(9) The commission shall submit communications to the governors and to the presiding officers of the legislatures of the party states regarding the activities of the commission, including an annual report to be submitted on or before January 15 of each year. The commission shall include in the annual report a review of, and recommendations for, low-level radioactive waste disposal methods which are alternative technologies to the shallow land burial of low-level radioactive waste.

(10) The commission shall assemble and make available to the party states, and to the public, information concerning low-level radioactive waste management needs, technologies, and problems.

(11) The commission shall keep a current inventory of all generators within the region, based upon information provided by the party states.

(12) The commission shall keep a current inventory of all regional disposal facilities, including information on the size, capacity, location, specific low-level radioactive wastes capable of being managed, and the projected useful life of each regional disposal facility.

(13) The commission may establish advisory committees for the purpose of advising the commission on the disposal and management of low-level radioactive waste.

(14) The commission may enter into contracts to carry out its duties and authority, subject to projected resources. No contract made by the commission shall bind a party state.

(15) The commission shall prepare contingency plans, with the cooperation and approval of the host state, for the disposal and management of low-level radioactive waste in the event that any regional disposal facility should be closed.

(16) The commission may sue and be sued and, when authorized by a majority vote of the members, may seek to intervene in an administrative or judicial proceeding related to this compact.

(17) The commission shall be managed by an appropriate staff, including an executive director. Notwithstanding any other provision of law, the commission may hire or retain, or both, legal counsel.

(18) The commission may, subject to applicable federal and state laws, recommend to the appropriate host state authority suitable land and rail transportation routes for low-level radioactive waste carriers.

(19) The commission may enter into an agreement to import low-level radioactive waste into the region only if both of the following requirements are met:

(a) The commission approves the importation agreement by a two-thirds vote of the commission.

(b) The commission and the host state assess the affected regional disposal facilities' capability to handle imported low-level radioactive

wastes and any relevant environmental or economic factors, as defined by the host state's appropriate regulatory authorities.

(20) The commission may, upon petition, allow an individual generator, a group of generators, or the host state of the compact, to export low-level radioactive wastes to a low-level radioactive waste disposal facility located outside the region. The commission may approve the petition only by a two-thirds vote of the commission. The permission to export low-level radioactive wastes shall be effective for that period of time and for the amount of low-level radioactive waste, and subject to any other term or condition, which may be determined by the commission.

(21) The commission may approve, only by a two-thirds vote of the commission, the exportation outside the region of material, which otherwise meets the criteria of low-level radioactive waste, if the sole purpose of the exportation is to process the material for recycling.

(22) The commission shall, not later than 10 years before the closure of the initial or subsequent regional disposal facility, prepare a plan for the establishment of the next regional disposal facility.

Article 4. Rights, Responsibilities, and Obligations of Party States

(A) There shall be regional disposal facilities sufficient to dispose of the low-level radioactive waste generated within the region.

(B) Low-level radioactive waste generated within the region shall be disposed of at regional disposal facilities and each party state shall have access to any regional disposal facility without discrimination.

(C) (1) Upon the effective date of this compact, the State of California shall serve as the host state and shall comply with the requirements of subdivision (E) for at least 30 years from the date the regional disposal facility begins to accept low-level radioactive waste for disposal. The extension of the obligation and duration shall be at the option of the State of California.

If the State of California does not extend this obligation, the party state, other than the State of California, which is the largest major generator state shall then serve as the host state for the second regional disposal facility.

The obligation of a host state which hosts the second regional disposal facility shall also run for 30 years from the date the second regional disposal facility begins operations.

(2) The host state may close its regional disposal facility when necessary for public health or safety.

(D) The party states of this compact cannot be members of another regional low-level radioactive waste compact entered into pursuant to the Low-Level Radioactive Waste Policy Act, as amended by the Low-Level Radioactive Waste Policy Amendments Act of 1985 (42 U.S.C. Secs. 2021b to 2021j, incl.).

(E) A host state shall do all of the following:

(1) Cause a regional disposal facility to be developed on a timely basis.

(2) Ensure by law, consistent with any applicable federal laws, the protection and preservation of public health and safety in the siting, design, development, licensing, regulation, operation, closure, decommissioning, and long-term care of the regional disposal facilities within the state.

(3) Ensure that charges for disposal of low-level radioactive waste at the regional disposal facility are reasonably sufficient to do all of the following:

(a) Ensure the safe disposal of low-level radioactive waste and long-term care of the regional disposal facility.

(b) Pay for the cost of inspection, enforcement, and surveillance activities at the regional disposal facility.

(c) Assure that charges are assessed without discrimination as to the party state of origin.

(4) Submit an annual report to the commission on the status of the regional disposal facility including projections of the facility's anticipated future capacity.

(5) The host state and the operator shall notify the commission immediately upon the occurrence of any event which could cause a possible temporary or permanent closure of a regional disposal facility.

(F) Each party state is subject to the following duties and authority:

(1) To the extent authorized by federal law, each party state shall develop and enforce procedures requiring low-level radioactive waste shipments originating within its borders and destined for a regional disposal facility to conform to packaging and transportation requirements and regulations. These procedures shall include, but are not limited to, all of the following requirements:

(a) Periodic inspections of packaging and shipping practices.

(b) Periodic inspections of low-level radioactive waste containers while in the custody of transporters.

(c) Appropriate enforcement actions with respect to violations.

(2) A party state may impose a surcharge on the low-level radioactive waste generators within the state to pay for activities required by paragraph (1).

(3) To the extent authorized by federal law, each party state shall, after receiving notification from a host state that a person in a party state has violated packaging, shipping, or transportation requirements or regulations, take appropriate actions to ensure that these violations do not continue. Appropriate actions may include, but are not limited to, requiring that a bond be posted by the violator to pay the cost of repackaging at the regional disposal facility and prohibit future shipments to the regional disposal facility.

(4) Each party state shall maintain a registry of all generators within the state that may have low-level radioactive waste to be disposed of at a regional disposal facility, including, but not limited to, the amount of low-level radioactive waste and the class of low-level radioactive waste generated by each generator.

(5) Each party state shall encourage generators within its borders to minimize the volume of low-level radioactive waste requiring disposal.

(6) Each party state may rely on the good faith performance of the other party states to perform those acts which are required by this compact to provide regional disposal facilities, including the use of the regional disposal facilities in a manner consistent with this compact.

(7) Each party state shall provide the commission with any data and information necessary for the implementation of the commission's responsibilities, including taking those actions necessary to obtain this data or information.

(8) Each party state shall agree that only low-level radioactive waste generated within the jurisdiction of the party states shall be disposed of in the regional disposal facility, except as provided in paragraph (19) of subdivision (G) of Article 3.

(9) Each party state shall agree that if there is any injury to persons on property resulting from the operation of a regional disposal facility, the damages resulting from the injury may be paid from the third-party liability fund pursuant to subparagraph (b) of paragraph (3) of subdivision (G) of Article 3, only to the extent that the damages exceed the limits of liability insurance carried by the operator. No party state, by joining this compact, assumes any liability resulting from the siting, operation, maintenance, long-term care, or other activity relating to a regional facility, and no party state shall be liable for any harm or damage resulting from a regional facility not located within the state.

Article 5. Approval of Regional Facilities

A regional disposal facility shall be approved by the host state in accordance with its laws. This compact does not confer any authority on the commission regarding the siting, design, development, licensure, or other regulation, or the operation, closure, decommissioning, or long-term care of, any regional disposal facility within a party state.

Article 6. Prohibited Acts and Penalties

(A) No person shall dispose of low-level radioactive waste within the region unless the disposal is at a regional disposal facility, except

as otherwise provided in paragraphs (20) and (21) of subdivision (G) of Article 3.

(B) No person shall dispose of or manage any low-level radioactive waste within the region unless the low-level radioactive waste was generated within the region, except as provided in paragraphs (19), (20), and (21) of subdivision (G) of Article 3.

(C) Violations of this section shall be reported to the appropriate law enforcement agency within the party state's jurisdiction.

(D) Violations of this section may result in prohibiting the violator from disposing of low-level radioactive waste in the regional disposal facility, as determined by the commission or the host state.

Article 7. Eligibility, Entry into Effect, Congressional Consent, Withdrawal, Exclusion

(A) The States of Arizona, North Dakota, South Dakota, and California are eligible to become parties to this compact. Any other state may be made eligible by a majority vote of the commission and ratification by the legislatures of all of the party states by statute, and upon compliance with those terms and conditions for eligibility which the host state may establish. The host state may establish all terms and conditions for the entry of any state, other than the states named in this subparagraph, as a member of this compact.

(B) Upon compliance with the other provisions of this compact, an eligible state may become a party state by legislative enactment of this compact or by executive order of the governor of the state adopting this compact. A state becoming a party state by executive order shall cease to be a party state upon adjournment of the first general session of its legislature convened after the executive order is issued, unless before the adjournment the legislature enacts this compact.

(C) A party state, other than the host state, may withdraw from the compact by repealing the enactment of this compact, but this withdrawal shall not become effective until two years after the effective date of the repealing legislation. If a party state which is a major generator of low-level radioactive waste voluntarily withdraws from the compact pursuant to this subdivision, that state shall make arrangements for the disposal of the other party states' low-level radioactive waste for a time period equal the period of time it was a member of this compact.

If the host state withdraws from the compact, the withdrawal shall not become effective until five years after the effective date of the repealing legislation.

(D) A party state may be excluded from this compact by a two-thirds vote of the commission members, acting in a meeting, if the state to be excluded has failed to carry out any obligations required by compact.

(E) This compact shall take effect upon the enactment by statute by the legislatures of the State of California and at least one other eligible state and upon the consent of Congress and shall remain in effect until otherwise provided by federal law. This compact is subject to review by Congress and the withdrawal of the consent of Congress every five years after its effective date, pursuant to federal law.

Article 8. Construction and Severability

(A) The provisions of this compact shall be broadly construed to carry out the purposes of the compact, but the sovereign powers of a party state shall not be infringed unnecessarily.

(B) This compact does not affect any judicial proceeding pending on the effective date of this compact.

(C) If any provision of this compact or the application thereof to any person or circumstances is held invalid, that invalidity shall not affect other provisions or applications of the compact that can be given effect without the invalid provision or application, and to this end the provisions of this compact are severable.

(D) Nothing in this compact diminishes or otherwise impairs the jurisdiction, authority, or discretion of either of the following:

(1) The Nuclear Regulatory Commission pursuant to the Atomic Energy Act of 1954, as amended (42 U.S.C. Sec. 2011 et seq.).

(2) An agreement state under Section 274 of the Atomic Energy Act of 1954, as amended (42 U.S.C. Sec. 2021).

(E) Nothing in this compact confers any new authority on the states or commission to do any of the following:

(1) Regulate the packaging or transportation of low-level radioactive waste in a manner inconsistent with the regulations of the Nuclear Regulatory Commission or the United States Department of Transportation.

(2) Regulate health, safety, or environmental hazards from source, byproduct, or special nuclear material.

(3) Inspect the activities of licensees of the agreement states or of the Nuclear Regulatory Commission.

115260. Notwithstanding Section 115255, authority for on-highway routing and enforcement relating to low-level radioactive waste shall, pursuant to other provisions of law, remain with the Department of the California Highway Patrol for low-level radioactive waste generated from, and shipments into, California.

115265. Notwithstanding Section 115255, authority for rail transportation routing and enforcement relating to low-level radioactive waste shall remain with the Public Utilities Commission pursuant to the Public Utilities Act (Part 1 (commencing with

Section 201) of Division 1 of the Public Utilities Code) for low-level radioactive waste generated from, and shipped into, California.

115270. The department shall adopt regulations specifying the modes of transportation which are most protective of public health and the environment which shall be used by generators to transport low-level radioactive waste within the state.

CHAPTER 9. NUCLEAR POWERPLANT RADIATION

115275. It is the intent of the Legislature that in the event of a nuclear accident timely and effective communications between the operators of nuclear powerplants in California and those state and local officials charged with nuclear emergency response activities be assured.

115280. (a) Each privately-owned and publicly-owned public utility operating a nuclear powerplant with a generating capacity of 50 megawatts or more shall install an automated alert system that will activate alarms in the California State Warning Center of the Office of Emergency Services in a manner to be determined by the Office of Emergency Services in consultation with the department and the appropriate county emergency services agency. This automated alert system shall duplicate the following alarms in the control rooms of each nuclear powerplant:

(1) Safety injection actuation (operation of the emergency core cooling system).

(2) High radiation alarm of the radioactive gas effluent stack monitor.

(b) The automated alert system shall be operative within 12 months of the effective date of this chapter.

(c) In no event shall the capital costs of complying with this section exceed two hundred thousand dollars ($200,000) per nuclear powerplant. The operator of each nuclear powerplant shall be responsible for any maintenance or recurring charges. The funds expended by privately owned utilities under this section shall be allowed for ratemaking purposes by the Public Utilities Commission. Publicly owned public utilities shall include funds expended under this section in their rates.

(d) The automated alert system shall be operational whenever corresponding alarms in the control rooms of each nuclear powerplant are required to be operational under the terms of the operating license issued by the Nuclear Regulatory Commission, except for periods of time required for maintenance, repair, calibration, or testing.

(e) Nothing in this section shall require plant modifications or the conduct of operations that may be in conflict with conditions of a license to operate issued by the Nuclear Regulatory Commission or other activities authorized by the Nuclear Regulatory Commission.

(f) The Office of Emergency Services shall make provision for immediate notification of appropriate local officials upon activation of the automated alert system pursuant to this section.

115285. Nothing in this chapter shall relieve nuclear powerplant operators of their responsibilities to notify local authorities as otherwise provided by law.

115290. Failure to comply with any provision of this chapter shall not constitute the basis for an action in a court of law or administrative proceeding to enjoin or prevent the operation or start-up of a nuclear facility.

115295. If the Humboldt Bay Nuclear Generating Station is not in operation on the effective date of this section, the local emergency plan for it shall not be required to meet the revised emergency response plan requirements of Section 8610.5 of the Government Code until the Nuclear Regulatory Commission determines that the powerplant meets Nuclear Regulatory Commission seismic safety criteria, or until the Nuclear Regulatory Commission issues an order rescinding the restrictions imposed on the Humboldt Bay Nuclear Generating Station in its order of May 21, 1976.

In the event that the Nuclear Regulatory Commission determines that the Humboldt Bay Nuclear Generating Station meets Nuclear Regulatory Commission seismic safety standards, or issues an order rescinding the restrictions in its order of May 21, 1976, a draft county emergency plan meeting the requirements of Section 8610.5 of the Government Code shall be submitted to the Office of Emergency Services for review within 180 days of the determination or rescission. Within 90 days after submission of the draft county emergency plan, approval of a final plan shall be completed by the Office of Emergency Services.

PART 10. RECREATIONAL SAFETY

CHAPTER 1. DEFINITIONS (Reserved)

CHAPTER 2. POWERS AND AUTHORITIES (Reserved)

CHAPTER 3. ENFORCEMENT AND PENALTIES (Reserved)

CHAPTER 4. SAFE RECREATIONAL LAND USE (Reserved)

Article 1. Abandoned Excavations

115700. (a) Every person owning land in fee simple or in possession thereof under lease or contract of sale who knowingly permits the existence on the premises of any abandoned mining shaft, pit, well, septic tank, cesspool, or other abandoned excavation dangerous to persons legally on the premises, or to minors under the

age of 12 years, who fails to cover, fill, or fence securely that dangerous abandoned excavation and keep it so protected, is guilty of a misdemeanor.

(b) Every person owning land in fee simple or in possession thereof under lease or contract of sale who knowingly permits the existence on the premises of any permanently inactive well, cathodic protection well, or monitoring well that constitutes a known or probable preferential pathway for the movement of pollutants, contaminants, or poor quality water, from above ground to below ground, or vertical movement of pollutants, contaminants, or poor quality water below ground, and that movement poses a threat to the quality of the waters of the state, shall be guilty of a misdemeanor.

(c) For purposes of this section, ''well'' includes any of the following:

(1) A ''monitoring well'' as defined by Section 13712 of the Water Code.

(2) A ''cathodic well'' as defined by Section 13711 of the Water Code.

(3) A ''water well'' as defined by Section 13710 of the Water Code.

(d) A ''permanently inactive well'' is a well that has not been used for a period of one year, unless the person owning land in fee simple or in possession thereof under lease or contract of sale demonstrates an intent for future use for water supply, ground water recharge, drainage, or ground water level control, heating or cooling, cathodic protection, ground water monitoring, or related uses. A well owner shall provide evidence to the local health officer of an intent for future use of an inactive well by maintaining the well in a way that the following requirements are met:

(1) The well shall not allow impairment of the quality of water within the well and ground water encountered by the well.

(2) The top of the well or well casing shall be provided with a cover, that is secured by a lock or by other means to prevent its removal without the use of equipment or tools, to prevent unauthorized access, to prevent a safety hazard to humans and animals, and to prevent illegal disposal of wastes in the well. The cover shall be watertight where the top of the well casing or other surface openings to the well are below ground level, as in a vault or below known levels of flooding. The cover shall be watertight if the well is inactive for more than five consecutive years. A pump motor, angle drive, or other surface feature of a well, when in compliance with the above provisions, shall suffice as a cover.

(3) The well shall be marked so as to be easily visible and located, and labeled so as to be easily identified as a well.

(4) The area surrounding the well shall be kept clear of brush, debris, and waste materials.

(e) At a minimum, permanently inactive wells shall be destroyed in accordance with standards developed by the Department of Water

Resources pursuant to Section 13800 of the Water Code and adopted by the State Water Resources Control Board or local agencies in accordance with Section 13801 of the Water Code. Minimum standards recommended by the department and adopted by the state board or local agencies for the abandonment or destruction of ground water monitoring wells or class 1 hazardous injection wells shall not be construed to limit, abridge, or supersede the powers or duties of the department, in accordance with Section 13801 of the Water Code.

(f) Nothing in this section is a limitation on the power of a city, county, or city and county to adopt and enforce additional penal provisions regarding the types of wells and other excavations described in subdivisions (a) and (b).

115705. The board of supervisors may order securely covered, filled, or fenced abandoned mining excavations on unoccupied public lands in the county.

115710. The board of supervisors shall order securely fenced, filled, or covered any abandoned mining shaft, pit, or other excavation on unoccupied land in the county whenever it appears to them, by proof submitted, that the excavation is dangerous or unsafe to man or beast. The cost of covering, filling, or fencing is a county charge.

115715. Every person who maliciously removes or destroys any covering or fencing placed around, or removes any fill placed in, any shaft, pit, or other excavation, as provided in this article, is guilty of a misdemeanor.

115720. This article is not applicable to any abandoned mining shaft, pit, well, septic tank, cesspool, or other abandoned excavation that contains a surface area of more than one-half acre.

Article 2. Playgrounds

115725. On or before January 1, 1992, the state department, in consultation with the office of the State Architect, the California Parks and Recreation Society, the League of California Cities, the Department of Parks and Recreation, the State Department of Education, and the California Council of the American Society of Landscape Architects, shall adopt regulations for the design, installation, inspection, maintenance, and supervision where appropriate, and training of personnel involved in the design, installation, and maintenance, of all playgrounds either operated by public agencies, including a state agency, city, county, city and county, school district, and any other district, or operated by any entity where the playground is open to the public. Those regulations shall meet the standard of care imposed by courts of law on playground operators, and shall, at a minimum, impose guidelines and criteria that shall be at least as protective as the guidelines in the Handbook for Public Playground Safety produced by the United

States Consumer Products Safety Commission, shall give due consideration to any successor to the Handbook for Public Playground Safety that may be published, and shall include more protective requirements where the state department finds those guidelines will provide inadequate protection. The regulations shall include special provisions for playgrounds in day care settings, that shall be developed in consultation with the State Department of Social Services and the California Children's Lobby, and that shall be appropriate for children within the range of ages in day care settings. The state department shall not be responsible for enforcement of any regulations pursuant to this section.

115730. All public agencies operating playgrounds, including a state agency, city, county, city and county, and district, shall upgrade their playgrounds by replacement or improvement as necessary to satisfy the regulations adopted pursuant to Section 115725 to the extent state funds are made available specifically for that purpose through state bonds or other means. All other entities operating playgrounds open to the public shall upgrade their playgrounds by replacement or improvement, as necessary to satisfy the regulations adopted pursuant to Section 115725, on or before January 1, 2000. This section shall not affect the liability or absence of liability of playground operators.

115735. For purposes of this article, all of the following shall apply:

(a) An ''entity operating a playground open to the public'' shall include, but not be limited to, a church, subdivision, hotel, motel, resort, camp, office, hospital, shopping center, day care setting, and restaurant.

(b) ''Playground'' shall refer to an improved outdoor area designed, equipped, and set aside for children's play that is not intended for use as an athletic playing field or athletic court, and shall include any play equipment, surfacing, fencing, signs, internal pathways, internal land forms, vegetation, and related structures.

(c) ''Supervision'' shall include all general and specific supervision necessary to protect children from unreasonable risk of harm from site hazards, the acts of other children, or the use of the playground in a way that was not intended by the designer or manager of the playground. The regulations required pursuant to this article shall not expand on the periods or circumstances when supervision shall be provided beyond the periods or circumstances already determined to be within the existing standard of care to which a playground operator is held.

115740. Regulations adopted pursuant to this article shall include special provisions where appropriate, as determined by the state department, for the needs of the developmentally disabled in state institutions, pursuant to Division 4.1 (commencing with Section 4400) of, and Division 4.5 (commencing with Section 4500) of, the Welfare and Institutions Code, and in community care facilities, and

other public and private institutions that provide residential or day care specifically for the developmentally disabled.

115745. (a) After the effective date of the regulations adopted pursuant to this article, no state funding shall be available for the planning, development, or redevelopment of any playground, unless the playground, after completion of the state-funded project, will conform to the applicable regulations adopted pursuant to this article. However, where state funds have been appropriated to, or allocated for, a playground project prior to the effective date of the regulations but the regulations become effective prior to the completion of the project, that funding shall be maintained, as long as the playground is altered to conform to the regulations to the extent the alterations can be made without adding significantly to the project cost.

(b) After the date by which an entity is required to conform its playground to satisfy regulations adopted pursuant to this article, no state funding shall be available for the operation, maintenance, or supervision of the playground unless the playground conforms to the applicable regulations adopted pursuant to this article.

115750. All new playgrounds open to the public built by a public agency or any other entity more than six months after the effective date of the regulations adopted pursuant to this article shall conform to the requirements of those regulations. Where the playground developer knows of the regulations before undertaking any expenses related to designing or building the playground, this six-month grace period shall not apply.

Article 3. Wooden Playground Equipment

115775. (a) No state funds shall be used by any state agency, onsite employee child care center for state employees, city, county, city and county, district, superintendent of schools, school district, or community college district to purchase wooden playground or recreational equipment where there is a likelihood of contact by children and when the equipment has been treated with any of the following substances:

(1) Pentachlorophenol.

(2) Creosote.

(3) Arsenic, elemental arsenic, or arsenic copper combination, unless the wood is treated with a nontoxic and nonslippery sealer and the seller certifies that the wood is treated in accordance with commodity standard C-17 for playground equipment as adopted by the American Wood-Preservers Association.

(b) The state or any city, county, city and county, district, superintendent of schools, school district, community college district, or onsite employee child care center for state employees that receives education or parks and recreation funds from the state shall

not use any portion of these funds for the maintenance or upkeep of any wooden structures treated with any of the substances that are prohibited from purchase pursuant to subdivision (a) and where there is a likelihood of contact by children, unless the state, city, county, city and county, superintendent of schools, school district, district, community college district, or onsite employee child care center for state employees treats the wooden structures with nontoxic and nonslippery sealers and reseals the treated structure in accordance with subdivision (c).

(c) The installer of any wooden playground or recreational equipment that will be available for public use and that has been treated with a substance listed in paragraph (3) of subdivision (a) shall seal the structures with a nontoxic and nonslippery sealant prior to, or at the time of, the installation of the equipment. After the equipment that is available for public use has been sealed pursuant to this subdivision, the owner of the equipment shall reseal the treated equipment every two years thereafter with a nontoxic and nonslippery sealant.

115800. (a) No operator of a skateboard park shall permit any person to ride a skateboard therein, unless that person is wearing a helmet, elbow pads, and knee pads.

(b) With respect to any facility, owned or operated by a local public agency, that is designed and maintained for the purpose of recreational skateboard use, and that is not supervised on a regular basis, the requirements of subdivision (a) may be satisfied by compliance with the following:

(1) Adoption by the local public agency of an ordinance requiring any person riding a skateboard at the facility to wear a helmet, elbow pads, and knee pads.

(2) The posting of signs at the facility affording reasonable notice that any person riding a skateboard in the facility must wear a helmet, elbow pads, and knee pads, and that any person failing to do so will be subject to citation under the ordinance required by paragraph (1).

(c) ''Local public agency'' for purposes of this section includes, but is not limited to, a city, county, or city and county.

CHAPTER 5. SAFE RECREATIONAL WATER USE

Article 1. Recreational Use of Reservoirs

115825. (a) It is hereby declared to be the policy of this state that multiple use should be made of all public water within the state, to the extent that multiple use is consistent with public health and public safety.

(b) Except as provided in Section 115840, recreational uses shall not, with respect to a reservoir in which water is stored for domestic

use, include recreation in which there is bodily contact with the water by any participant.

115830. All water supply reservoirs of a public agency, whether heretofore or hereafter constructed, shall be open for recreational use by the people of this state, subject to the regulations of the department.

115835. Unless the context otherwise requires, the following definitions shall control the construction of this article:

(a) ''Multiple use'' includes domestic, industrial, agricultural, and recreational uses.

(b) ''Public agency'' means the state or any city, other than a chartered city, county, public district, or other public institution.

(c) ''Reservoir'' does not include ditches, canals, or any similar type of water distributing facility.

115840. (a) In San Diego County, recreational uses shall not, with respect to a reservoir in which water is stored for domestic use, include recreation in which there is bodily contact with the water by any participant, unless both of the following conditions are satisfied:

(1) The water subsequently receives complete water treatment, including coagulation, flocculation, sedimentation, filtration, and disinfection, before being used for domestic purposes.

(2) The reservoir is operated in compliance with regulations of the department, as provided in Section 115830.

(b) The recreational use may be subject to additional conditions and restrictions adopted by the entity operating the water supply reservoir, if the conditions and restrictions do not conflict with regulations of the department and are designed to further protect or enhance the public health and safety.

115845. The public agency operating any water supply reservoir that is open for recreational use pursuant to this article may charge a use fee to cover the cost of policing the area around the reservoir, including the cost of providing the necessary sanitary facilities and other costs incidental to the recreational use of the reservoir.

115850. This article does not apply to terminal reservoirs for the supply of domestic water.

Article 2. Public Beaches

115875. ''Public beach,'' as used in Sections 115875 to 115895, inclusive, means any beach area used by the public for recreational purposes that is owned, operated, or controlled by the state, any state agency, any local agency, or any private person in this state.

115880. The department shall by regulation establish minimum standards for the sanitation of public beaches, including, but not limited to, the removal of refuse, as it determines are reasonably necessary for the protection of the public health and safety.

Any city or county may adopt standards for the sanitation of public beaches within its jurisdiction that are stricter than the standards adopted by the state department pursuant to this section.

115885. The health officer having jurisdiction over the area in which a public beach is created shall:

(a) Inspect the public beach to determine whether the standards established pursuant to Section 115880 are being complied with. If the health officer finds any violation of the standards, he or she shall restrict the use of, or close, the public beach or portion thereof in which the violation occurs until such time as the standard violated is complied with.

(b) Investigate any complaint of a person of a violation of any standard established by the department pursuant to Section 115880. If the health officer finds any violation of the standards prescribed by the department, he or she shall restrict the use of, or close, the public beach or portion thereof until the time as the standard violated is complied with. If the person who made the complaint is not satisfied with the action taken by the health officer, he or she may report the violation to the department. The department shall investigate the reported violation, and, if it finds that the violation exists, it shall restrict the use of or close the public beach or portion thereof until the standard violated is complied with.

(c) Report any violation of the standards established pursuant to Section 115880 to the Director of Parks and Recreation.

(d) Report any violation of the standards established pursuant to Section 115880 to the district attorney, or if the violation occurred in a city and, pursuant to Section 41803.5 of the Government Code, the city attorney is authorized to prosecute misdemeanors, to the city attorney.

115890. Prior to restricting the use of or closing a public beach or portion thereof alleged to be in violation of standards, the health officer, or the department as the case may be, shall give reasonable notice of the violation to the owner of, or person or agency in charge of, the beach.

115895. Any private person who violates any regulation adopted by the state department pursuant to Section 115880 is guilty of a misdemeanor.

115900. For the purposes of Sections 115900 to 115915, inclusive, the following definitions apply:

(a) ''Beach'' means any public beach of the ocean waters and bays of the state where water-contact sports are engaged in by the public.

(b) ''Board'' means the State Water Resources Control Board.

(c) ''Health officer'' means the legally appointed health officer or director of environmental health of the county or city having jurisdiction of the area in which a public saltwater beach is located.

115905. The Legislature finds and declares all of the following:

(a) California's world-famous beaches are an invaluable economic, environmental, and recreational resource that must be protected for present and future generations. Millions of residents and visitors alike visit the state's beaches annually.

(b) Pollution from toxic spills, untreated municipal sewage, and agricultural and urban runoff threatens this critical resource.

(c) During 1989 through 1991 alone, at least 400 of the state's beaches had to be posted ''off-limits'' due to dangerous levels of bacterial and toxic contamination.

(d) Due to this pollution, local health officials were forced to close one or more beaches between San Diego and Mendocino Counties for all but 18 days in 1991.

(e) This contamination of our beaches poses serious threats to the public's health, increasing the risk that persons who use the beaches will suffer from hepatitis, gastroenteritis, and other dangerous illnesses.

(f) Notwithstanding the importance and potential severity of this problem, the state has never conducted a statewide survey to document annual beach closings.

(g) The state does not have uniform testing protocols that must be followed to ensure that the public is never exposed to dangerous contamination at the state's beaches.

(h) The state does not have uniform standards requiring beach postings when California Ocean Plan bathing water standards, as adopted by the board pursuant to Section 13170.2 of the Water Code, are exceeded.

(i) The state does not have uniform requirements mandating the frequency with which beach waters must be tested to ensure public safety. Beach water sampling currently varies greatly from county to county. For example, Los Angeles County tests its beaches every week of the year while other coastal counties test much less frequently.

(j) More accurate and centralized recordkeeping on the relative contributions of pollutant sources to beach closures would enable more effective targeting of corrective actions to keep our beaches safe and our coastal areas economically strong.

115910. (a) On or before March 30, 1994, and annually thereafter, each health officer shall submit to the board a survey documenting all beach postings and closures due to threats to the public health that occurred during the preceding calendar year. The survey shall, at a minimum, include the location and duration of each beach closure in its jurisdiction and the suspected sources of the contamination that caused the closure, if known.

(b) On or before September 30, 1994, and annually thereafter, the board shall publish a statewide report documenting the beach posting and closure data provided to the board by health officers for the preceding calendar year. The report shall, at a minimum, include

the location and duration of each beach closure and the suspected sources of the contamination that caused the closure, if known.

(c) Within 30 days of publication of the report, the state board shall distribute copies of the report to the Governor, the Legislature, and major media organizations, and copies of the report shall be made available to the public.

115915. Whenever any beach fails to meet the bacteriological standards of Section 7958 of Title 17 of the California Code of Regulations, the health officer, after determining that the cause of the elevated bacteriological levels constitutes a public health hazard, shall, at a minimum, post the beach with conspicuous warning signs to inform the public of the nature of the problem and the possibility of risk to public health.

Article 3. Life Saving Devices

115975. ''Resort,'' as used in this article, means a resort, bathhouse, or other public place for the purpose of accommodating bathers, bordering upon or adjoining the seacoast or a lake where the public resort for the purpose of bathing in the open sea or lake.

115980. No person shall own or conduct a resort unless it is equipped with at least one lifeboat.

115985. The boat shall be fully equipped with oars, oarlocks, and not less than two life preservers, and two hundred feet of rope.

It shall be kept in good repair and near the resort.

115990. The boat shall have the word ''lifeboat'' plainly printed or painted upon it. It shall be used for no purpose other than for the saving of life or for other cases of emergency.

115995. Every person who violates any provision of this article is guilty of a misdemeanor punishable by a fine of not less than ten nor more than four hundred dollars ($400), or by imprisonment for not less than ten days nor more than six months, or by both.

116000. ''Resort,'' as used in this article, means any public bathing or swimming place or resort on a river or stream.

116005. No person shall maintain a resort unless he or she carefully sounds the depth of water and locates the eddies and pools and determines the presence and nature of dangerous currents, sunken logs, rocks, and obstructions in the stream or river.

116010. No person shall maintain a resort unless signs indicating in plain letters the depth of water, the location of pools or eddies, and the presence and direction of currents of water are placed and maintained in the water during the season when bathing and swimming are permitted or invited.

116015. No person shall maintain a resort unless safety ropes are stretched wherever necessary to show the line of eddies, pools, sunken obstructions, and other hidden dangers to bathers in the water.

116020. Every person who violates any provision of this article is guilty of a misdemeanor.

Article 5. Swimming Pool Sanitation

116025. ''Public swimming pool,'' as used in this article, means any public swimming pool, bathhouse, public swimming and bathing place and all related appurtenances.

116028. ''Lifeguard service,'' as used in this article, means the attendance at a public swimming pool during periods of use, of one or more lifeguards who possess, as minimal qualifications, current Red Cross advanced lifesaving certificates or Y.M.C.A. senior lifesaving certificates, or have equivalent qualifications and who are trained to administer first aid, including, but not limited to, cardiopulmonary resuscitation in conformance with Section 123725 and the regulations adopted thereunder, and who have no duties to perform other than to supervise the safety of participants in water-contact activities. ''Lifeguard services'' includes the supervision of the safety of participants in water-contact activities by lifeguards who are providing swimming lessons, coaching or overseeing water-contact sports, or providing water safety instructions to participants when no other persons are using the facilities unless those persons are supervised by separate lifeguard services.

116030. (a) The construction standards as set forth in this article and the regulations adopted pursuant thereto, shall not apply to any artificially constructed swimming facility in excess of 20,000 square feet of surface area, including, but not limited to, a manmade lake or swimming lagoon with sand beaches.

(b) The requirements of this article and regulations adopted pursuant thereto, pertaining to the operation, maintenance, and use of a public swimming pool, including the quality and purity of the water, lifesaving and other measures to ensure the safety of bathers, and measures to ensure personal cleanliness of bathers shall apply to the swimming facilities described in subdivision (a).

116033. Persons providing aquatic instruction, including, but not limited to, swimming instruction, water safety instruction, water contact activities, and competitive aquatic sports, at a public swimming pool shall possess an American Red Cross Emergency Water Safety Course certificate, or have equivalent qualifications, as determined by the state department. In addition, these persons shall be certified in standard first aid and cardiopulmonary resuscitation (CPR). All of these persons shall meet these qualifications by January 1, 1991. Persons who only disseminate written materials relating to water safety, are not persons providing aquatic instruction within the meaning of this section.

The requirements of this section shall be waived under either of the following circumstances: (a) when one or more aquatic instructors possessing the American Red Cross Emergency Water Safety Course Certificate or its equivalent are in attendance continuously during periods of aquatic instruction, or (b) when one or more lifeguards meeting the requirements of Section 116028 are in attendance continuously during periods of aquatic instruction.

116035. The department has supervision of sanitation, healthfulness, and safety of public swimming pools.

116038. Every person proposing to construct a public swimming pool shall file a copy of the plans therefor, prior to construction, with the local health officer having jurisdiction for approval.

116040. Every person operating or maintaining a public swimming pool must do so in a sanitary, healthful and safe manner.

116043. Every public swimming pool, including swimming pool structure, appurtenances, operation, source of water supply, amount and quality of water recirculated and in the pool, method of water purification, lifesaving apparatus, measures to insure safety of bathers, and measures to insure personal cleanliness of bathers shall be such that the public swimming pool is at all times sanitary, healthful and safe.

116045. (a) Lifeguard service shall be provided for any public swimming pool that is of wholly artificial construction and for the use of which a direct fee is charged. For all other public swimming pools, lifeguard service shall be provided or signs shall be erected clearly indicating that the service is not provided.

(b) ''Direct fee,'' as used in this section, means a separately stated fee or charge for the use of a public swimming pool to the exclusion of any other service, facility, or amenity.

116048. (a) On or after January 1, 1987, for public swimming pools in any common interest development, as defined in Section 1351 of the Civil Code, that consists of fewer than 25 separate interests, as defined in subdivision (*l*) of Section 1351 of the Civil Code, the person operating each such pool open for use shall be required to keep a record of the information required by subdivision (a) of Section 65523 of Title 22 of the California Administrative Code, except that the information shall be recorded at least two times per week and at intervals no greater than four days apart.

(b) On or after January 1, 1987, any rule or regulation of the department that is in conflict with subdivision (a) is invalid.

116049. (a) ''Public swimming pool,'' as used in this section, means any public swimming pool defined in Section 116025 that is owned or operated by the state or any local governmental entity, including, but not limited to, any city, county, city and county, charter city, charter county, or charter city and county.

(b) All dry-niche light fixtures, and all underwater wet-niche light fixtures operating at more than 15 volts in public swimming pools

shall be protected by a ground-fault circuit interrupter in the branch circuit, and all light fixtures in public swimming pools shall have encapsulated terminals. This subdivision is declaratory of existing law.

(c) Any public swimming pools that do not meet the requirements specified in subdivision (b) by January 1, 1995, shall be retrofitted to comply with these requirements by January 1, 1996.

(d) The ground-fault circuit interrupter required pursuant to this section shall comply with Underwriter's Laboratory standards.

(e) Any state or local governmental entity that owns or operates a public swimming pool shall have its public swimming pool inspected by a qualified inspector prior to July 1, 1996, to determine compliance with this section.

(f) A public swimming pool may charge a fee, or increase its fee charged, to the public for use of the pool, for the purpose of recovering the administrative and other costs of retrofitting pools in compliance with this section. The charge or increase due to this section shall terminate when funds sufficient to cover these costs are collected.

(g) All electrical work required for compliance with this section shall be performed by an electrician licensed pursuant to Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code.

116050. Except as provided in Section 18930, the department shall make and enforce regulations pertaining to public swimming pools as it deems properand shall enforce building standards published in the State Building Standards Code relating to public swimming pools; provided, that no rule or regulation as to design or construction of pools shall apply to any pool that has been constructed before the adoption of the regulation, if the pool as constructed is reasonably safe and the manner of the construction does not preclude compliance with the requirements of the regulations as to bacteriological and chemical quality and clarity of the water in the pool. The department shall adopt and submit building standards for approval pursuant to Chapter 4 (commencing with Section 18935) of Part 2.5 of Division 13 of this code for the purposes described in this section.

116053. Every health officer shall enforce the building standards published in the State Building Standards Code relating to swimming pools and the other regulations adopted by the department pursuant to this article in his or her jurisdiction.

116055. For the purposes of this article, any health officer, or any inspector of the department, may at all reasonable times enter all parts of the premises of a public swimming pool to make examination and investigation to determine the sanitary condition and whether this article, building standards published in the State Building Standards Code relating to swimming pools, or the other regulations

adopted by the department pursuant to this article are being violated.

116058. The department may publish the reports of inspections.

116060. Any public swimming pool constructed, operated, or maintained contrary to the provisions of this article is a public nuisance, dangerous to health.

116063. Any nuisance maintained in violation of this article may be abated or enjoined in an action brought by a local health officer, or the department, or it may be summarily abated in the manner provided by law for the summary abatement of other public nuisances dangerous to health.

116065. Every person who violates any provision of this article, building standards published in the State Building Standards Code relating to swimming pools, or the rules and regulations adopted pursuant to the provisions of this article, is guilty of a misdemeanor, punishable by a fine of not less than fifty dollars ($50) nor more than one thousand dollars ($1,000), or by imprisonment for not more than six months, or both.

116068. Each day that a violation of this article continues is a separate offense.

Article 6. Ocean Water-Contact Sports

116070. As used in this article, water-contact sport means any sport in which the body of a person comes into physical contact with water, including but not limited to swimming, surfboarding, paddleboarding, skin diving, and water-skiing. It does not include boating or fishing.

116075. The department has supervision of sanitation, healthfulness, and safety of the public beaches and public water-contact sport areas of the ocean waters and bays of the state and, except as provided in Section 18930, the department may make and enforce regulations pertaining thereto as it deems proper.

116080. Regulations made pursuant to this article shall include suitable standards of safe bacteria count for water-contact sports areas specified by the State Water Pollution Control Board or regional water pollution control boards, which standards shall be applied to all public water-contact sport areas of the ocean waters and bays of the state.

116085. Every person who violates any rule or regulation adopted pursuant to this article is guilty of a misdemeanor.

116090. Nothing contained in this article shall be construed to give the department the authority to fix the areas wherein water-contact sports may be engaged in or to affect the authority of the State Water Pollution Control Board or regional water pollution control boards to fix appropriate areas for various uses.

PART 11. VECTORS

CHAPTER 1. DEFINITIONS

116100. As used in Article 5 (commencing with Section 116185) of Chapter 2, ''department'' means the State Department of Health Services.

116102. ''Place,'' as used in Article 3 (commencing with Section 116125) of Chapter 2 and Section 116250, includes land, place, building, structure, wharf, pier, dock, vessel, or water craft.

116104. ''Rodents,'' as used in Article 3 (commencing with Section 116125) of Chapter 2 and Section 116250, means rats, mice, gophers, and ground squirrels.

116106. ''Possess,'' as used in Article 3 (commencing with Section 116125) of Chapter 2 and Section 116250, includes control, own, lease, occupy, possess, or have charge of or dominion over.

116108. ''Vector,'' as used in Article 1 (commencing with Section 116110) of, and Article 2 (commencing with Section 116120) of Chapter 2, and Section 106925, means any animal capable of transmitting the causative agent of human disease or capable of producing human discomfort or injury, including, but not limited to, mosquitoes, flies, other insects, ticks, mites, and rats.

CHAPTER 2. POWERS AND DUTIES

Article 1. Vector Biology and Control

116110. The department shall maintain a program of vector biology and control including, but not limited to, the following:

(a) Providing consultation and assistance to local vector control agencies in developing and conducting programs for the prevention and control of vectors.

(b) Surveillance of vectors and vector-borne diseases.

(c) Coordinating and conducting emergency vector control, as required.

(d) Training and certifying government agency vector control technicians.

(e) Disseminating information to the public regarding protection from vectors and vector-borne diseases.

Article 2. Importation of Exotic Vectors

116120. (a) It shall be unlawful for any person to import into the state any exotic vector without written approval from the state department.

(b) The state department shall issue an applicant written authority to import into the state any exotic vector upon a

determination by the state department that the public health and safety will not be endangered thereby.

(c) ‘‘Exotic vector’’ means a vector species that is not native to California and is not commonly found in the state.

(d) Any violation of this section is a misdemeanor.

Article 3. Rodent Abatement

116125. Every person possessing any place that is infested with rodents, as soon as their presence comes to his or her knowledge, shall at once proceed and continue in good faith to endeavor to exterminate and destroy the rodents, by poisoning, trapping, and other appropriate means.

116130. The department, the board of supervisors of each county, local health officers, or inspectors appointed by any of them, as provided in this article and Chapter 3 (commencing with Section 116250), may inspect all places for the purpose of ascertaining whether they are infested with rodents and whether the requirements of this article and Chapter 3 (commencing with Section 116250) as to their extermination and destruction are being complied with. However, no building occupied as a dwelling, hotel, or rooming house, shall be entered for inspection purposes except between the hours of 9 a.m., and 5 p.m.

116135. The board of supervisors of each county and the governing body of each city, whenever it may by resolution determine that it is necessary for the preservation of the public health or to prevent the spread of contagious or infectious disease, communicable to mankind, or when it determines that it is necessary to prevent great and irreparable damage to crops or other property, may appropriate money for the purchase of, and may purchase, poison, traps, and other materials for the purpose of exterminating and destroying rodents in that county or city, and may employ and pay inspectors, who shall prosecute the work of extermination and destruction on both private and public property in the county or city.

116140. Whenever any person possessing any place that is infested with rodents, fails, neglects or refuses to proceed and to continue to endeavor to exterminate and destroy the rodents, as required in this article and Chapter 3 (commencing with Section 116250), the department and its inspectors, the county board of supervisors and its inspectors, and the local health officer, shall at once cause the rodents to be exterminated and destroyed.

116145. The expense of exterminating and destroying the rodents is a charge against the county or city in which the work is done, and the board of supervisors or other governing body shall allow and pay it.

116150. The governing body shall record in the office of the county recorder a notice of payment, claiming a lien on the property for the amount of the payment.

116155. All sums so paid by the county or city are a lien on the property on which the work was done, and may be recovered in an action against the property.

116160. The action to foreclose the lien shall be brought within 90 days after the payment, and shall be prosecuted by the district or city attorney in the name of the county, or city, as the case may be, and for its benefit.

116165. When the property is sold, enough of the proceeds shall be paid into the treasury of the county or city to satisfy the lien and the costs, and the surplus, if any, shall be paid to the owner of the property, if known, and if not known shall be paid into the court for the use of the owner when ascertained.

116170. If it appears from the complaint in the action that the property on which the lien is to be foreclosed is likely to be removed from the jurisdiction of the court, the court may appoint a receiver to take possession of the property and hold it while the action is pending or until the defendant executes and files a bond, conditioned for the payment of any judgment that may be recovered against the defendant in the action and of all costs.

Article 4. Mosquito and Gnat Control

116175. The department shall make studies and demonstrations as may be necessary to determine the areas of the state that have a high proportion of mosquito-borne diseases, including malaria and encephalitis.

116180. (a) The department may enter into a cooperative agreement with any local district or other public agency engaged in the work of controlling mosquitoes, gnats, flies, other insects, rodents, or other vectors and pests of public health importance, in areas and under terms, conditions, and specifications as the director may prescribe.

(b) The agreement may provide for financial assistance on behalf of the state and for the doing of all or any portion of the necessary work by either of the contracting parties, except that in no event shall the department agree that the state’s contribution shall exceed 50 percent of the total cost of any acceptable plan.

(c) The agreement may provide for contributions by the local district or other public agency to the Mosquitoborne Disease Surveillance Account.

Article 5. Mosquito Control and Imported Tires

116185. The Legislature finds and declares that used tires imported into this country have contained mosquitos that are carriers of disease that is harmful to humans.

The Legislature further finds and declares that, in order to attempt to ensure that these mosquitos are not brought into this state, it is necessary to require that used tires not be imported into this state unless they have been certified as being free of mosquitos.

116190. (a) No used tires that have been imported into the United States shall be imported into this state, for purposes of sale, resale or disposal, unless they are inspected and certified as free from mosquitos in any stage of development by the department or its designee. Nothing in this section is intended to require inspection of each tire entering the state. The inspection shall be conducted using standard sampling procedures.

(b) Notwithstanding subdivision (a), if a shipment of tires imported into the United States has been inspected in a state other than California and certified as free from mosquitos in any state of development by persons meeting the federal certified pesticide applicator qualifications contained in 7 U.S.C. Section 136b, then the department shall review the certification to determine whether or not it is adequate. For the purposes of this subdivision, ''adequate'' means that the department shall confirm that the certification was performed by persons meeting the qualifications referred to in this subdivision and that the certification applies to the shipment of tires imported into this state.

If the certification is determined by the department to be adequate, the department shall make a written finding to that effect, and the inspection referred to in subdivision (a) shall not be required. The department may charge and collect a reasonable fee, not to exceed fifty dollars ($50) per shipment, to cover its costs incurred pursuant to this subdivision.

If the certification is determined by the department to be inadequate, the inspection referred to in subdivision (a) shall be required.

116195. The department shall administer this article. In carrying out this duty, the department may delegate its authority to other departments of the state or to local governmental agencies, or cooperate with other agencies in the enforcement of this article.

Notwithstanding Section 116180, the department may enter into a contract for services with local agencies, in order to implement this article.

116200. The department shall charge and collect a fee for each certificate issued by the department or its designee, which shall be in an amount reasonably necessary to produce sufficient revenue to effectively implement this article. The initial fee established by the

department shall not be greater than thirty cents ($0.30) per tire or casing imported.

A nonreturnable interim fee of thirty cents ($0.30) per tire or casing imported, and for which a certificate is issued by the department or its designee, is hereby established and shall remain in effect until the department adopts the necessary regulations pursuant to this article.

116205. The department shall collect and account for all money received pursuant to this article and shall deposit it in the Mosquitoborne Disease Surveillance Account provided for in Section 25852 of the Government Code.

116210. Fees collected pursuant to this article shall be subject to the annual fee increase provisions of Section 100425.

116215. Notwithstanding Section 25852 of the Government Code, fees deposited in the Mosquitoborne Disease Surveillance Account pursuant to this article shall be available for expenditure upon appropriation by the Legislature, to implement this article.

116220. It shall be a misdemeanor to violate this article.

116225. This article, with the exception of Section 116185, shall be inoperative upon a finding by the director that the federal government has established and is implementing a program that is at least as effective in ensuring that used tires imported into this state are free of mosquitos, as are the importation requirements established by this article.

CHAPTER 3. ENFORCEMENT AND PENALTIES

116250. A violation of Article 3 (commencing with Section 116125) of Chapter 2 is a misdemeanor.

PART 12. DRINKING WATER

CHAPTER 1. DEFINITIONS (Reserved)

CHAPTER 2. POWERS AND DUTIES (Reserved)

CHAPTER 3. ENFORCEMENT AND PENALTIES (Reserved)

CHAPTER 4. CALIFORNIA SAFE DRINKING WATER ACT

Article 1. Pure and Safe Drinking Water

116275. As used in this chapter:

(a) ‘‘Contaminant’’ means any physical, chemical, biological, or radiological substance or matter in water.

(b) ‘‘Department’’ means the State Department of Health Services.

(c) ‘‘Drinking water standards’’ means:

(1) Primary drinking water standards that specify maximum levels of contaminants that, in the judgment of the department, may have an adverse effect on the health of persons.

(2) Secondary drinking water standards that specify maximum contaminant levels that, in the judgment of the department, are necessary to protect the public welfare. Secondary drinking water standards may apply to any contaminant in drinking water that may adversely affect the odor or appearance of the water and may cause a substantial number of persons served by the public water system to discontinue its use, or that may otherwise adversely affect the public welfare. Regulations establishing secondary drinking water standards may vary according to geographic and other circumstances and may apply to any contaminant in drinking water that adversely affects the taste, odor, or appearance of the water when the standards are necessary to assure a supply of pure, wholesome, and potable water.

(3) The monitoring and reporting requirements as specified in regulations adopted by the department that pertain to maximum contaminant levels.

(d) ‘‘Maximum contaminant level’’ means the maximum permissible level of a contaminant in water.

(e) ‘‘Person’’ means an individual, corporation, company, association, partnership, limited liability company, municipality, public utility, or other public body or institution.

(f) ‘‘Public water system’’ means a system for the provision of piped water to the public for human consumption that has 15 or more service connections or regularly serves an average of at least 25 individuals daily at least 60 days out of the year. A public water system includes the following:

(1) Any collection, treatment, storage, and distribution facilities under control of the operator of the system which are used primarily in connection with the system.

(2) Any collection or pretreatment storage facilities not under the control of the operator that are used primarily in connection with the system.

(3) Any person who treats water on behalf of one or more public water systems for the purpose of rendering it safe for human consumption.

(g) ‘‘Community water system’’ means a public water system that serves at least 15 service connections used by yearlong residents or regularly serves at least 25 yearlong residents.

(h) ‘‘Noncommunity water system’’ means a public water system that meets one of the following criteria:

(1) Serves at least 25 nonresident individuals daily at least 60 days of the year, but not more than 24 yearlong residents.

(2) Serves 15 or more service connections and any number of nonresident individuals at least 60 days of the year, but no yearlong residents.

(i) ''Local health officer'' means a local health officer appointed pursuant to Section 101000 or a local comprehensive health agency designated by the board of supervisors pursuant to Section 101275 to carry out the drinking water program.

(j) ''Significant rise in the bacterial count of water'' means a rise in the bacterial count of water that the department determines, by regulation, represents an immediate danger to the health of water users.

(k) ''State small water system'' means a system for the provision of piped water to the public for human consumption that serves at least five, but not more than 14, service connections and does not regularly serve more than an average of 25 individuals daily for more than 60 days out of the year.

(*l*) ''User'' means any person using water for domestic purposes. User does not include any person processing, selling, or serving water or operating a public water system.

(m) ''Waterworks standards'' means regulations adopted by the department that take cognizance of the latest available ''Standards of Minimum Requirements for Safe Practice in the Production and Delivery of Water for Domestic Use'' adopted by the California section of the American Water Works Association.

(n) ''Local primacy agency'' means any local health officer that has applied for and received primacy delegation from the department pursuant to Section 116330.

(o) ''Service connection'' means the point of connection between the customer's piping or ditch, and the public water system's meter, service pipe, or ditch.

116280. This chapter does not apply to a public water system that meets all of the following conditions:

(a) Consists only of distribution and storage facilities and does not have any collection and treatment facilities.

(b) Obtains all of its water from, but is not owned or operated by, a public water system to which this chapter applies.

(c) Does not sell water to any person or user, except for the sale of water to users pursuant to Section 2705.5 of the Public Utilities Code through a submetered service system if the water supply is obtained from a public water system to which this chapter applies.

By enacting this subdivision, it is not the intent of the Legislature to change existing law as to responsibility or liability for distribution systems beyond the mastermeter.

116285. This chapter shall not apply to an irrigation canal system if the owner or operator of the system certifies to the department, and notifies each user, in writing, that the water is untreated and is

being furnished or supplied solely for agricultural purposes to either of the following:

(a) A user where the user receives the water, by pipe or otherwise, directly from the irrigation canal system.

(b) A person who owns or operates an integrated pipe system where the person receives the water, by pipe or otherwise, directly from the irrigation canal system.

''Irrigation canal system,'' as used in this section, means a system of water conveyance facilities, including pipes, tunnels, canals, conduits, pumping plants and related facilities operated to furnish or supply water for agricultural purposes where a substantial portion of the facilities is open to the atmosphere.

116290. In areas where the water service rendered by a person is primarily agricultural, and domestic service is only incidental thereto, this chapter shall not apply except in specific areas in which the department has found its application to be necessary for the protection of the public health and has given written notice thereof to the person furnishing or supplying water in the area.

The department may prescribe reasonable and feasible action to be taken by those persons or the users to insure that their domestic water will not be injurious to health.

116300. The Legislature finds and declares all of the following:

(a) Every citizen of California has the right to pure and safe drinking water.

(b) Feasible and affordable technologies are available and shall be used to remove toxic contaminants from public water supplies.

(c) According to the State Department of Health Services, over 95 percent of all large public water systems in California are in compliance with health-based action levels established by the state department for various contaminants.

(d) It is the policy of the state to reduce to the lowest level feasible all concentrations of toxic chemicals that when present in drinking water may cause cancer, birth defects, and other chronic diseases.

(e) This chapter is intended to ensure that the water delivered by public water systems of this state shall at all times be pure, wholesome, and potable. The provisions of this chapter provide the means to accomplish this objective.

(f) It is the intent of the Legislature to improve laws governing drinking water quality to improve upon the minimum requirements of the federal Safe Drinking Water Act Amendments of 1986, to establish primary drinking water standards that are at least as stringent as those established under the federal Safe Drinking Water Act, and to establish a program under this chapter that is more protective of public health than the minimum federal requirements.

(g) It is the further intent of the Legislature to establish a drinking water regulatory program within the State Department of Health Services in order to provide for the orderly and efficient delivery of

safe drinking water within the state and to give the establishment of drinking water standards and recommended public health goals greater emphasis and visibility within the state department.

Article 2. Department and Local Responsibilities

116325. The department shall be responsible for assuring that all public water systems are operated in compliance with this chapter and any regulations adopted hereunder. The department shall directly enforce this chapter for all public water systems with 200 or more service connections. Effective July 1, 1993, the department shall directly enforce this chapter for all public water systems except as set forth in Section 116500.

116330. (a) The department may delegate primary responsibility for the administration and enforcement of this chapter within a county to a local health officer authorized by the board of supervisors to assume these duties, by means of a local primacy delegation agreement if the local health officer demonstrates that it has the capability to meet the local primacy program requirements established by the department pursuant to subdivision (h) of Section 116375. This delegation shall not include the regulation of community water systems serving 200 or more service connections. The local primacy agreement may contain terms and conditions that the department deems necessary to carry out this chapter. The local primacy agreement shall provide that, although the local primacy agency shall be primarily responsible for administration and enforcement of this chapter for the designated water systems, the department does not thereby relinquish its authority, but rather shall retain jurisdiction to administer and enforce this chapter for the designated water systems to the extent determined necessary by the department.

(b) Any local health officer seeking a local primacy delegation shall submit an application to the department. The application shall be submitted by March 1, 1993, for local health officers seeking local primacy agreements for the 1993–94 fiscal year. Thereafter, the application shall be submitted by January 1, of the fiscal year immediately preceding the commencement of the fiscal year for which the local primacy delegation is sought. The application shall be in the format, and shall contain information, required by the department. The department shall approve the application for primacy if the department determines that the local health officer is capable of meeting the primacy program requirements established by the department.

(c) A local primacy delegation approved by the department shall remain in effect until any of the following conditions occur:

(1) The delegation is withdrawn by mutual agreement.

(2) The local primacy agency provides 120-day advance written notice to the department that it no longer wishes to retain local primacy.

(3) The department determines that the local primacy agency no longer complies with the department's local primacy program requirements. The department shall provide written notice to the local primacy agency and the board of supervisors and shall provide an opportunity for a public hearing prior to initiation of any local primacy revocation action by the department.

(d) The department shall evaluate the drinking water program of each local primacy agency at least annually. The department shall prepare a report of the evaluation and list any program improvements needed to conform to the department's local primacy program requirements. A copy of the evaluation report shall be provided to the local primacy agency and the board of supervisors. The local primacy agency shall be granted a reasonable amount of time to make any needed program improvements prior to the initiation of any local primacy revocation actions.

(e) To the extent funds are available in the Safe Drinking Water Account, the department shall provide the local primacy agency with an annual drinking water surveillance program grant to cover the cost of conducting the inspection, monitoring, surveillance, and water quality evaluation activities specified in the local primacy agreement. The annual program grant pursuant to this subdivision shall not exceed the amount that the department determines would be necessary for the department to conduct inspection, monitoring, surveillance, and water quality evaluation activities in the absence of a local primacy agreement for those systems in that county.

(f) The local primacy agency shall act for the department as the primary agency responsible for the administration and enforcement of this chapter for the specified public water systems and shall be empowered with all of the authority granted to the department by this chapter over those water systems.

116335. For public water systems with less than 200 service connections, except as provided in Section 116500, the local health officer shall be responsible for the enforcement of this chapter. For the purposes of this chapter, unless the context otherwise requires, and whenever enforcement activities involve public water systems with fewer than 200 service connections, the local health officer shall act for the department, except that variances and exemptions may only be granted or revoked by the local health officer following the procedures as provided in Section 116625 subject to the approval of the department.

Annual permit fees may be prescribed by the local governing body in accord with Section 101325 to pay the reasonable expenses of the local health officer in carrying out this chapter and regulations adopted thereunder.

This section does not apply to state small water systems regulated by Section 116340.

This section shall become inoperative on July 1, 1993, and, as of January 1, 1994, is repealed, unless a later enacted statute, which becomes effective on or before January 1, 1994, deletes or extends the dates on which it becomes inoperative and is repealed.

116340. This chapter shall not apply to state small water systems except as provided under this section:

(a) The department shall adopt regulations specifying minimum requirements for operation of a state small water system. The requirements may be less stringent than the requirements for public water systems as set forth in this chapter.

(b) The minimum requirements for state small water systems adopted by the department pursuant to subdivision (a) shall be enforced by the local health officer or a local health agency designated by the local health officer. In counties that do not have a local health officer, the requirements shall be enforced by the department. Local health agencies may adopt more stringent requirements for state small water systems than those specified in the state regulations.

(c) The reasonable costs of the local health officer in carrying out the requirements of this section may be recovered through the imposition of fees on state small water systems by the local governing body in accordance with Section 101325.

116345. (a) The local health officer shall submit a report monthly to the department regarding the status of compliance with this chapter by the public water systems under the jurisdiction of the local health officer. The report shall be in a form and manner prescribed by the department.

(b) The department shall review the public water system program of the local health officer at least every three years to assure compliance with this chapter. A report of the findings of the review along with any recommendations of the department shall be provided to the local health officer and the board of supervisors.

Article 3. Operations

116350. (a) The department shall administer the provisions of this chapter and all other provisions relating to the regulation of drinking water to protect public health.

(b) The department shall also have the following responsibilities:

(1) Conduct research, studies, and demonstration projects relating to the provision of a dependable, safe supply of drinking water, including, but not limited to, all of the following:

(A) Improved methods to identify and measure the existence of contaminants in drinking water and to identify the source of the contaminants.

(B) Improved methods to identify, measure, and assess the potential adverse health effects of contaminants in drinking water.

(C) New methods of treating raw water to prepare it for drinking, so as to improve the efficiency of water treatment and to remove or reduce contaminants.

(D) Improved methods for providing a dependable, safe supply of drinking water, including improvements in water purification and distribution, and methods of assessing health-related hazards.

(E) Improved methods of protecting the water sources of public water systems from contamination.

(F) Alternative disinfection technologies that minimize, reduce, or eliminate hazardous disinfection byproducts.

(2) Enforce provisions of the federal Safe Drinking Water Act and regulations adopted pursuant thereto.

(3) Adopt regulations to implement this chapter.

(c) The department may conduct studies and investigations as it deems necessary to assess the quality of private domestic water wells.

116355. (a) On or before July 1, 1991, the department shall submit to the Legislature a comprehensive Safe Drinking Water Plan for California.

(b) The Safe Drinking Water Plan shall include, but not be limited to, the following information:

(1) An analysis of the overall quality of California's drinking water and the identification of specific water quality problems.

(2) Types and levels of contaminants found in public drinking water systems that have less than 10,000 service connections. The discussion of these water systems shall include the following:

(A) Estimated costs of requiring these systems to meet primary drinking water standards and recommended public health goals.

(B) Recommendations for actions that could be taken by the Legislature, the department, and these systems to improve water quality.

(3) A discussion and analysis of the known and potential health risks that may be associated with drinking water contamination in California.

(4) An evaluation of how existing water quality information systems currently maintained by local or state agencies can be more effectively used to protect drinking water.

(5) An evaluation of the research needed to develop inexpensive methods and instruments to ensure better screening and detection of water borne chemicals, and inexpensive detection methods that could be used by small utilities and consumers to detect harmful microbial agents in drinking water.

(6) An analysis of the technical and economic viability and the health benefits of various treatment techniques that can be used to reduce levels of trihalomethanes, lead, nitrates, synthetic organic

chemicals, micro-organisms, and other contaminants in drinking water.

(7) A discussion of alternative methods of financing the construction, installation, and operation of new treatment technologies, including, but not limited to user charges, state or local taxes, state planning and construction grants, loans, and loan guarantees.

(8) A discussion of sources of revenue presently available, and projected to be available, to public water systems to meet current and future expenses.

(9) An analysis of the current cost of drinking water paid by residential, business, and industrial consumers based on a statewide survey of large, medium, and small public water systems.

(10) Specific recommendations, including recommendations developed pursuant to paragraph (6), to improve the quality of drinking water in California and a detailed five-year implementation program.

116360. The Office of Environmental Health Hazard Assessment shall establish recommended public health goals for contaminants in drinking water in accordance with all of the following criteria:

(a) Recommended public health goals, including those implementing the criteria set forth in subdivisions (b) to (h), inclusive, shall be set at a level that does not exceed the national primary drinking water standard adopted by the United States Environmental Protection Agency.

(b) Any recommended public health goals for an acutely toxic substance shall be set at a level at which scientific evidence indicates that no known or anticipated adverse effects on health will occur, plus an adequate margin of safety.

(c) Any recommended public health goal established for a carcinogen or other substance which may cause chronic disease shall be based solely on health effects without regard to cost impacts or other factors, and shall be set at a level which the office has determined, based upon currently available data, does not pose any significant risk to health.

(d) To the extent the information is available, the office shall consider possible synergistic effects resulting from exposure to, or interaction by, two or more contaminants.

(e) The office shall consider the existence of groups or individuals in the population that are more susceptible to adverse effects of contaminants than a normal healthy adult.

(f) The office shall consider the contaminant exposure and body burden levels that alter physiological function or structure in a manner that may significantly increase the risk of illness.

(g) In cases of scientific ambiguity, the office shall use criteria most protective of public health and shall incorporate safety factors

of noncarcinogenic substances for which generally accepted scientific research indicates there is a safe dose-response threshold.

(h) The office shall consider exposure to contaminants in media other than drinking water, including, but not limited to, exposures in food, in the ambient and indoor air, and the resulting body burden.

(i) Recommended public health goals established by the office shall be reviewed periodically and revised as necessary based upon the availability of new scientific data.

116365. (a) In addition to, and concurrent with, adoption of recommended public health goals established by the office pursuant to Section 116360, the department shall adopt primary drinking water standards for contaminants found in drinking water in accordance with the following criteria:

(1) Primary drinking water standards shall be set at a level that is as close as practical to recommended public health goals placing primary emphasis on protection of public health.

(2) Primary drinking water standards shall be set using considerations of technical feasibility and economic costs of compliance to water purveyors and consumers.

(3) In no event shall primary drinking water standards be set at levels less stringent than primary drinking water standards set by the United States Environmental Protection Agency.

(b) At least once every five years after adoption, the department shall review primary drinking water standards, and, using the criteria set forth in subdivision (a), shall amend any standard if any of the following occur:

(1) Changes in technology or treatment techniques permit greater protection of public health or attainment of the recommended public health goal.

(2) New scientific evidence indicates that a substance may present a substantially different risk to public health than was previously determined.

(3) The department determines that a primary standard no longer meets the requirements of this chapter.

(c) The department may, by regulation, require the use of a specified treatment technique in lieu of establishing a maximum contaminant level for a contaminant if the department determines that it is not economically or technologically feasible to ascertain the level of the contaminant.

116370. On or before January 1, 1992, the department shall propose, hold a public hearing, and promulgate a finding of the best available technology for each contaminant for which a recommended public health goal and a primary drinking water standard have been adopted. Thereafter, the department shall promulgate a finding of best available technology for each contaminant for which a recommended public health goal and a primary drinking water standard have been adopted at the time the

levels and standards are adopted. The finding of the department shall take into consideration the costs and benefits of best available treatment technology that have been proven effective under full-scale field applications.

116375. The department shall adopt regulations it deems necessary to carry out the purposes of this chapter. The regulations shall include, but not be limited to, the following:

(a) The monitoring of contaminants including the type of contaminant, frequency and method of sampling and testing and the reporting of results.

(b) The monitoring of unregulated contaminants for which drinking water standards have not been established by the department. The requirements shall be no less stringent than those promulgated pursuant to paragraph (2) of subsection (a) of Section 1445 of the federal Safe Drinking Water Act, as amended (42 U.S.C. Sec. 300j-4 (a)(2)). Until the time that the department adopts regulations regarding the monitoring of unregulated contaminants, the department may, by order, require any public water system that has been shown to contain detectable levels of any unregulated contaminants to conduct periodic water analyses in accordance with conditions specified by the department. The water analyses shall be reported on a quarterly basis unless the department finds that more or less frequent analysis is necessary.

(c) Requirements for the design, operation, and maintenance of public water systems, including, but not limited to, waterworks standards and the control of cross-connections, that the department determines are necessary to obtain, treat, and distribute a reliable and adequate supply of pure, wholesome, potable, and healthy water.

(d) Requirements for treatment, including disinfection of water supplies.

(e) Requirements for the filtration of surface water supplies at least as stringent as regulations promulgated pursuant to subparagraph (C) of paragraph (7) of subsection (b) of Section 1412 of the federal Safe Drinking Water Act, as amended (42 U.S.C. Sec. 300g-1 (b)(7)(C)).

(f) Requirements for notifying the public of the quality of the water delivered to consumers.

(g) Minimum acceptable financial assurances that a public water system shall be required to submit as a demonstration of its capability to provide for the ongoing operation, maintenance, and upgrading of the system, including compliance with monitoring and treatment requirements and contingencies. For privately owned systems not regulated by the California Public Utilities Commission, the financial assurance may be in the form of a trust fund, surety bond, letter of credit, insurance, or other equivalent financial arrangement acceptable to the department.

(h) Program requirements for the conduct of the public water system program by a local health officer under a primacy delegation from the department as set forth in this chapter. The requirements shall include, but not be limited to, the issuance of permits, surveillance and inspections, reporting of monitoring and compliance data, and the taking of enforcement actions.

(i) Methods for determination of the number of persons served by a public water system for drinking water regulatory purposes.

116380. In addition to the requirements set forth in Section 116375, the regulations adopted by the department pursuant to Section 116375 shall include requirements governing the use of point-of-entry treatment by public water systems in lieu of centralized treatment where it can be demonstrated that centralized treatment is not economically feasible.

116385. Any person operating a public water system shall obtain and provide at that person's expense an analysis of the water to the department, in the form, covering those matters, and at intervals as the department by regulation may prescribe. The analysis shall be performed by a laboratory duly certified by the department.

116390. (a) No laboratory, other than a laboratory operated by the department, shall perform tests required pursuant to this chapter for any public water system without first obtaining a certificate issued by the department pursuant to Article 3 (commencing with Section 100825) of Chapter 4 of Part 1 of Division 101, except that laboratories previously issued a certificate under this section shall be deemed certified until certification under Article 3 (commencing with Section 100825) of Chapter 4 of Part 1 of Division 101 has been either granted or denied, but not beyond the expiration date shown on the certificate previously issued under this section.

(b) No person or public entity of the state shall contract with a laboratory for environmental analyses for which the state department requires certification pursuant to this section, unless the laboratory holds a valid certificate.

116395. (a) The Legislature finds and declares all of the following:

(1) The large water system testing program has discovered chemical contamination of the state's drinking water with increasing frequency.

(2) A significant number of California residents rely on the state's small water systems to provide their water.

(3) The small systems, because they tend to be located in outlying rural areas where pesticide use is prevalent, and because they draw their water from shallow aquifers, face a serious threat of contamination.

(4) Unchecked water sources that may be contaminated pose a potentially serious threat to the health of the citizens of California, particularly those living in outlying rural areas.

(5) It is in the interest of all Californians that a testing program for small public water systems be implemented and carried out as expeditiously as possible.

(b) For purposes of this section, ‘‘small public water system’’ means a system with 200 connections or less, and is one of the following:

(1) A community water system that serves at least 15 service connections used by yearlong residents or regularly serves at least 25 yearlong residents.

(2) A state small water system.

(3) A noncommunity water system such as a school, labor camp, institution, or place of employment, as designated by the department.

(c) The department shall conduct training workshops to assist health officers in evaluation of small public water systems for organic chemical contamination, and in sampling and testing procedures. The department shall, at a minimum, provide health officers with guidelines for evaluating systems and instructions for sampling.

(d) The department shall develop a schedule for conduct of the programs by the local health officers. The schedule shall establish a program to address first those systems with the most serious potential for contamination. The department shall enter into agreements with the local health agencies to conduct the necessary work to be performed pursuant to the schedule. The department shall begin the program no later than three months after September 19, 1985. All local health officers shall complete the evaluation, sampling, testing, review of sampling results, and notification to the public water systems within their jurisdiction in accordance with the agreements entered into with the department and within the schedule established by the department. All work required by this section shall be completed within three years after September 19, 1985.

(e) In consultation with the department, the local health officer shall conduct an evaluation of all small public water systems under their jurisdictions to determine the potential for contamination of groundwater sources by organic chemicals. The evaluation shall include, but not be limited to:

(1) A review of the historical water quality data of each system to determine possible evidence of degradation.

(2) A review, to be coordinated with the State Water Resources Control Board, and the California regional water quality control boards, of past and present waste disposal practices that may potentially affect the respective well water supply.

(3) A review of other organic chemicals used in the water supply area that have potential health risks and that may have the potential for contaminating drinking water supplies because of environmental persistence or resistance to natural degradation under conditions existing in California.

(f) Based upon the evaluation of each system, the local health officers shall develop a sampling plan for each system within their jurisdiction. The health officer shall collect samples in accordance with the plan and shall submit the samples for analysis to a certified laboratory designated by the department. When applicable, the laboratory shall test water samples using the Environmental Protection Agency's 13 approved analytical techniques established under subdivision (h) of Section 304 of the Clean Water Act to qualitatively identify the complete range of contaminants in the same class as the specific contaminant or class of contaminants being analyzed.

(g) Within 10 days of the receipt from the laboratory of the testing results, the local health officer shall notify the small public water system, the department and the California regional water quality control board for that region of the results.

(h) Following a review of the testing results, the local health officer may order the public water system to conduct a periodic water sampling and analysis program in accordance with conditions specified by the local health officer. The department shall provide ongoing advice and assistance to local health officers in interpreting test results and determining appropriate notification and followup activities in those instances where contaminants are found.

(i) This section shall be operative during any fiscal year only if the Legislature appropriates sufficient funds to pay for all state-mandated costs to be incurred by local agencies pursuant to this section during that year.

116400. If the department determines that a public water system is subject to potential contamination, the department may, by order, require the public water system to conduct a periodic water analysis in accordance with conditions specified by the department. The water analysis shall be reported on a quarterly basis, unless the department finds that reasonable action requires either more or less frequent analysis.

116405. (a) In counties with a population not exceeding 500,000 persons as shown by the 1970 federal decennial census, any public water system supplying both domestic and untreated irrigation water in separate pressurized systems that were in existence prior to January 1, 1990, and that is operated by an incorporated or unincorporated association of users, shall not require protection against backflow into the domestic water system from premises receiving both the water services and having available no other source of water, except where interconnection between the systems has taken place. It shall be a misdemeanor for any person to knowingly interconnect the water services on a user's premises without installing a backflow protection device approved by the state department.

(b) Regulations of the state department requiring the installation of backflow protection shall not be continued to require the installation of the protection in any public water system described in subdivision (a), except as provided in that subdivision.

Article 4. Exemptions and Variances

116425. (a) The department may exempt any public water system from any maximum contaminant level or treatment technique requirement if it finds all the following:

(1) The public water system was in operation, or had applied for a permit to operate, on the effective date of the maximum contaminant level or treatment technique requirement.

(2) Due to compelling factors, which may include economic factors, the public water system is unable to comply with the maximum contaminant level or treatment technique requirement.

(3) The granting of the exemption will not result in an unreasonable risk to health.

(b) If the department grants a public water system an exemption for a primary drinking water standard under subdivision (a), the department shall prescribe, at the time an exemption is granted, a schedule for both of the following:

(1) Compliance by the public water system with each contaminant level or treatment technique requirement for which the exemption was granted.

(2) Implementation by the public water system of interim control measures the department may require for each contaminant or treatment technique requirement for which the exemption was granted.

(c) Any schedule prescribed by the department pursuant to this section shall require compliance by the public water system with each contaminant level or treatment technique requirement for which the exemption was granted within 12 months from the granting of the exemption.

(d) The final date for compliance with any schedule issued pursuant to this section may be extended by the department for a period not to exceed three years from the date of the granting of the exemption if the department finds all of the following:

(1) The system cannot meet the standard without capital improvements that cannot be completed within the period of the exemption.

(2) In the case of a system that needs financial assistance for the necessary improvements, the system has entered into an agreement to obtain the financial assistance or the system has entered into an enforceable agreement to become part of a regional public water system.

(3) The system is taking all practicable steps to meet the standard.

(e) In the case of a system that does not serve more than 500 service connections and that needs financial assistance for the necessary improvements, an exemption granted pursuant to paragraph (2) of subdivision (d) may be renewed for one or more additional two-year periods if the system establishes that it is taking all practicable steps to meet the requirements of subdivision (d).

(f) Prior to the granting of an exemption pursuant to this section, the department shall provide notice and an opportunity for a public hearing. Notice of any public hearing held pursuant to this section shall be given by the department in writing to the public water system seeking the exemption and to the public as provided in Section 6061 of the Government Code.

116430. (a) The department may grant a variance or variances from primary drinking water standards to a public water system. Any variance granted pursuant to this subdivision shall conform to the requirements established under the federal Safe Drinking Water Act, as amended (42 U.S.C. Sec. 300g-4).

(b) (1) In addition to the authority provided in subdivision (a), at the request of any public water system, the department shall grant a variance from the primary drinking water standard adopted by the department for fluoride. A variance granted by the department pursuant to this subdivision shall prohibit fluoride levels in excess of 75 percent of the maximum contaminant level established in the national primary drinking water regulation adopted by the United States Environmental Protection Agency for fluoride, or three milligrams per liter, whichever is higher, and shall be valid for a period of up to 30 years. The department shall review each variance granted pursuant to this section at least every five years. The variance may be withdrawn upon reasonable notice by the department if the department determines that the community served by the public water system no longer accepts the fluoride level authorized in the variance or the level of fluoride authorized by the variance poses an unreasonable risk to health. In no case may a variance be granted in excess of the United States Environmental Protection Agency maximum contaminant level.

(2) The department shall grant a variance pursuant to paragraph (1) only if it determines, after conducting a public hearing in the community served by the public water system, that there is no substantial community opposition to the variance and the variance does not pose an unreasonable risk to health. The public water system shall provide written notification, approved by the department, to all customers which shall contain at least the following information:

(A) The fact that a variance has been requested.

(B) The date, time and location of the public hearing that will be conducted by the department.

(C) The level of fluoride that will be allowed by the requested variance and how this level compares to the maximum contaminant

levels prescribed by the state primary drinking water standard, the federal national primary drinking water regulation, and the federal national secondary drinking water regulation.

(D) A discussion of the types of health and dental problems that may occur when the fluoride concentration exceeds the maximum contaminant levels prescribed by the state standard and the federal regulations.

(3) If, at any time after a variance has been granted pursuant to paragraph (1), substantial community concerns arise concerning the level of fluoride present in the water supplied by the public water system, the public water system shall notify the department, conduct a public hearing on the concerns expressed by the community, determine the fluoride level that is acceptable to the community, and apply to the department for an amendment to the variance which reflects that determination.

Article 5. Public Notification

116450. (a) When any primary drinking water standard specified in the department's regulations is not complied with, when a monitoring requirement specified in the department's regulations is not performed, or when a water purveyor fails to comply with the conditions of any variance or exemption, the person operating the public water system shall notify the department and shall give notice to the users of that fact in the manner prescribed by the department. When a variance or an exemption is granted, the person operating the public water system shall give notice to the users of that fact.

(b) When a person operating a public water system determines that a significant rise in the bacterial count of water has occurred in water he or she supplies, the person shall provide, at his or her expense, a report on the rise in bacterial count of the water, together with the results of an analysis of the water, within 24 hours to the department and, where appropriate, to the local health officer.

(c) When the department receives the information described in subdivision (b) and determines that it constitutes an immediate danger to health, the department shall immediately notify the person operating the public water system to implement the emergency notification plan required by this chapter.

(d) In the case of a failure to comply with any primary drinking water standard that represents an imminent danger to the health of water users, the operator shall notify each of his or her customers as provided in the approved emergency notification plan.

(e) In addition, the same notification requirement shall be required in any instance in which the department or the local health department recommends to the operator that it notify its customers to avoid internal consumption of the water supply and to use bottled

water due to a chemical contamination problem that may pose a health risk.

(f) The content of the notices required by this section shall be approved by the department. Notice shall be repeated at intervals, as required by the department, until the department concludes that there is compliance with its standards or requirements. Notices may be given by the department.

In any case where public notification is required by this section because a contaminant is present in drinking water at a level in excess of a primary drinking water standard, the notification shall include identification of the contaminant, information on possible effects of the contaminant on human health, and information on specific measures that should be taken by persons or populations who might be more acutely affected than the general population.

(g) Whenever a school or school system, the owner or operator of residential rental property, or the owner or operator of a business property receives a notification from a person operating a public water system under any provision of this section, the school or school system shall notify school employees, students and parents if the students are minors, the owner or operator of a residential rental property shall notify tenants, and the owner or operator of business property shall notify employees of businesses located on the property.

(1) The operator shall provide the customer with a sample notification form that may be used by the customer in complying with this subdivision and that shall indicate the nature of the problem with the water supply and the most appropriate methods for notification that may include, but is not limited to, the sending of a letter to each water user and the posting of a notice at each site where drinking water is dispensed.

(2) The notice required by this subdivision shall be given within 10 days of receipt of notification from the person operating the public water system.

(3) Any person failing to give notice as required by this subdivision shall be civilly liable in an amount not to exceed one thousand dollars ($1,000) for each day of failure to give notice.

(4) If the operator has evidence of noncompliance with this subdivision the operator shall report this information to the local health department and the department.

116455. (a) When a well, that is used as a source of drinking water for a public water system, is discovered to include, or is closed due to the presence of, a contaminant in excess of a maximum contaminant level or an action level established by the department, the person operating the public water system shall notify the governing body of the local agency in which users of the drinking water reside within 30 days of the discovery or closure.

(b) The notification required by subdivision (a) shall include the location of any affected well, its name, its type, the origin, if known, of the contaminant, the maximum contaminant level or action level for the contaminant detected and the operational status of the well immediately prior to its closure.

(c) For purposes of this section, the following terms have the following meanings:

(1) ''Action level'' means the concentration level of a contaminant in potable water that the department has determined, based on available scientific information, provides an adequate margin of safety to prevent potential risks to human health.

(2) ''Local agency'' means a city or county, or a city and county.

116460. No person shall operate a public water system without an emergency notification plan that has been submitted to and approved by the department. The emergency notification plan shall provide for immediate notice to the customers of the public water system of any significant rise in the bacterial count of water or other failure to comply with any primary drinking water standard that represents an imminent danger to the health of the water users.

No permit, variance, or exemption may be issued or amended under this chapter until an emergency notification plan has been approved by the department.

The department shall adopt regulations to implement the provisions of this section. The regulations may provide for the exclusion of public water systems from the requirements of this section when, in the judgment of the department, the exclusion will best serve the public interest.

116465. Upon formal complaint by the director alleging that additional facilities are necessary to provide the users of a public water system operated by a public utility under the jurisdiction of the Public Utilities Commission with a continuous and adequate supply of water or to bring the water system into conformity with secondary drinking water standards, the commission may, after hearing, direct the public utility to make the changes in its procedures or additions to its facilities as the commission shall determine are necessary to provide a continuous and adequate supply of water to the users thereof or to bring the system into conformity with secondary drinking water standards. Any proceeding of the commission pursuant to this article shall be conducted as provided in Chapter 9 (commencing with Section 1701) of Part 1 of Division 1 of the Public Utilities Code, and any order issued by the commission pursuant to this action shall be subject to judicial review as provided in Chapter 9.

116470. The department shall require every public water system, as a condition of operation, to report at least once annually to water consumers on the level of contaminants in drinking water which pose a potential risk to human health. The report shall include, but not be

limited to, information on source, content, and quality of water purveyed, a comparison between levels of contaminants and recommended public health goals; and information on compliance with primary drinking water standards.

116475. (a) The Emergency Clean Water Grant Fund is hereby established in the General Fund and, notwithstanding Section 13340 of the Government Code, is continuously appropriated to the department, without regard to fiscal years, to provide financial assistance to public water systems and to fund emergency actions by the department to ensure that safe drinking water supplies are available to all Californians who are served by public water systems.

(b) The department may expend funds in the Emergency Clean Water Grant Fund for the purposes specified in subdivision (a), including, but not limited to, payment for all of the following actions:

(1) The provision of alternative water supplies and bottled water.

(2) Improvements of the existing water supply system.

(3) Hookups with adjacent water systems.

(4) Design, purchase, installation, and operation and maintenance of water treatment technologies.

(c) The department shall develop and revise guidelines for the allocation and administration of moneys in the Emergency Clean Water Grant Fund. These guidelines shall include, but are not limited to, all of the following:

(1) A definition of what constitutes an emergency requiring an alternative or improved water supply.

(2) Priorities and procedures for allocating funds.

(3) Repayment provisions, as appropriate.

(4) Procedures for recovering funds from parties responsible for the contamination of public water supplies.

The guidelines are not subject to Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code.

116480. (a) The department shall expend moneys available in the Emergency Clean Water Grant Fund only for the purpose of taking corrective action necessary to remedy or prevent an emergency or imminent threat to public health due to the contamination or potential contamination of the public water supply.

(b) Notwithstanding any other provision of law, the department may enter into written contracts for remedial action taken or to be taken pursuant to subdivision (a), and may enter into oral contracts, not to exceed five thousand dollars ($5,000) in obligation, when, in the judgment of the department, immediate remedial action is necessary to remedy or prevent an emergency specified in subdivision (a). The contracts, written or oral, may include provisions for the rental or purchase of tools and equipment, either with or without operators, for the furnishing of labor and materials and for engineering consulting necessary to accomplish the work.

116485. Any remedial action taken or contracted for by the department pursuant to Section 116480 shall be exempt from the following provisions:

(a) State Contract Act provided for pursuant to Chapter 1 (commencing with Section 10100) of Part 2 of Division 2 of the Public Contract Code.

(b) Chapter 10 (commencing with Section 4525) of Division 5 of Title 1 of the Government Code.

(c) Section 14780 of the Government Code and Article 5 (commencing with Section 10355) of Chapter 2 of Part 2 of Division 2 of the Public Contract Code.

(d) Article 4 (commencing with Section 10335) of Chapter 2 of Part 2 of Division 2 of the Public Contract Code.

Article 6. Enforcement Responsibility

116500. This chapter shall be enforced directly by the department for all public water systems, including state small water systems, in any county that does not have a local health officer, or contracts with the department for environmental health services pursuant to Section 1157 and elects not to enforce this chapter.

Article 7. Requirements and Compliance

116525. (a) No person shall operate a public water system unless he or she first submits an application to the department and receives a permit as provided in this chapter. A change in ownership of a public water system shall require the submission of a new application.

(b) The department may require a new application whenever a change in regulatory jurisdiction has occurred.

(c) The department may renew, reissue, revise, or amend any domestic water supply permit whenever the department deems it to be necessary for the protection of public health whether or not an application has been filed.

116530. A public water system shall submit a technical report to the department as part of the permit application or when otherwise required by the department. This report may include, but not be limited to, detailed plans and specifications, water quality information, and physical descriptions of the existing or proposed system, and financial assurance information.

116535. Upon determination that an application submitted pursuant to this chapter is complete, the department shall make a thorough investigation of the proposed or existing plant, works, system, or water supply, and all other circumstances and conditions that it deems material, including any required financial assurance information.

116540. Following completion of the investigation and satisfaction of the requirements of subdivisions (a) and (b), the department shall issue or deny the permit. The department may impose permit conditions, requirements for system improvements, and time schedules as it deems necessary to assure a reliable and adequate supply of water at all times that is pure, wholesome, potable, and does not endanger the health of consumers.

(a) No public water system that was not in existence on January 1, 1991, shall be granted a permit unless the system demonstrates to the department that the water supplier possesses adequate financial capability to assure the delivery of pure, wholesome, and potable drinking water. This section shall also apply to any change of ownership of a public water system that occurs after January 1, 1991.

(b) No permit under this chapter shall be issued to an association organized under Title 3 (commencing with Section 20000) of Division 3 of the Corporations Code. This section shall not apply to unincorporated associations that as of December 31, 1990, are holders of a permit issued under this chapter.

116545. Prior to the issuance of any new, revised, renewed, or amended permit, or the denial of a permit, the department may conduct a public hearing to obtain additional public comment. Notice of the hearing shall be provided to the applicant and interested persons at least 30 days prior to the hearing. The department may require the applicant to distribute the notice of the hearing to affected consumers.

116550. (a) No person operating a public water system shall modify, add to or change his or her source of supply or method of treatment of, or change his or her distribution system as authorized by a valid existing permit issued to him or her by the department unless the person first submits an application to the department and receives an amended permit as provided in this chapter authorizing the modification, addition, or change in his or her source of supply or method of treatment.

(b) Unless otherwise directed by the department, changes in distribution systems may be made without the submission of a permit application if the changes comply in all particulars with the waterworks standards.

116555. Any person who operates a public water system shall do all of the following:

(a) Comply with primary and secondary drinking water standards.

(b) Ensure that the system will not be subject to backflow under normal operating conditions.

(c) Provide a reliable and adequate supply of pure, wholesome, healthful, and potable water.

116560. (a) The department shall develop and publish a list of all existing or proposed maximum contaminant levels that are set at a

level substantially less stringent, as determined by the department, than their corresponding recommended public health goals due to limitations of technology or excessive costs.

(b) Public water systems that serve more than 10,000 service connections and that exceed, for organic contaminants on a running quarterly average basis, or for inorganic contaminants on a basis established by the department, a recommended public health goal listed by the department pursuant to subdivision (a), shall do the following:

(1) The water system shall evaluate in writing all reasonable means of reducing the level of the contaminant to as close to the recommended public health goal as feasible, and submit the written evaluation to the department at least once annually.

(2) After the written evaluation has been submitted and upon being notified by the department of the need to do so, the water system shall submit a water quality improvement plan to the department, based upon the evaluation. The water quality improvement plan shall identify all reasonable measures available to the water system to reduce the level of the contaminant, the costs to consumers and the water system of implementing the measures, and a proposed schedule of actions to be undertaken by the water system to reduce the level of the contaminant. If the water system determines that it is unable to reduce the level of the contaminant due to technical or economic limitations, the basis for that determination shall be described in the plan.

(c) The department shall review the water quality improvement plan and may approve it as submitted or may require additional information from the water system. Upon approval of the plan, the department shall amend or revise the domestic water supply permit issued to the water system pursuant to this chapter to include a time schedule for implementation of those measures which are technically and economically feasible.

116565. (a) Commencing January 1, 1993, until June 30, 1993, each public water system serving 200 or more service connections and any public water system that treats water on behalf of one or more public water systems for the purpose of rendering it safe for human consumption, shall reimburse the department pursuant to this section for actual costs incurred by the department for conducting those activities mandated by this chapter relating to the issuance of domestic water supply permits, inspections, monitoring, surveillance, and water quality evaluation that relate to that specific public water system. The amount of reimbursement shall be sufficient to pay, but in no event shall exceed, the department’s actual cost in conducting these activities.

(b) Commencing July 1, 1993, each public water system serving 1,000 or more service connections and any public water system that treats water on behalf of one or more public water systems for the

purpose of rendering it safe for human consumption, shall reimburse the department for actual cost incurred by the department for conducting those activities mandated by this chapter relating to the issuance of domestic water supply permits, inspections, monitoring, surveillance, and water quality evaluation that relate to that specific public water system. The amount of reimbursement shall be sufficient to pay, but in no event shall exceed, the department's actual cost in conducting these activities.

(c) Commencing July 1, 1993, each public water system serving less than 1,000 service connections shall pay an annual drinking water operating fee to the department as set forth in this subdivision for costs incurred by the department for conducting those activities mandated by this chapter relating to inspections, monitoring, surveillance, and water quality evaluation relating to public water systems. The total amount of fees shall be sufficient to pay, but in no event shall exceed, the department's actual cost in conducting these activities. Notwithstanding adjustment of actual fees collected pursuant to Section 100425 as authorized pursuant to subdivision (d) of Section 116590, the maximum amount that shall be paid annually by a public water system pursuant to this section shall not exceed the following:

Type of public water system	Fee
15–24 service connections	$250
25–99 service connections	$400
100–499 service connections	$500
500–999 service connections	$700
Noncommunity water systems pursuant to paragraph (1) of subdivision (h) of Section 116275	$350

(d) For purposes of determining the fees provided for in subdivisions (a) and (b), the department shall maintain a record of its actual costs for pursuing the activities specified in subdivisions (a) and (b) relative to each system required to pay the fees. The fee charged each system shall reflect the department's actual cost, or in the case of a local primacy agency the local primacy agency's actual cost, of conducting the specified activities.

(e) The department shall submit an invoice for cost reimbursement for the activities specified in subdivisions (a) and (b) to the public water system prior to September 1 of the fiscal year following the fiscal year in which the costs were incurred. The invoice shall indicate the total hours expended, the reasons for the expenditure, and the hourly cost rate of the department. Payment of the invoice shall be made within 120 days of the date of the invoice.

Failure to pay the amount of the invoice within 120 days shall result in a 10 percent late penalty that shall be paid in addition to the fee.

(f) Any public water system under the jurisdiction of a local primacy agency shall pay the fees specified in this section to the local primacy agency in lieu of the department. This section shall not preclude a local health officer from imposing additional fees pursuant to Section 101325.

116570. (a) Each public water system serving less than 1,000 service connections applying for a domestic water supply permit pursuant to Section 116525 or 116550 shall pay a permit application processing fee to the department. Payment of the fee shall accompany the application for the permit or permit amendment.

(b) The amount of the permit application fee required under subdivision (a) shall be as follows:

(1) A new community water system for which no domestic water supply permits have been previously issued by the department shall pay an application fee of five hundred dollars ($500).

(2) A new noncommunity water system for which no domestic water supply permits have been previously issued by the department shall pay an application fee of three hundred dollars ($300).

(3) An existing public water system applying for an amendment to a domestic water supply permit due to a change in ownership shall pay an application fee of one hundred fifty dollars ($150).

(4) An existing public water system applying for an amendment to a domestic water supply permit due to an addition or modification of the source of supply, or an addition or change in the method of treatment of the water supply shall pay an application fee of two hundred fifty dollars ($250).

(c) Any public water system under the jurisdiction of a local primacy agency shall pay the permit application fees specified in this section to the local primacy agency in lieu of the department.

116577. (a) Each public water system shall reimburse the department for actual costs incurred by the department for any of the following enforcement activities related to that water system:

(1) Preparing, issuing, and monitoring compliance with, an order or a citation.

(2) Preparing and issuing public notification.

(3) Conducting a hearing pursuant to Section 116625.

(b) The department shall submit an invoice for these enforcement costs to the public water system that requires payment prior to September 1 of the fiscal year following the fiscal year in which the costs were incurred. The invoice shall indicate the total hours expended, the reasons for the expenditure, and the hourly cost rate of the department. The costs set forth in the invoice shall not exceed the total actual costs to the department of enforcement activities specified in this section.

(c) Notwithstanding the reimbursement of enforcement costs of the local primacy agency pursuant to subdivision (a) of Section 116595 by public water systems under the jurisdiction of the local primacy agency, public water systems shall also reimburse enforcement costs, if any, incurred by the department pursuant to this section.

(d) ''Enforcement costs'' as used in this section does not include ''litigation costs'' pursuant to Section 116585.

(e) The department shall not be entitled to enforcement costs pursuant to this section if either a court or the department determines that enforcement activities were in error.

(f) The maximum reimbursement, pursuant to this section, by a public water system serving less than 1,000 service connections during any fiscal year shall not exceed one thousand dollars ($1,000) or twice the maximum for that public water system as set forth in subdivision (c) of Section 116565, whichever is greater.

116580. (a) Each public water system that requests an exemption, plan review, variance, or waiver of any applicable requirement of this chapter or any regulation adopted pursuant to this chapter, shall reimburse the department for actual costs incurred by the department in processing the request.

(b) The department shall submit an invoice to the water system within 90 days of the department's final decision with respect to the request for an exemption, variance, or waiver. The invoice shall indicate the number of hours expended by the department and the department's hourly cost rate. Payment of the fee shall be made within 120 days of the date of the invoice. The department may revoke any approval of a request for an exemption, variance, or waiver for failure to pay the required fees.

(c) Notwithstanding subdivisions (a) and (b), requests for, and reimbursement of actual costs for, an exemption, variance, or waiver for public water systems under the jurisdiction of the local primacy agency shall, instead, be submitted to the local primacy agency pursuant to subdivision (c) of Section 116595.

116585. In any court action brought to enforce this chapter, the prevailing party or parties shall be awarded litigation costs, including, but not limited to, salaries, benefits, travel expenses, operating equipment, administrative, overhead, other litigation costs, and attorney's fees, as determined by the court. Litigation costs awarded to the department by the court shall be deposited into the Safe Drinking Water Account. Litigation costs awarded to a local primacy agency by the court shall be used by that local primacy agency to offset the local primacy agency's litigation costs.

116590. (a) All funds received by the department pursuant to this chapter, including, but not limited to, all civil penalties collected by the department pursuant to Article 9 (commencing with Section 116650) and Article 11 (commencing with Section 116725), shall be

deposited into the Safe Drinking Water Account that is hereby established. Funds in the Safe Drinking Water Account may not be expended for any purpose other than as set forth in this chapter. Notwithstanding Section 13340 of the Government Code, funds collected by the department pursuant to Sections 116565 to 116600, inclusive, and deposited into the Safe Drinking Water Account are continuously appropriated without regard to fiscal year to pay the expenses of the department to administer this chapter.

(b) The department's hourly cost rate used to determine the reimbursement for actual costs pursuant to Sections 116565, 116577, and 116580 shall be based upon the department's salaries, benefits, travel expense, operating, equipment, administrative support, and overhead costs.

(c) Notwithstanding Section 6103 of the Government Code, each public water system operating under a permit issued pursuant to this chapter shall pay the fees set forth in this chapter. A public water system shall be permitted to collect a fee from its customers to recover the fees paid pursuant to this chapter.

(d) The fees collected pursuant to subdivision (c) of Section 116565 and subdivision (b) of Section 116570 shall be adjusted annually pursuant to Section 100425, and the adjusted fee amounts shall be rounded off to the nearest whole dollar.

(e) Fees assessed pursuant to this chapter shall not exceed actual costs to either the department or the local primacy agency, as the case may be, related to the public water systems assessed the fees.

(f) In no event shall the total amount of funds collected pursuant to subdivisions (a) and (b) of Section 116565, and subdivision (a) of Section 116577 from public water systems serving 1,000 or more service connections exceed the following:

(1) For the 1992–93 fiscal year, four million nine hundred thousand dollars ($4,900,000).

(2) For the 1993–94 fiscal year, four million seven hundred fifty thousand dollars ($4,750,000).

(3) For the 1994–95 fiscal year, five million dollars ($5,000,000).

(4) For the 1995–96 fiscal year, five million two hundred fifty thousand dollars ($5,250,000).

(g) The department shall develop a time accounting standard designed to do all of the following:

(1) Provide accurate time accounting.

(2) Provide accurate invoicing based upon hourly rates comparable to private sector professional classifications and comparable rates charged by other states for comparable services. These rates shall be applied against the time spent by the actual individuals who perform the work.

(3) Establish work standards that address work tasks, timing, completeness, limits on redirection of effort, and limits on the time spent in the aggregate for each activity.

(4) Establish overhead charge-back limitations, including, but not limited to, charge-back limitations on charges relating to reimbursement of services provided to the department by other departments and agencies of the state, that reasonably relate to the performance of the function.

(5) Provide appropriate invoice controls.

116595. (a) Any public water system under the jurisdiction of a local primacy agency shall reimburse the local primacy agency for any enforcement cost incurred by the local primacy agency related to any of the following relating to that water system:

(1) Preparing, issuing, and monitoring compliance with, an order or a citation.

(2) Preparing and issuing public notification.

(3) Conducting a hearing pursuant to Section 116625.

The local primacy agency shall submit an invoice to the public water system that requires payment, prior to September 1 of the fiscal year following the fiscal year in which the costs were incurred. The invoice shall indicate the total hours expended, the reasons for the expenditure, and the hourly cost rate of the local primacy agency. The invoice shall not exceed the total costs to the local primacy agency of enforcement activities specified in this subdivision. Notwithstanding the reimbursement to the department of enforcement costs, if any, pursuant to Section 116577, any public water system under the jurisdiction of the local primacy agency shall also reimburse the local primacy agency for enforcement costs incurred by the local primacy agency pursuant to this section. The local primacy agency shall not be entitled to enforcement costs pursuant to this subdivision if either a court or the local primacy agency determines that enforcement activities were in error. ''Enforcement costs'' as used in this subdivision does not include ''litigation costs'' as used in subdivision (d). The maximum reimbursement, pursuant to this subdivision, by a public water system serving less than 1,000 service connections during any fiscal year shall not exceed twice the maximum for that public water system as set forth in subdivision (c) of Section 116565.

(b) The local primacy agency may adopt a fee schedule for the processing of applications for a domestic water supply permit, submitted pursuant to subdivision (c) of Section 116570 by a public water system under the jurisdiction of the local primacy agency, in lieu of the fee schedule set forth in subdivision (b) of Section 116570, to recover its cost of processing the permit applications as specified in the primacy agreement. The fee shall not exceed the total costs to the local primacy agency of processing the permit application.

(c) Any public water system under the jurisdiction of a local primacy agency that requests an exemption, variance, or waiver of any applicable requirement of this chapter, or any regulation of the department adopted pursuant to this chapter, shall submit the

request to the local primacy agency and shall reimburse the local primacy agency for any costs incurred by the local primacy agency in processing the request.

116600. Except as otherwise specified, Sections 116565 to 116600, inclusive, shall become operative July 1, 1993. Sections 116565 to 116600, inclusive, shall remain in effect until January 1, 1997, and as of that date are repealed unless a later enacted statute that is enacted before January 1, 1997, deletes or extends that date.

Article 8. Violations

116625. (a) The department, after a hearing noticed and conducted as provided in Section 11500 of the Government Code, may suspend or revoke any permit issued pursuant to this chapter if the department determines pursuant to the hearing that the permittee is not complying with the permit, this chapter, or any regulation, standard, or order issued or adopted thereunder, or that the permittee has made a false statement or representation on any application, record, or report maintained or submitted for purposes of compliance with this chapter.

(b) The permittee may file with the superior court a petition for a writ of mandate for review of any decision of the department made pursuant to subdivision (a). Failure to file a petition shall not preclude a party from challenging the reasonableness or validity of a decision of the department in any judicial proceeding to enforce the decision or from pursuing any remedy authorized by this chapter.

(c) The department may temporarily suspend any permit issued pursuant to this chapter prior to any hearing when the action is necessary to prevent an imminent or substantial danger to health. The director shall notify the permittee of the temporary suspension and the effective date thereof and, at the same time, notify the permittee that a hearing has been scheduled. The hearing shall be held as soon as possible, but not later than 15 days after the effective date of the temporary suspension. The temporary suspension shall remain in effect until the hearing is completed and the director has made a final determination on the merits, that in any event shall be made within 15 days after the completion of the hearing. If the determination is not transmitted within 15 days after the hearing is completed, the temporary suspension shall be of no further effect.

Article 9. Remedies

116650. (a) If the department determines that a public water system is in violation of this chapter or any regulation, permit, standard, or order issued or adopted thereunder, the department may issue a citation to the public water system. The citation shall be served upon the public water system personally or by registered mail.

(b) Each citation shall be in writing and shall describe with particularity the nature of the violation, including a reference to the statutory provision, standard, order, or regulation alleged to have been violated.

(c) For continuing violations, the citation shall fix the earliest feasible time for elimination or correction of the condition constituting the violation where appropriate. If the public water system fails to correct a violation within the time specified in the citation, the department may assess a civil penalty as specified in subdivision (e).

(d) For a noncontinuing violation of primary drinking standards, other than turbidity, the department may assess in the citation a civil penalty as specified in subdivision (e).

(e) Citations issued pursuant to this section shall be classified according to the nature of the violation or the failure to comply. The department shall specify the classification in the citation and may assess civil penalties for each classification as follows:

(1) For violation of a primary drinking standard, other than turbidity, an amount not to exceed one thousand dollars ($1,000) for each day that the violation occurred for noncontinuing violations or for each day that the violation continues beyond the date specified for correction in the citation.

(2) For failure to comply with any citation or order issued for failure of the primary drinking water standard for turbidity or for violation of a secondary drinking water standard that the director determines may have a direct or immediate relationship to the welfare of the users, an amount not to exceed two hundred fifty dollars ($250) for each day that the violation continues beyond the date specified for correction in the citation.

(3) For failure to comply with any citation or order issued for noncompliance with any department regulation or order, other than a primary or secondary drinking water standard, an amount not to exceed two hundred dollars ($200) per day for each day the violation continues beyond the date specified for correction in the citation.

116655. (a) Whenever the department determines that any person has violated or is violating this chapter, or any permit, regulation, or standard issued or adopted pursuant to this chapter, the director may issue an order doing any of the following:

(1) Directing compliance forthwith.

(2) Directing compliance in accordance with a time schedule set by the department.

(3) Directing that appropriate preventive action be taken in the case of a threatened violation.

(b) An order issued pursuant to this section may include, but shall not be limited to, any or all of the following requirements:

(1) That the existing plant, works, or system be repaired, altered, or added to.

(2) That purification or treatment works be installed.
(3) That the source of the water supply be changed.
(4) That no additional service connection be made to the system.
(5) That the water supply, the plant, or the system be monitored.
(6) That a report on the condition and operation of the plant, works, system, or water supply be submitted to the department.

116660. (a) Any person who operates a public water system without having an unrevoked permit to do so, may be enjoined from so doing by any court of competent jurisdiction at the suit of the department.

(b) When the department determines that any person has engaged in or is engaged in any act or practice that constitutes a violation of this chapter, or any regulation, permit, standard, or order issued or adopted thereunder, the department may bring an action in the superior court for an order enjoining the practices or for an order directing compliance.

(c) Upon a showing by the department of any violation set forth in subsection (b); the superior court shall enjoin the practices and may do any of the following:

(1) Enforce a reasonable plan of compliance, including the appointment of a competent person, to be approved by the department, and paid by the operator of the public water system, who shall take charge of and operate the system so as to secure compliance.
(2) Enjoin further service connections to the public water system.
(3) Afford any further relief that may be required to insure compliance with this chapter.

116665. Whenever the department determines that any public water system is unable or unwilling to adequately serve its users, has been actually or effectively abandoned by its owners, or is unresponsive to the rules or orders of the department, the department may petition the superior court for the county within which the system has its principal office or place of business for the appointment of a receiver to assume possession of its property and to operate its system upon such terms and conditions as the court shall prescribe. The court may require, as a condition to the appointment of the receiver, that a sufficient bond be given by the receiver and be conditioned upon compliance with the orders of the court and the department, and the protection of all property rights involved. The court may provide, as a condition of its order, that the receiver appointed pursuant to the order shall not be held personally liable for any good faith, reasonable effort to assume possession of, and to operate, the system in compliance with the order.

116670. Anything done, maintained, or suffered as a result of failure to comply with any primary drinking water standard is a public nuisance dangerous to health, and may be enjoined or summarily abated in the manner provided by law. Every public

officer or body lawfully empowered to do so shall abate the nuisance immediately.

116675. Notwithstanding Sections 116340 and 116500, the department shall, after adequate notification of the local health officer, take action authorized by this chapter against a public water system under the jurisdiction of the local health officer if any of the following occur:

(a) The public water system has been in violation of any provision of this chapter or the regulations adopted hereunder, including any violation of compliance with drinking water standards or waterworks standards, for a period of at least 90 days within the previous year.

(b) A contaminant is present in, or likely to enter, a public water system and presents an imminent and substantial danger to the health of the users of the system.

Article 10. Judicial Review

116700. (a) Within 30 days after service of a copy of an order issued by the department, any aggrieved party may file with the superior court a petition for a writ of mandate for review thereof. Failure to file an action shall not preclude a party from challenging the reasonableness and validity of a decision or order of the department in any judicial proceedings brought to enforce the decision or order or for any civil or criminal remedy authorized by this chapter.

(b) The evidence before the court shall consist of all relevant evidence that, in the judgment of the court, should be considered to effectuate and implement the provisions of this chapter. In every case, the court shall exercise its independent judgment on the evidence.

(c) Except as otherwise provided in this section, subdivisions (e) and (f) of Section 1094.5 of the Code of Civil Procedure shall govern proceedings pursuant to this section.

Article 11. Crimes and Penalties

116725. (a) Any person who knowingly makes any false statement or representation in any application, record, report, or other document submitted, maintained, or used for purposes of compliance with this chapter, may be liable, as determined by the court, for a civil penalty not to exceed five thousand dollars ($5,000) for each separate violation or, for continuing violations, for each day that violation continues.

(b) Any person who violates a citation schedule of compliance for a primary drinking water standard, other than turbidity, or any order regarding a primary drinking water standard other than turbidity, or the requirement that a reliable and adequate supply of pure,

wholesome, healthful, and potable water be provided may be liable, as determined by the court, for a civil penalty not to exceed twenty-five thousand dollars ($25,000) for each separate violation or, for continuing violations, for each day that violation continues.

(c) Any person who violates any order, other than one specified in subdivision (b), issued pursuant to this chapter may be liable, as determined by the court, for a civil penalty not to exceed five thousand dollars ($5,000) for each separate violation or, for continuing violations, for each day that violation continues.

(d) Any person who operates a public water system without a permit issued by the department pursuant to this chapter may be liable, as determined by the court, for a civil penalty not to exceed twenty-five thousand dollars ($25,000) for each separate violation or, for continuing violations, for each day that violation continues.

(e) Each civil penalty imposed for any separate violation pursuant to this section shall be separate and in addition to any other civil penalty imposed pursuant to this section or any other provision of law.

116730. (a) Any person who knowingly does any of the following acts may, upon conviction, be punished by a fine of not more than twenty-five thousand dollars ($25,000) for each day of violation, or by imprisonment in the county jail not to exceed one year, or by both the fine and imprisonment:

(1) Makes any false statement or representation in any application, record, report, or other document submitted, maintained, or used for the purposes of compliance with this chapter.

(2) Has in his or her possession any record required to be maintained pursuant to this chapter that has been altered or concealed.

(3) Destroys, alters, or conceals any record required to be maintained pursuant to this chapter.

(4) Withholds information regarding an imminent and substantial danger to the public health or safety when the information has been requested by the department in writing and is required to carry out the department’s responsibilities pursuant to this chapter in response to an imminent and substantial danger.

(5) Violates an order issued by the department pursuant to this chapter that has a substantial probability of presenting an imminent danger to the health of persons.

(6) Operates a public water system without a permit issued by the department pursuant to this chapter.

(b) If the conviction under subdivision (a) is for a violation committed after a first conviction of the person under this section, the person may be punished by imprisonment in the state prison for up to 24 months, or in the county jail for not to exceed one year, or by a fine of not less than two thousand dollars ($2,000) or more than

fifty thousand dollars ($50,000) per day of violation, or by both the fine and imprisonment.

116735. (a) In order to carry out the purposes of this chapter, any duly authorized representative of the department may, at any reasonable hour of the day, do any of the following:

(1) Enter and inspect any public water system or any place where the public water system records are stored, kept, or maintained.

(2) Inspect and copy any records, reports, test results, or other information required to carry out this chapter.

(3) Set up and maintain monitoring equipment for purposes of assessing compliance with this chapter.

(4) Obtain samples of the water supply.

(5) Photograph any portion of the system, any activity, or any sample taken.

(b) The department shall inspect each public water system at least annually, and shall provide an opportunity for a representative of the public water system to accompany the representative of the department during the inspection of the water system.

(c) It shall be a misdemeanor for any person to prevent, interfere with, or attempt to impede in any way any duly authorized representative of the department from undertaking the activities authorized by subdivision (a).

116740. If any person fails to pay an assessment of a civil penalty after it has become a final and unappealable order, the Attorney General or the district attorney shall recover the amount for which the person is liable in the superior court. In this action, the validity and appropriateness of the final order imposing the civil penalty shall not be subject to review.

116745. The remedies provided by this chapter are cumulative and shall not be construed as restricting any remedy, provisional or otherwise, provided by law for the benefit of any party, and no judgment under this chapter shall preclude any party from obtaining additional relief based upon the same facts.

116750. (a) Any person who tampers with a public water system is guilty of a felony and shall be punished by imprisonment in the state prison for three, four, or five years, subject to a fine not to exceed thirty thousand dollars ($30,000), or both.

(b) Any person who tampers with or makes a threat to tamper with a public water system is guilty of a felony and shall be punished by imprisonment in the state prison for 16 months, two, or three years, subject to a fine not to exceed twenty thousand dollars ($20,000), or both.

(c) For purposes of this section, the term ‘‘tamper’’ means either of the following:

(1) To introduce a contaminant into a public water system with the intention of harming persons.

(2) To otherwise interfere with the operation of a public water system with the intention of harming persons.

CHAPTER 5. WATER EQUIPMENT AND CONTROL

Article 1. Water Softeners

116775. The Legislature hereby finds and declares that the utilization of the waters of the state by residential consumers for general domestic purposes, including drinking, cleaning, washing, and personal grooming and sanitation of the people is a right that should be interfered with only when necessary for specified health and safety purposes. The Legislature further finds that variation in water quality, and particularly in water hardness, throughout the state requires that on-site water softening or conditioning be available throughout the state to insure to domestic consumers their right to a water supply that is effective and functional for domestic requirements of the residential household, but that the on-site water softening or conditioning shall be available only as hereinafter set forth.

116780. (a) Unless the context otherwise requires the definitions in this section govern the construction of this article.

(b) ''Clock control'' means the system controlling the periodic automatic regeneration of a residential water softening or conditioning appliance that is based upon a predetermined and preset time schedule.

(c) ''Demand control'' means the system controlling the periodic automatic regeneration of a residential water softening or conditioning appliance that is based either upon a sensor that detects imminent exhaustion of the active softening or conditioning material or upon the measurement of the volume of water passing through the appliance. A demand control system activates regeneration based upon the state of the equipment and its ability to continue the softening process.

(d) ''Fully manual regeneration'' means the method of regeneration of a residential water softening or conditioning appliance in which operations are performed manually and in which dry salt is added directly to the ion-exchanger tank after sufficient water is removed to make room for the salt.

(e) ''Hardness'' means the total of all dissolved calcium, magnesium, iron and other heavy metal salts, that interact with soaps and detergents in a manner that the efficiency of soaps and detergents for cleansing purposes is impaired. Hardness is expressed in grains per gallon or milligrams per liter as if all such salts were present as calcium carbonate.

(f) ''Manually-initiated control'' means the system controlling the periodic regeneration of a residential water softening or conditioning

appliance in which all operations, including bypass of hard water and return to service, are performed automatically after manual initiation.

(g) ''Regeneration'' means the phase of operation of a water softening or conditioning appliance whereby the capability of the appliance to remove hardness from water is renewed by the application of a brine solution of sodium chloride salt to the active softening or conditioning material contained therein followed by a subsequent rinsing of the active softening or conditioning material.

(h) ''Salt efficiency rating'' means the efficiency of the use of sodium chloride salt in the regeneration of a water softening appliance, expressed in terms of hardness removal capacity of the appliance per pound of salt used in the regeneration process. The units of salt efficiency rating are grains of hardness removed per pound of salt used. One grain of hardness per gallon is approximately equivalent to 17.1 milligrams of hardness per liter.

116785. No residential water softening or conditioning appliance shall be installed except in either of the following circumstances:

(a) The regeneration of the appliance is performed at a nonresidential facility separate from the location of the residence where the appliance is used.

(b) The regeneration of the appliance discharges to the waste disposal system of the residence where the appliance is used and both of the following conditions are satisfied:

(1) The appliance is certified to control the quantity of salt used per regeneration by a pre-set device and the settings of the device are limited so that a salt efficiency rating of no less than 2850 grains of hardness removed per pound of salt used in regeneration is achieved with a clock control, manually-initiated control, or demand control.

(2) The installation of the appliance is accompanied by the simultaneous installation of the following softened or conditioned water conservation devices on all fixtures using softened or conditioned water, unless the devices are already in place or are prohibited by local and state plumbing and building standards or unless the devices will adversely restrict the normal operation of the fixtures:

(A) Faucet flow restrictors.

(B) Shower head restrictors.

(C) Toilet reservoir dams.

(D) A piping system installed so that untreated (unsoftened or unconditioned) supply water is carried to hose bibs and sill cocks that serve water to the outside of the house, except that bypass valves may be installed on homes with slab foundations constructed prior to the date of installation; or condominiums constructed prior to the date of installation; or otherwise where a piping system is physically inhibited.

116790. Any water softening appliance in place at a residential dwelling prior to January 1, 1980, in those areas being served by sewage treatment facilities that have been limited with regard to salt loading pursuant to Division 7 (commencing with Section 13000) of the Water Code and for which the appropriate regional water quality control board makes a finding, after adoption of waste discharge requirements and subject to a public hearing, that the control of residential salinity input is necessary to provide compliance with those limitations, may be continued in operation for a period no longer than four years after the regional water quality control board has made its findings. After the four-year period has elapsed, any water softening appliance at that site shall be set at a salt efficiency rating of no less than 2850 grains of hardness removed per pound of salt used in regeneration when regeneration is initiated with clock controls or manually-initiated controls, or shall have regenerations initiated with demand devices. Also, after the four-year period has elapsed, those water-saving devices in shower heads, on faucets, and in toilet reservoirs, as recited in paragraph (2) of subdivision (b) of Section 116785, shall be installed unless already in place or prohibited by local and state plumbing and building standards. The salt efficiency rating of the water softening or conditioning appliance and the installation of water-saving devices shall be certified in accordance with Section 116795.

116795. The certification required by this article shall be provided by the new user of the appliance and shall be completed by a contractor having a valid Class C-55 water conditioning contractor's license or Class C-36 plumbing contractor's license and filed with the local agency responsible for issuing plumbing permits.

The certification form shall contain all of the following information:

(a) Name and address of homeowner.

(b) Manufacturer of the water softening or conditioning appliance, model number of the appliance, pounds of salt used per regeneration, and salt efficiency rating at the time of certification.

(c) Manufacturer of the water-saving devices installed, model number, and number installed.

(d) Name, address, and the specialty contractor's license number of the C-55 and C-36 licensee making the certification.

Article 2. Cross-Connection Control by Water Users

116800. Local health officers may maintain programs for the control of cross-connections by water users, within the users' premises, where public exposure to drinking water contaminated by backflow may occur. The programs may include inspections within water users premises for the purpose of identifying cross-connection hazards and determining appropriate backflow protection. Water users shall comply with all orders, instructions, regulations, and

notices from the local health officer with respect to the installation, testing, and maintenance of backflow prevention devices. The local health officer may collect fees from those water users subject to inspection to offset the costs of implementing cross-connection control programs.

116805. (a) Local health officers may maintain programs, in cooperation with water suppliers, to protect against backflow through service connections into the public water supply, and, with the consent of the water supplier, may collect fees from the water supplier to offset the costs of implementing these programs.

(b) The fees authorized under this section and under Section 116800 shall be limited to the costs of administering these programs. At the discretion of the water supplier, the fees collected from the water supplier by the local health officer may be passed through to water users.

(c) Programs authorized under this section and Section 116800 shall be conducted in accordance with backflow protection regulations adopted by the department.

(d) Nothing in this article shall prevent a water supplier from directly charging those water users required to install backflow prevention devices for the costs of the programs authorized in this section and Section 116800.

116810. To assure that testing and maintenance of backflow prevention devices are performed by persons qualified to do testing and maintenance, local health officers may maintain programs for certification of backflow prevention device testers. The local health officer may suspend, revoke, or refuse to renew the certificate of a tester, if, after a hearing before the local health officer or his or her designee, the local health officer or his or her designee finds that the tester has practiced fraud or deception or has displayed gross negligence or misconduct in the performance of his or her duties as a certified backflow prevention device tester. The local health officer may collect fees from certified testers to offset the cost of the certification program provided pursuant to this section. The certification standards shall be consistent with the backflow protection regulations adopted by the department.

116815. (a) All pipes installed above or below the ground, on and after June 1, 1993, that are designed to carry reclaimed water, shall be colored purple or distinctively wrapped with purple tape.

(b) Subdivision (a) shall apply only in areas served by a water supplier delivering water for municipal and industrial purposes, and in no event shall apply to any of the following:

(1) Municipal or industrial facilities that have established a labeling or marking system for reclaimed water on their premises, as otherwise required by a local agency, that clearly distinguishes reclaimed water from potable water.

(2) Water delivered for agricultural use.

(c) For purposes of this section, ‘‘reclaimed water’’ has the same meaning as defined in subdivision (n) of Section 13050 of the Water Code.

116820. Any person who violates any provision of this article, violates any order of the local health officer pursuant to this article, or knowingly files a false statement or report required by the local health officer pursuant to this article is guilty of a misdemeanor punishable by a fine not exceeding five hundred dollars ($500) or by imprisonment not exceeding 30 days in the county jail or by both such fine and imprisonment. Each day of a violation of any provision of this article or of any order of the local health officer beyond the time stated for compliance of the order shall be a separate offense.

Article 3. Water Treatment Devices

116825. Unless the context otherwise requires, the following definitions shall govern construction of this article:

(a) ‘‘Water treatment device’’ means any point of use or point of entry instrument or contrivance sold or offered for rental or lease for residential use, and designed to be added to the plumbing system, or used without being connected to the plumbing of a water supply intended for human consumption in order to improve the water supply by any means, including, but not limited to, filtration, distillation, adsorption, ion exchange, reverse osmosis, or other treatment. ‘‘Water treatment device’’ does not include any device that is regulated pursuant to Article 12 (commencing with Section 111070) of Chapter 5 of Part 5.

(b) ‘‘Department’’ means the Department of Health Services.

(c) ‘‘Person’’ means any individual, firm, corporation, or association, or any employee or agent thereof.

(d) ‘‘Contaminants’’ means any health-related physical, chemical, biological, or radiological substance or matter in water.

116830. (a) The department shall adopt regulations setting forth the criteria and procedures for certification of water treatment devices that are claimed to affect the health or safety of drinking water. The regulations shall include appropriate testing protocols and procedures to determine the performance of water treatment devices in reducing specific contaminants from public or private domestic water supplies. The regulations may adopt, by reference, the testing procedures and standards of one or more independent testing organizations if the department determines that the procedures and standards are adequate to meet the requirements of this section. The regulations may specify any testing organization that the department has designated to conduct the testing of water treatment devices.

(b) The regulations required by subdivision (a) shall include minimum standards for the following:

(1) Performance requirements.
(2) Types of tests to be performed.
(3) Types of allowable materials.
(4) Design and construction.
(5) Instruction and information requirements, including operational, maintenance, replacement, and estimated cost of these items.
(6) Any additional requirements, not inconsistent with this article, as may be necessary to carry out this article.

(c) The department or any testing organization designated by the department pursuant to this section may agree to evaluate test data on a water treatment device offered by the manufacturer of the water treatment device, in lieu of the requirements of this section, if the department or the testing organization determines that the testing procedures and standards used to develop the data are adequate to meet the requirements of this section.

116835. (a) No water treatment device that makes product performance claims or product benefit claims that the device affects health or the safety of drinking water, shall be sold or otherwise distributed that has not been certified by the department or by another entity in accordance with subdivision (b). Water treatment devices not offered for sale or distribution based on claims of improvement in the healthfulness of drinking water need not be certified pursuant to this section.

(b) The department may accept a water treatment device certification issued by an agency of another state, by an independent testing organization, or by the federal government in lieu of its own, if the department determines that certification program meets the requirements of this article.

(c) A water treatment device initially installed prior to the operative date of this section shall not require certification pursuant to Section 116830.

(d) Subdivisions (a), (b), and (c) shall become operative one year after the effective date of the regulations adopted pursuant to Section 116830. Regulations adopted pursuant to that section shall be transmitted to the Legislature upon adoption.

116840. (a) The department, or any local health officer with the concurrence of the department, shall enforce this article.

(b) The department may suspend, revoke, or deny a certificate upon its determination of either of the following:

(1) That the water treatment device does not perform in accordance with the claims made under the standard.

(2) That the manufacturer, or any employee or agent thereof, has violated this article, any regulation adopted pursuant to this article, or Chapter 1 (commencing with Section 17500) of Part 3 of Division 7 of the Business and Professions Code.

(c) Any person, corporation, firm, partnership, joint stock company, or any other association or organization that violates any provision of this article shall be liable for a civil penalty not to exceed five thousand dollars ($5,000) for each violation. Where the conduct constituting a violation is of a continuing nature, each day of the conduct is a separate and distinct violation. The civil penalty shall be assessed and recovered in a civil action brought in the name of the people of the State of California by the Attorney General, or by any district attorney, county counsel, or city attorney in any court of competent jurisdiction.

(d) If the action is brought by the Attorney General, one-half of the penalty collected shall be paid to the treasurer of the county in which the judgment was entered, and one-half to the State Treasurer. If brought by a district attorney or county counsel, the entire amount of penalties collected shall be paid to the treasurer of the county in which the judgment was entered. If brought by a city attorney or city prosecutor, one-half of the penalty shall be paid to the treasurer of the county and one-half to the city.

(e) Unless otherwise provided, the remedies or penalties provided by this article are cumulative to each other and to remedies or penalties available under all other laws of this state.

116845. The department shall publish a list of water treatment devices certified under this article, including the specific standard under which the device is certified.

116850. The department shall charge and collect a fee for each certificate applied for which shall be an amount reasonably necessary to produce sufficient revenue to effectively implement this article.

116855. In developing regulations pursuant to this article, the department shall seek the consultation of representatives from the industry regulated under the article, from drinking water purveyors, and from persons with expertise and experience in promoting public health.

116860. There is in the State Treasury the Water Device Certification Special Account. Fees collected pursuant to Section 116850 shall be deposited in the account created by this section.

116865. The Director of Finance may authorize the department to borrow up to two hundred thousand dollars ($200,000) for the purpose of implementing this article from any fund or account deemed appropriate by the Director of Finance. The department shall repay the loan with interest to be determined in accordance with Section 16314 of the Government Code.

Article 4. Lead Materials

116875. (a) Solders containing more than 0.20 percent lead shall not be used in making joints and fittings in any private or public potable water supply system or any water user’s pipelines.

(b) No solder containing more than 0.20 percent lead shall be sold in California on and after July 1, 1986, unless it contains a warning label that states: ''Contains lead. California law prohibits the use of this solder in making joints and fittings in any private or public potable water supply system or any water user's pipelines.''

(c) On and after January 1, 1986, lead pipe shall not be used in the construction of private or public potable water supply systems.

(d) The requirements of subdivision (a) shall not be applicable to potable water supply pipelines in any building where the date of application for a building permit is prior to the effective date of the standards adopted pursuant to Section 116880.

116880. The department shall adopt building standards that will limit the use of lead materials in public and private water systems. The standards shall be adopted in accordance with Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code and shall be published in the State Building Standards Code located in Title 24 of the California Code of Regulations. The standards shall be enforced by the appropriate state and local building and health officials.

CHAPTER 6. OPERATION OF WATER TREATMENT PLANTS

Article 1. Definitions

116900. Unless the context otherwise requires, the definitions in this article govern the interpretation of this chapter and Article 3 (commencing with Section 106875) of Chapter 4 of Part 1.

116905. ''Advisory committee'' means the committee established by former Section 116925.

116910. ''Certificate'' means a certificate of competency issued by the director stating that the operator has met the requirements for a specific operator classification of the certification program.

116915. ''Operator'' means any person who is responsible for the operation of a water treatment plant.

116920. ''Water treatment plant'' means a group or assemblage of structures, equipment, and processes that treat or condition a water supply, affecting the physical, chemical, or bacteriological quality of water distributed or otherwise offered to the public for domestic use.

Article 2. Administration

116950. The director shall adopt regulations and certification standards necessary to carry out this chapter and Article 3 (commencing with Section 106875) of Chapter 4 of Part 1, pursuant to Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code, and shall submit those regulations to the board for its review and approval.

CHAPTER 7. WATER SUPPLY

Article 1. Water Supply Provisions

116975. No person shall put the carcass of any dead animal, or the offal from any slaughter pen, corral, or butcher shop, into any river, creek, pond, reservoir, or stream.

116980. No person shall put any water closet, privy, cesspool or septic tank, or the carcass of any dead animal, or any offal of any kind, in, or upon the borders of, any stream, pond, lake, or reservoir from which water is drawn for the supply of any portion of the inhabitants of this state, in a manner that the drainage of the water closet, privy, cesspool or septic tank, or carcass, or offal may be taken up by or in the water.

116985. No person shall allow any water closet, privy, cesspool, or septic tank, or carcass of any dead animal, or any offal of any kind, to remain in or upon the borders of any stream, pond, lake, or reservoir within the boundaries of any land owned or occupied by him or her, in a manner that the drainage from the water closet, privy, cesspool or septic tank, or carcass, or offal, may be taken up by or in the stream, pond, lake, or reservoir, if water is drawn therefrom for the supply of any portion of the inhabitants of this state.

116990. No person shall keep any horses, mules, cattle, swine, sheep, or live stock of any kind, penned, corralled, or housed on, over, or on the borders of any stream, pond, lake, or reservoir, in a manner that the waters become polluted, if water is drawn therefrom for the supply of any portion of the inhabitants of this state.

116995. No person shall cause or permit any horses, cattle, sheep, swine, poultry, or any kind of live stock or domestic animals, to pollute the waters, or tributaries of waters, used or intended for drinking purposes by any portion of the inhabitants of this state.

117000. No person shall bathe, except as permitted by law, in any stream, pond, lake, or reservoir from which water is drawn for the supply of any portion of the inhabitants of this state, or by any other means foul or pollute the waters of any such stream, pond, lake, or reservoir.

117005. Nothing in this article shall be held to prevent the grazing of livestock in areas embracing any stream or watershed where the grazing would not tend to render the waters unwholesome or injurious to the public health.

117010. Every person who washes clothes in any spring, stream, river, lake, reservoir, well, or other waters that are used or intended for drinking purposes by the inhabitants of the vicinage or of any city, county, or town, of this state, is guilty of a misdemeanor, punishable by imprisonment in the county jail for not more than 90 days, or a fine of not less than fifty dollars ($50) nor more than one thousand dollars ($1,000), or by both such fine and imprisonment.

Each day's violation of this section is a separate offense.

117015. Every person who violates, or refuses or neglects to conform to, any sanitary rule, order, or regulation prescribed by the department for the prevention of the pollution of springs, streams, rivers, lakes, wells, or other waters used or intended to be used for human or animal consumption, is guilty of a misdemeanor.

117020. No person shall construct, maintain, or use any waste well extending to or into a subterranean water-bearing stratum that is used or intended to be used as, or is suitable for, a source of water supply for domestic purposes, except pursuant to Article 6 (commencing with Section 13540) of Chapter 7, Division 7 of the Water Code.

117025. It is unlawful for the owner, tenant, lessee, or occupant of any houseboat or boat intended for or capable of being used as a residence, house, dwelling, or habitation, or agent of the owner, tenant, lessee, or occupant to moor or anchor it or permit it to be moored or anchored in or on any river or stream, the waters of which are used for drinking or domestic purposes by any city, town, or village, within a distance of two miles above the intake or place where the city, town, or village water system takes water from the river or stream. This section does not apply to the mooring or anchoring of a houseboat when necessary, during transportation, for a period of not longer than one day.

117030. Violation of this article may be enjoined by any court of competent jurisdiction at the suit of any person whose supply of water for human or animal consumption or for domestic purposes is or may be affected, or by the state department.

117035. Anything done, maintained, or suffered, in violation of any of the provisions of this article is a public nuisance, dangerous to health, and may be summarily abated as such.

117040. A city, city and county, district or other public agency, owning or operating a reservoir used for domestic or drinking water purposes, may open to public fishing all or any part of the reservoir and its surrounding land.

117045. Before the reservoir and its surrounding land are opened to public fishing the public agency owning or operating the reservoir shall determine that the public fishing will not affect the purity and safety for drinking and domestic purposes of the water collected in the reservoir, and shall obtain from the department a valid water supply permit setting forth the terms and conditions upon which public fishing may be conducted in the reservoir and on its surrounding land.

117050. Public fishing shall not be conducted in a reservoir or on its surrounding land if the reservoir is used as a regulating reservoir to meet daily or peak consumption demands and as a terminal reservoir to a water collecting facility and as a distribution reservoir from which water may be supplied for drinking or domestic purposes

without full purification treatment after withdrawal from the reservoir.

117055. The department may allow public fishing on any terminal reservoir if it finds that adequate means are being used to protect drinking water quality and that public fishing will have no significant effect on water quality. The department shall examine all feasible means of protecting water quality on terminal reservoirs and other reservoirs where public fishing may be allowed. The department may close any terminal water supply reservoir to public angling on an emergency basis, if water quality is threatened by public use.

117060. The public agency owning or operating the reservoir may establish and collect fees, including charges for motor vehicle parking, for the construction and operation of structures, facilities and equipment and the operation and use of the reservoir and its surrounding lands for public fishing. The public agency may contract with any agency or department of the federal government or the state, with other public agencies or with private individuals for the construction, operation and use of structures, facilities and equipment and the performance of services necessary or convenient to public fishing in the reservoir and on its surrounding land, including the rental, lease or permission to use portions of the reservoir and its surrounding lands for structures, facilities and equipment necessary or convenient for the use of the public. The public agency may establish and enforce all rules and regulations necessary or convenient to the conducting of public fishing on the reservoir and its surrounding land and for the control, operation and protection of the reservoir, its surrounding land and all structures, facilities and equipment in connection with the reservoir.

117065. The public agency shall cause a copy of the rules and regulations to be posted upon the area opened to public fishing and other recreational uses, and it shall cause the rules and regulations to be published at least once in a newspaper of general circulation published in the county in which the reservoir is in whole or in part situated, if there be a newspaper, otherwise in a newspaper of general circulation published within the area of the public agency. Such posting and publication shall be sufficient notice to all persons. The affidavit of the secretary, clerk, or corresponding officer of the public agency that the rules and regulations have been so posted and published is prima facie evidence thereof. A copy of the rules and regulations, attested by the secretary, clerk, or corresponding officer of the public agency shall be prima facie evidence that the regulations have been made by the public agency as provided by law.

117070. Any violation of any such rule or regulation lawfully made by the public agency is a misdemeanor. Any judge of a justice court within any judicial district within which the reservoir lies in whole or in part, or any municipal court within the district, shall have

jurisdiction of all prosecutions for violations of any rules and regulations adopted by the public agency.

117075. Sections 117040 to 117070, inclusive, shall not apply to reservoirs used for domestic or drinking water purposes that are open to fishing or recreational uses on September 11, 1957, or that have been open to fishing or recreational uses prior to that date.

Article 2. Additional Water Supply Provisions

117080. ''Governmental agency,'' as used in this article, includes a city, city and county, and district, but does not include a chartered city or city and county.

''Body of water'' means a reservoir or lake.

''Owned'' means owned or controlled.

117085. The board of supervisors of any county wherein is located a body of water owned by a governmental agency, that is used to supply water for human consumption may by resolution request the governmental agency owning the body of water to open the body of water to public fishing and the surrounding land area for other recreational use. The governmental agency owning the body of water shall thereupon make and file with said board of supervisors an estimate of the cost of preparing a coordinated plan for public fishing in said body of water and other recreational uses in the surrounding land area. The board of supervisors thereupon may deposit with the governmental agency owning the body of water the amount of the estimate not exceeding two thousand five hundred dollars ($2,500), and the governmental agency owning said body of water thereupon shall proceed promptly with and complete the coordinated plan. In event the cost of preparing the plan shall be less than the amount deposited by the board of supervisors, the excess shall be repaid by the governmental agency owning the body of water to the board of supervisors that made the deposit. The plan may provide for development of the area by stages and may exclude from public access structures, facilities or works of the agency necessary in supplying water for human consumption and the portions of the body of water and surrounding land area as may be reasonably required for the protection, maintenance or operation of the structures, facilities, or works. The plan may exclude portions of the surrounding area as are unsuitable for public recreational use. The coordinated plan may also include an estimate of the cost of the capital improvements necessary or convenient for public fishing and recreational uses, an estimate of the annual cost of maintenance and operation of the plan, and a recommendation as to the manner in which the plan may be financed.

After completion of the coordinated plan the governmental agency shall promptly make application to the department for an amendment to its water supply permit, that would allow the opening

of the body of water to public fishing and the surrounding land area for other recreational use pursuant to the coordinated plan.

117090. Upon receipt of the amended permit, if the agency does not allow such use, it shall call for a vote of its constituents at the next statewide primary election or general election, or if the agency is a municipal corporation at the next general municipal election, to determine whether or not the use shall be allowed and if a majority vote is in favor the public agency shall allow public fishing in the body of water and other recreational uses in the surrounding area in compliance with the amended permit.

117095. Nothing herein contained shall permit or require fishing or other recreational uses in a secondary reservoir from which water is supplied for domestic use without purification treatment after withdrawal from said reservoir.

117100. The ballot for the election authorized by Section 117090 shall contain the instructions required by law to be printed thereon and in addition thereto the following:

Shall the (insert name of governmental agency) allow fishing in the (name of body of water) and other recreational uses in the surrounding area subject to the regulations of the State Deparment of Health Services?	YES	
	NO	

If the governmental agency concludes that a bond issue is required to pay for the capital improvements included in the coordinated plan as approved by the amended permit, there shall also be printed on the ballot, immediately following the ballot proposition aforesaid, the following proposition to be voted on by the constituents of the governmental agency:

Shall the (insert name of governmental agency) incur a bonded indebtedness in the principal amount of $____ for providing the capital improvements for fishing in the (name of body of water) and other recreational uses in the surrounding land area, subject to the regulations of the State Department of Health Services?	YES	
	NO	

117105. The governmental agency owning the body of water may fix and collect fees, including charges for motor vehicle parking, for the construction of facilities, operation, and use of the area opened for public fishing and other recreational uses. The governmental agency shall have the power to contract with others for the rendering of any or all of the services required in connection with the operation of the area including the right to rent or lease the whole or any part of the area to provide necessary or convenient facilities for the use of the public. The governmental agency shall have the power to make and enforce regulations that it may find necessary or convenient for proper control of the areas opened to public fishing and other recreational uses. The department shall make recurring inspections of all recreational areas approved under this article to ensure the continued purity of drinking water.

