, for the first time, to hold these animals for four days. Therefore, the Commission finds that the four or six day holding period is new.

Accordingly, the Commission finds that Food and Agriculture Code sections 31753 imposes a new program or higher level of service by:

- Requiring local agencies to provide care and maintenance during the increased holding period for impounded rabbits, guinea pigs, hamsters, pot-bellied pigs, birds, lizards, snakes, turtles, or tortoises legally allowed as personal property. The increased holding period shall be measured by calculating the difference between three days from the day of capture, and six business days from the day after impoundment, or four business days from the day after impoundment requiring local agencies to either:
 - (1) Make the animal available for owner redemption on one weekday evening until at least 7:00 p.m., or one weekend day; or
 - (2) For those local agencies with fewer than three full-time employees or that are not open during all regular weekday business hours, establish a procedure to enable owners to reclaim their animals by appointment at a mutually agreeable time when the agency would otherwise be closed; and by
- Requiring the release of the animal to a nonprofit animal rescue or adoption organization upon request by the organization prior to euthanasia.

Feral Cats

The test claim legislation added section 3 1752.5 to the Food and Agriculture Code to address feral cats. Feral cats are defined as cats without owner identification whose usual and consistent temperament is extreme fear and resistance to contact with people. A feral cat is totally unsocialized to people.

Food and Agriculture Code section 31752.5, subdivision (c), states the following:

Notwithstanding Section 31752 (establishing the holding period for stray cats), if any apparently feral cat has not been reclaimed by its owner or caretaker within the first three days of the required holding period, shelter personnel qualified to verify the temperament of the animal *shall verify whether it is feral or tame by using a standardized protocol*. If the cat is determined to be docile or a frightened or difficult tame cat, the cat shall be held for the entire required holding period specified in Section 31752. If the cat is determined to be truly feral, the cat *may* be euthanized or relinquished to a nonprofit . . . animal adoption organization that agrees to the spaying or neutering of the cat

if it has not already been spayed or neutered. In addition to any required spay or neuter deposit, the pound or shelter, at its discretion, may assess a fee, not to exceed the standard adoption fee, for the animal released. (Emphasis added.)

The claimants contend that section 3 1752.5 constitutes a new program or higher level of service by establishing holding periods for feral cats and by requiring local agencies to verify whether a cat is feral or tame by using a “newly developed or obtained” standardized protocol. The claimants state the following:

The mandatory holding periods for feral cats are completely new. There is no prior law on the subject. The ‘standard adoption fee[s]’ for feral cats shall not be exceeded. In addition, local government must now ‘verify whether it is feral or tame by using a standardized protocol’ in order to determine the correct holding period. Therefore, the costs of obtaining or developing such a protocol as well [as] its administration would be reimbursable ‘costs mandated by the state’ as claimed herein.

Regarding holding periods for feral cats, the clock starts to run after (not including) ‘. . . the day of impoundment.’ Under prior law, there were no holding periods for feral cats. Now holding periods are established, mandated, and defined in terms of a number of ‘business days’, considerably longer than the same number of calendar days. Therefore, Chapter 752/98 explicitly increases mandatory holding periods for feral cats and related costs upon local government.

The Commission disagrees with the claimants’ statement that holding periods for feral cats are completely new and that there was no prior law on the subject. Before the enactment of the test claim legislation, Food and Agriculture Code section 31752 required a 72-hour holding period from the time of capture for *all* impounded stray cats, except cats that were severely injured, seriously ill, or newborn cats unable to feed themselves. That section stated the following:

No *stray cat* which has been impounded by a public pound, society for the prevention of cruelty to animals shelter, or humane shelter shall be killed before 72 hours have elapsed from the time of the capture of the stray cat.

This section shall not apply to cats which are severely injured or seriously ill, or to newborn cats unable to feed themselves. (Emphasis added.)

Thus, the 72-hour holding period established under prior law applied to both feral and tame cats.

The Commission finds that the only new requirement imposed by Food and Agriculture Code section 31752.5 is the requirement to verify within the first three days of the holding period whether the cat is feral or tame by using a standardized protocol. If the cat is determined to be tame, the same holding period established by Food and Agriculture Code section 31752, as amended by the test claim legislation and described in the section above, applies; i.e., four or six business days.

Accordingly, the Commission finds that Food and Agriculture Code section 3 1752.5 constitutes a new program or higher level of service by requiring local agencies to verify, within the first three days of the holding period, whether a cat is feral or tame by using a standardized protocol.

Owner Relinquished Animals

The test claim legislation added Food and Agriculture Code section 31754 to address animals relinquished by their owners. That section provides in relevant part the following:

[A]ny animal relinquished by the purported owner that is of a species impounded by pounds or shelters shall be held for two full business days, not including the day of impoundment. The animal shall be available for owner redemption for the first day, not including the day of impoundment, and shall be available for owner redemption and adoption for the second day. After the second required day, the animal may be held longer, killed, or relinquished to a nonprofit . . . animal adoption organization under the same conditions and circumstances provided for stray dogs and cats. . . .

Section 3 1754 became operative on July 1, 1999, and sunsets on July 1, 2001.

On July 1, 2001, Food and Agriculture Code section 3 1754 will provide, with the exception stated below, that any animal relinquished by the purported owner that is of a species impounded by pounds or shelters shall be held for the same holding periods, and with the same requirements of care, applicable to stray dogs and cats in sections 31108 and 31752 of the Food and Agriculture Code.²⁴ However, the period for owner redemption shall be one day, not including the day of impoundment, and the period for owner redemption or adoption shall be the remainder of the holding period.

The holding period described above does not apply to relinquished animals that are irremediably suffering from a serious illness or severe injury, or newborn animals that need maternal care and have been impounded without their mothers.

Ms. Bryant contends that neither prior law, nor Food and Agriculture Code section 31754, require local agencies to take in owner-relinquished animals. Thus, she argues that taking in such animals is within the discretion of the local agency and that the holding periods established by section 31754 only apply if the local agency chooses to accept owner-relinquished animals.

The claimants contend that section 31754 imposes mandatory duties on the local agency to accept owner-relinquished pets since, in reality, owners relinquish their animals on the streets

²⁴ The Commission notes that section 31754 requires the same holding periods for owner-relinquished animals as the holding period for stray dogs and cats. The statute correctly refers to section 31108 for the holding period for stray dogs. But, the statute references section 31755, which is not the statute relating to stray cats. The statute relating to stray cats is section 31752. Accordingly, the Commission finds that there is a typographical error in section 31754 and that the Legislature intended to refer to section 31752 instead of 31755.

if the agency will not accept the animal. At that point, the animal will be deemed a stray or an abandoned animal and, thus, require the agency to take possession of the animal.²⁵

The Commission agrees with Ms. Bryant. At the time the test claim legislation was enacted, local agencies were not required to accept owner-relinquished animals. They were simply required to take possession of stray or abandoned animals.²⁶

The test claim legislation did not change existing law. Rather, based on the plain language of the test claim legislation and existing law, taking possession of owner-relinquished animals, and caring and maintaining the owner-relinquished animal during the required holding period, is within the discretion of the local agency.

Accordingly, the Commission finds that Food and Agriculture Code section 31754 does not constitute a new program or higher level of service since there are no state mandated duties imposed on local agencies.

Posting Lost and Found Lists

Food and Agriculture Code section 32001 provides the following:

All public pounds, shelters operated by societies for the prevention of cruelty to animals, and humane shelters, that contract to perform public animal control services, shall provide the owners of lost animals and those who find lost animals with all of the following:

(a) Ability to list the animals they have lost or found on ‘Lost and Found’ lists maintained by the pound or shelter.

(b) Referrals to animals listed that may be the animals the owner or finders have lost or found.

(c) The telephone numbers and addresses of other pounds and shelters in the same vicinity.

(d) Advice as to means of publishing and disseminating information regarding lost animals.

(e) The telephone numbers and addresses of volunteer groups that may be of assistance in locating lost animals.

The duties imposed by this section are mandatory duties for public entities for all purposes of the Government Code and for all private entities with which a public entity has contracted to perform those duties. (Emphasis added.)

Before the enactment of the test claim legislation, the duty imposed by section 32001 to post lost and found lists was *not* mandatory. The last two sentences of former section 32001 stated the following:

²⁵ Other commentators share the claimants’ view (e.g., Virginia Handley, Jeffrey Zinder, and Richard Ward.)

²⁶ Food and Agriculture Code section 31105; Penal Code section 597.1.

Notwithstanding Section 9, a violation of this section is not a misdemeanor. Furthermore, the duty imposed by this section is *not a mandatory duty* for purposes of Division 3.6 (commencing with Section 810) of Title 1 of the Government Code [entitled “ Claims and Actions Against Public Entities and Public Employees”], and *no cause of action for damages is created’by this section against a public entity or employee or against any other person.* (Emphasis added.)

The above sentences were repealed with the enactment of the test claim legislation. Thus, the test claim legislation created a legal duty for local agencies to post the lost and found lists required by section 32001, and at the same time, established a cause of action for an agency’s failure to comply.

Accordingly, the Commission finds that Food and Agriculture Code section 32001 imposes a new program or higher level of service by requiring local agencies to provide the owners of lost animals and those who find lost animals with all of the following:

- ⌘ Ability to list the animals they have lost or found on “Lost and Found” lists maintained by the pound or shelter.
- ⌘ Referrals to animals listed that may be the animals the owner or finders have lost or found.
- ⌘ The telephone numbers and addresses of other pounds and shelters in the same vicinity.
- ⌘ Advice as to means of publishing and disseminating information regarding lost animals.
- ⌘ The telephone numbers and addresses of volunteer groups that may be of assistance in locating lost animals.

Records

The test claim legislation amended Penal Code section 597.1 and added section 32003 to the Food and Agriculture Code to address the maintenance of records.

Penal Code section 597.1, subdivision (d), provides that “[a]n animal control agency that takes possession of an animal pursuant to subdivision (c) [i.e., injured cats and dogs found without their owners and conveyed to a veterinarian to determine if the animal should be euthanized or treated] shall keep records of the whereabouts of the animal from the time of possession to the end of the animal’s impoundment, and those records shall be available for inspection by the public upon request for three years after the date the animal’s impoundment ended. ”

Food and Agriculture Code section 32003 requires the maintenance of records on each animal taken up, medically treated, or impounded. That section states the following:

All public pounds and private shelters shall keep accurate records on each animal taken up, medically treated, or impounded. The records shall include all of the following information and any other information required by the California Veterinary Medical Board:

- (a) The date the animal was taken up, medically treated, euthanized, or impounded.
- (b) The circumstances under which the animal is taken up, medically treated, euthanized, or impounded.
- (c) The names of the personnel who took up, medically treated, euthanized, or impounded the animal.
- (d) A description of any medical treatment provided to the animal and the name of the veterinarian of record.
- (e) The final disposition of the animal, including the name of the person who euthanized the animal or the name and address of the adopting party. These records shall be maintained for three years after the date the animal's impoundment ends.

The claimant contends that these sections impose new and increased duties. Ms. Bryant, on the other hand, contends that no new records are required. She states that the requirement to keep records was previously required by the Public Records Act and by other areas of California law. Thus, Ms. Bryant contends that Penal Code section 597.1, subdivision (d), and Food and Agriculture Code section 32003 do not impose a new program or higher level of service.

For the reasons described below, the Commission finds that Food and Agriculture Code section 32003 imposes a partial new program or higher level of service.

Before the enactment of the test claim legislation, Penal Code section 597.1, subdivision (d), and Penal Code section 597f, subdivision (c), required animal control agencies to keep records for public inspection indicating the whereabouts of an injured dog or cat conveyed to a veterinarian for a 72-hour period from the time of possession.

In addition, pursuant to the Business and Professions Code and regulations enacted by the California Veterinary Medical Board in 1979, existing law requires all veterinarians to keep a written record of all animals receiving veterinary services. The record shall contain the following information, if available: name, address and phone number of the owner; name and identity of the animal; age, sex and breed of the animal; dates of custody (with the veterinarian); short history of the animal's condition; diagnosis or condition at the beginning of custody; medication and treatment provided; progress and disposition of the case; and surgery log. Such records shall be maintained for a minimum of three years after the last visit.²⁷

The Commission agrees that the test claim legislation imposes some of the same record-keeping responsibilities as existing law. For example, the Commission agrees that the requirements imposed by Penal Code section 597.1, subdivision (d), to keep records for three years on the whereabouts of the animal are not new. That section applies to injured cats and dogs that are conveyed to a veterinarian to determine whether the animal should be euthanized

²⁷ Business and Professions Code section 4855; California Code of Regulations, title 16, division 20, article 4, section 2032.3.

or treated. Although the test claim legislation increased the retention of the records from 72 hours to three years, existing regulations issued by the Veterinary Medical Board already require the maintenance of records describing the dates of custody, progress and disposition of the case for three years. Thus, the Commission finds that Penal Code section 597.1, subdivision (d), does not constitute a new program or higher level of service.

Similarly, the requirement imposed by Food and Agriculture Code section 32003 to maintain records for three years on animals receiving medical treatment by veterinarians is not new since the same requirement was previously imposed by the regulations issued by the Veterinary Medical Board.

However, the requirement imposed by Food and Agriculture Code section 32003 on local agencies to maintain records describing the “taking up” or “impoundment” of an animal is broader than the record keeping requirements imposed on veterinarians in prior law. Moreover, the requirement for local agencies to keep records regarding the euthanasia of an animal was not a requirement imposed in prior law. In this respect, the Commission disagrees with the arguments raised by Ms. Bryant and other commentators that euthanasia is a veterinary procedure and, thus, information regarding the euthanasia of an animal was required to be kept in the veterinarian’s records.²⁸ The Commission finds that euthanasia is not a veterinary procedure since employees of animal control shelters who are *not* veterinarians or registered veterinary technicians are legally allowed to perform the procedure after eight hours of training. The training covers the following topics: history and reasons for euthanasia; humane animal restraint techniques; sodium pentobarbital injection methods and procedures; verification of death; safety training and stress management for personnel; and record keeping and regulation compliance for sodium pentobarbital.²⁹

Accordingly, the Commission finds that Food and Agriculture Code section 32003 imposes new requirements on local agencies to maintain records for three years after the date the animal’s impoundment ends on animals that are *not medically treated* by a veterinarian, but are either taken up, euthanized after the end of the holding period, or impounded. Such records shall include the following:

- ⌘ The date the animal was taken up, euthanized, or impounded;
- ⌘ The circumstances under which the animal is taken up, euthanized, or impounded;
- ⌘ The names of the personnel who took up, euthanized, or impounded the animal; and
- ⌘ The final disposition of the animal, including the name of the person who euthanized the animal or the name and address of the adopting party.

The Commission agrees that making these records available to the public complies with the Public Records Act, as argued by Ms. Bryant. “Public records” are defined as any writing containing information relating to the conduct of the public’s business that is prepared, owned, used or retained by any state or local agency, regardless of the physical form or characteristic

²⁸ Comments filed by Ms. Bryant and comments filed by Lois Newman of The Cat and Dog Rescue Association.

²⁹ See section 2039 of the Veterinary Medical Board’s regulations.

of the writing. Local agencies are required under the Public Records Act to keep public records open for inspection at all times during the office hours of the local agency.³⁰ However, local agencies would not be compelled to make information on animals that do not receive veterinary services available to the public if the state had not created the requirement to maintain such records.

Accordingly, the Commission finds that the requirement to maintain records for three years on animals that are not medically treated by a veterinarian, but are either taken up, euthanized after the end of the holding period, or impounded constitutes a new program or higher level of service.

Veterinary Care

The claimants contend that the test claim legislation imposes a new program or higher level of service by requiring local agencies to provide veterinary care, which was not required under prior law. The claimants cite Civil Code section 1834.4, Penal Code section 599d, and Food and Agriculture Code section 17005, which expresses the state's policy that no adoptable animal should be euthanized and no treatable animal should be euthanized. All of these sections state the following:

(a) It is the policy of the state that no adoptable animal should be euthanized if it can be adopted into a suitable home. Adoptable animals include only those animals eight weeks of age or older that, at or subsequent to the time the animal is impounded or otherwise taken into possession, have manifested no sign of a behavioral or temperamental defect that could pose a health or safety risk or otherwise ~~make~~ the animal unsuitable for placement as a pet, and have manifested no sign of disease, injury, or congenital or hereditary condition that adversely affect the animal's health in the future.

(b) It is the policy of the state that no treatable animal should be euthanized. A *treatable animal shall include any animal that is not adoptable but that could become adoptable with reasonable efforts*. This subdivision, by itself, shall not be the basis of liability for damages regarding euthanasia. (Emphasis added.)

The claimants contend that the italicized language quoted above "requires" local agencies to provide reasonable veterinary treatment services in order to make them adoptable.

The claimants also cite Civil Code section 1834, which was amended by the test claim legislation. That section provides that:

A depository of living animals *shall* provide the animals with *necessary and prompt veterinary care*, nutrition, and shelter, and treat them kindly. Any depository that fails to perform these duties may be liable for civil damages as provided by law. (Emphasis added.)

³⁰ Government Code section 6253.

Similarly, Civil Code section 1846 was amended by the test claim legislation to provide in part that “[a] gratuitous depository of a living animal *shall provide the animal with necessary and prompt veterinary care.* ” (Emphasis added.)

Ms. Bryant contends that veterinary care does not constitute a new program or higher level of service. She states the following:

It is important to note that veterinary care is already mandated under Penal Code Sections 597f and 597.1, which require humane officers and animal control officers to ‘take possession of [a] stray or abandoned animal and . . . **provide care and treatment** for the animal until the animal is deemed to be in suitable condition to be returned to the owner. ’ (Penal Code Sec. 597.1(a)) Subsection (b) permits injured or sick animals other than cats or dogs to be killed or impounded and treated. Cats and dogs must be seen by a veterinarian before a determination is made to kill.

Accordingly, the addition of the words ‘prompt and necessary veterinary care’ to Civil Code Section 1834 does not add to shelters’ veterinary care responsibilities because of the pre-existing care provisions of Penal Code Section 597f and 597.1. (Emphasis in original.)

First, the Commission finds that the policy statements found in Civil Code section 1834.4, Penal Code section 599d, and Food and Agriculture Code section 17005 do not impose any requirements on local agencies. They simply describe the state’s policy regarding euthanasia. The Commission acknowledges that the word “shall” is used in the sentence, which provides that “a treatable animal *shall* include any animal that is not adoptable but that could become adoptable with reasonable efforts. ” However, that, sentence is merely defining “treatable animals.” It is not imposing the requirement to provide veterinary care for animals.

The issue of whether the requirement imposed by Civil Code sections 1834 and 1846 to provide necessary and prompt veterinary care constitutes a new program or higher level of service is more complicated, however.

Before the enactment of the test claim legislation, Penal Code section 597.1 contained a provision requiring local agencies to provide “care and treatment” for the animal until the animal is in a suitable condition to be returned to the owner. The Commission agrees that care and treatment can include necessary veterinary treatment. But, the provisions of Penal Code section 597.1 became operative *only if* the governing body of the local agency determined that it would operate under section 597.1. Penal Code section 597.1 stated in relevant part the following:

(a) . . . Any peace officer, humane society officer, or animal control officer shall take possession of the stray or abandoned animal and shall provide *care and treatment* for the animal until the animal is deemed to be in suitable condition to be returned to the owner. . . .

(1) This section *shall be operative* in a public agency or a humane society under the jurisdiction of the public agency, or both, *only if* the governing body of that public agency, by ordinance or resolution, determines that this section shall be

operative in the public agency or the humane society and that Section 597f shall not be operative. (Emphasis added.)³¹

Thus, the Commission finds that local agencies were not required to comply with the provisions of Penal Code section 597.1 before the enactment of the test claim legislation.

Before the test claim legislation was enacted, existing law, through Penal Code section 597f, also required local agencies to “care” for abandoned animals until the animal is redeemed by the owner. Penal Code section 597f further required local agencies to convey all injured dogs and cats to a veterinarian for treatment or euthanization. Local agencies had the option of providing “suitable care” for abandoned animals, other than cats and dogs, until the animal is deemed to be in a suitable condition to be delivered to the owner. Penal Code section 597f states in relevant part the following:

(a) And it shall be the duty of any peace officer, officer of the humane society, or officer of a pound or animal regulation department of a public agency, to take possession of the animal so abandoned or neglected and **care** for the animal until it is redeemed by the owner or claimant, and the cost of caring for the animal shall be a lien on the animal until the charges are paid. Every sick, disabled, infirm, or crippled animal, except a dog or cat, which shall be abandoned in any city, city and county, or judicial district, may, if after due search no owner can be found therefore, be killed by the officer; and it shall be the duty of all peace officers, an officer of such society, or officer of a pound or animal regulation department of a public agency to cause the animal to be killed on information of such abandonment. The officer may likewise take charge of any animal, including a dog or cat, that by reason of lameness, sickness, feebleness, or neglect, is unfit for the labor it is performing, or that in any other manner is being cruelly treated; and if the animal is not then in the custody of its owner, the officer shall give notice thereof to the owner, if known, *and may provide suitable care for the animal until it is deemed to be in a suitable condition to be delivered to the owner*, and any necessary expenses which may be incurred for taking care of and keeping the animal shall be a lien thereon, to be paid before the animal can be lawfully recovered.

(b) It *shall* be the duty of all officers of pounds or humane societies, and animal regulation departments of public agencies to convey, and for police and sheriff departments, to cause to be *conveyed all injured cats and dogs found without their owners in a public place directly to a veterinarian* known by the officer or agency to be a veterinarian that ordinarily treats dogs and cats for a determination of whether the animal shall be immediately and humanely destroyed or shall be hospitalized under proper care and given emergency treatment. . . . (Emphasis added.)

³¹ The Commission notes that the test claim legislation deleted subdivision (1) from Penal Code section 597.1 to codify the court’s decision *in Carrera v. Bertaini* (1976) 63 Cal.App.3d 721. There, the court held that making optional the provisions on post-seizure hearings in Penal Code section 597.1 was unconstitutional. Thus, with the deletion of subdivision (1), post-seizure hearings are now required.

Based on the language of section 597f, the Commission finds that local agencies had a pre-existing duty to obtain necessary veterinary care for injured cats and dogs. Thus, the Commission finds that providing “necessary and prompt veterinary care” for injured cats and dogs given emergency treatment, as required by Civil Code sections 1834 and 1846, does *not* constitute a new program or higher level of service.

However, the Commission finds that the requirement to provide “prompt and necessary veterinary care” for abandoned animals, other than injured cats and dogs given emergency treatment, is new. The Commission acknowledges that Penal Code section 597f requires local agencies to provide “care” to other animals. The word “care” is not defined by the Legislature. Nevertheless, for the reasons stated below, the Commission finds that the word “care” in section 597f does *not* include veterinary treatment.

The courts have determined that if a statute on a particular subject contains a particular word or provision, and another statute concerning the same or related subject omits that word or provision, then a different intention is indicated.³²

Penal Code section 597f requires local agencies to “care” for the animal until it is redeemed by the owner. That section was originally added by the Legislature in 1905, and was last amended in 1989. In 1991, the Legislature added Penal Code section 597.1. That section provides that local agencies shall provide “care *and treatment*” for the animal until it is redeemed by the owner. As indicated above, “care and treatment” can include veterinary care and treatment. However, since the Legislature did *not* use the word “treatment” in Penal Code section 597f like it did in Penal Code section 597.1, the Commission finds that the Legislature did not intend Penal Code section 597f to require local agencies to treat or provide “prompt and necessary veterinary care” to these other abandoned animals.

