"functions such as caring for one's self, performing manual tasks, walking, seeing, hearing, speaking, breathing, learning, and working." § 84.3(j)(2)(ii).

III

[1] Within this statutory and regulatory framework, then, we must consider whether Arline can be considered a handicapped individual. According to the testimony of Dr. ***281** McEuen, Arline suffered tuberculosis "in an acute form in such a degree that it affected her respiratory system," and was hospitalized for this condition. App. 11. Arline thus had a physical impairment as that term is defined by the regulations, since she had a "physiological disorder or condition ... affecting [her] ... respiratory [system]." 45 CFR § 84.3(j)(2)(i) (1985). This impairment was serious enough to require hospitalization, a fact more than sufficient to establish that one or more of her major life activities were substantially limited by her impairment. Thus, Arline's hospitalization for tuberculosis in 1957 suffices to establish that she has a "record of ... impairment" within the meaning of 29 U.S.C. § 706(7)(B)(ii), and is therefore a handicapped individual.

Petitioners concede that a contagious disease may constitute a handicapping condition to the extent that it leaves a person ****1128** with "diminished physical or mental capabilities," Brief for Petitioners 15, and concede that Arline's hospitalization for tuberculosis in 1957 demonstrates that she has a record of a physical impairment, see Tr. of Oral Arg. 52-53. Petitioners maintain, however, that Arline's record of impairment is irrelevant in this case, since the school board dismissed Arline not because of her diminished physical capabilities, but because of the threat that her relapses of tuberculosis posed to the health of others.[FN6]

> FN6. See Brief for Petitioners 15-16 (Act covers conditions that leave individuals with "diminished physical or mental capabilities," but not conditions that could "impair the health of others"); Pet. for Cert. 13-14 ("[T]he concept of a 'handicap' [should be limited] to physical and mental conditions which result in either a real or perceived diminution of an individual's capabilities.... [A]n individual suffering from a contagious disease may not necessarily suffer from any physical or mental impairments affecting his ability to perform the job in question. In other words, an employer's reluctance to hire such an individual is not due to any real or perceived inability on the individual's part, but rather because of the employer's reluctance to expose its other employees and its clientele to the threat of infection").

***282** We do not agree with petitioners that, in defining a handicapped individual under § 504, the contagious effects of a disease can be meaningfully distinguished from the disease's physical effects on a claimant in a case such as this. Arline's contagiousness and her physical impairment each resulted from the same underlying condition, tuberculosis. It would be unfair to allow an employer to seize upon the distinction between the effects of a disease on others and the effects of a disease on a patient and use that distinction to justify discriminatory treatment.[FN7]

> FN7. The United States argues that it is possible for a person to be simply a carrier of a disease, that is, to be capable of spreading a disease without having a "physical impairment" or suffering from any other symptoms associated with the disease. The United

> States contends that this is true in the case of some carriers of the Acquired Immune Deficiency Syndrome (AIDS) virus. From this premise the United States concludes that discrimination solely on the basis of contagiousness is never discrimination on the basis of a handicap. The argument is misplaced in this case, because the handicap here, tuberculosis, gave rise both to a physical impairment *and* to contagiousness. This case does not present, and we therefore do not reach, the questions whether a carrier of a contagious disease such as AIDS could be considered to have a physical impairment, or whether such a person could be considered, solely on the basis of contagiousness, a handicapped person as defined by the Act.

Nothing in the legislative history of § 504 suggests that Congress intended such a result. That history demonstrates that Congress was as concerned about the effect of an impairment on others as it was about its effect on the individual. Congress extended coverage, in 29 U.S.C. § 706(7)(B)(iii), to those individuals who are simply "regarded as having" a physical or mental impairment.[FN8] The Senate Report provides as an example of a person who would be covered under this subsection "a person with some kind of visible physical impairment which in fact does not substantially limit that person's functioning." S.Rep. No. 93-1297, at 64.[FN9] ***283** Such an impairment might not diminish a person's physical or mental capabilities, but could nevertheless substantially limit that person's ability to work as a result of the ****1129** negative reactions of others to the impairment. [FN10]

> FN8. See n. 4, *supra.*

> FN9. Congress' desire to prohibit discrimination based on the effects a person's handicap may have on others was evident from the inception of the Act. For example, Representative Vanik, whose remarks constitute "a primary signpost on the road toward interpreting the legislative history of § 504," *Alexander v. Choate*, 469 U.S. 287, 295-296, and n. 13, 105 S.Ct. 712, 717-718 and n. 13, 83 L.Ed.2d 661 (1985), cited as an example of improper handicap discrimination a case in which "a court ruled that a cerebral palsied child, who was not a physical threat and was academically competitive, should be excluded from public school, because his teacher claimed his physical appearance 'produced a nauseating effect' on his classmates." 117 Cong.Rec. 45974 (1971). See also 118 Cong.Rec. 36761 (1972) (remarks of Sen. Mondale) (a woman "crippled by arthritis" was denied a job not because she could not do the work but because "college trustees [thought] 'normal students shouldn't see her' "); *id.*, at 525 (remarks of Sen. Humphrey); cf. Macgregor, Some Psycho-Social Problems Associated with Facial Deformities, 16 Am. Sociological Rev. 629 (1961).

> FN10. The Department of Health and Human Services regulations, which include among the conditions illustrative of physical impairments covered by the Act "cosmetic disfigurement," lend further support to Arline's position that the effects of one's impairment on others is as relevant to a determination of whether one is handicapped as is the physical effect of one's handicap on oneself. 45 CFR § 84.3(j)(2)(i)(A) (1985). At oral argument, the United States took the position that a condition such as cosmetic disfigurement could not substantially limit a major life activity within the meaning of the statute, because the only major life activity that it would affect would be the ability to work. The United States recognized that "working" was one of the major life activities listed in the regulations, but said that to argue that a condition that impaired *only* the ability to work was a handicapping condition was to make "a totally circular argument which lifts itself by its bootstraps." Tr. of Oral Arg. 15-16. The argument is not circular, however, but direct. Congress plainly intended the Act to cover persons with a physical or mental impairment (whether actual, past, or perceived) that substantially limited one's ability to work. "[T]he primary goal of the Act is to increase employment of the handicapped." *Consolidated Rail Corporation v. Darrone*, 465 U.S., at 633, at n. 13, 104 S.Ct., at 1254, at n. 13; see also *id.*, at 632, 104 S.Ct., at 1253 ("Indeed, enhancing employment of the handicapped was so much the focus of the 1973 legislation that Congress the next year

felt it necessary to amend the statute to clarify whether § 504 was intended to prohibit other types of discrimination as well").

***284** [2] Allowing discrimination based on the contagious effects of a physical impairment would be inconsistent with the basic purpose of § 504, which is to ensure that handicapped individuals are not denied jobs or other benefits because of the prejudiced attitudes or the ignorance of others. By amending the definition of "handicapped individual" to include not only those who are actually physically impaired, but also those who are regarded as impaired and who, as a result, are substantially limited in a major life activity, Congress acknowledged that society's accumulated myths and fears about disability and disease are as handicapping as are the physical limitations that flow from actual impairment.[FN11] Few aspects of a handicap give rise to the same level of public fear and misapprehension as contagiousness.[FN12] Even those who suffer or have recovered from such noninfectious diseases as epilepsy or cancer have faced discrimination based on the irrational fear that they might be contagious.[FN13] The Act is ***285** carefully structured to replace such reflexive reactions to actual or perceived handicaps with actions based on reasoned and medically sound judgments: the definition of "handicapped individual" is broad, but only those individuals who are both handicapped *and* otherwise qualified are eligible for relief. The fact that *some* persons who have contagious diseases may pose a serious health threat to others under certain circumstances does not justify excluding from the coverage of the Act *all* ****1130** persons with actual or perceived contagious diseases. Such exclusion would mean that those accused of being contagious would never have the opportunity to have their condition evaluated in light of medical evidence and a determination made as to whether they were "otherwise qualified." Rather, they would be vulnerable to discrimination on the basis of mythology-precisely the type of injury Congress sought to prevent.[FN14] We conclude that ***286** the fact that a person with a record of a physical impairment is also contagious does not suffice to remove that person from coverage under § 504.[FN15]

FN11. S.Rep. No. 93-1297, at 50; see n. 4, *supra*. See generally, TenBroek & Matson, 54 Cal.L.Rev., at 814; Strauss, Chronic Illness, in The Sociology of Health and Illness 138, 146-147 (P. Conrad & R. Kern eds. 1981).

FN12. The isolation of the chronically ill and of those perceived to be ill or contagious appears across cultures and centuries, as does the development of complex and often pernicious mythologies about the nature, cause, and transmission of illness. Tuberculosis is no exception. See R. Dubos & J. Dubos, The White Plague (1952); S. Sontag, Illness as Metaphor (1978).

FN13. Senator Humphrey noted the "irrational fears or prejudice on the part of employers or fellow workers" that make it difficult for former cancer patients to secure employment. 123 Cong.Rec. 13515 (1977). See also Feldman, Wellness and Work, in Psychosocial Stress and Cancer 173-200 (C. Cooper ed. 1984) (documenting job discrimination against recovered cancer patients); S. Sontag, *supra*, at 6 ("Any disease that is treated as a mystery and acutely enough feared will be felt to be morally, if not literally, contagious. Thus, a surprisingly large number of people with cancer find themselves being shunned by relatives and friends ... as if cancer, like TB, were an infectious disease"); Dell, Social Dimensions of Epilepsy: Stigma and Response, in Psychopathology in Epilepsy: Social Dimensions 185-210 (S. Whitman & B. Hermann eds. 1986) (reviewing range of discrimination affecting epileptics); Brief for Epilepsy Foundation of America as *Amicus Curiae* 5-14 ("A review of the history of epilepsy provides a salient example that fear, rather than the handicap itself, is the major impetus for discrimination against persons with handicaps").

FN14. Congress reaffirmed this approach in its 1978 amendments to the Act. There, Congress recognized that employers and other grantees might have legitimate reasons not to extend jobs or benefits to drug addicts and alcoholics, but also understood the danger of improper discrimination against such individuals if they were categorically excluded from coverage under the Act. Congress therefore rejected the original House

proposal to exclude addicts and alcoholics from the definition of handicapped individual, and instead adopted the Senate proposal excluding only those alcoholics and drug abusers "whose current use of alcohol or drugs prevents such individual from performing the duties of the job in question or whose employment ... would constitute a direct threat to property or the safety of others." 29 U.S.C. § 706(7)(B). See 124 Cong.Rec. 30322 (1978); Brief for Senator Cranston et al. as *Amici Curiae* 35-36; 43 Op.Atty.Gen. No. 12 (1977).

> This approach is also consistent with that taken by courts that have addressed the question whether the Act covers persons suffering from conditions other than contagious diseases that render them a threat to the safety of others. See, *e. g., Strathie v. Department of Transportation*, 716 F.2d 227, 232-234 (CA3 1983); *Doe v. New York University*, 666 F.2d 761, 775 (CA2 1981).

FN15. The dissent implies that our holding rests only on our "own sense of fairness and implied support from the Act," *post*, at 1132, and that this holding is inconsistent with *Pennhurst State School and Hospital v. Halderman*, 451 U.S. 1, 101 S.Ct. 1531, 67 L.Ed.2d 694 (1981). It is evident, however, that our holding is premised on the plain language of the Act, and on the detailed regulations that implement it, neither of which the dissent discusses and both of which support the conclusion that those with a contagious disease such as tuberculosis may be considered "handicapped" under the Act. We also find much support in the legislative history, while the dissent is unable to find any evidence to support its view. Accordingly, the dissent's construction of the Act to exclude those afflicted with a contagious disease is not only arbitrary (and therefore unfair) but unfaithful to basic canons of statutory construction.

> Nothing in *Pennhurst* requires such infidelity. The statutory provision at issue there was held to be "simply a general statement of 'findings' " and to express "no more than ... a congressional preference for certain kinds of treatment." *Id.*, at 19, 101 S.Ct., at 1541. See *Wright v. Roanoke Redevelopment and Housing Auth.*, 479 U.S. 418, 422, 107 S.Ct. 766, 770, 93 L.Ed.2d 781 (1987). ("In *Pennhurst* ... the statutory provisions were thought to be only statements of 'findings' indicating no more than a congressional preference-at most a 'nudge in the preferred directio [n]' "). The contrast between the congressional preference at issue in *Pennhurst* and the antidiscrimination mandate of § 504 could not be more stark.

Nor is there any reason to think that today's decision will extend the Act beyond manageable bounds. Construing § 504 not to exclude those with contagious diseases will complement rather than complicate state efforts to enforce public health laws. As we state, *infra*, at 1132, courts may reasonably be expected normally to defer to the judgments of public health officials in determining whether an individual is otherwise qualified unless those judgments are medically unsupportable. Conforming employment decisions with medically reasonable judgments can hardly be thought to threaten the States' regulation of communicable diseases. Indeed, because the Act requires employers to respond rationally to those handicapped by a contagious disease, the Act will assist local health officials by helping remove an important obstacle to preventing the spread of infectious diseases: the individual's reluctance to report his or her condition. It is not surprising, then, that in their brief as *amici curiae* in support of respondent, the States of California, Maryland, Michigan, Minnesota, New Jersey, New York, and Wisconsin conclude that "inclusion of communicable diseases within the ambit of Section 504 does not reorder the priorities of state regulatory agencies ... [and] would not alter the balance between state and federal authority." Brief for State of California et al. 30.

***287** IV

[3] The remaining question is whether Arline is otherwise qualified for the job of elementary schoolteacher. To answer this question in most cases, the district court will need to conduct an individualized inquiry and make appropriate findings of fact. Such an inquiry is essential if § 504 ****1131** is to achieve its goal of protecting handicapped individuals from deprivations based on prejudice, stereotypes, or unfounded fear, while giving appropriate weight to such legitimate concerns of grantees as avoiding exposing others to significant health and safety risks.[FN16] The basic factors to be considered in conducting this inquiry are well established.[FN17] In the context***288** of the employment of a person handicapped with a contagious disease, we agree with *amicus* American Medical Association that this inquiry should include

> "[findings of] facts, based on reasonable medical judgments given the state of medical knowledge, about (a) the nature of the risk (how the disease is transmitted), (b) the duration of the risk (how long is the carrier infectious), (c) the severity of the risk (what is the potential harm to third parties) and (d) the probabilities the disease will be transmitted and will cause varying degrees of harm." Brief for American Medical Association as *Amicus Curiae* 19.

In making these findings, courts normally should defer to the reasonable medical judgments of public health officials.[FN18] The next step in the "otherwise-qualified" inquiry is for the court to evaluate, in light of these medical findings, whether the employer could reasonably accommodate the employee under the established standards for that inquiry. See n. 17, *supra.*

Because of the paucity of factual findings by the District Court, we, like the Court of Appeals, are unable at this stage of the proceedings to resolve whether Arline is "otherwise qualified" for her job. The District Court made no findings as to the duration and severity of Arline's condition, nor as to the probability that she would transmit the disease. Nor did the court determine whether Arline was contagious at the time she was discharged, or whether the School Board could ***289** have reasonably accommodated her. [FN19] Accordingly, the resolution of whether Arline was

FN16. A person who poses a significant risk of communicating an infectious disease to others in the workplace will not be otherwise qualified for his or her job if reasonable accommodation will not eliminate that risk. The Act would not require a school board to place a teacher with active, contagious tuberculosis in a classroom with elementary schoolchildren. Respondent conceded as much at oral argument. Tr. of Oral Arg. 45.