117110. The governmental agency shall cause a copy of the rules and regulations to be posted upon the area opened to public fishing and other recreational uses, and it shall cause the rules and regulations to be published at least once in a newspaper of general circulation published in the county in which the reservoir is in whole or in part situated, if there be such a newspaper, otherwise in a newspaper of general circulation published within the area of the governmental agency. The posting and publication shall be sufficient notice to all persons. The affidavit of the secretary, clerk, or corresponding officer of the governmental agency that the rules and regulations have been so posted and published is prima facie evidence thereof. A copy of the rules and regulations, attested by the secretary, clerk, or corresponding officer of the governmental agency shall be prima facie evidence that the rules and regulations have been made by the governmental agency as provided by law.

117115. As far as possible the development and operation of the recreational uses authorized by this article shall be financed out of the revenues authorized by this article; provided, however, that the governmental agency owning the body of water is not required to fix fees that are unreasonably high and in its discretion may make use of any means of financing that it is otherwise authorized to use for any purpose.

117120. Any violation of any rule or regulation lawfully made by the governmental agency is a misdemeanor. Any judge of a justice court within any judicial district within which the reservoir lies in whole or in part, or any municipal court that may be established within the district, shall have jurisdiction of all prosecutions for violations of any such rules and regulations adopted by the governmental agency.

117125. Notwithstanding any other provision of law, the Department of Fish and Game may stock with fish any body of water opened to public fishing pursuant to this article.

Article 3. Punishment or Violations

117130. Violation of any provision of this chapter is a misdemeanor.

PART 13. GARBAGE AND ONSITE SEWAGE DISPOSAL

CHAPTER 1. DEFINITIONS (Reserved)

CHAPTER 2. POWERS AND DUTIES (Reserved)

CHAPTER 3. ENFORCEMENT AND PENALTIES (Reserved)

CHAPTER 4. WASTE AND WASTE DISPOSAL

Article 1. Septic Tanks

117400. This article shall not apply to any city, town, county, sanitary district, sanitation district, sewer maintenance district or to any agency or institution of the state or the federal government by reason of the cleaning of septic tanks, chemical toilets, cesspools, sewage seepage pits or sewage works that are owned and operated by any of these governmental agencies or institutions.

117405. It is unlawful for any person or firm to carry on or engage in the business of the cleaning of septic tanks, chemical toilets, cesspools or sewage seepage pits or to dispose of the cleanings therefrom in any city, town, county, or city and county unless he or she or it shall hold an unrevoked registration issued by the local health officer or his or her duly authorized representative of the city, town, county, or city and county for the carrying on of the business.

117410. Except as provided in Section 25163, it is unlawful for any person to clean septic tanks, chemical toilets, cesspools or sewage seepage pits or to dispose or aid in the disposal of the cleanings thereof, for any person or firm engaged in the business of cleaning out septic tanks, chemical toilets, cesspools or sewage seepage pits or disposing of the cleanings thereof who does not hold an unrevoked registration as provided in this article.

117415. All applications for registration under this article shall be filed with the local health officer in the city, town, county, or city and county in which it is desired to carry on the business. The application shall state the name in full, if a partnership then names of each of the partners, the relation of the applicant to the firm or partnership, the place of business and place of residence of the applicant for registration and of each of the partners in the business, if a partnership, and shall state the exact location of the place at which it is proposed to dispose of cleanings. The application shall be signed

by the authorized officer of a corporation, if a corporation; or by the managing partner, if a partnership.

117420. Registration shall be issued only after a satisfactory examination by the health officer or his or her duly authorized representative covering the equipment to be used, the applicant's knowledge of sanitary principles and of the laws and ordinances affecting human health or nuisances, and the reliability of the applicant in observing sanitary laws, ordinances and directions, and in selecting laborers and employees who may clean out septic tanks, chemical toilets, cesspools and sewage seepage pits without endangering human health or comfort; and only after examination of the place or places and manner of disposal of the cleanings proposed by the applicant.

117425. The health officer is required to act upon each application within thirty (30) days of the date of filing same.

117430. Registration shall be only for the unexpired portion of the calendar year in which application is made, and at the end of the calendar year all registrations shall become void and of no effect.

117435. (a) Applicants may be registered under any terms, conditions, orders, and directions as the health officer or his or her duly authorized representative may deem necessary for the protection of human health and comfort. Each health officer and his or her duly authorized representative may require any and all persons who are registered with the health officer to clean septic tanks, cesspools, or sewage seepage pits or to dispose of the cleanings therefrom, to file with the health officer at any time and at any frequency or intervals as the health officer or duly authorized representative may desire, a statement specifying all of the following:

(1) The name and address of the owner or tenant of each and every one of the premises where a septic tank, cesspool, or sewage seepage pit has been cleaned out by the registrant or his or her employees or by others on his or her behalf and the date of each cleaning.

(2) The location where the cleanings are disposed of and by whom.

(3) Discharges of waste that may result in violation of laws or ordinances required to be known by the registrant pursuant to Section 117420.

(b) The health officer may require the statement to be sworn to before a notary.

(c) Any and all persons registered with the health officer to clean septic tanks, cesspools, or sewage seepage pits, or to dispose of the cleanings therefrom, shall also provide a statement as required pursuant to paragraph (3) of subdivision (a) to a regional board as defined pursuant to Section 13050 of the Water Code.

117440. A change of address of any registrant including a member of a partnership that is registered and of the place of business thereof

shall be reported in writing by registered mail by the registrant within two days after the change of address.

117445. Any registration issued under this article may be revoked by the issuing health officer for cause on 10 days' notice to the applicant. The notice shall be served by registered mail or in person at the latest place of residence or of business reported by the applicant.

117450. Violation of any of the provisions of this article or of any order or orders of a health officer made pursuant to this article for the protection of human health and comfort shall constitute a misdemeanor and shall be punishable by a fine of not less than two hundred dollars ($200) for each offense or by imprisonment for not less than thirty (30) days or by both the fine and imprisonment.

Article 2. Pollution of Navigable Waters with Garbage

117475. For the purpose of this article the term ''garbage'' includes any or all of the following:

(a) Garbage.
(b) Swill.
(c) Refuse.
(d) Cans.
(e) Bottles.
(f) Paper.
(g) Vegetable matter.
(h) Carcass of any dead animal.
(i) Offal from any slaughter pen or butcher shop.
(j) Trash.
(k) Rubbish.
(*l*) Radioactive waste materials.
(m) Discarded, nonbiodegradable materials including plastics or damaged or broken marine equipment.

117480. Every person who places, deposits, or dumps any garbage in or upon the navigable waters of this state, or who places, deposits, or loads it upon any vessel, with intent that it shall be dumped or deposited in or upon the navigable waters of this state, or at any point in the ocean within twenty miles of any point on the coast line of the state, is guilty of a misdemeanor.

117485. Every person in charge of any vessel who permits it to be loaded with any garbage with intent that it shall be dumped or deposited from the vessel in or upon any of the navigable waters of this state, or at any point in the ocean, within twenty miles of any point on the coast line of the state, is guilty of a misdemeanor.

117490. A vessel upon which any garbage has been loaded with the intent that it shall be dumped or deposited upon any of the waters of the ocean where permitted by this article, shall not leave any point within the state unless it shall carry for the entire trip an inspector

appointed by the department, or where the point of departure is in a city, then by the city. The inspector shall enforce this article.

Every person in charge of a vessel that is required to have an inspector on board by this article, and that does not carry an inspector during the entire trip, is guilty of a misdemeanor.

117495. Every person in charge of a vessel that is to dump or deposit radioactive waste materials upon any of the waters of the ocean where permitted by this article shall notify the department in writing at least five days in advance of the dumping or depositing, specifying the intended date of departure and giving other information as may be required by the department. The department may permit the vessel to leave without the inspector required by Section 117490 if it determines that the public health and welfare will not be endangered thereby. If this permission is granted, the department may require the person in charge of the vessel to submit a certified statement to it, at a time as the department determines, setting forth the time, location, and manner of the dumping or disposal and other information as the department may require.

117500. This article shall not be construed to affect the discharge of any sewer system.

Article 3. Vessel Sanitation

117505. No person shall maintain or operate in or upon the navigable waters of any lake, reservoir, or fresh water impoundment of this state any vessel that is equipped with a toilet unless the toilet is sealed or otherwise rendered inoperable or designed so that no human excreta can be discharged into the waters.

Article 4. Pollution by Vessels

117510. As used in this article:

(a) ''Vessel'' means every description of craft or other contrivance used, or capable of being used, as a means of transportation in or on water.

(b) ''Navigable waters'' means all public waters of the state in any river, stream, lake, reservoir, or other body of water, including all salt water bays, inlets, and estuaries within the jurisdiction of the state.

117515. No person shall place, deposit, or dump any human excreta in or upon the navigable waters of this state, that are within any marina, yacht harbor, fresh water lake, or fresh water impoundment, from any vessel tied to any dock, slip, or wharf that has toilet facilities available for the use of persons on the vessel.

117520. It is not the intent of the Legislature in enacting this article to preempt the field of pollution by vessels, and the provisions of this article do not prohibit the enactment or enforcement of any ordinance by any city, county, or district having the power to

regulate pollution by vessels, that is stricter than the provisions of this article.

117525. Any violation of this article is a misdemeanor.

Article 5. Violations

117530. Violation of any provision of Article 2 (commencing with Section 117475), Article 3 (commencing with Section 117505), Article 4 (commencing with Section 117510), and Article 6 (commencing with Section 117550) is a misdemeanor.

Article 6. Prohibited Waste Disposal in Public Places

117550. As used in this article, ''garbage'' includes any or all of the following:

(a) Garbage.
(b) Swill.
(c) Refuse.
(d) Cans.
(e) Bottles.
(f) Paper.
(g) Vegetable matter.
(h) Carcass of any dead animal.
(i) Offal from any slaughterpen or butcher shop.
(j) Trash.
(k) Rubbish.
(*l*) Abandoned and unidentifiable vehicles or vehicle bodies.
(m) Abandoned iceboxes and refrigerators.

117555. Every person who places, deposits, or dumps, or who causes to be placed, deposited or dumped, or who causes or allows to overflow, any sewage, sludge, cesspool or septic tank effluent, or accumulation of human excreta, or any garbage, in or upon any street, alley, public highway, or road in common use or upon any public park or other public property other than property designated or set aside for that purpose by the governing board or body having charge thereof, or upon any private property into or upon which the public is admitted by easement, license or otherwise, is guilty of a misdemeanor.

This section does not apply to the placing, depositing, or dumping of any garbage upon private property by the owner, or any person authorized by the owner, of the private property, except that the placing, depositing or dumping of the garbage shall not create a public health and safety hazard or a fire hazard, as determined by a local health department, local fire department or fire district, or the Division of Forestry.

117560. Every state fish and game warden, police officers of cities, sheriffs and their deputies and other peace officers of the State of

California, within their respective jurisdictions, shall enforce the provisions of this article.

Article 7. Solid Waste Handling and Disposal

117575. Unless the context otherwise requires, the definitions in Article 2 (commencing with Section 66710) of Chapter 1 of Title 7.3 of the Government Code govern the construction of this article.

117580. The department insofar as presently or hereafter provided by law, shall continue to be responsible for all aspects of solid waste management and resource recovery as they directly affect human health, including, but not limited to, the contamination of air, water, and land, propagation of vertebrates and invertebrates that may transmit disease to man, handling and disposal of hazardous wastes, and management practices that threaten the health of solid waste employees or the general public.

117585. The department shall continue to administer and enforce the laws, other than matters covered by Title 7.3 (commencing with Section 66700) of the Government Code, that are within its jurisdiction as they apply directly to solid wastes. The department also, as it relates directly to human health, shall:

(a) Evaluate and study, as appropriate, the characteristics of solid wastes and methods for their handling and disposal for health protection.

(b) Render technical assistance to the board, local agencies, and others in the planning and operation of solid waste management programs and resources recovery programs.

(c) Formulate technical criteria and suggested guidelines for use by state and local agencies in development, planning, implementation, and operation of programs for the local handling of solid waste.

(d) Stimulate and participate in research and development projects conducted by other public or private agencies, especially those intended to reduce, effectively reuse, or decontaminate waste products.

117590. The department, not later than January 1, 1975, shall prepare and shall submit minimum standards for solid waste handling and disposal for the protection of the public health to the board for inclusion in the state policy for solid waste management required to be adopted pursuant to Section 66770 of the Government Code. The department may adopt varying standards for different areas of the state depending on population density, climate, geology, and other factors relevant to solid waste handling and disposal, and may revise the standards when appropriate.

PART 14. MEDICAL WASTE

CHAPTER 1. GENERAL PROVISIONS

117600. This part shall be known and may be cited as the Medical Waste Management Act.

117605. This part does not preempt any local ordinance regulating infectious waste, as that term was defined by Section 25117.5 as it read on December 31, 1990, if the ordinance was in effect on January 1, 1990, and regulated both large and small quantity generators. Any ordinance may be amended in a manner that is consistent with this part.

117610. The department shall adopt regulations that will establish and ensure statewide standards for uniformity in the implementation and administration of this part and that will promote waste minimization and source reduction.

117615. Notwithstanding Section 117605, with the approval of the director, and in the interest of public health, a local ordinance providing more stringent requirements than specified in this part may be implemented for a specified time period.

117620. The department and any local enforcement agency initially electing to implement a medical waste management program pursuant to this part shall initiate that program and begin enforcement of its provisions on or before April 1, 1991, except for medical waste programs operating under Section 117605.

CHAPTER 2. DEFINITIONS

117625. Unless the context requires otherwise, the definitions in this article govern the construction of this part.

117630. ''Biohazard bag'' means a disposable red bag that is impervious to moisture and has a strength sufficient to preclude ripping, tearing, or bursting under normal conditions of usage and handling of the waste-filled bag. A biohazard bag shall be constructed of material of sufficient single thickness strength to pass the 165-gram dropped dart impact resistance test as prescribed by Standard D 1709-85 of the American Society for Testing and Materials and certified by the bag manufacturer.

117635. ''Biohazardous waste'' means any of the following:

(a) Laboratory waste, including, but not limited to, all of the following:

(1) Human or animal specimen cultures from medical and pathological laboratories.

(2) Cultures and stocks of infectious agents from research and industrial laboratories.

(3) Wastes from the production of bacteria, viruses, or the use of spores, discarded live and attenuated vaccines used in human health

care or research, discarded animal vaccines, including only Brucellosis, Contagious Ecthyma, and other animal vaccines, as identified by the department, and culture dishes and devices used to transfer, inoculate, and mix cultures.

(b) Waste containing any microbiologic specimens.

(c) Human surgery specimens or tissues removed at surgery or autopsy, that are suspected by the attending physician and surgeon or dentist of being contaminated with infectious agents known to be contagious to humans.

(d) Animal parts, tissues, fluids, or carcasses suspected by the attending veterinarian of being contaminated with infectious agents known to be contagious to humans.

(e) Waste, that at the point of transport from the generator's site, at the point of disposal, or thereafter, contains recognizable fluid blood, fluid blood products, containers, or equipment containing blood that is fluid or blood from animals known to be infected with diseases that are highly communicable to humans.

(f) Waste containing discarded materials contaminated with excretion, exudate, or secretions from humans who are required to be isolated by the infection control staff, the attending physician and surgeon, the attending veterinarian, or the local health officer, to protect others from highly communicable diseases or isolated animals known to be infected with diseases that are highly communicable to humans.

(g) Waste that is hazardous only because it is comprised of human surgery specimens or tissues that have been fixed in formaldehyde or other fixatives, or only because the waste is contaminated through contact with, or having previously contained, trace amounts of chemotherapeutic agents, including, but not limited to, gloves, disposable gowns, towels, and intravenous solution bags and attached tubing that are empty. A biohazardous waste that meets the conditions of this subdivision is not subject to Chapter 6.5 (commencing with Section 25100). These wastes shall be managed as medical waste in accordance with the applicable provisions of this part and shall be disposed of in accordance with subdivision (a) of Section 118215.

(1) For purposes of this subdivision, ''chemotherapeutic agent'' means an agent that kills or prevents the reproduction of malignant cells.

(2) For purposes of this subdivision, a container, or inner liner removed from a container, that previously contained a chemotherapeutic agent, is empty if the container or inner liner removed from the container has been emptied by the generator as much as possible, using methods commonly employed to remove waste or material from containers or liners, so that the following conditions are met:

(A) If the material that the container or inner liner held is pourable, no material can be poured or drained from the container or inner liner when held in any orientation, including, but not limited to, when tilted or inverted.

(B) If the material that the container or inner liner held is not pourable, no material or waste remains in the container or inner liner that can feasibly be removed by scraping.

117640. ''Common storage facility'' means any designated accumulation area that is onsite and is used by small quantity generators otherwise operating independently for the storage of medical waste for collection by a registered hazardous waste hauler.

117645. ''Container'' means the rigid container in which the medical waste is placed prior to transporting for purposes of storage or treatment.

117650. ''Enforcement agency'' means the department or the local agency administering this part.

117655. ''Enforcement officer'' means the director, or agents or registered environmental health specialists appointed by the director, and all local health officers, directors of environmental health, and their duly authorized registered environmental health specialists and environmental health specialist trainees, or the designees of the director, local health officers, or the directors of environmental health.

117660. ''Hazardous waste hauler'' means a person registered as a hazardous waste hauler pursuant to Article 6 (commencing with Section 25160) and Article 6.5 (commencing with Section 25167.1) of Chapter 6.5 of Division 20 and Chapter 30 (commencing with Section 66001) of Division 4 of Title 22 of the California Code of Regulations.

117665. ''Highly communicable diseases'' means diseases, such as those caused by organisms classified by the federal Centers for Disease Control as Biosafety Level IV organisms, that, in the opinion of the infection control staff, the department, local health officer, attending physician and surgeon, or attending veterinarian, merit special precautions to protect staff, patients, and other persons from infection.

''Highly communicable diseases'' does not include diseases such as the common cold, influenza, or other diseases not representing a significant danger to nonimmunocompromised persons.

117670. ''Household waste'' means any material, including garbage, trash, and sanitary wastes in septic tanks and medical waste, that is derived from households, farms, or ranches.

117675. ''Infectious agent'' means a type of microorganism, bacteria, mold, parasite, or virus that normally causes, or significantly contributes to the cause of, increased morbidity or mortality of human beings.

117680. ‘‘Large quantity generator’’ means a medical waste generator that generates 200 or more pounds per month of medical waste.

117685. ‘‘Local agency’’ means the local health department, as defined in Section 101185, or the local comprehensive environmental agency established in accordance with Section 101275, of a county that has elected to adopt a local ordinance to administer and enforce this part, pursuant to Chapter 3 (commencing with Section 117800).

117690. (a) ‘‘Medical waste’’ means waste that meets both of the following requirements:

(1) The waste is composed of waste that is generated or produced as a result of any of the following:

(A) Diagnosis, treatment, or immunization of human beings or animals.

(B) Research pertaining to the activities specified in subparagraph (A).

(C) The production or testing of biologicals.

(2) The waste is any of the following:

(A) Biohazardous waste.

(B) Sharps waste.

(b) Medical waste may contain infectious agents.

(c) For purposes of this section, ‘‘biologicals’’ means medicinal preparation made from living organisms and their products, including, but not limited to, serums, vaccines, antigens, and antitoxins.

117695. Medical waste that has been treated in accordance with Chapter 8 (commencing with Section 118215) and that is not otherwise hazardous, shall thereafter be considered solid waste as defined in Section 40191 of the Public Resources Code and not medical waste.

117700. Medical waste does not include any of the following:

(a) Waste containing microbiological cultures used in food processing and biotechnology and any containers or devices used in the preparation and handling of these cultures, that is not considered to be an infectious agent pursuant to Section 117675.

(b) Urine, feces, saliva, sputum, nasal secretions, sweat, tears, and vomitus, unless they contain fluid blood, except as defined in subdivision (f) of Section 117635.

(c) Waste that is not biohazardous, such as paper towels, paper products, articles containing nonfluid blood, and other medical solid waste products commonly found in the facilities of medical waste generators.

(d) Hazardous waste, radioactive waste, or household waste.

(e) Waste generated from normal and legal veterinarian, agricultural, and animal livestock management practices on a farm or ranch.

117705. ‘‘Medical waste generator’’ means any person, whose act or process produces medical waste and includes, but is not limited to, a provider of health care as defined in subdivision (a) of Section 56.05 of the Civil Code. All of the following are examples of businesses that generate medical waste:

(a) Medical and dental offices, clinics, hospitals, surgery centers, laboratories, research laboratories, unlicensed health facilities, those facilities required to be licensed pursuant to Division 2 (commencing with Section 1200), chronic dialysis clinics, as regulated pursuant to Division 2 (commencing with Section 1200), and education and research facilities.

(b) Veterinary offices, veterinary clinics, and veterinary hospitals.

(c) Pet shops.

117710. ‘‘Medical waste management plan’’ means a document that is completed by generators of medical waste pursuant to Sections 117935 and 117960, on forms prepared by the enforcement agency.

117715. ‘‘Medical waste permit’’ means a permit issued by the enforcement agency to a medical waste treatment facility.

117720. ‘‘Medical waste registration’’ means a registration issued by the enforcement agency to a medical waste generator.

117725. (a) ‘‘Medical waste treatment facility’’ means all adjacent land and structures, and other appurtenances or improvements on the land, used for treating medical waste or for associated handling and storage of medical waste. Medical waste treatment facilities are those facilities treating waste pursuant to subdivision (a) or (c) of Section 118215. A medical waste treatment method approved pursuant to subdivision (d) of Section 118215 may be designated as a medical waste treatment facility by the department.

(b) ‘‘Adjacent,’’ for purposes of subdivision (a), means real property within 400 yards from the property boundary of the existing medical waste treatment facility.

117730. ‘‘Mixed waste’’ means mixtures of medical and nonmedical waste. Mixed waste is medical waste, except for all of the following:

(a) Medical waste and hazardous waste is hazardous waste and is subject to regulation as specified in the statutes and regulations applicable to hazardous waste.

(b) Medical waste and radioactive waste is radioactive waste and is subject to regulation as specified in the statutes and regulations applicable to radioactive waste.

(c) Medical waste, hazardous waste, and radioactive waste is radioactive mixed waste and is subject to regulation as specified in the statutes and regulations applicable to hazardous waste and radioactive waste.

117735. ‘‘Offsite’’ means any location that is not onsite.

117740. (a) ‘‘Onsite’’ means a medical waste treatment facility, or common storage facility on the same or adjacent property as the generator of the medical waste being treated.

(b) ‘‘Adjacent,’’ for purposes of subdivision (a), means real property within 400 yards from the property boundary of the existing medical waste treatment facility.

117745. ‘‘Person’’ means an individual, trust, firm, joint stock company, business concern, partnership, association, limited liability company, and corporation, including, but not limited to, a government corporation. ‘‘Person’’ also includes any city, county, district, commission, the state or any department, agency, or political subdivision thereof, the Regents of the University of California, any interstate body, and the federal government or any department or agency thereof to the extent permitted by law.

117750. ‘‘Sharps container’’ means a rigid puncture-resistant container that, when sealed, is leak resistant and cannot be reopened without great difficulty.

117755. ‘‘Sharps waste’’ means any device having acute rigid corners, edges, or protuberances capable of cutting or piercing, including, but not limited to, all of the following:

(a) Hypodermic needles, hypodermic needles with syringes, blades, needles with attached tubing, syringes contaminated with biohazardous waste, acupuncture needles, and root canal files.

(b) Broken glass items, such as Pasteur pipettes and blood vials contaminated with biohazardous waste.

117760. ‘‘Small quantity generator’’ means a medical waste generator that generates less than 200 pounds per month of medical waste.

117765. ‘‘Storage’’ means the holding of medical wastes at a designated accumulation area, as specified in Chapter 9 (commencing with Section 118275).

117770. ‘‘Tracking document’’ means the medical waste tracking document specified in Section 118040.

117775. ‘‘Transfer station’’ means any offsite location where medical waste is loaded, unloaded, or stored by a registered hazardous waste hauler during the normal course of transportation of the medical waste. ‘‘Transfer station’’ does not include common storage facilities, large quantity generators used for the purpose of consolidation, or onsite treatment facilities.

117780. ‘‘Treatment’’ means any method, technique, or process designed to change the biological character or composition of any medical waste so as to eliminate its potential for causing disease, as specified in Chapter 8 (commencing with Section 118215).

CHAPTER 3. POWERS AND DUTIES

117800. A local agency may implement a medical waste management program by the adoption of an ordinance or resolution by the local governing body, in accordance with this part.

117805. Except as provided in subdivision (a) of Section 117810, a local agency that elects to implement a medical waste management program shall notify the department within 90 days from the effective date of the act enacting this part.

117810. (a) If a local agency does not elect to implement a medical waste management program, the local agency may elect to contract with another local agency to implement a medical waste management program or to implement it at a later date.

This election shall be made by the local governing body, that shall take effect 90 days after a notice of election is filed with the department.

(b) A local agency that elects to implement a medical waste management program shall continue to implement that program until the local governing body terminates the election by resolution or ordinance or the department revokes the authority of the local agency to administer a medical waste management program. The local agency shall file the notice of termination with the department at least 180 days prior to the termination date.

117815. Any local agency that has elected to implement a medical waste management program shall maintain a program that is consistent with Section 117820 and the regulations adopted pursuant to that section. With the approval of the department, the local agency may administer or enforce this part with respect to any person.

117820. A medical waste management program shall include, but not be limited to, all of the following:

(a) Issuing medical waste registrations pursuant to Chapter 5 (commencing with Section 117950) and permits pursuant to Chapter 7 (commencing with Section 118130).

(b) Processing and reviewing the medical waste management plans and inspecting onsite treatment facilities in accordance with Chapter 4 (commencing with Section 117925) for all small quantity medical waste generators required to be registered.

(c) Conducting an evaluation, inspection, or records review for all facilities or persons issued a large quantity medical waste registration pursuant to Chapter 5 (commencing with Section 117950) or issued a permit for an onsite medical waste treatment facility pursuant to Section 118130.

(d) Inspecting medical waste generators in response to complaints or emergency incidents, or as part of an investigation or evaluation of the implementation of the medical waste management plan.

(e) Inspecting medical waste treatment facilities in response to a complaint or as part of an investigation or emergency incident.

(f) Taking enforcement action for the suspension or revocation of medical waste permits issued by the local agency pursuant to this part.

(g) Referring or initiating proceedings for civil or criminal prosecution of violations specified in Chapter 10 (commencing with Section 118335).

(h) Reporting in a manner determined by the department so that the statewide effectiveness of the program can be determined.

117825. Each local enforcement agency that elects to implement the medical waste management program may prescribe, by resolution or ordinance, the registration and permit fees necessary to pay its reasonable expenses to administer the program.

117830. (a) A local agency electing to implement a medical waste management program is the enforcement agency for the jurisdiction where it is located and so designated by the department.

(b) In any local jurisdiction where the local agency does not elect to implement a medical waste management program, the department is the enforcement agency.

(c) Nothing in this chapter shall prevent a district attorney, city attorney, or city prosecutor from bringing any enforcement action for violation of this chapter.

117835. The department shall establish and maintain a data base of persons registered under Chapter 4 (commencing with Section 117925) and persons registered under Chapter 5 (commencing with Section 117950) for whom the department is the enforcement agency.

117840. It is the intent of the Legislature that the program carried out pursuant to this part be fully supported from the fees received pursuant to this part.

117845. The department shall implement this part so as to maximize the funds that may be received from the federal government.

117850. Information may be shared between the department and the Environmental Protection Agency.

117855. If the department finds that a local enforcement agency is not consistently fulfilling its responsibilities, the department shall notify the agency of the particular reasons for finding that the agency is not fulfilling its responsibilities and of the department’s intention to withdraw its designation if, within a time to be specified in that notification, but in no event less than 30 days, the agency does not take the corrective action specified by the department.

117860. If the department withdraws its designation of a local enforcement agency, the department shall become the enforcement agency within the jurisdiction of the local enforcement agency.

117870. If the department identifies significant violations of minimum requirements that were not identified and resolved through previous inspections by the local enforcement agency, the department shall do all of the following:

(a) Conduct a performance review of the agency within 120 days.

(b) Prepare a written performance report within 60 days of the review.

(c) Require the submission of a plan of correction by the agency within 90 days of receiving the report.

117875. The department shall withdraw a local enforcement agency's designation pursuant to Section 117860 if it determines that the enforcement agency has failed to submit an adequate plan of correction or has failed to implement the plan.

117880. If the department becomes the enforcement agency, it may charge the fees specified in this part.

117885. (a) There is in the State Treasury the Medical Waste Management Fund, that shall be administered by the director. Money deposited in the fund shall be available to the department, upon appropriation by the Legislature, for the purposes of this part.

(b) In addition to any other funds transferred by the Legislature to the Medical Waste Management Fund, the following shall be deposited in the fund:

(1) Fees, penalties, interest earned, and fines collected by, or on behalf of, the department pursuant to this part.

(2) Funds granted by the federal government for purposes of carrying out this part.

(c) This section shall become operative on July 1, 1993.

117890. No large quantity generator shall generate medical waste unless the large quantity generator is registered with the enforcement agency pursuant to this part.

117895. A small quantity generator that treats medical waste onsite by steam sterilization, incineration, or microwave technology shall register with the enforcement agency pursuant to this part.

117900. No person shall haul medical waste unless the person meets either of the following requirements:

(a) The person is registered pursuant to Article 6 (commencing with Section 25160) and Article 6.5 (commencing with Section 25167.1) of Chapter 6.5 of Division 20 and Chapter 30 (commencing with Section 66001) of Division 4 of Title 22 of the California Code of Regulations.

(b) The person has an approved limited-quantity exemption granted pursuant to Section 118030.

117903. No person shall treat medical waste unless the person is permitted by the enforcement agency as required by this part or unless the treatment is performed by a medical waste generator and is a treatment method approved pursuant to subdivision (d) of Section 118215.

117905. The department is the enforcement agency for offsite treatment facilities.

117908. The accumulated medical waste of more than one medical waste generator shall not be stored in a common storage facility unless that facility is registered with the enforcement agency.

117910. The department shall provide ongoing technical assistance and guidance to local enforcement agencies to assist them in their decisionmaking processes. This assistance shall include, but is not limited to, providing all of the following:

(a) Technical studies and reports.

(b) Copies of innovative facility operation plans.

(c) Investigative findings and analysis of new waste management practices and procedures.

CHAPTER 4. SMALL QUANTITY GENERATOR REQUIREMENTS

117915. Containment and storage of medical waste shall be in accordance with Chapter 9 (commencing with Section 118275).

117918. Treatment of medical waste shall be in accordance with Chapter 8 (commencing with Section 118215).

117920. The fee schedule specified in Section 117923 shall be for the issuance of medical waste registrations and for conducting inspections pursuant to this chapter when the department serves as the enforcement agency for small quantity generators. This fee schedule shall be adjusted annually in accordance with Section 100425. On or before January 1, 1993, the department may adjust by regulation the fees specified in Section 117923 to reflect the actual costs of implementing this chapter. Local enforcement agencies shall set fees that shall be sufficient to cover their costs in implementing this part with regard to small quantity generators required to be registered pursuant to Section 117925.

117923. (a) The registration and inspection fee for small quantity generators using onsite treatment, including an autoclave, incinerator, or microwave technology, to treat medical waste is one hundred dollars ($100), that shall be paid once every two years.

(b) The annual permit fee for a common storage facility permitted pursuant to Section 117928 is the amount specified in the following schedule:

(1) For storage facilities serving 10 or fewer generators, the permit fee is one hundred dollars ($100).

(2) For storage facilities serving 11 or more generators, but not more than 50 generators, the permit fee is two hundred fifty dollars ($250).

(3) For storage facilities serving more than 50 generators, the permit fee is five hundred dollars ($500).

117925. (a) Each small quantity generator using onsite steam sterilization, incineration, or microwave technology to treat medical

waste shall register with the enforcement agency. Small quantity generators owning or operating a medical waste treatment facility shall also apply for a permit for that treatment facility pursuant to Chapter 7 (commencing with Section 118130).

(b) Small quantity generators using onsite treatment, as specified in subdivision (a), that operate as a business in the same building, or that are associated with a group practice in the same building, may register as one generator.

(c) Small quantity generators using onsite treatment, as specified in subdivision (a), as specified in subdivision (b), operating in different buildings on the same or adjacent property, or as approved by the enforcement agency, may register as one generator.

(d) ''Adjacent,'' for purposes of subdivision (c), means real property within 400 yards from the property boundary of the primary registration site.

117928. (a) Any common storage facility for the collection of medical waste produced by small quantity generators operating independently, but sharing common storage facilities, shall have a permit issued by the enforcement agency.

(b) A permit for any common storage facility specified in subdivision (a) may be obtained by any one of the following:

(1) A provider of health care as defined in subdivision (d) of Section 56.05 of the Civil Code.

(2) The registered hazardous waste transporter.

(3) The property owner.

(4) The property management firm responsible for providing tenant services to the medical waste generators.

117930. Small quantity generators subject to Section 117925 shall register with the enforcement agency on or before April 1, 1991, where the generation of medical waste began prior to that date.

In those cases where the generation of medical waste begins after April 1, 1991, registration shall be completed pursuant to this chapter prior to commencement of the generation of medical waste.

117933. Common storage facilities subject to Section 117928 shall obtain a permit from the enforcement agency on or before April 1, 1991, where the storage of medical waste in the common storage facility began prior to that date.

In those cases where the storage of medical waste begins after April 1, 1991, permits shall be obtained pursuant to this chapter prior to commencement of storage of medical waste in the common storage facility.

117935. Any small quantity generator required to register with the enforcement agency pursuant to Section 117930 shall file with the enforcement agency a medical waste management plan, on forms prescribed by the enforcement agency containing, but not limited to, all of the following:

(a) The name of the person.

(b) The business address of the person.

(c) The type of business.

(d) The types, and the estimated average monthly quantity, of medical waste generated.

(e) The type of treatment used onsite.

(f) The name and business address of the registered hazardous waste hauler used by the generator for backup treatment and disposal, for waste when the onsite treatment method is not appropriate due to the hazardous or radioactive characteristics of the waste, or the name of the registered hazardous waste hauler used by the generator to have untreated medical waste removed for treatment and disposal.

(g) A statement indicating that the generator is hauling the medical waste generated in his or her business pursuant to Section 118030 and the name and any business address of the treatment and disposal facilities to which the waste is being hauled, if applicable.

(h) The name and business address of the registered hazardous waste hauler service provided by the building management to which the building tenants may subscribe or are required by the building management to subscribe and the name and business address of the treatment and disposal facilities used, if applicable.

(i) A statement certifying that the information provided is complete and accurate.

117938. (a) Small quantity generators using onsite steam sterilization, incineration, or microwave technology to treat medical waste are subject to biennial inspection of that onsite treatment facility by the enforcement agency and may be subject to the permitting requirements for onsite medical waste treatment facilities as determined by the enforcement agency.

(b) The inspection and permitting requirements of subdivision (a) do not apply when onsite steam sterilization is not used for the treatment or disposal of medical waste.

117940. (a) Each enforcement agency shall follow procedures consistent with this chapter in registering medical waste generators.

(b) Each medical waste generator registration issued by the enforcement agency shall be valid for two years.

(c) An application for renewal of the registration shall be filed with the enforcement agency on or before the expiration date.

(d) Generators shall submit within 30 days an updated application form when any of the information specified in subdivisions (a) to (i), inclusive, of Section 117935 changes.

117943. A medical waste generator required to register pursuant to this chapter shall maintain individual treatment, and tracking records, if applicable, for three years, or for the period specified in the regulations, and shall report or submit to the enforcement agency, upon request, both of the following:

(a) Treatment operating records.

(b) An emergency action plan complying with regulations adopted by the department.

117945. Small quantity generators who are not required to register pursuant to this chapter shall maintain on file in their office all of following:

(a) An information document stating how the generator contains, stores, treats, and disposes of any medical waste generated through any act or process of the generator.

(b) Records of any medical waste transported offsite for treatment and disposal, including the quantity of waste transported, the date transported, and the name of the registered hazardous waste hauler or individual hauling the waste pursuant to Section 118030. The small quantity generator shall maintain these records for not more than two years.

CHAPTER 5. LARGE QUANTITY GENERATOR REQUIREMENTS

117950. (a) Each large quantity generator, except as specified in subdivisions (b) and (c), shall register with the enforcement agency. Large quantity generators owning or operating a medical waste treatment facility shall also apply for a permit for that treatment facility pursuant to Chapter 7 (commencing with Section 118130).

(b) Large quantity generators operating as a business in the same building, or that are associated with a group practice in the same building, may register as one generator.

(c) Large quantity generators as specified in subdivision (a), operating in different buildings on the same or adjacent property, or as approved by the enforcement agency, may register as one generator.

(d) ''Adjacent,'' for purposes of subdivision (c), means real property within 400 yards from the property boundary of the primary registration site.

117955. Large quantity generators subject to Section 117950 shall register with the enforcement agency on or before April 1, 1991, if the generation of medical waste began prior to that date. In those cases where the generation of medical waste begins after April 1, 1991, registration shall be completed pursuant to this chapter prior to commencement of the generation of medical waste.

117960. Any large quantity generator required to register with the enforcement agency pursuant to Section 117950 shall file with the enforcement agency a medical waste management plan, on forms prescribed by the enforcement agency containing, but not limited to, all of the following:

(a) The name of the person.

(b) The business address of the person.

(c) The type of business.

(d) The types, and the estimated average monthly quantity, of medical waste generated.

(e) The type of treatment used onsite, if applicable. For generators with onsite medical waste treatment facilities, including incinerators or steam sterilizers or other treatment facilities as determined by the enforcement agency, the treatment capacity of the onsite treatment facility.

(f) The name and business address of the registered hazardous waste hauler used by the generator to have untreated medical waste removed for treatment, if applicable.

(g) The name and business address of the registered hazardous waste hauler service provided by the building management to which the building tenants may subscribe or are required by the building management to subscribe, if applicable.

(h) The name and business address of the offsite medical waste treatment facility to which the medical waste is being hauled, if applicable.

(i) An emergency action plan complying with regulations adopted by the department.

(j) A statement certifying that the information provided is complete and accurate.

117965. Large quantity generators shall be subject to at least annual inspection by the enforcement agency.

117970. (a) Each enforcement agency shall follow procedures consistent with this chapter in registering medical waste generators.

(b) Each medical waste registration issued by the enforcement agency shall be valid for one year.

(c) An application for renewal of the registration shall be filed with the enforcement agency not less than 90 days prior to the expiration date. Failure to meet this requirement shall result in an assessment of a late fee.

(d) Generators shall submit within 30 days an updated application form when any of the information specified in subdivisions (a) to (j), inclusive, of Section 117960 changes.

117975. A medical waste generator required to register pursuant to this chapter shall maintain individual treatment, and tracking records, if applicable, for three years or for the period specified in the regulations.

117980. Containment and storage of medical waste shall be in accordance with Chapter 9 (commencing with Section 118275).

117985. Treatment of medical waste shall be in accordance with Chapter 8 (commencing with Section 118215).

117990. The fee schedule specified in Section 117995 shall be for the issuance of medical waste registrations and onsite medical waste treatment facility permits when the department serves as the enforcement agency for large quantity generators. This fee schedule shall be adjusted annually in accordance with Section 100425. On or

before January 1, 1993, the department may adjust by regulation the fees specified in Section 117995 to reflect the actual costs of implementing this chapter. Local enforcement agencies shall set fees that shall be sufficient to cover their costs in implementing this part with regard to large quantity generators.

117995. The registration and annual permit fee for large quantity generators shall be set in following amounts:

(a) (1) A general acute care hospital, as defined in subdivision (a) of Section 1250, that has one or more beds, but not more than 99 beds, shall pay six hundred dollars ($600), a facility with 100 or more beds, but not more than 199 beds, shall pay eight hundred sixty dollars ($860), a facility with 200 or more beds, but not more than 250 beds shall pay one thousand one hundred dollars ($1,100), and a facility with 251 or more beds shall pay one thousand four hundred dollars ($1,400).

(2) In addition to the fees specified in paragraph (1), a general acute care hospital which is providing onsite treatment of medical waste shall pay an annual medical waste treatment facility inspection and permit fee of three hundred dollars ($300), if the facility has one or more beds but not more than 99 beds, five hundred dollars ($500), if the facility has 100 or more beds but not more than 250 beds, and one thousand dollars ($1,000), if the facility has 251 or more beds.

(b) A specialty clinic, providing surgical, dialysis, or rehabilitation services, as defined in subdivision (b) of Section 1204, shall pay three hundred fifty dollars ($350).

(c) A skilled nursing facility, as defined in subdivision (c) of Section 1250, that has one or more beds, but not more than 99 beds shall pay two hundred seventy-five dollars ($275), a facility with 100 or more beds, but not more than 199 beds shall pay three hundred fifty dollars ($350), and a facility with 200 or more beds shall pay four hundred dollars ($400).

(d) An acute psychiatric hospital, as defined in subdivision (b) of Section 1250, shall pay two hundred dollars ($200).

(e) An intermediate care facility, as defined in subdivision (d) of Section 1250, shall pay three hundred dollars ($300).

(f) A primary care clinic, as defined in Section 1200.1, shall pay three hundred fifty dollars ($350).

(g) A licensed clinical laboratory, as defined in paragraph (3) of subdivision (a) of Section 1206 of the Business and Professions Code, shall pay two hundred dollars ($200).

(h) A health care service plan facility, as defined in subdivision (f) of Section 1345, shall pay three hundred fifty dollars ($350).

(i) A veterinary clinic or veterinary hospital shall pay two hundred dollars ($200).

(j) A large quantity generator medical office shall pay two hundred dollars ($200).

(k) In addition to the fees specified in subdivisions (b) to (j), inclusive, a large quantity generator of medical waste which is providing onsite treatment of medical waste shall pay an annual medical waste treatment facility inspection and permit fee of three hundred dollars ($300).

CHAPTER 6. MEDICAL WASTE HAULERS

118000. (a) Except as otherwise exempted pursuant to Section 118030, all medical waste transported to an offsite medical waste treatment facility shall be transported in accordance with this chapter by a registered hazardous waste transporter issued a registration certificate pursuant to Chapter 6 (commencing with Section 118025) and Article 6.5 (commencing with Section 25167.1) of Chapter 6.5 of Division 20. A hazardous waste transporter transporting medical waste shall have a copy of the transporter's valid hazardous waste transporter registration certificate in the transporter's possession while transporting medical waste. The transporter shall show the certificate, upon demand, to any enforcement agency personnel or authorized employee of the Department of the California Highway Patrol.

(b) Except for small quantity generators transporting medical waste pursuant to Section 118030, medical waste shall be transported to a permitted offsite medical waste treatment facility or a permitted transfer station in leak-resistant and fully enclosed rigid secondary containers that are then loaded into an enclosed cargo body.

(c) A person shall not transport medical waste in the same vehicle with other waste unless the medical waste is separately contained in rigid containers or kept separate by barriers from other waste, or unless all of the waste is to be handled as medical waste in accordance with this part.

(d) Medical waste shall only be transported to a permitted medical waste treatment facility, or to a transfer station or another registered generator for the purpose of consolidation before treatment and disposal, pursuant to this part.

(e) Facilities for the transfer of medical waste shall be annually inspected and issued permits in accordance with the regulations adopted pursuant to this part.

(f) Any persons manually loading or unloading containers of medical waste shall be provided by their employer at the beginning of each shift with, and shall be required to wear, clean and protective gloves and coveralls, changeable lab coats, or other protective clothing. The department may require, by regulation, other protective devices appropriate to the type of medical waste being handled.

118025. All medical waste shall be hauled by either a registered hazardous waste hauler or by a person with an approved limited-quantity exemption granted pursuant to Section 118030.

118030. Medical waste generators may apply to the enforcement agency for a limited-quantity hauling exemption, if the generator meets all of the following requirements:

(1) The generator generates less than 20 pounds of medical waste per week, transports less than 20 pounds of medical waste at any one time, and has an information document on file in the generator's office pursuant to Section 117945.

(2) The generator transports the waste himself or herself, or directs a member of his or her staff to transport the waste, to a permitted medical waste treatment facility, a transfer station, or to another facility for the purpose of consolidation before treatment and disposal.

(3) The generator maintains a tracking document, as specified in Section 118040.

(b) The limited-quantity hauling exemption authorized by this section is valid for a period of one year.

(c) An application for an initial or a renewal of a limited-quantity hauling exemption shall be accompanied by a fee of twenty-five dollars ($25). The application shall identify each person who will transport waste for the transporter. If the generator identifies more than four persons who will be transporting medical waste, the generator shall pay an additional fee of five dollars ($5) for each person, up to a maximum additional fee of twenty-five dollars ($25).

118035. For the purpose of transferring medical waste prior to reaching a permitted medical waste treatment facility, the medical waste shall not be unloaded, reloaded, or transferred to another vehicle at any location, except at a permitted medical waste transfer station or in the case of a vehicle breakdown or other emergency.

118040. (a) A hazardous waste transporter or generator transporting medical waste shall maintain a completed tracking document of all medical waste removed for treatment or disposal. A hazardous waste transporter or generator who transports medical waste to a facility, other than the final medical waste treatment facility, shall also maintain tracking documents that show the name, address, and telephone number of the medical waste generator, for purposes of tracking the generator of medical waste when the waste is transported to the final medical waste treatment facility. At the time the medical waste is received by a hazardous waste transporter, the transporter shall provide the medical waste generator with a copy of the tracking document for the generator's medical waste records. The transporter or generator transporting medical waste shall maintain its copy of the tracking document for three years.

(b) The tracking document shall include, but not be limited to, all of the following information:

(1) The name, address, telephone number, and registration number of the transporter, unless transported pursuant to Section 118030.

(2) The type and quantity of medical waste transported.

(3) The name, address, and telephone number of the generator.

(4) The name, address, telephone number, permit number, and the signature of an authorized representative of the permitted facility receiving the waste.

(5) The date the medical waste is collected or removed from the generator's facility, the date the waste is received by the transfer station, or the registered large quantity generator for the purpose of consolidation, if applicable, and the date the waste is received by the treatment facility.

(c) Any hazardous waste transporter or generator transporting medical waste in a vehicle shall have a tracking document in his or her possession while transporting the waste. The tracking document shall be shown upon demand to any enforcement agency personnel or an officer of the Department of the California Highway Patrol. If the waste is transported by rail, vessel, or air, the railroad corporation, vessel operator, or airline shall enter on the shipping papers any information concerning the waste that the enforcement agency may require.

(d) A hazardous waste transporter or a generator transporting medical waste shall provide the facility receiving the medical waste with the original tracking document.

(e) Each hazardous waste transporter and each medical waste treatment facility shall provide tracking data periodically and in a format as determined by the department.

(f) Medical waste transported out of state shall be consigned to a permitted medical waste treatment facility in the receiving state. If there is no permitted treatment facility in the receiving state or if the medical waste is crossing an international border, the waste shall be treated in accordance with Chapter 9 (commencing with Section 118215) prior to being transported out of the state.

118045. (a) The department shall charge an application fee for a permit for a transfer station equal to one hundred dollars ($100) for each hour which the department spends on processing the application, but not more than ten thousand dollars ($10,000), or as provided in the regulations adopted by the department.

(b) In addition to the fee specified in subdivision (a), the annual permit fee for a transfer station issued a permit pursuant to subdivision (e) of Section 118000 is two thousand dollars ($2,000), or as provided in the regulations adopted pursuant to this part.

CHAPTER 7. MEDICAL WASTE TREATMENT FACILITY PERMITS

118130. All offsite medical waste treatment facilities and transfer stations shall be permitted and inspected by the department. All onsite medical waste treatment facilities shall be permitted and inspected by the enforcement agency.

118135. On or before April 1, 1991, each person operating a medical waste treatment facility shall obtain a permit pursuant to this chapter from the department. If the medical waste treatment facility begins operation after April 1, 1991, the permit shall be obtained pursuant to this article prior to commencement of the treatment facility's operation.

118140. A health care facility accepting medical waste for treatment from the physicians and surgeons who are on the staff of the facility and who are small quantity generators shall be classified as an onsite treatment facility and shall be permitted and inspected by the enforcement agency.

118145. A health care facility accepting medical waste for treatment from small quantity generators that are adjacent to the facility shall be classified as an onsite treatment facility and shall be permitted and inspected by the enforcement agency.

118150. (a) Each enforcement agency shall follow procedures that are consistent with this chapter, and the regulations adopted pursuant to this chapter, when issuing medical waste permits.

(b) Each person operating a medical waste treatment facility pursuant to a hazardous waste facilities permit or grant of interim status pursuant to Article 9 (commencing with Section 25200) of Chapter 6.5 of Division 20, as of January 1, 1991, shall be considered to have the medical waste permit required by this article until January 1, 1992, unless the enforcement agency with jurisdiction over its activities has taken final action prior to January 1, 1992, on an application for a permit pursuant to this article.

(c) Each medical waste facility subject to subdivision (b) shall operate in accordance with the standards and procedures contained in this chapter, and on and after January 1, 1991, is not subject to the standards and procedures contained in Chapter 6.5 (commencing with Section 25100) of Division 20.

118155. Any person required to obtain a permit pursuant to this part shall file with the enforcement agency an application, on forms prescribed by the department, containing, but not limited to, all of the following:

(a) The name of the applicant.

(b) The business address of the applicant.

(c) The type of treatment provided, the treatment capacity of the facility, a characterization of the waste treated at this facility, and the estimated average monthly quantity of waste treated at the facility.

(d) A disclosure statement, as provided in Section 25112.5, except for onsite medical waste treatment facilities.

(e) Evidence satisfactory to the enforcement agency that the operator of the medical waste treatment facility has the ability to comply with this part and the regulations adopted pursuant to this part.

(f) Any other information required by the enforcement agency for the administration or enforcement of this part or the regulations adopted pursuant to this part.

118160. (a) Prior to issuing or renewing a permit for an offsite medical waste treatment facility pursuant to Section 118130, the department shall review the compliance history of the applicant, under any local, state, or federal law or regulation governing the control of medical waste or pollution, including, but not limited to, the Clean Air Act (42 U.S.C. Sec. 7401 et seq.).

(b) The department shall, pursuant to this section, deny a permit, or specify additional permit conditions, to ensure compliance with applicable regulations, if the department determines that in the three-year period preceding the date of application the applicant has violated laws or regulations identified in subdivision (a) at a facility owned or operated by the applicant, and the violations demonstrate a recurring pattern of noncompliance or pose, or have posed, a significant risk to public health and safety or to the environment.

(c) In addition to any other information required to be submitted for the permitting of a facility pursuant to Section 118130, an applicant who has owned or operated a facility regulated by the department shall provide a description of all violations described in subdivision (a), that occurred at any facility permitted and owned or operated by the applicant in the state in the three years prior to the date of application.

(d) In making the determination of whether to deny a permit or to specify additional permit conditions pursuant to subdivision (b), the department shall take both of the following into consideration:

(1) Whether a permit denial or permit condition is appropriate or necessary given the severity of the violation.

(2) Whether the violation has been corrected in a timely fashion.

118165. On and after April 1, 1991, all persons operating a medical waste treatment facility shall maintain individual records for a period of three years and shall report or submit to the enforcement agency upon request, all of the following information:

(a) The type of treatment facility and its capacity.

(b) All treatment facility operating records.

(c) Copies of the tracking documents for all medical waste it receives for treatment from offsite generators or from hazardous waste haulers.

118170. (a) A medical waste permit issued by the enforcement agency to a medical waste treatment facility shall be valid for five years.

(b) An application for renewal of the permit shall be filed with the enforcement agency not less than 90 days prior to the expiration date. If a permittee fails to make a timely application for renewal, the medical waste permit shall expire on the expiration date.

118175. (a) A medical waste permit may be renewed if the enforcement agency finds the permittee has been in substantial compliance with this part and the regulations adopted pursuant to this part during the preceding permitted period or that the permittee corrected previous violations in a timely manner.

(b) Upon approval of the enforcement agency, a permit may be transferred from one subsidiary to another subsidiary of the same corporation, from a parent corporation to one of its subsidiaries, or from a subsidiary to a parent corporation.

118180. A person required to obtain a medical waste permit shall, at all times, possess a valid permit for each facility in operation. A medical waste permit shall terminate prior to its expiration date if suspended or revoked pursuant to Section 118350 or, notwithstanding Section 118355, if either of the following occurs:

(a) The permittee sells or otherwise transfers the facility, except as specified in subdivision (b) of Section 118175.

(b) The permittee surrenders the permit to the enforcement agency because the permittee ceases operation.

118185. The enforcement agency shall issue a medical waste permit upon evaluation, inspection, or records review of the applicant if the applicant is in substantial compliance with this part and the regulations adopted pursuant to this part and the applicant has corrected any previous violations. A decision to issue or not to issue the permit shall be made by the enforcement agency within 180 days of the time that the application is deemed complete, unless waived by the applicant.

118190. When issuing, renewing, or revising any treatment facility permit, the enforcement agency may prohibit or condition the handling or treatment of medical waste to protect the public health and safety.

118195. An enforcement agency shall inform an applicant for a medical waste permit, in writing, upon the denial of any application for the permit. Within 20 days after the enforcement agency mails the notice, the applicant may present a written petition for a hearing to the enforcement agency. Upon receipt by the enforcement agency of the petition in proper form, the petition shall be set for hearing.

If the department is the enforcement agency, the proceedings shall commence with the filing of a statement of issues and shall be conducted in accordance with Chapter 5 (commencing with Section 11500) of Part 1 of Division 3 of Title 2 of the Government Code, and

the department has all the powers granted to a department in that chapter.

If the department is not the enforcement agency, the hearings shall be held in accordance with the ordinance adopting the medical waste management program.

118200. The enforcement agency shall evaluate, inspect, and review the records of medical waste treatment facilities for compliance with this part.

118205. The fee schedule specified in Section 118210 shall cover the issuance of medical waste treatment facility permits and an inspection program, when the department serves as the enforcement agency. This fee schedule shall be adjusted annually in accordance with Section 100425. On or before January 1, 1993, the department may adjust by regulation the fees specified in Section 118210 to reflect the actual costs of implementing this chapter. Local enforcement agencies shall set fees that shall be sufficient to cover their costs in implementing this part with regard to large quantity generators.

118210. (a) The department shall charge an annual permit fee for an offsite medical waste treatment facility equal to either two-tenths of a cent($0.002) for each pound of medical waste treated or ten thousand dollars ($10,000), whichever is greater.

(b) The department shall charge an initial application fee for each type of treatment technology at an offsite medical waste treatment facility equal to one hundred dollars ($100) for each hour the department spends processing the application, but not more than fifty thousand dollars ($50,000), or as provided in the regulations adopted by the department.

CHAPTER 8. TREATMENT

118215. A person generating or treating medical waste shall ensure that the medical waste is treated by one of the following methods, thereby rendering it solid waste, that is not otherwise hazardous, prior to disposal:

(a) Incineration at a permitted medical waste treatment facility in a controlled-air, multichamber incinerator, or other method of incineration approved by the department that provides complete combustion of the waste into carbonized or mineralized ash. Monitoring for release of airborne pathogens from medical waste incinerators shall be conducted as prescribed by the department.

(b) (1) Discharge to a public sewage system if the medical waste is liquid or semiliquid, and not either of the following:

(A) Liquid or semiliquid laboratory waste, as defined in subdivision (a) of Section 117635.

(B) Microbiological specimens, including those specified in subdivision (b) of Section 117635.

(2) Medical waste discharge shall be consistent with the waste discharge requirements placed on the public sewer system by the California regional water quality control board with jurisdiction.

(c) Steam sterilization at a permitted medical waste treatment facility or by other sterilization, in accordance with all of the following operating procedures for steam sterilizers or other sterilization:

(1) Standard written operating procedures shall be established for biological indicators, or for other indicators of adequate sterilization approved by the department, for each steam sterilizer, including time, temperature, pressure, type of waste, type of container, closure on container, pattern of loading, water content, and maximum load quantity.

(2) Recording or indicating thermometers shall be checked during each complete cycle to ensure the attainment of 121° Centigrade (250° Fahrenheit) for at least one-half hour, depending on the quantity and density of the load, in order to achieve sterilization of the entire load. Thermometers shall be checked for calibration annually. Records of the calibration checks shall be maintained as part of the facility's files and records for a period of three years or for the period specified in the regulations.

(3) Heat-sensitive tape, or another method acceptable to the enforcement agency, shall be used on each biohazard bag or sharps container that is processed onsite to indicate the attainment of adequate sterilization conditions.

(4) The biological indicator Bacillus stearothermophilus, or other indicator of adequate sterilization as approved by the department, shall be placed at the center of a load processed under standard operating conditions at least monthly to confirm the attainment of adequate sterilization conditions.

(5) Records of the procedures specified in paragraphs (1), (2), and (4) shall be maintained for a period of not less than three years.

(d) (1) Other alternative medical waste treatment methods that are both of the following:

(A) Approved by the department.

(B) Result in the destruction of pathogenic microorganisms.

(2) Any alternative medical waste treatment method proposed to the department shall be evaluated by the department and either approved or rejected pursuant to the criteria specified in this subdivision.

118220. Recognizable human anatomical remains, with the exception of teeth not deemed infectious by the attending physician and surgeon, or dentist shall be disposed of by incineration or interment unless otherwise hazardous.

118225. (a) Sharps waste shall be rendered noninfectious prior to disposal by one of the following methods:

(1) Incineration.

(2) Steam sterilization.

(3) Disinfection using an alternative treatment method approved by the department.

(b) Sharps waste rendered noninfectious pursuant to this section may be disposed of as solid waste if the waste is not otherwise hazardous.

(c) Onsite medical waste treatment facilities treating sharps waste pursuant to paragraph (2) or (3) of subdivision (a) shall ensure that, prior to disposal, the treated sharps waste is destroyed or that public access to the treated sharps waste is prevented.

118230. An operator of a hazardous waste incinerator permitted pursuant to Section 25200 may also accept medical waste for incineration.

118235. Each medical waste treatment facility issued a medical waste permit shall provide the enforcement agency with an emergency action plan that the facility shall follow to ensure the proper disposal of medical waste in the event of equipment breakdowns, natural disasters, or other occurrences.

118240. Notwithstanding Section 9141 of the Food and Agricultural Code, animals that die from infectious diseases shall be treated in accordance with Section 118215 if, in the opinion of the attending veterinarian or local health officer, the carcass presents a danger of infection to humans.

118245. (a) The department shall charge an application fee for evaluation of an alternative treatment technology pursuant to subdivision (d) of Section 118215 of two thousand five hundred dollars ($2,500) and shall charge an additional fee equal to one hundred dollars ($100) per hour for each hour which the department spends on processing the application, but not more than a total of five thousand dollars ($5,000), or as provided in the regulations adopted by the department.

(b) The department shall charge an application fee of one thousand dollars, ($1,000) for evaluation and approval of the use of a medical waste mail back system, which sends medical waste generated in this state to an out-of-state facility for treatment and disposal pursuant to subdivision (f) of Section 118040.

CHAPTER 9. CONTAINMENT AND STORAGE

118275. To containerize or store medical waste, a person shall do all of the following:

(a) Medical waste shall be contained separately from other waste at the point of origin in the producing facility. Sharps containers may be placed in biohazard bags or in containers with biohazard bags.

(b) Biohazardous waste shall be placed in a red biohazard bag conspicuously labeled with the words ‘‘Biohazardous Waste’’ or with the international biohazard symbol and the word ‘‘BIOHAZARD’’.

(c) Sharps waste shall be contained in a sharps container pursuant to Section 118285.

(d) Biohazardous waste which meets the conditions of subdivision (g) of Section 117635 shall be segregated to ensure treatment of the waste pursuant to subdivision (a) of Section 118215.

118280. To containerize biohazard bags, a person shall do all of the following:

(a) The bags shall be tied to prevent leakage or expulsion of contents during all future storage, handling, or transport.

(b) Biohazardous waste shall be bagged in accordance with subdivision (b) of Section 118275 and placed for storage, handling, or transport in a rigid container that may be disposable, reusable, or recyclable. Containers shall be leak resistant, have tight-fitting covers, and be kept clean and in good repair. Containers may be recycled with the approval of the enforcement agency. Containers may be of any color and shall be labeled with the words ''Biohazardous Waste,'' or with the international biohazard symbol and the word ''BIOHAZARD,'' on the lid and on the sides so as to be visible from any lateral direction. Containers meeting the requirements specified in Section 66840 of Title 22 of the California Code of Regulations, as it read on December 31, 1990, may also be used until the replacement of the containers is necessary or existing stock has been depleted.

(c) Biohazardous waste shall not be removed from the biohazard bag until treatment as prescribed in Chapter 8 (commencing with Section 118215) is completed, except to eliminate a safety hazard. Biohazardous waste shall not be disposed of before being treated as prescribed in Chapter 8.

(d) (1) Except as provided in paragraph (5), a person generating 20 or more pounds of medical waste per month shall not contain or store biohazardous or sharps waste above 0° Centigrade (32° Fahrenheit) at any onsite location for more than seven days unless the enforcement agency approves the containment or storage in writing. Except as provided in paragraph (5), a person generating less than 20 pounds of biohazardous waste per month shall not contain or store biohazardous waste above 0 degrees Centigrade (32 degrees Fahrenheit) at any onsite location for more than 30 days.

(2) A person may store biohazardous or sharps waste at or below 0° Centigrade (32° Fahrenheit) at an onsite location for not more than 90 days without obtaining the written approval of the enforcement agency.

(3) A person may store biohazardous or sharps waste at a permitted transfer station at or below 0° Centigrade (32° Fahrenheit) for not more than 30 days without obtaining the approval of the enforcement agency.

(4) A person shall not store biohazardous or sharps waste above 0° Centigrade (32° Fahrenheit) for more than seven days before treatment at any location or facility that is offsite from the generator.

(5) Notwithstanding paragraphs (1) to (4), inclusive, if the facility is unable to control the odor from its stored waste and the odor poses a public nuisance, the enforcement agency may require more frequent removal.

118285. To containerize sharps waste, a person shall do all of the following:

(a) Place all sharps waste into a sharps container.

(b) Tape closed or tightly lid full sharps containers ready for disposal to preclude loss of contents.

(c) Store sharps containers ready for disposal for not more than seven days without the written approval of the enforcement agency.

(d) Label sharps containers with the words ‘‘sharps waste’’ or with the international biohazard symbol and the word ‘‘BIOHAZARD’’.

118290. Any small quantity generator who has properly containerized the medical waste according to the requirements of this article may store the waste in a permitted common storage facility.

118295. A person shall thoroughly wash and decontaminate reusable rigid containers for medical waste by a method approved by the enforcement agency each time they are emptied, unless the surfaces of the containers have been completely protected from contamination by disposable liners, bags, or other devices removed with the waste. These containers shall be maintained in a clean and sanitary manner. Approved methods of decontamination include, but are not limited to, agitation to remove visible soil combined with one of the following procedures:

(a) Exposure to hot water of at least 82° Centigrade (180° Fahrenheit) for a minimum of 15 seconds.

(b) Exposure to chemical sanitizer by rinsing with, or immersion in, one of the following for a minimum of three minutes:

(1) Hypochlorite solution (500 ppm available chlorine).

(2) Phenolic solution (500 ppm active agent).

(3) Iodoform solution (100 ppm available iodine).

(4) Quaternary ammonium solution (400 ppm active agent).

118300. Any leak or spill of a medical waste by a medical waste generator, hazardous waste hauler, or treatment facility shall be decontaminated by procedures adopted by the department.

118305. A person shall not use reusable pails, drums, dumpsters, or bins used for medical waste for the containment of solid waste, or for other purposes, except after being decontaminated by the procedures specified in Section 118295 and removal of all medical waste labels.

118310. Any enclosure or designated accumulation area used for the storage of medical waste containers shall be secured so as to deny

access to unauthorized persons and shall be marked with warning signs on, or adjacent to, the exterior of entry doors, gates, or lids. The storage area may be secured by use of locks on entry doors, gates, or receptacle lids.

The wording of warning signs shall be in English, ''CAUTION—BIOHAZARDOUS WASTE STORAGE AREA—UNAUTHORIZED PERSONS KEEP OUT,'' and in Spanish, ''CUIDADO—ZONA DE RESIDUOS—BIOLOGICOS PELIGROSOS—PROHIBIDA LA ENTRADA A PERSONAS NO AUTORIZADAS,'' or in another language, in addition to English, determined to be appropriate by the infection control staff or enforcement agency. A warning sign concerning infectious waste, as that term was defined by Section 25117.5 as it read on December 31, 1990, that sign having been installed before April 1, 1991, meets the requirements of this section, until the sign is changed and as long as the sign is not moved. Warning signs shall be readily legible during daylight from a distance of at least 25 feet.

Any enclosure or designated accumulation area shall provide medical waste protection from animals and natural elements and shall not provide a breeding place or a food source for insects or rodents.

118315. A person shall not use a trash chute to transfer medical waste.

118320. (a) Compactors or grinders shall not be used to process medical waste until after the waste has been treated pursuant to Chapter 8 (commencing with Section 118215) and rendered solid waste. However, grinding or compacting may be used when it is an integral part of an alternative treatment method, approved by the department.

(b) Medical waste in bags or other containers shall not be subject to compaction by any compacting device and shall not be placed for storage or transport in a portable or mobile trash compactor, except as allowed pursuant to subdivision (a).

CHAPTER 10. ENFORCEMENT

118325. An enforcement agency, district attorney, city attorney, or city prosecutor may bring an action to enjoin the violation, or threatened violation, of this part or the regulations adopted pursuant to this part, in the superior court in the county where the violation occurred or is about to occur. Any proceeding under this section shall be in accordance with Chapter 3 (commencing with Section 525) of Title 7 of Part 2 of the Code of Civil Procedure, except that the enforcement agency, district attorney, city attorney, or city prosecutor is not required to allege facts necessary to show or tending to show the lack of an adequate remedy at law or irreparable damage or loss.

With respect to any action brought pursuant to this section alleging actual violation of this part or the regulations adopted pursuant to this part, the court shall, if it finds the allegations to be true, issue its order enjoining the continuance of the violation.

118330. Whenever the enforcement agency determines that a violation or threatened violation of this part or the regulations adopted pursuant to this part has resulted, or is likely to result, in a release of medical waste into the environment, the agency may issue an order to the responsible person specifying a schedule for compliance or imposing an administrative penalty of not more than one thousand dollars ($1,000) per violation. Any person who, after notice and an opportunity for hearing, violates an order issued pursuant to this section is guilty of a misdemeanor. The department shall adopt regulations that specify the requirements for providing notice to persons to whom orders are issued and for administrative hearings and fines concerning these orders.

118335. (a) In order to carry out the purpose of this part, any authorized representative of the enforcement agency may do any of the following:

(1) Enter and inspect a facility for which a medical waste permit or registration has been issued, for which a medical waste permit or registration application has been filed, or that is subject to registration or permitting requirements pursuant to this part. Enter and inspect a vehicle for which a hazardous waste hauler registration has been issued or a limited-quantity exemption granted, for which an application has been filed for a hazardous waste hauler registration or a limited-quantity exemption, or that is subject to registration requirements pursuant to this part.

(2) Inspect and copy any records, reports, test results, or other information related to the requirements of this part or the regulations adopted pursuant to this part.

(b) The inspection shall be made with the consent of the owner or possessor of the facilities or, if consent is refused, with a warrant duly issued pursuant to Title 13 (commencing with Section 1822.50) of Part 3 of the Code of Civil Procedure. However, in the event of an emergency affecting the public health or safety, an inspection may be made without consent or the issuance of a warrant.

(c) Any traffic officer, as defined in Section 625 of the Vehicle Code, and any peace officer, as defined in Section 830.1 or 830.2 of the Penal Code, may enforce Chapter 6 (commencing with Section 118000) and this chapter, and for purposes of enforcing these chapters, traffic officers and these peace officers are authorized representatives of the department.

118340. (a) No person shall, transport, store, treat, dispose, or cause the treatment or disposal of medical waste in a manner not authorized by his or her permit or registration, this part, or the regulations adopted pursuant to this part.

(b) Any person who stores, treats, disposes, or causes the treatment or disposal of medical waste in violation of this part or the regulations adopted pursuant to this part is guilty of a public offense as follows:

(1) For a small quantity generator, a first offense is an infraction and is punishable by a fine of not more than one thousand dollars ($1,000).

(2) For a person other than a small quantity generator, a first offense is a misdemeanor punishable by a fine of not less than two thousand dollars ($2,000), or by up to one year in county jail, or by both the fine and imprisonment.

(c) A person who is convicted of a second or subsequent violation of subdivision (a) within three years of the prior conviction shall be punished by imprisonment in the county jail for not more than one year or by imprisonment in state prison for one, two, or three years or by a fine of not less than five thousand dollars ($5,000), or more than twenty-five thousand dollars ($25,000), or by both the fine and imprisonment. This section shall not apply unless any prior conviction is charged in the accusatory pleading and admitted by the defendant or found to be true by the trier of fact. If the defendant is a corporation that operates medical facilities in more than one geographic location, this subdivision shall apply only if the offense involves an adjacent facility involved in the prior conviction.

(d) Any person who knowingly treats or disposes, or causes the treatment or disposal of, medical waste in violation of this part shall be punished by imprisonment in the county jail for not more than one year or by imprisonment in the state prison for one, two, or three years, or by a fine of not less than five thousand dollars ($5,000), or more than twenty-five thousand dollars ($25,000), or by both the fine and imprisonment.

(e) This section does not apply to a person transporting medical waste who is required to be a registered hazardous waste transporter. Those persons are subject to penalties for violations pursuant to Article 8 (commencing with Section 25180) of Chapter 6.5 of Division 20.

118345. (a) Any person who intentionally makes any false statement or representation in any application, label, tracking document, record, report, permit, registration, or other document filed, maintained, or used for purposes of compliance with this part that materially affects the health and safety of the public is liable for a civil penalty of not more than ten thousand dollars ($10,000) for each separate violation or, for continuing violations, for each day that the violation continues.

(b) Any person who fails to register or fails to obtain a medical waste permit in violation of this part, or otherwise violates any provision of this part, any order issued pursuant to Section 118330, or any regulation adopted pursuant to this part, is liable for a civil

penalty of not more than ten thousand dollars ($10,000) for each violation of a separate provision of this part or, for continuing violations, for each day that the violation continues.

Chapter 11. Suspension or Revocation

118350. The enforcement agency may suspend, amend, or revoke any medical waste permit issued by the enforcement agency for any of the following reasons:

(a) Violation by the permittee of any of the provisions of this part or any regulation adopted pursuant to this part.

(b) Violation of any term or condition of the permit.

(c) Aiding, abetting, or permitting the violation specified in subdivision (a) or (b) or interference in the performance of the duty of the enforcement officer.

(d) Proof that the permittee has intentionally made false statements, or failed to disclose fully all relevant facts, in any material regard, on the application for a medical waste permit.

(e) The conviction of a permittee, or the person in charge of the activity subject to the medical waste permit, of any crime that is substantially related to the qualifications or duties of the permittee or the person in charge of the activity, or that is substantially related to the functions that are subject to the medical waste permit.

For purposes of this section, a conviction means a plea or verdict of guilty or a conviction following a plea of nolo contendere. An action to revoke or suspend the medical waste permit may be taken when the time for appeal has elapsed or the judgment of conviction has been affirmed on appeal. That action may also be taken when an order granting probation is made suspending the imposition of sentence, notwithstanding any subsequent order pursuant to Section 1203.4 of the Penal Code. The enforcement agency shall take into account all competent evidence of rehabilitation furnished by the permittee or person in charge of the permitted activity.

(f) A change in any condition that requires either a temporary or permanent modification, reduction, or termination of the permitted operation to bring it into compliance with the requirements of this part and the regulations adopted pursuant to this part.

118355. Proceedings conducted by the department for the suspension or revocation of a medical waste permit shall commence with the filing of any accusation and shall be conducted in accordance with Chapter 5 (commencing with Section 11500) of Part 1 of Division 3 of Title 2 of the Government Code, and the department shall have all the powers granted to a department in that chapter.

118360. The enforcement agency may temporarily suspend a medical waste permit prior to any hearing, when it has determined that this action is necessary to protect the public welfare. The enforcement agency shall notify the permittee of the temporary

suspension and the effective date thereof and, at the same time, shall serve the permittee with an accusation.

Upon receipt of a notice of defense by the permittee, the matter shall, within 15 days, be set for hearing. The hearing shall be held as soon as possible, but not later than 30 days after receipt of the notice.

The temporary suspension shall remain in effect until the hearing is completed and the enforcement agency has made a final determination on the merits. However, the temporary suspension is vacated if the enforcement agency fails to make a final determination on the merits within 60 days after the original hearing has been completed.

PART 15. MISCELLANEOUS REQUIREMENTS

CHAPTER 1. ARTICLES OF COMMON USE

Article 1. Common Drinking Cups

118375. No person conducting, having charge of, or control of, any hotel, restaurant, saloon, soda fountain, store, theater, public hall, public or private school, church, hospital, club, office building, park, playground, lavatory or washroom, barber shop, railroad train, boat, or any other public place, building, room, or conveyance, shall provide or expose for common use, or permit to be so provided or exposed, or allow to be used in common, any cup, glass, or other receptacle used for drinking purposes.

118380. For the purposes of this article the term ''common use'' when applied to a drinking receptacle is defined as its use for drinking purposes by, or for, more than one person without its being thoroughly cleansed and sterilized between consecutive uses thereof by methods prescribed by or acceptable to the department.

118385. No cask, water cooler, or other receptacle shall be used for storing or supplying drinking water to the public or to employees unless it is covered and protected so as to prevent persons from dipping the water therefrom or contaminating the water. All the containers shall be provided with a faucet or other suitable device for drawing the water.

118390. (a) The state department and all health officers of counties, cities, and health districts shall enforce this article.

(b) Pursuant to their enforcement of this article, those officers shall also enforce Section 2441 of the Labor Code. This section shall not be construed to abridge or limit in any manner the jurisdiction of the Division of Occupational Safety and Health of the Department of Industrial Relations pursuant to Division 5 (commencing with Section 6300) of the Labor Code.

118395. Violation of any provision of this article is a misdemeanor punishable by a fine not exceeding fifty dollars ($50) for each offense.

Article 2. Infected Packing Material

118400. For the purpose of this article the term ‘‘filthy, contaminated, or unsanitary packing material’’ includes any or all of the following:

(a) Packing material that has been exposed to contagious or infectious disease.

(b) Material that is contaminated with vermin.

(c) Material that is generally filthy.

(d) Filthy or used wood excelsior.

(e) Excelsior made from filthy or used paper.

118405. Unsanitary packing material shall not be used until it has been cleaned and disinfected to the satisfaction of the Department of Food and Agriculture, the department, or the agents of either or both, or by a county health officer.

118410. The person having the material cleaned and disinfected shall pay the costs of the inspection.

118415. Every person who knowingly packs any goods intended for delivery to other parties or for transportation by common carriers with unsanitary packing material is guilty of a misdemeanor.

Article 3. Common Towels

118425. No person conducting, operating, or having charge or control of, any hotel, restaurant, factory, store, barber shop, office building, school, public hall, railroad train, railway station, boat, or any other public place, room, or conveyance, shall maintain or keep in or about any such place any towel for common use.

118430. For the purpose of this article the term ‘‘common use’’ when applied to a towel means its use by, or for, more than one person without its being laundered between consecutive uses of the towel by methods prescribed by or acceptable to the department.

118435. The department and all health officers of counties, cities, and health districts shall enforce this article.

118440. Violation of any provision of this article is a misdemeanor punishable by a fine not exceeding fifty dollars ($50) for each offense.

Article 4. Wiping Rags

118450. ‘‘Wiping rags,’’ as used in this article means cloths and rags, other than reusable rental cloths or towels, used for any or all of the following purposes:

(a) Wiping and cleaning the surfaces of machinery, machines, tools, locomotives, engines, motor cars, automobiles, cars, carriages, windows, furniture, and surfaces of articles, appliances, and engines in factories, shops, steamships, and steamboats.

(b) Generally for cleaning in industrial employment.

(c) Used by mechanics and workmen for wiping from their hands and bodies soil incident to their employment.

118455. No person shall supply or furnish to his or her employees for wiping rags, or sell or offer for sale for wiping rags, any soiled wearing apparel, underclothing, bedding, or parts of soiled or used underclothing, wearing apparel, bedclothes, bedding, or soiled rags or cloths unless they have been sanitized by methods prescribed by or acceptable to the department.

118460. Every local health officer or registered sanitarian, upon proper demand and notice of his or her authority, may, during business hours, enter any place where wiping rags are used, are kept for sale, or offered for sale, and inspect the wiping rags. No person shall refuse to permit the inspection, or impede or obstruct the officer during the inspection.

118465. On and after July 1, 1975, it shall be unlawful for any person to operate any business of laundering, sanitizing, or selling wiping rags unless, in addition to any other permit that may be required, he or she has a valid permit issued by the local health officer pursuant to an ordinance of the local governing body.

118470. A permit to operate any business of laundering, sanitizing, or selling wiping rags shall be issued by the local health officer if the applicant complies with the provisions of this article and any regulations adopted thereunder. The governing body of each city and county shall determine the amount of any fee for the issuance of a permit pursuant to provisions of this article for any business within the territory under its jurisdiction. The amount of the fee shall not exceed the amount necessary to defray the costs of administering this article. The permit for operation shall be posted in a conspicuous place in the business establishment for which the permit is issued. Any permit issued pursuant to this article may be suspended or revoked for any violation of any of the provisions of this article, the regulations adopted thereunder, or any condition of the permit required by the ordinance of the local governing body. Nothing in this article shall preempt local regulation of the business of laundering, sanitizing, or selling wiping rags, and any local governing body may adopt an ordinance containing requirements more restrictive than those contained in regulations adopted pursuant to this article.

The local health officer shall issue and serve upon the permit holder a notice setting forth in clear and concise language the act or omission upon which the violation is based, when the permit holder is charged with any violation and shall inform the permit holder of his or her rights to a hearing prior to suspension or revocation. At any time within the 15 days after service of the notice, the permit holder may request a hearing before the local health officer to show cause why his or her permit should not be suspended or revoked. A failure

to request a hearing within 15 days shall be deemed a waiver of a right to a hearing.

The local health officer may call a hearing for the purpose of investigating any violations of this article.

118475. The local health officer authorized to issue permits to launder, sanitize, or sell wiping rags shall keep a record of suspension or revocation of permits and a register of:

(a) The names and places of business of persons to whom permits are issued.

(b) The date of issue and number of each permit.

118480. Before being sold or offered for sale, each package or parcel of wiping rags shall be plainly marked ''sanitized wiping rags,'' and in addition it shall be plainly marked with the name and location of the laundry where the rags were laundered and sanitized.

118485. No machinery or appliances used for laundering clothing and articles for personal wear or household use shall be used for laundering soiled rags or soiled cloth material for wiping rags.

118490. Every person who violates any provision of this article is guilty of a misdemeanor.

CHAPTER 2. RESTROOMS

Article 1. Public Restrooms

118500. Every public agency that conducts an establishment serving the public or open to the public and that maintains therein restroom facilities for the public, shall make every water closet for each sex maintained within the facilities available without cost or charge to the patrons, guests, or invitees of the establishment. ''Public agency'' as used in this section means only the state and any agency of the state and a city, a county, and a city and county.

118505. (a) Publicly and privately owned facilities where the public congregates shall be equipped with sufficient temporary or permanent restrooms to meet the needs of the public at peak hours.

(b) In conformity with the State Plumbing Code, and except as otherwise provided in this section, standards shall be adopted in order to enforce this section, as follows:

(1) The State Building Standards Commission shall adopt standards with respect to all state-owned or state-occupied facilities where the public congregates and over which it has jurisdiction pursuant to Section 18934.5.

(2) The Office of the State Architect shall adopt standards with respect to all facilities where the public congregates and that are not covered by paragraph (1), unless exempt from coverage pursuant to this section.

(c) The standards adopted pursuant to subdivision (b) shall be published in the State Building Standards Code contained in Title 24 of the California Code of Regulations.

(d) This section shall apply to facilities where the public congregates that commence construction, or that undertake structural alterations, repairs, or improvements exceeding 50 percent of the entire facility, on or after January 1, 1989.

(e) For the purposes of this section, ''facilities where the public congregates'' means sports and entertainment arenas, stadiums, community and convention halls, specialty event centers, amusement facilities, and ski resorts.

For purposes of this section, ''facilities where the public congregates'' also means specialty event centers in public parks.

(f) This section shall not apply to the following:

(1) Any hotel. For purposes of this section, ''hotel'' means an establishment in which there exists the relationship of guests and innkeeper between the occupants and the owner or operator of the establishment. The existence of some other legal relationship between the occupants and owner or operator shall be immaterial.

(2) Any restaurant or food facility, as defined in Section 113785.

(3) Any public or private elementary or secondary school facility.

(4) Any qualified historic building, defined as qualifying under provisions in the State Historical Building Code contained in Part 8 (commencing with Section 8-100) of Title 24 of the California Code of Regulations.

(g) It is the intent of the Legislature that, in order to ensure that standards are both viable and efficacious, the Office of the State Architect and the State Building Standards Commission hold a series of public meetings with representatives of affected industries and state and local agencies prior to adopting standards under this section.

Article 2. Food Facility Restroom Requirements (Reserved)

Article 3. Food Processor Restroom Requirements (Reserved)

Article 4. Other Restroom Requirements (Reserved)

CHAPTER 3. MISCELLANEOUS NOISE CONTROL

118825. The Legislature, recognizing the growing problem of noise pollution throughout the state and that we are daily assaulted with increased noise from advancing technology, machines, vehicles, and human clamor, declares that excessive noise must be considered a degradation of our environment and a health hazard to our citizens.

The Legislature further declares that it is particularly concerned that the proposed supersonic transport aircraft may significantly

increase the noise level in the areas surrounding our state's airports unless preventive legal sanctions are invoked.

The Legislature is compelled to enact a noise limit for aircraft landing in the state, as a necessary and proper function of its police powers, in order to protect the health and welfare of the citizens of this state.

118830. (a) Except in an emergency situation, no private or commercial aircraft entering commercial service after the effective date of this section may land or take off within the state if it produces noise in excess of the federal certification limits for subsonic jet transport aircraft as set forth in Title 14, Code of Federal Regulations, Part 36.

(b) The prohibition contained in this section shall not apply in the case of an aircraft of a type or class manufactured or in production on or before the effective date of this section where the manufacture of the aircraft is ordered and the aircraft is delivered for commercial service no later than three years after the effective date of this section.

CHAPTER 4. INDOOR AIR QUALITY

Article 1. California Indoor Clean Air Act of 1976

118875. This article and Article 2 (commencing with Section 118920) shall be known and may be cited as the California Indoor Clean Air Act of 1976.

118880. The Legislature finds and declares that tobacco smoke is a hazard to the health of the general public.

118885. Within indoor rooms, indoor chambers, or indoor places of public assembly in publicly owned buildings in which public business is conducted requiring or providing direct participation or observation by the general public there shall be a contiguous area of not less than 50 percent of the total area of the room, chamber, or place designated and posted by signs of sufficient number and posted in locations as to be readily seen by persons within the area, where the smoking of tobacco is prohibited while a public meeting is in progress. A public body, commission, agency, or other entity conducting a public meeting may waive the requirements of this section with respect to its own members, provided that the rights of nonsmoking members are not adversely affected.

118890. Every health facility, as defined in Section 1250, and clinic, as defined in Section 1200, shall comply with the following:

(a) Shall make every reasonable effort to assign patients to rooms according to the patient's individual nonsmoking or smoking preference.

(b) Shall designate and post by signs of sufficient number and posted in locations as to be readily seen by persons within the area,

a contiguous area of not less than 20 percent of every cafeteria or other dining area whose occupied capacity is 50 or more persons as a nonsmoking section.

(c) This section shall not prevent any health facility or clinic from banning smoking in any area that it may designate and post by sign or in all areas of the facility or clinic.

118895. Within every publicly owned building open to the general public for the primary purpose of exhibiting any motion picture, stage drama, music recital, or any other performance, with the exception of any indoor sporting event, signs shall be posted in sufficient number and in locations as to be readily seen by persons within the area, that shall designate that the smoking of tobacco is prohibited in any area other than that commonly known as the lobby. This prohibition shall not apply except during those times when the building is actually open to the public.

118900. Within every restaurant in a publicly owned building serving food or alcoholic beverages in rooms whose occupied capacity is 50 or more persons there shall be designated and posted by signs of sufficient number and posted in locations as to be readily seen by persons within the area, a contiguous area of not less than 20 percent of the serving area where the smoking of tobacco is prohibited.

(a) This section shall not apply to banquet rooms in use for private functions.

(b) This section shall not apply to premises under lease as a restaurant for the time as the lessee of record on January 1, 1977, has a lease as the operator of the restaurant.

(c) As used in this section, ‘‘restaurant’’ means any place designated as a restaurant by Section 28522.

118905. Any person may apply for a writ of mandate to compel compliance by any public entity that has not complied with the requirements of this article and Article 3 (commencing with Section 118920) for the designating or posting of nonsmoking areas or areas where the smoking of tobacco is prohibited. If judgment is given for the applicant, he or she may recover all reasonable costs of the suit, including reasonable attorney fees, reasonableness to be determined by the court.

118910. The Legislature declares its intent not to preempt the field of regulation of the smoking of tobacco. A local governing body may ban completely the smoking of tobacco, or may regulate smoking in any manner not inconsistent with this article and Article 3 (commencing with Section 118920) or any other provision of state law.

118915. (a) Except as provided in subdivision (b), no person shall smoke any tobacco product in any retail food production and marketing establishment, as defined in Section 28802, during the hours the establishment is open to the public.

(b) The provisions of subdivision (a) shall not apply to that portion of an establishment subject to Section 118900 nor to an area of an establishment set aside for employee smoking and not open to the public.

Article 2. Smoking in Private and Public Transportation

118920. (a) The Legislature hereby finds and declares that the United States Surgeon General's 1986 Report on the Health Consequences of Involuntary Smoking conclude all of the following:

(1) Involuntary smoking is a cause of disease, including lung cancer, in healthy nonsmokers.

(2) The children of parents who smoke compared with the children of nonsmoking parents have an increased frequency of respiratory infections, increased respiratory symptoms, and slightly smaller rates of increase in lung function as the lungs mature.

(3) The simple separation of smokers and nonsmokers within the same air space may reduce, but does not eliminate, the exposure of nonsmokers to environmental tobacco smoke.

(b) The Legislature further finds and declares the following:

(1) Nonsmokers have no adequate means to protect themselves from the damage inflicted upon them when they involuntarily inhale tobacco smoke.

(2) Regulation of smoking in public places is necessary to protect the health, safety, welfare, comfort, and environment of nonsmokers.

(c) It is, therefore, the intent of the Legislature, in enacting this article, to eliminate smoking on public transportation vehicles.

118925. It is unlawful for any person to smoke tobacco or any other plant product in any vehicle of a passenger stage corporation, the National Railroad Passenger Corporation (Amtrak) except to the extent permitted by federal law, in any aircraft except to the extent permitted by federal law, on a public transportation system, as defined by Section 99211 of the Public Utilities Code, or in any vehicle of an entity receiving any transit assistance from the state.

118930. A notice prohibiting smoking, displayed as a symbol and in English, shall be posted in each vehicle or aircraft subject to this article.

118935. (a) Every person and public agency providing transportation services for compensation, including, but not limited to, the National Railroad Passenger Corporation (Amtrak) to the extent permitted by federal law, passenger stage corporations, and local agencies that own or operate airports, shall designate and post, by signs of sufficient number and posted in locations that may be readily seen by persons within the area, a contiguous area of not less than 75 percent of any area made available by the person or public agency as a waiting room for these passengers where the smoking of

tobacco is prohibited. Not more than 25 percent of any given area may be set aside for smokers.

(b) Every person or public agency subject to subdivision (a) shall also post, by sign of sufficient number and posted in locations as to be readily seen by persons within the area of any building where tickets, tokens, or other evidences that a fare has been paid for transportation services that are provided by the person or public agency, a notice that the smoking of tobacco by persons waiting in line to purchase the tickets, tokens, or other evidences that a fare has been paid is prohibited.

(c) It is unlawful for any person to smoke in an area posted pursuant to this section.

118940. This article does not preempt any local ordinance on the same subject where a local ordinance is more restrictive to the benefit of the nonsmoker.

118945. Any violation of this article is an infraction punishable by a fine not exceeding one hundred dollars ($100) for a first violation, by a fine not exceeding two hundred dollars ($200) for a second violation within one year, or by a fine not exceeding five hundred dollars ($500) for a third and for each subsequent violation within one year.

Article 3. Tobacco Distribution

118950. (a) The Legislature hereby finds and declares the following:

(1) Smoking is the single most important source of preventable disease and premature death in California.

(2) Smoking is responsible for one-quarter of all death caused by fire.

(3) Tobacco-related disease places a tremendous financial burden upon the persons with the disease, their families, the health care delivery system, and society as a whole.

(4) Despite laws in at least 44 states prohibiting the sale of tobacco products to minors, each day 3,000 children start using tobacco products in this nation. Children under the age of 18 consume 947 million packages of cigarettes in this country yearly.

(5) The earlier a child begins to use tobacco products, the more likely it is that the child will be unable to quit.

(6) More than 60 percent of all smokers begin smoking by the age of 14, and 90 percent begin by age 19.

(7) Use of smokeless tobacco products among minors in this state is increasing.

(8) Smokeless tobacco or chewing tobacco is harmful to the health of individuals and may cause gum disease, mouth or oral cancers, increased tooth decay and leukoplakia.

(9) Tobacco product advertising and promotion are an important cause of tobacco use among children. More money is spent advertising and promoting tobacco products than any other consumer product.

(10) Distribution of tobacco product samples and coupons is a recognized source by which minors obtain tobacco products, beginning the addiction process.

(11) It is the intent of the Legislature that keeping children from beginning to use tobacco products in any form and encouraging all persons to quit tobacco use shall be among the highest priorities in disease prevention for the State of California.

(b) It is unlawful for any person, agent, or employee of a person in the business of selling or distributing smokeless tobacco or cigarettes from engaging in the nonsale distribution of any smokeless tobacco or cigarettes to any person in any public building, park or playground, or on any public sidewalk, street, or other public grounds.

(c) For purposes of this section:

(1) ''Nonsale distribution'' means to give smokeless tobacco or cigarettes to the general public at no cost, or at nominal cost, or to give coupons or rebate offers for smokeless tobacco or cigarettes to the general public at no cost or at nominal cost. Distribution of tobacco products or coupons or rebate offers in connection with the sale of another item, including tobacco products, cigarette lighters, magazines, or newspapers shall not constitute nonsale distribution.

(2) ''Smokeless tobacco'' means (A) a loose or flat, compressed cake form of tobacco that may be chewed or held in the mouth or (B) a shredded, powdered, or pulverized form of tobacco that may be inhaled through the nostrils, chewed, or held in the mouth.

(3) ''Public building, park, playground, sidewalk, street, or other public grounds'' means any structure or outdoor area that is owned, operated, or maintained by any public entity, including, but not limited to: city and county streets and sidewalks, parade grounds, fair grounds, public transportation facilities and terminals, public reception areas, public health facilities, public recreational facilities, and public office buildings.

(d) Any person who violates this section shall be liable for a civil penalty of not less than two hundred dollars ($200) for one act, five hundred dollars ($500) for two acts, and one thousand dollars ($1,000) for each succeeding violation. Each distribution of a single package, coupon, or rebate offer to an individual member of the general public in violation of this section shall be considered a separate violation.

(e) Nothing contained in this section or any other provision of law shall invalidate an ordinance of, or be construed to prohibit the adoption of an ordinance by, a city or county regulating distribution of smokeless tobacco or cigarette samples within its boundaries that

is more restrictive than this section. If this occurs, the more restrictive local ordinance shall control to the extent of any inconsistency between it and this section.

(f) This section shall not apply to any public building, park, playground, sidewalk, street, or other public grounds where minors are prohibited by law. This section also shall not apply to any public building, park, playground, sidewalk, street, or other public grounds leased for private functions where minors are denied access by a peace officer or licensed security guard on the premises.

CHAPTER 5. ELECTRICAL HAZARDS

119075. (a) The Legislature intends to prevent electricity generated by permanent or portable electric generators from backfeeding into a utility electrical distribution system by the enactment of this chapter.

(b) Any portable electrical generator that is capable of being connected temporarily to a customer's electrical system, that is normally supplied by an electrical corporation or state or local public agency, shall be connected only after opening the customer's main switch so as to isolate the customer's electrical system from that of the electrical corporation or state or local agency.

(c) Any electrical generator, other than a generator designed to run in parallel with the system of the serving utility and approved by that utility, that is capable of being permanently connected to a customer's electrical system shall be connected only by means of a double throw switch so as to isolate the customer's electrical system from that of the electrical corporation or state or local agency.

119080. (a) Every manufacturer of a portable or permanent electrical generator that is capable of being connected either permanently or temporarily to a commercial, industrial, or residential structure's electrical system, shall include a warning statement in the generator's instruction manual and a legible warning label on the generator that states the requirement of Section 119075 and explains the electrical hazards of backfeed into a utility's distribution system. The same warning information shall be included in all advertisements offering portable electric generators.

(b) No person or public agency shall sell, rent to another person or public agency, or offer for sale or rent to another person or public agency a portable electrical generator unless the legible warning label is on a visible surface of the generator.

119085. (a) Every public utility or utility district shall notify all electrical service customers of the electrical backfeed hazards of portable and permanent electric generators.

(b) Any owner, renter, or lessee who possesses and operates an electric generator, when the generator is connected to a commercial, industrial, or residential structure's electrical system that is

connected to the service of a public utility or utility district, shall notify the utility of the location of the generator.

119090. (a) Any person who violates Sections 119075 to 119085, inclusive, is guilty of a misdemeanor, and subject to a fine of not more than five hundred dollars ($500) or not more than six months' imprisonment.

(b) For purposes of this section, ''person'' shall not include public agencies, officers or employees of public agencies, or public utilities.

CHAPTER 6. CHLOROFLUOROCARBONS

119150. (a) On and after October 15, 1978, no person shall manufacture in this state a saturated chlorofluorocarbon not containing hydrogen for use as an aerosol propellant in a can, canister, or other container.

(b) On and after December 15, 1978, no person shall manufacture in this state any can, canister, or other container that is intended to utilize an aerosol propellant chemically composed, in whole or in part, of a saturated chlorofluorocarbon not containing hydrogen.

(c) On and after April 15, 1979, no person shall sell in this state any can, canister, or other container that utilizes an aerosol propellant chemically composed, in whole or in part, of a saturated chlorofluorocarbon not containing hydrogen.

119155. Notwithstanding the foregoing provisions of this chapter, nothing in this chapter shall preclude the manufacture or sale of saturated chlorofluorocarbons not containing hydrogen for any of the uses exempted in currently proposed federal regulations, to be modified as the federal regulations are modified.

119160. Subdivisions (a) and (b) of Section 119150 shall be superseded by the enactment or adoption of any federal law or regulation prohibiting the manufacture of any aerosol product utilizing saturated chlorofluorocarbons not containing hydrogen and prohibiting the manufacture of saturated chlorofluorocarbons not containing hydrogen for use as an aerosol propellant in a can, canister, or other container.

SEC. 7. Division 105 (commencing with Section 120100) is added to the Health and Safety Code, to read:

DIVISION 105. COMMUNICABLE DISEASE PREVENTION AND CONTROL

PART 1. ADMINISTRATION OF COMMUNICABLE DISEASE PREVENTION AND CONTROL

CHAPTER 1. GENERAL PROVISIONS AND DEFINITIONS

120100. ''Health officer,'' as used in the Communicable Disease Prevention and Control Act (Section 27) includes county, city, and district health officers, and city and district health boards, but does not include advisory health boards.

120105. Whenever in the Communicable Disease Prevention and Control Act (Section 27), service or notice of any order or demand is provided for, it shall be sufficient to do so by registered or certified mail if a receipt therefor signed by the person to be served or notified is obtained. The receipt shall be prima facie evidence of the service or notice in any civil or criminal action.

120110. As used in the Communicable Disease Prevention and Control Act (Section 27) a person has ''active tuberculosis disease'' when either one of the following occur:

(a) A smear or culture taken from any source in the person's body has tested positive for tuberculosis and the person has not completed the appropriate prescribed course of medication for active tuberculosis disease.

(b) There is radiographic, current clinical, or laboratory evidence sufficient to support a medical diagnosis of tuberculosis for which treatment is indicated.

120115. As used in the Communicable Disease Prevention and Control Act (Section 27) the following terms have the following meanings, unless the context indicates otherwise:

(a) ''Infectious tuberculosis disease'' means active or suspected active tuberculosis disease in an infectious state.

(b) ''Tuberculosis infection'' means the latent phase of tuberculosis, during which the infected person cannot spread tuberculosis to others.

(c) ''Heightened risk of tuberculosis exposure'' means likely exposure to persons with infectious tuberculosis disease.

(d) ''The appropriate prescribed course of medication for tuberculosis disease'' means that course recommended by the health officer, the most recent guidelines of the department, the most recent guidelines of the Centers for Disease Control and Prevention, or the most recent guidelines of the American Thoracic Society.

(e) ''Directly observed therapy'' means the appropriately prescribed course of treatment for tuberculosis disease in which the prescribed antituberculosis medications are administered to the person or taken by the person under direct observation of a health

care provider or a designee of the health care provider approved by the local health officer.

(f) An ''examination'' for tuberculosis infection or disease means conducting tests, including, but not limited to, Mantoux tuberculin skin tests, laboratory examination, and X-rays, as recommended by any of the following:

(1) The local health officer.

(2) The most recent guidelines of the state department.

(3) The most recent guidelines of the Centers for Disease Control and Prevention.

(4) The most recent guidelines of the American Thoracic Society.

(g) ''State correctional institution'' means a prison, institution, or other facility under the jurisdiction of the Department of Corrections or the Department of the Youth Authority.

(h) ''Local detention facility'' is defined in Section 6031.4 of the Penal Code.

(i) ''Penal institution'' means either a state correctional institution or a local detention facility.

(j) ''Health facility'' means a licensed health facility as defined in Sections 1250, 1250.2, and 1250.3.

(k) ''Health officer'' or ''local health officer'' includes his or her designee.

CHAPTER 2. FUNCTIONS AND DUTIES OF THE STATE DEPARTMENT OF HEALTH SERVICES

120125. The department shall examine into the causes of communicable disease in man and domestic animals occurring or likely to occur in this state.

120130. The department shall establish a list of reportable diseases. The list of reportable diseases may include both communicable and noncommunicable diseases. The list may include those diseases that are either known to be, or suspected of being, transmitted by milk or milk-based products. The list shall also include, but not be limited to, diphtheria, listeria, salmonella, shigella, streptococcal infection in food handlers or dairy workers, and typhoid. This list may be changed at any time by the department. Those diseases listed as reportable shall be properly reported as required to the department by the health officer.

The department may from time to time adopt and enforce regulations requiring isolation (strict or modified) or quarantine for any of the contagious, infectious, or communicable diseases if in the opinion of the department the action is necessary for the protection of the public health.

The health officer may require isolation (strict or modified) or quarantine for any case of contagious, infectious, or communicable disease when this action is necessary for the protection of the public

health. This list shall be published in Title 17 of the California Code of Regulations.

120135. The department may establish and maintain places of quarantine or isolation.

120140. Upon being informed by a health officer of any contagious, infectious, or communicable disease the department may take measures as are necessary to ascertain the nature of the disease and prevent its spread. To that end, the department may, if it considers it proper, take possession or control of the body of any living person, or the corpse of any deceased person.

120142. (a) The state director may order examinations for tuberculosis infection in the following persons for the purpose of directing preventive measures:

(1) Persons in close contact with persons with infectious tuberculosis disease.

(2) Other persons for whom the state director has reasonable grounds to determine are at heightened risk of tuberculosis exposure.

(b) An order for examination for tuberculosis infection shall be in writing and shall include other terms and conditions as may be necessary to protect the public health.

120145. The department may quarantine, isolate, inspect, and disinfect persons, animals, houses, rooms, other property, places, cities, or localities, whenever in its judgment the action is necessary to protect or preserve the public health.

120150. The department may destroy such objects as bedding, carpets, household goods, furnishings, materials, clothing, or animals, when ordinary means of disinfection are considered unsafe, and when the property is in its judgment, an imminent menace to the public health.

CHAPTER 3. FUNCTIONS AND DUTIES OF LOCAL HEALTH OFFICERS

120175. Each health officer knowing or having reason to believe that any case of the diseases made reportable by regulation of the department, or any other contagious, infectious or communicable disease exists, or has recently existed, within the territory under his or her jurisdiction, shall take measures as may be necessary to prevent the spread of the disease or occurrence of additional cases.

120180. If the health officer of any county having a population of 5,000,000 or more employs personnel as inspectors or investigators in the enforcement of the Communicable Disease Prevention and Control Act (Section 27), who are not otherwise licensed, registered, nor certified by this state, the personnel shall meet any one of the following minimum standards and qualifications:

(a) Possess a bachelor’s degree in public health from an institution on the list of accredited colleges of the United States Office of Education.

(b) Possess a bachelor's degree with a minimum of 30 semester units of basic sciences from an institution on the list of accredited colleges of the United States Office of Education; or a statement from an accredited institution that the applicant has successfully completed a minimum of 16 semester units distributed among at least the following fields: public health and administration, epidemiology, public health statistics, public health microbiology, and communicable disease control.

(c) Possess a bachelor's degree from an institution on the list of accredited colleges of the United States Office of Education; and have had at least one year of full-time experience or the equivalent in investigation or inspection work in public health or law enforcement.

(d) Be employed as an inspector or investigator in communicable disease prevention and control by a county health department in the State of California, and have passed an official civil service examination therefor prior to the effective date of this section.

120185. In the case of a local epidemic of disease, the health officer shall report at those times as are requested by the department all facts concerning the disease, and the measures taken to abate and prevent its spread.

120190. Each health officer shall immediately report by telegraph or telephone to the department every discovered or known case or suspect case of those diseases designated for immediate reporting by the department. Within 24 hours after investigation each health officer shall make reports as the department may require.

120195. Each health officer shall enforce all orders, rules, and regulations concerning quarantine or isolation prescribed or directed by the department.

120200. Each health officer, whenever required by the department, shall establish and maintain places of quarantine or isolation that shall be subject to the special directions of the department.

120205. No quarantine shall be established by a county or city against another county or city without the written consent of the department.

120210. Whenever in the judgment of the department it is necessary for the protection or preservation of the public health, each health officer shall, when directed by the department, do the following:

(a) Quarantine or isolate and disinfect persons, animals, houses or rooms, in accordance with general and specific instructions of the department.

(b) Destroy bedding, carpets, household goods, furnishings, materials, clothing, or animals, when ordinary means of disinfection are considered unsafe, and when the property is, in the judgment of the department, an imminent menace to the public health.

When the property is destroyed pursuant to this section, the governing body of the locality where the destruction occurs may make adequate provision for compensation in proper cases for those injured thereby.

120215. Upon receiving information of the existence of contagious, infectious, or communicable disease for which the department may from time to time declare the need for strict isolation or quarantine, each health officer shall:

(a) Ensure the adequate isolation of each case, and appropriate quarantine of the contacts and premises.

(b) Follow local rules and regulations, and all general and special rules, regulations, and orders of the department, in carrying out the quarantine or isolation.

120220. When quarantine or isolation, either strict or modified, is established by a health officer, all persons shall obey his or her rules, orders, and regulations.

120225. A person subject to quarantine or strict isolation, residing or in a quarantined building, house, structure, or other shelter, shall not go beyond the lot where the building, house, structure, or other shelter is situated, nor put himself or herself in immediate communication with any person not subject to quarantine, other than the physician, the health officer or persons authorized by the health officer.

120230. No instructor, teacher, pupil, or child who resides where any contagious, infectious, or communicable disease exists or has recently existed, that is subject to strict isolation or quarantine of contacts, shall be permitted by any superintendent, principal, or teacher of any college, seminary, or public or private school to attend the college, seminary, or school, except by the written permission of the health officer.

120235. No quarantine shall be raised until every exposed room, together with all personal property in the room, has been adequately treated, or, if necessary, destroyed, under the direction of the health officer; and until all persons having been under strict isolation are considered noninfectious.

120240. If, pursuant to Section 120130, a modified isolation order is issued, and the order is not complied with, the local health officer may, in that instance, issue a strict isolation order.

120245. Each health officer, other than a county health officer, in the county shall transmit to the county health officer at least weekly in writing a report showing the number and character of infectious, contagious, or communicable diseases reported, and their location.

120250. All physicians, nurses, clergymen, attendants, owners, proprietors, managers, employees, and persons living, or visiting any sick person, in any hotel, lodginghouse, house, building, office, structure, or other place where any person is ill of any infectious, contagious, or communicable disease, shall promptly report that fact

to the health officer, together with the name of the person, if known, the place where he or she is confined, and the nature of the disease, if known.

CHAPTER 4. VIOLATIONS

120275. Any person who, after notice, violates, or who, upon the demand of any health officer, refuses or neglects to conform to, any rule, order, or regulation prescribed by the department respecting a quarantine or disinfection of persons, animals, things, or places, is guilty of a misdemeanor.

120280. Inasmuch as the orders provided for by Section 121365 are for the protection of the public health, any person who, after service upon him or her of an order of a local health officer as provided in Section 121365 violates or fails to comply with the order, is guilty of a misdemeanor. Upon conviction thereof, in addition to any and all other penalties that may be imposed by law upon the conviction, the person may be ordered by the court confined until the order of the local health officer shall have been fully complied with or terminated by the local health officer, but not exceeding one year from the date of passing judgment upon the conviction, further, the court, upon suitable assurances that the order of the local health officer will be complied with, may place any person convicted of a violation of the order of the local health officer upon probation for a period not to exceed two years, upon condition that the order of the local health officer be fully complied with, further, upon any subsequent violation of the order of the local health officer, the probation shall be terminated and confinement as provided for in this section shall be ordered by the court. Confinement may be accomplished by placement in any appropriate facility, penal institution, or dwelling approved for the specific case by the local health officer.

120285. Upon any subsequent conviction under the provisions of Section 120280, the court may order the person confined for a period not exceeding one year for the subsequent conviction, or other penalty as provided by that section.

120290. Except in the case of the removal of an afflicted person in a manner the least dangerous to the public health, any person afflicted with any contagious, infectious, or communicable disease who wilfully exposes himself, and any person who wilfully exposes another person afflicted with the disease, is guilty of a misdemeanor.

120295. Any person who violates any section in Chapter 3 (commencing with Section 120175, but excluding Sections 120130 and 120195), is guilty of a misdemeanor, punishable by a fine of not less than fifty dollars ($50) nor more than one thousand dollars ($1,000), or by imprisonment for a term of not more than 90 days, or

by both. He or she is guilty of a separate offense for each day that the violation continued.

120300. The district attorney of the county where a violation of Sections 121365 and 120280 may be committed, shall prosecute all those violations and, upon the request of a health officer, shall prosecute, as provided in Section 120280, violations of any order of a health officer made and served as provided in Section 121365 or Section 120105.

120305. Every person who possesses any intoxicating liquor in or on any public hospital or sanatorium providing for the treatment of tuberculosis or within the boundaries of the grounds belonging thereto is guilty of a misdemeanor. This section shall not prohibit (a) the possession of any intoxicating liquor used for medicinal purposes when issued pursuant to a written order of a physician licensed to practice medicine under the laws of the State of California, (b) the possession of any intoxicating liquor by personnel for his or her own use who resides at the hospital or sanatorium or on the grounds thereof, (c) the possession of any intoxicating liquor used by a minister of the gospel or priest or rabbi in a religious sacrament or ceremony or (d) the service of wine to a patient as part of the hospital's regular menu or bill of fare if the patient is located in a portion of the premises wholly separate and isolated from patients receiving treatment for tuberculosis.

PART 2. IMMUNIZATIONS

CHAPTER 1. EDUCATIONAL AND CHILD CARE FACILITY IMMUNIZATION REQUIREMENTS

120325. In enacting Chapter 1 (commencing with Section 120325, but excluding Section 120380) and in enacting Sections 120400, 120405, 120410, and 120415, it is the intent of the Legislature to provide:

(a) A means for the eventual achievement of total immunization of appropriate age groups against the following childhood diseases:

(1) Diphtheria.
(2) Hepatitis B.
(3) Haemophilus influenzae type b.
(4) Measles.
(5) Mumps.
(6) Pertussis (whooping cough).
(7) Poliomyelitis.
(8) Rubella.
(9) Tetanus.
(10) Any other disease that is consistent with the most current recommendations of the United States Public Health Services' Centers for Disease Control Immunization Practices Advisory

Committee and the American Academy of Pediatrics Committee of Infectious Diseases, and deemed appropriate by the department.

(b) That the persons required to be immunized be allowed to obtain immunizations from whatever medical source they so desire, subject only to the condition that the immunization be performed in accordance with the regulations of the department and that a record of the immunization is made in accordance with the regulations.

(c) Exemptions from immunization for medical reasons or because of personal beliefs.

(d) For the keeping of adequate records of immunization so that health departments, schools, and other institutions, parents or guardians, and the persons immunized will be able to ascertain that a child is fully or only partially immunized, and so that appropriate public agencies will be able to ascertain the immunization needs of groups of children in schools or other institutions.

(e) Incentives to public health authorities to design innovative and creative programs that will promote and achieve full and timely immunization of children.

120330. The department, in consultation with the Department of Education, shall adopt and enforce all regulations necessary to carry out Chapter 1 (commencing with Section 120325, but excluding Section 120380) and to carry out Sections 120400, 120405, 120410, and 120415.

120335. (a) As used in Chapter 1 (commencing with Section 120325, but excluding Section 120380) and as used in Sections 120400, 120405, 120410, and 120415, the term ''governing authority'' means the governing board of each school district or the authority of each other private or public institution responsible for the operation and control of the institution or the principal or administrator of each school or institution.

(b) The governing authority shall not unconditionally admit any person as a pupil of any private or public elementary or secondary school, child care center, day nursery, nursery school, family day care home, or development center, unless prior to his or her first admission to that institution he or she has been fully immunized. The following are the diseases for which immunizations shall be documented:

(1) Diphtheria.

(2) Haemophilus influenzae type b, except for children who have reached the age of four years, six months.

(3) Measles.

(4) Mumps, except for children who have reached the age of seven years.

(5) Pertussis (whooping cough), except for children who have reached the age of seven years.

(6) Poliomyelitis.

(7) Rubella.

(8) Tetanus.

(9) Any other disease deemed appropriate by the department, taking into consideration the recommendations of the United States Public Health Services' Centers for Disease Control Immunization Practices Advisory Committee and the American Academy of Pediatrics Committee of Infectious Diseases.

(c) The department may specify the immunizing agents that may be utilized and the manner in which immunizations are administered.

120340. A person who has not been fully immunized against one or more of the diseases listed in Section 120335 may be admitted by the governing authority on condition that within time periods designated by regulation of the department he or she presents evidence that he or she has been fully immunized against all of these diseases.

120345. The immunizations required by Chapter 1 (commencing with Section 120325, but excluding Section 120380) and required by Sections 120400, 120405, 120410, and 120415 may be obtained from any private or public source desired if the immunization is administered and records are made in accordance with regulations of the department.

120350. The county health officer of each county shall organize and maintain a program to make immunizations available to all persons required by Chapter 1 (commencing with Section 120325, but excluding Section 120380) and required by Sections 120400, 120405, 120410, and 120415 to be immunized. The county health officer shall also determine how the cost of the program is to be recovered. To the extent that the cost to the county is in excess of that sum recovered from persons immunized, the cost shall be paid by the county in the same manner as other expenses of the county are paid.

120355. Any person or organization administering immunizations shall furnish each person immunized, or his or her parent or guardian, with a written record of immunization given in a form prescribed by the department.

120360. The requirements of Chapter 1 (commencing with Section 120325, but excluding Section 120380) and of Sections 120400, 120405, 120410, and 120415 shall not apply to any person 18 years of age or older, or to any person seeking admission to a community college.

120365. Immunization of a person shall not be required for admission to a school or other institution listed in Section 120335 if the parent or guardian or adult who has assumed responsibility for his or her care and custody in the case of a minor, or the person seeking admission if an emancipated minor, files with the governing authority a letter or affidavit stating that the immunization is contrary to his or her beliefs. However, whenever there is good cause to believe that the person has been exposed to one of the

communicable diseases listed in subdivision (a) of Section 120325, that person may be temporarily excluded from the school or institution until the local health officer is satisfied that the person is no longer at risk of developing the disease.

120370. If the parent or guardian files with the governing authority a written statement by a licensed physician to the effect that the physical condition of the child is such, or medical circumstances relating to the child are such, that immunization is not considered safe, indicating the specific nature and probable duration of the medical condition or circumstances that contraindicate immunization, that person shall be exempt from the requirements of Chapter 1 (commencing with Section 120325, but excluding Section 120380) and Sections 120400, 120405, 120410, and 120415 to the extent indicated by the physician's statement.

120375. (a) The governing authority of each school or institution included in Section 120335 shall require documentary proof of each entrant's immunization status. The governing authority shall record the immunizations of each new entrant in the entrant's permanent enrollment and scholarship record on a form provided by the department. The immunization record of each new entrant admitted conditionally shall be reviewed periodically by the governing authority to ensure that within the time periods designated by regulation of the department he or she has been fully immunized against all of the diseases listed in Section 120335, and immunizations received subsequent to entry shall be added to the pupil's immunization record.

(b) The governing authority of each school or institution included in Section 120335 shall prohibit from further attendance any pupil admitted conditionally who failed to obtain the required immunizations within the time limits allowed in the regulations of the department, unless the pupil is exempted under Section 120365 or 120370, until that pupil has been fully immunized against all of the diseases listed in Section 120335.

(c) The governing authority shall file a written report on the immunization status of new entrants to the school or institution under their jurisdiction with the department and the local health department at times and on forms prescribed by the department. As provided in paragraph (4) of subdivision (a) of Section 49076 of the Education Code, the local health department shall have access to the complete health information as it relates to immunization of each student in the schools or other institutions listed in Section 120335 in order to determine immunization deficiencies.

(d) The governing authority shall cooperate with the county health officer in carrying out programs for the immunization of persons applying for admission to any school or institution under its jurisdiction. The governing board of any school district may use funds, property, and personnel of the district for that purpose. The

governing authority of any school or other institution may permit any licensed physician or any qualified registered nurse as provided in Section 2727.3 of the Business and Professions Code to administer immunizing agents to any person seeking admission to any school or institution under its jurisdiction.

120380. It is the intent of the Legislature that the administration of immunizing agents by registered nurses in school immunization programs under the direction of a supervising physician and surgeon as provided in Section 11704 of the Education Code shall be in accordance with accepted medical procedure. To implement this intent, the department may adopt written regulations specifying the procedures and circumstances under which a registered nurse, acting under the direction of a supervising physician and surgeon, may administer an immunizing agent pursuant to Section 11704 of the Education Code.

However, nothing in this section shall be construed to prevent any registered nurse from administering an immunizing agent in accordance with Section 11704 of the Education Code in the absence of written regulations as the department is authorized to adopt under this section.

CHAPTER 2. DEPARTMENT OF HEALTH SERVICES PROVISION OF FUNDS, IMMUNIBIOLOGICS, AND ACCESS TO IMMUNIBIOLOGICS

120400. The department may establish an immunization outreach program.

120405. (a) A local health officer, or consortium of local health officers, may establish permanent, temporary, or mobile sites and programs, for the purpose of immunizing children, or performing outreach to refer parents to other programs that provide immunizations and comprehensive health services. These sites for referral or immunization may include, but are not limited to, the following:

(1) Public places where parents of children at high risk of remaining unimmunized reside, shop, worship, or recreate.

(2) School grounds, either during regular hours, or evening hours or on weekends.

(3) On or adjacent to sites of public- or community-based agencies or programs that either provide or refer persons to public assistance programs or services.

(b) Outreach programs shall, to the extent feasible, include referral components intended to link immunized children with available public or private primary care providers, in order to increase access to continuing pediatric care, including subsequent immunization services as necessary.

120410. The population to be targeted by the program shall include children who do not receive immunizations through private

third-party sources or other public sources with priority given to infants and children from birth up to age three. Outreach programs shall include information to the families of children being immunized about possible reactions to the vaccine and about followup referral sources.

120415. The Health and Welfare Agency may waive state administrative, eligibility, and billing requirements that apply to other public assistance programs through which immunization and comprehensive health services outreach and vaccination are offered, for counties that establish streamlined administrative, eligibility, billing, and referral procedures between those public assistance programs, and the immunization and comprehensive health services programs established pursuant to Sections 120400 through 120415, inclusive.

120420. The department shall provide financial assistance to county and areawide immunization campaigns under the direction of local health officers for the prevention of rubella.

120425. All moneys appropriated to the department for the purposes of this section and Section 120420 shall be made available to local health departments, as defined in Section 101185, or to areawide associations of local health departments. All moneys received by the local departments or areawide associations shall be utilized only for the purchase of rubella vaccines, other necessary supplies and equipment for rubella immunization campaigns, and promotional costs of such campaigns. No moneys appropriated for the purpose of this section and Section 120420 shall be used by the department or by any local department or areawide association for administrative purposes, and no such moneys may be used to supplant or support local health department clinics and programs already regularly operated by such the departments, but may be used only for additional county or areawide rubella immunization campaigns. All moneys appropriated for the purposes of this section and Section 120420 shall be expended by March 31, 1971.

120430. (a) The Legislature finds and declares that 1990 marks one of the worst measles epidemics in recent history and that this epidemic threatens the health and safety of our schoolaged children.

The Legislature finds and declares that, according to the Center for Disease Control and the American Academy of Pediatrics, current medical technology suggests that in order to be fully immunized against measles, children should receive two doses of the immunization agent for measles before the age of seven years.

It is the intent of the Legislature to ensure that all possible steps are taken to combat the spread of any disease through California schools.

(b) The department, in consultation with the State Department of Education, shall develop and adopt regulations to ensure that every student in any private or public elementary or secondary school, child care center, day nursery, nursery school, or

development center shall have access to full immunization against measles, as determined by the Center for Disease Control, to the extent funds are available.

Priority shall be given to children who have not received any type of measles immunization.

120435. The department shall purchase or prepare, and distribute free of cost, under any regulations as may be necessary, anti-rabic virus to be used in the treatment of persons exposed to rabies when they declare that it would be a hardship for them to pay for anti-rabic treatment.

CHAPTER 3. IMMUNIZATION REACTIONS

120450. It is the intent of the Legislature to provide for care, including medical, institutional, supportive, and rehabilitative care, necessitated because of severe adverse reaction to any immunization required by state law to be administered to children under 18 years of age.

As used in this chapter, a severe adverse reaction is one that manifests itself not more than 30 days after the immunization and requires extensive medical care, as defined by regulation of the department.

Medical expenses shall be reimbursed by the department in an amount not to exceed twenty-five thousand dollars ($25,000).

Eligibility for reimbursement under this section shall be limited to persons requiring extensive medical care, as defined by the department pursuant to this section. Such reimbursement shall be made without regard to ability to pay and neither the parents nor the estates of the persons shall be liable for repayment to the state of any portion of the amounts reimbursed pursuant to this chapter.

The department shall, by regulation, establish procedures for processing claims pursuant to this section.

Whenever reimbursement is provided for medical expenses under this chapter, the state shall be subrogated to the rights of the person receiving reimbursement of medical expenses for any amounts due to or recoverable by the person from third parties. The subrogation shall be for an amount equal to any claim reimbursed under this chapter.

There is hereby created in the State Treasury the Immunization Adverse Reaction Fund, that shall be administered by the department and is appropriated without regard to fiscal years. Reimbursements made pursuant to this chapter shall be made from the Immunization Adverse Reaction Fund.

120455. No person shall be liable for any injury caused by an act or omission in the administration of a vaccine or other immunizing agent to a minor, including the residual effects of the vaccine or immunizing agent, if the immunization is either required by state

law, or given as part of an outreach program pursuant to Sections 120400 through 120415, inclusive, and the act or omission does not constitute willful misconduct or gross negligence.

CHAPTER 4. REPORTS

120475. On or before March 15, 1991, and on or before March 15 of each year thereafter, the department shall submit a report to the Legislature on all of the following issues:

(a) The immunization status of young children in the state, based on available data.

(b) The steps taken to strengthen immunization efforts, particularly efforts through the Child Health and Disability Prevention Program.

(c) The steps taken to improve immunization levels among currently underserved minority children, young children in family day care and other child care settings, and children with no health insurance coverage.

(d) The improvements made in ongoing methods of immunization outreach and education in communities where immunization levels are disproportionately low.

(e) Its recommendations for a comprehensive strategy for fully immunizing all California children and its analysis of the funding necessary to implement the strategy.

PART 3. SEXUALLY TRANSMITTED DISEASE

CHAPTER 1. PREVENTION AND CONTROL

120500. As used in the Communicable Disease Prevention and Control Act (Section 27) ''venereal diseases'' means syphilis, gonorrhea, chancroid, lymphopathia venereum, and granuloma inguinale.

120505. The department shall develop and review plans and provide leadership and consultation for, and participate in, a program for the prevention and control of venereal disease.

120510. The department shall cooperate in the prevention, control, and cure of venereal diseases with physicians and surgeons; medical schools; public and private hospitals, dispensaries, and clinics; public and private school, college and university authorities; penal and charitable institutions; reform and industrial schools; detention homes; federal, state, local and district health officers, and boards of health, and all other health authorities; institutions caring for the mentally ill; and with any other persons, institutions, or agencies.

120515. The department shall investigate conditions affecting the prevention and control of venereal diseases and approved

procedures for prevention and control, and shall disseminate educational information relative thereto.

120520. The department shall conduct educational and publicity work as it may deem necessary; and, from time to time, shall cause to be issued, free of charge, copies of regulations, pamphlets, and other literature as it deems reasonably necessary.

120525. The department may establish, maintain, and subsidize clinics, dispensaries, and prophylactic stations for the diagnosis, treatment, and prevention of venereal diseases, and may provide medical, advisory, financial, or other assistance to the clinics, dispensaries, and stations as may be approved by it. No clinic, dispensary, or prophylactic station shall be approved unless it meets the requirements of the board and complies with its regulations.

120530. The department may furnish treatment for a case or for a group of cases in rural counties or cities upon the recommendation of the local health officer if adequate facilities for the treatment are not available in the county or city.

120535. Any state agency conducting a public hospital shall admit acute venereal disease cases, when, in the opinion of the department or the local health officer having jurisdiction, persons infected with venereal disease may be a menace to public health.

120540. The department may require any physician in attendance on a person infected or suspected of being infected with a venereal disease infection to submit specimens as may be designated for examination, when in its opinion the procedure is reasonably necessary to carry out the provisions and purposes of this chapter.

120545. The examination may be made in the state laboratory or in a local public health laboratory designated by the department or in a clinical laboratory that is under the immediate supervision and direction of a clinical laboratory technologist or a licensed physician and surgeon.

120550. Nothing in this chapter limits any person’s freedom to have additional examinations made elsewhere than specified in this chapter.

120555. Every diseased person shall give all information required by this chapter, including the name and address of any person from whom the disease may have been contracted and to whom the disease may have been transmitted.

120560. Every diseased person shall from time to time submit to approved examinations to determine the condition of the disease.

120565. If any person subject to proper venereal disease control measures discontinues any control procedure required by this chapter, the agency administering the procedure prior to the discontinuance shall make reasonable efforts to determine whether the person is continuing to comply with the procedure elsewhere.

120570, If it appears reasonably likely that the person is not complying with the procedure elsewhere, the agency that was administering the procedure prior to the discontinuance shall make all reasonable efforts to induce the person to comply; and if it thereafter appears reasonably likely that he or she has failed to comply, shall report his or her name and address to the local health officer or board of health, or to the department where there is no local health officer or board.

120575. It is the duty of the local health officers to use every available means to ascertain the existence of cases of infectious venereal diseases within their respective jurisdictions, to investigate all cases that are not, or probably are not, subject to proper control measures approved by the board, to ascertain so far as possible all sources of infection, and to take all measures reasonably necessary to prevent the transmission of infection.

120580. Notwithstanding any other provision of law, a person employed by a public health department as a venereal disease case investigator may perform venipuncture or skin puncture for the purpose of withdrawing blood for test purposes, upon specific authorization from a licensed physician and surgeon, even though he or she is not otherwise licensed to withdraw blood; provided that the person meets all of the following requirements:

(a) He or she works under the direction of a licensed physician and surgeon.

(b) He or she has been trained by a licensed physician and surgeon in the proper procedures to be employed when withdrawing blood, in accordance with training requirements established by the board, and has a statement signed by the instructing physician and surgeon that the training has been successfully completed.

120585. Local health officers may inspect and quarantine any place or person when the procedure is necessary to enforce the regulations of the board or the department.

120590. It is the duty of the district attorney of the county where a violation of this chapter may occur to prosecute the person accused of the violation.

120595. In any prosecution for a violation of any provision of this chapter, or any rule or regulation of the board made pursuant to this chapter, or in any quarantine proceeding authorized by this chapter, or in any habeas corpus or other proceeding in which the legality of the quarantine is questioned, any physician, health officer, spouse, or other person shall be competent and may be required to testify against any person against whom the prosecution or other proceeding was instituted, and the privileges provided by Sections 970, 971, 980, 994, and 1014 of the Evidence Code are not applicable to or in any such prosecution or proceeding.

120600. Any person who refuses to give any information to make any report, to comply with any proper control measure or

examination, or to perform any other duty or act required by this chapter, or who violates any provision of this chapter or any rule or regulation of the state board issued pursuant to this chapter, or who exposes any person to or infects any person with any venereal disease; or any person infected with a venereal disease in an infectious state who knows of the condition and who marries or has sexual intercourse, is guilty of a misdemeanor.

120605. Nothing in this chapter shall be construed to interfere with the freedom of any adherent of teachings of any well-recognized religious sect, denomination, or organization to depend exclusively upon prayer for healing in accordance with the teachings of the religious sect, denomination, or organization. Any such person, along with any person treating him or her, shall be exempt from all provisions of this chapter regarding venereal diseases, except that the provisions of this code and the regulations of the board regarding compulsory reporting of communicable diseases and the quarantine of those diseases, and regarding callings that a person with venereal disease may not engage, shall apply.

CHAPTER 2. PRENATAL SYPHILIS TESTS

120675. ''Approved laboratory'' as used in this chapter means a laboratory approved by the department, or any other laboratory whose director is licensed by the department according to law.

120680. ''Standard laboratory blood test'' as used in this chapter means a test for syphilis approved by the department.

120685. Every licensed physician and surgeon or other person engaged in prenatal care of a pregnant woman, or attending the woman at the time of delivery, shall obtain or cause to be obtained a blood specimen of the woman at the time of the first professional visit or within 10 days thereafter.

120690. The blood specimen thus obtained shall be submitted to an approved laboratory for a standard laboratory test for syphilis.

120695. In submitting a specimen to a laboratory the physician shall designate it as a prenatal test or a test following recent delivery.

120700. The laboratory shall submit the laboratory reports of records to the department as are required by regulation of the department. The health officer may destroy any copies of reports that have been retained by him or her pursuant to this section for a period of two years.

120705. All laboratory reports are confidential, and are not open to public inspection.

120710. In case of question concerning the accuracy of a test required by this chapter, it is mandatory upon the department to accept specimens for checking purposes from any district in the state.

120715. Any licensed physician and surgeon, or other person engaged in attendance upon a pregnant woman or a recently

delivered woman, or any representative of a laboratory who violates any provision of this chapter, is guilty of a misdemeanor. However, a licensed physician and surgeon, or other person engaged in attendance upon a pregnant or recently delivered woman, whose request for a specimen is refused, is not guilty of a misdemeanor for failure to obtain it.

CHAPTER 3. INFORMATION ON VENERAL DISEASE MATERIALS

120750. The department shall develop and prepare posters and leaflets that inform the public of venereal disease and make the posters and leaflets available to the California State Board of Pharmacy for distribution.

The department may determine the size, shape, and materials of the posters and leaflets so as to adequately fulfill the purposes of this chapter.

PART 4. HUMAN IMMUNODEFICIENCY VIRUS (HIV)

CHAPTER 1. DEFINITIONS

120775. As used in this code:

(a) ''AIDS'' means acquired immune deficiency syndrome.

(b) ''Human immunodeficiency virus'' or ''HIV'' means the etiologic virus of AIDS.

(c) ''HIV test'' means any clinical test, laboratory or otherwise, used to identify HIV, a component of HIV, or antibodies or antigens to HIV.

CHAPTER 2. CALIFORNIA ACQUIRED IMMUNE DEFICIENCY SYNDROME (AIDS) PROGRAM (CAP)

120800. The intent of the Legislature in enacting this chapter is as follows:

(a) To fund specified pilot AIDS education programs.

(b) To fund pilot projects to demonstrate the value of noninstitutional health care services such as hospice, home health, and attendant care in controlling costs and providing humane care to people with AIDS and AIDS-related conditions.

(c) To fund clinical research.

(d) To fund the development of an AIDS Mental Health Project.

(e) To fund specified needs assessments, studies, and program evaluations.

(f) To authorize the use of funds appropriated by Section 6 of Chapter 23 of the Statutes of 1985 for preventive education for individuals who are seropositive as a result of antibody testing.

(g) To promote broad-based support for AIDS programs by encouraging community level networking and coordination of

efforts among private sector, nonprofit, and public service agencies as well as health care professionals and providers of essential services.

(h) To promote an aggressive community-based HIV infection prevention program in all communities and areas where behaviors and prevalence indicate high risk of HIV infection, and to encourage local programs to involve racial and ethnic minorities in a leading role to plan the development, implementation, and evaluation of preventive education, HIV testing, delivery of care, and research activities that are necessary to the formation of a comprehensive, community-based, culturally sensitive HIV infection prevention strategy.

(i) To promote education of health care practitioners concerning new clinical manifestations of HIV, particularly among women and children.

120805. (a) The department shall:

(1) Additionally, use funds appropriated by Section 6 of Chapter 23 of the Statutes of 1985 for purposes of making reimbursements to counties pursuant to Section 120895, for preventive education for individuals who are seropositive as a result of antibody testing.

(2) Issue contracts to evaluate the effectiveness of the AIDS information and education program conducted by the department.

(3) Issue contracts for development and implementation of pilot programs of professional education and training for hospital, home health agency, and attendant care workers.

(4) Issue contracts for the development and implementation of pilot programs to reduce the spread of AIDS through residential detoxification and outpatient detoxification and treatment services for intravenous drug users with AIDS or AIDS-related conditions.

(5) Monitor state and federal AIDS-related budget and policy development, and coordinate budget items to ensure that funding for matters related to AIDS is adequate and complete within the department each fiscal year.

(6) Develop and maintain an information clearinghouse within the department including periodic updates or releases to inform health professionals or community organizations providing services to people with AIDS or AIDS-related conditions of the status of current or new clinical drug trials. These updates shall be compiled through review of scientific journals and in conjunction with the UC AIDS Task Force and researchers conducting clinical drug trials in California.

(7) Review, edit, and input summaries from scientific journals into the Computerized AIDS Information Network (CAIN), and do outreach about CAIN availability to health professionals.

(8) Develop and conduct a needs assessment of the availability of supportive services for people with AIDS or AIDS-related conditions. The needs assessment shall be conducted in conjunction with the state's AIDS education contractors and with any public or private

agencies providing services to people with AIDS or AIDS-related conditions.

(9) Promote information and education programs for the general public to correct misinformation about AIDS. This shall include, but need not be limited to, periodic press releases to the printed and broadcast media and public service announcements.

(10) Prepare a report to the Legislature on the feasibility of coordinating various levels of health care, including health facility licensure categories within one program in a city and county that would serve persons with HIV infections, AIDS-related complex, and AIDS. The levels of health care to be covered in the report include, but are not limited to, general acute care hospital, acute psychiatric hospital, skilled nursing facility, hospice, intermediate care facility, residential care facility, adult day health care facility, and congregate living health facility. The report shall be developed in cooperation with the office, and shall be submitted to the Legislature before July 1, 1990. The director may contract for services necessary for completion of the report that cannot be provided through existing resources of the department.

(11) Establish, with the assistance of other state agencies as the department deems appropriate, centralized translation services to facilitate development of multilanguage, culturally relevant educational materials on HIV infection.

(12) Include, to the extent feasible, in its HIV surveillance and reporting practices, a breakdown of the major Asian-Pacific Islander subgroup populations. This breakdown shall be reflected in the surveillance and morbidity statistics issued by the director pursuant to Section 120825.

(13) Include, to the extent feasible with existing resources, in its HIV surveillance and reporting practices, information concerning newly identified clinical manifestations of HIV infection and available resources for health care practitioners to seek diagnostic and treatment information.

(b) The director shall contract for a prospective two-year study to accomplish the following objectives:

(1) Determine the medical costs of AIDS, comparing inpatient care, outpatient care, physician services, and community support services.

(2) The study shall include cost factors in the review of inpatient costs that may not be apparent in the analysis of charges, such as private rooms and social work.

The study shall include an interim report to the Legislature six months after receipt of funding and a final report to the Legislature within two years of receipt of funding so that the state can be in a knowledgeable position to plan for and provide the services and funding needed to meet this public health crisis.

(c) Notwithstanding Chapter 2 (commencing with Section 10290) of Part 2 of Division 2 of the Public Contract Code, if the director determines that it is in the best interest of the state to enter into a contract for the purposes specified below without competitive bids, then the state director may, during the 1985–86 fiscal year, enter into a sole source contract for all of the following:

(1) Educational program evaluation.

(2) Education of hospital, home health agency, and attendant care workers.

(3) Drug education and treatment programs.

(4) The cost-of-care study.

(d) Notwithstanding Chapter 2 (commencing with Section 10290) of Part 2 of Division 2 of the Public Contract Code, if the director determines that it is in the best interest of the state to enter into a contract for the purposes of the preparation of the feasibility report required by paragraph (10) of subdivision (a) without competitive bids, then the state director may enter into a sole source contract for the preparation of the feasibility report. The contract for the feasibility report shall be exempt from the requirement of approval by the Department of General Services and the Department of Finance.

120815. (a) The department may provide supplemental funding to residential AIDS shelters in accordance with Section 120810, as long as that section is operative, and to residential care facilities for persons with a chronic, life-threatening illness, that are licensed in accordance with Chapter 3.01 (commencing with Section 1568.01) of Division 2.

(b) A residential AIDS shelter that receives a supplemental grant and subsequently is licensed as a residential care facility for persons with a chronic, life-threatening illness prior to the end of the grant period shall be entitled to the full amount of the supplemental grant.

120817. (a) The State Department of Health Services shall develop and implement, with the assistance of other state agencies, a pilot project to provide a model women's HIV early intervention center. The Office of AIDS, within the department, shall designate areas of the state in which to implement this pilot project. The selection shall be based on observed HIV and AIDS trends among women. At a minimum, two pilot sites shall be established. Los Angeles County and the Alameda/Contra Costa County area shall be considered as possible sites for the pilot project. The women's HIV early intervention centers shall be linked to, or located with, AIDS outpatient treatment clinics and clinics providing a full range of women's health services.

(b) Women's HIV early intervention services shall include, but not be limited to, medical monitoring, laboratory tests, colposcopy, mammography, HIV-related obstetrical and gynecological services, psychosocial support, HIV transmission risk assessment, risk

reduction counseling and support, health education, nutritional counseling, assistance with clinical drug trials, alcohol and substance abuse treatment, and child care.

(c) It is the intent of the Legislature that funding for implementation of this pilot project be provided from funds allocated to the Office of AIDS within the State Department of Health Services for early intervention for the prevention of HIV and AIDS among women, subject to appropriation in the Budget Act of 1994.

(d) The department shall develop and implement this pilot project on or before July 1, 1995.

(e) This section shall become inoperative on June 30, 1998, and, as of January 1, 1999, is repealed, unless a later enacted statute, which becomes effective on or before January 1, 1999, deletes or extends the dates on which it becomes inoperative and is repealed.

120820. (a) Personal data in any investigations, reports, and information relating thereto shall be kept confidential and be afforded protections provided by Section 100330, except as provided by Section 1603.1 or 1603.3.

(b) If patient-identifying information is subpoenaed from the department, the department shall seek and the court shall issue a protective order keeping this information confidential. The court order may require production, but limit the use and disclosure of, records, require production with names and identifying information deleted, provide sanctions for misuse of records or set forth other methods for assuring confidentiality.

120825. The director shall:

(a) Be prepared to report to the Legislature on the amounts and recipients of contracts or block grant awards, and needs assessments conducted by the department.

(b) Issue once each month a public information release to the state contractors, local health departments, medical societies or organizations, nursing associations, hospital and hospital administrator associations, blood banks or centers, hemophilia associations and treatment centers, lesbian and gay health organizations, media outlets or community organizations, and other interested organizations or individuals, and the news media identifying research breakthroughs, new treatment protocols, infection control updates, surveillance and morbidity statistics, and other current and up-to-date information regarding AIDS education, treatment, or patient service programs.

120830. Pilot projects to demonstrate the cost effectiveness of home health, attendant, or hospice care shall be initiated through a block grant program, as described in this section.

(a) The state director shall designate the contractors and the amounts that contractors will receive for the block grant direct service demonstration projects.

(b) An amount of not more than 10 percent of the grant may be retained by contractors for administrative overhead. Contractors accepting block grant funds shall compile comparative cost data reports for transmission to the department and the Legislature. Reports shall be made semiannually until the conclusion of the project.