Accordingly, the Commission finds that providing prompt and necessary veterinary care for abandoned animals, other than injured cats and dogs given emergency treatment, as required by Civil Code sections 1834 and 1846, is new and, thus, imposes a new program or higher level of service.³³

³² Volume 58, Cal. Jur., sections 127 and 172; *Kaiser Steel Corp. v. County of Solano* (1979) 90 Cal.App.3d 662.

³³ Interested party, County of San Diego, contends that the test claim legislation constitutes a new program or higher level of service by “providing veterinary care for stray or abandoned animals found and delivered by any person (other than a peace officer, humane society officer, or animal control officer) to a public animal shelter, that are ultimately euthanized.” The County of San Diego contends that Penal Code sections 597f and 597.1, when read in context, only apply when animals are seized by specified officers in the field and do not apply when other individuals find such animals.

The Commission disagrees with this interpretation, Penal Code section 597f, subdivision (a), states that “it shall be the duty of any peace officer, officer of the humane society, or officer of a pound or animal regulation department of a public agency, to take possession of the animal so abandoned or neglected and care for the animal until it is redeemed by the owner. . . .” While section 597f does apply to seized animals, it does not limit the requirement to care for the animal to only those animals that are seized by an officer. The duty to care for the animal is imposed on the “animal regulation department of a public agency” once the animal comes into their possession.

Construction of New Buildings

Finally, the claimants' are requesting reimbursement for the construction of cat housing, isolation/treatment facilities, and additional kennel buildings in order to comply with the test claim legislation. The Department of Finance and other commentators contend that this request is suspect.

The Commission notes that the test claim legislation does *not* expressly require or mandate local agencies to construct new buildings. However, the Commission's regulations allow reimbursement for the most reasonable methods of complying with the activities determined by the Commission to constitute reimbursable state mandated activities under article XIII B, section 6 of the California Constitution.³⁴ Therefore, in order for the claimants to be entitled to reimbursement for construction of new buildings, the claimants will have to show at the parameters and guidelines phase that construction of new buildings occurred as a direct result of the mandated activities and was the most reasonable method of complying with the mandated activities.

Issue 3: Does the test claim legislation impose "costs mandated by the state" within the meaning of Government Code sections 17514 and 17556?

As indicated above, the Commission finds that the test claim legislation constitutes a new program or higher level of service for the following activities:

- ⌘ Providing care and maintenance for impounded dogs and cats for the increased holding period established by the test claim legislation (measured by calculating the difference between three days from the day of capture, and four business days from the day after impoundment, as specified in the third bullet below, or six business days from the day after impoundment);
- ⌘ Providing care and maintenance for impounded rabbits, guinea pigs, hamsters, pot-bellied pigs, birds, lizards, snakes, turtles, or tortoises legally allowed as personal property during the increased holding period established by the test claim legislation (measured by calculating the difference between three days from the day of capture, and four business days from the day after impoundment, as specified in the third bullet below, or six business days from the day after impoundment);
- ⌘ For impounded dogs, cats, and other specified animals that are held for four business days after the day of impoundment, either:
 - (a) Making the animal available for owner redemption on one weekday evening until at least 7:00 p.m., or one weekend day; or
 - (b) For those local agencies with fewer than three full-time employees or that are not open during all regular weekday business hours, establishing a procedure to enable owners to reclaim their animals by appointment at a mutually agreeable time when the agency would otherwise be closed;

³⁴ Title 2, California Code of Regulations, section 1183.1, subdivision (a)(4).

- Requiring the release of the impounded animal to a nonprofit animal rescue or adoption organization upon request prior to the euthanization of the animal;
- Verifying whether a cat is feral or tame by using a standardized protocol;
- Posting lost and found lists;
- Maintaining records on animals that are not medically treated by a veterinarian, but are either taken up, euthanized after the holding period, or impounded; and
- Providing prompt and necessary veterinary care for abandoned animals, other than injured cats and dogs that receive emergency treatment.

The Commission continues its inquiry to determine if these activities impose “costs mandated by the state.”

Increased Holding Periods/ Release to Nonprofit Rescue or Adoption Organization/ Veterinary Care for Animals Other Than Cats and Dogs

The claimants contend that the longer holding periods established by the test claim legislation for impounded and owner-relinquished animals, and the veterinary care result in increased costs mandated by the state. The claimant acknowledges that, in addition to a spay or neuter deposit, the test claim legislation authorizes the local agency to assess a fee, not to exceed the standard adoption fee, for animals released to an adoption organization. However, the claimants argue that the fee authority is not sufficient to cover the “substantial new costs. ”

Both the Department of Finance and Ms. Bryant, citing Government Code section 17556, subdivisions (d) and (e), contend that the test claim legislation does not impose “costs mandated by the state” since the legislation authorizes local agencies to assess fees sufficient to pay for the mandated program and that the legislation has no net negative financial impact on local government. Ms. Bryant states the test claim legislation includes a number of cost saving measures such as (a) turning over shelter animals to qualified nonprofit animal rescue and adoption groups, which saves the costs of killing and carcass disposal and brings in adoption revenues paid by the nonprofit groups; (b) waiting before automatically killing owner-relinquished pets so that they can be reunited with their real owner or adopted by a new owner or nonprofit group - - thereby bringing in revenues and saving the expense of killing and disposing of the bodies; (c) providing for lost/found listings and other information to aid owners of lost pets, which obviates the need for many animals to enter the shelters at all; (d) enabling shelters to collect freely offered rewards for the return of lost pets; and (e) creating more legal avenues for dealing with anti-cruelty statute enforcement. The Department of Finance and Ms. Bryant further contend that the costs of impoundment must be passed on to the owners under the existing authority of Penal Code sections 597f and 597.1 and Government Code section 25802.

Government Code section 17514 defines “costs mandated by the state” as *any increased cost* a local agency is required to incur as a result of a statute that mandates a new program or higher level of service.

Government Code section 17556 lists seven exceptions to reimbursement, two of which are pertinent here. That section states that the Commission shall not find “costs mandated by the state” if the Commission finds that:

- ⚡ The local agency has the authority to levy service charges, fees or assessments sufficient to pay for the mandated program or increased level of service (Gov. Code, § 17556, subd. (d)); or
- ⚡ The statute provides for offsetting savings to local agencies which result in no net costs to the local agencies, or includes additional revenue that was specifically intended to fund the costs of the state mandate in an amount sufficient to fund the cost of the state mandate (Gov. Code, § 17556, subd. (e)).

Government Code section 17556, subdivisions (d) and (e), are analyzed below.

Fee Authority – Government Code Section 17556, Subdivision (d). Government Code section 17556, subdivision (d), provides that there shall be no costs mandated by the state if the local agency has the authority to levy service charges, fees, or assessments sufficient to pay for the mandated program.

In the present case, local agencies do have the authority, under certain circumstances, to assess fees upon the owner of an impounded animal for the care and maintenance of the animal. For example, pursuant to Civil Code section 2080, any public agency that takes possession of an animal has the authority to charge the owner, *if known*, a reasonable charge for saving and taking care of the animal.

Similarly, Penal Code sections 597f and 597.1 also allow local agencies to pass on the costs of caring for abandoned or seized animals to their owners by providing that “the cost of caring for the animal shall be a lien on the animal until the charges are paid. ”

Moreover, Penal Code section 597f allows the cost of hospital and emergency veterinary services provided for impounded animals to be passed on to the owner, if **known**.³⁵

The fee authority granted under the foregoing authorities applies only if the owner is known. Thus, local agencies have the authority to assess a fee to care and provide treatment for animals relinquished by their owners pursuant to Food and Agriculture Code section 31754. Local agencies also have the authority to assess a fee for the care and treatment of impounded animals that are ultimately redeemed by their owners. Under such circumstances, the Commission finds that the fee authority is sufficient to cover the increased costs to care,

³⁵ Penal Code section 597f also allows the cost of such veterinary services to be *partially* paid pursuant to Food and Agriculture Code section 30652, which provides the following: “All fees for the issuance of dog license tags and all fines collected pursuant to this division shall be paid into the county, city, or city and county treasury, as the case may be, and shall be used: (a) First, to pay fees for the issuance of dog license tags; (b) Second, to pay fees, salaries, costs, expenses, or any or all of them for the enforcement of this division and all ordinances which are made pursuant to this division; (c) Third, to pay damages to owners of livestock which are killed by dogs; (d) Fourth, to pay costs of *any hospitalization or emergency care of animals pursuant to Section 597f of the Penal Code*. (Emphasis added.) The monies collected for licenses and fines can be identified as an offset in the Parameters and Guidelines.

maintain, and provide necessary veterinary treatment for the animal during the required holding period since the “cost of caring” for the animal can be passed on to the owner.

Accordingly, pursuant to Government Code section 17556, subdivision (d), the Commission finds that there are no costs mandated by the state for the care, maintenance and necessary veterinary treatment of animals relinquished by their owners or redeemed by their owners during the required holding period.

The Commission further finds that there are no costs mandated by the state under Government Code section 17556, subdivision (d), for the care, maintenance, and treatment of impounded animals that are ultimately adopted by a new owner; for the care, maintenance, and treatment of impounded animals that are requested by a nonprofit animal rescue or adoption organization; or for the administrative activities associated with releasing the animal to such organizations.

The test claim legislation gives local agencies the authority to assess a standard adoption fee, in addition to any spay or neuter deposit, upon nonprofit animal rescue or adoption organizations that request the impounded animal prior to the scheduled euthanization of the animal.³⁶

The claimant contends that the “standard adoption fee” is not sufficient to cover the costs for animals adopted or released to nonprofit animal rescue or adoption organizations. However, based on the evidence presented to date, the Commission finds that local agencies are not prohibited by statute from including in their “standard adoption fee” the costs associated with caring for and treating impounded animals that are ultimately adopted by a new owner or released to nonprofit animal rescue or adoption organizations, and the associated administrative costs. Rather, local agencies are only prohibited from charging nonprofit animal rescue or adoption organizations a higher fee than the amount charged to individuals seeking to adopt an animal.

However, the fees recovered by local agencies under the foregoing authorities do not reimburse local agencies for the care and maintenance of stray or abandoned animals, or the veterinary treatment of stray or abandoned animals (other than cats and dogs) during the holding period required by the test claim legislation when:

- ⌘ The owner is unknown;
- ⌘ The animal is not adopted or redeemed; or
- ⌘ The animal is not released to a nonprofit animal rescue or adoption organization.

Thus, the fee authority is not sufficient to cover the increased costs for care, maintenance, and treatment during the required holding period for those animals that are ultimately euthanized. Under such circumstances, the Commission finds that that Government Code section 17556, subdivision (d), does not apply to deny this claim. Rather, local agencies may incur increased costs mandated by the state to care for these animals during the required holding period.

³⁶ See Food and Agriculture Code sections 31108 (dogs), 317.52 (cats), 31752.5 (feral cats), 31753 (other animals), and 3 1754 (owner-relinquished animals).

Offsetting Savings or Additional Revenue – Government Code Section 17556,

Subdivision (e). Government Code section 17556, subdivision (e), states that the Commission shall not find costs mandated by the state if:

- ⚭ The *test claim statute* provides for offsetting savings to local agencies which result in no net costs to the local agencies, or
- ⚭ The *test claim statute* includes additional revenue that was specifically intended to fund the costs of the state mandate in an amount sufficient to fund the cost of the state mandate.

As indicated above, the Department of Finance and Ms. Bryant contend that Government Code section 17556, subdivision (e), applies to this claim since the legislation has no net negative financial impact on local government and includes a number of cost saving measures,

Additionally, the San Francisco SPCA contends that the test claim legislation is cost-effective and can be accomplished on a revenue-neutral or revenue-positive basis without expenditures for new facilities or increased space.

The Commission agrees that one of the purposes of the test claim legislation was to reduce the cost of euthanasia. The Legislature expressly declared in Section 1 of the test claim legislation that the “redemption of owned pets and adoption of lost or stray adoptable animals is preferable to incurring social and economic costs of euthanasia.” To reduce the rate of killing, the Legislature made it easier for owners to redeem their pets by establishing longer holding periods, mandatory record-keeping, and lost and found lists.

In this respect, both the Department of Finance and Ms. Bryant describe a hypothetical situation showing the projected cost savings to a local agency when complying with the test claim legislation. The Commission recognizes that if complying with the test claim legislation really does result in cost savings, then local agencies will not be filing claims for reimbursement with the State Controller’s Office. Government Code section 17514 only authorizes reimbursement by the state for the *increased* costs in complying with the mandate. The Commission notes that the claimants and several other commentators have filed declarations stating that local agencies have incurred increased costs as a result of the test claim legislation,

But, with regard to the legal issue of whether Government Code section 17556, subdivision (e), applies to this test claim, the only provision *in the test claim legislation* that provides for offsetting savings for the care and maintenance of the animal during the required holding period is the authorization to accept advertised rewards or rewards freely offered by the owner of the animal.³⁷ Rewards are not offered in every case, however. In addition, the rewards do not reimburse local agencies for the care and maintenance of a stray or abandoned animal when the owner cannot be found.

Thus, the Commission finds that there is no evidence that the test claim legislation provides for offsetting savings that result in *no* net costs to local agencies.

³⁷ Civil Code section 1845.

Moreover, the test claim legislation does not include additional revenue specifically intended to fund the costs of the mandate.

Accordingly, the Commission finds that Government Code section 17556, subdivision (e), does not apply to this claim.

Feral Cats, Lost and Found Lists, Maintaining Records

The Commission finds that none of the exceptions to reimbursement in Government Code section 17556 apply to deny this test claim with respect to the activities listed below. In this regard, the Commission finds that local agencies may incur increased costs mandated by the state pursuant to Government Code section 17514:

- ⚡ For impounded dogs, cats, and other specified animals that are held for four business days after the day of impoundment, to either:
 - (1) Make the animal available for owner redemption on one weekday evening until at least 7:00 p.m., or one weekend day; or
 - (2) For those local agencies with fewer than three full-time employees or that are not open during all regular weekday business hours, establish a procedure to enable owners to reclaim their animals by appointment at a mutually agreeable time when the agency would otherwise be closed (Food & Agr., Code §§ 31108, 31752, and 31753);
- ⚡ To verify whether a cat is feral or tame by using a standardized protocol (Food & Agr. Code, § 31752.5);
- ⚡ To post lost and found lists (Food & Agr. Code, § 32001); and
- ⚡ To maintain records on animals that are not medically treated by a veterinarian, but are either taken up, euthanized after the holding period, or impounded (Food & Agr. Code, § 32003).

Issue 4: Do the activities imposed by Penal Code section 597.1, relating to the seizure of animals, constitute a reimbursable state mandated program pursuant to article XIII B, section 6 of the California Constitution and Government Code section 17514?

At the hearing on October 26, 2000, interested party, the County of San Diego, testified that the activities required by Penal Code section 597.1, relating to the seizure of animals, constitutes a reimbursable state mandated program. The claimants did not request reimbursement for such activities.

However, on November 9, 2000, the claimants submitted a “Review of Transcript and Proposed Recommendation” requesting that the Commission’s decision incorporate the County of San Diego request. Specifically, the claimants are requesting that the Commission find that the activities listed below constitute reimbursable state mandated activities, and that the Commission adopt the following language in the statement of decision:

For dogs, cats and other animals seized pursuant to Penal Code Section [PC] 597.1:

- A. Conducting pre-seizure hearings [PC 597.1 (g)] ,
- B. Conducting post-seizure hearings [PC 597.1(f)], in those cases where it is determined the seizure was justified,
- C. Providing care, maintenance, and required veterinary treatment, except for emergency treatment of injured dogs and cats, during the new segment of the 14 day holding period, if not paid for by the animals' owner or on the owner's behalf [PC 597.1(h)], or, if required veterinary care is not provided by the owner and the animal is deemed to be abandoned [PC 597.1(i)].

For the reasons stated below, the Commission disagrees with the claimants and interested parties, and finds that the activities listed above do not constitute reimbursable state mandated activities pursuant to article XIII B, section 6 of the California Constitution and Government Code section 175 14.

Pre-Seizure and Post-Seizure Hearings

Before the test claim legislation was enacted, Penal Code section 597.1 made it a misdemeanor to permit an animal to be in any building, street, or lot without proper care and attention. In cases where the local agency determined that prompt action was required to protect the health and safety of the animal or others, the local agency was authorized to immediately seize the animal. Under such circumstances, subdivision (f) required that the local agency provide the owner, if known, with the opportunity for a post-seizure hearing before the commencement of the criminal proceeding to determine the validity of the seizure.

In cases where the immediate seizure was not justified, the local agency was required by subdivision (g) to provide the owner, if known, with the opportunity of a pre-seizure hearing. In such cases, the owner was required to produce the animal at the time of the hearing, unless the owner made arrangements with the local agency to view the animal, or unless the owner could provide verification that the animal was euthanized. The purpose of the hearing was to determine if the animal should be seized for care and treatment.

Although, in prior law, subdivisions (f) and (g) contained language requiring agencies to conduct pre-seizure and post-seizure hearings, the provisions of Penal Code section 597.1, including subdivisions (f) and (g), became operative *only if* the governing body of the local agency determined that it would operate under section 597.1. Former Penal Code section 597.1, subdivision (l), stated the following:

- (1) This section shall be operative in a public agency or a humane society under the jurisdiction of the public agency, or both, only if the governing body of that public agency, by ordinance or resolution, determines that this section shall be operative in the public agency or the humane society and that Section 597f shall not be operative.

Thus, before the test claim legislation was enacted, adherence to Penal Code section 597.1 was optional.

The test claim legislation deleted subdivision (1). With the deletion of subdivision (1), pre-seizure and post-seizure hearings are now required.

Nevertheless, for the reasons provided below, the Commission finds the requirement to conduct either a pre-seizure or post-seizure hearing does *not* constitute a new program or higher level of service, and does not impose costs mandated by the state.

In 1976, the California Court of Appeal determined, in *the* case of *Can-era v. Bertaini*,³⁸ that pre-seizure and post-seizure hearings are constitutionally required pursuant to Fourteenth Amendment, Due Process Clause, of the United States Constitution. In *Carrera*, the petitioner's farm animals were seized and impounded for running at large and the owner was charged with cruelty and neglect. The seizure immediately resulted in petitioner incurring several hundred dollars in fees and costs that had to be paid before she could get possession of her animals. Petitioner was not given the opportunity under either a pre-seizure or post-seizure hearing to determine if the seizure was valid. Instead, by the time she was able to institute a lawsuit and obtain a court hearing, six weeks after the seizure, the fees increased to over **\$2,500**. The court found that the county's procedures violated the Due Process Clause and recognized that where the government takes a person's property, the Due Process Clause requires some form of notice and hearing. The court stated the following:

As a matter of basic fairness, to avoid the incurrence of unnecessary expenses, appellant was entitled to a hearing *before* her animals were seized or, if the circumstances justified a seizure without notice and a hearing, she was entitled to a *prompt hearing after* the animals were seized. Manifestly, the hearing in the superior court six weeks after the seizure cannot be said to satisfy appellant's due process rights.³⁹
(Emphasis added.)

Since pre-seizure and post-seizure hearings were *previously required* by the United States Constitution, these same activities imposed by Penal Code section 597.1 do not constitute a new program or higher level of service.

Moreover, the requirement to conduct pre-seizure and post-seizure hearings does not impose costs mandated by the state. Government Code section 17556, subdivision (b), provides that the Commission shall not find costs mandated by the state when "the statute or executive order affirmed for the state that which had been declared existing law or regulation by action of the courts," The Commission finds that Government Code section 17556, subdivision (b), applies here since before the enactment of the test claim legislation, the court in *Carrera* declared that existing law, through the Due Process Clause of the United States Constitution, required local agencies to conduct pre-seizure and post-seizure hearings when animals are seized. Moreover, bill analyses of the test claim legislation reveal that the amendment to Penal Code section 597.1 was intended to codify the court's decision in *Carrera*.

³⁸ *Carrera v. Bertaini* (1976) 63 Cal.App.3d 721.

³⁹ *Id.* at 729.

Accordingly, the Commission finds that the requirement imposed by Penal Code section 597.1 to conduct pre-seizure and post-seizure hearings does not constitute a reimbursable state mandated activity pursuant to article XIII B, section 6 of the California Constitution and Government Code section 17514.

Holding Period for Seized Animals

The claimants and interested parties also request reimbursement for the following activities as a result of the 14-day holding period for seized animals:

Providing care, maintenance, and required veterinary treatment, except for emergency treatment of injured dogs and cats, during the new segment of the 14 day holding period, if not paid for by the animals' owner or on the owner's behalf [PC 597.1(h)], or, if required veterinary care is not provided by the owner and the animal is deemed to be abandoned [PC 597.1(i)].

The Commission disagrees with the claimants' request.

Penal Code section 597.1, subdivisions (h), provides that if an animal is properly seized, the owner shall be personally liable to the local agency for the cost of the seizure and care of the animal. The owner has 14 days after the animal was seized to pay the charges and redeem the animal. The charges constitute a lien on the animal. If the owner does not pay the charges permitted under section 597.1, then the animal shall be deemed an abandoned animal and may be disposed of by the local agency.

Penal Code section 597.1, subdivision (i), further provides that if the seized animal requires veterinary care and the local agency is not assured, within 14 days of the seizure of the animal, that the owner will provide the necessary care, the animal is deemed abandoned and may be disposed of by the local agency.

The 14-day holding period does *not* apply if it has been determined #at the seized animal incurred severe injuries, is incurably crippled, or is afflicted with a serious contagious disease and the owner does not immediately authorize treatment of the animal at the expense of the owner. In such cases, the seized animal may be euthanized without regard to the holding period. (Pen. Code, § 597.1, subd. (i).)

Furthermore, the Commission finds that the 14-day holding period does *not* apply when the owner is truly unknown. Under such circumstances, the animal may be euthanized if sick or injured without regard to the 14-day holding period, or is deemed an abandoned or stray animal requiring the local agency to comply with the four or six day holding period established for dogs, cats, and other animals in Food and Agriculture Code sections 3 1108, 31752, and 31753. For example, Penal Code section 597.1, subdivision (b), provides that "every sick, disabled, infirm, or crippled animal, except a dog or cat, that is abandoned in any city, county, city and county, or judicial district may be killed by the officer if, after a reasonable search, no owner of the animal can be found." Subdivision (b) further provides that the local agency has the duty to cause the animal to be euthanized or rehabilitated and placed in a suitable home on information that the animal is stray or abandoned. Moreover, subdivision (c) requires that all injured dogs and cats be conveyed to a veterinarian. If the owner does not redeem the injured

dog or cat “within the locally prescribed waiting period,” the veterinarian may euthanize the animal.

When the 14-day holding period does apply, the Commission agrees that it constitutes a new program or higher level of service. Before the enactment of the test claim legislation, Penal Code section 597f required local agencies to take possession of animals that were abandoned, neglected, unfit for labor, or cruelly treated, and care for the animal until it is redeemed by the owner.

The Commission finds that prior law established in Penal Code section 597f implies *some* holding period for seized animals to allow the owner to redeem the animal after payment of expenses. However, there was *no prior state or federal law* mandating local agencies to hold seized animals for any specified time period. With the enactment of the test claim legislation, which deleted subdivision (1) of section 597.1 making its provisions mandatory, the state is now requiring local agencies, for the first time, to hold seized animals for 14 days before the animal may be disposed of by the local agency.

Thus, the Commission finds that providing care and maintenance for seized animals during the 14-day holding period constitutes a new program or higher level of service.