FN17. "An otherwise qualified person is one who is able to meet all of a program's requirements in spite of his handicap." *Southeastern Community College v. Davis*, 442 U.S. 397, 406, 99 S.Ct. 2361, 2367, 60 L.Ed.2d 980 (1979). In the employment context, an otherwise qualified person is one who can perform "the essential functions" of the job in question. 45 CFR § 84.3(k) (1985). When a handicapped person is not able to perform the essential functions of the job, the court must also consider whether any "reasonable accommodation" by the employer would enable the handicapped person to perform those functions. *Ibid.* Accommodation is not reasonable if it either imposes "undue financial and administrative burdens" on a grantee, *Southeastern Community College v. Davis*, 442 U.S., at 412, 99 S.Ct., at 2370, or requires "a fundamental alteration in the nature of [the] program," *id.*, at 410. See 45 CFR § 84.12(c) (1985) (listing factors to consider in determining whether accommodation would cause undue hardship); 45 CFR pt. 84, Appendix A, p. 315 (1985) ("[W]here reasonable accommodation does not overcome the effects of a person's handicap, or where reasonable accommodation causes undue hardship to the employer, failure to hire or promote the handicapped person will not be considered discrimination"); *Davis, supra*, at 410-413, 99 S.Ct., at 2369-2370; *Alexander v. Choate*, 469 U.S., at 299-301, and n. 19, 105 S.Ct., at 720, and n. 19; *Strathie v. Department of Transportation*, 716 F.2d, at 231.

FN18. This case does not present, and we do not address, the question whether courts should also defer to the reasonable medical judgments of private physicians on which an employer has relied.

otherwise qualified requires further findings of fact.

FN19. Employers have an affirmative obligation to make a reasonable accommodation for a handicapped employee. Although they are not required to find another job for an employee who is not qualified for the job he or she was doing, they cannot deny an employee alternative employment opportunities reasonably available under the employer's existing policies. See n. 17, *supra;* 45 CFR § 84.12 and Appendix A, pp. 315-316 (1985).

****1132** V

[4] We hold that a person suffering from the contagious disease of tuberculosis can be a handicapped person within the meaning of § 504 of the Rehabilitation Act of 1973, and that respondent Arline is such a person. We remand the case to the District Court to determine whether Arline is otherwise qualified for her position. The judgment of the Court of Appeals is

Affirmed.

Chief Justice REHNQUIST, with whom Justice SCALIA joins, dissenting.

In *Pennhurst State School and Hospital v. Halderman*, 451 U.S. 1, 101 S.Ct. 1531, 67 L.Ed.2d 694 (1981), this Court made clear that, where Congress intends to impose a condition on the grant of federal funds, "it must do so unambiguously." *Id.*, at 17, 101 S.Ct., at 1540. This principle applies with full force to § 504 of the Rehabilitation Act, which Congress limited in scope to "those who actually 'receive' federal financial assistance." *United States Department of Transportation v. Paralyzed Veterans of America*, 477 U.S. 597, 605, 106 S.Ct. 2705, 2711, 91 L.Ed.2d 494 (1986). Yet, the Court today ignores this principle, resting its holding on its own sense of fairness and implied support from the Act. *Ante,* at 1128-1130. Such an approach, I believe, is foreclosed not only by *Pennhurst,* but also by our prior decisions interpreting the Rehabilitation Act.

Our decision in *Pennhurst* was premised on the view that federal legislation imposing obligations only on recipients of ***290** federal funds is "much in the nature of a contract." 451 U.S., at 17, 101 S.Ct., at 1539. See also *Board of Education of Hendrick Hudson Central School District v. Rowley*, 458 U.S. 176, 204, n. 26, 102 S.Ct. 3034, 3049, n. 26, 73 L.Ed.2d 690 (1982). As we have stated in the context of the Rehabilitation Act, " 'Congress apparently determined it would require ... grantees to bear the costs of providing employment for the handicapped as a *quid pro quo* for the receipt of federal funds.' " *United States Department of Transportation v. Paralyzed Veterans of America, supra,* 477 U.S., at 605, 106 S.Ct., at 2711, quoting *Consolidated Rail Corporation v. Darrone*, 465 U.S. 624, 633, n. 13, 104 S.Ct. 1248, 1254, n. 13, 79 L.Ed.2d 568 (1984). The legitimacy of this *quid pro quo* rests on whether recipients of federal funds voluntarily and knowingly accept the terms of the exchange. *Pennhurst, supra,* 451 U.S., at 17, 101 S.Ct., at 1539. There can be no knowing acceptance unless Congress speaks "with a clear voice" in identifying the conditions attached to the receipt of funds. 451 U.S., at 17, 101 S.Ct., at 1539.

The requirement that Congress unambiguously express conditions imposed on federal moneys is particularly compelling in cases such as this where there exists long-standing state and federal regulation of the subject matter. From as early as 1796, Congress has legislated directly in the area of contagious diseases.[FN1] Congress has also, however, left significant leeway to the States, which have enacted a myriad of public health statutes designed to protect against the introduction and spread of contagious diseases.[FN2] When faced ***291** with such extensive regulation, this Court has ****1133** declined to read the Rehabilitation Act expansively. See *Bowen v. American Hospital Assn.*, 476 U.S. 610, 642-647, 106 S.Ct. 2101, 2120-2123, 90 L.Ed.2d 584 (1986); *Alexander v. Choate*, 469 U.S. 287, 303, 307, 105 S.Ct. 712, 721, 723, 83 L.Ed.2d 661 (1985). Absent an expression of intent to the contrary, "Congress ... 'will not be deemed to have significantly changed the federal-state balance.' " *Bowen v. American Hospital Assn., supra,* 476 U.S., at 644, 106 S.Ct., at 2121, quoting *United States v. Bass*, 404 U.S. 336, 349, 92 S.Ct. 515, 523, 30 L.Ed.2d 488 (1971).

FN1. See, *e.g.*, 42 U.S.C. §§ 243, 264; Act of May 27, 1796, ch. 31, 1 Stat. 474; see generally Morgenstern, The Role of the Federal Government in Protecting Citizens from Communicable Diseases, 47 U.Cin.L.Rev. 537 (1978).

FN2. The coverage of state statutes regulating contagious diseases is broad, addressing, *inter alia*, reporting requirements, quarantines, denial of marriage licenses based on the presence of certain diseases, compulsory immunization, and certification and medical testing requirements for school employees. See, *e.g.*, Ariz.Rev.Stat.Ann. § 36.621 *et seq.* (1986) (reporting requirements); Conn.Gen.Stat. §§ 19a-207, 19a-221 (1985) (quarantines); Fla.Stat. §§ 741.051-741.055 (1985) (marriage licenses); Mass.Gen.Laws c. 71 § 55B (1984) (certification requirements for school employees); Miss.Code Ann. § 37-7-301(i) (Supp.1986) (compulsory immunization of school students); W.Va.Code § 16-3-4a (1985) (medical testing).

Applying these principles, I conclude that the Rehabilitation Act cannot be read to support the result reached by the Court. The record in this case leaves no doubt that Arline was discharged because of the contagious nature of tuberculosis, and not because of any diminished physical or mental capabilities resulting from her condition.[FN3] Thus, in the language of § 504, the central question here is whether discrimination on the basis of contagiousness constitutes discrimination "by reason of ... handicap." Because the language of the Act, regulations, and legislative history are ***292** silent on this issue,[FN4] the principles outlined above compel the conclusion that contagiousness is not a handicap within the meaning of § 504. It is therefore clear that the protections of the Act do not extend to individuals such as Arline.

FN3. In testifying concerning his reasons for recommending Arline's termination, petitioner Craig Marsh, Superintendent of Schools of Nassau County, Florida, stated that "I felt like that for the benefit of the total student population and ... personnel in Nassau County and the public benefit, that it would be best if-not to continue or offer Mrs. Arline any employment." App. 62. Marsh added:

> "I am charged and so is the school board, with the responsibility for the protecting, the safety, health and welfare of students, every student in Nassau County. And the record clearly states that, you know, after all-after the third time that I had knowledge of Mrs. Arline's recurring condition, which was infectious at the time of each reoccurrence, that I felt like it [was] in the best interest of the school system of Nassau County that she be dismissed from the classroom." *Id.*, at 81.

Before Arline's termination, Marsh consulted with Dr. Marianne McEuen, who testified that she recommended the termination because of the threat that Arline's condition posed to the health of the small children with whom Arline was in constant contact. *Id.*, at 12-17.

FN4. See, *e.g.*, 29 U.S.C. § 701 *et seq.*; 45 CFR pt. 84 (1985); H.R.Rep. No. 95-1149 (1978); S.Rep. No. 95-890 (1978); S.Rep. No. 93-1297 (1974); H.R.Rep. No. 93-244 (1973); S.Rep. No. 93-318 (1973).

In reaching a contrary conclusion, the Court never questions that Arline was discharged because of the threat her condition posed to others. Instead, it posits that the contagious effects of a disease cannot be "meaningfully" distinguished from the disease's effect on a claimant under the Act. *Ante*, at 1128. To support this position, the Court observes that Congress intended to extend the Act's protections to individuals who have a condition that does not impair their mental and physical capabilities, but limits their major life activities because of the adverse reactions of others. This congressional recognition of a handicap resulting from the reactions of others, we are told, reveals that Congress intended the Rehabilitation Act to regulate discrimination on the basis of contagiousness. *Ante*, at 1129.

This analysis misses the mark in several respects. To begin with, Congress' recognition that an individual may be handicapped under the Act solely by reason of the reactions of others in no way demonstrates that, for the purposes of interpreting the Act, the reactions of others to the condition cannot be considered separately from the effect of the condition on the claimant. In addition, the Court provides no basis for extending the Act's generalized coverage of individuals suffering discrimination as a result of the reactions of others to coverage of individuals with contagious

diseases. Although citing examples of handicapped individuals described in the regulations and legislative history, the Court points to nothing in these materials ****1134** suggesting that Congress contemplated that a person with a condition posing a threat to the health of others may be considered handicapped under ***293** the Act.[FN5] Even in an ordinary case of statutory construction, such meager proof of congressional intent would not be determinative. The Court's evidence, therefore, could not possibly provide the basis for "knowing acceptance" by such entities as the Nassau County School Board that their receipt of federal funds is conditioned on Rehabilitation Act regulation of public health issues. *Pennhurst*, 451 U.S., at 17, 101 S.Ct., at 1539.

FN5. In fact, two of the examples cited by the Court may be read to support a contrary conclusion. The 1978 amendments to the Rehabilitation Act, cited by the majority, *ante*, at 1130, n. 14, specifically exclude from the definition of a handicapped person alcoholics and drug abusers that "constitute a *direct threat to* property or *the safety of others.* " 29 U.S.C. § 706(7)(B) (emphasis added). If anything, this exclusion evinces congressional intent to avoid the Act's interference with public health and safety concerns. See Oversight Hearings on Rehabilitation Act of 1973 before the Subcommittee on Select Education of the House Committee on Education and Labor, 95th Cong., 2d Sess., 503 (1978) (statement of Rep. Hyde) ("Congress needs to give thoughtful and wide-ranging consideration to the needs of handicapped persons, balanced against the realities of public safety, economics, and commonsense"). This intent is also present in the statements of Representative Vanik relied on by the Court. See *ante*, at 1128, n. 9. Representative Vanik expressed apparent disapproval of a court ruling that " 'a cerebral palsied child, *who was not a physical threat* and was academically competitive, should be excluded from public school, because his teacher claimed his physical appearance "produced a nauseating effect" on his classmates.' " *Ante*, at 1128, n. 9, quoting 117 Cong.Rec. 45974 (1971) (emphasis added).

In *Alexander v. Choate, supra*, 469 U.S., at 299, 105 S.Ct., at 720, this Court stated that "[a]ny interpretation of § 504 must ... be responsive to two powerful but countervailing considerations-the need to give effect to the statutory objectives and the desire to keep § 504 within manageable bounds." The Court has wholly disregarded this admonition here.

END OF DOCUMENT

Supreme Court of the United States
B. T. SHELTON et al., Appellants,
v.
Everett TUCKER, Jr., etc., et al.
Max CARR et al., Petitioners,
v.
R. A. YOUNG et al.

Nos. 14, 83.
Argued Nov. 7, 1960.
Decided Dec. 12, 1960.

Actions in state court and federal court brought by schoolteachers and others challenging constitutionality of state statute requiring teachers in public schools to file affidavits giving names and addresses of all organizations to which they had belonged or contributed within the preceding five years as a prerequisite to employment. From adverse judgment of the United States District Court for the Eastern District of Arkansas, Western Division, 174 F.Supp. 351, the plaintiffs appealed and to review the judgment of the Supreme Court of Arkansas, 331 S.W.2d 701, affirming an adverse decree of the Chancery Court, First Division, Pulaski County, the plaintiffs petitioned for certiorari. The United States Supreme Court, Mr. Justice Stewart, held that statute compelling every teacher as a condition of employment in state-supported school or college, to file annually an affidavit listing without limitation every organization to which he has belonged or regularly contributed within the preceding five years, was unconstitutional as to teachers, who were hired on a year-to-year basis and were not covered by a civil service system and who had no job security beyond the end of each school year.

Judgments reversed.

Mr. Justice Frankfurter, Mr. Justice Harlan, Mr. Justice Whittaker, and Mr. Justice Clark, dissented.

Mr. Justice STEWART delivered the opinion of the Court.

[1] An Arkansas statute compels every teacher, as a condition of employment in a state-supported school or college, to file annually an affidavit listing without limitation every organization to which he has belonged or regularly contributed within the preceding five years. At issue in these two cases is the validity of that statute under the Fourteenth Amendment to the Constitution. No. 14 is an appeal from the judgment of a three-judge Federal District Court upholding the statute's validity, 174 F.Supp. 351. No. 83 is here on writ of certiorari to the Supreme Court of Arkansas, which also held the statute constitutionally valid. 231 Ark. 641, 331 S.W.2d 701.

The statute in question is Act 10 of the Second Extraordinary Session of the Arkansas General Assembly of 1958. The provisions of the Act are summarized in the opinion of the District Court as follows (174 F.Supp. 353):

'Act 10 provides in substance that no person shall be employed or elected to employment as a superintendent, principal or teacher in any public school in Arkansas, or as an instructor, professor or teacher in any public institution of higher learning in that State until such person shall have submitted to the appropriate***481** hiring authority an affidavit listing all organizations to which he at the time belongs and to which he has belonged during the past five years, and also listing all organizations to which he at the time is paying regular dues or is making regular contributions, or to which within the past five years he has paid such dues or made such contributions. The Act further provides, among other things, that any contract entered into with any person who has not filed the prescribed affidavit shall be void; that no public moneys shall be paid to such person as compensation for his services; and that any such funds so paid may be recovered back either from the person receiving such funds or from the board of trustees or other governing body making the payment. The filing of a false affidavit is denounced as perjury, punishable by a fine of not less than five hundred nor more than one thousand dollars, and, in addition, the person filing the false affidavit is to lose his teaching license.' 174 F.Supp. 353-354.[FN1]

FN1. The statute is in seven sections. Section 1 provides: 'It is hereby declared that the purpose of this act is to provide assistance in the administration and financing of the public schools of Arkansas, and institutions of higher learning supported wholly or in part by public funds, and it is hereby determined that it will be beneficial to the public schools and institutions of higher learning and the State of Arkansas, if certain affidavits of membership are required as hereinafter provided.'

Section 2 provides: 'No superintendent, principal, or teacher shall be employed or elected in any elementary or secondary school by the district operating such school, and no instructor, professor, or other teacher shall be employed or elected in any institution of higher learning, or other educational institution supported wholly or in part by public funds, by the trustees or governing authority thereof, until, as a condition precedent to such employment, such superintendent, principal, teacher, instructor or professor shall have filed with such board of trustees or governing authority an affidavit as to the names and addresses of all incorporated and/or unincorporated associations and organizations that such superintendent, principal, teacher, instructor or professor is or within the past five years has been a member of, or to which organization or association such superintendent, principal, teacher, instructor, professor, or other teacher is presently paying, or within the past five years has paid regular dues, or to which the same is making or within the past five years has made regular contributions.'