(c) Contractors receiving direct service block grants shall:

(1) Encourage broad-based community involvement and support for AIDS programs and involve charitable, other nonprofit, and other agencies as well as health care professionals as providers of essential services.

(2) Ensure the proposed services are not duplicated in the community and are based on the needs of people with AIDS, AIDS-related conditions, at-risk communities, their families or others affected by AIDS.

(3) Make maximum use of other federal, state, and local funds and programs.

(4) Provide services that are culturally and linguistically appropriate to the population served.

(c) Counties with existing programs of demonstrated effectiveness in AIDS education or services shall receive equal consideration with other applicants and shall not be penalized when awarding funds pursuant to this chapter with respect to the proposed expansion of their programs.

(d) Contractors shall develop a comprehensive service system including, but not limited to, the following essential services, that can be provided either directly by the contractors or indirectly through a referral network arranged by the contractor:

(1) Provision for hospice, skilled nursing facility, home health care, and homemaker chore services.

(2) Individual consultation and health planning and assessment.

(3) Information for people with AIDS or AIDS-related conditions regarding death and dying.

(4) Evaluation and referral services for medical care.

(5) Referral services for mental health services, as appropriate.

(6) Assistance in applying for financial aid or social services that are available and for which clients qualify.

The system of essential services developed by a contractor shall offer maximum opportunity for involvement of family, friends, domestic partners and of nonprofit and charitable organizations in preventing the severe, adverse health and social consequences that result from being diagnosed with AIDS or AIDS-related conditions.

(e) The direct service program for provision of essential services shall ensure:

(1) An ongoing quality assurance program.

(2) Confidentiality assurances and methods for developing interagency confidentiality agreements.

120835. (a) The department shall amend the home health, hospice, and attendant care pilot projects funded pursuant to this chapter, to include, to the extent that it is cost-effective to the Medi-Cal program or the General Fund, the payment of private health insurance premiums for participants in the pilot projects prior to the participants becoming eligible for Medi-Cal.

(b) The director shall make a determination of cost-effectiveness, that shall be reviewed by the Department of Finance. The director may use existing budgeted resources for services provided for pursuant to subdivision (a).

120840. The Department of Mental Health shall establish an AIDS mental health project, as described in this section.

(a) The program should include, but need not be limited to, the following:

(1) The conduct of a statewide needs assessment of AIDS-related mental health issues.

(2) The conduct of education and training for mental health professionals throughout the state.

(3) The conduct, through the Office of Promotion, of a media campaign on such issues as the use of support groups, the relationship between stress and the immune system, and dealing with grief.

(b) The Department of Mental Health shall coordinate projects and resources directly with the department.

(c) The Director of the Department of Mental Health may appoint advisory groups for this project as needed.

(d) Notwithstanding any provision of Chapter 2 (commencing with Section 10290) of Part 2 of Division 2 of the Public Contract Code, if the Director of Mental Health determines that it is in the best interest of the state to enter into a contract for the purposes specified in this section without competitive bids, then the director may, during the 1985–86 fiscal year, enter into a sole source contract for these purposes.

120845. Pilot programs to reduce the spread of AIDS through residential detoxification and outpatient detoxification and treatment services for intravenous drug users, as described in paragraph (4) of subdivision (a) of Section 120805, shall be initiated through local agency operated AIDS-related substance abuser programs.

(a) The director shall designate the local agency contractors and the amounts that these contractors will receive for the AIDS-related substance abuser demonstration programs.

(b) The contractors shall develop a comprehensive service system including, but not limited to, the following essential services, that can be provided either directly by the contractors or through a referral network arranged by the contractors:

(1) Residential detoxification programs for intravenous drug users.

(2) Outpatient detoxification programs including health promotion and health assessment for intravenous drug users.

(3) AIDS and substance abuse information, consultation and resource referral to providers of services to AIDS patients and to drug treatment providers.

(4) Outreach, health promotion, health assessment, consultation and referrals for homeless youth substance abusers.

120850. The amount of two million three hundred thousand dollars ($2,300,000), appropriated pursuant to Section 2 of Chapter 767 of the Statutes of 1985, shall be allocated to the University of California for research into AIDS. When expending these funds, the university shall solicit and consider proposals from within the University of California system and from universities and colleges outside the University of California system as well. In the expenditure of these funds, it is the preference of the Legislature that priority be given to viral cultures, clinical trials, and the administrative and laboratory support services necessary to conduct the trials.

120855. (a) The department may use funds appropriated to it to pay the costs, including reimbursements to contractors for administrative costs, of providing home and community-based services to eligible persons with a diagnosis of acquired immune deficiency syndrome (AIDS) or AIDS related conditions (ARC) when the funds are appropriated for that purpose.

(b) To the extent that federal financial participation is available, each department within the Health and Welfare Agency, including departments designated as single state agencies for public social services programs, shall waive regulations and general policies and make resources available when necessary for the provision of home and community-based care services to eligible persons with a diagnosis of AIDS or ARC.

120860. (a) The department shall, in coordination with the State Department of Alcohol and Drug Programs, develop a plan that assesses the need for, a program of acquired immune deficiency syndrome (AIDS) primary prevention, health education, testing, and counseling, specifically designed for women and children, that shall be integrated, as the department deems appropriate, into the following programs:

(1) The California Childrens Services Program provided for pursuant to Article 5 (commencing with Section 123800) of Chapter 3 of Part 2 of Division 106.

(2) Programs under the Maternal and Child Health Branch of the department.

(3) The Child Health Disability Prevention Program provided for pursuant to Article 6 (commencing with Section 124025) of Chapter 3 of Part 2 of Division 106.

(4) The Genetic Disease Program, provided for pursuant to Sections 125000 and 125005.

(5) The Family Planning Programs, provided for pursuant to Chapter 8.5 (commencing with Section 14500) of Part 3 of Division 9 of the Welfare and Institutions Code.

(6) The Rural and Community Health Clinics Program.

(7) The County Health Services Program, provided for pursuant to Part 4.5 (commencing with Section 16700) of Division 9 of the Welfare and Institutions Code.

(8) The Sexually Transmitted Disease Program.

(9) Programs administered by the State Department of Alcohol and Drug Programs.

(b) The AIDS-related services that shall be addressed in the plan specified in this section shall include, but not be limited to, all of the following:

(1) A variety of educational materials that are appropriate to the cultural background and educational level of the program clientele.

(2) The availability of confidential HIV antibody testing and counseling either onsite or by referral.

(c) Pursuant to subdivision (a), the plan shall include a method to provide the educational materials specified in subdivision (b) and appropriate AIDS-related training programs for those persons who provide direct services to women and children receiving services under the programs specified in this section.

(d) In order that the AIDS-related services plan provided through the programs specified in this section be as effective as possible, the department shall ensure that the educational materials and training programs provided for each program specified in subdivision (a) are developed in coordination with, and with input from, each of the respective programs.

(e) Nothing in this section shall preclude the department from incorporating the plan requirements into the department's annual state AIDS plan, or any other reporting document relating to AIDS deemed appropriate by the department.

120865. (a) The department, in consultation with the State Department of Alcohol and Drug Programs, shall review existing programs administered by the department, the State Department of Alcohol and Drug Programs, or both that provide services to persons with AIDS or ARC or persons at risk of becoming infected with HIV to identify whether there are unmet needs in targeting these programs to substance abusers, racial and ethnic minority populations, and women. In reviewing the existing programs, the department shall consider the provision of care by the existing programs outside of a general acute care hospital setting to substance abusers, racial and ethnic minority populations, and women by taking into account the current availability of beds outside of a hospital setting, the availability of those beds to substance abusers, racial and ethnic minority populations, and women, and the projected need for additional beds outside of a hospital setting for

substance abusers, racial and ethnic minority populations, and women.

(b) The department shall take into account the unmet needs of substance abusers, racial and ethnic minority populations, and women as identified pursuant to subdivision (a) in its planning and development of programs that provide services to persons with AIDS and ARC.

(c) The department shall report its findings pursuant to this section on or before April 1, 1991. The report shall include, but not be limited to, recommendations suggesting programmatic changes deemed appropriate by the department that would better meet the needs of substance abusers, racial and ethnic minority populations, and women with, or at risk of becoming infected with, HIV, and the fiscal considerations for implementing the recommendations.

120870. (a) Every person who sells alkyl nitrites shall at the point of sale of the alkyl nitrites, post a sign measuring no less than five by seven inches to read as follows:

''Warning: These products contain alkyl nitrites ('poppers'). Inhaling or swallowing alkyl nitrites may be harmful to your health. The use of alkyl nitrites may affect the immune system. Several studies have suggested that their use is associated with the development of Kaposi's sarcoma (an AIDS condition).''

(b) The signs required by subdivision (a) shall be furnished by the manufacturers or distributors of alkyl nitrites in California in sufficient quantity with the shipments of alkyl nitrites to allow posting at all points of sale.

(c) ''Point of sale'' for purposes of this section is that place within close proximity of the shelves or other area where the alkyl nitrites are displayed for consumer purchase.

CHAPTER 3. ACQUIRED IMMUNE DEFICIENCY SYNDROME (AIDS) INFORMATION

120875. The State Department of Education shall provide information to school districts on acquired immune deficiency syndrome (AIDS), on AIDS-related conditions, and on Hepatitis B. This information shall include, but not be limited to, any appropriate methods school employees may employ to prevent exposure to AIDS and Hepatitis B, including information concerning the availability of a vaccine to prevent contraction of Hepatitis B, and that the cost of vaccination may be covered by the health plan benefits of the employees. This information shall be compiled and updated annually, or if there is new information, more frequently, by the State Department of Education in conjunction with the department department and in consultation with the California Conference of

Local Health Officers. In order to reduce costs, this information may be included as an insert with other regular mailings to the extent practicable, and the information required to be provided on Hepatitis B shall be provided in conjunction with the information required to be provided on AIDS.

120880. School districts shall inform their employees annually, or if there is new information, more frequently, of the information compiled by the State Department of Education pursuant to Section 120875.

120885. The Legislature finds and declares it is of great benefit to the public health and essential to the protection of safe blood and blood components available for transfusion to provide testing for the presence of antibodies to the probable causative agent of acquired immune deficiency syndrome (AIDS) as a function separate from the donation of blood or blood components.

120890. The director shall, in order to protect the public health and in order to make blood and blood components safe for transfusion, designate counties that shall establish alternative testing sites, within the funds available, pursuant to this section and Sections 120885 and 120895. When designating a county pursuant to this section, the director may consider whether the county contains a permanent operational blood bank. All alternative test sites, established pursuant to this section and Sections 120885 and 120895, shall be under the supervision of a physician and surgeon or be a clinic or health facility licensed by the department.

120895. (a) Each county, designated by the director, shall make the test available within its jurisdiction without charge, in an accessible manner and the tests shall be made available by the county on a confidential basis through use of a coded system with no linking of individual identity with the test request or results. The number and location of sites in each county designated by the director shall be approved by the director. The test shall be made available by the county either directly or by contract with a physician and surgeon or with any clinic or health facility licensed by the department. Neither the county nor anyone else administering the test described in this section and Sections 120885 and 120890, shall ask for the name, social security number, or any other information that could reveal the identity of the individual who takes the test. Each alternative test site shall make available confidential information and referral services, within the funds available, to individuals who seek testing. A county may subcontract with individuals or entities to provide information and referral services.

All alternative test sites shall provide a referral list of physicians and surgeons or clinics knowledgeable about AIDS, to all persons who have any known risk factor for AIDS, especially those who have a reactive antibody test, for further information and explanation of the test results and for medical evaluation.

At a minimum, individuals seeking testing shall be informed about the validity and accuracy of the antibody test before the test is performed. All testing site personnel shall be required to attest to having provided the above information. Furthermore, all individuals who are tested at the sites established by this section and Sections 120885 and 120890 shall be given the results of this test in person. All sites providing antibody testing pursuant to this section and Sections 120885 and 120890 shall have a protocol for referral for 24-hour inpatient and mental health services. All individuals awaiting test results and all persons to whom results are reported shall be informed of available crisis services and shall be directly referred, if necessary.

Each county, designated by the director, shall be required to submit a plan to the department within 45 days after the effective date of this section that details where testing and pretest and posttest information and referral will be provided and the qualifications of the staff who will be performing the services required by this section and Sections 120885 and 120890. The department shall make training available, especially to smaller counties.

(b) The department shall establish a reimbursement process for counties within 30 days after the effective date of this section for the following services:

(1) Informing test applicants on the test's reliability and validity.

(2) Administration of tests, analysis of test samples, and costs associated with the laboratory work required by this antibody test.

(3) Short-term information and referral sessions, of no more than one visit per person tested for the purpose of transmitting the person's test results and, as requested, for referral to available followup services.

The department shall establish the amounts to be reimbursed for each of these services, but the amounts shall be established at a level to ensure that the purposes of this section and Sections 120885 and 120890 are carried out. Reimbursements shall be made for each service provided.

(c) The department may replace the test for the antibody to the probable causative agent for AIDS with another type of HIV test, as the department deems appropriate.

(d) The director may grant a waiver to a county from the requirements of this section and Sections 120885 and 120890 if the county petitions the director for the waiver and the director determines that the waiver is consistent with the purposes of this section and Sections 120885 and 120890.

(e) A participating county or the department may accept grants, donations, and in-kind services for purposes of carrying out this section and Sections 120885 and 120890.

CHAPTER 4. ACQUIRED IMMUNE DEFICIENCY SYNDROME (AIDS) EARLY INTERVENTION PROJECTS

120900. (a) The director shall award contracts to early intervention projects to provide long-term services to persons infected with HIV. The purposes of the early intervention projects shall be to provide appropriate medical treatment to prevent or delay the progression of disease that results from HIV infection, to coordinate services available to HIV infected persons, and to provide information and education, including behavior change support, to HIV infected persons to prevent the spread of HIV infection to others. The director shall award contracts to early intervention projects from a variety of geographical areas. In selecting projects, the director shall ensure that each early intervention project will respond to the needs of its projected service area, will be sensitive to linguistic, ethnic, and cultural differences, and will accommodate the special needs of clients by taking into account the circumstances that placed them at risk for becoming infected with HIV. The director shall award contracts for early intervention services at a pace that reflects the availability of private, state, and federal reimbursement pursuant to Section 120920. Prior to awarding contracts to new programs, the director shall consider utilizing existing services and programs with which it currently contracts, or that are currently in operation, and that provide HIV-related services.

(b) Early intervention projects that are awarded contracts pursuant to this section shall provide all of the following services:

(1) Health assessment of HIV infected persons, including, but not limited to, a physical examination and immunologic and clinical monitoring.

(2) Health education and behavior change support related to reducing the risk of spreading HIV infection to others and to maximize the healthy and productive lives of HIV infected persons.

(3) Psychosocial counseling services.

(4) Information and referrals for social services.

(5) Information and referrals on available research for the treatment of HIV infection.

(6) Covered outpatient preventative or therapeutic health care services related to HIV infection, as determined by the director.

(7) Case management.

(c) An early intervention project shall establish a core case management team for each client to assess the needs of the client and to develop, implement, and evaluate the client's written individual service plan. As needed by the client, the individual service plan shall include services specified in subdivision (b), other support services, legal services, public assistance, insurance, and inpatient and outpatient health care services needs of the client. A core case management team shall include, but not be limited to, a physician

and surgeon, a physician assistant or nurse practitioner, a health educator, a case manager, and the client. Case management in an early intervention project shall incorporate an interdisciplinary approach. Other professionals, paraprofessionals, and other interested persons deemed appropriate by the members of the core case management team also may be included. The case manager shall coordinate the objectives specified in the client's individual service plan. The case manager also shall monitor and assist the client through all services provided by the project and shall provide information, guidance, and assistance to the client regarding support services, legal services, public assistance, insurance, and inpatient and outpatient health care services. The project shall designate a sufficient number of case managers to reflect case manager-to-client ratios established by the department.

120905. (a) The director shall commence awarding contracts to projects on or before July 1, 1990. In awarding contracts to early intervention projects, the director may select projects from each of the following models:

(1) A privately operated profit or nonprofit clinic that is not licensed as part of a health facility and that provides all of the services specified in subdivision (b) of Section 120900.

(2) A publicly operated clinic that is not licensed as part of a health facility and that provides all of the services specified in subdivision (b) of Section 120900.

(3) A combination of independent privately operated clinics, publicly operated clinics, and other health care providers that in total provide all of the services specified in subdivision (b) of Section 120900.

(4) Any other model that the director considers worthy of receiving funds.

(b) An applicant for a contract to operate an early intervention project that is not a part of a county health department shall submit its application to the county health department for review and comment. The county health department shall provide comment on the application to the department within a time period to be specified by the department. The failure by a county health department to comment on an application submitted to it within the time period specified by the department shall not jeopardize the application, and the department in a case of this nature may process and award a contract in the absence of comment by the county health department.

(c) An applicant for a contract to operate an early intervention project shall indicate in its application how it intends to coordinate with county health department programs, community-based organizations that provide HIV-related services, and other public and private entities that may provide services to a person who is infected with HIV.

120910. (a) The department shall collect data from the early intervention projects, assess the effectiveness of the different models of early intervention projects, and report its findings to the Legislature on or before January 1, 1992, and on or before January 1 of each subsequent year.

(b) The department shall continuously collect data from each early intervention project. The data collected may include, but not be limited to, the following:

(1) The total number of clients served.

(2) The number of clients utilizing each service provided by the project.

(3) Demographics on clients in the aggregate.

(4) The source of funding for each type of service provided.

(5) The cost of each type of service provided.

(6) Medical treatment modalities utilized in the aggregate.

(7) Changes in the clinical status of clients in the aggregate.

(8) Changes in behaviors that present risks of transmitting HIV infection of the clients in the aggregate.

(9) The psychosocial changes of clients in the aggregate.

(10) Referrals made by the project.

(11) Perceived unmet needs of the clients served by the project.

(c) The department shall develop and distribute to each early intervention project forms for data collection that are designed to elicit information necessary for the department to comply with the requirements of subdivision (b). The data may be used by the department to comply with the requirements of subdivision (a).

120915. (a) The department shall establish a reimbursement schedule for all of the services detailed in subdivision (b) of Section 120900. The amounts to be reimbursed for these services shall be commensurate with the costs of providing these services.

(b) The department shall develop and disseminate guidelines to assist early intervention projects in identifying appropriate public and private payers of early intervention services. The guidelines shall take into account each client's access to, and eligibility for, private health insurance and public medical assistance. The guidelines shall include, but not be limited to, the reimbursement schedule established pursuant to subdivision (a) and the elements identified in subdivisions (c) to (h), inclusive.

(c) Reimbursement under Sections 120900 to 120920, inclusive, shall not be made for any services that are available to the client under a private health insurance program. Early intervention projects shall inquire of each client as to the client's coverage by a private health insurance policy. Where a client has a private health insurance policy, the early intervention project shall bill the insurer for those services in subdivision (b) of Section 120900 that are covered by the client's policy.

(d) The department shall develop and implement, or cause to be implemented by an early intervention project, a uniform sliding fee schedule for services provided to individuals under Sections 120900 to 120920, inclusive. The schedule shall be based on the client's ability to pay.

(e) The department may apply for any funds available from the federal government for the reimbursement of those services to be provided by early intervention projects, including, but not limited to, funds available pursuant to Section 2318 of the Public Health Service Act, as added by Public Law 100-607, that provides for the development of model protocols for the clinical care of individuals who are infected with HIV.

(f) To the extent permitted under existing law, the Medi-Cal program shall provide reimbursement to early intervention projects for services provided under Sections 120900 to 120920, inclusive, that are covered under the Medi-Cal program. This subdivision shall not be construed to confer Medi-Cal eligibility on any person who does not meet existing Medi-Cal eligibility requirements.

(g) The department shall use federal and state general funds that are appropriated for the purpose of purchasing HIV-related drug treatments and related services, to reimburse for covered outpatient preventative or therapeutic health care services, as defined by the director, provided that the client is eligible for a federal or state program that subsidizes the cost of HIV-related drugs and related services. If Assembly Bill 2251 of the 1989–90 Regular Session is enacted, the department shall use the provisions in Chapter 6 (commencing with Section 120950) to implement this subdivision.

(h) The department shall use moneys from the General Fund to cover expenses for early intervention services that are not otherwise reimbursed, to the extent that moneys from the General Fund are expressly appropriated to the department for early intervention services.

120920. The Legislature hereby finds and declares that people with HIV infection may not avail themselves of early intervention services unless they are aware of the availability of the services and the efficacy of early intervention in prolonging life. This awareness by HIV-infected persons is critical to maximizing the benefits of early intervention. Therefore, it is the intent of the Legislature that the department includes early intervention education as a component of information and education grants in the first grant cycle following enactment of Sections 120900 to 120920, inclusive.

CHAPTER 5. PROVISION OF AZIDOTHYMIDINE

120925. The Legislature hereby finds and declares all of the following:

(a) The drug azidothymidine (AZT) improves and prolongs the quality of life for those suffering from acquired immune deficiency syndrome (AIDS) or AIDS-related conditions, is believed to reduce the infectiousness of a person infected with human immunodeficiency virus (HIV), and is the only drug approved by the federal Food and Drug Administration for treatment of AIDS and AIDS-related conditions.

(b) Hundreds of Californians infected with HIV are receiving AZT due to a subsidy for AZT made available by the federal government for low-income people.

(c) The department estimates that it will have sufficient federal funds to maintain those enrolling in the program prior to October 1, 1988, through April 1989, if it terminates new enrollees beginning October 1, 1988.

(d) The department intends to direct counties to cease accepting new enrollees for the subsidy program beginning October 1, 1988, because of the exhaustion of these federal funds.

(e) The federal government has an obligation to continue to support the subsidy program that it has initiated because of the horrendous moral consequences of terminating the access of low-income infected people to the drug.

(f) The funding cycle for federal programs precludes appropriating additional funds to maintain this program until June of 1989.

120930. It is the intent of the Legislature that the State of California continue to provide temporary funding for the program to ensure that those whose health depends on obtaining access to AZT and who are unable to afford it can receive the drug during this interim period.

120935. The department shall continue through June 1989, the AZT subsidy program established in 1987 with federal funds. The department shall maintain the eligibility standards used for the program as of August 1988. The department shall allocate to local health jurisdictions the funds appropriated to support the subsidy program. The department may reallocate funds among these local health jurisdictions as needed to ensure that persons requiring the subsidy receive it through June 1989.

CHAPTER 6. HUMAN IMMUNODEFICIENCY VIRUS (HIV) TREATMENT

120950. The Legislature hereby finds and declares all of the following:

(a) State-of-art knowledge regarding treatment of people infected with the human immunodeficiency virus (HIV) indicates that active HIV infection (AIDS) can be a manageable, though chronic, condition with the use of drugs such as zidovudine (AZT), aerosolized pentamidine, and ganciclovir. AIDS experts across the

nation agree that early intervention with these drugs can prolong life, minimize the related occurrences of more serious illnesses, reduce more costly treatments, and maximize the HIV-infected person's vitality and productivity.

(b) For reasons of compassion and cost effectiveness, the State of California has a compelling interest in ensuring that its citizens infected with the HIV virus have access to these drugs.

(c) The department subsidizes the cost of these drugs for persons who do not have private health coverage, are not eligible for Medi-Cal, or cannot afford to purchase the drug privately. The subsidy program is funded through state and federal sources.

(d) Congress is expected to place limitations on the federal subsidy program that will jeopardize access to these life-prolonging drugs for people whose income is higher than federal income eligibility cap but lower than the state's income eligibility cap.

(e) It is critical that suffering persons with limited income have access to life-prolonging drugs. It is also critical that persons currently eligible for the subsidy program remain eligible regardless of changes that may result from the congressional action and the enactment of this chapter. However, it is appropriate that people who can afford to pay a portion of the cost of treatment be obligated to share the cost of these drugs.

120955. (a) To the extent that state and federal funds are appropriated in the Budget Act for these purposes, the director shall establish and may administer a program to provide drug treatments to persons infected with human immunodeficiency virus (HIV), the etiologic agent of acquired immune deficiency syndrome (AIDS). The director shall develop, maintain, and update as necessary a list of drugs to be provided under this program. Drugs on the list shall include, but not be limited to, the drugs zidovudine (AZT) and aerosolized pentamidine.

(b) The director may grant funds to a county public health department through standard agreements to administer this program in that county. To maximize the recipients' access to drugs covered by this program, the director shall urge the county health department in counties granted these funds to decentralize distribution of the drugs to the recipients.

(c) The director shall establish a rate structure for reimbursement for the cost of each drug included in the program. Rates shall not be less than the actual cost of the drug. However, the director may purchase a listed drug directly from the manufacturer and negotiate the most favorable bulk price for that drug.

(d) Reimbursement under this chapter shall not be made for any drugs that are available to the recipient under any other private, state, or federal programs, or under any other contractual or legal entitlements, except that the director may authorize an exemption

from this subdivision where exemption would represent a cost savings to the state.

120960. (a) The department shall establish uniform standards of financial eligibility for the drugs under the program established under this chapter.

(b) Nothing in the financial eligibility standards shall prohibit drugs to an otherwise eligible person whose adjusted gross income does not exceed fifty thousand dollars ($50,000) per year. However, the director may authorize drugs for persons with incomes higher than fifty thousand dollars ($50,000) per year if the estimated cost of those drugs in one year is expected to exceed 20 percent of the person's adjusted gross income.

(c) The department shall establish and may administer a payment schedule to determine the payment obligation of a person receiving drugs. No person shall be obligated for payment whose adjusted gross income is less than four times the federal poverty level. The payment obligation shall be the lesser of the following:

(1) Two times the person's annual state income tax liability, less funds expended by the person for health insurance premiums.

(2) The cost of drugs.

(d) Persons who have been determined to have a payment obligation pursuant to subdivision (c) shall be advised by the department of their right to request a reconsideration of that determination to the department. Written notice of the right to request a reconsideration shall be provided to the person at the time that notification is given that he or she is subject to a payment obligation. The payment determination shall be reconsidered if one or more of the following apply:

(1) The determination was based on an incorrect calculation made pursuant to subdivision (b).

(2) There has been a substantial change in income since the previous eligibility determination that has resulted in a current income that is inadequate to meet the calculated payment obligation.

(3) Unavoidable family or medical expenses that reduce the disposable income and that result in current income that is inadequate to meet the payment obligation.

(4) Any other situation that imposes undue financial hardship on the person and would restrict his or her ability to meet the payment obligation.

(e) The department may exempt a person, who has been determined to have a payment obligation pursuant to subdivision (c), from the obligation if both of the following criteria are satisfied:

(1) One or more of the circumstances specified in subdivision (d) exist.

(2) The department has determined that the payment obligation will impose an undue financial hardship on the person.

(f) If a person requests reconsideration of the payment obligation determination, the person shall not be obligated to make any payment until the department has completed the reconsideration request pursuant to subdivision (d). If the department denies the exemption, the person shall be obligated to make payments for drugs received while the reconsideration request is pending.

(g) A county public health department administering this program pursuant to an agreement with the director pursuant to subdivision (b) of Section 120955 shall use no more than 5 percent of total payments it collects pursuant to this section to cover any administrative costs related to eligibility determinations, reporting requirements, and the collection of payments.

(h) A county public health department administering this program pursuant to subdivision (b) of Section 120955 shall provide all drugs added to the program pursuant to subdivision (a) of Section 120955 within 60 days of the action of the director, subject to the repayment obligations specified in subdivision (d) of Section 120965.

120965. (a) Effective March 15, 1991, a person determined eligible for benefits under this chapter shall be subject to the payment obligation specified in subdivision (c) of Section 120960.

(b) Persons who are receiving benefits under a HIV drug treatment subsidy program administered by the department prior to March 15, 1991, shall not be subject to the payment obligation specified in subdivision (c) of Section 120960.

(c) Notwithstanding subdivision (b), if any person is disenrolled from eligibility in a HIV drug treatment subsidy program administered by the department for any reason after March 15, 1991, the subsequent enrollment of that person for benefits under this chapter shall be in accordance with the payment obligation specified in subdivision (c) of Section 120960.

(d) Notwithstanding subdivision (b), if a drug is added pursuant to subdivision (a) of Section 120955, any person determined eligible for benefits under this chapter, regardless of the date of enrollment, shall be subject to the payment obligation specified in subdivision (c) of Section 120960 for the added drug. The payment obligation for any other drug shall be determined in accordance with subdivision (b).

CHAPTER 7. MANDATED BLOOD TESTING AND CONFIDENTIALITY TO PROTECT PUBLIC HEALTH

120975. To protect the privacy of individuals who are the subject of blood testing for antibodies to the probable causative agent of acquired immune deficiency syndrome (AIDS) the following shall apply:

Except as provided in Section 1603.1 or 1603.3, as amended by Chapter 23 of the Statutes of 1985, no person shall be compelled in any state, county, city, or other local civil, criminal, administrative,

legislative, or other proceedings to identify or provide identifying characteristics that would identify any individual who is the subject of a blood test to detect antibodies to the probable causative agent of AIDS.

120980. (a) Any person who negligently discloses results of an HIV test, as defined in Section 120775, to any third party, in a manner that identifies or provides identifying characteristics of the person to whom the test results apply, except pursuant to a written authorization, as described in subdivision (g), or except as provided in Section 1603.1 or 1603.3 or any other statute that expressly provides an exemption to this section, shall be assessed a civil penalty in an amount not to exceed one thousand dollars ($1,000) plus court costs, as determined by the court, which penalty and costs shall be paid to the subject of the test.

(b) Any person who willfully discloses the results of an HIV test, as defined in Section 120775, to any third party, in a manner that identifies or provides identifying characteristics of the person to whom the test results apply, except pursuant to a written authorization, as described in subdivision (g), or except as provided in Section 1603.1 or 1603.3 or any other statute that expressly provides an exemption to this section, shall be assessed a civil penalty in an amount not less than one thousand dollars ($1,000) and not more than five thousand dollars ($5,000) plus court costs, as determined by the court, which penalty and costs shall be paid to the subject of the test.

(c) Any person who willfully or negligently discloses the results of an HIV test, as defined in Section 120775, to a third party, in a manner that identifies or provides identifying characteristics of the person to whom the test results apply, except pursuant to a written authorization, as described in subdivision (g), or except as provided in Section 1603.1 or 1603.3 or any other statute that expressly provides an exemption to this section, that results in economic, bodily, or psychological harm to the subject of the test, is guilty of a misdemeanor, punishable by imprisonment in the county jail for a period not to exceed one year or a fine of not to exceed ten thousand dollars ($10,000) or both.

(d) Any person who commits any act described in subdivision (a) or (b) shall be liable to the subject for all actual damages, including damages for economic, bodily, or psychological harm that is a proximate result of the act.

(e) Each disclosure made in violation of this chapter is a separate and actionable offense.

(f) Except as provided in Article 6.9 (commencing with Section 799) of Chapter 1 of Part 2 of Division 1 of the Insurance Code, the results of an HIV test, as defined in Section 120775, that identifies or provides identifying characteristics of the person to whom the test results apply, shall not be used in any instance for the determination of insurability or suitability for employment.

(g) ‘‘Written authorization,’’ as used in this section, applies only to the disclosure of test results by a person responsible for the care and treatment of the person subject to the test. Written authorization is required for each separate disclosure of the test results, and shall include to whom the disclosure would be made.

(h) Nothing in this section limits or expands the right of an injured subject to recover damages under any other applicable law. Nothing in this section shall impose civil liability or criminal sanction for disclosure of the results of tests performed on cadavers to public health authorities or tissue banks.

(i) Nothing in this section imposes liability or criminal sanction for disclosure of an HIV test, as defined in Section 120775, in accordance with any reporting requirement for a diagnosed case of AIDS by the department or the Centers for Disease Control under the United States Public Health Service.

(j) The department may require blood banks and plasma centers to submit monthly reports summarizing statistical data concerning the results of tests to detect the presence of viral hepatitis and HIV. This statistical summary shall not include the identity of individual donors or identifying characteristics that would identify individual donors.

(k) ‘‘Disclosed,’’ as used in this section, means to disclose, release, transfer, disseminate, or otherwise communicate all or any part of any record orally, in writing, or by electronic means to any person or entity.

(*l*) When the results of an HIV test, as defined in Section 120775, are included in the medical record of the patient who is the subject of the test, the inclusion is not a disclosure for purposes of this section.

120985. (a) Notwithstanding Section 120980, the results of an HIV test that identifies or provides identifying characteristics of the person to whom the test results apply may be recorded by the physician who ordered the test in the test subject’s medical record or otherwise disclosed without written authorization of the subject of the test, or the subject’s representative as set forth in Section 121020, to the test subject’s providers of health care, as defined in subdivision (d) of Section 56.05 of the Civil Code, for purposes of diagnosis, care, or treatment of the patient, except that for purposes of this section ‘‘providers of health care’’ does not include a health care service plan regulated pursuant to Chapter 2.2 (commencing with Section 1340) of Division 2.

(b) Recording or disclosure of HIV test results pursuant to subdivision (a) does not authorize further disclosure unless otherwise permitted by law.

120990. (a) Except in the case of a person treating a patient, no person shall test a person’s blood for evidence of antibodies to the probable causative agent of AIDS without the written consent of the subject of the test or the written consent of the subject, as provided

in Section 121020, and the person giving the test shall have a written statement signed by the subject or conservator or other person, as provided in Section 121020 confirming that he or she obtained the consent from the subject. In the case of a physician and surgeon treating a patient, the consent required under this subdivision shall be informed consent, by the patient, conservator, or other person provided for in Section 121020.

This requirement does not apply to a test performed at an alternative site, as established pursuant to Sections 120885 to 120895, inclusive. This requirement also does not apply to any blood and blood products specified in paragraph (2) of subdivision (a) of Section 1603.1. This requirement does not apply when testing is performed as part of the medical examination performed pursuant to Section 7152.5.

(b) Nothing in this section shall preclude a medical examiner or other physician from ordering or performing a blood test to detect antibodies to the probable causative agent of AIDS on a cadaver when an autopsy is performed or body parts are donated pursuant to the Uniform Anatomical Gift Act, provided for pursuant to Chapter 3.5 (commencing with Section 7150) of Part 1 of Division 7.

(c) The requirements of subdivision (a) do not apply when blood is tested as part of a scientific investigation conducted either by medical researchers operating under institutional review board approval or by the department in accordance with a protocol for unlinked testing. For purposes of this section, unlinked testing means that blood samples are obtained anonymously or that the individual's name and other identifying information is removed in a manner that precludes the test results from ever being linked to a particular individual in the study.

120995. Actions taken pursuant to Section 1768.9 of the Welfare and Institutions Code shall not be subject to subdivisions (a) to (c), inclusive, of Section 120980. In addition, the requirements of subdivision (a) of Section 120990 shall not apply to testing performed pursuant to Section 1768.9 of the Welfare and Institutions Code.

121000. Actions taken pursuant to Title 8 (commencing with Section 7500) of Part 3 of the Penal Code shall not be subject to subdivisions (a) to (c), inclusive, of Section 120980. In addition, the requirements of subdivision (a) of Section 120990 shall not apply to testing performed pursuant to that title.

121005. Neither the department nor any blood bank or plasma center, including a blood bank or plasma center owned or operated by a public entity, shall be held liable for any damages resulting from the notification of test results, as set forth in paragraph (3) of subdivision (a) of, and in subdivision (c) of, Section 1603.3, as amended by Chapter 23 of the Statutes of 1985.

121010. Notwithstanding Section 120975 or 120980, the results of a blood test to detect antibodies to the probable causative agent of

AIDS may be disclosed to any of the following persons without written authorization of the subject of the test:

(a) To the subject of the test or the subject's legal representative, conservator, or to any person authorized to consent to the test pursuant to subdivision (b) of Section 120990.

(b) To a test subject's provider of health care, as defined in subdivision (d) of Section 56.05 of the Civil Code, except that for purposes of this section, ''provider of health care'' does not include a health care service plan regulated pursuant to Chapter 2.2 (commencing with Section 1340) of Division 2.

(c) To an agent or employee of the test subject's provider of health care who provides direct patient care and treatment.

(d) To a provider of health care who procures, processes, distributes, or uses a human body part donated pursuant to the Uniform Anatomical Gift Act (Chapter 3.5 (commencing with Section 7150) of Part 1 of Division 7).

121015. (a) Notwithstanding Section 120980 or any other provision of law, no physician and surgeon who has the results of a confirmed positive test to detect infection by the probable causative agent of acquired immune deficiency syndrome of a patient under his or her care shall be held criminally or civilly liable for disclosing to a person reasonably believed to be the spouse, or to a person reasonably believed to be a sexual partner or a person with whom the patient has shared the use of hypodermic needles, or to the county health officer, that the patient has tested positive on a test to detect infection by the probable causative agent of acquired immune deficiency syndrome, except that no physician and surgeon shall disclose any identifying information about the individual believed to be infected.

(b) No physician and surgeon shall disclose the information described in subdivision (a) unless he or she has first discussed the test results with the patient and has offered the patient appropriate educational and psychological counseling, that shall include information on the risks of transmitting the human immunodeficiency virus to other people and methods of avoiding those risks, and has attempted to obtain the patient's voluntary consent for notification of his or her contacts. The physician and surgeon shall notify the patient of his or her intent to notify the patient's contacts prior to any notification. When the information is disclosed to a person reasonably believed to be a spouse, or to a person reasonably believed to be a sexual partner, or a person with whom the patient has shared the use of hypodermic needles, the physician and surgeon shall refer that person for appropriate care, counseling, and followup. This section shall not apply to disclosures made other than for the purpose of diagnosis, care, and treatment of persons notified pursuant to this section, or for the purpose of interrupting the chain of transmission.

(c) This section is permissive on the part of the attending physician, and all requirements and other authorization for the disclosure of test results to detect infection by the probable causative agent of acquired immune deficiency syndrome are limited to the provisions contained in this chapter, Chapter 10 (commencing with Section 121075) and Sections 1603.1 and 1603.3. No physician has a duty to notify any person of the fact that a patient is reasonably believed to be infected by the probable causative agent of acquired immune deficiency syndrome.

(d) The county health officer may alert any persons reasonably believed to be a spouse, sexual partner, or partner of shared needles of an individual who has tested positive on a test to detect infection by the probable causative agent of acquired immune deficiency syndrome about their exposure, without disclosing any identifying information about the individual believed to be infected or the physician making the report, and shall refer any person to whom a disclosure is made pursuant to this subdivision for appropriate care and followup. Upon completion of the county health officer's efforts to contact any person pursuant to this subdivision, all records regarding that person maintained by the county health officer pursuant to this subdivision, including but not limited to any individual identifying information, shall be expunged by the county health officer.

(e) The county health officer shall keep confidential the identity and the seropositivity status of the individual tested and the identities of the persons contacted, as long as records of contacts are maintained.

(f) Except as provided in Section 1603.1 or 1603.3, no person shall be compelled in any state, county, city, or local civil, criminal, administrative, legislative, or other proceedings to identify or provide identifying characteristics that would identify any individual reported or person contacted pursuant to this section.

121020. (a) (1) When the subject of an HIV test is not competent to give consent for the test to be performed, written consent for the test may be obtained from the subject's parents, guardians, conservators, or other person lawfully authorized to make health care decisions for the subject. For purposes of this paragraph, a minor shall be deemed not competent to give consent if he or she is under 12 years of age.

(2) Notwithstanding paragraph (1), when the subject of the test is a minor adjudged to be a dependent child of the court pursuant to Section 360 of the Welfare and Institutions Code, written consent for the test to be performed may be obtained from the court pursuant to its authority under Section 362 or 369 of the Welfare and Institutions Code.

(b) Written consent shall only be obtained for the subject pursuant to subdivision (a) when necessary to render appropriate care or to practice preventative measures.

(c) The person authorized to consent to the test pursuant to subdivision (a) shall be permitted to do any of the following:

(1) Notwithstanding Sections 120975 and 120980, receive the results of the test on behalf of the subject without written authorization.

(2) Disclose the test results on behalf of the subject in accordance with Sections 120975 and 120980.

(3) Provide written authorization for the disclosure of the test results on behalf of the subject in accordance with Sections 120975 and 120980.

CHAPTER 8. ACQUIRED IMMUNE DEFICIENCY SYNDROME (AIDS) PUBLIC HEALTH RECORDS CONFIDENTIALITY ACT

121025. (a) Public health records relating to acquired immune deficiency syndrome (AIDS), containing personally identifying information, that were developed or acquired by state or local public health agencies shall be confidential and shall not be disclosed, except as otherwise provided by law for public health purposes or pursuant to a written authorization by the person who is the subject of the record or by his or her guardian or conservator.

(b) State or local public health agencies may disclose personally identifying information in public health records, as described in subdivision (a), to other local, state, or federal public health agencies or to corroborating medical researchers, when the confidential information is necessary to carry out the duties of the agency or researcher in the investigation, control, or surveillance of disease, as determined by the state or local public health agency.

(c) Any disclosure authorized by subdivision (a) or (b) shall include only the information necessary for the purpose of that disclosure and shall be made only upon agreement that the information will be kept confidential and will not be further disclosed without written authorization, as described in subdivision (a).

(d) No confidential public health record, as described in subdivision (a), shall be disclosed, discoverable, or compelled to be produced in any civil, criminal, administrative, or other proceeding.

(e) Any person who willfully or maliciously discloses the content of any confidential public health record, as described in subdivision (a), to any third party, except pursuant to a written authorization, as described in subdivision (a), or as otherwise authorized by law, shall be subject to a civil penalty in an amount not less than one thousand dollars ($1,000) and not more than five thousand dollars ($5,000) plus court costs, as determined by the court, which penalty and costs shall be paid to the person whose record was disclosed.

(f) In the event that a public health record, as described in subdivision (a), is disclosed, the information shall not be used to determine employability, or insurability of any person.

121030. (a) To the extent Chapter 7 (commencing with Section 120975) and Chapter 10 (commencing with Section 121075) apply to records or information that would be covered by this chapter, Chapters 7 and 10 shall supersede this chapter.

(b) This chapter supersedes Section 100330 to the extent it applies to records or information covered by Section 100325 or 100330.

121035. For purposes of this chapter:

(a) ''Disclosed'' or ''disclosure'' or ''discloses'' has the same meaning as set forth in subdivision (b) of Section 121125.

(b) ''State or local public health agencies'' are the department, and any local entity that a health officer, as defined in Section 120100, serves.

CHAPTER 9. ACQUIRED IMMUNE DEFICIENCY SYNDROME (AIDS) PUBLIC SAFETY AND TESTING DISCLOSURE

121050. The people of the State of California find and declare that AIDS, AIDS-related conditions, and other communicable diseases pose a major threat to the public health and safety.

The health and safety of the public, victims of sexual crimes, and peace officers, firefighters, and custodial personnel who may come into contact with infected persons, have not been adequately protected by law. The purpose of this chapter is to require that information that may be vital to the health and safety of the public, victims of certain crimes, certain defendants and minors, and custodial personnel, custodial medical personnel, peace officers, firefighters and emergency medical personnel put at risk in the course of their official duties, be obtained and disclosed in an appropriate manner in order that precautions can be taken to preserve their health and the health of others or that those persons can be relieved from groundless fear of infection.

It is the intent of this chapter to supersede in case of conflict existing statutes or case law on the subjects covered including but not limited to the confidentiality and consent provisions contained in Chapter 7 (commencing with Section 120975), Chapter 8 (commencing with Section 121025), and Chapter 10 (commencing with Section 121075).

121055. Any defendant charged in any criminal complaint filed with a magistrate or court with any violation of Penal Code Sections 261, 261.5, 262, 266b, 266c, 286, 288, or 288a and any minor with respect to whom a petition has been filed in a juvenile court alleging violation of any of the foregoing laws, shall be subject to an order of a court having jurisdiction of the complaint or petition requiring testing as provided in this chapter.

If an alleged victim listed in the complaint or petition makes a written request for testing under this section, the prosecuting attorney, or the alleged victim may petition the court for an order authorized under this section.

The court shall promptly conduct a hearing upon any such petition. If the court finds that probable cause exists to believe that a possible transfer of blood, saliva, semen, or other bodily fluid took place between the defendant or minor and the alleged victim in an act specified in this section, the court shall order that the defendant or minor provide two specimens of blood for testing as provided in this chapter.

Copies of the test results shall be sent to the defendant or minor, each requesting victim and, if the defendant or minor is incarcerated or detained, to the officer in charge and the chief medical officer of the facility where the person is incarcerated or detained.

121060. Any person charged in any criminal complaint filed with a magistrate or court and any minor with respect to whom a petition has been filed in juvenile court, in which it is alleged in whole or in part that the defendant or minor interfered with the official duties of a peace officer, firefighter, or emergency medical personnel by biting, scratching, spitting, or transferring blood or other bodily fluids on, upon, or through the skin or membranes of a peace officer, firefighter, or emergency medical personnel shall in addition to any penalties provided by law be subject to an order of a court having jurisdiction of the complaint or petition requiring testing as provided in this chapter.

The peace officer, firefighter, emergency medical personnel or the employing agency, officer, or entity may petition the court for an order authorized under this section.

The court shall promptly conduct a hearing upon any such petition. If the court finds that probable cause exists to believe that a possible transfer of blood, saliva, semen, or other bodily fluid took place between the defendant or minor and the peace officer, firefighter, or emergency medical personnel, as specified in this section, the court shall order that the defendant or minor provide two specimens of blood for testing as provided in this chapter.

Copies of the test results shall be sent to the defendant or minor, each peace officer, firefighter, and emergency medical personnel named in the petition and his or her employing agency, officer, or entity, and if the defendant or minor is incarcerated or detained, to the officer in charge and the chief medical officer of the facility where the person is incarcerated or detained.

121065. (a) The withdrawal of blood shall be performed in a medically approved manner. Only a physician, registered nurse, licensed vocational nurse, licensed medical technician, or licensed phlebotomist may withdraw blood specimens for the purposes of this chapter.

(b) The court shall order that the blood specimens be transmitted to a licensed medical laboratory and that tests be conducted thereon for medically accepted indications of exposure to or infection by acquired immunity deficiency syndrome (AIDS) virus, AIDS-related conditions, and those communicable diseases for which medically approved testing is readily and economically available as determined by the court.

(c) Copies of test results that indicate exposure to or infection by AIDS, AIDS-related conditions, or other communicable diseases shall also be transmitted to the department.

(d) The test results shall be sent to the designated recipients with the following disclaimer:

''The tests were conducted in a medically approved manner but tests cannot determine exposure to or infections by AIDS or other communicable diseases with absolute accuracy. Persons receiving this test result should continue to monitor their own health and should consult a physician as appropriate.''

If the person subject to the test is a minor, copies of the test result shall also be sent to the minor's parents or guardian.

(e) The court shall order all persons, other than the test subject, who receive test results pursuant to Sections 121055 or 121060, to maintain the confidentiality of personal identifying data relating to the test results except for disclosure that may be necessary to obtain medical or psychological care or advice.

(f) The specimens and the results of tests ordered pursuant to Sections 121055 and 121060 shall not be admissible evidence in any criminal or juvenile proceeding.

(g) Any person performing testing, transmitting test results, or disclosing information pursuant to the provisions of this chapter shall be immune from civil liability for any action undertaken in accordance with the provisions of this chapter.

121070. (a) Any medical personnel employed by, under contract to, or receiving payment from the State of California, any agency thereof, or any county, city, or city and county to provide service at any state prison, the Medical Facility, any Youth Authority institution, any county jail, city jail, hospital jail ward, juvenile hall, juvenile detention facility, or any other facility where adults are held in custody or minors are detained, or any medical personnel employed, under contract, or receiving payment to provide services to persons in custody or detained at any of the foregoing facilities, who receives information as specified herein that an inmate or minor at the facility has been exposed to or infected by the AIDS virus or has an AIDS-related condition or any communicable disease, shall communicate the information to the officer in charge of the facility where the inmate or minor is in custody or detained.

(b) Information subject to disclosure under subsection (a) shall include the following: any laboratory test that indicates exposure to

or infection by the AIDS virus, AIDS-related condition, or other communicable diseases; any statement by the inmate or minor to medical personnel that he or she has AIDS or an AIDS-related condition, has been exposed to the AIDS virus, or has any communicable disease; the results of any medical examination or test that indicates that the inmate or minor has tested positive for antibodies to the AIDS virus, has been exposed to the AIDS virus, has an AIDS-related condition, or is infected with AIDS or any communicable disease; provided, that information subject to disclosure shall not include information communicated to or obtained by a scientific research study pursuant to prior written approval expressly waiving disclosure under this section by the officer in charge of the facility.

(c) The officer in charge of the facility shall notify all employees, medical personnel, contract personnel, and volunteers providing services at the facility who have or may have direct contact with the inmate or minor in question, or with bodily fluids from the inmate or minor, of the substance of the information received under subsections (a) and (b) so that those persons can take appropriate action to provide for the care of the inmate or minor, the safety of other inmates or minors, and their own safety.

(d) The officer in charge and all persons to whom information is disclosed pursuant to this section shall maintain the confidentiality of personal identifying data regarding the information, except for disclosure authorized hereunder or as may be necessary to obtain medical or psychological care or advise.

(e) Any person who wilfully discloses personal identifying data regarding information obtained under this section to any person who is not a peace officer or an employee of a federal, state, or local public health agency, except as authorized hereunder, by court order, with the written consent of the patient or as otherwise authorized by law, is guilty of a misdemeanor.

CHAPTER 10. ACQUIRED IMMUNE DEFICIENCY SYNDROME (AIDS) RESEARCH CONFIDENTIALITY ACT

121075. Research records, in a personally identifying form, developed or acquired by any person in the course of conducting research or a research study relating to Acquired Immune Deficiency Syndrome (AIDS) shall be confidential, and these confidential research records shall not be disclosed by any person in possession of the research record, nor shall these confidential research records be discoverable, nor shall any person be compelled to produce any confidential research record, except as provided by this chapter.

121080. Confidential research records may be disclosed in accordance with the prior written consent of the research subject

with respect to whom the research record is maintained, but only to the extent, under the circumstances, to the persons, and for the purposes the written consent authorizes. Any disclosure authorized by a research subject shall be accompanied by a written statement containing substantially the same language as follows:

''This information has been disclosed to you from a confidential research record the confidentiality of which is protected by state law and any further disclosure of it without specific prior written consent of the person to whom it pertains is prohibited. Violation of these confidentiality guarantees may subject you to civil or criminal liabilities.''

121085. (a) Confidential research records shall be protected in the course of conducting financial audits or program evaluations, and audit personnel shall not directly or indirectly identify any individual research subject in any report of a financial audit or program evaluation. To the extent it is necessary for audit personnel to know the identity of individual research subjects, authorized disclosure of confidential research records shall be made on a case-by-case basis, and every prudent effort shall be exercised to safeguard the confidentiality of these research records in accordance with this chapter. Information disclosed for audit or evaluation purposes should be used only for audit and evaluation purposes and may not be redisclosed or used in any other way.

(b) Nothing in this section imposes liability or criminal sanction for disclosure of confidential research records in accordance with any reporting requirement for a diagnosed case of AIDS by the department or the Centers for Disease Control under the United States Public Health Services.

121090. Notwithstanding Section 121080, whether or not the research subject, with respect to whom any confidential research record is maintained, gives prior written consent, the content of the confidential research record may be disclosed in any of the following situations:

(a) To medical personnel to the extent it is necessary to meet a bona fide medical emergency of a research subject.

(b) To the department to the extent necessary for the conduct of a special investigation pursuant to Section 100325, in which case the confidentiality provisions of Chapter 8 (commencing with Section 121025) shall apply.

121095. The content of any confidential research record shall be disclosed to the research subject, the legal representative of the research subject if the research subject is a minor, or the personal representative of a deceased research subject to whom the record pertains, thirty (30) days after written request therefor by the research subject, the legal representative or the personal representative.

121100. (a) No confidential research record may be compelled to be produced in any state, county, city or other proceeding in order to initiate or substantiate any criminal charge or charges against a research subject, or to conduct an investigation of a research subject, unless a court finds there is reasonable likelihood that the records in question will disclose material information or evidence of substantial value in connection with the criminal charge or charges or investigation, and there is no other practicable way of obtaining the information or evidence.

In addition, no confidential research record shall be disclosed, discoverable, or compelled to be produced in order to initiate or substantiate any criminal charge or charges against a research subject until after a showing of good cause. In assessing good cause, the court shall weigh the public interest and need for disclosure against the injury to the research subject and the harm to the research being undertaken. Upon the granting of an order to produce, the court, in determining the extent to which disclosure of all or any part of a confidential research record is necessary, shall impose appropriate safeguards against unauthorized disclosure, that shall include, but not necessarily be limited to, the individuals or bodies that may have access to the data, the purposes for which the data shall be used, prohibitions on further disclosure and protection of the identities of other research subjects.

(b) No confidential research record may be compelled to be produced in any state, county, city or other civil proceeding, except as expressly provided in this chapter.

121105. Prior to participation of an individual in a research study relating to AIDS, both of the following requirements shall be met:

(a) The informed consent of each research subject shall be obtained in the method and manner required by Section 46.116, (a) and (b), of Part 46 of Title 45 of the Code of Federal Regulations and be documented in accordance with Section 46.117 of that part.

(b) Each research subject shall be provided with an explanation in writing, in language understandable to the research subject, of the rights and responsibilities of researchers and research subjects under this chapter.

121110. (a) Any person who willfully or maliciously discloses the content of any confidential research record, to any third party, except pursuant to this chapter, shall be assessed a civil penalty in an amount not less than one thousand dollars ($1,000) and not more than five thousand dollars ($5,000) plus court costs, as determined by the court, which penalty and costs shall be paid to the subject of the test.

(b) Any person who maliciously discloses the content of any confidential research record, to a third party, except pursuant to this chapter, that results in economic, bodily, or psychological harm to the research subject, is guilty of a misdemeanor, punishable by

imprisonment in the county jail for a period not to exceed one year or a fine of not to exceed ten thousand dollars ($10,000) or both.

(c) Any person who commits any act described in subdivision (a) or (b) shall be liable to the subject for all actual damages for economic, bodily, or psychological harm that is a proximate result of the act.

(d) Any person who negligently or willfully violates Section 121105 is guilty of an infraction punishable by a fine of twenty-five dollars ($25).

(e) Each violation f this chapter is a separate and actionable offense.

(f) Nothing in this section limits or expands the right of an injured research subject to recover damages under any other applicable law.

121115. In the event that the participation of an individual in a research study is disclosed, the information shall not be used to determine the employability or insurability of the research subject.

121120. Nothing in this chapter shall preclude disclosure of information in order to further research efforts, including, but not limited to, the publication, dissemination, or sharing of raw data, statistics, or case studies, so long as no confidential research records concerning any research subject are disclosed.

121125. For purposes of this chapter:

(a) ''AIDS'' means Acquired Immune Deficiency Syndrome.

(b) ''Disclosed'' means to disclose, release, transfer, disseminate, or otherwise communicate all or any part of any confidential research record orally, in writing, or by electronic means to any person or entity, or to provide the means for obtaining the records.

(c) ''Confidential research record or records'' means any data in a personally identifying form, including name, social security number, address, employer, or other information that could, directly or indirectly, in part or in sum, lead to the identification of the individual research subject, developed or acquired by any person in the course of conducting research or a research study relating to AIDS.

CHAPTER 11. ACQUIRED IMMUNE DEFICIENCY SYNDROME (AIDS) RESEARCH AND WORKSHOP GRANTS

121150. The Legislature hereby finds and declares that the department, working with the California AIDS Leadership Committee, has developed a draft state AIDS plan for comprehensive, coordinated government action against AIDS and HIV infection. It is the intention of the Legislature to implement those recommendations pertaining to infectious-disease screening of blood and other body parts and fluids, and to notifying donors of the results of those screening tests.

121155. (a) There is hereby created in the state department an AIDS Advisory Committee. The membership of the committee shall be composed of eight members who have knowledge or expertise in the area of public health or AIDS research, or have been educated in the areas for which the grants are to be directed by the committee. These members shall be appointed by the following:

(1) Two by the Speaker of the Assembly.

(2) Two by the Senate Rules Committee.

(3) Four by the Governor.

(b) In addition to the membership prescribed by subdivision (a), the following persons shall be ex officio members:

(1) The Director of Health Services or a designee shall be a voting member.

(2) The Director of Mental Health, or a designee, a designee, requested to be appointed by the President of the University of California, with knowledge, experience, and responsibility for the university-wide allocation of AIDS research grants, shall be nonvoting members.

(c) The committee shall be abolished effective July 1, 1990, unless extended by subsequent legislative action.

121160. The members of the AIDS Advisory Committee shall serve at the pleasure of the appointing powers. The members shall serve without compensation, but shall be reimbursed for necessary and travel expenses incurred in the performance of the duties of the committee.

The committee shall advise and assist the state in addressing the public health issues associated with Acquired Immune Deficiency Syndrome, and shall work with the department in statewide efforts to promote primary prevention, public education, and the advancement of knowledge regarding Acquired Immune Deficiency Syndrome.

121165. The committee may establish rules or criteria for grants under this chapter as it deems necessary. Pursuant to the rules or criteria, the committee may review and recommend approval by the director of grant applications and monitor programs receiving grants under this chapter.

121170. The director may award grants from any funds that may be made available for the purposes of this chapter to individuals, organizations, or facilities for activities that may include, but need not be limited to, any of the following:

(a) Education regarding primary prevention for high risk groups.

(b) Public education to reduce panic and lessen unnecessary anxiety about AIDS among California residents.

(c) Interdisciplinary or educational workshops to facilitate the interchange of knowledge among investigators regarding AIDS and related disorders.

(d) Research grants that would assist the state with the educational efforts outlined in subdivisions (a) and (b).

(e) Grants to provide seed money for larger grants funded by the federal government or other sources.

121175. The department may do all of the following:

(a) Accept any federal funds provided for any of the purposes of this chapter.

(b) Accept any gift, donation, bequest, or grant of funds from a private or public agency for any of the purposes of this chapter.

121180. Not more than 10 percent of any money appropriated for purposes of this chapter shall be utilized for the administration of this chapter.

CHAPTER 12. ACQUIRED IMMUNE DEFICIENCY SYNDROME (AIDS) VACCINE RESEARCH AND DEVELOPMENT GRANT PROGRAM

121200. The Legislature finds and declares all of the following:

(a) Over the past five years AIDS has reached an epidemic stage and is estimated to affect 30,000 Californians by 1990.

(b) The estimated cost of medical care alone for the 4,000 AIDS cases that have occurred to date in California totals approximately two hundred fifty million dollars ($250,000,000). By the end of 1990, medical care is projected to approach three billion five hundred million dollars ($3,500,000,000) and the total public health and medical care expenditures are expected to exceed five billion dollars ($5,000,000,000).

(c) There is no cure for the AIDS virus. The long-term solution to the elimination of AIDS lies in conducting vaccine research.

(d) Much research has already been completed by the private sector and should be utilized to the maximum extent possible, including supplementing with public funds.

(e) Profitmaking corporations are (1) not eligible for most of the existing public funding sources as are institutions of higher learning and nonprofit corporations; (2) when eligible, the public funding amounts are not adequate to conduct research; and (3) private grants are only available to nonprofit corporations.

(f) Moreover, private research companies, already having established vaccine development and manufacturing capabilities, are uniquely situated to maximize available resources and to utilize both management and research staff, equipment, and technical innovations to their greatest efficiency towards the specific goal of developing and manufacturing an AIDS vaccine at the earliest possible time.

(g) Exclusion of private corporations from public funding to develop an approved vaccine will likely result in (1) a delay in the development of a vaccine to prevent AIDS; (2) continued spread of

AIDS to the general population; and (3) continued increases in private and public funds to provide care to AIDS victims.

(h) An AIDS Vaccine Research and Development Grant Program should be established to encourage AIDS vaccine research by the private sector.

(i) It is appropriate to mandate that a grant made to a private entity to develop an AIDS vaccine, once the vaccine has been approved by the FDA for use by the general population, should be reimbursed to the state from the sale of the vaccine.

121205. (a) There is hereby created an AIDS Vaccine Research and Development Grant Program. There is hereby established an AIDS Vaccine Research and Development Grant Fund the moneys in which shall, upon appropriation to the department, be available for the purposes of this chapter.

(b) For the purposes of this chapter:

(1) ''AIDS'' means acquired immune deficiency syndrome.

(2) ''California manufacturer'' means a manufacturer with management or officers based in this state and operations for the conduct of research and development of an AIDS vaccine in this state.

(3) ''Committee'' means the AIDS Vaccine Research and Development Advisory Committee.

(4) ''Grant'' means AIDS vaccine research and development grants.

121215. (a) The department shall issue within 60 days of the effective date of this chapter, a request for proposal (RFP) for research and development projects, based on the criteria provided in subdivision (d). Upon issuing the RFP the department shall publish this fact along with the deadline for grant proposals in the newspapers with the greatest circulation in the major cities of the state, as determined by the department. Additionally, upon issuing the RFP the same information shall be transmitted to the Secretary of the Senate and the Chief Clerk of the Assembly for publishing in the respective journals of each house of the California Legislature.

(b) Any California manufacturer may submit a proposal to the RFP for an AIDS vaccine research and development grant to the department. The proposal shall be submitted to the department within 90 days of the issuance of the RFP.

(c) Within 30 days after the proposal deadline, the committee shall review the proposals and make recommendations to the department. The department, taking into consideration the committee's recommendations, shall award grants to no more than three California manufacturers within 30 days after receiving the committee's recommendations.

(d) The department, making use of an RFP, shall include a clear description of the criteria to be used to select the projects that will receive funding pursuant to this chapter. The committee shall make

recommendations to the department regarding the content of the RFP. The criteria shall include, but not be limited to, the following:

(1) The potential of the grant recipient to develop a vaccine for AIDS.

(2) The financial, technical, and managerial commitment of the grant recipient to the development of an AIDS vaccine.

(3) The demonstrated need of the grant recipient for state funding.

(e) The grants made pursuant to this chapter are not subject to the State Contract Act (Part 2 (commencing with Section 10100) of Division 2 of the Public Contract Code).

121220. (a) The recipients of the grants shall use the moneys of the grant to develop an AIDS vaccine until the Federal Food and Drug Administration (FDA) approves the clinical testing of an AIDS vaccine on humans. Any grant funds not encumbered or expended at the time of the FDA approval of the clinical testing of an AIDS vaccine on humans shall not be used by the recipients until the department authorizes further expenditure or requires the funds to be returned to the AIDS Vaccine Research and Development Grant Fund pursuant to subdivision (b).

(b) If an AIDS vaccine that has received FDA approval for clinical testing on humans has been developed by a grant recipient pursuant to this chapter, then any funds that have been granted to, but not expended or encumbered by, the grant recipient, after approval by the department, shall be expended for the clinical testing of the vaccine on humans in accordance with the FDA protocol, the continued research and development of the vaccine, or both, for the purpose of optimizing the efficacy of the vaccine during clinical testing.

With respect to the other grant recipients, or when none of the recipients have received the FDA approval for the vaccine they are developing, the committee shall meet to consider whether the grant recipient has a good chance of developing a vaccine that will receive FDA approval for clinical testing on humans and shall make recommendations to the department. If the department, taking into consideration the committee's recommendations, determines that the grant recipient has a good chance of developing an FDA approved vaccine, it shall inform the grant recipient in writing to continue expending its grant funds for the development of an AIDS vaccine.

If the department, taking into consideration the committee's recommendations, determines that the grant recipient does not have a good chance of developing a vaccine that will receive FDA approval for clinical testing on humans, it shall inform the recipient in writing that the funds not encumbered or expended, as described in subdivision (a), shall be returned to the department for deposit in the AIDS Vaccine Research and Development Grant Fund.

Any funds remaining in the AIDS Vaccine Research and Development Grant Fund after the department's determinations pursuant to this subdivision, shall, in the state department's discretion, either be expended for (1) further support of the clinical trials of a vaccine developed in whole or in part by a grant recipient or for (2) further research and development of a vaccine by a grant recipient who has been permitted, in accordance with this subdivision, to continue expending grant funds for development of a vaccine, or be expended for (3) both purposes. If no grant recipient is conducting clinical trials or developing a vaccine pursuant to this subdivision, then the moneys in the AIDS Vaccine Research and Development Grant Fund shall revert to the General Fund.

(c) Notwithstanding any other provision of this section, the department may make grants to applicants even after approval has been given by the federal Food and Drug Administration to conduct clinical testing of an AIDS vaccine on humans.

121225. If a California manufacturer that is a grant recipient sells, delivers, or distributes an AIDS vaccine that has received FDA approval for use by the general population and that was developed in whole or in part using a grant awarded pursuant to this chapter, the State of California shall be reimbursed for the grant as provided in this section.

Until the total amount of the grant is repaid, repayments in the amount of one dollar ($1) per dose from the sale of the AIDS vaccine shall be deposited by the grant recipient into the General Fund. Upon payment in full of the grant amount into the General Fund, a royalty on the sale of the vaccine from the grant recipient shall be deposited into the General Fund. The percentage amount of the royalty shall be negotiated at the time of the grant award.

CHAPTER 13. ACQUIRED IMMUNE DEFICIENCY SYNDROME (AIDS) IMMUNIZATION

121250. The Legislature finds and declares all of the following:

(a) The rapidly spreading AIDS epidemic poses an unprecedented major public health crisis in California, and threatens, in one way or another, the life and health of every Californian.

(b) The best hope of stemming the spread of the AIDS virus among the general public is the development of an AIDS vaccine to develop an immunity to exposure.

(c) No vaccine has yet been fully developed, tested, or approved for AIDS. An effective vaccine, especially when directed at high-risk groups of unexposed persons, will virtually eliminate the risk of contracting AIDS, just as the risk of contracting polio and smallpox have been virtually eliminated by earlier vaccine development, production, and use among the general public.

(d) Private industry today has the capability of conducting the vaccine research, biological research, immunology, and genetic engineering of appropriate viral components needed to formulate, develop, produce, and test an AIDS vaccine. Whenever these and other appropriate expertise cannot be found within a single company, the formation of multiinstitutional research groups should be encouraged and prioritized, as it is in the public interest to encourage efforts toward vaccine production.

(e) It is of the highest importance and in the public interest to maximize public protection by developing an AIDS vaccine and by establishing high levels of immunization, initially among high-risk populations.

(f) The continuous spread of AIDS and especially the threat of infection spreading among population groups previously considered low-risk demands that the highest of priorities be given to the development of a universal immunoprophylaxis.

(g) The use of vaccines to control the spread of infectious pathogens is recognized as one of the genuinely decisive technologies of modern medicine. Recent advances in pharmaceutical technology combined with better understanding of the immune process offer the hope of an AIDS vaccine that is effective, safe, relatively inexpensive, and relatively easy to administer.

(h) Utilization of this new science may be forestalled, however, by problems that have recently deterred the development of vaccines by traditional means. These problems must be resolved before the full public health benefits of new approaches to vaccine development can be fully and expeditiously realized.

(i) The marketplace conditions facing vaccine manufacturers and developers today have changed considerably over the past 30 years. Private manufacturers and developers of vaccines cannot be forced to produce vaccines, and may choose, under the free enterprise system, not to produce them if marketplace conditions are unfavorable.

(j) Certain market conditions are slowing and threatening to halt the development of an AIDS vaccine. Any delay in the discovery, testing, approval, and production of the vaccine because of these secondary considerations may cost tens of thousands of human lives annually, unnecessary pain and suffering for hundreds of thousands of infected Americans, and billions of dollars in medical costs and in lost productivity.

(k) Resource constraints in the public and private sectors and the time required to bring vaccines to market presently limit investments in vaccines research and development. Although universities constitute a significant resource in AIDS research in particular and vaccines research in general, university funding limitations and conflicting research priorities make reliance on the

resources and expertise of the private pharmaceutical industry a necessary supplement to public funding of AIDS research.

(*l*) There has been a decrease in the willingness of pharmaceutical companies to become involved in vaccine research, development, and manufacturing because of uncertain profitability and perceived and actual marketplace risks and disincentives.

(m) It is clearly in the public interest to provide appropriate and necessary incentives toward the timely development and production of an effective and safe AIDS vaccine.

(n) The development of an AIDS vaccine provides an exceptionally important benefit, making its availability highly desirable. However, certain conditions may preclude that development, including the following:

(1) There is a high cost for capital expenditures for vaccine development (estimated to be from ten million dollars ($10,000,000) to thirty million dollars ($30,000,000)). Testing costs of clinical trials (twenty million dollars ($20,000,000) per vaccine, by some estimates) are particularly burdensome, especially for smaller firms.

(2) There is an uncertain market demand for a vaccine once development costs have been invested and FDA marketing approval has been secured.

(o) Without state intervention to assure minimal profitability of an AIDS vaccine, inadequate incentives may exist for the private sector to commit resources and expertise to the accelerated development of an AIDS vaccine.

(p) In light of the dangers inherent in the AIDS epidemic to the general public of California, it is crucial that to the extent possible any serious obstacles to the development of a vaccine be removed.

(q) Because an AIDS vaccine provides an exceptionally important public benefit, it is in the public interest to take uncommon action to facilitate the development and production of a vaccine.

(r) It is as well in the public interest to assure fair compensation, if necessary at public expense, to any innocent victim who may be injured by an AIDS vaccine, as a part of implementing the socially beneficial policy of establishing high levels of AIDS immunization.

(s) In light of the high incidence of AIDS amongst Californians, the California Legislature must lead our country into the 20th century in this effort.

(t) It is therefore fitting and proper that the State of California enact uncommon and exceptional legislation in order to prevent the further spread of the AIDS epidemic.

121255. The Legislature further finds and declares all of the following:

(a) Acquired immune deficiency syndrome (AIDS) is caused by the virus human T-cell lymphotropic virus, type III (HTLV-3) that initially cripples the body’s immune system and eventually leaves the body open to an array of lethal opportunistic infections.

(b) So far, there is no known cure for AIDS and once a person is AIDS infected, the virus remains throughout the rest of his or her life.

(c) The AIDS virus has a three-to-seven year incubation period, making it one of the most difficult diseases to combat and trace.

(d) An easily administered blood test can determine whether a person has been exposed to the AIDS virus.

(e) In 1979, when AIDS was first diagnosed in the United States, the number of newly diagnosed victims was doubling every six to nine months; today the number of people diagnosed with AIDS doubles each year.

(f) Nationally, between 500,000 and 2,000,000 Americans are estimated to have been exposed to the AIDS virus. Of those exposed, between 25,000 and 500,000 persons (5 percent–25 percent) may be expected to die of AIDS.

(1) Another 25,000 to 500,000 persons may be expected to develop AIDS Related Complex (ARC). The range of illnesses these individuals will suffer from may range from minor ailments to brain damage.

(2) The remaining majority of those exposed may never suffer its consequences, but may carry and transmit the disease unknowingly.

(3) Some experts estimate as many as 1,000 additional people are exposed daily.

(g) The department, in its report to the Legislature (March 1986) estimated conservatively that over 30,000 Californians shall have contracted AIDS by 1990, about 50 percent having succumbed. The disease is believed to be fatal within 18 months of diagnosis. To date, more than half the 16,000 people with AIDS in the United States have died.

(h) The AIDS virus is transmitted primarily through sexual contact, and also through the sharing of hypodermic needles, contaminated blood transfusions, and during pregnancy to the fetus.

(i) While the earliest spread of the AIDS virus was primarily among homosexuals, the virus is now found and spreading among heterosexuals as well.

(j) Additionally, drug abusers are highly susceptible to the AIDS virus since the drugs diminish the ability of the body’s immune system to function. Intravenous drug abusers traditionally come into contact with the virus from sharing hypodermic needles.

(k) Persons sexually active in the heterosexual community are also at risk. Until a vaccine is developed, the AIDS virus will cross over from the high-risk groups to the lower risk groups. At this time, it is not known how fast the AIDS virus will penetrate other population groups, but it is not expected to be nearly as rapid. To date, partners of high-risk groups (bisexual men and intravenous drug users) are considered the main means of transmitting the AIDS virus to the heterosexual population. Other means include pregnant women who

pass the infection on to the child and prostitutes who pass on the infection to their clients.

(*l*) Of the first 9,000 AIDS cases diagnosed in the United States, almost 1,000 were women. Fourteen percent of these women developed AIDS through sexual contact. Recent studies have demonstrated that the virus can be transmitted by women to their male sexual partners. Sexual contact with an infected partner may transmit the virus and fatally infect the partner.

121260. The Legislature further finds and declares all of the following:

(a) The average cost per patient in the treatment of AIDS until death is now one hundred fifty thousand dollars ($150,000). It is estimated that total costs including health care of the first 10,000 AIDS cases in the United States totaled more than six billion three hundred million dollars ($6,300,000,000). By 1990, according to the department, Californians will spend almost five billion dollars ($5,000,000,000) in medical costs alone in care and treatment of 30,000 AIDS patients, with no realistic hope for their remission or cure. This cost does not include money spent on education, research, and lost income.

(b) To date, the costs of caring for people with AIDS related complex (ARC) has not been officially calculated. However, it is safe to assume the costs are substantial over time. Experts fear that the illnesses of ARC patients, although they may not be fatal, are severe. For example, the virus invades the brain rendering the patients incapable of caring for themselves. It is, therefore, plausible that a percentage of ARC patients will need to be institutionalized.

(c) The Legislature intends by this chapter to take uncommon action to remove the impediments to the expeditious development of an AIDS vaccine.

(d) It is further the intent of the Legislature to provide to any person, whose injury is proximately caused by the use of the vaccine, except to the extent the injuries are attributable to the comparative negligence of the claimant in the use of the vaccine, all of the following:

(1) Compensation for related medical costs associated with the care and treatment of the injury.

(2) Compensation for the loss of any and all earnings caused by the injury.

(3) Compensation for pain and suffering caused by the injury, except that in no action shall the amount of damages for noneconomic losses exceed five hundred fifty thousand dollars ($550,000).

(e) It is further the intent of the Legislature to establish the AIDS Clinical Trials Testing Fund that will be available to not more than three California manufacturers of an AIDS vaccine approved by the federal Food and Drug Administration (FDA) or the department

pursuant to Part 5 (commencing with Section 109875) of Division 104 for clinical trials with humans.

(f) The AIDS Vaccine Research and Development Advisory Committee, established pursuant to Section 121210, shall review requests from California manufacturers for funds from the AIDS Clinical Trials Testing Fund and shall make recommendations to the department regarding the award of funds, including the appropriate amount of funding. The department, taking into consideration the committee's recommendations, may allocate the funds to the manufacturers specified in the protocol approved by the FDA or the department pursuant to Part 5 (commencing with Section 109875) of Division 104 for administering the clinical trials.

(g) A California manufacturer seeking the approval of the FDA, rather than the department, for administering clinical trials of an AIDS vaccine may apply while FDA approval is pending to the AIDS Vaccine Research and Development Advisory Committee for the committee's recommendation that the manufacturer receive funds from the AIDS Clinical Trials Testing Fund upon FDA approval.

121265. ''State,'' as used in this chapter, has the same meaning as set forth in Section 900.6 of the Government Code.

121270. (a) There is hereby created the AIDS Vaccine Victims Compensation Fund.

(b) For the purposes of this section:

(1) ''AIDS vaccine'' means a vaccine that (A) has been developed by any manufacturer and (B) is approved by the FDA or the department pursuant to Part 5 (commencing with Section 109875) of Division 104 as a safe and efficacious vaccine for the purpose of immunizing against AIDS.

(2) ''Board'' means the State Board of Control.

(3) ''Damages for personal injuries,'' means the direct medical costs for the care and treatment of injuries to any person, including a person entitled to recover damages under Section 377 of the Code of Civil Procedure, proximately caused by an AIDS vaccine, the loss of earnings caused by the injuries, and the amount necessary, but not to exceed five hundred fifty thousand dollars ($550,000), to compensate for noneconomic losses, including pain and suffering caused by the injuries.

(4) ''Fund'' means the AIDS Vaccine Victims Compensation Fund.

(c) The board shall pay from the fund, contingent entirely upon the availability of moneys as provided in subdivision (o), damages for personal injuries caused by an AIDS vaccine that is sold in or delivered in California, and administered or dispersed in California to the injured person except that no payment shall be made for any of the following:

(1) Damages for personal injuries caused by the vaccine to the extent that they are attributable to the comparative negligence of the person making the claim.

(2) Damages for personal injuries in any instance when the manufacturer has been found to be liable for the injuries in a court of law.

(3) Damages for personal injuries due to a vaccination administered during a clinical trial.

(d) An application for payment of damages for personal injuries shall be made on a form prescribed by the board, that application may be required to be verified, within one year of the date that the injury and its cause are discovered. Upon receipt, the board may require the submission of additional information necessary to evaluate the claim.

(e) (1) Within 45 days of the receipt of the application and the submission of any additional information, the board shall do either of the following:

(A) Allow the claim in whole or part.

(B) Disallow the claim.

(2) In those instances of unusual hardship to the victim, the board may grant an emergency award to the injured person to cover immediate needs upon agreement by the injured person to repay in the event of a final determination denying the claim.

(3) If the claim is denied in whole or part, the victim may apply within 60 days of denial for a hearing. The hearing shall be held within 60 days of the request for a hearing unless the injured person requests a later hearing.

(f) At the hearing the injured person may be represented by counsel and may present relevant evidence as defined in subdivision (c) of Section 11513 of the Government Code. The board may consider additional evidence presented by its staff. If the injured person declines to appear at the hearing, the board may act solely upon the application, the staff report, and other evidence that appears on the record.

(g) The board may delegate the hearing of applications to hearing examiners.

(h) The decision of the board shall be in writing and shall be delivered or mailed to the injured person within 30 days of the hearing. Upon the request by the applicant within 30 days of delivery or mailing, the board may reconsider its decision.

(i) Judicial review of a decision shall be under Section 1094.5 of the Code of Civil Procedure, and the court shall exercise its independent judgment. A petition for review shall be filed as follows:

(1) If no request for reconsideration is made, within 30 days of personal delivery or mailing of the board’s decision on the application.

(2) If a timely request for reconsideration is filed and rejected by the board, within 30 days of personal delivery or mailing of the notice of rejection.

(3) If a timely request for reconsideration is filed and granted by the board, or reconsideration is ordered by the board, within 30 days of personal delivery or mailing of the final decision on the reconsidered application.

(j) The board shall adopt regulations to implement this section, including those governing discovery.

(k) The fund is subrogated to any right or claim that any injured person may have who receives compensation pursuant to this section, or any right or claim that the person's personal representative, legal guardian, estate, or survivor may have, against any third party who is liable for the personal injuries caused by the AIDS vaccine, and the fund shall be entitled to indemnity from that third party. The fund shall also be entitled to a lien on the judgment, award, or settlement in the amount of any payments made to the injured person.

(*l*) In the event that the injured person, or his or her guardian, personal representative, estate, or survivors, or any of them, bring an action for damages against the person or persons liable for the injury or death giving rise to an award by the board under this section, notice of institution of legal proceedings and notice of any settlement shall be given to the board in Sacramento except in cases where the board specifies that notice shall be given to the Attorney General. All notices shall be given by the attorney employed to bring the action for damages or by the injured person, or his or her guardian, personal representative, estate, or survivors, if no attorney is employed.

(m) This section is not intended to affect the right of any individual to pursue claims against the fund and lawsuits against manufacturers concurrently, except that the fund shall be entitled to a lien on the judgment, award, or settlement in the amount of any payments made to the injured party by the fund.

(n) There is hereby created the AIDS Vaccine Injury Compensation Policy Review Task Force consisting of 14 members. The task force shall be composed of 10 members appointed by the Governor, of which two shall be from a list provided by the California Trial Lawyers Association, one from the department, the Director of Finance, one unspecified member, and one attorney with experience and expertise in products liability and negligence defense work, two representing recognized groups that represent victims of vaccine induced injuries or AIDS victims, or both, and two representing manufacturers actively engaged in developing an AIDS vaccine. In addition four Members of the Legislature or their designees shall be appointed to the task force, two of which shall be appointed by the Speaker of the Assembly and two of which shall be appointed by the Senate Rules Committee. The chairperson of the task force shall be

appointed by the Governor from the membership of the task force. The task force shall study and make recommendations on the legislative implementation of the fund created by subdivision (a). These recommendations shall at least address the following issues:

(1) The process by which victims are to be compensated through the fund.

(2) The procedures by which the fund will operate and the governance of the fund.

(3) The method by which manufacturers are to pay into the fund and the amount of that payment.

(4) The procedural relationship between a potential victim's claim through the fund and a court claim made against the manufacturer.

(5) Other issues deemed appropriate by the task force.

The task force shall make its recommendations to the Legislature on or before June 30, 1987.

(o) The fund shall be funded wholly by a surcharge on the sale of an AIDS vaccine, that has been approved by the FDA, or by the department pursuant to Part 5 (commencing with Section 109875) of Division 104, in California in an amount to be determined by the department. The surcharge shall be levied on the sale of each unit of the vaccine sold or delivered, administered, or dispensed in California. The appropriate amount of the surcharge shall be studied by the AIDS Vaccine Injury Compensation Policy Review Task Force which shall recommend the appropriate amount as part of its report, with the amount of the surcharge not to exceed ten dollars ($10) per unit of vaccine. Expenditures of the task force shall be made at the discretion of the Director of Finance or the director's designee.

(p) For purposes of this section, claims against the fund are contingent upon the existing resources of the fund as provided in subdivision (o), and in no case shall the state be liable for any claims in excess of the resources in the fund.

121275. (a) Because the development of a vaccine now costs somewhere between twenty million dollars ($20,000,000) and forty million dollars ($40,000,000), and because the last vaccine produced and marketed did not sell well, vaccine manufacturers are hesitant to proceed to invest their resources in a risky venture. It is, therefore, in the public health interest of California to assure that manufacturers proceed to develop this vaccine and protect Californians against this dread disease and protect the State of California against the enormous fiscal costs of treatment for persons getting AIDS. It is a sound and worthwhile investment to provide a guarantee of a market to lessen the risk of loss and assure the development of an AIDS vaccine.

It is anticipated that this AIDS vaccine will consist of a three-unit series. The State of California is willing to guarantee that at least 175,000 persons will be vaccinated, and to guarantee the purchase,

within three years after the FDA or the department pursuant to Part 5(commencing with Section 109875) of Division 104 approves marketing of an AIDS vaccine, of at least 500,000 units, at a cost of no more than twenty dollars ($20) per dosage, by all companies, anywhere in the United States.

Therefore, the State of California, by moneys to be appropriated later through the Budget Act, commits itself to purchasing, at the end of three years after the FDA or the department pursuant to Part 5 (commencing with Section 109875) of Division 104 has approved the marketing on a competitive basis, at not more than twenty dollars ($20) per dosage, the difference between 500,000 units and the actual amount sold, delivered, administered, or dispensed by all companies throughout the United States, including units sold to or reimbursed by Medi-Cal, Medicare, or other public programs, providing that less than 500,000 units are sold, delivered, administered, or dispensed.

(b) The AIDS Vaccine Guaranteed Purchase Fund is hereby established and shall be administered by the department, that may develop necessary regulations to carry out the purpose of this section.

(c) The department may carry out this section, when those funds are appropriated through the State Budget. In determining which vaccine shall be purchased by the state from among those manufacturers selling or distributing in California, an AIDS vaccine approved by the FDA or the department pursuant to Part 5 (commencing with Section 109875) of Division 104, the department shall take into consideration at least all of the following factors:

(1) The length of time each AIDS vaccine has been in the marketplace in California.

(2) Each AIDS vaccine's history of efficacy since approval by the FDA or the department.

(3) Each AIDS vaccine's history of side effects experienced by previous recipients of the vaccine.

(4) The relative cost of each competing manufacturer's AIDS vaccine.

121280. (a) In enacting this section the Legislature finds and declares:

(1) It is in the interest of the people of California to develop a vaccine that will prevent the infection of HIV, the agent that causes AIDS.

(2) In order to develop that vaccine, a prototype vaccine must be first given to HIV-negative people to determine the following:

(A) The vaccine's toxicity.

(B) The vaccine's efficacy.

(C) The human immune response to the vaccine.

(3) These studies are currently impossible because vaccine manufacturers fear that, by inoculating HIV-negative individuals with an experimental vaccine, they will elicit a positive immune response as measured by an enzyme linked immunosorbent assay

(ELISA), western blot or other federal Food and Drug Administration approved in vitro diagnostic test, thereby placing vaccine volunteers at risk for denial of health or life insurance by insurance carriers as a consequence of their participation.

(4) Insurers need a reliable mechanism by which they can verify the insurability of a vaccine trial participant.

(b) No health care service plan, disability insurer, nonprofit hospital service plan, self-insured employee welfare benefit plan, or life insurer may withhold any settlement or coverage of an individual solely because of his or her participation in an AIDS/HIV vaccine clinical trial studied under an investigational new drug application effective pursuant to Section 312 of Title 21 of the Code of Federal Regulations, or Section 111595.

(c) The sponsor of any such trial shall make a confidential certificate with all the necessary particulars, which shall be determined by the department, for each enrollee and then submit it to the department, which shall endorse it and return it to the vaccine recipient. A copy of this confidential certificate shall be kept on file indefinitely by both the study sponsor and the department.

(d) Release of a confidential certificate shall be by written authorization of the enrollee named in the certificate. If the enrollee is unable to provide the written authorization, a person designated in the certificate by the enrollee may provide the written authorization. The written authorization shall include the name of the person or entity to whom the disclosure would be made.

Disclosure as used in this section means to release, transfer, disseminate or otherwise communicate all or part of any confidential certificate orally, in writing, or by electronic means to any person or entity.

CHAPTER 14. ACQUIRED IMMUNE DEFICIENCY SYNDROME (AIDS) CLINICAL TRIAL GRANT AWARD FOR THE PREVENTION OF MATERNAL TRANSMISSION OF HUMAN IMMUNODEFICIENCY VIRUS (HIV) INFECTION

121300. The Legislature finds and declares all of the following:

(a) Nearly 90 percent of the cases of pediatric AIDS in the United States occur as a result of maternal infant transmission.

(b) It is estimated that from 13 to 45 percent of infants born to HIV-infected mothers will acquire HIV either in utero, during delivery, or postpartum.

(c) In 1990, the number of cases of AIDS in women in the United States increased by 34 percent compared to an increase of 18 percent in men. As a consequence of this increased dissemination of HIV in women, there has been a concomitant increase in the number of HIV infected infants.

(d) Approximately 6,000 children were born to HIV-infected women in the United States in 1990. This resulted in 1,500 to 2,000 newly infected infants. Internationally, it is estimated that one million children acquired HIV through maternal transmission in 1990.

(e) HIV infection that is transmitted maternally progresses more rapidly than HIV infection in adults, with most infants developing advanced symptoms of infection within 18 months. Costs for care of infants infected with HIV have been estimated to be comparable or higher than the cost of treating HIV-related illness in adults. Currently, limited data exists for the costs of treating HIV-infected children. A recent estimate for those costs is as follows:

(1) For the mean lifetime hospital costs per child: ninety thousand dollars ($90,000).

(2) For the mean annual cost per child hospitalized all year: two hundred nineteen thousand dollars ($219,000). A significant portion of pediatric hospital costs may be due to a prolonged hospitalization because of the lack of foster homes for children.

(3) For the estimated annual medicaid cost: eighteen thousand dollars ($18,000) to forty-two thousand dollars ($42,000).

(4) In comparison, recent estimates of the national cost of treating an adult with HIV and without AIDS is five thousand dollars ($5,000) per year and the average cost of treating an adult person with AIDS is thirty-two thousand dollars ($32,000) per year of that twenty-four thousand dollars ($24,000) is inpatient costs and eight thousand dollars ($8,000) for other services.

(f) AIDS vaccines are now available for testing in FDA-approved clinical trials in HIV-infected pregnant women for the purpose of protecting against HIV transmission from mother to child.

(g) Manufacturers are hesitant to conduct these trials because of the combined threat of liability and the limited market to reimburse the research and clinical trial investment.

(h) The California Legislature wishes to encourage FDA-approved AIDS vaccine clinical trials to protect against maternal HIV transmission from mother to child, that may also provide a therapeutic effect in the HIV-infected mother. It is appropriate to mandate that grants be made to encourage qualified manufacturers to conduct these trials for the benefit of California citizens.

121305. For the purposes of this chapter, the following definitions apply:

(a) ''AIDS'' means acquired immune deficiency syndrome.

(b) ''An HIV-positive individual'' means an individual who is infected with the AIDS virus.

(c) ''Committee'' means the AIDS Vaccine Research and Development Advisory Committee established pursuant to Section 121210.

(d) ‘‘Grant award’’ means an AIDS Vaccine Clinical Trial Grant Award for the Prevention of Maternal Transmission of HIV Infection.

(e) ‘‘AIDS vaccine,’’ for the purposes of this chapter, means a vaccine that has been developed by a manufacturer and is being tested and administered for the purposes of determining whether immunization of HIV-infected pregnant women will protect against maternal transmission of the AIDS virus. Clinical trials must be conducted under an investigational new drug (IND) application on file with the federal Food and Drug Administration (FDA).

(f) ‘‘Research subject’’ means a person who is administered an AIDS vaccine, or a fetus of a woman administered an AIDS vaccine, or a child born to a woman administered an AIDS vaccine during pregnancy.

(g) ‘‘Researcher’’ means a person employed by or affiliated with a manufacturer or a research institution, who participates in the development or testing or administration of an AIDS vaccine, or who is involved in the diagnosis and treatment of a research subject.

121310. A manufacturer, research institution, or researcher shall, prior to the administration of an AIDS vaccine to a research subject, obtain that woman’s informed consent, that shall comply with all applicable statutes and regulations.

(a) The informed consent shall contain a statement that significant new findings developed during the course of the research that may relate to the subject’s willingness to continue participation will be provided to the subject.

(b) A copy of the informed consent shall be maintained with the woman’s medical records.

121315. (a) A manufacturer, research institution, or researcher shall not be strictly liable for personal injury or wrongful death resulting from the administration of any AIDS vaccine to a research subject participating in the clinical trials described in this chapter.

(b) It is the intent of the Legislature in enacting this section to confer upon manufacturers, research institutions, and researchers participating in the clinical trials described in this chapter an immunity from liability to the same extent as conferred upon specified pharmaceutical manufacturers under Brown v. Superior Court, 44 Cal. 3d 1049.

(c) No immunity shall be conferred to the extent that the injury or death was caused by the negligence, gross negligence, or reckless, willful, or wanton misconduct of the manufacturer, research institution, or researcher or the manufacturer, research institution, or the researcher has failed to comply with Section 121310.

(d) The immunity provided by this section shall not apply to a manufacturer, research institution, or researcher who intentionally provided false information to the FDA in connection with an IND application.

(e) Notwithstanding the immunity provided by this section, nothing in this section shall be construed to affect the inapplicability or applicability of the holding in Brown v. Superior Court, 44 Cal. 3d 1049 to other situations involving the same or similar conduct.

121320. No person shall be denied the opportunity to be a research subject because of the inability to pay for medical treatment.

121325. There is hereby created the AIDS Vaccine Clinical Trial Grant Award for the Prevention of Maternal Transmission of HIV Infection. Moneys within the AIDS Clinical Trials Testing Fund, established in accordance with Section 121260, shall, upon appropriation by the Legislature, be available to the department for the purposes of this chapter, that shall include a one-time amount of sixty thousand dollars ($60,000) for the department to develop and process the request for proposal as specified in subdivision (a). Grant awards shall be made available to not more than three manufacturers of an AIDS vaccine approved by the FDA for clinical trials in HIV-positive pregnant women. The purpose is to expedite the completion of an AIDS vaccine to prevent maternal transmission of HIV. The funds are to be used for FDA approved clinical trials.

(a) The department shall issue a request for proposal (RFP) for the clinical trials of an AIDS vaccine to prevent maternal transmission of HIV infection.

(1) The RFP shall be based on the criteria provided in subdivision (d).

(2) Upon issuing the RFP, the department shall publish this fact along with the deadline for grant proposals in the newspapers with the greatest circulation in the major cities of the state, as determined by the department. Additionally, upon issuing the RFP, the same information shall be transmitted to the Secretary of the Senate and the Chief Clerk of the Assembly for publishing in the respective journals of each house of the Legislature.

(b) Any manufacturer may submit a proposal for the grant award in the response to the RFP issued by the department.

(c) The department, taking into consideration the committee's recommendations, shall, for purposes of this chapter, award grants to no more than three California manufacturers after receiving the committee's recommendations.

(d) The department, making use of an RFP, shall include a clear description of the criteria to be used to select the projects that will receive funding pursuant to this chapter. The committee shall make recommendations to the department regarding the content of the RFP. The criteria shall include, but not be limited to, the following:

(1) The potential of the grant recipient to develop a vaccine for the prevention of maternal transmission of HIV infection.

(2) The financial, technical, and managerial commitment of the grant recipient to the development of the vaccine.

(3) The commitment of the grant recipient to agree to provide medical treatment, either directly or through reasonable health insurance coverage, to the participant for any injury caused by the AIDS vaccine in the clinical trial. This agreement shall also be included as part of the participant's informed consent pursuant to Section 121305.

(e) Grant awards may be made without limitation on the amount of funding from the AIDS Clinical Trials Testing Fund that may be allocated to a single manufacturer, provided that the committee has determined that the grant award is in the public interest.

121330. If a manufacturer that is a grant recipient sells, delivers, or distributes an AIDS vaccine that has received FDA approval for use by the general population and that was developed in whole or in part using a grant awarded pursuant to this chapter, the State of California shall be reimbursed for the grant as provided in this section.

Until the total amount of the grant is repaid, repayments in the amount of one dollar ($1) per dose from the sale of the AIDS vaccine shall be deposited by the grant recipient into the General Fund. Upon payment in full of the grant amount into the General Fund, a royalty on the sale of the vaccine from the grant recipient shall be deposited into the General Fund. The percentage amount of the royalty shall be negotiated at the time of the grant award.

121335. It is the intent of the Legislature for the department to make every effort possible to insure a comprehensive and diverse expert representation on the committee. It is the intent of the Legislature to ensure that expert members of the committee include, but are not limited to, ethnic minorities and women.

PART 5. TUBERCULOSIS

CHAPTER 1. TUBERCULOSIS CONTROL

121350. The department shall maintain a program for the control of tuberculosis. The department shall administer the funds made available by the state for the care of tuberculosis patients.

121355. Notwithstanding any other provision of this chapter a county that has elected to come under Section 14150.1 of the Welfare and Institutions Code shall not receive any tuberculosis subsidy or reimbursement from the state under the provisions of this chapter.

121357. The state department shall be the lead agency for all tuberculosis control and prevention activities at the state level.

121360. Pulmonary tuberculosis is an infectious and communicable disease, dangerous to the public health, and all proper expenditures that may be made by any county, pursuant to this chapter, are necessary for the preservation of the public health of the county.

121361. (a) (1) A health facility, local detention facility, or state correctional institution shall not discharge or release any of the following persons unless subdivision (e) is complied with:

(A) A person known to have active tuberculosis disease.

(B) A person who the medical staff of the health facility or of the penal institution has reasonable grounds to believe has active tuberculosis disease.

(2) In addition, persons specified in this subdivision may be discharged from a health facility only after a written treatment plan described in Section 121362 is approved by a local health officer of the jurisdiction in which the health facility is located. Treatment plans submitted for approval pursuant to this paragraph shall be reviewed by the local health officer within 24 hours of receipt of the plans.

(3) The approval requirement of paragraph (2) shall not apply to any transfer to a general acute care hospital when the transfer is due to an immediate need for a higher level of care, nor to any transfer from any health facility to a correctional institution. Transfers or discharges described in this paragraph shall occur only after the notification and treatment plan required by Section 121362 have been received by the local health officer.

(4) This subdivision shall not apply to transfers within the state correctional system or to interfacility transfers occurring within a local detention facility system.

(b) No health facility shall transfer a person described in subparagraph (A) or (B) of paragraph (1) of subdivision (a) to another health facility unless subdivision (e) is complied with. This subdivision shall not apply to transfers within the state correctional system or to interfacility transfers occurring within a local detention facility system.

(c) No state correctional institution or local detention facility shall transfer a person described in subparagraph (A) or (B) of paragraph (1) of subdivision (a) from a state to a local, or from a local to a state, penal institution unless notification and a written treatment plan are received by the chief medical officer of the penal institution receiving the person.

(d) No local detention facility shall transfer a person described in subparagraph (A) or (B) of paragraph (1) of subdivision (a) to a local detention facility in another jurisdiction unless subdivision (e) is complied with and notification and a written treatment plan are received by the chief medical officer of the local detention facility receiving the person.

(e) All discharges, releases, or transfers described in subdivisions (a), (b), (c), and (d) may occur only after notification and a written treatment plan pursuant to Section 121362 has been received by the local health officer. When prior notification would jeopardize the person’s health, the public safety, or the safety and security of the

penal institution, then the notification and treatment plan shall be submitted within 24 hours of discharge, release, or transfer.

121362. Each health care provider who treats a person for active tuberculosis disease, each person in charge of a health facility, or each person in charge of a clinic providing outpatient treatment for active tuberculosis disease shall promptly report to the local health officer at the times that the health officer requires, but no less frequently than when there are reasonable grounds to believe that a person has active tuberculosis disease, and when a person ceases treatment for tuberculosis disease. Situations in which the provider may conclude that the patient has ceased treatment include times when the patient fails to keep an appointment, relocates without transferring care, or discontinues care. The initial disease notification report shall include an individual treatment plan that includes the patient name, address, date of birth, tuberculin skin test results, pertinent radiologic, microbiologic, and pathologic reports whether final or pending, and any other information required by the local health officer. Subsequent reports shall provide updated clinical status and laboratory results, assessment of treatment adherence, name of current care provider if patient transfers care, and any other information required by the local health officer. A facility discharge, release, or transfer report shall include all pertinent and updated information required by the local health officer not previously reported on initial or subsequent reports, and shall specifically include verified patient address, the name of the medical provider who has specifically agreed to provide medical care, clinical information used to assess the current infectious state, and any other information required by the local health officer. Each health care provider who treats a person with active tuberculosis disease, and each person in charge of a health facility or a clinic providing outpatient treatment for active tuberculosis disease, shall maintain written documentation of each patient's adherence to his or her individual treatment plans. Nothing in this section shall authorize the disclosure of test results for human immunodeficiency virus (HIV) unless authorized by Chapter 7 (commencing with Section 120975) of, Chapter 8 (commencing with Section 121025) of, and Chapter 10 (commencing with Section 121075) of, Part 4, of Division 105.

In the case of a parolee under the jurisdiction of the Department of Corrections, the local health officer shall notify the medical officer of the parole region or the physician and surgeon designated by the Director of Corrections when there are reasonable grounds to believe that the parolee has active tuberculosis disease and when the parolee ceases treatment for tuberculosis. Situations where the local health officer may conclude that the parolee has ceased treatment include times when the parolee fails to keep an appointment, relocates without transferring care, or discontinues care.

121363. Each health care provider who treats a person for active tuberculosis disease shall examine, or cause to be examined, all household contacts or shall refer them to the local health officer for examination. Each health care provider shall promptly notify the local health officer of the referral. When required by the local health officer, nonhousehold contacts and household contacts not examined by a health care provider shall submit to examination by the local health officer or designee. If any abnormality consistent with tuberculosis disease is found, steps satisfactory to the local health officer shall be taken to refer the person promptly to a health care provider for further investigation, and if necessary, treatment. Contacts shall be reexamined at times and in a manner as the local health officer may require. When requested by the local health officer, a health care provider shall report the results of any examination related to tuberculosis of a contact.

121364. (a) Within the territory under his or her jurisdiction, each local health officer may order examinations for tuberculosis infection for the purposes of directing preventive measures for persons in the territory, except those incarcerated in a state correctional institution, for whom the local health officer has reasonable grounds to determine are at heightened risk of tuberculosis exposure.

(b) An order for examination pursuant to this section shall be in writing and shall include other terms and conditions as may be necessary to protect the public health.

121365. Each local health officer is hereby directed to use every available means to ascertain the existence of, and immediately investigate all reported or suspected cases of active tuberculosis disease in the jurisdiction, and to ascertain the sources of those infections. In carrying out the investigations, each local health officer shall follow applicable local rules and regulations and all general and special rules, regulations, and orders of the state department. If the local health officer determines that the public health in general or the health of a particular person is endangered by exposure to a person who is known to have active tuberculosis disease, or to a person for whom there are reasonable grounds to believe has active tuberculosis disease, the local health officer may issue any orders he or she deems necessary to protect the public health or the health of any other person, and may make application to a court for enforcement of the orders. Upon the receipt of information that any order has been violated, the health officer shall advise the district attorney of the county in which the violation has occurred, in writing, and shall submit to the district attorney the information in his or her possession relating to the subject matter of the order, and of the violation or violations thereof.

The orders may include, but shall not be limited to, any of the following:

(a) An order authorizing the removal to, detention in, or admission into, a health facility or other treatment facility for appropriate examination for active tuberculosis disease of a person who is known to have active tuberculosis disease, or a person for whom there are reasonable grounds to believe that the person has active tuberculosis disease and who is unable or unwilling voluntarily to submit to the examination by a physician or by the local health officer. Any person whom the health officer determines should have an examination for tuberculosis disease may have the examination made by a physician and surgeon of his or her own choice who is licensed to practice medicine under Chapter 5 (commencing with Section 2000) of Division 2 of the Business and Professions Code under terms and conditions as the local health officer shall determine on reasonable grounds to be necessary to protect the public health. This section does not authorize the local health officer to mandate involuntary anergy testing.

(b) An order requiring a person who has active tuberculosis disease to complete an appropriate prescribed course of medication for tuberculosis disease and, if necessary, to follow required infection control precautions for tuberculosis disease. This subdivision does not allow the forceable or involuntary administration of medication.

(c) An order requiring a person who has active tuberculosis disease and who is unable or unwilling otherwise to complete an appropriate prescribed course of medication for tuberculosis disease to follow a course of directly observed therapy. This subdivision does not allow forceable or involuntary administration of medication.

(d) An order for the removal to, detention in, or admission into, a health facility or other treatment facility of a person if both of the following occur:

(1) The person has infectious tuberculosis disease, or who presents a substantial likelihood of having infectious tuberculosis disease, based upon proven epidemiologic evidence, clinical evidence, X-ray readings, or tuberculosis laboratory test results.

(2) The local health officer finds, based on recognized infection control principles, that there is a substantial likelihood the person may transmit tuberculosis to others because of his or her inadequate separation from others.

(e) An order for the removal to, detention in, or admission into, a health facility or other treatment facility of a person if both of the following occur:

(1) The person has active tuberculosis disease, or has been reported to the health officer as having active tuberculosis disease with no subsequent report to the health officer of the completion of an appropriate prescribed course of medication for tuberculosis disease.

(2) There is a substantial likelihood, based on the person’s past or present behavior, that he or she cannot be relied upon to participate

in or complete an appropriate prescribed course of medication for tuberculosis disease and, if necessary, follow required infection control precautions for tuberculosis disease. The behavior may include, but is not limited to, refusal or failure to take medication for tuberculosis disease, refusal or failure to keep appointments or treatment for tuberculosis disease, refusal or failure to complete the treatment for tuberculosis disease, or disregard for infection control precautions for active tuberculosis disease.

(f) An order for exclusion from attendance at the workplace for persons with infectious tuberculosis disease. The order may, also, exclude the person from any place when the local health officer determines that the place cannot be maintained in a manner adequate to protect others against the spread of tuberculosis disease.

(g) An order for isolation of persons with infectious tuberculosis disease to their place of residence until the local health officer has determined that they no longer have infectious tuberculosis disease.

(h) This section shall apply to all persons except those incarcerated in a state correctional institution.

(i) This section shall not be construed to require a private hospital or other private treatment facility to accept any patient without a payment source, including county responsibilities under Section 17000 of the Welfare and Institutions Code, except as required by Sections 1317 et seq. or by federal law.

121366. The local health officer may detain in a hospital or other appropriate place for examination or treatment, a person who is the subject of an order of detention issued pursuant to subdivision (a), (d), or (e) of Section 121365 without a prior court order except that when a person detained pursuant to subdivision (a), (d), or (e) of Section 121365 has requested release, the local health officer shall make an application for a court order authorizing the continued detention within 72 hours after the request or, if the 72-hour period ends on a Saturday, Sunday, or legal holiday, by the end of the first business day following the Saturday, Sunday, or legal holiday, which application shall include a request for an expedited hearing. After the request for release, detention shall not continue for more than five business days in the absence of a court order authorizing detention. However, in no event shall any person be detained for more than 60 days without a court order authorizing the detention. The local health officer shall seek further court review of the detention within 90 days following the initial court order authorizing detention and thereafter within 90 days of each subsequent court review. In any court proceeding to enforce a local health officer’s order for the removal or detention of a person, the local health officer shall prove the particularized circumstances constituting the necessity for the detention by clear and convincing evidence. Any person who is subject to a detention order shall have the right to be represented by

counsel and upon the request of the person, counsel shall be provided.

121367. (a) An order of a local health officer pursuant to Section 121365 shall set forth all of the following:

(1) The legal authority under which the order is issued, including the particular sections of state law or regulations.

(2) An individualized assessment of the person's circumstances or behavior constituting the basis for the issuance of the order.

(3) The less restrictive treatment alternatives that were attempted and were unsuccessful, or the less restrictive treatment alternatives that were considered and rejected, and the reasons the alternatives were rejected.

(4) The orders shall be in writing, and shall include the name of the person, the period of time during which the order shall remain effective, the location, payer source if known, and other terms and conditions as may be necessary to protect the public health. Upon issuing an order, a copy of the order shall be served upon the person named in the order.

(b) An order for the detention of a person shall do all of the following:

(1) Include the purpose of the detention.

(2) Advise the person being detained that he or she has the right to request release from detention by contacting a person designated on the local health officer's order at the telephone number stated on the order and that the detention shall not continue for more than five business days after the request for release, in the absence of a court order authorizing the detention.

(3) Advise the person being detained that, whether or not he or she requests release from detention, the local health officer is required to obtain a court order authorizing detention within 60 days following the commencement of detention and thereafter shall further seek court review of the detention within 90 days of the court order and within 90 days of each subsequent court review.

(4) Advise the person being detained that he or she has the right to arrange to be represented by counsel or to have counsel provided, and that if he or she chooses to have counsel provided, the counsel will be notified that the person has requested legal representation.

(5) Be accompanied by a separate notice that shall include, but not be limited to, all of the following additional information:

(A) That the person being detained has the right to request release from detention by contacting a person designated on the local health officer's order at a telephone number stated on the order, and that the detention shall not continue for more than five business days after the request in the absence of a court order authorizing the detention.

(B) That he or she has the right to arrange to be advised and represented by counsel or to have counsel provided, and that if he or

she chooses to have counsel provided, the counsel will be notified that the person has requested legal representation.

(C) That he or she may supply the addresses or telephone numbers of not more than two individuals to receive notification of the person's detention, and that the local health officer shall, at the patient's request, provide notice within the limits of reasonable diligence to those people that the person is being detained.

121368. Notwithstanding any inconsistent provision of Section 121365, 121366 or 121367, all of the following shall apply:

(a) A person who is detained solely pursuant to subdivision (a) of Section 121365 shall not continue to be detained beyond the minimum period of time required, with the exercise of all due diligence, to make a medical determination of whether a person who is suspected of having tuberculosis disease, has active tuberculosis or whether a person who has active tuberculosis disease has infectious tuberculosis disease. Further detention of the person shall be authorized only upon the issuance of a local health officer's order pursuant to subdivision (d) or (e) of Section 121365.

(b) A person who is detained solely for the reasons described in subdivision (d) of Section 121365 shall not continue to be detained after he or she ceases to be infectious or after the local health officer ascertains that changed circumstances exist that permit him or her to be adequately separated from others so as to prevent transmission of tuberculosis disease after his or her release from detention.

(c) A person who is detained for the reasons described in subdivision (e) of Section 121365 shall not continue to be detained after he or she has completed an appropriate prescribed course of medication.

121369. For the purposes of Sections 121365, 121366, and 121367, all of the following shall apply:

(a) If necessary, language interpreters and persons skilled in communicating with vision and hearing impaired individuals shall be provided in accordance with applicable law.

(b) Nothing in those sections shall be construed to permit or require the forcible administration of any medication without a prior court order.

(c) Any and all orders authorized under those sections shall be made by the local health officer. His or her authority to make the orders may be delegated to the person in charge of medical treatment of inmates in penal institutions within the local health officer's jurisdiction, or pursuant to Section 7. The local health officer shall not make any orders incorporating by reference any other rules or regulations.

121370. No examination or inspection shall be required of any person who depends exclusively on prayer for healing in accordance with the teachings of any well recognized religious sect, denomination or organization and claims exemption on that ground,

except that the provisions of this code regarding compulsory reporting of communicable diseases and isolation and quarantine shall apply where there is probable cause to suspect that the person is infected with the disease in a communicable stage. Such person shall not be required to submit to any medical treatment, or to go to or be confined in a hospital or other medical institution; provided, he or she can be safely quarantined and/or isolated in his or her own home or other suitable place of his or her choice.

121375. The department may inspect and have access to all records of all institutions and clinics, both public and private, where tuberculosis patients are treated.

121380. The department may advise officers of state educational, correctional, and medical institutions regarding the control of tuberculosis and the care of tuberculosis patients.

121390. The department shall lease any facilities it deems necessary to care for persons afflicted with active contagious tuberculosis who violate the quarantine or isolation orders of the health officer as provided in Section 120280.

121395. Whenever any person confined in any state institution, as provided in Section 120280, subject to the jurisdiction of the Director of Corrections, dies, and any personal funds or personal property of the person remains in the hands of the Director of Corrections, those funds may be applied in an amount not exceeding three hundred dollars ($300) to the payment of expenses relating to burial; provided, however, that if no such funds are available, the department shall reimburse the Director of Corrections for the expenses in an amount not exceeding three hundred dollars ($300).

121400. If the place of confinement of a person confined under the provisions of Section 120280 is in a county other than the county where he or she was convicted, upon release he or she shall be released in the custody of the sheriff of the county where he or she was convicted, and the sheriff shall forthwith return him or her to the place where he or she was convicted without the necessity of a court order or other process. The sheriff shall prior to the return of the person notify the health officer having jurisdiction of the area to which he or she will be returned of the date he or she will reach that area.

121450. The department may distribute for the purpose of tuberculosis control an annual subvention, paid quarterly, to any local health department that maintains a tuberculosis control program consistent with standards and procedures established by the department. This annual subvention shall be used primarily for the strengthening of tuberculosis prevention activities by local health departments. Further, the department may allocate additional funds to selected local health departments based on high disease incidence, or other standards established by the department. These additional funds shall be expended primarily for the cost of diagnosis, treatment,

and followup services required for an effective tuberculosis control program. Services rendered under this section may not be made dependent on status of residence.

121455. The department may establish standards and procedures for the operation of local tuberculosis control programs. Such standards shall include, but not be limited to, the maintenance of records and reports relative to services rendered and to expenditures made that shall be reported semiannually to the department in a manner as it may specify.

121460. Of the annual appropriation made to the department for tuberculosis control, the department may expend a sum not to exceed 7.5 percent of the total, for administrative costs. In addition, it may, if it deems necessary, withhold a portion of the appropriation to pay for the cost of regional laboratory services and regional hospitalization facilities for patients whose care cannot be reasonably accomplished in facilities available within a local health department, or it may contract with physicians to supervise the medical care of tuberculosis patients in areas where the specialized care is not available. Further, the appropriation shall be available to purchase materials or drugs used in tuberculosis control for distribution to local health departments.

CHAPTER 2. TUBERCULOSIS TESTS FOR PUPILS

121475. In enacting this chapter, it is the intent of the Legislature to provide:

(a) A means for the eventual elimination of tuberculosis.

(b) Persons required to be tested for tuberculosis under this chapter may obtain testing from whatever medical source they desire, subject only to the condition that the testing be performed in accordance with the regulations of the department and that a record of the testing is made in accordance with the regulations.

(c) Exemptions from tuberculosis tests because of personal beliefs.

(d) For the keeping of adequate records of tuberculosis tests so that health departments, schools, and other institutions, parents or guardians, and the persons tested will be able to ascertain that a child is free from active tuberculosis, and so that appropriate public agencies will be able to ascertain the testing needs of groups of children in schools or other institutions.

121480. As used in this chapter, the following terms shall have the following meanings:

(a) ''Governing authority'' means the governing board of each school district or the authority of each other private or public institution responsible for the operation and control of the institution or the principal or administrator of each school or institution.

(b) ''Certificate'' means a document signed by the examining physician and surgeon who is licensed under Chapter 5 (commencing with Section 2000) of Division 2 of the Business and Professions Code, or a notice from a public health agency, a unit of the American Lung Association, or any other private or public source, any of which indicates examination for, and freedom from, active tuberculosis.

(c) ''Department'' means State Department of Health Services.

121485. (a) If the local health officer determines that persons seeking first admission to any private or public elementary or secondary school or institution are reasonably suspected of having tuberculosis and further determines that the examination of the persons for tuberculosis is necessary for the preservation and protection of the public health, he or she may issue an order requiring the persons to undergo a tuberculosis examination.

(b) If an order has been issued pursuant to subdivision (a), the governing authority shall not unconditionally admit any person subject to the order as a pupil of any private or public elementary or secondary school, or institution, unless prior to his or her first admission to that institution, he or she provides evidence to the institution of a certificate showing that he or she is free of communicable tuberculosis.

(c) Thereafter, any such pupil may be required to undergo the tuberculosis examinations and provide another certificate showing that he or she is free of communicable tuberculosis, if the local health officer orders the examination.

121490. The examination shall consist of an approved intradermal tuberculin skin test, that, if positive, is followed by an X-ray of the lungs.

121495. (a) A person subject to an order made pursuant to subdivision (a) of Section 121485 who does not have on file the certificate required by this chapter may be admitted by the governing authority on condition that within time periods designated by regulations of the department, he or she will provide the certificate.

(b) The governing authority shall prohibit from further attendance any person admitted conditionally who fails to obtain and provide the required certificate within the time limits allowed in the regulations of the department, unless the person is exempted under Section 121505, until the person has provided the certificate to the governing authority.

121500. The examinations required by this chapter may be administered by any private or public source desired.

121505. The certificate shall not be required for a person who is subject to an order made pursuant to subdivision (a) of Section 121485, if the parent, guardian, or other adult who has assumed responsibility for his or her care and custody in case of a minor, or the

person seeking admission, if an emancipated minor, provides to the governing authority an affidavit stating that the examination required to obtain the certificate is contrary to his or her beliefs. If at any time there should be probable cause to believe that the person is afflicted with active tuberculosis, he or she may be excluded from the school or other institution listed in Section 121485 until the governing board is satisfied that he or she is not so afflicted.

121510. Any person or organization administering tuberculosis examinations shall furnish each person examined, or his or her parent or guardian, as appropriate, with a certificate of the examination results given in a form prescribed by the department.

121515. The governing authority shall cooperate with the local health officer in carrying out any programs ordered by the local health officer for the tuberculosis examinations of persons applying for first admission to any school or institution under its jurisdiction. The governing board of any school district may use funds, property, and personnel of the district for that purpose.

121520. The department, in consultation with the Department of Education, shall adopt and enforce all and regulations necessary to carry out this chapter.

CHAPTER 3. TUBERCULOSIS TESTS FOR EMPLOYEES

121525. (a) Except as provided in Section 121555, no person shall be initially employed by a private or parochial elementary or secondary school, or any nursery school, unless that person produces or has on file with the school a certificate showing that within the last 60 days the person has been examined and has been found to be free of communicable tuberculosis.

(b) Thereafter those employees who are skin test negative shall be required to undergo the foregoing examination at least once each four years or more often if directed by the school upon recommendation of the local health officer for so long as the employee remains skin test negative. Once an employee has a documented positive skin test, the foregoing examination is no longer required and a referral shall be made within 30 days of completion of the examination to the local health officer to determine the need for followup care.

(c) At the discretion of the governing authority of a private school, this section shall not apply to employees who are employed for any period of time less than a school year whose functions do not require frequent or prolonged contact with pupils. The governing authority may, however, require the examination and may as a contract condition require the examination of persons employed under contract if the governing authority believes the presence of the persons in and around the school premises would constitute a health hazard to students.

(d) The governing authority of a private school providing for the transportation of pupils under authorized contract shall require as a condition of the contract that every person transporting pupils produce a certificate showing that within the last 60 days the person has been examined and has been found to be free of communicable tuberculosis, except that any private contracted driver who transports pupils on an infrequent basis, not to exceed once a month, shall be excluded from this requirement.

(e) The examination attested to in the certificate required pursuant to subdivision (d) of this section shall be made available without charge by the local health officer.

''Certificate,'' as used in this chapter, means a document signed by the examining physician and surgeon who is licensed under Chapter 5 (commencing with Section 2000) of Division 2 of the Business and Professions Code, or a notice from a public health agency or unit of the Tuberculosis Association that indicates freedom from active tuberculosis.

(f) Nothing in this section shall prevent the governing authority of a private, parochial, or nursery school, upon recommendation of the local health officer, from establishing a rule requiring a more extensive or more frequent examination than required by this section.

121530. The examination shall consist of an approved intradermal tuberculosis test, that, if positive, shall be followed by an X-ray of the lungs.

121535. The X-ray film may be taken by a competent and qualified X-ray technician if the X-ray film is subsequently interpreted by a licensed physician and surgeon.

121540. The school shall maintain a file containing an up-to-date certificate for each person covered by this chapter. It shall be the duty of the county health officer of each county to insure that the provisions of this chapter are complied with.

121545. (a) All volunteers in schools covered under this chapter shall also be required to have on file with the school a certificate showing that within the last four years the person has been examined and has been found to be free of communicable tuberculosis.

(b) At the discretion of the governing authority of a private school, this section shall not apply to volunteers whose functions do not necessitate frequent or prolonged contact with pupils.

121550. Nothing in this chapter shall prevent the school from requiring more extensive or more frequent examinations.

121555. (a) A person who transfers his or her employment from one of the schools specified in subdivision (a) of Section 121525 to another shall be deemed to meet the requirements of subdivision (a) of Section 121525 if the person can produce a certificate that shows that he or she was examined within the past four years and was found

to be free of communicable tuberculosis, or if it is verified by the school previously employing him or her that it has a certificate on file.

(b) A person who transfers his or her employment from a public elementary school or secondary school to any of the schools specified in subdivision (a) of Section 121525 shall be deemed to meet the requirements of subdivision (a) of Section 121525 if that person can produce a certificate as provided for in Section 11708 of the Education Code that shows that he or she was examined within the past four years and was found to be free of communicable tuberculosis, or if it is verified by the school district previously employing him or her that it has a certificate on file.

PART 6. VETERINARY PUBLIC HEALTH AND SAFETY

CHAPTER 1. RABIES CONTROL

121575. ''Rabies,'' as used in this chapter, includes rabies, and any other animal disease dangerous to human beings that may be declared by the department as coming under chapter.

121580. ''Quarantine,'' as used in this chapter, means the strict confinement, upon the private premises of the owner, under restraint by leash, closed cage, or paddock, of all animals specified in the order of the department.

121585. ''Rabies area'' shall mean any area not less than a county as determined by the director within a region where the existence of rabies constitutes a public health hazard, as found and declared by the director. A region shall be composed of two or more counties as determined by the director. The status of an area as a rabies area shall terminate at the end of one year from the date of the declaration unless, not earlier than two months prior to the end of the year, it is again declared to be a rabies area in the manner provided in this section. If however, the director at any time finds and declares that an area has ceased to be a rabies area its status shall terminate upon the date of the declaration.

121595. Whenever any case of rabies is reported as existing in any county or city, the department shall make, or cause to be made, a preliminary investigation as to whether the disease exists, and as to the probable area of the state in which the population or animals are endangered.

121600. If upon the investigation the department finds that rabies exists, a quarantine shall be declared against all animals as are designated in the quarantine order, and living within the area specified in the order.

121605. Following the order of quarantine the department shall make or cause to be made a thorough investigation as to the extent of the disease, the probable number of persons and animals exposed, and the area found to be involved.

121610. The department may substitute for the quarantine order regulations as may be deemed adequate for the control of the disease in each area.

121615. All peace officers and boards of health shall carry out the provisions of this chapter.

121620. During the period for which any quarantine order is in force any officer may kill or in his or her discretion capture and hold for further action by the department any animal in a quarantine area, found on public highways, lands, and streets, or not held in restraint on private premises as specified in this chapter.

121625. Any proper official within the meaning of this chapter may examine and enter upon all private premises for the enforcement of this chapter.

121630. Except as provided in Sections 121705 and 121710, every person who possesses or holds any animal in violation of the provisions of this chapter is guilty of an infraction, punishable by a fine not exceeding one thousand dollars ($1,000).

121635. For the purpose of providing funds to pay expenses incurred in connection with the eradication of rabies, the rabies treatment and eradication fund is continued in existence in each county or city in this state.

121640. All money collected for dog license taxes shall be deposited to the credit of this fund with the treasurer of the county or city; but funds now collected from any dog tax may continue to be collected and used for other purposes specified by local ordinances.

121645. Upon the determination by the department that rabies exists in any county or city, a special dog license tax shall immediately become effective, unless a dog tax is already in force the funds from which are available for the payment of expenditures in accordance with this chapter.

121650. This tax shall be levied as follows: An annual tax of one dollar and fifty cents ($1.50) for each male, two dollars and fifty cents ($2.50) for each female, and one dollar and fifty cents ($1.50) for each neuter dog. It shall be collected by the proper authority at the same time and in the same manner as other taxes are collected; except that at the first collection the proportion of the annual tax as corresponds to the number of months the tax has been in operation plus one year advance payment shall be collected.

121655. After this dog license tax has been established in a county or city, it shall be continued in force until an order has been issued by the department declaring that county, or the portion of that county as may be deemed advisable, to be free from rabies or further danger of its spread.

121660. One half of all fines collected by any court or judge for violations of this chapter shall be placed to the credit of the rabies treatment and eradication fund of the county or city where the violation occurred.

121665. Whenever it becomes necessary in the judgment of the department, to enforce this chapter in any county or city, the department may institute special measures of control to supplement the efforts of the local authorities in any county or city whose duties are specified in this chapter.

121670. All expenditures incurred in enforcing the special measures shall be proper charges against the special fund referred to in this chapter, and shall be paid as they accrue by the proper authorities of each county or city where they have been incurred; but all expenditures that may be incurred after the issuance of the order establishing the tax and before the first collection of the tax, shall be paid as they accrue from the general fund of the county or city.

121675. All expenditures in excess of the balance of money in this fund shall likewise be paid as they accrue from the general fund. All money thus expended from the general fund shall be repaid from the special fund when the collections from the tax have provided the money.

121680. Notwithstanding any other provision of this chapter a guide dog serving a blind master shall not be quarantined, in the absence of evidence that he or she has been exposed to rabies, unless his or her master fails:

(a) To keep him or her safely confined to the premises of the master.

(b) To keep him or her available for examination at all reasonable times.

121685. Notwithstanding any other provision of this chapter, a dog used by any state, county, city, or city and county law enforcement agency shall not be quarantined after biting any person if the bite occurred while the dog was being used for any law enforcement purpose. The law enforcement agency shall make the dog available for examination at any reasonable time. The law enforcement agency shall notify the local health officer if the dog exhibits any abnormal behavior.

121690. In rabies areas, all of the following shall apply:

(a) Every dog owner, after his or her dog attains the age of four months, shall no less than once every two years secure a license for the dog as provided by ordinance of the responsible city, city and county, or county. License fees shall be fixed by the responsible city, city and county, or county, at an amount not to exceed limitations otherwise prescribed by state law or city, city and county, or county charter.

(b) Every dog owner, after his or her dog attains the age of four months, shall, at intervals of time not more often than once a year, as may be prescribed by the department, procure its vaccination by a licensed veterinarian with a canine antirabies vaccine approved by, and in a manner prescribed by the department.

(c) All dogs under four months of age shall be confined to the premises of, or kept under physical restraint by, the owner, keeper, or harborer. Nothing in this chapter and Section 120435 shall be construed to prevent the sale or transportation of a puppy four months old or younger.

(d) Any dog in violation of this chapter and any additional provisions that may be prescribed by any local governing body, shall be impounded, as provided by local ordinance.

(e) It shall be the duty of the governing body of each city, city and county, or county to maintain or provide for the maintenance of a pound system and a rabies control program for the purpose of carrying out and enforcing this section.

(f) It shall be the responsibility of each city, county, or city and county to provide dog vaccination clinics, or to arrange for dog vaccination at clinics operated by veterinary groups or associations, held at strategic locations throughout each city, city and county, or county. The vaccination and licensing procedures may be combined as a single operation in the clinics. No charge in excess of the actual cost shall be made for any one vaccination at a clinic. No owner of a dog shall be required to have his or her dog vaccinated at a public clinic if the owner elects to have the dog vaccinated by a licensed veterinarian of the owner's choice.

All public clinics shall be required to operate under antiseptic immunization conditions comparable to those used in the vaccination of human beings.

(g) In addition to the authority provided in subdivision (a), the ordinance of the responsible city, city and county, or county may provide for the issuance of a license for a period not to exceed three years for dogs that have attained the age of 12 months or older and have been vaccinated against rabies. The person to whom the license is issued pursuant to this subdivision may choose a license period as established by the governing body of up to one, two, or three years. However, when issuing a license pursuant to this subdivision, the license period shall not extend beyond the remaining period of validity for the current rabies vaccination. A dog owner who complies with this subdivision shall be deemed to have complied with the requirements of subdivision (a).

121695. Nothing in this chapter and Section 120435 is intended or shall be construed to limit the power of any city, city and county, or county in its authority in the exercise of its police power or in the exercise of its power under any other provisions of law to enact more stringent requirements, to regulate and control dogs within the boundaries of its jurisdiction.

121700. Rabies vaccines for animal use shall not be supplied to other than a veterinary biologic supply firm, a person licensed to practice veterinary medicine under Chapter 11 (commencing with

Section 4800) of Division 2 of the Business and Professions Code, or a public agency.

121705. Any person who willfully conceals information about the location or ownership of an animal subject to rabies, that has bitten or otherwise exposed a person to rabies, with the intent to prevent the quarantine or isolation of that animal by the local health officer is guilty of a misdemeanor.

Any person who violates this section is guilty of a misdemeanor.

121710. Any person who, after notice, violates any order of a local health officer concerning the isolation or quarantine of an animal of a species subject to rabies, that has bitten or otherwise exposed a person to rabies or who, after that order, fails to produce the animal upon demand of the local health officer, is guilty of a misdemeanor, punishable by imprisonment in the county jail for a period not to exceed one year, or by fine of not less than one hundred dollars ($100), nor more than one thousand dollars ($1,000) per day of violation, or by both fine and imprisonment.

CHAPTER 2. AVIAN ZOONOSIS CONTROL

121725. No person, association, organization, partnership, or corporation shall raise and sell, offer for sale, trade, or barter any shell parakeet or budgerigar unless the bird is banded with traceable, seamless, closed bands of standard size, color, and material as specified by the department after consulting with the advisory committee.

121730. No band manufacturer, bird club, association, corporation, society, or person shall issue any bands prescribed under Section 121725 without a permit from the department. A permit shall be granted by the department upon compliance with reasonable and necessary regulations as prescribed by the board.

121735. No manufacturer of bands prescribed under Section 121725 shall sell or market the bands in the state without giving a bond as required by the regulations of the board and without obtaining a permit from the department.

121740. Every band issuing agency shall maintain records and make reports as required by reasonable and necessary regulations of the board. The board may by regulation prescribe the keeping of sales records as it deems necessary to effectuate the purposes of this chapter.

121745. (a) Whenever the director finds that psittacosis, or any other diseases transmissible to man from pet birds, have become a public health hazard to the extent that control measures are necessary or desirable, the board shall adopt additional regulations as it deems necessary for the public health; and these regulations shall apply to all pet birds whether or not of a species otherwise regulated under this chapter. These regulations shall be adopted in accordance

with Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code.

(b) This section shall not be operative during the 1993–94 fiscal year.

121755. All manufacturers selling or marketing bands prescribed in Section 121725 shall collect a fee for the department on each band sold. The board shall provide by regulation the amount of the fee to be collected, the total amount of those fees to yield a sum approximating the estimated cost of the administration of the parakeet banding program. All fees collected by manufacturers under this chapter shall be paid to the department quarterly on or before the last day of the month next succeeding each quarterly period. Such fees shall be paid by the department into the General Fund in the State Treasury.

121760. The violation of any of the provisions of this chapter shall constitute a misdemeanor.

121765. This chapter shall apply to all shell parakeets or budgerigars.

CHAPTER 3. IMPORTATION OF WILD ANIMALS

Article 1. General

121775. As used in this chapter, ''wild animal'' refers to any animal of the class Aves (birds) or class Mammalia (mammals) that either is not normally domesticated in this state or not native to this state.

121780. As used in this chapter, ''enforcement officer'' means any officer, employee, or agent of the department, local health officer, or of any state or local agency with which an agreement has been made to enforce Article 3 (commencing with Section 121850), or local health officer.

121785. The department may enter into agreement with any state or local agency for the enforcement of Article 3 (commencing with Section 121850) of this chapter.

121790. The department shall publish from time to time a list of animals that may not be imported into this state except by permit from the department. Unless a permit is issued pursuant to this chapter, it is unlawful to import into this state any wild animal for which a permit is required by the department.

121795. The department may adopt regulations governing the entry, quarantine, or release from quarantine, of any and all wild animals imported into this state pursuant to this chapter. The regulations shall be designed to protect the public health against diseases known to occur in any such animals.

121800. The violation of any provision of this chapter shall be a misdemeanor.

Article 2. Permits

121825. The department may issue a written permit to import into this state any wild animal specified by the department pursuant to Section 121790, upon determination that the public health and safety will not be endangered by the importation in accordance with the terms and conditions of the permit.

121830. A permit shall be issued only upon written application from the person desiring to import the species, enumerating all of the following:

(a) The number and true scientific name of each species of wild animal for which a permit is requested.

(b) The carrier and probable point of first arrival in this state of each shipment of the species.

(c) The purpose for which they are to be imported.

(d) The name and address of the consignee.

(e) The name and address of the consignor.

(f) The place or premises where the animals shall be held in quarantine pending the completion of the tests, veterinary examinations, and observation period as may be specified by the department as a condition of the permit required under this chapter.

(g) The name and address of the licensed veterinarian who shall conduct the tests and examinations as specified by the department pursuant to this chapter.

121835. Each permit issued shall set forth the following:

(a) The number and true scientific name of the species of wild animal for which the permit is granted.

(b) A statement of the terms and conditions under which the entry of the species is permitted.

(c) The place and conditions of quarantine where required.

(d) A statement of the tests, veterinary examinations, observation period, and quarantine period as may be specified by the department.

121840. Whenever any permit is issued under provisions of this article, one copy shall be sent by the department to the local health officer of the county where the species will be held in quarantine, two copies shall accompany each shipment of wild animals involved.

121845. The department shall charge a fee for the issuance of the import permit provided for under Section 121825. The department shall provide by regulation the amount of the fee to be collected, the total amount of the fees to yield a sum approximating the cost of the administration and enforcement of this chapter. All fees shall be paid by the department into the General Fund.

Article 3. Regulation and Enforcement

121850. Any person who imports, transports into the state, or receives, any live wild animal enumerated in or designated pursuant to Section 121790, shall hold the animal in confinement for inspection and immediately notify the department of the arrival thereof. If there is found in any shipment any species not specified in the permit issued under this chapter and subject thereto, or more than the number of any species specified, the animals shall be refused admittance as provided under Section 121865.

121855. If, during inspection upon arrival any wild animal is found to be diseased, or there is reason to suspect the presence of disease that will or may endanger the public health and safety, the diseased animal, and, if necessary, the entire shipment shall be destroyed by or under the supervision of the enforcing officer, unless the public health and safety will not be endangered by its detention in quarantine for a time and under conditions satisfactory to the enforcing officer for disinfection, treatment, or diagnosis, or no detriment can be caused by its return to point of origin at the option and expense of the owner or bailee.

121860. Whenever any wild animal brought into this state under permit is quarantined as provided in this chapter, the species shall not be released from quarantine except by release in writing from the department. All tests, veterinary examinations, and quarantines shall be at the expense of the owner or bailee of the animals involved. Any species refused release from quarantine under this section shall be destroyed, detained, or returned to its point of origin as provided in Section 121855.

121865. Any live wild animal brought into this state in violation of the provisions of this chapter or any regulations thereunder may, upon notice from the enforcing officer inspecting them or discovering the violation, be returned to the point of origin, or destroyed, within the time specified in the notice, at the option of the owner or bailee.

The exercise of any such option shall be under the direction and control of the enforcing officer and at the expense of the owner or bailee. If the owner or bailee fails to exercise the option within the time specified in the notice, the enforcing officer shall immediately thereafter seize and destroy the animals at the expense of the owner or bailee.

121870. This chapter, or any regulations adopted pursuant thereto, shall not authorize the importation, transportation, or possession of any live wild animals enumerated in Chapter 2 (commencing with Section 2116) of Division 3 of the Fish and Game Code or the regulations of the Fish and Game Commission adopted pursuant thereto, except as provided in Chapter 2 (commencing with Section 2116) of Division 3 of the Fish and Game Code.

CHAPTER 4. ANIMAL CONTROL

121875. This chapter may be cited as ''The Dog Act of 1969.''

121880. For the purposes of this chapter, ''sentry dog'' means a dog trained to work without supervision in a fenced facility and to deter or detain unauthorized persons found within the facility.

121885. For the purposes of this chapter, ''narcotic detection dog'' means a dog trained to locate narcotics by scent.

121890. For the purposes of this chapter, ''tracker or attack dog'' means a dog trained to work with a handler in searching out facilities for burglary suspects and other intruders.

121895. For the purposes of this chapter, ''sentry dog company'' means any person who agrees to furnish trained sentry, attack, or narcotic detection dogs for hire.

121900. For the purposes of this chapter ''dog handler'' means any person trained in the handling of dogs whose training includes the care, feeding, and maintenance of dogs, and the procedures necessary to control the behavior of a dog subject to this chapter.

121905. For the purposes of this chapter ''hire'' shall include, but not be limited to, the renting or leasing of the services of a dog with or without a dog handler, or the sale of a dog with an option to repurchase.

121910. Each sentry dog company shall register each dog subject to this chapter that it handles with the local law enforcement agency and with the state, city, county, or district fire department that has the responsibility for the prevention and suppression of fires in the area where the sentry dog company is located.

121915. Each sentry dog company that handles a dog subject to this chapter shall notify the appropriate local law enforcement agency and the appropriate fire department by mail not more than 15 days before a dog is sent on an assignment of the location and duration of the assignment. The local law enforcement agency and fire department shall maintain a file of the assignments.

121920. Each dog subject to this chapter shall, at all times, wear an identification tag. The identification tag shall be provided by the sentry dog company furnishing the dog for hire. Such identification tag shall contain, but not be limited to, the following information:

(a) The name of the dog.

(b) The name, address, and telephone number of the sentry dog company furnishing the dog for hire. Any telephone number so provided shall be to a telephone that is manned by a person 24 hours per day every day of the year so that calls of the public may be received and answered.

The identification tag required by this section shall be in addition to any tag required or issued by any agency of government to show that a dog has been immunized or inoculated against disease.

121925. Whenever a dog subject to this chapter is being transported anywhere, it shall be well secured in a humane manner as will reasonably prevent its possible escape.

121930. Each dog subject to this chapter shall, wherever and whenever the dog is kept when on actual duty, be visited by a dog handler at least once every 12 hours to insure that the dog's physical condition, its surroundings, and its food and water supply are adequate, and if inadequate, the dog handler shall do whatever may be necessary to correct or remedy the situation. Such dog handler shall be either the owner of, or be employed by or under contract to, the sentry dog company that placed the dog on assignment.

121935. (a) No person shall take a sentry dog or a tracker or attack dog into, or keep a sentry dog or a tracker or attack dog in, any portion of any business establishment that is open to the general public, unless any such dog is accompanied or kept by a dog handler.

(b) No person shall keep any sentry dog or tracker or attack dog in any business establishment or any other place open to the general public at any time unless there is posted at every entrance of the business establishment or place a sign of sufficient size and design to warn persons that such a dog is used at the business establishment or place.

(c) This section does not apply to dogs used and accompanied by peace officers or uniformed employees of private patrol operators and operators of a private patrol service who are licensed pursuant to Chapter 11.5 (commencing with Section 7580) of Division 3 of the Business and Professions Code, while employees are acting within the course and scope of their employment as private patrolmen.

(d) This section does not apply to any dog handler or his or her dog while training the dog or another dog handler.

121940. Any violation of any provision of this chapter shall be punishable by a fine of two hundred dollars ($200).

CHAPTER 5. SALE OF DOGS AND CATS

Article 1. Sale of Dogs by Breeders

122045. (a) This article shall be known and may be cited as the Polanco-Lockyer Pet Breeder Warranty Act.

(b) Every breeder of dogs shall comply with this article. As used in this article, ''dog breeder,'' or ''breeder'' means a person, firm, partnership, corporation, or other association that has sold, transferred, or given away 50 or more dogs during the proceeding calendar year that were bred and reared on the premises of the person, firm, partnership, corporation, or other association.

(c) For the purposes of this article, ''purchaser'' means any person who purchases a dog from a breeder.

(d) This article shall not apply to pet dealers regulated under Article 2 (commencing with Section 122125), or to publicly operated pounds, humane societies, or privately operated rescue organizations.

122050. (a) Every breeder of dogs shall deliver to each purchaser of a dog a written disclosure containing all of the following:

(1) The breeder's name and address. If the breeder is a dealer licensed by the United States Department of Agriculture, the federal dealer identification number shall also be indicated.

(2) The date of the dog's birth and the date the breeder received the dog. If the dog is not advertised or sold as purebred, registered, or registerable, the date of birth may be approximated if not known by the breeder.