The Commission also finds the providing treatment for seized animals during the 14-day holding period, constitutes a new program or higher level of service. Penal Code section 597.1, subdivision (a), states. that “any peace officer, humane society officer, or animal control officer shall take possession of the stray or abandoned animal and shall provide care *and treatment* for the animal until it is deemed in suitable condition to be returned to the owner. ” Subdivisions (f) and (g) of section 597.1 also require that the due process notice given to owners of seized animals contain a statement that the owner is liable for the cost of caring for *and treating* the seized animal. Thus, necessary treatment is required during this time period.

But, the Commission finds that there are *no* costs mandated by the state associated with the 14-day holding period.

Government Code section 17556, subdivision (d), provides that the Commission shall not find costs mandated by the state when the local agency has the authority to levy service charges, fees or assessments sufficient to pay for the mandated program or increased level of service.

The Commission finds that Government Code section 17556, subdivision (d), applies here. Penal Code section 597.1 authorizes the local agency to pass on the costs of the seizure and care, including veterinary care, of the animal to the owner when the seizure is upheld at the due process hearing. The charges become a lien on the animal until paid. If the owner pays all costs associated with the seizure of the animal, then the owner can redeem the animal and the local agency’s costs are fully recovered. (Pen. Code, § 597.1, subd. (a).) Under such circumstances, there are no costs mandated by the state.

Even in situations where the owner abandons the seized animal, and fails or refuses to pay the costs of the seizure and care during the 14-day holding period, the local agency still has the authority to recover their costs in full from the owner. Under such circumstances, the owner becomes personally liable for the charges. For example, subdivisions (f) and (g) of section 597.1 provide that the owner’s failure to request or attend the due process hearing “shall result

in liability” for the cost of caring for and treating any animal properly seized. Moreover, once the owner is found guilty of a misdemeanor under section 597.1, the costs of caring for and treating the animal become restitution to be paid by the owner to the local agency. Thus, even if the owner abandons the animal, liability for the costs of care and treatment during the 14-day holding period follow the owner and are collectible by the local agency.

The Commission further finds that Government Code section 17556, subdivision (d), applies to deny reimbursement for the costs incurred as a result of the 14-day holding period when the local agency is not able to collect the full amount of the charges from the owner. In *Santa Margarita Water District v. Kathleen Connell, as State Controller*⁴⁰ the court rejected the interpretation that authority to levy fees sufficient to cover costs under Government Code section 17556, subdivision (d), turns on economic feasibility. Rather, the court held that the plain language of subdivision (d) precludes reimbursement where the local agency has the authority, the right or the power to levy fees sufficient to cover the costs of the state-mandated program. The court stated the following:

The Districts in effect ask us to construe ‘authority,’ as used in the statute, as a practical ability in light of surrounding economic circumstances. However, this construction cannot be reconciled with the plain language of the statute and would create a vague standard not capable of reasonable adjudication. Had the Legislature wanted to adopt the position advanced by the Districts, it would have used “reasonable ability” in the statute rather than “authority”.⁴¹

Accordingly, the Commission finds that the 14-day holding period established under Penal Code section 597.1 does not constitute a reimbursable state mandated program within the meaning of article XIII B, section 6 of the California Constitution and Government Code section 17514.

CONCLUSION

The Commission concludes that the test claim legislation imposes a partial reimbursable state mandated program on local agencies pursuant to article XIII B, section 6 of the California Constitution and Government Code section 17514 for the *increased costs* in performing the following activities:

1. Providing care and maintenance during the increased holding period for impounded dogs and cats that are ultimately euthanized. The increased holding period shall be measured by calculating the difference between three days from the day of capture, and four business days from the day after impoundment, as specified below in 3(a) and 3(b), or six business days from the day after impoundment (Food & Agr. Code, §§ 31108, 31752);

⁴⁰ (1997) 59 Cal.App.4th 382.

⁴¹ *Id.*, pg. 401

2. Providing care and maintenance for four business days from the day after impoundment, as specified below in 3(a) and 3(b), or six business days from the day after impoundment, for impounded rabbits, guinea pigs, hamsters, pot-bellied pigs, birds, lizards, snakes, turtles, or tortoises legally allowed as personal property that are ultimately euthanized (Food & Agr. Code, § 31753);
3. For impounded dogs, cats, and other specified animals that are held for four business days after the day of impoundment, either:
 - (a) Making the animal available for owner redemption on one weekday evening until at least 7:00 p.m., or one weekend day; or
 - (b) For those local agencies with fewer than three full-time employees or that are not open during all regular weekday business hours, establishing a procedure to enable owners to reclaim their animals by appointment at a mutually agreeable time when the agency would otherwise be closed (Food & Agr., Code §§ 31108, 31752, and 31753);
4. Verifying whether a cat is feral or tame by using a standardized protocol (Food & Agr. Code, § 31752.5);
5. Posting lost and found lists (Food & Agr. Code, § 32001);
6. Maintaining records on animals that are not medically treated by a veterinarian, but are either taken up, euthanized after the holding period, or impounded (Food & Agr. Code, § 32003); and
7. Providing “necessary and prompt veterinary care” for abandoned animals, other than injured cats and dogs given emergency treatment, that are ultimately euthanized (Civ. Code, §§ 1834 and 1846).

The Commission also concludes that all other statutes included in the test claim legislation that are not listed above do not impose a reimbursable state mandated program within the meaning of article XIII B, section 6 of the California Constitution and Government Code section 175 14.

The Commission further concludes that several statutes outside the test claim legislation that provide local agencies with revenues to offset the costs of the mandated program should be included in the Parameters and Guidelines as offsetting savings to the extent they are collected and received by the local agency. For example, local agencies have the authority to attribute part of the fees collected from owners for dog license tags and fines to pay salaries, costs, and expenses for the enforcement of animal control and emergency care of impounded animals. (Food & Agr. Code, § 30652; Pen. Code, § 597f.) Local agencies also have the authority to use a portion of the unclaimed spay and neuter deposits and fines collected for not complying with spay and neuter requirements to the administrative costs incurred by a local agency. (Food & Agr. Code, §§ 30520 et seq., and 31751 et seq.)⁴² Finally, local agencies have the

⁴² The Commission recognizes that as of January 1, 2000, dogs and cats are required to be spayed or neutered before they are adopted or released. (Food & Ag. Code, §§ 30503 and 31751.3.) Thus, local agencies stopped collecting spay/neuter deposits for cats and dogs as of January 1, 2000. (See comments from County of Fresno.) The reimbursement period for this test claim will begin January 1, 1999. Accordingly, the Commission concludes

authority to use the fines imposed and collected from owners of impounded animals to pay for the expenses of operation and maintenance of the public pound and for the compensation of the poundkeeper. (Gov. Code, § 25802.)

that the spay/neuter deposits collected by local agencies for cats and dogs from January 1, 1999 to January 1, 2000, be identified as an offset.

ITEM 4

STAFF'S PROPOSED PARAMETERS AND GUIDELINES

Civil Code Sections 1834 and 1846;
Food and Agriculture Code Sections 31108, 31752, 31752.5, 31753, 32001, and 32003
As Added or Amended by Statutes of 1998, Chapter 752

Animal Adoption

Executive Summary

Introduction

This item was originally heard at the Commission's August 23, 2001 hearing. The Commission continued the matter to further discuss the issues raised at the hearing and in the written comments. Since the last hearing on this item, a pre-hearing conference was held and additional written comments have been filed.

The main issues in dispute are as follows:

- The classification of one-time activities (Section IV. Reimbursable Activities);
- Reimbursement for animals that die during the holding period;
- Acquisition of additional space and/or construction of new facilities (Section IV. Reimbursable Activities);
- Necessary and prompt veterinary care (Section IV. Reimbursable Activities); and
- Offsetting savings and other reimbursements (Section VII).

Staff has made some changes to the Proposed Parameters and Guidelines that were presented to the Commission in August 2001. These changes are reflected in the Staff's Proposed Parameters and Guidelines, beginning on page 21, with ~~strikeout~~ and underline.

Summary of the Mandate

The test claim legislation was enacted in an attempt to end the euthanasia of adoptable and treatable animals. Generally, the test claim legislation increased the holding period for stray and abandoned dogs, cats, and other specified animals; required the verification of the temperament of feral cats; required the posting of lost and found lists; required the maintenance of records for impounded animals; and required that impounded animals receive "necessary and prompt veterinary care."

On January 25, 2001, the Commission partially approved this test claim, pursuant to article XIII B, section 6 of the California Constitution and Government Code section 17514, for the *increased costs* in performing the following activities only:

1. Providing care and maintenance during the increased holding period for impounded dogs and cats that are ultimately euthanized. The increased holding period shall be measured by calculating the difference between three days from the day of capture and four business days from the day after impoundment, as specified below in 3 (a) and 3 (b), or six business days from the day after impoundment (Food & Agr. Code, §§ 31108, 31752);
2. Providing care and maintenance for four business days from the day after impoundment, as specified below in 3 (a) and 3 (b), or six business days from the day after impoundment, for impounded rabbits, guinea pigs, hamsters, pot-bellied pigs, birds, lizards, snakes, turtles, or tortoises legally allowed as personal property that are ultimately euthanized (Food & Agr. Code, § 31753);
3. For dogs, cats, and other specified animals held for four business days after the day of impoundment, either:
 - (a) Making the animal available for owner redemption on one weekday evening until at least 7:00 p.m., or one weekend day; or
 - (b) For those local agencies with fewer than three full-time employees or that are not open during all regular weekday business hours, establishing a procedure to enable owners to reclaim their animals by appointment at a mutually agreeable time when the agency would otherwise be closed (Food & Agr., Code §§ 31108, 31752, and 31753);
4. Verifying whether a cat is feral or tame by using a standardized protocol (Food & Agr. Code, § 31752.5);
5. Posting lost and found lists (Food & Agr. Code, § 32001);
6. Maintaining records on animals that are not medically treated by a veterinarian, but are either taken up, euthanized after the holding period, or impounded (Food & Agr. Code, § 32003); and
7. Providing “necessary and prompt veterinary care” for abandoned animals, other than injured cats and dogs given emergency treatment, that are ultimately euthanized (Civ.Code, §§ 1834 and 1846).

Staff Recommendation

Staff recommends that the Commission adopt staff’s Proposed Parameters and Guidelines, which begin on page 21.

Staff also recommends that the Commission authorize staff to make any non-substantive, technical corrections to the Parameters and Guidelines following the hearing.

STAFF ANALYSIS

This item was originally heard at the Commission's August 23, 2001 hearing. The Commission continued the matter to further discuss the issues raised at the hearing and in the written comments. Since the last hearing on this item, a pre-hearing conference was held and additional written comments have been filed.¹

The main issues in dispute are as follows:

- The classification of one-time activities (Section IV. Reimbursable Activities);
- Reimbursement for animals that die during the holding period;
- Acquisition of additional space and/or construction of new facilities (Section IV. Reimbursable Activities);
- Necessary and prompt veterinary care (Section IV. Reimbursable Activities); and
- Offsetting savings and other reimbursements (Section VII).

As described below, staff has made some changes to the Proposed Parameters and Guidelines that were presented to the Commission in August 2001. These changes are reflected in the Staff's Proposed Parameters and Guidelines, beginning on page 21, with ~~strikeout~~ and underline.

Classification of One-Time Activities

At the August 2001 hearing, the Counties of Fresno and Tulare requested that the one-time activity of procuring medical, kennel, and computer equipment necessary to comply with the reimbursable activities be classified, instead, as an ongoing activity. These parties contend that equipment wears out and needs to be replaced when necessary.² Staff agrees that using this equipment constitutes a reasonable method of complying with the mandated activities.³ Thus, the equipment may need to be replaced on an on-going basis in order to comply with the mandated program. Accordingly, staff has deleted the activity from Section IV (A), One Time Activities, and added the following language to Section IV (B) (10), Ongoing Activities:

Beginning January 1, 1999 - Procuring medical, kennel, and computer equipment necessary to comply with the reimbursable activities listed in Section IV (B) of these parameters and guidelines, to the extent these costs are not claimed as an indirect cost under Section V (B) of these parameters and guidelines. If the

¹ As reflected in the chronology, the Commission has received numerous comments from interested persons. (Exhibit Q.) Most of these comments request that funding be provided for the test claim legislation. They do not address the substantive issues raised in the proposed Parameters and Guidelines. In addition, the comments submitted by the County of Riverside (Exhibit K) concern issues addressed in the Commission's Statement of Decision. The comments do not address the issues raised in the proposed Parameters and Guidelines. Accordingly, a summary of these comments is not provided in this staff analysis.

² August 23, 2001, Hearing Transcript, pages 21-22. (Exhibit A.) See also, Exhibit I, Comments Filed by County of Fresno on September 21, 2001.

³ California Code of Regulations, title 2, section 1183.1.

medical, kennel, and computer equipment is utilized in some way not directly related to the mandated program or the population of animals listed in Section IV (B), only the pro rata portion of the activity that is used for the purposes of the mandated program is reimbursable.

Staff notes that the cost of the equipment can be claimed as a direct cost under Section V (A) of these Parameters and Guidelines.

Additionally, the County of Los Angeles has requested that the proposed Parameters and Guidelines clarify that training on the mandated program be provided on a one-time basis for each employee. Staff agrees and has added clarifying language (i.e., one-time per employee) to this activity.

Finally, the County of San Diego requests reimbursement for the ongoing cost of software license renewal contracts for maintenance of non-medical records.⁴ Staff agrees that a one-time activity of purchasing software to maintain non-medical records is a reasonable method of complying with the mandated activity.⁵ Thus, Section IV (A) includes the initial activity of procuring computer software. The cost of the software can be claimed as a direct cost under Section V (A) of these Parameters and Guidelines. Staff further agrees that the ongoing cost of software license renewal contracts is eligible for reimbursement. Accordingly, staff has added the following language to Section IV (B) (8), Maintaining Non-Medical Records:

The cost of software license renewal contracts, to the extent these costs are not claimed as an indirect cost under these parameters and guidelines, is eligible for reimbursement under Section V (A) (2) of these parameters and guidelines. If the computer software is utilized in some way that is not directly related to the maintenance of records specified in this section, only the pro rata portion of the software license renewal contract that is used for compliance with this section is reimbursable.

Reimbursement for Animals that Die During the Increased Holding Period

The County of Fresno requests reimbursement for the care and maintenance of animals that die during the increased holding period. The County states the following:

Fresno County recommends that reimbursements that apply to animals that are ultimately euthanized also apply to those animals that die while being held pending adoption or euthanization. If the animal dies pending adoption, obviously no adoption fees can be paid, and thus there is no revenue pertaining to that animal. If the animal dies pending euthanasia, the animal still had to be held until its untimely demise.⁶

⁴ August 23, 2001, Hearing Transcript, pages 46-47. (Exhibit A.)

⁵ California Code of Regulations, title 2, section 1183.1.

⁶ Exhibit I.

The Commission's Statement of Decision does not specifically address animals that die during the increased holding period. Nevertheless, with the limitations described below, staff agrees that the County's request is consistent with the Statement of Decision.

As reflected in the Statement of Decision, the Commission concluded that the requirement to increase the holding period for impounded stray or abandoned dogs, cats and other specified animals constitutes a new program or higher level of service. For stray and abandoned dogs and cats, the increased holding period is the difference between three days from the day of capture, and either four or six business days from the day after impoundment. Eligible claimants are not entitled to reimbursement for the first three days of that period. For stray and abandoned animals specified in Food and Agriculture Code section 31753 (i.e., rabbits, guinea pigs, pot-bellied pigs, etc.) the increased holding period is the entire period of four or six business days from the day after impoundment.

The Commission also found that providing "necessary and prompt veterinary care" during the entire holding period specified in the test claim legislation (i.e., four or six business days from the day after impoundment) for stray and abandoned animals, other than injured cats and dogs given emergency treatment, constitutes a new program or higher level of service.

The Commission, however, concluded that the test claim legislation provides sufficient fee authority to local agencies allowing them to charge the original and/or adoptive owners for the cost to care, maintain, and provide "necessary and prompt veterinary care" for animals that are relinquished, redeemed, adopted, or released to a nonprofit adoption organization. Thus, there are no costs mandated by the state for these animals, and reimbursement is not required for the care, maintenance, and "necessary and prompt veterinary care" of these animals. Accordingly, the Commission concluded that reimbursement for the care, maintenance, and "necessary and prompt veterinary care" is limited to animals that are ultimately euthanized.

If a stray or abandoned animal dies during the time an agency is required to hold that animal, the agency would still be required by the state to incur costs to care and maintain the animal, and to provide "necessary and prompt veterinary care" for the animal before the animal died. The agency cannot recover those costs from the adoptive owner since the animal was never adopted or released to a nonprofit adoption organization. Thus, staff agrees with the County that these costs are eligible for reimbursement.

However, the same reimbursement limitations apply to the stray and abandoned animals that die during the holding period. For example, reimbursement for the care and maintenance of these animals is limited to the costs incurred during the *increased* holding period, as calculated in the proposed Parameters and Guidelines.

Additionally, eligible claimants are not entitled to reimbursement for providing the following veterinary procedures to animals that die during the holding period:

- Emergency treatment given to injured cats and dogs (Pen. Code, § 597f, subd. (b));
- Administration of rabies vaccination to dogs (Health & Saf. Code, § 121690);

- Implantation of microchip identification; and
- Spay or neuter surgery and treatment;⁷

Finally, eligible claimants are not entitled to reimbursement for the care, maintenance, and “necessary and prompt veterinary care” of the following population of animals that die during the holding period:

- Stray or abandoned animals that are irremediably suffering from a serious illness or severe injury (Food & Agr.Code, § 17006);
- Newborn stray or abandoned animals that need maternal care and have been impounded without their mothers (Food & Agr. Code, § 17006);
- Stray or abandoned animals too severely injured to move or where a veterinarian is not available and it would be more humane to dispose of the animal (Pen. Code, §§ 597.1, subd. (e), 597f, subd. (d));
- Owner relinquished animals.

Accordingly, staff has inserted language in Sections IV (B) (1), (2), (3), (4), and (9) of the proposed Parameters and Guidelines clarifying that increased costs for the care and maintenance of animals that die during the increased holding period, and for providing “necessary and prompt veterinary care” to animals that die during the holding period are eligible for reimbursement.

Acquisition of Additional Space and/or Construction of New Facilities

Leasing Additional Space

At the August 2001 hearing, the County of Tuolumne questioned whether the proposed Parameters and Guidelines allow reimbursement for leasing additional space to comply with the increased holding period mandated by the test claim legislation.⁸ The answer is yes. The reimbursable activity of acquiring additional space (Section IV (B) (1)) includes purchasing and leasing space. If an eligible claimant seeks reimbursement for the cost of the lease, the proposed Parameters and Guidelines do require the claimant to submit the documentation specified in the Parameters and Guidelines with the reimbursement claim to the State Controller’s Office. In addition, eligible claimants are only entitled to reimbursement for the cost of leasing space based on a pro rata representation of impounded stray or abandoned dogs, cats, and other animals specified in Statutes of 1998, Chapter 752 (the test claim legislation) that are held during the increased holding period and are ultimately euthanized or die during the increased holding period, to the total population of animals housed in the leased facility. Staff has added clarifying language to Section IV (B) (1) that acquiring additional space includes purchasing and leasing.

⁷ The last two bulleted exclusions were proposed by the County of San Diego.

⁸ August 23, 2001, Hearing Transcript, page 43. (Exhibit A.)

Pro Rata Reimbursement

In addition, the County of Fresno contends that the proposed Parameters and Guidelines, which provide pro rata reimbursement for the acquisition of additional space, do not provide the County with a full reimbursement of its costs to construct a new facility for stray animals only. The County states the following:

The concern that Fresno County has with regard to the proposed Parameters and Guidelines, while they are geared to being a road map for all entities, would not take into account a situation such as Fresno's wherein the expansion was just of the stray facility. To prorate the cost of the addition using the formula proposed by the Commission which takes into account the owner relinquished animals does not provide the County with full reimbursement of its costs, which is the purpose of Article XIII B, section 6 of the California Constitution. Rather, it only provides a portion of the reimbursement for which Fresno County would otherwise be due, as the formula for reimbursement implies that some of the additional capital costs are directly attributable to owner relinquished and other non-reimbursable animals.⁹

In this regard, the County of Fresno initially proposed that the Parameters and Guidelines provide full reimbursement for the cost of constructing facilities for stray animals only. (Exhibit I.) In the County's supplemental filing, however, the County proposes reimbursement based on the proportionate share of actual costs of stray animals that are held during the increased holding period and are ultimately euthanized, to the total population of stray animals held in the facility. (Exhibit P.) The language proposed in the supplemental filing is similar to the language proposed in the Parameters and Guidelines presented in August 2001, except that it excludes owner-relinquished animals from the total population of animals held in the facility.

Staff disagrees with the language initially proposed by the County, which provides full reimbursement for the cost of construction. Full reimbursement for stray animals is not consistent with the Commission's Statement of Decision. The Commission's Statement of Decision limits reimbursement for the care and maintenance of stray dogs and cats to just the increased holding period. The increased holding period is calculated by determining the difference between three days from the day of capture (the law before the enactment of the test claim legislation), and four or six business days from the day after impoundment (the holding period required by the test claim legislation). Thus, while stray dogs and cats in a "stray facility" are held for four to six business days from the day after impoundment, eligible claimants are not entitled to reimbursement for the first three days of that period.

The Statement of Decision also provides that reimbursement is not required under article XIII B, section 6 of the California Constitution and Government Code section 17514 for holding owner relinquished animals, and for holding stray or abandoned animals that are ultimately redeemed, adopted, or released to a nonprofit animal rescue or adoption

⁹ Exhibit P. See also Exhibit I.

organization. The Commission found that local agencies have sufficient statutory fee authority to cover their costs for these animals. Although the County of Fresno does not house owner-relinquished animals in the “stray facility,” the total population of stray animals housed in the “stray facility” includes the population of non-reimbursable strays that are ultimately adopted, redeemed, or released. Eligible claimants are only entitled to reimbursement for those stray animals that are ultimately euthanized or die during the increased holding period.

Finally, the test claim legislation states that local agencies are not required to hold the following population of stray animals:

- Stray or abandoned dogs and cats that are irremediably suffering from a serious illness or severe injury (Food & Agr.Code, § 17006);
- Newborn stray or abandoned dogs and cats that need maternal care and have been impounded without their mothers (Food & Agr. Code, § 17006);
- Stray or abandoned dogs and cats too severely injured to move or where a veterinarian is not available and it would be more humane to dispose of the animal (Pen. Code, §§ 597.1, subd. (e), 597f, subd. (d));

Thus, reimbursement is not required under article XIII B, section 6 of the California Constitution for the maintenance and care of the stray animals bulleted above that may be voluntarily housed in a “stray facility” with the rest of the reimbursable stray animals.

Staff has modified the proposed language for the activity of acquiring additional space to clarify the limitations described above. The proposed language now states the following:

Eligible claimants are only entitled to reimbursement for the proportionate share of actual costs required to plan, design, acquire, and/or build facilities in a given fiscal year based on the pro rata representation of impounded stray or abandoned dogs, cats, and other animals specified in Statutes of 1998, Chapter 752 that are held during the *increased* holding period specified in Sections IV (B) (3) and (4) of these Parameters and Guidelines and die during the increased holding period or are ultimately euthanized, to the total population of animals housed in the facility (including those animals that are excluded from reimbursement, as specified in Sections IV (B) (3) and (4) of these Parameters and Guidelines) during the entire holding period required by Food and Agriculture Code sections 31108, 31752 and 31753.

The proposed language keeps owner-relinquished animals in the description of the total population of animals since some agencies may be requesting reimbursement for acquiring space and/or constructing new facilities to house owner-relinquished and strays together. Since the County of Fresno’s newly constructed facility is for strays only, their calculation of the total population of animals would presumably not include owner-relinquished animals.