Section 3 sets out the form of affidavit to be used.

Section 4 provides: 'Any contract entered into by any board of any school district, board of trustees of any institution of higher learning, or other educational institution supported wholly or in part by public funds, or by any governing authority thereof, with any superintendent, principal, teacher, instructor, professor, or other instructional personnel, who shall not have filed the affidavit required in Section 2 hereof prior to the employment or election of such person and prior to the making of such contracts, shall be null and void and no funds shall be paid under said contract to such superintendent, principal, teacher, instructor, professor, or other instructional personnel; any funds so paid under said contract to such superintendent, principal, teacher, instructor, professor, or other instructional personnel, may be recovered from the person receiving the same and/or from the board of trustees or other governing authority by suit filed in the circuit court of the county in which such contract was made, and any judgment entered by such court in such cause of action shall be a personal judgment against the defendant therein and upon the official bonds made by such defendants, if any such bonds be in existence.'

Section 5 provides that a teacher filing a false affidavit shall be guilty of perjury, punishable by a fine, and shall forfeit his license to teach in any school or other institution of learning supported wholly or in part by public funds.

Section 6 is a separability provision.

Section 7 is an emergency clause, reading in part as follows:

'It is hereby determined that the decisions of the United States Supreme Court in the school segregation cases require solution of a great variety of local public school problems of considerable complexity immediately and which involve the health, safety and general welfare of the people of the State of Arkansas, and that the purpose of this act is to assist in the solution of these problems and to provide for the more efficient administration of public education.'

****249 *482** These provisions must be considered against the existing system of teacher employment required by Arkansas law. Teachers there are hired on a year-to-year basis. They are not covered by a civil

service system, and they have no job security beyond the end of each school year. The closest approach to tenure is a statutory provision for the automatic renewal of a teacher's contract if he is not notified within ten days after the end of a school year that the contract has not been renewed. Ark.1947 Stat.Ann. s 80-1304(b) (1960); Wabbaseka School District No. 7 of Jefferson County v. Johnson, 225 Ark. 982, 286 S.W.2d 841.

The plaintiffs in the Federal District Court (appellants here) were B. T. Shelton, a teacher employed in the Little Rock Public School System, suing for himself and others similarly situated, together with the Arkansas Teachers Association and its Executive Secretary, suing for the benefit of members of the Association. Shelton had been ***483** employed in the Little Rock Special School District for twenty-five years. In the spring of 1959 he was notified that, before he could be employed for the 1959-1960 school year, he must file the affidavit required by Act 10, listing all his organizational connections over the previous five years. He declined to file the affidavit, and his contract for the ensuing school year was not renewed. At the trial the evidence showed that he was not a member of the Communist Party or of any organization advocating the overthrow of the Government by force, and that he was a member of the National Association for the Advancement of Colored People. The court upheld Act 10, finding the information it required was 'relevant,' and relying on several decisions of this Court, particularly Garner v. Board of Public Works of Los Angeles, 341 U.S. 716, 71 S.Ct. 909, 95 L.Ed. 1317; Adler v. Board of Education, 342 U.S. 485, 72 S.Ct. 380, 96 L.Ed. 517; ***484**250**Beilan v. Board of Higher Education, 357 U.S. 399, 78 S.Ct. 1317, 2 L.Ed.2d 1414; and Lerner v. Casey, 357 U.S. 468, 78 S.Ct. 1311, 2 L.Ed.2d 1423.[FN2]

FN2. In th same proceeding the court held constitutionally invalid an Arkansas statute (Acts 1959, Act 115) making it unlawful for any member of the National Association for the Advancement of Colored People to be employed by the State of Arkansas or any of its subdivisions. 174 F.Supp. 351.

The plaintiffs in the state court proceedings (petitioners here) were Max Carr, an associate professor at the University of Arkansas, and Ernest T. Gephardt, a teacher at Central High School in Little Rock, each suing for himself and others similarly situated. Each refused to execute and file the affidavit required by Act 10. Carr executed an affirmation[FN3] in which he listed his membership in professional organizations, denied ever having been a member of any subversive organization, and offered to answer any questions which the University authorities might constitutionally ask touching upon his qualifications as a teacher. Gephardt filed an affidavit stating that he had never belonged to a subversive organization, disclosing his membership in the Arkansas Education Association and the American Legion, and also offering to answer any questions which the school authorities might constitutionally ask touching upon his qualifications as a teacher. Both were advised that their failure to comply with the requirements of Act 10 would make impossible their re-employment as teachers for the following school year. The Supreme Court of Arkansas upheld the constitutionality of Act 10, on its face and as applied to the petitioners. 231 Ark. 641, 331 S.W.2d 701.

FN3. The affirmation recited that Carr was 'conscientiously opposed to taking an oath or swearing in any form * * *.'

I.

It is urged here, as it was unsuccessfully urged throughout the proceedings in both the federal and state courts, that Act 10 deprives teachers in Arkansas of their ***485** rights to personal, associational, and academic liberty, protected by the Due Process Clause of the Fourteenth Amendment from invasion by state action. In considering this contention, we deal with two basic postulates.

[2][3] First. There can be no doubt of the right of a State to investigate the competence and fitness of those whom it hires to teach in its schools, as this Court before now has had occasion to recognize. 'A teacher works in a sensitive area in a schoolroom. There he shapes the attitude of young minds towards the society in which they live. In this, the state has a vital concern.' Adler v. Board of Education, 342 U.S. 485, 493, 72 S.Ct. 380, 385, 96 L.Ed. 517. There is 'no requirement in the Federal Constitution that a teacher's classroom conduct be the sole basis for determining his fitness. Fitness for teaching depends on a broad range of factors.' Beilan v. Board of Education, 357 U.S. 399, 406, 78 S.Ct. 1317, 1322, 2 L.Ed.2d 1414.

FN4

FN4. The actual holdings in Adler and Beilan, involving the validity of teachers' discharges, are not relevant to the present case.

This controversy is thus not of a pattern with such cases as N.A.A.C.P. v. Alabama, 357 U.S. 449, 78 S.Ct. 1163, 2 L.Ed.2d 1488, and Bates v. Little Rock, 361 U.S. 516, 80 S.Ct. 412, 4 L.Ed.2d 480. In those cases the Court held that there was no substantially relevant correlation between the governmental interest asserted and the State's effort to compel disclosure of the membership lists involved. Here, by contrast, there can be no question of the relevance of a State's inquiry into the fitness and competence of its teachers.FN5

FN5. The declared purpose of Act 10 is 'to provide assistance in the administration and financing of the public schools * * *.' The declared justification for the emergency clause is 'to assist in the solution' of problems raised by 'the decisions of the United States Supreme Court in the school segregation cases.' See note 1. But neither the breadth and generality of the declared purpose nor the possible irrelevance of the emergency provision detracts from the existence of an actual relevant state interest in the inquiry.

****251** [4] Second. It is not disputed that to compel a teacher to disclose his every associational tie is to impair ***486** that teacher's right of free association, a right closely allied to freedom of speech and a right which, like free speech, lies at the foundation of a free society. De Jonge v. Oregon, 299 U.S. 353, 364, 57 S.Ct. 255, 260, 81 L.Ed. 278; Bates v. Little Rock, supra, 361 U.S. at pages 522-523, 80 S.Ct. at pages 416-417. Such interference with personal freedom is conspicuously accented when the teacher serves at the absolute will of those to whom the disclosure must be made-those who any year can terminate the teacher's employment without bringing charges, without notice, without a hearing, without affording an opportunity to explain.

The statute does not provide that the information it requires be kept confidential. Each school board is left free to deal with the information as it wishes.FN6 The record contains evidence to indicate that fear of public disclosure is neither theoretical nor groundless.FN7 Even if there were no disclosure to the general public, the pressure upon a teacher to avoid any ties which might displease those who control his professional destiny would be constant and heavy. Public exposure, bringing with it the possibility of public pressures upon school boards to discharge teachers who belong to unpopular or minority ***487** organizations, would simply operate to widen and aggravate the impairment of constitutional liberty.

FN6. The record contains an opinion of the State Attorney General that 'it is an administrative determination, to be made by the respective Boards, as to the disclosure of information contained in the affidavits.' The Supreme Court of Arkansas has held only that 'the affidavits need not be opened to public inspection * * *.' 231 Ark. 641, 646, 331 S.W.2d 701, 704. (Emphasis added.)

FN7. In the state court proceedings a witness who was a member of the Capital Citizens Council testified that his group intended to gain access to some of the Act 10 affidavits with a view to eliminating from the school system persons who supported organizations unpopular with the group. Among such organizations he named the American Civil Liberties Union, the Urban League, the American Association of University Professors, and the Women's Emergency Committee to Open Our Schools.

The vigilant protection of constitutional freedoms is nowhere more vital than in the community of American schools. 'By limiting the power of the States to interfere with freedom of speech and freedom of inquiry and freedom of association, the Fourteenth Amendment protects all persons, no matter what their calling. But, in view of the nature of the teacher's relation to the effective exercise of the rights which are safeguarded by the Bill of Rights and by the Fourteenth Amendment, inhibition of freedom of thought, and of action upon thought, in the case of teachers brings the safeguards of those amendments vividly into operation. Such unwarranted inhibition upon the free spirit of teachers * * * has an unmistakable tendency to chill that free play of the spirit which all teachers ought especially to cultivate and practice; it makes for caution and timidity in their

associations by potential teachers.' Wieman v. Updegraff, 344 U.S. 183, 195, 73 S.Ct. 215, 221, 97 L.Ed. 216 (concurring opinion). 'Scholarship cannot flourish in an atmosphere of suspicion and distrust. Teachers and students must always remain free to inquire, to study and to evaluate * * *.' Sweezy v. New Hampshire, 354 U.S. 234, 250, 77 S.Ct. 1203, 1212, 1 L.Ed.2d 1311.

II.

The question to be decided here is not whether the State of Arkansas can ask certain of its teachers about all their organizational relationships. It is not ****252** whether the State can ask all of its teachers about certain of their associational ties. It is not whether teachers can be asked how many organizations they belong to, or how much time they spend in organizational activity. The question is whether the State can ask every one of its teachers to disclose every single organization with which he has ***488** been associated over a five-year period. The scope of the inquiry required by Act 10 is completely unlimited. The statute requires a teacher to reveal the church to which he belongs, or to which he has given financial support. It requires him to disclose his political party, and every political organization to which he may have contributed over a five-year period. It requires him to list, without number, every conceivable kind of associational tie-social, professional, political, avocational, or religious. Many such relationships could have no possible bearing upon the teacher's occupational competence or fitness.

[5] In a series of decisions this Court has held that, even though the governmental purpose be legitimate and substantial, that purpose cannot be pursued by means that broadly stifle fundamental personal liberties when the end can be more narrowly achieved.[FN8] The breadth of legislative abridgment must be viewed in the light of less drastic means for achieving the same basic purpose.[FN9]

FN8. In other areas, involving different constitutional issues, more administrative leeway has been thought allowable in the interest of increased efficiency in accomplishing a clearly constitutional central purpose. See Purity Extract & Tonic Co. v. Lynch, 226 U.S. 192, 33 S.Ct. 44, 57 L.Ed. 184; Jacob Ruppert, Inc. v. Caffey, 251 U.S. 264, 40 S.Ct. 141, 64 L.Ed. 260; Schlesinger v. Wisconsin, 270 U.S. 230, 241, 46 S.Ct. 260, 262, 70 L.Ed. 557 (dissenting opinion); Queenside Hills Realty Co. v. Saxl, 328 U.S. 80, 83, 66 S.Ct. 850, 851, 90 L.Ed. 1096. But cf. Dean Milk Co. v. Madison, 340 U.S. 349, 71 S.Ct. 295, 95 L.Ed. 329.

FN9. See Freund, Competing Freedoms in American Constitutional Law, 13 U. of Chicago Conference Series 26, 32-33; Richardson, Freedom of Expression and the Function of Courts, 65 Harv.L.Rev. 1, 6, 23-24; Comment, Legislative Inquiry into Political Activity: First Amendment Immunity From Committee Interrogation, 65 Yale L.J. 1159, 1173-1175.

In Lovell v. Griffin, 303 U.S. 444, 58 S.Ct. 666, 82 L.Ed. 949, the Court invalidated an ordinance prohibiting all distribution of literature at any time or place in Griffin, Georgia, without a license, pointing out that so broad an interference was unnecessary to accomplish legitimate municipal aims. In ***489** Schneider v. State, 308 U.S. 147, 60 S.Ct. 146, 150, 84 L.Ed. 155, the Court dealt with ordinances of four different municipalities which either banned or imposed prior restraints upon the distribution of handbills. In holding the ordinances invalid, the Court noted that where legislative abridgment of 'fundamental personal rights and liberties' is asserted, 'the courts should be astute to examine the effect of the challenged legislation. Mere legislative preferences or beliefs respecting matters of public convenience may well support regulation directed at other personal activities, but be insufficient to justify such as diminishes the exercise of rights so vital to the maintenance of democratic institutions.' 308 U.S. at page 161, 60 S.Ct. at page 151. In Cantwell v. Connecticut, 310 U.S. 296, 60 S.Ct. 900, 84 L.Ed. 1213, the Court said that '(c)onduct remains subject to regulation for the protection of society,' but pointed out that in each case 'the power to regulate must be so exercised as not, in attaining a permissible end, unduly to infringe the protected freedom.' 310 U.S. at page 304, 60 S.Ct. at page 903. Illustrations of the same constitutional principle are to be found in many other decisions of the Court, among them, Martin v. Struthers, 319 U.S. 141, 63 S.Ct. 862, 87 L.Ed. 1313; ****253**Saia v. New York, 334 U.S. 558, 68 S.Ct. 1148, 92 L.Ed. 1574; and Kunz v. New York, 340 U.S. 290, 71 S.Ct. 312, 95 L.Ed. 280.

As recently as last Term we held invalid an ordinance prohibiting the distribution of handbills because the breadth of its application went far beyond what was necessary to achieve a legitimate governmental purpose. Talley v. California, 362 U.S. 60, 80 S.Ct. 536, 4 L.Ed.2d 559. In that case the Court noted that it had been 'urged that this ordinance is aimed at providing a way to identify those responsible for fraud, false advertising and libel. Yet the ordinance is in no manner so limited * * *. Therefore we do not pass on the validity of an ordinance limited to prevent these or any other supposed evils. This ordinance simply bars all handbills under all circumstances anywhere that do not have the names and addresses printed on them in the place the ordinance requires.' 362 U.S. at page 64, 80 S.Ct. at page 538.

***490** The unlimited and indiscriminate sweep of the statute now before us brings it within the ban of our prior cases. The statute's comprehensive interference with associational freedom goes far beyond what might be justified in the exercise of the State's legitimate inquiry into the fitness and competency of its teachers. The judgments in both cases must be reversed.

It is so ordered.

Judgments reversed.

Mr. Justice FRANKFURTER, dissenting.

As one who has strong views against crude intrusions by the state into the atmosphere of creative freedom in which alone the spirit and mind of a teacher can fruitfully function, I may find displeasure with the Arkansas legislation now under review. But in maintaining the distinction between private views and constitutional restrictions, I am constrained to find that it does not exceed the permissible range of state action limited by the Fourteenth Amendment. By way of emphasis I therefore add a few words of the dissent of Mr. Justice HARLAN, in which I concur.