(3) The breed, sex, color, and identifying marks at the time of sale, if any. If the dog is from a United States Department of Agriculture licensed source, the individual identifying tag, tattoo, or collar number for that animal. If the breed is unknown or mixed, the record shall so indicate.

(4) If the dog is being sold as being capable of registration, the names and registration numbers of the sire and dam, and the litter number, if known.

(5) A record of inoculations and worming treatments administered, if any, to the dog as of the time of sale, including dates of administration and the type of vaccine or worming treatment.

(6) A record of any veterinarian treatment or medication received by the dog while in the possession of the breeder and either of the following:

(A) A statement, signed by the breeder at the time of sale, that:

(i) The dog has no known disease or illness.

(ii) The dog has no known congenital or hereditary condition that adversely affects the health of the dog at the time of the sale or that is likely to adversely affect the health of the dog in the future.

(B) A record of any known disease, illness, or congenital or hereditary condition that adversely affects the health of the dog at the time of sale, or that is likely to affect the health of the dog in the future, along with a statement signed by a veterinarian licensed in the State of California that authorizes the sale of the dog, recommends necessary treatment, if any, and verifies that the disease, illness, or condition does not require hospitalization or nonelective surgical procedures, nor is it likely to require hospitalization or nonelective surgical procedures in the future. A veterinarian statement is not required for intestinal or external parasites unless their presence makes the dog clinically ill or is likely to make the dog clinically ill. The statement shall be valid for seven days following examination of the dog by the veterinarian.

(b) The written disclosure made pursuant to this section shall be signed by both the breeder certifying the accuracy of the statement,

and by the purchaser of the dog acknowledging receipt of the statement.

(c) In addition, all medical information required to be disclosed pursuant to this section shall be made orally by the breeder to the purchaser.

(d) For purposes of this article, a disease, illness, or congenital or hereditary condition that adversely affects the health of the dog at the time of sale, or is likely to adversely affect the health of the dog in the future, shall be one that is apparent at the time of sale or that should have been known by the breeder from the history of veterinary treatment disclosed pursuant to this section.

(e) For the purpose of this article, ''nonelective surgical procedure'' means a surgical procedure that is necessary to preserve or restore the health of the dog, to prevent the dog from experiencing pain or discomfort, or to correct a condition that would otherwise interfere with the dog's ability to walk, run, jump, or otherwise function in a normal manner.

(f) For the purposes of this article, ''clinically ill'' means an illness that is apparent to a veterinarian based on observation, examination, or testing of the dog, or upon a review of the medical records relating to the dog.

122055. A breeder shall maintain a written record on the health, status, and disposition of each dog for a period of not less than one year after disposition of the dog. The record shall also include all of the information that the breeder is required to disclose pursuant to Section 122050.

122060. Except as provided for in paragraph (6) of subdivision (a) of Section 122050, no breeder shall knowingly sell a dog that is diseased, ill or has a condition, any one of which that requires hospitalization or nonelective surgical procedures. In lieu of the civil penalties imposed pursuant to Section 122110, any breeder who violates this section shall be subject to a civil penalty of up to one thousand dollars ($1,000), or shall be prohibited from selling dogs for up to 30 days, or both. If there is a second offense, the breeder shall be subject to a civil penalty of up to two thousand five hundred dollars ($2,500), or a prohibition from selling dogs for up to 90 days, or both. For a third offense, the breeder shall be subject to a civil penalty of up to five thousand dollars ($5,000), or a prohibition from selling dogs for up to six months, or both. For a fourth and subsequent offense, the breeder shall be subject to a civil penalty of up to ten thousand dollars ($10,000) or a prohibition from selling dogs for up to one year, or both. For the purpose of this section, a violation that occurred over five years prior to the most recent violation shall not be considered.

An action for recovery of the civil penalty and for a court order enjoining the breeder from engaging in the business of selling dogs at retail for the period set forth in this section, may be prosecuted by the district attorney for the county in which the violation occurred,

or the city attorney for the city in that the violation occurred, in the appropriate court.

122065. It shall be unlawful for a breeder to fail to do any of the following:

(a) Maintain facilities where the dogs are kept in a sanitary condition.

(b) Provide dogs with adequate nutrition and potable water.

(c) Provide adequate space appropriate to the age, size, weight, and breed of dog. For purposes of this subdivision, ‘‘adequate space’’ means sufficient space for the dog to stand up, sit down, and turn about freely using normal body movements, without the head touching the top of the cage, and to lie in a natural position.

(d) Provide dogs housed on wire flooring with a rest board, floormat, or similar device that can be maintained in a sanitary condition.

(e) Provide dogs with adequate socialization and exercise. For the purpose of this article, ‘‘socialization’’ means physical contact with other dogs or with human beings.

(f) Wash hands before and after handling each infectious or contagious dog.

(g) Provide veterinary care without delay when necessary.

122070. If a licensed veterinarian states in writing that within 15 days after the purchaser has taken physical possession of a dog following the sale by a breeder, the dog has become ill due to any illness or disease that existed in the dog on or before delivery of the dog to the purchaser, or, if within one year after the purchaser has taken physical possession of the dog after the sale by a breeder, a veterinarian licensed in this state states in writing that the dog has a congenital or hereditary condition which that adversely affects the health of the dog, or which that requires, or is likely in the future to require, hospitalization or nonelective surgical procedures, the dog shall be considered unfit for sale, and the breeder shall provide the purchaser with any of the following remedies that the purchaser elects:

(1) Return the dog to the breeder for a refund of the purchase price, plus sales tax, and reimbursement for reasonable veterinary fees for diagnosis and treating the dog in an amount not to exceed the original purchase price of the dog, including sales tax.

(2) Exchange the dog for a dog of the purchaser’s choice of equivalent value, providing a replacement dog is available, and receive reimbursement for reasonable veterinary fees for diagnosis and treating the dog in an amount not to exceed the original purchase price of the dog, plus sales tax on the original purchase price of the dog.

(3) Retain the dog, and receive reimbursement for reasonable veterinary fees for diagnosis and treating the dog in an amount not

to exceed 150 percent of the original purchase price of the dog, plus sales tax.

(b) If the dog has died, regardless of the date of death of the dog, obtain a refund for the purchase price of the dog, plus sales tax, or a replacement dog of equivalent value of the purchaser's choice, and reimbursement for reasonable veterinary fees for diagnosis and treatment of the dog in an amount not to exceed the purchase price of the dog, plus sales tax, if any of the following conditions exist:

(1) A veterinarian, licensed in this state, states in writing that the dog has died due to an illness or disease that existed within 15 days after the purchaser obtained physical possession of the dog after the sale by a breeder.

(2) A veterinarian, licensed in this state, states in writing that the dog has died due to a congenital or hereditary condition that was diagnosed by the veterinarian within one year after the purchaser obtained physical possession of the dog after the sale by a breeder.

122075. (a) There shall be a rebuttable presumption that an illness existed at the time of sale if the animal dies within 15 days of delivery to the purchaser.

(b) For purposes of Section 122070, a finding by a veterinarian of intestinal or external parasites shall not be grounds for declaring a dog unfit for sale unless their presence makes the dog clinically ill or is likely to make the dog clinically ill.

(c) For purposes of Section 122070, the value of veterinary services shall be deemed reasonable if the services rendered are appropriate for the diagnosis and treatment of illness or congenital or hereditary condition made by the veterinarian and the value of the services is comparable to the value of similar services rendered by other licensed veterinarians in proximity to the treating veterinarian.

122080. To obtain the remedies provided for in Section 122070, the purchaser shall substantially comply with all of the following requirements:

(a) Notify the breeder as soon as possible but no later than five days of the diagnosis by a veterinarian licensed in this state of a medical or health problem, including a congenital or hereditary condition and of the name and telephone number of the veterinarian providing the diagnosis.

(b) Return the dog to the breeder, in the case of illness or congenital or hereditary condition, along with a written statement from a veterinarian licensed in this state, stating the dog to be unfit for purchase due to illness, a congenital or hereditary condition, or the presence of symptoms of a contagious or infectious disease, that existed on or before delivery of the dog to the purchaser, and that adversely affects the health of the dog. The purchaser shall return the dog along with a copy of the veterinarian's statement as soon as possible but no later than five days of receipt of the veterinarian's statement.

(c) Provide the breeder, in the event of death, with a written statement from a veterinarian licensed in this state stating that the dog died from an illness that existed on or before the delivery of the dog to the purchaser. The presentation of the statement shall be sufficient proof to claim reimbursement or replacement and the return of the deceased dog to the breeder shall not be required.

122085. No refund, replacement, or reimbursement of veterinary fees shall be made under Section 122070 if any of the following conditions exist:

(a) The illness, condition, or death resulted from maltreatment or neglect or from an injury sustained or an illness or condition contracted subsequent to the delivery of the dog to the purchaser.

(b) The purchaser fails to carry out the recommended treatment prescribed by the examining veterinarian who made the initial diagnosis. However, this subdivision shall not apply if the cost for the treatment together with the veterinarian's fee for the diagnosis would exceed the purchase price of the dog, plus sales tax.

(c) A veterinarian's statement was provided to the purchaser pursuant to subparagraph (B) of paragraph (6) of subdivision (a) of Section 122050 that disclosed the disease, illness, or condition for which the purchaser seeks to return the dog. However, this subdivision shall not apply if, within one year after the purchaser took physical possession of the dog, a veterinarian licensed in this state states in writing that the disease, illness, or condition requires, or is likely in the future to require, hospitalization or nonelective surgical procedures or that the disease, illness, or condition resulted in the death of the dog.

(d) The purchaser refuses to return to the breeder all documents previously provided to the purchaser for the purpose of registering the dog. This subdivision shall not apply if the purchaser signs a statement certifying that the documents have been inadvertently lost or destroyed.

122090. (a) The veterinarian's statement pursuant to Section 122070 shall contain all of the following information:

(1) The purchaser's name and address.

(2) The date or dates the dog was examined.

(3) The breed and age of the dog, if known.

(4) That the veterinarian examined the dog.

(5) That the dog has or had disease, illness, or a hereditary or congenital condition, as described in Section 122050 that renders it unfit for purchase or resulted in its death.

(6) The precise findings of the examination or necropsy, including laboratory results or copies of laboratory reports.

(b) If a refund for reasonable veterinary expenses is being requested, the veterinarian's statement shall be accompanied by an itemized bill of fees appropriate for the diagnosis and treatment of the illness or congenital or hereditary condition.

(c) Refunds and payment of reimbursable expenses provided for in Section 122070 shall be paid, unless contested, by the breeder to the purchaser not later than 10 business days following receipt of the veterinarian's statement required by Section 122070 or, where applicable, not later than 10 business days after the date on that the dog is returned to the breeder.

122095. (a) In the event that a breeder wishes to contest a demand for any of the remedies specified in Section 122070, the breeder may, except in the case of the death of the dog, require the purchaser to produce the dog for examination by a licensed veterinarian designated by the breeder. The breeder shall pay the cost of this examination.

(b) If the purchaser and the breeder are unable to reach an agreement within 10 business days following receipt by the breeder of the veterinarian's statement pursuant to Section 122070, or following receipt of the dog for examination by a veterinarian designated by the breeder, whichever is later, the purchaser may initiate an action in a court of competent jurisdiction to resolve the dispute or the parties may submit to binding arbitration if mutually agreed upon by the parties in writing.

(c) The prevailing party in the dispute shall have the right to collect reasonable attorney's fees if the other party acted in bad faith in seeking or denying the requested remedy.

122100. Every breeder that sells a dog shall provide the purchaser at the time of sale, and a prospective purchaser upon request, with a written notice of rights, setting forth the rights provided for under this section. The notice shall be contained in a separate document. The written notice of rights shall be in 10-point type. A copy of the written notice of rights shall be signed by the purchaser acknowledging that he or she has reviewed the notice. The notice shall state the following:

"A STATEMENT OF CALIFORNIA LAW GOVERNING THE SALE OF DOGS

The sale of dogs is subject to consumer protection regulation. In the event that a California licensed veterinarian states in writing that your dog is unfit for purchase because it became ill due to an illness or disease that existed within 15 days following delivery to you, or within one year in the case of congenital or hereditary condition, you may choose one of the following:

(1) Return your dog and receive a refund of the purchase price, plus sales tax, and receive reimbursement for reasonable veterinarian fees up to the cost of the dog, plus sales tax.

(2) Return your dog and receive a dog of your choice of equivalent value, providing a replacement dog is available, and receive

reimbursement for reasonable veterinarian fees up to the cost of the dog, plus sales tax.

(3) Keep the dog and receive reimbursement for reasonable veterinarian fees up to 150 percent of the original purchase price of the dog plus sales tax on the original purchase price of the dog.

In the event your dog dies, you may receive a refund for the purchase price of the dog, plus sales tax, or a replacement dog of your choice, of equivalent value, and reimbursement for reasonable veterinary fees for the diagnosis and treatment of the dog, if a veterinarian, licensed in this state, states in writing that the dog has died due to an illness or disease that existed within 15 days after the purchaser obtained physical possession of the dog after the sale by a dog breeder, or states that the dog has died due to a congenital or hereditary condition that was diagnosed by the veterinarian within one year after the purchaser obtained physical possession of the dog after the sale by a dog breeder. These fees may not exceed the purchase price of the dog, plus sales tax.

In order to exercise these rights, you must notify the dog breeder as quickly as possible but no later than five days after learning from your veterinarian that a problem exists. You must tell the dog breeder about the problem and give the dog breeder the name and telephone number of the veterinarian providing the diagnosis.

If you are making a claim, you must also present to the dog breeder a written veterinary statement, in a form prescribed by law, that the animal is unfit for purchase and an itemized statement of all veterinary fees related to the claim. This information must be presented to the dog breeder no later than five days after you have received the written statement from the veterinarian.

In the event that the dog breeder wishes to contest the statement or the veterinarian’s bill, the dog breeder may request that you produce the dog for examination by a licensed veterinarian of the dog breeder’s choice. The dog breeder shall pay the cost of this examination.

In the event of death, the deceased dog need not be returned to the dog breeder if you submit a statement issued by a licensed veterinarian stating the cause of death.

If the parties cannot resolve the claim within 10 business days following receipt of the veterinarian statement or the examination by the dog breeder’s veterinarian, whichever event occurs later, you may file an action in a court of competent jurisdiction to resolve the dispute. If a party acts in bad faith, the other party may collect reasonable attorney’s fees. If the dog breeder does not contest the matter, the dog breeder must make the refund or reimbursement no later than 10 business days after receiving the veterinary certification.

This statement is a summary of key provisions of the consumer remedies available. California law also provides safeguards to protect

dog breeders from abuse. If you have questions, obtain a copy of the complete relevant statutes.

This notice shall be contained in a separate document. The written notice shall be in 10-point type. The notice shall be signed by the purchaser acknowledging that he or she has reviewed the notice. The dog breeder shall permit persons to review the written notice upon request.

NOTE: This disclosure of rights is a summary of California law. The actual statutes are contained in Article 1 (commencing with Section 122045) of Chapter 5 of Part 6 of Division 105 of the Health and Safety Code.''

122105. Nothing in this article shall in any way limit the rights or remedies that are otherwise available to a consumer under any other law. Nor shall this article in any way limit the breeder and the purchaser from agreeing between themselves upon additional terms and conditions that are not inconsistent with this article. However, any agreement or contract by a purchaser to waive any rights under this article shall be null and void and shall be unenforceable.

122110. (a) Except as otherwise specified herein, any person violating any provision of this article other than Section 122060 shall be subject to civil penalty of up to one thousand dollars ($1,000) per violation. An action may be prosecuted in the name of the people of the State of California by the district attorney for the county where the violation occurred in the appropriate court or by the city attorney in the city where the violation occurred.

(b) Nothing in this article limits or authorizes any act or omission that violates Section 597*l* of the Penal Code.

Article 2. Retail Sale of Dogs and Cats

122125. (a) This article shall be known and may be cited as the Lockyer-Polanco-Farr Pet Protection Act.

(b) Every pet dealer of dogs and cats shall conform to the provisions of this article. As used in this article, '' pet dealer'' means a person engaging in the business of selling dogs or cats, or both, at retail, and by virtue of the sales of dogs and cats is required to possess a permit pursuant to Section 6066 of the Revenue and Taxation Code. For purposes of this article, the separate sales of dogs or cats from a single litter shall constitute only one sale under Section 6019 of the Revenue and Taxation Code. This definition does not apply to breeders of dogs regulated pursuant to Article 1 (commencing with Section 122045) nor to any person, firm, partnership, corporation, or other association, that breeds or rears dogs on the premises of the person, firm, partnership, corporation, or other association, that has sold, transferred, or given away fewer than 50 dogs in the preceding year.

(c) For purposes of this article, ‘‘purchaser’’ means a person who purchases a dog or cat from a pet dealer without the intent to resell the animal.

(d) This article shall not apply to publicly operated pounds and humane societies.

122130. Every pet dealer receiving dogs or cats from a common carrier shall transport, or have transported, dogs and cats from the carrier’s premises within four hours after receipt of telephone notification by the carrier of the completion of shipment and arrival of the animal at the carrier’s point of destination.

122135. All dogs or cats received by a retail dealer shall, prior to being placed with other dogs or cats, be examined for sickness. Any dog or cat found to be afflicted with a contagious disease shall be kept caged separately from healthy animals.

122140. Every pet dealer shall deliver to the purchaser of each dog and cat at the time of sale a written statement in a standardized form prescribed by the Department of Consumer Affairs containing the following information:

(a) For cats:

(1) The breeder’s and broker’s name and address, if known, or if not known, the source of the cat. If the person from whom the cat was obtained is a dealer licensed by the United States Department of Agriculture, the person’s name, address, and federal dealer identification number.

(2) The date of the cat’s birth, unless unknown because of the source of the cat and the date the dealer received the cat.

(3) A record of the immunizations and worming treatments administered, if any, to the cat as of the time of sale, including the dates of administration and the type of vaccine or worming treatment.

(4) A record of any known disease or sickness that the cat is afflicted with at the time of sale. In addition, this information shall also be orally disclosed to the purchaser.

(b) For dogs:

(1) The breeder’s name and address, if known, or if not known, the source of the dog. If the person from whom the dog was obtained is a dealer licensed by the United States Department of Agriculture, the person’s name, address, and federal dealer identification number.

(2) The date of the dog’s birth, and the date the dealer received the dog. If the dog is not advertised or sold as purebred, registered, or registerable, the date of birth may be approximated if not known by the seller.

(3) The breed, sex, color, and identifying marks at the time of sale, if any. If the dog is from a United States Department of Agriculture licensed source, the individual identifying tag, tattoo, or collar number for that animal. If the breed is unknown or mixed, the record shall so indicate.

(4) If the dog is being sold as being capable of registration, the names and registration numbers of the sire and dam, and the litter number, if known.

(5) A record of inoculations and worming treatments administered, if any, to the dog as of the time of sale, including dates of administration and the type of vaccine or worming treatment.

(6) A record of any veterinarian treatment or medication received by the dog while in the possession of the pet dealer and either of the following:

(A) A statement, signed by the pet dealer at the time of sale, containing all of the following:

(i) The dog has no known disease or illness.

(ii) The dog has no known congenital or hereditary condition that adversely affects the health of the dog at the time of the sale or that is likely to adversely affect the health of the dog in the future.

(B) A record of any known disease, illness, and any congenital or hereditary condition that adversely affects the health of the dog at the time of sale, or is likely to adversely affect the health of the dog in the future, along with a statement signed by a veterinarian licensed in the State of California that authorizes the sale of the dog, recommends necessary treatment, if any, and verifies that the disease, illness, or condition does not require hospitalization or nonelective surgical procedures, nor is it likely to require hospitalization or nonelective surgical procedures in the future. A veterinarian statement is, not required for intestinal or external parasites unless their presence makes the dog clinically ill or is likely to make the dog clinically ill. The statement shall be valid for seven days following examination of the dog by the veterinarian.

(c) For the purpose of this article, ‘‘nonelective surgical procedure’’ means a surgical procedure that is necessary to preserve or restore the health of the dog, to prevent the dog from experiencing pain or discomfort, or to correct a condition that would interfere with the dog’s ability to walk, run, jump, or otherwise function in a normal manner.

(d) For the purposes of this article, ‘‘clinically ill’’ means an illness that is apparent to a veterinarian based on observation, examination, or testing of the dog, or upon a review of the medical records relating to the dog.

(e) A disclosure made pursuant to subdivision (b) shall be signed by both the pet dealer certifying the accuracy of the statement, and the purchaser of the dog acknowledging receipt of the statement. In addition, all medical information required to be disclosed pursuant to subdivision (b) shall be made orally to the purchaser.

(f) For purposes of this article, a disease, illness, or congenital or hereditary condition that adversely affects the health of a dog at the time of sale or is likely to adversely affect the health of the dog in the future shall be one that is apparent at the time of sale or that should

have been known by the pet dealer from the history of veterinary treatment disclosed pursuant to this section.

122145. A pet dealer shall maintain a written record on the health, status, and disposition of each dog and each cat for a period of not less than one year after disposition of the dog or cat. The record shall also contain all of the information required to be disclosed pursuant to Sections 122140 and 122220. Those records shall be available to humane officers, animal control officers, and law enforcement officers for inspection during normal business hours.

122150. (a) Except as otherwise specified herein, any person violating any provision of this article other than Section 122205 shall be subject to a civil penalty of up to one thousand dollars ($1,000) per violation. The action may be prosecuted in the name of the people of the State of California by the district attorney for the county where the violation occurred in the appropriate court or by the city attorney in the city where the violation occurred.

(b) Nothing in this article limits or authorizes any act or omission that violates Section 597*l* of the Penal Code.

122155. (a) It shall be unlawful for a pet dealer to fail to do any of the following:

(1) Maintain facilities where the dogs are kept in a sanitary condition.

(2) Provide dogs with adequate nutrition and potable water.

(3) Provide adequate space appropriate to the age, size, weight, and breed of dog. Adequate space means sufficient space for the dog to stand up, sit down, and turn about freely using normal body movements, without the head touching the top of the cage, and to lie in a natural position.

(4) Provide dogs housed on wire flooring with a rest board, floormat, or similar device that can be maintained in a sanitary condition.

(5) Provide dogs with adequate socialization and exercise. For the purpose of this article ‘‘socialization’’ means physical contact with other dogs or with human beings.

(6) Wash hands before and after handling each infectious or contagious dog.

(7) Maintain either of the following:

(A) A fire alarm system that is connected to a central reporting station that alerts the local fire department in case of fire.

(B) Maintain a fire suppression sprinkler system.

(8) Provide veterinary care without delay when necessary.

(b) A pet dealer shall not be in possession of a dog that is less than eight weeks old.

122160. (a) If a licensed veterinarian states in writing that within 15 days after the purchaser has taken physical possession of the dog after the sale by a pet dealer, the dog has become ill due to any illness that existed in the dog on or before delivery of the dog to the

purchaser, or, if within one year after the purchaser has taken physical possession of the dog after the sale, a veterinarian licensed in this state states in writing that the dog has a congenital or hereditary condition that adversely affects the health of the dog, or that requires, or is likely in the future to require, hospitalization or nonelective surgical procedures, the dog shall be considered unfit for sale, and the pet dealer shall provide the purchaser with any of the following remedies that the purchaser elects:

(1) Return the dog to the pet dealer for a refund of the purchase price, plus sales tax, and reimbursement for reasonable veterinary fees for diagnosis and treating the dog in an amount not to exceed the original purchase price of the dog, plus sales tax.

(2) Exchange the dog for a dog of the purchaser's choice of equivalent value, providing a replacement dog is available, and reimbursement for reasonable veterinary fees for diagnosis and treating the dog in an amount not to exceed the original purchase price of the dog, plus sales tax.

(3) Retain the dog, and reimbursement for reasonable veterinary fees for diagnosis and treating the dog in an amount not to exceed 150 percent of the original purchase price of the dog, plus sales tax on the original purchase price of the dog.

(b) If the dog has died, regardless of the date of the death of the dog, obtain a refund for the purchase price of the dog, plus sales tax, or a replacement dog of equivalent value of the purchaser's choice and reimbursement for reasonable veterinary fees in diagnosis and treatment of the dog in an amount not to exceed the original purchase price of the dog, plus sales tax, if either of the following conditions exist:

(1) A veterinarian, licensed in this state, states in writing that the dog has died due to an illness or disease that existed within 15 days after the purchaser obtained physical possession of the dog after the sale by a pet dealer.

(2) A veterinarian, licensed in this state, states in writing that the dog has died due to a congenital or hereditary condition that was diagnosed by the veterinarian within one year after the purchaser obtained physical possession of the dog after the sale by a pet dealer.

122165. (a) There shall be a rebuttable presumption that an illness existed at the time of sale if the animal dies within 15 days of delivery to the purchaser.

(b) For purposes of Section 122160, a finding by a veterinarian of intestinal or external parasites shall not be grounds for declaring a dog unfit for sale unless their presence makes the dog clinically ill or is likely to make the dog clinically ill.

(c) For purposes of Section 122160, the value of veterinary services shall be deemed reasonable if the services rendered are appropriate for the diagnosis and treatment of illness or congenital or hereditary condition, made by the veterinarian and the value of

similar services is comparable to the value of similar services rendered by other licensed veterinarians in proximity to the treating veterinarian.

122170. To obtain the remedies provided for in Section 122160, the purchaser shall substantially comply with all of the following requirements:

(a) Notify the pet dealer as soon as possible but not more than five days after the diagnosis by a veterinarian licensed in this state of a medical or health problem, including a congenital or hereditary condition and of the name and telephone number of the veterinarian providing the diagnosis.

(b) Return the dog to the pet dealer, in the case of illness, along with a written statement from a veterinarian licensed in this state, stating the dog to be unfit for purchase due to illness, a congenital or hereditary condition, or the presence of symptoms of a contagious or infectious disease, that existed on or before delivery of the dog to the purchaser, and that adversely affects the health of the dog. The purchaser shall return the dog along with a copy of the veterinarian's statement as soon as possible but not more than five days after receipt of the veterinarian's statement.

(c) Provide the pet dealer, in the event of death, with a written statement from a veterinarian licensed in this state stating that the dog died from an illness that existed on or before the delivery of the dog to the purchaser. The presentation of the statement shall be sufficient proof to claim reimbursement or replacement and the return of the deceased dog to the pet dealer shall not be required.

122175. Notwithstanding Section 122160, no refund, replacement, or reimbursement of veterinary fees shall be made if any of the following conditions exist:

(a) The illness or death resulted from maltreatment or neglect or from an injury sustained or an illness contracted subsequent to the delivery of the dog to the purchaser.

(b) The purchaser fails to carry out the recommended treatment prescribed by the examining veterinarian who made the initial diagnosis. However, this subdivision shall not apply if the cost for the treatment together with the veterinarian's fee for the diagnosis would exceed the purchase price of the dog, including sales tax.

(c) A veterinarian's statement was provided to the purchaser pursuant to subparagraph (B) of paragraph (6) of subdivision (b) of Section 122140 that disclosed the disease, illness, or condition for which the purchaser seeks to return the dog. However, this paragraph shall not apply if, within one year after the purchaser took physical possession of the dog, a veterinarian licensed in this state states in writing that the disease, illness, or condition requires, or is likely in the future to require, hospitalization or nonelective surgical procedures or that the disease, illness, or condition resulted in the death of the dog.

(d) The purchaser refuses to return to the pet dealer all documents previously provided to the purchaser for the purpose of registering the dog. This subdivision shall not apply if the purchaser signs a written statement certifying that the documents have been inadvertently lost or destroyed.

122180. (a) The veterinarian's statement pursuant to Section 122160 shall contain the following information:

(1) The purchaser's name and address.

(2) The date or dates the dog was examined.

(3) The breed and age of the dog, if known.

(4) That the veterinarian examined the dog.

(5) That the dog has or had an illness described in this section that renders it unfit for purchase or resulted in its death.

(6) The precise findings of the examination or necropsy, including laboratory results or copies of laboratory reports.

(b) If a refund for reasonable veterinary expenses is being requested, the veterinary statement shall be accompanied by an itemized bill of fees appropriate for the diagnosis and treatment of the illness or congenital or hereditary condition.

(c) Refunds and payment of reimbursable expenses provided for by Section 122160 shall be paid, unless contested, by the pet dealer to the purchaser not later than 10 business days following receipt of the veterinarian's statement required by Section 122160 or, where applicable, not later than 10 business days after the date on which the dog is returned to the pet dealer.

122185. (a) In the event that a pet dealer wishes to contest a demand for any of the remedies specified in Section 122160, the dealer may, except in the case of the death of the dog, require the purchaser to produce the dog for examination by a licensed veterinarian designated by the pet dealer. The pet dealer shall pay the cost of this examination.

(b) If the purchaser and the pet dealer are unable to reach an agreement within 10 business days following receipt by the pet dealer of the veterinarian's statement pursuant to Section 122160, or following receipt of the dog for examination by a veterinarian designated by the pet dealer, whichever is later, the purchaser may initiate an action in a court of competent jurisdiction to resolve the dispute or the parties may submit to binding arbitration if mutually agreed upon by the parties in writing.

(c) The prevailing party in the dispute shall have the right to collect reasonable attorney's fees if the other party acted in bad faith in seeking or denying the requested remedy.

122190. Every pet dealer that sells a dog shall provide the purchaser at the time of sale, and a prospective purchaser upon request, with a written notice of rights, setting forth the rights provided for under this section. The notice shall be contained in a separate document. The written notice of rights shall be in 10-point

type. A copy of the written notice of rights shall be signed by the purchaser acknowledging that he or she has reviewed the notice. The notice shall state the following:

''A STATEMENT OF CALIFORNIA LAW GOVERNING THE SALE OF DOGS

The sale of dogs is subject to consumer protection regulations. In the event that a California licensed veterinarian states in writing that your dog is unfit for purchase because it became ill due to an illness or disease that existed within 15 days following delivery to you, or within one year in the case of congenital or hereditary condition, you may choose one of the following:

(1) Return your dog and receive a refund of the purchase price, plus sales tax, and receive reimbursement for reasonable veterinarian fees up to the cost of the dog plus sales tax.

(2) Return your dog and receive a dog of your choice of equivalent value, providing a replacement dog is available, and receive reimbursement for reasonable veterinarian fees up to the cost of the dog, plus sales tax.

(3) Keep the dog and receive reimbursement for reasonable veterinarian fees up to 150 percent of the original purchase price of the dog plus sales tax on the original purchase price of the dog.

In the event your dog dies, you may receive a refund for the purchase price of the dog, plus sales tax, or a replacement dog of your choice, of equivalent value, and reimbursement for reasonable veterinary fees for the diagnosis and treatment of the dog, if a veterinarian, licensed in this state, states in writing that the dog has died due to an illness or disease that existed within 15 days after the purchaser obtained physical possession of the dog after the sale by a pet dealer, or states that the dog has died due to a congenital or hereditary condition that was diagnosed by the veterinarian within one year after the purchaser obtained physical possession of the dog after the sale by a pet dealer. These fees may not exceed the purchase price of the dog, plus sales tax.

In order to exercise these rights, you must notify the pet dealer as quickly as possible but no later than five days after learning from your veterinarian that a problem exists. You must tell the pet dealer about the problem and give the pet dealer the name and telephone number of the veterinarian providing the diagnosis.

If you are making a claim, you must also present to the pet dealer a written veterinary statement, in a form prescribed by law, that the animal is unfit for purchase and an itemized statement of all veterinary fees related to the claim. This information must be presented to the pet dealer no later than five days after you have received the written statement from the veterinarian.

In the event that the pet dealer wishes to contest the statement or the veterinarian's bill, the pet dealer may request that you produce the dog for examination by a licensed veterinarian of the pet dealer's choice. The pet dealer shall pay the cost of this examination.

In the event of death, the deceased dog need not be returned to the pet dealer if you submit a statement issued by a licensed veterinarian stating the cause of death.

If the parties cannot resolve the claim within 10 business days following receipt of the veterinarian statement or the examination by the pet dealer's veterinarian, whichever event occurs later, you may file an action in a court of competent jurisdiction to resolve the dispute. If a party acts in bad faith, the other party may collect reasonable attorney's fees. If the pet dealer does not contest the matter, the pet dealer must make the refund or reimbursement no later than 10 business days after receiving the veterinary certification.

If the pet dealer has represented your dog as registerable with a pedigree organization, the pet dealer shall provide you with the necessary papers to process the registration within 120 days following the date you received the dog. If the pet dealer fails to deliver the papers within the prescribed timeframe, you are entitled to return the dog for a full refund of the purchase price, including sales tax, or a refund of 75 percent of the purchase price, including sales tax if you choose to keep the dog.

This statement is a summary of key provisions of the consumer remedies available. California law also provides safeguards to protect pet dealers from abuse. If you have any questions, obtain a copy of the complete relevant statutes.

This notice shall be contained in a separate document. The written notice shall be in 10-point type. The notice shall be signed by the purchaser acknowledging that he or she has reviewed the notice. The pet dealer shall permit persons to review the written notice upon request.

NOTE: This disclosure of rights is a summary of California law. The actual statutes are contained in Article 2 (commencing with Section 122125 of Chapter 5 of Part 6 of Division 105 of the Health and Safety Code.''

122195. Nothing in this article shall in any way limit the rights or remedies that are otherwise available to a consumer under any other law. Nor shall this article in any way limit the pet dealer and the purchaser from agreeing between themselves upon additional terms and conditions that are not inconsistent with this article. However, any agreement or contract by a purchaser to waive any rights under this article shall be null and void and shall be unenforceable.

122200. (a) A pet dealer shall not state, promise, or represent to the purchaser, directly or indirectly, that a dog is registered or

capable of being registered with an animal pedigree registry organization, unless the pet dealer provides the purchaser with the documents necessary for that registration within 120 days following the date of sale of the dog.

(b) In the event that a pet dealer fails to provide the documents necessary for registration within 120 days following the date of sale, in violation of subdivision (a), the purchaser shall, upon written notice to the pet dealer, be entitled to retain the animal and receive a partial refund of 75 percent of the purchase price, plus sales tax, or return the dog along with all documentation previously provided the purchaser for a full refund, including sales tax.

122205. Except as provided for in subparagraph (B) of paragraph (6) of subdivision (b) of Section 122140, no pet dealer shall knowingly sell a dog that is diseased, ill, or has a condition, any one of which requires hospitalization or surgical procedures. In lieu of the civil penalties imposed pursuant to Section 122150, any pet dealer who violates this section shall be subject to a civil penalty of up to one thousand dollars ($1,000), or shall be prohibited from selling dogs at retail for up to 30 days, or both. If there is a second offense, the pet dealer shall be subject to a civil penalty of up to two thousand five hundred dollars ($2,500), or a prohibition from selling dogs at retail for up to 90 days, or both. For a third offense, the pet dealer shall be subject to a civil penalty of up to five thousand dollars ($5,000) or a prohibition from selling dogs at retail for up to six months, or both. For a fourth and subsequent offense, the pet dealer shall be subject to a civil penalty of up to ten thousand dollars ($10,000) or a prohibition from selling dogs at retail for up to one year, or both. For purposes of this section, a violation that occurred over five years prior to the most recent violation shall not be considered.

An action for recovery of the civil penalty and for a court order enjoining the pet dealer from engaging in the business of selling dogs at retail for the period set forth in this section, may be prosecuted by the district attorney for the county where the violation occurred, or the city attorney for the city where the violation occurred, in the appropriate court.

122210. (a) No dog may be offered for sale by a pet dealer to a purchaser until the dog has been examined by a veterinarian licensed in this state. Each dog shall be examined within five days of receipt of the dog and once every 15 days thereafter while the dog is in the possession or custody of the pet dealer. The pet dealer shall provide any sick dog with proper veterinary care without delay.

(b) Any dog diagnosed with a contagious or infectious disease, illness, or condition shall be caged separately from healthy dogs until a licensed veterinarian determines that the dog is free from contagion or infection. The area shall meet the following conditions when contagious or infectious dogs are present:

(1) The area shall not be used to house other healthy dogs or new arrivals awaiting the required veterinary examination.

(2) The area shall not be used for storing open food containers or bowls, dishes, or other utensils that come in contact with healthy dogs.

(3) The area shall have an exhaust fan that creates air movement from the isolation area to an area outside the premises of the pet dealer. The removal of exhaust air from the isolation area may be accomplished by the use of existing heating and air-conditioning ducts, provided no exhaust air is permitted to enter or mix with fresh air for use by the general animal population.

(4) Upon removal of all of the contagious or infectious dogs, the area shall be cleaned and disinfected before any healthy animal can be placed in the area.

(c) If the pet dealer's veterinarian deems the dog to be unfit for purchase due to a disease, illness, or congenital condition, any of which is fatal or that causes, or is likely to cause, the dog to unduly suffer, the veterinarian shall humanely euthanize the dog. The veterinarian shall provide the pet dealer with a written statement as to why the dog was euthanized. Otherwise, the pet dealer shall have a veterinarian treat the dog, or may surrender the dog to a humane organization that consents to the receipt thereof.

(d) In the event a dog is returned to a pet dealer due to illness, disease, or a congenital or hereditary condition requiring veterinary care, the pet dealer shall provide the dog with proper veterinary care.

122215. Every retail dealer shall post conspicuously on the cage of each dog offered for sale a notice indicating the state where the dog was bred and brokered.

122220. (a) Every pet dealer shall post conspicuously within close proximity to the cages of dogs offered for sale, a notice containing the following language in 100-point type:

''Information on the source of these dogs, and veterinary treatments received by these dogs is available for review.''

''You are entitled to a copy of a statement of consumer rights.''

(b) Every pet dealer shall, upon request for information regarding a dog, make immediately available to prospective purchasers all of the information required to be disclosed to purchasers pursuant to subdivision (b) of Section 122140 and pursuant to Section 122190.

Article 3. Dog Pedigree Registries

122300. For purposes of this article:

(a) ‘‘Dog dealer’’ means any person, firm, partnership, corporation, or other association that engages in the acquisition of dogs for retail sale to the public. ‘‘Dog dealer’’ does not include duly incorporated nonprofit humane societies dedicated to the care of unwanted animals that make animals available for adoption, whether or not a fee for the adoption is charged, or pet dealers who do not in the normal course of business sell dogs, but who sometimes exhibit dogs for adoption.

(b) ‘‘Dog breeder’’ means any person, firm, partnership, corporation, or other association that breeds and sells dogs at wholesale or retail.

(c) ‘‘Dog pedigree registry’’ means any of various private agencies that serve to keep track of the breed, lineage, physical characteristics, and historical data regarding dogs that are registered with the agency.

122305. Every dog dealer that sells registered dogs or that claims that the dogs being sold are registered or are registerable with a dog pedigree registry shall post conspicuously within close proximity to the dogs offered for sale, a notice containing the following language in at least 100-point type:

‘‘Pedigree registration does not assure proper breeding conditions, health, quality, or claims to lineage.’’

122310. (a) For every dog sold by a dog dealer or dog breeder that is sold with any representation that the dog is registered or registerable with a dog pedigree registry, the following fully completed disclosure shall be made, orally and in writing on a separate sheet from any other statements, including, but not limited to, the name of the dog dealer or breeder and the name of the relevant dog pedigree registry:

‘‘Disclosure by

DOG PEDIGREE REGISTRATION DISCLOSURE

Description of dog: _____

_____

The dog you are purchasing is registered/registerable [circle one] with the _____ [enter name of registry].

Registration means only that _____ [enter name of registry] maintains information regarding the parentage and identity of this dog, it does not guarantee the quality or health of this dog, and it does not guarantee quality lineage. Since dog pedigree registries depend in large part on the honesty and accuracy of persons registering dogs, registration does not guarantee the accuracy of the lineage recorded nor that this dog is purebred.

Acknowledged: _____ _____"
Retail purchaser's signature Date

(b) The disclosure in subdivision (a) shall be signed and dated by the retail purchaser of the dog acknowledging receipt of a copy of the statement and the dog dealer or dog breeder shall retain a copy.

122315. (a) Any dog dealer or dog breeder who fails to comply with the disclosure requirements in Section 122305 or 122310, as the case may be, shall be liable to the retail purchaser for civil damages in an amount equal to three times the cost of the dog. Claim for payment under this section shall be made within one year from the date of purchase of the dog.

(b) The remedies provided in this section shall be in addition to any other remedies or penalties authorized by other provisions of law.

SEC. 8. Division 106 (commencing with Section 123100) is added to the Health and Safety Code, to read:

DIVISION 106. PERSONAL HEALTH CARE (INCLUDING MATERNAL, CHILD, AND ADOLESCENT)

PART 1. GENERAL ADMINISTRATION

CHAPTER 1. PATIENT ACCESS TO HEALTH RECORDS

123100. The Legislature finds and declares that every person having ultimate responsibility for decisions respecting his or her own health care also possesses a concomitant right of access to complete information respecting his or her condition and care provided. Similarly, persons having responsibility for decisions respecting the health care of others should, in general, have access to information on the patient's condition and care. It is, therefore, the intent of the Legislature in enacting this chapter to establish procedures for providing access to health care records or summaries of those records by patients and by those persons having responsibility for decisions respecting the health care of others.

123105. As used in this chapter:

(a) ''Health care provider'' means any of the following:

(1) A health facility licensed pursuant to Chapter 2 (commencing with Section 1250) of Division 2.

(2) A clinic licensed pursuant to Chapter 1 (commencing with Section 1200) of Division 2.

(3) A home health agency licensed pursuant to Chapter 8 (commencing with Section 1725) of Division 2.

(4) A physician and surgeon licensed pursuant to Chapter 5 (commencing with Section 2000) of Division 2 of the Business and Professions Code or pursuant to the Osteopathic Act.

(5) A podiatrist licensed pursuant to Article 22 (commencing with Section 2460) of Chapter 5 of Division 2 of the Business and Professions Code.

(6) A dentist licensed pursuant to Chapter 4 (commencing with Section 1600) of Division 2 of the Business and Professions Code.

(7) A psychologist licensed pursuant to Chapter 6.6 (commencing with Section 2900) of Division 2 of the Business and Professions Code.

(8) An optometrist licensed pursuant to Chapter 7 (commencing with Section 3000) of Division 2 of the Business and Professions Code.

(9) A chiropractor licensed pursuant to the Chiropractic Initiative Act.

(10) A marriage, family, and child counselor licensed pursuant to Chapter 13 (commencing with Section 4980) of Division 2 of the Business and Professions Code.

(11) A clinical social worker licensed pursuant to Chapter 14 (commencing with Section 4990) of Division 2 of the Business and Professions Code.

(b) ''Mental health records'' means patient records, or discrete portions thereof, specifically relating to evaluation or treatment of a mental disorder. ''Mental health records'' includes, but is not limited to, all alcohol and drug abuse records.

(c) ''Patient'' means a patient or former patient of a health care provider.

(d) ''Patient records'' means records in any form or medium maintained by, or in the custody or control of, a health care provider relating to the health history, diagnosis, or condition of a patient, or relating to treatment provided or proposed to be provided to the patient. ''Patient records'' includes only records pertaining to the patient requesting the records or whose representative requests the records. ''Patient records'' does not include information given in confidence to a health care provider by a person other than another health care provider or the patient, and that material may be removed from any records prior to inspection or copying under Section 123110 or 123115. ''Patient records'' does not include information contained in aggregate form, such as indices, registers, or logs.

(e) ''Patient's representative'' or ''representative'' means a parent or the guardian of a minor who is a patient, or the guardian or conservator of the person of an adult patient, or the beneficiary or personal representative of a deceased patient.

(f) ''Alcohol and drug abuse records'' means patient records, or discrete portions thereof, specifically relating to evaluation and treatment of alcoholism or drug abuse.

123110. (a) Notwithstanding Section 5328 of the Welfare and Institutions Code, and except as provided in Sections 123115 and 123120, any adult patient of a health care provider, any minor patient authorized by law to consent to medical treatment, and any patient

representative shall be entitled to inspect patient records upon presenting to the health care provider a written request for those records and upon payment of reasonable clerical costs incurred in locating and making the records available. However, a patient who is a minor shall be entitled to inspect patient records pertaining only to health care of a type for which the minor is lawfully authorized to consent. A health care provider shall permit this inspection during business hours within five working days after receipt of the written request. The inspection shall be conducted by the patient or patient's representative requesting the inspection, who may be accompanied by one other person of his or her choosing.

(b) Additionally, any patient or patient's representative shall be entitled to copies of all or any portion of the patient records that he or she has a right to inspect, upon presenting a written request to the health care provider specifying the records to be copied, together with a fee to defray the cost of copying, that shall not exceed twenty-five cents ($0.25) per page or fifty cents ($0.50) per page for records that are copied from microfilm and any additional reasonable clerical costs incurred in making the records available. The health care provider shall ensure that the copies are transmitted within 15 days after receiving the written request.

(c) Copies of X-rays or tracings derived from electrocardiography, electroencephalography, or electromyography need not be provided to the patient or patient's representative under this section, if the original X-rays or tracings are transmitted to another health care provider upon written request of the patient or patient's representative and within 15 days after receipt of the request. The request shall specify the name and address of the health care provider to whom the records are to be delivered. All reasonable costs, not exceeding actual costs, incurred by a health care provider in providing copies pursuant to this subdivision may be charged to the patient or representative requesting the copies.

(d) This section shall not be construed to preclude a health care provider from requiring reasonable verification of identity prior to permitting inspection or copying of patient records, provided this requirement is not used oppressively or discriminatorily to frustrate or delay compliance with this section. Nothing in this chapter shall be deemed to supersede any rights that a patient or representative might otherwise have or exercise under Section 1158 of the Evidence Code or any other provision of law. Nothing in this chapter shall require a health care provider to retain records longer than required by applicable statutes or administrative regulations.

(e) This chapter shall not be construed to render a health care provider liable for the quality of his or her records or the copies provided in excess of existing law and regulations with respect to the quality of medical records. A health care provider shall not be liable to the patient or any other person for any consequences that result

from disclosure of patient records as required by this chapter. A health care provider shall not discriminate against classes or categories of providers in the transmittal of X-rays or other patient records, or copies of these X-rays or records, to other providers as authorized by this section.

Every health care provider shall adopt policies and establish procedures for the uniform transmittal of X-rays and other patient records that effectively prevent the discrimination described in this subdivision. A health care provider may establish reasonable conditions, including a reasonable deposit fee, to ensure the return of original X-rays transmitted to another health care provider, provided the conditions do not discriminate on the basis of, or in a manner related to, the license of the provider to which the X-rays are transmitted.

(f) Any health care provider described in paragraphs (4) to (10), inclusive, of subdivision (a) of Section 123105 who willfully violates this chapter is guilty of unprofessional conduct. Any health care provider described in paragraphs (1) to (3), inclusive, of subdivision (a) of Section 123105 that willfully violates this chapter is guilty of an infraction punishable by a fine of not more than one hundred dollars ($100). The state agency, board, or commission that issued the health care provider's professional or institutional license shall consider a violation as grounds for disciplinary action with respect to the licensure, including suspension or revocation of the license or certificate.

(g) This section shall be construed as prohibiting a health care provider from withholding patient records or summaries of patient records because of an unpaid bill for health care services. Any health care provider who willfully withholds patient records or summaries of patient records because of an unpaid bill for health care services shall be subject to the sanctions specified in subdivision (f).

123115. (a) The representative of a minor shall not be entitled to inspect or obtain copies of the minor's patient records in either of the following circumstances:

(1) With respect to which the minor has a right of inspection under Section 123110.

(2) Where the health care provider determines that access to the patient records requested by the representative would have a detrimental effect on the provider's professional relationship with the minor patient or the minor's physical safety or psychological well being. The decision of the health care provider as to whether or not a minor's records are available for inspection under this section shall not attach any liability to the provider, unless the decision is found to be in bad faith.

(b) When a health care provider determines there is a substantial risk of significant adverse or detrimental consequences to a patient in seeing or receiving a copy of mental health records requested by

the patient, the provider may decline to permit inspection or provide copies of the records to the patient, subject to the following conditions:

(1) The health care provider shall make a written record, to be included with the mental health records requested, noting the date of the request and explaining the health care provider's reason for refusing to permit inspection or provide copies of the records, including a description of the specific adverse or detrimental consequences to the patient that the provider anticipates would occur if inspection or copying were permitted.

(2) The health care provider shall permit inspection by, or provide copies of, the mental health records to a licensed physician and surgeon or licensed psychologist designated by request of the patient.

(3) The health care provider shall inform the patient of the provider's refusal to permit him or her to inspect or obtain copies of the requested records, and inform the patient of the right to require the provider to permit inspection by, or provide copies to, a licensed physician and surgeon, licensed psychologist, or licensed clinical social worker designated by written authorization of the patient.

(4) The health care provider shall indicate in the mental health records of the patient whether the request was made under paragraph (2).

123120. Any patient or representative aggrieved by a violation of Section 123110 may, in addition to any other remedy provided by law, bring an action against the health care provider to enforce the obligations prescribed by Section 123110. Any judgment rendered in the action may, in the discretion of the court, include an award of costs and reasonable attorney fees to the prevailing party.

123125. (a) This chapter shall not require a health care provider to permit inspection or provide copies of alcohol and drug abuse records where, or in a manner, prohibited by Section 408 of the federal Drug Abuse Office and Treatment Act of 1972 (Public Law 92-255) or Section 333 of the federal Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act of 1970 (Public Law 91-616), or by regulations adopted pursuant to these federal laws. Alcohol and drug abuse records subject to these federal laws shall also be subject to this chapter, to the extent that these federal laws do not prohibit disclosure of the records. All other alcohol and drug abuse records shall be fully subject to this chapter.

(b) This chapter shall not require a health care provider to permit inspection or provide copies of records or portions of records where or in a manner prohibited by existing law respecting the confidentiality of information regarding communicable disease carriers.

123130. (a) A health care provider may prepare a summary of the record, according to the requirements of this section, for

inspection and copying by a patient. If the health care provider chooses to prepare a summary of the record rather than allowing access to the entire record, he or she shall make the summary of the record available to the patient within 10 working days from the date of the patient's request. However, if more time is needed because the record is of extraordinary length or because the patient was discharged from a licensed health facility within the last 10 days, the health care provider shall notify the patient of this fact and the date that the summary will be completed, but in no case shall more than 30 days elapse between the request by the patient and the delivery of the summary. In preparing the summary of the record the health care provider shall not be obligated to include information that is not contained in the original record.

(b) A health care provider may confer with the patient in an attempt to clarify the patient's purpose and goal in obtaining his or her record. If as a consequence the patient requests information about only certain injuries, illnesses, or episodes, this subdivision shall not require the provider to prepare the summary required by this subdivision for other than the injuries, illnesses, or episodes so requested by the patient. The summary shall contain for each injury, illness, or episode any information included in the record relative to the following:

(1) Chief complaint or complaints including pertinent history.

(2) Findings from consultations and referrals to other health care providers.

(3) Diagnosis, where determined.

(4) Treatment plan and regimen including medications prescribed.

(5) Progress of the treatment.

(6) Prognosis including significant continuing problems or conditions.

(7) Pertinent reports of diagnostic procedures and tests and all discharge summaries.

(8) Objective findings from the most recent physical examination, such as blood pressure, weight, and actual values from routine laboratory tests.

(c) This section shall not be construed to require any medical records to be written or maintained in any manner not otherwise required by law.

(d) The summary shall contain a list of all current medications prescribed, including dosage, and any sensitivities or allergies to medications recorded by the provider.

(e) Subdivision (c) of Section 123110 shall be applicable whether or not the health care provider elects to prepare a summary of the record.

(f) The health care provider may charge no more than a reasonable fee based on actual time and cost for the preparation of

the summary. The cost shall be based on a computation of the actual time spent preparing the summary for availability to the patient or the patient's representative. It is the intent of the Legislature that summaries of the records be made available at the lowest possible cost to the patient.

123135. Except as otherwise provided by law, nothing in this chapter shall be construed to grant greater access to individual patient records by any person, firm, association, organization, partnership, business trust, company, corporation, or municipal or other public corporation, or government officer or agency. Therefore, this chapter does not do any of the following:

(a) Relieve employers of the requirements of the Confidentiality of Medical Information Act (Part 2.6 (commencing with Section 56) of Division 1 of the Civil Code).

(b) Relieve any person subject to the Insurance Information and Privacy Protection Act (Article 6.6 (commencing with Section 791) of Chapter 1 of Part 2 of Division 1 of the Insurance Code) from the requirements of that act.

(c) Relieve government agencies of the requirements of the Information Practices Act of 1977 (Title 1.8 (commencing with Section 1798) of Part 4 of Division 3 of the Civil Code).

123140. The Information Practices Act of 1977 (Title 1.8 (commencing with Section 1798) of Part 4 of Division 3 of the Civil Code) shall prevail over this chapter with respect to records maintained by a state agency.

123145. (a) Providers of health services that are licensed pursuant to Sections 1205, 1253, 1575 and 1726 have an obligation, if the licensee ceases operation, to preserve records for a minimum of seven years following discharge of the patient, except that the records of unemancipated minors shall be kept at least one year after the minor has reached the age of 18 years, and in any case, not less than seven years.

(b) The department or any person injured as a result of the licensee's abandonment of health records may bring an action in a proper court for the amount of damage suffered as a result thereof. In the event that the licensee is a corporation or partnership that is dissolved, the person injured may take action against that corporation's or partnership's principle officers of record at the time of dissolution.

(c) Abandoned means violating subdivision (a) and leaving patients treated by the licensee without access to medical information to which they are entitled pursuant to Section 123110.

123148. Notwithstanding any other provision of law, a health care professional at whose request a test is performed shall, upon a written or oral request of a patient who is the subject of a clinical laboratory test, provide the patient with the results of the test in plain language conveyed in the manner deemed most appropriate by the health care

professional who requested the test. The test results to be reported to the patient pursuant to this section shall be recorded in the patient's medical record and shall be reported to the patient within a reasonable time period after the test results are received at the offices of the health care professional who requested the test.

123149. (a) Providers of health services, licensed pursuant to Sections 1205, 1253, 1575, and 1726, that utilize electronic recordkeeping systems only, shall comply with the additional requirements of this section. These additional requirements do not apply to patient records if hard copy versions of the patient records are retained.

(b) Any use of electronic recordkeeping to store patient records shall ensure the safety and integrity of those records at least to the extent of hard copy records. All providers set forth in subdivision (a) shall ensure the safety and integrity of all electronic media used to store patient records by employing an offsite backup storage system, an image mechanism that is able to copy signature documents, and a mechanism to ensure that once a record is input, it is unalterable.

(c) Original hard copies of patient records may be destroyed once the record has been electronically stored.

(d) The printout of the computerized version shall be considered the original as defined in Section 255 of the Evidence Code for purposes of providing copies to patients, the Division of Licensing and Certification, and for introduction into evidence in accordance with Sections 1550 and 1551 of the Evidence Code, in administrative or court proceedings.

(e) Access to electronically stored patient records shall be made available to the Division of Licensing and Certification staff promptly, upon request.

(f) This section does not exempt licensed clinics, health facilities, adult day health care centers, and home health agencies from the requirement of maintaining original copies of patient records that cannot be electronically stored.

(g) Any health care provider subject to this section, choosing to utilize an electronic recordkeeping system, shall develop and implement policies and procedures to include safeguards for confidentiality and unauthorized access to electronically stored patient health records, authentication by electronic signature keys, and systems maintenance.

(h) Nothing contained in this chapter shall affect the existing regulatory requirements for the access, use, disclosure, confidentiality, retention of record contents, and maintenance of health information in patient records by health care providers.

(i) This chapter does not prohibit any provider of health care services from maintaining or retaining patient records electronically.

CHAPTER 2. DESTRUCTION OF RECORDS AND EXHIBITS OF HUMAN HEALTH

123150. The board of supervisors may authorize the destruction or the disposition to a public or private medical library of any X-ray photographs and case records that are more than five years old and that were taken by the county health officer in the performance of his or her duties with regard to tuberculosis if any of the following conditions are complied with:

(a) The county health officer has determined that the X-ray photographs or a series of X-ray photographs in conjunction with case records do not show the existence of tuberculosis in the infectious stage.

(b) The individual of whom the X-ray photographs were taken has been deceased not less than two years or the 102nd anniversary of the individual's birthdate has occurred and the county health officer cannot reasonably ascertain whether the individual is still living.

(c) The place of residence of the individual of whom the X-ray photographs were taken has been unknown to the county health officer for 10 years.

123155. The board of supervisors of any county, in addition to its other powers and duties may acquire or construct exhibits and displays depicting all or parts of the human body and functions thereof for the purpose of educating the public with regard to human health, and maintain, operate and manage the exhibits and displays in any county or other public building. It may enter into contracts or leases with any other governmental agency or any nonprofit association or corporation, including a county medical association, for the construction and acquisition of the exhibits and displays, and for the maintenance, operation and management of the exhibits and displays in any county or other public building, without consideration except the agreement of the contracting or leasing agency, association or corporation to construct, acquire, maintain, operate and manage the exhibits and displays for the purpose of public health education and upon any other terms and conditions as may be agreed upon by the board and the contracting or leasing agency, association or corporation.

CHAPTER 3. CATASTROPHIC HEALTH INSURANCE

123175. The Legislature finds and declares as follows:

(a) A catastrophic illness or injury may financially devastate an individual or the family of that individual because of extraordinary medical expenses. It is vitally necessary to the public health and welfare of the State of California that:

(1) Its residents not be burdened with those financial costs. Most health insurance policies contain a monetary limitation on the

amount of money that can be expended on a particular illness or individual, leaving any balance to be paid by the patient. The state has enacted this chapter to promote the availability of additional insurance to help pay extensive medical costs.

(2) The state government not be financially burdened by residents who may become indigent due to these catastrophic health costs.

(b) It is the intent of the Legislature in enacting this chapter to institute a program to inform state residents of the need for catastrophic health insurance, and to make this insurance available to residents through an independent insurer at no cost or liability to the state.

123180. As used in this chapter:

(a) ''Catastrophic health insurance'' means a supplementary insurance contract that indemnifies a California resident for medical expenses, including at least the costs of the basic health care services that result from an illness, injury, or disease, and that are greater than fifty thousand dollars ($50,000), subject to a lifetime benefit limit of one million dollars ($1,000,000).

(b) ''Resident'' means any individual who lives in California for at least 90 consecutive days.

(c) ''Insurer'' as used in this chapter includes a disability insurer that covers hospital, medical, or surgical expenses, and a nonprofit hospital service plan.

(d) ''Basic health care services'' includes, but is not limited to, the following:

(1) Inpatient hospital treatment, including room and board, general nursing services, diagnostic tests, supplies, and other medically necessary services.

(2) Outpatient services for surgery, presurgical diagnostic tests, emergency care, and chemotherapy.

(3) Surgery and anesthesia.

(4) Hospital and office visits and consultations.

(5) X-rays and laboratory tests; allergy tests, injections, and sera.

(6) Maternity care for the subscriber or enrolled spouse.

(7) Psychotherapy.

(8) Chemotherapy and radiation therapy.

(9) Physical, speech, occupational and respiratory therapies.

(10) Prescription drugs.

(11) Prostheses and durable medical equipment, such as artificial limbs, hospital beds, and wheelchairs.

(12) Cardiac rehabilitation program.

(13) Local ambulance service.

(14) Alcohol and drug abuse rehabilitation.

(15) Rehabilitative care.

(16) Outpatient skilled nursing care (up to two hours per day for up to 50 days per calendar year).

(17) Home health care and hospice services provided by an approved home health agency or hospice agency.

123185. The director shall, in consultation with, and approval of the Department of Insurance, do all of the following:

(a) Contract with an insurer or insurers to provide any resident catastrophic health insurance.

(b) Inform residents of the availability of catastrophic health insurance.

(c) Provide oversight for all contract obligations of the insurer.

(d) Approve all advertising and marketing materials used by an insurer in connection with catastrophic health insurance provided under this chapter in order to ensure accuracy and fairness. The advertising standards used shall be those set out in Section 1360.

(e) Determine the cost of the oversight function and make provisions to cover all administrative costs.

123190. The director may appoint a full-time employee, and other staff as required, to implement this chapter.

123195. (a) A contract provided for by this chapter shall not be required to cover a preexisting medical condition of the resident during the first 10 months the resident is covered by catastrophic health insurance provided under this chapter. Charges for a preexisting condition shall not apply toward the deductible during the first 10 months of coverage. Charges for other conditions during that initial period shall apply toward the deductible.

(b) The contract shall also prohibit the insurer from discriminating against prospective insureds in their underwriting practices on the basis of demographic factors, such as age, or preexisting medical conditions.

123200. The state is not liable in any way for any claims arising out of an arrangement for insurance established under this chapter. The insurer shall bear the cost of all claims, and shall indemnify the state against all claims and the cost of defending against all claims in connection with an arrangement for catastrophic health insurance established under this chapter.

123205. The director shall enter into contracts pursuant to subdivision (a) of Section 123185 only with insurers that meet all of the following criteria, as determined by the director:

(a) The insurer shall be actuarially sound.

(b) The insurer shall be fully self-supported by its policy premiums or charges and investments.

(c) The insurer shall use advertising that is accurate.

123210. (a) The term of any contract entered into pursuant to subdivision (a) of Section 123185 shall be determined by the director, but shall not exceed three years.

(b) The contract shall contain a provision authorizing the director to terminate the contract upon giving 60 days' written notice to the insurer of any of the following causes for termination:

(1) The department has determined that management practices of the insurer or the current financial condition of the insurer interferes with the efficient and timely payment of catastrophic health insurance benefits.

(2) Continuing failure of the insurer to timely pay the benefits of its policies of catastrophic health insurance or provide catastrophic health insurance services in accordance with the contract.

(3) Other continuing unsatisfactory performance by the insurer under the contract, based upon complaints received from insureds or other sources, if the insurer has failed to take reasonable, effective, and prompt actions to resolve the complaints.

(c) The contract shall contain a provision authorizing the director to terminate the contract without cause upon any annual anniversary date of the contract by giving at least 60 days' notice to the insurer.

(d) The director may give up to 120 days' notice to terminate if it is determined to be in the best interest of plan participants.

(e) The director shall annually certify that participating providers meet the conditions of the program. In carrying out this requirement, the director shall consult with the Department of Insurance to obtain any audits performed by those agencies that may be used in evaluating the performance of each provider.

123215. Premiums or charges paid for catastrophic health insurance provided pursuant to this chapter shall include an increment to defray the reasonable administrative costs of the department in administering this chapter that shall be transmitted by insurers to the department as provided in the contract.

123220. If studies or research demonstrate that it is in the best interest of the program, the director may adopt regulations setting forth modifications to the coverage provided under the program. No modification shall apply to any coverage provided by a policy or contract issued prior to the operative date of the regulation, except that the modification shall apply to coverage provided after any renewal of the policy or contract occurring after the operative date of the regulation.

PART 2. MATERNAL, CHILD, AND ADOLESCENT HEALTH

CHAPTER 1. GENERAL PROVISIONS

Article 1. Maternal, Child, and Adolescent Health

123225. The department shall maintain a program of maternal and child health.

123227. (a) The Maternal and Child Health Branch of the State Department of Health Services shall administer a comprehensive shelter-based services grant program to battered women's shelters pursuant to this section.

(b) The Maternal and Child Health Branch shall administer grants to battered women's shelters that propose to expand existing services or create new services, and to establish new battered women's shelters to provide services, in any of the following four areas:

(1) Emergency shelter to women and their children escaping violent family situations.

(2) Transitional housing programs to help women and their children find housing and jobs so that they are not forced to choose between returning to a violent relationship or becoming homeless. The programs may offer up to 18 months of housing, case management, job training and placement, counseling, support groups, and classes in parenting and family budgeting.

(3) Legal and other types of advocacy and representation to help women and their children pursue the appropriate legal options.

(4) Other support services for battered women identified by the advisory council, including, but not limited to, creative and innovative service approaches such as community response teams.

(c) In implementing the grant program pursuant to this section, the State Department of Health Services shall consult with an advisory council, to remain in existence until January 1, 1996. The council shall be composed of not to exceed 13 voting members and two nonvoting members appointed as follows:

(1) Seven members appointed by the Governor.

(2) Three members appointed by the Speaker of the Assembly.

(3) Three members appointed by the Senate Committee on Rules.

(4) Two nonvoting ex officio members who shall be Members of the Legislature, one appointed by the Speaker of the Assembly and one appointed by the Senate Committee on Rules. Any Member of the Legislature appointed to the council shall meet with, and participate in the activities of, the council to the extent that participation is not incompatible with his or her position as a Member of the Legislature.

The membership of the council shall consist of domestic violence advocates, battered women service providers, and representatives of women's organizations, law enforcement, and other groups involved with domestic violence. At least one-half of the council membership shall consist of domestic violence advocates or battered women service providers from organizations such as the California Alliance Against Domestic Violence.

It is the intent of the Legislature that the council membership reflect the ethnic, racial, cultural, and geographic diversity of the state.

(d) The department shall collaborate closely with the council in the development of funding priorities, the framing of the Request for Proposals, and the solicitation of proposals.

(e) Administrative costs of the State Department of Health Services incurred pursuant to the grant program shall not exceed 5 percent of the funds allocated for the program.

(f) The shelters funded pursuant to this section shall reflect the ethnic, racial, economic, cultural, and geographic diversity of the state. It is the intent of the Legislature that services funded by this program include services in underserved and minority communities.

(g) As a condition of receiving funding pursuant to this section, battered women's shelters shall provide matching funds or in-kind contributions equivalent to 10 percent of the grant they would receive. The matching funds or in-kind contributions may come from other governmental or private sources.

(h) The State Department of Health Services shall issue a Request for Proposals and shall encumber the funds or complete negotiations for agreements no later than May 1, 1995.

123230. The department may investigate, and disseminate educational information relating to, conditions affecting the health of the children of this state.

123235. The program may include the provision of educational, preventative, diagnostic and treatment services, including medical care, hospitalization and other institutional care and aftercare, appliances and facilitating services directed toward reducing infant mortality and improving the health of mothers and children. The department may make grants or contracts or advance funds from any funds that are made available for the purposes of the Maternal and Child Health Program Act (Section 27).

123240. (a) The Maternal and Child Health Branch of the department shall conduct a pilot project to assess the effectiveness of daily ambulatory uterine monitoring devices and services in reducing preterm births in Medi-Cal eligible women.

(b) The department shall implement the pilot program to assess the incidence of preterm births in 1,000 women at high risk of preterm birth, 500 of whom shall be provided daily ambulatory uterine monitoring services between the 23rd and 36th weeks of gestation and 500 of whom shall be provided routine prenatal care augmented by training in palpatation. Women participating in the pilot program shall be Medi-Cal eligible women. To the maximum extent possible these services shall be prescribed by providers participating in other programs administered by the Maternal and Child Health Branch of the department or the comprehensive perinatal program.

(c) Women shall be deemed to be at high risk if they have multiple gestation or any two of the following risk factors for preterm labor; uterine malformation, a history of preterm labor or births, cervical incompetence, cervical dilation or effacement, and those patients who have been treated during the current pregnancy for preterm labor.

(d) The department shall select five counties to participate in the project, at least one of which shall be a rural county, and shall reimburse providers of ambulatory uterine monitoring services a fee based on reasonable costs.

(e) (1) The department shall also contract for an evaluation of the pilot project to ascertain whether use of the ambulatory uterine monitoring services significantly reduces the incidence of preterm births. The evaluation shall compare the experimental and control groups and identify the following for each group:

(A) The number of preterm births.

(B) The number of hospital days used by the mother prior to delivery.

(C) The number of hospital days used by the mother and child after delivery, including neonatal intensive care.

(D) The number of children born with developmental disabilities or conditions that may lead to developmental disabilities.

(E) The costs of providing prenatal services.

(2) The evaluation shall also project the costs associated with the health care provided to the mother and child during the course of the pilot project and, if feasible, shall project the longer term health care costs of children born prematurely, including costs of services provided to the developmentally disabled.

(3) The department may enter into the contract on a sole source basis.

(f) (1) The pilot project established pursuant to this section shall be considered successful if it shows that the experimental group, when compared to the control group, had all of the following:

(A) A 20-percent reduction in the number of premature births.

(B) A 20-percent reduction in the number of antepartum hospitalization days.

(C) A 20-percent reduction in the number of neonatal intensive care unit days for premature births.

(D) A 20-percent reduction in total patient costs.

(2) The department shall submit the evaluation to the Legislature by September 1, 1990.

(g) (1) The department shall immediately seek any federal waivers necessary to ensure full federal financial participation in the pilot program established pursuant to this section.

(2) The department shall not implement the pilot program under this section until necessary federal waivers are received.

123245. The Maternal and Child Health Program Act (Section 27) does not give the power to force compulsory medical or physical examination of children.

123250. Upon request the department shall advise all public officers, organizations, and agencies interested in the health and welfare of mothers and children in the state.

Article 2. Women, Infants, and Children's Nutrition

123275. The Legislature finds that medical, educational and psychological evidence increasingly points to adequate nutrition as a determinant not only of good physical health but also of full intellectual development and educational achievement, with adequate nutrition in the earliest months and years being particularly important for full development of the child's mind and body, that problems of child nutrition cut across income lines and can result not only from low income but also from parental ignorance or neglect and that there is a need for a statewide child nutrition program that has the potential of reaching all pregnant women and mothers of infants.

123280. The department may conduct a statewide program for providing nutritional food supplements to low-income pregnant women, low-income postpartum and lactating women, and low-income infants and children under five years of age, who have been determined to be at nutritional risk by a health professional, based on criteria established by the department. Any program established pursuant to this section shall do all of the following:

(a) Comply with all the requirements of this article.

(b) Be conducted only if a special project is authorized by inclusion in the Budget Act or notification is provided to the Legislature pursuant to Section 28 of the Budget Act, and federal funds are appropriated therefor.

(c) Be known as the California Special Supplemental Food Program for Women, Infants, and Children.

123285. As used in this article, the following definitions shall apply:

(a) ''Health professional'' means a physician and surgeon, registered nurse, nutritionist, dietitian, or state or local medically trained health official, who is competent to professionally evaluate nutritional need and to authorize supplemental foods, as determined by the state department.

(b) ''Low income'' means an income of not more than 185 percent of the poverty level as determined by the federal poverty income guidelines promulgated by the United States Department of Health and Human Services.

(c) ''Recipient'' means low-income pregnant women, low-income postpartum and lactating women, and low-income infants and children under five years of age, who are determined to be at nutritional risk by a health professional, based on criteria established by the state department.

(d) ''Nutrition coupon'' means a check that is limited as to value, food type, and food quantity and that has a limited period of validity.

123290. The department, under any program established pursuant to this article, shall do all of the following:

(a) Establish guidelines to determine resource allocation giving consideration to an area's nutritional need.

(b) Designate the counties within which a program will be conducted, with the approval of those counties.

(c) Establish the minimum nutritional requirements for recipients.

(d) Designate specific supplemental foods to meet the minimum nutritional requirements for recipients.

(e) Develop and maintain a system for the delivery of supplemental foods to recipients through the distribution of supplemental foods designated in subdivision (d) and nutrition coupons when other methods of delivery are impractical.

(f) (1) Develop and coordinate a smoking cessation component of program operations, with consideration of local agency plans, needs, and available tobacco education resources.

(2) In consultation with the directors of local agencies and with other individuals with expertise in the field of smoking cessation, identify and promulgate a strategy for smoking cessation in the state plan of operation and administration of the WIC program, including, but not limited to all of the following:

(A) Designating an agency staff member to coordinate smoking cessation efforts.

(B) Providing training on smoking cessation and tobacco education to designated staff members of local agencies who are responsible for counseling participants in the program.

(3) Develop and implement procedures to ensure that tobacco use screening and education, including, but not limited to, smoking cessation counseling and referrals where appropriate, are offered to all participants.

(g) (1) Establish guidelines and criteria to be used by participating local agencies, when determining recipient eligibility, that require, in addition to a recipient being a low-income pregnant woman, or a low-income postpartum and lactating woman, or a low-income infant or child under five years of age, that the recipient be at nutritional risk.

(2) A health professional on the staff of the local agency shall determine if a person is at nutritional risk through a medical or nutritional assessment. This determination may be based on referral data submitted by a health professional not on the staff of the local agency. The person's height or length and weight shall be measured, and a hematological test for anemia, such as a hemoglobin or hematocrit test, shall be performed. However, the tests shall not be required for infants under six months of age. In addition, the blood test shall not be required for children who were determined to be within the normal range at their last program certification. However, the blood test shall be performed on the children at least once a year. A breastfeeding woman may be certified if the child she is

breastfeeding is determined to be at nutritional risk and the woman meets the income eligibility criteria.

(h) Operate the program as an adjunct to existing health services.

(i) Seek federal funds to carry out this article.

123295. Nutrition coupons in an amount sufficient to meet the nutritional needs of a recipient for one month shall be granted to a recipient by facilities and persons referred to in subdivision (f) of Section 123290 upon the written finding of nutritional need by the recipient's physician or other health professional.

123300. The department may, under any program established pursuant to this article, investigate the feasibility of contracting with one or more banks in the area served by the program for the redemption of nutrition coupons.

123305. The department, under any program established pursuant to this article, may collect data to determine the need for and the continuation of a supplemental nutritional program for recipients under this article.

123310. The department, under any program established pursuant to this article, shall authorize retail food vendors, by written agreement, to accept nutrition coupons. The department shall authorize an appropriate number and distribution of food vendors in order to assure adequate participant convenience and access and to assure that state or local officials can effectively manage review of authorized food vendors in their jurisdictions. The department shall establish criteria to limit the number of retail food vendors with which the department enters into agreements. The criteria, at a minimum, shall include:

(a) The prices the vendor charges for foods in relation to other stores in the area.

(b) The ability of the department to ensure that authorized supplemental foods will be provided through in-store compliance purchases.

(c) The adequacy of the shelf stock of the authorized supplemental foods.

(d) Past performance of the vendor in compliance with this article and with the Food Stamp Program.

123315. The department, under any program established pursuant to this article, shall ensure that, at a minimum, the authorized vendor shall do all of the following:

(a) Redeem nutrition coupons only from persons bearing appropriate identification provided by the department.

(b) Redeem nutrition coupons for only those foods specified thereon.

(c) Redeem nutrition coupons at an amount that is the same as, or lesser than, that charged other customers for identical foods.

(d) Redeem and deposit nutrition coupons during specified valid periods.

(e) Deposit the nutrition coupons directly in the vendor's bank account and not transfer them for cash payment, credit, or any other benefit to any party other than the vendor's bank or the state.

(f) Maintain for a period of at least three years records, that shall include, but not be limited to, all of the following:

(1) Inventory records showing all purchases, both wholesale and retail, in the form of invoices that identify the quantity and prices of specified authorized supplemental foods.

(2) Sales and use tax returns.

(3) Books of account.

(4) Other pertinent records that the department determines are necessary to substantiate the volume and prices charged to the state department through the nutrition coupons redeemed by the vendor.

123320. The department shall inform the retail food vendors of, and include in the written agreement with, the vendors, guidelines consistent with Section 123315 and shall print on each coupon the following:

(a) Specific supplemental foods and the quantities thereof for which the coupon may be redeemed.

(b) The valid period of the nutrition coupon.

(c) The maximum value for which the nutrition coupon may be redeemed.

123325. A retail food vendor or any other person who knowingly redeems coupons in excess of the price charged other customers for identical foods, or who provides anything of value other than the specified foods, or who fails to provide inventory records to substantiate purchases for resale of authorized supplemental foods is subject to all sanctions set forth in federal regulation for the Special Supplemental Food Program for Women, Infants, and Children, that is provided for in Section 246 and following of Title 7 of the Code of Federal Regulations. The department may disqualify a food vendor who is currently disqualified from the Food Stamp Program.

123330. Any person or persons who have embezzled, willfully misapplied, stolen, or fraudulently obtained funds or benefits pursuant to this article shall be subject to the penalties set forth in federal regulations for the Special Supplemental Food Program for Women, Infants, and Children, that is provided for in Section 246 and following of Title 7 of the Code of Federal Regulations.

123335. Any officer, employee, or agent of the department may enter the place of business of any vendor transacting nutrition coupons to verify food prices, to witness or investigate procedures, to conduct financial audits, or to otherwise determine compliance of the vendor with this article and the vendor agreement.

123340. (a) Except as provided in subdivision (c), if any amount is due and payable and unpaid as a result of an overpayment to a vendor or local agency established under this article that is identified through an audit or examination conducted by or on behalf of the

director and the department has issued an audit or examination finding, or an administrative decision resulting from an administrative appeal of the audit or examination finding that has become final, the director may file in the office of the County Clerk of Sacramento County and with the county clerk of the county in which the vendor has his or her principal place of business, a certificate containing the following:

(1) The amount due and owing and unpaid plus the applicable interest at a rate equal to the monthly average of the rate received on investments in the Pooled Money Investment Fund commencing on the date that an audit or examination finding, made pursuant to Section 316.5 is mailed to the vendor or local agency.

(2) A statement that the director has complied with this article prior to the filing of the certificate.

(3) A request that judgment be entered against the vendor or local agency in the amount set forth in the certificate.

The county clerk immediately upon the filing of the certificate, shall enter a judgment for the State of California against the vendor or local agency in the amount set forth in the certificate.

Notwithstanding any provision of law to the contrary, the Special Supplemental Food Program for Women, Infants, and Children shall pay the normal fee charged by the county for the certificate of judgment.

Nothing in this subdivision shall prevent the director from using any other means available in law to recover amounts due and owing and unpaid from the vendor or local agency.

(b) The dates when the department may file the certificate and seek judgment from the county clerk, as provided in subdivision (a), depends on whether the audit finding is appealed by the vendor or local agency.

(1) If the audit finding or lower level administrative decision is not appealed, the department may file the certificate the day after the end of the appeal period or anytime thereafter, but not later than three years after the payment became due and owing.

(2) If the audit finding or lower level administrative decision is appealed to the director, the department may file the certificate no earlier than 90 days after the issuance of the final decision by the director, but no later than three years after the issuance of the final decision.

(c) If the vendor seeks judicial review of the final decision of the director pursuant to Section 1094.5 of the Code of Civil Procedure, and notice of the action is properly served on the director within 90 days of the issuance of the final decision, the department shall not file any certificate as provided in subdivision (a).

If the vendor does not seek judicial review of the final decision of the director or does not properly serve notice within 90 days from the

date of the final decision of the director, the department may file the certificate and obtain judgment pursuant to subdivision (a).

123345. An abstract of judgment obtained pursuant to subdivisions (a) and (b) of Section 123335 or a copy thereof may be recorded with the county recorder of any county. From the time of recording, the judgment shall constitute a lien upon all real or personal property owned by the vendor at the time, or that the vendor may afterwards, but before the lien expires, acquire. The lien shall have the force, effect, and priority of a judgment lien and shall continue for 10 years from the time of recording of the abstract of judgment obtained pursuant to subdivisions (a) and (b) of Section 123335 unless sooner released or otherwise discharged.

The lien may, within 10 years from the date of recording of the abstract of judgment or within 10 years from the date of the last extension of the lien in the manner herein provided, be extended by recording a new abstract in the office of the county recorder of any county. From the date of the recording the lien shall be extended for 10 years unless sooner released or otherwise discharged.

123350. The department shall arrange for the conduct of periodic audits of participating local agencies.

123355. The department shall provide a hearing procedure whereby any food vendor or local agency may appeal any adverse action taken by the department affecting the vendor's or local agency's participation in the California Supplemental Food Program for Women, Infants, and Children. The hearing procedure shall be in accordance with the requirements of the federal regulations for the Special Supplemental Food Program for Women, Infants, and Children, that is contained in Section 246 et seq. of Title 7 of the Code of Federal Regulations.

CHAPTER 2. MATERNAL HEALTH

Article 1. Determination of Pregnancy

123375. (a) Except as otherwise provided in subdivision (b), no person shall sell, offer for sale, give away, distribute, or otherwise furnish materials intended to determine the presence of pregnancy, unless that person has obtained a certificate of acceptability from the department declaring that the materials have been approved as to efficacy and safety by the department.

(b) Subdivision (a) shall not apply to materials intended to determine the presence of pregnancy, that are sold, offered for sale, given away, distributed, or otherwise furnished to a physician and surgeon licensed to practice in this state, a pharmacist licensed to practice in this state, a licensed primary care clinic, a licensed health facility, or a public health agency.

(c) Any person other than a person described in subdivision (b) who intends to sell, offer for sale, give away, distribute or otherwise furnish materials intended to determine the presence of pregnancy shall first make application to the state department for certification of the materials. The department shall also require that an application for certification shall be accompanied by samples of any materials that are the subject of the application as the department may reasonably require.

Any violation of this section is a misdemeanor.

123380. Local public health agencies shall make pregnancy testing services available free or at cost to the person using the services. The results of any pregnancy test shall be confidential.

123385. It is the intent of the Legislature that the program authorized pursuant to this article be entirely self-supporting, and for this purpose the state department is authorized to establish a schedule of fees for applications for certificates of acceptability that shall provide revenues that shall not exceed the amount necessary, but shall be sufficient to cover all costs incurred in the administration of this article.

Article 2. Abortion

123400. This chapter shall be known and may be cited as the Therapeutic Abortion Act.

123405. A holder of the physician's and surgeon's certificate, as defined in the Business and Professions Code, is authorized to perform an abortion or aid or assist or attempt an abortion, only if each of the following requirements is met:

(a) The abortion takes place in a hospital that is accredited by the Joint Commission on Accreditation of Hospitals.

(b) The abortion is approved in advance by a committee of the medical staff of the hospital, which committee is established and maintained in accordance with standards promulgated by the Joint Commission on Accreditation of Hospitals. In any case in which the committee of the medical staff consists of no more than three licensed physicians and surgeons, the unanimous consent of all committee members shall be required in order to approve the abortion.

(c) The Committee of the Medical Staff finds that one or more of the following conditions exist:

(1) There is substantial risk that continuance of the pregnancy would gravely impair the physical or mental health of the mother.

(2) The pregnancy resulted from rape or incest.

123407. The Committee of the Medical Staff shall not approve the performance of an abortion on the ground that the pregnancy resulted from rape or incest except in accordance with the following procedure:

(a) Upon receipt of an application for an abortion on the grounds that the pregnancy resulted from rape or incest, the committee shall immediately notify the district attorney of the county in which the alleged rape or incest occurred of the application, and transmit to the district attorney the affidavit of the applicant attesting to the facts establishing the alleged rape or incest. If the district attorney informs the committee that there is probable cause to believe that the pregnancy resulted from a violation of Section 261 or Section 285 of the Penal Code, the committee may approve the abortion. If, within five days after the committee has notified the district attorney of the application, the committee does not receive a reply from the district attorney, it may approve the abortion. If the district attorney informs the committee that there is no probable cause to believe the alleged violation did occur, the committee shall not approve the abortion, except as provided in subdivision (b) of this section.

(b) If the district attorney informs the committee that there is no probable cause to believe the alleged violation did occur, the person who applied for the abortion may petition the superior court of the county in that the alleged rape or incest occurred, to determine whether the pregnancy resulted from a violation of Section 261 or Section 285 of the Penal Code. Hearing on the petition shall be set for a date no later than one week after the date of filing of the petition.

The district attorney shall file an affidavit with the court stating the reasons for his or her conclusion that the alleged violation did not occur, and this affidavit shall be received in evidence. The district attorney may appear at the hearing to offer further evidence or to examine witnesses.

If the court finds that it has been proved, by a preponderance of the evidence, that the pregnancy did result from a violation of Section 261 or Section 285 of the Penal Code, it shall issue an order so declaring, and the committee may approve the abortion. Any hearing granted under this section may, at the court's discretion, be held in camera. The testimony, findings, conclusions or determinations of the court in a proceeding under this section shall be inadmissible as evidence in any other action or proceeding, although nothing herein shall be construed to prevent the appearance of any witness who testified at a proceeding under this section, or to prevent the introduction of any evidence that may have been introduced at a proceeding under this section, in any other action or proceeding.

(c) Notwithstanding any other provision of this section, an abortion shall be approved on the ground of a violation of subdivision (1) of Section 261 of the Penal Code only when the woman at the time of the alleged violation, was below the age of 15 years.

(d) Notwithstanding any other provision of this section, the testimony of any witness in a proceeding under this section shall be admissible as evidence in any prosecution of that witness for perjury.

123410. The committee of the medical staff referred to in Section 123405 must, in all instances, consist of not less than two licensed physicians and surgeons, and if the proposed termination of pregnancy will occur after the 13th week of pregnancy, the committee must consist of at least three such licensed physicians and surgeons. In no event shall the termination be approved after the 20th week of pregnancy.

123415. The term ''mental health'' as used in Section 123405 means mental illness to the extent that the woman is dangerous to herself or to the person or property of others or is in need of supervision or restraint.

123420. (a) No employer or other person shall require a physician, a registered nurse, a licensed vocational nurse, or any other person employed or with staff privileges at a hospital, facility, or clinic to directly participate in the induction or performance of an abortion, if the employee or other person has filed a written statement with the employer or the hospital, facility, or clinic indicating a moral, ethical, or religious basis for refusal to participate in the abortion.

No such employee or person with staff privileges in a hospital, facility, or clinic shall be subject to any penalty or discipline by reason of his or her refusal to participate in an abortion. No such employee of a hospital, facility, or clinic that does not permit the performance of abortions, or person with staff privileges therein, shall be subject to any penalty or discipline on account of the person's participation in the performance of an abortion in other than the hospital, facility, or clinic.

No employer shall refuse to employ any person because of the person's refusal for moral, ethical, or religious reasons to participate in an abortion, unless the person would be assigned in the normal course of business of any hospital, facility, or clinic to work in those parts of the hospital, facility, or clinic where abortion patients are cared for. No provision of this article prohibits any hospital, facility, or clinic that permits the performance of abortions from inquiring whether an employee or prospective employee would advance a moral, ethical, or religious basis for refusal to participate in an abortion before hiring or assigning that person to that part of a hospital, facility, or clinic where abortion patients are cared for.

The refusal of a physician, nurse, or any other person to participate or aid in the induction or performance of an abortion pursuant to this subdivision shall not form the basis of any claim for damages.

(b) No medical school or other facility for the education or training of physicians, nurses, or other medical personnel shall refuse admission to a person or penalize the person in any way because of the person's unwillingness to participate in the performance of an abortion for moral, ethical, or religious reasons. No hospital, facility, or clinic shall refuse staff privileges to a physician because of the

physician's refusal to participate in the performance of abortion for moral, ethical, or religious reasons.

(c) Nothing in this article shall require a nonprofit hospital or other facility or clinic that is organized or operated by a religious corporation or other religious organization and licensed pursuant to Chapter 1 (commencing with Section 1200) or Chapter 2 (commencing with Section 1250) of Division 2, or any administrative officer, employee, agent, or member of the governing board thereof, to perform or to permit the performance of an abortion in the facility or clinic or to provide abortion services. No such nonprofit facility or clinic organized or operated by a religious corporation or other religious organization, nor its administrative officers, employees, agents, or members of its governing board shall be liable, individually or collectively, for failure or refusal to participate in any such act. The failure or refusal of any such corporation, unincorporated association or individual person to perform or to permit the performance of such medical procedures shall not be the basis for any disciplinary or other recriminatory action against such corporations, unincorporated associations, or individuals. Any such facility or clinic that does not permit the performance of abortions on its premises shall post notice of that proscription in an area of the facility or clinic that is open to patients and prospective admittees.

(d) This section shall not apply to medical emergency situations and spontaneous abortions.

Any violation of this section is a misdemeanor.

123425. The refusal of any person to submit to an abortion or surgical sterilization or to give consent therefor shall not be grounds for loss of any privileges or immunities to which the person would otherwise be entitled, nor shall submission to an abortion or surgical sterilization or the granting of consent therefor be a condition precedent to the receipt of any public benefits. The decision of any person to submit to an abortion or surgical sterilization or to give consent therefor shall not be grounds for loss of any privileges or immunities to which the person would otherwise be entitled, nor shall the refusal to submit to an abortion or surgical sterilization or to give consent therefor be a condition precedent to the receipt of any public benefits.

123430. The department shall by regulation establish and maintain a system for the reporting of therapeutic abortions so as to determine the demographic effects of abortion and assess the experience in relation to legal and medical standards pertaining to abortion practices. The reporting system shall not require, permit, or include the identification by name or other means of any person undergoing an abortion. The department shall make a report to the Legislature not later than the 30th calendar day each even-numbered year on its findings related to therapeutic abortions and their effects.

The department shall seek, in addition to any other funds made available to it, federal funds in order to carry out the purposes of this article.

123435. The rights to medical treatment of an infant prematurely born alive in the course of an abortion shall be the same as the rights of an infant of similar medical status prematurely born spontaneously.

123440. (a) It is unlawful for any person to use any aborted product of human conception, other than fetal remains, for any type of scientific or laboratory research or for any other kind of experimentation or study, except to protect or preserve the life and health of the fetus. ''Fetal remains,'' as used in this section, means a lifeless product of conception regardless of the duration of pregnancy. A fetus shall not be deemed to be lifeless for the purposes of this section, unless there is an absence of a discernible heartbeat.

(b) In addition to any other criminal or civil liability that may be imposed by law, any violation of this section constitutes unprofessional conduct within the meaning of the Medical Practice Act, Chapter 5 (commencing with Section 2000) of Division 2 of the Business and Professions Code.

123445. (a) Except as provided in subdivision (b), at the conclusion of any scientific or laboratory research or any other kind of experimentation or study upon fetal remains, the fetal remains shall be promptly interred or disposed of by incineration.

Storage of the fetal remains prior to the completion of the research, experimentation, or study shall be in a place not open to the public, and the method of storage shall prevent any deterioration of the fetal remains that would create a health hazard.

(b) Subdivision (a) shall not apply to public or private educational institutions.

Any violation of this section is a misdemeanor.

123450. (a) Except in a medical emergency requiring immediate medical action, no abortion shall be performed upon an unemancipated minor unless she first has given her written consent to the abortion and also has obtained the written consent of one of her parents or legal guardian.

(b) If one or both of an unemancipated, pregnant minor's parents or her guardian refuse to consent to the performance of an abortion, or if the minor elects not to seek the consent of one or both of her parents or her guardian, an unemancipated pregnant minor may file a petition with the juvenile court. If, pursuant to this subdivision, a minor seeks a petition, the court shall assist the minor or person designated by the minor in preparing the petition and notices required pursuant to this section. The petition shall set forth with specificity the minor's reasons for the request. The court shall ensure that the minor's identity is confidential. The minor may file the petition using only her initials or a pseudonym. An unemancipated

pregnant minor may participate in the proceedings in juvenile court on her own behalf, and the court may appoint a guardian ad litem for her. The court shall, however, advise her that she has a right to court-appointed counsel upon request. The hearing shall be set within three days of the filing of the petition. A notice shall be given to the minor of the date, time, and place of the hearing on the petition.

(c) At the hearing on a minor's petition brought pursuant to subdivision (b) for the authorization of an abortion, the court shall consider all evidence duly presented, and order either of the following:

(1) If the court finds that the minor is sufficiently mature and sufficiently informed to make the decision on her own regarding an abortion, and that the minor has, on that basis, consented thereto, the court shall grant the petition.

(2) If the court finds that the minor is not sufficiently mature and sufficiently informed to make the decision on her own regarding an abortion, the court shall then consider whether performance of the abortion would be in the best interest of the minor. In the event that the court finds that the performance of the abortion would be in the minor's best interest, the court shall grant the petition ordering the performance of the abortion without consent of, or notice to, the parents or guardian. In the event that the court finds that the performance of the abortion is not in the best interest of the minor, the court shall deny the petition.

Judgment shall be entered within one court day of submission of the matter.

(d) The minor may appeal the judgment of the juvenile court by filing a written notice of appeal at any time after the entry of the judgment. The Judicial Council shall prescribe, by rule, the practice and procedure on appeal and the time and manner in which any record on appeal shall be prepared and filed. These procedures shall require that the notice of the date, time, and place of hearing, which shall be set within five court days of the filing of notice of appeal, shall be mailed to the parties by the clerk of the court. The appellate court shall ensure that the minor's identity is confidential. The minor may file the petition using only her initials or a pseudonym. Judgment on appeal shall be entered within one court day of submission of the matter.

(e) No fees or costs incurred in connection with the procedures required by this section shall be chargeable to the minor or her parents, or either of them, or to her legal guardian.

(f) It is a misdemeanor, punishable by a fine of not more than one thousand dollars ($1,000), or by imprisonment in the county jail of up to 30 days, or both, for any person to knowingly perform an abortion on an unmarried or unemancipated minor without complying with the requirements of this section.

Article 3. Community-Based Perinatal System

123475. The Legislature finds that a community-based system of comprehensive perinatal care, including prenatal care, delivery service, postpartum care, and neonatal and infant care are necessary services that have been demonstrated effective in preventing or reducing maternal, perinatal, and infant mortality and morbidity.

123480. It is the intent of the Legislature in enacting this article to maintain, to the extent resources are available, a permanent statewide community-based comprehensive perinatal system to provide care and services to low-income pregnant women and their infants who are considered underserved in terms of comprehensive perinatal care.

It is also the intent of the Legislature that the statewide, community-based, comprehensive perinatal health care program be developed by the department to conform with the guidelines set forth in this article, and be integrated and coordinated with the perinatal access program in Article 2.5 (commencing with Section 288).

It is further the intent of the Legislature that these guidelines allow each applicant the flexibility to design a system specific to the nature of the community and the needs of the clients.

It is further the intent of the Legislature that the director, in allocating funds available for programs that provide comprehensive perinatal care, follow the guidelines and principles developed in this article.

123485. The following definitions shall govern the construction of this article:

(a) ''Community-based comprehensive perinatal care'' means a range of prenatal, delivery, postpartum, infant, and pediatric care services delivered in an urban community or neighborhood, rural area, city or county clinic, city or county health department, freestanding birth center, or other health care provider facility by health care practitioners trained in methods of preventing complications and problems during and after pregnancy, and in methods of educating pregnant women of these preventive measures, and who provide a continuous range of services. The health care practitioners shall, through a system of established linkages to other levels of care in the community, consult with, and, when appropriate, refer to, specialists.

(b) ''Low income'' means all persons of childbearing age eligible for Medi-Cal benefits under Chapter 7 (commencing with Section 14000) and all persons eligible for public social services for which federal reimbursement is available, including potential recipients. ''Potential recipients'' shall include the pregnant woman and her infant in a family where current social, economic and health

conditions of the family indicate that the family would likely become a recipient of financial assistance within the next five years.

(c) ''Prenatal care'' means care received from conception until the completion of labor and delivery.

(d) ''Perinatal care'' means care received from the time of conception through the first year after birth.

(e) ''State department'' means the department, unless otherwise designated.

123490. (a) The department shall develop and maintain a statewide comprehensive community-based perinatal services program and enter into contracts, grants, or agreements with health care providers to deliver these services in a coordinated effort to the extent permitted under federal law and regulation. These contracts, grants, or agreements shall be made in medically underserved areas or areas with demonstrated need. Nothing in this section shall be construed to prevent reallocation of resources or use of new moneys for the development of new community-based comprehensive perinatal systems in underserved areas or areas with demonstrated need, and supplementation of systems already in existence.

(b) As a condition of receiving funds from the Maternal and Child Health program, contractors shall bill the Medi-Cal program for services provided to Medi-Cal recipients.

123495. (a) The department shall seek any federal waiver or waivers that may be necessary to maximize funds from the federal government including, but not limited to, funds provided under Title 19 of the Social Security Act to provide funds for a full range of preventive perinatal services.

(b) The department shall, in preparing its budget for submission each year, coordinate all funding sources intended primarily for perinatal care made available through the Budget Act to maximize the delivery of perinatal care services and to avoid duplication of programs and funding.

(c) The department shall develop and implement a uniform sliding fee schedule for women provided perinatal care through the perinatal services program. The fee schedule shall be based on family size and income, but in no case shall the fee exceed the actual cost of the services provided. The department shall not implement any schedule developed pursuant to this section sooner than 30 days after the department has provided the chairperson of the Joint Legislative Budget Committee and the chairperson of the fiscal committee of each house with the developed schedule.

All free clinics, as defined in paragraph (2) of subdivision (a) of Section 1204 shall be exempt from this subdivision.

All organizations funded under the Public Health Service Act, Sections 254b and 254c of Title 42 of the United States Code, shall be permitted to utilize those sliding fee scales mandated by federal law

or regulation in lieu of the sliding fee scale adopted by the department.

123500. The department shall monitor the delivery of services under contracts, grants, and agreements provided for in this article through a uniform health data collection system that utilizes epidemiologic methodology. The department may collect data from providers receiving funds through this program as necessary to evaluate program effectiveness.

123505. The goals of the community-based comprehensive perinatal health care system shall be:

(a) To decrease and maintain the decreased level of perinatal, maternal, and infant mortality and morbidity in the State of California.

(b) To support methods of providing comprehensive prenatal care that prevent prematurity and the incidence of low birth weight infants.

123510. The program objectives of the community-based comprehensive perinatal health care system shall be the following:

(a) To ensure continuing availability and accessibility to early prenatal care within the areas presently served and to develop a community-based comprehensive perinatal system in other areas of the state that are medically underserved or have demonstrated need.

(b) To assure the appropriate level of maternal, newborn and pediatric care services necessary to provide the healthiest outcome for mother and infant.

(c) To ensure postpartum, family planning, and followup care through the first year of life, and referral to an ongoing primary health care provider.

(d) To include support and ancillary services such as nutrition, health education, public health nursing, and social work that have been demonstrated to decrease maternal, perinatal, and infant mortality and morbidity, as components of comprehensive perinatal care.

(e) To ensure that care shall be available regardless of the patient’s financial situation.

(f) To ensure, to the extent possible, that the same quality of care shall be available to all pregnant women.

(g) To promote program flexibility by recognizing the needs within an area and providing for unique programs to meet those needs.

(h) To emphasize preventive health care as a major component of any perinatal program, and to support outreach programs directed at low-income pregnant women that will encourage early entry into, and appropriate utilization of, the perinatal health care system.

123515. In processing and awarding contracts, grants, or agreements pursuant to this article, the department shall evaluate

the ability of applicants to meet, to the maximum extent possible, the following criteria:

(a) The applicant's prior experience in providing community-based, comprehensive perinatal care and services to low-income women and infants.

(b) The applicant's ability to provide comprehensive perinatal care, either directly or through subcontract. Those services comprising comprehensive perinatal care include, but are not limited to, the following:

(1) Initial and ongoing physical assessment.

(2) Psychosocial assessments and counseling, and referral when appropriate.

(3) Nutrition assessments, counseling and referral to counseling on food supplement programs, vitamins, and breast-feeding.

(4) Health educational assessments, and intervention and referral, including childbirth preparation and parenting.

(5) Outreach and community education.

(6) Laboratory, radiology, and other specialized services as indicated.

(7) Delivery, postpartum followup, and pediatric care through the first year of life.

(c) The quality of care that is being, or has been provided to low-income women and infants by health care providers.

(d) Whether the area that is, or that will be, serviced by the applicant is medically underserved or has otherwise demonstrated the need for comprehensive, community-based perinatal services.

(e) The applicant's ability to use an appropriate multidisciplinary staff working as a team, in consultation with obstetricians, pediatricians, and family practitioners when appropriate, to provide a full range of comprehensive perinatal care services. Staffing patterns shall reflect, to the maximum extent feasible, at all levels, the cultural, linguistic, ethnic, and other social characteristics of the community served. This staff shall include at least one of those persons described in paragraphs (1) to (3), inclusive, of this subdivision, as follows, and may include, but not be limited to, a combination of those persons described in paragraphs (4) to (10), inclusive, of this subdivision, as follows:

(1) An obstetrician.

(2) A pediatrician.

(3) A family practice physician.

(4) Certified nurse midwives, public health nurses, nurse practitioners, or physician assistants.

(5) Nutritionists.

(6) Social workers.

(7) Health and childbirth educators.

(8) A family planning counselor.

(9) Community outreach peer workers.

(10) A translator.

123520. (a) In developing a comprehensive system, health care providers funded under this article may perform the following activities to ensure that a full range of program components of a comprehensive, community-based health care system are available, accessible, and utilized by pregnant women and infants:

(1) Coordinate specific linkages with one another.

(2) Subcontract the services specified in this article.

(3) Provide additional services not specifically listed in this article. These additional services shall include, but shall not be limited to the Women, Infants, and Children (WIC) food supplement program, services offered by local health departments, and public and private social welfare agencies. Nothing contained in this article shall be construed to prohibit a subcontractor from being reimbursed pursuant to a fee for service, capitation, or other payment mechanism.

(b) All services and educational materials shall be provided in the primary languages of the clients served, provided that there are at least 5 percent or 100 persons, whichever is less, of the total beneficiary population served annually by each facility, who share language other than English and who are limited-English speaking. ''Limited-English speaking'' means a person who uses a language other than English in order to communicate effectively.

(c) Health care providers applying for a contract, grant, or agreement under this article shall indicate the manner in which their service elements will be coordinated with existing community resources and services and with hospitals of all levels in the area to ensure each client receives the appropriate level or care at the appropriate time. The department may require written agreements between contractors and hospital or hospitals in the area regarding delivery services, and protocols for referral and transfer when special treatment services are required. The department may, when requested by the grantee or contractor, assist in achieving coordination and written agreements pertaining to the delivery of these services.

123525. The provisions contained in this article shall be subject to the normal Budget Act process and shall be operative to the extent funds are appropriated for this purpose.

Article 4. Perinatal Health Care

123550. The Legislature finds and declares that prenatal care, delivery service, postpartum care and neonatal and infant care are essential services necessary to assure maternal and infant health. These services are not currently distributed so as to meet the minimum maternal and infant health needs of many Californians. A regionalized perinatal health system can provide these essential

services; however, many underserved areas lack the staff or expertise to develop these systems.

123555. The department shall develop and implement a uniform sliding fee schedule, based on family size and income, for women provided perinatal care through the Perinatal Care Services Program. The department shall not implement any schedule developed pursuant to this section sooner than 30 days after the department has provided the Chairperson of the Joint Legislative Budget Committee and the chairperson of the fiscal committee of each house with the developed schedule.

123560. Unless the context otherwise requires, the definitions in this section govern the construction of this article:

(a) ''Perinatal health system'' means all of the prenatal care, delivery care, postpartum care, and neonatal and infant care services available to a region identified by the department pursuant to this article.

(b) ''Regionalized perinatal health system'' means coordinated measures intended to ensure that a perinatal health system provides at least minimum services necessary to meet the maternal and infant health needs of the region and intended to ensure that it does so as efficiently and cost-effectively as possible.

(c) ''High-risk pregnant woman'' means a woman considered highly likely for any reason to suffer personal mortality or morbidity from her pregnancy, or to deliver a defective, disabled, high-risk, or stillborn infant.

(d) ''High-risk infant'' means a newborn considered highly likely for any reason to suffer personal mortality or morbidity or to suffer long-lasting defect or disability.

(e) ''High-risk geographic area'' means a region in this state in which the proportion of high-risk pregnant women or high-risk infants exceeds the average for the population of California as a whole.

(f) ''High-risk population'' means a demographic group in which the proportion of high-risk women or high-risk infants exceeds the average for the population of California as a whole.

123565. The department shall maintain a program that addresses the special needs of high-risk pregnant women and infants. The program shall include the following:

(a) Identification of high-risk geographical areas and populations.

(b) Identification and evaluation of deficiencies in perinatal health systems.

(c) Assistance in the development of regionalized perinatal health systems, particularly in underserved areas, to meet unmet needs.

(d) Assistance in implementing regionalized perinatal health systems.

(e) Collection and analyses of data on perinatal health systems and needs.

(f) Monitoring of results.

(g) Assist in implementing and maintaining a high-risk infant follow-up program.

123570. (a) In assisting in the development of the regionalized perinatal health systems, the department shall consult with the office, the State Department of Developmental Services, county health officials, health systems agencies, health professionals and health facilities expected to participate in the systems, and community groups.

(b) In carrying out this article, the department shall coordinate the regionalized perinatal health systems with all other maternal and infant health programs conducted by or for the department, the office, the State Department of Developmental Services, and all other state agencies, to ensure full regional coordination.

123575. It is the intent of the Legislature that the program created by Sections 123550 to 123570, inclusive, be funded through the normal budgetary process beginning in the 1980–81 fiscal year.

123600. By July 1, 1991, the Health and Welfare Agency shall develop and disseminate a model needs assessment protocol for pregnant and postpartum substance abusing women in conjunction with the appropriate professional organizations in the areas of hospital administration, substance abuse prevention and treatment, social services, public health, and appropriate state agencies, including the State Department of Social Services, the department, the State Department of Developmental Services, and the State Department of Alcohol and Drug Programs. This model may be utilized by hospitals and counties pursuant to Section 123605.

123605. (a) Each county shall establish protocols between county health departments, county welfare departments, and all public and private hospitals in the county, regarding the application and use of an assessment of the needs of, and a referral for, a substance exposed infant to a county welfare department pursuant to Section 11165.13 of the Penal Code.

(b) The assessment of the needs shall be performed by a health practitioner, as defined in Section 11165.8 of the Penal Code, or a medical social worker. The needs assessment shall be performed before the infant is released from the hospital.

(c) The purpose of the assessment of the needs is to do all of the following:

(1) Identify needed services for the mother, child, or family, including, where applicable, services to assist the mother caring for her child and services to assist maintaining children in their homes.

(2) Determine the level of risk to the newborn upon release to the home and the corresponding level of services and intervention, if any, necessary to protect the newborn’s health and safety, including a referral to the county welfare department for child welfare services.

(3) Gather data for information and planning purposes.

123610. It is the intent of the Legislature that funding for Sections 123600 and 123605 be provided in the annual Budget Act.

Article 5. Perinatal Care Guidance (Reserved)

CHAPTER 3. CHILD HEALTH

Article 1. Infant Mortality and Morbidity Prevention

123650. (a) The department shall develop a plan to identify causes of infant mortality and morbidity in California and to study recommendations on the reduction of infant mortality and morbidity in California.

(b) The study plan shall be completed on or before July 1, 1988, and shall be developed in conjunction with, and reviewed by, each of the following organizations:

(1) The California Medical Association.
(2) The California Nurses Association.
(3) The California Hospital Association.
(4) The American College of Obstetrics and Gynecologists.
(5) The American College of Nurse Midwives.
(6) The California Academy of Family Physicians.
(7) The American Academy of Pediatrics.
(8) The California Association of Freestanding Birth Centers.
(9) The American Public Health Association.
(10) The Medical Board of California.
(11) The Board of Registered Nurses.
(12) The Department of Consumer Affairs.
(13) The office.
(14) The California Association of Midwives.

123655. The study plan shall incorporate in its design the findings of MCH Title V Research Contract DHS 8689088, the ''Maternal Neonatal and Fetal Mortality Study.''

The department shall issue a report to the Legislature on or before July 1, 1989, concerning causal factors in infant mortality and morbidity.

Article 2. Black Infant Health (Reserved)

Article 3. Sudden Infant Death Syndrome

123725. (a) For purposes of this section, the following definitions shall apply:

(1) ''SIDS'' means sudden infant death syndrome.

(2) ‘‘SIDS Advisory Council’’ or ‘‘advisory council’’ means the Sudden Infant Death Syndrome Advisory Council established pursuant to subdivision (b).

(b) The department shall establish a Sudden Infant Death Syndrome Advisory Council. The advisory council shall consist of nine members who shall be chosen by the director in consultation with regional SIDS parent advisory councils. At least one-third of the members of the advisory council chosen by the director shall be representatives of SIDS parents’ groups. The membership of the advisory council shall also include, but not be limited to, a coroner, a medical examiner, a public health nurse, a physician and surgeon with expertise in SIDS, and a representative from a police or fire department.

(c) The SIDS Advisory Council shall do all of the following:

(1) Provide guidance to the state department in the development of training, educational, and research programs regarding SIDS.

(2) Provide ongoing guidance to the Governor and the Legislature regarding the need for specific programs regarding SIDS for specific targeted groups of persons.

(3) In conjunction with the state department or a person with whom the state department contracts to provide SIDS education, convene a statewide conference annually to examine the progress in discovering the cause of SIDS, explore the progress of newly established programs and services related to SIDS, identify future needs for legislation and program development regarding SIDS, and make recommendations on the needs of programs regarding SIDS. Conference participants shall include professionals and service providers in the area of SIDS, family members of SIDS victims, and the staff of members of the Legislature and departments of the state.

(d) The members of the advisory council shall serve at the pleasure of the director. The members of the advisory council shall serve without compensation, but shall be reimbursed for necessary and travel expenses incurred in the performance of the duties of the advisory council.

(e) The requirements contained in this section shall be subject to the annual Budget Act and shall be operative only to the extent that funds are appropriated for the purposes of this section.

123730. The department shall keep each county health officer advised of the most current knowledge relating to the nature and causes of sudden infant death syndrome.

123735. (a) As used in this section, ‘‘SIDS’’ means sudden infant death syndrome.

(b) The department shall contract with a person to provide regular and ongoing SIDS education and training programs for those who interact with parents and caregivers following a death from SIDS, including, but not limited to, the following:

(1) County public health nurses.

(2) Coroners and coroners' investigators.
(3) Forensic pathologists.
(4) Emergency room physicians and surgeons, nurses, and other staff.
(5) Licensed day care providers.
(6) SIDS parent groups.
(7) Medical examiners.

(c) The department shall contract with a person to produce, update, and distribute literature on SIDS for specific target populations of persons who interact with parents and caregivers following a death from SIDS, including, but not limited to, the following:
(1) Clergy.
(2) Fire and police departments.
(3) Emergency medical service staff.
(4) Morticians.
(5) Funeral directors.
(6) SIDS parent groups.

(d) The requirements of this section shall be subject to the annual Budget Act and shall be operative only to the extent funds are appropriated for the purposes of this section.

123740. (a) For purposes of this section the following definitions shall apply:

(1) ''Appropriately trained public health professional'' means a public health nurse or a social worker who is knowledgeable about the incidence of sudden infant death syndrome and the care and support of persons who have experienced a death of this nature, and who has basic grief counseling skills.

(2) ''Contact'' is a face-to-face visit, a group visit, or a telephone call that provides one or more of the following services:
(A) An assessment of the family, child care provider, or both.
(B) Crisis intervention and counseling.
(C) A referral to a community service.
(D) A followup assessment of the family's, the child care provider's, or both family's and child care provider's progress.

(3) ''Immediately'' means within three working days of receiving notice from the coroner or other reporting agent of a death presumedly caused by sudden infant death syndrome.

(4) ''Local health officer'' means a health officer for a city, county, or city and county.

(b) Upon being informed by the coroner pursuant to Section 102865 of any case in which sudden infant death syndrome is the presumed cause of death, the local health officer or his or her designated agent, who is an appropriately trained public health professional, after consultation with the infant's physician of record, when possible, shall immediately contact the person or persons who had custody and control of the infant, including foster parents, when

applicable, for the purposes of providing to that person information, support, referral, and followup services relating to sudden infant death syndrome. If the infant was in child care, the local health officer or his or her designated agent who is an appropriately trained public health professional also shall immediately contact the child care provider.

(c) The local health officer shall perform the duties required by this section throughout the jurisdiction of that local health officer.

123745. The department shall monitor, or contract with a person to monitor, whether the county health officer or his or her designated agent is performing the duties required by Section 123740 and whether they are being performed within the timeframes specified in Section 123740.

Article 4. Infant Medical Dispatch Centers

123750. The Legislature finds that intensive care nurseries for at-risk infants are often at capacity. It further finds that serious delays can occur in placing critically ill newborn infants in intensive care nurseries due to calls being placed to many hospitals. Additionally, valuable staff time is often taken by a capacity nursery in attempting to find another nursery with an available bed. It is further found that, due to the lack of a centralized dispatch system, at-risk infants are often not placed in the intensive care nursery nearest their homes.

Therefore, the Legislature finds that in order to protect the health of critically ill newborn children and to more efficiently utilize space and staff in intensive care nurseries it is necessary to establish 24-hour-a-day, year-round medical dispatch centers linking all hospitals providing obstetrical services with intensive care nurseries.

123753. The department shall establish two dispatch centers, each to be located at a hospital containing an intensive care nursery that has been approved by the department.

123755. One of the centers established pursuant to Section 123750 shall be located to serve the region of the state north of the Tehachapi Mountains, and one of the centers shall be located to serve the region south of the Tehachapi Mountains.

123760. The centers shall locate bedspace for critically ill newborn infants nearest their homes, locate and dispatch transport for the infants and for appropriate medical personnel, advise the obstetrical nursery regarding maintenance care of the infant until transport is effected, and keep a daily record of the availability of bedspace in all intensive care nurseries.

Nothing in this article shall obligate the state for transport costs other than those already authorized by law.

123765. Funds appropriated to carry out the purposes of this article shall be used for leasing or purchasing communication

equipment or time; and for hiring, training, or contracting for personnel and administration of the centers.

123770. Public and private nonprofit health facilities, organizations, and educational institutions are eligible to receive center funds under this article.

123775. Each infant medical dispatch center established pursuant to this article shall annually report on the progress of the project, the status of the data base obtained pursuant to Section 123760, and any necessary changes to meet the goals prescribed in Section 123760 to the Legislature on or before November 1 of each year.

Article 5. California Children's Services

123800. This article shall be known and may be cited as the Robert W. Crown California Children's Services Act.

123805. The department shall establish and administer a program of services for physically defective or handicapped persons under the age of 21 years, in cooperation with the federal government through its appropriate agency or instrumentality, for the purpose of developing, extending and improving the services. The department shall receive all funds made available to it by the federal government, the state, its political subdivisions or from other sources. The department shall have power to supervise those services included in the state plan that are not directly administered by the state. The department shall cooperate with the medical, health, nursing and welfare groups and organizations concerned with the program, and any agency of the state charged with the administration of laws providing for vocational rehabilitation of physically handicapped children.

The reference to ''the age of 21 years'' in this section is unaffected by Section 1 of Chapter 1748 of the Statutes of 1971 or any other provision of that chapter.

123810. The department succeeds to and is vested with the duties, purposes, responsibilities, and jurisdiction heretofore exercised by the State Department of Benefit Payments with respect to moneys, funds, and appropriations available to the department for the purposes of processing, audit, and payment of claims received for the purposes of this article.

123815. The department shall have possession and control of all records, papers, equipment, and supplies held for the benefit or use of the Director of Benefit Payments in the performance of his duties, powers, purposes, responsibilities, and jurisdiction that are vested in the department by Section 123810.

123820. All officers and employees of the Director of Benefit Payments who on July 1, 1978, are serving in the state civil service, other than as temporary employees, and engaged in the performance of a function vested in the department by Section 123810 shall be

transferred to the department. The status, positions, and rights of these persons shall not be affected by the transfer and shall be retained by them as officers and employees of the department pursuant to the State Civil Service Act, except as to positions exempt from civil service.

123822. All claims for services provided under this article shall be submitted to the state fiscal intermediary for payment no later than January 1, 1999. The State Department of Health Services shall work in cooperation with the counties to develop a timeline for implementing the centralized billing system. If a department review of those counties participating in the centralized billing system demonstrates that as of January 1, 2000, any county has incurred increased costs as a result of submitting claims for services to the state fiscal intermediary, that county may be exempt from this section.

123825. It is the intent of the Legislature through this article to provide, to the extent practicable, for the necessary medical services required by physically handicapped children whose parents are unable to pay for these services, wholly or in part. This article shall also include the necessary services rendered by the program to physically handicapped children treated in public schools that provide services for physically handicapped children.

123830. ''Handicapped child,'' as used in this article, means a physically defective or handicapped person under the age of 21 years who is in need of services. The director shall establish those conditions coming within a definition of ''handicapped child'' except as the Legislature may otherwise include in the definition. Phenylketonuria, hyaline membrane disease, cystic fibrosis, and hemophilia shall be among these conditions.

The reference to ''the age of 21 years'' in this section is unaffected by Section 1 of Chapter 1748 of the Statutes of 1971 or any other provision of that chapter.

123835. The department shall keep the program abreast of advances in medical science, leading to the inclusion of other handicapping conditions and services within the limits of and consistent with the most beneficial use of funds appropriated for this purpose. With the approval of the agency administrator the department may carry out pilot studies to determine the need for, or the feasibility of, including other handicapping conditions and services in the program within the limits of available funds appropriated for the program.

123840. ''Services,'' as used in this article, means any or all of the following:

(a) Expert diagnosis.
(b) Medical treatment.
(c) Surgical treatment.
(d) Hospital care.
(e) Physical therapy.

(f) Occupational therapy.
(g) Special treatment.
(h) Materials.
(i) Appliances and their upkeep, maintenance, care and transportation.
(j) Maintenance, transportation, or care incidental to any other form of ''services.''

123845. ''California Children's Services Program,'' as used in this article, means the program of services established and operated pursuant to this article.

123850. The board of supervisors of each county shall designate the county department of public health or the county department of social welfare as the designated agency to administer the California Children's Services Program. Counties with total population under 200,000 persons may administer the county program independently or jointly with the department. Counties with a total population in excess of 200,000 persons shall administer the county program independently. Except as otherwise provided in this article, the director shall establish standards relating to the local administration and minimum services to be offered by counties in the conduct of the California Children's Services Program.

123855. The department or designated county agency shall cooperate with, or arrange through, local public or private agencies and providers of medical care to seek out handicapped children, bringing them expert diagnosis near their homes. Case finding shall include, but not be limited to, children with impaired sense of hearing. This section does not give the department or designated agency power to require medical or other form of physical examination without consent of parent or guardian.

123860. In accordance with applicable regulations of the United States Children's Bureau, the department and designated county agencies shall provide a diagnosis for handicapped children. Within the limits of available funds, the department and designated local agencies may accept for diagnosis a handicapped child believed to have a severe chronic disease or severe physical handicap, as determined by the director, irrespective of whether the child actually has an eligible medical condition specified in Section 123830. The department shall cause a record to be kept listing all conditions diagnosed by the program and shall publish the information annually, including data on the number and kinds of diagnosed medical conditions that do not come within the definition of ''handicapped child'' as specified in Section 123830.

123865. Whenever the parents or estate of a handicapped child is wholly or partly unable to furnish for the child necessary services, the parents or guardian may apply to the agency of the county that has been designated by the board of supervisors of the county of residence under the terms of Section 123850 to administer the

provisions for handicapped children. Residence shall be determined in accordance with Sections 243 and 244 of the Government Code.

123870. (a) The department shall establish uniform standards of financial eligibility for treatment services under the California Children's Services Program. Financial eligibility for treatment services under this program shall be limited to persons in families with an adjusted gross income of forty thousand dollars ($40,000) or less in the most recent tax year, as calculated for California state income tax purposes. However, the director may authorize treatment services for persons in families with higher incomes if the estimated cost of care to the family in one year is expected to exceed 20 percent of the family's adjusted gross income.

(b) Necessary medical therapy treatment services under the California Children's Services Program rendered in the public schools shall be exempt from financial eligibility standards and enrollment fee requirements for the services when rendered to any handicapped child whose educational or physical development would be impeded without the services.

(c) All counties shall use the uniform standards for financial eligibility and enrollment fees established by the department. All enrollment fees shall be used in support of the California Children's Services Program.

(d) Annually, every family with a child eligible to receive services under this article shall pay a fee of twenty dollars ($20), that shall be in addition to any other program fees for which the family is liable. This assessment shall not apply to any child who is eligible for full scope Medi-Cal benefits without a share of cost, for children receiving therapy through the California Children's Services Program as a related service in their individualized education plans, or for children from families having incomes of less than 100 percent of the federal poverty level.

123872. In addition to the other eligibility requirements set forth in this article, prior to being determined financially eligible for services under this article, the applicant family shall agree to repay the California Children's Services Program for any treatment services authorized by the program in an amount not to exceed the proceeds of any judgment, award, or settlement for damages as a result of a lawsuit or pursuant to an agreement relating to a California Children's Services medically eligible condition.

123875. When the California Children's Service medical therapy unit conference team, based on a medical referral recommending medically necessary occupational or physical therapy in accordance with subdivision (b) of Section 7575 of the Government Code, finds that a handicapped child, as defined in Section 123830, needs medically necessary occupational or physical therapy, that child shall be determined to be eligible for therapy services. If the California Children's Services medical consultant disagrees with the

determination of eligibility by the California Children's Services medical therapy unit conference team, the medical consultant shall communicate with the conference team to ask for further justification of its determination, and shall weigh the conference team's arguments in support of its decision in reaching his or her own determination.

This section shall not change eligibility criteria for the California Children's Services programs as described in Sections 123830 and 123860.

This section shall not apply to children diagnosed as specific learning disabled, unless they otherwise meet the eligibility criteria of the California Children's Services.

123880. The department and designated agencies shall not deny eligibility or aid under the California Children's Services Program because an otherwise eligible person is receiving treatment services under a teaching program at an accredited medical school facility or accredited school or college of podiatric medicine, whether or not all or part of the treatment services are performed by the staff at the facility, school, or college, provided that treatment services at the facility, school, or college are under the general supervision of a California Children's Services Program panel physician and surgeon, including a family physician, and podiatrist.

123885. Panel members as set forth in Section 123880 shall be board-certified and have expertise in the care of children.

123890. (a) The state department shall not deny a hospital's request to provide treatment to burn victims who are eligible under the California Children's Services Program solely on the basis that the hospital does not have separate facilities for child and adult burn victims, provided that the hospital has approval from the department to operate a burn center pursuant to Section 1255.

(b) Subdivision (a) shall only be applied to burn units located in hospitals where there are no regional burn centers, or any other existing burn center, within an 85-mile radius of the hospital.

(c) Subdivision (a) shall only apply if the hospital seeking the exemption had a state-approved burn center in operation as of January 1, 1982, and if there is no hospital specializing in children's services within an 85-mile radius of the hospital seeking the subdivision (a) exemption.

(d) Hospitals having qualified and received a subdivision (a) exemption, shall demonstrate, at the request of the department, that the nursing staff providing burn care to children victims have satisfactorily completed post-graduate training in pediatrics.

123895. The designated agency shall determine the financial eligibility of the family according to standards established by the department. The agency will also determine if the parents are residents of the county, if the guardian of the child is a resident of the county, or if the emancipated minor is a resident of the county where

application for services is made. If the agency finds that the family, guardian, or emancipated minor is a resident of the county and financially eligible for services, it shall make a record of the facts and shall certify this child for care under the program.

123900. (a) Beginning September 1, 1991, in addition to any other standards of eligibility pursuant to this article, each family with a child otherwise eligible to receive services under this article shall pay an annual enrollment fee as a requirement for eligibility for services, except as specified in subdivision (f).

(b) The department shall determine the annual enrollment fee, that shall be a sliding fee scale based upon family size and income, and shall be adjusted by the department to reflect changes in the federal poverty level.

(c) ''Family size'' shall include the child, his or her natural or adoptive parents, siblings, and other family members who live together and whose expenses are dependent upon the family income.

(d) ''Family income'' for purposes of this article, shall include the total gross income, or their equivalents, of the child and his or her natural or adoptive parents.

(e) Payment of the enrollment fee is a condition of program participation. The enrollment fee is independent of any other financial obligation to the program.

(f) The enrollment fee shall not be charged in any of the following cases:

(1) The only services required are for diagnosis to determine eligibility for services, or are for medically necessary therapy pursuant to Section 123875.

(2) The child is otherwise eligible to receive services and is eligible for full Medi-Cal benefits at the time of application or reapplication.

(3) The family of the child otherwise eligible to receive services under this article has a gross annual income of less than 200 percent of the federal poverty level.

(g) Failure to pay or to arrange for payment of the enrollment fee within 60 days of the due date shall result in disenrollment and ineligibility for coverage of treatment services 60 days after the due date of the required payment.

(h) The county shall apply the enrollment fee scale established by the department and shall collect the enrollment fee. The county may arrange with the family for periodic payment during the year if a lump-sum payment will be a hardship for the family. The agency director of California Children's Services may, on a case-by-case basis, waive or reduce the amount of a family's enrollment fee if, in the director's judgment, payment of the fee will result in undue hardship.

(i) By thirty days after the effective date of this section or August 1, 1991, whichever is later, the department shall advance to each county, as a one-time startup amount, five dollars and fifty cents

($5.50) for each county child who was receiving services under this article on June 30, 1990, and who was not a Medi-Cal beneficiary. This one-time payment shall be in addition to the 4.1 percent of the gross total expenditures for diagnoses, treatment, and therapy by counties allowed under subdivision (c) of Section 123955.

(j) Each county shall submit to the state, as part of its quarterly claim for reimbursement, an accounting of all revenues due and revenues collected as enrollment fees.

123905. A county of under 200,000 population, administering its county program jointly with the department, shall forward to the department a statement certifying the family of the handicapped child as financially eligible for treatment services. The department shall authorize necessary services within the limits of available funds. Payment for services shall be made by the department, with reimbursement from the county for its proportionate share as specified in this article.

123910. The department may, without the possession of a county certification, pay the expenses for services required by any physically handicapped child out of any funds received by it through gift, devise, or bequest or from private, state, federal, or other grant or source.

The department may authorize or contract with any person or institution properly qualified to furnish services to handicapped children. It may pay for services out of any funds appropriated for the purpose or from funds it may receive by gift, devise, or bequest.

The department may receive gifts, legacies, and bequests and expend them for the purpose of this article, but not for administrative expense.

123915. When the department provides, or arranges for the provision of, services to physically handicapped children directly, as in the case of nonresident physically handicapped children, it shall enter into an agreement with parents, guardians or persons responsible for the care of handicapped children for payment of the enrollment fee.

123920. Upon the request of another state or of a federal agency, the department may pay the expenses of services required by any physically handicapped child who is not a resident of the state; provided, that the cost of the services is fully covered by special grants or allotments received from the state or federal agency for that purpose.

123925. The department and designated agencies shall maintain surveillance and supervision over the services provided handicapped children under authorization by the program to assure a high quality of service and shall cause a record to be kept showing the condition and improvement of these handicapped children.

123930. This article does not authorize any treatment service without the written consent of a parent or guardian except as a person under 18 years of age is an emancipated minor.

123935. A handicapped child shall not be denied services pursuant to this article because he or she is mentally retarded.

123940. (a) (1) Annually, the board of supervisors shall appropriate a sum of money for services for handicapped children of the county, including diagnosis, treatment, and therapy services for physically handicapped children in public schools, equal to 25 percent of the actual expenditures for the county program under this article for the 1990–91 fiscal year, except as specified in paragraph (2).

(2) If the state certifies that a smaller amount is needed in order for the county to pay 25 percent of costs of the county's program from this source. The smaller amount certified by the state shall be the amount that the county shall appropriate.

(b) In addition to the amount required by subdivision (a), the county shall allocate an amount equal to the amount determined pursuant to subdivision (a) for purposes of this article from revenues allocated to the county pursuant to Chapter 6 (commencing with Section 17600) of Division 9 of the Welfare and Institutions Code.

(c) The state shall match county expenditures for this article from funding provided pursuant to subdivisions (a) and (b).

(d) The county may appropriate and expend moneys in addition to those set forth in subdivision (a) and (b) and the state shall match the expenditures, on a dollar-for-dollar basis, to the extent that state funds are available for this article.

(e) Nothing in this section shall require the county to expend more than the amount set forth in subdivision (a) plus the amount set forth in subdivision (b) nor shall it require the state to expend more than the amount of the match set forth in subdivision (c).

123945. For those counties with a total appropriation of county funds not exceeding one hundred twenty-five thousand dollars ($125,000), and upon the expenditure of the county funds equivalent to a county appropriation pursuant to Section 123940, the department may, to the extent funds are available from state appropriated funds for the California Children's Services Program and upon certification of the county that there are insufficient revenues from the account established pursuant to Chapter 6 (commencing with Section 17600) of Division 9 of the Welfare and Institutions Code, pay for services for cases deemed by the department to represent emergencies or cases where medical care cannot be delayed without great harm to the child.

123950. The designated county agency shall administer the medical-therapy program in local public schools for physically handicapped children. As provided in Section 123940, the state and counties will share in the cost of support of therapist salaries in these

schools in the ratio of one dollar ($1) of state or federal funds reimbursed quarterly to one dollar ($1) of county funds. The director shall establish standards for the maximum number of therapists employed in the schools eligible for state financial support in this program, the services to be provided, and the county administrative services subject to reimbursement by the state.

The department may adopt regulations to implement this section as emergency regulations in accordance with Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code. For the purposes of the Administrative Procedure Act, the adoption of the regulations shall be deemed an emergency and necessary for the immediate preservation of the public peace, health, safety, and general welfare. Notwithstanding Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code, these emergency regulations shall not be subject to the review and approval of the Office of Administrative Law.

Notwithstanding any other provision of law, if the department determines that emergency regulations are necessary to implement any part of this article, there shall be deemed to be good cause for the regulations to take effect prior to public notice and hearing.

Notwithstanding subdivision (h) of Section 11346.1 and Section 11349.6 of the Government Code, the department shall transmit these regulations directly to the Secretary of State for filing. The regulations shall become effective immediately upon filing by the Secretary of State.

The Office of Administrative Law shall provide for the printing and publication of these regulations in the California Code of Regulations. Notwithstanding Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code, these regulations shall not be repealed by the Office of Administrative Law and shall remain in effect until revised or repealed by the department.

123955. (a) The state and the counties shall share in the cost of administration of the California Children's Services Program at the local level.

(b) (1) The director shall adopt regulations establishing minimum standards for the administration, staffing, and local implementation of this article subject to reimbursement by the state.

(2) The standards shall allow necessary flexibility in the administration of county programs, taking into account the variability of county needs and resources, and shall be developed and revised jointly with state and county representatives.

(c) The director shall establish minimum standards for administration, staffing and local operation of the program subject to reimbursement by the state.

(d) Until July 1, 1992, reimbursable administrative costs, to be paid by the state to counties, shall not exceed 4.1 percent of the gross total expenditures for diagnosis, treatment and therapy by counties as specified in Section 123940.

(e) Beginning July 1, 1992, this subdivision shall apply with respect to all of the following:

(1) Counties shall be reimbursed by the state for 50 percent of the amount required to meet state administrative standards for that portion of the county caseload under this article that is ineligible for Medi-Cal to the extent funds are available in the state budget for the California Children's Services Program.

(2) On or before September 15 of each year, each county program implementing this article shall submit an application for the subsequent fiscal year that provides information as required by the state to determine if the county administrative staff and budget meet state standards.

(3) The state shall determine the maximum amount of state funds available for each county from state funds appropriated for CCS county administration. If the amount appropriated for any fiscal year in the Budget Act for county administration under this article differs from the amounts approved by the department, each county shall submit a revised application in a form and at the time specified by the department.

(f) The department and counties shall maximize the use of federal funds for administration, of the programs implemented pursuant to this article, including using state and county funds to match funds claimable under Title 19 of the Social Security Act.

123960. The department shall require of participating local governments the provision of program data including, but not limited to, the number of children treated, the kinds of disabilities, and the costs of treatment, to enable the department, the Department of Finance, and the Legislature to evaluate in a timely fashion and to adequately fund the California Children's Services Program.

123965. A handicapped child placed for adoption, determined to be financially eligible for care at the time of placement, shall not be denied services pursuant to this article based upon the income of the adopting parents, nor shall the adopting parents be required to enter into any agreement to pay toward the costs of services authorized for the care. This section shall only apply to physical handicaps present, and diagnosed, at the time of adoption. Residence, for the purposes of this section, shall be that of the adopting parents.

123970. The department and the placing adoption agency at the time of placement shall notify all prospective adopting parents in writing, that funds received under the California Children's Services Program shall terminate if the adopting parents move out of the state. However, the department and the placing adoption agency shall

advise the prospective adopting parents that they may be eligible for the funds in the new state, subject to any applicable qualifications.

123975. (a) The department, in consultation with selected representatives of participating neonatal intensive care units, shall establish a system to screen newborn infants at high risk for deafness and create and maintain a system of followup and assessment for infants identified by the screening in neonatal intensive care units participating in the California Children's Services Program.

This section shall not be applicable to a newborn child whose parent or guardian objects to the tests on the ground that the tests conflict with his or her religious beliefs or practices.

(b) It is the intent of the Legislature, in enacting this section, to ensure the establishment and maintenance of protocols and quality of standards.

(c) The department shall implement this section for infants in neonatal intensive care units participating in the California Children's Services Program.

123980. If the recipient of services provided by the California Children's Services Program, his or her guardian, conservator, personal representative, estate, or survivors, or any of them brings an action against a third person who may be liable for the injury, notice of institution of legal proceedings, notice of settlement, and all other notices required by this code shall be given to the State Director of Health Services in Sacramento and to the county-managed California Children's Services Program. The director may provide notice to the Attorney General. All of these notices shall be given by the attorney retained to assert the beneficiary's claim, or by the injured party beneficiary, his or her guardian, conservator, personal representative, estate, or survivors, if no attorney is retained.

123982. Except as otherwise provided by law, the amount of any judgment, award, or settlement relating to a medical condition for which treatment services have been provided under the California Children's Services Program shall be subject to a claim by the state department and the designated county agency for reimbursement of the costs of the benefits provided, and to any lien filed against that judgment, award, or settlement. The department or the county designated agency, through its civil legal adviser, may, to enforce this right, institute and prosecute legal proceedings against the person who has received benefits under this article, his or her guardian, conservator, or other personal representative, or his or her estate. In the event of a judgment, award, or settlement in a suit or claim against a third person who is liable for the medical condition for which treatment services have been provided under the California Children's Services Program, the court or other agency shall first order paid from the judgment, award, or settlement the actual costs of the care and treatment furnished, or to be furnished, under the California Children's Services Program.

123985. (a) A bone marrow transplant for the treatment of cancer shall be reimbursable under this article, when all of the following conditions are met:

(1) The bone marrow transplant is recommended by the recipient's attending physician.

(2) The bone marrow transplant is performed in a hospital that is approved for participation in the California Children's Services program.

(3) The bone marrow transplant is a reasonable course of treatment and is approved by the appropriate hospital medical policy committee.

(4) The bone marrow transplant has been deemed appropriate for the recipient by the program's medical consultant. The medical consultant shall not disapprove the bone marrow transplant solely on the basis that it is classified as experimental or investigational.

(b) The program shall provide reimbursement for both donor and recipient surgery.

(c) Any county that has a population of not more than 600,000, as determined by the most recent decennial census conducted by the United States Bureau of the Census, shall be exempt from complying with the 25-percent matching requirement provided for under this article, for any bone marrow transplant reimbursable under this section.

123990. The department shall adopt regulations to implement the amendments of this article in 1991. The adoption of the regulations shall be deemed to be an emergency, and necessary for the immediate preservation of the public peace, health, safety, and general welfare.

123995. (a) The department shall require all applicants to the program who may be eligible for cash grant assistance or for Medi-Cal benefits to apply for Medi-Cal.

(b) This section shall not be interpreted to prohibit the coverage of services in emergency cases.

Article 6. Child Health And Disability Prevention Program

124025. The Legislature finds and declares that many physical and mental disabilities can be prevented, or their impact on an individual lessened, when they are identified and treated before they become chronic and irreversible damage occurs. The Legislature finds and declares that a community-based program of early identification and referral for treatment of potential handicapping conditions will be effective in reducing the incidence of the conditions and will benefit the health and welfare of the citizens of this state.

It is the intent of the Legislature in enacting this article and Section 120475 to establish child health and disability prevention programs,

that shall be financed and have standards established at the state level and that shall be operated at the local level, for the purpose of providing early and periodic assessments of the health status of children. It is further intended that child health and disability prevention programs shall make maximum use of existing health care resources and shall utilize, as the first source of screening, the child's usual source of health care so that health screening programs are fully integrated with existing health services, that health care professionals be appropriately represented and utilized in these programs, that outreach programs be developed to stimulate the use of preventive health services, and that services offered pursuant to this article be efficiently provided and be of the highest quality.

124030. As used in this article and Section 120475:

(a) ''State board'' means the State Maternal, Child, and Adolescent Health Board.

(b) ''Department'' means the department.

(c) ''Director'' means the director.

(d) ''Governing body'' means the county board of supervisors or boards of supervisors in the case of counties acting jointly.

(e) ''Local board'' means local maternal, child, and adolescent health board.

(f) ''Local health jurisdiction'' means county health department or combined health department in the case of counties acting jointly or city health department within the meaning of Section 101185.

124035. The department shall administer this article and Section 120475 and shall adopt minimum standards for the approval of community child health and disability prevention programs and regulations as necessary. The standards shall allow necessary flexibility in the administration of county programs, taking into account the variability of county needs and resources. However, the standards, rules, and regulations may be adopted only with the advice and written recommendations of the board. Standards shall be adopted for:

(a) Education and experience requirements for directors of community child health and disability prevention programs.

(b) Health screening, evaluation, and diagnostic procedures for child health and disability prevention programs.

(c) Public and private facilities and providers that may participate in community child health and disability prevention programs.

The department shall adopt a five-year state plan for child health and disability prevention services by October 1, 1977. The plan shall include a method for allocating child health and disability prevention funds to counties. The plan shall be reviewed and revised as necessary to provide a basis for allocating state child health and disability prevention program funds throughout the state.

Nothing in this section shall be construed as prohibiting programs provided pursuant to this article from being conducted in public and

private school facilities; provided that, with respect to private school facilities, no services provided thereon pursuant to this article and financed by public funds shall result in any material benefit to, or be conducted in a manner that furthers any educational or other mission of, such a school or any person or entity maintaining the school.

124040. The governing body of each county or counties shall establish a community child health and disability prevention program for the purpose of providing early and periodic assessments of the health status of children in the county or counties by July 1, 1974. However, this shall be the responsibility of the department for all counties that contract with the state for health services. Contract counties, at the option of the board of supervisors, may provide services pursuant to this article in the same manner as other county programs, provided the option is exercised prior to the beginning of each fiscal year. Each plan shall include, but is not limited to, the following requirements:

(a) Outreach and educational services.