Humane Society Standards

The County of San Diego requests that the Commission adopt minimum building standards outlined by the Humane Society of the United States in the Parameters and Guidelines for purposes of facility related reimbursement. The County of San Diego states the following:

With respect to animal shelter facility and enclosure standards, we would recommend the Commission adopt the minimum standards contained in the attached Humane Society of the United States (HSUS) *Guidelines for the Operation of an Animal Shelter* (specifically, sections 1[A] on page 1 through section I[H] on page 3, pertaining to animal shelter facility planning) for the sole purpose of setting a benchmark for the upper limits of approved animal shelter facility related reimbursement. It is our view that these minimum standards, developed by professionals in the animal sheltering field and endorsed by HSUS, a nationally recognized animal welfare organization, meet both the letter and spirit of SB 1785 requirements. (Emphasis in original.)¹⁰

Staff disagrees with this request. Although the HSUS recommends facility guidelines, local agencies are not required by state or federal law to use these standards when housing stray and abandoned animals. Thus, this request goes beyond the scope of the mandate.

Staff also notes that the proposed Parameters and Guidelines require the governing body of the local agency to determine that acquiring additional space, constructing new facilities, or remodeling existing facilities is necessary to comply with the increased holding periods established by the test claim legislation and that it is the most cost-effective approach.

Necessary and Prompt Veterinary Care

The proposed Parameters and Guidelines provide reimbursement for “necessary and prompt veterinary care” during the entire holding period specified in the test claim legislation for stray and abandoned animals, other than injured cats and dogs given emergency treatment, that die during the holding period or are ultimately euthanized. “Necessary and prompt veterinary care” is defined as follows:

“Necessary and prompt veterinary care” means all reasonable medical procedures performed by a veterinarian or someone under the supervision of a veterinarian to make stray or abandoned animals “adoptable.” The following veterinary procedures, if conducted, are eligible for reimbursement:

- An initial physical examination of the animal to determine the animal’s baseline health status and classification as “adoptable,” “treatable,” or “non-rehabilitatable.”

¹⁰ Exhibit H.

- A wellness vaccine administered to “treatable” or “adoptable” animals.
- Veterinary care to stabilize and/or relieve the suffering of a “treatable” animal.
- Veterinary care intended to remedy any applicable disease, injury, or congenital or hereditary condition that adversely affects the health of a “treatable” animal or that is likely to adversely affect the animal’s health in the future, until the animal becomes “adoptable.”

At the August 2001 hearing, the Department of Finance questioned the proposed reimbursement for the initial physical examination and the wellness vaccine. The Department of Finance asserts that these activities are already being performed by shelters and, therefore, should not be reimbursable.¹¹

Staff disagrees. The test claim legislation, for the first time, required local agencies to provide “prompt and necessary veterinary care” to stray and abandoned animals, other than injured cats and dogs given emergency treatment. According to legislative intent provided in Civil Code section 1834.4 of the test claim legislation, the purpose of this new requirement was to prevent the euthanization of treatable animals. The legislature defined a treatable animal as “any animal that is not adoptable but that could become adoptable with reasonable efforts.” In this regard, two veterinarians from the County of San Diego and a veterinarian from the Contra Costa County have submitted comments stating that performing an initial examination to determine if the stray or abandoned animal is treatable, and administering a wellness vaccine to adoptable and treatable stray or abandoned animals is necessary to comply with the intent of the mandated requirement of providing “prompt and necessary veterinary care.”¹² The Department of Finance has not submitted any comments to contradict these expert opinions. Thus, staff has left these activities in the proposed Parameters and Guidelines.

In addition, at the pre-hearing conference, the parties agreed to change the definition of “necessary and prompt veterinary care” from “all reasonable medical procedures performed by a veterinarian or someone under the supervision of a veterinarian to make stray or abandoned animals ‘adoptable’”, to “all ~~reasonable~~ reasonably necessary medical procedures performed by a veterinarian or someone under the supervision of a veterinarian to make stray or abandoned animals ‘adoptable’.” The Commission has not received any subsequent comments opposing this change. Thus, the proposed Parameters and Guidelines include this modification.

Offsetting Savings and Other Reimbursements

Rewards

The test claim legislation, in Civil Code section 1845, authorizes local agencies, for the first time, to accept advertised rewards or rewards freely offered by the owner of the

¹¹ August 23, 2001, Hearing Transcript, page 33-34

¹² See, Exhibit A, Bates page 325; Exhibit F, Bates page 496; and Exhibit H, Bates page 513.

animal. Such rewards may be received by the local agency in addition to the fees authorized by the test claim legislation for the care and maintenance of the redeemed animal. The State Controller's Office requests that these rewards be included in the proposed Parameters and Guidelines as a potential source of offsetting revenue.

Staff agrees with this request. Section 1183.1, subdivision (a), of the Commission's regulations requires that all proposed parameters and guidelines "allow for an offset of any other reimbursement received from the federal or state governments or other non-local sources."

This regulation is consistent with the California Supreme Court's decision in *County of Fresno v. State of California*. In the *County of Fresno* case, the court clarified that article XIII B, section 6 of the California Constitution requires reimbursement by the state only for those expenses that are recoverable from tax revenues. Reimbursable costs under article XIII B, section 6 do not include reimbursement received from other non-tax sources, such as income from gifts.¹³

Staff finds that rewards received under Civil Code section 1845 fall within the definition of non-tax sources, as provided in the *County of Fresno* case. Staff further finds the reward money is a required offset, as defined in the Commission's regulations. Accordingly, the proposed Parameters and Guidelines specify that rewards authorized by Civil Code section 1845 must be identified and deducted from the reimbursement claim.

Fees Collected for Dog License Tags and Fines (Food and Agr. Code, § 30652)

At the August 2001 hearing, there was a lot of discussion about including Food and Agriculture Code section 30652 as a source of offsetting revenue. Food and Agriculture Code section 30652 was enacted in 1967¹⁴ and requires that fees received from dog license tags and fines be used by local agencies on expenditures according to the priority outlined in the statute. Section 30652 states the following:

All fees for the issuance of dog license tags and all fines collected pursuant to this division shall be paid into the county, city, or city and county treasury, as the case may be, and shall be used:

- (a) First, to pay fees for the issuance of dog license tags.
- (b) *Second, to pay fees, salaries, costs, expenses, or any or all of them for the enforcement of this division and all ordinances which are made pursuant to this division.*
- (c) Third, to pay damages to owners of livestock which are killed by dogs.
- (d) Fourth, to pay costs of any hospitalization or emergency care of animals pursuant to Section 597f of the Penal Code. (Emphasis added.)

¹³ *County of Fresno v. State of California* (1991) 53 Cal.3d 482, 486-488.

¹⁴ Statutes of 1967, chapter 15.

Food and Agriculture Code section 30652, subdivision (b), authorizes local agencies to attribute *part* of the fees collected from owners for dog license tags and fines to pay the salaries, costs, and expenses for the enforcement of Division 14 of the Food and Agriculture Code. This division of the Food and Agriculture Code governs the regulation and licensing of dogs, and includes section 31108 of the test claim legislation, which imposes the increased holding period for impounded dogs. The Commission found that Food and Agriculture Code section 31108 imposes a reimbursable state mandated program for providing care and maintenance during the increased holding period for impounded stray or abandoned dogs that are ultimately euthanized.

Division 14 of the Food and Agriculture Code, and section 30652, subdivision (b), include both field and shelter services for dogs. For example, Food and Agriculture Code sections 31101 et seq. address a local agency's field requirements to seize and impound dogs running at large. These sections were enacted in 1967 by the same statute that enacted section 30652. Once a dog is seized by the local agency, section 31108 of the test claim legislation imposes the holding period for sheltering the dog. The initial holding period of 72 hours established in section 31108 was enacted in 1967 by the same statute that enacted section 30652. The test claim legislation was enacted in 1998 and amended section 31108 by increasing the holding period.

Thus, according to the priority set out in the statute, the local agency is first required to use the revenue generated from fines and the fee authority on the issuance of dog license tags. (Food and Agr. Code, § 30652, subd. (a).) If there is excess revenue following the expenditure for dog license tags, the local agency is required by subdivision (b) of section 30652 to attribute the excess funds on both the field and sheltering services. The Legislature did not, however, prioritize the field and shelter expenditures within subdivision (b).

Thus, the parties have proposed the following approaches with respect to Food and Agriculture Code section 30652:

1. The Department of Finance contends that any excess revenues be identified and deducted from the reimbursement claim first before the agency funds the “non-mandated” field activities. The Department proposes that the following language be included in Section VII, Offsetting Savings: “Specifically, all fees for the issuance of dog license tags and all fines collected pursuant to Division 14 of the Food and Agriculture Code, in excess of the amount to pay fees associated with the issuance of license tags, shall be identified and deducted from the claim before funding non-mandated activities.”
2. The Counties of Contra Costa and Fresno contend that section 30652 should not be included as a source of offsetting revenue because there is no excess revenue after paying the expenses of dog license tags in section 30652, subdivision (a). In addition, they contend that section 30652 was enacted before the test claim legislation and, thus, should not be used to pay for the expenses of the test claim legislation.¹⁵

¹⁵ Exhibits F and I.

3. The County of Mendocino contends that the offset against the total cost of the mandated program be just the proportionate share of the excess revenue attributable to shelter costs that preexisted the test claim legislation. This approach does not take into account the cost of field services. Mendocino County also proposes that the excess revenue used to pay for the costs incurred under section 30652, subdivision (d) (i.e., hospitalization or emergency care of animals under Penal Code section 596f), should be deducted before any offset is taken.¹⁶
4. The County of Tulare contends that revenues received under section 30652 should not be deducted from costs relating to the acquisition of additional space and/or construction of new facilities, or the remodeling/renovating existing facilities. Tulare County states that “if licensing fees received pursuant to Food and Agriculture Code [section] 30652, are to be deducted from the claim for reimbursement for the mandate it should not again be deducted from the claim for capital costs.”¹⁷

Based on the analysis and legal authorities described below, staff disagrees with the parties’ proposals.

First, staff disagrees with the approach proposed by the Counties of Contra Costa and Fresno, which omits section 30652 from the list of offsets. The claimants are correct that Section 30652 was enacted before the test claim legislation. It must be presumed, however, that the Legislature has existing laws in mind at the time that it enacts a new statute.¹⁸ Thus, the Legislature was aware of section 30652 as a revenue source when it amended Food and Agriculture Code section 31108 extending the holding period for stray and abandoned dogs. Since the plain language of section 30652 requires any excess revenue received by the local agency from dog license fees and fines to be applied, as a second priority, to the administration of Division 14, of which section 31108 is a part, section 30652 cannot be ignored as potential source of offsetting revenue.

Moreover, the California Supreme Court in *County of Fresno v. State of California* has made it clear that article XIII B, section 6 requires reimbursement only when the state mandates local agencies to expend tax revenues. Reimbursement is not required under section 6 when local agencies make expenditures on state mandated programs from sources other than local taxes. Sources other than local taxes include revenue generated from fines, fees, federal funds, bond funds, and income from gifts.¹⁹ Accordingly, staff finds that the Commission is legally required to identify Food and Agriculture Code section 30652 as a potential source of offsetting revenue.²⁰

¹⁶ The Counties of Los Angeles and San Diego agree with this approach. (See Exhibits L and N.)

¹⁷ Exhibit O.

¹⁸ *Schmidt v. Southern California Rapid Transit Dist.* (1993) 14 Cal.App.4th 23. (Exhibit R.)

¹⁹ *County of Fresno v. State of California* (1991) 53 Cal.3d 482, 486-488.

²⁰ See also, section 1183.1, subdivision (a)(8), of the Commission’s regulations, which require that all parameters and guidelines “allow for an offset of any other reimbursement received from the federal or state governments or other non-local sources.”

Staff also disagrees with the approaches proposed by the Department of Finance and the County of Mendocino. The Department of Finance contends that any excess revenue received pursuant to section 30652 be applied first to this reimbursement claim before the local agency applies any excess funds to “non-mandated” activities in Division 14. The County of Mendocino contends that just the proportionate share of the excess revenue attributable to shelter costs that preexisted the test claim legislation be used to offset the cost of the mandated program.

Both approaches require that the Commission establish a priority of expenditures within subdivision (b) of Food and Agriculture Code section 30652. As noted above, the plain language of subdivision (b) does not establish such a priority. Thus, both the Department of Finance and the County of Mendocino read a requirement into Food and Agriculture Code section 30652, subdivision (b), which, by the plain language of the statute, is not there. This violates the rules of statutory interpretation. Courts and administrative agencies may not disregard or enlarge the plain provisions of a statute, nor may they go beyond the meaning of the words used when the words are clear and unambiguous.²¹

In addition, article XI, section 7 of the California Constitution authorizes counties and cities to “make and enforce within its limits all local, police, sanitary, and other ordinances and regulations not in conflict with general laws.” This constitutional grant of power allows cities and counties a certain amount of independence and discretion in matters of local concern. If, however, the general laws of the state conflict with a local law, the local law is preempted.²² These principles apply to the licensing, fielding and sheltering of dogs. The California Supreme Court, in *Simpson v. City of Los Angeles*, recognized that the licensing of dogs and the regulation of the manner in which they shall be kept and controlled, while not exclusively a municipal affair, are within the legitimate sphere of a local agency’s police power.²³ Thus, pursuant to article XI, section 7 of the California Constitution, a local agency has the discretion to enact laws relating to the fielding and sheltering of dogs, unless the Legislature has preempted the field. Here, the Legislature has not enacted a law requiring local agencies to pay for the expenses of Food and Agriculture Code section 31108 of the test claim legislation first, before excess revenue is applied to other required field and sheltering services. As indicated above, the Legislature did not prioritize the field and shelter expenditures within Food and Agriculture Code section 30652, subdivision (b). Rather, the state has left the expenditure of excess revenues within Food and Agriculture Code section 30652, subdivision (b), to the discretion of the local agency. As the courts have made clear, the Commission is required to construe article XIII B, section 6 strictly and not extend its provisions to include matters not covered by the language used or as an equitable remedy to cure the perceived unfairness resulting from political decisions on funding priorities.²⁴

²¹ *In re Rudy L.* (1994) 29 Cal.App.4th 1007; *Whitcomb v. California Employment Commission* (1944) 24 Cal.2d 753, 757. (Exhibit R.)

²² *Korean American Legal Advocacy Foundation v. City of Los Angeles* (1994) 23 Cal.App.4th 376. (Exhibit R.)

²³ *Simpson v. City of Los Angeles* (1953) 40 Cal.2d 271, 278-279. (Exhibit R.)

²⁴ *City of San Jose v. State of California* (1996) 45 Cal.App.4th 1802, 1816-1817, where the court stated the following: “ ‘A strict construction of section 6 is in keeping with rules of constitutional interpretation, which require that constitutional limitations and restrictions on legislative power are to be construed

Accordingly, staff finds that there is no legal support for the proposals of the Department of Finance and the County of Mendocino.

Therefore, staff recommends that the Parameters and Guidelines identify Food and Agriculture Code section 30652 as a potential source of offsetting revenue based on the plain language of that section. Specifically, revenue received from dogs license tags and fines pursuant to Food and Agriculture Code section 30652 shall be used first to pay for dog license tags under subdivision (a). Second, in accordance with section 30652, subdivision (b), any excess revenue shall be applied to the fees, salaries, costs, expenses, or any or all of them for the enforcement of Division 14 of the Food and Agriculture Code, including Food and Agriculture Code section 31108, and all ordinances that are made pursuant to Division 14. Under subdivision (b), a local agency has the discretion to prioritize the expenditures on field and shelter services. But, pursuant to the plain language of section 30652, a local agency is required to pay for the costs incurred in complying with Food and Agriculture Code section 31108 *before* any revenue can be applied to subdivisions (c) and (d) of section 30652 for damages to owners of livestock which are killed by dogs and hospitalization or emergency care of animals pursuant to Section 597f of the Penal Code. Costs incurred in complying with Food and Agriculture Code section 31108 include expenses identified in the Commission’s Statement of Decision, and those expenses the Commission finds to be reasonable methods of complying with section 31108. Specifically, these expenses are as follows:

- The care and maintenance of stray and abandoned dogs that are euthanized or die during the increased holding period (Section IV (B) (3) of the proposed Parameters and Guidelines);
- For those agencies using the holding period of four business days after the day of impoundment, making the animal available for owner redemption on one weekday evening until at least 7:00 p.m., or one weekend day; or establishing a procedure to enable owners to reclaim their animals by appointment (Section IV (B) (5) of the proposed Parameters and Guidelines);
- Acquisition of additional space, construction of new facilities, remodeling/renovating existing facilities (Section IV (B) (1) and (2) of the proposed Parameters and Guidelines); and
- All the one-time activities listed in Section IV (A) of the proposed Parameters and Guidelines.

Unclaimed Spay and Neuter Deposits (Food and Agr. Code, §§ 30520, 31751)

Contra Costa County contends that the unclaimed spay and neuter deposits received for dogs and cats under Food and Agriculture Code sections 30520 et seq. and 31751 et seq.

strictly, and are not to be extended to include matters not covered by the language used.’ [Citations Omitted.] [‘Under our form of government, policymaking authority is vested in the Legislature and neither arguments as to the wisdom of an enactment nor questions as to the motivation of the Legislature can serve to invalidate particular legislation.’] Under these principles, there is no basis for applying section 6 as an equitable remedy to cure the perceived unfairness resulting from political decisions on funding priorities.” See also, *County of Sonoma v. Commission on State Mandates* (2000) 84 Cal.App.4th 1264, 1281.

should not be identified as a source of offsetting revenue because the expenditure of this revenue is limited to the spay and neuter programs.

Staff agrees with the County's position. At the time the test claim legislation was enacted, Food and Agriculture Code section 30503 required local agencies to charge a deposit for spaying or neutering a dog before the dog is sold or given away. The deposit could not exceed \$40 and was used to cover the costs of spaying and neutering dogs. The local agency was required to return the deposit to the new owner if the new owner presented a written statement or receipt indicating that the dog had been spayed or neutered. Section 30503 further stated that any unclaimed deposit shall be used only to pay for a public education program to prevent overpopulation of dogs and cats, a program to spay or neuter dogs and cats, a follow-up program to assure that animals sold or given away are spayed or neutered, and any additional costs under section 30503. Food and Agriculture Code section 31751 contained similar requirements for cats. Thus, based on the plain language of sections 30503 and 31751, local agencies were not authorized to use the unclaimed spay or neuter deposits on the test claim legislation.

In 1998, Food and Agriculture Code sections 30503 and 31751 were amended, and section 30520 et seq. were added to the Food and Agriculture Code.²⁵ These provisions became operative on January 1, 2000, and also require that the unclaimed spay or neuter deposits be used only for spay and neuter programs for dogs and cats, public education to reduce and prevent the overpopulation of dogs and cats, a follow-up program to ensure that transferred dogs and cats are spayed or neutered, and any additional costs under these sections. Thus, based on the plain language of these provisions, local agencies are not authorized to use the unclaimed spay or neuter deposits on the test claim legislation.

Accordingly, staff has deleted Food and Agriculture Code sections 30520 et seq. and 31751 et seq. from the list of offsets.

Other Offsetting Savings Proposed by the Department of Finance

The Department of Finance contends that the intent of the test claim legislation is to ensure that an animal is adopted or reclaimed, rather than euthanized. Thus, the Department argues that if, under the test claim legislation, more animals are adopted or reclaimed, a local agency is saving money by avoiding the costs of euthanization. Specifically, the Department states the following:

Additionally, the test claim legislation enhances the prospect that an animal will be adopted or reclaimed instead of euthanized. Presuming animals are adopted or reclaimed during the extended holding period, counties will realize offsetting savings. Prior to the test claim legislation, a county would have incurred costs for holding and euthanizing an animal not adopted or reclaimed by the owner. If, under the existing law, the animal is now adopted or reclaimed during the extended holding period, these holding costs would shift to the animal adoption fees or penalties authorized pursuant to Food and Agriculture Code sections 31108 (b), 31752, and 31753 and Penal Code section 597f, resulting in savings to county funds (license fees and other funds). Furthermore, the counties

²⁵ Statutes of 1998, chapter 747.

will avoid euthanasia costs that would have been incurred under prior law. This offsetting savings could be determined by tracking the number of animals adopted or reclaimed during the extended holding period. Any such savings must be identified and deducted from the reimbursement claim.²⁶

Thus, the Department recommends that the Commission adopt the following language in Section VII of the Parameters and Guidelines:

Claims for reimbursement must identify sources of offsetting savings. Offsetting savings include, but are not limited to, holding and euthanasia costs for animals that would have been euthanized but for the extended holding period and which are instead adopted or reclaimed. These costs, that would have been funded from county license fees or other funds if the animal had been euthanized, are avoided (euthanasia costs) or passed via an adoption fee or penalty levied to the person adopting or reclaiming the animal (holding costs).

In the present case, the test claim legislation did not expressly repeal or reduce any of the existing state requirements relating to the care and maintenance of animals. Rather, as the Commission determined, the test claim legislation imposes new, state mandated, activities on local agencies. The Commission noted in its Statement of Decision, however, that one of the purposes of the test claim legislation was to reduce the rate of euthanasia. The Statement of Decision (on Bates page 173) states the following:

The Commission agrees that one of the purposes of the test claim legislation was to reduce the cost of euthanasia. The Legislature expressly declared in Section 1 of the test claim legislation that the “redemption of owned pets and adoption of lost or stray adoptable animals is preferable to incurring social and economic costs of euthanasia.” To reduce the rate of killing, the Legislature made it easier for owners to redeem their pets by establishing longer holding periods, mandatory record keeping, and lost and found lists.

The Commission also noted the contention of the San Francisco SPCA that the test claim legislation is cost-effective and can be accomplished on a revenue-neutral or revenue-positive basis without expenditures for new facilities or increased space.

However, there is no direct evidence in the record that local agencies are saving money as a result of the test claim legislation. Rather, as reflected in the Statement of Decision (Bates page 173), the record contains several declarations stating that local agencies have incurred increased costs as a result of the test claim legislation.

The Commission’s regulations require an agency to identify and deduct offsetting savings experienced as a result of the mandate. Section 1183.1, subdivision (a)(9), of the Commission’s regulations states that “all proposed parameters and guidelines must allow

²⁶ Exhibit M.

for any offsetting savings in the same program experienced as a result of the same statute(s) or executive order(s) found to contain a mandate.”²⁷

In accordance with this regulation, the first sentence in the boilerplate language in Section VII of the Parameters and Guidelines states the following: “Any offsetting savings that the claimant experiences as a direct result of this mandate must be deducted from the costs claimed.”

Staff finds the boilerplate language addresses the concerns of the Department of Finance.

Staff Recommendation

Staff recommends that the Commission adopt staff’s Proposed Parameters and Guidelines, which begin on page 21.

Staff also recommends that the Commission authorize staff to make any non-substantive, technical corrections to the parameters and guidelines following the hearing.

²⁷ The California Supreme Court has held that “a regulation adopted by a state administrative agency pursuant to a delegation of rulemaking authority by the Legislature has the force and effect of a statute.” *Agricultural Labor Relations Bd. v. Superior Court* (1976) 16 Cal.3d 392, 401. (Exhibit R.)

STAFF'S PROPOSED PARAMETERS AND GUIDELINES

Civil Code Sections 1834 and 1846;
Food and Agriculture Code Sections 31108, 31752, 31752.5, 31753, 32001, and 32003
As Added or Amended by Statutes of 1998, Chapter 752

Animal Adoption

I. Summary of the Mandate

The test claim legislation was enacted in an attempt to end the euthanasia of adoptable and treatable animals. Generally, the test claim legislation increased the holding period for stray and abandoned dogs, cats, and other specified animals; required the verification of the temperament of feral cats; required the posting of lost and found lists; required the maintenance of records for impounded animals; and required that impounded animals receive “necessary and prompt veterinary care.”