It is essential, at the outset, to establish what is not involved in this litigation:

(1) As the Court recognizes, this is not a case where, as in N.A.A.C.P. v. Alabama, 357 U.S. 449, 78 S.Ct. 1163, 2 L.Ed.2d 1488, and Bates v. Little Rock, 361 U.S. 516, 80 S.Ct. 412, 4 L.Ed.2d 480, a State, asserting the power to compel disclosure of organizational affiliations, can show no rational relation between disclosure and a governmental interest justifying it. Those cases are relevant here only because of their recognition that an interest in privacy, in nondisclosure, may under appropriate circumstances claim constitutional protection. The question here is whether that interest is overborne by a countervailing public interest. To this concrete, limited question-whether the State's interest in knowing the nature ***491** of the organizational activities of teachers employed by it or by institutions which it supports, as a basis for appraising the fitness of those teachers for the positions which they hold, outweighs the interest recognized in N.A.A.C.P. and Bates-those earlier decisions themselves give no answer.

(2) The Court's holding that the Arkansas statute is unconstitutional does not, apparently, rest upon the threat that the information which it requires of teachers will be revealed to the public. In view of the opinion of the Supreme Court of Arkansas, decision here could not, I believe, turn on a claim that the teachers' affidavits will not remain confidential. That court has expressly said that 'Inasmuch as the validity of the act depends upon its being construed as a bona fide legislative effort to provide school boards with needed information, ****254** it necessarily follows that the affidavits need not be opened to public inspection, for the permissible purpose of the statute is to enlighten the school board alone.' 231 Ark. 641, 646, 331 S.W.2d 701, 704. If the validity of the statute depended on this matter, the pronouncement of the State's highest judicial organ would have to be read as establishing-the earlier view of the State Attorney General notwithstanding-that the statute does not authorize the making public of the affidavits. Even were the Arkansas court's language far more ambiguous than it is, it would be our duty so to understand its opinion, in accordance with the principle that 'So far as statutes fairly may be construed in such a way as to avoid doubtful constitutional questions they should be so construed.' Fox v. Washington, 236 U.S. 273, 277, 35 S.Ct. 383, 384, 59 L.Ed. 573.

(3) This is not a case in which Lovell v. Griffin, 303 U.S. 444, 58 S.Ct. 666, 82 L.Ed. 949; Cantwell v. Connecticut, 310 U.S. 296, 60 S.Ct. 900, 84 L.Ed. 1213; Saia v. New York, 334 U.S. 558, 68 S.Ct. 1148, 92 L.Ed. 1574; and Kunz v. New York, 340 U.S. 290,

71 S.Ct. 312, 95 L.Ed. 280, call for condemnation of the 'breadth' of the statute. Those decisions struck down licensing laws ***492** which vested in administrative officials a power of censorship over communications not confined within standards designed to curb the dangers of arbitrary or discriminatory official action. The 'breadth' with which the cases were concerned was the breadth of unrestricted discretion left to a censor, which permitted him to make his own subjective opinions the practically unreviewable measure of permissible speech.[FN1] Nor is this a case of the nature of Thornhill v. Alabama, 310 U.S. 88, 60 S.Ct. 736, 84 L.Ed. 1093, and Herndon v. Lowry, 301 U.S. 242, 57 S.Ct. 732, 81 L.Ed. 1066, [FN2] involving penal statutes which the Court found impermissibly 'broad' in quite another sense. Prohibiting, indiscriminately, activity within and without the sphere of the Fourteenth Amendment's protection of free expression, those statutes had the double vice of deterring the exercise of constitutional freedoms by making the uncertain line of the Amendment's application determinative of criminality and of prescribing indefinite standards of guilt, thereby allowing the potential vagaries and prejudices of juries, effectively insulated against control by reviewing courts, the power to intrude upon the protected sphere. The statute challenged in the present cases involves neither administrative discretion to censor nor vague, overreaching tests of criminal responsibility.

Texas, 318 U.S. 418, 63 S.Ct. 667, 87 L.Ed. 873; Jones v. Opelika, 319 U.S. 103, 63 S.Ct. 890, 87 L.Ed. 1290, vacating 316 U.S. 584, 62 S.Ct. 1231, 86 L.Ed. 1691 (the Opelika ordinance); Niemotko v. Maryland, 340 U.S. 268, 71 S.Ct. 325, 328, 95 L.Ed. 267, 280; Joseph Burstyn, Inc., v. Wilson, 343 U.S. 495, 72 S.Ct. 777, 96 L.Ed. 1098; Gelling v. Texas, 343 U.S. 960, 72 S.Ct. 1002, 96 L.Ed. 1359; Superior Films, Inc., v. Department of Education, 346 U.S. 587, 74 S.Ct. 286, 98 L.Ed. 329; Staub v. Baxley, 355 U.S. 313, 78 S.Ct. 277, 2 L.Ed.2d 302; cf. Marsh v. Alabama, 326 U.S. 501, 66 S.Ct. 276, 90 L.Ed. 265; Tucker v. Texas, 326 U.S. 517, 66 S.Ct. 274, 90 L.Ed. 274. The common-law count in the Cantwell case involved considerations similar to those which were determinative of the decisions cited in text and note, at note 2, infra.

FN2. See also Stromberg v. California, 283 U.S. 359, 51 S.Ct. 532, 75 L.Ed. 1117; Winters v. New York, 333 U.S. 507, 68 S.Ct. 665, 92 L.Ed. 840.

***493** Where state assertions of authority are attacked as impermissibly restrictive upon thought, expression, or association, the existence vel non of other possible less restrictive means of achieving the ****255** object which the State seeks is, of course, a constitutionally relevant consideration. This is not because some novel, particular rule of law obtains in cases of this kind. Whenever the reasonableness and fairness of a measure are at issue-as they are in every case in which this Court must apply the standards of reason and fairness, with the appropriate scope to be given those concepts, in enforcing the Due Process Clause of the Fourteenth Amendment as a limitation upon state action-the availability or unavailability of alternative methods of proceeding is germane. Thus, a State may not prohibit the distribution of literature on its cities' streets as a means of preventing littering, when the same end might be achieved with only slightly greater inconvenience by applying the sanctions of the penal law not to the pamphleteer who distributes the paper but to the recipient who crumples it and throws it away. Hague v. C.I.O., 307 U.S. 496, 59 S.Ct. 954, 83 L.Ed. 1423; Schneider v. State, 308 U.S. 147, 60 S.Ct. 146, 84 L.Ed. 155; Jamison v. Texas, 318 U.S. 413, 63 S.Ct. 669, 87 L.Ed. 869. Nor may a State protect its population from the dangers and incitements of salacious books by restricting the reading matter of adults to that which would be harmless to the susceptible mind of a child. Butler v. Michigan, 352 U.S. 380, 77 S.Ct. 524, 1 L.Ed.2d 412. And see De Jonge v. Oregon, 299 U.S. 353, 57 S.Ct. 255, 81 L.Ed. 278; Talley v. California, 362 U.S. 60, 80 S.Ct. 536, 4 L.Ed.2d 559.[FN3] But the consideration ***494** of feasible alternative modes of regulation in these cases did not imply that the Court might substitute its own choice among alternatives for that of a state legislature, or that the States were to be restricted to the 'narrowest' workable means of accomplishing an end. See Prince v. Massachusetts, 321 U.S. 158, 169-170, 64 S.Ct. 438, 443-444, 88 L.Ed. 645. Consideration of alternatives may focus the precise exercise of state legislative authority which is tested in this Court by the standard of reasonableness, but it does

not alter or displace that standard. The issue remains whether, in light of the particular kind of restriction upon individual liberty which a regulation entails, it is reasonable for a legislature to choose that form of regulation rather than others less restrictive. To that determination, the range of judgment easily open to a legislature in considering the relative degrees of efficiency of alternative means in achieving the end it seeks is pertinent.

> FN3. Language characterizing state statutes as overly broad has sometimes been found in opinions where it was unnecessary to the result, and merely meant to express the idea that whatever state interest was there asserted as underlying a regulation was insufficient to justify the regulation's application to particular circumstances fairly within the Fourteenth Amendment's protection. Compare Thomas v. Collins, 323 U.S. 516, 65 S.Ct. 315, 89 L.Ed. 430, with Fiske v. Kansas, 274 U.S. 380, 47 S.Ct. 655, 71 L.Ed. 1108. Compare Martin v. Struthers, 319 U.S. 141, 63 S.Ct. 862, 87 L.Ed. 1313, with Breard v. Alexandria, 341 U.S. 622, 71 S.Ct. 920, 95 L.Ed. 1233.

In the present case the Court strikes down an Arkansas statute requiring that teachers disclose to school officials all of their organizational relationships, on the ground that 'Many such relationships could have no possible bearing upon the teacher's occupational competence or fitness.' Granted that a given teacher's membership in the First Street Congregation is, standing alone, of little relevance to what may rightly be expected of a teacher, is that membership equally irrelevant when it is discovered that the teacher is in fact a member of the First Street Congregation and the Second Street Congregation and the Third Street Congregation and the 4-H Club and the 3-H Club and half a dozen other groups? Presumably, a teacher may have so many divers associations, so many divers commitments, that they consume his time and energy and interest at the expense of his ****256** work or even of his professional dedication. Unlike wholly individual interests, organizational connections-because they involve obligations undertaken with relation to other persons***495** -may become inescapably demanding and distracting. Surely, a school board is entitled to inquire whether any of its teachers has placed himself, or is placing himself, in a condition where his work may suffer. Of course, the State might ask: 'To how many organizations do you belong?' or 'How much time do you expend at organizational activity?' But the answer to such questions could reasonably be regarded by a state legislature as insufficient, both because the veracity of the answer is more difficult to test, in cases where doubts as to veracity may arise, than in the case of the answers required by the Arkansas statute, and because an estimate of time presently spent in organizational activity reveals nothing as to the quality and nature of that activity, upon the basis of which, necessarily, judgment or prophesy of the extent of future involvement must be based. A teacher's answers to the questions which Arkansas asks, moreover, may serve the purpose of making known to school authorities persons who come into contact with the teacher in all of the phases of his activity in the community, and who can be questioned, if need be, concerning the teacher's conduct in matters which this Court can certainly not now say are lacking in any pertinence to professional fitness. It is difficult to understand how these particular ends could be achieved by asking 'certain of (the State's) teachers about all their organizational relationships,' or 'all of its teachers about certain of their associational ties,' or all of its teachers how many associations currently involve them, or during how many hours; and difficult, therefore, to appreciate why the Court deems unreasonable and forbids what Arkansas does ask.

If I dissent from the Court's disposition in these cases, it is not that I put a low value on academic freedom. See Wieman v. Updegraff, 344 U.S. 183, 194, 73 S.Ct. 215, 220, 97 L.Ed. 216 (concurring opinion); Sweezy v. New Hampshire, 354 U.S. 234, 255, 77 S.Ct. 1203, 1214, 1 L.Ed.2d 1311 (concurring opinion). It is because that very freedom ***496** in its most creative reaches, is dependent in no small part upon the careful and discriminating selection of teachers. This process of selection is an intricate affair, a matter of fine judgment, and if it is to be informed, it must be based upon a comprehensive range of information. I am unable to say, on the face of this statute, that Arkansas could not reasonably find that the information which the statute requires-and which may not be otherwise acquired than by asking the question which it asks-is germane to that selection. Nor, on this record, can I attribute to the State a purpose to employ the enactment as a device for the accomplishment of what is constitutionally forbidden. Of course, if the information gathered by the required affidavits is used

to further a scheme of terminating the employment of teachers solely because of their membership in unpopular organizations, that use will run afoul of the Fourteenth Amendment. It will be time enough, if such use is made, to hold the application of the statute unconstitutional. See Yick Wo v. Hopkins, 118 U.S. 356, 6 S.Ct. 1064, 30 L.Ed. 220. Because I do not find that the disclosure of teachers' associations to their school boards is, without more, such a restriction upon their liberty, or upon that of the community, as to overbalance the State's interest in asking the question, I would affirm the judgments below.

I am authorized to say that Mr. Justice CLARK, Mr. Justice HARLAN and Mr. Justice WHITTAKER agree with this opinion.

Mr. Justice HARLAN, whom Mr. Justice FRANKFURTER, Mr. Justice CLARK and Mr. Justice WHITTAKER join, dissenting.

****257** Of course this decision has a natural tendency to enlist support, involving as it does an unusual statute that touches constitutional rights whose protection in the context of the racial situation in various parts of the country ***497** demands the unremitting vigilance of the courts. Yet that very circumstance also serves to remind of the restraints that attend constitutional adjudication. It must be emphasized that neither of these cases actually presents an issue of racial discrimination. The statute on its face applies to all Arkansas teachers irrespective of race, and there is no showing that it has been discriminatorily administered.

The issue is whether, consistently with the Fourteenth Amendment, a State may require teachers in its public schools or colleges to disclose, as a condition precedent to their initial or continued employment, all organizations to which they have belonged, paid dues, or contributed within the past five years. Since I believe that such a requirement cannot be said to transgress the constitutional limits of a State's conceded authority to determine the qualifications of those serving it as teachers, I am bound to consider that Arkansas had the right to pass the statute in question, and therefore conceive it my duty to dissent.

The legal framework in which the issue must be judged is clear. The rights of free speech and association embodied in the 'liberty' assured against state action by the Fourteenth Amendment (see De Jonge v. Oregon, 299 U.S. 353, 364, 57 S.Ct. 255, 260, 81 L.Ed. 278; Gitlow v. New York, 268 U.S. 652, 672, 45 S.Ct. 625, 632, 69 L.Ed. 1138, dissenting opinion of Holmes, J.) are not absolute. Near v. Minnesota, 283 U.S. 697, 708, 51 S.Ct. 625, 628, 75 L.Ed. 1357; Whitney v. California, 274 U.S. 357, 373, 47 S.Ct. 641, 647, 71 L.Ed. 1095 (concurring opinion of Brandeis, J.). Where official action is claimed to invade these rights, the controlling inquiry is whether such action is justifiable on the basis of a superior governmental interest to which such individual rights must yield. When the action complained of pertains to the realm of investigation, our inquiry has a double aspect: first, whether the investigation relates to a legitimate governmental purpose; second, whether, judged in the light of that purpose, the questioned***498** action has substantial relevance thereto. See Barenblatt v. United States, 360 U.S. 109, 79 S.Ct. 1081, 3 L.Ed.2d 1115; Uphaus v. Wyman, 360 U.S. 72, 79 S.Ct. 1040, 3 L.Ed.2d 1090.

In the two cases at hand, I think both factors are satisfied. It is surely indisputable that a State has the right to choose its teachers on the basis of fitness. And I think it equally clear, as the Court appears to recognize, that information about a teacher's associations may be useful to school authorities in determining the moral, professional, and social qualifications of the teacher, as well as in determining the type of service for which he will be best suited in the educational system. See Adler v. Board of Education, 342 U.S. 485, 72 S.Ct. 380, 96 L.Ed. 517; Beilan v. Board of Public Education, 357 U.S. 399, 78 S.Ct. 1317, 2 L.Ed.2d 1414; see also Slochower v. Board of Higher Education, 350 U.S. 551, 76 S.Ct. 637, 100 L.Ed. 692. Furthermore, I take the Court to acknowledge that, agreeably to our previous decisions, the State may enquire into associations to the extent that the resulting information may be in aid of that legitimate purpose. These cases therefore do not present a situation such as we had in N.A.A.C.P. v. Alabama, 357 U.S. 449, 78 S.Ct. 1163, 2 L.Ed.2d 1488, and Bates v. Little Rock, 361 U.S. 516, 80 S.Ct. 412, 4 L.Ed.2d 480, where the required disclosure bears no substantial relevance to a legitimate state interest.

Despite these considerations this statute is stricken down because, in the Court's view, it is too broad, because it asks more than may be necessary to effectuate the State's legitimate interest. Such a statute, it is said, cannot justify ****258** the inhibition on freedom of association which so blanket an inquiry

may entail. Cf. N.A.A.C.P. v. Alabama, supra; Bates v. Little Rock, supra.

I am unable to subscribe to this view because I believe it impossible to determine a priori the place where the line should be drawn between what would be permissible inquiry and over broad inquiry in a situation like this. Certainly the Court does not point that place out. There can be little doubt that much of the associational information***499** called for by the statute will be of little or no use whatever to the school authorities, but I do not understand how those authorities can be expected to fix in advance the terms of their enquiry so that it will yield only relevant information.