(b) Agreements with public and private facilities and practitioners to carry out the programs.

(c) Health screening and evaluation services including, for all children eligible for Medi-Cal, a physical examination, immunizations appropriate for their age and health history, and laboratory procedures appropriate for their age and population group.

(d) Referral for diagnosis or treatment when needed, including, for all children eligible for Medi-Cal, referral for treatment by a provider participating in the Medi-Cal program of the conditions detected, and methods for assuring referral is carried out.

(e) Recordkeeping and program evaluations.

The health screening and evaluation part of each community child health and disability prevention program plan shall include, but is not limited to, the following for each child:

(a) A health and development history.

(b) An assessment of physical growth.

(c) An examination for obvious physical defects.

(d) Ear, nose, mouth, and throat inspection, including inspection of teeth and gums, and for all children three years of age and older who are eligible for Medi-Cal, referral to a dentist participating in the Medi-Cal program.

(e) Screening tests for vision, hearing, anemia, tuberculosis, diabetes, and urinary tract conditions.

(f) An assessment of nutritional status.

(g) An assessment of immunization status.

(h) Where appropriate, testing for sickle cell trait, lead poisoning, and other tests that may be necessary to the identification of children with potential disabilities requiring diagnosis and possibly treatment.

(i) For all children eligible for Medi-Cal, necessary assistance with scheduling appointments for services and with transportation.

(j) The department shall report to the Legislature, by April 15, 1986, on all necessary steps to improve access to preventive dental care for children eligible for Medi-Cal, such as streamlining reimbursement procedures, increasing fees for specific preventive dental procedures, or increasing fees in specific geographic areas.

(k) Dentists receiving referrals of children eligible for Medi-Cal under this section shall employ procedures to advise the child's parent or parents of the need for and scheduling of annual appointments.

Standards for procedures to carry out health screening and evaluation services and to establish the age at which particular tests should be carried out shall be established by the director, with review and recommendation by the board. However, a governing body may include additional health screening and evaluation procedures in its program if approved by the director and the board.

Each community child health and disability prevention program shall, pursuant to standards set by the director, establish a record system that contains a health case history for each child so that costly and unnecessary repetition of screening, immunization and referral will not occur and appropriate health treatment will be facilitated as specified in Section 124085.

124045. A city that operates an independent health agency may elect to provide the services described in this article with the approval of the department. In this instance, the powers granted a governing body of a county shall be vested in the governing body of the city.

124050. Each community child health and disability program shall have a director meeting qualification standards by the department, appointed by the governing body, except for counties contracting with the state for health services.

124055. Any community child health and disability prevention program may contract to furnish services to any other county if the contract is approved by the director.

124060. (a) On or before September 15 of each year, each county program director shall submit a budget update for the subsequent fiscal year that provides the following information:

(1) A summary of the previous year's activity, including the number of children screened, the number of children referred for diagnosis and treatment, by condition, and the cost of screening services.

(2) A summary description of the results of cases in that a treatable disability was identified and referral made.

(3) A projection and cost estimates of the number of children to be screened for the fiscal year for which the budget is being submitted.

(b) The multiyear base community child health and disability prevention plan shall include the following:

(1) An assessment of the adequacy and availability of the facilities and providers to provide health screening diagnostic and treatment services.

(2) A description of the child health and disability prevention program to be offered, including expected participating providers and outreach mechanisms to be utilized.

(3) A summary description of the current year's activity, including the number of children screened, the number of children referred for diagnosis and treatment, by condition, and the cost of screening services.

(4) A description of how existing school health resources, including school health personnel, are to be utilized for outreach and other services.

(5) Budget estimates, including all sources of revenue, for the budget.

(c) On or before September 15 of each year each governing board shall submit an update to the multiyear base community child health and disability prevention plan.

The director shall determine the amount of state funds available for each county for specified services under an approved multiyear base community child health and disability prevention plan, as updated, from state funds appropriated for child health and disability prevention services.

If the amount appropriated in the Budget Act for the fiscal year as enacted into law differs from the amount in the budget submitted by the Governor for the fiscal year, each governing board shall submit an additional revised update in the form and at the time specified by the department.

Notwithstanding any other provision of this article, no new community child health and disability prevention plan shall be submitted by a county until September 15, 1983. Each county plan and budget approved for the 1981–82 fiscal year shall be updated on or before September 15 by the governing body of each county for the 1982–83 and 1983–84 fiscal years pursuant to regulations adopted by the department. On or before September 15, 1983, the governing body of each county shall prepare and submit to the department a multiyear base plan and budget for the 1984–85 fiscal year that shall be annually updated on or before September 15 of each subsequent year pursuant to regulations adopted by the department.

The department shall develop and implement the format and procedures for the preparation and submission of a multiyear base plan update in order for the counties to have sufficient time prior to September 15, 1983, to prepare and submit their multiyear base plan by September 15, 1983.

For the purposes of simplifying and reducing plan requirements, the Legislature intends that the annual update shall not duplicate any of the material in the multiyear base plan, but serve as a progress report both evaluating what has been accomplished over the past year and describing in more detail what will be accomplished in relation to each of the elements in the base plan during the coming year.

124065. Counties shall be reimbursed for the amount required by the county to carry out its community child health and disability prevention program in accordance with the approved community child health and disability prevention plan. Claims for state reimbursement shall be made in the manner as the director shall provide. Each claim for state reimbursement shall be payable from the appropriation made for the fiscal year when the expenses upon which the claim is based are incurred.

There shall be no reimbursement for expenditures for the treatment of disabilities identified as a result of the program or for capital improvements or the purchase or construction of buildings, except for the equipment items and remodeling expenses as may be allowed by regulations adopted by the director.

124070. Counties shall be reimbursed for the amount required by the county to carry out its community child health and disability prevention program in accordance with the approved community child health and disability prevention plan. Claims for state reimbursement shall be made in a manner as the director shall provide. Each claim for state reimbursement shall be payable from the appropriation made for the fiscal year in which the expenses upon which the claim is based are incurred.

There shall be no reimbursement for expenditures for the treatment of disabilities identified as a result of the program, except for the costs of immunizations necessary to bring the child current in his or her immunization status as provided for by regulations of the department, or for capital improvements or the purchase or construction of buildings, except for the equipment items and remodeling expenses as may be allowed by regulations adopted by the director.

124075. (a) In order to ensure the maximum utilization of the California Medical Assistance Program and other potential reimbursement sources, the department shall develop a schedule and method of reimbursement at reasonable rates for services rendered pursuant to this article. The reimbursement schedule shall include provision for well child examinations as well as for administrative expenses incurred by providers pursuant to meeting this article. Inquiry shall be made of all recipients of services under this article as to their entitlement for third-party reimbursement for medical services. Where an entitlement exists it shall be billed. Notwithstanding subdivision (c) of Section 14000 of the Welfare and

Institutions Code and Section 14005 of that code, the California Medical Assistance Program shall be billed for services rendered pursuant to this article for every Medi-Cal eligible beneficiary.

(b) The department and counties shall maximize the use of federal funds for carrying out this article, including using state or county funds to match funds claimable under Title 19 of the Social Security Act. Services and administrative support costs claimable under federal law shall include, but not be limited to, outreach, health education, case management, resource development, and training at state and local levels. Any federal funds received shall augment and not replace funds appropriated from the General Fund for carrying out the purposes of this article.

124080. The department may contract with a private entity for the performance of processing claims for state reimbursement, so long as the cost of the contract is no more than 85 percent of the cost of the service if performed in state service and there is compliance with other applicable provisions of the Government Code including, but not limited to, Sections 19130 to 19132, inclusive.

124085. On and after July 1, 1976, each child eligible for services under this article shall, within 90 days after entrance into the first grade, provide a certificate approved by the department to the school where the child is to enroll documenting that within the prior 18 months the child has received the appropriate health screening and evaluation services specified in Section 124040. A waiver signed by the child's parents or guardian indicating that they do not want or are unable to obtain the health screening and evaluation services for their children shall be accepted by the school in lieu of the certificate. If the waiver indicates that the parent or guardian was unable to obtain the services for the child, then the reasons why should be included in the waiver.

124090. Any child between birth and 90 days after entrance into the first grade and all persons under 21 years of age who are eligible for the California Medical Assistance Program shall be eligible for services from the child health and disabilities prevention program in the county where they are a resident. The department, with review and recommendation by the board, shall adopt regulations specifying age groups that shall be given certain types of screening tests and recommendations for referral.

The first source of referral shall be the child's usual source of health care. If referral is required and no regular source of health care can be identified, the facility or provider providing health screening and evaluation services shall provide a list of three qualified sources of care, without prejudice for or against any specific source.

124095. Each community child health and disability prevention program shall provide the child or his or her parent or guardian with a copy of the results of the health screening and evaluation, as well

as an explanation of the meaning of the results, and shall, where the need indicates, refer the child for further diagnosis and treatment.

124100. (a) In cooperation with the county child health and disability prevention program, the governing body of every school district or private school that has children enrolled in kindergarten shall provide information to the parents or guardians of all children enrolled in kindergarten of this article and Section 120475. Every school district or private school that has children enrolled in the first grade shall report by January 15 of each year to the county child health and disability prevention program, the department, and the Department of Education the following information:

(1) The total number of children enrolled in first grade.

(2) The number of children who have had a health screening examination, as evidenced by the certificate required by Section 124085.

(3) The number of children whose parents or guardian have given written waiver pursuant to Section 124085 that they do not want their child to receive a health screening examination.

(b) Each county child health and disability prevention program shall reimburse school districts for information provided pursuant to this section. The Superintendent of Public Instruction may withhold state average daily attendance funds to any school district for any child for whom a certification or parental waiver is not obtained.

124105. (a) This section shall be known and may be cited as the ''Hughes Children's Health Enforcement Act.''

(b) The Legislature recognizes the importance of health to learning and to a successful academic career. The Legislature also recognizes the important role of schools in ensuring the health of pupils through health education and the maintenance of minimal health standards among the pupil population. Therefore, it is the intent of the Legislature that schools ensure that pupils receive a health screening before the end of the first grade.

(c) The department shall compile district information, using the information reported pursuant to Section 124100, and report to the Legislature the percentage levels of compliance with Section 124085 on an annual basis commencing January 1, 1994, utilizing data from the prior school year.

(d) The governing board of each school district shall exclude from school, for not more than five days, any first grade pupil who has not provided either a certificate or a waiver, as specified in Section 124085, on or before the 90th day after the pupil's entrance into the first grade. The exclusion shall commence with the 91st calendar day after the pupil's entrance into the first grade, unless school is not in session that day, then the exclusion shall commence on the next succeeding schoolday. A child shall not be excluded under this section if the pupil's parent or guardian provides to the district either a certificate or a waiver as specified in Section 124085.

(e) The governing board of a school district may exempt any pupil from the exclusion described in subdivision (d) if, at least twice between the first day and the 90th day after the pupil's entrance into the first grade, the district has contacted the pupil's parent or guardian and the parent or guardian refuses to provide either a certificate or a waiver as specified in Section 124085. The number of exemptions from exclusion granted by a school district pursuant to this subdivision may not exceed 5 percent of a school district's first grade enrollment. It is the intent of the Legislature that exemptions from exclusion be used in extraordinary circumstances, including, but not limited to, family situations of great dysfunction or disruption, such as substance abuse by parents or guardians, child abuse, or child neglect.

(f) It is the intent of the Legislature that, upon a pupil's enrollment in kindergarten or first grade, the governing board of the school district notify the pupil's parent or guardian of the obligation to comply with Section 124085 and of the availability for low-income children of free health screening for up to 18 months prior to entry into first grade through the Child Health Disabilities Prevention Program.

(g) It is the intent of the Legislature that school districts provide information to parents regarding the requirements of Section 124085 within the notification of immunization requirements. Moreover, the Legislature intends that the information sent to parents encourage parents to obtain health screenings simultaneously with immunizations.

124110. All information and results of the health screening and evaluation of each child shall be confidential and shall not be released without the informed consent of a parent or guardian of the child.

The results of the health screening and evaluation shall not be released to any public or private agency, even with the consent of a parent or guardian, unless accompanied by a professional interpretation of what the results mean.

Article 7. Childhood Lead Poisoning Prevention Act

124125. The Legislature hereby finds and declares that childhood lead exposure represents the most significant childhood environmental health problem in the state today; that too little is known about the prevalence, long-term health care costs, severity, and location of these problems in California; that it is well known that the environment is widely contaminated with lead; that excessive lead exposure causes acute and chronic damage to a child's renal system, red blood cells, and developing brain and nervous system; that at least one in every 25 children in the nation has an elevated blood lead level; and that the cost to society of neglecting this problem may be enormous.

The Legislature further finds and declares that knowledge about where and to what extent harmful childhood lead exposures are occurring in the state could lead to the prevention of these exposures, and to the betterment of the health of California's future citizens. Therefore, it is the intent of the Legislature in enacting this article to establish a state Childhood Lead Poisoning Prevention Program within the department to accomplish all of the following:

(a) To compile information concerning the prevalence, causes, and geographic occurrence of high childhood blood lead levels.

(b) To identify and target areas of the state where childhood lead exposures are especially significant.

(c) To analyze information collected pursuant to this article and, where indicated, design and implement a program of medical followup and environmental abatement and followup that will reduce the incidence of excessive childhood lead exposures in California.

124130. (a) All medical laboratories shall report to the department each detected case of a blood lead level greater than 25 micrograms of lead per deciliter of human blood or the equivalent standard as measured in micrograms of protoporphyr in per gram of hemoglobin. The blood lead findings, the names, ages, and addresses of the patients involved in each detected case and any additional information necessary to implement this article shall be reported to the department in a manner prescribed by the director.

(b) All information reported pursuant to this section shall be confidential, as provided in Section 100330.

(c) All medical laboratories testing for blood lead levels shall participate in a blood lead and free erythrocyte protoporphyrin (FEP) proficiency testing program.

(d) Laboratories that fail to meet reporting requirements will be assessed fines of up to five hundred dollars ($500) at the discretion of the director.

124135. (a) By July 1, 1987, the department shall identify target areas in which to conduct a childhood lead screening program.

(b) The targeted areas shall include at least one area within the urban San Francisco/Alameda County area, one area within, the urban Los Angeles/Orange County/San Diego area, and one area within the Central Valley Sacramento/Fresno area, and other areas if scientifically indicated as determined by the director.

(c) These target areas shall be described by census tract and shall be selected based on the prevalence of the following factors:

(1) Older housing.

(2) Lead-emitting industry.

(3) History of heavy automobile traffic.

(4) Use or disposal of hazardous materials or waste.

(5) Populations where cultural or ethnic factors or both may result in a higher risk of ingestion of lead.

(6) Population of children between the ages of 12 months and 6 years.

124140. By October 1, 1988, the department shall complete a screening program for childhood lead in the targeted areas identified pursuant to Section 124135, and in other areas where scientifically indicated. Further, where environmental abatement is found to be indicated, the department shall carry out field trials of alternative abatement technologies.

124145. On January 1, 1989, the department shall submit a report to the relevant legislative policy committees, and to the relevant legislative budget subcommittees for their review, describing the results of the screening program, the significance of the results, and the department's recommendations for further actions, where indicated.

124150. The Legislature hereby finds and declares that the activities conducted by the department pursuant to Sections 124130, 124135, and 124140 have confirmed and supported the findings specified in Section 124125 and, in addition, have resulted in the following findings:

(a) Very few children are currently tested for elevated blood lead levels in California. The lead registry established pursuant to Section 124130 has been effective at identifying incidents of occupational lead poisoning; however, because childhood lead screening is not now required in California, the registry is unable to serve as the exclusive mechanism to identify children with elevated blood lead levels. Additional blood lead screening needs to be done to identify children at high risk of lead poisoning.

(b) Based on emerging information about the severe deleterious affects of low levels of lead on children's health, the lead danger level is expected to be lowered from 25 to 15 micrograms of lead per deciliter of human blood.

(c) Lead poisoning poses a serious health threat for significant numbers of California children. Based on lead registry reports and targeted screening results, the department has estimated that tens of thousands of California children may be suffering from blood lead levels greater than the danger level.

(d) The implications of lead exposure to children and pregnant women from lead brought home on the clothing of workers is unknown, but may be significant.

(e) Levels of lead found in soil and paint around and on housing constitute a health hazard to children living in the housing. No regulations currently exist to limit allowable levels of lead in paint surfaces in California housing.

124155. (a) The department shall design and implement a screening program for lead exposure of children not older than seven years old in migrant labor camps where lead-based paint has been identified pursuant to Section 50710.5.

(b) The department may implement the screening program through the local health departments utilizing the department's protocols. Notwithstanding any other provision of law, the department may contract with a nonprofit organization to assist in administration of the program. The contract shall not be subject to competitive bidding requirements.

124160. The department shall continue to direct the Childhood Lead Poisoning Prevention Program to implement a program to identify and conduct medical followup of high-risk children, and to establish procedures for environmental abatement and followup designed to reduce the incidence of excessive childhood lead exposures in California. In implementing this program, the department shall utilize its own studies, as well as relevant information from the scientific literature and childhood lead poisoning programs from outside California. The particular activities specified in this section shall be initiated by January 1, 1990, and completed on or before January 1, 1993. The program shall include at least all of the following components:

(a) Lead screening. The department shall:

(1) Design and implement at least one pilot blood lead screening project targeting children at high risk of elevated blood lead levels. In designing any pilot projects, the department shall give special consideration to conducting screening through the Child Health Disability and Prevention Program.

(2) Conduct a pilot screening project to evaluate blood lead levels among children of workers exposed to lead in their occupations.

(3) Develop and issue health advisories urging health care providers to conduct routine annual screening of high-risk children between the ages of one and five years of age.

(4) Study the options for, and feasibility of, implementing a mandatory childhood blood lead testing program in California. The study shall include an evaluation of the voluntary response and cooperation of health care providers to the health advisory program specified in paragraph (3). The results of this study shall be submitted to the Legislature by July 1, 1991.

(5) Develop a program to assist local health departments in identifying and following up cases of elevated blood lead levels.

(6) Develop and conduct programs to educate health care providers regarding the magnitude and severity of, and the necessary responses to, the childhood lead poisoning problem in California.

(b) The department, in consultation with the Department of Housing and Community Development, shall adopt regulations governing the abatement of lead paint in and on housing, including, but not limited to, standards for enforcement, testing, abatement, and disposal.

(c) The department shall conduct a study to evaluate whether abatement of lead in soil is effective at reducing blood lead levels in children.

124165. After January 1, 1993, the department, through the Childhood Lead Poisoning Prevention Program, shall continue to take steps that it determines are necessary to reduce the incidence of excessive childhood lead exposure in California.

CHAPTER 4. ADOLESCENT HEALTH

Article 1. California Adolescent Family Life Act of 1988

124175. The Legislature hereby finds and declares that:

(a) Adolescent pregnancy and parenthood is a problem with significant social, medical, educational, and economic consequences to the teen parent and child, her family, and the State of California.

(b) In an attempt to address the problems of pregnant and parenting adolescents, the Governor, in 1985, created the Adolescent Family Life Demonstration Program, that was designed to bring pregnant and parenting teenagers into programs that provide services of demonstrated cost benefit and effectiveness by organizing networks of local agencies focused on providing services to adolescents and ensuring the most timely and effective utilization of services.

(c) Independent evaluations indicate that the program has been successful and effective in achieving its intended goals of providing pregnant adolescents with prenatal care, reducing the incidence of low birthweight babies born to adolescent mothers, keeping or reenrolling pregnant and parenting adolescents in school, and reducing the rate of repeat teen pregnancies.

124180. (a) The department may conduct the Adolescent Family Life Program to assure that pregnant adolescents receive comprehensive continuous prenatal care in order to deliver healthy babies; to establish networks within regions to provide to pregnant and parenting teens and their children necessary services including medical care, psychological and nutritional counseling, maternity counseling, adoption counseling, academic and vocational programs, and day care; to provide a continuous case manager to each family unit; and to maintain a data base to measure outcomes of adolescent pregnancies. Specific procedures to operate this program will be defined and carried out through standards and guidelines established by the department.

(b) No grant funds may be used for essential services to pregnant adolescents or schoolage parents unless the services are not available in the county or are insufficient to meet the basic needs of the population to be served; in that case, funds may be used for essential services only as set forth in the approved grant application. No grant

funds may be expended for abortions, abortion referrals, or abortion counseling.

124185. (a) The department, through its program of maternal and child health, shall award contract augmentations to four Adolescent Family Life Programs that meet the requirements of this section and develop plans for a comprehensive coordinated substance abuse prevention, intervention, and counseling program, designed specifically to meet the developmental, social, and educational needs of high-risk pregnant or parenting adolescents. The program shall, to the extent practicable, feasible, and appropriate, leverage existing programs and funding rather than creating new, duplicative programs and services.

(b) The department shall adopt guidelines and criteria setting forth the terms and conditions upon which the department will offer contract augmentations pursuant to this section. The department also shall disseminate information designed to publicize the availability of contract augmentations for a comprehensive coordinated substance abuse prevention, intervention, and counseling program to high-risk pregnant or parenting adolescents.

(c) The department shall encourage Adolescent Family Life Programs with small caseloads to develop plans and submit applications that reflect sharing of services among two or more programs.

(d) At least one program that is awarded a contract augmentation shall be located in northern California, at least one program shall be located in central California, and at least one program shall be located in southern California.

(e) This section shall become operative on July 1, 1994.

124190. A comprehensive coordinated substance abuse prevention, intervention, and counseling program, as used in Section 124185, shall include, but not be limited to, programs that:

(a) Have demonstrated a capacity for developing interagency cooperative approaches to reduce the incidence of high-risk pregnant or parenting adolescents. This shall include documentation of program development and plans for coordination and collaboration with existing perinatal substance abuse programs in the county, including state pilot projects on perinatal substance abuse established under the direction of the Local Perinatal Substance Abuse Coordinating Council.

(b) Employ maximum utilization of existing available programs and facilities.

(c) Have developed goals and objectives for reducing the incidence of high-risk pregnant and parenting adolescents.

(d) Are culturally and linguistically appropriate to the population being served.

(e) Include staff development training by substance abuse counselors.

(f) This section shall become operative on July 1, 1994.

124195. The department shall require reports to be prepared by all programs funded pursuant to this article. A summary of the reports and recommendations regarding the programs shall be submitted by the department to the Legislature on or before December 31, 1996. The summary shall include all of the following:

(a) An accounting of the incidence of high-risk pregnant or parenting adolescents who are abusing alcohol or drugs, or a combination of alcohol and drugs.

(b) An accounting of the health outcomes of infants of high-risk pregnant and parenting adolescents including: infant morbidity, mortality, rehospitalization, low birth weight, premature birth, developmental delay, and other related areas.

(c) An accounting of school enrollment among high-risk pregnant and parenting adolescents.

(d) An assessment of the effectiveness of the counseling services in reducing the incidence of high-risk pregnant and parenting adolescents who are abusing alcohol or drugs, or a combination of alcohol and drugs.

(e) The effectiveness of the component of other health programs aimed at reducing substance use among pregnant and parenting adolescents.

(f) The need for an availability of substance abuse treatment programs in the program areas that are appropriate, acceptable, and accessible to teenagers.

(g) This section shall become operative on July 1, 1994.

124200. Funding for the purpose of this article shall be provided through funds appropriated to the department through the annual Budget Act.

Article 2. Child and Adolescent Resource Program

124225. (a) The Legislature finds that recent responsibilities for assessing and treating the mental disorders of children and adolescents have been required of county mental health programs creating an unmet need for personnel in the field of mental health who have expertise in preventing, diagnosing, and treating the mental and emotional disorders of children.

(b) Recent attention to child abuse cases has increased the awareness of the special needs of children who are victims of abuse and of those who are then called to the courtroom as witnesses. Mental health personnel with special training are also needed for these children.

124230. It is the purpose of the Legislature, in enacting this article, to encourage the Regents of the University of California to augment the academic child and adolescent programs at the medical

schools of the University of California. The programs shall include, but not be limited to, one or more of the following elements:

(a) Clinical or postgraduate educational programs in child and adolescent psychiatry to instruct and train students in recognizing and treating children with mental and emotional problems, both organic and functional.

(b) Provision of continuing education for specialists in the care and treatment of children and adolescents with mental and emotional problems.

(c) Research into the causes, prevention, and treatment of mental disorders of children.

124235. By February 1, 1987, the Regents of the University of California are requested to submit to the Legislature a report on their assessment of the need for, and relative priority of, increased university programs for training specialists in the care and treatment of children and adolescents with mental and emotional problems in this state. It is requested that the report include, but not be limited to, all of the following:

(a) A description of the university's programs for the training of specialists in the care and treatment of children and adolescents with mental and emotional problems.

(b) A determination of the need for and relative priority of increased university training and research in this field.

(c) The estimated costs of programs to train additional specialists.

CHAPTER 5. DENTAL DISEASE (RESERVED)

PART 3. FAMILY PLANNING

124300. Within any county where 10 percent or more of the population, as determined by the Population Research Unit of the Department of Finance, speaks any one language other than English as its native language, every local health department shall make copies of circulars and pamphlets relating to family planning that are made available to the public also available in the other language.

The department, upon request, shall make a translation available in other than English those family planning informational materials normally distributed to the general public.

PART 4. PRIMARY HEALTH CARE

CHAPTER 1. GENERAL PROVISIONS

124400. (a) The Legislature makes the following findings and declarations:

(1) There is a maldistribution of health services in California resulting in underserved rural and urban areas and underserved population groups.

(2) Most rural areas of the state do not have adequate health services because there are insufficient personnel and facilities to provide the services. The lack of adequate services has a negative impact on the health and safety of the public.

(3) In many urban areas of the state there are inadequate health services for low-income populations. Financial barriers create access problems. These barriers to health services have a negative impact on the health and safety of these groups and the public.

(4) Population groups, such as American Indians and seasonal agricultural and migratory workers, lack access to adequate and appropriate health services. The lack of adequate services has a negative impact on the health and safety of these groups and the public.

(5) State assistance will be needed to assure financial stability of primary care resources for these specified population groups.

(b) It is therefore the intent of the Legislature that the state develop an overall strategy to ensure the maintenance of adequate primary health care resources for special population groups.

124405. (a) The department shall develop a statewide plan for health services for special population groups identified pursuant to subdivision (b) of Section 124425 by January 1, 1985, and shall evaluate and update the plan every two years. The plan shall include, but not be limited to, an assessment of resources, an assessment of unmet needs, an evaluation of prior years program goals and objectives, and a two-year action plan for at least the following program areas:

(1) Health of seasonal agricultural and migratory workers and their families.

(2) American Indian health services.

(3) Rural health services.

(4) California health services corps.

(5) Grants-in-aid to clinics.

(b) The plan shall describe the types, locations, and effectiveness of the programs specified in paragraphs (1) to (5), inclusive, and contain an assessment of resources needed to maintain the plan consistent with the Primary Care Services Act (Section 27).

(c) The plan may be a consolidation of individual program reports due to the Legislature during the year the plan is updated. The plan may also be integrated with other plans the department is required to develop concerning maternal and child health programs and services for special population groups.

(d) The statewide plan shall be initially developed in consultation with the Primary Care Clinics Advisory Committee and the California Conference of Local Health Officers and biannually

updated as provided in this section in consultation with individuals and groups representing special populations and areas, with local governments, and with the office.

124410. Notwithstanding any other provision of law, the department may, if requested by the nonprofit or public agency and to the extent funds are available, provide for advance payments for services to be performed under any agreement entered into pursuant to the Primary Care Services Act (Section 27) and that is otherwise in compliance with the requirements contained in Section 100350. Individual advance payments made to any nonprofit or public agency that requests those payments shall be made in a timely fashion and shall not exceed 25 percent of the total amount of the grant award.

124415. Notwithstanding any other provision of law, the department may, in addition to the advance payment under Section 124410, provide for prospective payments for services to be performed under any agreement entered into pursuant to the Primary Care Services Act (Section 27). These prospective payments may be provided each month to a contracting agency on one of the following bases:

(a) One-twelfth of the total funding award each month.

(b) One-twelfth of 75 percent of the funding award, if a 25 percent advance payment is also provided.

Prospective payments may be made to those nonprofit or public agencies that request prospective payments and may be adjusted if necessary during the project period after the submission and review of required program reports.

124420. Each agreement for a project shall require the contracting agency to seek third-party reimbursements, including Medi-Cal and private insurance, for any person served under the agreement and shall require that the reimbursements be used for purposes consistent with the Primary Care Services Act (Section 27). Each agreement may require the contracting agency to provide reports to the department on reimbursements.

124425. (a) It is the intent of the Legislature that funds authorized by the Primary Care Services Act (Section 27) be provided to organizations and agencies that are located in underserved areas or that are serving population groups identified pursuant to subdivision (b).

(b) Every two years the director shall develop a list of underserved rural and urban areas and underserved population groups. The director shall take into consideration the list of urban and rural areas designated as medically underserved by the California Health Manpower Policy Commission and by the office and federal medically underserved areas and population groups designated by federal agencies.

(c) The director shall develop the list of underserved rural and urban areas and underserved population groups, set forth in subdivision (b), after consulting and receiving written recommendations from the Primary Care Clinics Advisory Committee and after consulting with appropriate groups and individuals, including individuals representing underserved populations and local government.

124430. (a) It is the intent of the Legislature that programs in the Primary Care Services Act (Section 27) be funded annually through the budgetary process.

(b) In administering funds pursuant to the Primary Care Services Act (Section 27), the department shall use the funds only for the purpose of funding grants specifically authorized by that act.

(c) No local assistance funds may be used for state administration purposes under the Primary Care Services Act (Section 27).

124435. An applicant for funds pursuant to the Primary Care Services Act (Section 27) shall transmit a copy of an application to any person who makes a written request therefor at the same time that the application is transmitted to the state.

124440. The department may enter into agreements with any clinic that is licensed under subdivision (a) of Section 1204 or exempt from licensure under subdivision (c) of Section 1206, and which requests the agreements, for up to three consecutive years.

The contracts shall be limited to the provision of health services to persons authorized to receive health services under the programs specified in the Primary Care Services Act (Section 27).

The department shall retain the right to terminate contracts under the general provisions of the contract language prior to the three years for failure to comply with the performance terms and conditions set forth in the contracts.

The multiple-year contracts shall be modified to reflect any cost-of-living adjustments that are provided to the programs specified in this section, provided the cost-of-living adjustments are granted pursuant to the Budget Act. The contracts may also be amended to reflect changes in the base budget amount, scope of work, and other contract language changes as necessary. Nothing shall prohibit the department from establishing a three-year budget and annually amending the contract to change the budget amount, scope of work, and other contract language changes as necessary. Nothing shall prohibit the contract from being modified based on the mutual consent of the contractor and the department. Advance payments in the original contract and in each one-year extension are permitted, but shall not exceed 25 percent of the funds provided for each fiscal year.

On or before January 1, 1990, the department at any time shall report to the Legislative Analyst as to the personnel-year and General Fund savings that have been associated with this authority.

CHAPTER 2. PRIMARY CLINIC REVOLVING FUND

Article 1. General Provisions

124475. The Legislature finds and declares all of the following:

(a) Clinics are valuable partners in the state's efforts to improve access to health services.

(b) Clinics have an established record of providing quality health services to medically uninsured persons at a reasonable cost.

(c) Clinics are experienced in serving the culturally diverse populations of this state and have developed comprehensive health services packages that meet special population needs.

(d) Clinics are major partners with all levels of government as contractors and grantees in programs that serve the poor, low income, minorities, and other target populations with special needs in both urban and rural areas of California.

(e) The state's grant and contract approval process are so complicated and time consuming that clinics are faced annually with severe cash-flow problems.

(f) The length of time required for the state to process and execute payment of claims submitted by clinics, creates severe cash-flow problems for the clinics.

(g) Clinics often have no choice but to borrow funds to cover operations pending receipt of state funds and the resulting interest payments reduce the amount of funds available for direct services to the needy population.

(h) Therefore, it is the intent of the Legislature that preliminary advance payment authority be established for the department in order to alleviate clinics' cash-flow problems to the extent possible.

(i) It is the intent of the Legislature that a clinic revolving fund be established within the department to expedite the payment process and thereby alleviate the cash-flow problems of clinics.

124480. As used in this chapter, ''clinic'' means a primary care clinic as defined in Section 1200.

124485. (a) The department shall prepare and transmit to the Legislature a report of the department's activities relating to the utilization of clinics to provide comprehensive health services pursuant to the following programs:

(1) Health of seasonal agricultural and migratory workers and their families program.

(2) American Indian health services program.

(3) Rural health services program.

(4) Grants-in-aid to clinic program.

(5) California health services corps program.

(b) A report shall be transmitted to the Legislature by July 1, 1992, and by July 1 of every fourth year thereafter.

(c) The report shall also include any grant funds expended and the resources allocated to the programs by the department, including staff, travel, and support services.

(d) The report shall reflect activities, resources, and expenditures by fiscal year.

Article 2. The Clinic Revolving Fund

124500. The Clinic Revolving Fund of the department is hereby established for the purpose of expediting preliminary advance payments as authorized pursuant to Article 3 (commencing with Section 124525) and to reimburse clinics that are grantees or contractors for services rendered under grants or contracts issued pursuant to this part.

124505. (a) Notwithstanding Section 16400 of the Government Code or any other provision of law, the department may, to the extent local assistance appropriations are made by the Legislature for programs set forth in this part, without at the time furnishing vouchers or itemized statements, draw up to 50 percent of the funds appropriated for the purposes of the Clinic Revolving Fund, for purposes of preliminary advance payments pursuant to Article 3 (commencing with Section 124525).

(b) The purpose of the Clinic Revolving Fund does not include expenses related to departmental administrative expenses, departmental travel expenses, departmental travel expense advances, or other departmental administrative costs.

124510. In lieu of actually withdrawing revolving fund moneys from the State Treasury, the Controller, upon the request of the department, shall apply and credit the amount of the Clinic Revolving Fund, or any portion thereof, as repayment and return of any existing funds in the revolving fund to the appropriation for which it was drawn by the department.

124515. The department shall remain fully accountable for the Clinic Revolving Fund. All disbursements shall be substantiated by vouchers filed with the Controller. Disbursements may be reported, substantiated by vouchers, from time to time to the Controller in connection with claims for reimbursements of the revolving fund. At any time, upon the demand of the Department of Finance or the Controller, the revolving fund shall be accounted for and substantiated by vouchers and itemized statements submitted to the Controller.

Article 3. Preliminary Advance Payments

124525. Notwithstanding any provision of law to the contrary, the department may, to the extent funds are available, provide for advance payments for services to be performed under pending grant

agreements or contracts with clinics pursuant to the Primary Care Services Act (Section 27), at the time that the notice of award is issued if all of the following conditions are met:

(a) The request for application or the request for proposals contains the terms and conditions under which advance payment may be received pursuant to this section.

(b) That the total amount of the advance shall not exceed 25 percent of the amount of the proposed award, including any advance payments provided under authority of any other provision of law.

(c) That the terms and conditions of the request for application or the request for proposal, specifies that the grantee shall repay the full amount of the advance if the grant or the contract is not finally approved.

(d) That the department has evaluated the financial stability of the clinic and found it to be reasonably financially sound.

(e) That advance payments be made only to those nonprofit agencies that request an advance in writing.

(f) That the application or proposal contains the terms and conditions set forth in the request for application or the request for proposal.

(g) That the application or proposal is signed by an authorized person representing the clinic.

CHAPTER 3. HEALTH OF SEASONAL AGRICULTURAL AND MIGRATORY WORKERS

124550. The department shall maintain a program for seasonal agricultural and migratory workers and their families, consisting of all of the following:

(a) Studies of the health and health services for seasonal agricultural and migratory workers and their families throughout the state.

(b) Technical and financial assistance to local agencies concerned with the health of seasonal agricultural and migratory workers and their families.

(c) Coordination with similar programs of the federal government, other states, and voluntary agencies.

124555. The department shall contract and cooperate with local governmental agencies and voluntary nonprofit organizations in connection with the development of local health programs for seasonal agricultural and migratory workers and their families.

CHAPTER 4. AMERICAN INDIAN HEALTH SERVICES

124575. The department shall maintain a program for American Indians and their families, consisting of all of the following:

(a) Studies of the health and health services available to American Indians and their families throughout the state.

(b) Technical and financial assistance to local agencies concerned with the health of American Indians and their families.

(c) Coordination with similar programs of the federal government, other states, and voluntary agencies.

124580. The department shall cooperate with local governmental agencies and contract with voluntary nonprofit organizations in connection with the development of local health programs for American Indians and their families.

124585. (a) All moneys appropriated to the department for the purposes of this chapter shall be used to provide financial, training, and technical assistance to urban and rural American Indian health programs and to assist these programs in planning, implementing, and upgrading programs to attain a comprehensive health services delivery system for American Indians in urban and rural areas.

(b) The department shall provide technical assistance and shall promote the provision of services for preventive health care, health education, and environmental health.

(c) The department may expend funds, appropriated to it to carry out the purposes of this chapter, by contract or grant, or any combination thereof, to assist any urban or rural American Indian health program.

(d) The department shall adopt regulations establishing criteria for reimbursement for direct services under this chapter, that shall include, but not be limited to, a definition of direct services that are reimbursable and a formula for allocation of funds appropriated to the department.

(e) The department shall provide assistance to American Indian health services programs in maximizing utilization of third party payment systems and in developing programs in health education, nutrition, and family planning, if the assistance is not being provided by agencies of the federal government.

(f) Funds appropriated to carry out the purposes of this chapter shall be supplemental to those available from the federal government and shall not duplicate, and they shall not replace, any commitments made by the federal government to provide health services to American Indians and their families in this state who receive health services pursuant to an urban or rural American Indian health program.

(g) It is the intent of the Legislature that the program established by this chapter shall, commencing with the 1984–85 fiscal year, be funded according to customary budget procedures.

124590. The Legislature finds and declares that the health status of many American Indians in California is not adequate.

It is, therefore, the intent of the Legislature to insure that in addition to funding provided pursuant to the American Indian

Health Service program, sufficient funding is provided to American Indians from other programs in order to substantially improve their access to health services. These programs include, but are not limited to, the following:

(a) Rural health services.
(b) Mental health services.
(c) Developmental disability programs.
(d) Maternal and child health programs.
(e) Alcoholism programs.
(f) Programs for the aging.
(g) Environmental health programs.

The department shall report to the Legislature by July 1, 1984, and every two years thereafter, with respect to the extent to that funding for these programs is allocated to grantees receiving funding from the department pursuant to Section 124585.

124595. (a) The Indian Health Policy Panel, established by the director pursuant to Section 1520 of Title 17 of the California Administrative Code, is continued in existence and shall be renamed the American Indian Health Policy Panel. The policy panel shall advise the department on the level of resources, priorities, criteria, and guidelines necessary to implement this chapter. The policy panel shall be composed of 10 members, appointed by the director. Four members shall be appointed from a list of persons submitted by the California Rural Indian Health Board, four members shall be appointed from a list of persons submitted by the California Urban Indian Health Council, and two members shall represent the public. The persons appointed by the director to represent the public may be consumers, consumer advocates, health service providers, representatives of state or county health agencies, health professionals, or private citizens. The terms of the members shall be established pursuant to bylaws adopted by the policy panel.

(b) The director may also seek advice from individuals and groups, other than the policy panel, on program issues.

(c) Those persons who are members of the policy panel on December 31, 1983, shall continue to be members for the remainder of their terms and, upon expiration of their terms, shall be eligible for reappointment by the director.

CHAPTER 5. RURAL HEALTH SERVICES DEVELOPMENT

Article 1. Legislative Intent and General Provisions

124600. The Legislature makes the following findings and declarations:

(a) There is a maldistribution of health services in California. Most rural areas of the state do not have adequate health services because

there are insufficient health personnel and facilities and inadequate transportation to such services.

(b) The lack of health services in rural areas has a negative impact on the health and safety of the public.

(c) Existing public programs to meet the problem of inadequate health services in rural areas are not sufficient in scope or properly coordinated to significantly improve the availability of health services.

(d) It is unlikely that the situation will improve without substantial state and local action.

It is, therefore, the intent of the Legislature in enacting this chapter to establish a program of rural health services in the department. The purpose of the program is to improve the coordination of rural health services and to increase the amount and availability of the services.

The Legislature intends that the program consist of all the following:

(1) The California Health Services Corps in which health personnel are assigned to health care delivery organizations.

(2) Health services development projects, in which new health care delivery organizations are established.

(3) An organizational unit within the department to coordinate rural health programs.

124605. The department shall implement a program to remedy deficiencies in health services in rural areas. The department shall have responsibility for the following elements:

(a) California Health Services Corps.

(b) California Rural Health Services Development Projects.

(c) Coordination of Rural Health Programs.

124610. The director shall administer this chapter and shall adopt any regulations and standards as are necessary to implement this chapter.

124615. No services provided under this chapter shall substitute for current services and obligations of a county including those required by state law.

124620. Funds expended pursuant to this chapter shall be supplemental to those made available by the federal government for the National Health Services Corps and shall not duplicate, or replace, but may supplement and complement, any commitments made by the federal government to provide health personnel as needed.

124625. (a) It is the intent of the Legislature that the Rural Health Services Development Program be funded annually through the budgetary process.

(b) Notwithstanding any other provision of law, the department may, to the extent funds are available, provide for advance payments for services to be performed under any contract entered into

pursuant to this chapter with any small community based public or private nonprofit agency with modest reserves and potential cash flow problems, where the department determines that such advance payments will further the purposes of this chapter. Advance payments shall not be made more than once a year.

Article 2. California Health Services Corps

124650. The director shall establish in the department, a California Health Services Corps. The purpose of the corps is to make available health personnel to rural areas that are presently receiving inadequate health services. The corps shall consist of physicians and surgeons, podiatrists, dentists, vision care providers, and other health professionals, such as nurse practitioners, physician assistants, nurses, dental hygienists, dental assistants, health educators, nutritionists, dietitians, health and nutrition aides, and other personnel as the director finds necessary to meet the purposes of the program.

124655. Members of the California Health Services Corps may be assigned to the following categories of health services programs:

(a) Any nonprofit primary care clinic or licensed health facility.

(b) Any health provider or group provider.

(c) Any county health program or facility.

(d) Any state health program or facility.

(e) Any federal health program.

Assignments may be made to a health provider or facility, to a health services development project established pursuant to Article 3 (commencing with Section 124700), or directly to an area in California where health services are inadequate.

124660. Assignments shall be made in accordance with the following:

(a) The authority of any person to supervise any member of the corps shall be subject to approval by the director.

(b) No member of the corps shall be placed in an assignment without the prior agreement of the person or governing board in charge of the health delivery program to which the corps member is assigned.

(c) Corps members directly assigned to rural areas or to state-operated projects shall be contract employees of the California Health Services Corps. Corps members assigned to projects with a nonstate provider or facility may be employees of the provider or facility if specified by contract between the state and the provider or facility. The state shall provide malpractice insurance coverage for all corps personnel.

(d) Local consumers shall be consulted in the placement of California Health Services Corps members.

(e) In making the assignment of a corps member, the director shall seek to match the characteristics and preferences of the

member with those of the area, population group, or medical facility where the member may be assigned to the maximum extent possible in order to increase the probability of the member remaining to serve the area, population group, or medical facility upon completion of his or her assignment period.

124665. The director shall, by regulation, specify the salary schedules, other terms and conditions of employment, and reimbursement policies with respect to the employment of corps members that shall be followed by institutions, providers, or programs where a member of the California Health Services Corps is assigned.

124670. Funds expended pursuant to this article may be used for any of the following purposes:

(a) Expenses of the department in administering the program.

(b) Salaries and employee benefits for members of the California Health Services Corps.

(c) Supplies, equipment, minor capital outlay, and minor renovations.

124675. Assignments shall be made by the department without regard to ability of residents in areas to pay.

Any provider or facility where a California Health Services Corps member is assigned, and any corps member, shall be required to seek third party reimbursements, including Medi-Cal and private insurance, for any person served by the corps member. Any such corps member, provider, or facility may be required to provide reports to the department concerning reimbursements and may be required to contribute all or part of the proceeds of reimbursements to the department for deposit in the State Treasury in accordance with regulations or contracts adopted by the department after regulations have been approved by the Director of Finance.

124680. No corps member may refuse needed service to any person because of inability to pay for such service, or refuse service to persons on account of their entitlement to medical benefits under Title XVIII or XIX of the United States Social Security Act.

124685. The director may, upon request, provide technical assistance to groups preparing applications for assignment of corps personnel.

Article 3. Health Services and Development Projects

124700. The department shall plan and put into operation a number of health services development projects. The purpose of the projects shall be to demonstrate effective ways of providing health care services in underserved rural health areas. The director shall make the final decision on approval of a project.

124705. Applications may be made for funds for health services development projects and the projects may be initiated and operated by any agency, including, but not limited to, the following:

(a) A community agency, including a National Health Services Corps site.

(b) An ongoing rural health program, including migrant health or American Indian health program.

(c) A family practice education program.

(d) A county health department.

(e) The department.

(f) Any health facility or licensed nonprofit primary care clinic.

124710. Projects may be in the form of grants or loans provided under contract between the department and the contracting nonprofit agency, or may be administered directly by the department.

124715. The department may assist community agencies to develop contract proposals.

124720. Project proposals shall be considered that address the health needs of rural populations, including, but not limited to, migratory and other agricultural workers, American Indians, and senior citizens, who have insufficient access to adequate levels of health care services due to geographical isolation or economic factors.

Projects that are approved shall accomplish one or more of the following:

(a) Provide primary health care, including preventive health services and diagnostic, treatment, referral, and followup services.

(b) Provide comprehensive health care, including specialized physician services, inpatient and outpatient facilities, laboratory and X-ray services, home health services, and other specialized services.

(c) Provide emergency medical services designed to meet the special problems of rural isolation.

(d) Provide transportation appropriate to achieving the goal of making health care services available to residents of rural areas.

(e) Provide electronic communication technology to improve health care delivery and emergency health services in the designated rural areas.

(f) Establish regional health systems, including linkage with both rural and urban health programs and facilities.

(g) Improve the quality of medical care and the administrative capabilities of agencies and management systems in rural areas.

(h) Provide health education programs in the designated rural areas, including health and nutrition education, and continuing education for health professionals.

(i) Promote nurse practitioner and physician assistants programs and other programs for training and placement of health

professionals in the designated areas to respond to rural manpower shortages.

124725. Project funding shall be for one year. Continuation of funding for a project shall depend on progress toward achieving the goals of the project. The director shall make the final decision to continue or discontinue a project. In evaluating the success of a project, the director shall take into account the number of additional persons who are receiving quality health care as a result of the operation of the project and the improvement in health status of the population served by the project.

124730. Each applicant shall form an advisory committee for the project. The advisory committee shall participate in all of the following:

(a) Planning the project.

(b) Reviewing the progress of the project.

(c) Proposing changes in the project.

(d) Planning for the continuation of the project after the grant period through self-sufficiency.

At least one-half of the members of the advisory committee shall be consumers, as defined by Public Law 93-641. The advisory committee shall include, where feasible, representatives of the health service agencies, the Seasonal Agricultural and Migratory Workers Advisory Committee, the American Indian Health Policy Panel, consumers selected from rural target populations, such as American Indians, senior citizens, Medi-Cal recipients, isolated rural residents, and agricultural and forestry workers, providers from rural areas, and persons with knowledge of rural areas from educational institutions, and state, county, and federal agencies.

124735. Each contract for a project shall require the contracting agency to seek third-party reimbursements, including Medi-Cal and private insurance, for any person served under the contract. Each contract shall require the contracting agency to provide reports to the department on reimbursements and may require the contracting agencies to contribute all or part of the proceeds of reimbursements to the department for deposit in the State Treasury in accordance with regulations to be adopted by the department after the regulations are approved by the Director of Finance.

124740. State-operated projects shall be established only in accordance with all of the following:

(a) The health of the population in a rural area would be substantially improved by the establishment of a project.

(b) There exists no local public or nonprofit agency willing and able to undertake the project.

(c) The project contains two or more of the elements specified in Section 124720.

A project may employ staff, and may purchase, rent, or lease supplies and equipment where required. A project may also rent or lease land and buildings where required.

Article 4. Coordination of Rural Health Programs

124750. The director shall ensure the coordination of state efforts in rural health in order to maximize effective use of scarce medical resources and to coordinate efforts to provide health services through the California Health Services Corps and health services development projects with existing program resources, including, but not limited to, migrant health programs, American Indian health programs, contract county health services programs, the National Health Service Corps, and other related programs administered by the department to ensure minimal duplication and maximum effectiveness.

124760. The Health Manpower Policy Commission shall establish a plan that integrates family practice residencies and other health sciences education programs established in rural areas pursuant to Article 8 (commencing with Section 31910) of Chapter 5 of Division 5 of Division 22 of the Education Code with the health services provided pursuant to Article 3 (commencing with Section 124700).

124765. The Health Manpower Policy Commission, in coordination with the Rural Health Section of the department, shall designate the geographical rural areas within California where unmet priority need for medical services exists.

124770. The director shall utilize the authority to establish health manpower pilot projects pursuant to Article 1 (commencing with Section 128125) of Chapter 3 of Part 3 of Division 107 to develop personnel with special health and medical skills that may effectively advance the objectives of the Primary Care Services Act (Section 27).

124775. Each proposal for health corps personnel or project application under Article 3 (commencing with Section 124700) shall be submitted to the appropriate county health officer or district health officer for review and recommendation. The review and recommendation shall be completed within 30 days of receipt. Any recommendations made shall be based upon the Health Systems Plan and Annual Implementation Plan as required for that area by Public Law 93-641.

124780. If the director decides to act contrary to the recommendation of a county or district health officer made pursuant to Section 124775, the director shall explain his or her action in writing to the appropriate board of supervisors.

124785. Nothing in the Primary Care Services Act (Section 27) shall affect the operation of local public health services contracted for by the department with other agencies pursuant to former Section 1157.

CHAPTER 6. SMALL AND RURAL HOSPITALS

124800. The Legislature finds and declares all of the following:

(a) Rural hospitals serve as the ''hub of health,'' and through that role attract and retain in their communities physicians, nurses, and other primary care providers. Because of economies of scale compounded by reimbursement reforms, many rural hospitals will close before the end of this decade. This will result in the departure of primary care providers and the loss of emergency medical services both to residents and persons traveling through the area. The smallest and most remote facilities are at highest risk.

(b) The rural hospital is often one of the largest employers in the community. The closure of such a hospital means the loss of a source of employment. This has an economic impact beyond the health sector. Further, economic development of a rural area is, in part, tied to the existence of a hospital. People, for example, tend not to retire to areas where there is not reasonable access to physician and hospital-based services.

(c) Rural hospitals, especially the smaller facilities, lack access to the sophisticated expertise necessary to deal with current reimbursement regulations and the associated bureaucracy.

(d) Most rural hospitals are unable to participate in programs that provide access to short- and long-term financing due to lender requirements for credit enhancement.

(e) Because of economies of scale compounded by regulations under Title 22 of the California Code of Regulations and other regulations, rural hospitals have high, fixed costs that, in the present reimbursement environment, cannot be offset by revenues generated from serving a relatively small population base. Further, in an economically depressed rural area, community contributions are not sufficient to offset deficits.

(f) Rural hospitals are an important link in the Medi-Cal program, and without special consideration that takes into account their unique circumstances, rural hospitals will be unable to continue providing services to Medi-Cal patients. This is especially true for outpatient services that are reimbursed at less than 60 percent of costs.

(g) While only a very small percentage of the Medi-Cal budget for inpatient and outpatient services is spent for services rendered by rural hospitals, their participation is essential to preserve the integrity of the entire Medi-Cal program.

124805. (a) The Legislature recognizes the need to strengthen, and in some cases salvage, rural hospitals to ensure that adequate access to services is provided to residents of rural areas as well as tourists and travelers who, at certain times, may outnumber the residents. Further, the Legislature recognizes that this will require a comprehensive approach. Therefore, the Legislature intends that:

(1) Expertise be provided to endangered rural hospitals to both of the following:

(A) Carry out a strategic assessment of potential business and diversification of service opportunities.

(B) Develop a specific plan of action when feasible.

(2) Access, when appropriate, be provided to special eligibility programs within the California Health Facilities Financing Authority.

(3) Short-term technical assistance be available on fiscal and program matters.

(4) The department continue to provide regulatory relief through program flexibility.

(5) Inpatient reimbursement limitations be modified so as not to single out rural hospitals for application.

(6) Reimbursement rates for outpatient services be set at a level that will provide incentives for rural hospitals to focus on the provision of outpatient services and that will reduce the financial losses incurred by the facilities in providing those services.

(b) The Legislature recognizes that for certain rural settings, an acute care hospital as defined in subdivision (a) of Section 1250 may no longer be cost-effective. Therefore, a rural alternative model that preserves the primary and emergency care systems must be identified, studied through demonstration projects, and developed as a new category of health facility.

(c) The Legislature recognizes that a rural alternative facility may not conform to what is now depicted in state or federal regulation. Therefore, to identify a model, implement demonstration projects, and establish the rural alternative hospital as a license category of health facility, a cooperative effort will be required between the department, the federal Health Care Financing Administration, and the health care industry. To this end, the Legislature intends that the department inform the federal Health Care Financing Administration of its interest in establishing the rural alternative hospital program and subsequently seek any necessary waivers.

124810. Unless the context otherwise requires, the definitions contained in this article govern the construction of this chapter.

124815. ''Department'' means the State Department of Health Services.

124820. ''High-risk rural hospital,'' means a hospital as defined in subdivision (a) of Section 124840 that can demonstrate through audited and interim financial reports and projections that it is probable that it will need to cease operations within one year.

124825. The department shall, in consultation with an organization of interest, develop recommendations on the type and scope of technical assistance that needs to be available to small and rural hospitals from within the department. The recommendations

of an organization of interest shall be given consideration by the department in development of subsequent budgets.

124830. ''Director'' means the State Director of Health Services.

124835. ''Organizations of interest'' means nonprofit organizations that typically represent the interests of hospitals and health systems.

124840. ''Small and rural hospital'' means an acute care hospital that meets either of the following criteria:

(a) Meets the criteria for designation within peer group six or eight, as defined in the report entitled Hospital Peer Grouping for Efficiency Comparison, dated December 20, 1982.

(b) Meets the criteria for designation within peer group five or seven and has no more than 76 acute care beds and is located in an incorporated place or census designated place of 15,000 or less population according to the 1980 federal census.

124845. ''Strategically located'' means a hospital as defined in subdivision (a) of Section 124840 that, by virtue of its location, or the location of a major portion of the hospital's service area, can demonstrate that its existence is essential to provide health services including emergency services and stabilization to the service area and transient populations.

124850. The department shall provide expert technical assistance to strategically located, high-risk rural hospitals to assist the hospitals in carrying out an assessment of potential business and diversification of service opportunities. In providing the technical assistance on business opportunities, the department shall consult with the Department of Commerce and other appropriate agencies. The high-risk rural hospital, in cooperation with the department, may develop a short-term plan of action if, in its opinion, the results of the assessment so indicate. The department, in consultation with an organization of interest, shall do all of the following:

(a) Establish a process for identifying strategically located, high-risk rural hospitals and reviewing requests from the hospitals for assistance.

(b) Develop a standard format for the strategic assessment.

(c) Develop a model action plan.

(d) Establish criteria for review of action plans.

(e) Request input and assistance from organizations of interest.

(f) Make the strategic assessment format and model action plan available to all small and rural hospitals.

124855. Any small and rural hospital may apply to the California Health Facilities Financing Authority for consideration under special eligibility programs if the hospital has successfully completed the assessment and developed an action plan.

124860. (a) The department, after consultation with an organization of interest, shall select two strategically located, high-risk rural hospitals to plan and implement rural alternative

hospital demonstration projects. To the extent possible, the department shall choose two demonstration sites, with one site serving an isolated mountainous area where access may be impeded by adverse weather conditions, and one site located in a rural agricultural community. Hospitals shall be selected on the basis of their interest in becoming a demonstration site and on their suitability as model rural alternative hospitals. The demonstration projects shall include, but not be limited to, identification of the following:

(1) Appropriate mix and type of services to be provided locally and obtained on referral.

(2) Types and numbers of personnel required.

(3) Probability of, and the amount of, reimbursement under current regulations.

(4) Statutory and regulatory changes necessary to license the facility and maximize reimbursement.

(b) In administering the rural alternative hospital demonstration project, the department shall do all of the following:

(1) Establish two demonstration sites on or before January 1, 1990, and operate the projects for a period of up to 18 months.

(2) Grant exceptions to the licensure requirements for general acute care hospitals that are necessary to serve the purposes of this section when the granting of the exceptions do not jeopardize the health and welfare of patients.

(3) Convey to the Federal Health Care Financing Administration its intent to establish the rural alternative hospital demonstration project and seek any necessary appropriate waivers.

(4) Consider requests for grant funds made by demonstration site hospitals pursuant to subdivision (a) of Section 1188.86 as meeting criteria for priority funding.

(5) Monitor and evaluate demonstration site projects as to the applicability of these models for statewide application.

(c) The department, based on interim findings from the demonstration projects, shall do either of the following:

(1) Prepare and adopt regulations establishing the rural alternative hospital as a licensed health facility by January 1, 1992.

(2) Submit to the Legislature by that date a report detailing why a category of health facility should not be established.

124865. The department shall continue to provide regulatory relief when appropriate through program flexibility for such items as staffing, space, and physical plant requirements.

124870. (a) The department shall adopt regulations that will provide for an increase in reimbursement rates for outpatient services rendered to Medi-Cal patients by small and rural hospitals, as defined in Section 124840, over and above those reimbursement rates specified in Section 51509 of the California Code of Regulations. The amount of this increase shall be governed by the funding

allocated for this specific purpose in the Budget Act, or in another specific appropriation measure.

(b) The rate adjustment authorized by subdivision (a) shall be allocated to eligible hospitals as follows:

(1) A separate percentage increase shall be calculated for minimum floor and nonminimum floor hospitals based on the ratio of each small and rural hospitals' Medi-Cal outpatient payments to the total of all small and rural hospitals' Medi-Cal outpatient payments during the preceding calendar year, as determined by the department. The percentage rate increase for minimum floor hospitals shall be 125 percent of the rate increase percentage calculated for nonminimum floor hospitals. The combined rate increases for minimum floor and nonminimum floor hospitals shall not exceed the funds appropriated for this purpose.

(2) For purposes of this section, ''minimum floor hospital'' means a hospital (A) where Medi-Cal payments for outpatient services during the preceding calendar year were less than $^1/_2$ percent of the total of Medi-Cal payments for outpatient services rendered by all small and rural hospitals during that period and (B) where the total gross patient revenue from all sources during that period was less than two million five hundred thousand dollars ($2,500,000).

(3) For purposes of this section, ''nonminimum floor hospital'' means a hospital (A) where Medi-Cal payments for outpatient services during the preceding calendar year equaled or exceeded $^1/_2$ percent or of the total of Medi-Cal payments for outpatient services rendered by all small and rural hospitals during that period or (B) where the total gross patient revenue from all sources during that period was two million five hundred thousand dollars ($2,500,000) or more.

(c) For the purpose of calculating the percentage increase, if any eligible hospital had less than a full year of operation upon which to determine the ratio of Medi-Cal expenditures as defined in paragraph (1) of subdivision (b), the department shall extrapolate the Medi-Cal paid claims expenditures for that hospital to estimate a full year's Medi-Cal claims expenditure.

(d) Payment under this section shall be contingent upon submission of approved claims for Medi-Cal outpatient services rendered after January 1, 1989.

(e) The Director of Health Services shall adopt emergency regulations pursuant to Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code to implement the rate adjustments required under this section. The adoption of these regulations shall be deemed an emergency and necessary for the immediate preservation of the public peace, health, or safety. Notwithstanding any provision of Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code, emergency regulations adopted by the

department to implement the rate adjustments required under this section shall not be subject to any review, approval, or disapproval by the Office of Administrative Law at any stage of the rulemaking process. These regulations shall become effective immediately upon their filing with the Secretary of State.

(f) Notwithstanding any other provision of law, reimbursement rates adopted pursuant to this section shall not exceed the hospital's usual and customary charges for services rendered.

(g) The department shall maximize federal financial participation in implementing this section.

(h) This section shall become operative July 1, 1989.

CHAPTER 7. GRANTS IN AID FOR CLINICS

Article 1. Clinics

124875. The Legislature finds and declares that:

(a) In California there are approximately 300 community clinics and free clinics that provide primary health care at low cost for a significant portion of the medically underserved population.

(b) These clinics account for more than 3,000,000 patient visits annually.

(c) Increasingly large caseloads, the debilitating effects of inflation on purchased goods and services, and a lack of financial resources are forcing many community and free clinics to curtail services needed in their communities.

(d) Recognizing the contribution of community and free clinics to the health care of Californians and the contribution of the clinics to lowering the costs of health care, it is in the interest of the people of this state to ensure continuation of clinic programs by providing necessary funding.

124880. The department shall conduct a program of grants-in-aid for the following purposes:

(a) To assist in stabilizing the health care operations of community clinics and free clinics that provide a wide range of primary health care services.

(b) To fund innovative and creative programs of such clinics designed to provide a high quality of health services at minimum cost.

Eligibility for grants shall be limited to community clinics, free clinics, clinics exempt from licensure under subdivision (c) of Section 1206, and any nonprofit corporation that is comprised of not less than three such clinics having a combined service area covering an entire county or more. Grants authorized pursuant to this article shall be limited in purpose to defraying operating expenses of the recipient clinic, including personnel costs, and for technical assistance provided to the recipient. Grants shall not be made or used for purchase of equipment, facility renovations, or purchase of land or

buildings. As a condition to making a grant pursuant to this chapter, the director shall require the applicant to match not less than 20 or more than 40 percent of the amount granted. The required matching funds shall be determined by the director, based upon the ability of the applicant to provide matching funds. The required match may be in cash or in-kind contributions, or a combination of both. In-kind contributions may include, but shall not be limited to, staff and volunteer services. The director may waive all or a portion of the grantee match in individual cases of demonstrated hardship if the director determines that making the grant would effectively serve the purposes of this chapter. The director shall adopt criteria to be applied in determining whether to grant requests for waivers.

124885. The department shall annually receive and process grant applications submitted by eligible applicants, and shall allocate grant moneys in accordance with the policies and priorities adopted pursuant to this article. Individual grants shall be limited to a maximum of sixty thousand dollars ($60,000), including grants to nonprofit corporations comprised of more than one clinic. However, grants may be renewed on an annual basis, subject to the submission and review of an annual renewal application, that shall be considered with, and subject to the same priorities as, new applications. No applicant shall receive more than one grant in any year.

Each grant shall be subject to a contract between the department and the grantee prescribing the services to be provided by the grantee thereunder and other conditions of the grant. A contract may provide for periodic advance payments for services to be performed, but in no event shall advance payments exceed 25 percent of the grant.

124890. In developing policies and priorities pertaining to the allocation of grant funds, the department shall give primary consideration to the following factors:

(a) The applicant’s need for funds to continue its current level of operation.

(b) The applicant’s long-term prospects for financial stability.

(c) The quality of services provided.

(d) The high-risk or underserved population groups currently being served by the applicant.

All of the above factors being present, clinics primarily serving population groups determined by the director to be medically underserved shall be entitled to first consideration in the allocation of grant funds.

The department shall adopt guidelines for establishment of grant-supported activities, including criteria for evaluation of each activity and monitoring to assure compliance with grant conditions and applicable regulations of the department. The guidelines shall be developed in consultation with the Primary Care Clinics Advisory

Committee and other advisory committees and persons as the department determines are appropriate.

Article 2. Primary Care

124900. (a) The State Department of Health Services shall select primary care clinics that are licensed under paragraph (1) or (2) of subdivision (a) of Section 1204, or are exempt from licensure under subdivision (c) of Section 1206, to be reimbursed for delivering medical services, including preventative health care, and smoking prevention and cessation health education, to program beneficiaries. In selecting primary care clinics for reimbursement, the department shall give priority to clinics that provide services in a medically underserved area or to a medically underserved population as determined by the department.

(b) As a part of the award process for funding pursuant to this article, the department shall take into account the availability of primary care services in the various geographic areas of the state. The department shall determine which areas within the state have populations which have clear and compelling difficulty in obtaining access to primary care. The department shall consider proposals from new and existing eligible providers to extend clinic services to these populations. The department shall give equal consideration to all applicants, regardless of whether or not they have previously been funded for this program by the department.

(c) Each primary care clinic applying for funds pursuant to this article shall demonstrate that the funds shall be used to expand medical services, including preventative health care, and smoking prevention and cessation health education, for program beneficiaries based on the primary care clinic's projected increase in outpatient visits as compared to the outpatient visits provided in the 1988 calendar year.

(d) (1) For purposes of this article, an outpatient visit shall include, diagnosis and medical treatment services, including the associated pharmacy, X-ray, and laboratory services, and prevention health and case management services that are needed as a result of the outpatient visit. For a new patient, an outpatient visit shall also include a health assessment encompassing an assessment of smoking behavior and the patient's need for appropriate health education specific to related tobacco use and exposure.

(2) ''Case management'' includes, for this purpose, the management of all physician services, both primary and specialty, and arrangements for hospitalization, postdischarge care, and followup care.

(e) (1) Payment shall be on a per visit basis at a rate that is determined by the department to be appropriate for an outpatient

visit as defined in this section, not to exceed sixty-five dollars ($65) per outpatient visit.

In developing a statewide uniform rate for an outpatient visit as defined in this article, the department shall consider existing rates of payments for comparable outpatient visits. The department shall review the outpatient visit rate on an annual basis.

(2) The department may also pay for case management services, and may establish a separate, uniform statewide rate for these services which shall be paid in addition to the outpatient visit rate. The rate for case management shall not exceed 5 percent of the rate for an outpatient visit. If, upon establishment of the outpatient visit rate, the department determines that the rate of payment for case management is not adequate to cover the cost of the service, the department may increase the rate for case management, but the rate shall not exceed 10 percent of the outpatient visit rate.

In developing the separate, uniform statewide rate for case management, the department shall take into account rates paid to providers for case management services under any other program funded in whole or in part by the state or federal government. The rates shall be published in accordance with subdivision (e). The department shall review the case management rate on an annual basis.

(3) A primary care clinic may, at its option, and with department approval, provide and be paid for both outpatient visits and case management services.

(f) Not later than January 15 of each year, the department shall adopt and provide each clinic with a schedule for programs under this article, including the date for notification of availability of funds, the deadline for the submission of a completed application, and an anticipated contract award date for successful applicants.

(g) In administering the program created pursuant to this article, the department shall utilize the Medi-Cal program statutes and regulations pertaining to program participation standards, medical and administrative recordkeeping, the ability of the department to monitor and audit clinic records pertaining to program services rendered to program beneficiaries and take recoupments or recovery actions consistent with monitoring and audit findings, and the provider’s appeal rights. Each primary care clinic applying for program participation shall certify that it will abide by these statutes and regulations and other program requirements set forth in this article.

124905. For purposes of this article, a ‘‘program beneficiary’’ is any person whose income level is at or below 200 percent of the federal poverty level. Program beneficiaries shall not be required to provide any copayment for services that are funded pursuant to this article. The department shall annually adjust this income standard to reflect any changes in the federal poverty level. Payment pursuant

to this article shall be made only for services for which payment will not be made through any private or public third-party reimbursement.

124910. (a) Each eligible entity applying for funds under this article, as specified in subdivision (a) of Section 124900, shall demonstrate in its application that it is providing primary care services, to a medically underserved area or population. Any applicant who has applied for and received a federal or state designation for serving a medically underserved area or population shall be deemed to meet the requirements of subdivision (a) of Section 124900.

(b) Each applicant shall also demonstrate to the satisfaction of the department that the proposed services supplement, and do not supplant, those primary care services to program beneficiaries that are funded by any county, state, or federal program.

(c) Each applicant shall demonstrate that it is an active Medi-Cal provider by having a Medi-Cal provider number and diligently billing the Medi-Cal program for services rendered to Medi-Cal eligible patients during the past three months. This subdivision shall not apply to clinics that are not currently Medi-Cal providers, and were funded participants pursuant to this article during the 1993–94 fiscal year.

(d) Each application shall be evaluated by the state department prior to funding to determine all of the following:

(1) The number of program beneficiaries who are in the service area of the applicant, and the number of visits, the scope of primary care services, and the proposed total budget for outpatient visits provided to beneficiaries under this article. The applicant shall provide its most recently audited financial statement to verify budget information.

(2) The applicant's ability to deliver basic primary care to program beneficiaries.

(3) A description of the applicant's operational quality assurance program.

(4) The applicant's use of protocols for the most common diseases in the population served under this article.

124915. Services funded pursuant to this article shall be limited to the extent that funds are appropriated for this purpose.

124920. (a) The department shall utilize existing contractual claims processing services in order to promote efficiency and to maximize use of funds.

(b) The department shall certify which primary care clinics are selected to participate in the program for each specific fiscal year, and how much in program funds each selected primary care clinic will be allocated each fiscal year.

(c) The department shall make an advance payment for funds appropriated for services provided under this article to the selected

primary care clinics in an amount not to exceed 25 percent of a clinic's allocation for visits provided to program beneficiaries. These advance payments may only be made during the 1994–95 fiscal year.

(d) In the event the department's contractual claims processing service is not ready to accept and timely adjudicate program claims by August 15, 1994, the department shall reimburse clinic billings in excess of the advance payment until such time as the contractual claims processing mechanism is viable.

(e) The department shall pay claims from selected primary care clinics up to each clinic's annual allocation, adjusted for advance payments made under subdivision (c) and claims reimbursement made under subdivision (d). Once a clinic has exhausted its annual allocation, the state shall stop paying its program claims.

(f) The department may adjust any selected primary care clinic's allocation to take into account:

(1) An increase in program funds appropriated for the fiscal year.

(2) A decrease in program funds appropriated for the fiscal year.

(3) A clinic's projected inability to fully spend its allocation within the fiscal year.

(4) Surplus funds reallocated from other selected primary care clinics.

(g) The department shall notify all affected primary care clinics in writing prior to adjusting selected primary care clinics' allocations.

(h) Cessation of program payments under subdivision (e) or adjustment of selected primary care clinic's allocations under subdivision (f) shall not be subject to the Medi-Cal appeals process referenced in subdivision (g) of Section 124900.

124925. The department shall submit a report on its activities under this article to the Legislature no later than January 1, 1991, and annually thereafter.

124927. Final payment adjustments reflecting advance payments pursuant to this article shall be made pursuant to a plan of financial adjustment that is approved by the state department and submitted to the Controller.

124930. (a) For any condition detected as part of a child health and disability prevention screen for any child eligible for services under Section 140395, if the child was screened by the clinic or upon referral by a child health and disability prevention program provider, unless the child is eligible to receive care with no share of cost under the Medi-Cal program, is covered under another publicly funded program, or the services are payable under private coverage, a clinic shall, as a condition of receiving funds under this article, do all of the following:

(1) Insofar as the clinic directly provides these services for other patients, provide medically necessary followup treatment, including prescription drugs.

(2) Insofar as the clinic does not provide treatment for the condition, arrange for the treatment to be provided.

(b) (1) If any child requires treatment the clinic does not provide, the clinic shall arrange for the treatment to be provided, and the name of that provider shall be noted in the patient's medical record.

(2) The clinic shall contact the provider or the patient or his or her guardian, or both, within 30 days after the arrangement for the provision of treatment is made, and shall determine if the provider has provided appropriate care, and shall note the results in the patient's medical record.

(3) If the clinic is not able to determine, within 30 days after the arrangement for the provision of treatment is made, whether the needed treatment was provided, the clinic shall provide written notice to the county child health and disability prevention program director, and shall also provide a copy to the state director of the program.

(c) (1) For the 1994–95 and 1995–96 fiscal years, inclusive, the state department may establish a reimbursement program for referral case management services required pursuant to subdivision (b), provided to a child pursuant to subdivision (a).

(2) The department may utilize funds appropriated for the purposes of this article for reimbursements under paragraph (1).

(3) (A) The department shall evaluate the effectiveness of the referral case management program, including the extent to which children actually receive appropriate treatment for conditions detected as part of the Child Health and Disability Prevention Program examination.

(B) The department shall report the evaluation required by subparagraph (A) to the health policy committee of each house of the Legislature no later than April 1 of each year.

124935. (a) For the 1990–91 to 1993–94 fiscal years, inclusive, the department shall establish and maintain a primary care clinic risk pool in which the department shall assume responsibility to pay for dental treatment of a child by the primary care clinic subsequent to the clinic's meeting the requirements of subdivision (b) of Section 124930.

(b) Payment under this section shall be available when the clinic has done either of the following:

(1) Detected the condition as part of a child health and disability prevention screen pursuant to Section 124930 and has directly provided the treatment.

(2) Provided the treatment upon referral from another child health and disability prevention provider.

124940. The use of funds granted pursuant to this article for use by school-based clinics shall be limited to those school-based clinics that were licensed and in operation before January 1, 1990.

124945. Any entity or provider that receives funds pursuant to this article shall expend those funds in accordance with the requirements of Article 2 (commencing with Section 30121) of Chapter 2 of Part 13 of Division 2 of the Revenue and Taxation Code.

124950. This article shall remain operative only until July 1, 1996, and shall remain in effect only until January 1, 1997, and as of that date is repealed, unless a later enacted statute, which is effective on or before January 1, 1997, deletes or extends that date.

PART 5. HEREDITARY DISEASES/CONGENITAL DEFECTS

CHAPTER 1. GENETIC PREVENTION SERVICES

Article 1. Hereditary Disorders Act

124975. The Legislature hereby finds and declares that:

(a) Each person in the State of California is entitled to health care commensurate with his or her health care needs, and to protection from inadequate health services not in the person's best interests.

(b) Hereditary disorders, such as sickle cell anemia, cystic fibrosis, and hemophilia, are often costly, tragic, and sometimes deadly burdens to the health and well-being of the citizens of this state.

(c) Detection through screening of hereditary disorders can lead to the alleviation of the disability of some hereditary disorders and contribute to the further understanding and accumulation of medical knowledge about hereditary disorders that may lead to their eventual alleviation or cure.

(d) There are different severities of hereditary disorders, that some hereditary disorders have little effect on the normal functioning of individuals, and that some hereditary disorders may be wholly or partially alleviated through medical intervention and treatment.

(e) All or most persons are carriers of some deleterious recessive genes that may be transmitted through the hereditary process, and that the health of carriers of hereditary disorders is substantially unaffected by that fact.

(f) Carriers of most deleterious genes should not be stigmatized and should not be discriminated against by any person within the State of California.

(g) Specific legislation designed to alleviate the problems associated with specific hereditary disorders may tend to be inflexible in the face of rapidly expanding medical knowledge, underscoring the need for flexible approaches to coping with genetic problems.

(h) State policy regarding hereditary disorders should be made with full public knowledge, in light of expert opinion and should be constantly reviewed to consider changing medical knowledge and ensure full public protection.

(i) The extremely personal decision to bear children should remain the free choice and responsibility of the individual, and should not be restricted by the state.

(j) Participation of persons in hereditary disorders programs in the State of California should be wholly voluntary, except for initial screening for phenylketonuria (PKU) and other genetic disorders treatable through the California newborn screening program. All information obtained from persons involved in hereditary disorders programs in the state should be held strictly confidential.

(k) In order to minimize the possibility for the reoccurrence of abuse of genetic intervention in hereditary disorders programs, all programs offering screening programs for heredity disorders shall comply with the principles established in the Hereditary Disorders Act (Section 27). The Legislature finds it necessary to establish a uniform statewide policy for the screening for heredity disorder in the State of California.

124980. The director shall establish any regulations and standards for hereditary disorders programs as the director deems necessary to promote and protect the public health and safety, in accordance with the principles established pursuant to this section. These principles shall include, but not be limited to, the following:

(a) The public, especially communities and groups particularly affected by programs on hereditary disorders, should be consulted before any regulations and standards are adopted by the department.

(b) The incidence, severity and treatment costs of each hereditary disorder and its perceived burden by the affected community should be considered; and that where appropriate, state and national experts in the medical, psychological, ethical, social, and economic effects or programs for the detection and management of hereditary disorders be consulted by the department.

(c) Information on the operation of all programs on hereditary disorders within the state, except for confidential information obtained from participants in the programs, be open and freely available to the public.

(d) Clinical testing procedures established for use in programs, facilities, and projects be accurate, provide maximum information, and that the testing procedures selected produce results that are subject to minimum misinterpretation.

(e) No test or tests shall be performed on any minor over the objection of the minor’s parents or guardian, nor may any tests be performed unless the parent or guardian is fully informed of the purposes of testing for hereditary disorders, and is given reasonable opportunity to object to the testing.

(f) No testing, except initial screening for PKU and other diseases that may be added to the newborn screening program, shall require mandatory participation, and no testing programs shall require restriction of childbearing, and participation in a testing program

shall not be a prerequisite to eligibility for, or receipt of, any other service or assistance from, or to participate in, any other program, except where necessary to determine eligibility for further programs of diagnoses of or therapy for hereditary conditions.

(g) Counseling services for hereditary disorders be available through the program or a referral source for all persons determined to be or who believe themselves to be at risk for a hereditary disorder as a result of screening programs; the counseling is nondirective, emphasizes informing the client, and not require restriction of childbearing.

(h) All participants in programs on hereditary disorders be protected from undue physical and mental harm, and except for initial screening for PKU and other diseases that may be added to newborn screening programs, be informed of the nature of risks involved in participation in the programs, and those determined to be affected with genetic disease be informed of the nature, and where possible, the cost of available therapies or maintenance programs, and be informed of the possible benefits and risks associated with such therapies and programs.

(i) All testing results and personal information generated from hereditary disorders programs be made available to an individual over 18 years of age, or to the individual's parent or guardian. If the individual is a minor or incompetent, all testing results that have positively determined the individual to either have, or be a carrier of, a heredity disorder shall be given through a physician or other source of health care.

(j) All testing results and personal information from hereditary disorders programs obtained from any individual, or from specimens from any individual, be held confidential and be considered a confidential medical record except for such information as the individual, parent, or guardian consents to be released; provided that the individual is first fully informed of the scope of the information requested to be released, of all of the risks, benefits, and purposes for the release, and of the identity of those to whom the information will be released or made available, except for statistical data compiled without reference to the identity of any individual, and except for research purposes, provided that pursuant to 45 Code of Federal Regulations Section 46.101 et seq. entitled ''Protection of Human Subjects,'' the research has first been reviewed and approved by an institutional review board that certifies the approval to the custodian of the information and further certifies that in its judgment the information is of such potentially substantial public health value that modification of the requirement for legally effective prior informed consent of the individual is ethically justifiable.

(k) An individual whose confidentiality has been breached as a result of any violation of the provisions of the Hereditary Disorders Act (Section 27) may recover compensatory damages, and in

addition, may recover civil damages not to exceed ten thousand dollars ($10,000), reasonable attorney's fees, and the costs of litigation.

124985. A violation of any of the provisions of the Hereditary Disorders Act (Section 27) or any of the regulations adopted pursuant to that act shall be punishable as a misdemeanor.

124990. For the purposes of the Hereditary Disorders Act (Section 27), hereditary disorders programs shall include, but not be limited to, all antenatal, neonatal, childhood, and adult screening programs, and all adjunct genetic counseling services.

124995. The following programs shall comply with the regulations established pursuant to the Hereditary Disorders Act (Section 27):

(a) The California Children's Services Program under Article 5 (commencing with Section 123800) of Chapter 3 of Part 2.

(b) Prenatal testing programs for newborns under Sections 125050 to 125065, inclusive.

(c) Medical testing programs for newborns under the Maternal and Child Health Program Act (Section 27).

(d) Programs of the genetic disease unit under Section 125000.

(e) Child health disability prevention programs under Article 6 (commencing with Section 124025) of Chapter 3 of Part 2 and Section 120475.

(f) Genetically handicapped person's programs under Article 1 (commencing with Section 125125) of Chapter 2.

(g) Medi-Cal Benefits Program under Article 4 (commencing with Section 14131) of Chapter 7 of Part 3 of Division 9 of the Welfare and Institutions Code.

Article 2. Newborn Screening

125000. (a) It is the policy of the State of California to make every effort to detect, as early as possible, phenylketonuria and other preventable heritable or congenital disorders leading to mental retardation or physical defects.

The department shall establish a genetic disease unit, that shall coordinate all programs of the department in the area of genetic disease. The unit shall promote a statewide program of information, testing, and counseling services and shall have the responsibility of designating tests and regulations to be used in executing this program.

The information, tests, and counseling for children shall be in accordance with accepted medical practices and shall be administered to each child born in California once the department has established appropriate regulations and testing methods. The information, tests, and counseling for pregnant women shall be in accordance with accepted medical practices and shall be offered to

each pregnant woman in California once the department has established appropriate regulations and testing methods. These regulations shall follow the standards and principles specified in Section 124980. The department may provide laboratory testing facilities or contract with any laboratory that it deems qualified to conduct tests required under this section. However, notwithstanding Section 125005, provision of laboratory testing facilities by the department shall be contingent upon the provision of funding therefor by specific appropriation to the Genetic Disease Testing Fund enacted by the Legislature. If moneys appropriated for purposes of this section are not authorized for expenditure to provide laboratory facilities, the department may nevertheless contract to provide laboratory testing services pursuant to this section and shall perform laboratory services, including, but not limited to, quality control, confirmatory, and emergency testing, necessary to ensure the objectives of this program.

(b) The department shall charge a fee for any tests performed pursuant to this section. The amount of the fee shall be established and periodically adjusted by the director in order to meet the costs of this section.

(c) The department shall inform all hospitals or physicians and surgeons, or both, of required regulations and tests and may alter or withdraw any of these requirements whenever sound medical practice so indicates.

(d) This section shall not apply if a parent or guardian of the newborn child objects to a test on the ground that the test conflicts with his or her religious beliefs or practices.

(e) The genetic disease unit is authorized to make grants or contracts or payments to vendors approved by the department for all of the following:

(1) Testing and counseling services.

(2) Demonstration projects to determine the desirability and feasibility of additional tests or new genetic services.

(3) To initiate the development of genetic services in areas of need.

(4) To purchase or provide genetic services from any sums as are appropriated for this purpose.

(f) The genetic disease unit shall evaluate and prepare recommendations on the implementation of tests for the detection of hereditary and congenital diseases, including, but not limited to, cystic fibrosis and congenital adrenal hyperplasia. The genetic disease unit shall also evaluate and prepare recommendations on the availability and effectiveness of preventative followup interventions, including the use of specialized medically necessary dietary products.

It is the intent of the Legislature that funds for the support of the evaluations and recommendations required pursuant to this

subdivision, and for the activities authorized pursuant to subdivision (e), shall be provided in the annual Budget Act appropriation from the Genetic Disease Testing Fund.

(g) Health care providers that contract with a prepaid group practice health care service plan that annually has at least 20,000 births among its membership, may provide, without contracting with the department, any or all of the testing and counseling services required to be provided under this section or the regulations adopted pursuant thereto, if the services meet the quality standards and adhere to the regulations established by the department and the plan pays that portion of a fee established under this section that is directly attributable to the department's cost of administering the testing or counseling service and to any required testing or counseling services provided by the state for plan members. The payment by the plan, as provided in this subdivision, shall be deemed to fulfill any obligation the provider or the provider's patient may have to the department to pay a fee in connection with the testing or counseling service.

(h) The adoption of regulations pursuant to this section shall be deemed to be an emergency, and necessary for the immediate preservation of the public peace, health, safety, and general welfare. Notwithstanding subdivision (h) of Section 11346.1 and Section 11349.6 of the Government Code, the director shall transmit regulations adopted pursuant to this section directly to the Secretary of State for filing. The regulations shall be filed by the Secretary of State as emergency regulations and shall become effective immediately.

(i) The department may appoint experts in the area of genetic screening, including, but not limited to, cytogenetics, molecular biology, prenatal, specimen collection, and ultrasound to provide expert advice and opinion on the interpretation and enforcement of regulations adopted pursuant to this section. These experts shall be designated agents of the state with respect to their assignments. These experts shall receive no salary, but shall be reimbursed for expenses associated with the purposes of this section. All expenses of the experts for the purposes of this section shall be paid from the Genetic Disease Testing Fund.

(j) Notwithstanding Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code, any emergency regulations adopted by the department pursuant to this section shall not be repealed by the Office of Administrative Law and shall remain in effect until revised or repealed by the department.

125005. The Genetic Disease Testing Fund is continued in existence as a special fund in the State Treasury. All moneys collected by the department under Section 125000 shall be deposited in the Genetic Disease Testing Fund, that is continuously appropriated to the department to carry out the purposes of Section 125000.

It is the intent of the Legislature that the program carried out pursuant to Section 125000 be fully supported from fees collected for such testing.

Article 3. Sickle Cell Anemia

125025. It is the policy of the State of California to make every effort to detect, as early as possible, sickle cell anemia, a heritable disorder that leads to physical defects.

The department shall have the responsibility of designating tests and regulations to be used in executing this policy. These tests shall be in accordance with accepted medical practices.

Testing for sickle cell anemia may be conducted at the following times:

(a) Upon first enrollment of a child at an elementary school in this state, the child may be tested.

(b) For any child not tested pursuant to subdivision (a), upon first enrollment at a junior high school or senior high school in this state, as the case may be, the child may be tested.

(c) Upon application of any person for a license to marry, the parties seeking to be married may be tested.

(d) At any other times that the department may designate.

This section shall not apply if a parent or guardian of a minor child sought to be tested or any adult sought to be tested objects to the test on the ground that the test conflicts with his or her religious beliefs or practices.

125030. The department may require that a test be given for sickle cell anemia pursuant to Section 125025 to any identifiable segment of the population that the department determines is susceptible to sickle cell anemia at a disproportionately higher ratio than is the balance of the population.

125035. The department is authorized to make grants or contracts for demonstration projects to determine the feasibility of alternate methods of testing for sickle cell anemia, to provide counseling services, to evaluate the social consequences of the identification of sickle cell trait carriers, to provide training in genetic counseling, and to conduct research on the prevention of sickle cell anemia.

Article 4. Prenatal Testing

125050. The department shall administer a statewide program for the prenatal testing for genetic disorders and birth defects, including, but not limited to, ultrasound, amniocentesis, chorionic villus sampling, and blood testing for genetic disorders and birth defects.

125055. The department shall:

(a) Establish criteria for eligibility for the prenatal testing program. Eligibility shall include definition of conditions and

circumstances that result in a high risk of a detectable genetic disorder or birth defect.

(b) Develop an education program designed to educate physicians and surgeons and the public concerning the uses of prenatal testing and the availability of the program.

(c) Ensure that genetic counseling be given in conjunction with prenatal testing at the approved prenatal diagnosis centers.

(d) Designate sufficient prenatal diagnosis centers to meet the need for these services. Prenatal diagnosis centers shall have equipment and staff trained and capable of providing genetic counseling and performing prenatal diagnostic procedures and tests, including the interpretation of the results of the procedures and tests.

(e) Administer a program of subsidy grants for approved nonprofit prenatal diagnosis centers. The subsidy grants shall be awarded based on the reported number of low-income women referred to the center, the number of prenatal diagnoses performed in the previous year at that center, and the estimated size of unmet need for prenatal diagnostic procedures and tests in its service area. This subsidy shall be in addition to fees collected under other state programs.

(f) Establish any rules, regulations, and standards for prenatal diagnostic testing and the allocation of subsidies as the director deems necessary to promote and protect the public health and safety and to implement the Hereditary Disorders Act (Section 27).

125060. The participation by any individual in the prenatal testing program shall be wholly voluntary and shall not be a prerequisite to eligibility for, or receipt of, any other service or assistance from, or to participation in, any other program.

125065. All prenatal diagnosis centers shall meet standards developed by the department and shall agree to accept patients from state funded or administered programs, including, but not limited to, Medi-Cal, Regional Centers, Maternal and Child Health, California Children's Services, Genetically Handicapped Persons Program, and Family Planning. Only prenatal diagnosis centers meeting standards developed by the department shall be eligible for reimbursement under these state programs.

125070. (a) Laboratories licensed by the Department of Health Services shall not offer the maternal serum-alpha fetoprotein screening test for prenatal detection of neural tube defects of the fetus until the department has developed regulations, under the authorization granted by Section 124980. However, laboratories providing this testing, as of July 21, 1983, may continue to provide this testing until these regulations become operative. The department shall adopt regulations pursuant to this section.

(b) The adoption of regulations pursuant to this section shall be deemed to be an emergency, and necessary for the immediate preservation of the public peace, health, safety, and general welfare.

Notwithstanding subdivision (h) of Section 11346.1 and Section 11349.6 of the Government Code, the director shall transmit regulations adopted pursuant to this section directly to the Secretary of State for filing. The regulations shall be filed by the Secretary of State as emergency regulations and shall become effective immediately.

(c) Notwithstanding Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code, any emergency regulations adopted by the department pursuant to this section shall not be repealed by the Office of Administrative Law and shall remain in effect until revised or repealed by the department.

125075. Every licensed physician and surgeon or other person attending a newborn infant diagnosed as having had rhesus (Rh) isoimmunization hemolytic disease shall report the condition to the department on report forms prescribed by the department.

125080. A licensed physician and surgeon or other person engaged in the prenatal care of a pregnant woman or attending the woman at the time of delivery shall obtain or cause to be obtained a blood specimen of the woman. Prior to obtaining the blood specimen, the woman shall be notified of the fact that the blood specimen is going to be obtained. If the blood specimen is not obtained prior to delivery, it shall be obtained at the time of delivery.

125085. (a) A blood specimen obtained pursuant to Section 125080 shall be submitted to a clinical laboratory licensed by the department or to an approved public health laboratory for a determination of rhesus (Rh) blood type and the results shall be reported to both of the following:

(1) The physician and surgeon or other person engaged in the prenatal care of the woman or attending the woman at the time of delivery.

(2) The woman tested.

(b) In addition, a blood specimen obtained pursuant to Section 125080 shall be submitted to a clinical laboratory licensed by the department or to an approved public health laboratory for a test to determine the presence of hepatitis B surface antigen. In the event that other tests to determine hepatitis B infection become available, the department may approve additional tests.

125090. (a) Subdivision (a) of Section 125085 shall not be applicable if the licensed physician and surgeon or other person engaged in the prenatal care of a pregnant woman or attending the woman at the time of delivery has knowledge of the woman's blood type and accepts responsibility for the accuracy of the information.

(b) Subdivision (b) of Section 125085 shall not be applicable if the licensed physician and surgeon or other person engaged in the prenatal care of a pregnant woman or attending the woman at the time of delivery has knowledge that the woman has previously been

determined to be chronically infected with hepatitis (B) and accepts responsibility for the accuracy of the information.

125095. The department may adopt regulations as it determines are reasonably necessary for the implementation of the Maternal and Child Health Program Act (Section 27).

125100. (a) Clinical laboratories licensed by the department, approved public health laboratories, local health departments, physicians and surgeons, or other persons engaged in the prenatal care of a pregnant woman or in the care of an infant shall maintain and make available to the department information necessary to evaluate, for public health purposes, the effectiveness of testing and followup treatment for the prevention of perinatally transmitted hepatitis B infection.

(b) The department shall make available, to the extent state funds are appropriated therefor in the annual Budget Act or federal funds are available for that purpose, money to each county requesting funds for testing and followup treatment for the prevention of perinatally transmitted hepatitis B infection or for any functions performed pursuant to subdivision (a). The money shall be allocated by the department on the basis of the incidence of perinatally transmitted hepatitis B infection and the need for necessary followup treatment and evaluation in the requesting county.

125105. (a) The blood specimen and test results pursuant to subdivision (b) of Section 125085 shall be confidential and shall not be disclosed, except as otherwise provided by law.

(b) No person shall be compelled in any state, county, city, or other local civil, criminal, administrative, legislative, or other proceeding to provide test results determined pursuant to Section 125080 and Section 125085.

125110. The Maternal and Child Health Program Act (Section 27) shall not apply if the pregnant woman objects to the test required by that act on the ground that the test conflicts with her religious beliefs or practices.

CHAPTER 2. GENETIC DISEASE SERVICES

Article 1. Genetically Handicapped Persons Program

125125. This article shall be known and may be cited as the Holden-Moscone-Garamendi Genetically Handicapped Person's Program.

125130. The Director of Health Services shall establish and administer a program for the medical care of persons with genetically handicapping conditions, including cystic fibrosis, hemophilia, sickle cell disease, Huntington's disease, Friedreich's Ataxia, Joseph's disease, Von Hippel-Landau syndrome, and the following hereditary metabolic disorders: phenylketonuria, homocystinuria, branched

chain amino acidurias, disorders of propionate and methylmalonate metabolism, urea cycle disorders, hereditary orotic aciduria, Wilson's Disease, galactosemia, disorders of lactate and pyruvate metabolism, tyrosinemia, hyperornithinemia, and other genetic organic acidemias that require specialized treatment or service available from only a limited number of program-approved sources.

The program shall also provide access to social support services, that may help ameliorate the physical, psychological, and economic problems attendant to genetically handicapping conditions, in order that the genetically handicapped person may function at an optimal level commensurate with the degree of impairment.

The medical and social support services may be obtained through physicians and surgeons, genetically handicapped person's program specialized centers, and other providers that qualify pursuant to the regulations of the department to provide the services. ''Medical care,'' as used in this section, is limited to noncustodial medical and support services.

The director, with the guidance of the Advisory Committee on Genetically Handicapped Person's Program, may, by regulation, expand the list of genetically handicapping conditions covered under this article. The director shall adopt regulations that are necessary for the implementation of this article. The director, with the approval of the advisory committee, shall establish priorities for the use of funds and provision of services under this article.

125135. As used in this article, ''genetically handicapping condition'' shall mean a disease that is accepted as being genetic in origin by the American Society of Human Genetics.

125140. The program established under this article shall include any or all of the following medical and social support services:

(a) Initial intake and diagnostic evaluation.

(b) The cost of blood transfusion and use of blood derivatives, or both.

(c) Rehabilitation services, including reconstructive surgery.

(d) Expert diagnosis.

(e) Medical treatment.

(f) Surgical treatment.

(g) Hospital care.

(h) Physical and speech therapy.

(i) Occupational therapy.

(j) Special treatment.

(k) Materials.

(*l*) Appliances and their upkeep, maintenance, and care.

(m) Maintenance, transportation, or care incidental to any other form of services.

(n) Respite care or other existing resources (e.g., sheltered workshops).

(o) Genetic and long-term psychological counseling.

(p) Appropriate administrative staff resources to carry out this article. The staff shall include, but not be limited to, at least one case manager per each 350 clients.

125145. The director shall appoint an 11-member Advisory Committee on Genetically Handicapped Person's Program composed of professional and consumer representatives who shall serve without compensation and at the discretion of the director. The director shall seek the advice of the advisory committee with respect to regulations to be adopted pursuant to this article.

125150. The director shall establish the rate structure for reimbursement of physicians and supportive services. The rates shall not be less than the amounts paid for provider services under the Medi-Cal Act (Chapter 7 (commencing with Section 14000) of Part 3 of Division 9 of the Welfare and Institutions Code).

125155. Reimbursement under this article shall not be made for any services that are available to the recipient under any other private, state, or federal programs or under other contractual or legal entitlements, except for those instances where the department determines that prolonged use of employer health insurance would jeopardize the recipient's employment. However, no provision in this article shall be construed as limiting in any way state participation in any federal governmental program for medical care of persons with genetically handicapping conditions.

125160. The department shall receive and expend all funds made available to it by the federal government, the state, its political subdivisions or from other sources for the purposes of this article. Payment for genetically handicapped person's program shall be made by the department.

125165. (a) The department shall determine and establish an enrollment fee for the services provided pursuant to this article.

(b) Beginning July 1, 1993, each client eligible for services shall pay an annual enrollment fee to the department, except as provided in subdivision (f).

(c) (1) The annual enrollment fee schedule shall be a sliding scale based upon family size and income and shall be identical to the fee schedule established under Section 123900. The department shall adjust the scale to reflect changes in the federal poverty level. Family size shall be based upon the number of persons living with the applicant who are dependent upon the family income. Family income shall include the total gross income of the applicant and other individuals living with the applicant.

(2) Until July 1, 1995, the annual enrollment fee for eligible participants who use the Genetically Handicapped Persons Program but receive only case management services provided by the program shall be determined by using 50 percent of the amount specified in the sliding scale. On or before July 1, 1995, the department shall evaluate the revenue enhancement resulting from the use of this

reduced enrollment fee schedule for persons who receive only case management services. After July 1, 1995, all eligible participants shall pay the enrollment fee established pursuant to paragraph (1).

(d) Notwithstanding any other subdivision, those persons whose family income exceeds forty thousand dollars ($40,000) per year and whose cost of care is 20 percent or less of the family's adjusted gross income shall pay either the enrollment fee or the cost of care, whichever is greater. Those persons whose family income exceeds forty thousand dollars ($40,000) per year and whose cost of care exceeds 20 percent of the family's adjusted gross income shall pay the enrollment fee.

(e) Payment of the enrollment fee is a condition of program participation and is independent of any other outstanding obligations to the program. The department may arrange for periodic payment during the year if it determines a lump-sum payment will be a hardship for the family. The director, on a case-by-case basis, may waive or reduce the amount of an enrollment fee if the director determines payment of the fee will result in undue hardship. Otherwise, failure to pay or arrange for payment of the enrollment fee within 60 days of the due date shall result in disenrollment and ineligibility for coverage of treatment services effective 60 days after the due date of the fee.

(f) The enrollment fee shall not be charged in the following cases:

(1) The client is eligible for the full scope of Medi-Cal benefits, without being required to pay a share of cost, at the time of enrollment fee determination.

(2) The family of the client otherwise eligible to receive services has a gross annual income of less than 200 percent of the federal poverty level.

(g) Upon determination of program eligibility, the department shall enter into an agreement with the applicant or client legally responsible for that applicant for payment of the enrollment fee.

(h) All enrollment fees shall be used in support of the program for services established under this article.

125170. The department shall maintain sufficient, appropriate staff to carry out this article.

125175. The health care benefits and services specified in this article, to the extent that the benefits and services are neither provided under any other federal or state law nor provided nor available under other contractual or legal entitlements of the person, shall be provided to any patient who is a resident of this state and is made eligible by this article. After the patient has utilized the contractual or legal entitlements, the payment liability under Section 125165 shall then be applied to the remaining cost of genetically handicapped person's services.

125180. The department shall require all applicants to the program who may be eligible for cash grant public assistance or for

Medi-Cal to apply for Medi-Cal eligibility prior to becoming eligible for funded services.

Article 2. Long-Term Care for Degenerative Genetic Disease

125200. The Legislature finds and declares that there are many persons in California who are victims of chronic and degenerative genetic conditions, who experience a wide range of degenerating conditions including mental and physical deterioration. For some of these conditions, there is no known prior detection or subsequent treatment.

The Legislature further finds and declares that appropriate supportive care services, both in and out of the home, are very often unavailable, due to the lack of resource identification and referral, and the lack of case management services.

125205. The department and the State Department of Social Services shall, after consultation with the Genetically Handicapped Persons Program of the department, from the Genetically Handicapped Persons Program Advisory Committee, and from consumer organizations representing persons with chronic and degenerative conditions, as defined in Section 125210, compile a list of long-term care resources that serve adults with chronic and degenerative conditions, as defined. The list of resources shall include those that have already been identified by the Genetically Handicapped Persons Program as serving persons with Huntington's disease, Joseph's disease, and Friedrich's ataxia, and shall include those that have already been identified by consumer organizations representing persons with chronic and degenerative conditions. The list of resources shall include, but not be limited to, the following:

(a) Public and private skilled nursing facilities and intermediate care facilities.

(b) Public and private community residential care facilities.

(c) Public and private out-of-home long-term care resources such as day activity programs, and in-home support service programs. Nothing in this section shall require the Department of Health Services to undertake a survey of long-term care facilities or programs in the state for the purposes of carrying out the requirements of this section.

The information shall be made available to the public, upon request, through the Genetically Handicapped Persons Program of the department.

125210. For the purposes of this article, chronic and degenerative diseases shall include those conditions that are neurological and neuromuscular in origin, including such disorders as Huntington's disease, Friedrich's ataxia, Joseph's disease, and other disorders that are determined by the department to be similar in origin and clinical manifestation to the named disorders, and that affect adults.

125215. The department and the State Department of Social Services shall review regulations that currently provide disincentives to providers of in-home and out-of-home long-term care resources, as defined in Section 125205, to accept and serve persons with chronic and degenerative disorders. The review shall be conducted with assistance and input from the Genetically Handicapped Persons Program of the department, and from the Genetically Handicapped Persons Program Advisory Committee. These departments shall provide a list of those regulations to the Legislature by September 1, 1982. The regulations subject to review shall be those regulations that do the following:

(a) Affect the admission of patients to state-licensed skilled nursing facilities, intermediate care facilities, and community residential care facilities.

(b) Affect the staffing ratios necessary to care for persons with chronic and degenerative conditions, as defined, within those facilities.

(c) Affect the likelihood of facilities, or of day care programs and in-home support service programs, to refuse the admission of persons with chronic and degenerative conditions, solely on the basis of anticipated jeopardy to their licensing, or on the basis of anticipated liability to the facilities arising from instances where a person's degenerative condition, by its own clinical merits, results in medical complications that are, in fact, entirely unrelated to the quality of care provided by the facility or program.

125220. The actions undertaken pursuant to this article shall not impose additional state obligations or expenditures for the care of persons with chronic and degenerative conditions, as defined by this article, unless the Legislature enacts a statute specifically appropriating money for the additional obligations or expenditures.

Article 3. Huntington's Disease Research and Workshop Grants

125225. The Legislature hereby finds and declares that:

(a) Huntington's disease is a chronic progressive inherited disorder of the central nervous system.

(b) The constellation of mental and physical symptoms, the insidious onset of the disorder, and the torment of those at-risk, waiting throughout their lives to learn if they have been spared, conspire to make ''Huntington's disease one of the most diabolical diseases known to man.'' Each child of a patient with Huntington's disease has a 50/50 chance of getting the disease.

(c) Males, females, and all ethnic groups may be affected and there is no effective treatment or cure. Because so little is known about the disease, many people are misdiagnosed and mistreated.

(d) The suicide rate among Huntington's disease patients is estimated to be seven times the national rate.

(e) The advancement of scientific knowledge about Huntington's disease, that, because of its extraordinary range of symptoms, serves as an excellent prototype for other major chronic genetic, neurologic, and psychiatric illnesses and diseases of aging, such as epilepsy, muscular dystrophy, and Parkinson's disease, will reveal fundamental scientific information that may lead to treatment, prevention, and ultimately a cure for an array of inherited disorders that affect millions.

125230. The director may establish any rules or criteria for grants under this article as the director deems necessary.

125235. There is hereby created a Scientific Advisory Review Committee. The membership of the committee shall be composed of 11 members who shall be representatives from each of the following:

(a) Two from the University of California.

(b) One from Stanford University.

(c) One from the California Institute of Technology.

(d) One from the Hereditary Disease Foundation.

(e) One from the City of Hope.

(f) One from the Health and Welfare Agency appointed by the Secretary of the Health and Welfare Agency.

(g) One appointed by the Speaker of the Assembly.

(h) One appointed by the President pro Tempore of the California Senate.

(i) One from the National Huntington's Disease Association.

(j) One from the Committee to Combat Huntington's Disease.

Except as otherwise provided in this section, members of the committee shall be appointed by the director, who shall make the appointments based upon recommendations from the entity or organization represented.

The members of the committee shall serve at the pleasure of the appointing power. The members of the committee shall serve without compensation, but shall be reimbursed for necessary and travel expenses incurred in the performance of the duties on the committee.

The Scientific Advisory Review Committee is hereby abolished one year after the grants under this article have been made by the director.

125240. Pursuant to the rules or criteria as the director may deem necessary, the Scientific Advisory Review Committee shall review and recommend approval of grant applications and monitor programs receiving grants under this article.

125245. The director may make grants as follows:

(a) Individual research grants to scientists and facilities residing in this state that have research experience with basic and clinical investigations on Huntington's disease and related disorders. Individual research grants shall not exceed twenty thousand dollars ($20,000).

(b) Interdisciplinary workshop grants to scientists and facilities for the purposes of facilitating interchange among an interdisciplinary group of investigators regarding problems in the treatment and care of patients as well as basic research, all of which may be applicable to a variety of genetic or neuro-degenerative disorders in addition to Huntington's disease. Individual workshop grants shall not exceed twelve thousand five hundred dollars ($12,500).

125250. Not more than 10 percent of any money appropriated for purposes of this article shall be utilized for the administration of this article.

Article 4. Alzheimer's Disease

125275. (a) The Legislature finds that Alzheimer's disease, a devastating disease that destroys certain vital cells of the brain, affects more than 1,500,000 Americans. The Legislature also finds that Alzheimer's disease and related disorders are responsible for 50 percent of all nursing home admissions and Alzheimer's disease is the fourth leading cause of death in adults. The Legislature recognizes that the disease has serious emotional, financial, and social consequences for its victims and their families.

(b) The Legislature recognizes that the cause of Alzheimer's disease is presently unknown, and there is no established treatment that can cure, reverse, or stop the progression of Alzheimer's disease. The Legislature also recognizes that research is the only hope for victims and families. The Legislature finds that existing diagnostic and treatment centers have improved the quality of care available to the victims of Alzheimer's disease and increased knowledge with respect to Alzheimer's disease and related disorders. These centers provide clinical opportunities for research and facilitate the collection of essential data regarding Alzheimer's disease and related disorders, while at the same time providing valuable services such as information and referral, counseling, and training to victims and their families. It is the intent of the Legislature, in enacting this article, to encourage the establishment of geographically dispersed diagnostic and treatment centers for Alzheimer's disease within every postsecondary higher educational institution with a medical center, and to encourage research to discover the cause of, and a cure for, Alzheimer's disease.

(c) The functions of the diagnostic and treatment centers shall be designed to serve all of the following purposes:

(1) To provide diagnostic and treatment services and improve the quality of care to victims of Alzheimer's disease.

(2) To increase research by faculty and students in discovering the cause of, and a cure for, Alzheimer's disease.

(3) To provide training, monitoring, consultation, and continuing education to the families of those who are affected by Alzheimer's disease.

(4) To increase the training of health care professionals with respect to Alzheimer's disease.

125280. (a) Any postsecondary higher educational institution with a medical center may establish diagnostic and treatment centers for Alzheimer's disease subject to the department's grants review process.

(b) The department shall administer grants to postsecondary higher educational institutions that establish diagnostic and treatment centers pursuant to subdivision (a).

(c) Funds appropriated for the purposes of this article by the Statutes of 1987 shall first be used to maintain and enhance, as determined by the department, existing centers and to prevent program cutbacks under subdivision (b).

(d) Alzheimer's disease grants for the purpose of establishing a diagnostic and treatment center shall be used only for the purposes of this article, including, but not limited to, all of the following:

(1) Salary and benefits for faculty, residents, fellows, and staff of the diagnostic and treatment center.

(2) Costs of supplies and equipment.

(3) Research grants for faculty research to discover the cause of, and a cure for, Alzheimer's disease.

(4) Research grants for students, residents, and fellows.

(5) General administrative costs of up to 8 percent of the total grant.

(e) The department shall establish criteria for requests for Alzheimer's disease diagnostic and treatment center grants and Alzheimer's disease research grants, and for program evaluation.

(f) No grant awarded pursuant to this article shall be approved for any amount that exceeds 25 percent of the total amount of funds appropriated for this purpose in the 1987–88 Regular Session of the Legislature.

(g) The department shall administer a grant program for the purpose of research into the causes, treatment, cure, strategies for coping with, prevention, incidence, and prevalence of Alzheimer's disease and related disorders. Priority shall be given to grant applications for feasibility studies, startup grants, and matching funds for federal and privately funded research grants. Consideration shall be given to proposals that link service delivery and collect data relative to patient care and the delivery of social services. This research may include, but is not limited to, examinations and recommendations for the improvement of the family, community-based and health care support systems available to Alzheimer's disease victims, and their caregivers.

(h) Upon request, the department shall make available to the Legislature information regarding the progress of the grant programs established pursuant to this article.

(i) The department shall reduce any grant pursuant to this article by the amount of any federal funds available for the same purposes to the same grantee.

PART 6. HOSPITALS (Reserved)

PART 7. CHRONIC DISEASE SERVICES

CHAPTER 1. KIDNEY DISEASES-CHRONIC UREMIA

125500. (a) Up to four regional dialysis centers with up to two in the northern and up to two in the southern part of the state, shall be established for the treatment of persons suffering from chronic uremia. Each center shall be located in a metropolitan area and shall have an affiliation with a large hospital or medical school, but shall not be necessarily a physical part of the institution. These institutions, however, shall be able to provide a full range of medical, surgical and rehabilitation services. The department shall only act as a granting agency for state funds that are appropriated for the establishment and the continuation of the four centers. The department, upon the advice of the review committee that is provided for by Section 125515, may contract with any hospital or medical care institution for the administration and operation of one of the regional dialysis centers. It is not the intent of this section that any new hospital or medical school be established.

(b) Any moneys appropriated by Chapter 1416 of the Statutes of 1972 may be used either in existing dialysis and kidney transplantation programs for children or to establish new programs for such purposes. Any new or existing dialysis center funded pursuant to this subdivision shall provide for children the same center dialysis, home dialysis, and outpatient clinic services as are provided under Section 125530. Any new center funded pursuant to this subdivision shall be designated as a pediatric renal failure center. Funds granted for aid to children under this subdivision shall be based upon need as determined by the Renal Dialysis Review Committee established pursuant to Section 125515 and an evaluation by the department of a county’s ability to fund their one-fourth share of a child’s care under the Crippled Children’s Services Program. The funds shall only cover costs not recoverable from direct or third party payments. A pediatric renal failure center may use funds provided under this subdivision for payment of costs for kidney transplantation services at any hospital that is authorized to perform these services by the department. For purposes of this subdivision, a child is any person 18 years of age or under.

125505. The dialysis centers shall be designed primarily to provide lifesaving dialysis services to approximately 30 patients in each center. Funds shall be provided for developing home dialysis treatment services for approximately 20 patients in each center and the necessary specialized personnel and equipment to operate each center. Funds for construction of the centers shall also be provided. The centers shall develop and utilize newer methods of dialysis designed to make the process more efficient and economical and shall take into account other applications of the procedure such as home dialysis. Centers may seek the active participation and consultation from industry in order to streamline equipment and procedures for greater efficiency.

125510. The dialysis centers shall also serve to provide training for medical and nursing personnel who will carry out dialysis services in other communities in the state. The dialysis centers may also work in close cooperation with other medical specialists who are seeking ways to develop successful means of kidney transplantation. Dialysis services are necessary as an adjunct to this type of medical investigation.

125515. The director shall appoint a review committee, upon nomination of the represented party, not to exceed nine members, at least four of whom shall be physicians, including at least one physician specializing in kidney transplantation and at least two physicians specializing in pediatric nephrology, one member to represent the University of California, one to represent a private organization or organizations concerned with kidney disease in California, one to represent the department, and two members to represent the lay public. The chairman of the committee shall be appointed by the Governor. This committee shall establish standards for the expenditure of state funds that are provided for the establishment and support of regional dialysis and transplantation centers to assure the availability of specialized personnel, resources, and equipment necessary to enable the centers to function and care for patients with severe uremia. The director shall choose from a list provided by the review committee the institutions that qualify under the standards established to receive grants of state funds to establish and continue a regional dialysis center. The review committee shall also examine periodically the performance of established regional dialysis centers and recommend continuation grants to the director. The members of the review committee shall serve for a two-year period and may be reappointed. Not more than half the membership of the committee shall be changed during any one year. The committee shall serve without compensation, but shall receive their necessary travel expenses.

125520. The dialysis centers may also receive and make use of any outside source of funds that may become available from federal,

voluntary, philanthropic, or other sources in order to augment state funds.

125525. No resident of this state shall be denied treatment in any of the regional dialysis centers because of his or her place of residence, so long as he or she is able to transport himself to the center.

125530. The funds that are provided by the state shall only be expended for the construction and equipment of the regional dialysis centers; equipment for and development of, home dialysis services; training of personnel and other expenses incident to the activation of the regional centers; services of dialysis and directly associated procedures; and treatment of complications that may result from dialysis. These funds shall not be utilized to pay for general medical care services that should come from private, local, other state or federal sources.

125535. The department succeeds to and is vested with the duties, purposes, responsibilities, and jurisdiction heretofore exercised by the Department of Benefit Payments with respect to the payment of grants to and audit responsibility for regional dialysis centers under this chapter and for home dialysis training centers under Chapter 2 (commencing with Section 125550).

125540. The department shall have possession and control of all records, papers, equipment, and supplies held for the benefit or use of the Director of Benefit Payments in the performance of his or her duties, powers, purposes, responsibilities, and jurisdiction that are vested in the department by Section 125535.

125545. All officers and employees of the Director of Benefit Payments who, on July 1, 1978, are serving in the state civil service, other than as temporary employees, and engaged in the performance of a function vested in the department by Section 125535 shall be transferred to the department. The status, positions, and rights of those persons shall not be affected by the transfer and shall be retained by them as officers and employees of the department pursuant to the State Civil Service Act, except as to positions exempt from civil service.

CHAPTER 2. HOME DIALYSIS TRAINING CENTER

125550. Up to three home dialysis training centers shall be established for the purpose of training persons suffering from chronic uremia for home dialysis. Each center shall have an affiliation with a large hospital or medical school, but shall utilize the most economical facilities for treatment. These institutions, however, shall be able to provide a full range of home dialysis training services. The department and the review committee established pursuant to Section 125515 shall exercise over the home dialysis training centers

the same powers they exercise, pursuant to Chapter 1 (commencing with Section 125500), over regional dialysis centers.

125555. Each center shall contain approximately four dialysis bed units. The department shall grant to each center fifty thousand dollars ($50,000) during the first year, twenty-five thousand dollars ($25,000) during the second year, and twelve thousand five hundred dollars ($12,500) during the third year. The department shall grant to each center not to exceed five thousand dollars ($5,000) in the first year for the purchasing or leasing of equipment and not to exceed two thousand five hundred dollars ($2,500) in the first year for construction or remodeling of the physical facility.

PART 8. ADULT HEALTH (Reserved)

PART 9. OTHER (Reserved)

SEC. 9. Division 107 (commencing with Section 127000) is added to the Health and Safety Code, to read:

DIVISION 107. STATEWIDE HEALTH PLANNING AND DEVELOPMENT

PART 1. OFFICE OF STATEWIDE HEALTH PLANNING AND DEVELOPMENT

CHAPTER 1. GENERAL PROVISIONS

127000. There is in the state government, in the Health and Welfare Agency, an Office of Statewide Health Planning and Development.

127005. The office is under the control of an executive officer known as the Director of Statewide Health Planning and Development, who shall be appointed by the Governor, subject to confirmation by the Senate, and hold office at the pleasure of the Governor. He or she shall receive the annual salary provided by Article 1 (commencing with Section 11550) of Chapter 6 of Part 1 of Division 3 of Title 2 of the Government Code.

127010. The director of the office shall have the powers of a head of the department pursuant to Chapter 2 (commencing with Section 11150) of Part 1 of Division 3 of Title 2 of the Government Code.

127015. The office succeeds to and is vested with all the duties, powers, purposes, responsibilities, and jurisdiction of the State Department of Health relating to health planning and research development. The office shall assume the functions and responsibilities of the Facilities Construction Unit of the former State Department of Health, including, but not limited to, those functions

and responsibilities performed pursuant to the following provisions of law:

Chapter 1 (commencing with Section 127125) of Part 2, Article 1 (commencing with Section 127750) of Chapter 1, Article 3 (commencing with Section 127975) of Chapter 2, and Article 1 (commencing with Section 128125) of Chapter 3 of Part 3, Part 6 (commencing with Section 129000) and Part 7 (commencing with Section 129675) of this division, Sections 104650, 104655, and Section 127050; Chapter 10 (commencing with Section 1770) of Division 2; and Section 13113.

127020. All regulations heretofore adopted by the State Department of Health that relate to functions vested in the office and that are in effect immediately preceding the operative date of this section, shall remain in effect and shall be fully enforceable unless and until readopted, amended, or repealed by the office.

127025. The office may use the unexpended balance of funds available for use in connection with the performance of the functions of the State Department of Health transferred to the office pursuant to Section 127015.

127030. All officers and employees of the State Department of Health, who, on July 1, 1978, are serving in the state civil service, other than as temporary employees, and engaged in the performance of a function vested in the Office of Statewide Planning and Development by Section 127015 shall be transferred to the office. The status, positions, and rights of these persons shall not be affected by the transfer and shall be retained by them as officers and employees of the office, pursuant to the State Civil Service Act except as to positions exempted from civil service.

127035. The office shall have possession and control of all records, papers, offices, equipment, supplies, moneys, funds, appropriations, land or other property, real or personal, held for the benefit or use of the State Department of Health for the performance of functions transferred to the office by Section 127015.

127040. All officers or employees of the office employed after the operative date of this section shall be appointed by the director of the office.

127045. The office may enter into agreements and contracts with any person, department, agency, corporation, or legal entity that are necessary to carry out the functions vested in the office by this article, Article 1 (commencing with Section 127875), Article 2 (commencing with Section 127900), Article 5 (commencing with Section 128050) of Chapter 2, Article 2 (commencing with Section 128375), and Article 3 (commencing with Section 128425) of Chapter 5 of Part 3.

127050. (a) As used in this section, ‘‘nonprofit hospital’’ means a general acute care hospital or an acute psychiatric hospital owned and operated by a fund, foundation, or corporation, no part of the net

earnings of which inures, or may lawfully inure, to the benefit of any private shareholder or individual.

(b) A nonprofit hospital may exercise the right of eminent domain to acquire property necessary for the establishment, operation, or expansion of the nonprofit hospital if both of the following requirements are satisfied:

(1) The property to be acquired by eminent domain is adjacent to other property used or to be used for the establishment, operation, or expansion of the nonprofit hospital.

(2) The director of the office has certified, after the public hearing required by subdivision (c), all of the following:

(A) The acquisition of the property sought to be condemned is necessary for the establishment, operation, or expansion of the nonprofit hospital.

(B) The public interest and necessity require the proposed project.

(C) The proposed project is planned or located in the manner that will be most compatible with the greatest public good and the least private injury.

(c) The director of the office shall adopt reasonable regulations that will provide for a public hearing to be conducted by a hearing officer in accordance with Chapter 5 (commencing with Section 11500) of Part 1 of Division 3 of Title 2 of the Government Code in the area where the hospital is located to determine the necessity of the proposed project and of any acquisition of property for the project. Written notice of the hearing shall be given to the voluntary area health planning agency, if one exists, in the area where the hospital is located. The voluntary area health planning agency so notified shall make its recommendations to the hearing officer within 90 days from the receipt of notice. No hearing shall be held prior to the expiration of the 90-day period unless the hearing officer has received the recommendations of the voluntary area health planning agency. At the public hearing, the hearing officer shall ensure that the hearing, in part at least, considers the impact of the proposed project upon the delivery of health care services in the community and upon the environment, as gathered from an environmental impact report. The applicant and all interested parties to the acquisition, including the voluntary area health planning agency, have the right to representation by counsel, the right to present oral and written evidence, and the right to confront and cross-examine opposing witnesses. A transcript of the public hearing shall be filed with the director of the office as a public record.

PART 2. HEALTH POLICY AND PLANNING

CHAPTER 1. HEALTH PLANNING

127125. As used in this chapter, ''office'' means the Office of Statewide Health Planning and Development and ''office director'' means the director of the office.

Any reference in this chapter to the State Department of Health, the department, the state department, or the Director of Health shall be deemed a reference to the office in the Health and Welfare Agency.

127130. For the purposes of this chapter:

(a) ''Health maintenance organization'' or ''HMO'' means a public or private organization, organized under the laws of this state, that:

(1) Provides or otherwise makes available to enrolled participants health care services, including at least the following basic health care services: usual physician services, hospitalization, laboratory, X-ray, emergency and preventive services, and out-of-area coverage.

(2) Is compensated (except for copayments) for the provision of basic health care services listed in paragraph (1) to enrolled participants on a predetermined periodic rate basis.

(3) Provides physician services primarily (i) directly through physicians who are either employees or partners of the organization, or (ii) through arrangements with individual physicians or one or more groups of physicians (organized on a group practice or individual practice basis).

(4) Is not a corporation organized or operating pursuant to Section 10810 of the Corporations Code.

(b) ''Health maintenance organization for which assistance may be provided under Title XIII'' means an HMO that is qualified under Section 1310(d) of Title XIII of the federal Public Health Service Act, or an HMO that the Secretary of Health, Education and Welfare determines, upon the basis of an application and the submission of any information and assurance that he or she finds necessary, may be eligible for assistance under Title XIII of the act.

127135. Any reference in any code to the Health Planning Council, the Health Review and Program Council, or the State Board of Public Health, with respect to functions thereof that are advisory, shall be deemed a reference to the Advisory Health Council.

127140. (a) In order to effectively implement this chapter, the Legislature finds that it is indispensable that providers of health care be free to engage in voluntary, cooperative efforts with consumers, government, or other providers of health care to fulfill the purposes of the health planning laws.

(b) Approved plans and projects undertaken in compliance with those plans, as provided in Sections 437.20, 437.21, 437.22, and 437.23

are exempt from Chapter 1 (commencing with Section 16600), Chapter 2 (commencing with Section 16700), Chapter 3 (commencing with Section 16900), and Chapter 4 (commencing with Section 17000) of Part 2 of Division 7 of the Business and Professions Code.

(c) In the case of a project that, on or before January 1, 1987, is included in the Tulare County countywide long-range capital investment plan, that is contained in the ''April 1983 Multi-Hospital Capital Investment and Master Plan,'' as amended by the April 1986 update, the exemptions set forth in subdivision (b) shall apply even though the project is not undertaken until after January 1, 1987.

127145. (a) The Advisory Health Council, with the recommendation of the department, shall approve the statewide health facility and services plan adopted pursuant to subdivision (b) of Section 127155.

(b) The Advisory Health Council shall advise the department in the conduct of its health planning activities and in the setting of priorities in accordance with the statewide health facility and services plan adopted pursuant to subdivision (b) of Section 127155.

(c) Public agencies shall furnish to the Advisory Health Council, upon request, data on health programs pertinent to effective planning and coordination.

(d) The Advisory Health Council shall act as the appeals body pursuant to Section 127250 regarding applications for a certificate of need filed pursuant to this chapter.

127150. (a) The office director shall adopt regulations for the implementation of this chapter.

(b) Notwithstanding any other provision of this chapter to the contrary, the office director may suspend the operation of any or all of the following provisions or requirements of this chapter:

(1) The administrative appeals process for certificate-of-need applications established by Sections 127250 to 127270, inclusive. Nothing in this section shall be construed, however, to limit the availability of judicial review of a decision of the office director or of the Advisory Health Council as provided in Section 127275.

(2) The notification of intent required by Section 127225.

(c) It is the intent of the Legislature that the office and the area health planning agencies shall not implement the requirements of subdivisions (g) and (h) of Section 1513 of the Public Health Service Act. To the extent required by federal law, the office and area health planning agencies shall request from the Secretary of the United States Department of Health and Human Services a waiver from those requirements.

(d) The Governor shall not execute an agreement with the Secretary of the United States Department of Health and Human Services pursuant to Section 1122 of Public Law 92-603 as the section existed on January 1, 1981.

127155. The Advisory Health Council shall evaluate and shall designate annually no more than one area health planning agency for any area of the state designated by the council. An area health planning agency shall be incorporated as a nonprofit corporation and controlled by a board of directors consisting of a majority representing the public and local government as consumers of health services with the balance being broadly representative of the providers of health services and the health professions, or alternatively be a health systems agency established pursuant to Public Law 93-641. The functions of area health planning agencies are all of the following:

(a) To review information on utilization of hospitals and related health facilities.

(b) To develop area plans to be used for the determination of community need and desirability of projects specified in Section 127170, consistent with the regulations adopted by the office pursuant to Section 127160. Each plan shall become effective upon a determination by the council that the plan is in conformance with regulations adopted pursuant to Section 127160. The council shall integrate all area plans into a single Statewide Health Facilities and Services Plan that shall become effective upon formal adoption by the council.

(c) To conduct public meetings where providers of health care and consumers will be encouraged to participate.

(d) Area health planning agencies shall comply with all of the following requirements:

(1) The governing body of the agency shall, to the extent feasible, be composed of individuals representative of the major social, economic, linguistic, and racial populations, and geographic areas, within the area served by the agency.

(2) The agency shall hold public meetings and hearings only after reasonable public notice. This notice shall, to the extent feasible, be publicized directly to those who, as determined by the director, are medically underserved and are in other ways denied equal access to good medical care.

(3) The agency shall file with the Advisory Health Council an affirmative action employment plan approved by the office.

Area health planning agencies may divide their areas into local areas for purposes of more effective health facility planning, with the approval of the Advisory Health Council. These local areas shall be of a geographic size and contain adequate population to ensure a broad base for planning decisions. Each local area shall contain a local health planning agency that shall meet the requirements of this section.

An organization that meets the requirements of this section may make application to its area health planning agency for designation as a local health planning agency for a designated area. Within 45 days

after a complete application for designation has been received, the area agency shall reach a decision concerning the application.

Each area health planning agency existing on the operative date of amendments to this section enacted during the 1976 portion of the 1975–76 Regular Session of the Legislature shall continue to function as an area planning agency pursuant to this chapter, until one or more designated health systems agencies are fully operational, as determined by the Advisory Health Council in the area served, or formerly served, by the respective area health planning agency.

If the Advisory Health Council determines that an area health planning agency approved under this section is dissolved or unable to carry out the functions required by this chapter, the office shall fulfill the responsibilities of an area health planning agency pursuant to this chapter in the area until another area health planning agency is designated by the Advisory Health Council for the area and becomes fully operational.

Adoption of regulations setting forth administrative procedures for area and local area health planning agencies shall be made by the office pursuant to Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code.

127160. The office shall adopt regulations setting forth statewide policies for area health planning agencies in the performance of their responsibilities under Section 127155.

In adopting the regulations, the office shall, with the advice of the Advisory Health Council, consider the following factors, and may consider other factors not inconsistent with the following:

(a) The need for health care services in the area and the requirements of the population to be served, including evaluation of current utilization patterns.

(b) The availability and adequacy of health care services in the area's existing facilities that currently conform to federal and state standards.

(c) The availability and adequacy of services in the area such as preadmission, ambulatory or home care services that may serve as alternatives or substitutes for care in health facilities.

(d) The possible economies and improvement in service that may be derived from the following:

(1) Operation of joint, cooperative, or shared health care resources.

(2) Maximum utilization of health facilities consistent with the appropriate levels of care, including, but not limited to, intensive care, acute general care, and skilled nursing care.

(3) Development of medical group practices, especially those providing services appropriately coordinated or integrated with institutional health service, and development of health maintenance organizations.

(e) The development of comprehensive services for the community to be served. These services may be either direct or indirect through formal affiliation with other health programs in the area, and include preventive, diagnostic, treatment and rehabilitation services. Preference shall be given to health facilities that will provide the most comprehensive health services and include outpatient and other integrated services useful and convenient to the operation of the facility and the community.

(f) The needs or reasonably anticipated needs of special populations, including members of a comprehensive group practice prepayment health care service plan, members of a religious body or denomination who desire to receive care and treatment in accordance with their religious conviction, or persons otherwise contracted or enrolled under extended health care arrangements, including life-care agreements pursuant to Chapter 10 (commencing with Section 1770), Division 2 of the Health and Safety Code.

(g) The special needs and circumstances of those entities that provide a substantial portion of their services or resources, or both, to individuals not residing in the health service areas where the entities are located. These entities may include medical and other health professional schools, multidisciplinary clinics, and specialty centers.

With respect to the determination of unmet need in the community or the adverse effect of new or expanded surgical clinics on the utilization of operating rooms in hospitals, it is not the intent of the Legislature to limit the expansion of surgical clinics when the hospitals have not made efforts to fully utilize their ambulatory operating capacity and to provide ambulatory surgical services at a reasonable cost to the community.

127165. (a) The basis for decisions by the office on applications for certificates of need filed pursuant to this chapter shall be:

(1) The Statewide Health Facilities and Services Plan specified in subdivision (b) of Section 127155.

(2) The statewide policies developed pursuant to Section 127160.

(b) The office shall annually update the statistical information used in the determination of resource requirements in the Statewide Health Facilities and Services Plan and shall update this statistical information more frequently when new data is available. These data updates shall include, but not be limited to, population estimates, utilization data, changes in the inventory, and other statistical information used in the determination of resource requirements. This data shall be incorporated into the Statewide Health Facilities and Services Plan by operation of law and without the necessity of following the procedures set forth in Chapter 3.5 (commencing with Section 11340) of Title 2 of Division 3 of the Government Code.

127170. Except as otherwise exempted by any other provision of law, projects requiring a certificate of need issued by the office are the following:

(a) Construction of a new health facility, relocation of a health facility or specialty clinic on a site that is not the same site or adjacent thereto, the increase of bed capacity in an existing health facility, the conversion of an entire existing health facility from one license category to another, or the conversion of a health facility's existing beds from any bed classification set forth in Section 1250.1 to skilled nursing beds, psychiatric beds, or intermediate care beds, and the conversion of skilled nursing beds, psychiatric beds, or intermediate care beds to any other bed classification set forth in Section 1250.1, except for skilled nursing beds or intermediate care beds licensed as of March 1, 1983, as part of a general acute care hospital. The conversion may not exceed during any three-year period 5 percent of the existing beds of the bed classification to which the conversion is made.

A health facility may use beds in one bed classification that, pursuant to the facility's license, have been designated in another bed classification, if all of these bed classification changes do not at any time exceed 5 percent of the total number of the facility's beds as set forth by the facility's license and if this use meets the requirements of Chapter 2 (commencing with Section 1250) of Division 2. In addition, a facility may use an additional 5 percent of its beds in this manner if the director finds that seasonal fluctuations justify it.

For purposes of this subdivision, ''adjacent,'' means real property within a 400-yard radius of the site where a health facility or specialty clinic currently exists.

(b) Establishment of a new specialty clinic, as defined in paragraphs (1) and (3) of subdivision (b) of Section 1204, a project by a health facility for expanded outpatient surgical capacity, the conversion of an existing primary care clinic to a specialty clinic, or the conversion of an existing specialty clinic to a different category of specialty-clinic licensure. It does not constitute a project and no certificate of need is required for the establishment of a primary care clinic, as defined in subdivision (a) of Section 1204, the conversion of an existing specialty clinic to a primary care clinic, or the conversion of an existing primary care clinic to a different category of primary-care-clinic licensure. Any capital expenditure involved in the establishment of a primary care clinic also does not constitute a project, except as provided in subdivision (d).

(c) The establishment of a new special service delineated in subdivision (a), (b), (c), (e), (f), (g), or (h) of Section 1255, or the establishment by a specialty clinic, as defined in paragraphs (1) and (3) of subdivision (b) of Section 1204, of a new special service identified by or pursuant to Section 1203.

(d) The initial purchase or lease by a clinic subject to licensure under Chapter 1 (commencing with Section 1200) of Division 2, of diagnostic or therapeutic equipment with a value in excess of one million dollars ($1,000,000) in a single fiscal year, or where the cumulative cost exceeds this amount in more than one fiscal year. For purposes of this subdivision, the purchase or lease of one or more articles of functionally related diagnostic or therapeutic equipment, as determined by the office, shall be considered together.

(e) (1) Any project requiring a capital expenditure for a specialty clinic, as defined in paragraphs (1) and (3) of subdivision (b) of Section 1204, or for the services, equipment or modernization of a specialty clinic in excess of one million dollars ($1,000,000) in the current fiscal year or cumulation to an expenditure of one million dollars ($1,000,000) in the same fiscal year or subsequent fiscal years for a single project.

(2) The threshold exemptions from certificate-of-need requirements provided for in this subdivision do not apply to projects for expanded outpatient surgical capacity.

(3) For the purposes of this subdivision, ''capital expenditure'' means any of the following:

(A) An expenditure, including an expenditure for a construction project undertaken by the specialty clinic as its own contractor, that under generally accepted accounting principles is not properly chargeable as an expense of operation and maintenance and that exceeds one million dollars ($1,000,000). The cost of studies, surveys, legal fees, land, offsite improvements, designs, plans, working drawings, specifications, and other activities essential to the acquisition, improvement, expansion, or replacement of the physical plant and equipment for which the expenditure is made shall be included in determining whether the cost exceeds one million dollars ($1,000,000). Where the estimated cost of a proposed project, including cost escalation factors appropriate to the area where the project is located, is, within 60 days of the date that the obligation for the expenditure is incurred, certified by a licensed architect or engineer to be one million dollars ($1,000,000) or less, that expenditure shall be deemed not to exceed one million dollars ($1,000,000) regardless of the actual cost of the project. However, in any case where the actual cost of the project exceeds one million dollars ($1,000,000) the specialty clinic on whose behalf the expenditure is made shall provide written notification of the cost to the office not more than 30 days after the date that the expenditure is incurred. The notification shall include a copy of the certified estimate.

(B) The acquisition, under lease or comparable arrangement, or through donation, of equipment for a specialty clinic, the expenditure for which would have been considered a capital

expenditure if the person had acquired it by purchase. For the purposes of this paragraph, ''donation'' does not include a bequest.

(C) Any change in a proposed capital expenditure that meets the criteria set forth in this subdivision.

(4) ''Capital expenditure'' includes the total cost of the proposed project as certified by a licensed architect or engineer based on preliminary plans or specifications and concurred in by the state department.

(5) For the purposes of this subdivision, ''project'' does not include the purchase of real property for future use or the transfer of ownership, in whole or part, of an existing specialty clinic or the acquisition of all or substantially all of the assets or stock thereof, or the construction, modernization, purchase, lease, or other acquisition of parking lots or parking structures, telephone systems, and nonclinical data-processing systems.

(6) For the purposes of this subdivision, ''modernization'' means the alteration, expansion, repair, remodeling, replacement, or renovation of existing buildings, including initial equipment thereof, and the replacement of equipment of existing buildings.

(f) Except as provided in subdivision (g), only those projects where 25 percent or less of the patients are covered by prepaid health care.

(g) Projects otherwise subject to review under subdivision (a) that are for the addition of new licensed skilled nursing beds by construction or conversion, regardless of the percentage of patients served who are covered by prepaid health care.

(h) (1) Except as provided in paragraph (2), the office shall annually adjust the dollar thresholds set forth in subdivisions (d) and (e) to reflect changes in the cost of living, as determined by the Department of Finance, using 1981 as the base year.

(2) Notwithstanding the amount of the dollar thresholds specified in paragraph (1), in the event Congress increases or repeals the amount or amounts of the thresholds, the dollar thresholds set forth in subdivisions (d) and (e) shall be the highest amount or amounts permitted by Public Law 93-641, as amended, or one million dollars ($1,000,000), whichever is less, on the date congressional action is effective.

(i) This section is not applicable to an intermediate care facility/developmentally disabled habilitative or an intermediate care facility/developmentally disabled—nursing.

127175. (a) The office shall exempt from Sections 127210 to 127275, inclusive, and shall issue a certificate of exemption for those projects that were not previously subject to review under Section 127155 prior to the effective date of this section where the applicant has shown and the office director has found all of the following:

(1) The applicant has, prior to the effective date of this section, committed or incurred a financial obligation, including any

obligation payable by force account, that is certified by a licensed architect or engineer to be 10 percent of the cost of the total project, or seventy-five thousand dollars ($75,000), whichever is less.

(2) The project cannot be terminated without substantial economic loss to the applicant.

(3) Except with respect to projects set forth in subdivision (d) of Section 127170, the project was commenced prior to the effective date of this section and is being diligently pursued to completion.

(4) The applicant has filed a notice of the project with the office on forms supplied by the office within 60 days of the effective date of this section.

For the purposes of this subdivision, ''project'' shall mean any project set forth in Section 127170, and the term ''financial obligation'' shall include cost factors set forth in the definition of ''capital expenditure'' in Section 127170.

Within 120 days of the effective date of this section, the office shall determine in public hearing the applications that are entitled to an exemption under this subdivision.

(b) In addition, the office shall exempt from Sections 127210 to 127275, inclusive, and shall issue a certificate of need for those projects where the applicant has shown and the office director has found one of the following:

(1) The project is necessary solely to replace health care services that are no longer available at the facility because of a disaster or other emergency.

(2) The project is solely for the purpose of complying with requirements of law or regulations.

(3) The project was the subject of an application submitted to an area health planning agency prior to the effective date of this section. These applications shall be processed and decided in the manner prescribed by this chapter as it existed immediately prior to the operative date of this section, except that any petition for appeal of a decision or lack of decision the area health planning agency rendered after the effective date of this section shall be made directly to the Advisory Health Council.

(4) The project is to add not more than 10 percent of licensed bed capacity or 10 beds, whichever is less, to an existing general acute care hospital, an existing acute psychiatric hospital, an existing special hospital, an existing general acute care/rehabilitating hospital, or an existing chemical dependency recovery hospital, where the applicant has shown and the office director has found that:

(A) The applicant hospital has not been granted a certificate of exemption pursuant to this provision or pursuant to Section 437.112, as Section 437.112 existed on January 1, 1982, within the last preceding 24 months.

(B) The applicant hospital has had an occupancy rate for the classification of beds to be added, and for the facility as a whole, for the preceding 12-month period, of not less than 85 percent.