The Commission partially approved this test claim, pursuant to article XIII B, section 6 of the California Constitution and Government Code section 17514, for the *increased costs* in performing the following activities only:

1. Providing care and maintenance during the increased holding period for impounded dogs and cats that are ultimately euthanized. The increased holding period shall be measured by calculating the difference between three days from the day of capture and four business days from the day after impoundment, as specified below in 3 (a) and 3 (b), or six business days from the day after impoundment (Food & Agr. Code, §§ 31108, 31752);
2. Providing care and maintenance for four business days from the day after impoundment, as specified below in 3 (a) and 3 (b), or six business days from the day after impoundment, for impounded rabbits, guinea pigs, hamsters, pot-bellied pigs, birds, lizards, snakes, turtles, or tortoises legally allowed as personal property that are ultimately euthanized (Food & Agr. Code, § 31753);
3. For dogs, cats, and other specified animals held for four business days after the day of impoundment, either:
 - (a) Making the animal available for owner redemption on one weekday evening until at least 7:00 p.m., or one weekend day; or
 - (b) For those local agencies with fewer than three full-time employees or that are not open during all regular weekday business hours, establishing a procedure to enable owners to reclaim their animals by appointment at a mutually agreeable time when the agency would otherwise be closed (Food & Agr., Code §§ 31108, 31752, and 31753);
4. Verifying whether a cat is feral or tame by using a standardized protocol (Food & Agr. Code, § 31752.5);

5. Posting lost and found lists (Food & Agr. Code, § 32001);
6. Maintaining records on animals that are not medically treated by a veterinarian, but are either taken up, euthanized after the holding period, or impounded (Food & Agr. Code, § 32003); and
7. Providing “necessary and prompt veterinary care” for abandoned animals, other than injured cats and dogs given emergency treatment, that are ultimately euthanized (Civ.Code, §§ 1834 and 1846).

II. Eligible Claimants

Any city, county, city and county, dependent special district, and joint powers authority comprised of a city, county, and/or city and county that incurs increased costs as a result of this reimbursable state mandated program is eligible to claim reimbursement of those costs.

III. Period of Reimbursement

Government Code section 17557, as amended by Statutes of 1998, Chapter 681 (which became effective on September 22, 1998), states that a test claim shall be submitted on or before June 30 following a fiscal year in order to establish eligibility for reimbursement for that fiscal year. On December 22, 1998, the County of Los Angeles filed the test claim for this mandated program, establishing eligibility for reimbursement beginning on or after July 1, 1997.

However, except for the amendments to Food and Agriculture Code sections 31108 and 31752, Statutes of 1998, Chapter 752 became operative and effective on January 1, 1999. Therefore, except for the amendments to Food and Agriculture Code sections 31108 and 31752, the costs incurred for Statutes of 1998, Chapter 752 are eligible for reimbursement on or after January 1, 1999.

Section 21 of Statutes of 1998, Chapter 752 establishes an operative date of July 1, 1999 for the amendments to Food and Agriculture Code section 31108 (holding period for stray dogs) and Food and Agriculture Code sections 31752 (holding period for stray cats). Therefore, costs incurred for Food and Agriculture Code sections 31108 and 31752, as amended by Statutes of 1998, Chapter 752, are eligible for reimbursement on or after July 1, 1999.

Actual costs for one fiscal year shall be included in each claim. Estimated costs for the subsequent year may be included on the same claim, if applicable. Pursuant to section 17561, subdivision (d)(1) of the Government Code, all claims for reimbursement of initial years’ costs shall be submitted within 120 days of notification by the State Controller of the issuance of claiming instructions.

If the total costs for a given year do not exceed \$200, no reimbursement shall be allowed, except as otherwise allowed by Government Code section 17564.

IV. Reimbursable Activities

For each eligible claimant, all direct and indirect costs of labor, materials, supplies, fixed assets, contracted services, training and travel for the performance of the activities listed below are eligible for reimbursement.

Except as specified in Component (B)(3) and (4), reimbursement claims for the performance of the activities listed below shall be based on actual or estimated costs as provided in Government Code section 17560.

A. One Time Activities

1. Develop policies and procedures to implement the reimbursable activities listed in Section IV (B) of these parameters and guidelines.
2. Train staff on the reimbursable activities listed in ~~part~~ Section IV (B) of these parameters and guidelines. (One-time per employee.)
- ~~3. Procure medical, kennel, and computer equipment necessary to comply with the reimbursable activities listed in Section IV (B) of these parameters and guidelines to the extent these costs are not claimed as an indirect cost under Section V. (B) of these parameters and guidelines.~~
4. Develop or procure computer software for the maintenance of records on animals specified in Section IV (B) (8) of these parameters and guidelines to the extent these costs are not claimed as an indirect cost under Section V (B) (8) of these parameters and guidelines. If the computer software is utilized in some way that is not directly related to the maintenance of records specified in Section IV (B) (8), only the pro rata portion of the activity that is used for compliance with Section IV (B) (8) is reimbursable.

B. Ongoing Activities

1. Acquisition of Additional Space and/or Construction of New Facilities

Beginning January 1, 1999 - Acquiring additional space by purchase or lease and/or construction of new facilities to provide appropriate or adequate shelter space necessary to comply with the mandated activities during the increased holding period for impounded stray or abandoned dogs, cats, and other animals specified in Statutes of 1998, Chapter 752 that die during the increased holding period or are ultimately euthanized.

Eligible claimants are only entitled to reimbursement for the proportionate share of actual costs required to plan, design, acquire, and/or build facilities in a given fiscal year based on the pro rata representation of impounded stray or abandoned dogs, cats, and other animals specified in Statutes of 1998, Chapter 752 that are held during

the increased holding period specified in Sections IV (B) (3) and (4) of these Parameters and Guidelines and die during the increased holding period or are ultimately euthanized, to the total population of animals housed in the facility (including those animals that are excluded from reimbursement, as specified in Sections IV (B) (3) and (4) of these Parameters and Guidelines) during the entire holding period required by Food and Agriculture Code sections 31108, 31752 and 31753.

Supporting Documentation Submitted with the Initial and Subsequent Reimbursement Claims

Acquiring additional space and/or construction of new facilities is reimbursable only to the extent that an eligible claimant submits, with the initial and/or subsequent reimbursement claim, documentation reflecting the following:

A determination by the governing board that acquiring additional space and/or constructing new facilities is necessary for the increased holding period required by Statutes of 1998, Chapter 752 because the existing facilities do not reasonably accommodate impounded stray or abandoned dogs, cats and other specified animals that are ultimately euthanized. The determination by the governing board shall include all of the following findings:

- The average daily census of impounded stray or abandoned dogs, cats, and other animals specified in Statutes of 1998, Chapter 752 that were impounded in 1998. Average Daily Census is defined as the average number of impounded stray or abandoned dogs, cats, and other animals specified in Statutes of 1998, Chapter 752 housed on any given day, in a 365-day period;
- The average daily census of impounded stray or abandoned dogs, cats, and other animals specified in Statutes of 1998, Chapter 752 that were impounded in a given year under the holding periods required by Food and Agriculture Code sections 31108, 31752, and 31753, as added or amended by Statutes of 1998, Chapter 752;
- Existing facilities are not appropriately configured and/or equipped to comply with the increased holding period required by Statutes of 1998, Chapter 752;
- Remodeling existing facilities is not feasible or is more expensive than acquiring additional space and/or constructing new facilities; and
- Contracting with existing private or public shelters in the area to house the increase of impounded stray or abandoned dogs, cats, or other animals specified in Statutes of 1998, Chapter

752 is not feasible or is more expensive than acquiring additional space and/or constructing new facilities.

Documentation requirements may be satisfied in whole or in part by staff agenda items, staff reports, minutes of governing board meetings, transcripts of governing board meetings, certification by the governing board describing the findings and determination, and/or a resolution adopted by the governing board pursuant to Food and Agriculture Code section 31755, as added by Statutes of 1999, Chapter 81 (Assembly Bill 1482).

2. Remodeling/Renovating Existing Facilities

Beginning January 1, 1999 - Remodeling/renovating existing facilities to provide appropriate or adequate shelter space necessary to comply with the mandated activities during the increased holding period for impounded stray or abandoned dogs, cats, and other animals specified in Statutes of 1998, Chapter 752 that die during the increased holding period or are ultimately euthanized.

Eligible claimants are only entitled to reimbursement for the proportionate share of actual costs required to plan, design, remodel and/or renovate existing facilities in a given fiscal year based on the pro rata representation of impounded stray or abandoned dogs, cats, and other animals specified in Statutes of 1998, Chapter 752 that are held during the *increased* holding period specified in Sections IV (B) (3) and (4) of these Parameters and Guidelines and die during the increased holding period or are ultimately euthanized, to the total population of animals housed in the facility (including those animals that are excluded from reimbursement, as specified in Sections IV (B) (3) and (4) of these Parameters and Guidelines) during the entire holding period required by Food and Agriculture Code sections 31108, 31752 and 31753.

Supporting Documentation Submitted with the Initial and Subsequent Reimbursement Claims

Remodeling/renovating existing facilities is reimbursable only to the extent that an eligible claimant submits, with the initial and/or subsequent reimbursement claim, documentation reflecting the following:

A determination by the governing board or a delegated representative that remodeling/renovating existing facilities is necessary because the existing facilities do not reasonably accommodate impounded stray or abandoned dogs, cats and other specified animals that are ultimately euthanized for the increased holding period required by Statutes of 1998, Chapter 752. The determination by the governing board or delegated representative shall include all of the following findings:

- The average daily census of impounded stray or abandoned dogs, cats, and other animals specified in Statutes of 1998, Chapter 752 that were impounded in 1998. Average Daily Census is defined as the average number of impounded stray or abandoned dogs, cats, and other animals specified in Statutes of 1998, Chapter 752 housed on any given day, in a 365-day period;
- The average daily census of impounded stray or abandoned dogs, cats, and other animals specified in Statutes of 1998, Chapter 752 in a given year under the holding periods required by Food and Agriculture Code sections 31108, 31752, and 31753, as added or amended by Statutes of 1998, Chapter 752;
- Existing facilities are not appropriately configured and/or equipped to comply with the increased holding period required by Statutes of 1998, Chapter 752;
- Contracting with existing private or public shelters in the area to house the increase of impounded stray or abandoned dogs, cats, or other animals specified in Statutes of 1998, Chapter 752 is not feasible or is more expensive than remodeling/renovating existing facilities.

Documentation requirements may be satisfied in whole or in part by staff agenda items, staff reports, minutes of governing board meetings, transcripts of governing board meetings, certification by the governing board or declaration from the delegated representative describing the findings and determination, and/or a resolution adopted by the governing board pursuant to Food and Agriculture Code section 31755, as added by Statutes of 1999, Chapter 81 (Assembly Bill 1482).

3. Care and Maintenance for Impounded Stray or Abandoned Dogs and Cats that Die During the Increased Holding Period or are Ultimately Euthanized (Food & Agr. Code, §§ 31108, 31752)

Beginning July 1, 1999 - Providing care and maintenance during the increased holding period for impounded stray or abandoned dogs and cats that die during the increased holding period or are ultimately euthanized. The increased holding period shall be measured by calculating the difference between three days from the day of capture, and four or six business days from the day after impoundment.

Exclusions

Eligible claimants are *not* entitled to reimbursement for the care and maintenance of the following population of dogs and cats:

- Stray or abandoned dogs and cats that are irremediably suffering from a serious illness or severe injury (Food & Agr. Code, § 17006);
- Newborn stray or abandoned dogs and cats that need maternal care and have been impounded without their mothers (Food & Agr. Code, § 17006);
- Stray or abandoned dogs and cats too severely injured to move or where a veterinarian is not available and it would be more humane to dispose of the animal (Pen. Code, §§ 597.1, subd. (e), 597f, subd. (d));
- Owner relinquished dogs and cats; and
- Stray or abandoned dogs and cats that are ultimately redeemed, adopted, or released to a nonprofit animal rescue or adoption organization.

Methods for Claiming Costs

Eligible claimants may elect one of following two methods to claim costs for the care and maintenance of impounded stray or abandoned dogs and cats that die during the increased holding period or are ultimately euthanized:

- Actual Cost Method – Under the actual cost method, actual reimbursable care and maintenance costs per animal per day are computed for an annual claim period.
 - a) Determine the total annual cost of care and maintenance for all dogs and cats impounded at a facility. Total cost of care and maintenance includes labor, materials, supplies, indirect costs, and contract services.
 - b) Determine the average daily census of dogs and cats.
 - c) Multiply the average daily census of dogs and cats by 365 = yearly census of dogs and cats.
 - d) Divide the total annual cost of care by the yearly census of dogs and cats = cost per animal per day.
 - e) Multiply the cost per animal per day, by the number of impounded stray or abandoned dogs and cats that die during the increased holding period or are ultimately euthanized, by each reimbursable day (the difference between three days from the day of capture, and four or six business days from the day after impoundment).
- Time Study Method – Under the time study method, a random sample of impounded stray or abandoned dogs and cats are

observed to determine the amount of time to provide care and maintenance during a reimbursable day.

The time study shall be developed using one representative month each quarter and be supported with actual source documentation. Time studies shall be conducted on a more frequent basis if there are significant variations of time expended from month to month. The time study shall identify hours devoted to each specific category. If the time study supports a fixed-cost approach such as an animal day (i.e., dog-day, cat-day, etc.), the eligible claimant shall document the analysis supporting the method used.

Time records used to support the time study shall:

- a) Reflect an after-the-fact distribution of each employee's actual activity;
 - b) Account for the total activity for which each employee is compensated;
 - c) Account for the total labor hours of the month;
 - d) Be signed and dated by the employee not later than the end of the pay period that follows the pay period covered by the report; and
 - e) Document, by signature or initials and date, supervisor approval.
4. Care and Maintenance for Impounded Stray or Abandoned Animals Specified in Food and Agriculture Code Section 31753 that Die During the Increased Holding Period or are Ultimately Euthanized (Food & Agr. Code, § 31753)

Beginning January 1, 1999 - Providing care and maintenance for four or six business days from the day after impoundment for impounded stray or abandoned rabbits, guinea pigs, hamsters, pot-bellied pigs, birds, lizards, snakes, turtles, and tortoises legally allowed as personal property that die during the increased holding period or are ultimately euthanized.

Exclusions

Eligible claimants are *not* entitled to reimbursement for the care and maintenance of the following population of animals:

- Stray or abandoned animals that are irremediably suffering from a serious illness or severe injury (Food & Agr. Code, § 17006);
- Newborn animals that need maternal care and have been impounded without their mothers (Food & Agr. Code, § 17006);

- Stray or abandoned animals too severely injured to move or where a veterinarian is not available and it would be more humane to dispose of the animal (Pen. Code, §§ 597.1, subd. (e), 597f, subd. (d));
- Owner relinquished animals; and
- Stray or abandoned animals that are ultimately redeemed, adopted, or released to a nonprofit animal rescue or adoption organization.

Methods for Claiming Costs

Eligible claimants may elect one of following two methods to claim costs for the care and maintenance of impounded stray or abandoned animals specified in Food and Agriculture Code section 31753 that die during the increased holding period or are ultimately euthanized:

- Actual Cost Method – Under the actual cost method, actual reimbursable care and maintenance costs per animal per day are computed for an annual claim period.
 - a) Determine the total annual cost of care and maintenance for all animals specified in Food and Agriculture Code section 31753 that are impounded at a facility. Total cost of care and maintenance includes labor, materials, supplies, indirect costs, and contract services.
 - b) Determine the average daily census of the animals specified in Food and Agriculture Code section 31753.
 - c) Multiply the average daily census of the animals specified in Food and Agriculture Code section 31753 by 365 = yearly census of animals specified in Food and Agriculture Code section 31753.
 - d) Divide the total annual cost of care by the yearly census of animals specified in Food and Agriculture Code section 31753 = cost per animal per day.
 - e) Multiply the cost per animal per day, by the number of impounded stray or abandoned animals specified in Food and Agriculture Code section 31753 that die during the increased holding period or are ultimately euthanized, by each reimbursable day (four or six business days from the day after impoundment).
- Time Study Method – Under the time study method, a random sample of impounded stray or abandoned animals are observed to determine the amount of time to provide care and maintenance during a reimbursable day.

The time study shall be developed using one representative month each quarter and be supported with actual source documentation. Time studies shall be conducted on a more frequent basis if there are significant variations of time expended from month to month. The time study shall identify hours devoted to each specific category. If the time study supports a fixed-cost approach such as an animal day, the eligible claimant shall document the analysis supporting the method used.

Time records used to support the time study shall:

- a) Reflect an after-the-fact distribution of each employee's actual activity;
- b) Account for the total activity for which each employee is compensated;
- c) Account for the total labor hours of the month;
- d) Be signed and dated by the employee not later than the end of the pay period that follows the pay period covered by the report; and
- e) Document, by signature or initials and date, supervisor approval.

5. Agencies Using the Holding Period of Four Business Days After the Day of Impoundment (Food & Agr. Code, §§ 31108, 31752, 31753)

Beginning January 1, 1999 - For impounded animals specified in Food and Agriculture Code section 31753, either:

- Making the animal available for owner redemption on one weekday evening until at least 7:00 p.m., or one weekend day; or
- For those local agencies with fewer than three full-time employees or that are not open during all regular weekday business hours, establishing a procedure to enable owners to reclaim their animals by appointment at a mutually agreeable time when the agency would otherwise be closed.

Beginning July 1, 1999 - For impounded dogs and cats, either:

- Making the animal available for owner redemption on one weekday evening until at least 7:00 p.m., or one weekend day; or
- For those local agencies with fewer than three full-time employees or that are not open during all regular weekday business hours, establishing a procedure to enable owners to reclaim their animals by appointment at a mutually agreeable time when the agency would otherwise be closed.

6. Feral Cats (Food & Agr. Code, § 31752.5)

Beginning January 1, 1999 - Verifying whether a cat is feral or tame by using a standardized protocol within the first three days of the required holding period if an apparently feral cat has not been reclaimed by its owner or caretaker.

7. Lost and Found Lists (Food & Agr. Code, § 32001)

Beginning January 1, 1999 - Providing owners of lost animals and those who find lost animals with all of the following:

- Ability to list the animals they have lost or found on “lost and found” lists maintained by the local agency;
- Referrals to animals listed that may be the animals the owner or finders have lost or found;
- The telephone numbers and addresses of other pounds and shelters in the same vicinity;
- Advice as to means of publishing and disseminating information regarding lost animals; and
- The telephone numbers and addresses of volunteer groups that may be of assistance in locating lost animals.

8. Maintaining *Non-Medical* Records (Food & Agr. Code, § 32003)

Beginning January 1, 1999 - Maintaining non-medical records on animals that are either taken up, euthanized after the holding period, or impounded. Such records shall include the following:

- The date the animal was taken up, euthanized, or impounded;
- The circumstances under which the animal is taken up, euthanized, or impounded;
- The names of the personnel who took up, euthanized, or impounded the animal; and
- The final disposition of the animal, including the name of the person who euthanized the animal or the name and address of the adopting party.

The cost of software license renewal contracts, to the extent these costs are not claimed as an indirect cost under these parameters and guidelines, is eligible for reimbursement under Section V (A) (2) of these parameters and guidelines. If the computer software is utilized in some way that is not directly related to the maintenance of records specified in this section, only the pro rata portion of the software license renewal contract that is used for compliance with this section is reimbursable.

9. “Necessary and Prompt Veterinary Care” (Civ. Code, §§ 1834 and 1846)

Beginning January 1, 1999 - Providing “necessary and prompt veterinary care” for stray and abandoned animals, other than injured cats and dogs given emergency treatment, that die during the holding period or are ultimately euthanized, during the ~~increased~~ holding periods specified in Statutes of 1998, Chapter 752.

“Necessary and prompt veterinary care” means all ~~reasonable~~ reasonably necessary medical procedures performed by a veterinarian or someone under the supervision of a veterinarian to make stray or abandoned animals “adoptable.” The following veterinary procedures, if conducted, are eligible for reimbursement:

- An initial physical examination of the animal to determine the animal’s baseline health status and classification as “adoptable,” “treatable,” or “non-rehabilitatable.”
- A wellness vaccine administered to “treatable” or “adoptable” animals.
- Veterinary care to stabilize and/or relieve the suffering of a “treatable” animal.
- Veterinary care intended to remedy any applicable disease, injury, or congenital or hereditary condition that adversely affects the health of a “treatable” animal or that is likely to adversely affect the animal’s health in the future, until the animal becomes “adoptable.”

Population Exclusions

Eligible claimants are *not* entitled to reimbursement for providing “necessary and prompt veterinary care” to the following population of animals:

- Animals that are irremediably suffering from a serious illness or severe injury (Food & Agr. Code, § 17006);
- Newborn animals that need maternal care and have been impounded without their mothers (Food & Agr. Code, § 17006);
- Animals too severely injured to move or where a veterinarian is not available and it would be more humane to dispose of the animal. (Pen. Code, §§ 597.1, subd. (e), 597f, subd. (d));
- Owner relinquished animals; and
- Stray or abandoned animals that are ultimately redeemed, adopted, or released to a nonprofit animal rescue or adoption organization.

Veterinary Care Exclusions

Eligible claimants are *not* entitled to reimbursement for providing the following veterinary procedures:

- Emergency treatment given to injured cats and dogs (Pen. Code, § 597f, subd. (b));
- Administration of rabies vaccination to dogs (Health & Saf. Code, § 121690);
- Implantation of microchip identification;
- Spay or neuter surgery and treatment;
- Euthanasia.

10. Beginning January 1, 1999 - Procuring medical, kennel, and computer equipment necessary to comply with the reimbursable activities listed in Section IV (B) of these parameters and guidelines, to the extent these costs are not claimed as an indirect cost under Section V (B) of these parameters and guidelines. If the medical, kennel, and computer equipment is utilized in some way not directly related to the mandated program or the population of animals listed in Section IV (B), only the pro rata portion of the activity that is used for the purposes of the mandated program is reimbursable.

V. Claim Preparation and Submission

Each claim for reimbursement must be timely filed and identify each cost element for which reimbursement is claimed under this mandate. Claimed costs must be identified to each reimbursable activity identified in Section IV. of these Parameters and Guidelines.

A. Direct Costs

Direct costs are defined as costs that can be traced to specific goods, services, programs, activities, or functions and shall be supported by the following cost element information:

1. Salaries and Benefits

Identify the employee(s), and/or show the classification of the employee(s) involved. Describe the reimbursable activities performed, specify the actual time devoted to each activity by each employee, and the productive hourly rate, and related fringe benefits.

Reimbursement for personnel services includes compensation paid for salaries, wages, and employee fringe benefits. Employee fringe benefits include regular compensation paid to an employee during periods of authorized absences (e.g., annual leave, sick leave) and the employer's contributions to social security, pension plans, insurance, and worker's compensation insurance. Fringe benefits

are eligible for reimbursement when distributed equitably to all job activities performed by the employee.

2. Materials and Supplies

Only expenditures that can be identified as direct costs of this mandate may be claimed. List the cost of the materials and supplies consumed specifically for the purposes of this mandate. Purchases shall be claimed at the actual price after deducting cash discounts, rebates, and allowances received by the claimant. Supplies that are withdrawn from inventory shall be charged based on a recognized method of costing, consistently applied.