I do not mean to say that alternatives such as an inquiry limited to the names of organizations of whose character the State is presently aware, or to a class of organizations defined by their purposes, would not be more consonant with a decent respect for the privacy of the teacher, nor that such alternatives would be utterly unworkable. I do see, however, that these alternatives suffer from deficiencies so obvious where a State is bent upon discovering everything which would be relevant to its proper purposes, that I cannot say that it must, as a matter of constitutional compulsion, adopt some such means instead of those which have been chosen here.

Finally, I need hardly say that if it turns out that this statute is abused, either by an unwarranted publicizing of the required associational disclosures or otherwise, we would have a different kind of case than those presently before us. See Lassiter v. Northampton Elections Board, 360 U.S. 45, 53-54, 79 S.Ct. 985, 991, 3 L.Ed.2d 1072. All that is now here is the validity of the statute on its face, and I am unable to agree that in this posture of things the enactment can be said to be unconstitutional.

I would affirm in both cases.

U.S. 1960.
Shelton v. Tucker
364 U.S. 479, 81 S.Ct. 247, 5 L.Ed.2d 231

END OF DOCUMENT

Supreme Court of the United States.
W. W. SMITH, Plff. in Err.,
v.
STATE OF TEXAS.

No. 268.
Argued and submitted March 12, 1914.
Decided May 11, 1914.

IN ERROR to the Court of Criminal Appeals of the State of Texas to review a judgment which affirmed a conviction in the County Court of Gregg County, in that state, of having acted as conductor of a freight train without previous experience as freight conductor or brakeman. Reversed and remanded for further proceedings.

See same case below, -- Tex. Crim. Rep. --, 146 S. W. 900.

The facts are stated in the opinion.

Acts Tex. 31st Leg. c. 46, making it a misdemeanor for any person to act as conductor without having served for two years as a freight conductor or brakeman, is unconstitutional.

***631 **682** Messrs. **Gardiner Lathrop** and Robert Dunlap for plaintiff in error.

***632** Mr. **B. F. Looney** Attorney General of Texas, and Mr. Luther Nickels for defendant in error.

***635** Mr. Justice **Lamar** delivered the opinion of the court:

W. W. Smith, the plaintiff in error, a man forty-seven years of age, had spent twenty-one years in the railroad business. He had never been a brakeman or a conductor, but for six years he served as fireman, for three years ran as extra engineer on a freight train, for eight years was engineer on a mixed train, hauling freight and passengers, and for four years had been engineer on a passenger train of the Texas & Gulf Railway. On July 22, 1910, he acted as conductor of a

freight train running between two Texas towns on that road. There is no claim in the brief for the state that he was not competent to perform the duties of that position. On the contrary, it affirmatively and without contradiction appeared that the plaintiff in error, like other locomotive engineers, was familiar with the duties of that position, and was competent to discharge them with skill and efficiency. He was, however, found guilty of the offense of violating the Texas statute which makes it unlawful for any person to act[FN†] as conductor of a freight train without having ***636** previously served for two years as conductor or brakeman on such trains. On that verdict he was sentenced to pay a fine, and the judgment having been affirmed, the case is here on a record in which he contends that the statute under which he was convicted violated the provisions of the 14th Amendment.

> FN† Sec. 2. If any person shall act or engage to act as a conductor on a railroad train in this state without having for two (2) years prior thereto served or worked in the capacity of a brakeman or conductor on a freight train on a line of railroad, he shall be deemed guilty of a misdemeanor, and shall be punished by a fine of not less than $25 nor more than $500, and each day he so engages shall constitute a separate offense.
>
> Sec. 3. If any person shall knowingly engage, promote, require, persuade, prevail upon, or cause any person to do any act in violation of the provisions of the two preceding sections of this act, he shall be deemed guilty of a misdemeanor, and shall be punished by a fine of not less than $25 nor more than $500, and each day he so engages shall constitute a separate offense. [Tex. Laws 1909, chap. 46.]

1. Life, liberty, property, and the equal protection of the law, grouped together in the Constitution, are so related that the deprivation of any one of those separate and independent rights may lessen or extinguish the value of the other three. In so far as a man is deprived of the right to labor, his liberty is restricted, his capacity to earn wages and acquire property is lessened, and he is denied the protection which the law affords those who are permitted to work. Liberty means more than freedom from servitude, and the constitutional guaranty is an assurance that the citizen shall be protected in the right to use his powers of mind and body in any lawful calling.

If the service is public, the state may prescribe qualifications and require an examination to test the fitness of any person to engage in or remain in the public calling. Re Lockwood, 154 U. S. 116, 38 L. ed. 929, 14 Sup. Ct. Rep. 1082; Hawker v. New York, 170 U. S. 189, 42 L. ed. 1002, 18 Sup. Ct. Rep. 573; Watson v. Maryland, 218 U. S. 173, 54 L. ed. 987, 30 Sup. Ct. Rep. 644. The private employer may likewise fix standards and tests, but, if his business is one in which the public health or safety is concerned, the state may legislate so as to exclude from work in such private calling those whose incompetence might cause injury to the public. But, as the public interest is the basis of such legislation, the tests and prohibition should be enacted with reference to that object, and so as not unduly to 'interfere with private business, or impose unusual and unnecessary restrictions upon lawful occupations.' Lawton v. Steele, 152 U. S. 137, 38 L. ed. 388, 14 Sup. Ct. Rep. 499.

A discussion of legislation of this nature is found in Nashville, C. & St. L. R. Co. v. Alabama, 128 U. S. 98, 32 L. ed. 353, 2 Inters. Com. Rep. 238, 9 Sup. Ct. Rep. 28, where this court sustained the validity of a statute which required ***637** all locomotive engineers to submit to an examination for color blindness, and then provided that those ****683** unable to distinguish signals should not act as engineers on railroad trains. That statute did not prevent any competent person from being employed, but operated merely to exclude those who, on examination, were found to be physically unfit for the discharge of a duty where defective eyesight was almost certain to cause loss of life or limb. Another case cited by the plaintiff in error is that of Dent v. West Virginia, 129 U. S. 114, 32 L. ed. 623, 9 Sup. Ct. Rep. 231. The act there under review provided that no one except licensed physicians should be allowed to practise medicine, and declared that licenses should be issued by the state board of health only to those (1) who were graduates of a reputable medical college; (2) to those who had practised medicine continuously for ten years; or (3) to those who, after examination, were found qualified to practice. Ten years' experience was accepted as proof of fitness, but such experience was not made the sole test, since the privilege of practising was attainable by all others who, by producing a diploma or by standing an examination, could show that they were qualified for the performance of the duties of the profession. In answer

to the contention that the act was void because it deprived the citizen of the liberty to contract and the right to labor, the court said no objection could be raised to the statutory requirements 'because of their stringency or difficulty. It is only when they have no relation to such calling or profession, or are unattainable by such reasonable study and application, that they can operate to deprive one of his right to pursue a lawful vocation.'

The necessity of avoiding the fixing of arbitrary tests by which competent persons would be excluded from lawful employment is also recognized in Smith v. Alabama, 124 U. S. 465, 480, 31 L. ed. 508, 513, 1 Inters. Com. Rep. 804, 8 Sup. Ct. Rep. 564. There the act provided that all engineers should secure a license, and in sustaining the ***638** validity of the statute the court pointed out that the law 'requires that every locomotive engineer shall have a license, but it does not limit the number of persons who may be licensed, or prescribe any arbitrary conditions of the grant.' This and the other cases establish, beyond controversy, that, in the exercise of the police power, the state may prescribe tests and require a license from those who wish to engage in or remain in a private calling affecting the public safety. The liberty of contract is, of course, not unlimited; but there is no reason or authority for the proposition that conditions may be imposed by statute which will admit some who are competent and arbitrarily exclude others who are equally competent to labor on terms mutually satisfactory to employer and employee. None of the cases sustains the proposition that, under the power to secure the public safety, a privileged class can be created and be then given a monopoly of the right to work in a special or favored position. Such a statute would shut the door, without a hearing, upon many persons and classes of persons who were competent to serve, and would deprive them of the liberty to work in a calling they were qualified to fill with safety to the public and benefit to themselves.

2. The statute here under consideration permits those who had been freight conductors for two years before the law was passed, and those who for two years have been freight conductors in other states, to act in the same capacity in the state of Texas. But barring these exceptional cases, the act permits brakemen of freight trains to be promoted to the position of conductor on a freight train, but excludes all other citizens of the United States from the right to engage in such service. The statute does not require the brakeman to prove his fitness, though it does prevent all others from showing that they are competent. The act prescribes no other qualification for appointment as conductor than that for two years the ***639** applicant should have been a brakeman on a freight train, but affords no opportunity to any others to prove their fitness. It thus absolutely excludes the whole body of the public, including many railroad men, from the right to secure employment as conductor on a freight train.

For it is to be noted that under this statute, not only the general public, but also four classes of railroad men, familiar with the movement and operation of trains, and having the same kind of experience as a brakeman, are given no chance to show their competency, but are arbitrarily denied the right to act as conductors. The statute excludes firemen and engineers of all trains, and all brakemen and conductors of passenger trains. But no reason is suggested why a brakeman on a passenger train should be denied the right to serve in a position that the brakeman on a freight train is permitted to fill. Both have the same class of work to do, both acquire the same familiarity with rules, signals, and methods of ****684** moving and distributing cars, and if the training of one qualifies him to serve as conductor, the like training of the other should not exclude him from the right to earn his living in the same occupation.

It is argued in the brief for the state that, in practice, brakemen on freight trains are generally promoted to the position of freight conductors, and then to the position of conductors on passenger trains. And yet, under this act, even passenger conductors of the greatest experience and highest capacity would be punished if they acted as freight conductors without having previously been brakemen.

The statute not only prevents experienced and competent men in the passenger service from acting as freight conductors, but it excludes the engineer on a freight train,-even thought, under the rules of all railroads, the freight engineer now acts as conductor in the event the regular conductor is disable *en route*. This general custom***640** is a practical recognition of their qualification, and is founded on the fact that the engineer, by virtue of his position, is familiar with the rules and signals relating to the train's movement, and peculiarly qualified for the performance of the duties

of conductor. If we cannot take judicial knowledge of these facts, the record contains affirmative proof on the subject. For, according to the testimony FN† of the state's witness, 'acting as engineer on ***641** a freight train would better acquaint one with the knowledge of how to operate a freight train than acting as brakeman.' And yet, though at least equally competent, the engineer is denied the right to serve as conductor, and the exclusive right of appointment and promotion to that position is conferred upon brakemen.

> FN† I understand the railroad business, and know that a locomotive engineer learns as much about how a freight train should be operated by a conductor as a brakeman or conductor. Acting as engineer on a freight train will better acquaint one with a knowledge of how to operate a freight train than acting as brakeman. Under the rules of all railroads, and of the Texas & Gulf Railway Company, the engineer is held equally responsible with the conductor for the safe operation of the train. All orders are given to the engineer as well as to the conductor. Every order sent to a conductor in a train is made in duplicate, and one copy of it is given to the conductor and the other to the engineer. It is a rule with railway companies that if anything should happen to disable the conductor, or in any way prevent his proceeding with his train, the engineer is to immediately take charge of the train and handle it into the terminal. The engineer is constantly with the train and knows all of the signals, knows how the couplings are made, knows how the cars are switched and distributed, and knows how they are taken into the train and transported from one place to another. An engineer is so constantly associated with all the work of a conductor on a freight train that he should know as much about how a freight train should be operated by a conductor as the conductor himself. All actions of the conductor that pertain to the safe operation of the train are being carried on in his presence and within his observation all the time. The matter of handling the way bills and ascertaining the destinations of the cars in his train is easy and plain, and it does not take a person that has had experience as a conductor to understand that part of his service. The way bills are plainly written and the destinations plainly given, and booking the waybills and delivering them with the cars is clerical, and can be done by anyone that can read and write and who has ordinary sense. Every act that is to be done by the engineer, and all of the conductor's acts with reference to this are in the view and observation of the engineer.

3. So that the case distinctly raises the question as to whether a statute, in permitting certain competent men to serve, can lay down a test which absolutely prohibits other competent men from entering the same private employment. It would seem that to ask the question is to answer,-and the answer in no way denies the right of the state to require examinations to test the fitness and capacity of brakemen, firemen, engineers, and conductors to enter upon a service fraught with so much of risk to themselves and to the public. But all men are entitled to the equal protection of the law in their right to work for the support of themselves and families. A statute which permits the brakeman to act,-because he is presumptively competent,-and prohibits the employment of engineers and all others who can affirmatively prove that they are likewise competent, is not confined to securing the public safety, but denies to many the liberty of contract granted to brakemen, and operates to establish rules of promotion in a private employment.

If brakemen only are allowed the right of appointment to the position of conductors, then a privilege is given to them which is denied all other citizens of the United States. If the statute can fix the class from which conductors on freight trains shall be taken, another statute could limit the class from which brakeman and conductors on passenger trains could be selected, and so, progressively, the whole matter as to who could enter the railroad service, and who could go from one position to another, would be regulated by statute. In the nature of ****685** the case, promotion is a matter of private business management, and ***642** should be left to the carrier company, which, bound to serve the public, is held to the exercise of diligence in selecting competent men, and responsible in law for the acts of those who fill any of these positions.

4. There was evidence that Smith safely and properly operated the train which had in it cars containing freight destined for points in Texas, Missouri, Oklahoma, and Kansas. But in view of what has been

said it is not necessary to consider whether the plaintiff, as engineer, was in a position to raise the point that, under the decision in the Adams Express Case (Platt v. New York, 232 U. S. 35, 58 L. ed. 492, 34 Sup. Ct. Rep. 209) the statute interfered with interstate commerce. The judgment is reversed and the case remanded to the Court of Criminal Appeals of the State of Texas for further proceedings not inconsistent with this opinion.

Reversed.

Mr. Justice **Holmes** dissents.

Smith v. State of Texas
L.R.A. 1915D,677, 233 U.S. 630, 34 S.Ct. 681, 58 L.Ed. 1129, Am.Ann.Cas. 1915D,420

END OF DOCUMENT

Supreme Court of the United States
Joseph VITEK, etc., et al., Applicants,
v.
Larry D. JONES.

No. 78-1155.
Argued Dec. 3, 1979.
Decided March 25, 1980.

An action was brought challenging the constitutionality, on procedural due process grounds, of Nebraska statute allowing the Director of Correctional Services to transfer a prisoner to a mental hospital if a designated physician or psychologist finds the prisoner to be suffering from a mental disease or defect that cannot be given proper treatment in prison. The Nebraska District Court, Urbom, Chief Judge, 437 F.Supp. 569, declared the statute unconstitutional. On appeal after remand of the case to the District Court for consideration of question of mootness, 436 U.S. 407, 98 S.Ct. 2276, 56 L.Ed.2d 381, the Supreme Court, Mr. Justice White, held, inter alia, that: (1) the case was not moot; (2) the involuntary transfer of a prisoner to a mental hospital implicates a liberty interest protected by the Fourteenth Amendment's due process clause; and (3) the District Court properly identified and weighed the relevant factors in arriving at its judgment of the statute's unconstitutionality.

Judgment affirmed as modified.

Mr. Justice Powell filed an opinion concurring in part.

Mr. Justice Stewart filed a dissenting opinion in which Mr. Chief Justice Burger and Mr. Justice Rehnquist joined.

Mr. Justice Blackmun filed a dissenting opinion.

Counsel should be provided to indigent prisoners whom the state seeks to involuntarily treat as mentally ill. (Per Mr. Justice White, with three Justices concurring.) R.R.S.Neb.1943, § 83-180(1); U.S.C.A.Const. Amend. 14.