(C) The facility is accessible to persons for whom the cost of care is reimbursed under Chapter 7 (commencing with Section 14000) of Part 3 of Division 9 of the Welfare and Institutions Code. In the case of an acute psychiatric hospital, the showing required by this subparagraph shall be limited to those categories of patients for whom acute psychiatric hospitals are eligible to receive reimbursement under Chapter 7 (commencing with Section 14000) of Part 3 of Division 9 of the Welfare and Institutions Code.

(5) The project is to add not more than five beds to an existing skilled nursing facility that is operated as a distinct part of a primary health service hospital, as defined in Section 1339.9 that participates in Medi-Cal programs, provided that all of the following conditions exist:

(A) At the time of the application, the Statewide Health Facility and Services Plan indicates a need for the proposed number of beds, taking into account the number of approved beds in the health facilities planning area where the project is located including beds approved pursuant to this subdivision.

(B) The applicant skilled nursing facility has had at least a 95 percent occupancy rate for existing beds for the 12 months preceding the submission of an application.

(C) The applicant facility has not been issued within the 12 months preceding application a citation for a class A violation or more than one class B violation, as defined in Section 1424, that is one of the following:

(i) Uncontested.

(ii) Contested, but not adjudicated.

(iii) Contested, but sustained upon adjudication.

In determining the current number of approved beds in the health facilities planning area where the project is located, the office shall count the number of beds for which applications for a certificate of need have been deemed complete pursuant to Section 127220, before the effective date of the amendments to this section enacted by the Statutes of 1983.

The project shall not require a capital expenditure that exceeds ten thousand dollars ($10,000), and only one project may be approved for a facility in a 12-month period. However, no facility shall receive approval pursuant to this section for more than two projects. The office shall annually adjust this capital expenditure threshold to reflect changes in the cost of living as determined by the Department of Finance, using 1981 as the base year.

Any certificate issued for projects shall expire if the applicant does not complete the project within 12 months after issuance unless the office, for good cause shown, extends the certificate.

(c) A certificate of exemption issued pursuant to this section or Section 1268 shall, for all purposes, have the same effect as a certificate of need issued pursuant to this chapter.

127180. (a) In addition to the exemption required by Section 127175, the office director shall exempt Sections 127210 to 127275, inclusive, and shall issue a certificate of exemption for those projects where the applicant has shown, and the office director has found, all of the following:

(1) The conversion of a freestanding skilled nursing facility to a chemical dependency recovery hospital, as defined in Section 1250.3, where the project was commenced on or before September 15, 1981, and provided that the person or entity proposing the project was, prior to June 1, 1981, operating in this state a health facility, or distinct part thereof, that provided 24 hours' chemical dependency recovery hospital in-patient services as enumerated in Section 1250.3 under a direction of a medical director, and that the person or entity was the owner or lessee of the facility to be converted prior to June 1, 1981. As used in this paragraph, ''person'' or ''entity'' shall include collectively a corporation and any wholly owned subsidiaries thereof. ''Commencement'' means the submission of drawings for the project to the local government having jurisdiction containing substantially sufficient detail for the issuance of a building permit or permits as required and submission of a written declaration of intent for the project to the department on or before September 15, 1981.

(2) The project does not meet the construction standards established by law or regulation for general acute care hospitals.

(3) The applicant has filed a notice of the project with the office director on or before September 15, 1981.

(4) The applicant has filed a notice of the project with the office director on forms supplied by the office director within 90 days of the effective date of this section. The office director shall inform the applicant in writing of his or her determination as to eligibility of the application for a certificate of exemption under this section within 60 days of receipt of a complete application.

(b) A certificate of exemption issued pursuant to this section shall for all purposes have the same effect as a certificate of need issued pursuant to this chapter.

127185. (a) In addition to the exemption required by Section 127175, the office director shall exempt from Sections 127210 to 127275, inclusive, and shall issue a certificate of need for those projects where the applicant has shown and the office director has found all of the following:

(1) The project is for either of the following:

(A) The conversion of a skilled nursing or community care facility, or acute psychiatric hospital or a county funded institution-based alcoholism program, certified by the Department of Alcohol and Drug Programs pursuant to Section 11831 as a residential treatment

program, to a chemical dependency recovery hospital as defined in subdivision (a) of Section 1250.3, and provided that the facility to be converted has, prior to June 1, 1981, and continuously thereafter, been used exclusively to provide 24-hour residential chemical dependency recovery services, including the basic services enumerated in Section 1250.3 under the direction of a medical director.

(B) The construction and licensure of a chemical dependency recovery hospital where the project was commenced prior to June 1, 1981, and is being diligently pursued to completion, and provided that the person or entity proposing the facility was, prior to June 1, 1981, operating in this state a skilled nursing or community care facility used exclusively for 24-hour residential chemical dependency recovery services, including the basic services enumerated in Section 1250.3, under the direction of a medical director. As used in this paragraph, ''commencement of the project'' means acquisition of the site where the facility is to be located and submission of drawings for the project to the local government having jurisdiction containing substantially sufficient detail for the issuance of a building permit or permits.

(2) The project could not meet the construction standards established by law or regulation for general acute care hospitals.

(3) The applicant has filed a notice of the project with the office director on forms supplied by the office director within 90 days of the effective date of this section.

The office director shall inform the applicant in writing of his or her determination as to eligibility of the application for a certificate of need under this subdivision within 60 days of receipt of a complete application.

(b) In addition to the exemption required by Section 127175, the office director shall exempt from Sections 127210 to 127275, inclusive, and shall issue a certificate of need for a project for the conversion of a portion of the authorized bed capacity of a general acute care hospital in the classifications listed in Section 1250.1 to chemical dependency recovery beds as provided in subdivision (h) of Section 1250.1, or for the conversion of a skilled nursing facility to a chemical dependency recovery hospital as defined in subdivision (a) of Section 1250.3, where the applicant has shown and the office director has found all of the following:

(1) Commencement of the project began prior to August 10, 1981, and is being diligently pursued to completion.

(2) The facility proposing a conversion was, prior to June 1, 1981, operating an alcoholism treatment program, including all the basic services enumerated in Section 1250.3, under the direction of a medical director, or the facility had obtained, prior to June 1, 1981, the services of a medical director and contracted with program professionals for the conversion of the facility.

As used in this subdivision, ''commencement of the project'' means a written declaration by the governing body or administration of a hospital of the intention to convert beds of other licensed categories to usage as chemical dependency beds pursuant to subdivision (f) of Section 1250.3 as it existed on August 10, 1981, or a written declaration by the governing body or administration of a skilled nursing facility of the intention to convert to a chemical dependency recovery hospital. The written declaration shall be transmitted to the director by August 17, 1981.

(c) Construction or remodeling necessary to enable a facility exempted under this section to comply with applicable licensing regulations shall be deemed to be eligible for exemption under paragraph (2) of subdivision (b) of Section 127175.

(d) A certificate of exemption issued pursuant to this section shall, for all purposes, have the same effect as a certificate of need issued pursuant to this chapter.

127190. Notwithstanding any other provision of this chapter, the office shall exempt from Sections 127210 to 127275, inclusive, and shall issue a certificate of need for, any health care project of a health facility that agrees to provide free health care services to indigents over a period of at least five years at a dollar value equal to the dollar value of the exempted project at completion. The annual dollar value of the free care shall be at a level equal to at least 10 percent of the project value as determined in the agreement. The free health care services shall be furnished in the form of direct service or by reimbursement of costs incurred by other facilities if an insufficient number of patients, as determined in the agreement, are referred or present themselves for treatment to account for the minimum 10 percent requirement.

The provision of free care pursuant to this section shall be in accordance with an agreement executed between the health facility granted an exemption and the office. If the health facility does not meet the terms of the agreement, the department shall suspend the license or special permit associated with the exempted project until compliance with the terms is obtained. The obligations imposed by the agreement shall not be discharged by virtue of transfer of ownership, but shall be assumed by a new owner as a condition of transfer.

''Free care,'' as used in this section, does not include either of the following:

(a) Bad debt unless the debtor makes specific application for relief as an indigent.

(b) Contractual allowances.

127195. Projects for freestanding outpatient surgery units that only perform cataract surgery under the Medi-Cal program or a program that provides over 25 percent of its services to patients

covered by prepaid health care are exempt from the certificate-of-need requirement of this chapter.

As used in this section and in paragraphs (f) and (g) of Section 127170, patients are covered by prepaid health care if they are members of federally qualified health maintenance organizations.

127200. Taking into consideration the basis for decision set forth in Section 127165:

(a) The office may, in individual cases, grant certificates of need for projects when it determines that one of the following is applicable:

(1) The applicant has provided evidence that the project will meet the needs or reasonably anticipated needs of a special population including members of a religious body or denomination who desire to receive care and treatment in accordance with their religious convictions.

(2) The applicant has provided evidence that the project is or will be necessary to meet the health needs or reasonably anticipated health needs of adult residents of a nonprofit community care facility, as defined by subdivision (a) of Section 1502, that is owned by the applicant.

(3) The applicant has provided evidence that, as a health facility, it has developed community support for its services as indicated by its current utilization patterns, and has provided health care services for at least five years.

(4) The applicant has provided evidence, when the project is for a new health facility or an increase in bed capacity, that there will be an equal or greater reduction in bed capacity in other health facilities in the area.

(5) The applicant has provided evidence that it will deliver the service proposed to be offered as a result of the project in an innovative and more competitive manner, or at a lower cost than the service is provided by other facilities in the area, and has provided evidence that the quality of care offered will be comparable to that offered by other facilities in the area; or that as a health facility, it serves a disproportionate volume of publicly funded patients, or patients for whom the cost of health care is uncompensated. The office director shall, as he or she deems appropriate, ensure fulfillment of the requirements of this subdivision through conditions mutually agreed upon by the applicant and the office. This paragraph does not apply to projects for the addition of licensed skilled nursing beds by construction or conversion.

If an applicant is requesting the exercise of discretion by the office director pursuant to this paragraph, prior to granting a certificate of need, the office director shall receive an evaluation from the department assessing the potential negative financial impact upon any county owned or operated general acute care hospital. If there

is a significant negative potential financial impact, a certificate of need shall not be granted.

Nothing in this subdivision requires the office to grant certificates of need as authorized by this section in any of the above categories.

(b) In the case of a project for a service to be provided by or through a health maintenance organization for which assistance may be provided under Title XIII, the office shall grant a certificate of need for the project unless the office director finds that the project is not needed by the enrolled or reasonably anticipated new members of the HMO or proposed HMO or the beds or services to be provided are available from non-HMO providers or other HMO's in a reasonable and cost-effective manner that is consistent with the basic method of operation of the HMO.

For the purposes of subdivision (b), beds or services shall not be considered available if they are any of the following:

(1) Dispersed in more than one facility when the HMO's basic method of operation is to provide services through medical centers that consist of a hospital and medical offices at the same site.

(2) Not available under a contract of at least five years' duration, with an option to extend the contract for an additional time period as is reasonably necessary for the HMO to obtain a certificate of need and to construct and equip and begin operating alternative beds or service, in the event the non-HMO provider or other HMO gives notice that it intends to terminate the contract.

(3) Not available under circumstances that would grant full and equal staff privileges to an adequate number of physicians associated with the HMO in appropriate specialties, or otherwise not conveniently accessible through physicians and other health care professionals associated with the HMO.

(4) Not available in a manner that is administratively feasible to the HMO.

(5) More costly than if the services were provided by the HMO.

In order to qualify under this section, a project that is proposed to be provided by or through a health maintenance organization for which assistance may be provided under Title XIII, and that consists of or includes the construction, development, or establishment of a new inpatient health care facility, shall be a facility that the office determines will be utilized by members of the health maintenance organization for at least 75 percent of the projected annual inpatient days, as determined in accordance with the recommended occupancy levels under the applicable health systems plan.

(c) In the case of a project for a service to be provided by or through an HMO, the office shall not deny a certificate of need with respect to the service (or otherwise make a finding that the service is not needed) in those cases (1) when the office has granted a certificate of need that authorized the development of the service, or expenditures in preparation for the offering or development (or

has otherwise made a finding that the development or expenditure is needed), and when the offering of this service will be consistent with the basic objectives, time schedules, and plans of the previously approved application. However, the office may impose a limitation on the duration of the certificate of need that shall expire at the end of this time unless the health service is offered prior thereto, or (2) solely because there is an HMO of the same type in the same area, or solely because the services are not discussed in the applicable health systems plan, annual implementation plan, state health plan, or state medical facilities plan.

(d) A project for a service to be provided by, or through, an HMO that is subject to review under this chapter shall remain subject to that review, unless the federal law states that an approved state program shall not require a certificate of need for the project.

The office shall establish uniform procedures and criteria for approving applications under this section.

127205. (a) It is the intent of the Legislature that projects for a general acute care hospital designated as a sole community provider and licensed for less than 100 beds, projects for the establishment or expansion of skilled nursing facilities or intermediate care facilities, and projects for skilled nursing beds or intermediate care beds in health facilities other than skilled nursing or intermediate care facilities be processed as expeditiously as possible, consistent with the purposes of this chapter.

(b) In reviewing an application for projects for a general acute care hospital designated as a sole community provider and licensed for less than 100 beds, a project for a skilled nursing facility, a project for an intermediate care facility, or a project for skilled nursing beds or intermediate care beds in health facilities, the office director shall consider only need, expected utilization and financial feasibility, compliance with applicable laws and regulations, and whether the proposed facility will enhance access to the population to be served.

(c) The following exceptions to the procedural provisions of this chapter shall apply to applications for projects for a general acute care hospital designated as a sole community provider and licensed for less than 100 beds, projects for the establishment or expansion of skilled nursing facilities or intermediate care facilities, or a project for skilled nursing beds or intermediate care beds in health facilities other than skilled nursing or intermediate care facilities:

(1) The notification of intent specified in Section 127225 shall not be required prior to the filing of an application.

(2) Upon a determination that an application is complete pursuant to Section 127220, the office shall promptly publish notice in a newspaper of general circulation in the geographical area to be served by the project. The notice shall describe the project and provide that any affected person may request, in writing, that the office hold a public hearing in the course of its review. The notice

shall state the address where the request shall be made and the time period when it shall be made. The written request shall be based upon the applicable review criteria and shall specify the review criteria.

(3) No hearing need be held by the office in the course of its review unless ordered by the office within 30 calendar days after the application is determined to be complete. In those cases when no hearing is required to be held, the office shall, within 30 calendar days after the application is determined to be complete, issue a decision approving the project in its entirety or with modifications or conditions as have been agreed to in writing by the office and the applicant.

(d) The office shall amend its regulations and application forms as may be necessary to effectuate the purposes of this section.

127210. Applicants for a certificate of need for a project specified in Section 127170 shall submit an application to the department on the official forms provided by the department, that may include, but need not be limited to, the following information:

(a) The site of the facility in the geographic area to be served.

(b) The population to be served, categorized by age, income, and sex, as well as projections of population growth, by age, income, and sex.

(c) The anticipated demand for the health care service or services to be provided.

(d) A description of the service or services to be provided.

(e) Utilization of existing programs within the area to be served offering the same or similar health care services.

(f) The benefit to the community that will result from the development of the project as well as the anticipated impact on other institutions offering the same or similar services in the area.

(g) A schedule for the commencement and completion of the project.

(h) Reasonable assurance that adequate financing is available for the completion of the project within the time period stated in the application.

127215. Each application for a certificate of need shall contain all of the information required by the office and, except as otherwise provided in this chapter, shall be accompanied by a fee. The fee shall be determined annually by regulation of the office director and shall be set forth in a schedule differentiating by type and cost of project, as determined by the office director. The office director shall establish fees so that in the aggregate they will defray costs of processing certificate of need applications that are not otherwise defrayed by the special fees charged pursuant to Section 127280. However, the application fee for a certificate of need shall not in any event exceed five thousand dollars ($5,000).

127220. (a) The office, within 15 days of its receipt of an application for a certificate of need submitted pursuant to Section 127210, shall make a determination as to whether the application is complete. If the office determines that the applicant has not submitted an application that adequately addresses the information requirements of the application form, it shall provide to the applicant a written notification of incompleteness specifying the additional information required to render the application complete. After receipt of this additional information, the office, within 15 days, shall make a determination as to whether the application is complete.

(b) If, after review of additional information pursuant to subdivision (a), the office determines that the application is still incomplete, it shall provide to the applicant a written notification of incompleteness, advising the applicant of the additional information needed and the options available to the applicant to render the application complete. Following receipt of notification, the applicant shall exercise one of the following options:

(1) Submit the additional information required by the office.

(2) Request in writing, with or without submitting the additional information, that the review commence notwithstanding the determination of incompleteness.

Upon receipt of a written statement requesting that the review commence, the application shall be deemed complete on the fifth business day following receipt unless the office determines, and notifies the applicant in writing, by the fifth business day, that the lack of information is so material that it would render meaningful analysis of the application impossible and that the application is therefore incomplete. This determination shall be based solely on the failure to provide information specifically requested by the application form.

If the applicant submits the requested additional information and does not submit a written statement requesting the office to commence the review notwithstanding its determination of incompleteness, the office, within 15 days after receipt of the additional information, shall make a determination as to whether the application is complete.

Upon the receipt of any additional notifications of incompleteness, the applicant shall exercise one of the options enumerated in paragraphs (1) and (2). The office, in its second or subsequent completeness inquiry, shall not request information beyond the scope of the preceding request.

(c) If the office does not give the notification of incompleteness within the 15-day period required for review of completeness, the application shall be deemed complete on the 15th day following the receipt of the material submitted and the office shall then proceed with its review.

(d) The office shall publish notice of the commencement of the review promptly after the application review process commences pursuant to subdivision (b) or (c).

(e) A completed application may be amended or withdrawn by the applicant at any time without prejudice, but any amendment to an application, except as the office and the applicant may otherwise agree, shall cause the amended application to be treated as a new application for purposes of the time limits prescribed by this chapter and for the determination of the amount of the fee.

(f) A filed application shall be a public document and shall be available for inspection at the offices of the area health planning agency and the office. A copy of any filed application shall be furnished to any person upon request and payment of a reasonable fee, to be established by the office in an amount sufficient to defray the costs of reproduction.

(g) Applications filed by any state agency or the Board of Regents of the University of California shall be exempt from a filing fee.

127225. At least 20 calendar days prior to the filing of an application for a certificate of need under Section 127170, the applicant shall notify the office of its intent to apply for a certificate of need. The office may consult with the applicant on the proposed project.

The office may refuse to accept a certificate-of-need application where the applicant has failed to file a notification of intent to apply for a certificate of need pursuant to this section. However, if a certificate of need is issued, it shall not be invalidated on the sole basis of failure of the applicant to notify the office within the time required by this section.

127230. The office shall transmit a copy of each application for a certificate of need determined by it to be complete, or otherwise deemed complete pursuant to Section 127220, to the appropriate area health planning agency. The area health planning agency may, at its discretion, informally review the application and provide comment on it at the public hearing held pursuant to Section 127235, if a public hearing is held. If an area health planning agency intends to provide comment on an application at a public hearing, it shall provide notice to the applicant and to the state 20 days in advance of making a comment. The comment shall be deemed to have given the area health planning agency party status.

127235. (a) Within 45 calendar days of the receipt of the complete application, or an application otherwise deemed complete pursuant to Section 127220, the office shall do one of the following:

(1) Approve the application. The office may approve the application pursuant to this subdivision with modifications or conditions, provided that the applicant agrees in writing to the modifications or conditions.

(2) Order a hearing if the office determines that substantial questions exist as to the eligibility of the proposed project for certificate-of-need approval. Except as otherwise provided in this section, the hearing shall be held in the health service area served by the applicant.

(b) The office shall order a hearing by the service of a copy of the order on the applicant and the Office of Administrative Hearings. The order shall include the intended position of the Division of Certificate of Need of the office. Upon receipt of the order, the Office of Administrative Hearings shall promptly consult with the parties to the hearing in order to determine the time and place of hearing. Except as otherwise agreed by the parties and the Office of Administrative Hearings, the hearing shall commence within 15 days of the date of the order. Upon the scheduling of the hearing, the Office of Administrative Hearings shall promptly serve notice of the date, location, and time of the hearing upon the parties to the hearing. The Office of Administrative Hearings shall also publish a notice of the date, location, and time of the hearing in at least one newspaper of general circulation in the health service area served by the applicant. The notice shall also include the name and address of the applicant, the nature of the proposed project, and other information, deemed relevant by the Office of Administrative Hearings.

(c) The hearing shall be conducted in accordance with Chapter 5 (commencing with Section 11500) of Part 1 of Division 3 of Title 2 of the Government Code, except as otherwise provided in this chapter. The hearing shall be conducted by a hearing officer assigned by the Office of Administrative Hearings who shall rule on the admission and exclusion of evidence and may exercise all other powers relating to the conduct of the hearing. With the concurrence of the parties to the hearing, law and motion matters pertaining to the hearing may be heard by the hearing officer in a location other than the geographic location of the hearing.

(d) The hearing shall conclude within 45 calendar days after commencement of the hearing unless one of the following occurs:

(1) The applicant agrees to extend the time for conclusion of the hearing.

(2) The hearing is ongoing and continuing during consecutive business days, in which case it shall be concluded as soon as reasonably practicable thereafter.

(e) Within seven days after the conclusion of the hearing, the hearing officer shall render a proposed decision supported by findings of fact, based solely upon the record of the hearing, and conclusions of law. The proposed decision, findings of fact, and conclusions of law shall be served upon the parties to the hearing.

(f) The director shall make a final decision on an application within seven calendar days after issuance of the proposed decision by

the hearing officer. The decision shall either approve the application, approve it with modifications, reject it, or approve it with conditions mutually agreed upon by the applicant and the office. The failure of any applicant to fulfill the conditions under which the certificate of need was granted shall constitute grounds for revocation of the certificate of need.

(g) Notice of the substance of the office's decision shall be published in a newspaper of general circulation within the health service area served by the applicant, within 10 calendar days following the decision.

127240. (a) Notwithstanding subdivision (b), (c), (d), (e), or (f) of Section 127235, if the office orders a hearing on an application, the applicant may request an informal hearing of the matter, described in this section, in lieu of, and in the alternative to, the formal procedures described in subdivisions (b), (c), (d), (e), and (f) of Section 127235.

(b) If an applicant requests an informal hearing and the office concurs with the request, the office shall proceed as follows:

(1) Within five calendar days after receipt of the request for an informal public hearing, the office shall order the informal public hearing by the service of a copy of the order on the applicant. The order shall include the staff report and recommendations prepared by staff of the office. Except as otherwise agreed by the applicant and the office, the informal public hearing shall commence within 20 days of the date of the order. Upon the scheduling of the hearing, the office shall promptly serve notice of the date, location, and time of the informal public hearing upon the applicant. The office shall also publish a notice of the date, location, and time of the informal public hearing in at least one newspaper of general circulation in the health service area served by the applicant. The notice shall also include the name and address of the applicant, the nature of the proposed project, and other information, deemed relevant by the office.

(2) The informal public hearing shall not be conducted in accordance with Chapter 5 (commencing with Section 11500) of Part 1 of Division 3 of Title 2 of the Government Code. The informal public hearing shall be conducted by an employee of the office designated by the office director. The person conducting the informal public hearing may exercise all powers relating to the conduct of the hearing, including the power to reasonably limit the length of oral presentations by any person who has been allowed to make a statement.

The informal public hearing shall be conducted as follows:

(A) The applicant shall be given an opportunity to present the merits of the project and to address the issues raised by the staff report and recommendations.

(B) The office staff shall be given an opportunity to present their analysis of the project.

(C) Other interested persons shall be given an opportunity to present written or oral statements.

(D) The person conducting the informal public hearing may question any person making a written or oral statement and may give the applicant and office staff an opportunity to question any person who has made a written or oral statement.

(E) The applicant and staff shall be given an opportunity to make closing statements.

(F) The office shall make a tape recording of the hearing, and copies of the tape shall be made available at cost upon reasonable notice. However, the applicant shall have a right to bring a certified shorthand reporter to be used in place of the tape recording, provided that he or she provides the office with a copy of the transcript.

(c) The informal public hearing shall conclude within 10 calendar days after commencement of the hearing unless one of the following occurs:

(1) The applicant agrees to extend the time for conclusion of the hearing.

(2) The hearing is ongoing and continuing during consecutive business days, in which case it shall be concluded as soon as reasonably practicable thereafter.

(d) Within 10 days after the conclusion of the informal public hearing, the person conducting the hearing shall render a proposed decision supported by findings of fact, based solely upon the record of the hearing. The proposed decision shall be served upon the applicant and the office staff.

(e) The director shall make a final decision on an application within 10 calendar days after issuance of the proposed decision. The decisions shall either approve the application, approve it with modifications, reject it, or approve it with conditions mutually agreed upon by the applicant and the office. The failure of any applicant to fulfill the conditions under which the certificate of need was granted shall constitute grounds for revocation of the certificate of need.

(f) Notice of the substance of the office's decisions shall be published in a newspaper of general circulation within the health service area served by the applicant, within 10 calendar days following the decision.

(g) Whether or not an informal hearing is granted shall be at the discretion of the office.

127245. (a) The undertaking of a project that requires a certificate of need, as provided in this chapter, without having first obtained a certificate of need shall (1) constitute grounds for revocation or denial of licensure, and (2) shall be deemed a violation of Section 1253.

In addition, the state department may assess and collect a civil penalty from any person undertaking a project without a certificate

of need. For projects requiring a certificate of need pursuant to subdivision (a) of Section 127170, the civil penalty shall not be more than five thousand dollars ($5,000). For projects requiring a certificate of need pursuant to subdivisions (b), (c), (d), or (e) of Section 127170, the civil penalty shall be two thousand five hundred dollars ($2,500) or 20 percent of the cost of the project, whichever is less.

(b) A certificate of need shall expire 18 months from the date of issuance unless:

(1) The certificate holder has commenced the project covered by the certificate of need and is diligently pursuing the same to completion, as determined by the state department; or

(2) The duration of the certificate of need has been extended by the state department upon a showing of good cause. However, an extension shall not cumulatively exceed a period of 12 months beyond the original expiration date of the certificate of need.

127250. Any decision issued pursuant to Section 127235 shall take effect 30 calendar days following its issuance unless within that time the applicant files a petition for appeal with the Advisory Health Council. The Advisory Health Council shall render a decision on each appeal, and appeal shall be by right. The filing of a petition shall operate to suspend and stay the decision by the office pending the hearing and entry of a final decision.

A petition for appeal shall be filed with the council within 30 calendar days following the date a decision is issued by the office. The petition shall be filed in the form and manner as prescribed by the office. As soon as a petition is filed, the council shall be polled and respond in writing to determine within 30 calendar days whether it will take oral argument on the petition. The council shall order a hearing if at least seven of the members certify in writing that they agree to take oral argument. If the council orders a hearing, the hearing shall be held within 60 calendar days of the date of the council's order. If a hearing is denied, a statement of the reasons for denial shall be issued by the council that shall be sent to the applicant, the office, and persons requesting the statement.

The council shall cause to be published in a newspaper of general circulation in the area where the proposed project is to be located, at least 30 calendar days prior to the appeal hearing, a notice summarizing the application and the office's decision, with particulars as the council may deem necessary, including, but not limited to, the name and address of the applicant, the type of project, and the date, time and place of the appeal hearing. In addition, the council shall send copies of the notice to the applicant, the office, and any person requesting a notice.

Parties to the appeals proceedings may only be the applicant and the office. Any other person shall have the right to appear and be

heard at the appeal hearing, but shall not be a party to the proceedings.

The appeal hearing may be held by the council or by a hearing officer, as ordered by the council. If there is a hearing officer, he or she shall rule on the admission and exclusion of evidence. The council shall exercise all other powers relating to the conduct of the hearing, but may delegate any or all powers to the hearing officer. Except as otherwise provided in this chapter, appeal hearings shall conform to Chapter 5 (commencing with Section 11500) of Part 1 of Division 3 of Title 2 of the Government Code, except that the office may use its own hearing officer.

127255. Grounds for appeal pursuant to Section 127250 shall be limited to the following:

(a) The office or the hearing officer violated the review procedures prescribed by this chapter.

(b) The decision of the office is not supported by substantial evidence.

(c) The office or hearing officer has otherwise acted in an arbitrary and capricious manner.

127260. The Advisory Health Council, upon review of a decision of the department, shall do one of the following:

(a) Enter an order affirming the decision of the department where it finds as to the respective basis of review that:

(1) The application was processed and the hearing conducted was consistent with this chapter, or that any inconsistency with respect thereto was immaterial to the decision of the department.

(2) There is substantial evidence in the record supporting the department's decision.

(3) The department has not acted in an arbitrary and capricious manner.

(b) Enter an order remanding the decision of the department where it finds as to the respective basis of review that:

(1) The application was not processed or the hearing conducted was not consistent with this chapter, and this inconsistency was material to the decision rendered by the department.

(2) There is no substantial evidence in the record supporting the decision.

(3) The department has acted in an arbitrary or capricious manner.

(c) Enter an order reversing the decision of the department where it finds as to the respective basis of review that:

(1) The application was not processed or the hearing conducted was not consistent with the provisions of this chapter, and this inconsistency was material to the decision rendered by the department.

(2) There is no substantial evidence in the record supporting the decision.

(3) The department has acted in an arbitrary or capricious manner.

Orders of the council authorized by this section shall be made only upon the affirmative vote of a majority of the council, with at least six of the affirmative votes cast by the following members:

(a) Representative of consumers of services for the mentally retarded appointed by the Governor.

(b) Representative of consumers of mental health services appointed by the Governor.

(c) Representative of local government appointed by the Governor.

(d) Representatives of the general consumer public appointed by the Governor, Senate Committee on Rules, or Speaker of the Assembly.

(e) Members of the Legislature appointed by the Senate Committee on Rules or Speaker of the Assembly.

127265. Where the order of the Advisory Health Council remands the decision of the department pursuant to subdivision (b) of Section 127260, the council may direct the department to reconsider the application pursuant to Section 11521 of the Government Code in the light of its order and to take further action as is specially enjoined upon it by law, but the order shall not limit or control in any way the discretion vested by law in the department.

If the Advisory Health Council does not adopt a decision within 90 calendar days after the close of the hearing provided for by Section 127250, in the absence of reconsideration on the motion of the department, the decision of the department shall be final.

127270. An appellant, other than an agency of the state or the Board of Regents of the University of California, who petitions pursuant to Section 127250, shall be responsible for the actual cost to the state for the hearing officers and stenographic assistance, including reproduction of minutes and reports, connected with the appeal, as determined by the Department of General Services. However, when a decision of the department is remanded or reversed by the council, the appellant shall not be required to reimburse the costs.

127275. Judicial review of a decision of the Advisory Health Council affirming the decision of the department pursuant to subdivision (a) of Section 127260 may be had by any party to the proceedings, other than the department, as provided in Section 1094.5 of the Code of Civil Procedure. An appellant desiring to contest an adverse decision of the department need not pursue the appeal procedures prescribed by this chapter, but may elect to pursue direct judicial remedy pursuant to Section 1094.5 of the Code of Civil Procedure. The decision of the council or department shall be upheld against a claim that its findings are not supported by the

evidence unless the court determines that the findings are not supported by substantial evidence.

127280. (a) Every health facility licensed pursuant to Chapter 2 (commencing with Section 1250) of Division 2, except a health facility owned and operated by the state, shall be charged a fee of not more than 0.035 percent of the health facility's gross operating cost for the provision of health care services for its last fiscal year ending prior to the effective date of this section. Thereafter the office shall set for, charge to, and collect from all health facilities, except health facilities owned and operated by the state, a special fee, that shall be due on July 1, and delinquent on July 31 of each year beginning with the year 1977, of not more than 0.035 percent of the health facility's gross operating cost for provision of health care services for its last fiscal year that ended on or before June 30 of the preceding calendar year. Each year the office shall establish the fee to produce revenues equal to the appropriation to pay for the functions required to be performed pursuant to this chapter or Chapter 1 (commencing with Section 128675) of Part 5 by the office, the area and local health planning agencies, and the Advisory Health Council.

Health facilities that pay fees shall not be required to pay, directly or indirectly, the share of the costs of those health facilities for which fees are waived.

(b) There is hereby established the California Health Data and Planning Fund within the office for the purpose of receiving and expending fee revenues collected pursuant to this chapter.

(c) Any amounts raised by the collection of the special fees provided for by subdivision (a) of this section that are not required to meet appropriations in the Budget Act for the current fiscal year shall remain in the California Health Data and Planning Fund and shall be available to the office and the council in succeeding years when appropriated by the Legislature, for expenditure under the provisions of this chapter, and Chapter 1 (commencing with Section 128675) of Part 5 and shall reduce the amount of the special fees that the office is authorized to establish and charge.

(d) No health facility liable for the payment of fees required by this section shall be issued a license or have an existing license renewed unless the fees are paid. New, previously unlicensed health facilities shall be charged a pro rata fee to be established by the office during the first year of operation.

The license of any health facility, against which the fees required by this section are charged, shall be revoked, after notice and hearing, if it is determined by the office that the fees required were not paid within the time prescribed by subdivision (a).

127285. (a) Health facilities and clinics, except for chronic dialysis clinics as defined in subdivision (b) of Section 1204, shall annually report to the office all of the following information on forms supplied by the office:

(1) A current inventory of beds and services.

(2) Utilization data by bed type and service.

(3) Acquisitions of diagnostic or therapeutic equipment during the reporting period with a value in excess of five hundred thousand dollars ($500,000).

(4) Commencement of projects during the reporting period that require a capital expenditure for the facility or clinic in excess of one million dollars ($1,000,000).

(b) With respect to chronic dialysis clinics, the office may annually obtain this information to the extent it is available from the Federal End Stage Renal Disease Network.

127290. (a) The department shall contract with agencies approved pursuant to Section 127155 for the purpose of providing agencies with funds to assist them to perform the duties required of them by this chapter. The Advisory Health Council shall review and make recommendations to the department upon all contracts to be entered into under this section. The department shall prepare contracts upon information submitted by agencies in the form required by the department.

(b) Pending final approval by the department of the contracts, the department may advance funds to those area health planning agencies that the director determines require emergency assistance to carry out their functions under this chapter. This emergency funding authority shall expire July 1, 1977. After determining the emergency funding available to each area health planning agency, the department shall immediately notify the administrative body of each area health planning agency of the amount and the conditions governing its availability.

127295. The Legislature finds that funds available to the office, the health systems agencies, and the area health planning agencies for the implementation of this chapter may prevent the office, the health systems agencies and the area health planning agencies from fully complying with their statutorily mandated functions.

In the event that the health systems agencies lose all, or substantially all, federal funding that is not replaced by other funding at a level that allows them to fulfill their major responsibilities under this chapter and in order to ensure continuity of the certificate-of-need process, the Governor is hereby authorized to request that the Secretary for Health and Human Services eliminate federal designation and funding of some or all health systems agencies located within the state and to terminate some or all duties assigned to area health system planning agencies and to assign the office to conduct some or all functions heretofore designated to the health systems agencies and area health planning agencies.

127300. (a) Notwithstanding any other provision of law, on and after January 1, 1987, the requirement that health facilities and

specialty clinics apply for, and obtain, certificates of need or certificates of exemption is indefinitely suspended.

(b) Notwithstanding any other provision of law, the requirements of Section 15438.1 of the Government Code shall be suspended for the period of time specified for the suspension in subdivision (a).

CHAPTER 2. HEALTH POLICY RESEARCH AND EVALUATION

Article 1. Health Outcomes Reports (Reserved)

CHAPTER 3. UNIFORM BILLING FORMAT

127575. For purposes of this chapter, the following definitions shall apply:

(a) ''Carrier'' means any of the following:

(1) Any insurer, including, but not limited to, disability insurers, nonprofit hospital service plans, fraternal benefit societies, and firemen's, policemen's, or peace officers' benefit and relief associations.

(2) A health care service plan other than a specialized health care service plan.

(3) A self-funded employer sponsored plan, multiple employer trust, or Taft-Hartley Trust as defined by federal law, authorized to pay for health care services in this state.

(4) The State Compensation Insurance Fund.

(5) The health insurance offered to certain employees of this state by the Public Employees' Retirement System known as ''PERS'' Care.

(b) ''Department'' means the State Department of Health Services.

(c) ''Office'' means the Office of Statewide Health Planning and Development.

(d) ''Professional health care services'' means any diagnostic or treatment services provided in California directly to a patient by a person licensed or practicing pursuant to Division 2 (commencing with Section 500) of the Business and Professions Code who is eligible to directly bill for their services. ''Professional health care services'' does not include services provided by a person licensed pursuant to a chapter of Division 2 that the director of the office has determined, pursuant to Section 127590, should be exempted.

(e) ''Institutional provider services'' means any services, equipment, and supplies, other than professional health care services that are provided by an institution, site, or facility through that professional health care services are provided. ''Institutional provider services'' includes any component of an episode of health care for which there will be charges, other than professional health care services. ''Institutional provider services'' does not include

diagnostic or treatment services that would be considered ‘‘professional health care services’’ but for the fact that the provider is licensed under a chapter of Division 2 of the Business and Professions Code that the director of the office has exempted pursuant to Section 127590.

(f) ‘‘California uniform billing form for professional health care services’’ and ‘‘California uniform billing form for institutional provider services’’ means billing forms in the formats developed by the office pursuant to Section 127580.

127580. The office, after consultation with the Insurance Commissioner, the Commissioner of Corporations, the director, and the Director of Industrial Relations, shall adopt a California uniform billing form format for professional health care services and a California uniform billing form format for institutional provider services. The format for professional health care services shall be the format developed by the National Uniform Claim Form Task Force. The format for institutional provider services shall be the format developed by the National Uniform Billing Committee. The formats shall be acceptable for billing in federal Medicare and medicaid programs. The office shall specify a single uniform system for coding diagnoses, treatments, and procedures to be used as part of the uniform billing form formats. The system shall be acceptable for billing in federal Medicare and medicaid programs.

127585. (a) Carriers shall accept, and providers shall use, a completed California uniform billing form, or the electronic equivalent, for each instance when a carrier provides coverage for professional health care services and for each instance when a carrier provides coverage for institutional provider services.

(b) Carriers that are health care service plans licensed under the Knox-Keene Health Care Service Plan Act of 1975 (Chapter 2.2 (commencing with Section 1340) of Division 2 of the Health and Safety Code), and providers of professional health care services or institutional provider services covered by those plans shall be exempt from the requirement of subdivision (a) except in instances when the provider of the professional health care services bills the plan for the specific services provided and in instances when the provider of the institutional provider services bills the plan for the specific services provided.

(c) Nothing in the forms shall be construed to prohibit a carrier from requiring that its insured or enrollee, or a person acting on behalf of the insured or enrollee, submit other information to the carrier as necessary to determine that the professional health care services or institutional provider services are covered under the terms of the carrier’s health benefits plan.

127590. The Director of the Office of Statewide Health Planning and Development may determine that the definition of ‘‘professional health care services’’ in subdivision (d) of Section 127575 does not

include services provided by persons licensed under certain chapters of Division 2 of the Business and Professions Code and shall have the authority to determine the chapters that shall be exempt.

127595. The department shall adopt the California uniform billing form formats for use in all health care payment programs it administers, including, but not limited to, Medi-Cal, county health services programs, and other health care payment programs, for each instance when a program provides coverage for professional health care services and for each instance when a program provides coverage for institutional provider services. The department may adapt the billing format for institutional provider services only to the extent necessary for the forms to be optically scanned and automatically microfilmed. The department shall provide exemptions from this requirement as necessary and appropriate to the efficient operation of health care service plans that do not reimburse providers on a fee-for-service basis, except that the plans shall use the formats in instances when the professional or institutional provider bills a plan for the specific services provided. The department shall implement this requirement in any Medi-Cal contract for fiscal intermediary services entered into on or after January 1, 1993.

127600. (a) The department, in consultation with the office and the California Health Policy and Data Advisory Commission, may develop a uniform core dataset for public health programs to do all of the following:

(1) Reduce administrative complexity.

(2) Eliminate unnecessary duplication in the collection and reporting of data.

(3) Facilitate integration, consistency, and transfer of data among public health and health services programs.

(4) Promote monitoring of health status, planning, policy development and service coordination, quality assurance, and program evaluation for all public health programs.

(b) The department, in consultation with the office and the California Health Policy and Data Advisory Commission, shall develop proposed policies and procedures to ensure privacy and confidentiality of data and appropriate use and access to data.

(c) This section shall not be construed to require any physician and surgeon or other health care provider to provide any additional items of information to these public health care programs.

PART 3. HEALTH PROFESSIONS DEVELOPMENT

CHAPTER 1. HEALTH PROFESSIONS PLANNING

Article 1. Health Personnel Planning

127750. The office shall prepare a Health Manpower Plan for California. The plan shall consist of at least the following elements:

(a) The establishment of appropriate standards for determining the adequacy of supply in California of at least each of the following categories of health personnel: physicians, midlevel medical practitioners (physician's assistants and nurse practitioners); nurses; dentists; midlevel dental practitioners (dental nurses and dental hygienists); optometrists; optometry assistants; pharmacists; and pharmacy technicians.

(b) A determination of appropriate standards for the adequacy of supply of the categories in subdivision (a) shall be made by taking into account all of the following: current levels of demand for health services in California; the capacity of each category of personnel in subdivision (a) to provide health services; the extent to which midlevel practitioners and assistants can substitute their services for those of other personnel; the likely impact of the implementation of a national health insurance program on the demand for health services in California; professionally developed standards for the adequacy of the supply of health personnel; and assumptions concerning the future organization of health care services in California.

(c) A determination of the adequacy of the current and future supply of health personnel by category in subdivision (a) taking into account the sources of supply for such personnel in California, the magnitude of immigration of personnel to California, and the likelihood of the immigration continuing.

(d) A determination of the adequacy of the supply of specialties within each category of health personnel in subdivision (a). The determination shall be made, based upon standards of appropriate supply to speciality developed, in accordance with subdivision (b).

(e) Recommendations concerning changes in health manpower policies, licensing statutes, and programs needed to meet the state's need for health personnel.

127755. The office shall consult with the Health Manpower Policy Commission, health systems agencies, and other appropriate organizations in the preparation of this plan.

127760. The Legislature finds and declares that:

(a) Planning for appropriate supplies and distribution of health care personnel is essential to assure the continued health and well-being of the people of the state and also to contain excess costs

that may result from unnecessary training and under utilization of health care personnel.

(b) The information on physicians and surgeons collected by the Medical Board of California, in cooperation with the office, and under the authority of Sections 921 and 923 of the Business and Professions Code, has proven to be valuable for health manpower planning purposes. It is the intent of the Legislature, through this article and Article 2 (commencing with Section 104650) of Chapter 2 of Part 3 of Division 103, to provide for the efficient collection and analysis of similar information on other major categories of healing arts licentiates, in order to facilitate the development of the biennial health manpower plan and other reports and program activities of the office.

(c) It is the intent of the Legislature that the data transmitted to the office by the various boards be processed by the boards so that licentiates are not identified by name or license number.

127765. The office is authorized and directed to receive, with the cooperation of the respective healing arts licensing boards and licentiates, basic data on each licentiate in the following categories of health personnel: registered nurses, licensed vocational nurses, pharmacists, dentists, and optometrists. The office shall develop a suggested format for data collection to be utilized by the various boards. However, the methods utilized to collect and tabulate this information, including the format and content of questionnaires and other survey instruments, shall be determined by each respective healing arts licensing board after consultation with the director of the office.

127770. The basic data to be collected on each licentiate in accordance with Section 127765 shall include at least all of the following: principal and other practice locations, practice specialty or specialties for appropriate categories, time spent in direct patient-care/patient-contact and other professional activities, race or ethnicity, age, sex, and educational background.

127775. Notwithstanding Sections 922 and 925 of the Business and Professions Code, the office may receive, and the Medical Board of California may provide, information respecting individual licentiates collected pursuant to Sections 921 and 923 of the Business and Professions Code.

Information provided to the office pursuant to this section shall be transmitted in a form so that the name or license number of an individual licensee is not identifiable. However, an encoding procedure shall be used to assign a unique identifying number to the other information provided upon the questionnaire so as to allow the office to track the geographical movements of physicians for planning purposes.

127780. The office shall maintain the confidentiality of the information it receives respecting individual licentiates under this

article and Article 2 (commencing with Section 104650) of Chapter 2 of Part 3 of Division 103 and shall only release information in a form that cannot be used to identify individuals.

127785. The California Postsecondary Education Commission shall furnish to the office, at least biennially, all information that the commission has compiled pursuant to Section 66903.2 of the Education Code, that constitutes basic data as to enrollees in public and private educational institutions and programs preparing or training health personnel. The office may request additional data from licensing boards and agencies to supplement the data received from the commission, as necessary to carry out the health personnel planning and development activities of the office.

127790. The basic data to be provided to the office pursuant to Section 127785 shall include all of the following, by training year or class: numbers enrolled, numbers in the various discipline or specialty categories, and numbers in age, sex, and race or ethnic categories.

127795. The office shall implement the authority granted to the office by Sections 127765, 127775, and 127785, on a phased basis, consistent with respective relicensure intervals and with the availability of resources for the effective utilization of the data and information obtained under that authority.

127800. The respective licensing boards for registered nurses, licensed vocational nurses, pharmacists, optometrists, and dentists may adopt regulations that require licentiates to provide the information included in Section 127770 as a condition of relicensure. In order to facilitate the collection and analysis of this information, any of these boards may use information from a scientifically selected random sample of the licentiates. These licensing boards may collaborate with the office in the collection or analysis of this information.

CHAPTER 2. PERSONNEL RECRUITMENT AND EDUCATION

Article 1. Health Professions Careers Opportunity Program

127875. The Legislature finds and declares that California has an insufficient number of minority health professionals to meet the health care needs in the state. Greater numbers of minority health professionals are required to meet the special needs of population groups who face cultural and linguistic barriers to adequate health care, and to meet the state's needs for a more equitable geographic distribution of professional health personnel resources.

127880. It is the intent of the Legislature to maintain a Health Professions Career Opportunity Program designed to:

(a) Increase the number of ethnic minorities in health professional training.

(b) Increase the number of minority health professionals practicing in health manpower shortage areas in this area.

127885. The office shall maintain a Health Professions Career Opportunity Program that shall include, but not be limited to, all of the following:

(a) Producing and disseminating a series of publications aimed at informing and motivating minority and disadvantaged students to pursue health professional careers.

(b) Conducting a conference series aimed at informing those students of opportunities in health professional training and mechanisms of successfully preparing to enter the training.

(c) Providing support and technical assistance to health professional schools and colleges as well as student and community organizations active in minority health professional development.

(d) Conducting relevant manpower information and data analysis in the field of minority and disadvantaged health professional development.

(e) Providing necessary consultation, recruitment, and counseling through other means.

(f) Supporting and encouraging minority health professionals in training to practice in health professional shortage areas of California.

Article 2. Health Promotion Education Programs for Allied Health Professionals

127900. (a) The Legislature finds and declares that evidence exists to support the development of health promotion and health-risk reduction programs as an effective method of constraining the annual inflation rate for expenditures in the health industry. It is, therefore, the intent of the Legislature that a health manpower education program be developed to demonstrate the health promotion and health-risk reduction concept at educational institutions, with special emphasis on health manpower development in urban areas having a disproportionate share of disadvantaged and indigent persons.

(b) The office shall establish a contract program for funding allied health manpower training projects related to health promotion and health-risk reduction. The contract program shall provide funds to eligible institutions, as determined by the office, for all of the following purposes:

(1) Teaching existing and future primary care providers about health-risk reduction through the institutions' basic curricula.

(2) Recruiting, remediating, and retaining minority allied health professionals, including, but not limited to, physician assistants, nurse practitioners, nurse midwives, public health nurses, health educators, dieticians, and nutritionists, especially those who provide in-home patient care.

(3) Increasing the supply of medical care in underserved urban areas and demonstrating methods which reduce cost through the use of allied health personnel.

(c) These funds shall be available to institutions which currently operate programs for training family practice physicians, other primary care physicians, and those health professionals identified in paragraph (2) of subdivision (b).

(d) The recipients of the funds shall provide, but shall not be limited to providing, orientation and training of primary care providers in teaching methods related to patient health education and health promotion, such as educating allied health professionals in the principles of self-care management as it relates to specific health problems in medically underserved communities.

(e) The office shall consult with organizations and experts in the field regarding the establishment of this program, and beginning with the 1986–87 fiscal year, this program shall be implemented to the extent funds are provided in the Budget Act. This program shall be designed to accommodate an appropriation request in the range of forty thousand dollars ($40,000) to eighty thousand dollars ($80,000) per year.

(f) The director of the office may waive any of the requirements of subdivisions (b) and (c) if a potential contractor demonstrates an ability to meet the goals and objectives of the program.

Article 3. Nursing Education Scholarships

127975. Recognizing that there is a shortage in supply of registered nurses, and that if the number of nursing students is to be materially increased to meet the demand there must first be an increase in the number of persons qualified for teaching or supervising in clinical areas, and further recognizing that the cost of education deters nurses from obtaining the education necessary to qualify them for teaching or supervision in clinical areas, there are hereby created state scholarships that shall be maintained by the state and awarded and administered pursuant to this article.

127980. There shall be available at least 10 scholarships per year. The scholarships shall be available to any registered nurse who is enrolled in one of the following accredited nursing programs in a college or university in California that is accredited by the Western Association of Schools and Colleges:

(a) The junior or senior year in a bachelor’s degree program in nursing.

(b) A program supplementary to a bachelor’s degree program in nursing required for admission to master’s level studies, in nursing.

(c) A master’s degree or a post-master’s program in teaching or supervision in a clinical nursing area.

127985. No person shall be awarded a scholarship under subdivision (a) or (b) of Section 127980 unless:

(a) He or she is a resident of California.

(b) He or she is licensed as a registered nurse by this state.

(c) He or she has complied with all the regulations adopted pursuant to this article.

(d) He or she has agreed that he or she will continue his or her education to completion of the bachelor's degree or a program supplemental to a bachelor's degree required for admission to master level studies in nursing, and that after completion of the requirements of subdivision (a) or (b) of Section 127980 and within a period of time to be determined by the office, will enroll in an accredited master's degree program in teaching or supervision in a clinical nursing area.

(e) He or she agrees that immediately upon completion of his or her graduate study, either master's degree or post-master's program, he or she will assume an employment obligation in California in teaching or supervision in a clinical nursing area, for not less than one year.

127990. No person shall be awarded a scholarship under subdivision (c) of Section 127980 unless he or she satisfies the requirements prescribed by subdivisions (a), (b), (c), and (e) of Section 127985.

127995. The office shall administer the program of nursing education scholarships and shall for this purpose, adopt regulations as it determines are necessary to carry out this article.

128000. Applications for scholarships shall be made to the office, upon forms provided by it, at the times and in the manner prescribed by the regulations adopted by the office.

128005. The office shall award the scholarships to the applicants that it determines are best fitted to undertake the educational program for which the scholarships are awarded and will be the best qualified to teach or supervise. In awarding the scholarships the office may give a preference to applicants who are willing to be available, upon the completion of their educational program, for a position in any part of the state. The office shall not, however, award any scholarship to an applicant if it determines that the applicant has adequate financial resources to pay the cost of the education necessary to qualify him or her for teaching or supervision in a clinical area.

128010. Scholarships shall be awarded without regard to race, religion, creed, or sex.

128015. Each scholarship under this article is for the period of no more than one academic year, and the award shall be:

(a) For a person qualifying under subdivision (a) or (b) of Section 127980, the sum of two hundred dollars ($200) per month for 12 months, plus school fees.

(b) For a person qualifying under subdivision (c) of Section 127980, the sum of two hundred fifty dollars ($250) per month for 12 months, plus school fees.

128020. A scholarship shall remain in effect only during the period, as determined by the office, that the person receiving the award achieves satisfactory progress and is regularly enrolled, within the terms of this article, as a full-time student.

Article 4. Health Professions Planning Grants

128025. For the purpose of this article, ''innovative programs of education in the health professions'' means programs for the development of physicians and surgeons, podiatrists, dentists, pharmacists, nurses, optometrists, and occupations in the allied health professions, that emphasize all of the following:

(a) The practice in the community on the part of graduates of the program.

(b) The utilization of existing teaching resources and clinical care facilities within the community where the program is located.

(c) The development of curricular mechanisms that allow for movement from one occupational category to the next, up to and including the doctor of medicine level.

(d) The training of persons possessing previously acquired health care skills, for positions of greater responsibility, with an emphasis upon corpsmen honorably discharged from the military.

(e) The training of persons with little or no formal education but with a willingness and aptitude to acquire health care skills.

(f) The development of coordination with community health care facilities to insure quality education and satisfactory employment opportunities for graduates of the program.

128030. The office, in cooperation with the California Postsecondary Education Commission, shall administer the program established pursuant to this chapter and shall for this purpose, adopt regulations as it determines are reasonably necessary to carry out this chapter.

128035. The office is authorized to make grants, from funds appropriated by the Legislature for this purpose, to assist organizations in meeting the cost of special projects to plan, develop, or establish innovative programs of education in the health professions, or for research in the various fields related to education in the health professions, or to develop training for new types of health professions personnel, or to meet the costs of planning experimental teaching facilities.

In determining priority of project applications, the office shall give the highest priority to:

(1) Applicants able to obtain commitments for matching planning funds from other governmental and private sources.

(2) Applicants who develop a preliminary plan that conforms to the criteria stated hereinabove for innovative programs of education in the health sciences.

(3) Applicants that in its judgment are most able to translate a plan into a feasible program.

CHAPTER 3. PROFESSIONAL PRACTICE DEVELOPMENT

Article 1. Health Manpower Pilot Projects

128125. The Legislature finds that there is a need to improve the effectiveness of health care delivery systems. One way of accomplishing that objective is to utilize health care personnel in new roles and to reallocate health tasks to better meet the health needs of the citizenry.

The Legislature finds that experimentation with new kinds and combinations of health care delivery systems is desirable, and that, for purposes of this experimentation, a select number of publicly evaluated health manpower pilot projects should be exempt from the healing arts practices acts. The Legislature also finds that large sums of public and private funds are being spent to finance health manpower innovation projects, and that the activities of some of these projects exceed the limitations of state law. These projects may jeopardize the public safety and the careers of persons who are trained in them. It is the intent of the Legislature to establish the accountability of health manpower innovation projects to the requirements of the public health, safety, and welfare, and the career viability of persons trained in these programs. Further, it is the intent of this legislation that existing healing arts licensure laws incorporate innovations developed in approved projects that are likely to improve the effectiveness of health care delivery systems.

128130. For the purposes of this article:

(a) ''Office'' means the Office of Statewide Health Planning and Development.

(b) ''Approved project'' means an educational or training program approved by the office that does any of the following on a pilot program basis:

(1) Teaches new skills to existing categories of health care personnel.

(2) Develops new categories of health care personnel.

(3) Accelerates the training of existing categories of health care personnel.

(4) Teaches new health care roles to previously untrained persons, and that has been so designated by the office.

(c) ''Trainee'' means a person to be taught health care skills.

(d) ''Supervisor'' means a person designated by the project sponsor who already possesses the skills to be taught the trainees and

is certified or licensed in California to perform the health care tasks involving the skills.

(e) ''Health care services'' means the practice of medicine, dentistry, nursing, including, but not limited to, specialty areas of nursing such as midwifery, pharmacy, optometry, podiatry, and psychology.

128135. The office may designate experimental health manpower projects as approved projects where the projects are sponsored by community hospitals or clinics, nonprofit educational institutions, or government agencies engaged in health or education activities. Nothing in this section shall preclude approved projects from utilizing the offices of physicians, dentists, pharmacists, and other clinical settings as training sites.

128140. Notwithstanding any other provision of law, a trainee in an approved project may perform health care services under the supervision of a supervisor where the general scope of the services has been approved by the office.

128145. A trainee and his or her supervisor shall be held to the standard of care of, and shall be afforded the same immunities as, an individual otherwise legally qualified to perform the health care service or services performed by the trainee or supervisor.

128150. Any patient being seen or treated by a trainee shall be apprised of that fact and shall be given the opportunity to refuse treatment. Consent to the treatment shall not constitute assumption of the risk.

128155. The office, after one or more public hearings thereon, shall establish minimum standards, guidelines, and instructions for pilot projects. Advance notice of the hearing shall be sent to all interested parties and shall include a copy of the proposed minimum standards, guidelines, and instructions.

Organizations requesting designation as approved projects shall complete and submit to the office an application, that shall include a description of the project indicating the category of person to be trained, the tasks to be taught, the numbers of trainees and supervisors, a description of the health care agency to be used for training students, and a description of the types of patients likely to be seen or treated. Additionally, the application shall contain a description of all of the following:

(a) The evaluation process to be used.

(b) The baseline data and information to be collected.

(c) The nature of program data that will be collected and the methods for collecting and analyzing the data.

(d) Provision for protecting the safety of patients seen or treated in the project.

(e) A statement of previous experience in providing related health care services.

128160. (a) Pilot projects may be approved in the following fields:

(1) Expanded role medical auxiliaries.

(2) Expanded role nursing.

(3) Expanded role dental auxiliaries.

(4) Maternal child care personnel.

(5) Pharmacy personnel.

(6) Mental health personnel.

(7) Other health care personnel including, but not limited to, veterinary personnel, chiropractic personnel, podiatric personnel, geriatric care personnel, therapy personnel, and health care technicians.

(b) Projects that operate in rural and central city areas shall be given priority.

128165. The office shall carry out periodic onsite visitations of each approved project and shall evaluate each project to determine the following:

(a) The new health skills taught or extent that existing skills have been reallocated.

(b) Implication of the project for existing licensure laws with suggestions for changes in the law where appropriate.

(c) Implications of the project for health services curricula and for the health care delivery systems.

(d) Teaching methods used in the project.

(e) The quality of care and patient acceptance in the project.

(f) The extent that persons with the new skills could find employment in the health care system, assuming laws were changed to incorporate their skill.

(g) The cost of care provided in the project, the likely cost of this care if performed by the trainees subsequent to the project, and the cost for provision of this care by current providers thereof.

All data collected by the office and by projects approved pursuant to this article shall become public information, with due regard for the confidentiality of individual patient information. The raw data on which projects' reports are based and the data on which the office's evaluation is based shall be available on request for review by interested parties. The office shall provide a reasonable opportunity for interested parties to submit dissenting views or challenges to reports to the Legislature and professional licensing boards required by this section. The office shall publish those comments, subject only to nonsubstantive editing, as part of its annual, or any special, reports.

128170. The office shall approve a sufficient number of projects to provide a basis for testing the validity of the experiment.

128175. The office shall seek the advice of appropriate professional societies and appropriate healing arts licensing boards prior to designating approved projects. In the case of projects

sponsored by a state agency, the following additional procedures shall apply:

(a) A hearing shall be conducted by a disinterested state government official selected by the director of the office from a state agency other than the office or the proponent of the project. The cost of the services of the disinterested state governmental official shall be paid by the office pursuant to an interagency agreement with the state agency represented by the state governmental official.

(b) A notice of hearing shall be sent by the office to interested parties, as designated by the director of the office, by registered mail no less than 30 days preceding the date of the hearing. The notice shall include, but not be limited to, the date, time, location, and subject matter of the hearing, and shall include a copy of the application for a pilot project that is the subject of the hearing.

(c) A verbatim transcript of the hearing shall be prepared and distributed to interested parties upon request.

(d) Within 60 days of the release of the transcript, the office shall submit a recommendation on the proposal to the director of the office and shall send copies to the interested parties.

(e) The director of the office shall accept comments on the recommendations, and, on or after 30 days after transmittal of the recommendations, the director of the office shall approve or disapprove the proposed project.

128180. The office shall not approve a project for a period lasting more than two training cycles plus a preceptorship of more than 24 months, unless the office determines that the project is likely to contribute substantially to the availability of high-quality health services in the state or a region thereof.

CHAPTER 4. FAMILY PRACTICE PHYSICIAN PROGRAMS (Reserved)

Article 1. Family Physician Training Program (Reserved)

Article 2. Additional Duties of the Health Manpower Policy Commission (HMPC) (Reserved)

CHAPTER 5. MINORITY HEALTH PROFESSIONS EDUCATION FOUNDATION PROGRAMS

Article 1. Minority Health Professions Education Foundation (Reserved)

Article 2. California Registered Nurse Education Program

128375. (a) The Legislature hereby finds and declares that an adequate supply of professional nurses is critical to assuring the health and well-being of the citizens of California.

(b) The Legislature further finds that changes in the health care system of this state have increased the need for more highly skilled nurses. These changes include advances in medical technology and pharmacology, that necessitate the use of more highly skilled nurses in acute care facilities. Further, the containment of health care costs has led to increased reliance on home health care and outpatient services and to a higher proportion of more acutely ill patients in acute care facilities. Long-term care facilities also need more highly educated nursing personnel. Both shifts require a larger number of skilled nursing personnel.

(c) The Legislature further finds and declares that in nursing, as in other professions, certain populations are underrepresented. The Legislature also finds and declares that it is especially important that nursing care be provided in a way that is sensitive to the sociocultural variables that affect a person's health. The Legislature recognizes that the financial burden of obtaining a baccalaureate degree is considerable and that persons from families lacking adequate financial resources may need financial assistance to complete a baccalaureate degree.

(d) The Legislature further finds and declares that approximately 20 percent of all Californians live in rural and urban areas that have been designated health manpower shortage areas. The shortage of professional nurses in these areas makes it more difficult for those citizens to obtain health care and more difficult to attract and retain other health care professionals to those areas.

(e) The Legislature further finds and declares that applications for enrollment in programs that grant baccalaureate of science of nursing degrees have declined at the same time that demand for professional nurses has increased.

128380. It is the intent of the Legislature to accomplish the following:

(a) Assure an adequate supply of appropriately trained professional nurses.

(b) Encourage persons from populations that are currently underrepresented in the nursing profession to enter that profession.

(c) Encourage professional nurses to work in medically underserved areas.

128385. (a) There is hereby created the Registered Nurse Education Program within the Minority Health Professions Education Foundation. Persons participating in this program shall be either persons from demographically underrepresented groups or persons who agree in writing prior to graduation to serve in an eligible county health facility or a health manpower shortage area, as designated by the director of the office. Persons from demographically underrepresented groups may apply for awards for persons agreeing to serve in eligible county health facilities or health manpower shortage areas. The Registered Nurse Education Program

shall be administered in accordance with Article 14 (commencing with Section 69795) of Chapter 2 of Part 42 of the Education Code, except that all funds in the Registered Nurse Education Fund shall be used only for the purpose of promoting the education of registered nurses and related administrative costs, and except that persons who apply for awards that require them to serve in an eligible county health facility or a health manpower shortage area may be, but are not required to be, persons from demographically underrepresented groups or persons from ''underrepresented minority groups'' as defined in subdivision (g) of Section 69795 of the Education Code. The Minority Health Professions Education Foundation shall make recommendations to the director of the office concerning both the following:

(1) A standard contractual agreement to be signed by the director and any student who has received an award to work in an eligible county health facility or in a health manpower shortage area that would require a period of obligated professional service in the areas of California designated by the Health Manpower Policy Commission as deficient in primary care services. The obligated professional service shall be in direct patient care. The agreement shall include a clause entitling the state to recover the funds awarded plus the maximum allowable interest for failure to begin or complete the service obligation.

(2) Maximum allowable amounts for scholarships, educational loans, and loan repayment programs in order to assure the most effective use of these funds.

(b) Applicants may be persons licensed as registered nurses or graduates of associate degree nursing programs prior to entering a program granting a baccalaureate of science of nursing. Priority shall be given to applicants who hold associate degrees in nursing.

(c) Not more than 5 percent of the funds available under the Registered Nurse Education Program shall be available for a pilot project designed to test whether it is possible to encourage articulation from associate degree nursing programs to baccalaureate of science of nursing programs. Persons who otherwise meet the standards of subdivision (a) shall be eligible for educational loans when they are enrolled in associate degree nursing programs. If these persons complete a baccalaureate of science of nursing program in California within five years of obtaining an associate degree in nursing and meet the standards of this article, these loans shall be completely forgiven.

(d) As used in this section, ''eligible county health facility'' means a county health facility that has been determined by the office to have a nursing vacancy rate greater than noncounty health facilities located in the same health facility planning area.

128390. The funds made available pursuant to this article shall be used as specified in Article 14 (commencing with Section 69795) of

Chapter 2 of Part 42 of the Education Code, except that the funds shall be used only for the purpose of assisting students in completing nursing programs meeting the standards specified in subdivision (j) of Section 69799 of the Education Code.

128395. In developing this program, the Minority Health Professions Education Foundation shall solicit the advice of representatives of the Board of Registered Nurses, the California Nurses Association, the Chancellor of the California Community Colleges, the Chancellor of the California State University, and the California Association of Hospitals and Health Systems.

128400. There is hereby established in the State Treasury the Registered Nurse Education Fund. All money in the fund shall be used for the purposes specified in the California Registered Nurse Education Program established pursuant to this article. This fund shall receive money collected pursuant to subdivision (c) of Section 2815 of the Business and Professions Code. These funds shall be appropriated annually in the Budget Act.

128405. This article shall remain in effect only until January 1, 2000, and as of that date is repealed, unless a later enacted statute, that is enacted before January 1, 2000, deletes or extends that date.

Article 3. Geriatric Nurse Practitioner and Clinical Nurse Specialist Scholarship Program

128425. The Legislature hereby finds and declares that more and better qualified medical care is needed for residents of health care facilities. The Legislature further finds that the shortage of physicians available to work in skilled nursing facilities and other facilities providing care primarily to geriatric patients is expected to continue.

Therefore, it is the intent of the Legislature to promote more and better-qualified medical care for geriatric patients by increasing training opportunities for geriatric nurse practitioners and geriatric clinical nurse specialists and by providing an incentive for nurse practitioners and clinical nurse specialists to practice in skilled nursing facilities or other facilities providing care primarily to geriatric patients. It is not the intent of the Legislature in enacting this article to change the existing scope of practice of nurse practitioners or clinical nurse specialists.

128430. For purposes of this article:

(a) A ‘‘geriatric clinical nurse specialist’’ is a registered nurse, licensed by the Board of Registered Nursing, who has completed a master’s program in nursing with an emphasis on care of elders.

(b) A ‘‘geriatric nurse practitioner’’ is a registered nurse, licensed by the Board of Registered Nursing as a nurse practitioner, who has completed an educational program in gerontological nursing, or family or adult nursing with an emphasis on care of elders.

128435. (a) There is hereby created the Geriatric Nurse Practitioner and Clinical Nurse Specialist Scholarship Program within the Minority Health Professions Education Foundation. Persons participating in this program shall be persons enrolled in nurse practitioner or clinical nurse specialist programs in this state who agree in writing prior to graduation to practice for a period of time, to be determined in accordance with paragraph (1) of subdivision (b), as geriatric nurse practitioners or geriatric clinical nurse specialists either in skilled nursing facilities licensed pursuant to Section 1250 or in other settings where care is provided primarily to geriatric patients. This program shall be administered in accordance with Article 2 (commencing with Section 128375), and with Article 14 (commencing with Section 69795) of the Education Code, except that all funds shall be used only for geriatric nurse practitioners and geriatric clinical nurse specialists and except that the programs shall be available only to those geriatric nurse practitioners and geriatric clinical nurse specialists who agree to practice in skilled nursing facilities or other settings caring for geriatric patients.

(b) The Minority Health Professions Education Foundation shall make recommendations to the director of the office concerning both of the following:

(1) A standard contractual agreement to be signed by the director and any student who has received an award to practice in a skilled nursing facility or other setting caring for geriatric patients that would require a period of obligated professional service. The obligated professional service shall be in direct patient care. The obligated professional service may be performed by a geriatric nurse practitioner or geriatric clinical nurse specialist either as an employee or independent contractor of a skilled nursing facility or other setting caring for geriatric patients, or as an employee or independent contractor of a physician providing care for geriatric patients in a skilled nursing facility or other setting. The agreement shall include a clause entitling the state to recover the funds awarded plus the maximum allowable interest for failure to begin or complete the service obligation.

(2) Maximum allowable amounts for scholarships and other financial assistance in order to assure the most effective use of these funds.

(c) To the extent feasible and appropriate, the Minority Health Professions Education Foundation shall assure that the standard contractual agreement and other aspects of the Geriatric Nurse Practitioner and Clinical Nurse Specialist Scholarship Program are substantially similar to those developed for the Registered Nurse Education Program.

128525. The Legislature finds and declares that:

(a) A pilot program was established by the Office of Statewide Health Planning and Development to test the feasibility of performing high quality, safe diagnostic cardiac catheterization procedures in a freestanding cardiac catheterization laboratory.

(b) Evaluation of this pilot program by the office demonstrated that it is feasible to conduct these procedures in nonhospital settings and that these laboratories maintain the quality of the diagnostic procedures while also reducing the cost of care.

(c) Based on this evaluation, it is the intent of the Legislature that those freestanding cardiac catheterization laboratories that are in active status in the pilot program be licensed.

128530. (a) Notwithstanding any other provision of law, a freestanding cardiac catheterization laboratory that as of December 31, 1993, was in active status in the Health Care Pilot Project established pursuant to former Part 1.85 (commencing with Section 444) of Division 1, and that meets the requirements specified in this section, may be licensed by the State Department of Health Services as a freestanding cardiac catheterization laboratory. The license shall be subject to suspension or revocation, or both, in accordance with Article 5 (commencing with Section 1240) of Chapter 1 of Division 2. An application for licensure or annual renewal shall be accompanied by a fee of one thousand dollars ($1,000).

(b) A laboratory granted a license pursuant to this section shall be subject to the department's regulations that govern cardiac catheterization laboratories operating in hospitals without facilities for cardiac surgery, any similar regulations that may be developed by the department specifically to govern freestanding cardiac catheterization laboratories, and to the following regulations: subdivisions (a) and (d) of Section 70129 of; paragraphs (1), (2), (3), and (4) of subdivision (a) of, and subdivision (i) of Section 70433 of; paragraphs (1), (3), (4), and (5) of subdivision (a) of Section 70435 of; subparagraphs (A), (B), and (D) of paragraph (1) of, and paragraphs (5) and (7) of, subdivision (b) of Section 70437 of; subdivision (a) of Section 70439 of; Sections 70841, 75021, and 75022 of; subdivision (a) of Section 75023 of; Sections 75024, 75025, and 75026 of; subdivisions (a), (b), and (c) of Section 75027 of; subdivision (b) of Section 75029 of; Section 75030 of; subdivision (b) of Section 75031 of; Sections 75034, 75035, 75037, 75039, 75045, and 75046 of; subdivision (a) of Section 75047 of; and Sections 75050, 75051, 75052, 75053, 75054, 75055, 75057, 75059, 75060, 75061, 75062, 75063, 75064, 75065, 75066, 75071, and 75072 of; Title 22 of the California Code of Regulations.

(c) A laboratory granted a license pursuant to this section shall have a system for the ongoing evaluation of its operations and the services it provides. This system shall include a written plan for evaluating the efficiency and effectiveness of the health care services provided that describes the following:

(1) The scope of the services provided.

(2) Measurement indicators regarding the processes and outcomes of the services provided.

(3) The assignment of responsibility when the data from the measurement indicators demonstrates the need for action.

(4) A mechanism to ensure followup evaluation of the effectiveness of the actions taken.

(5) An annual evaluation of the plan.

(d) A laboratory granted a license pursuant to this section is authorized to perform only the following diagnostic procedures:

(1) Right heart catheterization or angiography, or both.

(2) Left heart catheterization or angiography, or both.

(3) Coronary catheterization and angiography.

(4) Electrophysiology studies.

(e) A laboratory granted a license pursuant to this section shall only perform its procedures on adults, on an outpatient basis. Each laboratory shall define patient characteristics that are appropriate for safe performance of procedures in the laboratory, and include evaluation of these criteria in its quality assurance process.

(f) Notwithstanding the requirements already set forth in this chapter, freestanding cardiac catheterization laboratories shall comply with all other applicable federal, state, and local laws.

(g) This section shall become operative upon the effective date of the bill adding this section, and does not require the department to adopt regulations.

CHAPTER 2. POSTSURGICAL CARE DEMONSTRATION PROJECT

128600. (a) The Office of Statewide Health Planning and Development shall conduct a demonstration project to evaluate the accommodation of postsurgical care patients for periods not exceeding two days, except that the attending physician and surgeon may require that the stay be extended to no more than three days.

(b) (1) The demonstration project shall operate for a period not to exceed six years, for no more than 12 project sites, one of which shall be located in Fresno County. However, the demonstration project shall be extended an additional three years, to September 30, 1997, only for those project sites that were approved by the office and operational prior to January 1, 1994.

(2) Any of the 12 project sites may be distinct parts of health facilities, or any of those sites may be physically freestanding from health facilities. None of the project sites that are designated as distinct parts of health facilities, shall be located in the service area of any one of the six freestanding project sites. None of the project sites that are designated as distinct parts of health facilities shall have a service area that overlaps with any one or more service areas of the

freestanding pilot sites. For the purposes of this section, service area shall be defined by the office.

(c) (1) The office shall establish standards for participation, commensurate with the needs of postsurgical care patients requiring temporary nursing services following outpatient surgical procedures.

(2) In preparing the standards for participation, the office may, as appropriate, consult with the state department and with a technical advisory committee which may be appointed by the Director of the Office of Statewide Health Planning and Development. The committee shall have no more than eight members, all of whom shall be experts in health care, as determined by the director of the office. One of the members of the committee shall, as determined by the director of the office, have specific expertise in the area of pediatric surgery and recovery care.

(3) If a technical advisory committee is established by the director of the office, members of the committee shall be reimbursed for any actual and necessary expenses incurred in connection with their duties as members of the committee.

(d) Not later than six months prior to the conclusion of the demonstration project, the office shall submit an evaluation of the demonstration project to the Legislature on the effectiveness and safety of the demonstration project in providing recovery services to patients receiving outpatient surgical services. The office, as part of the evaluation, shall include recommendations regarding the establishment of a new license category or amendment of existing licensing standards.

(e) The office shall establish and administer the demonstration project in facilities with no more than 20 beds which continuously meet the standards of skilled nursing facilities licensed under subdivision (c) of Section 1250, except that the office may, as appropriate and unless a danger to patients would be created, eliminate or modify the standards. This section shall not prohibit general acute care hospitals from participating in the demonstration project. The office may waive those building standards applicable to a project site which is a distinct part of a health facility which are inappropriate, as determined by the office, to the demonstration project. Notwithstanding health facility licensing regulations contained in Division 5 (commencing with Section 70001) of Title 22 of the California Code of Regulations, a project site which is a distinct part of a health facility shall comply with all standards for participation established by the office and with all regulations adopted by the office to implement this section. A project site which is a distinct part of a health facility shall not, for the duration of the pilot project, be subject to Division 5 (commencing with Section 70001) of Title 22 of the California Code of Regulations which conflict, as determined by the office, with the demonstration project standards or regulations.

(f) The department shall issue a facility identification number to each facility selected for participation in the demonstration project.

(g) Persons who wish to establish recovery care programs shall make application to the office for inclusion in the pilot program. Applications shall be made on forms provided by the office and shall contain sufficient information determined as necessary by the office.

(h) As a condition of participation in the pilot program, each applicant shall agree to provide statistical data and patient information that the office deems necessary for effective evaluation. It is the intent of the Legislature that the office shall develop procedures to assure the confidentiality of patient information and shall only disclose patient information, including name identification, as is necessary pursuant to this section or any other law.

(i) Any authorized officer, employee, or agent of the office or the state department may, upon presentation of proper identification, enter and inspect any building or premises and any records, including patient records, of a pilot project participant at any reasonable time to review compliance with, or to prevent any violation of, this section or the regulations and standards adopted thereunder.

(j) The office may suspend or withdraw approval of any or all pilot projects with notice, but without hearing if it determines that patient safety is being jeopardized.

(k) The office may charge applicants and participants in the program a reasonable fee to cover its actual cost of administering the pilot program and the cost of any committee created under this section.

(*l*) The office may contract with a medical consultant or other advisers as necessary, as determined by the office. Due to the necessity to expedite the demonstration project and its extremely specialized nature, the contracts shall be exempt from Section 10373 of the Public Contract Code, and shall be considered sole-source contracts.

(m) The office may adopt emergency regulations to implement this section in accordance with Section 11346.1 of the Government Code, except that the regulations shall be exempt from the requirements of subdivisions (e), (f), and (g) of that section. The regulations shall be deemed an emergency for the purposes of Section 11346.1 of the Government Code.

Applications to establish any of the four project sites authorized by the amendments made to this section during the 1987–88 Regular Session of the California Legislature shall be considered by the office from among the applications submitted to it in response to its initial request for proposal process.

(n) Any administrative opinion, decision, waiver, permit, or finding issued by the office prior to July 1, 1990, with respect to any of the demonstration projects approved by the office prior to July 1,

1990, shall automatically be extended by the office to remain fully effective as long as the demonstration projects are required to operate pursuant to this section.

(o) The office shall not grant approval to a postsurgical recovery care facility, as defined in Section 97500.111 of Title 22 of the California Code of Regulations, which is freestanding, as defined in Section 97500.49 of Title 22 of the California Code of Regulations, to begin operation as a participating demonstration project if it is located in the County of Solano.

128605. (a) In addition to the 12 postsurgical care demonstration project sites authorized in Section 128600, the office may approve one additional freestanding demonstration project, in accordance with the requirements of Section 128600, in a site that is in a rural area. For the purposes of this section, ''rural area'' means any area of the state that is not in a metropolitan statistical area as described in the publication ''State and Metropolitan Area Data Book,'' 1986, published by the United States Department of Commerce.

(b) In order to receive applications for this one additional rural project site, the office shall accept additional applications until October 31, 1988.

PART 5. HEALTH DATA

CHAPTER 1. HEALTH FACILITY DATA

128675. This chapter shall be known as the Health Data and Advisory Council Consolidation Act.

128680. The Legislature hereby finds and declares that:

(a) Significant changes have taken place in recent years in the health care marketplace and in the manner of reimbursement to health facilities by government and private third-party payers for the services they provide.

(b) These changes have permitted the state to reevaluate the need for, and the manner of data collection from health facilities by the various state agencies and commissions.

(c) It is the intent of the Legislature that as a result of this reevaluation that the data collection function be consolidated in a single state agency. It is the further intent of the Legislature that the single state agency only collect that data from health facilities that are essential. The data should be collected, to the extent practical on consolidated, multipurpose report forms for use by all state agencies.

(d) It is the further intent of the Legislature to eliminate the California Health Facilities Commission and the State Advisory Health Council, and to create a single advisory commission to assume consolidated data collection and planning functions.

(e) It is the Legislature's further intent that the review of the data that the state collects be an ongoing function. The office, with the

advice of the advisory commission, shall annually review this data for need and shall revise, add, or delete items as necessary. The commission and the office shall consult with affected state agencies and the affected industry when adding or eliminating data items. However, the office shall neither add nor delete data items to the Hospital Discharge Abstract Data Record or the quarterly reports without prior authorizing legislation, unless specifically required by federal law or judicial decision.

(f) The Legislature recognizes that the authority for the California Health Facilities Commission is scheduled to expire January 1, 1986. It is the intent of the Legislature, by the enactment of this chapter, to continue the uniform system of accounting and reporting established by the commission and required for use by health facilities. It is also the intent of the Legislature to continue an appropriate, cost-disclosure program.

128685. Intermediate care facilities/developmentally disabled-habilitative, as defined in subdivision (e) of Section 1250, are not subject to this chapter.

128690. Intermediate care facilities/developmentally disabled—nursing, as defined in subdivision (h) of Section 1250, are not subject to this chapter.

128695. There is hereby created the California Health Policy and Data Advisory Commission to be composed of 11 members.

The Governor shall appoint seven members, one of whom shall be a hospital chief executive officer, one of whom shall be a long-term care facility chief executive officer, one of whom shall be a representative of the health insurance industry involved in establishing premiums or underwriting, one of whom shall be a representative of a group prepayment health care service plan, one of whom shall be a representative of a business coalition concerned with health, and two of whom shall be general members. The Speaker of the Assembly shall appoint two members, one of whom shall be a physician and surgeon and one of whom shall be a general member. The Senate Rules Committee shall appoint two members, one of whom shall be a representative of a labor coalition concerned with health, and one of whom shall be a general member.

The chairperson shall be designated by the Governor. The Governor shall designate four original appointments that will be for four-year terms. The Governor shall designate three original appointments that shall be for two-year terms. The Speaker of the Assembly shall designate one original appointment that will be for two years and one original appointment that will be for four years. The Senate Rules Committee shall designate one original appointment that will be for two years and one original appointment that will be four years. Thereafter, all appointments shall be for four-year terms.

In addition to the 11 original appointees to the commission, the chairperson of the Advisory Health Council on December 31, 1985, and the chairperson of the California Health Facilities Commission on December 31, 1985, shall also serve four-year terms. During their terms when the commission shall have 13 members, they shall be full voting representatives.

128700. As used in this chapter, the following terms mean:

(a) ''Commission'' means the California Health Policy and Data Advisory Commission.

(b) ''Health facility'' or ''health facilities'' means all health facilities required to be licensed pursuant to Chapter 2 (commencing with Section 1250) of Division 2.

(c) ''Hospital'' means all health facilities except skilled nursing, intermediate care, and congregate living health facilities.

(d) ''Office'' means the Office of Statewide Health Planning and Development.

(e) ''Risk-adjusted outcomes'' means the clinical outcomes of patients grouped by diagnoses or procedures that have been adjusted for demographic and clinical factors.

128705. On and after January 1, 1986, any reference in this code to the Advisory Health Council shall be deemed a reference to the California Health Policy and Data Advisory Commission.

128710. The California Health Policy and Data Advisory Commission shall meet at least once every two months, or more often if necessary to fulfill its duties.

128715. The members of the commission shall receive per diem of one hundred dollars ($100) for each day actually spent in the discharge of official duties and shall be reimbursed for any actual and necessary expenses incurred in connection with their duties as members of the commission.

128720. The commission may appoint an executive secretary subject to approval by the Secretary of Health and Welfare. The office shall provide other staff to the commission as the office and the commission deem necessary.

128725. The functions and duties of the commission shall include the following:

(a) Advise the office on the implementation of the new, consolidated data system.

(b) Advise the office regarding the ongoing need to collect and report health facility data and other provider data.

(c) Annually develop a report to the director of the office regarding changes that should be made to existing data collection systems and forms. Copies of the report shall be provided to the Senate Health and Human Services Committee and to the Assembly Health Committee.

(d) Advise the office regarding changes to the uniform accounting and reporting systems for health facilities.

(e) Conduct public meetings for the purposes of obtaining input from health facilities, other providers, data users, and the general public regarding this chapter and Chapter 1 (commencing with Section 127125) of Part 2.

(f) Advise the Secretary of Health and Welfare on the formulation of general policies that shall advance the purposes of this chapter.

(g) Advise the office on the adoption, amendment, or repeal of regulations it proposes prior to their submittal to the Office of Administrative Law.

(h) Advise the office on the format of individual health facility or other provider data reports and on any technical and procedural issues necessary to implement this chapter.

(i) Advise the office on the formulation of general policies that shall advance the purposes of Chapter 1 (commencing with Section 127125) of Part 2.

(j) Recommend, in consultation with a 12-member technical advisory committee appointed by the chairperson of the commission, to the office the data elements necessary for the production of outcome reports required by Section 128745.

(k) The technical advisory committee appointed pursuant to subdivision (j) shall be composed of two members who shall be hospital representatives appointed from a list of at least six persons nominated by the California Association of Hospitals and Health Systems, two members who shall be physicians and surgeons appointed from a list of at least six persons nominated by the California Medical Association, two members who shall be registered nurses appointed from a list of at least six persons nominated by the California Nurses Association, one medical record practitioner who shall be appointed from a list of at least six persons nominated by the California Health Information Association, one member who shall be a representative of a hospital authorized to report as a group pursuant to subdivision (d) of Section 128760, two members who shall be representative of California research organizations experienced in effectiveness review of medical procedures or surgical procedures, or both procedures, one member representing the Health Access Foundation, and one member representing the Consumers Union. Members of the technical advisory committee shall serve without compensation, but shall be reimbursed for any actual and necessary expenses incurred in connection with their duties as members of the technical advisory committee.

The commission shall submit its recommendation to the office regarding the first of the reports required pursuant to subdivision (a) of Section 128745 no later than January 1, 1993. The technical advisory committee shall submit its initial recommendations to the commission pursuant to subdivision (d) of Section 128750 no later than January 1, 1994. The commission, with the advice of the

technical advisory committee, may periodically make additional recommendations under Section 128745 to the office, as appropriate.

(*l*) As the office and the commission deem necessary, the commission may establish committees and appoint persons who are not members of the commission to these committees as are necessary to carry out the purposes of the commission. Representatives of area health planning agencies shall be invited, as appropriate, to serve on committees established by the office and the commission relative to the duties and responsibilities of area health planning agencies. Members of the standing committees shall serve without compensation, but shall be reimbursed for any actual and necessary expenses incurred in connection with their duties as members of these committees.

Whenever the office or the commission does not accept the advice of the other body on proposed regulations or on major policy issues, the office or the commission shall provide a written response on its action to the other body within 30 days, if so requested.

The commission or the office director may appeal to the Secretary of Health and Welfare over disagreements on policy, procedural, or technical issues.

128730. (a) Effective January 1, 1986, the office shall be the single state agency designated to collect the following health facility or clinic data for use by all state agencies:

(1) That data required by the office pursuant to Section 127285.

(2) That data required in the Medi-Cal cost reports pursuant to Section 14170 of the Welfare and Institutions Code.

(3) Those data items formerly required by the California Health Facilities Commission that are listed in Sections 128735 and 128740. Information collected pursuant to subdivision (g) of Section 128735 shall be made available to the State Department of Health Services. The department shall ensure that the patient's rights to confidentiality shall not be violated in any manner. The department shall comply with all applicable policies and requirements involving review and oversight by the State Committee for the Protection of Human Subjects.

(b) The office shall consolidate any and all of the reports listed under this section or Sections 128735 and 128740, to the extent feasible, to minimize the reporting burdens on hospitals. Provided, however, that the office shall neither add nor delete data items from the Hospital Discharge Abstract Data Record or the quarterly reports without prior authorizing legislation, unless specifically required by federal law or regulation or judicial decision.

128735. Every organization that operates, conducts, or maintains a health facility and the officers thereof, shall make and file with the office, at the times as the office shall require, all of the following reports on forms specified by the office that shall be in accord where applicable with the systems of accounting and uniform reporting

required by this part, except the reports required pursuant to subdivision (g) shall be limited to hospitals:

(a) A balance sheet detailing the assets, liabilities, and net worth of the health facility at the end of its fiscal year.

(b) A statement of income, expenses, and operating surplus or deficit for the annual fiscal period, and a statement of ancillary utilization and patient census.

(c) A statement detailing patient revenue by payer, including, but not limited to, Medicare, Medi-Cal, and other payers, and revenue center except that hospitals authorized to report as a group pursuant to subdivision (d) of Section 128760 are not required to report revenue by revenue center.

(d) A statement of cash-flows, including, but not limited to, ongoing and new capital expenditures and depreciation.

(e) A statement reporting the information required in subdivisions (a), (b), (c), and (d) for each separately licensed health facility operated, conducted, or maintained by the reporting organization, except those hospitals authorized to report as a group pursuant to subdivision (d) of Section 128760.

(f) The office shall consult with the County Hospital Committee of the California Hospital Association, the County Supervisors Association of California, and the California Association of Public Hospitals to improve the accuracy of indigent care revenue reporting and shall present legislative or regulatory recommendations for such improvements by March 30, 1985.

(g) A Hospital Discharge Abstract Data Record that includes all of the following:

(1) Date of birth.

(2) Sex.

(3) Race.

(4) ZIP Code.

(5) Patient social security number, if it is contained in the patient's medical record.

(6) Prehospital care and resuscitation, if any, including all of the following:

(A) ''Do not resuscitate'' (DNR) order at admission.

(B) ''Do not resuscitate'' (DNR) order after admission.

(7) Admission date.

(8) Source of admission.

(9) Type of admission.

(10) Discharge date.

(11) Principal diagnosis and whether the condition was present at admission.

(12) Other diagnoses and whether the conditions were present at admission.

(13) External cause of injury.

(14) Principal procedure and date.

(15) Other procedures and dates.
(16) Total charges.
(17) Disposition of patient.
(18) Expected source of payment.

(h) No person reporting data pursuant to this section shall be liable for damages in any action based on the use or misuse of patient-identifiable data that has been mailed or otherwise transmitted to the office pursuant to the requirements of subdivision (g).

A hospital or its designee shall semiannually file the Hospital Discharge Abstract Data Record not later than six months after the end of each semiannually period, commencing six months after January 1, 1986. A hospital may submit the Hospital Discharge Abstract Data Record in a computer tape format, and a hospital shall use coding from the International Classification of Diseases in reporting diagnoses and procedures.

128740. (a) Commencing with the first calendar quarter of 1992, the following summary financial and utilization data shall be reported to the office by each hospital within 45 days of the end of every calendar quarter. Adjusted reports reflecting changes as a result of audited financial statements may be filed within four months of the close of the hospital's fiscal or calendar year. The quarterly summary financial and utilization data shall conform to the uniform description of accounts as contained in the Accounting and Reporting Manual for California Hospitals and shall include all of the following:

(1) Number of licensed beds.
(2) Average number of available beds.
(3) Average number of staffed beds.
(4) Number of discharges.
(5) Number of inpatient days.
(6) Number of outpatient visits.
(7) Total operating expenses.
(8) Total inpatient gross revenues by payer, including Medicare, Medi-Cal, county indigent programs, other third parties, and other payers.
(9) Total outpatient gross revenues by payer, including Medicare, Medi-Cal, county indigent programs, other third parties, and other payers.
(10) Deductions from revenue in total and by component, including the following: Medicare contractual adjustments, Medi-Cal contractual adjustments, and county indigent program contractual adjustments, other contractual adjustments, bad debts, charity care, restricted donations and subsidies for indigents, support for clinical teaching, teaching allowances, and other deductions.
(11) Total capital expenditures.
(12) Total net fixed assets.

(13) Total number of inpatient days, outpatient visits, and discharges by payer, including Medicare, Medi-Cal, county indigent programs, other third parties, self-pay, charity, and other payers.

(14) Total net patient revenues by payer including Medicare, Medi-Cal, county indigent programs, other third parties, and other payers.

(15) Other operating revenue.

(16) Nonoperating revenue net of nonoperating expenses.

(b) Hospitals reporting pursuant to subdivision (d) of Section 128760 may provide the items in paragraphs (7), (8), (9), (10), (14), (15), and (16) of subdivision (a) on a group basis, as described in subdivision (d) of Section 128760.

(c) The office shall make available at cost, to all interested parties, a hard copy of any hospital report made pursuant to this section and in addition to hard copies, shall make available at cost, a computer tape of all reports made pursuant to this section within 105 days of the end of every calendar quarter.

(d) The office, with the advice of the commission, shall adopt by regulation guidelines for the identification, assessment, and reporting of charity care services. In establishing the guidelines, the office shall consider the principles and practices recommended by professional health care industry accounting associations for differentiating between charity services and bad debts. The office shall further conduct the onsite validations of health facility accounting and reporting procedures and records as are necessary to assure that reported data are consistent with regulatory guidelines.

This section shall become operative January 1, 1992.

128745. (a) Commencing July 1993, and annually thereafter, the office shall publish risk-adjusted outcome reports in accordance with the following schedule:

Publication Date	Period Covered	Procedures and Conditions Covered
July 1993	1988–90	3
July 1994	1989–91	6
July 1995	1990–92	9

Reports for subsequent years shall include conditions and procedures and cover periods as appropriate.

(b) The procedures and conditions to be reported shall be divided equally among medical, surgical and obstetric conditions or procedures and shall be selected by the office, based on the recommendations of the commission and the advice of the technical advisory committee set forth in subdivision (j) of Section 128725. The selections shall be in accordance with all of the following criteria:

(1) The patient discharge abstract contains sufficient data to undertake a valid risk adjustment.

(2) The relative importance of the procedure and condition in terms of the cost of cases and the number of cases.

(3) Ability to measure outcome and the likelihood that care influences outcome.

(4) Reliability of the diagnostic and procedure data.

(c) The annual reports shall compare the risk-adjusted outcomes experienced by all patients treated for the selected conditions and procedures in each California hospital during the period covered by each report, to the outcomes expected. Outcomes shall be reported in the five following groupings:

(1) ''Much higher than average outcomes,'' for hospitals with risk-adjusted outcomes much higher than the norm.

(2) ''Higher than average outcomes,'' for hospitals with risk-adjusted outcomes higher than the norm.

(3) ''Average outcomes,'' for hospitals with average risk-adjusted outcomes.

(4) ''Lower than average outcomes,'' for hospitals with risk-adjusted outcomes lower than the norm.

(5) ''Much lower than average outcomes,'' for hospitals with risk-adjusted outcomes much lower than the norm.

128750. (a) Prior to the public release of the annual outcome reports the office shall furnish a preliminary report to each hospital that is included in the report. The office shall allow the hospital and chief of staff 60 days to review the outcome scores and compare the scores to other California hospitals. A hospital or its chief of staff that believes that the risk-adjusted outcomes do not accurately reflect the quality of care provided by the hospital may submit a statement to the office, within the 60 days, explaining why the outcomes do not accurately reflect the quality of care provided by the hospital. The statement shall be included in an appendix to the public report, and a notation that the hospital or its chief of staff has submitted a statement shall be displayed wherever the report presents outcome scores for the hospital.

(b) The office shall, in addition to public reports, provide hospitals and the chiefs of staff of the medical staffs with a report containing additional detailed information derived from data summarized in the public outcome reports as an aid to internal quality assurance.

(c) If, pursuant to the recommendations of the office, based on the advice of the commission, in response to the recommendations of the technical advisory committee made pursuant to subdivision (d) of this section, the Legislature subsequently amends Section 128735 to authorize the collection of additional discharge data elements, then the outcome reports for conditions and procedures for which sufficient data is not available from the current abstract record will

be produced following the collection and analysis of the additional data elements.

(d) The recommendations of the technical advisory committee for the addition of data elements to the discharge abstract should take into consideration the technical feasibility of developing reliable risk-adjustment factors for additional procedures and conditions as determined by the technical advisory committee with the advice of the research community, physicians and surgeons, hospitals, and medical records personnel.

(e) The technical advisory committee at a minimum shall identify a limited set of core clinical data elements to be collected for all of the added procedures and conditions and unique clinical variables necessary for risk adjustment of specific conditions and procedures selected for the outcomes report program. In addition, the committee should give careful consideration to the costs associated with the additional data collection and the value of the specific information to be collected.

(f) The technical advisory committee shall also engage in a continuing process of data development and refinement applicable to both current and prospective outcome studies.

128755. (a) (1) Hospitals shall file the reports required by subdivisions (a), (b), (c), and (d) of Section 128735 with the office within four months after the close of the hospital's fiscal year except as provided in paragraph (2).

(2) If a licensee relinquishes the facility license or puts the facility license in suspense, the last day of active licensure shall be deemed a fiscal year end.

(3) The office shall make the reports filed pursuant to this subdivision available no later than three months after they were filed.

(b) (1) Skilled nursing facilities, intermediate care facilities, intermediate care facilities/developmentally disabled, and congregate living facilities, including nursing facilities certified by the state department to participate in the Medi-Cal program, shall file the reports required by subdivisions (a), (b), (c), and (d) of Section 128735 with the office within four months after the close of the facility's fiscal year, except as provided in paragraph (2).

(2) (A) If a licensee relinquishes the facility license or puts the facility licensure in suspense, the last day of active licensure shall be deemed a fiscal year end.

(B) If a fiscal year end is created because the facility license is relinquished or put in suspense, the facility shall file the reports required by subdivisions (a), (b), (c), and (d) of Section 128735 within two months after the last day of active licensure.

(3) The office shall make the reports filed pursuant to paragraph (1) available not later than three months after they are filed.

(4) (A) Effective for fiscal years ending on or after December 31, 1991, the reports required by subdivisions (a), (b), (c), and (d) of

Section 128735 shall be filed with the office by electronic media, as determined by the office.

(B) Congregate living health facilities are exempt from the electronic media reporting requirements of subparagraph (A).

(c) The reports required by subdivision (g) of Section 128735 shall be filed semiannually by each hospital or its designee not later than six months after the end of each semiannual period, commencing six months after January 1, 1986, and shall be available from the office no later than six months after the date that the report was filed.

(d) The reports referred to in paragraph (2) of subdivision (a) of Section 128730 shall be filed with the office on the dates required by applicable law and shall be available from the office no later than six months after the date that the report was filed.

(e) The office shall make available at cost, to all interested parties, a hard copy of any health facility report referred to in subdivision (a), (b), (c), (d), or (g) of Section 128735 and in addition to hard copies, shall make available at cost, computer tapes of the health facility reports referred to in subdivision (a), (b), (c), (d), or (g) of Section 128735, unless the office determines that an individual patient's rights of confidentiality would be violated.

128760. (a) On and after January 1, 1986, those systems of health facility accounting and auditing formerly approved by the California Health Facilities Commission shall remain in full force and effect for use by health facilities but shall be maintained by the office with the advice of the Health Policy and Data Advisory Commission.

(b) The office, with the advice of the commission, shall allow and provide, in accordance with appropriate regulations, for modifications in the accounting and reporting systems for use by health facilities in meeting the requirements of this chapter if the modifications are necessary to do any of the following:

(1) To correctly reflect differences in size of, provision of, or payment for, services rendered by health facilities.

(2) To correctly reflect differences in scope, type, or method of provision of, or payment for, services rendered by health facilities.

(3) To avoid unduly burdensome costs for those health facilities in meeting the requirements of differences pursuant to paragraphs (1) and (2).

(c) Modifications to discharge data reporting requirements. The office, with the advice of the commission, shall allow and provide, in accordance with appropriate regulations, for modifications to discharge data reporting format and frequency requirements if these modifications will not impair the office's ability to process the data or interfere with the purposes of this chapter. This modification authority shall not be construed to permit the office to administratively require the reporting of discharge data items not specified in Section 128735.

(d) Reporting provisions for health facilities. The office, with the advice of the commission, shall establish specific reporting provisions for health facilities that receive a preponderance of their revenue from associated comprehensive group-practice prepayment health care service plans. These health facilities shall be authorized to utilize established accounting systems, and to report costs and revenues in a manner that is consistent with the operating principles of these plans and with generally accepted accounting principles. When these health facilities are operated as units of a coordinated group of health facilities under common management, they shall be authorized to report as a group rather than as individual institutions. As a group, they shall submit a consolidated income and expense statement.

Hospitals authorized to report as a group under this subdivision may elect to file cost data reports required under the regulations of the Social Security Administration in its administration of Title XVIII of the federal Social Security Act in lieu of any comparable cost reports required under Section 128735. However, to the extent that cost data is required from other hospitals, the cost data shall be reported for each individual institution.

The office, with the advice of the commission, shall adopt comparable modifications to the financial reporting requirements of this chapter for county hospital systems consistent with the purposes of this chapter.

128765. (a) The office, with the advice of the commission, shall maintain a file of all the reports filed under this chapter at its Sacramento office. Subject to any rules the office, with the advice of the commission, may prescribe, these reports shall be produced and made available for inspection upon the demand of any person, with the exception of hospital discharge abstract data that shall be available for public inspection unless the office determines that an individual patient's rights of confidentiality would be violated.

(b) Copies certified by the office as being true and correct, copies of reports properly filed with the office pursuant to this chapter, together with summaries, compilations, or supplementary reports prepared by the office, shall be introduced as evidence, where relevant, at any hearing, investigation, or other proceeding held, made, or taken by any state, county, or local governmental agency, board, or commission that participates as a purchaser of health facility services pursuant to the provisions of a publicly financed state or federal health care program. Each of these state, county, or local governmental agencies, boards, and commissions shall weigh and consider the reports made available to it pursuant to the provisions of this subdivision in its formulation and implementation of policies, regulations, or procedures regarding reimbursement methods and rates in the administration of these publicly financed programs.

(c) The office, with the advice of the commission, shall compile and publish summaries of the data for the purpose of public disclosure. The commission shall approve the policies and procedures relative to the manner of data disclosure to the public. The office, with the advice of the commission, may initiate and conduct studies as it determines will advance the purposes of this chapter.

(d) In order to assure that accurate and timely data are available to the public in useful formats, the office shall establish a public liaison function. The public liaison shall provide technical assistance to the general public on the uses and applications of individual and aggregate health facility data and shall provide the director and the commission with an annual report on changes that can be made to improve the public's access to data.

(e) In addition to its public liaison function, the office shall continue the publication of aggregate industry and individual health facility cost and operational data published by the California Health Facilities Commission as described in subdivision (b) of Section 441.95, as that section existed on December 31, 1985. This publication shall be submitted to the Legislature not later than March 1 of each year commencing with calendar year 1986 and in addition shall be offered for sale as a public document.

128770. (a) Any health facility that does not file any report as required by this chapter with the office is liable for a civil penalty of one hundred dollars ($100) a day for each day the filing of any report is delayed. No penalty shall be imposed if an extension is granted in accordance with the guidelines and procedures established by the office, with the advice of the commission.

(b) Any health facility that does not use an approved system of accounting pursuant to the provisions of this chapter for purposes of submitting financial and statistical reports as required by this chapter shall be liable for a civil penalty of not more than five thousand dollars ($5,000).

(c) Civil penalties are to be assessed and recovered in a civil action brought in the name of the people of the State of California by the office. Assessment of a civil penalty may, at the request of any health facility, be reviewed on appeal, and the penalty may be reduced or waived for good cause.

(d) Any money that is received by the office pursuant to this section shall be paid into the General Fund.

128775. Any health facility affected by any determination made under this chapter by the office may petition the office for review of the decision. This petition shall be filed with the office within 15 business days, or within a greater time that the office, with the advice of the commission, may allow, and shall specifically describe the matters that are disputed by the petitioner.

A hearing shall be commenced within 60 calendar days of the date that the petition was filed. The hearing shall be held before an

employee of the office, a hearing officer employed by the Office of Administrative Hearings, or a committee of the commission chosen by the chairperson for this purpose. If held before an employee of the office or a committee of the commission, the hearing shall be held in accordance with procedures as the office, with the advice of the commission, shall prescribe. If held before a hearing officer employed by the Office of Administrative Hearings, the hearing shall be held in accordance with Chapter 5 (commencing with Section 11500) of Division 3 of the Government Code. The employee, hearing officer, or committee shall prepare a recommended decision including findings of fact and conclusions of law and present it to the office for its adoption. The decision of the office shall be in writing and shall be final. The decision of the office shall be made within 60 calendar days after the conclusion of the hearing and shall be effective upon filing and service upon the petitioner.

Judicial review of any final action, determination, or decision may be had by any party to the proceedings as provided in Section 1094.5 of the Code of Civil Procedure. The decision of the office shall be upheld against a claim that its findings are not supported by the evidence unless the court determines that the findings are not supported by substantial evidence.

The employee of the office, the hearing officer employed by the Office of Administrative Hearings, the Office of Administrative Hearings, or the committee of the commission, may issue subpoenas and subpoenas duces tecum in a manner and subject to the conditions established by Section 11510 of the Government Code.

128780. Notwithstanding any other provision of law, the disclosure aspects of this chapter shall be deemed complete with respect to district hospitals, and no district hospital shall be required to report or disclose any additional financial or utilization data to any person or other entity except as is required by this chapter.

128782. Notwithstanding any other provision of law, upon the request of a small and rural hospital, as defined in Section 124840, that did not file financial reports with the office by electronic media as of January 1, 1993, the office shall, on a case-by-case basis, do one of the following:

(a) Exempt the small and rural hospital from any electronic filing requirements of the office regarding annual or quarterly financial disclosure reports specified in Sections 128735 and 128740.

(b) Provide a one-time reduction in the fee charged to the small and rural hospital not to exceed the maximum amount assessed pursuant to Section 127280 by an amount equal to the costs incurred by the small and rural hospital to purchase the computer hardware and software necessary to comply with any electronic filing requirements of the office regarding annual or quarterly financial disclosure reports specified in Sections 443.31 and 443.32.

128785. On January 1, 1986, all regulations previously adopted by the California Health Facilities Commission that relate to functions vested in the office and that are in effect on that date, shall remain in effect and shall be fully enforceable to the extent that they are consistent with this chapter, as determined by the office, unless and until readopted, amended, or repealed by the office following review and comment by the commission.

128790. Pursuant to Section 16304.9 of the Government Code, the Controller shall transfer to the office the unexpended balance of funds as of January 1, 1986, in the California Health Facilities Commission Fund, available for use in connection with the performance of the functions of the California Health Facilities Commission to which it has succeeded pursuant to this chapter.

128795. All officers and employees of the California Health Facilities Commission who, on December 31, 1985, are serving the state civil service, other than as temporary employees, and engaged in the performance of a function vested in the office by this chapter shall be transferred to the office. The status, positions, and rights of persons shall not be affected by the transfer and shall be retained by them as officers and employees of the office, pursuant to the State Civil Service Act except as to positions exempted from civil service.

128800. The office shall have possession and control of all records, papers, offices, equipment, supplies, moneys, funds, appropriations, land, or other property, real or personal, held for the benefit or use of the California Health Facilities Commission for the performance of functions transferred to the office by this chapter.

128805. The office may enter into agreements and contracts with any person, department, agency, corporation, or legal entity as are necessary to carry out the functions vested in the office by this chapter or any other law.

128810. The office shall administer this chapter and shall make all regulations necessary to implement the provisions and achieve the purposes stated herein. The commission shall advise and consult with the office in carrying out the administration of this chapter.

128815. This chapter shall remain in effect only until January 1, 1997, and as of that date is repealed unless a later enacted statute chaptered prior to that date extends or deletes that date.

CHAPTER 2. ANNUAL LICENSURE REPORTS (Reserved)

CHAPTER 3. ANNUAL CLINIC REPORTS (Reserved)

PART 6. FACILITIES LOAN INSURANCE AND FINANCING

CHAPTER 1. HEALTH FACILITY CONSTRUCTION LOAN INSURANCE

Article 1. General Provisions

129000. This chapter may be cited as the ''California Health Facility Construction Loan Insurance Law.''

129005. The purpose of this chapter is to provide, without cost to the state, an insurance program for health facility construction, improvement, and expansion loans in order to stimulate the flow of private capital into health facilities construction, improvement, and expansion and in order to rationally meet the need for new, expanded and modernized public and nonprofit health facilities necessary to protect the health of all the people of this state. The provisions of this chapter are to be liberally construed to achieve this purpose.

129010. Unless the context otherwise requires, the definitions in this section govern the construction of this chapter and of Section 32127.2.

(a) ''Bondholder'' means the legal owner of a bond or other evidence of indebtedness issued by a political subdivision or a nonprofit corporation.

(b) ''Borrower'' means a political subdivision or nonprofit corporation that has secured or intends to secure a loan for the construction of a health facility.

(c) ''Construction, improvement, or expansion'' or ''construction, improvement, and expansion'' includes construction of new buildings, expansion, modernization, renovation, remodeling and alteration of existing buildings, acquisition of existing buildings or health facilities, and initial or additional equipping of any of these buildings.

In connection therewith, ''construction, improvement, or expansion'' or ''construction, improvement, and expansion'' includes the cost of construction or acquisition of all structures, including parking facilities, real or personal property, rights, rights-of-way, the cost of demolishing or removing any buildings or structures on land so acquired, including the cost of acquiring any land where the buildings or structures may be moved, the cost of all machinery and equipment, financing charges, interest (prior to, during and for a period after completion of the construction), provisions for working capital, reserves for principal and interest and for extensions, enlargements, additions, replacements, renovations and improvements, cost of engineering, financial and legal services,

plans, specifications, studies, surveys, estimates of cost and of revenues, administrative expenses, expenses necessary or incident to determining the feasibility or practicability of constructing or incident to the construction; or the financing of the construction or acquisition.

(d) ''Commission'' means the California Health Policy and Data Advisory Commission.

(e) ''Debenture'' means any form of written evidence of indebtedness issued by the State Treasurer pursuant to this chapter, as authorized by Section 4 of Article XVI of the California Constitution.

(f) ''Fund'' means the Health Facility Construction Loan Insurance Fund.

(g) ''Health facility'' means any facility providing or designed to provide services for the acute, convalescent, and chronically ill and impaired, including, but not limited to, public health centers, community mental health centers, facilities for the developmentally disabled, nonprofit community care facilities that provide care, habilitation, rehabilitation or treatment to developmentally disabled persons, facilities for the treatment of chemical dependency, including a community care facility, licensed pursuant to Chapter 3 (commencing with Section 1500) of Division 2, a clinic, as defined pursuant to Chapter 1 (commencing with Section 1200) of Division 2, an alcoholism recovery facility, defined pursuant to former Section 11834.11, and a structure located adjacent or attached to another type of health facility and that is used for storage of materials used in the treatment of chemical dependency, and general tuberculosis, mental, and other types of hospitals and related facilities, such as laboratories, outpatient departments, extended care, nurses' home and training facilities, offices and central service facilities operated in connection with hospitals, diagnostic or treatment centers, extended care facilities, nursing homes, and rehabilitation facilities. ''Health facility'' also means an adult day health center and a multilevel facility. Except for facilities for the developmentally disabled, facilities for the treatment of chemical dependency, or a multilevel facility, or as otherwise provided in this subdivision, ''health facility'' does not include any institution furnishing primarily domiciliary care.

''Health facility'' also means accredited nonprofit work activity programs as defined in subdivision (e) of Section 19352 and Section 19355 of the Welfare and Institutions Code, and nonprofit community care facilities as defined in Section 1502, excluding foster family homes, foster family agencies, adoption agencies, and residential care facilities for the elderly.

Unless the context dictates otherwise, ''health facility'' includes a political subdivision of the state or nonprofit corporation that

operates a facility included within the definition set forth in this subdivision.

(h) ‘‘Office’’ means the Office of Statewide Health Planning and Development.

(i) ‘‘Lender’’ means the provider of a loan and its successors and assigns.

(j) ‘‘Loan’’ means money or credit advanced for the costs of construction or expansion of the health facility, and includes both initial loans and loans secured upon refinancing and may include both interim, or short-term loans, and long-term loans. A duly authorized bond or bond issue, or an installment sale agreement, may constitute a ‘‘loan.’’

(k) ‘‘Maturity date’’ means the date that the loan indebtedness would be extinguished if paid in accordance with periodic payments provided for by the terms of the loan.

(*l*) ‘‘Mortgage’’ means a first mortgage on real estate. ‘‘Mortgage’’ includes a first deed of trust.

(m) ‘‘Mortgagee’’ includes a lender whose loan is secured by a mortgage. ‘‘Mortgagee’’ includes a beneficiary of a deed of trust.

(n) ‘‘Mortgagor’’ includes a borrower, a loan to whom is secured by a mortgage, and the trustor of a deed of trust.

(o) ‘‘Nonprofit corporation’’ means any corporation formed under or subject to the Nonprofit Public Benefit Corporation Law (Part 2 (commencing with Section 5110) of Division 2 of Title 1 of the Corporations Code) that is organized for the purpose of owning and operating a health facility and that also meets the requirements of Section 501(c)(3) of the Internal Revenue Code.

(p) ‘‘Political subdivision’’ means any city, county, joint powers entity, local hospital district, or the California Health Facilities Authority.

(q) ‘‘Project property’’ means the real property where the health facility is, or is to be, constructed, improved, or expanded, and also means the health facility and the initial equipment in that health facility.

(r) ‘‘Public health facility’’ means any health facility that is or will be constructed for and operated and maintained by any city, county, or local hospital district.

(s) ‘‘Adult day health center’’ means a facility defined under subdivision (b) of Section 1570.7, that provides adult day health care, as defined under subdivision (a) of Section 1570.7.

(t) ‘‘Multilevel facility’’ means an institutional arrangement where a residential facility for the elderly is operated as a part of, or in conjunction with, an intermediate care facility, a skilled nursing facility, or a general acute care hospital. ‘‘Elderly,’’ for the purposes of this subdivision, means a person 62 years of age or older.

129015. The office shall administer this chapter and shall make all regulations necessary to implement the provisions and achieve the

purposes stated herein. The commission, as authorized by this chapter and by Section 129460, shall advise and consult with the office in carrying out the administration of this chapter.

129020. The office shall implement the loan insurance program for the construction, improvement, and expansion of public and nonprofit corporation health facilities so that, in conjunction with all other existing facilities, the necessary physical facilities for furnishing adequate health facility services will be available to all the people of the state.

The office shall make an inventory of all existing health facilities and shall survey the need for construction, improvement, and expansion of public and nonprofit corporation health facilities and, on the basis of that inventory and survey, shall develop a state plan. The office shall submit copies of the state plan to the Senate Health and Human Services, Senate Appropriations, Assembly Health, and Assembly Ways and Means Committees.

The health facility construction loan insurance program shall provide for health facility distribution throughout the state in a manner that will make all types of health facility services reasonably accessible to all persons in the state according to the state plan.

In performing its duties under this section, the office may utilize the state plan developed pursuant to former Section 439.3.

129022. Applications submitted to the office shall be signed under penalty of perjury by the applicant.

129025. No insurance shall be provided for loans under this chapter until a statewide system of health facility planning has been established so that all hospitals as defined in Section 1250 and facilities licensed by the department pursuant to Chapter 1 (commencing with Section 1200) to Chapter 2.5 (commencing with Section 1440), inclusive, except for Chapter 2.2 (commencing with Section 1340) of Division 2, have been reviewed by an area health planning agency prior to licensure. No insurance shall be provided for a loan under this chapter for a hospital or facility unless it has been finally approved through the statewide system of health facility planning.

129030. The proceeds of all loans insured pursuant to this chapter shall be disbursed only upon order of the office or its designated agent. The office shall make regulations to insure the security of these proceeds.

129035. From time to time the office or its designated agent shall inspect each construction project for which loan insurance was approved, and if the inspection so warrants, the office or agent shall certify that the work has been performed upon the project, or purchases have been made, in accordance with the approved plans and specifications, and that payment of an installment of the loan proceeds is due to the borrower. The office shall charge the borrower a fee for such inspections and certifications, that in no instance shall exceed four dollars ($4) for each one thousand dollars ($1,000) of the

borrower's loan that is insured. These fees shall be deposited in the fund.

129040. The office shall establish an annual premium charge for the insurance of hospital construction loans under this chapter, and this charge shall be deposited in the fund. The annual premium charge shall not be more than an amount equivalent to one-half of 1 percent per annum of the average amount of the principal obligation of the loan during the year in which the charge is made, without taking into account delinquent payments. The office may reduce or eliminate the premium charges for insured loans outstanding for a period in excess of three years. These premium charges shall be payable by the borrower, or, where practicable, by the lender on account of a delinquent borrower, to the office at times that shall be established by the office. The office may require the payment of one or more premium charges at the time the loan is insured, at a discount rate as it may prescribe not in excess of the interest rate specified in the loan. In the event that the principal obligation of any insured loan is paid in full prior to the maturity as the office shall determine to be equitable, of the current unearned premium charges theretofore paid by the borrower.

Article 2. Insurable Loans and Applications Therefor

129050. A loan shall be eligible for insurance under this chapter if all of the following conditions are met:

(a) When the borrower is a nonprofit corporation, the loan shall be secured by a mortgage, first lien, trust indenture, or other security agreement that the office may require subject only to those conditions, covenants and restrictions, easements, taxes, and assessments of record approved by the office. When the borrower is a political subdivision, the loan may be evidenced by a duly authorized bond issue. A loan to a local hospital district or county may meet the requirement of this subdivision by either method.

(b) The borrower obtains an American Land Title Association title insurance policy with the office designated as beneficiary, with liability equal to the amount of the loan insured under this chapter, and with additional endorsements that the office may reasonably require.

(c) The proceeds of the loan shall be used exclusively for the construction, improvement, or expansion of the health facility, as approved by the office under Section 129020. However, loans insured pursuant to this chapter may include loans to refinance another prior loan, whether or not state insured and without regard to the date of the prior loan, if the office determines that the prior loan would have been eligible for insurance under this chapter at the time it was made. The office may not insure a loan for a health facility that is not

needed as determined by the state plan developed under the authorization of Section 129020.

(d) The loan shall have a maturity date not exceeding 30 years from the date of the beginning of amortization of the loan, except as authorized by subdivision (e), or 75 percent of the office's estimate of the economic life of the health facility, whichever is the lesser.

(e) The loan shall contain complete amortization provisions requiring periodic payments by the borrower not in excess of its reasonable ability to pay as determined by the office. The office shall permit a reasonable period of time during which the first payment to amortization may be waived on agreement by the lender and borrower. The office may, however, waive the amortization requirements of this subdivision and of subdivision (g) of this section when a term loan would be in the borrower's best interest.

(f) The loan shall bear interest on the amount of the principal obligation outstanding at any time at a rate, as negotiated by the borrower and lender, as the office finds necessary to meet the loan money market. As used in this chapter, ''interest'' does not include premium charges for insurance and service charges if any. Where a loan is evidenced by a bond issue of a political subdivision, the interest thereon may be at any rate the bonds may legally bear.

(g) The loan shall provide for the application of the borrower's periodic payments to amortization of the principal of the loan.

(h) The loan shall contain those terms and provisions with respect to insurance, repairs, alterations, payment of taxes and assessments, foreclosure proceedings, anticipation of maturity, additional and secondary liens, and other matters the office may in its discretion prescribe.

(i) The loan shall have a principal obligation not in excess of an amount equal to 90 percent of the total construction cost. Where the borrower is a political subdivision, the office may fully insure loans equal to the total construction cost.

(j) The borrower shall offer reasonable assurance that the services of the health facility will be made available to all persons residing or employed in the area served by the facility.

(k) A certificate of need or certificate of exemption has been issued for the project to be financed pursuant to Chapter 1 (commencing with Section 127125) of Part 2, unless the project is not subject to this requirement.

(*l*) In the case of acquisitions, a project loan shall be guaranteed only for transactions not in excess of the fair market value of the acquisition.

Fair market value shall be determined, for purposes of this subdivision, pursuant to the following procedure, that shall be utilized during the state review of a loan guarantee application:

(1) Completion of a property appraisal by an appraisal firm qualified to make appraisals, as determined by the office, before closing a loan on the project.

(2) Evaluation of the appraisal in conjunction with the book value of the acquisition by the office. When acquisitions involve additional construction, the office shall evaluate the proposed construction to determine that the costs are reasonable for the type of construction proposed. In those cases where this procedure reveals that the cost of acquisition exceeds the current value of a facility, including improvements, then the acquisition cost shall be deemed in excess of fair market value.

(m) Notwithstanding subdivision (i), any loan in the amount of five million dollars ($5,000,000) or less may be insured up to 95 percent of the total construction cost.

In determining financial feasibility of projects of counties pursuant to this section, the office shall take into consideration any assistance for the project to be provided under Sections 14085.5 and 16715 of the Welfare and Institutions Code or from other sources. It is the intent of the Legislature that the office endeavor to assist counties in whatever ways are possible to arrange loans that will meet the requirements for insurance prescribed by this section.

129052. A pledge by or to the office of, or the grant to the office of a security interest in, revenues, moneys, accounts, accounts receivable, contract rights, general intangibles, documents, instruments, chattel paper, and other rights to payment of whatever kind made by or to the office pursuant to the authority granted in this chapter shall be valid and binding from the time the pledge is made for the benefit of pledgees and successors thereto. The revenues, moneys, accounts, accounts receivable, contract rights, general intangibles, documents, instruments, chattel paper, and other rights to payment of whatever kind pledged by or to the office or its assignees shall immediately be subject to the lien of the pledge without physical delivery or further act. The lien of such pledge shall be valid and binding against all parties, irrespective of whether the parties have notice of the lien. The indenture, trust agreement, resolution, or another instrument by which such pledge is created need not be recorded or the security interest otherwise perfected.

129055. In order to comply with subdivision (j) of Section 129050, the borrower shall demonstrate that its facility is used by persons for whom the cost of care is reimbursed under Chapter 7 (commencing with Section 14000) of Part 3 of Division 9 of the Welfare and Institutions Code in a proportion that is reasonable based upon the proportion of Medi-Cal patients in the community served by the borrower and by persons for whom the costs of care is reimbursed under Title XVIII of the federal Social Security Act in a proportion that is reasonable based upon the proportion of Medicare patients in the community served by the borrower.

For the purposes of this chapter, the community served by the facility shall mean the health facility planning area designated for the planning and review of health facility beds pursuant to Chapter 1 (commencing with Section 127125) of Part 2 where the facility is located, unless the office determines that, or the borrower demonstrates to the satisfaction of the office that, a different definition is more appropriate for the borrower's facility.

129060. Subdivisions (b) and (c) of Section 129355 shall apply to any residential or nonresidential alcoholism or drug abuse recovery or treatment program or facility, as certified under Section 11831.5, or licensed under former Section 11834.19; and any facility that provides an organized program of therapeutic, social, and health activities and services to persons with functional impairments, as licensed under Section 1576.

129065. As part of its assurance under subdivision (j) of Section 129050, the borrower shall agree to the following actions:

(a) To advise each person seeking services at the borrower's facility as to the person's potential eligibility for Medi-Cal and Medicare benefits or benefits from other governmental third party payers.

(b) To make available to the office and to any interested person a list of physicians with staff privileges at the borrower's facility, that includes:

(1) Name.

(2) Speciality.

(3) Language spoken.

(4) Whether takes Medi-Cal and Medicare patients.

(5) Business address and phone number.

(c) To inform in writing on a periodic basis all practitioners of the healing arts having staff privileges in the borrower's facility as to the existence of the facility's community service obligation. The required notice to practitioners shall contain a statement, as follows:

''This hospital has agreed to provide a community service and to accept Medi-Cal and Medicare patients. The administration and enforcement of this agreement is the responsibility of the Office of Statewide Health Planning and Development and this facility.''

(d) To post notices in the following form, that shall be multilingual where the borrower serves a multilingual community, in appropriate areas within the facility, including but not limited to, admissions offices, emergency rooms, and business offices:

NOTICE OF COMMUNITY SERVICE OBLIGATION

''This facility has agreed to make its services available to all persons residing or employed in this area. This facility is prohibited by law from discriminating against Medi-Cal and Medicare patients. Should you believe you may be eligible for Medi-Cal or Medicare, you should

contact our business office (or designated person or office) for assistance in applying. You should also contact our business office (or designated person or office) if you are in need of a physician to provide you with services at this facility. If you believe that you have been refused services at this facility in violation of the community service obligation you should inform (designated person or office) and the Office of Statewide Health Planning and Development.''

The borrower shall provide copies of this notice for posting to all welfare offices in the county where the borrower's facility is located.

129070. In the event the borrower cannot demonstrate that it meets the requirement of Section 129055, it may nonetheless be eligible for a loan under this chapter if it presents a plan that is satisfactory to the office, that details the reasonable steps and timetables that the borrower agrees to take to bring the facility into compliance with Section 129055.

129075. Each borrower shall make available to the office and to the public upon request an annual report substantiating compliance with the requirements of subdivision (j) of Section 129050. The annual report shall set forth sufficient information and verification therefore to indicate the borrower's compliance. The report shall include at least the following:

(a) By category for inpatient admissions, emergency admission, and where the facility has a separate identifiable outpatient service:

(1) The total number of patients receiving services.

(2) The total number of Medi-Cal patients served.

(3) The total number of Medicare patients served.

(4) The dollar volume of services provided to each patient category listed in paragraphs (1), (2), and (3) of this subdivision.

(b) Where appropriate, the actions taken pursuant to Section 129070 and the effect the actions have had on the data specified in subdivision (a) of this section.

(c) Any other information as the office may reasonably require.

129080. The office may impose appropriate remedies and sanctions against a borrower when the office determines that the annual compliance report required in Section 129075 indicates that the borrower is out of compliance with subdivision (j) of Section 129050. The sanctions shall include, but not be limited to, the following:

(a) Rendering the borrower ineligible for federal and state financial assistance under the Hill-Burton Program.

(b) Requiring a borrower that had originally met the conditions of Section 129055, but who no longer does, to submit a plan that is satisfactory to the office that details the reasonable steps and timetables that the borrower agrees to take to bring the facility back into compliance with Section 129055.

(c) Referring the violation to the office of the Attorney General of California for legal action authorized under existing law or other remedy at law or equity, when a facility fails to carry out the actions agreed to in a plan approved by the office pursuant to Section 129070 or subdivision (b) of this section, or when the facility fails to submit compliance reports as required by Section 129075.

However, the remedies obtainable by legal action shall not include withdrawal or cancellation of the loan insurance provided under this chapter.

129085. (a) If a borrower is unable to comply with subdivision (j) of Section 129050 due to selective provider contracting under the Medi-Cal program, and the office has determined the borrower has negotiated in good faith but was not awarded a contract, the borrower may be eligible for insurance under this chapter as provided in subdivision (b).

(b) The office may determine that a noncontracting borrower shall be considered as meeting the requirements of subdivision (j) of Section 129050 if the borrower otherwise provides a community service in accordance with regulations adopted by the office. The regulations shall describe alternative methods of meeting the obligation, that may include, but not be limited to, providing free care, charity care, trauma care, community education, or primary care outreach and care to the elderly, in amounts greater than the community average. The regulations shall include a requirement that a general acute care hospital, that is not a small and rural hospital as defined in former Section 442.2, shall have, and continue to maintain, a 24-hour basic emergency medical service with a physician on duty, if it provided this service on January 1, 1990. The office shall have the authority to waive this requirement upon a determination by the director that this requirement would create a hardship for the hospital, be inconsistent with regionalization of emergency medical services, or not be in the best interest of the population served by the hospital.

129090. Political subdivisions and nonprofit corporations may apply for state insurance of needed construction, improvement, or expansion loans for construction, remodeling, or acquisition of health facilities to be or already owned, established, and operated by them as provided in this chapter. Applications shall be submitted to the office by the nonprofit corporation or political subdivision authorized to construct and operate a health facility. Each application shall conform to state requirements, shall be submitted in the manner and form prescribed by the office, and shall be accompanied by an application fee of one-half of 1 percent of the amount of the loan applied for, but in no case shall the application fee exceed five hundred dollars ($500). The fees shall be deposited by the office in the fund and used to defray the office’s expenditures in the administration of this chapter.

129095. (a) The office shall not regulate, impose requirements on, or require approval by the office of a professional, or a fee charged by a professional, used by applicants for the initial application for loan insurance. The choice of any professional and the funding source used shall be left entirely to the participants.

(b) For purposes of this section, ''professional'' includes, but is not limited to, an underwriter, bond counsel, or consultant.

(c) Nothing in this section shall prohibit the office, in the event of defaults, from taking any action authorized under this chapter to protect the financial interest of the state.

129100. Every applicant for insurance shall be afforded an opportunity for a fair hearing before the council upon 10 days' written notice to the applicant. If the office, after affording reasonable opportunity for development and presentation of the application and after receiving the advice of the council, finds that an application complies with the requirements of this article and of Section 129020 and is otherwise in conformity with the state plan, it may approve the application for insurance. The office shall consider and approve applications in the order of relative need set forth in the state plan in accordance with Section 129020.

129105. The office may upon application of the borrower insure any loan that is eligible for insurance under this chapter; and upon terms as the office may prescribe, may make commitments for the insuring of the loans prior to their date of execution or disbursement thereon. The office may, for five years after the effective date of this chapter, accept and approve applications for insurance of loans executed during the period from and including November 5, 1968, to the effective date of this chapter.

129110. Any contract of insurance executed by the office under this chapter shall be conclusive evidence of the eligibility of the loan for insurance and the validity of any contract of insurance so executed shall be incontestable from the date of the execution of the contract, except in case of fraud or misrepresentation on the part of the lender.

Article 3. Defaults

129125. In any case when the lender under a loan to a nonprofit corporation insured under this chapter shall have foreclosed and taken possession of the property under a mortgage in accordance with regulations of, and within a period to be determined by the office, or shall, with the consent of the office, have otherwise acquired the property from the borrower after default, the lender shall be entitled to receive the benefit of the insurance as provided in this section, upon (a) the prompt conveyance to the office of title to the property that meets the requirements of the regulations of the office in force at the time the loan was insured, and that is evidenced in the

manner prescribed by the regulations, and (b) the assignment to the office of all claims of the lender against the borrower or others arising out of the loan transaction or foreclosure proceedings except claims that may have been released with the consent of the office. Upon the conveyance and assignment, the office shall notify the Treasurer, who shall issue to the lender debentures having a total face value equal to the outstanding value of the loan.

For the purposes of this section, the outstanding value of the loan shall be determined, in accordance with the regulations prescribed by the office, by (a) adding to the amounts of the original principal obligation of the loan and interest that are accrued and unpaid the amount of all payments that have been made by the lender for the following: taxes and assessments, ground rents, water rates, and other liens that are prior to the mortgage; charges for the administration, operation, maintenance and repair of the health facility property; insurance on the project property, loan insurance premiums, and any tax imposed by a city or county upon any deed or other instrument by which the property was acquired by the lender and transferred or conveyed to the office; and the costs of foreclosure or of acquiring the property by other means actually paid by the lender and approved by the office; and by (b) deducting from the total amount any amounts received by the lender after the borrower's default on account of the loans or as rent or other income from the property.

129130. In any case when a political subdivision defaults on the payment of interest or principal accrued and due on bonds or other evidences of indebtedness insured under this chapter, debentures in an amount equal to the outstanding original principal obligation and interest on the bonds that were accrued and unpaid on the date of default and bearing interest at a rate equal to and payment schedule identical with those of the bonds shall be issued by the Treasurer upon notification thereof by the office to the bondholders upon the surrender of the bonds to the office.

In any case in which a hospital district defaults on the payment of interest or principal accrued and due on an insured loan secured by a first mortgage, first deed of trust, or other security agreement as authorized by Section 32127.2, debentures in an amount equal to the outstanding original principal obligation and interest on the bonds that were accrued and unpaid on the date of default and bearing interest at a rate equal to and payment schedule identical with those of the bonds shall be issued by the Treasurer upon notification thereof by the office to the bondholders upon surrender of the bonds to the office after the state has enforced its rights under the first mortgage, first deed of trust, or other security agreement.

129135. Notwithstanding any requirement contained in this chapter relating to acquisition of title and possession of the project property by the lender and its subsequent conveyance and transfer to the office, and for the purpose of avoiding unnecessary conveyance

expense in connection with payment of insurance benefits under the provisions of this chapter, the office may, subject to regulations that it may prescribe, permit the lender to tender to the office a satisfactory conveyance of title and transfer of possession direct from the borrower or other appropriate grantor and to pay to the lender the insurance benefits to which it would otherwise be entitled if the conveyance had been made to the lender and from the lender to the office.

129140. Upon receiving notice of the default of any loan insured under this chapter, the office, in its discretion and for the purpose of avoiding foreclosure under Section 129125 and notwithstanding the fact that it has previously approved a request of the lender for extensions of the time for curing the default and of the time for commencing foreclosure proceedings or for otherwise acquiring title to the project property, or has approved a modification of the loan for the purpose of changing the amortization provisions by recasting the unpaid balance, may acquire the loan and security agreements securing the loans upon the issuance to the lender of debentures in an amount equal to the unpaid principal balance of the loan plus any accrued unpaid loan interest plus reimbursement for the costs and attorney's fees of the lender enumerated in Section 129125.

After the acquisition of the loan and security interests therefor by the office, the lender shall have no further rights, liabilities, or obligations with respect thereto. The provisions of Section 129125 relating to the issuance of debentures incident to the acquisition of foreclosed properties shall apply with respect to debentures issued under this section, and the provisions of this chapter relating to the rights, liabilities, and obligations of a lender shall apply with respect to the office when it has acquired an insured loan under this section, in accordance with and subject to any regulations prescribed by the office modifying the provisions to the extent necessary to render their application for these purposes appropriate and effective.

129145. Notwithstanding any other provision of this chapter, after the office determines that the lender and borrower have exhausted all reasonable means of curing any default, the office within its discretion may, when it is in the best interests of the state, the borrower, and the lender, cure the default of the borrower by making payment from the fund directly to the lender of any amounts of the original principal obligation and interest of the loan that are accrued and unpaid. The payment shall be secured by an assignment to the office of a pro rata share of the security agreements made to the lender and, upon the payment, the borrower shall become liable for repayment of the amount thereof to the office over a period and at a rate of interest as shall be determined by the office.

129150. The office may at any time, under the terms and conditions that it may prescribe, consent to the lender's release of the borrower from its liability under the loan or the security agreement

securing the loan, or consent to the release of parts of the project property from the lien of any security agreement.

129155. Debentures issued under this chapter shall be in the form and denomination, subject to the terms and conditions, and include provisions for redemption, if any, as may be prescribed by the office with the approval of the Treasurer, and may be in coupon or registered form.

129160. (a) All debentures issued under this chapter to any lender or bondholder shall be executed in the name of the fund as obligor, shall be signed by the State Treasurer, and shall be negotiable. Pursuant to Sections 129125 and 129130, all debentures shall be dated as of the date of the institution of foreclosure proceedings or as of the date of the acquisition of the property after default by other than foreclosure, or as of another date as the office, in its discretion, may establish. The debentures shall bear interest from that date at a rate approved by the State Treasurer, equal to either the rate applicable to the most recent issue of State General Fund bonds or that specified in Section 129130, which shall be payable on the dates as the office, in its discretion, may establish except in the case of bonds or other evidences of indebtedness as specified in Section 129130, and shall have the same maturity date as the loan which they insured. All debentures shall be exempt, both as to principal and interest, from all taxation now or hereafter imposed by the state or local taxing agencies, shall be paid out of the fund, which shall be primarily liable therefor, and shall be, pursuant to Section 4 of Article XVI of the California Constitution, fully and unconditionally guaranteed as to principal and interest by the State of California, which guaranty shall be expressed on the face of the debentures. In the event that the fund fails to pay upon demand, when due, the principal of or interest on any debentures issued under this chapter, the State Treasurer shall pay to the holders the amount thereof which is authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, and thereupon to the extent of the amount so paid the State Treasurer shall succeed to all the rights of the holders of the debentures. The fund shall be liable for repayment to the Treasury of any money paid therefrom pursuant to this section in accordance with procedures jointly established by the State Treasurer and the office.

(b) In the event of a default, any debenture issued under this article shall be paid on a par with general obligation bonds issued by the state.

129165. Notwithstanding any other provision of law relating to the acquisition, management or disposal of real property by the state, the office shall have power to deal with, operate, complete, lease, rent, renovate, modernize, insure, or sell for cash or credit, in its discretion, any properties conveyed to it in exchange for debentures as provided in this chapter; and notwithstanding any other provision

of law, the office shall also have power to pursue to final collection by way of compromise or otherwise all claims against borrowers assigned by lenders to the office as provided in this chapter. All income from the operation, rental, or lease of the property and all proceeds from the sale thereof shall be deposited in the fund and all costs incurred by the office in its exercise of powers granted in this section shall be met by the fund.

The power to convey and to execute in the name of the office deeds of conveyance, deeds of release, assignments and satisfactions of loans and mortgages, and any other written instrument relating to real or personal property or any interest therein acquired by the office pursuant to the provisions of this chapter may be exercised by the office or by any officer of the office appointed by it.

129170. No lender or borrower shall have any right or interest in any property conveyed to the office or in any claim assigned to it, nor shall the office owe any duty to any lender or borrower with respect to the management or disposal of this property.

129172. Notwithstanding any other provision of law, if, prior to foreclosing on any collateral provided by a borrower, the office institutes a judicial proceeding or takes any action against a borrower to enforce compliance with the obligations set out in the regulatory agreement, the contract of insurance, or any other contractual loan closing document or law, including, but not limited to, Section 129173, that remedy or action shall not constitute an action within the meaning of subdivision (a) of Section 726 of the Code of Civil Procedure, or in any way constitute a violation of the intent or purposes of Section 726 of the Code of Civil Procedure, or constitute a money judgment or a deficiency judgment within the meaning of Sections 580a, 580b, 580d, or subdivision (b) of Section 726 of the Code of Civil Procedure. However, these provisions of the Code of Civil Procedure shall apply to any judicial proceeding instituted, or nonjudicial foreclosure action taken by the office to collect the principal and interest due on the loan with the borrower.

129173. In fulfilling the purposes of this article, as set forth in Section 129005, and upon making a determination that the financial status of a borrower may jeopardize a borrower’s ability to fulfill its obligations under any insured loan transaction so as to threaten the economic interest of the office in the borrower or to jeopardize the borrower’s ability to continue to provide needed healthcare services in its community, including, but not limited to, a declaration of default under any contract related to the transaction, the borrower missing any payment to its lender, or the borrower’s accounts payable exceeding three months, the office may assume or direct managerial or financial control of the borrower in any or all of the following ways:

(a) The office may supervise and prescribe the activities of the borrower in the manner and under the terms and conditions as the office may stipulate in any contract with the borrower.

(b) Notwithstanding the provisions of the articles of incorporation or other documents of organization of a nonprofit corporation borrower, this control may be exercised through the removal and appointment by the office of members of the governing body of the borrower sufficient such that the new members constitute a voting majority of the governing body.

(c) In the event the borrower is a nonprofit corporation or a political subdivision, the office may request the Secretary of the Health and Welfare Agency to appoint a trustee, this trustee shall have full and complete authority of the borrower over the insured project, including all property on which the office holds a security interest. No trustee shall be appointed unless approved by the office. A trustee appointed by the secretary pursuant to this subdivision may exercise all the powers of the officers and directors of the borrower, including the filing of a petition for bankruptcy. No action at law or in equity may be maintained by any party against the office or a trustee by reason of their exercising the powers of the officers and directors of a borrower pursuant to the direction of, or with the approval of, the secretary.