3. Contract Services

Provide the name(s) of the contractor(s) who performed the services, including any fixed contracts for services. Describe the reimbursable activity(ies) performed by each named contractor and give the number of actual hours spent on the activities, if applicable. Show the inclusive dates when services were performed and itemize all costs for those services. Attach consultant invoices to the claim.

4. Travel

Travel expenses for mileage, per diem, lodging, and other employee entitlements are eligible for reimbursement in accordance with the rules of the local jurisdiction. Provide the name(s) of traveler(s), purpose of travel, inclusive dates and times of travel, destination point(s), and travel costs.

5. Training

The cost of training an employee to perform the mandated activities, as specified in Section IV (A) of these Parameters and Guidelines, is eligible for reimbursement. Identify the employee(s) by name and job classification. Provide the title and subject of the training session, the date(s) attended, and the location. Reimbursable costs may include salaries and benefits, registration fees, transportation, lodging, and per diem.

6. Fixed Assets

List the costs of the fixed assets that have been acquired specifically for the purpose of this mandate. If the fixed asset is utilized in some way not directly related to the mandated program, only the pro-rata portion of the asset that is used for the purposes of the mandated program is reimbursable.

B. Indirect Costs

Compensation for indirect costs is eligible for reimbursement. Indirect costs are those that have been incurred for common or joint purposes. These costs

benefit more than one cost objective and cannot be readily identified with a particular final cost objective without effort disproportionate to the results achieved. After direct costs have been determined and assigned to other activities, as appropriate, indirect costs are those remaining to be allocated to benefited cost objectives. A cost may not be allocated as an indirect cost if any other cost incurred for the same purpose, in like circumstances, has been claimed as a direct cost.

Indirect costs include (a) the indirect costs originating in each department or agency of the governmental unit carrying out state mandated programs and (b) the costs of central governmental services distributed through the central service cost allocation plan and not otherwise treated as direct costs.

Claimants have the option of using 10% of direct labor, excluding fringe benefits, or preparing an Indirect Cost Rate Proposal (ICRP) pursuant to the Office of Management and Budget (OMB) Circular A-87.

VI. Supporting Data

For auditing purposes, all costs claimed shall be traceable to source documents (e.g., employee time records, cost allocation reports, invoices, receipts, purchase orders, contracts, worksheets, calendars, declarations, time studies, etc.) that show evidence of the validity of such costs and their relationship to this mandate. All documentation in support of claimed costs shall be made available to the State Controller's Office, as may be requested. Pursuant to Government Code section 17558.5, these documents must be kept on file by the agency submitting the claim for a period of no less than two years after the later of (1) the end of the calendar year in which the reimbursement claim is filed or last amended, or (2) if no funds are appropriated for the fiscal year for which the claim is made, the date of initial payment of the claim.

VII. Offsetting Savings and Other Reimbursements

Any offsetting savings that the claimant experiences as a direct result of this mandate must be deducted from the costs claimed. ~~Additionally, reimbursement for this mandate received from any source, including but not limited to licensing fees and fines received and applied pursuant to Food and Agriculture Code sections 30520 et seq., 30652, 31751 et seq., Government Code section 28502, and Penal Code section 597f; other state funds; and federal funds, shall be identified and deducted from this claim.~~ Additionally, reimbursement for this mandate received from any source shall be identified and deducted from this claim. These sources shall include, but not be limited to, rewards received under the authority of Civil Code section 1845; licensing fees and fines received and applied pursuant to Food and Agriculture Code section 30652, Government Code section 28502, and Penal Code section 597f; other state funds, and federal funds. The fees and fines received pursuant to Food and Agriculture Code section 30652 shall be deducted from the claim according to the priority specified in the statute and stated below:

- First, to pay fees for the issuance of dog license tags pursuant to Food and Agriculture Code section 30652, subdivision (a);
- Second, in accordance with Food and Agriculture Code section 30652, subdivision (b), any excess revenue held after the payment of dog license tags shall be applied to the fees, salaries, costs, expenses, or any or all of them for the enforcement of Division 14 of the Food and Agriculture Code, including Food and Agriculture Code section 31108, and all ordinances that are made pursuant to Division 14. Costs incurred under Food and Agriculture Code section 31108 are specified in Section IV (B) (1), (2), (3), and (5), and Section IV (A) of these parameters and guidelines. Any or all excess revenue must be applied to the costs incurred under Food and Agriculture Code section 31108 before any revenue can be applied to subdivisions (c) and (d) of Food and Agriculture Code section 30652.

VIII. State Controller's Office Required Certification

An authorized representative of the claimant shall be required to provide a certification of the claim, as specified in the State Controller's Office claiming instructions, for those costs mandated by the state contained herein.

IX. Parameters and Guidelines Amendments

Pursuant to title 2, California Code of Regulations, section 1183.2, Parameters and Guidelines amendments filed before the deadline for initial claims as specified in the Claiming Instructions shall apply to all years eligible for reimbursement as defined in the original Parameters and Guidelines. A Parameters and Guidelines amendment filed after the initial claiming deadline must be submitted on or before January 15, following a fiscal year in order to establish eligibility for reimbursement for the fiscal year.

County of Los Angeles, City of Lindsay, County of Tulare, County of Fresno
and Southeast Area Animal Control Authority, Claimants

Staff's Proposed Parameters and Guidelines and Final Staff Analysis have been completed and are enclosed for your review.

Hearing

The Proposed Parameters and Guidelines are set for hearing on February 28, 2002 at 9:30 a.m. in Room 126 of the State Capitol, Sacramento, California.

Hearing Procedures

If you wish to testify at the hearing, please complete the enclosed form and return the form, by fax or mail, to our office by Monday, February 25, 2002, at 5:00 p.m.

Testimony at the hearing will be presented in the following order: Claimants, the State Controller's Office, the Department of Finance, interested parties, and then interested persons.

The Chairperson may impose time limits on testimony as provided in the Commission's regulations. (Cal.Code Regs., tit.2, § 1182.2, subd. (b)(2).)

EXECUTIVE SUMMARY

I. SUMMARY OF THE MANDATE

The test claim legislation was enacted in an attempt to end the euthanasia of adoptable and treatable animals. Generally, the test claim legislation increased the holding period for stray and abandoned dogs, cats, and other specified animals; required the verification of the temperament of feral cats; required the posting of lost and found lists; required the maintenance of records for impounded animals; and required that impounded animals receive “necessary and prompt veterinary care.”

On January 25, 2001, the Commission on State Mandates (Commission) partially approved this test claim, pursuant to article XIII B, section 6 of the California Constitution and Government Code section 17514, for the *increased costs* in performing the following activities only:

1. Providing care and maintenance during the increased holding period for impounded dogs and cats that are ultimately euthanized. The increased holding period shall be measured by calculating the difference between three days from the day of capture and four business days from the day after impoundment, as specified below in 3 (a) and 3 (b), or six business days from the day after impoundment (Food & Agr. Code, §§ 31108, 31752);
2. Providing care and maintenance for four business days from the day after impoundment, as specified below in 3 (a) and 3 (b), or six business days from the day after impoundment, for impounded rabbits, guinea pigs, hamsters, pot-bellied pigs, birds, lizards, snakes, turtles, or tortoises legally allowed as personal property that are ultimately euthanized (Food & Agr. Code, § 31753);
3. For dogs, cats, and other specified animals held for four business days after the day of impoundment, either:

- (a) Making the animal available for owner redemption on one weekday evening until at least 7:00 p.m., or one weekend day; or
- (b) For those local agencies with fewer than three full-time employees or that are not open during all regular weekday business hours, establishing a procedure to enable owners to reclaim their animals by appointment at a mutually agreeable time when the agency would otherwise be closed (Food & Agr., Code §§ 31108, 31752, and 31753);
- 4. Verifying whether a cat is feral or tame by using a standardized protocol (Food & Agr. Code, § 31752.5);
- 5. Posting lost and found lists (Food & Agr. Code, § 32001);
- 6. Maintaining records on animals that are not medically treated by a veterinarian, but are either taken up, euthanized after the holding period, or impounded (Food & Agr. Code, § 32003); and
- 7. Providing “necessary and prompt veterinary care” for abandoned animals, other than injured cats and dogs given emergency treatment, that are ultimately euthanized (Civ.Code, §§ 1834 and 1846).

The Commission adopted the parameters and guidelines for this program on February 28, 2002.

Bureau of State Audits – Audit of the Animal Adoption Program

On March 12, 2003, the Joint Legislative Audit Committee authorized an audit of the *Animal Adoption* mandate. On October 15, 2003, the Bureau of State Audits (BSA) released its audit report on the *Animal Adoption* mandate. The audit report recommended that the Commission and the Legislature implement the following:

To ensure that local entities receive reimbursement only for costs associated with the increased holding period for eligible animals, the Legislature should direct the Commission to amend the parameters and guidelines of the *Animal Adoption* mandate to correct the formula for determining the reimbursable portion of acquiring additional shelter space.

In 2004, Assembly Bill (AB) 2224 (Stats. 2004, ch. 313) was enacted to direct the Commission to amend the parameters and guidelines for the *Animal Adoption* program to:

- 1. Amend the formula for determining the reimbursable portion of acquiring or building additional shelter space that is larger than needed to comply with the increased holding period to specify that costs incurred to address preexisting shelter overcrowding or animal population growth are not reimbursable.
- 2. Clarify how the costs for care and maintenance shall be calculated.

3. Detail the documentation necessary to support reimbursement claims under this mandate, in consultation with the Bureau of State Audits and the Controller's office.

(b) The parameters and guidelines, as amended pursuant to this section, shall apply to claims for costs incurred in fiscal years commencing with the 2005-06 fiscal year in which Chapter 752 of the Statutes of 1998 is not suspended pursuant to Section 17581.

(c) Before funds are appropriated to reimburse local agencies for claims related to costs incurred in fiscal years commencing with the 2005-06 fiscal year pursuant to Sections 1834 and 1846 of the Civil Code, and Sections 31108, 31752, 31752.5, 31753, 32001, and 32003 of the Food and Agricultural Code, known as the Animal Adoption mandate, local agencies shall file reimbursement claims pursuant to the parameters and guidelines amended pursuant to this section, and the Controller's revised claiming instructions.

On November 17, 2004, the State Controller's Office (SCO) submitted a proposed formula for determining the reimbursable portion of acquiring or building additional shelter space to be included in the parameters and guidelines.¹ On December 23, 2004, the Bureau of State Audits, affected state agencies and interested parties were invited to submit comments on the proposed formula and attend a prehearing conference. No comments were filed. On March 29, 2005 a prehearing was conducted to discuss the proposed formula. The prehearing was attended by Department of Finance, the SCO, numerous county representatives. Representatives from BSA did not attend the prehearing.

As a result of prehearing discussions, the SCO submitted a revised formula on May 16, 2005.² The attached proposed parameters and guidelines include that revised formula as modified by staff.

Discussion

Non-substantive, technical changes were made to the parameters and guidelines for purposes of clarification, consistency with language in recently adopted parameters and guidelines, and conformity to the Statement of Decision and statutory language.

Substantive changes were made to the following sections of the parameters and guidelines.

Section III. Period of Reimbursement

AB 2224 requires the amended parameters and guidelines to apply to reimbursement claims commencing with the 2005-2006 fiscal year, and any fiscal year where the *Animal*

¹ Exhibit A.

² Exhibit B.

Adoption mandate has not been suspended. Therefore, staff revised this section to clarify that the amended parameters and guidelines are effective July 1, 2005.

Section IV. Reimbursable Activities

AB 2224 requires the Commission to amend the formula for determining the reimbursable portion of acquiring or building additional shelter space that is larger than needed to comply with the increased holding period to specify that costs incurred to address preexisting shelter overcrowding or animal population growth are not reimbursable. The SCO submitted a revised formula to meet this requirement. Staff modified the revised formula to clarify the difference between the formula for dogs and cats and the formula for other animals.

AB 2224 also requires the parameters and guidelines to clarify how the costs for care and maintenance shall be calculated. The SCO's revised formula clarifies that to determine the average daily census for calculating care and maintenance, all dogs and cats impounded at a facility must be calculated. Staff made no modifications to this section of the proposal, and recommends that the CSM adopt the SCO's proposal.

Finally, AB 2224 requires the Commission to detail the documentation necessary to support reimbursement claims under this mandate, in consultation with the Bureau of State Audits and the SCO. Staff modified the parameters and guidelines to include language clarifying what type of documentation is necessary to support the reimbursement claims. This language is similar to language adopted in other parameters and guidelines.

Staff Recommendation

Staff recommends the Commission adopt the proposed amendments to the parameters and guidelines for the *Animal Adoption* program beginning on page 5.

Staff also recommends that the Commission authorize staff to make any non-substantive, technical corrections to the parameters and guidelines following the hearing.

PROPOSED PARAMETERS AND GUIDELINES AMENDMENT

Civil Code Sections 1834 and 1846;
Food and Agriculture Code Sections 31108, 31752, 31752.5, 31753, 32001, and 32003
As Added or Amended by Statutes of 1998, Chapter 752

AND

Amended Pursuant to Statutes 2004, Chapter 313 (AB 2224) and
Request of the State Controller's Office

Animal Adoption

I. Summary of the Mandate

The test claim legislation was enacted in an attempt to end the euthanasia of adoptable and treatable animals. Generally, the test claim legislation increased the holding period for stray and abandoned dogs, cats, and other specified animals; required the verification of the temperament of feral cats; required the posting of lost and found lists; required the maintenance of records for impounded animals; and required that impounded animals receive “necessary and prompt veterinary care.”

The Commission partially approved this test claim, pursuant to article XIII B, section 6 of the California Constitution and Government Code section 17514, for the *increased costs* in performing the following activities only:

1. Providing care and maintenance during the increased holding period for impounded dogs and cats that are ultimately euthanized. The increased holding period shall be measured by calculating the difference between three days from the day of capture and four business days from the day after impoundment, as specified below in 3 (a) and 3 (b), or six business days from the day after impoundment (Food & Agr. Code, §§ 31108, 31752);
2. Providing care and maintenance for four business days from the day after impoundment, as specified below in 3 (a) and 3 (b), or six business days from the day after impoundment, for impounded rabbits, guinea pigs, hamsters, pot-bellied pigs, birds, lizards, snakes, turtles, or tortoises legally allowed as personal property that are ultimately euthanized (Food & Agr. Code, § 31753);
3. For dogs, cats, and other specified animals held for four business days after the day of impoundment, either:
 - (a) Making the animal available for owner redemption on one weekday evening until at least 7:00 p.m., or one weekend day; or

(b) For those local agencies with fewer than three full-time employees or that are not open during all regular weekday business hours, establishing a procedure to enable owners to reclaim their animals by appointment at a mutually agreeable time when the agency would otherwise be closed (Food & Agr., Code §§ 31108, 31752, and 31753);

4. Verifying whether a cat is feral or tame by using a standardized protocol (Food & Agr. Code, § 31752.5);
5. Posting lost and found lists (Food & Agr. Code, § 32001);
6. Maintaining records on animals that are not medically treated by a veterinarian, but are either taken up, euthanized after the holding period, or impounded (Food & Agr. Code, § 32003); and
7. Providing “necessary and prompt veterinary care” for abandoned animals, other than injured cats and dogs given emergency treatment, that are ultimately euthanized (Civ.Code, §§ 1834 and 1846).

II. Eligible Claimants

Any city, county, city and county, dependent special district, and joint powers authority comprised of a city, county, and/or city and county that incurs increased costs as a result of this reimbursable state mandated program is eligible to claim reimbursement of those costs.

III. Period of Reimbursement

The period of reimbursement for the activities in this parameters and guidelines amendment begins on July 1, 2005.

Pursuant to Government Code section 17560, reimbursement for state-mandated costs may be claimed as follows:

1. A local agency may file an estimated reimbursement claim by January 15 of the fiscal year in which costs are to be incurred, and, by January 15 following that fiscal year shall file an annual reimbursement claim that details the costs actually incurred for that fiscal year; or it may comply with the provisions of subdivision (b).
2. A local agency may, by January 15 following the fiscal year in which costs are incurred, file an annual reimbursement claim that details the costs actually incurred for that fiscal year.
3. In the event revised claiming instructions are issued by the Controller pursuant to subdivision (c) of section 17558 between October 15 and January 15, a local agency filing an annual reimbursement claim shall have 120 days following the issuance date of the revised claiming instructions to file a claim.

~~Government Code section 17557, as amended by Statutes of 1998, Chapter 681 (which became effective on September 22, 1998), states that a test claim shall be submitted on or before June 30 following a fiscal year in order to establish eligibility for reimbursement for that fiscal year. On~~

~~December 22, 1998, the County of Los Angeles filed the test claim for this mandated program, establishing eligibility for reimbursement beginning on or after July 1, 1997.~~

~~However, except for the amendments to Food and Agriculture Code sections 31108 and 31752, Statutes of 1998, Chapter 752 became operative and effective on January 1, 1999. Therefore, except for the amendments to Food and Agriculture Code sections 31108 and 31752, the costs incurred for Statutes of 1998, Chapter 752 are eligible for reimbursement on or after January 1, 1999.~~

~~Section 21 of Statutes of 1998, Chapter 752 establishes an operative date of July 1, 1999 for the amendments to Food and Agriculture Code section 31108 (holding period for stray dogs) and Food and Agriculture Code sections 31752 (holding period for stray cats). Therefore, costs incurred for Food and Agriculture Code sections 31108 and 31752, as amended by Statutes of 1998, Chapter 752, are eligible for reimbursement on or after July 1, 1999.~~

~~Reimbursable a~~Actual costs for one fiscal year shall be included in each claim. Estimated costs for the subsequent year may be included on the same claim, if applicable. Pursuant to Government Code section 17561, subdivision (d)(1) ~~of the Government Code~~, all claims for reimbursement of initial years' costs shall be submitted within 120 days of ~~notification by the issuance of the~~ State Controller's ~~of the issuance of~~ claiming instructions. If the total costs for a given fiscal year do not exceed \$1,000, no reimbursement shall be allowed, except as otherwise allowed by Government Code section 17564.

There shall be no reimbursement for any period in which the Legislature has suspended the operation of a mandate pursuant to state law.

~~If the total costs for a given year do not exceed \$200, no reimbursement shall be allowed, except as otherwise allowed by Government Code section 17564.~~

IV. Reimbursable Activities

To be eligible for mandated cost reimbursement for any fiscal year, only actual costs may be claimed. Actual costs are those costs actually incurred to implement the mandated activities. Actual costs must be traceable and supported by source documents that show the validity of such costs, when they were incurred, and their relationship to the reimbursable activities. A source document is a document created at or near the same time the actual cost was incurred for the event or activity in question. Source documents may include, but are not limited to, employee time records or time logs, sign-in sheets, invoices, and receipts.

Evidence corroborating the source documents may include, but is not limited to, worksheets, cost allocation reports (system generated), purchase orders, contracts, agendas, training packets, and declarations. Declarations must include a certification or declaration stating, "I certify (or declare) under penalty of perjury under the laws of the State of California that the foregoing

is true and correct,” and must further comply with the requirements of Code of Civil Procedure section 2015.5. Evidence corroborating the source documents may include data relevant to the reimbursable activities otherwise in compliance with local, state, and federal government requirements. However, corroborating documents cannot be substituted for source documents.

The claimant is only allowed to claim and be reimbursed for increased costs for reimbursable activities identified below. Increased cost is limited to the cost of an activity that the claimant is required to incur as a result of the mandate.

For each eligible claimant, the following activities are reimbursable:

~~For each eligible claimant, all direct and indirect costs of labor, materials, supplies, fixed assets, contracted services, training and travel for the performance of the activities listed below are eligible for reimbursement.~~

~~Except as specified in Component (B)(3) and (4), reimbursement claims for the performance of the activities listed below shall be based on actual or estimated costs as provided in Government Code section 17560.~~

A. One Time Activities

1. Develop policies and procedures to implement the reimbursable activities listed in Section IV (B) of these parameters and guidelines.
2. Train staff on the reimbursable activities listed in Section IV (B) of these parameters and guidelines. (One-time per employee.)
3. Develop or procure computer software for the maintenance of records on animals specified in Section IV (B) (8) of these parameters and guidelines to the extent these costs are not claimed as an indirect cost under Section V (B) (8) of these parameters and guidelines. If the computer software is utilized in some way that is not directly related to the maintenance of records specified in Section IV (B) (8), only the pro rata portion of the activity that is used for compliance with Section IV (B) (8) is reimbursable.

B. Ongoing Activities

1. Acquisition of Additional Space and/or Construction of New Facilities
Beginning January 1, 1999 - Acquiring additional space by purchase or lease and/or construction of new facilities to provide appropriate or adequate shelter necessary to comply with the mandated activities during the increased holding period for impounded stray or abandoned dogs, cats, and other animals specified in Statutes of 1998, Chapter 752 that die during the increased holding period or are ultimately euthanized.

Eligible claimants are only entitled to reimbursement for the proportionate share of actual costs required to plan, design, acquire, and/or build facilities in a given fiscal year based on the pro rata representation of impounded stray or abandoned dogs, cats, and other animals specified in Statutes of 1998, Chapter 752 that are held during the *increased* holding period specified in Sections IV (B) (3) and (4) of these Parameters and Guidelines and die during the increased holding period or are ultimately euthanized, to the total population of animals housed in the facility (including those animals that are excluded from reimbursement, as specified in Sections IV (B) (3) and (4) of these Parameters and Guidelines) during the entire holding period required by Food and Agriculture Code sections 31108, 31752 and 31753.

Formula for Proportionate Share of Actual Costs:

Where:

(A) = Shelter square footage, 1998

(B) = Total animal average daily census (ADC), 1998

(C) = Square footage per ADC, 1998 (=A/B)

(D) = Total dog/cat ADC, 1998

(E) = Shelter square footage, claim year

(F) = Total dog/cat ADC, claim year

(G) = Eligible dog/cat ADC, claim year

(H) = Eligible other animal ADC, claim year

(I) = Eligible dog/cat square footage, claim year

For shelters that meet the conditions of to Food and Agricultural Code section 31108(a)(1) or (2) for dogs, and section 31752(a)(1) or (2) for cats:¹

(I) = $2/5 \times C \times F$

For shelters that do not meet the conditions of Food and Agricultural Code section 31108(a)(1) or (2) for dogs, and section 31752(a)(1) or (2) for cats:

(I) = $4/7 \times C \times F$

(J) = Reduction in eligible square footage due to decline in total dog/cat population (cannot exceed 0)

¹ In order to select this option claimants must either make the animal available for owner redemption on one weekday evening until at least 7:00 p.m., or one weekend day; or (b) Have fewer than three full-time employees or are not open during all regular weekday business hours, establishing a procedure to enable owners to reclaim their animals by appointment at a mutually agreeable time when the agency would otherwise be closed.

For shelters that meet the conditions of Food and Agricultural Code section 31108(a)(1) or (2) for dogs, and section 31752(a)(1) or (2) for cats:²

$$(J) = [(F/5 - D/3 \times C \times D) / (D/3)]$$

For shelters that do not meet the conditions of Food and Agricultural Code section 31108(a)(10 or (2) for dogs, and section 31752(a)(1) or (2) for cats:

$$(J) = [(F/7 - D/3) \times C \times D] / (D/3)$$

(K) = Net eligible dog/cat square footage (cannot be less than 0)

$$(K = I+J)$$

(L) = Percentage of eligible dog/cat ADC, claim year (L = G/F)

(M) = Allowable dog/cat square footage (M = K x L)

(N) = Allowable square footage for other animals specified by Food and Agricultural Code section 31573 (N = C x H)

(P) = Eligible percentage of acquisition/construction costs (cannot exceed 100%) [P = (M+N) / ((E-A)]

Statutes 2004, chapter 313 specifies that costs incurred to address preexisting shelter overcrowding or animal population growth are not reimbursable. The mandate reimburses for costs required due to the increased holding period required by Statutes 1998, chapter 752. In calculating net eligible dog/cat square footage, the formula recognizes that a decline in the number of animals sheltered may offset the effect of the increased holding period. For example, if the dog/cat average daily census does not change between the 1998 base year and the claim year, there is no additional square footage required.