****1257** *Syllabus* [FN*]

FN* The syllabus constitutes no part of the opinion of the Court but has been prepared by the Reporter of Decisions for the convenience of the reader. See *United States v. Detroit Lumber Co.*, 200 U.S. 321, 337, 26 S.Ct. 282, 287, 50 L.Ed. 499.

***480** Appellee, a convicted felon, was transferred from state prison to a mental hospital pursuant to a Nebraska statute (§ 83-180(1)) which provides that if a designated physician or psychologist finds that a prisoner "suffers from a mental disease or defect" that "cannot be given proper treatment" in prison, the Director of Correctional Services may transfer the prisoner to a mental hospital. In an action chal-

lenging the constitutionality of § 83-180(1) on procedural due process grounds, the District Court declared the statute unconstitutional as applied to appellee, holding that transferring him to the mental hospital without adequate notice and opportunity for a hearing deprived him of liberty without due process of law contrary to the Fourteenth Amendment, and that such transfers must be accompanied by adequate notice, an adversary hearing before an independent decisionmaker, a written statement by the factfinder of the evidence relied on and the reasons for the decision, and the availability of appointed counsel for indigent prisoners. The court permanently enjoined the State from transferring appellee (who meanwhile had been transferred back to prison) to the mental hospital without following the prescribed procedures. Subsequently, appellee was paroled on condition that he accept mental treatment, but he violated that parole and was returned to prison. Relying on appellee's history of mental illness and the State's representation that he was a serious threat to his own and others' safety, the District Court held that the parole and revocation thereof did not render the case moot because appellee was still subject to being transferred to the mental hospital.

Held : The judgment is affirmed as modified. Pp. 1260-1265; 1265-1267.

Affirmed as modified.

Mr. Justice WHITE delivered the opinion of the Court with respect to Parts I, II, III, IV-A, and V, concluding that:

1. The District Court properly found that the case is not moot. The reality of the controversy between appellee and the State has not been lessened by the cancellation of his parole and his return to prison, where he is protected from further transfer by the District Court's judgment ***481** and injunction. Under these circumstances, it is not "absolutely clear," absent the injunction, that the State's alleged wrongful behavior could not reasonably be expected to recur. P. 1260.

2. The involuntary transfer of appellee to a mental hospital implicates a liberty interest that is protected by the Due Process Clause of the Fourteenth Amendment. Pp. 1261-1264.

(a) The District Court properly identified a liberty interest rooted in § 83-180(1), under which a prisoner could reasonably expect that he would not be transferred to a mental hospital without a finding that he was suffering from a mental illness for which he could not secure adequate treatment in prison. The State's reliance on the opinion of a designated physician or psychologist for determining whether the conditions warranting transfer exist neither removes the prisoner's interest from due process protection nor answers the question of what process is due under the Constitution. Pp. 1261-1262.

(b) The District Court was also correct in holding that, independently of § 83-180(1), the transfer of a prisoner from a prison to a mental hospital must be accompanied by appropriate procedural protections. Involuntary commitment to a mental hospital is not within the range of conditions of confinement to which a prison sentence subjects an individual. While a conviction****1258** and sentence extinguish an individual's right to freedom from confinement for the term of his sentence, they do not authorize the State to classify him as mentally ill and to subject him to involuntary psychiatric treatment without affording him additional due process protections. Here, the stigmatizing consequences of a transfer to a mental hospital for involuntary psychiatric treatment, coupled with the subjection of the prisoner to mandatory behavior modification as a treatment for mental illness, constitute the kind of deprivations of liberty that requires procedural protections. Pp. 1263-1264.

3. The District Court properly identified and weighed the relevant factors in arriving at its judgment. Pp. 1264-1265.

(a) Although the State's interest in segregating and treating mentally ill patients is strong, the prisoner's interest in not being arbitrarily classified as mentally ill and subjected to unwelcome treatment is also powerful, and the risk of error in making the determinations required by § 83-180(1) is substantial enough to warrant appropriate procedural safeguards against error. P. 1264.

(b) The medical nature of the inquiry as to whether or not to transfer a prisoner to a mental hospital does not justify dispensing with due process requirements. P. 1265.

***482** (c) Because prisoners facing involuntary transfer to a mental hospital are threatened with immediate deprivation of liberty interests and because of the risk of mistaken transfer, the District Court properly determined that certain procedural protections, including notice and an adversary hearing, were appropriate in the circumstances present in this case. P. 1265.

Mr. Justice WHITE, joined by Mr. Justice BRENNAN, Mr. Justice MARSHALL, and Mr. Justice STEVENS, concluded in Part IV-B that it is appropriate that counsel be provided to indigent prisoners whom the State seeks to treat as mentally ill. Such a prisoner has an even greater need for legal assistance than does a prisoner who is illiterate and uneducated, because he is more likely to be unable to understand or exercise his rights. P. 1265.

Mr. Justice POWELL concluded that although the State is free to appoint a licensed attorney to represent a prisoner who is threatened with involuntary transfer to a mental hospital, it is not constitutionally required to do so, and that due process will be satisfied so long as such a prisoner is provided qualified and independent assistance. Pp. 1265-1267.

Melvin Kent Kammerlohr, Asst. Atty. Gen. of Neb., Lincoln, Neb., for appellants.

Thomas A. Wurtz, Omaha, Neb., for appellee.

Mr. Justice WHITE delivered the opinion of the Court, except as to Part IV-B.

The question in this case is whether the Due Process Clause of the Fourteenth Amendment entitles a prisoner convicted and incarcerated in the State of Nebraska to certain procedural***483** rotections, including notice, an adversary hearing, and provision of counsel, before he is transferred involuntarily to a state mental hospital for treatment of a mental disease or defect.

I

Nebraska Rev.Stat. § 83-176(2) (1976) authorizes the Director of Correctional Services to designate any available, suitable, and appropriate residence facility or institution as a place of confinement for any state prisoner and to transfer a prisoner from one place of confinement to another. Section 83-180(1), however, provides that when a designated physician or psychologist finds that a prisoner "suffers from a mental disease or defect" and "cannot be given proper treatment in that facility," the director may transfer him for examination, study, and treatment to another institution within or without the Department of Correctional ****1259** Services.[FN1] Any prisoner so transferred to a mental hospital is to be returned to the Department if, prior to the expiration of his sentence, treatment is no longer necessary. Upon expiration of sentence,***484** f the State desires to retain the prisoner in a mental hospital, civil commitment proceedings must be promptly commenced. § 83-180(3).[FN2]

FN1. Section 83-180(1) provides:

> "When a physician designated by the Director of Correctional Services finds that a person committed to the department suffers from a physical disease or defect, or when a physician or psychologist designated by the director finds that a person committed to the department suffers from a mental disease or defect, the chief executive officer may order such person to be segregated from other persons in the facility. If the physician or psychologist is of the opinion that the person cannot be given proper treatment in that facility, the director may arrange for his transfer for examination, study, and treatment to any medical-correctional facility, or to another institution in the Department of Public Institutions where proper treatment is available. A person who is so transferred shall remain subject to the jurisdiction and custody of the Department of Correctional Services and shall be returned to the department when, prior to the expiration of his sentence, treatment in such facility is no longer necessary."

FN2. Section 83-180(3) provides:

> "When two psychiatrists designated by the Director of Correctional Services find that a person about to be released or discharged from any facility suffers from a mental disease or defect of such a nature that his release or discharge will endanger the public safety or the safety of the offender, the director shall transfer him to, or if he has already been transferred, permit him to

> remain in, a psychiatric facility in the Department of Public Institutions and shall promptly commence proceedings applicable to the civil commitment and detention of persons suffering from such disease or defect."

On May 31, 1974, Jones was convicted of robbery and sentenced to a term of three to nine years in state prison. He was transferred to the penitentiary hospital in January 1975. Two days later he was placed in solitary confinement, where he set his mattress on fire, burning himself severely. He was treated in the burn unit of a private hospital. Upon his release and based on findings required by § 83-180 that he was suffering from a mental illness or defect and could not receive proper treatment in the penal complex, he was transferred to the security unit of the Lincoln Regional Center, a state mental hospital under the jurisdiction of the Department of Public Institutions.

Jones then intervened in this case, which was brought by other prisoners against the appropriate state officials (the State) challenging on procedural due process grounds the adequacy of the procedures by which the Nebraska statutes permit transfers from the prison complex to a mental hospital. [FN3] On August 17, 1976, a three-judge District Court, convened ***485** pursuant to 28 U.S.C. § 2281 (1970 ed.),[FN4] denied the State's motion for summary judgment and trial ensued. On September 12, 1977, the District Court declared § 83-180 unconstitutional as applied to Jones, holding that transferring Jones to a mental hospital without adequate notice and opportunity for a hearing deprived him of liberty without due process of law contrary to the Fourteenth Amendment and that such transfers must be accompanied by adequate notice, an adversary hearing before an independent decisionmaker, a written statement by the factfinder of the evidence relied on and the reasons for the decision, and the availability of appointed counsel for indigent prisoners. *Miller v. Vitek*, 437 F.Supp. 569 (D.C.Neb.1977). Counsel was requested to suggest appropriate relief.

> FN3. After initially certifying this case as a class action, the District Court decertified the class, but permitted intervention by three individual plaintiffs, including Jones. The District Court subsequently dismissed the claims of all plaintiffs except Jones, who is the sole appellee in this Court.
>
> FN4. The statute authorizing the convening of a three-judge court, 28 U.S.C. § 2281 (1970 ed.), was repealed by Pub.L.94-381, 90 Stat. 1119, effective for actions commenced after August 12, 1976. Because the instant action was filed on November 12, 1975, the three-judge court was properly convened.

In response to this request, Jones revealed that on May 27, 1977, prior to the ****1260** District Court's decision, he had been transferred from Lincoln Regional Center to the psychiatric ward of the penal complex but prayed for an injunction against further transfer to Lincoln Regional Center. The State conceded that an injunction should enter if the District Court was firm in its belief that the section was unconstitutional. The District Court then entered its judgment declaring § 83-180 unconstitutional as applied to Jones and permanently enjoining the State from transferring Jones to Lincoln Regional Center without following the procedures prescribed in its judgment.

We noted probable jurisdiction 434 U.S. 1060, 98 S.Ct. 1230, 55 L.Ed.2d 760 (1978). Meanwhile, Jones had been paroled, but only on condition that he accept psychiatric treatment at a Veterans' Administration Hospital. We vacated the judgment of the District Court and remanded the case to that court for consideration ***486** of the question of mootness. *Vitek v. Jones*, 436 U.S. 407, 98 S.Ct. 2276, 56 L.Ed.2d 381 (1978). Both the State and Jones at this juncture insisted that the case was not moot. The State represented that because "Jones' history of mental illness indicates a serious threat to his own safety, as well as to that of others . . . there is a very real expectation" that he would again be transferred if the injunction was removed. App. to Juris. Statement 24. Jones insisted that he was receiving treatment for mental illness against his will and that he was continuing to suffer from the stigmatizing consequences of the previous determination that he was mentally ill. On these representations, the District Court found that the case was not moot because Jones "is subject to and is in fact under threat of being transferred to the state mental hospital under § 83-180." *Ibid.* The District Court reinstated its original judgment. We postponed consideration of jurisdiction to a hearing on the merits.

441 U.S. 922, 99 S.Ct. 2029, 60 L.Ed.2d 395 (1979). Meanwhile, Jones had violated his parole, his parole had been revoked, and he had been reincarcerated in the penal complex.

II

[1] We agree with the parties in this case that a live controversy exists and that the case is not moot. Jones was declared to be mentally ill pursuant to § 83-180 and was transferred to a mental hospital and treated. He was later paroled but only on condition that he accept mental treatment. He violated that parole and has been returned to the penal complex. On our remand to consider mootness, the District Court, relying on Jones' history of mental illness and the State's representation that he represented a serious threat to his own safety as well as to that of others, found that Jones "is in fact under threat of being transferred to the state mental hospital under § 83-180." We see no reason to disagree with the District Court's assessment at that time, and the reality of the controversy between Jones and the State has not been lessened by the cancellation of his parole and his return to the state prison, ***487** where he is protected from further transfer by the outstanding judgment and injunction of the District Court. The State, believing that the case is not moot, wants the injunction removed by the reversal of the District Court's judgment. Jones, on the other hand, insists that the judgment of the District Court be sustained and the protection against transfer to a mental hospital, except in accordance with the specified procedures, be retained.

Against this background, it is not "absolutely clear," absent the injunction, "that the allegedly wrongful behavior could not reasonably be expected to recur." *United States v. Phosphate Export Assn.*, 393 U.S. 199, 203, 89 S.Ct. 361, 364, 21 L.Ed.2d 344 (1968); *County of Los Angeles v. Davis*, 440 U.S. 625, 631, 99 S.Ct. 1379, 1383, 59 L.Ed.2d 642 (1979); *United States v. W. T. Grant Co.*, 345 U.S. 629, 633, 73 S.Ct. 894, 897, 97 L.Ed. 1303 (1953). [FN5] Furthermore, as the ****1261** matter now stands, the § 83-180 determination that Jones suffered from mental illness has been declared infirm by the District Court. Vacating the District Court's judgment as moot would not only vacate the injunction against transfer but also the declaration that the procedures employed by the State afforded an inadequate basis for declaring Jones to be mentally ill. In the posture of the case, it is not moot.

FN5. Because Jones has not completed serving his sentence, he remains subject to the transfer procedures he challenges, unlike the plaintiff in *Weinstein v. Bradford*, 423 U.S. 147, 96 S.Ct. 347, 46 L.Ed.2d 350 (1975), where a challenge to parole procedures was held to be moot because plaintiff had completed his sentence and there was no longer any likelihood whatsoever that he would again be subjected to the parole procedures he challenged.

III

[2][3] On the merits, the threshold question in this case is whether the involuntary transfer of a Nebraska state prisoner to a mental hospital implicates a liberty interest that is protected by the Due Process Clause. The District Court held that it did and offered two related reasons for its conclusion. The District Court first identified a liberty interest rooted in ***488** § 83-180(1), under which a prisoner could reasonably expect that he would not be transferred to a mental hospital without a finding that he was suffering from a mental illness for which he could not secure adequate treatment in the correctional facility. Second, the District Court was convinced that characterizing Jones as a mentally ill patient and transferring him to the Lincoln Regional Center had "some stigmatizing" consequences which, together with the mandatory behavior modification treatment to which Jones would be subject at the Lincoln Center, constituted a major change in the conditions of confinement amounting to a "grievous loss" that should not be imposed without the opportunity for notice and an adequate hearing. We agree with the District Court in both respects.

A

[4] We have repeatedly held that state statutes may create liberty interests that are entitled to the procedural protections of the Due Process Clause of the Fourteenth Amendment. There is no "constitutional or inherent right" to parole, *Greenholtz v. Nebraska Penal Inmates*, 442 U.S. 1, 7, 99 S.Ct. 2100, 2103, 60 L.Ed.2d 668 (1979), but once a State grants a prisoner the conditional liberty properly dependent on the observance of special parole restrictions, due process protections attach to the decision to revoke parole. *Morrissey v. Brewer*, 408 U.S. 471, 92 S.Ct. 2593, 33 L.Ed.2d 484 (1972). The same is true of the revocation of probation. *Gagnon v. Scarpelli*, 411 U.S.

778, 93 S.Ct. 1756, 36 L.Ed.2d 656 (1973). In *Wolff v. McDonnell*, 418 U.S. 539, 94 S.Ct. 2963, 41 L.Ed.2d 935 (1974), we held that a state-created right to good-time credits, which could be forfeited only for serious misbehavior, constituted a liberty interest protected by the Due Process Clause. We also noted that the same reasoning could justify extension of due process protections to a decision to impose "solitary" confinement because "[it] represents a major change in the conditions of confinement and is normally imposed only when it is claimed and proved that there has been a major act of misconduct." *Id.*, at 571-572, n. 19, 94 S.Ct., at 2982, n. 19. Once a State has ***489** granted prisoners a liberty interest, we held that due process protections are necessary "to insure that the state-created right is not arbitrarily abrogated." *Id.*, at 557, 94 S.Ct., at 2975.