(d) The office may institute any action or proceeding, or the office may request the Attorney General to institute any action or proceeding against any borrower, to obtain injunctive or other equitable relief, including the appointment of a receiver for the borrower or the borrower's assets, in the superior court in and for the county in which the assets or a substantial portion of the assets are located. The proceeding under this section for injunctive relief shall conform with the requirements of Chapter 3 (commencing with Section 525) of Title 7 of Part 2 of the Code of Civil Procedure, except that the office shall not be required to allege facts necessary to show lack of adequate remedy at law, or to show irreparable loss or damage. Injunctive relief may compel the borrower, its officers, agents, or employees to perform each and every provision contained in any regulatory agreement, contract of insurance, or any other loan closing document to which the borrower is a party, or any obligation imposed on the borrower by law, and require the carrying out of any and all covenants and agreements and the fulfillment of all duties imposed on the borrower by law or such documents.

A receiver may be appointed pursuant to Chapter 5 (commencing with Section 564) of Title 7 of Part 2 of the Code of Civil Procedure. Upon a proper showing, the court shall grant the relief provided by law and requested by the office or the Attorney General. No receiver shall be appointed unless approved by the office. A receiver appointed by the superior court pursuant to this subdivision and Section 564 of the Code of Civil Procedure may, with the approval

of the court, exercise all of the powers of the officers and directors of the borrower, including the filing of a petition for bankruptcy. No action at law or in equity may be maintained by any party against the office, the Attorney General, or a receiver by reason of their exercising the powers of the officers and directors of a borrower pursuant to the order of, or with the approval of, the superior court.

(e) The borrower shall inform the office in advance of all meetings of its governing body. The borrower shall not exclude the office from attending any meeting of the borrower's governing body.

Article 4. Termination of Insurance

129175. Should a borrower be more than 10 days delinquent in paying the premium charges or inspection fees for insurance under this chapter, the office shall notify the borrower in writing. If that payment remains delinquent more than 30 days after the sending of the office's notice to the borrower, the office shall make every reasonable effort to notify the lender in writing. If that delinquency continues, on the 31st day after sending of the office's notice to the lender, the insurance shall be terminated and become null and void.

129180. The obligation to pay any subsequent premium charge for insurance shall cease, and all rights of the lender and the borrower under this chapter shall terminate as of the date of the notice, as herein provided, in the event that (a) any lender under a loan forecloses on the mortgaged property, or has otherwise acquired the project property from the borrower after default, but does not convey the property to the office in accordance with this chapter, and the office is given written notice thereof, or (b) the borrower pays the obligation under the loan in full prior to the maturity thereof, and the office is given written notice thereof.

129185. The office is authorized to terminate any insurance contract upon joint request by the borrower and the lender and upon payment of a termination charge that the office determines to be equitable, taking into consideration the necessity of protecting the fund. Upon the termination, borrowers and lenders shall be entitled to the rights, if any, that they would be entitled to under this chapter if the insurance contract were terminated by payment in full of the insured loan.

Article 5. Health Facility Construction Loan Insurance Fund

129200. There is hereby established a Health Facility Construction Loan Insurance Fund, that shall be used by the office as a revolving fund for carrying out the provisions and administrative costs of this chapter. The money in the fund is hereby appropriated to the office without regard to fiscal years for the purposes of this chapter.

129205. Moneys in the fund not needed for the current operations of the office under this chapter shall be invested pursuant to law. The office may, with the approval of the State Treasurer, purchase the debentures issued under this chapter. Debentures so purchased shall be canceled and not reissued.

129210. (a) The office's authorization to insure health facility construction, improvement, and expansion loans under this chapter shall be limited to a total of not more than two billion five hundred million dollars ($2,500,000,000). However, when the office completes the state plan as is required by Section 129020, and the plan is approved by the Governor and submitted to the legislative committees referred to in that section by December 31, 1992, and the plan includes a finding that the limit should be further increased, then the limit shall be increased on January 1, 1993, from two billion five hundred million dollars ($2,500,000,000) to three billion dollars ($3,000,000,000).

(b) Notwithstanding the limitation in subdivision (a), the office may exceed the specific dollar limitation in either of the following instances:

(1) Refinancing a preexisting loan, if the refinancing results in savings to the health facility and increases the probability that a loan can be repaid.

(2) The need for financing results from earthquakes or other natural disasters.

129215. The Health Facility Construction Loan Insurance Fund, established pursuant to Section 129200, shall be a trust fund and neither the fund nor the interest or other earnings generated by the fund shall be used for any purpose other than those purposes authorized by this chapter.

Article 6. Community Mental Health Facilities Loan Insurance

129225. This article shall be known as, and may be cited as, the Community Mental Health Facilities Loan Insurance Law.

129230. It is the intent of the Legislature in enacting this article to encourage the development of facilities for community-based programs that assist mental health clients living in any institutional setting, including state and local inpatient hospitals, skilled nursing homes, intermediate care facilities, and community care facilities to move to more independent living arrangements. It is further the intent of the Legislature to encourage local programs to seek funding for facility development from private sources and with the assistance provided pursuant to this chapter.

To achieve this purpose in determining eligibility for loan insurance pursuant to this chapter, the following special provisions apply to facilities approved in the county Short-Doyle plan and meeting the intentions of this article:

(a) Facilities shall not require approval pursuant to Section 129295 by the statewide system of health facility planning, the area health planning agency, or the Health Advisory Council, for the issuance of loan insurance, unless specifically required for the facilities by the facility category of licensure.

(b) Notwithstanding subdivision (i) of Section 129050, any loan of under three hundred thousand dollars ($300,000) for a nonprofit corporation as well as a political subdivision may be fully insured equal to the total construction cost, except a loan to any proprietary corporation that is insured pursuant to subdivision (d) of this section.

(c) The State Department of Mental Health or the local mental health program may provide all application fees, inspection fees, premiums and other administrative payments required by this chapter, except with respect to any loan to a proprietary corporation that is insured pursuant to subdivision (d) of this section.

(d) The borrower may be a proprietary corporation, provided that the facility is leased to the local mental health program for the duration of the insurance agreement. In these instances, all provisions in this chapter and this article that apply to a nonprofit corporation shall apply to the proprietary corporation, except as provided in subdivisions (b) and (c) of this section.

(e) For the purposes of this article, subdivision (c) of Section 129010 shall include the purchase of existing buildings.

(f) Facilities shall not require approval pursuant to Section 129020 by the statewide system of health facility planning, the area health planning agency, or the Health Advisory Council, for the issuance of loan insurance, until the director of the office and the Director of the Department of Mental Health determine that the state plan developed pursuant to Section 129020 adequately and comprehensively addresses the need for community mental health facilities and that finding is reported to the appropriate policy committees of the Legislature.

129235. Loans of under three hundred thousand dollars ($300,000) for any single facility shall have priority for obtaining loan insurance under the special provisions established pursuant to Section 129230.

129240. The total amount of loans that may be insured pursuant to this article shall not exceed fifteen million dollars ($15,000,000).

129245. No loan insurance shall be provided pursuant to this article for the purpose of providing psychiatric inpatient services in an acute psychiatric hospital or a general acute care hospital.

129250. The Legislative Analyst shall review and comment on the utilization and effectiveness of this article in the annual budget analysis and in hearings.

129255. If, in construing Article 6 (commencing with Section 129225) of this chapter as applied to the other provisions of this

chapter, any conflict arises, this article shall prevail over the other provisions of this chapter.

129260. If any provision of this article or the application thereof to any person or circumstances is held invalid, that invalidity shall not affect other provisions or applications of this article that can be given effect without the invalid provision or application, and to this end the provisions of this act are severable.

Article 7. Small Facility Loan Guarantee for Developmental Disability Programs

129275. This article shall be known and may be cited as the Small Facility Loan Guarantee for Developmental Disability Programs.

129280. It is the intent of the Legislature in enacting this article to encourage the development of facilities for community-based programs that assist developmentally disabled clients living in any institutional setting, including state and local inpatient hospitals, skilled nursing homes, intermediate care facilities, and community care facilities to move to more independent living arrangements. It is further the intent of the Legislature to encourage local programs to seek funding for facility development from private sources and with the assistance provided pursuant to this chapter.

To achieve this purpose in determining eligibility for loan insurance pursuant to this chapter, the following special provisions apply to facilities approved by area developmental disabilities boards and meeting the intentions of this article:

(a) Facilities shall not require approval pursuant to Section 129295 by the statewide system of health facility planning, the area health planning agency, or the Health Advisory Council, for the issuance of loan insurance, unless specifically required for the facilities by the facility category of licensure.

(b) Notwithstanding subdivision (i) of Section 129050, any loan of under three hundred thousand dollars ($300,000) for a nonprofit corporation as well as a political subdivision may be fully insured equal to the total construction cost.

(c) Facilities shall not require approval pursuant to Section 129020 by the statewide system of health facility planning, the area health planning agency, or the Health Advisory Council, for the issuance of loan insurance, until the director of the office and the Director of the Department of Developmental Services determine that the state plan developed pursuant to Section 129020 adequately and comprehensively addresses the need for community developmental services facilities and that finding is reported to the appropriate policy committees of the Legislature.

129285. (a) Loans of under three hundred thousand dollars ($300,000) for any single facility for six or fewer developmentally disabled shall have priority for obtaining loan insurance.

(b) The total amount of loans that may be insured pursuant to this article shall not exceed fifteen million dollars ($15,000,000).

129290. If any provision of this article or the application thereof to any person or circumstances is held invalid, that invalidity shall not affect other provisions or applications of this article that can be given effect without the invalid provision or application, and to this end the provisions of this article are severable.

129295. The office shall establish a pilot program under this article of insuring loans to nonprofit borrowers that are not licensed to operate the facilities for which the loans are insured. The number of facilities for which loans are insured under this section shall not exceed 30 and the aggregate amount of loans insured under this section shall not exceed six million dollars ($6,000,000), this may be in addition to the maximum loan insurance amount otherwise authorized by subdivision (b) of Section 129285. Construction of all projects assisted under this section shall be commenced on or before January 1, 1990.

The office may delay processing or decline acceptance of loan guarantee applications under this section if the volume of applications becomes too large for existing staff to process in a timely manner or if risks associated with the pilot program are determined by the office to be unreasonable.

The office shall submit a report to the Legislature, on or before January 1, 1991, specifically identifying potential problems and financial risks associated with insuring loans authorized by this section.

Article 9. Rural Hospital Grant Program

129325. It is the intent of the Legislature in enacting this article to assist rural hospitals that play a vital role in the health delivery system. The Legislature recognizes the difficulties rural hospitals encounter meeting urban hospital standards while serving a small, rural, or tourist patient base. However, it is not the intent of the Legislature to provide assistance to facilities that can only survive with continuous subsidies. Rather, it is the intent of the Legislature, through this program, to encourage the development and transition to an alternative rural hospital model, and to provide essential access to services not available at the alternative rural hospital level.

129330. In each even-numbered year, the office shall contract for an actuarial study to determine the reserve sufficiency of funds in the Health Facility Construction Loan Insurance Fund. The study shall examine the portfolio of existing insured loans and shall estimate the amount of reserve funds that the office should reasonably have available to be able to respond adequately to potential foreseeable risks, including extraordinary administrative expenses and actual defaults. Actuarial study contracts shall be exempt from Section 10373

of the Public Contract Code and shall be considered sole-source contracts.

129335. (a) In each odd-numbered year when the reserve balance in the fund is projected to be in excess of that actuarially needed, the office may, subject to authority in the Budget Act, grant excess reserve funds to rural hospitals.

(b) Whenever the office administers the grant program, it shall do so by a competitive process where potential grantees have sufficient time to apply. Priority for funds shall be given to alternative rural hospitals and rural hospitals that are sole community providers. Priority shall also be given to applicants that are otherwise financially viable, but request one-time financial assistance for equipment expenditures or other capital outlays. The maximum amount of any grant for a single project in any one grant year shall be two hundred fifty thousand dollars ($250,000).

(c) For the purposes of this article, ‘‘rural hospital’’ shall have the same meaning as contained in subdivision (a) of Section 124840.

Article 10. Community Health Center Facilities Loan Insurance

129350. This article shall be known and may be cited as the Community Health Center Facilities Loan Insurance Law.

129355. (a) ‘‘Community health center facilities,’’ as used in this article, means those licensed, nonprofit primary care clinics as defined in paragraph (1) of subdivision (a) of Section 1204.

(b) Notwithstanding subdivision (i) of Section 129050, any loan in the amount of five million dollars ($5,000,000) or less for a community health center facility pursuant to this chapter may be insured up to 95 percent of the total construction cost.

(c) Community health center facilities applying for any loan insurance pursuant to this chapter, may use existing equity in buildings, equipment, and donated assets, including, but not limited to, land and receipts from expenses related to the capital outlay for the project, notwithstanding the date of occurrence to meet the equity requirements of this chapter. In determining the value of the equity in any donated property, the office may use the original purchase price or the current appraised value.

(d) Any state plan referred to in Section 129020 developed by the office shall include a chapter identifying any impediments that preclude small facilities from utilizing the California Health Facility Construction Loan Insurance Program. The state plan shall also include specific programmatic remedies to enable small projects to utilize the program if impediments are found.

CHAPTER 2. HOSPITAL SURVEY AND CONSTRUCTION (HILL BURTON PROGRAM)

Article 1. Definitions and General Provisions

129375. This chapter may be cited as the ''California Hospital Survey and Construction Act.''

129380. As used in this chapter, the terms defined in this article have the meanings set forth in this article.

129385. ''The federal act'' includes Public Law 725 of the 79th Congress, approved August 13, 1946, entitled the Hospital Survey and Construction Act, as amended by Public Law 482 of the 83d Congress, approved July 12, 1954, entitled the Medical Facilities Survey and Construction Act of 1954, Public Law 88-164 of the 88th Congress, approved October 31, 1963, entitled Mental Retardation Facilities and Community Mental Health Centers Construction Act of 1963, and any other law now enacted by Congress concerning hospitals as defined in this article.

129390. ''The Surgeon General'' means the Surgeon General of the Public Health Service of the United States, or the Secretary of the Department of Health, Education and Welfare of the United States.

129395. ''Hospital'' includes hospitals for the chronically ill and impaired, public health centers, community mental health centers, facilities for the mentally retarded, and general, tuberculosis, mental and other types of hospitals and related facilities, such as laboratories, outpatient departments, nurses' home and training facilities, and central service facilities operated in connection with hospitals, diagnostic or treatment centers, nursing homes, and rehabilitation facilities, but except for facilities for the mentally retarded does not include any institution furnishing primarily domiciliary care.

129400. ''Public health center'' means a publicly owned facility for the provision of public health services, including related facilities such as laboratories, clinics, provisions for bed care, and administrative offices operated in connection with public health centers.

129405. ''Nonprofit hospital,'' ''nonprofit diagnostic or treatment center,'' ''nonprofit rehabilitation facility,'' and ''nonprofit nursing home'' mean any hospital, diagnostic or treatment center, rehabilitation facility, and nursing home, as the case may be, that is owned and operated by one or more nonprofit corporations or associations no part of the net earnings of that inures, or may lawfully inure, to the benefit of any private shareholder or individual, or a hospital publicly owned or operated by a public entity or agency of this state.

129410. ''Construction'' includes construction of new buildings, expansion, remodeling, and alteration of existing buildings, and initial equipment of any buildings; including architects' fees, but

excluding the cost of off-site improvements and, except with respect to public health centers, the cost of the acquisition of land.

129415. This chapter shall not apply to any sanatorium or institution conducted by or for the adherents of any well recognized church or religious denomination for the purpose of providing facilities for the care or treatment of the sick who depend upon prayer or spiritual means for healing in the practice of the religion of the church or denomination.

129420. ''Diagnostic or treatment center'' means a facility for the diagnosis or diagnosis and treatment of ambulatory patients (1) that is operated in connection with a hospital, or (2) where patient care is under the professional supervision of persons licensed to practice medicine or surgery in the State, or, in the case of dental diagnosis or treatment, under the professional supervision of persons licensed to practice dentistry in the state.

129425. ''Hospital for the chronically ill and impaired'' shall not include any hospital primarily for the care and treatment of mentally ill or tuberculous patients.

129430. ''Rehabilitation facility'' means a facility that is operated for the primary purpose of assisting in the rehabilitation of disabled persons through an integrated program of medical, psychological, social, and vocational evaluation and services under competent professional supervision, and in the case of which (1) the major portion of the evaluation and services is furnished within the facility; and (2) either (a) the facility is operated in connection with a hospital, or (b) all medical and related health services are prescribed by, or are under the general direction of, persons licensed to practice medicine or surgery in the state.

129435. ''Nursing home'' means a facility for the accommodation of convalescents or other persons who are not acutely ill and not in need of hospital care, but who require skilled nursing care and related medical services (1) that is operated in connection with a hospital, or (2) where nursing care and medical services are prescribed by, or are performed under the general direction of, persons licensed to practice medicine or surgery in the state.

Article 2. Administration

129450. The office shall constitute the sole agency of the state for the following purposes:

(a) Making an inventory of existing hospitals, surveying the need for construction of hospitals, and developing a program of hospital construction as provided in Article 3 (commencing with Section 129475) of this chapter.

(b) Developing and administering a state plan for the construction of public and other nonprofit hospitals as provided in Article 3 (commencing with Section 129475) of this chapter.

129455. In carrying out the purposes of this chapter, the department shall:

(a) Require reports, make inspections and investigations, and prescribe regulations as the department deems necessary.

(b) Provide methods of administration, appoint personnel, and take other action as may be necessary to comply with the requirements of the federal act, this chapter, and the regulations thereunder.

(c) Make an annual report to the Governor and to the Legislature on activities and expenditures pursuant to this chapter, including recommendations for additional legislation as the director considers appropriate to furnish adequate hospital, clinic, and similar facilities to the people of this state.

129460. The California Health Policy and Data Advisory Commission shall advise and consult with the department in carrying out the administration of this chapter and succeeds to and is vested with the functions, authority and responsibility of the Advisory Hospital Council and the Health Planning Council.

Any reference in any code to the Advisory Hospital Council or to the Health Planning Council shall be deemed a reference to the California Health Policy and Data Advisory Commission.

Article 3. Survey and Planning

129475. The department shall make an inventory of existing hospitals, including public, nonprofit, and proprietary hospitals, to survey the need for construction of hospitals, and, on the basis of the inventory and survey, shall develop a program for the construction of public and other nonprofit hospitals as will, in conjunction with existing facilities, afford the necessary physical facilities for furnishing adequate hospital, clinic, and similar services to all the people of the state.

129480. The construction program shall provide, in accordance with regulations prescribed under the federal act, this chapter, and the regulations thereunder, for adequate hospital facilities for the people residing in this state, and as much as possible shall provide for their distribution throughout the state in a manner that makes all types of hospital service reasonably accessible to all persons in the state.

129485. The office may make application to the Surgeon General for federal funds to assist in carrying out the survey and planning activities provided for in this article. These funds shall be deposited in the Office of Statewide Health Planning and Development Fund in the State Treasury.

129490. The department shall prepare and submit to the Surgeon General a state plan, and any revisions thereof or supplements thereto, that shall include the hospital construction program

developed under this article, and that shall provide for the establishment, administration, and operation of hospital construction activities in accordance with the requirements of the federal act and regulations thereunder.

129495. The department shall, by regulation, prescribe minimum requirements for the maintenance and operation of hospitals that receive federal aid for construction under the state plan and shall adopt and submit building standards for approval pursuant to Chapter 4 (commencing with Section 18935) of Part 2.5 of Division 13 as required for those purposes.

129500. The state plan shall set forth the relative need for the several projects included in the construction program, determined on the basis of the relative need of different sections of the population and of different areas lacking adequate hospital facilities, giving special consideration to areas with relatively small financial resources, and in accordance with the regulations of the Surgeon General prescribed pursuant to the federal act, and shall provide for their construction in the order of relative need so determined, insofar as financial resources available therefor and for maintenance and operations make it possible. In enacting this section it is the intent of the Legislature to encourage the design of projects and the development of programs that undertake responsibility to provide in an efficient manner comprehensive health care, including outpatient and preventive care, as well as hospitalization, to a defined population or populations.

For purposes of this section, the criterion of efficiency referred to herein shall include, but not be limited to, a consideration of the utilization of health facilities and services, including policies, mechanisms, and procedures to prevent excessive utilization.

129505. Applications for hospital construction projects for which federal funds are requested shall be submitted to the department, and may be submitted by the state or any political subdivision thereof or by any public or nonprofit agency authorized to construct and operate a hospital. Each application for a construction project shall conform to federal and state requirements, and shall be submitted in the manner and form prescribed by the department.

Any county that applies for or accepts federal funds for any hospital does so on condition that the hospital for which assistance is requested and accepted, at all times during which it is operated, (a) shall be qualified for a license under Chapter 2 (commencing with Section 1250) of Division 2 (whether or not that chapter is otherwise applicable to the hospital), and be subject to inspection under that chapter to the same extent as are other hospitals to which that chapter applies; and (b) shall not restrict patients to those unable to pay for their care.

129510. The department shall afford to every applicant for assistance for a construction project an opportunity for a fair hearing

before the council upon 10 days' written notice to the applicant. If the department, after affording reasonable opportunity for development and presentation of applications in the order of relative need, finds that a project application complies with the requirements of Section 129505 and is otherwise in conformity with the state plan, it shall approve the application and shall recommend and forward it to the Surgeon General. The department shall consider and forward applications in the order of relative need set forth in the state plan in accordance with Section 129500.

129515. From time to time the department shall inspect each construction project approved by the Surgeon General, and if the inspection so warrants, the department shall certify to the Surgeon General that work has been performed upon the project, or purchases have been made, in accordance with the approved plans and specifications, and that payment of an installment of federal funds is due to the applicant.

129520. The office is hereby authorized to receive federal funds in behalf of, and transmit them to, the applicants. Money received from the federal government for a construction project approved by the Surgeon General shall be deposited in the Office of Statewide Health Planning and Development Fund, and shall be used solely for payments due applicants for work performed, or purchases made, in carrying out approved projects.

129525. Any moneys deposited in the Office of Statewide Health Planning and Development Fund in accordance with this article are appropriated for expenditure by the office director for the purposes for which moneys were received, in accordance with the provisions of this chapter. Any funds received and not expended for the purposes of this article shall be repaid to the Treasury of the United States.

129530. The Legislature finds that in certain areas there is a need for nursing and convalescent homes for persons who are indigent. It is the purpose of this section to provide authorization for the construction of the homes, so that public medical assistance may be provided, under the state's medical assistance programs, for indigent persons.

The office may issue a certificate of need upon application by a chartered nonprofit corporation, for a nursing and convalescent home that provides or makes available medical care for indigent persons, to be constructed under the Mortgage Insurance Program of the Federal Housing Administration.

129535. The department shall, to the extent required by federal law, ascertain and enforce compliance with federal and state provisions and regulations adopted pursuant to this section during the period that an applicant who receives federal assistance remains obligated in order to assure the provision of uncompensated services for persons unable to pay for those services.

The department shall adopt regulations, in accordance with applicable federal regulations and Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code, for administering federal requirements for uncompensated services for persons unable to pay for those services. The regulations shall include all of the following:

(a) Identify categories of persons eligible for uncompensated services.

(b) Define the services that applicants may provide to meet their obligations under this section.

(c) Require obligated facilities to submit information, data, budgets, and reports, in a form and manner as the department may prescribe, describing the method under which the facility elects to establish the level at which it will provide uncompensated services.

(d) Permit department approval of requests to provide uncompensated services at a lesser level than prescribed, based on facility's inability to provide the prescribed level.

(e) Specify procedures for public hearings to inform the public of levels of uncompensated services to be provided by individual facilities or to resolve disputes and complaints relating to these levels.

(f) Set forth procedures for publication of notice concerning public hearings and, thereafter, for notices announcing the levels of uncompensated services to be provided by facilities.

(g) Describe the surveillance program utilized by the department to assure that individual facility's obligations to provide a determined level of uncompensated services are met.

Article 4. State Assistance for Hospital Construction

129550. As used in this article, ''public agency'' means cities, counties, and local hospital districts.

129555. ''Public agency'' also means any corporation, no part of the net earnings of which inures, or may lawfully inure, to the benefit of any private shareholder or individual, who is authorized to construct and operate a hospital.

129560. The office shall administer this article, and shall make regulations as may be necessary to carry out its provisions.

129565. From any state moneys made available to it for that purpose, the department shall provide assistance pursuant to this article for the construction of hospitals to public agencies that apply therefor, if the public agencies are eligible for assistance under this article and apply for and accept assistance upon the conditions specified in this article.

129570. A public agency is eligible for state assistance under this article only if it qualifies for and receives assistance from the United States Government under the federal act.

129575. Any public agency that applies for or accepts state assistance for any hospital under this article does so on condition that the hospital for which such assistance is requested and accepted, at all times during which it is operated, (a) shall be qualified for a license under Chapter 2 (commencing with Section 1400) of Division 2 of this code (whether or not Chapter 2 is otherwise applicable to the hospital), and be subject to inspection under Chapter 2 to the same extent as are other hospitals to which Chapter 2 applies; or shall be qualified for a license under Part 2 (commencing with Section 5699) of Division 5 of the Welfare and Institutions Code (whether or not Division 5 is otherwise applicable to the hospital), and be subject to inspection under Division 5 to the same extent as are other hospitals to which Division 5 applies; and (b) shall not restrict patients to those unable to pay for their care.

129580. The amount of state assistance that shall be provided to any public agency for any hospital under this article shall be a sum equal to the assistance received by the agency for its project under the federal act, but in no event shall the amount of the state assistance exceed one-third of the cost of construction of the project.

129585. Application for state assistance under this article shall be made to the office, in the manner and form prescribed by the office. The office shall prescribe the time and manner of payment of state assistance, if granted.

129590. Funds utilized for community mental health center purposes shall be allocated in a manner consistent with the intent of Section 9000 of the Welfare and Institutions Code and priority shall be given to the establishment or enlargement of clinical service facilities in general hospitals that are a part of a project proposal that provides a comprehensive service.

CHAPTER 3. FIRE SAFETY LOAN PROGRAM (Reserved)

PART 7. FACILITIES DESIGN REVIEW AND CONSTRUCTION

CHAPTER 1. HEALTH FACILITIES

Article 1. General Provisions

129675. This chapter shall be known and may be cited as the Alfred E. Alquist Hospital Facilities Seismic Safety Act of 1983.

129680. It is the intent of the Legislature that hospitals, that house patients who have less than the capacity of normally healthy persons to protect themselves, and that must be reasonably capable of providing services to the public after a disaster, shall be designed and constructed to resist, insofar as practical, the forces generated by earthquakes, gravity, and winds. In order to accomplish this purpose,

the Legislature intends to establish proper building standards for earthquake resistance based upon current knowledge, and intends that procedures for the design and construction of hospitals be subjected to independent review. It is the intent of the Legislature to preempt from local jurisdictions the enforcement of all building standards published in the California Building Standards Code relating to the regulation of hospital projects and the enforcement of other regulations adopted pursuant to this chapter, and all other applicable state laws, including plan checking and inspection of the design and details of the architectural, structural, mechanical, plumbing, electrical, and fire and panic safety systems, and the observation of construction. The Office of Statewide Health Planning and Development shall assume these responsibilities by establishing, maintaining, and operating separate, but coordinated, plan review and field inspection units within the statewide office.

It is the intent of the Legislature that where local jurisdictions have more restrictive requirements for the enforcement of building standards, other building regulations, and construction supervision, these requirements shall be enforced by the statewide office.

It shall be the responsibility of each local jurisdiction to keep the office advised as to the existence of any more restrictive local requirements. Where a reasonable doubt exists as to whether the requirements of the local jurisdiction are more restrictive, the effect of these requirements shall be determined by the Hospital Building Safety Board.

It is further the intent of the Legislature that the office, with the advice of the Hospital Building Safety Board, may conduct or enter into contracts for research regarding the reduction or elimination of seismic or other safety hazards in hospital buildings or research regarding hospital building standards.

Article 2. Definitions

129700. Unless the context otherwise requires, the definitions in this article govern the construction of this chapter.

129705. ''Architect'' means a person who is certified and holds a valid license under Chapter 3 (commencing with Section 5500) of Division 3 of the Business and Professions Code.

129710. ''Construction or alteration'' includes any construction, reconstruction, or alteration of, or addition to, any hospital building.

129715. ''Director'' means the Director of the Office of Statewide Health Planning and Development.

129720. ''Engineering geologist'' means a person who is validly certified under Chapter 12.5 (commencing with Section 7800) of Division 3 of the Business and Professions Code.

129725. (a) (1) ''Hospital building'' includes any building not specified in subdivision (b) that is used, or designed to be used, for

a health facility of a type required to be licensed pursuant to Chapter 2 (commencing with Section 1250) of Division 2.

(2) Except as provided in paragraph (9) of subdivision (b), hospital building includes a correctional treatment center, as defined in subdivision (j) of Section 1250, the construction of which was completed on or after March 7, 1973.

(b) ''Hospital building'' does not include any of the following:

(1) Any building where outpatient clinical services of a health facility licensed pursuant to Section 1250 are provided that is separated from a building in which hospital services are provided. If any one or more outpatient clinical services in the building provides services to inpatients, the building shall not be included as a ''hospital building'' if those services provided to inpatients represent no more than 25 percent of the total outpatient services provided at the building. Hospitals shall maintain on an ongoing basis, data on the patients receiving services in these buildings, including the number of patients seen, categorized by their inpatient or outpatient status. Hospitals shall submit this data annually to the department.

(2) Any building used, or designed to be used, for a skilled nursing facility or intermediate care facility if the building is of single-story, wood-frame or light steel frame construction.

(3) Any building of single-story, wood-frame or light steel frame construction where only skilled nursing or intermediate care services are provided if the building is separated from a building housing other patients of the health facility receiving higher levels of care.

(4) Any freestanding structures of a chemical dependency recovery hospital exempted under subdivision (c) of Section 1275.2.

(5) Any building licensed to be used as an intermediate care facility/developmentally disabled habilitative with six beds or less and any intermediate care facility/developmentally disabled habilitative of 7 to 15 beds that is a single-story, wood-frame or light steel frame building.

(6) Any building that has been used as a community care facility licensed pursuant to Chapter 3 (commencing with Section 1500) of Division 2, and was originally licensed to provide that level of care prior to March 7, 1973, if (A) the building complied with applicable building and safety standards at the time of that licensure, (B) the Director of the State Department of Health Services, upon application, determines that in order to continue to properly serve the facility's existing client population, relicensure as an intermediate care facility/developmentally disabled will be required, and (C) a notice of intent to obtain a certificate of need was filed with the area health planning agency and the office on or before March 1, 1983. The exemption provided in this paragraph extends only to use of the building as an intermediate care facility/developmentally disabled.

(7) Any building that has been used as a community care facility pursuant to paragraph (1) or (2) of subdivision (a) of Section 1502, and was originally licensed to provide that level of care if all of the following conditions are satisfied:

(A) The building complied with applicable building and safety standards for a community care facility at the time of that licensure.

(B) The facility conforms to the 1973 Edition of the Uniform Building Code of the International Conference of Building Officials as a community care facility.

(C) The facility is other than single story, but no more than two stories, and the upper story is licensed for ambulatory patients only.

(D) A certificate of need was granted prior to July 1, 1983, for conversion of a community care facility to an intermediate care facility.

(E) The facility otherwise meets all nonstructural construction standards for intermediate care facilities in existence on the effective date of this act or obtains waivers from the appropriate agency.

The exemption provided in this paragraph extends only to use of the building as an intermediate care facility as defined in subdivision (d) of Section 1250 and the facility is in Health Facilities Planning Area 1420.

(8) Any building subject to licensure as a correctional treatment center, as defined in subdivision (j) of Section 1250, the construction of which was completed prior to March 7, 1973.

(9) (A) Any building that meets the definition of a correctional treatment center, pursuant to subdivision (j) of Section 1250, for which the final design documents were completed or the construction of which was begun prior to January 1, 1994, operated by or to be operated by the Department of Corrections, the Department of the Youth Authority, or by a law enforcement agency of a city, county, or a city and county.

(B) In the case of reconstruction, alteration, or addition to, the facilities identified in this paragraph, and paragraph (8) or any other building subject to licensure as a general acute care hospital, acute psychiatric hospital, correctional treatment center, or nursing facility, as defined in subdivisions (a), (b), (j), and (k) of Section 1250, operated or to be operated by the Department of Corrections, the Department of the Youth Authority, or by a law enforcement agency of a county, only the reconstruction, alteration, or addition, itself, and not the building as a whole, nor any other aspect thereof, shall be required to comply with this chapter or the regulations adopted pursuant thereto.

129730. (a) Space for the following functions shall be considered ‘‘outpatient clinical services,’’ when provided in a freestanding building that is separated from a hospital building where inpatient hospital services are provided: administrative space, central sterile supply; storage; morgue and autopsy facilities; employee dressing

rooms and lockers; janitorial and housekeeping facilities; and laundry.

(b) The outpatient portions of the following services may also be delivered in a freestanding building and shall be considered ''outpatient clinical services:'' intermediate care; chronic dialysis; psychiatry; rehabilitation; occupational therapy; physical therapy; maternity; dentistry; skilled nursing; and chemical dependency.

(c) Services that duplicate basic services, as defined in subdivision (a) of Section 1250, or services that are provided as part of a basic service, but are not required for facility licensure may also be provided in a freestanding building.

(d) The office shall not approve any plans that propose to locate any function listed in subdivision (a) in a freestanding building until the department certifies to the office that it has received and approved a plan acceptable to the department that demonstrates how the health facility will continue to provide all basic services in the event of any emergency when the freestanding building may no longer remain functional.

(e) Services listed in subdivisions (b) and (c) are subject to the same 25-percent inpatient limitation described in Section 129725.

129735. ''Light steel frame construction'' means building construction using bearing walls composed of light gauge steel studs for its primary vertical support systems.

129740. ''Office'' means the Office of Statewide Health Planning and Development.

129745. ''Structural engineer'' means a person who is validly certified to use the title structural engineer under Chapter 7 (commencing with Section 6700) of Division 3 of the Business and Professions Code.

Article 3. General Requirements and Administration

129750. The office shall observe the construction of, or addition to, any hospital building or the reconstruction or alteration of any hospital building, as it deems necessary to comply with this chapter for the protection of life and property.

129755. Notwithstanding this chapter or any other provision of law, a city or county may operate a federally owned facility for the purpose of providing services to persons with human immunodeficiency (HIV) infections, and the operation of that facility shall be subject only to those seismic safety standards contained in federal law.

129760. The governing board of each hospital or other hospital governing authority, before adopting any plans for the hospital building, shall submit the plans to the office for approval and shall pay the fees prescribed in this chapter.

129765. In each case, the application for approval of the plans shall be accompanied by the plans, by full, complete, and accurate specifications, by structural design computations, and by the specified fee, which shall comply with the requirements prescribed by the office.

129770. (a) The office shall pass upon and approve or reject all plans for the construction or the alteration of any hospital building, independently reviewing the design to assure compliance with the requirements of this chapter. The office shall review the structural systems and related details, including the independent review of the geological data. Geological data shall be reviewed by an engineering geologist, and structural design data shall be reviewed by a structural engineer.

(b) Whenever the office finds a violation of this chapter that requires correction, a citation of the violation shall be issued to the hospital governing board or authority in writing and shall include a proper reference to the regulation or statute being violated.

129775. (a) Except as otherwise provided in subdivision (b), plans submitted pursuant to this chapter for work that affects structural elements shall contain an assessment of the nature of the site and potential for earthquake damage, based upon geologic and engineering investigations and reports by competent personnel of the causes of earthquake damage. One-story Type V wood frame or light steel frame, or light steel and wood frame construction of 4,000 square feet or less, shall be exempt from the provisions of this section, unless the project is within a special study zone established pursuant to Section 2622 of the Public Resources Code.

(b) The requirements of subdivision (a) may be waived by the office when the office determines that these requirements for the proposed hospital project are unnecessary and would not be beneficial to the safety of the public. The office, after consultation with the Building Safety Board, shall adopt regulations defining the criteria upon which the determination of a waiver shall be made.

129780. The engineering investigation shall be correlated with the geologic evaluation made pursuant to Section 129775.

129785. The application shall be accompanied by a filing fee in an amount that the office determines will cover the costs of administering this chapter. The fee shall not exceed 2 percent of the estimated construction cost. The fee shall be established in accordance with applicable procedures established in Article 5 (commencing with Section 11346) of Chapter 3.5 of Part 1 of Division 3 of Title 2 of the Government Code.

The minimum fee in any case shall be two hundred fifty dollars ($250).

The office shall issue an annual permit upon submission, pursuant to Section 129765, of an application for a project only if its estimated construction cost is twenty-five thousand dollars ($25,000) or less.

The cost of this annual permit shall be two hundred fifty dollars ($250) and this fee shall constitute the filing fee and shall cover all projects undertaken for a particular skilled nursing or intermediate care facility by the applicant up to an estimated construction cost of twenty-five thousand dollars ($25,000) during the state fiscal year in which the annual permit is issued. The fees for projects over the twenty-five thousand dollar ($25,000) limit shall be assessed at a rate established by the office in regulation. However, the rate established by the office shall not exceed 1.5 percent of the estimated construction cost for projects of skilled nursing and intermediate care facilities, as defined in subdivision (c), (d), (e), or (g) of Section 1250.

If the actual construction cost exceeds the estimated construction cost by more than 5 percent, a further fee shall be paid to the office, based on the above schedule and computed on the amount that the actual cost exceeds the amount of the estimated cost. If the estimated construction cost exceeds the actual construction cost by more than 5 percent, the office shall refund the excess portion of any paid fees, based on the above schedule and computed on the amount that the estimated cost exceeds the amount of the actual cost. A refund shall not be required if the applicant did not complete construction or alteration of 75 percent of the square footage included in the project, as contained in the approved drawings and specifications for the project. In addition, the office shall adopt regulations specifying other circumstances when the office shall refund to an applicant all or part of any paid fees for projects submitted under this chapter. The regulations shall include, but not be limited to, refunds of paid fees for a project that is determined by the office to be exempt or otherwise not reviewable under this chapter, and for a project that is withdrawn by the applicant prior to the commencement of review by the office of the drawing and specifications submitted for the project. All refunds pursuant to this section shall be paid from the Hospital Building Account in the Architecture Public Building Fund, as established pursuant to Section 129795.

129787. (a) The payment of the filing fee described in Section 15046 may be postponed by the statewide office if all of the following conditions are met:

(1) The proposed construction or alteration has been proposed as a result of a seismic event that has been declared to be a disaster by the Governor.

(2) The statewide office determines that the applicant cannot presently afford to pay the filing fee.

(3) The applicant has applied for federal disaster relief from the Federal Emergency Management Agency (FEMA) with respect to the disaster described in paragraph (1).

(4) The applicant is expected to receive disaster assistance within one year from the date of the application.

(b) If the statewide office does not receive full payment of any fee for which payment has been postponed pursuant to subdivision (a) within one year from the date of plan approval, the statewide office may request an offset from the Controller for the unpaid amount against any amount owed by the state to the applicant, and may request additional offsets against amounts owed by the state to the applicant until the fee is paid in full. This subdivision shall not be construed to establish an offset as described in the preceding sentence as the exclusive remedy for the collection of any unpaid fee amount as described in that same sentence.

129790. The office shall adopt specific space, architectural, structural, mechanical, plumbing, and electrical standards for correctional treatment centers in cooperation with the Board of Corrections, the Department of Corrections, and the Department of the Youth Authority.

129795. All fees shall be paid into the State Treasury and credited to the Hospital Building Fund, that is hereby created and continuously appropriated without regard to fiscal years for the use of the office, subject to approval of the Department of Finance, in carrying out this chapter. Adjustments in the amounts of the fees, as determined by the office and approved by the Department of Finance, shall be made within the limits set in Section 129785 in order to maintain a reasonable working balance in the account. Notwithstanding any other provision of law, any moneys collected pursuant to this chapter contained in the hospital building fund established by the Department of Finance, that are in the fund on January 1, 1994, shall be available for expenditure in accordance with this section.

129800. The director shall request the Department of Finance or the Auditor General to perform an audit of the uses of fees collected pursuant to Section 129785. This audit shall include, but not be limited to, an accounting of staff resources allocated to hospital plan reviews by the office and by the Office of the State Architect in the Department of General Services since these reviews are funded by fees collected pursuant to Section 129785. If the Department of Finance and the Auditor General indicate that other audit responsibilities will prohibit them from performing and completing the audit within six months of being initially requested to do so, then the office may contract with an independent organization to perform the audit.

129805. All plans and specifications shall be prepared under the responsible charge of an architect or a structural engineer, or both. A structural engineer shall prepare the structural design and shall sign plans and specifications related thereto. Administration of the work of construction shall be under the responsible charge of the architect and structural engineer, except that where plans and specifications for alterations or repairs do not affect architectural or

structural conditions, the plans and specifications may be prepared and work of construction may be administered by a professional engineer duly qualified to perform the services and holding a valid certificate under Chapter 7 (commencing with Section 6700) of Division 3 of the Business and Professions Code for performance of services in that branch of engineering in which the plans, specifications, and estimates and work of construction are applicable.

129810. Before commencing any construction or alteration of any hospital building, the written approval of the necessary plans as to safety of design and construction, by the office, shall be obtained.

129815. Any permit or authorization issued or provided pursuant to this chapter shall be subject to Chapter 3 (commencing with Section 15374) of Part 6.7 of Division 3 of Title 2 of the Government Code.

129820. No contract for the construction or alteration of any hospital building, made or executed on or after January 1, 1983, by the governing board or authority of any hospital or other similar public board, body, or officer otherwise vested with authority to make or execute such a contract, is valid, and no money shall be paid for any work done under such a contract or for any labor or materials furnished in constructing or altering any such building unless all of the following requirements are satisfied:

(a) The plans and specifications comply with this chapter and the requirements prescribed by the office.

(b) The approval thereof in writing has first been had and obtained from the office.

(c) The hospital building is to be accessible to, and usable by, the physically handicapped.

(d) The plans and specifications comply with the fire and panic safety requirements of the State Fire Marshal.

129825. (a) The hospital governing board or authority shall provide for and require competent and adequate inspection during construction or alteration by an inspector satisfactory to the architect or structural engineer, or both, and the office. Except as otherwise provided in subdivision (b), the inspector shall act under the direction of the architect or structural engineer, or both, and be responsible to the board or authority. Nothing in this section shall be construed to prohibit any licensed architect, structural engineer, mechanical engineer, electrical engineer, or any facility maintenance personnel, if approved by the office, from performing the duties of an inspector.

(b) If alterations or repairs are to be conducted under the supervision of a professional engineer pursuant to Section 129805, the inspector need only be satisfactory to the office and to the professional engineer, and the inspector shall act under the direction of the professional engineer.

(c) The office shall make an inspection of the hospital buildings and of the work of construction or alteration as in its judgment is necessary or proper for the enforcement of this chapter and the protection of the safety of the public.

Whenever the office finds a violation of this chapter that requires correction, the citation of the violation shall be issued to the hospital governing board or authority in writing and shall include a proper reference to the regulation or statute being violated.

(d) The office shall approve inspectors that shall be limited to the following:

(1) ''A'' inspectors, who may inspect all phases of construction, including, but not limited to, structural.

(2) ''B'' inspectors, who may inspect all phases of construction, except structural.

(3) ''C'' inspectors, who may inspect all phases of construction projects that the office determines do not materially alter the mechanical, electrical, architectural, or structural integrity of the health facility.

(e) (1) As part of its approval process, the office shall initially and periodically examine inspectors by giving either a written examination or a written and oral examination. The office may charge a fee for the examination process calculated to cover its costs. Inspectors who have not passed a written examination shall not be approved by the office until they have successfully passed the written examination. No employee of the office performing field inspections or supervising the field inspections shall be approved as an inspector on any construction project pursuant to this chapter for a period of one year after leaving employment of the office.

(2) The office shall develop regulations for the testing and approval of inspectors.

129830. From time to time, as the work of construction or alteration progresses and whenever the office requires, the architect or structural engineer, or both, in charge of construction or registered engineer in charge of other work, the inspector on the work, and the contractor shall each make a report, duly verified by him or her, upon a form prescribed by the office showing, of his or her own personal knowledge, that the work during the period covered by the report has been performed and materials used and installed are in accordance with the approved plans and specifications, setting forth detailed statements of fact as required by the office.

The term ''personal knowledge,'' as used in this section and as applied to the architect or registered engineer, or both, means personal knowledge that is the result of the general administration of construction as is required and accepted of, and for, these persons in the construction of buildings. These persons shall, however, use reasonable diligence to obtain the information required.

The term ‘‘personal knowledge,’’ as applied to the inspector, means the actual personal knowledge of the inspector obtained by his or her personal observation of the work of construction at the construction site in all stages of progress.

The term ‘‘personal knowledge,’’ as applied to the contractor, means the personal knowledge that is obtained from the construction of the building. The exercise of reasonable diligence to obtain the facts is required.

129835. Upon written request to the office by the governing board or authority of any hospital, the office shall make, or cause to be made, an examination and report on the structural condition of any hospital building subject to the payment by the governing board or authority of the actual expenses incurred by the office.

129840. Subsequent to the occurrence of any earthquake, the office may make, or cause to be made, studies of health facilities within the area involved.

129845. The office, in cooperation with the California Seismic Safety Commission, Emergency Medical Services Authority, the department, State Fire Marshal, the office of the State Architect, and representatives from the health care industry shall design a policy study identifying health care services required during and after a disaster and seismic standards for those services, and a financial strategy that would enable identified settings to meet those standards. The design of the study shall include an assessment of the capacity, efficacy, and demand for medical services provided in nonhospital settings following a disaster.

129850. Except as provided in Sections 18929 and 18930, the office shall from time to time make any regulations that it deems necessary, proper, or suitable to effectually carry out this chapter. The office shall also propose and submit building standards to the California Building Standards Commission for adoption and approval pursuant to Chapter 4 (commencing with Section 18935) of Part 2.5 of Division 13 relating to seismic safety for hospital buildings.

129855. The office may enter into any agreements and contracts with any qualified person, department, agency, corporation, or legal entity, as determined by the office, when necessary in order to facilitate the timely performance of the duties and responsibilities relating to the review and inspection of architectural, mechanical, electrical, and plumbing systems of hospital buildings to be constructed or altered or buildings under construction or alteration.

If the office determines that the structural review of plans for a hospital building cannot be completed without undue delay, the office may enter into contractual agreements with private structural engineers or local governments for the purpose of facilitating the timely performance of the duties and responsibilities relating to the review and inspection of plans and specifications of the structural systems of hospital construction projects.

The office, with the advice of the Building Safety Board, shall prepare regulations, containing qualification criteria, for implementing the contractual agreement provisions of this section.

Article 4. Special Requirements

129875. Construction or alterations of buildings specified in paragraphs (2) and (3) of subdivision (b) of Section 129725 shall conform to the latest edition of the California Building Standards Code. The office shall independently review and inspect these buildings. For purposes of this section, ''construction or alteration'' includes the conversion of a building to a purpose specified in paragraphs (2) and (3) of subdivision (b) of Section 129725. Any construction or alteration of any building subject to this section shall be exempt from any plan review and approval or construction inspection requirement of any city or county.

The office may also exempt from the plan review process or expedite those projects undertaken by an applicant for a hospital building that the office determines do not materially alter the mechanical, electrical, architectural, or structural integrity of the facility. The office shall set forth criteria to expedite projects or to implement any exemptions made pursuant to this paragraph.

The Legislature recognizes the relative safety of single-story, wood frame, and light steel frame construction for use in housing patients requiring skilled nursing and intermediate care services and it is, therefore, the intent of the Legislature to provide for reasonable flexibility in seismic safety standards for these structures. The office shall be reasonably flexible in the application of seismic standards for other buildings by allowing incidental and minor nonstructural additions or nonstructural alterations to be accomplished with simplified written approval procedures as established by the office, with the advice of the office of the State Architect and the State Fire Marshal.

The office shall continue to implement, and modify as necessary, criteria that were initially developed and implemented prior to July 2, 1989, to exempt from the plan review process or expedite those projects for alterations of buildings specified in paragraphs (2) and (3) of subdivision (b) of Section 12975 that may include, but are not limited to, renovations, remodeling, or installations of necessary equipment such as hot water heaters, air-conditioning units, dishwashers, laundry equipment, handrails, lights, television brackets, small emergency generators (up to 25 kilowatts), storage shelves, and similar plant operations equipment; and decorative materials such as wall coverings, floor coverings, and paint.

The office shall include provisions for onsite field approvals by available office construction advisers and the preapproval of projects that comply with the requirements for which the office has

developed standard architectural or engineering detail, or both standard architectural and engineering detail.

This section shall remain in effect only until January 1, 1997, and shall have no force or effect on or after that date, unless a later enacted statute, that is enacted before January 1, 1997, deletes or extends that date.

129880. Construction or alterations of buildings specified in paragraphs (1), (2), and (3) of subdivision (b) of Section 129725 shall conform to the applicable provisions of the latest edition of the California Building Standards Code. The office shall independently review and inspect these buildings. For purposes of this section, ''construction or alteration'' includes the conversion of a building to a purpose specified in paragraphs (1), (2), and (3) of subdivision (b) of Section 129725. Any construction or alteration of any building subject to this section shall be exempt from any plan review and approval or construction inspection requirement of any city or county. The building standards for the construction or alteration of buildings specified in paragraph (1) of subdivision (b) of Section 129725 shall not be more restrictive or comprehensive than comparable building standards established, or otherwise applied, by the office to clinics licensed pursuant to Chapter 1 (commencing with Section 1200) of Division 2.

The office may also exempt from the plan review process or expedite those projects undertaken by an applicant for a hospital building that the office determines do not materially alter the mechanical, electrical, architectural, or structural integrity of the facility. The office shall set forth criteria to expedite projects or to implement any exemptions made pursuant to this paragraph.

The Legislature recognizes the relative safety of single story, wood frame, and light steel frame construction for use in housing patients requiring skilled nursing and intermediate care services and it is, therefore, the intent of the Legislature to provide for reasonable flexibility in seismic safety standards for these structures. The office shall be reasonably flexible in the application of seismic standards for other buildings by allowing incidental and minor nonstructural additions or nonstructural alterations to be accomplished with simplified written approval procedures as established by the office, with the advice of the office of the State Architect and the State Fire Marshal.

The office shall continue to implement, and modify as necessary, criteria that were initially developed and implemented prior to July 2, 1989, to exempt from the plan review process or expedite those projects for alterations of buildings specified in paragraphs (2) and (3) of subdivision (b) of Section 129725 that may include, but are not limited to, renovations, remodeling, or installations of necessary equipment such as hot water heaters, air-conditioning units, dishwashers, laundry equipment, handrails, lights, television

brackets, small emergency generators (up to 25 kilowatts), storage shelves, and similar plant operations equipment; and decorative materials such as wall coverings, floor coverings, and paint.

The office shall include provisions for onsite field approvals by available office construction advisers and the preapproval of projects that comply with the requirements for which the office has developed standard architectural or engineering detail, or both standard architectural and engineering detail.

This section shall become operative on January 1, 1997.

129885. A city or county, as applicable, shall have plan review and building inspection responsibilities for the construction or alteration of buildings described in paragraph (1) of subdivision (b) of Section 129725. The building standards for the construction or alteration of buildings specified in paragraph (1) of subdivision (b) of Section 129725 established or applied by a city or county, shall not be more restrictive or comprehensive than comparable building standards established, or otherwise applied, to clinics licensed pursuant to Chapter 1 (commencing with Section 1200) of Division 2.

This section shall remain in effect only until January 1, 1997, and shall have no force or effect on or after that date, unless a later enacted statute, that is enacted before January 1, 1997, deletes or extends that date.

129890. (a) Notwithstanding any other provision of law, the office shall, on or before January 1, 1991, set forth and implement criteria for the alteration or construction of buildings specified in subdivision (a) of Section 129725 that provide for onsite field review and approval by construction advisors of the office and provide for preapproval of project plans that comply with the requirements for which the office has developed standard architectural or engineering detail, or both standard architectural and engineering detail.

(b) On site field reviews shall be performed by available area construction advisors of the office. The area construction advisors shall have the responsibility to coordinate any approvals required by the State Fire Marshal. The approvals may be obtained prior to the start of construction or on a deferred basis, at the discretion of the area construction advisor.

(c) An annual building permit project classified as a ‘‘field review’’ shall be reviewed and approved by the area construction advisor.

(d) Effective January 1, 1991, all plans submitted for the alteration or construction of buildings specified in subdivision (a) of Section 129725 to the office for plan review shall be evaluated to determine if it is exempt from the plan review process or if it qualifies for an expedited plan review. The evaluation shall give priority to plans that are for minor renovation, remodeling, or installation of equipment.

129895. (a) The office shall adopt by regulations seismic safety standards for hospital equipment anchorages, as defined by the

office. Such regulations shall include criteria for the testing of equipment anchorages.

(b) Any fixed hospital equipment anchorages purchased or acquired on or after either the effective date of the regulations adopted pursuant to subdivision (a), shall not be used or installed in any hospital building unless the equipment anchorages are approved by the office.

(c) Manufacturers, designers, or suppliers of equipment anchorages may submit data sufficient for the state department to evaluate equipment anchorages' seismic safety prior to the selection of equipment anchorages for any specific hospital building.

(d) The office may charge a fee based on the actual costs incurred by it for data review, approvals, and field inspections pursuant to this section.

129900. Notwithstanding any other provision of law, plans for the construction or alteration of any hospital building, or any building specified in Section 129875, that are prepared by or under the supervision of the Department of General Services shall not require the review and approval of the office. In lieu of review and approval by the office, the Department of General Services shall certify to the office that the plans are in full conformance with all applicable building standards and the requirements of this chapter. The Department of General Services shall also observe all aspects of construction and alteration, including the architectural, structural, mechanical, plumbing and electrical systems.

It is the intent of the Legislature that projects developed by, or under the supervision of, the Department of General Services shall still meet all applicable building standards published in the State Building Standards Code relating to the regulation of hospital projects where applicable, and all regulations adopted pursuant to this chapter and all other applicable state laws.

129905. Subject to the complete exemption contained in paragraphs (8) and (9) of subdivision (b) of Section 129726, and notwithstanding any other provision of law, plans for the construction or alteration of any hospital building, as defined in Section 1250, or any building specified in Section 129875, that are prepared by or under the supervision of the Department of Corrections or on behalf of the Department of the Youth Authority shall not require the review and approval of the statewide office. In lieu of review and approval by the statewide office, the Department of Corrections and the Department of the Youth Authority shall certify to the statewide office that their plans and construction are in full conformance with all applicable building standards, including, but not limited to, fire and life and safety standards, and the requirements of this chapter for the architectural, structural, mechanical, plumbing, and electrical systems. The Department of Corrections and the Department of the Youth Authority shall use a

secondary peer review procedure to review designs to ensure the adherence to all design standards for all new construction projects, and shall ensure that the construction is inspected by a competent, onsite inspector to ensure the construction is in compliance with the design and plan specifications.

Subject to the complete exemption contained in paragraphs (8) and (9) of subdivision (b) of Section 129725, and notwithstanding any other provision of law, plans for the construction or alteration of any correctional treatment center that are prepared by or under the supervision of a law enforcement agency of a city, county, or city and county shall not require the review and approval of the statewide office. In lieu of review and approval by the statewide office, the law enforcement agency of a city, county, or city and county shall certify to the statewide office that the plans and construction are in full conformance with all applicable building standards, including, but not limited to, fire and life and safety standards, and the requirements of this chapter for the architectural, structural, mechanical, plumbing, and electrical systems.

It is the intent of the Legislature that, except as specified in this section, all hospital buildings as defined by this chapter constructed by or under the supervision of the Department of Corrections or local law enforcement agencies, or constructed on behalf of the Department of the Youth Authority shall at a minimum meet all applicable regulations adopted pursuant to this chapter and all other applicable state laws.

Article 5. Building Safety Board

129925. There is in the office a Hospital Building Safety Board that shall be appointed by the director. The board shall advise the director and, notwithstanding Section 13142.6 and except as provided in Section 18945, shall act as a board of appeals in all matters relating to the administration and enforcement of building standards relating to the design, construction, alteration, and seismic safety of hospital building projects submitted to the office pursuant to this chapter.

Further, notwithstanding Section 13142.6, the board shall act as the board of appeals in matters relating to all fire and panic safety regulations and alternate means of protection determinations for hospital building projects submitted to the office pursuant to this chapter.

129930. The board shall consist of 16 members appointed by the director of the office. Of the appointive members, two shall be structural engineers, two shall be architects, one shall be an engineering geologist, one shall be a geotechnical engineer, one shall be a mechanical engineer, one shall be an electrical engineer, one shall be a hospital facilities manager, one shall be a local building official, one shall be a general contractor, one shall be a fire and panic

safety representative, one shall be a hospital inspector of record, and three shall be members of the general public.

129932. (a) Each member shall be appointed by the director for a term of four years and shall hold office until the appointment and qualification of his or her successor or until one year has elapsed since the expiration of the term for which he or she was appointed, whichever first occurs. No person shall serve as a member of the board for more than two consecutive terms. The director may remove any member of the board for neglect of duty or other just cause.

(b) The terms of the appointive members of the board who are in office before January 1, 1994, shall expire as follows:

(1) The terms of two members shall expire January 1, 1994.
(2) The terms of two members shall expire January 1, 1995.
(3) The terms of two members shall expire January 1, 1996.
(4) The terms of two members shall expire January 1, 1997.
(5) The terms of three members shall expire January 1, 1998.
(6) The terms of three members shall expire January 1, 1999.

The terms shall expire in the same relative order as the original appointment dates.

(c) Vacancies occurring during a term shall be filled by appointment for the unexpired term.

129935. Appointive members, except for the public members, shall be qualified by close connection with hospital design and construction and highly knowledgeable in their respective fields with particular reference to seismic safety. Appointive members, except for the public members, shall be appointed from nominees recommended by the governing bodies of the Structural Engineers Association of California; the American Institute of Architects; the Earthquake Engineering Research Institute; the Association of Engineering Geologists; the Consulting Engineers and Land Surveyors of California; the California Association of Local Building Officials; the American Society for Heating, Refrigerating, and Air-Conditioning Engineers, Inc.; the California Association of Hospitals and Health Systems; the Associated General Contractors of California; the American Construction Inspectors' Association; and the California Fire Chiefs' Association. Board members shall be residents of California.

129940. (a) There shall be six ex officio members of the board, who shall be the director of the office, the State Fire Marshal, the State Geologist, the Executive Director of the California Building Standards Commission, the State Director of Health Services, and the Deputy Director of the Division of Facilities Development in the office, or their officially designated representatives.

(b) The director may also appoint up to three additional ex officio members, with the advice of the chair. On January 1, 1994,

director-appointed ex officio members may continue to serve until appointment of their successors by the director.

129942. (a) Only appointed members shall vote at board meetings.

(b) Appointed members, ex officio members, and others appointed to a committee, including an appeal committee, by the chair, may vote at committee meetings.

129945. The chair of the board shall be an appointive member and shall be elected by a majority of the appointive members.

129950. The board shall be served by an executive director who shall be a member of the office staff.

129955. The Building Safety Board shall convene upon request of the chairperson thereof. The chairperson may convene a meeting of the board whenever it may be necessary, in the chairperson's judgment, for the board to meet. The board shall adopt rules of procedure as necessary to enable it to perform its duties. The chairperson shall, at his or her discretion, or upon instructions from the board, designate subcommittees to study and report back to the board upon any technical subject or matter for which an independent review or further study is desired.

129960. Members of the board shall be reimbursed from the Hospital Building Account in the Architecture Public Building Fund for their reasonable actual expenses in attending meetings conducted to carry out the provisions of this chapter, and they shall receive from that account per diem of one hundred dollars ($100) for each day actually spent in the discharge of official duties where attendance at one or more publicly scheduled meetings or hearings of the board is required by the board's chairperson. However, they shall receive no other compensation from that account for their services.

Article 6. Enforcement

129975. The director of the office may conduct studies relating to the implementation of this chapter to ensure that the implementation of its provisions results in the least amount of increases in costs, staffing, and regulation.

129980. Whenever any construction or alteration of any hospital building is being performed contrary to the provisions of this chapter, the office may order the construction or alteration stopped by written notice served upon any persons engaged in or causing the work to be done. Upon service of the written notice, all construction or alteration shall cease until an authorization to remove the notice is issued by the office. Any person so served shall, upon request made within 15 days of the written notice, be entitled to a hearing pursuant to Section 11506 of the Government Code.

129985. (a) Whenever it is necessary to make an inspection to enforce any of the provisions of this chapter or whenever the office or its authorized representatives has reasonable cause to believe that there exists in any building or upon any premises any condition or a violation of any applicable building standards that makes the building or premises unsafe, dangerous, or hazardous, the office or its authorized representatives may enter the building or premises at any reasonable time to make an inspection or to perform any authorized duty. Prior to an entry authorized by this section, the authorized representatives of the office shall first present proper identification and credentials and request entry. In the event that the building or premises are unoccupied, there shall be a reasonable effort made to locate the owner or other person or persons having control or charge of the building or premises in order to request an entry. If a request for entry is refused, the office or its authorized representatives shall have recourse to any remedy prescribed by law to secure entry.

(b) Whenever the owner, occupant, or other person having control or charge of the building or premises is presented with a proper inspection warrant or other authorization prescribed by law to secure entry and a request for entry is made, the owner, occupant, or other person having control or charge of the building or premises shall promptly permit the entry of the authorized representatives of the office for the purpose of inspection and examination authorized by this chapter.

129990. The office may order the vacating of any building or structure found to have been in violation of the adopted regulations of the office and may order the use of the building or structure discontinued within the time prescribed by the office upon the service of notice to the owner or other person having control or charge of the building or structure. Any owner or person having control so served shall, upon request made within 15 days of the written notice, be entitled to a hearing pursuant to Section 11506 of the Government Code.

Article 7. Penalties

129998. (a) Any person who violates any provision of this chapter is guilty of a misdemeanor.

(b) This section shall not apply to correctional treatment centers. This subdivision shall not affect any civil or administrative liability against correctional treatment centers or persons employed by these centers. This subdivision shall remain operative only until January 1, 1994.

Article 8. New State Responsibilities For Seismic Safety in Hospitals

130000. (a) The Legislature hereby finds and declares the following:

(1) The Alfred E. Alquist Hospital Facilities Seismic Safety Act of 1983 was created because of the loss of life in the collapse of hospitals during the Sylmar earthquake of 1971.

(2) We were reminded of the vulnerability of hospitals in the Northridge earthquake of January 17, 1994.

(3) Several hospitals built prior to the act suffered major damage and had to be evacuated.

(4) Hospitals built to the Alfred E. Alquist Hospital Facilities Seismic Safety Act standards resisted the Northridge earthquakes with very little structural damage demonstrating the value and necessity of this act.

(5) Both pre- and post-act hospitals suffered damage to architecture and to power and water systems that prevented hospitals from being operational, caused the loss of one life, triggered evacuations, unacceptable property losses, and added additional concerns on emergency medical response.

(6) An earthquake survivability inventory of California's hospitals completed by the Office of Statewide Health Planning and Development in December 1989 indicated that over 83 percent of the state's hospital beds were in buildings that did not comply with the Alfred E. Alquist Hospital Facilities Seismic Safety Act because they were issued permits prior to the effective date of the act. Furthermore, 26 percent of the beds are in buildings posing significant risks of collapse since they were built before modern earthquake codes. The older hospitals pose significant threats of collapse in major earthquakes and loss of functions in smaller or more distant earthquakes.

(7) The 1989 survey also states: ''Of the 490 hospitals surveyed, nine hospitals are in Alquist–Priolo Earthquake Fault Rupture Zones, 31 are in areas subject to soil liquefaction, 14 in areas with landslide potential, 33 in flood zones, and 29 have a possible loss or disruption of access. Two hundred five hospitals had no emergency fuel for their main boilers on hand, 19 had no emergency fuel for their emergency generators. Onsite emergency potable water was available at 273 hospitals and nonpotable water was available at 102 hospitals. Four hundred eighteen hospitals had emergency radios onsite, and 419 hospitals had inadequate or partially adequate equipment anchorage. In terms of available emergency preparedness, inadequate or partially inadequate equipment anchorage is still the most widespread shortcoming.''

(8) This survey identifies many of the shortcomings that caused 23 hospitals to suspend some or all operations after the Northridge

earthquake. However, one hospital was rebuilt to comply with the Alfred E. Alquist Hospital Facilities Seismic Safety Act after an older hospital building had partially collapsed in the 1971 Sylmar earthquake. The rebuilt hospital suffered failures in water distribution systems and had to be evacuated.

(9) The state must rely on hospitals to support patients and offer medical aid to earthquake victims.

(b) Therefore, it is the intent of the Legislature, that:

(1) By enacting this article, the state shall take steps to ensure that the expected earthquake performance of hospital buildings housing inpatients and providing primary basic services is disclosed to public agencies that have a need and a right to know, because the medical industry cannot immediately bring all hospital buildings into compliance with the Alfred E. Alquist Hospital Facilities Seismic Safety Act.

(2) The state shall encourage structural retrofits or replacements of hospital buildings housing inpatients and providing primary basic services that place lives at risk because of their potential for collapse during an earthquake.

(3) The state shall also encourage retrofits and enhancements to critical hospital architecture, equipment, and utility and communications systems to improve the ability of hospitals to remain operational for those hospitals that do not pose risk to life.

130005. By June 30, 1996:

(a) The Office of Statewide Health Planning and Development, hereinafter called the office, shall develop definitions of earthquake performance categories for earthquake ground motions for both new and existing hospitals that are:

(1) Reasonably capable of providing services to the public after a disaster, designed and constructed to resist, insofar as practical, the forces generated by earthquakes, gravity, and winds, and in full compliance with the regulations and standards developed by the office pursuant to the Alfred E. Alquist Hospital Facilities Seismic Safety Act.

(2) In substantial compliance with the pre-1973 California Building Standards Codes, but not in substantial compliance with the regulations and standards developed by the office pursuant to the Alfred E. Alquist Hospital Facilities Seismic Safety Act. These buildings may not be repairable or functional but will not significantly jeopardize life.

(3) Potentially at significant risk of collapse and that represent a danger to the public.

(b) The office may define other earthquake performance categories as it deems necessary to meet the intent of this article and the Alfred E. Alquist Hospital Facilities Seismic Safety Act.

(c) Earthquake performance categories shall also include subgradations for risk to life, structural soundness, building contents,

and nonstructural systems that are critical to providing basic services to hospital inpatients and the public after a disaster.

(d) Earthquake performance categories shall, as far as practicable, use language consistent with definitions and concepts as developed in the model codes and other state and federal agencies. Where the office finds that deviations from other's definitions and concepts are necessary and warranted to comply with the intent of the Alfred E. Alquist Hospital Facilities Seismic Safety Act, the act that added this article, or the specific nature or functions of hospitals, the office shall provide supporting documentation that justifies these differences.

(e) Insofar as practicable, the office shall define rapid seismic evaluation procedures that will allow owners to determine with reasonable certainty the existing applicable earthquake performance categories and the minimum acceptable earthquake performance categories for hospital buildings. These procedures shall allow for abbreviated analysis when known vulnerability is clear and when construction in accordance with post-1973 codes allows for an evaluation focusing on limited structural and nonstructural elements.

(f) The office, in consultation with the Hospital Building Safety Board, shall develop regulations to identify the most critical nonstructural systems and to prioritize the timeframes for upgrading those systems that represent the greatest risk of failure during an earthquake.

(g) The office shall develop regulations as they apply to the administration of seismic standards for retrofit designs, construction, and field reviews for the purposes of this article.

(h) The office shall develop regulations for the purpose of reviewing requests and granting delays to hospitals demonstrating a need for more time to comply with Section 130060.

(i) The office shall submit all information developed pursuant to subdivisions (a) to (f), inclusive, to the California Building Standards Commission by June 30, 1996.

(j) The office shall submit all information developed pursuant to subdivisions (g) and (h) to the California Building Standards Commission by December 31, 1996.

(k) ''Hospital building,'' as used in Article 8 and Article 9 of this chapter means a hospital building as defined in Section 129725 and that is also licensed pursuant to subdivision (a) of Section 1250, but does not include these buildings if the beds licensed pursuant to subdivision (a) of Section 1250, as of January 1, 1995, comprise 10 percent or less of the total licensed beds of the total physical plant, and does not include facilities owned or operated, or both, by the Department of Corrections.

130010. The office is responsible for reviewing and approving seismic evaluation reports, compliance schedules and construction

documents that are developed by hospital owners, and field review of construction for work done pursuant to this article.

130015. For the 1994–95 through 1997–98 fiscal years, the sum of three hundred eighteen thousand dollars ($318,000) is hereby appropriated from the Hospital Building Fund to the office for the purpose of developing regulations pursuant to subdivisions (a) through (j) of Section 130005.

130020. (a) By December 31, 1996, the California Building Standards Commission shall review, revise as necessary and adopt earthquake performance categories, seismic evaluation procedures, and standards and timeframes for upgrading the most critical nonstructural systems as developed by the office. By June 30, 1997, the California Building Standards Commission shall review, revise as necessary, and adopt seismic retrofit building standards and procedures for reviewing requests and granting delays to hospitals that demonstrate a need for more time to comply with Section 130060.

(b) For purposes of this section all submittals made by the office pursuant to subdivisions (i) and (j) of Section 130005 shall be deemed as emergency regulations and adopted as such.

130025. (a) In the event of a seismic event, or other natural or manmade calamity that the office believes is of such a magnitude that it may have compromised the structural integrity of a hospital building, or any major system of a hospital building, the office shall send one or more authorized representatives to examine the structure or system. ''System'' for these purposes shall include, but not be limited to, the electrical, mechanical, plumbing, and fire and life safety system of the hospital building. If in the opinion of the office, the structural integrity of the hospital building or any system has been compromised and damaged to a degree that the hospital building has been made unsafe to occupy, the office may cause to be placed on the hospital building either a red tag, a yellow tag, or a green tag.

(b) A ''red'' tag shall mean the hospital building is unsafe and shall be evacuated immediately. Access to red-tagged buildings shall be restricted to persons authorized by the office to enter.

(c) A ''yellow'' tag shall mean that the hospital building has been authorized for limited occupancy, and the authorized representative of the office shall write directly on the yellow tag that portion of the hospital building that may be entered with or without restriction and those portions that may not.

(d) A ''green'' tag shall mean the hospital building and all of its systems have been inspected by an authorized agent of the office, and have been found to be safe for use and occupancy.

(e) Any law enforcement or other public safety agency of this state shall grant access to hospital buildings by authorized

representatives of the office upon the showing of appropriate credentials.

Article 9. Hospital Owner Responsibilities

130050. (a) Within three years after the adoption of the standards described in Section 130020, owners of all general acute care hospitals shall:

(1) Conduct seismic evaluations in accordance with procedures developed by the office pursuant to subdivision (e) of Section 130005 and submit evaluations to the office for its review and approval.

(2) Identify the most critical nonstructural systems that represent the greatest risk of failure during an earthquake and submit the timetables for upgrading those systems pursuant to subdivision (f) of Section 130005 to the office for its review and approval.

(b) Within three years after the adoption of standards described in Section 130020, owners of all general acute care hospitals shall prepare a plan and compliance schedule for each building under the office's jurisdiction that indicates the steps by which the hospital intends to bring their hospital buildings into substantial compliance with the regulations and standards developed by the office pursuant to the Alfred E. Alquist Hospital Facilities Seismic Safety Act and this act, identifies the phasing out of or retrofit of noncomplying structures and systems, or outlines steps for relocation of acute care services to facilities that comply with the regulations and standards developed by the office pursuant to Alfred E. Alquist Hospital Facilities Seismic Safety Act and this act, and presents comprehensive plans and compliance schedules to the office for its review and approval, and integrates this schedule into the facility's master plan.

(c) Owners of all general acute care hospitals may be granted a one year allowance from the requirements of subdivision (b) by the office if they demonstrate a need for more time to prepare plans and compliance schedules for their buildings.

130055. Within 60 days following the office's approval of the report submitted pursuant to subdivision (b) of Section 130050, general acute hospital building owners shall do all of the following:

(a) Inform the local office of emergency services or the equivalent agency, the California Office of Emergency Services, and the office, of each building's expected earthquake performance.

(b) Include all pertinent information regarding the building's expected earthquake performance in emergency training, response, and recovery plans.

(c) Include all pertinent information regarding the building's expected earthquake performance in capital outlay plans.

130060. After January 1, 2008, any general acute care hospital building that is determined to be a potential risk of collapse or pose

significant loss of life shall only be used for nonacute care hospital purposes. A delay in this deadline may be granted by the office upon a demonstration by the owner that compliance will result in a loss of health care capacity that may not be provided by other general acute care hospitals within a reasonable proximity.

Upon compliance with this section, the hospital shall be issued a written notice of compliance by the office. The office shall send a written notice of violation to hospital owners that fail to comply with this section.

130065. In accordance with the compliance schedule approved by the office, but in any case no later than January 1, 2030, owners of all acute care inpatient hospitals shall either:

(a) Demolish, replace, or change to nonacute care use all hospital buildings not in substantial compliance with the regulations and standards developed by the office pursuant to the Alfred E. Alquist Hospital Facilities Seismic Safety Act and this act.

(b) Seismically retrofit all acute care inpatient hospital buildings so that they are in substantial compliance with the regulations and standards developed by the office pursuant to the Alfred E. Alquist Hospital Facilities Seismic Safety Act and this act.

Upon compliance with this section, the hospital shall be issued a written notice of compliance by the office. The office shall send a written notice of violation to hospital owners that fail to comply with this section.

130070. The office shall notify the State Department of Health Services of the hospital owners that have received a written notice of violation for failure to comply with either Section 130060 or 130065. Unless the hospital places its license in voluntary suspense, the state department shall suspend or refuse to renew the license of a hospital that has received a notice of violation from the office because of its failure to comply with either Section 130060 or 130065. The license shall be reinstated or renewed upon presentation to the state department of a written notice of compliance issued by the office.

CHAPTER 2. CLINIC CONSTRUCTION STANDARDS (Reserved)

SEC. 10. Section 26 of the Health and Safety Code is repealed.

SEC. 11. Chapter 1 (commencing with Section 100) of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 12. Chapter 1.4 (commencing with Section 140) of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 13. Chapter 1.5 (commencing with Section 150) of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 14. Chapter 1.7 (commencing with Section 175) of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 15. Chapter 1.8 (commencing with Section 185) of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 16. Chapter 1.85 (commencing with Section 188) of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 17. Chapter 1.9 (commencing with Section 190) of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 18. Chapter 1.10 (commencing with Section 195) of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 19. Chapter 1.11 (commencing with Section 199.20) of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 20. Chapter 1.12 (commencing with Section 199.30) of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 21. Chapter 1.13 (commencing with Section 199.42) of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 22. Chapter 1.14 (commencing with Section 199.45) of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 23. Chapter 1.15 (commencing with Section 199.55) of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 24. Chapter 1.16 (commencing with Section 199.70) of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 25. Chapter 1.17 (commencing with Section 199.81) of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 26. Chapter 1.19 (commencing with Section 199.86) of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 27. Chapter 1.20 (commencing with Section 199.95) of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 28. Article 1 (commencing with Section 200) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 29. Article 1.5 (commencing with Section 225) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 30. Article 1.7 (commencing with Section 230) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 31. Article 1.7 (commencing with Section 235) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 32. Article 1.8 (commencing with Section 242) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 33. Article 1.9 (commencing with Section 246.1) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 34. Article 2 (commencing with Section 248) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 35. Article 2.1 (commencing with Section 275) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 36. Article 2.4 (commencing with Section 283) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 37. Article 2.6 (commencing with Section 289) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 38. Article 2.9 (commencing with Section 295) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 39. Article 3 (commencing with Section 300) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 40. Article 3.1 (commencing with Section 309.7) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 41. Article 3.2 (commencing with Section 309.100) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 42. Article 3.3 (commencing with Section 310) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 43. Article 3.4 (commencing with Section 320) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 44. Article 3.45 (commencing with Section 324.7) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 45. Article 3.5 (commencing with Section 325) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 46. Article 3.6 (commencing with Section 340) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 47. Article 3.7 (commencing with Section 349) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 48. Article 4 (commencing with Section 350) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 49. Article 4.5 (commencing with Section 360) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 50. Article 4.6 (commencing with Section 372) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 51. Article 5 (commencing with Section 374) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 52. Article 5.5 (commencing with Section 380) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 53. Article 5.7 (commencing with Section 390) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 54. Article 6 (commencing with Section 400) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 55. Article 6.1 (commencing with Section 402) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 56. Article 6.5 (commencing with Section 405) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 57. Article 7 (commencing with Section 410) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 58. Article 7.2 (commencing with Section 412) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 59. Article 7.7 (commencing with Section 417) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 60. Article 7.8 (commencing with Section 418) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 61. Article 8 (commencing with Section 420) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 62. Article 8.1 (commencing with Section 421) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 63. Article 8.5 (commencing with Section 423) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 64. Article 8.7 (commencing with Section 424.10) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 65. Article 9.5 (commencing with Section 426) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 66. Article 10 (commencing with Section 427) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 67. Article 10.2 (commencing with Section 427.10) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 68. Article 11 (commencing with Section 428) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 69. Article 13 (commencing with Section 429.11) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 70. Article 13.1 (commencing with Section 429.13) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 71. Article 14.5 (commencing with Section 429.35) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 72. Article 15 (commencing with Section 429.40) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 73. Article 16 (commencing with Section 429.50) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 74. Article 17 (commencing with Section 429.60) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 75. Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 76. Article 18.5 (commencing with Section 429.90) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 77. Article 19 (commencing with Section 429.94) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 78. Article 20 (commencing with Section 429.994) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 79. Chapter 3 (commencing with Section 430) of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 79.5. Chapter 4 (commencing with Section 436) of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 80. Chapter 5 (commencing with Section 436.50) of Part 1 of Division 1 of the Health and Safety Code is repealed.

SEC. 81. Part 1.5 (commencing with Section 437.01) of Division 1 of the Health and Safety Code is repealed.

SEC. 82. Part 1.8 (commencing with Section 443) of Division 1 of the Health and Safety Code is repealed.

SEC. 83. Part 1.85 (commencing with Section 444) of Division 1 of the Health and Safety Code is repealed.

SEC. 84. Part 1.95 (commencing with Section 446) of Division 1 of the Health and Safety Code is repealed.

SEC. 85. Part 1.96 (commencing with Section 447.70) of Division 1 of the Health and Safety Code is repealed.

SEC. 86. Part 1.97 (commencing with Section 448) of Division 1 of the Health and Safety Code is repealed.

SEC. 87. Chapter 1 (commencing with Section 450) of Part 2 of Division 1 of the Health and Safety Code is repealed.

SEC. 88. Chapter 2 (commencing with Section 600) of Part 2 of Division 1 of the Health and Safety Code is repealed.

SEC. 153. Chapter 7.9 (commencing with Section 25884) of Division 20 of the Health and Safety Code is repealed.

SEC. 154. Chapter 8 (commencing with Section 25895) of Division 20 of the Health and Safety Code is repealed.

SEC. 155. Chapter 9 (commencing with Section 25898) of Division 20 of the Health and Safety Code is repealed.

SEC. 156. Chapter 10 (commencing with Section 25900) of Division 20 of the Health and Safety Code is repealed.

SEC. 157. Chapter 10.2 (commencing with Section 25906) of Division 20 of the Health and Safety Code is repealed.

SEC. 158. Chapter 10.5 (commencing with Section 25920) of Division 20 of the Health and Safety Code is repealed.

SEC. 159. Chapter 10.7 (commencing with Section 25930) of Division 20 of the Health and Safety Code is repealed.

SEC. 160. Chapter 10.8 (commencing with Section 25940) of Division 20 of the Health and Safety Code is repealed.

SEC. 161. Chapter 11 (commencing with Section 25950) of Division 20 of the Health and Safety Code is repealed.

SEC. 162. Chapter 12 (commencing with Section 25960) of Division 20 of the Health and Safety Code is repealed.

SEC. 163. Chapter 12.7 (commencing with Section 25967) of Division 20 of the Health and Safety Code is repealed.

SEC. 164. Chapter 13 (commencing with Section 25970) of Division 20 of the Health and Safety Code is repealed.

SEC. 165. Chapter 13.7 (commencing with Section 25989.500) of Division 20 of the Health and Safety Code is repealed.

SEC. 166. Chapter 14 (commencing with Section 25990) of Division 20 of the Health and Safety Code is repealed.

SEC. 167. Chapter 14.5 (commencing with Section 25995) of Division 20 of the Health and Safety Code is repealed.

SEC. 168. Chapter 14.7 (commencing with Section 25996.950) of Division 20 of the Health and Safety Code is repealed.

SEC. 169. Division 21 (commencing with Section 26000) of the Health and Safety Code is repealed.

SEC. 170. Division 22 (commencing with Section 27000) of the Health and Safety Code is repealed.

SEC. 171. It is the intent of the Legislature in enacting this act to reorganize and clarify portions of the Health and Safety Code and thereby facilitate its administration. The Legislature intends that the changes made to the Health and Safety Code, as reorganized by this act, have only technical and nonsubstantive effect. Hence, no change made by this act shall create any new right, duty, or other obligation that did not exist on the effective date of this act, or result in the limitation or termination of any right, duty, or other obligation that existed on the effective date of this act.

SEC. 172. The Legislature finds that the reorganization of the Health and Safety Code pursuant to this act, in view of the nonsubstantive statutory changes made, will not result in new or additional costs to local agencies.

SEC. 173. Any section of any act, other than the act for the maintenance of the codes (SB 975), enacted by the Legislature during the 1995 calendar year that takes effect on or before January 1, 1996, and that amends, amends and renumbers, adds, repeals and adds, or repeals a section that is amended, amended and renumbered, added, repealed and added, or repealed by this act, shall prevail over the amendment, amendment and renumbering, addition, repeal and addition, or repeal of that section by this act whether that act is enacted prior to, or subsequent to, the enactment of this act.

Effective: March 15, 2011

Code of Federal Regulations Currentness
Title 28. Judicial Administration
Chapter I. Department of Justice
Part 35. Nondiscrimination on the Basis of Disability in State and Local Government Services (Refs & Annos)
Subpart A. General
➡ **§ 35.104 Definitions.**

For purposes of this part, the term--

1991 Standards means the requirements set forth in the ADA Standards for Accessible Design, originally published on July 26, 1991, and republished as Appendix D to 28 CFR part 36.

2004 ADAAG means the requirements set forth in appendices B and D to 36 CFR part 1191 (2009).

2010 Standards means the 2010 ADA Standards for Accessible Design, which consist of the 2004 ADAAG and the requirements contained in § 35.151.

Act means the Americans with Disabilities Act (Pub.L. 101-336, 104 Stat. 327, 42 U.S.C. 12101-12213 and 47 U.S.C. 225 and 611).

Assistant Attorney General means the Assistant Attorney General, Civil Rights Division, United States Department of Justice.

Auxiliary aids and services includes--

(1) Qualified interpreters on-site or through video remote interpreting (VRI) services; notetakers; real-time computer-aided transcription services; written materials; exchange of written notes; telephone handset amplifiers; assistive listening devices; assistive listening systems; telephones compatible with hearing aids; closed caption decoders; open and closed captioning, including real-time captioning; voice, text, and video-based telecommunications products and systems, including text telephones (TTYs), videophones, and captioned telephones, or equally effective telecommunications devices; videotext displays; accessible electronic and information technology; or other effective methods of making aurally delivered information available to individuals who are deaf or hard of hearing;

(2) Qualified readers; taped texts; audio recordings; Brailled materials and displays; screen reader software; magnification software; optical readers; secondary auditory programs (SAP); large print materials; accessible electronic and information technology; or other effective methods of making visually delivered materials available to individuals who are blind or have low vision;

(3) Acquisition or modification of equipment or devices; and

(4) Other similar services and actions.

Complete complaint means a written statement that contains the complainant's name and address and describes the public entity's alleged discriminatory action in sufficient detail to inform the agency of the nature and date of the alleged violation of this part. It shall be signed by the complainant or by someone authorized to do so on his or her behalf. Complaints filed on behalf of classes or third parties shall describe or identify (by name, if possible) the alleged victims of discrimination.

Current illegal use of drugs means illegal use of drugs that occurred recently enough to justify a reasonable belief that a person's drug use is current or that continuing use is a real and ongoing problem.

Designated agency means the Federal agency designated under subpart G of this part to oversee compliance activities under this part for particular components of State and local governments.

Direct threat means a significant risk to the health or safety of others that cannot be eliminated by a modification of policies, practices or procedures, or by the provision of auxiliary aids or services as provided in §

35.139.

Disability means, with respect to an individual, a physical or mental impairment that substantially limits one or more of the major life activities of such individual; a record of such an impairment; or being regarded as having such an impairment.

(1)(i) The phrase physical or mental impairment means--

(A) Any physiological disorder or condition, cosmetic disfigurement, or anatomical loss affecting one or more of the following body systems: Neurological, musculoskeletal, special sense organs, respiratory (including speech organs), cardiovascular, reproductive, digestive, genitourinary, hemic and lymphatic, skin, and endocrine;

(B) Any mental or psychological disorder such as mental retardation, organic brain syndrome, emotional or mental illness, and specific learning disabilities.

(ii) The phrase physical or mental impairment includes, but is not limited to, such contagious and noncontagious diseases and conditions as orthopedic, visual, speech and hearing impairments, cerebral palsy, epilepsy, muscular dystrophy, multiple sclerosis, cancer, heart disease, diabetes, mental retardation, emotional illness, specific learning disabilities, HIV disease (whether symptomatic or asymptomatic), tuberculosis, drug addiction, and alcoholism.

(iii) The phrase physical or mental impairment does not include homosexuality or bisexuality.

(2) The phrase major life activities means functions such as caring for one's self, performing manual tasks, walking, seeing, hearing, speaking, breathing, learning, and working.

(3) The phrase has a record of such an impairment means has a history of, or has been misclassified as having, a mental or physical impairment that substantially limits one or more major life activities.

(4) The phrase is regarded as having an impairment means--

(i) Has a physical or mental impairment that does not substantially limit major life activities but that is treated by a public entity as constituting such a limitation;

(ii) Has a physical or mental impairment that substantially limits major life activities only as a result of the attitudes of others toward such impairment; or

(iii) Has none of the impairments defined in paragraph (1) of this definition but is treated by a public entity as having such an impairment.

(5) The term disability does not include--

(i) Transvestism, transsexualism, pedophilia, exhibitionism, voyeurism, gender identity disorders not resulting from physical impairments, or other sexual behavior disorders;

(ii) Compulsive gambling, kleptomania, or pyromania; or

(iii) Psychoactive substance use disorders resulting from current illegal use of drugs.

Drug means a controlled substance, as defined in schedules I through V of section 202 of the Controlled Substances Act (21 U.S.C. 812).

Existing facility means a facility in existence on any given date, without regard to whether the facility may also be considered newly constructed or altered under this part.

Facility means all or any portion of buildings, structures, sites, complexes, equipment, rolling stock or other conveyances, roads, walks, passageways, parking lots, or other real or personal property, including the site where the building, property, structure, or equipment is located.

Historic preservation programs means programs conducted by a public entity that have preservation of historic properties as a primary purpose.

Historic Properties means those properties that are listed or eligible for listing in the National Register of Historic Places or properties designated as historic under State or local law.

Housing at a place of education means housing operated by or on behalf of an elementary, secondary, undergraduate, or postgraduate school, or other place of education, including dormitories, suites, apartments, or other places of residence.

Illegal use of drugs means the use of one or more drugs, the possession or distribution of which is unlawful under the Controlled Substances Act (21 U.S.C. 812). The term illegal use of drugs does not include the use of a drug taken under supervision by a licensed health care professional, or other uses authorized by the Controlled Substances Act or other provisions of Federal law.

Individual with a disability means a person who has a disability. The term individual with a disability does not include an individual who is currently engaging in the illegal use of drugs, when the public entity acts on the basis of such use.

Other power-driven mobility device means any mobility device powered by batteries, fuel, or other engines--whether or not designed primarily for use by individuals with mobility disabilities--that is used by individuals with mobility disabilities for the purpose of locomotion, including golf cars, electronic personal assistance mobility devices (EPAMDs), such as the Segway® PT, or any mobility device designed to operate in areas without defined pedestrian routes, but that is not a wheelchair within the meaning of this section. This definition does not apply to Federal wilderness areas; wheelchairs in such areas are defined in section 508(c)(2) of the ADA, 42 U.S.C. 12207(c)(2).

Public entity means--

(1) Any State or local government;

(2) Any department, agency, special purpose district, or other instrumentality of a State or States or local government; and

(3) The National Railroad Passenger Corporation, and any commuter authority (as defined in section 103(8) of the Rail Passenger Service Act).

Qualified individual with a disability means an individual with a disability who, with or without reasonable modifications to rules, policies, or practices, the removal of architectural, communication, or transportation barriers, or the provision of auxiliary aids and services, meets the essential eligibility requirements for the receipt of services or the participation in programs or activities provided by a public entity.

Qualified interpreter means an interpreter who, via a video remote interpreting (VRI) service or an on-site appearance, is able to interpret effectively, accurately, and impartially, both receptively and expressively, using any necessary specialized vocabulary. Qualified interpreters include, for example, sign language interpreters, oral transliterators, and cued-language transliterators.

Qualified reader means a person who is able to read effectively, accurately, and impartially using any necessary specialized vocabulary.

Section 504 means section 504 of the Rehabilitation Act of 1973 (Pub.L. 93-112, 87 Stat. 394 (29 U.S.C. 794)), as amended.

Service animal means any dog that is individually trained to do work or perform tasks for the benefit of an individual with a disability, including a physical, sensory, psychiatric, intellectual, or other mental disability. Other species of animals, whether wild or domestic, trained or untrained, are not service animals for the purposes of this definition. The work or tasks performed by a service animal must be directly related to the individual's disability. Examples of work or tasks include, but are not limited to, assisting individuals who are blind or have low vision with navigation and other tasks, alerting individuals who are deaf or hard of hearing to the presence of people or sounds, providing non-violent protection or rescue work, pulling a wheelchair, assisting an individual during a seizure, alerting individuals to the presence of allergens, retrieving items such as medicine or the telephone, providing physical support and assistance with balance and stability to individuals with mobility disabilities, and helping persons with psychiatric and neurological disabilities by preventing or interrupting impulsive or destructive behaviors. The crime deterrent effects of an animal's presence and the provision of emotional support, well-being, comfort, or companionship do not constitute work or tasks for the purposes of this definition.

State means each of the several States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, American Samoa, the Virgin Islands, the Trust Territory of the Pacific Islands, and the Commonwealth of the Northern Mariana Islands.

Video remote interpreting (VRI) service means an interpreting service that uses video conference technology over dedicated lines or wireless technology offering high-speed, wide-bandwidth video connection that delivers high-quality video images as provided in § 35.160(d).

Wheelchair means a manually-operated or power-driven device designed primarily for use by an individual with a mobility disability for the main purpose of indoor or of both indoor and outdoor locomotion. This definition does not apply to Federal wilderness areas; wheelchairs in such areas are defined in section 508(c)(2) of the ADA, 42 U.S.C. 12207(c)(2).

Part 35. Nondiscrimination on the Basis of Disability in State and Local Government Services (Refs & Annos)
Subpart B. General Requirements
➡ § 35.130 General prohibitions against discrimination.

<For statute(s) affecting validity, see: 42 U.S.C.A. § 12101 et seq.>

(a) No qualified individual with a disability shall, on the basis of disability, be excluded from participation in or be denied the benefits of the services, programs, or activities of a public entity, or be subjected to discrimination by any public entity.

(b)(1) A public entity, in providing any aid, benefit, or service, may not, directly or through contractual, licensing, or other arrangements, on the basis of disability--

(i) Deny a qualified individual with a disability the opportunity to participate in or benefit from the aid, benefit, or service;

(ii) Afford a qualified individual with a disability an opportunity to participate in or benefit from the aid, benefit, or service that is not equal to that afforded others;

(iii) Provide a qualified individual with a disability with an aid, benefit, or service that is not as effective in affording equal opportunity to obtain the same result, to gain the same benefit, or to reach the same level of achievement as that provided to others;

(iv) Provide different or separate aids, benefits, or services to individuals with disabilities or to any class of individuals with disabilities than is provided to others unless such action is necessary to provide qualified individuals with disabilities with aids, benefits, or services that are as effective as those provided to others;

(v) Aid or perpetuate discrimination against a qualified individual with a disability by providing significant assistance to an agency, organization, or person that discriminates on the basis of disability in providing any aid, benefit, or service to beneficiaries of the public entity's program;

(vi) Deny a qualified individual with a disability the opportunity to participate as a member of planning or advisory boards;

(vii) Otherwise limit a qualified individual with a disability in the enjoyment of any right, privilege, advantage, or opportunity enjoyed by others receiving the aid, benefit, or service.

(2) A public entity may not deny a qualified individual with a disability the opportunity to participate in services, programs, or activities that are not separate or different, despite the existence of permissibly separate or different programs or activities.

(3) A public entity may not, directly or through contractual or other arrangements, utilize criteria or methods of administration:

(i) That have the effect of subjecting qualified individuals with disabilities to discrimination on the basis of disability;

(ii) That have the purpose or effect of defeating or substantially impairing accomplishment of the objectives of the public entity's program with respect to individuals with disabilities; or

(iii) That perpetuate the discrimination of another public entity if both public entities are subject to common administrative control or are agencies of the same State.

(4) A public entity may not, in determining the site or location of a facility, make selections--

(i) That have the effect of excluding individuals with disabilities from, denying them the benefits of, or otherwise subjecting them to discrimination; or

(ii) That have the purpose or effect of defeating or substantially impairing the accomplishment of the objectives of the service, program, or activity with respect to individuals with disabilities.

(5) A public entity, in the selection of procurement contractors, may not use criteria that subject qualified individuals with disabilities to discrimination on the basis of disability.

(6) A public entity may not administer a licensing or certification program in a manner that subjects qualified individuals with disabilities to discrimination on the basis of disability, nor may a public entity establish requirements for the programs or activities of licensees or certified entities that subject qualified individuals with disabilities to discrimination on the basis of disability. The programs or activities of entities that are licensed or certified by a public entity are not, themselves, covered by this part.

(7) A public entity shall make reasonable modifications in policies, practices, or procedures when the modifications are necessary to avoid discrimination on the basis of disability, unless the public entity can demonstrate that making the modifications would fundamentally alter the nature of the service, program, or activity.

(8) A public entity shall not impose or apply eligibility criteria that screen out or tend to screen out an individual with a disability or any class of individuals with disabilities from fully and equally enjoying any service, program, or activity, unless such criteria can be shown to be necessary for the provision of the service, program, or activity being offered.

(c) Nothing in this part prohibits a public entity from providing benefits, services, or advantages to individuals with disabilities, or to a particular class of individuals with disabilities beyond those required by this part.

(d) A public entity shall administer services, programs, and activities in the most integrated setting appropriate to the needs of qualified individuals with disabilities.

(e)(1) Nothing in this part shall be construed to require an individual with a disability to accept an accommodation, aid, service, opportunity, or benefit provided under the ADA or this part which such individual chooses not to accept.

(2) Nothing in the Act or this part authorizes the representative or guardian of an individual with a disability to decline food, water, medical treatment, or medical services for that individual.

(f) A public entity may not place a surcharge on a particular individual with a disability or any group of individuals with disabilities to cover the costs of measures, such as the provision of auxiliary aids or program accessibility, that are required to provide that individual or group with the nondiscriminatory treatment required by the Act or this part.

(g) A public entity shall not exclude or otherwise deny equal services, programs, or activities to an individual or entity because of the known disability of an individual with whom the individual or entity is known to have a relationship or association.

(h) A public entity may impose legitimate safety requirements necessary for the safe operation of its services, programs, or activities. However, the public entity must ensure that its safety requirements are based on actual risks, not on mere speculation, stereotypes, or generalizations about individuals with disabilities.

Title 28. Judicial Administration
Chapter I. Department of Justice
Part 35. Nondiscrimination on the Basis of Disability in State and Local Government Services (Refs & Annos)
Subpart E. Communications
➡ **§ 35.160 General.**

(a)(1) A public entity shall take appropriate steps to ensure that communications with applicants, participants, members of the public, and companions with disabilities are as effective as communications with others.

(2) For purposes of this section, "companion" means a family member, friend, or associate of an individual seeking access to a service, program, or activity of a public entity, who, along with such individual, is an appropriate person with whom the public entity should communicate.

(b)(1) A public entity shall furnish appropriate auxiliary aids and services where necessary to afford individuals with disabilities, including applicants, participants, companions, and members of the public, an equal opportunity to participate in, and enjoy the benefits of, a service, program, or activity of a public entity.

(2) The type of auxiliary aid or service necessary to ensure effective communication will vary in accordance with the method of communication used by the individual; the nature, length, and complexity of the communication involved; and the context in which the communication is taking place. In determining what types of auxiliary aids and services are necessary, a public entity shall give primary consideration to the requests of individuals with disabilities. In order to be effective, auxiliary aids and services must be provided in accessible formats, in a timely manner, and in such a way as to protect the privacy and independence of the individual with a disability.

(c)(1) A public entity shall not require an individual with a disability to bring another individual to interpret for him or her.

(2) A public entity shall not rely on an adult accompanying an individual with a disability to interpret or facilitate communication except--

(i) In an emergency involving an imminent threat to the safety or welfare of an individual or the public where there is no interpreter available; or

(ii) Where the individual with a disability specifically requests that the accompanying adult interpret or facilitate communication, the accompanying adult agrees to provide such assistance, and reliance on that adult for such assistance is appropriate under the circumstances.

(3) A public entity shall not rely on a minor child to interpret or facilitate communication, except in an emergency involving an imminent threat to the safety or welfare of an individual or the public where there is no interpreter available.

(d) Video remote interpreting (VRI) services. A public entity that chooses to provide qualified interpreters via VRI services shall ensure that it provides--

(1) Real-time, full-motion video and audio over a dedicated high-speed, wide-bandwidth video connection or wireless connection that delivers high-quality video images that do not produce lags, choppy, blurry, or grainy images, or irregular pauses in communication;

(2) A sharply delineated image that is large enough to display the interpreter's face, arms, hands, and fingers, and the participating individual's face, arms, hands, and fingers, regardless of his or her body position;

(3) A clear, audible transmission of voices; and

(4) Adequate training to users of the technology and other involved individuals so that they may quickly and efficiently set up and operate the VRI.

(4) names of personnel who treat, prescribe, and/or issue medication; and
(5) location where treated.
(b) The physician/patient confidentiality privilege applies to the medical/
/chiatric record. Access to the medical/psychiatric record shall be controlled
the responsible physician or the medical administrator.
The responsible physician shall insure the confidentiality of each prisoner's
dical record file and such file shall be maintained separately from and in no
y be part of the prisoner's other jail records. The responsible physician or
dical staff designated by him/her shall communicate information obtained
the course of medical screening and care to jail authorities when necessary
the protection of the welfare of the prisoner, of other prisoners, manage-
nt of the jail, or maintenance of jail security and order.
c) Written authorization by the inmate is necessary for transfer of medical/
chiatric record information unless otherwide provided by law or administra-
e regulations having the force and effect of law.
d) Prisoners shall not be used for medical recordkeeping.

TE: Authority cited: Section 6030, Penal Code. Reference: Section 6030, Penal Code.
STORY:
. Amendment filed 9-30-82; effective thirtieth day thereafter (Register 82, No. 40).

6. Medical Procedures Manual.

Every facility health administrator/physician shall, in cooperation with the
ility administrator, set forth in writing policy and procedures which include
are not limited to:
a) summoning and application of proper medical aid;
b) contact and consultation with private physicians;
c) emergency and non-emergency medical and dental services, including
nsportation;
d) provision for medically required dental and medical prostheses and eye-
ses;
e) notification of next of kin or legal guardian in case of serious illness;
f) provision for care of pregnant women;
g) screening, referral and care of mentally ill and retarded inmates;
h) implementation of special medical programs;
i) pharmaceuticals and a protocol for over-the-counter (non-prescription)
dication; and
) use of non-physician personnel.

TE: Authority cited: Section 6030, Penal Code. Reference: Section 6030, Penal Code.
TORY:
Editorial correction of NOTE filed 9-30-82 (Register 82, No. 40).

. Pre-Screening.

ccording to procedures established by the responsible physician and the
ity administrator, a pre-screen is performed on all inmates prior to housing
living area. The pre-screening shall be performed by a medically licensed
on or trained non-medical staff per the written order of the physician
onsible for health care at the facility.
here shall be a written plan to provide medical care for any inmate who
ears at pre-screening to be in need of medical treatment or who requests
ical treatment.

E: Authority cited: Section 6030, Penal Code. Reference: Section 6030, Penal Code.
ORY:
Editorial correction of NOTE filed 9-30-82 (Register 82, No. 40).

1208. Pre-Screening for Mental Disorders.

Any inmate who appears to be in need of psychiatric attention or who is suspected of suffering any type of mental disorder shall be brought to the attention of an appropriate medical professional.
Jails with an average daily population of 51 or more shall have a plan for identifying, screening, treatment and/or referral of the mentally disordered inmate which is developed in consultation with the local mental health director or his designee.

NOTE: Authority cited: Section 6030, Penal Code. Reference: Section 6030, Penal Code.
HISTORY:
1. Editorial correction of NOTE filed 9-30-82 (Register 82, No. 40).

1209. Transfer to Treatment Facility.

A mentally disordered inmate who appears to be a danger to himself or others, or to be gravely disabled, shall be transferred to a treatment facility designated by the county and approved by the State Department of Health Services for diagnosis and treatment of such apparent mental disorder pursuant to Penal Code 4011.6 and/or Welfare and Institutions Code 5150 unless appropriate facilities and personnel, as determined by the local mental health director, are present in the jail for this purpose. Inmates found unable to be cared for adequately within any jail shall be transferred to a designated treatment facility as soon as possible.

NOTE: Authority cited: Section 6030, Penal Code. Reference: Section 6030, Penal Code.
HISTORY:
1. Editorial correction of NOTE filed 9-30-82 (Register 82, No. 40).

1210. Individualized Treatment Plan.

For each inmate treated by a mental health service, in a jail, the service shall develop a written treatment plan which shall be shared with staff responsible for ongoing care of the inmate and which shall include referral to continuing mental health treatment after release.

NOTE: Authority cited: Section 6030, Penal Code. Reference: Section 6030, Penal Code.
HISTORY:
1. Editorial correction of NOTE filed 9-30-82 (Register 82, No. 40).

1211. Sick Call.

There shall be a written plan implementing daily sick call conducted for all inmates or provision made that any inmate requesting medical attention be given such attention.

NOTE: Authority cited: Section 6030, Penal Code. Reference: Section 6030, Penal Code.
HISTORY:
1. Editorial correction of NOTE filed 9-30-82 (Register 82, No. 40).

1212. Vermin Control.

Each facility health administrator/physician shall develop a written plan for the prophylaxis, control and treatment of vermin-infested inmates. There shall be written, medical protocols, signed by the facility physician, if any prophylactic treatment is used for persons suspected of being infested or having contact with a vermin-infested inmate.

NOTE: Authority cited: Section 6030, Penal Code. Reference: Section 6030, Penal Code.
HISTORY:
1. Editorial correction of NOTE filed 9-30-82 (Register 82, No. 40).

California Department of Public Health

Fact Sheet

Tuberculosis Control Branch

Division of Communicable Disease Control

Program Description

Tuberculosis Control Branch Mission Statement: To protect and improve the health of all, the California Tuberculosis Control Branch provides leadership and resources to control and eliminate tuberculosis.

The TB Control Branch works with the state's 61 local health departments to assess and improve our state's ability to:

- Find and treat active cases of TB to prevent deaths from TB, halt TB transmission, and stop the development and spread of drug resistant TB
- Find and treat those who have become infected by breathing in TB bacteria, so they do not develop active TB and spread it to others

Background

Tuberculosis (TB) is a contagious disease that is transmitted through the air from one person to another by tiny infectious airborne particles expelled when a person with TB disease coughs, sneezes or talks. Anyone inhaling the air containing these particles may become infected.

- **Latent TB infection** - In most people, the immune system keeps the TB bacteria in check, so the person does not feel sick and cannot spread TB to others. If untreated, the latent TB bacteria can become active and cause TB disease.

- **TB disease** - If active TB disease develops, TB bacteria attack the lungs or other parts of the body. It usually takes 6 months of treatment to cure the disease, which helps to ensure that the patient doesn't die or remain infectious and spread TB to others. Multi drug-resistant TB (MDR-TB) - active TB caused by bacteria resistant to our most powerful drugs - is much more difficult and costly to treat and can be incurable. Extensively drug-resistant TB (XDR-TB) is from strains of TB resistant to most, if not all, available treatment. XDR-TB may be impossible to treat and has a high mortality.

TB Branch roles include:

- field assistance to investigate outbreaks and help local TB programs fill programmatic gaps that allowed TB to spread
- oversee the care of all multidrug resistant (MDR) and extensively drug resistant (XDR) TB cases and their contacts to prevent spread of these deadliest strains
- work with local programs to evaluate and improve performance on key TB control indicators (TB Indicators Project, TIP)
- collect data and conduct studies to evaluate and guide TB control interventions
- ensure fiscal accountability and efficient application of resources to highest priority needs of the state and local TB programs

Program Goals

- Ensure prompt diagnosis and treatment of individuals with TB and their infected contacts to prevent TB from spreading.
- Expand the use of directly observed therapy to ensure TB patients are cured and do not develop drug-resistant TB.
- Ensure individuals with drug-resistant TB receive appropriate treatment and do not spread these deadly strains to others.
- Improve TB detection and prevention among newly arriving immigrants and refugees.
- Maintain housing and detention capacity so homeless or noncompliant TB patients can complete treatment.
- Work with the federal government and Mexico on a regional strategy to combat TB along the border.
- Halt and prevent TB outbreaks in health care facilities and community settings.

Statistics

California reports the most TB cases of any state, 21% of the nation's total.

More than 2,700 new cases of TB were reported in California in 2007. California also reports the most multi-drug resistant (MDR) TB cases of any state, and 1-2 cases of virtually untreatable, extensively drug resistant (XDR) strains of TB have been reported each year in California since 2000.

California Department of Public Health
Tuberculosis Control Branch

Tuberculosis Control Local Assistance Funds
Policies and Procedures Manual
Fiscal Year 2010-2011

Base Award

Food, Shelter, Incentives and Enablers Funds

Reimbursement for Civil Detention

Revised April 2010

Table of Contents

Part 1 – Policies and General Requirements

1. Overview

The California Department of Public Health (CDPH) Tuberculosis Control Branch (TBCB) sets forth the following policies and procedures. These policies and procedures specify the conditions for receipt of CDPH TBCB local assistance funds.

2. Authority

Health and Safety Code Sections 121350, 121355, 121357, 121360, 121375, 121380, 121390, 121450, 121455, and 121460 authorize the tuberculosis (TB) subvention program and charge the CDPH TBCB with establishing standards and procedures with which to condition the awarding of funds. The following conditions apply to the local health jurisdiction that has been awarded these funds. The local health jurisdiction is hereinafter referred to as the Contractor.

3. Allocation of Local Assistance Funds

Local assistance Base Awards are re-calculated every two years. Fiscal Year (FY) 2010-2011 is the first year of a two-year local assistance funding cycle. Base Award amounts for local health jurisdictions (LHJs) reporting 20 or more cases of TB on average (over five years) are allocated using of a funding formula. A new multi-variable funding formula modeled after the national TB allocation formula was developed in 2009 in collaboration with the California TB Controllers Association (CTCA). See Table 1 below for the new funding formula variables and weights.

Table 1. Base Award Allocation Formula FY 2010-2011

Base Award Allocation Formula 2010-2011	
Variable	**Weight**
Incident cases	32%
Foreign-born/U.S.-born minorities	35%
Pulmonary smear-positive	15%
Immigrants with B-notification	5%
HIV/AIDS co-infection	5%
Substance abuse	5%
Homelessness	5%
Multi-drug resistant (MDR) TB	3%

LHJs reporting 6 – 19 cases on average receive fixed amount Base Awards.

4. Contractor's Responsibilities

The Contractor agrees to:

- Direct activities toward achieving the program objectives set forth by CDPH TBCB.
- Use these funds in accordance with CDPH TBCB policies and procedures as set forth in this Policies and Procedures Manual, and to any additional requirements set forth by the CDPH TBCB regarding the granting, use and reimbursement of the TBCB local assistance funds.
- Use these funds to supplement existing funds and not supplant funds that have been locally appropriated for the same purposes. These funds are intended to provide local entities with increased capabilities or to build capacity to address tuberculosis control needs. Supplanting funds is defined (for the purposes of this agreement) as using Local Assistance Award monies to "replace" or "take the place of" existing local funding. For example, reductions in local funds cannot be offset by the use of CDPH TBCB dollars for the same purpose.
- Abide by the most recent standards of care for tuberculosis treatment, control, and prevention as promulgated by:
    - California Department of Public Health[1]
    - California Tuberculosis Controllers Association (CTCA)[2]
    - American Thoracic Society (ATS)[3]
    - Centers for Disease Control and Prevention (CDC)[4]

5. Base Award

5.1 Tuberculosis Control Branch Priorities, Local Priorities and Objectives

A. CDPH TBCB Priorities

The CDPH TBCB has adopted the national priorities established by the CDC, as described in the article titled, "Essential Components of TB Prevention and Control Programs,"[5] which was published in the Morbidity and Mortality Weekly Report (MMWR) dated September 8, 1995 and in "Controlling Tuberculosis in the United States: Recommendations from the American Thoracic Society,

[1] CDPH TBCB Guidelines can be found at: http://www.cdph.ca.gov/programs/tb/Pages/GuidelinesRegulations.aspx
[2] CTCA Guidelines can be found at: http://www.ctca.org/guidelines/index.html
[3] ATS Guidelines can be found at: http://www.thoracic.org/statements/
[4] CDC TB Guidelines can be found at: http://www.cdc.gov/tb/publications/guidelines/default.htm
[5] Essential Components document can be found at: http://www.cdc.gov/mmwr/PDF/rr/rr4411.pdf

CDC, and the Infectious Diseases Society of America,"[6] published in the November 4, 2005 MMWR. CDC identified three priorities in the control of TB:

- First Priority:
  Identifying and treating persons who have active TB and ensuring they complete appropriate therapy, and, in exceptional cases, using confinement measures. In California, this includes the provision of directly observed therapy (DOT) for TB cases when it is recommended.

- Second Priority:
  Finding and evaluating persons who have been in contact with TB patients to determine whether they have TB infection or disease, and providing them with appropriate treatment.

- Third Priority:
  Targeted testing of high-risk populations to detect people with latent TB infection (LTBI) who could benefit from therapy to prevent the infection from progressing to TB disease.

B. General Guidelines for Local Health Jurisdictions

Local health jurisdictions (LHJs) should prioritize TB control activities toward Priorities 1 and 2 before directing local assistance funding toward Priority 3.

In order to receive approval for Local Assistance Award dollars to be directed toward Priority 3, health departments should ensure that:

- Patients evaluated as part of a designated target population who are identified with latent TB infection (LTBI) are appropriately treated, that a program is established to ensure completion of treatment for LBTI, and

- The jurisdiction has met the CDC objectives for Priority 1 and 2 and can sustain these activities while implementing Priority 3.

C. Additional Guidelines for Local Health Jurisdictions Participating in the TB Indicators Project (TIP)

Participation in TIP is a funding requirement for high morbidity (≥ 55 annual cases) jurisdictions. TIP jurisdictions should establish local assistance funding priorities that are based on TIP goals and

[6] Controlling TB in the U.S. can be found at: http://www.cdc.gov/mmwr/PDF/rr/rr5412.pdf

performance objectives. Local objectives should be established that are time-phased, measurable, and attainable. A list of the 14 local health jurisdictions currently participating in TIP and the assigned TBCB staff working with each LHD is located on the CDPH TBCB internet site at: http://www.cdph.ca.gov/programs/tb/Documents/TBCB-TIP-Team-Assignments.pdf.

D. Additional Guidelines for Local Health Jurisdictions not Participating in the TB Indicators Project (TIP)

Local health jurisdictions not participating in TIP are encouraged to review "TIP goals and performance objectives"[7] and consider how local assistance funding can be used to improve performance in high priority areas. In assessing performance, it may be useful to review the most recent "Report on Tuberculosis in California"[8] which includes some jurisdiction-specific performance data (e.g., TB Cases by Type of Therapy Administration, TB Cases by Initial Drug Regimen). Additional TIP documents are available on the CDPH TBCB internet site at: http://www.cdph.ca.gov/programs/tb/pages/TuberculosisindicatorsProject.aspx.

5.2 Use of Base Award Funds

Base Award funds must be used exclusively for TB-related activities in accordance with the requirements set forth in Part 1, Sections 4 and 5.1. Allowable expenses include: salaries and benefits for personnel involved in TB control activities, equipment, and supplies (including equipment and supplies to support public health laboratories performing mycobacteriology services). See Table 2 for a complete list of allowable expenditures.

[7] TIP goals and performance objectives can be found at: http://www.cdph.ca.gov/programs/tb/Documents/TBCB-TIP-CaliforniaObjectives.doc

[8] Report on Tuberculosis in California (all years 2000-2008) can be found at: http://www.cdph.ca.gov/data/statistics/Pages/TuberculosisDiseaseData.aspx

Table 2. Allowable and Non-allowable Expenditures FY 2010-2011

Allowable: The following expenditures are usually approved when used to support TB Control Priorities 1 and 2. This list is not comprehensive and the presence of an item on the Allowable list does not imply automatic approval. Please contact the TBCB Fiscal Analyst for guidance.

Personnel
- MDs, NPs, Clinical RNs, Radiologists, PHNs, CDIs, Community Workers, Lab Staff, Clerks, Social Workers, Financial Screeners, Epidemiologists, Interpreters

Public Health Tuberculosis Laboratory
- Supplies (BACTEC, DNA probes)
- Equipment (incubators, fluorescent microscopes, centrifuge)

Patient Incentives & Enablers [applies to Food, Shelter, Incentives and Enablers (FSIE) Allotment]
- Patient housing
- Food vouchers
- Other personal products
- Transportation tokens or vouchers

Purchase of Fixed Assets
Radiographic equipment
- Sputum induction devices (booths or hoods)
- Isolation tents
- In-room air cleaners (HEPA Filters)

Indirect Costs
- Subcontract ONLY

Vehicle Leasing Fees

Travel (In-State ONLY)
- Local & Out of Jurisdiction

Equipment
- Cell phones
- Bubble pack packagers for DOT medications
- Fax machines
- Computer hardware
- Computer software for data management of cases and contacts
- Printers
- Scanners

Supplies
- Medical clinic supplies, anti-tuberculosis medications (State Funds ONLY)
- Office supplies
- Respirators (OSHA required individual masks and/or filters)

TB Training
- CTCA Conference Expenses
- Francis J. Curry National TB Center
- Tuberculosis training and educational materials

Non-Allowable: These expenditures will not be approved:

- **Leasing or Rental Fees**
  - Building or office space
- **General Building Renovation Fees**
- **Laboratory Renovations**
- **TB Clinic Renovations**
- **Desks and Tables**
- **File Cabinets**
- **Modular Furniture**
- **Out-of-State Travel**
- **Promotional items and Advertising (e.g., TB Program or Health Department Labeled Pens, Coasters, Banners)**

5.3 Use of Housing Award Funds

Some Base Awards include a portion of funds previously allocated as part of the Housing Award. Each year the letter announcing the request for application (RFA) identifies the amount of these funds. Housing Award funds must be budgeted for activities that enhance adherence in TB patients who are homeless, and/or at risk for homelessness or for default from therapy, so that civil detention is not necessary to complete therapy.

A. Purpose of former Housing Award Funds

These funds were awarded to the CDPH TBCB to be used specifically with the TB patients who are:

- Homeless, or
- At risk of becoming homeless, or
- At risk for defaulting from therapy

The housing funds in the Base Award are not intended for expenditures for food, shelter, incentives and enablers (FSIE). Separate funds have been set aside for the FSIE expenditures. Some jurisdictions have a designated annual FSIE allotment. Jurisdictions without an FSIE allotment may submit requests for reimbursement of these expenditures. See Part 1, Section 6, and Part 2, Section 3.

B. Eligible Expenditures

Eligible activities and expenditures for the former Housing Award funds included as part of the Base Award are those that foster the use of less restrictive alternatives to decrease or obviate the need for detention. Some examples are:

- Personnel salaries and benefits, e.g., outreach worker, social worker, public health nurse staff who work with the specified population to attain the expected outcomes
- Local mileage for personnel to perform DOT or other services that meet the eligibility criteria above, or
- Other expenditures that meet the criteria for use of these funds

5.4 Base Award Application: Required Forms and Information

Applications must be completed in accordance with the instructions given in Part 2. The application must include a:

- Summary Budget, Detail Budget and line item justifications (including expenditures budgeted using former Housing Award funds, when applicable)
- Funding Matrix
- Personnel Roster and Designated Correctional Liaison
- Plan for Housing Homeless TB Patients[9] – required only if not previously submitted, or if your current plan needs to be updated (see Part 1, Section 6.1)

All required budget forms can be found on the CDPH TBCB website at: http://www.cdph.ca.gov/programs/tb/pages/LocalAssistanceAward.aspx

For questions regarding the Base Award application process, please contact the CDPH TBCB Fiscal Analyst, David Beers, at (510) 620-3012 or via e-mail at david.beers@cdph.ca.gov.

5.5 Submitting Your Base Award Application

Submit electronically to tbawards@cdph.ca.gov or mail by Tuesday, June 1, 2010, to:

California Department of Public Health
Tuberculosis Control Branch
850 Marina Bay Parkway, Building P, Second Floor
Richmond, CA 94804-6403
Attention: David Beers – Application for Funding

5.6 Notice of Base Award Application Approval

The CDPH TBCB issues a Letter of Award to the recipient upon approval of the application package. Jurisdictions receiving both a Base Award and an FSIE allotment will receive a single Letter of Award announcing the amounts of the Base Award and the allotment. Attached to the letter is an Acceptance of Award page to return with an authorized signature.

5.7 Acceptance of Award

As an official acknowledgement of receipt of the award, the Acceptance of Award form must be returned to the CDPH TBCB with an authorized signature. By signing the Acceptance of Award, the recipient agrees to all the conditions of the award as set forth by the CDPH TBCB. A signed agreement is a prerequisite for reimbursement of invoices. The

[9] The Plan for Housing Homeless Tuberculosis Patients template can be found at: http://www.cdph.ca.gov/programs/tb/Documents/TBCB-Special%20Populations-Plan%20for%20Housing%20Homeless%20Tuberculosis%20Patients.doc

following signed forms should be sent with the signed acceptance of award:

- Drug-Free Workplace Certification (Submit with Acceptance of Award)
- Certification Regarding Lobbying (Submit with Acceptance of Award)
- Disclosure of Lobbying Activities (Submit with Acceptance of Award)
- Darfur Contracting Act (Submit with Acceptance of Award)

All required certifications and disclosures can be found on the CDPH TBCB website at:
http://www.cdph.ca.gov/programs/tb/pages/LocalAssistanceAward.aspx

5.8 Rights of the California Department of Public Health Tuberculosis Control Branch

The CDPH TBCB reserves the right to modify the terms and conditions of this award. Additional information and documentation may be required.

5.9 Reimbursement

- The CDPH TBCB reimburses the Contractor, in arrears, for actual expenditures in accordance with an approved budget.
- Reimbursement occurs only after the CDPH TBCB has received a signed original copy of the Acceptance of Award agreement that is provided with the Letter of Award.
- Reimbursement is contingent upon TBCB approval of expenditures submitted in an invoice.
- Reimbursement will be withheld if the CDPH TBCB determines that the Contractor is not adhering to the terms and conditions described in the Policies and Procedures Manual.
- Reimbursements will be made provided that sufficient funds are available in the budget of the CDPH TBCB for the period of this award.
- Total reimbursement shall not exceed the sum specified in the Base Award - Letter of Award, with the exception of an FSIE allotment or a Special Needs Funds award. Additional funds may be requested when a jurisdiction has exceeded its designated FSIE allotment. See Part 1, Section 6.3 for additional information. LHJs experiencing events which require acute and non-enduring

tuberculosis (TB) control activities, *for which no other funds are available*, such as extended contact investigations, cases of multi-drug resistant TB (MDR TB), and outbreaks may request Special Needs Funds (See Part 1, Section 7 for additional information). Reimbursement for expenditures from Base Awards, FSIE allotments and Special Needs Funds awards will not be made more frequently than quarterly.

5.10 Communicating with the CDPH TBCB

- Address questions about fiscal or reimbursement issues with the CDPH TBCB Fiscal Analyst, David Beers.
- Address questions about programmatic issues with your CDPH TBCB Program Liaison.

6. Food, Shelter, Incentives and Enablers (FSIE) Funds

6.1 Award of Funds

FSIE funds are granted as designated allotments to those local health jurisdictions that were recipients of Housing Award funds in prior funding cycles. These funds are also available for reimbursement of eligible expenses on a case-by-case basis to local health jurisdictions that do not receive an allotment.

Recipients of a designated allotment receive a Letter of Award specifying the amount of the allotment. Recipients of both a Base Award and an FSIE allotment receive a single Letter of Award specifying the amounts of the Base Award and the FSIE allotment.

A copy of the "Plan for Housing Homeless TB Patients"[9] must be on file with the CDPH TBCB. The CDPH TBCB originally requested these plans when Housing Awards were granted starting in FY 1998-1999. If a plan has been submitted, it is not necessary to re-submit unless the plan on file with the CDPH TBCB needs to be updated.

6.2 Use of Food, Shelter, Incentives and Enablers (FSIE) Funds

FSIE funds are to be used to provide services that include measures to enhance adherence, prevent homelessness, and allow the use of less restrictive alternatives that decrease or obviate the need for detention. Use of these funds requires that all confirmed and suspected TB cases housed with these funds must be placed and maintained on Directly Observed Therapy (DOT). For additional requirements, please see the

"Policy for Housing Patients with Confirmed or Suspected Tuberculosis Who Are Considered Infectious."[10]

A. Funds may be used to provide food, shelter, incentives and enablers to:

   a) Confirmed or suspected TB cases that fall into the following groups:

      - Homeless – See Part 1, Section 6.2 D for definition
      - At risk of becoming homeless
      - At risk for detention
      - At risk for defaulting from therapy

   b) Contacts of confirmed or suspected TB cases if the contacts are homeless, at risk of becoming homeless, or at risk of defaulting from therapy for latent TB infection (LTBI).

B. Using FSIE Funds for the Hospitalization of Homeless Patients

   By providing funds to house homeless tuberculosis (TB) patients, it was the intent of the 1997-1998 State Budget Initiative to improve completion of therapy (COT) for TB, decrease the need for detention of homeless TB patients, and decrease the number of homeless TB patients who are lost to follow-up. The initiative was also intended to reduce the need for hospitalization of homeless TB patients. The CDPH TBCB recognizes, however, that when no other form of housing is available (or the patient is acutely ill), there may still be a need to hospitalize a homeless TB patient.
   The CDPH TBCB may approve the use of housing funds for hospitalization when the following criteria are met:

   a) The patient is homeless at the time of hospital admission.

   b) The patient is infectious or too ill to place in any other available housing. This must be clearly documented by the health department in the patient's health department chart.

   c) All other payer sources have been explored and found inadequate or unavailable. Please note that patients otherwise eligible for Medi-Cal except for their immigration status may be eligible for Emergency Medi-Cal services. A description of these efforts must be documented in the patient's health department chart.

[10] The Policy for Housing Patients with Confirmed or Suspected Tuberculosis who are Considered Infectious can be found at: http://www.cdph.ca.gov/programs/tb/Documents/TBCB-Policy-for-housing-patients-considered-infectious.pdf

d) The patient is not under an order of detention as stated in Health and Safety Code Section 121365(d), (e). The CDPH TBCB has a separate mechanism for reimbursement for civil detention (See Part I, Section 9). Each proposed detention should be discussed with a CDPH TBCB Program Liaison as soon as the need for detention arises. However, the patient may be under an order of isolation as stated in Health and Safety Code 121365(g). Note that while both Health and Safety Code 121365(d) and (g) require the isolation of the patient, Health and Safety Code 121365(g) does not require the patient to be detained.

Additionally, as required by Health and Safety Code Sections 121361 and 121362, the hospital must submit a written treatment plan to the health department and receive approval prior to discharging or transferring the patient. The health department should develop a plan for transferring the patient to a location identified in the LHJ's housing plan.

C. Requesting Funds for the Hospitalization of Homeless Patients

Local health jurisdictions receiving an FSIE allotment should notify the CDPH TBCB Fiscal Analyst if they are giving consideration to using their FSIE allotment to cover part or all of the cost of the hospitalization.

D. Definition of Homelessness

This definition is taken from the Report of Verified Cases of Tuberculosis Form Completion Instructions, Tuberculosis Registry Guidelines, Version 4.1, April 2010.[11] A homeless person may be defined as:

i) An individual who lacks a fixed, regular, and adequate nighttime residence;

ii) An individual who has a primary nighttime residence that is:

- A supervised publicly or privately operated shelter designed to provide temporary living accommodations (including welfare hotels, congregate shelters, and transitional housing for the mentally ill);

[11] Tuberculosis Registry Guidelines (Poppy Manual) can be found at: http://www.cdph.ca.gov/programs/tb/Documents/TBCB-Tuberculosis-Registry-Guidelines.pdf

or

- An institution that provides a temporary residence for individuals intended to be institutionalized;

or

- A public or private place not designated for, or ordinarily used as, a regular sleeping accommodation for human beings.

A homeless person may also be defined as a person who has no home, e.g., is not paying rent, does not own a home, and is not steadily living with relatives or friends. Another definition is a person who lacks customary and regular access to a conventional dwelling or residence. Included as homeless are persons who live on streets or in nonresidential buildings. Also included are residents of homeless shelters, shelters for battered women, welfare hotels, and single room occupancy (SRO) hotels which are not designated for permanent long-term housing.

6.3 Requesting Additional FSIE Funds – Local Health Jurisdictions (LHJs) Receiving an Allotment

Additional FSIE funds may be requested by and granted to jurisdictions that exhaust their allotment in accordance with the following criteria:

- The CDPH TBCB should be the funding source of last resort for additional FSIE funds.
- The health jurisdiction must attempt to find resources that will allow the local TB control program to provide the necessary services to the TB patient. The CDPH TBCB Fiscal Analyst will assist the local health jurisdiction in identifying appropriate alternate sources of funding.
- Requests for additional funds should be primarily for the purpose of providing housing to suspected and confirmed TB cases. Circumstances warranting exceptions to this will be considered and approval will be made on a case-by-case basis. Exceptions should be in accordance with the prescribed use of these funds as described in Part I, Section 6.2 of this manual.
- Local health jurisdictions should submit requests to the CDPH TBCB Fiscal Analyst as soon as the need for additional funds is identified. Invoices for additional funds will be reviewed at the end

of each quarter and will be reimbursed, provided that expenses submitted are allowable and sufficient funds are available. Instructions for submitting requests and invoicing for reimbursement are located in Part 2, Section 3.3.

- The CDPH TBCB cannot ensure that sufficient funds will always be available to pay every request. However, the CDPH TBCB will take every step possible to identify all available appropriate funds. Payment is on a first come, first served basis, and made in accordance with available funds.

- The CDPH TBCB reserves the right to question and re-negotiate reimbursement for any expenditure that may appear to exceed a reasonable cost for the service.

6.4 Availability of FSIE Funds – LHJs with no Allotment

Funds for FSIE are available by prior approval from the CDPH TBCB to local health jurisdictions that do not receive an FSIE allotment in accordance with the criteria described in Part 1, Section 6.2. The following criteria apply:

- A copy of the "Plan for Housing Homeless TB Patients"[9] must be on file with the CDPH TBCB. The CDPH TBCB originally requested these plans when Housing Awards were granted starting in FY 1998-1999. If a plan has been submitted, it is not necessary to re-submit unless the plan on file with the CDPH TBCB needs to be updated.

- The CDPH TBCB should be the funding source of last resort for additional FSIE funds.

- The local health jurisdiction must attempt to find local resources that will allow the local TB control program to provide the necessary services to the TB patient. The CDPH TBCB Fiscal Analyst is available to assist the local health jurisdiction in identifying appropriate alternate sources of funding.

- Should the local TB control program exhaust available resources, or be unable to identify adequate resources, requests for funds should be directed to the CDPH TBCB Fiscal Analyst. Instructions for requesting these funds and invoicing for approved requests are described in Part 2, Section 3.2 of this manual.

- Requests for funds should be primarily for the purpose of providing housing to suspect and confirmed TB cases. Exceptions to this will be considered, and approval will be made, on a case-by-case

basis. Exceptions should be in accordance with the prescribed use of these funds as described in Part I, Section 6.2.

- Requests may be submitted at any time during the fiscal year. Approved requests may be invoiced quarterly up to the amount approved.

- The CDPH TBCB cannot ensure that sufficient funds will always be available to meet every request. However, the CDPH TBCB will take every step possible to identify all available appropriate funds. Payment is on a first come, first served basis, and will be made in accordance with available funds.

7. Special Needs Funds

Special Needs Funds awards are made available when possible to LHJs experiencing the need for acute and non-enduring tuberculosis (TB) control activities such as extended contact investigations, unexpected cases of MDR TB, and outbreaks. The amount available each year is variable. Available funds may be federal, State General Fund or both; allowable expenditures will be based on federal guidelines.

7.1 Requesting Special Needs Funds

Special Needs Funds may be requested by and granted to jurisdictions that have no other funds available in accordance with the following criteria:

- Eligible expenditures reimbursed with Special Needs Funds include support for additional personnel, benefits, travel, translation services, laboratory testing, supplies and services such as a portable X-ray van to conduct on-site screening of contacts for active TB disease.

- Non-eligible expenditures include in-patient care, medications, any expenditure for routine, on-going TB control activities, expenditures listed as "not allowed" on the "Allowable Expenditures" (see Table 2) and any expenditure that can be covered by another source of funds.

- Health departments that receive funds through a Cooperative Agreement with the Centers for Disease Control and Prevention are only eligible for State General Funds, when available.

- Requests may be submitted at any time during the fiscal year. Approved requests may be invoiced quarterly up to the amount approved.

For additional information regarding the Special Needs Funds application process, the Special Needs Funds application[12] and/or the Application Checklist,[13] please contact the CDPH TBCB Fiscal Analyst.

8. Reporting Requirements

8.1 Case Reports

All Contractors shall comply with morbidity reporting requirements. Beginning in 2010, all cases will be reported using the revised Report of Verified Case of Tuberculosis (RVCT). Contractors will submit complete and timely reporting of TB case data, participate in training of the revised RVCT, and participate in requisite quality control procedures, including reconciliation of case counts.

8.2 Electronic Reporting

All Contractors are required to work with TBCB staff to identify the appropriate reporting mechanisms to submit case reports to the California Reportable Disease Information Exchange (CalREDIE), the CDPH-DCDC web-based reporting software for notifiable diseases. Options include entering case data directly into CalREDIE, and electronic messaging from local software systems. Submission of hard copy RVCTs for data entry into CalREDIE by TBCB is a short-term option available to some LHDs. All Contractors must submit an RVCT electronically or via hard copy within 2 weeks of case confirmation.

8.3 California Aggregate Report for Program Evaluation (ARPE): Follow-up and Treatment for Contacts of TB Cases, Preliminary and Final Reports (Contact Report)

All Contractors are required to submit completed ARPE-Contact Investigation (CI) forms to the CDPH TBCB semi-annually. See the TBCB website for the required form, instructions, and ARPE due dates http://www.cdph.ca.gov/programs/tb/Pages/TBSurvFormsTBCB.aspx.

8.4 Protocols for People who Move

All Contractors are required to use the March 2002 National Tuberculosis Controllers Association (NTCA) protocol and forms for the

[12] Special Needs Funds application can be found at: http://www.cdph.ca.gov/programs/tb/Documents/TBCB-PPM-Special-TB-Needs-Funding-Application.doc

[13] Special Needs Funds application checklist can be found at: http://www.cdph.ca.gov/programs/tb/Documents/TBCB-PPM-Special-Needs-App-Checklist.doc

transfer of patient care between jurisdictions in California or between states.[14]

Instructions and forms for patients that move out of the U.S. can be found on the CDC website.[15]

Instructions for RVCT reporting of patients who move are included in the Tuberculosis Registry Guidelines, Version 4.1, April 2010.[11]

8.5 Outbreak Reporting

Timely TB outbreak reporting is required by the California Code of Regulations. Consistent with these regulations, the CDPH TBCB requires that local health officers or their designees report TB outbreaks or suspected outbreaks within one week of recognition. Reports should be conveyed by calling the CDPH TBCB Outbreak Duty Officer at (510) 620-3000. LHJs may also report TB outbreaks by fax or email using form CDPH 9060 (10/08) "Preliminary Report of Communicable Disease Outbreak."[16]

The suggested trigger for reporting suspected or confirmed outbreaks to CDPH TBCB is when three or more cases with epidemiologic links are identified. The characteristics of the case and/or setting may lower the threshold of the number of cases that define an outbreak. For example, jurisdictions may want to report two epidemiologically or genotypically linked cases involving multiple households, high risk populations (e.g., persons with HIV infection, children < 5 years of age, or persons with chronic medical conditions associated with elevated risk of TB), MDR TB, or occurrence in congregate settings. Jurisdictions are encouraged to report a situation if unclear whether or not it is an outbreak, or if State assistance may be useful.

Notes:

- For all situations: If the genotype is available, cases with > 1 different spoligotype or mycobacterial interspersed repetitive units (MIRU) locus should not be counted towards the number of cases defining an outbreak. Please report immediately, even while awaiting genotype results.

[14] NTCA Interjurisdictional Transfer Recommendations and protocols can be found at: http://www.cdph.ca.gov/programs/tb/Pages/TBSurvFormsTBCB.aspx
[15] CDC forms for international referrals can be found at: http://www.cdc.gov/tb/programs/international/default.htm
[16] CDPH form 9060 (10/08) "Preliminary Report of Communicable Disease Outbreak" can be found at: http://www.cdph.ca.gov/pubsforms/forms/CtrldForms/cdph9060.pdf

- For the purpose of an operational outbreak definition: Please include epidemiologic links that are both known (known contact or exposure in common) and possible (shared demographic features, geographic locations, and/or social interactions).

- For information about TBCB's Outbreak Response Team and investigation-related consultation and assistance available to local health departments, please see the Outbreak Response Team fact sheet.[17]

8.6 Immigrants and Refugees with B Notifications

Contractors are required to submit to CDPH TBCB the results of U.S. evaluations of immigrants and refugees arriving with A/B notifications using the Electronic Disease Notification (EDN) B notification Follow-up Worksheet[18] within 90 days of arrival in the U.S., or as soon as the TB American Thoracic Society (ATS) classification has been assigned. LHJs receiving e-mail notifications are required to enter the Worksheet results on-line into EDN; LHJs receiving paper notifications are required to submit the Worksheet by fax or mail to the CDPH TBCB.

8.7 Requests for Information and Reports

The CDPH TBCB reserves the right to request information and reports of all Contractors. All Contractors will submit information and reports as requested by the TBCB.

9. Reimbursement for Civil Detention of Persistently Non-Adherent Tuberculosis Patients

9.1 Reimbursement Policies

- All jurisdictions requesting reimbursement for the civil detention of a persistently non-adherent tuberculosis patient must have a current civil detention plan[19] on file with the CDPH TBCB.

- Consideration for reimbursement of persistently non-adherent tuberculosis patients for detention is on a case-by-case basis. Health and Safety Code 121358(a) prohibits the use of these funds for detentions carried out in correctional facilities.

[17] The Outbreak Response Team factsheet can be found at: http://www.cdph.ca.gov/programs/tb/Documents/TBCB-ORT-Fact-Sheet.pdf

[18] Forms A/B Notification Reporting including the B notification Follow-up Worksheet can be found at: http://www.cdph.ca.gov/programs/tb/Pages/TBSurvFormsTBCB.aspx

[19] The Plan for the Detention of Persistently Non-Adherent Tuberculosis Patients template can be found at: http://www.cdph.ca.gov/programs/tb/Documents/TBCB-Special%20Populations-Civil%20Detention%20Plan.doc

- Reimbursement is available for detentions for isolation [Health and Safety Code 121365(d)] and completion of therapy [Health and Safety Code 121365(e)].
- Reimbursement for detention is a fixed rate per day based on type of facility. Contact the Civil Detention Coordinator for information about the current rate (Table 3).
- Prior to submitting an invoice to the CDPH TBCB, local health jurisdictions should seek third party reimbursement for expenses for all eligible detainees.
- The reimbursement process is described in Part 2, Section 4 and in the Procedure for Requesting Reimbursement of Civil Detention of a Persistently Non-Adherent Tuberculosis Patient algorithm.[20]

Table 3. Allowable and Non-allowable Expenditures – Civil Detention

Allowable: All civil detention reimbursements are reviewed on a case by case basis. The CDPH TBCB is the payer of last resort. Proof of third party payer non-eligibility must be provided to the Tuberculosis Control Branch at the end of each fiscal year.
Room Accommodation (including access to toileting and bathing, meals, housekeeping, and laundry, provision of nursing care for administration of TB medication by DOT and visitation procedures)
• Health or Other Treatment Facility o Acute Care Hospital ($285 per day) o Skilled Nursing Facility ($285 per day) o Alcohol and Drug Rehabilitation Facility ($50 per day) o Mental Health Rehabilitation Center ($248 per day) o Other Health Care/Treatment Facility (up to $285 per day) o Motel (up to $285 per day) with elopement prevention

[20] Procedure for Requesting Reimbursement of Civil Detention of a Persistently Non-Adherent Tuberculosis Patient algorithm can be found at: http://www.cdph.ca.gov/programs/tb/Documents/TBCB-CivilDetention-Procedure-for-requesting-reimbursement.pdf

Allowable: All civil detention reimbursements are reviewed on a case by case basis. The CDPH TBCB is the payer of last resort. Proof of third party payer non-eligibility must be provided to the Tuberculosis Control Branch at the end of each fiscal year.