The mandate reimburses only for costs attributable to eligible animals. Prior to Statutes 1998, chapter 752, shelters were required to hold dogs and cats for three days, whereas there was no required holding period for other animals. Therefore, the mandate reimbursable percentage formula separately calculates allowable square footage for dogs and cats, and allowable square footage for other animals specified by Food and Agricultural Code section 31753.

Acquisition/construction costs that are less than or equal to the cost of contract services for eligible animals are reimbursable.

² In order to select this option claimants must either make the animal available for owner redemption on one weekday evening until at least 7:00 p.m., or one weekend day; or (b) Have fewer than three full-time employees or are not open during all regular weekday business hours, establishing a procedure to enable owners to reclaim their animals by appointment at a mutually agreeable time when the agency would otherwise be closed.

Claimants may recalculate the eligible percentage of acquisition/construction costs each year, based on current animal population statistics. However, claimants may only claim allowable costs that have not been claimed in previous fiscal years.

Supporting Documentation Submitted with the Initial and Subsequent Reimbursement Claims

Acquiring additional space and/or construction of new facilities is reimbursable only to the extent that an eligible claimant submits, with the initial and/or subsequent reimbursement claim, documentation reflecting the following:

A determination by the governing board that acquiring additional space and/or constructing new facilities is necessary for the increased holding period required by Statutes of 1998, Chapter 752 because the existing facilities do not reasonably accommodate impounded stray or abandoned dogs, cats and other specified animals that are ultimately euthanized. The determination by the governing board shall include all of the following findings:

- The average daily census of impounded stray or abandoned dogs, cats, and other animals specified in Statutes of 1998, Chapter 752 that were impounded in 1998. For purposes of claiming reimbursement under section IV.B.1, aAverage Daily Census is defined as the average number of impounded stray or abandoned dogs, cats, and other animals specified in Statutes of 1998, Chapter 752 housed on any given day, in a 365-day period;
- The average daily census of impounded stray or abandoned dogs, cats, and other animals specified in Statutes of 1998, Chapter 752 that were impounded in a given year under the holding periods required by Food and Agriculture Code sections 31108, 31752, and 31753, as added or amended by Statutes of 1998, Chapter 752;
- Existing facilities are not appropriately configured and/or equipped to comply with the increased holding period required by Statutes of 1998, Chapter 752;
- Remodeling existing facilities is not feasible or is more expensive than acquiring additional space and/or constructing new facilities to comply with the increased holding period required by Statutes 1998, chapter 752; and
- Contracting with existing private or public shelters in the area to house the increase of impounded stray or abandoned dogs, cats, or other animals specified in Statutes of 1998, ~~C~~chapter 752 is not feasible or is more expensive than acquiring additional space and/or constructing new facilities to comply

with the increased holder period required by Statutes 1998, chapter 752. This finding should include the cost to contract with existing shelters.

Documentation requirements may be satisfied in whole or in part by staff agenda items, staff reports, minutes of governing board meetings, transcripts of governing board meetings, certification by the governing board describing the findings and determination, and/or a resolution adopted by the governing board pursuant to Food and Agriculture Code section 31755, as added by Statutes of 1999, Chapter 81 (Assembly Bill 1482).

2. Remodeling/Renovating Existing Facilities

Beginning January 1, 1999 - Remodeling/renovating existing facilities to provide appropriate or adequate shelter necessary to comply with the mandated activities during the increased holding period for impounded stray or abandoned dogs, cats, and other animals specified in Statutes of 1998, Chapter 752 that die during the increased holding period or are ultimately euthanized.

Eligible claimants are only entitled to reimbursement for the proportionate share of actual costs required to plan, design, remodel and/or renovate existing facilities in a given fiscal year based on the pro rata representation of impounded stray or abandoned dogs, cats, and other animals specified in Statutes of 1998, Chapter 752 that are held during the *increased* holding period specified in Sections IV (B) (3) and (4) of these Parameters and Guidelines and die during the increased holding period or are ultimately euthanized, to the total population of animals housed in the facility (including those animals that are excluded from reimbursement, as specified in Sections IV (B) (3) and (4) of these Parameters and Guidelines) during the entire holding period required by Food and Agriculture Code sections 31108, 31752 and 31753.

Since the remodeling/renovation will not increase square footage to address existing overcrowding or future growth issues, the mandate reimbursable percentage formula for remodeling/renovation would exclude the eligible percentage of square footage factor.

Formula for proportionate share of actual remodeling/renovation costs:

(A) = Shelter square footage

(B) = Total animal average daily census (ADC), claim year

(C) = Square footage per ADC, claim year (C = A/B)

(G) = Eligible dog/cat ADC, claim year

(H) = Eligible other animal ADC, claim year

(M) = Eligible dog/cat square footage, claim year

For shelters that meet the requirements of Food and Agricultural Code section 31108 (a)(1) or (2) for dogs, and section 31752 (a)(1) or (2) for cats, $M = 2/5 \times C \times G$.

For shelters that do not meet the requirements of Food and Agricultural Code section 31108(a)(1) or (2) for dogs, and section 31752(a)(1) or (2) for cats, $M = 4/7 \times C \times G$.

(N) = Allowable square footage for other animals specified by Food and Agricultural Code section 31753, claim year ($N = C \times H$)

(P) = Eligible percentage of remodeling/renovation costs [$P = (M + N) / A$]

Claimants may recalculate the eligible percentage of remodeling/renovation costs each year, based on current animal population statistics. However, claimants may only claim allowable costs that have not been claimed in previous fiscal years.

Supporting Documentation Submitted with the Initial and Subsequent Reimbursement Claims

Remodeling/renovating existing facilities is reimbursable only to the extent that an eligible claimant submits, with the initial and/or subsequent reimbursement claim, documentation reflecting the following:

A determination by the governing board or a delegated representative that remodeling/renovating existing facilities is necessary because the existing facilities do not reasonably accommodate impounded stray or abandoned dogs, cats and other specified animals that are ultimately euthanized for the increased holding period required by Statutes of 1998, Chapter 752. The determination by the governing board or delegated representative shall include all of the following findings:

- The average daily census of impounded stray or abandoned dogs, cats, and other animals specified in Statutes of 1998, Chapter 752 that were impounded in 1998. [For purposes of claiming reimbursement under section IV.B.2, a](#)Average Daily Census is defined as the average number of impounded stray or abandoned dogs, cats, and other animals specified in Statutes of 1998, Chapter 752 housed on any given day, in a 365-day period;
- The average daily census of impounded stray or abandoned dogs, cats, and other animals specified in Statutes of 1998, Chapter 752 in a given year under the holding periods required by Food and Agriculture Code sections 31108, 31752, and 31753, as added or amended by Statutes of 1998, Chapter 752;

- Existing facilities are not appropriately configured and/or equipped to comply with the increased holding period required by Statutes of 1998, Chapter 752;
- Contracting with existing private or public shelters in the area to house the increase of impounded stray or abandoned dogs, cats, or other animals specified in Statutes of 1998, Chapter 752 is not feasible or is more expensive than remodeling/renovating existing facilities [to comply with the increased holding period required by Statutes 1998, chapter 752.](#)

Documentation requirements may be satisfied in whole or in part by staff agenda items, staff reports, minutes of governing board meetings, transcripts of governing board meetings, certification by the governing board or declaration from the delegated representative describing the findings and determination, and/or a resolution adopted by the governing board pursuant to Food and Agriculture Code section 31755, as added by Statutes of 1999, Chapter 81 (Assembly Bill 1482).

2.3. Care and Maintenance for Impounded Stray or Abandoned Dogs and Cats that Die During the Increased Holding Period or are Ultimately Euthanized (Food & Agr. Code, §§ 31108, 31752)

Beginning July 1, 1999 - Providing care and maintenance during the increased holding period for impounded stray or abandoned dogs and cats that die during the increased holding period or are ultimately euthanized. The increased holding period shall be measured by calculating the difference between three days from the day of capture, and four or six business days from the day after impoundment.

Exclusions

Eligible claimants are *not* entitled to reimbursement for the care and maintenance of the following population of dogs and cats:

- Stray or abandoned dogs and cats that are irremediably suffering from a serious illness or severe injury (Food & Agr. Code, § 17006);
- Newborn stray or abandoned dogs and cats that need maternal care and have been impounded without their mothers (Food & Agr. Code, § 17006);
- Stray or abandoned dogs and cats too severely injured to move or where a veterinarian is not available and it would be more humane to dispose of the animal (Pen. Code, §§ 597.1, subd. (e), 597f, subd. (d));
- Owner relinquished dogs and cats; and

- Stray or abandoned dogs and cats that are ultimately redeemed, adopted, or released to a nonprofit animal rescue or adoption organization.

Methods for Claiming Costs

Eligible claimants may elect one of following two methods to claim costs for the care and maintenance of impounded stray or abandoned dogs and cats that die during the increased holding period or are ultimately euthanized:

- Actual Cost Method – Under the actual cost method, actual reimbursable care and maintenance costs per animal per day are computed for an annual claim period.
 - a) Determine the total annual cost of care and maintenance for all dogs and cats impounded at a facility. Total cost of care and maintenance includes labor, materials, supplies, indirect costs, and contract services.
 - b) Determine the average daily census of [all dogs and cats impounded at a facility. For purposes of claiming reimbursement under IV.B.3, average daily census is defined as the average number of all dogs and cats at a facility housed on any given day, in a 365-day period.](#)
 - c) Multiply the average daily census of dogs and cats by 365 = yearly census of dogs and cats.
 - d) Divide the total annual cost of care by the yearly census of dogs and cats = cost per animal per day.
 - e) Multiply the cost per animal per day, by the number of impounded stray or abandoned dogs and cats that die during the increased holding period or are ultimately euthanized, by each reimbursable day (the difference between three days from the day of capture, and four or six business days from the day after impoundment).
- Time Study Method – Under the time study method, a random sample of impounded stray or abandoned dogs and cats are observed to determine the amount of time to provide care and maintenance during a reimbursable day.

The time study shall be developed using one representative month each quarter and be supported with actual source documentation. Time studies shall be conducted on a more frequent basis if there are significant variations of time expended from month to month. The time study shall identify hours devoted to each specific category. If the time study supports a fixed-cost approach such as an animal day (i.e., dog-

day, cat-day, etc.), the eligible claimant shall document the analysis supporting the method used.

Time records used to support the time study shall:

- a) Reflect an after-the-fact distribution of each employee's actual activity;
 - b) Account for the total activity for which each employee is compensated;
 - c) Account for the total labor hours of the month;
 - d) Be signed and dated by the employee not later than the end of the pay period that follows the pay period covered by the report; and
 - e) Document, by signature or initials and date, supervisor approval.
3. Care and Maintenance for Impounded Stray or Abandoned Animals Specified in Food and Agriculture Code Section 31753 that Die During the Increased Holding Period or are Ultimately Euthanized (Food & Agr. Code, § 31753)

Beginning January 1, 1999 - Providing care and maintenance for four or six business days from the day after impoundment for impounded stray or abandoned rabbits, guinea pigs, hamsters, pot-bellied pigs, birds, lizards, snakes, turtles, and tortoises legally allowed as personal property that die during the increased holding period or are ultimately euthanized.

Exclusions

Eligible claimants are *not* entitled to reimbursement for the care and maintenance of the following population of animals:

- Stray or abandoned animals that are irremediably suffering from a serious illness or severe injury (Food & Agr. Code, § 17006);
- Newborn animals that need maternal care and have been impounded without their mothers (Food & Agr. Code, § 17006);
- Stray or abandoned animals too severely injured to move or where a veterinarian is not available and it would be more humane to dispose of the animal (Pen. Code, §§ 597.1, subd. (e), 597f, subd. (d));
- Owner relinquished animals; and
- Stray or abandoned animals that are ultimately redeemed, adopted, or released to a nonprofit animal rescue or adoption organization.

Methods for Claiming Costs

Eligible claimants may elect one of following two methods to claim costs for the care and maintenance of impounded stray or abandoned animals specified in Food and Agriculture Code section 31753 that die during the increased holding period or are ultimately euthanized:

- Actual Cost Method –Under the actual cost method, actual reimbursable care and maintenance costs per animal per day are computed for an annual claim period.
 - a) Determine the total annual cost of care and maintenance for all animals specified in Food and Agriculture Code section 31753 that are impounded at a facility. Total cost of care and maintenance includes labor, materials, supplies, indirect costs, and contract services.
 - b) Determine the average daily census of the animals specified in Food and Agriculture Code section 31753.
 - c) Multiply the average daily census of the animals specified in Food and Agriculture Code section 31753 by 365 = yearly census of animals specified in Food and Agriculture Code section 31753.
 - d) Divide the total annual cost of care by the yearly census of animals specified in Food and Agriculture Code section 31753 = cost per animal per day.
 - e) Multiply the cost per animal per day, by the number of impounded stray or abandoned animals specified in Food and Agriculture Code section 31753 that die during the increased holding period or are ultimately euthanized, by each reimbursable day (four or six business days from the day after impoundment).
- Time Study Method – Under the time study method, a random sample of impounded stray or abandoned animals are observed to determine the amount of time to provide care and maintenance during a reimbursable day.

The time study shall be developed using one representative month each quarter and be supported with actual source documentation. Time studies shall be conducted on a more frequent basis if there are significant variations of time expended from month to month. The time study shall identify hours devoted to each specific category. If the time study supports a fixed-cost approach such as an animal day, the eligible claimant shall document the analysis supporting the method used.

Time records used to support the time study shall:

- a) Reflect an after-the-fact distribution of each employee's actual activity;
- b) Account for the total activity for which each employee is compensated;
- c) Account for the total labor hours of the month;
- d) Be signed and dated by the employee not later than the end of the pay period that follows the pay period covered by the report; and
- e) Document, by signature or initials and date, supervisor approval.

4. Agencies Using the Holding Period of Four Business Days After the Day of Impoundment (Food & Agr. Code, §§ 31108, 31752, 31753)

Beginning January 1, 1999 - For impounded animals specified in Food and Agriculture Code section 31753, either:

- Making the animal available for owner redemption on one weekday evening until at least 7:00 p.m., or one weekend day; or
- For those local agencies with fewer than three full-time employees or that are not open during all regular weekday business hours, establishing a procedure to enable owners to reclaim their animals by appointment at a mutually agreeable time when the agency would otherwise be closed.

Beginning July 1, 1999 - For impounded dogs and cats, either:

- Making the animal available for owner redemption on one weekday evening until at least 7:00 p.m., or one weekend day; or
- For those local agencies with fewer than three full-time employees or that are not open during all regular weekday business hours, establishing a procedure to enable owners to reclaim their animals by appointment at a mutually agreeable time when the agency would otherwise be closed.

5. Feral Cats (Food & Agr. Code, § 31752.5)

Beginning January 1, 1999 - Verifying whether a cat is feral or tame by using a standardized protocol within the first three days of the required holding period if an apparently feral cat has not been reclaimed by its owner or caretaker.

6. Lost and Found Lists (Food & Agr. Code, § 32001)

Beginning January 1, 1999 - Providing owners of lost animals and those who find lost animals with all of the following:

- Ability to list the animals they have lost or found on “lost and found” lists maintained by the local agency;
- Referrals to animals listed that may be the animals the owner or finders have lost or found;
- The telephone numbers and addresses of other pounds and shelters in the same vicinity;
- Advice as to means of publishing and disseminating information regarding lost animals; and
- The telephone numbers and addresses of volunteer groups that may be of assistance in locating lost animals.

7. Maintaining *Non-Medical* Records (Food & Agr. Code, § 32003)

Beginning January 1, 1999 - Maintaining non-medical records on animals that are either taken up, euthanized after the holding period, or impounded. Such records shall include the following:

- The date the animal was taken up, euthanized, or impounded;
- The circumstances under which the animal is taken up, euthanized, or impounded;
- The names of the personnel who took up, euthanized, or impounded the animal; and
- The final disposition of the animal, including the name of the person who euthanized the animal or the name and address of the adopting party.

The cost of software license renewal contracts, to the extent these costs are not claimed as an indirect cost under these parameters and guidelines, is eligible for reimbursement under Section V (A) (2) of these parameters and guidelines. If the computer software is utilized in some way that is not directly related to the maintenance of records specified in this section, only the pro rata portion of the software license renewal contract that is used for compliance with this section is reimbursable.

8. “Necessary and Prompt Veterinary Care” (Civ. Code, §§ 1834 and 1846)

Beginning January 1, 1999 - Providing “necessary and prompt veterinary care” for stray and abandoned animals, other than injured cats and dogs given emergency treatment, that die during the holding

period or are ultimately euthanized, during the holding periods specified in Statutes of 1998, Chapter 752.

“Necessary and prompt veterinary care” means all reasonably necessary medical procedures performed by a veterinarian or someone under the supervision of a veterinarian to make stray or abandoned animals “adoptable.” The following veterinary procedures, if conducted, are eligible for reimbursement:

- An initial physical examination of the animal to determine the animal’s baseline health status and classification as “adoptable,” “treatable,” or “non-rehabilitatable.”
- A wellness vaccine administered to “treatable” or “adoptable” animals.
- Veterinary care to stabilize and/or relieve the suffering of a “treatable” animal.
- Veterinary care intended to remedy any applicable disease, injury, or congenital or hereditary condition that adversely affects the health of a “treatable” animal or that is likely to adversely affect the animal’s health in the future, until the animal becomes “adoptable.”

Population Exclusions

Eligible claimants are *not* entitled to reimbursement for providing “necessary and prompt veterinary care” to the following population of animals:

- Animals that are irremediably suffering from a serious illness or severe injury (Food & Agr. Code, § 17006);
- Newborn animals that need maternal care and have been impounded without their mothers (Food & Agr. Code, § 17006);
- Animals too severely injured to move or where a veterinarian is not available and it would be more humane to dispose of the animal. (Pen. Code, §§ 597.1, subd. (e), 597f, subd. (d));
- Owner relinquished animals; and
- Stray or abandoned animals that are ultimately redeemed, adopted, or released to a nonprofit animal rescue or adoption organization.

Veterinary Care Exclusions

Eligible claimants are *not* entitled to reimbursement for providing the following veterinary procedures:

- Emergency treatment given to injured cats and dogs (Pen. Code, § 597f, subd. (b));
- Administration of rabies vaccination to dogs (Health & Saf. Code, § 121690);
- Implantation of microchip identification;
- Spay or neuter surgery and treatment;
- Euthanasia.

10. Beginning January 1, 1999 - Procuring medical, kennel, and computer equipment necessary to comply with the reimbursable activities listed in Section IV (B) of these parameters and guidelines, to the extent these costs are not claimed as an indirect cost under Section V (B) of these parameters and guidelines. If the medical, kennel, and computer equipment is utilized in some way not directly related to the mandated program or the population of animals listed in Section IV (B), only the pro rata portion of the activity that is used for the purposes of the mandated program is reimbursable.

V. Claim Preparation and Submission

Each of the following cost elements must be identified for each reimbursable activity identified in Section IV, Reimbursable Activities, of this document. Each claimed reimbursable cost must be supported by source documentation as described in Section IV. Additionally, each reimbursement claim must be filed in a timely manner.

A. Direct Cost Reporting

Direct costs are those costs incurred specifically for the reimbursable activities. The following direct costs are eligible for reimbursement.

1. Salaries and Benefits

Report each employee implementing the reimbursable activities by name, job classification, and productive hourly rate (total wages and related benefits divided by productive hours). Describe the specific reimbursable activities performed and the hours devoted to each reimbursable activity performed.

2. Materials and Supplies

Report the cost of materials and supplies that have been consumed or expended for the purpose of the reimbursable activities. Purchases shall be claimed at the actual price after deducting discounts, rebates, and allowances received by the claimant. Supplies that are withdrawn from inventory shall be charged on an appropriate and recognized method of costing, consistently applied.

3. Contracted Services

Report the name of the contractor and services performed to implement the reimbursable activities. If the contractor bills for time and materials, report

the number of hours spent on the activities and all costs charged. If the contract is a fixed price, report the services that were performed during the period covered by the reimbursement claim. If the contract services are also used for purposes other than the reimbursable activities, only the pro-rata portion of the services used to implement the reimbursable activities can be claimed. Submit contract consultant and attorney invoices with the claim and a description of the contract scope of services.

4. Fixed Assets and Equipment

Report the purchase price paid for fixed assets and equipment (including computers) necessary to implement the reimbursable activities. The purchase price includes taxes, delivery costs, and installation costs. If the fixed asset or equipment is also used for purposes other than the reimbursable activities, only the pro-rata portion of the purchase price used to implement the reimbursable activities can be claimed.

5. Travel

Report the name of the employee traveling for the purpose of the reimbursable activities. Include the date of travel, destination point, the specific reimbursable activity requiring travel, and related travel expenses reimbursed to the employee in compliance with the rules of the local jurisdiction. Report employee travel time according to the rules of cost element A.1, Salaries and Benefits, for each applicable reimbursable activity.

6. Training

Report the cost of training an employee to perform the reimbursable activities, as specified in Section IV of this document. Report the name and job classification of each employee preparing for, attending, and/or conducting training necessary to implement the reimbursable activities. Provide the title, subject, and purpose (related to the mandate of the training session), dates attended, and location. If the training encompasses subjects broader than the reimbursable activities, only the pro-rata portion can be claimed. Report employee training time for each applicable reimbursable activity according to the rules of cost element A.1, Salaries and Benefits, and A.2, Materials and Supplies. Report the cost of consultants who conduct the training according to the rules of cost element A.3, Contracted Services.

B. Indirect Cost Rates

Indirect costs are costs that are incurred for a common or joint purpose, benefiting more than one program, and are not directly assignable to a particular department or program without efforts disproportionate to the result achieved. Indirect costs may include both (1) overhead costs of the unit performing the mandate; and (2) the costs of the central government services distributed to the other departments based on a systematic and rational basis through a cost allocation plan.

Compensation for indirect costs is eligible for reimbursement utilizing the procedure provided in the Office of Management and Budget (OMB) Circular

A-87. Claimants have the option of using 10% of direct labor, excluding fringe benefits, or preparing an Indirect Cost Rate Proposal (ICRP) if the indirect cost rate claimed exceeds 10%.

If the claimant chooses to prepare an ICRP, both the direct costs (as defined and described in OMB Circular A-87 Attachments A and B) and the indirect costs shall exclude capital expenditures and unallowable costs (as defined and described in OMB Circular A-87 Attachments A and B). However, unallowable costs must be included in the direct costs if they represent activities to which indirect costs are properly allocable.

The distribution base may be (1) total direct costs (excluding capital expenditures and other distorting items, such as pass-through funds, major subcontracts, etc.), (2) direct salaries and wages, or (3) another base which results in an equitable distribution.