In *Meachum v. Fano*, 427 U.S. 215, 96 S.Ct. 2532, 49 L.Ed.2d 451 (1976), and *Montanye v. Haymes*, 427 U.S. 236, 96 S.Ct. 2543, 49 L.Ed.2d 466 (1976), we held that the transfer of a prisoner from one prison to another does not infringe a protected liberty interest. But in those cases transfers were discretionary with the prison authorities, and in neither case did the prisoner possess any right or justifiable expectation that he would not be transferred except for misbehavior or upon the occurrence of other specified events. Hence, "the predicate for invoking the protection of the Fourteenth Amendment as construed and ****1262** applied in *Wolff v. McDonnell* [was] totally nonexistent." *Meachum v. Fano*, *supra*, 427 U.S., at 226-227, 96 S.Ct., at 2540.

Following *Meachum v. Fano* and *Montanye v. Haymes*, we continued to recognize that state statutes may grant prisoners liberty interests that invoke due process protections when prisoners are transferred to solitary confinement for disciplinary or administrative reasons. *Enomoto v. Wright*, 434 U.S. 1052, 98 S.Ct. 1223, 55 L.Ed.2d 756 (1978), summarily aff'g 462 F.Supp. 397 (ND Cal.1976). Similarly in *Greenholtz v. Nebraska Penal Inmates*, *supra*, we held that state law granted petitioners a sufficient expectancy of parole to entitle them to some measure of constitutional protection with respect to parole decisions.

We think the District Court properly understood and applied these decisions. Section 83-180(1) provides that if a designated physician finds that a prisoner "suffers from a mental disease or defect" that "cannot be given proper treatment" in prison, the Director of Correctional Services may transfer a prisoner to a mental hospital. The District Court also found that in practice prisoners are transferred to a mental hospital only if it is determined that they suffer from a mental disease or defect that cannot adequately be treated within the penal complex. This "objective expectation, firmly fixed in state law and official penal complex practice," that ***490** a prisoner would not be transferred unless he suffered from a mental disease or defect that could not be adequately treated in the prison, gave Jones a liberty interest that entitled him to the benefits of appropriate procedures in connection with determining the conditions that warranted his transfer to a mental hospital. Under our cases, this conclusion of the District Court is unexceptionable.

Appellants maintain that any state-created liberty interest that Jones had was completely satisfied once a physician or psychologist designated by the director made the findings required by § 83-180(1) and that Jones was not entitled to any procedural protections.[FN6] But if the State grants a pris oner***491** a right or expectation that adverse action will not be taken against him except upon the occurrence of specified behavior, "the determination of whether such behavior has occurred becomes critical, and the minimum requirements of procedural due ****1263** process appropriate for the circumstances must be observed." *Wolff v. McDonnell*, 418 U.S., at 558, 94 S.Ct., at 2976. These minimum requirements being a matter of federal law, they are not diminished by the fact that the State may have specified its own procedures that it may deem adequate for determining the preconditions to adverse official action. In *Morrissey*, *Gagnon*, and *Wolff*, the States had adopted their own procedures for determining whether conditions warranting revocation of parole, probation, or good-time credits had occurred; yet we held that those procedures were constitutionally inadequate. In like manner, Nebraska's reliance on the opinion of a designated physician or psychologist for determining whether the conditions warranting a transfer exist neither removes the prisoner's interest from due process protection nor answers the question of what process is due under the Constitution.

FN6. A majority of the Justices rejected an identical position in *Arnett v. Kennedy*, 416 U.S. 134, 166-167, 94 S.Ct. 1633, 1650-1651, 40 L.Ed.2d 15 (1974) (opinion of

POWELL, J., joined by BLACKMUN, J.), 177-178, 94 S.Ct., 1655-1656 (opinion of WHITE, J.), 210-211, 94 S.Ct., 1671-1672 (opinion of MARSHALL, J., joined by DOUGLAS and BRENNAN, JJ.). As Mr. Justice POWELL's opinion observed:

> "The plurality opinion evidently reasons that the nature of appellee's interest in continued federal employment is necessarily defined and limited by the statutory procedures for discharge and that the constitutional guarantee of procedural due process accords to appellee no procedural protections against arbitrary or erroneous discharge other than those expressly provided in the statute. The plurality would thus conclude that the statute governing federal employment determines not only the nature of appellee's property interest, but also the extent of the procedural protections to which he may lay claim. It seems to me that this approach is incompatible with the principles laid down in [*Board of Regents v.*] *Roth* [, 408 U.S. 564, 92 S.Ct. 2701, 33 L.Ed.2d 548 (1972)] and [*Perry v.*] *Sindermann* [, 408 U.S. 593, 92 S.Ct. 2694, 33 L.Ed.2d 570 (1972)]. Indeed, it would lead directly to the conclusion that whatever the nature of an individual's statutorily created property interest, deprivation of that interest could be accomplished without notice or a hearing at any time. This view misconceives the origin of the right to procedural due process. That right is conferred, not by legislative grace, but by constitutional guarantee. While the legislature may elect not to confer a property interest in federal employment, it may not constitutionally authorize the deprivation of such an interest, once conferred, without appropriate procedural safeguards. As our cases have consistently recognized, the adequacy of statutory procedures for deprivation of a statutorily created property interest must be analyzed in constitutional terms. *Goldberg v. Kelly*, 397 U.S. 254 [90 S.Ct. 1011, 25 L.Ed.2d 287] (1970); *Bell v. Burson*, 402 U.S. 535 [91 S.Ct. 1586, 29 L.Ed.2d 90] (1971); *Board of Regents v. Roth, supra* [408 U.S. 564, 92 S.Ct. 2701, 33 L.Ed.2d 548 (1972)]; *Perry v. Sindermann, supra* [408 U.S. 593, 92 S.Ct. 2694, 33 L.Ed.2d 570 (1972)]." *Id.*, at 166-167, 94 S.Ct. at 1650-1651.

B

[5] The District Court was also correct in holding that independently of § 83-180(1), the transfer of a prisoner from a prison to a mental hospital must be accompanied by appropriate procedural protections. The issue is whether after a conviction for robbery, Jones retained a residuum of liberty that would be infringed by a transfer to a mental hospital without complying with minimum requirements of due process.

[6][7] We have recognized that for the ordinary citizen, commitment to a mental hospital produces "a massive curtailment of liberty," *Humphrey v. Cady*, 405 U.S. 504, 509, 92 S.Ct. 1048, 1052, 31 L.Ed.2d 394 (1972), and in ***492** consequence "requires due process protection." *Addington v. Texas*, 441 U.S. 418, 425, 99 S.Ct. 1804, 1809, 60 L.Ed.2d 323 (1979); *O'Connor v. Donaldson*, 422 U.S. 563, 580, 95 S.Ct. 2486, 2496, 45 L.Ed.2d 396 (1975) (BURGER, C. J., concurring). The loss of liberty produced by an involuntary commitment is more than a loss of freedom from confinement. It is indisputable that commitment to a mental hospital "can engender adverse social consequences to the individual" and that "[w]hether we label this phenomena 'stigma' or choose to call it something else . . . we recognize that it can occur and that it can have a very significant impact on the individual." *Addington v. Texas, supra*, at 425-426, 99 S.Ct., at 1809. See also *Parham v. J. R.*, 442 U.S. 584, 600, 99 S.Ct. 2493, 2503, 61 L.Ed.2d 101 (1979). Also, "[a]mong the historic liberties" protected by the Due Process Clause is the "right to be free from, and to obtain judicial relief for, unjustified intrusions on personal security." *Ingraham v. Wright*, 430 U.S. 651, 673, 97 S.Ct. 1401, 1413, 51 L.Ed.2d 711 (1977). Compelled treatment in the form of mandatory behavior modification programs, to which the District Court found Jones was exposed in this case, was a proper factor to be weighed by the District Court. Cf. *Addington v. Texas, supra*, at 427, 99 S.Ct., at 1810.

The District Court, in its findings, was sensitive to these concerns:

> "[T]he fact of greater limitations on freedom of

action at the Lincoln Regional Center, the fact that a transfer to the Lincoln Regional Center has some stigmatizing consequences, and the fact that additional mandatory behavior modification systems are used at the Lincoln Regional Center combine to make the transfer a 'major change in the conditions of confinement' amounting to a 'grievous loss' to the inmate." *Miller v. Vitek*, 437 F.Supp., at 573.

Were an ordinary citizen to be subjected involuntarily to these consequences, it is undeniable that protected liberty interests would be unconstitutionally infringed absent compliance with the procedures required by the Due Process Clause. ***493** We conclude that a convicted felon also is entitled to the benefit of procedures appropriate in the circumstances before he is found to have a mental disease and transferred to a mental hospital.

[8][9][10] Undoubtedly, a valid criminal conviction and prison sentence extinguish a ****1264** defendant's right to freedom from confinement. *Greenholtz v. Nebraska Penal Inmates*, 442 U.S., at 7, 99 S.Ct., at 2103. Such a conviction and sentence sufficiently extinguish a defendant's liberty "to empower the State to confine him in any of its prisons." *Meachum v. Fano*, 427 U.S., at 224, 96 S.Ct., at 2538 (emphasis deleted). It is also true that changes in the conditions of confinement having a substantial adverse impact on the prisoner are not alone sufficient to invoke the protections of the Due Process Clause "[a]s long as the conditions or degree of confinement to which the prisoner is subjected is within the sentence imposed upon him." *Montanye v. Haymes*, 427 U.S., at 242, 96 S.Ct., at 2547.

[11] Appellants maintain that the transfer of a prisoner to a mental hospital is within the range of confinement justified by imposition of a prison sentence, at least after certification by a qualified person that a prisoner suffers from a mental disease or defect. We cannot agree. None of our decisions holds that conviction for a crime entitles a State not only to confine the convicted person but also to determine that he has a mental illness and to subject him involuntarily to institutional care in a mental hospital. Such consequences visited on the prisoner are qualitatively different from the punishment characteristically suffered by a person convicted of crime. Our cases recognize as much and reflect an understanding that involuntary commitment to a mental hospital is not within the range of conditions of confinement to which a prison sentence subjects an individual. *Baxstrom v. Herold*, 383 U.S. 107, 86 S.Ct. 760, 15 L.Ed.2d 620 (1966); *Specht v. Patterson*, 386 U.S. 605, 87 S.Ct. 1209, 18 L.Ed.2d 326 (1967); *Humphrey v. Cady*, 405 U.S. 504, 92 S.Ct. 1048, 31 L.Ed.2d 394 (1972); *Jackson v. Indiana*, 406 U.S. 715, 724-725, 92 S.Ct. 1845, 1851, 32 L.Ed.2d 435 (1972). A criminal conviction and sentence of imprisonment extinguish an individual's***494** right to freedom from confinement for the term of his sentence, but they do not authorize the State to classify him as mentally ill and to subject him to involuntary psychiatric treatment without affording him additional due process protections.

[12] In light of the findings made by the District Court, Jones' involuntary transfer to the Lincoln Regional Center pursuant to § 83-180, for the purpose of psychiatric treatment, implicated a liberty interest protected by the Due Process Clause. Many of the restrictions on the prisoner's freedom of action at the Lincoln Regional Center by themselves might not constitute the deprivation of a liberty interest retained by a prisoner, see *Wolff v. McDonnell*, 418 U.S., at 572, n. 19, 94 S.Ct., at 2982, n. 19; cf. *Baxter v. Palmigiano*, 425 U.S. 308, 323, 96 S.Ct. 1551, 1560, 47 L.Ed.2d 810 (1976). But here, the stigmatizing consequences of a transfer to a mental hospital for involuntary psychiatric treatment, coupled with the subjection of the prisoner to mandatory behavior modification as a treatment for mental illness, constitute the kind of deprivations of liberty that requires procedural protections.

IV

The District Court held that to afford sufficient protection to the liberty interest it had identified, the State was required to observe the following minimum procedures before transferring a prisoner to a mental hospital:

"A. Written notice to the prisoner that a transfer to a mental hospital is being considered;

"B. A hearing, sufficiently after the notice to permit the prisoner to prepare, at which disclosure to the prisoner is made of the evidence being relied upon for the transfer and at which an opportunity to be heard in person and to present documentary evidence is given;

"C. An opportunity at the hearing to present testimony of witnesses by the defense and to confront and cross-examine witnesses called by the state, except ***495** upon a finding, not arbitrarily made, of good cause for not permitting such presentation, confrontation, or cross-examination;

****1265** "D. An independent decisionmaker;

"E. A written statement by the factfinder as to the evidence relied on and the reasons for transferring the inmate;

"F. Availability of legal counsel, furnished by the state, if the inmate is financially unable to furnish his own; and

"G. Effective and timely notice of all the foregoing rights." 437 F.Supp., at 575.

A

[13] We think the District Court properly identified and weighed the relevant factors in arriving at its judgment. Concededly the interest of the State in segregating and treating mentally ill patients is strong. The interest of the prisoner in not being arbitrarily classified as mentally ill and subjected to unwelcome treatment is also powerful, however; and as the District Court found, the risk of error in making the determinations required by § 83-180 is substantial enough to warrant appropriate procedural safeguards against error.

[14] We recognize that the inquiry involved in determining whether or not to transfer an inmate to a mental hospital for treatment involves a question that is essentially medical. The question whether an individual is mentally ill and cannot be treated in prison "turns on the meaning of the facts which must be interpreted by expert psychiatrists and psychologists." *Addington v. Texas*, 441 U.S., at 429, 99 S.Ct., at 1811. The medical nature of the inquiry, however, does not justify dispensing with due process requirements. It is precisely "[t]he subtleties and nuances of psychiatric diagnoses" that justify the requirement of adversary hearings. *Id.*, at 430, 99 S.Ct., at 1811.

[15] Because prisoners facing involuntary transfer to a mental hospital are threatened with immediate deprivation of liberty ***496** interests they are currently enjoying and because of the inherent risk of a mistaken transfer, the District Court properly determined that procedures similar to those required by the Court in *Morrissey v. Brewer*, 408 U.S. 471, 92 S.Ct. 2593, 33 L.Ed.2d 484 (1972), were appropriate in the circumstances present here.

The notice requirement imposed by the District Court no more than recognizes that notice is essential to afford the prisoner an opportunity to challenge the contemplated action and to understand the nature of what is happening to him. *Wolff v. McDonnell, supra*, at 564, 94 S.Ct., at 2978. Furthermore, in view of the nature of the determinations that must accompany the transfer to a mental hospital, we think each of the elements of the hearing specified by the District Court was appropriate. The interests of the State in avoiding disruption was recognized by limiting in appropriate circumstances the prisoner's right to call witnesses, to confront and cross examine. The District Court also avoided unnecessary intrusion into either medical or correctional judgments by providing that the independent decisionmaker conducting the transfer hearing need not come from outside the prison or hospital administration. 437 F.Supp., at 574.

B [FN**]

FN** This part is joined only by Mr. Justice BRENNAN, Mr. Justice MARSHALL, and Mr. Justice STEVENS.

[16] The District Court did go beyond the requirements imposed by prior cases by holding that counsel must be made available to inmates facing transfer hearings if they are financially unable to furnish their own. We have not required the automatic appointment of counsel for indigent prisoners facing other deprivations of liberty, *Gagnon v. Scarpelli*, 411 U.S., at 790, 93 S.Ct., at 1763; *Wolff v. McDonnell, supra*, at 569-570, 94 S.Ct., at 2981; but we have recognized that prisoners who are illiterate and uneducated have a greater need for assistance in exercising their rights. ****1266***Gagnon v. Scarpelli, supra*, at 786-787, 93 S.Ct., at 1761-1762; *Wolff v. McDonnell, supra*, at 570, 94 S.Ct., at 2981. A prisoner thought to be suffering from a ***497** mental disease or defect requiring involuntary treatment probably has an even greater need for legal assistance, for such a prisoner is more likely to be unable to understand or

exercise his rights. In these circumstances, it is appropriate that counsel be provided to indigent prisoners whom the State seeks to treat as mentally ill.