Other Expenditures

- **Additional Patient Services**
  - Provision of TB clinical services for medical evaluation, monitoring, and follow-up
  - Mental health, substance abuse and spiritual counseling
  - Recreation
  - Elopement prevention
    (may include: 24 hour security, security guard, closed circuit television, electronic monitoring, alarm on doors, and electronic key pad for entry and exit)

- **Medication**

The most cost efficient method of purchasing TB medication must be utilized (i.e., third party payer, or a discounted drug purchasing program)

- **Transportation**
  - Mental health, substance On a case-by-case basis
  - Ground transportation to and from a regional civil detention site and to and from medical appointments

Non-Allowable: These expenditures will not be approved for reimbursement:

Detention in a Correctional Facility	**Detention in a Private Residence**
Personal Monitoring Devices (Unless Ordered by a Court)	**Air Transportation Within the State of California**

9.2 CDPH TBCB Civil Detention Coordinator

Jan Young, R.N., M.S.N., Chief, Program Development Section, may be reached at (510) 620-3029 or via e-mail at Jan.Young@cdph.ca.gov, or contact your program liaison for technical assistance.

Part 2 – Procedures

1. Completing the Application for Funding

1.1 Completing the Budget

A. Salary Savings and the Contractor's Initial Budget

The CDPH TBCB requires a budget submitted without projected salary savings. However, for jurisdictions that must include salary savings in their application budget to meet local requirements, the following are required:

- Prepare a budget that does not include salary savings
- Prepare a separate revised budget that includes projected salary savings
- Submit both budgets with your application

All required budget forms, certifications and disclosures can be found on the CDPH TBCB website at: http://www.cdph.ca.gov/programs/tb/pages/LocalAssistanceAward.aspx.

B. Medi-Cal Fee-for-Service Reimbursement of Directly Observed Therapy and Directly Observed Preventive Therapy

The CDPH TBCB encourages the use of directly observed therapy (DOT) as a strategy for improving completion of therapy and reducing adverse treatment outcomes. To the extent possible, DOT services should be reimbursed by Medi-Cal on a fee-for-service basis of $19.23 per encounter.

The following rules apply when you plan to claim Medi-Cal reimbursement for your DOT services:

- For Medi-Cal fee-for-service reimbursement, DOT or directly observed preventive therapy (DOPT) must be provided by personnel who are either fully or partially funded with local revenue dollars. Personnel who are fully funded through CDPH TBCB local assistance funds do **not** qualify for this fee-for-service reimbursement. A county or local overmatch is required to claim this Federal Financial Participation reimbursement.
- Contractors should determine which position(s), if any, will provide Medi-Cal fee-for-service DOT or DOPT, and structure their local and CDPH TBCB local assistance budgets to maximize this revenue stream. Reimbursement is limited by the amount of

county or local overmatch budgeted for the personnel providing the service.

Suggested options for structuring your budget:

Option A:

1. Identify the number and type of personnel who will provide this reimbursable service.

2. Budget these positions to be fully funded with local revenue dollars.

Option B:

1. Identify the number and type of personnel who will provide this reimbursable service.

2. Estimate the amount of expected reimbursement for each personnel line item identified.

3. Budget each personnel line item identified to be partially funded through local revenue dollars for an amount equal to or greater than the expected amount of reimbursement.

4. Budget the remainder of each personnel item to be funded through State or federal local assistance funds.

C. Personnel (Benefit and Non-Benefit)

Budget information for Personnel line items is required on the Summary and Detailed Budget forms, and in the Line Item Justification.

Summary Budget

Personnel (Benefit) line item category

- Enter the total amount budgeted for benefited personnel

Personnel (Non-Benefit) line item category

- Enter the total amount budgeted for non-benefited personnel and miscellaneous personnel items

- Detailed Budget

- Personnel (Benefit) line item category

- List and consecutively number each benefited position as a separate line item
- For each position listed, include the following information:
- Position Title
- New or Continuing
- Number of Full Time Equivalents (FTE)
- Total Line Item Amount

EXAMPLE DETAILED BUDGET

Line Item Category			Amount
Personnel (Benefit) (Title, New or Continuing, #FTE)			
Community Worker	Continuing	1.5	$ 42,516
Epidemiology Analyst	New	1.0	$ 40,056
Total Personnel (Benefit)			$ 82,572
Benefits (@ 35%)			
1. Community Worker			$ 14,880
2. Epidemiology Analyst			$ 14,019
Total Benefits			$ 28,899
Personnel (Non-Benefit) (Title, New or Continuing, #FTE)			
Community Worker	New	1.0	$ 28,344
Total Personnel (Non-Benefit)			$ 28,344
GRAND TOTAL PERSONNEL SERVICES			$139,815

Line Item Justification:

Include the following information for each position listed in the Detailed Budget.

- Position Title
- Name(s) of the individual(s) filling the position. State "vacant" if position(s) are not filled

- Brief summary of the duties for the position; describe how the position contributes to meeting a program objective
- Identify the designated personnel previously funded in the Housing Award and identify their activities and the amount of FTE that match the criteria for the use of these dollars
- Identify personnel engaged in Priority 3 Activities (see also Part 2, Section 1K)
- Identify personnel fulfilling the duties of a Correctional Liaison (see also Part 2, Section 1L)

In addition to the above information, CDPH TBCB is required by CDC to submit information about DOT services and surveillance activities. Include the following information in your line item justification. Refer to the sample line item justification that follows when completing this portion of your application.

- If positions provide DOT, indicate the percentage of time spent in this activity expressed as FTE
- If positions provide fee-for-service DOT that will be claimed for reimbursement through Medi-Cal, indicate the number of FTE devoted to providing this service
- If positions provide support for an RVCT registry or laboratory data registry, or analyze RVCT data to identify disease trends and monitor patient outcomes, indicate the number of FTE providing these surveillance activities

EXAMPLE LINE ITEM JUSTIFICATION

PERSONNEL (Benefit & Non-Benefit)
Henry Trevon (1.0 FTE), Leo Segundo (1.0 FTE), Luther X. Ray (0.5 FTE) Henry Trevon and Leo Segundo provide .75 FTE of DOT each along with other patient follow-up services in a public health clinic. Luther X. Ray provides (1.0 FTE) provides .5 FTE DOT which is billed through the Medi-Cal TB Program fee-for-service DOT. He is supported for this portion of his effort by local revenue dollars. Epidemiology Analyst (Vacant) This individual assists the epidemiologist in analyzing RVCT data to identify disease trends and monitor patient outcomes. This individual also provides support to the RVCT Registry. This individual devotes 1.0 FTE to surveillance activities.

D. Benefits

- Benefit rates of greater than 35% must be justified. Include official documentation of the rate, as well as a breakdown of the benefits
- Benefit information is required on the Summary and Detailed Budget sheets
- Summary Budget – Benefits line item category
- Enter the rate at which benefits are computed and the total amount budgeted
- Detailed Budget – Benefits line item category
- Enter the benefit rate or range and the amount of benefits budgeted for each consecutively numbered position listed in the Personnel (Benefit) category

EXAMPLE DETAILED BUDGET

Line Item Category			Amount
Personnel (Benefit) (Title, New or Continuing, #FTE)			
Community Worker	Continuing	1.5	$ 42,516
Epidemiology Analyst	New	1.0	$ 40,056
Total Personnel (Benefit)			$ 82,572
Benefits (@%)			
1. @ 22%			$ 9,354
2. @ 28.2%			$ 11,296
Total Benefits			$ 20, 650
Personnel (Non-Benefit) (Title, New or Continuing, #FTE)			
Community Worker	New	1.0	$ 28,344
Total Personnel (Non-Benefit)			$ 28,344
GRAND TOTAL PERSONNEL SERVICES			$ 131,566

E. Miscellaneous Personnel Line Items

Budget information for miscellaneous personnel line items, i.e., Nurse Retention Bonus, Bilingual Bonus, is required on the Summary and Detailed Budget forms, and in the Line Item Justification.

Summary Budget – Personnel (Non-Benefit) line item category

Include in the total amount budgeted for miscellaneous personnel line items

Detailed Budget – Personnel (Non-Benefit) line item category

List any miscellaneous personnel line items as separate line items

EXAMPLE DETAILED BUDGET

Line Item Category				Amount
Personnel (Benefit) (Title, New or Continuing, #FTE)				
Community Worker	Continuing	1.5		$ 42,516
Epidemiology Analyst	New	1.0		$ 40,056
Total Personnel (Benefit)				$ 82,572
Benefits (@%)				
@ 22%				$ 9,354
@ 28.2%				$ 11,296
Total Benefits				$ 20,650
Personnel (Non-Benefit) (Title, New or Continuing, #FTE)				
Community Worker	New	1.0		$ 28,344
Bilingual Bonus	$ 80 per month	12 months	9 Nurses	$ 8,640
Nurse Retention Bonus	$110 per month	12 months	9 Nurses	$ 11,880
Total Personnel (Non-Benefit)				$ 48,864
GRAND TOTAL PERSONNEL SERVICES				$ 152,086

Line Item Justification:

For each miscellaneous personnel item listed in the Detailed Budget, include the following information in the Line Item Justification:

- Name of the line item

- A brief justification describing how these line items assist your staff in meeting identified program needs

EXAMPLE PERSONNEL (Non-Benefit)

Bilingual Bonus These bilingual individuals provide direct services to non-English speaking persons. Nurse Retention Bonus These individuals are registered nurses. Nurse Retention Bonuses are required by the local department of health services for all registered nurses providing nursing services.

F. Travel and Per Diem

Allowable Travel and Per Diem Expenses and Reimbursement (In-State only)

- Mileage – Private Car: 50¢ per mile (or current State reimbursement rate)
- Contractors must maintain a travel log that includes the individual's name, purpose of the trip (e.g., DOT visit), date(s) of travel, and the total mileage for the trip
- Daily Subsistence Rates (when travel exceeds 24 consecutive hours)*
- Lodging with a receipt up to $84.00 plus tax**
- Lodging without a receipt $24.50
- Breakfast $ 6.00
- Lunch $10.00
- Dinner $18.00
- Incidentals $ 6.00

*Reimbursement is made on the actual amount of the lodging or expense up to the designated maximum. All expenses invoiced must be for the actual amount of the expense. Local health jurisdiction personnel traveling on Base Award dollars should maintain receipts for all claimed expenses.

**Designated reimbursement maximums for lodging are higher for (receipted) hotel stays in the following counties:

- Los Angeles and San Diego: $110 plus tax

- Alameda, San Francisco, San Mateo, Santa Clara: $140 plus tax
- Reimbursement for travel and per diem shall be in accordance with the policies for State employees (see http://www.dpa.ca.gov/personnel-policies/travel/employees.htm)

Summary Budget – Travel line item category

List the total amount of combined travel and per diem

Detailed Budget – Travel line item category

- List projected within-jurisdiction travel separately from out-of-jurisdiction travel
- For within-jurisdiction travel, indicate the number of miles and mileage rate
- For out-of-jurisdiction travel, indicate travel and per diem expenses separately

Line Item Justification

- For within-jurisdiction and out-of-jurisdiction travel and per diem, briefly describe the purpose of the travel relative to stated program objectives. If applicable, identify the dollar amount of Housing Award funds and how the activities meet the criteria for the use of these funds (see Part 1, Section 5.3 for guidance on the use of former Housing Award funds).

EXAMPLE TRAVEL

Within-jurisdiction travel is required for community outreach workers and public health nurses to perform field directly observed therapy, case interviewing, and contact investigation. $10,000 – Housing Award funds: outreach worker's travel for DOT to high risk patients.

Out-of-jurisdiction travel is required for medical, nursing, other health professional staff to participate in continuing education through the annual CTCA conferences.

G. Equipment

Note: The CDPH requires that certain equipment purchased with State funds be documented on the "Current Contract Year Equipment

Purchased with State Funds.[21]" Return the completed form to the CDPH TBCB with the final invoice.

- Approval to purchase equipment is contingent on the Contractor's ability to demonstrate that the purchase is a cost effective means to meet a need related to the control and prevention of TB. This is best accomplished by clearly relating the purchase of this equipment to a stated program objective
- Equipment procurement shall not exceed an annual (fiscal year) maximum of $50,000
- All equipment and products purchased should be American-made, to the greatest extent practicable

Summary Budget – Equipment line category

List the total amount of all equipment purchases

Detailed Budget – Equipment line item category

Itemize equipment purchases. Include:

- The number of units, cost per unit, and total cost
- Make and model number

Line Item Justification

Briefly describe how the equipment will enhance your ability to meet a stated program objective. If applicable, identify the dollar amount of Housing Award funds and how the use of the equipment meets the criteria for the use of these funds (see Part 1, Section 5.3 for guidance on the use of former Housing Award funds).

H. Supplies

Use this line item for office supplies and clinic supplies, such as pens and tuberculin syringes.

Summary Budget

List the total amount for all supplies to be purchased.

Detailed Budget

[21] The Current Year Equipment Purchased with State Funds form can be found at: http://www.cdph.ca.gov/programs/tb/Documents/TBCB-PPMBud-Contractor-Equipment-Purchased.doc

Itemize projected expenditures into two categories:

- Office Supplies: State the total amount to be expended for these supplies. It is not necessary to list all the types of supplies
- Clinic Supplies: Itemize all the types of supplies you will purchase with the dollar amount for each type

EXAMPLE DETAILED BUDGET

Supplies	$745
Office Supplies	$500
Clinic Supplies	
Tuberculin Syringes	$200
Band-Aids	$ 20
Alcohol Wipes	$ 25

I. Sub-Contracts

Important: A copy of each sub-contract must accompany the application. A final draft is acceptable. A copy of the signed contract must be submitted to the CDPH TBCB as soon as the local approval process is completed.

Sub-contracts should include the name of the contract organization, the terms of the agreement, including the service period, as well as all of the following applicable information, including, but not limited to:

- Whether the sub-contractor is a community-based organization or a private agency
- Population and number of clients served by sub-contractor
- Maximum amount to be paid
- Basis upon which the payment is to be made under the terms of the agreement
- A list of the parties to the agreement
- Types and quantity of the product(s) to be delivered, including the delivery schedule
- Payment schedule based on the delivery of the product(s)

- Personnel detail: Position Title(s), Number of FTE, Total Pay, Fringe Benefits rate and cost
- Travel expenses and per diem rates
- Fee for service rate, when applicable
- Details regarding equipment and supplies purchases as described in Part 2, Section 1G

Summary Budget – Contractual line item category

List the total amount of all sub-contracts, e.g., purchase agreements and service contracts

Detailed Budget – Contractual line item category

Itemize each sub-contract on the detailed budget sheet. If the sub-contract does not show a detailed listing of the personnel, services, equipment and other costs, then prepare a separate detailed budget for each sub-contract. Provide the same details for personnel, benefits, travel, equipment and other costs covered under the sub-contract as is required for the Base Award detailed budget section.

Line Item Justification

Briefly describe the purpose of the sub-contract and how the sub-contract will enhance your program's ability to meet a stated program objective. If applicable, identify the dollar amount of Housing Award funds and how the sub-contract meets the criteria for the use of these funds (see Part 1, Section 5.3 for guidance on the use of former Housing Award funds).

J. Other Line Items

Use this line item for other direct costs that have not been listed elsewhere.

Summary Budget – Other line item category

Enter the total amount of Other category line items

Detailed Budget – Other line item category

Itemize each type of expenditure

Line Item Justification

Provide a brief justification for all items listed in the Detailed Budget - Other category. If applicable, identify the dollar amount of Housing Award funds and how the proposed item meets the criteria for the use of these funds (see Part 1, Section 5.3 for guidance on the use of former Housing Award funds).

K. Documentation of and Justification for the Use of Funds for Priority 3 Activities

Local health jurisdictions should prioritize TB control activities toward meeting and maintaining the Centers for Disease Control and Prevention's (CDC) Priorities 1 and 2 before directing local assistance funding toward Priority 3. (See Part 1, Section 5.1 of this manual)

In order to receive approval for Local Assistance Award dollars to be directed toward Priority 3, LHJs should ensure that:

- Patients evaluated as part of a designated target population who are identified with latent TB infection (LTBI) are appropriately treated, that a program is established to ensure completion of treatment for LBTI, and
- Demonstrate that the local health jurisdiction has met the CDC objectives for Priority 1 and 2, and can sustain these activities while implementing Priority 3.

Prepare a separate line item justification, entitled Priority 3, for all funds directed toward Priority 3 activities. The following information is required:

- For all applicable line items, identify the amount of the FTE budgeted that will be dedicated toward these activities
- A statement that the jurisdiction will continue to maintain Priority 1 and 2 activities
- A description of the population to be targeted for testing and to be treated for LTBI
- A description of the methods for collecting and analyzing testing and treatment data
- A description of the personnel resources available to ensure that the patients identified for treatment complete therapy

L. Designation of a Correctional Liaison

Ensuring the continuity of care of TB patients who transfer between correctional facilities and the community is a high priority for TB control in California. Each jurisdiction should identify its needs and determine those duties that are most appropriate for their Correctional Liaison. Use the CDPH-CTCA jointly approved duty statement for a Correctional Liaison[22] to determine these duties.

The designee may be your jurisdiction's Correctional Liaison identified in the CTCA Directory,[23] or you may choose to designate someone else.

To identify the designee in your application package:

- If this position is supported through local assistance subvention funds, then include the following statement in the line item justification: "Fulfills the Duties of a Correctional Liaison"
- If the Correctional Liaison is supported through other funds, then indicate in the cover letter included with the submission of your budget the name and position classification of the staff member responsible for fulfilling these duties.

2. Managing Your Base Award

2.1 Reimbursement Procedures for Base Award Expenditures

A. Submitting Base Award Invoices

Note: No invoices will be processed for the new fiscal year if there are outstanding invoices from the previous year or if there are unresolved stipulations from the Letter of Award. Also, a signed Acceptance of Award must be on file with the CDPH TBCB.

1. To facilitate timely reimbursement, use the sample invoice format and include:
   - Award period
   - Billing period
   - Total amount to be reimbursed

[22] The joint CTCA-CDPH Health Department Tuberculosis Correctional Liaison Duty Statement can be found at: http://www.cdph.ca.gov/programs/tb/Documents/TBCB-Special%20Populations-Health%20Department%20Tuberculosis%20Correctional%20Liaison%20Duty%20Statement.pdf

[23] The CTCA Directory can be found at: http://www.ctca.org/programs/index.html

- Amount to be reimbursed by line item
- Contractual line item expenditures detailed on a separate page
- For equipment expenditures, attach evidence of payment purchase, e.g., official county purchase order, and a brief description of the item(s) purchased. When possible, include make and model number.
- In the Supplies line item, expenditures for anti-TB medications must be listed as a separate item (e.g., anti-TB medications $500)
- Personnel and other line item expenditures for Priority 3 activities must be listed separately

2. Submit a signed original invoice on the Contractor's letterhead. The official signature(s) must be in blue ink. Please ensure that the invoices reflect the Richmond mailing address for the State TB Branch.

3. Invoice Due Dates and Requests for Extensions

Quarter	Period Covered	Due Date
First	July 1 through September 30	November 15
Second	October 1 through December 31	February 15
Third	January 1 through March 31	May 16
Fourth	April 1 through June 30	August 15

Invoices must be postmarked by the quarterly due date. If an invoice will not be postmarked by the quarterly due date, the LHJ is required to contact the CDPH TBCB Fiscal Analyst to request an extension. Extensions may be granted for up to two weeks past the invoice due date by telephone. Requests for longer extensions must be submitted in writing (letter, fax or e-mail) by the invoice due date with an explanation of the barriers to timely submission. Requests for longer extensions may not be granted if fiscal closeout will be delayed. LHJs that are granted extensions must submit a "not to exceed" amount by the last business day in February and August. Fiscal closeout begins on the first business day of March and September of each fiscal year.

2.2 Budget Revisions

A. Budget Revision Process

1. General Policies

The CDPH TBCB must grant written approval of modified budget requests. No reimbursements can be made for revised budget expenses until approval has been granted.

The CDPH TBCB ***does not*** give verbal approval for budget revisions.

2. Requesting a Budget Revision

A. General Requirements

- Submit the Budget Revision Request form,[24] a revised Summary Budget, Detailed Budget, and line item justification to the CDPH TBCB Fiscal Analyst at least four weeks prior to the date of the proposed expenditure. Budget revision requests that are not submitted on the Budget Revision form will be returned. Additional information may be requested.

- Before preparing the budget revision, review the list of Allowable Expenditures (see Table 2).

B. Completing the Proposal

- Include a complete narrative justification for each revised line item. The justification should clearly describe how each proposed revision to the approved budget would enhance the TB program's ability to achieve stated Priority 1 and 2 goals.

- The following items, when appropriate, must be included when submitting revisions to the Personnel line item:

  - Itemized salary savings for each benefited and non-benefited personnel line item
  - For changes in employment status, include the employee's title, start date, and termination date (when applicable) in the justification section.
  - A revised Personnel Matrix
  - All required signatures

3. Notification of Action Taken on a Budget Revision Request

A copy of the approved or disapproved request will be e-mailed or faxed to the contact person listed on the budget revision form, or on the cover letter accompanying the request, if different than the contact person listed on the form.

[24] The Budget Revision Request form can be found at: http://www.cdph.ca.gov/programs/tb/Documents/TBCB-PPMBud-Budget-Revision-Request.doc

2.3 Required Forms Submitted with Acceptance of Award

- Drug-Free Workplace Certification
- Certification Regarding Lobbying
- Disclosure of Lobbying Activities
- Darfur Contracting Act

2.4 Additional Required Forms

- Current Contract Year Equipment Purchased with State Funds – this form will be provided to those Contractors making approved equipment purchases. Submit with final invoice.
- Contractor's Release for All Contracts – This form is provided at the end of the fiscal year. Submit once the final payment has been received for all invoices.

3. Reimbursement for Food, Shelter, Incentives and Enablers (FSIE)

3.1 Submitting Invoices for Reimbursement from an FSIE Allotment

1. To facilitate timely reimbursement, use the FSIE sample invoice format[25] and include the following information:
   - Total amount to be reimbursed
   - Amount to be reimbursed by line item
   - Shelter: By patient, include the RVCT and/or suspect ID number, location, cost per day, number of days, and total cost. ***Please do not submit with patient identifiers, such as name, address, or birth date.***
   - If the patient received DOT during the time housing was provided
   - Food items, meals, incentives, enablers: Itemize and cross-foot, e.g., 20 personal hygiene kits @ $3.50, total $70; 100 bus vouchers @ $1.00, total $100; 50 McDonald's coupons @ $3.00, total $150.

   Note: It is not necessary to submit evidence of purchase for food, shelter, incentives and enablers; however, LHJs are required to maintain documentation of these expenditures. Please contact CDPH

[25] The FSIE sample invoice can be found at: http://www.cdph.ca.gov/programs/tb/Documents/TBCB-PPMBud-Food-Shelter-Incentives-Enablers-Invoice.doc

TBCB Fiscal Analyst for more information regarding record retention requirements

2. Submit a signed original invoice on the Contractor's letterhead. The official signature(s) must be in blue ink

3. FSIE Invoice Due Dates and Requests for Extensions

Invoices should be submitted quarterly on the same schedule as Base Award invoices:

Quarter	Period Covered	Due Date
First	July 1 through September 30	November 15
Second	October 1 through December 31	February 15
Third	January 1 through March 31	May 16
Fourth	April 1 through June 30	August 15

Invoices must be postmarked by the quarterly due date. If an invoice will not be postmarked by the quarterly due date, the LHJ is required to contact the CDPH TBCB Fiscal Analyst , in advance, to request an extension. Extensions may be granted for up to two weeks past the invoice due date by telephone. Requests for longer extensions must be submitted in writing (letter, fax or e-mail) by the invoice due date with an explanation of the barriers to timely submission. Requests for longer extensions may not be granted if fiscal closeout will be delayed. LHJs that are granted an extension must submit a "not to exceed amount" by the last business day in February and August. Fiscal closeout begins on the first business day of March and September of each fiscal year.

Important: 4th quarter invoices are due 45 days following the end of the quarter (August 15 for the 4th quarter). Requests for extensions will be granted through the last business day in August. The CDPH TBCB Resources Planning and Management Section will review the balance of unexpended FSIE funds and re-distribute these funds to jurisdictions that have requested additional funds. By failing to contact the CDPH TBCB Fiscal Analyst to request an extension, and submitting an invoice after the last business day in August, jurisdictions may not receive full payment of the invoiced amount.

3.2 Process for Requesting and Invoicing for Reimbursement for FSIE Expenditures for Local Health Jurisdictions with no Designated Allotment

Funds for the provision of food, shelter, incentives and enablers in accordance with the criteria described in Part 1, Sections 6.2 and 6.4, are available with prior approval from the CDPH TBCB to local health jurisdictions that have not received an allotment. Follow this process to request funds:

1. Contact the CDPH TBCB Fiscal Analyst to discuss your request. The initial contact may be by telephone, but must be followed by a written request (letter or email).

2. Upon approval, the LHJ will receive written verification of the approved amount and be instructed to submit an invoice or invoices not to exceed that amount. Use the FSIE sample invoice[25] format and include the information described in Part 2, Section 3.1 of this manual, as appropriate. Or, request a sample invoice from the CDPH TBCB Fiscal Analyst.

3. Reimbursement is for expenditures made in arrears. Do not include projected expenses on your invoice.

Note: Reimbursement is contingent on availability of sufficient FSIE funds.

3.3 Process for Requesting and Invoicing Additional FSIE Funds – LHJs with Designated Allotments

- Requests for additional funds should be submitted in writing (by letter or e-mail) to the CDPH TBCB Fiscal Analyst as soon as the need has been identified.

- Requests must be in accordance with the use of these funds as described in Part I, Sections 6.2 and 6.3. .

- Invoices should be submitted on the same quarterly schedule and format as described in Part 2, Section 3.1 of this manual. Expenditures invoiced must have occurred within the invoicing period.

- Submit a separate invoice for expenditures exceeding the original allotment.

- Example: An LHJ's allotment is $20,000. In the 3rd quarter the LHJ exceeds the allotment and requests additional funds. Two invoices should be submitted for the 3rd quarter. One invoice should zero out

the balance of the allotment. The second invoice should include additional expenditures within the 3rd quarter.

- The closing date for submitting invoices with expenditures above a local health jurisdiction's FSIE allotment is August 31 of the fiscal year following the award period (e.g., August 31, 2011 for the award period of July 1, 2010 – June 30, 2011). Invoices postmarked after August 31 will not be considered for reimbursement unless the local health jurisdiction has received approval for an extension from the CDPH TBCB Fiscal Analyst.

4. Reimbursement for Civil Detention of Persistently Non-Adherent Tuberculosis Patients

4.1 Requesting Approval and Required Documentation for Reimbursement for Civil Detention

Refer to "Procedure for Requesting Reimbursement for Civil Detention for a Persistently Non-Adherent Tuberculosis Patient"[20] for a complete description of this process and required documentation.

For assistance in completing the required documentation, refer to the CDPH-CTCA "Joint Guidelines for the Civil Detention of Persistently Non-Adherent Tuberculosis Patients in California"[26]

Local health jurisdictions must use one of the following options in order to be eligible for reimbursement.

Option 1 (The CDPH TBCB recommends the use of this option)

1. Prior to the detention:
   - Contact your assigned CDPH TBCB Program Liaison
   - Submit a completed "Request for Reimbursement of Civil Detention of a Persistently Non-Adherent Tuberculosis Patient"[27] form along with the required documentation.
2. Requests for reimbursement will be approved or denied by the CDPH TBCB Civil Detention Coordinator and faxed back to the requesting local health jurisdiction.

[26] The "Joint Guidelines for the Civil Detention of Persistently Non-Adherent Tuberculosis Patients in California" can be found at: http://www.ctca.org/guidelines/IIB4cdetention.pdf
[27] The "Request for Reimbursement of Civil Detention of a Persistently Non-Adherent Tuberculosis Patient" form can be found at:

Option 2

1. Within 5 working days of the day the detention began, the local health jurisdiction must submit a completed "Request for Reimbursement of Civil Detention of a Persistently Non-Adherent Tuberculosis Patient"[27] form along with required documentation.

2. Requests for reimbursement will be approved or denied by the CDPH TBCB Civil Detention Coordinator and faxed back to the requesting local health jurisdiction within 5 working days of receipt of the request.

Please remember that if a request for reimbursement is denied by the CDPH TBCB, the local health jurisdiction is financially responsible for the detention.

4.2 Invoicing for Civil Detention

Prior to submitting an invoice to the CDPH TBCB, LHJs must seek third party payer reimbursement for all eligible services and expenses for all eligible detainees. Invoices may be submitted once the detention is approved and expenses have been incurred. Proof of denial of third party payer reimbursement or proof of denial of an application for health benefits must be submitted as soon as possible, but no later than 45 days past the end of the fiscal year (August 15).

Use the CDPH TBCB civil detention invoice template form[28] for invoicing. The invoice must include the authorized original signature(s) in blue ink. Final invoices for each fiscal year are due no later than 45 days past the end of the fiscal year (August 15).

4.3 Detention Release Date Information

Within 5 working days of the detention release date, the local health jurisdiction will fax the release date to the CDPH TBCB Civil Detention Coordinator.

4.4 CDPH TBCB Civil Detention Coordinator

Jan Young, R.N., M.S.N., Chief, Program Development Section may be reached at (510) 620-3029 or via e-mail at Jan.Young@cdph.ca.gov.

[28] The civil detention invoice template can be found at: http://www.cdph.ca.gov/programs/tb/Documents/TBCB-PPMBud-Civil-Detention-Program-Invoice.doc

Menu of Suggested Provisions For State Tuberculosis Prevention and Control Laws

VI. Protection of Individual Rights

A. Due Process

Descriptive Note: The due process clause of the Fourteenth Amendment to the U.S. Constitution prohibits state governments from depriving individuals of life, liberty, or property without due process of law. Due process has both substantive and procedural components. "Substantive due process" generally requires the government to have adequate justification for implementing laws or taking other official actions that deprive individuals of life, liberty, or property. "Procedural due process" requires the government to use fair and reasonable procedures when restraining a person's liberty. Notice and an opportunity to be heard are among the most fundamental procedures that must be available. The disease control measures described above – examination, isolation, confinement, treatment, etc. – potentially implicate liberty interests protected by the due process clause. Due process is incorporated into many state laws relating to TB prevention and control, including those in this Menu, and states therefore may not have "separate" provisions addressing due process. This section contains examples of existing laws that address due process. The first bullet is a good example of substantive due process because the justification and due process measures that must be taken increase with the level of restriction – in this case, detention. The provision also accounts for procedural due process, with specific requirements on what must be provided in the notice to the patient, and hearing requirements. The second provision below is a concise summary of procedural due process requirements concerning hearings conducted pursuant to the state's TB control regulations. See Appendix A for more on due process as it relates to TB prevention and control.

- An order of the health officer pursuant to [regulation authorizing administrative order for disease control measures] shall set forth:
  - The legal authority under which the order is issued, including the particular sections of this Article or other law or regulation;
  - An individualized assessment of the person's circumstances and/or behavior constituting the basis for the issuance of such orders;
  - The less restrictive treatment alternatives that were attempted and were unsuccessful and/or the less restrictive treatment alternatives that were considered and rejected, and the reasons such alternatives were rejected.

  In addition, an order for the removal and detention of a person shall:

  - Include the purpose of the detention;
  - Advise the person being detained that he or she has the right to request release from detention by contacting a person designated on the health officer's order at a telephone number stated on such order, and that the detention shall not continue for more than five (5) business days after such request in the absence of a court order authorizing such detention;
  - Advise the person being detained that, whether or not he or she requests release from detention, the health officer must obtain a court order authorizing detention within sixty (60) days following the commencement of detention and thereafter must further

seek court review of the detention within ninety (90) days of such court order and within ninety (90) days of each subsequent court review;
- Advise the person being detained that he or she has the right to arrange to be represented by counsel or to have counsel provided, and that if he or she chooses to have counsel provided, that such counsel will be notified that the person has requested legal representation;
- Be accompanied by a separate notice which shall include but not be limited to the following additional information: 1) that the person being detained has the right to request release from detention by contacting a person designated on the health officer's order at a telephone number stated on such order, and that the detention shall not continue for more than five (5) business days after such request in the absence of a court order authorizing such detention; 2) that he or she has the right to arrange to be advised and represented by counsel or to have counsel provided, and that if he or she chooses to have counsel provided, that such counsel will be notified that the person has requested legal representation; and 3) that he or she may supply the addresses and/or telephone numbers of friends and/or relatives to receive notification of the person's detention, and that the Department shall, at the patient's request, provide notice to a reasonable number of such people that the person is being detained. New York, N.Y., 24RCNY Health Code § 11.21 (2009).

- At any hearing conducted pursuant to [TB control regulations], a person shall have the following due process rights:
  - Written notice detailing the grounds and underlying facts of the matter;
  - The right to have counsel present at the hearing and, if indigent, the right to appointed counsel; and
  - The right to be present at a court hearing, to cross examine, and to present witnesses, which rights may be exercised through telecommunication technology. N.J. Admin. Code § 8:57-5.15 (2009).

B. Religious Exemptions

Descriptive Note: In addition to federal and state constitutional provisions and case law interpreting the First Amendment's free exercise clause, some states have enacted statutory religious exemptions to treatment, examination, or both to protect the religious interests of patients with TB. The statutory religious exemptions below allow patients with TB who rely on spiritual means or prayer for healing to do so while protecting the public's health because the patient is required to adhere to isolation. In practice, the burden is generally on the patient to demonstrate good faith belief in his/her particular religion, and the health department may require documentation in support of that belief.

- Any person who depends exclusively on prayer for healing in accordance with the teachings of any well-recognized religious sect, denomination, or organization, and claims exemptions on such grounds, shall nevertheless be subject to examination, and the provisions of [state TB control statutory provisions] regarding compulsory reporting of communicable diseases and isolations shall apply where there is probable cause to suspect that such person has active tuberculosis. Such person shall not be required to submit to any medical treatment or to go to or be confined in a hospital or other medical institution if the person can safely be isolated in the person's own home or other suitable place of the person's choice. Colo. Rev. Stat. § 25-4-506 (2009).

- The [health official] or a health officer may not require an individual to have a physical examination, other than a chest X ray and to render sputum samples. The [health official] or a health officer may not restrict the right of the individual to select a treatment method, if the individual: (1) In good faith relies on spiritual means through prayer for healing; and

(2) Complies with the laws, rules, and regulations that relate to sanitation for and isolation of infectious, contagious, and communicable diseases. Md. Code Ann., Health-Gen. § 18-324 (LexisNexis 2009).

- A [person who has or who based upon reasonable grounds is suspected of having active tuberculosis] is not required to undergo treatment under this article if that person depends exclusively on prayer or spiritual means for healing in accordance with the tenets and practices of a recognized church or religious denomination and claims an exemption on that ground. The requirements of this article regarding compulsory reporting of tuberculosis disease, exclusion from employment or school, monitoring, examination, and isolation apply if there is clear and convincing evidence that the person is a [person who has or who based upon reasonable grounds is suspected of having active tuberculosis] and is a substantial danger to another person or the community. Ariz. Rev. Stat. § 36-734 (LexisNexis 2009).

C. Confidentiality

Descriptive Note: Public health authorities that are also covered entities under the Health Insurance Portability and Accountability Act of 1996 (HIPAA) (Public Law 104-191) must comply with the requirements of the Privacy Rule, but HIPAA does not apply to all situations that TB programs and their legal counsel may face concerning patient confidentiality. The provisions in this section are examples of laws that some states have enacted or promulgated to address confidentiality, from use of a pseudonym to allowing patient information to be used for research purposes.

- Except as otherwise provided by law, all records kept by the department and by local public health agencies and all records retained in a county coroner's office in accordance with [regulation concerning retention of death certificate in county coroner's office], as a result of the investigation of tuberculosis shall be kept strictly confidential and shall only be shared to the extent necessary for the investigation, treatment, control, and prevention of tuberculosis; except that every effort shall be made to limit disclosure of personal identifying information to the minimal amount necessary to accomplish the public health purpose. Colo. Rev. Stat. § 25-4-511 (2009).
- When requesting an order from a circuit court under the provisions of [state TB control provisions], the department shall substitute a pseudonym for the true name of the person to whom the order pertains. The actual name of the person shall be revealed to the court only in camera, and the court shall seal such name from further revelation. All court decisions, orders, petitions, and other formal documents shall be styled in a manner to protect the name of the person from public disclosure. The department, its authorized representatives, the court, and other parties to the lawsuit shall not reveal the name of any person subject to these proceedings except as permitted in [state confidentiality provision]. Such information is exempt from [state public records provision]. Fla. Stat. Ann. § 392.545 (LexisNexis 2009).
- Patient medical information or information concerning reportable events pursuant to any section of this subchapter shall not be disclosed except under the following circumstances:
  - For research purposes, provided that the study is reviewed and approved by the applicable Institutional Review Board, and is done in a manner that does not identify any person, either by name or other identifying data element;
  - With written consent of the person identified;
  - When the [public health official], or his or her designee, determines that such disclosure is necessary to enforce public health laws or to protect the life or health of a named party, in accordance with applicable State and Federal laws; or
  - Pursuant to a valid court order. N.J. Admin. Code § 8:57-5.17 (2009).
- Information regarding communicable or reportable disease confidential – Exceptions

- 1) Information collected pursuant to this chapter in the possession of the department or local health departments relating to an individual who has or is suspected of having a disease designated by the department as a communicable or reportable disease under this chapter shall be held by the department and local health departments as strictly confidential. The department and local health departments may not release or make public that information upon subpoena, search warrant, discovery proceedings, or otherwise, except as provided by this section.
- 2) The information described in Subsection 1) may be released by the department or local health departments only in accordance with the requirements of this chapter and as follows:
  - Specific medical or epidemiological information may be released with the written consent of the individual identified in that information or, if that individual is deceased, his next-of-kin;
  - Specific medical or epidemiological information may be released to medical personnel or peace officers in a medical emergency, as determined by the department in accordance with guidelines it has established, only to the extent necessary to protect the health or life of the individual identified in the information, or of the attending medical personnel or law enforcement or public safety officers;
  - Specific medical or epidemiological information may be released to authorized personnel within the department, local health departments, official health agencies in other states, the United States Public Health Service, the Centers for Disease Control and Prevention (CDC), or when necessary to continue patient services or to undertake public health efforts to interrupt the transmission of disease;
  - If the individual identified in the information is under the age of 18, the information may be released to the Division of Child and Family Services within the Department of Human Services in accordance with [state law]. If that information is required in a court proceeding involving child abuse or sexual abuse under [state law], the information shall be disclosed in camera and sealed by the court upon conclusion of the proceedings;
  - Specific medical or epidemiological information may be released to authorized personnel in the department or in local health departments, and to the courts, to carry out the provisions of this title, and rules adopted by the department in accordance with this title;
  - Specific medical or epidemiological information may be released to blood banks, organ and tissue banks, and similar institutions for the purpose of identifying individuals with communicable diseases. The department may, by rule, designate the diseases about which information may be disclosed under this subsection, and may choose to release the name of an infected individual to those organizations without disclosing the specific disease;
  - Specific medical or epidemiological information may be released in such a way that no individual is identifiable;
  - Specific medical or epidemiological information may be released to a "health care provider" as defined [under state law], health care personnel, and public health personnel who have a legitimate need to have access to the information in order to assist the patient, or to protect the health of others closely associated with the patient. This subsection does not create a duty to warn third parties, but is intended only to aid health care providers in their treatment and containment of infectious disease; and
  - Specific medical or epidemiological information regarding a health care provider, as defined [under state law], may be released to the department, the appropriate local health department, and the Division of Occupational and Professional Licensing within the Department of Commerce, if the identified health care

provider is endangering the safety or life of any individual by his continued practice of health care. Utah Code Ann. § 26-6-27 (LexisNexis 2009).

- In the event a [person with tuberculosis who] poses a health threat to others uses interstate or international flight to avoid treatment and/or isolation in [State], such individual shall be deemed to have waived confidentiality as to his health status, and [State] health authorities can contact health authorities in the jurisdiction to which the individual fled regarding the health threat presented by the [person with tuberculosis]. Tenn. Comp. R. & Regs. 1200-14-4-.03 (2009).

STATE OF CALIFORNIA

PETE WILSON, *Governor*

DEPARTMENT OF FINANCE
OFFICE OF THE DIRECTOR
STATE CAPITOL, ROOM 1145
SACRAMENTO, CA 95814-4998

AUG 2 3 1993

AUG 3 0 1993

Honorable Mike Gotch
Member of the Assembly
State Capitol, Room 3120
Sacramento, CA 95814

Dear Assemblyman Gotch:

Our office has reviewed AB 803, and on the basis of our attached analysis of available information, our position is currently "Neutral, note concerns." As discussed in the analysis, we do have some concern with provisions of your legislation which you may wish to consider.

If you have any questions, please call me at 445-9862 and we will arrange any assistance necessary.

Sincerely,

Duane M. Cummins

DEPARTMENT OF FINANCE BILL ANALYSIS

AMENDMENT DATE: August 18, 1993
POSITION: NEUTRAL, NOTE CONCERNS
SPONSOR: Health Officers Association of CA

BILL NUMBER: AB 803
AUTHOR: Gotch

BILL SUMMARY

This measure would make various changes to the Health and Safety Code related to the control of tuberculosis (TB).

FISCAL SUMMARY

Code/Department Agency or Revenue Type	SO LA CO RV	PROP 98	(Fiscal Impact by Fiscal Year) (Dollars in Thousands) FC 1993-94	FC 1994-95	FC 1995-96	Code Fund
4260/DHS	SO	No	----------No Fiscal Impact----------			001/GF
5240/Corrections	SO	No	----------Indeterminable----------			001/GF
5460/Yth Authority	SO	No	----------Indeterminable----------			001/GF

COMMENTS

While the intent of this measure has merit, we are concerned that this bill could result in substantial litigation costs (personal liberty claims) as well as increased inmate/ward housing costs to the Department of Corrections due to extended lengths-of-stay in state prison facilities.

SUMMARY OF CHANGES

Amendments to this bill since our last analysis of the April 15 version include the following significant amendment which partially addresses one of our prior concerns:

- appears to confront jurisdictional and/or technical problems concerning the Department of Health Services (DHS) and the Department of Corrections.

BILL ANALYSIS Form DF-43 (Rev 03/92 Buff)

AB803.MDA

BILL ANALYSIS/ENROLLED BILL REPORT--(CONTINUED) Form DF-43

AUTHOR	AMENDMENT DATE	BILL NUMBER
Gotch	August 18, 1993	AB 803

ANALYSIS

A. Specific Findings

Specifically, this bill would strengthen the control of TB by: 1) allowing the Director of Health Services or health officers to order examinations for TB of "high risk" individuals (as specified) for directing preventive measures; 2) ordering health or correctional facilities not to discharge individuals suspected of having active TB until a health officer approves a written treatment plan and the local health officer has been notified; 3) requiring health care providers to notify the local health officer that individuals are likely to have active TB, or that infected individuals have ceased treatment for TB; 4) directing providers to examine or refer household contacts for review; 5) allowing health officers to issue any orders, excluding involuntary medical treatment and subject to a court order and procedures (as stipulated), he or she deems necessary to protect the public health; 6) making it a misdemeanor for failing to comply with a health officer's order in the interest of protecting the public health; 7) designating the DHS as the lead agency for TB control and prevention activities at the state level; and 8) repealing current law which would be superseded by this proposal and specifies the duties of health officers.

This bill would require that an inmate who is suspected of having or known to have active TB be kept in an institution and not discharged or transferred to any other facility without prior notification and provision of an individualized treatment plan to the health officer of the jurisdiction where the inmate is to be transferred or released. While most such plans and notifications could presumably be completed in a timely manner, even a short delay in an inmate's release could result in significant litigation regarding constitutional issues.

B. Fiscal Analysis

The DHS advises (and we concur) that the bill would contain no fiscal impact on the department, even though the bill would designate the DHS as the lead agency (a role which the department currently has assumed) for TB issues.

The costs of this measure to the Department of Corrections and the California Youth Authority (CYA) are indeterminable but potentially significant because, this bill could result in substantial litigation costs as well as increased inmate/ward housing costs due to extended lengths-of-stay in state prison facilities. Further, the department advises that the potential costs (although indeterminable) to test staff and inmates, if required to do so at increased frequency by the Director of DHS or local health officers, could be significant.

Any local government costs resulting from the mandate in this measure would not be state-reimbursable, because the mandate only involves the definition of a crime or the penalty for conviction of a crime. It is recognized, however, that a local agency or school district may pursue any remedies to obtain reimbursement available to it under Chapter 4 (commencing with Section 17550) of the Government Code.

DEPARTMENT OF FINANCE BILL ANALYSIS

AMENDMENT DATE: August 9, 1994
POSITION: NEUTRAL
SPONSOR: HEALTH OFFICERS ASSOCIATION OF CALIFORNIA

BILL NUMBER: AB 804
AUTHOR: Gotch

DMS

BILL SUMMARY

This bill would clarify existing law by: a) allowing the transfer of tuberculosis (TB) patients, without prior approval of treatment plans, to a general acute care hospital when an immediate need for higher care is required, or from any health facility to a state correctional institution, b) requiring that treatment plans for patients being discharged from a health facility be reviewed by the local health officer within 24 hours from the time of receipt, and c) clarifying the local health officers authority to define "any appropriate facility" for confinement of TB patients convicted of violating local health officer orders for therapy, medication, etc.

FISCAL SUMMARY

Code/Department Agency or Revenue Type	SO LA CO RV	PROP 98	(Fiscal Impact by Fiscal Year) (Dollars in Thousands) FC 1994-95	FC 1995-96	FC 1996-97	Code Fund
4260/DHS			--------No/Minor Fiscal Impact----------			001/GF
5240/DOC			--------No/Minor Fiscal Impact----------			001/GF

COMMENTS

The Department of Health Services (DHS) advises that this measure provides technical clean-up to Chapter 676, Statutes of 1993 (AB 803, Gotch), which was intended to further the control of TB by making various procedural changes related to exposed individuals. Specifically, this bill would clarify and streamline responsibilities already being performed by local health officials.

The 1994 Budget Act contains a $17,418,000 Governor's Initiative to implement a strategic plan for the control and elimination of TB in California. This measure is consistent with the objectives of the Initiative.

The DHS and the Department of Corrections (DOC) advise, and we concur, that this bill would have no fiscal impact on either department.

This bill imposes a state-mandate by requiring local health officers to review treatment plans within 24 hours from the time they are received for TB patients being discharged from a health facility. California County of Local Health Officers (CCLHO) staff advises that this change would result in minor, if any, local costs since, under current law and practice, these treatment plans are reviewed in advance of all transfers, discharges and releases.

BILL ANALYSIS — Form DF-43 (Rev 03/92 Buff)

AB804.RWM

SUMMARY OF CHANGES

Amendments to this bill since our analysis of June 30, 1994 version include the following significant amendments which do not change our position:

- Clarifies and makes specific the notification and review of treatment plan requirements for TB patients.

ANALYSIS

A. Specific Findings

Existing law requires that the local health officer be notified before TB patients are discharged or paroled from health or correctional facilities, and when therapy ceases. In addition, current law requires prior health officer approval if the release is from a health facility.

The 1994 Budget Act contains a $17,418,000 Governor's Initiative to implement a strategic plan for the control and elimination of TB in California. The goals of the TB Initiative are to improve identification and reporting of all patients with TB disease; ensure that TB patients receive and complete early and appropriate treatment; prevent persons with TB infection from developing TB disease; develop, implement and evaluate measures to control TB transmission in high-risk settings; and improve education of health service providers, policy makers and communities at risk. The intent of this measure is consistent with the objectives of the Initiative.

This measure would clarify and streamline specified services currently being provided by local health officers.

B. Fiscal Analysis

The DHS and the DOC advise, and we concur, that this bill would have no fiscal impact on either department.

This bill imposes a state-mandate by requiring local health officers to review treatment plans within 24 hours, from when they are received, for TB patients being discharged from a health facility. Current law requires local health officers to review treatment plans prior to the release or transfer of TB patients from/between health and/or correctional facilities. CCLHO staff advises that this change would impose minor additional costs, if any, on local governments since these plans are, under current law and practice, reviewed prior to all transfers, discharges and releases.

April 15, 1993

Honorable Burt Margolin, Chairman
Assembly Health Committee
State Capitol
Sacramento, CA 95814

Dear Mr. Margolin:

The Health Officers Association of California (HOAC) is sponsoring AB 804 (Gotch) which is designed to develop appropriate health facility resources for the treatment of tuberculosis. Specifically, this legislation would require a cooperative effort between state departments and other organizations and agencies to develop housing facilities for homeless tuberculosis patients and facilities for respiratory isolation of certain persons with infectious tuberculosis. In addition, facilities would be developed for in-patient and out-patient care including treatment facilities for individuals who require legal orders of detention and for patients with complicated tuberculosis.

This legislation would also require the State Department of Health Services to develop the means for reimbursement of the services provided in the facilities described above.

Your support of this important measure will be greatly appreciated.

Sincerely,

Bruce Pomer, Legislative Consultant
Health Officers Association of California

The Honorable John Burton, Chair
Senate Judiciary Committee
State Capitol, Room 4074
Sacramento, CA 95814

Reference: **SB 362 (Maddy)**

CHA POSITION: **Support/Sponsor**

The California Healthcare Association is sponsoring SB 362 (Maddy), which would provide that no health facility that declines to discharge, release or transfer a person pursuant to existing law requiring that a person with active tuberculosis be detained, shall be civilly or criminally liable or subject to administrative sanction.

This measure is necessary to protect a health care facility from criminal or civil liability for detaining a person with active tuberculosis as required by existing law. Existing law prohibits a health facility from discharging, releasing or transferring anyone known to have TB unless notification and a written treatment plan have been received by the local health officer, and the health officer has approved this plan.

THE CHA RESPECTFULLY URGES AN AYE VOTE ON SB 362.

Sincerely,

George F. Cate
Legislative Advocate

HOAC

June 14, 2002

The Honorable Helen Thomson, Chair
Assembly Health Committee
State Capitol, Room 6005
Sacramento, CA 95814

Dear Assembly Member Thomson:

The Health Officers Association of California (HOAC), which represents the physician Health Officers in California's 58 counties, is a sponsor and strong supporter of SB 843 (Perata), also known as the Omnibus TB control Act of 2002, which will be heard in your Committee June 25.

The State Department of Health Services estimates that as many as 3.4 million Californians may now be infected (latent tuberculosis infection) with the bacteria that can cause active tuberculosis As many as 10 percent of these individuals (340,0000) could develop active tuberculosis, thus continuing the cycle of transmission.

Because persons who are infected have no symptoms, the only way to detect the infection is by a tuberculin skin test. To that end, SB 843 will allow any city or county health department to provide for the certification of tuberculin skin test technicians, who would be authorized (after successful completion of a local health department training program) to place and measure skin tests for tuberculosis for the local health department.

The current shortage of health professionals and budget constraints within local health departments limit the ability to reach and test significant portions of the population that may be infected with TB. The provisions of this bill will help to increase the number of persons qualified to administer these tests. This will enhance our ability to contact and treat more people thus preventing the spread of this disease to other sectors of the population.

Health Officers Association of California
1100 11th Street, Suite 321, Sacramento, CA 95814
Phone: (916) 441-7405 Fax: (916) 485-1532

It should be noted that the tuberculosis skin technician's role and function is extremely narrow and limited. It is authorized solely for public health tuberculosis workers assigned to local health departments and is not to be used in any other health care setting.

SB 843 also contains revisions to current statute that would require the local Health Officer to notify the assigned parole agent, when known, or the regional parole administrator when a person with active TB is released from a correctional institution. These provisions were added to SB 843 at the request of the State Department of Corrections and are supported by HOAC.

We appreciate your consideration of this important legislation which is designed to protect the health of California's citizenry by preventing the spread of such serious diseases as Tuberculosis.

Sincerely,

Bruce Pomer
Executive Director

Cc: Senator Don Perata

PUBLIC HEALTH INSTITUTE

TB and the Law Project

TB Control and the Law
Frequently Asked Questions on Civil Commitment

How does the law differentiate among active TB, infectious TB, and TB infection?	Health and Safety Code §120110:* Active TB occurs if either of the following occur: (a) A smear or culture taken from any source in the person's body has tested positive for TB and the person has not completed the appropriate prescribed course of medication for active TB; or (b) There is a radiographic, current clinical, or laboratory evidence sufficient to support a medical diagnosis of TB for which treatment is indicated. *Comment*: Active TB is not necessarily in an infectious state. §120115: Infectious TB means active or suspected active TB in an infectious state. §120115: Tuberculosis infection is the latent phase of TB during which the infected person cannot spread TB to others.
How does the law define directly observed therapy (DOT)?	§120115: Directly observed therapy means the appropriately prescribed course of medical treatment for TB in which the medications are administered to the person or taken by the person under direct observation of a health care provider or designee.
What are the mandatory duties of the California Department of Health Services (CDHS or the department) regarding communicable disease control?	§120125: CDHS shall examine into the cause of communicable diseases. §120130: CDHS shall establish a list of reportable diseases. The department may adopt and enforce regulations for isolation and quarantine. §121350: CDHS shall maintain a program for the control of TB. §121357: CDHS shall be the lead agency for all TB control and prevention activities at the state level. §121358(b): CDHS shall work with local health jurisdictions to identify

* All references are to the California Health and Safety Code unless otherwise specified.

	detention sites for persistently nonadherent TB patients. *Comment*: Mandatory duties are those that are *required* to be performed by the department.
What are the discretionary duties of the California Department of Health Services regarding communicable disease control?	§120135: CDHS may establish and maintain places of quarantine and isolation. §120140: When informed of a communicable disease, CDHS may take measures to ascertain the nature of the disease and to prevent its spread. The department may take possession of the body of a living person or corpse. §120142: The state director of CDHS may order examinations of persons in close contact with infectious TB patients and persons who are at heightened risk of TB. Orders of examination must be in writing. §120145: CDHS may quarantine, isolate, inspect, and disinfect persons, animals, houses, rooms, and other property whenever necessary to protect the public's health. §120150: CDHS may destroy property if disinfection is not safe and when the property is an imminent menace to public health. §121375: CDHS may have access to all records of all institutions and clinics. §121390: CDHS shall lease facilities it deems necessary to care for persons with active contagious TB who violate quarantine or detention orders as provided in §§120280 and 121365. §121450: CDHS may distribute an annual subvention to be used for TB control according to the standards and procedures set by the department. *Comment*: Discretionary duties are not *required* to be carried out by the health officer, but are performed using the best judgment of the health officer under the circumstances.
What are the mandatory duties of local health officers in TB control?	§121365: Local health officers must use every available means to ascertain the existence of, and immediately investigate, all reported or suspected cases of active TB in the jurisdiction, and to ascertain the sources of those infections. In carrying out investigations, health officers shall follow local rules and regulations, and those of the state health services department. *Comment*: The mandatory duty is to investigate suspected cases and to

	follow all rules as established by local or state law or CDHS. There is no mandatory duty to treat persons with TB (see below). §121365: If a health order has been violated, the health officer shall advise the district attorney in writing, and shall submit to the district attorney the information in his or her possession relating to the subject matter of the order and to the violation(s). *Comment*: Although a health officer is not required to issue health orders - even if a person is persistently nonadherent with examination or treatment guidelines (see below) - once a health order is issued, it becomes a mandatory duty of the health officer to report any violations of a health order to the district attorney.
What are the discretionary duties of local health officers in TB control?	§121365: The local health officer may issue any orders he or she deems necessary to protect the public health, and may make an application to a court to enforce those orders. *Comment*: Issuing health orders is a discretionary duty of health officers. Health officers enjoy broad authority to issue any order they deem necessary to protect public health. Health officers can ask courts to enforce health orders through injunctions (i.e., court orders to compel or desist action), fines, or other equitable relief. §121366: Health officers may detain a persistently nonadherent patient in a hospital or other appropriate place for examination or treatment.
What behaviors can health orders compel?	§121365: Health orders may include, but are not limited to: (a) An order authorizing the removal to, detention in, or admission into, a health facility or other treatment facility for the examination of active TB for a person who is unable or unwilling to submit to examination. (b) An order requiring a person who has active TB to complete medical treatment and follow infection control precautions. This section does not allow involuntary administration of medications. (c) An order requiring a person with active TB who is unable or unwilling to complete medication to follow a course of directly observed therapy. This section does not allow involuntary administration of medications. (d) An order authorizing the removal to, detention in, or admission into, a health facility or other treatment facility of a person if *both* are present: (1)The person has infectious TB or is substantially likely to have infectious TB; and (2) The local health officer finds that there is a substantial

	likelihood that the person may transmit TB because of the person's inadequate separation from others. (e) An order authorizing the removal to, detention in, or admission into, a health facility or other treatment facility of a person if *both* are present: (1)The person has active TB or has been reported to have active TB with no report that the person has completed prescribed medication; and (2) The local health officer finds that there is a substantial likelihood, based on the person's past or present behavior, that the person cannot be relied upon to participate in or complete medical treatment and follow infection control precautions. (f) An order for exclusion from the workplace or any other place the Health officer deems inadequate to protect against the spread of TB. (g) An order for the isolation of persons with infections TB to their home until they are no longer deemed infectious. *Comment*: Again, these are discretionary duties and the authority of the health officer to issue health orders is not limited to the orders enumerated above.
What behavior indicates that a person is unlikely to be relied upon to complete medical treatment?	§121365(e)(2): The behavior may include, but is not limited to: refusal or failure to take medication, to keep appointments, to complete treatment, or to regard the infection control precautions. *Comment*: These behaviors provide the evidence that a health officer will need in order to enforce health orders against a person. This specific, individualized type of evidence is a hallmark of procedural due process.
Is a court order needed for civil detention for examination or treatment?	§121366: Health officers may detain a person in a hospital or other appropriate location for examination or treatment *without* a prior court order *except* if the person requests release (see below).
How long can a person be detained for examination or treatment?	§121366: A local health officer may detain a person in a hospital or other appropriate location for examination or treatment up to 60 days without a court order. A court order must be obtained to hold the person longer than 60 days. *However*, if at any time during detention, the person who is detained pursuant to §121365 (a), (d) or (e) requests release, the local health officer must make an application for a court order within 72 hours of the request. If the 72-hour period ends on a Saturday, Sunday or legal holiday, the request must be made by the end of the next business day.

	After a person's request for release, detention shall not continue for more than 5 business days in the absence of a court order. If a court order authorizes continued detention, a health officer must seek further court review of the detention within 90 days following the initial or subsequent court order allowing detention. In addition, the following limits on detention apply: §121368 (a): If a person is detained solely for examination under §12165(a), the person shall be detained no longer than the minimum period of time to make a medical determination of whether the person has active or infectious TB. §121368(b): If a person is detained for treatment for infectious TB under §121368(d), the person may be detained only until he or she is no longer infectious or until the health officer ascertains that the person can be adequately separated from others to prevent the transmission of TB to others. §121368(c): If a person is detained for treatment for active TB under §121365(e), the person may be detained only until he or she has completed medical treatment. *Comment*: This section of the statute interlaces discretionary and mandatory duties. It is discretionary whether a person with TB should be detained. However, once a person is detained, a series of mandatory obligations are triggered (e.g., court approval requirements and timelines) in order to ensure that procedural due process standards are met.
What information must all health orders contain?	§121367(a): All health orders, including orders for examination, treatment, directly observed therapy, detention, exclusion from work, isolation, or any other order issued by a health officer must include all of the following: (1) The legal authority and particular sections of state law or regulations under which the order is issued; (2) An individualized assessment of the person's circumstances or behavior constituting the basis for the issuance of the order. (3) The less restrictive treatment alternatives that were attempted and were unsuccessful, or that were considered and rejected with the reasons the alternatives were rejected. (4) The orders must be in writing and include the person's name, the time period the order will be in effect, the location, the payer source if known, and other terms and conditions necessary to protect the public health. A copy of the order must be served upon the person.

	Comment: Again, while issuing a health order is a discretionary act, if it is issued, it is mandatory that the health order include certain information. These mandates safeguard the due process rights of the person by requiring the government (i.e., health officer) to provide justification for his or her actions that have the potential to infringe upon the person's constitutional rights to privacy, bodily integrity, travel, etc.
What additional information must a detention order contain?	121367(b): In addition to the requirements that apply to the contents of all §121365 health orders, an order for detention shall do all of the following: (1) Include the purpose of the detention; (2) Advise the person that he or she has the right to request release from detention by contacting the health officer or designee at the number provided, and that the detention shall not continue for more than 5 days after the request in the absence of a court order authorizing detention; (3) Advise that the local health officer can only detain the person up to 60 days without a court order; and that that further court review is required within every 90 days thereafter; (4) Advise the person that he or she has the right to retain or be appointed counsel, and that the counsel shall be notified if the person chooses to obtain counsel; (5) Provide a separate notice stating at least that the person has the right to: a. request release from detention; b. counsel; and c. supply the addresses of telephone numbers of not more than 2 individuals to receive notification of the person's detention. *Comment*: Detention is one of the actions a health officer can take that most intrudes on a person's constitutional right to liberty. This section of the statute serves to protect a person's procedural due process rights by providing, for example, that the person is notified of his or her right to legal counsel and right to a review of the merits of a detention order by an impartial decision-maker. This section applies only to detention orders. Non-detention health orders (e.g., orders for examination, treatment, directly observed therapy, exclusion from work, and isolation) need not comply with §121367(b).

What must an application to a court for continued detention contain?	§121366: The health officer must prove the particularized circumstances constituting the necessity for the detention. The application must provide "clear and convincing" evidence. The application must also request an expedited hearing. *Comment*: "Clear and convincing evidence" means that the evidence must show a high probability that the person is unable or unwilling to abide by examination or treatment orders. It is a tough evidentiary standard. A court must have a firm belief or conviction as to the truth of an allegation.
What constitutes a "local detention facility?"	The term "local detention facility" has the same meaning in Health and Safety Code §120115(h) as it does in Penal Code §6031.4. Penal Code defines "local detention facility" to mean any city or county or regional facility used for the confinement of persons, excluding those portions of the facility used to confine minors. Penal Code §6031.4. It may include a private detention facility under contract with a city or county if it is responsible for the custody and control of a prisoner. Penal Code §§6031.4(c) and 6031.6. A local detention facility may include a locked ward in a county hospital if the hospital has a contract with a city or county to provide for the custody and control of a prisoner. A home used pursuant to home isolation would not be considered a local detention facility, as the owner of the home is not under contract with a city or county to provide for the custody and control of a prisoner.
Does a person who is civilly detained have a right to legal counsel?	§121366: Any person who is subject to a detention order has a right to be represented by counsel. Upon request of the person, counsel must be provided. *Comment:* The right to counsel is a hallmark of procedural due process.
Do health orders have to be in a native language?	§121369(a): For the purpose of health orders (§§121365 and 121367) and detention orders (§121366), language, visual, or hearing interpreters must be provided when necessary to ensure the person's understanding of the health order. *Comment:* The law does not require health orders to be written in a native language, so long as translators are provided. However, it would be prudent to supply written translations both to assure the patient's comprehension and to have hard evidence that the patient was duly notified of the contents of the order.

Can patients be forced to take medications?	§121369(b): The forcible administration of medications cannot occur without a court order.
What religious rights do patients have to refuse examination or treatment?	§121370: No examination or inspection shall be required of any person who depends exclusively upon prayer for healing in accordance with the teachings of any well recognized religion. However, the compulsory reporting of TB, and isolation and quarantine shall apply if there is probable cause to suspect the person is infected with the disease in the communicable stage. So long as the person can be quarantined or isolated in his or her home or other suitable place of his or her choice, he or she will not have to submit to medical treatment or be confined in a medical institution. *Comment:* A health officer might avoid an equal protection or First Amendment challenge by applying the religious exemption to a genuinely religious person regardless of whether the person seeking the exemption belongs to a "well recognized" religion.
What happens after detention?	§121361(a)(1): A health facility, a local detention facility, or a state correctional institution may not release persons known or reasonably believed to have active TB until a notification and written treatment plan has been received by the local health officer. §121361(a)(2): A person known or reasonably believed to have active TB may be discharged from a health facility only after notice is given to, and a reasonable treatment plan is approved by, the local health officer.
Can persons with active or infectious TB be detained in a jail or other correctional facility?	§121358: Individuals detained through the TB program shall not reside in a correctional facility. In *Souvannarath v. Hadden,* 95 Cal. App. 4th 1115 (2002), the court interpreted §121358 to mean that *civil detention* may not occur in a correctional facility. However, §121358 explicitly states that the statute "shall not be interpreted to prohibit the institutionalization of *criminals* with tuberculosis in correctional facilities."
What is the difference between a "state correctional institution," a "local detention facility," and a "penal institution?"	§120115(g) defines a "state correctional institution" to mean a prison, institution, or other facility under the jurisdiction of the Department of Corrections or the Department of the Youth Authority. §120115(h) defines a "local detention facility" to mean the same thing as provided in Penal Code §6031.4 (i.e., any city or county or regional facility used for the confinement of persons, excluding those portions of the facility used to confine minors). §120115(i) defines "penal institution" to mean either a state correctional institution or a local detention facility.

	Comment: Confusion arises when the operative provisions of the TB control statute do not use these terms exactly as defined. For example, §121358 prohibits the detention of persistently nonadherent patients in "correctional facilities." Does this mean a "state correctional institution," a "local detention facility," both, or something else entirely? The court in *Souvannarath v. Hadden,* 95 Cal. App. 4th 1115 (2002), interpreted §121358 to mean that persistently nonadherent TB patients may not be detained in a "jail." While the court did not define the term "jail," the court used the term as if it were synonymous with "correctional facility." Therefore, it is prudent to assume that the term "correctional facility" means any place where people are confined awaiting trial or serving short sentences (i.e., all of the facilities defined in §120115(g) (h) and (i)).
What is the difference between civil and criminal detention?	Civil detention is a non-criminal action taken by a government against a private individual in order to protect the individual from him/herself or others. It is authorized by §121366, which allows for detention in a hospital or other appropriate place for examination or treatment of individuals who violate written health orders. According to *Souvannarath v. Hadden,* 95 Cal. App. 4th 1115 (2002), a jail or prison (i.e., a penal institution or correctional facility) may not be used for civil detention. *Comment:* Criminal detention is a punitive action taken by a government against someone who has engaged in illegal activity, such as the violation of a health order issued pursuant to §121365. Criminal detention for violation of a TB-related health order is authorized by §120280. It allows detention in any appropriate facility, penal institution, or dwelling approved by the local health officer.
Does civil detention include detention in an unlocked or unsecured facility?	§121365 authorizes a health officer to issue an order for removal to, detention in, or admission into a health facility or other treatment facility. It is silent regarding whether these facilities should be locked and secured. Because §121365 provides only *examples* of the types of health orders a health officer may issue, a health officer has the discretion to determine whether or not the detention should be in a locked and secured facility. Furthermore, §121366 provides a health officer with summary enforcement authority to detain a person in a hospital or other appropriate place for treatment. This means the health officer can detain a person without a prior court order. Again, the statute is silent regarding whether the facility must be secured.

	While civil detention theoretically may include a detention in an unlocked or unsecured facility, the usefulness of such a detention order is questionable for a patient who already has demonstrated an unwillingness or inability to comply with voluntary health directives or less restrictive health orders such as directly observed therapy.
Are federal correctional facilities required to notify a health officer pursuant to §§121361 and 121362?	From a practical point of view, public health protection cannot be attained if federal facilities do not cooperate with fundamental TB control provisions as laid out in §§121361 and 121362. It is prudent of a health officer to have a memorandum of understanding with any federal facility within the health jurisdiction ensuring that the federal facility will abide by §§121361 and 121362. The memorandum of understanding is a contract that is legally enforceable.
Does an emergency room have to develop a treatment plan prior to releasing a patient known to have or suspected of having TB?	§121361(a)(1) prohibits a health facility from *discharging*, *releasing*, or *transferring* a patient known to have, or suspected of having, active TB until a notification and written treatment plan has been *received* by the local health officer. (Note that this section requires receipt by, but not approval of, the local health officer.) For the purposes of §121361(a), "health facility" is defined as "any facility, place, or building that is organized, maintained, and operated for the diagnosis, care, prevention, and treatment of human illness . . . to which the patients are admitted for a 24-hour stay or longer . . ." See §§ 120115(j) and 1250. Therefore, so long as an emergency room is part of a "health facility" as defined in the statute, it would be prudent for the emergency room to follow the requirements set forth in §121361(a)(1) that the facility give notification and a written treatment plan to the local health officer. It is probably irrelevant that a given patient was never admitted to the hospital.
Does an emergency room have to obtain approval from a local health officer before releasing a patient known to have or suspected of having TB?	§121361(a)(2) prohibits a health facility from *discharging* a patient known to have, or suspected of having, active TB until a written treatment plan has been *approved* by a local health officer. The local health officer must review all treatment plans submitted for approval within 24 hours of receiving the plans. Presumably, this subsection would apply only to patients who have been admitted to a hospital, and not to patients simply treated in and released from an emergency room.

PUBLIC HEALTH INSTITUTE

TB and the Law Project

California Tuberculosis Control Law*

James B. Simpson, J.D., M.P.H., Samantha Graff, J.D., and Marice Ashe, J.D., M.P.H.

Public health officials in California are re-examining their duties and responsibilities for tuberculosis (TB) control in light of recent litigation regarding the civil detention of a non-compliant TB patient in a county jail. The litigation concerned a monolingual Laotian immigrant, Hongkham Souvannarath, who was detained in a county jail due to noncompliance with TB-related health orders. Her incarceration involved a series of missteps by county officials who disregarded the state statutes governing civil detention and certain constitutional principles. Upon her release, Souvannarath filed two court cases. The first case cost the county $1.2 million in settlement funds,[1] and the second resulted in an appeals court opinion ordering the county to cease using the county jail as a civil detention site for persistently nonadherent TB patients.[2]

The Souvannarath litigation exemplifies the need for public health professionals to understand the statutory and constitutional limitations on their ability to manage individuals who decline to follow public health mandates. This paper responds to this need by summarizing the legal underpinnings of communicable disease control, describing California's statutory scheme for TB control, and pointing out some areas of uncertainty relating to the TB control statute. The intended audience is health officials and their legal counsel.

I. Legal basis for TB and other communicable disease control

Public health law rests on three basic concepts: the broad *powers* vested in public health officials, the *restraints* that the Constitution and other laws place on health officials, and the specific *duties* that public health officials are obliged to carry out.[3]

 This publication is an edited version of materials presented by the authors at the California Conference Of Local Health Officers Annual Meeting, May 1, 2003 Sacramento, California. Support was provided by the California Department of Health Services (CDHS), Tuberculosis Control Branch. The assistance of Sarah Royce, M.D., M.P.H., Chief, Tuberculosis Control Branch, CDHS and her staff in the preparation of this publication is gratefully acknowledged. The opinions expressed herein are those of the authors, and do not necessarily represent the official position of CDHS. The purpose of this publication is to provide general information. For legal advice, health officials should consult their agency's legal counsel.

Public health police power

The authority enjoyed by public health agencies and officials is grounded in the "police power" of the fifty states. The police power is the natural prerogative of sovereign governments to enact laws, promulgate regulations, and take action to protect, preserve, and promote public health, safety, and welfare. In the words of the California Supreme Court, "The preservation of the public health is universally conceded to be one of the duties devolving upon the state as a sovereignty, and whatever reasonably tends to preserve the public health is a subject upon which the legislature, within its police power, may take action."[4]

As a legal principle, the police power comes from common law—the tradition of judicial lawmaking that spans from medieval England to the present day. In political theory, it describes the conditions under which a sovereign government can legitimately intrude upon a person's autonomy, privacy, liberty, or property. The police power is an inherent authority of the states, and the states may delegate the police power to local governments. The California Constitution does so by declaring that "a county or city may make and enforce within its limits all local, police, sanitary, and other ordinances and regulations not in conflict with general laws."[5] Protecting the public from TB is an "archetypical expression of police power."[6] Police-power methods routinely used in TB control include compulsory testing, reporting, treatment, isolation, and detention.

Limits on the authority of public health officials

The police power does not give public health officials unlimited authority. The U.S. Constitution (and state constitutions) shield individuals from excessive government intrusion. The constitutional protections most frequently invoked to limit the exercise of the public health police power are described below.[7]

Constitutional right to substantive due process

The Due Process Clause of the Fifth and Fourteenth Amendments to the U.S. Constitution prohibits federal and state governments from depriving individuals of "life, liberty, or property without due process of law." Life and liberty refer to individual self-determination, while property refers to an individual's economic interests. Due process has substantive and procedural components.

Substantive due process means an individual's right to demand that the government have an adequate justification for laws or other official actions that affect life, liberty, or property. In order to assess the adequacy of the government's justification, a court will evaluate the relative importance of the individual and governmental interests at stake. The criteria become more demanding as the individual interest at stake becomes more significant.

[5] Cal. Const., Article 11, § 7.
[6] *Newark v. J.S.*, 652 A.2d 265, 271 (N.J. Super. Ct. Law Div. 1993).
[7] This section covers federal constitutional restraints. It does not address analogous restraints contained in the California Constitution.

Rational basis test

Courts use a "rational basis" test when the individual interest is considered routine. The rational basis test asks whether a law or other official action is "reasonably related to a legitimate government interest." This inquiry into means and ends is deferential to the judgment of public officials. It requires that the basis for legislative or other official action be plausible, but not necessarily persuasive. It further requires that there be a reasonable, but not necessarily close, relationship between the government's objective and the means chosen to accomplish it. In the public health field, the rational basis test is most often used to evaluate regulatory schemes that affect property rights, like health inspection and licensure laws. However, it has also been applied to communicable disease control measures in California.

> A convicted prostitute argued that a California law requiring that she undergo HIV testing violated substantive due process. The court applied the rational basis test on the grounds that drawing blood is a routine and minimal intrusion. The court held that the statute bore a reasonable relationship to the government's legitimate interest in preventing the spread of disease, since convicted prostitutes are at a high risk of contracting and spreading HIV. *April Love v. Superior Court.*[8]

Strict scrutiny test

At the opposite end of the spectrum from the rational basis test, a "strict scrutiny" test is used when "fundamental rights" are at stake. Fundamental rights include the right to freedom from physical confinement and to privacy in matters relating to marriage, procreation, contraception, family relationships and child rearing.[9] Under the strict scrutiny test, the court evaluates whether the government's action advances a "compelling state interest," and whether it is "narrowly tailored" in a way that represents the "least restrictive alternative." The strict scrutiny test ensures that a given law or government action is precisely targeted at a very serious problem and has a minimal impact on an individual's fundamental rights.

Courts generally apply strict scrutiny to public health measures that affect the right to freedom from confinement, such as isolation or quarantine. Courts are readily persuaded that the government has a compelling interest in controlling disease. In the words of one court, "The claim of 'disease' in a domestic setting has the same kind of power as the claim of 'national security' in matters relating to foreign policy. Both claims are very powerful arguments for executive action."[10] So, the key issue in these cases is usually whether the government has taken a sufficiently tailored approach and has selected the least restrictive alternative.

[8] 226 Cal. App. 3d 736 (1991); see also *Application of Halko*, 246 Cal. App. 2d 553 (1966) (upholding the isolation of TB patients).

[9] See, e.g., *Dunn v. Blumstein*, 405 U.S. 330, 338 (1972) (addressing the right to travel); *Planned Parenthood of Southeastern Penn. v. Casey*, 505 U.S. 833, 926 (1992) (addressing reproductive rights).

[10] *Newark v. J.S.*, 652 A.2d 265, 271 (N.J. Super. Ct. Law Div. 1993).

A New Jersey court used the strict scrutiny test in upholding a city's decision to seek the involuntary hospitalization of a persistently nonadherent active TB patient who was homeless. The city had a compelling interest ("hardly any state interest is higher than protecting its citizenry from disease"), and the patient's fundamental liberty interest was at stake ("hardly any individual interest is higher than the liberty interest of being free from confinement"). The court concluded that since the patient was homeless, involuntary hospitalization was the least restrictive alternative available to ensure that he would not spread TB. *Newark v. J.S.*[11]

Some courts have identified heightened liberty interests that may not be labeled fundamental but that call for something like strict scrutiny. Examples include the right to refuse medical care and to non-disclosure of personal medical information. When these rights are implicated, courts take a very close look at the law or government action.

In 1905, the U.S. Supreme Court ruled for the government after balancing a compulsory smallpox vaccination law against an individual's claim that the law was "hostile to the inherent right of every free man to care for his own body and health in such way as to him seems best." *Jacobson v. Massachusetts.*[12]

In 1900, the San Francisco Board of Health confined residents of Chinese descent to the city unless they submitted to a bubonic plague vaccination. A resident of Chinese descent sued in part on substantive due process grounds. The court recognized that the city had a strong interest in preventing the spread of disease. However, it struck down the vaccination order in part because the order was not appropriately tailored to solve the problem. The order applied widely to unexposed persons, rather than narrowly to persons quarantined on suspicion of disease. *Wong Wai v. Williamson.*[13]

A New York law required physicians to report to a computerized database the identities of patients who received prescriptions for schedule III drugs. The U.S. Supreme Court upheld the law, ruling that the state's interest in using the database to prevent illegal drug use justified the privacy intrusion, since disclosure of private medical information is "part of modern medical practice" and there were safeguards against redisclosure. *Whalen v. Roe.*[14]

Health officials do not have to remember all the details of substantive due process. However, they should be aware that they need a strong justification to intrude on a patient's freedom of movement, bodily integrity, or privacy, and they should make every effort to minimize the impact on personal liberty.

[14] 429 U.S. 589 (1977).

Constitutional right to procedural due process

"Procedural due process" has to do with the fairness of the procedures the government uses before depriving someone of life, liberty, or property. The basic concepts of procedural due process are prior notice of impending government action and a means to register objections. The specific procedures required in any given situation depend upon the individual interest at stake, the safeguards needed to avoid erroneous decisions, and the government's interest in efficient decisionmaking.[15]

Procedural due process jurisprudence underwent a revolution in the late twentieth century, when the judiciary was confronted with a flood of economic and social welfare regulation. The courts were generally deferential to the substantive policy determinations of the government. However, the courts remained mindful of their role as guarantors of individual rights, so they became increasingly rigorous in their evaluations of the procedures used by the government to implement policy. The involuntary detention of mentally ill persons was ground zero for the procedural due process revolution. In a series of decisions, the U.S. Supreme Court held that before mentally-ill persons can be civilly committed, they are entitled to a range of procedural due process guarantees, including legal representation and a hearing before an impartial decision-maker. Elements of procedural due process from mental health law have found their way into TB control law by both court decision and legislation.[16]

> A persistently nonadherent TB patient petitioned for release from involuntary detention. The West Virginia Supreme Court held that an infectious patient facing detention is entitled to similar procedural due process safeguards as someone with mental illness, including: (1) adequate written notice detailing the grounds and underlying facts on which commitment is sought; (2) the right to counsel; (3) the right to a hearing where they can cross-examine and present their own witnesses; (4) a standard of proof by clear, cogent, and convincing evidence; and (5) the right to a verbatim transcript of the proceedings for purposes of appeal. *Green v. Edwards.*[17]

A key issue in procedural due process jurisprudence is whether the government can restrict a person's life, liberty, or property before that person has an opportunity to be heard. Courts generally prohibit pre-hearing deprivations except under emergency conditions involving immediate danger to public health or safety.[18] However, the courts have been sympathetic to mental health and communicable disease control laws that provide for "summary confinement" (i.e., the involuntary confinement prior to receiving a court order) of persons considered dangerous to themselves or the community, as long as such persons are entitled to post-confinement hearings within a reasonable time.[19]

---

[15] See *Mathews v. Eldridge*, 424 U.S. 319 (1976); see also, *Machado v. State Water Resources Control Board*, 90 Cal. App. 4th 720 (2001) (finding that procedural due process did not require a hearing before the issuance of a wastewater abatement order).

[16] Arguably, disease control measures need not be as procedurally intensive, because mental health intervention carries a greater stigma, and communicable disease presents a more immediate risk to the community.

[17] 263 S.E.2d 661 (W.Va. 1980).

[18] See, e.g., *Phillips v. San Luis Obispo County Dept of Animal Regulation,* 183 Cal. App. 3d 372 (1986) (holding that an ordinance providing for the destruction of a dog without a prior hearing was unconstitutional, since there was no imminent risk to public safety).

[19] See, e.g., *Green v. Edwards,* 263 S.E.2d 661 (W.Va. 1980).

Another major issue is whether hearings must take place before a judge, or whether they may take place in an administrative hearing with the opportunity for subsequent judicial review. Although the courts have upheld administrative hearings in a variety of settings, mental health and communicable disease control laws usually provide for judicial proceedings.

Constitutional right to equal protection

The Equal Protection Clause of the Fifth and Fourteenth Amendments guarantees that similarly situated classes of people will be treated similarly by the government. In other words, equal protection means that the government cannot arbitrarily discriminate against a group of people just because they fall into a particular category. While due process focuses on individual rights, equal protection focuses on the rights of groups.

The tests used in the equal protection context are similar to those used in the substantive due process context. The rational basis test is applied when the government is not targeting a suspicious category (known in legal parlance as a "suspect classification").[20]

> A nineteen year old challenged a statute outlawing the purchase of alcoholic beverages by minors. The court applied the rational basis test since age is not a suspect classification. The court ruled that the statute did not deny minors equal protection because it was reasonably related to the state's legitimate interest in controlling youth alcohol abuse. *Gabree v. King.*[21]

Courts apply the strict scrutiny test when "suspect classifications" of race, national origin, or ethnicity are involved because "distinctions between citizens solely because of their ancestry are by their very nature odious to a free people whose institutions are founded upon the doctrine of equality."[22] Strict scrutiny in equal protection cases is basically the same as strict scrutiny in substantive due process cases. A court will examine whether a law or government action that discriminates on the basis race, national origin, or ethnicity is "narrowly tailored" to further a "compelling" state interest, or is the "least restrictive alternative" to achieving a "compelling" state interest. In the equal protection context, another way of assessing whether a law or government action is "narrowly tailored" or is the "least restrictive alternative" is to look at whether it is underinclusive (i.e., it singles out an ethnic or racial group when it should be targeting a more diverse group).

---

[20] An intermediate test, which considers whether the government's action is "substantially related to an important state interest," is used for classifications based on gender or legitimacy. See, e.g., *Mississippi University for Women v. Hogan*, 458, U.S. 718 (1982) (finding that a nursing school no-male admissions policy denied equal protection because it was not substantially related to an important state interest).

[21] 614 F.2d 1 (1st Cir. 1980).

[22] *Hirabayashi v. United States*, 320 U.S. 81, 100 (1943).

The San Francisco Board of Health quarantined the Chinatown district in response to reports that nine residents in one block had died of bubonic plague. Residents of Chinese descent were subject to the quarantine but others within the district were free to come and go. The court struck down the quarantine as a violation of equal protection. The quarantine was underinclusive in treating similarly situated people differently for no other reason than race. *Jew Ho v. Williamson.*[23]

Constitutional right to religious freedom

The "Free Exercise Clause" of the First Amendment (which applies to the states through the Fourteenth Amendment) provides that the federal and state governments shall make no laws that prohibit the free exercise of religion. The free exercise of religion means "the right to believe and profess whatever religious doctrine one desires" without government interference; however, the right of free exercise does not relieve an individual of the obligation to comply with a "valid and neutral law of general applicability on the ground that the law proscribes (or prescribes) conduct that his religion prescribes (or proscribes)."[24] In other words, a law does not infringe on an individual's right of free exercise if the law does not specifically target religious conduct, but it happens to have an impact on the individual's ability to practice the tenants of her religion. In the communicable disease field, individuals have invoked the Free Exercise Clause in protesting compulsory testing, vaccination, and treatment laws. Although many states grant limited religious exemptions from such laws, forcing individuals to follow the laws despite their religious beliefs would probably not violate the First Amendment.[25]

The state charged a mother with violating public-health oriented child labor laws by using her children to distribute religious literature. The U.S. Supreme Court ruled that the state had not infringed upon the mother's right of free exercise because the child labor laws were generally applicable and were not targeted at her religion. Analogizing to mandatory vaccination, the Court declared: "The right to practice religion freely does not include liberty to expose the community or the child to communicable disease or the latter to ill health or death." *Prince v. Massachusetts.* [26]

Constitutional right to freedom from cruel and unusual punishment

The Eighth Amendment of the U.S. Constitution prohibits "cruel and unusual punishment." Some courts have indicated that the Eighth Amendment applies to civil detention as well as criminal confinement.[27]

There have been numerous Eighth Amendment challenges to the adequacy of TB control efforts in correctional facilities. The courts have ruled that although prison authorities can be

---

[24] *Employment Div., Dept. of Human Resources of Oregon v. Smith*, 484 U.S. 872, 877 (1990).
[25] See Larry Gostin, Public Health Law: Power, Duty, Restraint 182 (2000).
[26] 321 U.S. 158, 166-67 (1944).
[27] See, e.g., *People v. Feagley*, 14 Cal.3d 338, 376 (1975) (finding that the confinement of a civilly committed, mentally disordered sex offender for an indefinite period in a prison setting violated the "cruel and unusual punishment" clauses of the California and U.S. Constitutions).

liable for failing to provide adequate medical care or a healthful, disease-free environment for prisoners, the standard of care demanded by the Eighth Amendment is minimal. Specifically, the government will be liable only if prison officials are "deliberately indifferent to serious medical needs."[28] Under this standard, a single instance of medical malpractice is not an Eighth Amendment violation, but a consistent pattern of negligent or reckless conduct may constitute a violation.[29] Several courts have also assessed whether compulsory TB testing and treatment in prisons violates the Eight Amendment. Inmates generally lose these cases.[30] It is worth noting that these cases are not directly relevant to the constitutionality of compulsory TB control measures for the general population, since prisoners have diminished liberty interests.

Constitutional right to freedom from unreasonable search and seizure

The Fourth Amendment prohibits the "unreasonable" search or seizure of a person's body, house, paper, or personal effects. Courts evaluate the reasonableness of a search by weighing the intrusion into individual privacy against the government's need for information. The courts have held that medical screening and testing programs involve searches subject to the Fourth Amendment's reasonableness requirement.[31] For example, taking a sputum sample pursuant to a compulsory examination order or requiring a skin test as a condition of public employment probably are considered searches.[32] That said, public health-related searches are almost always upheld.[33] Due to the relatively unobtrusive nature of TB testing and the importance of preventing the spread of a highly communicable disease, it is unlikely that TB testing would be found to violate the Fourth Amendment.

The Fourth Amendment also contains a set of requirements that officials must satisfy to obtain a warrant to search or seize property or persons. A reasonable search is allowed without a warrant if there is a special government need and a reasonable degree of individualized suspicion.[34] Warrantless arrests are permissible when there is both probable cause and exigent circumstances.[35]

Duties of public health officials

The police power gives public health officials the authority but not the duty to protect public health. Their affirmative obligations are set forth in statutes. From the time of statehood,

[29] See, e.g. *Degido v. Pong*, 920 F.2d 525 (8th Cir. 1990) (finding an Eighth Amendment violation because of the prison officials' failure to allocate organizational resources to develop and implement a communicable disease policy, the lack of a written protocol for TB testing, the failure to monitor prisoner medication compliance, and the inadequate investigation of a prison TB outbreak by the state health department).
[30] See, e.g., *McCormick v. State*, 105 F.3d 1059 (5th Cir. 1997) (upholding compulsory TB treatment in prison); *Hasenmeier-McCarthy v. Rose*, 986 F. Supp. 464 (S.D. Ohio 1998) (upholding compulsory TB testing in prison).
[31] See, e.g., *Ferguson v. City of Charleston*, 532 U.S. 67 (2001) (finding that a city hospital's tests of obstetrical patients' urine for cocaine was a search under the Fourth Amendment).
[32] See *Washington v. Canbra*, 165 Fed. 3d 920 (9th Cir. 1998) (unpublished opinion) (holding that a TST test can be considered a search).
[33] See, e.g., *April Love v. Superior Court*, 226 Cal. App. 3d 736 (1991) (holding that an HIV test of a convicted prostitute for purposes of AIDS prevention did not violate the Fourth Amendment).
[34] See, e.g., *Ferguson v. City of Charleston*, 532 U.S. 67, 79 (2001).
[35] See *People v. Ramey*, 16 Cal. 2d 263 (1976). See also Cal. Penal Code § 836 (permitting a warrantless arrest if the criminal activity is committed in the presence of a peace officer). Section 836 would apply to a refusal to abide by a health order in a peace officer's presence.

California law has assigned counties (and cities) front-line responsibility for communicable disease control. Currently, county boards of supervisors have an all-purpose duty to "take measures as may be necessary to preserve and protect the public health in the unincorporated areas of the county."[36] County and city health officers must enforce state, county, and city statutes, regulations, and orders pertaining to public health.[37] Health officers must also take the necessary steps to prevent the spread of reportable communicable diseases.[38] In addition to their general duties in the area of communicable disease control, local public health officials have particular duties regarding certain public health hazards (e.g., domestic and wild animals) and diseases (e.g., STDs, HIV, AIDS, and TB). The TB control duties of health officials are enumerated in a special part of the Communicable Disease Prevention and Control division of the Health and Safety Code,[39] discussed in detail below.

Liability for failure to carry out disease control duties

Federal and state civil rights laws provide individuals with legal remedies for violations of their constitutional rights by public entities and public employees. Public entities and their employees were traditionally immune from liability for nonperformance or negligence in fulfilling their statutory responsibilities. However, in the late twentieth century, most states reversed course and adopted government tort liability statutes. California's Tort Claims Act allows private individuals to sue public entities and their employees for certain wrongful acts or omissions.[40] The Act makes public entities liable for breach of so-called "mandatory duties." A mandatory duty is one that is *obligatory*, rather than merely discretionary or permissive, in its directions to the public entity; it must *require*, rather than merely authorize or permit, that a particular action be taken or not taken.[41] It makes public employees liable for all wrongful acts and omissions, but gives them immunity for "discretionary" acts or omissions.[42]

Discretionary duties are those that include "planning and policy making" and "basic policy decisions."[43] To qualify for immunity based on discretionary duties, a local health department must demonstrate that it made a conscious, specific policy decision, deliberately balancing risks and advantages to the patient.[44] Because the majority of duties regarding the examination, treatment, and detention of TB patients are discretionary in nature, health departments and their employees are generally immune from liability for injuries that occur in

---

[36] Cal. Health & Safety Code § 101025. Governing bodies of cities have a similar duty. Cal. Health & Safety Code § 101450.

[37] Cal. Health & Safety Code §§ 101030, 101470.

[38] Cal. Health & Safety Code § 120175.

[39] Specifically, part 5 of Division 105 of the Health and Safety Code (Cal. Health & Safety Code §§ 121350–121555). Chapter 1 deals with TB control, chapter 2 with pupil testing, and chapter 3 with public employee testing. This paper refers to chapter 1 as the "TB control statute."

[40] See generally, Simpson, "In Time of Emergency: Liability Issues for Public Health Practitioners," (presentation at CPHA-N 2003 annual meeting), available from the authors.

[41] *Haggis v. City of Los Angeles*, 22 Cal. 4th 490 (2000) (emphasis in original). The courts have construed mandatory duty liability narrowly. The statutory or regulatory mandate must oblige the public entity to perform a specific action designed to prevent a specific injury, and the entity's misfeasance must directly cause the plaintiff's injury.

[42] See *Johnson v. State*, 69 Cal. 3d 782 (1968) (finding that planning, policymaking and other basic policy decisions are discretionary).

[43] *Johnson v. State*, 69 Cal. 3d 782 (1968).

[44] Note the similarity between this standard of care and the "individualized assessments" of a patient's circumstances as required by California Health and Safety Code section 121367.

the performance of TB control duties. Since the statutes describe the communicable disease control duties of public health agencies and their employees in broad, permissive terms (e.g., "use every available means to investigate disease, and issue any orders deemed necessary to protect public health"), the courts seldom find agencies and employees liable for decisions about the best way to prevent or control disease.

> Jones contracted TB, allegedly from Czapky, in 1957. He sued county and state health officials under government liability statutes claiming that they failed to conduct adequate monitoring to ensure Czapky's compliance with a quarantine order confining him to his residence. The court ruled against Jones, holding that is a discretionary duty to set the terms of a quarantine. The court found that the officials had made a reasonable policy decision, so they could not be held liable even if the terms of the quarantine may have turned out to be lacking. *Jones v. Czapky.*[45]

Government Code section 855.4 provides immunity from liability for "injury resulting from the decision to perform or not to perform any act to promote the public health of the community by preventing disease or controlling the communication of disease." Section 855.6 provides immunity for injury caused by failure to make an examination for the purpose to determine whether a person has a disease that would "constitute a hazard to the health or safety of himself or others." The California Law Revision Commission's comments on these sections indicate that 855.4 was intended to provide immunity for quarantine and 855.6 was intended to immunize public health examinations such as TB examinations. Despite these immunity statutes, the courts have allowed cases to proceed where public officials were not engaged in discretionary planning and policymaking, but were alleged to have been negligent in performing an operational function, such as a medical procedure.

> A police officer asked a county medical center to perform an HIV test on the blood of a mentally-disturbed person with self-inflicted stab wounds. The officer was exposed while assisting in the person's civil commitment. The county erroneously tested for hepatitis instead of HIV, discarded the sample, and released the patient. The court held that the officer could bring a lawsuit against the county for damages under the Tort Claims Act caused by anguish due to uncertainty about his HIV status, because the performance of the test was not an immune exercise of discretion. *Smith v. County of Kern.*[46]

II. Federal role in TB control

Although TB control falls mainly under state and local jurisdiction, the Constitution gives the federal government certain powers in this area. First, under its exclusive authority over immigration and naturalization, the federal government serves as the gatekeeper for aliens with active TB seeking to enter the United States.[47] It can exclude an alien with active TB from

[45] 182 Cal. App. 2d 192 (1960).
[46] 20 Cal. App. 4th 1826 (1993).
[47] See U.S. Const., Article I, § 8.

immigration or entry on a non-immigrant visa.[48] Aliens suspected of active TB can be detained at the border, repatriated, or deported.[49] The federal government requires applicants for immigration to have a medical examination that includes a chest x-ray. Consular officials may require medical examinations for non-immigrant visa applicants suspected of being medically ineligible.[50] Second, the federal government is the sole regulator of foreign and interstate commerce, and can use this authority for communicable disease control. For example, CDC can inspect, detain, quarantine, or take other measures at U.S. ports to prevent the importation of communicable diseases, including active TB.[51] CDC can also take whatever measures it deems necessary to prevent the interstate spread of TB and other communicable diseases if it finds that state and local officials are not doing enough.[52] Lastly, CDC provides support to state and local TB control authorities under the federal government's constitutional power to tax and spend for the public welfare.[53]

III. Current California TB control statute

The California TB control statute recognizes that the power to control TB rests within three levels of the public health infrastructure: CDHS, local health departments, and local health care facilities. It delegates mandatory and discretionary duties to each level.

Powers and duties of CDHS

CDHS has a range of responsibilities for communicable disease, including TB control. Mandatory duties include examining the causes of communicable diseases, establishing a list of reportable diseases (of which TB is one), acting as the lead agency for TB response, working with local health departments to identify detention sites, and maintaining a program for the control of TB.[54] CDHS also has discretion to advise local health officers, adopt regulations about isolation and quarantine, and require inspection, disinfection, isolation, or quarantine when necessary to protect the public health.[55] The TB control statute places CDHS in an administrative, supervisory, and support role, leaving the bulk of the on-the-ground work to local health departments. Specifically, it provides for CDHS to maintain a TB control program and states that CDHS is the "lead agency" for all TB control and prevention activities at the state level.[56] It authorizes CDHS to provide an annual subvention to health departments that maintain local TB control programs consistent with state standards.[57]

Powers and duties of local health officers

Local health officers bear primary responsibility for TB control in California. They are charged with both mandatory and discretionary duties. Section 121365 obliges local health officers to use every available means to investigate reported or suspected cases of active TB in

[57] Cal. Health & Safety Code §§ 121450-121460.

their jurisdiction. Under section 121364, they have discretion to perform a compulsory examination of persons they have reasonable grounds to believe are at heightened risk of TB exposure. Moreover, under section 121365 they have broad discretionary duty to issue orders deemed necessary to protect the public health or the health of any individual, such as:

- order of detention for purposes of examination;
- order to complete a prescribed course of medication and if necessary, to follow infection control precautions;
- order to follow a course of directly observed therapy (DOT) (if an active TB patient is unable or unwilling to complete a prescribed course of medication);
- order of detention in a health or other treatment facility if a person is substantially likely to have infectious TB and to transmit the disease;
- order of detention in a health or other treatment facility if (1) a person has active TB and shows no evidence of having completed treatment and (2) there is a substantial likelihood, based on past or present behavior, that the patient cannot be relied upon to complete treatment and follow infection control precautions;
- order for the exclusion from attendance at the workplace; and
- order for home isolation.

Powers and duties of health care providers and facilities

Private health care providers and facilities are also on the front line of TB control. Health care providers have a mandatory duty to report to the local health officer (1) when they encounter a suspected or actual active TB patient and (2) when the patient ceases treatment for TB.[58] They have a mandatory duty to maintain written documentation of an active TB patient's adherence to an individual treatment plan.[59] In addition, a health care provider who treats an active TB patient is required either to examine all household contacts or refer them to the local health officer for examination.[60] Finally, health facilities have a mandatory duty not to discharge or release a suspected or actual active TB patient until a written treatment plan has been approved by the health officer.[61]

Statutory limits on the powers and duties of TB control professionals

The powers and duties of TB control professionals in California can significantly interfere with constitutional rights. For example, an isolation or detention order would seriously impede an individual's movement. An order to complete a prescribed course of medication might offend a patient's right to religious freedom. To protect the rights of patients, the California legislature built checks and balances into the TB control statute, breaking the constitutional principles down into a set of action steps for TB control professionals to follow.

Contents of health orders

Since TB control related health orders often implicate heightened or fundamental liberty interests (including the rights to bodily integrity, privacy, and travel), these health orders must

[58] Cal. Health & Safety Code § 121362.
[59] Cal. Health & Safety Code § 121362.
[60] Cal. Health & Safety Code § 121363.
[61] Cal. Health & Safety Code § 121361.

incorporate basic due process principles. Any TB control related health order must state the legal authority on which the order was based.[62] In addition, it must include an individualized assessment of the person's situation or behavior that justifies the order and either (1) the less restrictive alternatives that were attempted and were unsuccessful or (2) the less restrictive alternatives that were considered and rejected, and why they were rejected.[63] By making health officers walk through the individualized assessment and the less restrictive alternatives, the TB control statute basically guides health officers through the most rigorous type of substantive due process analysis (i.e., the strict scrutiny test).

Special civil detention procedures

Because civil detention entails an extreme deprivation of liberty, the civil detention process in the TB control statute involves extra procedural due process measures. A local health officer can detain without prior court authorization under section 121365, but sections 121366 and 121367(b) gives detainees the following rights:

- Upon a detainee's request, the local health officer must apply for a court order authorizing continued detention within 72 hours of the request.
- Whether or not a detainee makes a request, a court order is required for detentions of more than 60 days.
- The health officer must seek further court review of a detention within 90 days of the initial court order and within 90 days of each subsequent court review.
- The health officer must prove the necessity of the detention by "clear and convincing" evidence.
- A person subject to detention has the right to counsel and to have counsel provided.
- Each health order must advise the detainee of his or her rights regarding release requests, court orders, court review, and legal representation.
- Each health order must be accompanied by a separate notice that explains the detainee's right to request release; that lists the phone number the detainee may call to request release; that explains the detainee's right to counsel; and that informs the detainee that, at the detainee's request, the health officer will notify two individuals of the detention.[64]
- A detainee may only be detained for the amount of time necessary to fulfill the purpose of the detention.

This checklist represents a legislative effort to promulgate standard operating procedures for detention that meet or exceed constitutional requirements.

Location of detention

Section 121358(a) of the TB control statute provides that "individuals detained through the tuberculosis control, housing, and detention program shall not reside in correctional facilities." The court in *Souvannarath v. Hadden* interpreted this to mean that civil detention pursuant to the TB control statute cannot take place in a correctional facility.[65] This holding is binding on all lower courts in California. The court in that case did not consider the

[62] Cal. Health & Safety Code § 121367(a).
[63] Cal. Health & Safety Code § 121367.
[64] Cal. Health & Safety Code §§ 121366, 121367.
[65] See *Souvannarath v. Hadden*, 95 Cal. App. 4th 1115 (2002). The case is discussed at length in Section V below.

constitutionality of Souvannarath's incarceration, but due process and Eighth Amendment issues were raised in another case that ended in the county's payment of $1.2 million in settlement funds.[66]

Interpreters

The TB control statute mandates that "language interpreters and persons skilled in communicating with vision and hearing impaired individuals shall be provided" for the purposes of executing TB related investigations and orders.[67] As such, TB control workers who interact with the public ought to try to make sure that they are understood. In addition, it would prudent to translate health orders (either verbally or in writing) for non-English speakers.[68]

Involuntary treatment

The TB control statute has several prohibitions relating to compulsory testing and treatment. Section 121369(b) provides that nothing in sections 121365, 121366 or 121367 "shall be construed to permit or require the forcible administration of any medication without a prior court order." Section 121365(b) and (c) authorize orders requiring active TB patients to complete a course of medication or undergo DOT, with the caveat that the section "does not allow the forcible or involuntary administration of medication." Section 121365(a) authorizes health officers to order the detention of patients for examination, but the section explicitly "does not authorize the local health officer to mandate involuntary anergy testing."

Religious exemption

With limited exception, "no examination or inspection shall be required of any person who depends exclusively on prayer for healing in accordance with the teachings of any well recognized religious sect, denomination, or organization and claims exemption on that ground."[69] Moreover, such person "shall not be required to submit to any medical treatment, or to go to or be confined in a hospital or other medical institution; provided, he or she can be safely quarantined and/or isolated in his or her own home or other suitable place of his or her choice."[70]

---

[66] See *Souvannarath v. County of Fresno*, Civ. F-99-6655 (E.D. Cal. 1999) (second amended complaint).

[67] Cal. Health & Safety Code § 121369(a).

[68] The law does not require health orders to be written in a native language, so long as translators are provided. However, it would be sensible to supply written translations both to assure the patient's comprehension and to have hard evidence that the patient was duly notified of the contents of the order.

[69] Cal. Health & Safety Code § 121370.

[70] Cal. Health & Safety Code § 121370. Courts have ruled that states are not constitutionally obliged to offer religious exemptions. See, e.g., *Prince v. Massachusetts*, 321 U.S. 158, 166-67 (1944); *Boone v. Boozman*, 217 F. Supp. 2d 938 (E.D. Ark. 2002). Nonetheless, the California legislature decided to provide the exemption to those belonging to "well recognized" religions. It is worth noting that the religious exemption may be subject to challenge by sincerely religious individuals who do not belong to a "well recognized" religion. In order to avoid a constitutional challenge, a health officer might consider applying the religious exemption to a genuinely religious person regardless of whether the person seeking the exemption belongs to a "well recognized" religion.

Criminal sanctions for failure to comply with TB related health orders

A health order issued under the TB control statute has teeth because failure to comply is a misdemeanor under Health and Safety Code section 120280.[71] A misdemeanor is a non-felony crime punishable by a fine and/or imprisonment in the county jail for a period of up to six months, unless otherwise specified by a particular law.[72] Anyone who violates a TB related health order may be prosecuted. Once charged, the person leaves the civil system. This is important because civil and criminal detainees are subject to different standards of due process and different types of confinement.

The TB control statute has special rules for violations of health orders issued under section 121365. The health officer is required to report violations of section 121365 orders to the district attorney.[73] Upon receipt of a report, the district attorney is supposed to prosecute the violation.[74] If a persistently nonadherent active TB patient is convicted of a misdemeanor for failing to comply with a section 121365 order, the court may order the offender to be confined for up to one year.[75] Section 120280 states that the confinement may take place in "any appropriate facility, penal institution, or dwelling approved for the specific case by the local health officer." As an alternative to confinement, the court may place the offender on probation for up to two years upon condition that the offender comply with the 121365 order.[76] The court can terminate probation and order the confinement of an offender who violates the terms of probation.[77]

IV. Legislative history of the California TB control statute

Early TB control laws

California has had a TB control statute since the early 1900s. The version adopted in 1957 gave local health departments lead responsibility for TB control.[78] It required local health officers to investigate suspected TB cases and authorized them to examine persons reasonably suspected of active TB and isolate or quarantine active cases if necessary. The procedure for doing so was to serve a written examination, quarantine or isolation order on the person.[79] Unlike the current TB control law, there was no statutory provision for the health officer to apply to court for civil enforcement of an order.[80] However, if a person violated a quarantine or isolation order, the health officer was required to notify the local district attorney.[81] Violation of an examination or isolation order was a misdemeanor, punishable by confinement until

[81] Cal. Health & Safety Code § 3285(f) (1957).

compliance with the order but no longer than six months.[82] The district attorney was required to prosecute if requested by the health officer.[83]

California law appears to have authorized state funding to counties for treatment of TB patients since 1915.[84] The 1957 law provided for the state health department to lease "any facilities it deems necessary to care for persons afflicted with active contagious tuberculosis who violate the quarantine or isolation orders of the health officer," with the cost of care in state-leased facilities deducted from the county subsidy.[85]

1975 amendments

In 1975, the legislature adopted a provision authorizing CDHS to distribute an annual subvention to local health departments that maintain a TB control program consistent with standards and procedures established by the department. This provision remains in the TB control law to this day.[86]

1993 reforms: AB 803 (Gotch)

The intent of the Gotch bill was to modernize the California TB control statute. TB incidence had increased significantly in the United States in the 1980s, and there was a prevailing sense that California needed to redouble its TB control efforts. Additionally, it was recognized that the society expected and the courts would eventually require that TB patients receive procedural due process protections not unlike those afforded mentally ill persons.

In 1992, a California TB Elimination Task Force (CTETF) was convened by CDHS, CCLHO, the California Tuberculosis Controllers Association, and the American Lung Association of California. In 1994, CTETF released a Strategic Plan for Tuberculosis Control and Elimination with a number of recommendations for improving TB control in California. AB 803 was introduced as a direct consequence of CTETF. The Health Officers Association of California (HOAC) sponsored the bill, and supporters included CCLHO and ALAC. The resulting law comprises the bulk of the current TB control statute.

From the early stages of the legislative process, AB 803 included the procedural due process provisions relating to TB orders and detention that, with minor modifications, are a key feature of the current statute.[87] While authorizing health officers to detain persons without a court order, the bill also included a provision, new to California TB control law, authorizing local health officers to apply to court for civil enforcement of TB orders. It deleted the requirement in existing law that local health officers notify the district attorney of violations of TB orders, but kept the existing provision making it a misdemeanor to violate a TB order and

[84] See *County of Sacramento v. Chambers*, 33 Cal. App. 142 (1917) (finding that a state subsidy to counties for TB treatment was not an unconstitutional transfer of a state function to a local government or a gift of public funds).
[85] Cal. Health & Safety Code § 3295 (1957). The current law appears to provide for CDHS to lease the facilities it deems necessary for persons convicted of a § 120280 misdemeanor. See Cal. Health& Safety Code § 121390 (2003).
[86] Cal. Health & Safety Code § 121450 (2003).
[87] AB 803 was introduced as a spot bill. It was replaced on April 15, 1993 with the procedural due process provisions. This paper refers to the April 15th version as the original Gotch bill.

requiring prosecution if requested by the health officer.[88] Thus, AB 803 appears to have originally been intended to give health officers a range of enforcement options. The Assembly Committee on Health report on AB 803 indicated that Assemblyman Gotch intended to establish a procedure "more in tune with current civil rights expectations that allow for gradually more restrictive measures for persistently nonadherent patients who threaten to spread infection because they do not respond to specific treatment orders. . . ." The Assembly Ways and Means Committee analysis stated that the new procedures for enforcement would generate savings by "preventing the use of misdemeanor penalties and incarceration in jail."

However, after AB 803 passed the Assembly, the Senate deleted the procedural due process provisions and the mandatory referral for prosecution provision was put back in.[89] The ACLU objected and the procedural due process provisions were reinstated, but mandatory referral for prosecution was not taken out.[90] Assemblyman Gotch apparently continued to prefer civil proceedings. The final Senate committee report on the bill quoted him as stating, "Isolation of an infectious TB patient is not an accusation, but rather to be used by medical professionals to treat TB and preserve the public's health."[91]

There were many other amendments during the legislative process, particularly relating to the reporting obligations of health facilities and the authority and responsibility of CDHS, local health officers, and the state Department of Corrections with respect to prisoners with TB.

1994 clean-up legislation: AB 804 (Gotch)

AB 804 was introduced at the same time as AB 803. HOAC sponsored and CCLHO supported it. AB 804 originally addressed financing and reimbursement issues. Early versions required CDHS to develop a plan for housing and treatment facilities for TB patients, since a key CTETF concern was prolonged acute care hospitalization of TB patients due to the lack of community-based housing facilities. There were also provisions for CDHS to create a plan for regional detention facilities. However, this language was watered down during the course of the legislative process and eventually removed altogether. After AB 803 was enacted, the legislature used AB 804 to make minor wording changes in the new statute. AB 804 was enacted in September 1994.

Funding for housing and detention of TB patients

Numerous efforts were made over the next several years to pass legislation authorizing CDHS to provide funding for local health departments for facilities to house homeless TB patients. In the 1995–1996 session, housing and detention facility provisions similar to the early versions of AB 804 were proposed in AB 476 (Escutia). At the same time, AB 553 (Escutia) proposed a CDHS contingency fund for secured housing for persistently nonadherent TB patients. One purpose was to keep patients needing detention out of local jails. Both bills died at the end of 1996, apparently because legislators concluded that CDHS already had the authority to fund local TB control efforts, and funds for housing homeless and persistently nonadherent TB patients had been appropriated in annual budget acts during this period. In 1997, SB 274

[88] See AB 803, as amended April 15, 1993.

[90] See AB 803, as amended July 17, 1993.
[91] Senate Rules Committee, Committee Report for 1993 California Assembly Bill No. 803 (September 9, 1993).

(Watson) proposed authorizing CDHS to provide funds to local health departments for secured housing for persistently nonadherent TB patients, so that the local agencies could implement their civil detention orders. Once again, the legislation did not pass. However, the 1997–1998 budget trailer bill, SB 391 (Solis), included a provision setting a deadline of January 1, 1998 for CDHS to identify sites throughout the state where each local health department should send persistently nonadherent TB patients.[92]

Prohibition on detaining TB patients in correctional facilities

SB 391 also provided that individuals detained through "the tuberculosis control, housing, and detention program" could not reside in correctional facilities, nor could funds under that program be disbursed to correctional facilities. However, this prohibition "should not be interpreted to prohibit the institutionalization of criminals with tuberculosis in correctional facilities."[93] The SB 391 Assembly and Senate Committee Reports stated that the effect of this provision was to "stipulate that individuals housed through a specified tuberculosis control program shall not reside in correctional facilities, while not precluding the incarceration of criminals under law." The meaning of this language, codified in section 121358, was considered by the Fifth District Court of Appeal in the *Souvannarath* case.

V. The Souvannarath Case

The *Souvannarath* decision has generated considerable attention in the public health community. The underlying factual situation is troubling, and the mistakes made by the health department are sobering. Moreover, the court's interpretation of the statutory prohibition on detaining TB patients in jail facilities has been controversial.

Factual background

The Court of Appeal found the facts to be as follows: Hongkham Souvannarath was a monolingual Laotian immigrant with multi-drug-resistant TB. In January 1998, she was diagnosed with TB and ordered by the Fresno County health officer to undergo treatment at a local chest clinic. In July 1998, the health officer concluded that she was not complying with the treatment program. He served her with an examination order requiring appearance at the chest clinic. When Souvannarath failed to appear, the health officer issued another order directing that she be detained in county jail until completion of a prescribed course of treatment (for up to two years). The order did not contain the findings and notices required by the TB control statute for detention orders. The next day, Souvannarath was served with the order and simultaneously removed at gun point to the county jail. There, she was strip-searched and was placed in a safety cell for three days because a Hmong officer interpreted her statement that she was afraid to die as a suicide threat. The safety cell had no water, heat, light, bed, or toilet. Thereafter, Souvannarath was housed in the infirmary where she was expected to clean up after other inmates. Souvannarath was eventually placed in the general inmate population where she was subject to the same treatment as the other inmates. She had limited visiting hours with her family, she could make only collect calls, and she was shackled whenever she was taken from the jail to outside treatment facilities. Although the TB control statute requires a post-detention

[92] Cal. Health and Safety Code § 121358.
[93] Cal. Health and Safety Code § 121358.

judicial proceeding within at least sixty days, the health officer did not apply for court review for ten months. The costs of Souvannarath's detention in county jail were paid from funds other than the state TB control subvention. When the health officer finally applied for judicial review, the parties negotiated an agreement for Souvannarath's unconditional release.

Upon her release, Souvannarath brought two separate court cases. The first was an action for monetary damages for various alleged civil rights and constitutional violations in connection with her treatment and detention. That case settled before trial for $1.2 million.[94] In the second case, Souvannarath asked the court to order the county to stop using the county jail as a civil detention site for persistently nonadherent TB patients. The trial court ruled in Souvannarath's favor,[95] and the Fifth District California Court of Appeal affirmed.[96] The Fifth District's holding is binding on all lower state courts.

Jail prohibition issue

The Court of Appeal analyzed California Health and Safety Code section 121358, which provides:

> (a) Notwithstanding any other provision of law, individuals housed or detained through the tuberculosis control, housing, and detention program shall not reside in correctional facilities, and the funds available under that program with regard to those individuals shall not be disbursed to, or used by, correctional facilities. This section shall not be interpreted to prohibit the institutionalization of criminals with tuberculosis in correctional facilities.
>
> (b) The department shall work with local health jurisdictions to identify a detention site for persistently nonadherent tuberculosis patients appropriate for each local health jurisdiction in the state. The department shall notify all counties of their designated site by January 1, 1998.

The court concluded that the statute prohibits the use of the county jail as a civil detention site for patients like Souvannarath. The court began its analysis by deciding that the word "program" in Section 121358(a) refers to a two-level, statewide program for TB control which the legislature enacted in the TB control statute. In the court's view, civil detention by local health officers is part of this "program," and is therefore subject to the jail prohibition. Stated differently, the jail prohibition limits the discretion that section 121366 previously gave local health officers to detain TB patients in "a hospital or other appropriate place," which could include a jail.

Second, the court determined that the legislative history supported its interpretation. The Legislative Counsel's Digest accompanying SB 391 (the legislation that enacted section 121358) stated that: "[E]xisting law requires the department and each county to administer a tuberculosis control, prevention, and detention program. This bill would prohibit individuals housed under this program, other than criminal offenders, from residing in correctional facilities." The court

[94] See John Roemer, "Reclaiming a Soul," Daily Journal, Apr. 30, 2001.
[95] *Souvannarath v. Hadden*, No. 633425-4 (Cal. Super. Ct. June 10, 1999).
[96] *Souvannarath v. Hadden*, 95 Cal. App. 4th 1115 (2002).

read the phrase "this program" in the second sentence to include detentions authorized under the TB control statute.

Fresno County countered that the proponents of section 121358 merely intended to prevent counties from using CDHS funds for detention in correctional facilities. The court rejected this argument by closely scrutinizing the wording and sentence structure of the statute. It found that the jail prohibition and the funding prohibition in 121358(a) were separate prohibitions with equal dignity. The county's interpretation would edit out the jail prohibition language. Moreover, it concluded that the last sentence of 121358(a), which saves the institutionalization of criminals in correctional facilities from the jail prohibition, would be unnecessary if the statute only contained a funding prohibition. Undeterred, the county argued that statements in the Department of Finance and CDHS Enrolled Bill Reports (internal administration reports on SB 391), which cited health officers' objections to including a jail prohibition in the bill, could indicate that the administration saw the final version of the bill as exclusively a funding prohibition. The court rejected this approach too, concluding that the statements were inconsistent with the balance of the legislative history and the health officers' concerns were most likely disregarded by the legislature.

Procedural due process issue

One part of the Court of Appeal decision is "unpublished," which means that it cannot be used as precedent in any California court. This part of the decision addresses the county's future compliance with the TB control statute. After Souvannarath filed her lawsuit, the county developed new forms and documents to bring itself into compliance. It claimed in court that these actions made a judicial order requiring compliance unnecessary. The Court of Appeal disagreed. It expressed doubt that the county's actions were anything more than paper compliance, since there was minimal evidence that the health department had changed its standard operating procedures to implement the new forms. The court's suspicion was aroused by testimony from health department officials demonstrating ignorance of the TB control statute and the basic concepts of procedural due process. The court said that public health officials "must be held to know the basic provisions of the laws which empower them and govern the exercise of their particular offices and duties."[97]

VI. Questions about the California TB control statute

By and large, California's TB control statute represents a coherent and comprehensive scheme. However, there are some areas where the statutory language is unclear. In addition some parts of the statutory scheme have been thrown into question in the *Souvannarath* decision.

Multiple enforcement mechanisms

There are three enforcement mechanisms that a health department may be able to use to ensure that a patient complies with a TB-related order: administrative, civil, and criminal. The language and history of the statute leave it unclear whether administrative enforcement actually

[97] *Souvannarath v. Hadden*, No. F035228, at 14 (Cal. Ct. App. Jan. 3, 2002) (reprinted at http://www.court.info.ca.gov/opinions/documents/F035228.PDF).

exists, and whether the three mechanisms are alternatives with equal status or whether each is intended to be used in different circumstances. The discussion of enforcement mechanisms that follows uses the example of a section 121365(e) order for detention of a persistently non-adherent patient with active tuberculosis disease.

Administrative Enforcement: Section 121366 states that a health officer may detain a persistently nonadherent patient in a health or other treatment facility without first obtaining a court order. It is possible that this statement means that the legislature has granted the health officer the coercive power of the state (i.e., the power to forcibly compel an individual's behavior against their will). When administrative agencies are granted such a power, they have what is called "summary enforcement power."[98] Administrative agencies usually do not have summary enforcement powers. Instead, they generally must apply to a court to enforce their administrative orders.

Civil Enforcement: Section 121365 provides that the local health officer may "make application to a court for enforcement" of any orders issued by that officer.[99] In other words, if a patient violates a detention order, the health officer can "borrow" the enforcement authority of a civil court by asking it to issue a ruling requiring that the patient follow the order. If the patient were violate the court ruling, the patient would be guilty of contempt of court, which is a misdemeanor in California.[100]

Criminal Enforcement: The criminal enforcement mechanism is outlined in sections 121365, 120280, and 120300. Section 121365 requires the health officer to notify the district attorney upon receiving information that an order has been violated.[101] Section 120280 makes the violation of an order a misdemeanor. Section 120300 requires the district attorney to prosecute violations. If convicted, the individual may be if sentenced for up to two years in a penal institution.

There are at least two problems generated by the statutory language regarding enforcement. First, the statutory scheme does not make it clear whether health officers possess summary TB control enforcement powers. [102] The statement in section 121366 that health

---

[98] Since public health officials are not peace officers, the actual exercise of summary enforcement power would require the cooperation of local law enforcement, most likely the sheriff's department.

[99] Cal. Health & Safety Code § 121365.

[100] See Cal. Penal Code § 166(a)(4).

[101] See Cal. Health & Safety Code § 121365 ("Upon the receipt of information that any order has been violated, the health officer shall advise the district attorney of the county in which the violation has occurred, in writing, as shall submit to the district attorney the information in his or her possession relating to the subject matter of the order, and of the violation or violations.").

[102] There are some California court decisions and Attorney General opinions stating that public health officials can initiate summary enforcement proceedings without a court order. A 1919 Court of Appeal decision stated that summary quarantine by a health officer without a prior judicial order was not improper. (*In re Johnson*, 40 Cal. App. 242 (1919)). It was apparently common practice in California during the first half of the twentieth century for health officials to summarily enforce quarantine and treatment orders with the help of law enforcement personnel, and even when they doubted the wisdom of such orders, the courts do not appear to have questioned the summary enforcement process. (See, e.g., *In re Martin*, 83 Cal. App. 2d 164 (1948) and cases cited therein.) In a 1957 opinion dealing primarily with the appropriateness of isolating persistently nonadherent TB patients in jail, the California Attorney General said that "it has long been established that health officers have the power to quarantine and isolate afflicted persons without resort to court procedures." (30 Atty. Gen. Ops. 229 (1957)). In *Application of Halko*, 246 Cal. App. 2d 553 (1966), a patient detained at Mira Loma Hospital pursuant to an isolation order escaped. He was

officers may detain a patient without a prior court order implies the existence of summary enforcement power. However, the presence of explicit civil and criminal enforcement mechanisms in section 121365 could be interpreted to signify that no other enforcement mechanisms exist.[103]

Second, the statute does not indicate when civil or criminal judicial enforcement mechanisms should be pursued. The choice between proceeding on the civil or criminal side is not trivial. A criminal conviction carries a lifelong stigma. The initiation of criminal prosecution redirects the government's interaction with the TB patient away from the humane goals of individual treatment and community protection and toward punishment. A patient who is convicted of a misdemeanor becomes a criminal detainee, and thus loses some of the due process protections that the TB control statute provides to civil detainees (including the 90-day judicial review of continued detention under section 121366, the limits on duration of detention under section 121368, and the involuntary treatment prohibitions in sections 121365 and 121369).

Additionally, it is conceivable that the constitutionality of criminal prosecution for violation of a TB order could be challenged. In *People v. Lockheed Shipbuilding and Construction Company*, the Court of Appeal held unconstitutional a statutory scheme under which noncompliance with an administrative order regarding industrial injuries was made a misdemeanor.[104] The statute did not provide an opportunity for administrative or judicial review

---

captured, convicted of a misdemeanor, and returned to Mira Loma. The health officer began serving successive six-month isolation orders. The patient filed a habeas corpus petition alleging that continuous detention without judicial review denied due process. The court denied the petition on the grounds that the statutory provision for isolation was reasonable and necessary to protect public health. The health officer's administrative enforcement authority was not addressed directly, but the holding is consistent with the decisions cited above in downplaying the judicial role in issuance of TB orders. On the other hand, in 1960, the Attorney General was asked whether a local health officer could initiate civil proceedings to enforce a TB order. (36 Atty. Gen. Ops. 28 (1960)). Without referring to the 1957 opinion, the Attorney General's office said health officers had two enforcement options. They could initiate civil proceedings in court to obtain an injunction against violating the order. (An injunction is a court order directing a party to do or refrain from doing a particular act.) If the individual failed to comply, they could return to court to obtain a civil contempt order. Alternatively, if the person failed to comply with the health order, the health officer could ask the district attorney to prosecute the person for a misdemeanor violation. (If convicted and confined, the person could dispute the validity of the order in a habeas corpus proceeding, which is a special court proceeding to determine the validity of a confinement.) According to the Attorney General, the second option was preferable because less expensive and time-consuming (presumably because only one court proceeding was needed to confine a persistently nonadherent person). Although the opinion does not say so, one could infer that between 1957 and 1960, the Attorney General changed his mind and concluded that health officials could not enforce their orders administratively.

[103] Uncertainty about administrative enforcement is not unique to California. A commentator has noted similar questions raised by health officers about Washington state's TB statute. See Vincler & Gordon, *Legislative Reform of Washington's Tuberculosis Control Law: the Tension between Due Process and Protecting Public Health*, 71 Washington Law Review 989 (1996). The Washington Attorney General specifically declined to offer an opinion as to whether Washington law authorized administrative enforcement. He concluded that the TB statute probably did so, but he could not predict whether the courts would uphold it. See 20 Ops Wash. Atty. Gen. 5 (1993).

[104] 35 Cal. App. 776 (1973). The California Labor Code authorized the Division of Industrial Safety to make just and reasonable orders respecting the cause of industrial injuries. There was no provision for notifying the employer or for a prior or subsequent hearing. Lockheed was prosecuted for violating an order. The court ruled that the absence of a pre-or post-order hearing denied due process. In doing so, it said that a criminal proceeding would not be an adequate substitute for a due process hearing. What seems to have troubled the court was the possibility that Lockheed would not have any opportunity in the criminal proceeding to present evidence rebutting the findings in

of the validity of the administrative order. The court held the scheme unconstitutional on due process and equal protection grounds. To be sure, the statutory scheme for TB control is different from the industrial injury scheme in *Lockheed Shipbuilding* because it provides greater due process safeguards. However, it bears some similarity in that a criminal prosecution can follow immediately on the heels of the service of the order and can short-circuit a civil hearing process. *Lockheed Shipbuilding* suggests potential vulnerability in a statutory scheme under which a civil proceeding can abruptly shift into a criminal prosecution.

The legislative history is murky as to whether civil or criminal enforcement is preferred. However, it is possible to infer a legislative preference for criminal prosecution from the fact that health officers *may* apply to court for civil enforcement of an order but *must* set the criminal process in motion by notifying the district attorney when an order is violated. If this preference for criminal enforcement is an accurate reading of the statutory scheme, it is ironic that the legislature would have enacted extensive procedural due process provisions with an intent to protect the rights of TB patients in a way that is "more in tune with current civil rights expectations" while simultaneously creating an easy way for local officials to opt out of these provisions.

It might be possible to reconcile these provisions through creative interpretation. For example, one might read section 121365 as requiring a health officer to bring violations of *court* orders (rather than *health* orders) to the attention of the district attorney. This would enable the health officer to keep proceedings on the civil side up to the point where a patient has defied a court order. In addition, one might interpret the summary enforcement language in section 121366 as creating an administrative enforcement scheme that is only available when a patient has violated an existing detention order. A health officer would have to follow the civil or criminal route for violations of all other TB-related health orders (such as isolation, direct observed therapy, and exclusion from work.) Unfortunately, while interpretations like these might lead to outcomes somewhat more consistent with the apparent legislative intent, they struggle for consistency with the literal wording of the statute.

It may be worth considering whether to modify the TB control statute to clarify the intent of these provisions. For example, the local health officer's summary enforcement power with respect to detention could be clearly indicated by adding a provision to section 121366 to the effect that, "Local law-enforcement agencies shall, if requested by the local health officer, carry out the local health officer's detention order." The local health officer could be given discretion to choose between civil and criminal enforcement if section 121365 were modified to provide that, "The local health officer may, in his or her discretion, make application to a court for enforcement of the orders or, upon receipt of information than any order has been violated, advise the district attorney of the county in which the violation has occurred."

---

the administrative order. (Citing *In re Halko*, 246 Cal. App. 2d 553 (1966), the court analogized Lockheed's predicament to that of a TB patient facing detention. According to the court, the TB patient at least had the right to obtain an examination by a physician of his own choosing as a way to contest the order.) The court also concluded that the statutory scheme denied equal protection because it authorized the Division of Industrial Safety to create "special legislation" defining the actions of a single employer as a crime.

Placing persistently nonadherent TB patients in correctional facilities

The appropriateness of using jails to detain persistently nonadherent patients has long been debated in California.[105] However, the *Souvannarath* case represents the first time the courts have blocked health officers from doing so. The case might not have a great deal of practical significance if non-correctional facilities were available in every county for detention of persistently nonadherent TB patients. However, it appears that non-correctional facilities are only readily available in Los Angeles County.[106]

Regardless of the public policy debate surrounding the use of jails to detain persistently nonadherent patients, the Court of Appeal's interpretation of section 121358 is open to criticism. The interpretation turns on the notion that the word "program" in the jail prohibition refers to all the state and local TB control activities authorized by the TB control statute. Actually, the TB control statute contains separate references to the state program for the control of TB and to local TB programs.[107] The fact that CDHS is named the "lead agency" does not merge the two.[108] Arguably, section 121358's reference to the "program" in the singular is a reference only to the state program. If the legislature had meant that all local TB control activities would be covered by 121358, it might more logically have referred to "programs." If accepted by the courts, this alternate interpretation would collapse the jail prohibition into the funding prohibition.

Since Souvannarath was civilly detained, the Court of Appeal only decided whether the jail prohibition applied to civil detention. However, the jail prohibition could be interpreted to apply to *any* detention arising out of an order authorized under the TB control statute, including criminal detention. In other words, the "program" could be viewed as embracing criminal prosecution as well as civil detention. The phrase "notwithstanding any other provision of law" in section 121358 could be read as superseding the provision in section 120280 allowing confinement of the convicted person in a penal institution. Convicted TB patients would not be released from detention because section 120280 also allows their confinement in other appropriate facilities or dwellings approved by the health officer.[109] If this interpretation of the statute were adopted by the courts, it would prompt a crisis in counties that do not have non-correctional facilities available for detention. The risk of such an outcome could be forestalled by amending the final sentence of section 121358(a) to provide that: "This section shall not be interpreted to prohibit the institutionalization in correctional facilities of persons convicted of a violation of section 120280."

---

[105] The Attorney General's 1957 TB opinion said that local health officers could quarantine individuals with active TB in a local jail facility if "no better suitable facility" is available for such purpose. For judicial opinions approving quarantine of persons with venereal disease in jail facilities, see *In re Martin,* 83 Cal. App. 2d 164 (1948), and cases cited therein; see also 4 Ops. Atty. Gen. 146 (1944).

[106] Two facilities in California accept TB patients for long-term detention and treatment-Los Angeles County's High Desert Hospital and Cordilleras Mental Health Center, a privately-operated facility in San Mateo County primarily serving mental health patients. In preparing this article, the authors received mixed information about the practical and financial impact on counties in other parts of California of transporting TB patients to these facilities for detention.

[107] Compare § 121350 with 121455.

[108] In fact, § 121357 makes CDHS the lead agency only at the state level.

[109] The savings clause for institutionalization of criminals would be interpreted only to apply to persons who are criminals first and TB patients second, that is to clarify that § 121358 does not require that prisoners be released to non-correctional settings if they contract TB.

Involuntary testing and treatment

The involuntary testing and treatment prohibitions in the TB control statute were added to the Gotch bill at different points in the legislative process, and perhaps as a result, they do not quite fit with one another. Section 121369(b), which was in the original version of the Gotch bill, states that nothing in sections 121365, 121366, and 121367 "shall be construed to permit or require the forcible administration of any medication without a court order." However, sections 121365 (b) and (c) (relating to health orders to complete treatment and to follow a course of DOT) prohibit health departments from the "forcible or involuntary administration of medication." These provisions were inserted into the Gotch bill when it was amended to address the ACLU's concerns.

The provisions relating to involuntary treatment are legally problematic. If the purpose of section 121369(b) is to *authorize* civil courts to issue or enforce involuntary treatment orders, the law should be explicit. As it stands, the language of section 121369(b) only *implies* that civil courts have the authority to issue and/or enforce involuntary treatment orders. The statute provides no mechanism for a health officer or other interested party to petition a court to issue an involuntary treatment order, nor does it provide a mechanism for a health officer to issue an involuntary treatment order that might be reviewed by a court, nor does it provide a mechanism for anyone to implement an involuntary treatment order once it has been issued. Sections 121365(b) and (c) provide an added complication. These sections expressly prohibit involuntary treatment under health orders to complete treatment or to follow a course of DOT, and it is not clear whether section 121369(b) is meant to override these prohibitions. Because the statute is unclear as to the status of and procedures for compelled treatment, the most viable way to force someone to take his or her medications would be to convict the patient of a misdemeanor in criminal court. Because prisoners have diminished constitutional liberty interests, correctional facilities are generally able to administer involuntary treatment.[110]

One solution to this problem would be to amend sections 121365(b) and (c) to conform with section 121369(b) by prohibiting involuntary treatment "without a prior court order." An amendment could include detailed procedures for obtaining such a court order.

Another concern regarding involuntary treatment relates to anergy testing.[111] Section 121365(a) which was added by the Gotch cleanup bill AB 804, states that the local health officer may not "mandate involuntary anergy testing." Although it is apparently no longer a recommended diagnostic tool, anergy testing is no more intrusive than other skin tests that the health officer has the authority to perform. Generally, the legislature defers to the professional judgment of health professionals regarding the use of diagnostic procedures. It is troubling to have the legislature dictate to health officers specific diagnostic tools that may or may not be used.

---

[110] See the discussion of the Eighth Amendment in Section I above.

[111] Individuals with suppressed immune systems may not respond normally to conventional tuberculin skin tests. Anergy testing is a way of gauging their responsiveness to antigen skin tests by administering standard skin tests for childhood diseases.

Procedural due process for non-detention orders

A curious feature of the TB control statute is the limited procedural due process provisions for non-detention orders, such as examination, treatment, DOT, workplace exclusion, and isolation orders. For example, the notice of legal rights and subsequent hearing provisions of sections 121367 and 121366 only apply to detention orders. Although the statute provides for notice,[112] it lacks a mechanism for individuals to obtain an administrative or judicial hearing as well. This absence may create a constitutional vulnerability.

VII. Conclusion

TB control officials should make every effort to secure voluntary compliance with their requests. Doing so respects individual self-determination, maximizes resources, and maintains good community relations. Incentives and warnings can be used to cajole persistently nonadherent individuals. However, there will always be some patients who are unable or unwilling to obey requests made by TB officials. In addition, the highly infectious character of active TB means that immediate enforcement mechanisms may sometimes be needed for individuals who, if enough time were available, could be persuaded to submit voluntarily.

As long as tuberculosis remains at current levels in California, the TB control statute should provide local health officials with an effective tool kit to achieve the foregoing purposes in a manner consistent with individual rights. However, if the overall incidence or number of serious outbreaks increased dramatically, weakness in the statutory scheme could adversely affect the public health community's response capability. Uncertainty about statutory interpretation, heavy reliance on judicial review and enforcement, and legal restrictions on detention facilities could bog down the program. While such an increase is unlikely, events like the unfolding SARS outbreak are a reminder that communicable diseases do not stand still for human institutions.

[112] See § 121364(b) (mandating notice of examination order) and 121367(a) (mandating notice of 121365 orders).

(4) names of personnel who treat, prescribe, and/or issue medication; and,
(5) location where treated.

(b) The physician/patient confidentiality privilege applies to the medical/psychiatric record. Access to the medical/psychiatric record shall be controlled by the responsible physician or the medical administrator.

The responsible physician shall insure the confidentiality of each prisoner's medical record file and such file shall be maintained separately from and in no way be part of the prisoner's other jail records. The responsible physician or medical staff designated by him/her shall communicate information obtained in the course of medical screening and care to jail authorities when necessary for the protection of the welfare of the prisoner, of other prisoners, management of the jail, or maintenance of jail security and order.

(c) Written authorization by the inmate is necessary for transfer of medical/psychiatric record information unless otherwide provided by law or administrative regulations having the force and effect of law.

(d) Prisoners shall not be used for medical recordkeeping.

HISTORY:

1. Amendment filed 9-30-82; effective thirtieth day thereafter (Register 82, No. 40).

1206. Medical Procedures Manual.

Every facility health administrator/physician shall, in cooperation with the facility administrator, set forth in writing policy and procedures which include but are not limited to:

(a) summoning and application of proper medical aid;
(b) contact and consultation with private physicians;
(c) emergency and non-emergency medical and dental services, including transportation;
(d) provision for medically required dental and medical prostheses and eyeglasses;
(e) notification of next of kin or legal guardian in case of serious illness;
(f) provision for care of pregnant women;
(g) screening, referral and care of mentally ill and retarded inmates;
(h) implementation of special medical programs;
(i) pharmaceuticals and a protocol for over-the-counter (non-prescription) medication; and
(j) use of non-physician personnel.

HISTORY:

1. Editorial correction of NOTE filed 9-30-82 (Register 82, No. 40).

1207. Pre-Screening.

According to procedures established by the responsible physician and the facility administrator, a pre-screen is performed on all inmates prior to housing in a living area. The pre-screening shall be performed by a medically licensed person or trained non-medical staff per the written order of the physician responsible for health care at the facility.

There shall be a written plan to provide medical care for any inmate who appears at pre-screening to be in need of medical treatment or who requests medical treatment.

NOTE: Authority cited: Section 6030, Penal Code. Reference: Section 6030, Penal Code.

HISTORY:

1. Editorial correction of NOTE filed 9-30-82 (Register 82, No. 40).

1208. Pre-Screening for Mental Disorders.

Any inmate who appears to be in need of psychiatric attention or who is suspected of suffering any type of mental disorder shall be brought to the attention of an appropriate medical professional.

Jails with an average daily population of 51 or more shall have a plan for identifying, screening, treatment and/or referral of the mentally disordered inmate which is developed in consultation with the local mental health director or his designee.

NOTE: Authority cited: Section 6030, Penal Code. Reference: Section 6030, Penal Code.

HISTORY:

1. Editorial correction of NOTE filed 9-30-82 (Register 82, No. 40).

1209. Transfer to Treatment Facility.

A mentally disordered inmate who appears to be a danger to himself or others, or to be gravely disabled, shall be transferred to a treatment facility designated by the county and approved by the State Department of Health Services for diagnosis and treatment of such apparent mental disorder pursuant to Penal Code 4011.6 and/or Welfare and Institutions Code 5150 unless appropriate facilities and personnel, as determined by the local mental health director, are present in the jail for this purpose. Inmates found unable to be cared for adequately within any jail shall be transferred to a designated treatment facility as soon as possible.