In calculating an ICRP, the claimant shall have the choice of one of the following methodologies:

1. The allocation of allowable indirect costs (as defined and described in OMB Circular A-87 Attachments A and B) shall be accomplished by (1) classifying a department's total costs for the base period as either direct or indirect, and (2) dividing the total allowable indirect costs (net of applicable credits) by an equitable distribution base. The result of this process is an indirect cost rate which is used to distribute indirect costs to mandates. The rate should be expressed as a percentage which the total amount allowable indirect costs bears to the base selected; or
2. The allocation of allowable indirect costs (as defined and described in OMB Circular A-87 Attachments A and B) shall be accomplished by (1) separating a department into groups, such as divisions or sections, and then classifying the division's or section's total costs for the base period as either direct or indirect, and (2) dividing the total allowable indirect costs (net of applicable credits) by an equitable distribution base. The result of this process is an indirect cost rate that is used to distribute indirect costs to mandates. The rate should be expressed as a percentage which the total amount allowable indirect costs bears to the base selected.

~~Each claim for reimbursement must be timely filed and identify each cost element for which reimbursement is claimed under this mandate. Claimed costs must be identified to each reimbursable activity identified in Section IV. of these Parameters and Guidelines.~~

~~A. Direct Costs~~

~~Direct costs are defined as costs that can be traced to specific goods, services, programs, activities, or functions and shall be supported by the following cost element information:~~

- ~~1. Salaries and Benefits~~

~~Identify the employee(s), and/or show the classification of the employee(s) involved. Describe the reimbursable activities performed, specify the actual time devoted to each activity by each employee, and the productive hourly rate, and related fringe benefits.~~

~~Reimbursement for personnel services includes compensation paid for salaries, wages, and employee fringe benefits. Employee fringe benefits include regular compensation paid to an employee during periods of authorized absences (e.g., annual leave, sick leave) and the employer's contributions to social security, pension plans, insurance, and worker's compensation insurance. Fringe benefits are eligible for reimbursement when distributed equitably to all job activities performed by the employee.~~

~~2. Materials and Supplies~~

~~Only expenditures that can be identified as direct costs of this mandate may be claimed. List the cost of the materials and supplies consumed specifically for the purposes of this mandate. Purchases shall be claimed at the actual price after deducting cash discounts, rebates, and allowances received by the claimant. Supplies that are withdrawn from inventory shall be charged based on a recognized method of costing, consistently applied.~~

~~3. Contract Services~~

~~Provide the name(s) of the contractor(s) who performed the services, including any fixed contracts for services. Describe the reimbursable activity(ies) performed by each named contractor and give the number of actual hours spent on the activities, if applicable. Show the inclusive dates when services were performed and itemize all costs for those services. Attach consultant invoices to the claim.~~

~~4. Travel~~

~~Travel expenses for mileage, per diem, lodging, and other employee entitlements are eligible for reimbursement in accordance with the rules of the local jurisdiction. Provide the name(s) of traveler(s), purpose of travel, inclusive dates and times of travel, destination point(s), and travel costs.~~

~~5. Training~~

~~The cost of training an employee to perform the mandated activities, as specified in Section IV (A) of these Parameters and Guidelines, is eligible for reimbursement. Identify the employee(s) by name and job classification. Provide the title and subject of the training session, the date(s) attended, and the location. Reimbursable costs may include salaries and benefits, registration fees, transportation, lodging, and per diem.~~

6. Fixed Assets

List the costs of the fixed assets that have been acquired specifically for the purpose of this mandate. If the fixed asset is utilized in some way not directly related to the mandated program, only the pro-rata portion of the asset that is used for the purposes of the mandated program is reimbursable.

B. Indirect Costs

Compensation for indirect costs is eligible for reimbursement. Indirect costs are those that have been incurred for common or joint purposes. These costs benefit more than one cost objective and cannot be readily identified with a particular final cost objective without effort disproportionate to the results achieved. After direct costs have been determined and assigned to other activities, as appropriate, indirect costs are those remaining to be allocated to benefited cost objectives. A cost may not be allocated as an indirect cost if any other cost incurred for the same purpose, in like circumstances, has been claimed as a direct cost.

Indirect costs include (a) the indirect costs originating in each department or agency of the governmental unit carrying out state mandated programs and (b) the costs of central governmental services distributed through the central service cost allocation plan and not otherwise treated as direct costs.

Claimants have the option of using 10% of direct labor, excluding fringe benefits, or preparing an Indirect Cost Rate Proposal (ICRP) pursuant to the Office of Management and Budget (OMB) Circular A-87.

VI. RECORD RETENTION

Pursuant to Government Code section 17558.5, subdivision (a), a reimbursement claim for actual costs filed by a local agency or school district pursuant to this chapter³ is subject to the initiation of an audit by the Controller no later than three years after the date that the actual reimbursement claim is filed or last amended, whichever is later. However, if no funds are appropriated or no payment is made to a claimant for the program for the fiscal year for which the claim is filed, the time for the Controller to initiate an audit shall commence to run from the date of initial payment of the claim. In any case, an audit shall be completed not later than two years after the date that the audit is commenced. All documents used to support the reimbursable activities, as described in Section IV, must be retained during the period subject to audit. If an audit has been initiated by the Controller during the period subject to audit, the retention period is extended until the ultimate resolution of any audit findings.

VI.Supporting Data

~~VII.~~For auditing purposes, all costs claimed shall be traceable to source documents (e.g., employee time records, cost allocation reports, invoices, receipts, purchase orders, contracts, worksheets, calendars, declarations, time

³ This refers to Title 2, division 4, part 7, chapter 4 of the Government Code.

~~studies, etc.) that show evidence of the validity of such costs and their relationship to this mandate. All documentation in support of claimed costs shall be made available to the State Controller's Office, as may be requested. Pursuant to Government Code section 17558.5, these documents must be kept on file by the agency submitting the claim for a period of no less than two years after the later of (1) the end of the calendar year in which the reimbursement claim is filed or last amended, or (2) if no funds are appropriated for the fiscal year for which the claim is made, the date of initial payment of the claim.~~

VII. Offsetting Savings and Other Reimbursements

Any offsetting savings that the claimant experiences as a direct result of this mandate must be deducted from the costs claimed. Additionally, reimbursement for this mandate received from any source shall be identified and deducted from this claim. These sources shall include, but not be limited to, rewards received under the authority of Civil Code section 1845; licensing fees and fines received and applied pursuant to Food and Agriculture Code section 30652, Government Code section 28502, and Penal Code section 597f; other state funds, and federal funds. The fees and fines received pursuant to Food and Agriculture Code section 30652 shall be deducted from the claim according to the priority specified in the statute and stated below:

- First, to pay fees for the issuance of dog license tags pursuant to Food and Agriculture Code section 30652, subdivision (a);
- Second, in accordance with Food and Agriculture Code section 30652, subdivision (b), any excess revenue held after the payment of dog license tags shall be applied to the fees, salaries, costs, expenses, or any or all of them for the enforcement of Division 14 of the Food and Agriculture Code, including Food and Agriculture Code section 31108, and all ordinances that are made pursuant to Division 14. Costs incurred under Food and Agriculture Code section 31108 are specified in Section IV (B) (1), (2), (3), and (5), and Section IV (A) of these parameters and guidelines. Any or all excess revenue must be applied to the costs incurred under Food and Agriculture Code section 31108 before any revenue can be applied to subdivisions (c) and (d) of Food and Agriculture Code section 30652.

VIII. STATE CONTROLLER'S REVISED CLAIMING INSTRUCTIONS

Pursuant to Government Code section 17558, subdivision (c), the Controller shall issue revised claiming instructions for each mandate that requires state reimbursement not later than 60 days after receiving the revised parameters and guidelines from the Commission, to assist local agencies and school districts in claiming costs to be reimbursed. The revised claiming instructions shall be derived from the test claim decision and the revised parameters and guidelines adopted by the Commission.

Pursuant to Government Code section 17561, subdivision (d)(2), issuance of the revised claiming instructions shall constitute a notice of the right of the local agencies and school

districts to file reimbursement claims, based upon [the revised parameters and guidelines](#) adopted by the Commission.

IX. REMEDIES BEFORE THE COMMISSION

Upon request of a local agency or school district, the Commission shall review the claiming instructions issued by the State Controller or any other authorized state agency for reimbursement of mandated costs pursuant to Government Code section 17571. If the Commission determines that the claiming instructions do not conform to the parameters and guidelines, the Commission shall direct the Controller to modify the claiming instructions and the Controller shall modify the claiming instructions to conform to the parameters and guidelines as directed by the Commission.

In addition, requests may be made to amend parameters and guidelines pursuant to Government Code section 17557, subdivision (d), and California Code of Regulations, title 2, section 1183.2.

X. LEGAL AND FACTUAL BASIS FOR THE PARAMETERS AND GUIDELINES

The Statement of Decision is legally binding on all parties and provides the legal and factual basis for the parameters and guidelines. The support for the legal and factual findings is found in the administrative record for the test claim. The administrative record, including the Statement of Decision, is on file with the Commission.

VIII. State Controller's Office Required Certification

~~An authorized representative of the claimant shall be required to provide a certification of the claim, as specified in the State Controller's Office claiming instructions, for those costs mandated by the state contained herein.~~

VII. Parameters and Guidelines Amendments

~~Pursuant to title 2, California Code of Regulations, section 1183.2, Parameters and Guidelines amendments filed before the deadline for initial claims as specified in the Claiming Instructions shall apply to all years eligible for reimbursement as defined in the original Parameters and Guidelines. A Parameters and Guidelines amendment filed after the initial claiming deadline must be submitted on or before January 15, following a fiscal year in order to establish eligibility for reimbursement for the fiscal year.~~

MINUTES

COMMISSION ON STATE MANDATES

U.S. Bank Building, 980 Ninth Street¹
Second Floor Conference Room
Sacramento, California
August 23, 2001

Present: Chairperson Annette Porini
Representative of the Director of the Department of Finance
Member William Sherwood
Representative of the State Treasurer
Member Heather Halsey
Representative of the Director of the Office of Planning and Research
Member John Harrigan
Representative of the State Controller
Member Joann Steinmeier
School Board Member
Member John Lazar
City Council Member
Vacant: Public Member

CALL TO ORDER AND ROLL CALL

Chairperson Porini called the meeting to order at 9:40 a.m.

APPROVAL OF MINUTES

Item 1 July 26, 2001

Upon motion by Member Sherwood and second by Member Steinmeier, the minutes were adopted. Member Lazar abstained.

PROPOSED CONSENT CALENDAR

HEARINGS AND DECISIONS, PURSUANT TO CALIFORNIA CODE OF REGULATIONS,
TITLE 2, CHAPTER 2.5, ARTICLE 7 (action)

PROPOSED STATEMENTS OF DECISION – TEST CLAIMS

Item 4 *Comprehensive School Safety Plans*, 98-TC-01 and 99-TC-10
Kern High School District, Claimant
Education Code Sections 35294.1, 35294.2, 35294.6 and 35294.8
Statutes of 1997, Chapter 736, Statutes of 1999, Chapter 996

¹ The Commission meeting was moved to this location because the Legislature needed State Capital Room 126 for legislative hearings. All parties were notified and signs were posted to direct the public to the meeting location.

- Item 5 *Sex Offenders: Disclosure by Law Enforcement Officers*, 97-TC-15
County of Tuolumne, Claimant
Penal Code Sections 290 and 290.4
Statutes of 1996, Chapters 908 and 909
Statutes of 1997, Chapters 17, 80, 817, 818, 819, 820, 821 and 822
Statutes of 1998, Chapters 485, 550, 927, 928, 929 and 930
- Item 6 Dismissal of the *Educational Revenue Augmentation Fund (ERAF)*, Test
Claim, 00-TC-03
City of Sacramento, Claimant
Revenue and Taxation Code Section 95, et al.
Education Code Section 41204.5, et al.
Statutes of 1992, Chapter 699, et al.

PROPOSED STATEMENT OF DECISION - INCORRECT REDUCTION CLAIM

- Item 7 *Graduation Requirements*, 4435-I-13 & 4435-I-39
Castro Valley Unified School District
Education Code Section 51225.3
Statutes of 1983, Chapter 498

Member Steinmeier moved for adoption of the consent calendar. With a second by Member Sherwood, the consent calendar was unanimously adopted.

HEARINGS AND DECISIONS, PURSUANT TO CALIFORNIA CODE OF REGULATIONS, TITLE 2, CHAPTER 2.5, ARTICLE 7

TEST CLAIMS

- Item 2 *Eastview Optional Attendance Area*, CSM 99-TC-01
Palos Verdes Peninsula Unified School District, Claimant
Statutes of 1998, Chapter 868

This item was postponed at the request of the claimant.

- Item 3 *Sex Crime Confidentiality*, 98-TC-21
City of Hayward, Claimant
Penal Code Section 293
Statutes of 1992, Chapter 502
Statutes of 1993, Chapter 555
Statutes of 1993-94, 1st Extraordinary Session, Chapter 36

Ellen Fishman, Staff Counsel, presented this item. She explained that the test claim addresses section 293 of the Penal Code relating to the confidentiality of the name and address of an alleged victim of a sex offense. Ms. Fishman noted that the test claim legislation added the following requirements: any law enforcement employee who personally receives a report from a person alleged to be a victim of a sex offense shall inform that person that his or her name will become a matter of public record unless he or she requests otherwise; any written report of an alleged sex offense shall indicate that the alleged victim has been informed of the right to confidentiality and shall indicate his or her response; and, law enforcement agencies are prohibited from disclosing the name or address of the victim, except to certain specified law

enforcement personnel. Staff found the test claim legislation imposes a new program or higher level of service on local law enforcement agencies for the activities listed in staff's analysis.

Parties were represented as follows: Pamela Stone, Harry Bruno, and Veronica Larson, with the City of Hayward and Jennifer Osborn with the Department of Finance.

Ms. Stone thanked staff for their efforts and concurred with staff's analysis. Mr. Bruno also agreed with staff's analysis and added that the increase in service has been great for his community. Ms. Osborn noted her agreement with staff's analysis and with staff's recommendation to address the specific activities in the parameters and guidelines phase.

Member Harrigan moved staff's analysis. With a second by Member Halsey, the motion passed unanimously.

INFORMATIONAL HEARING PURSUANT TO CALIFORNIA CODE OF REGULATIONS, TITLE 2, CHAPTER 2.5, ARTICLE 8

ADOPTION OF PROPOSED PARAMETERS AND GUIDELINES

- Item 8 *Animal Adoption, 98-TC-11*
County of Los Angeles, City of Lindsay, County of Tulare, County of Fresno and Southeast Area Animal Control Authority, Claimants
Civil Code Sections 1815, 1816, 1834, 1834.4, 1845, 1846, 1847, and 2080;
Food and Agriculture Code Sections 17005, 17006, 31108, 31752, 31752.5, 31753, 31754, 32001, and 32003; Penal Code Sections 597.1 and 599d; As Added or Amended by Statutes of 1998, Chapter 752

Camille Shelton, Staff Counsel, presented this item. She noted that one issue still in dispute relates to offsetting savings. The Counties of Fresno, Tulare, and Mendocino contended that Section 30652 of the Food and Agricultural Code (hereinafter referred to as "Section 30652") should not be included in the parameters and guidelines as a source of offsetting savings because the revenue generated does not cover the cost of the reimbursable activities. In its late filing, Mendocino County argued that local agencies were offsetting that revenue against field and sheltering services before the test claim legislation. Staff agreed that the revenue can be used for those services, but noted that, if a county receives excess revenue, it could be applied to the reimbursable activities and so staff left Section 30652 as an offset in the parameters and guidelines. Staff recommended the Commission adopt the proposed parameters and guidelines, as corrected by the errata dated August 17, 2001.

Parties were represented as follows: Leonard Kaye and Marcia Mayeda, with the County of Los Angeles; Pamela Stone, with the Counties of Tulare and Fresno; Tom Sherry, with the County of Tulare; Allan Burdick, with the California State Association of Counties; Tim Casagrande, with the County of Fresno; Amber Pearce, with the Department of Finance; and Shawn Silva, with the State Controller's Office.

Mr. Kaye commended staff for its efforts. He added that, due to the fine print in this area, if not all proposed changes are adopted today, he intended to review the parameters and guidelines and file amendments. Mr. Kaye urged the Commission to adopt the parameters and guidelines today.

The Chair directed the witnesses to confine comments to the parameters and guidelines.

Ms. Mayeda stated that she agreed, in large part, with staff's recommendations, but was concerned with the offsetting of increased costs.

Ms. Stone noted staff's recommendation for reimbursement of one-time costs for medical, kennel and computer equipment. She contended that fixed assets have a limited useful life and therefore requested reimbursement for ongoing costs. Ms. Stone suggested using a prorated methodology to account for use of the equipment for the categories of animals not covered for reimbursement.

Mr. Sherry voiced his concern about the offsetting savings language recommended by staff. He argued that field enforcement activities are separate from the shelter activities affected by this mandate.

Mr. Casagrande disagreed with staff's analysis regarding reimbursement of construction costs. He explained that, in the County of Fresno, additional facility space was not needed or planned for prior to this mandate. Mr. Casagrande submitted that the total costs of construction the County subsequently experienced are attributable to the mandate and should be reimbursable. He added that, for counties with expansion plans in place before the mandate or counties also using new facilities for other purposes, a pro rata reimbursement might be appropriate, but Fresno County had no expansion plans and its new facility is being totally utilized to meet this mandate.

Ms. Shelton replied that, to find that construction or acquiring additional facilities is reasonably necessary, it must be related back to an activity the Commission found to be reimbursable. She added that this was the reason for the inclusion of the pro rata language.

Mr. Silva was concerned with staff's defining "prompt and necessary veterinary care" as all reasonable medical procedures performed to make the animals adoptable. He argued that this definition removes the sense of urgency implied by the words "prompt" and "necessary," therefore expanding the scope of the mandate. Mr. Silva submitted that the interpretation of "reasonable" might differ between auditors and veterinarians. He contended that this standardless analysis creates difficulties for the State Controller's Office and therefore asked the Commission to define what is and what is not covered.

Mr. Silva further disagreed with staff's exclusion of rewards from offsetting savings. Regarding the inclusion of offsetting language referencing Section 30652, Mr. Silva agreed with staff's analysis, but submitted that the issue was actually whether the funds were available as opposed to utilized. He agreed with Mendocino's suggestion for a pro rata analysis. Regarding the issues of construction and renovation, Mr. Silva supported staff's analysis and the certification requirement. However, he was concerned that there are no standards on what constitutes the appropriate space or density of animals and was unsure of how the SCO would determine reasonableness and reimbursement. Mr. Silva noted that the reasonable standard might have to be the pre-statute density of animals.

Ms. Pearce agreed with staff's analysis. She also agreed that using unit cost at this time is inappropriate since no standard exists across the state. She argued that the initial physical exam of the animal should not be included within the definition of "reasonable and necessary veterinary care" because it is a basic function of a shelter that is already being done. She added that the definition seems to be broad and agreed with the SCO's suggestion to include a list of what is not reimbursable. Ms. Pearce submitted that, as far as excess revenue and any rewards, it is appropriate to provide offsetting savings to the general reimbursable claims because legislation and the code provides for that.

Member Steinmeier noted her concern that, during the process of developing these parameters and guidelines, everyone needs to be sure they have the same understanding as the State Controller's Office or the Commission will end up with Incorrect Reduction Claims. She asked Ms. Shelton to discuss the SCO's comments about standardization for care and about a pro rata analysis of licensing fees.

Ms. Shelton noted that no state agency defines standard veterinary care and that the comments submitted in the record regarding standards have no supporting evidence. Staff found that the language proposed by the veterinarian from the County of San Diego was consistent with the intent of the legislation. She added that staff included veterinary care exclusions that were statutorily based. Regarding construction, Ms. Shelton explained that there is no requirement to use the Humane Societies standards for population density. She stated that claimants would have to go through a certification process to show that construction was the most reasonable solution and then reimbursement would be on a pro rata basis.

Regarding the SCO's concern about excess fees and staff's use of the phrase "as applied," Ms. Shelton explained that the fee authority does not tell agencies how to apply it. Member Steinmeier asked about using the standard of what agencies were doing before the statute. Ms. Shelton agreed that might be reasonable, but said she needed the claimants or state agencies to propose language or a formula for staff to consider.

Member Sherwood thanked the SCO for coming forward now, thereby decreasing the potential for IRCs on this issue. He was concerned that the Commission might need more input from the parties before moving forward. For example, Member Sherwood questioned whether proportional offsets are allowed in other Commission decisions. Ms. Shelton clarified that the statute is identified in the statement of decision as a potential offsetting revenue source. She added that proposed language from the parties might help staff to clarify this issue.

Member Harrigan shared the same concerns as Members Steinmeier and Sherwood and suggested postponing the item and outlining the remaining issues for staff.

Chairperson Porini called forward the next group of interested party and interested person witnesses. Parties were represented as follows: John Humphrey, with the San Diego County Department of Animal Control; Frank Zotter, with the Mendocino County Counsel's Office; Jennifer Clarke, with Tuolumne County Animal Control; Michael Ross, with Contra Costa County Animal Services and California Animal Control Director's Association; and, Lois Newman, with the Cat and Dog Rescue Association.

Mr. Ross complimented staff on its thorough analysis. He disagreed with the offsetting language regarding Section 30652 and noted that his county, and other counties he was aware of, fully utilized the license fees to support the programs in existence prior to the enactment of the statute. Mr. Ross contended that, unless the fees were raised to support the mandate, there would be no excess money available.

Regarding construction costs, Mr. Clarke explained that Tuolumne County's cost analysis for expanding its facility increased due to the increased holding requirements. The County is currently leasing space, but Mr. Clarke was concerned that their costs might not be reimbursable if construction is not started for a few years.

Mr. Zotter apologized for his late filing and thanked staff for its response. He explained that he was not necessarily in disagreement with the other counties, but he offered the pro rata analysis

for offsetting costs as an alternative. He further submitted that Penal Code section 597, subdivision (f), was mentioned in Section 30652, but those costs, like the shelter and field costs, were preexisting and therefore should not be offset.

Mr. Humphrey agreed with staff's recommendation, as amended, with one exception. He asked for clarification of the language regarding the use of excess fees. He further requested the Commission find ongoing costs for periodic computer software license renewal requirements to the extent they are not claimed as indirect costs. Mr. Humphrey urged the Commission to adopt the Humane Society standards submitted by the SCO to set the benchmark for the upper limits of reimbursement. Regarding veterinary care, he submitted that the term "urgency" is not in the statute and that the "pre-statute density" mentioned earlier was not consistent with the statute or Humane Society standards. Regarding DOF's exclusion of the initial vet exam, Mr. Humphrey argued that, though it may have been a practice of some agencies, the mandate now requires it.

Ms. Newman argued that any costs associated with the test claim legislation can be fully recovered by fees charged by counties and therefore, pursuant to Article XIII B, section 6, should not be eligible for state mandate reimbursement. She further argued against staff's use of 1998 figures for numbers of animals in each jurisdiction and stated that figures for 1996 through 2000 would provide a more accurate picture. Ms. Newman submitted that only additional kennels and associated space for dogs and cats should be calculated in additional housing costs so the taxpayers are not being double-taxed for capital improvements through both their local jurisdictions bond-raising methods and the state mandates process. She also argued that wellness vaccinations should not be reimbursable because many jurisdictions have charged for them for years and some include a charge in the adoption fees. She argued that the local taxpayers pay for shelter operations, including veterinary supplies, the adopter pays for vaccinations, so state mandate reimbursement would be a third source of reimbursement for the same activity.

The Commissioners agreed to hold this item over for staff to explore the areas of concern raised today. Mr. Burdick asked if the experts who traveled here today could meet with staff. Ms. Shelton replied that she would prefer written submissions and that she would send out a copy of today's hearing transcript. She noted that Mendocino County might want to propose language on offsetting costs and that she needed evidence in the record from a veterinarian supporting a standard for "prompt and necessary veterinary care" if someone had a proposal different from the County of San Diego's used by staff.