V

Because Mr. Justice POWELL, while believing that Jones was entitled to competent help at the hearing, would not require the State to furnish a licensed attorney to aid him, the judgment below is affirmed as modified to conform with the separate opinion filed by Mr. Justice POWELL.

So ordered.

Mr. Justice POWELL, concurring in part.

I join the opinion of the Court except for Part IV-B. I agree with Part IV-B insofar as the Court holds that qualified and independent assistance must be provided to an inmate who is threatened with involuntary transfer to a state mental hospital. I do not agree, however, that the requirement of independent assistance demands that a licensed attorney be provided.[FN1]

FN1. I also agree with the Court's holding that this case is not moot. The question is whether appellee faces a substantial threat that he will again be transferred to a state mental hospital. See *Doran v. Salem Inn, Inc.*, 422 U.S. 922, 930-932, 95 S.Ct. 2561, 2567-2568, 45 L.Ed.2d 648 (1975); *Steffel v. Thompson*, 415 U.S. 452, 458-460, 94 S.Ct. 1209, 1215-16, 39 L.Ed.2d 505 (1974); *Doe v. Bolton*, 410 U.S. 179, 188, 93 S.Ct. 739, 745, 35 L.Ed.2d 201 (1973). He was involuntarily transferred from the prison complex to a mental institution, and thereafter paroled upon condition that he continue to receive psychiatric treatment. When he violated parole, he was returned to prison. The State advises us that appellee's "history of mental illness indicates a serious threat to his own safety, as well as to that of others," and "there is a very real expectation" of transfer if the District Court injunction were removed. App. to Juris. Statement 24. The District Court concluded that appellee is under threat of transfer. In these circumstances it is clear that a live controversy remains in which appellee has a personal stake. See *Seatrain Shipbuilding Corp. v. Shell Oil Co.*, 444 U.S. 572, 581-583, 100 S.Ct. 800, 806-807, 63 L.Ed.2d 36 (1980).

***498** I

In *Gagnon v. Scarpelli*, 411 U.S. 778, 93 S.Ct. 1756, 36 L.Ed.2d 656 (1973), my opinion for the Court held that counsel is not necessarily required at a probation revocation hearing. In reaching this decision the Court recognized both the effects of providing counsel to each probationer and the likely benefits to be derived from the assistance of counsel. "The introduction of counsel into a revocation proceeding [would] alter significantly the nature of the proceeding," *id.*, at 787, 93 S.Ct., at 1762, because the hearing would inevitably become more adversary. We noted that probationers would not always need counsel because in most hearings the essential facts are undisputed. In lieu of a *per se* rule we held that the necessity of providing counsel should be determined on a case-by-case basis. In particular, we stressed that factors governing the decision to provide counsel include (i) the existence of factual disputes or issues which are "complex or otherwise difficult to develop or present," and (ii) "whether the probationer appears to be capable of speaking effectively for himself." *Id.*, at 790, 791, 93 S.Ct., at 1764.

Consideration of these factors, and particularly the capability of the inmate, persuades me that the Court is correct that independent assistance must be provided to an inmate before he may be transferred involuntarily to a mental hospital. The essence of the issue in an involuntary commitment proceeding will be the mental health of the inmate. The resolution of factual disputes will be less important than the ability to understand and analyze expert psychiatric testimony that is often expressed in language relatively incomprehensible to laymen. It is unlikely that an inmate threatened with involuntary transfer ****1267** to mental hospitals will possess the competence or training to protect adequately his own interest in these state-initiated proceedings. And the circumstances of being imprisoned without normal access to others who may assist him places an additional handicap upon an inmate's ability to represent himself. I therefore agree ***499** that due process requires the provision of assistance to an inmate threatened with involuntary transfer to a mental hospital.

II

I do not believe, however, that an inmate must

always be supplied with a licensed attorney. "[D]ue Process is flexible and calls for such procedural protections as the particular situation demands." *Morrissey v. Brewer*, 408 U.S. 471, 481, 92 S.Ct. 2593, 2600, 33 L.Ed.2d 484 (1972). See *Mathews v. Eldridge*, 424 U.S. 319, 334-335, 96 S.Ct. 893, 902-903, 47 L.Ed.2d 18 (1976). Our decisions defining the necessary qualifications for an impartial decisionmaker demonstrate that the requirements of due process turn on the nature of the determination which must be made. "Due Process has never been thought to require that the neutral and detached trier of fact be law trained or a judicial or administrative officer." *Parham v. J. R.*, 442 U.S. 584, 607, 99 S.Ct. 2493, 2506, 61 L.Ed.2d 101 (1979). In that case, we held that due process is satisfied when a staff physician determines whether a child may be voluntarily committed to a state mental institution by his parents. That holding was based upon recognition that the issues of civil commitment "are essentially medical in nature," and that " 'neither judges nor administrative hearing officers are better qualified than psychiatrists to render psychiatric judgments.' " *Id.*, at 607, 609, 99 S.Ct., at 2506, 2507, quoting *In re Roger S.*, 19 Cal.3d 921, 942, 141 Cal.Rptr. 298, 311, 569 P.2d 1286, 1299 (1977) (Clark, J., dissenting). See also *Morrissey v. Brewer*, *supra*, 408 U.S., at 489, 92 S.Ct., at 2604; *Goldberg v. Kelly*, 397 U.S. 254, 271, 90 S.Ct. 1011, 1022, 25 L.Ed.2d 287 (1970).

In my view, the principle that due process does not always require a law-trained decisionmaker supports the ancillary conclusion that due process may be satisfied by the provision of a qualified and independent adviser who is not a lawyer. As in *Parham v. J. R.*, the issue here is essentially medical. Under state law, a prisoner may be transferred only if he "suffers from a mental disease or defect" and "cannot be given proper treatment" in the prison complex. Neb.Rev. ***500** tat. § 83-180(1) (1976). The opinion of the Court allows a non-lawyer to act as the impartial decisionmaker in the transfer proceeding. *Ante*, at 1265.[FN2]

> FN2. The District Court specifically held that "a judicial officer is not required, and the decisionmaker need not be from outside the prison or hospital administration." *Miller v. Vitek*, 437 F.Supp. 569, 574 (Neb.1977) (three-judge court).

The essence of procedural due process is a fair hearing. I do not think that the fairness of an informal hearing designed to determine a medical issue requires participation by lawyers. Due process merely requires that the State provide an inmate with qualified and independent assistance. Such assistance may be provided by a licensed psychiatrist or other mental health professional. Indeed, in view of the nature of the issue involved in the transfer hearing, a person possessing such professional qualifications normally would be preferred. As the Court notes, "[t]he question whether an individual is mentally ill and cannot be treated in prison 'turns on the meaning of the facts which must be interpreted by expert psychiatrists and psychologists.' " *Ante*, at 1265, quoting *Addington v. Texas*, 441 U.S. 418, 429, 99 S.Ct. 1804, 1811, 60 L.Ed.2d 323 (1979). I would not exclude, however, the possibility that the required assistance may be rendered by competent laymen in some cases. The essential requirements are that the person provided by the State be competent and independent, and that he be free to act solely in the inmate's best interest.

****1268** In sum, although the State is free to appoint a licensed attorney to represent an inmate, it is not constitutionally required to do so. Due process will be satisfied so long as an inmate facing involuntary transfer to a mental hospital is provided qualified and independent assistance.

Mr. Justice STEWART, with whom THE CHIEF JUSTICE and Mr. Justice REHNQUIST join, dissenting.

It seems clear to me that this case is now moot. Accordingly, I would vacate the judgment and remand the case to ***501** the District Court with directions to dismiss the complaint. *United States v. Munsingwear, Inc.*, 340 U.S. 36, 71 S.Ct. 104, 95 L.Ed. 36.

As the Court points out, this is not a class action, and the appellee is now incarcerated in the Nebraska Penal and Correctional Complex with an anticipated release date in March 1982. See *ante*, at 1259-1260, and n. 3, *ante*. In that status, the appellee is simply one of thousands of Nebraska prisoners, with no more standing than any other to attack the constitutionality of Neb.Rev.Stat. § 83-180(1) (1976) on the sole basis of the mere possibility that someday that statute might be invoked to transfer him to another institution.

Although the appellee was once transferred in accord with § 83-180(1), there is no demonstrated

probability that that will ever happen again. *Weinstein v. Bradford*, 423 U.S. 147, 96 S.Ct. 347, 46 L.Ed. 350. And this case is not one that by its nature falls within the ambit of the "capable of repetition, yet evading review" exception to established principles of mootness. See *Southern Pacific Terminal Co. v. ICC*, 219 U.S. 498, 31 S.Ct. 279, 55 L.Ed. 310; *Super Tire Engineering Co. v. McCorkle*, 416 U.S. 115, 94 S.Ct. 1694, 40 L.Ed.2d 1. If the appellee should again be threatened with transfer under the allegedly infirm statute, there will be ample time to reach the merits of his claim.

" 'To adjudicate a cause which no longer exists is a proceeding which this Court uniformly has declined to entertain.' *Brownlow v. Schwartz*, 261 U.S. 216, 217-218 [43 S.Ct. 263, at page 264, 67 L.Ed. 620]." *Oil Workers v. Missouri*, 361 U.S. 363, 371, 80 S.Ct. 391, 396, 4 L.Ed.2d 373.

Mr. Justice BLACKMUN, dissenting.

I agree with Mr. Justice STEWART that this case is not properly before us. I write separately to express my own reasons for reaching that conclusion.

The claimed harm that gave birth to this lawsuit was the alleged deprivation of liberty attending appellee's transfer to the Lincoln Regional Center. It is clear to me that that asserted injury disappeared, at the latest, when appellee was ***502** granted parole.[FN1] Cf. ****1269***Preiser v. Newkirk*, 422 U.S. 395, 95 S.Ct. 2330, 45 L.Ed.2d 272 (1975). So did any immediate threat that that injury would be suffered again. Appellee has been returned to custody, however, and the ***503** parties agree that his reincarceration, coupled with his history of mental problems, has brought the controversy back to life.

FN1. The Court does not appear to share this view. It states that, even while at the Veterans' Administration Hospital, appellee Jones "insisted that he was receiving treatment for mental illness against his will." *Ante*, at 1260. It adds that appellee was "paroled, but only on condition that he accepts psychiatric treatment." *Ibid*. The Court does not identify the precise import of these facts, but a fair inference is that they are meant to suggest that this case-even during the time of appellee's parole-might properly have been pursued on the theory that the appellee was continuing to feel the effects of the alleged deprivation of constitutional rights in receiving in-patient care at the Veterans' Administration Hospital.

I cannot accept this suggestion. First, its premise appears to be faulty. The District Court did not find, and it does not appear clearly in the record, that the parole board's offer or appellee's acceptance of parole was in any way related to his prior transfer to the Lincoln Regional Center. Appellee chose to accept conditional parole. Moreover, at the time appellee elected to go on parole, he was being housed at the penal complex, not at the Lincoln Regional Center. Thus, it is not surprising that the District Court based its finding of nonmootness solely on its conclusion that appellee-notwithstanding his conditioned release-was "under threat of being transferred to the state mental hospital under § 83-180." App. to Juris. Statement 24. Second, the "continuing injury" theory seems to me to be incorrect as a matter of law. Appellee did not seek or evince any interest in seeking release from the Veterans' Administration Hospital, and a declaration that his initial transfer had been illegal would have neither justified nor predictably led to appellee's removal from that facility. In other words, after accepting the condition grant of parole, appellee could no longer show, as required by the case-or-controversy requirement, "that he personally would benefit in a tangible way from the court's intervention." *Warth v. Seldin*, 422 U.S. 490, 508, 95 S.Ct. 2197, 2210, 45 L.Ed.2d 343 (1975).

The Court also finds some support for its holding in the fact that vacating the District Court's order would remove the declaration that the challenged procedures "afforded an inadequate basis for declaring Jones to be mentally ill." *Ante*, at 1260. If the Court, by this statement, means to imply that appellee's suit is somehow mootness-proof due to the continuing stigma resulting from the transfer to the mental hospital, I cannot accept that sweeping proposition. The Court has never

> suggested that the "collateral consequences" doctrine of *Sibron v. New York*, 392 U.S. 40, 88 S.Ct. 1889, 20 L.Ed.2d 917 (1968), which saves an action challenging the validity of a conviction after a prisoner has served his sentence, also saves a challenge to a commitment by a patient who has been released from a mental hospital. Nor does the logic of *Sibron* -focusing on tangible and remediable collateral consequences, such as use of a prior conviction to enhance a sentence for a later crime, or to impeach credibility if one appears as a witness-comfortably extend to the claim of a former mental patient. See *id.*, at 55, 88 S.Ct., at 1898 (referring to "adverse collateral legal consequences").

Given these facts, the issue is not so much one of mootness as one of ripeness. At most, although I think otherwise, it is a case presenting a "mixed question" of ripeness and mootness, hinging on the possibility that the challenged procedures will be applied again to appellee. This Court has confronted mixed questions of this kind in cases presenting issues "capable of repetition, yet evading review," see, *e. g., Nebraska Press Assn. v. Stuart*, 427 U.S. 539, 96 S.Ct. 2791, 49 L.Ed.2d 683 (1976), and *Sosna v. Iowa*, 419 U.S. 393, 95 S.Ct. 553, 42 L.Ed.2d 532 (1975), and in cases concerning the cessation of challenged conduct during the pendency of litigation, see, *e. g., Walling v. Helmerich & Payne, Inc.*, 323 U.S. 37, 43, 65 S.Ct. 11, 14, 89 L.Ed. 29 (1944). In those contexts, the Court has lowered the ripeness threshold so as to preclude manipulation by the parties or the mere passage of time from frustrating judicial review. Mr. Justice STEWART correctly observes, and the Court apparently concedes, however, that the "capable of repetition" doctrine does not apply here. Neither does the liberal rule applied in "voluntary cessation" cases, since the current state of affairs is in no way the product of the appellants' voluntary discontinuation of their challenged conduct.[FN2] Certainly it is not the result of any effort on the part of the appellants to avoid review by this Court. Thus, since these mixed mootness/ripeness rules are inapplicable, this case presents for me nothing more than a plain, old-fashioned question of ripeness.[FN3]

> FN2. The decisions to award and revoke parole were made by the Nebraska Parole Board, not by appellants.

> FN3. It is not clear whether the Court views this as a "voluntary cessation" case. It nowhere expressly relies on the doctrine and does not explain what factors might justify characterizing appellee's present situation as the result of voluntary cessation of illegal conduct by appellants. On the other hand, each of the three decisions cited by the Court to support its application of a "creampuff" ripeness standard, *County of Los Angeles v. Davis*, 440 U.S. 625, 631, 99 S.Ct. 1379, 1383, 59 L.Ed.2d 642 (1979); *United States v. Phosphate Export Assn.*, 393 U.S. 199, 203, 89 S.Ct. 361, 364, 21 L.Ed.2d 344 (1968); *United States v. W. T. Grant Co.*, 345 U.S. 629, 633, 73 S.Ct. 894, 897, 97 L.Ed. 1303 (1953), pivoted on the presence of "voluntary cessation." It is therefore unclear whether the Court deems this a "voluntary cessation" case (without explaining why) or deems the "no reasonable expectation of recurrence" standard-to date a litmus carefully confined by a policy-tailored and principled "voluntary cessation" rule-applicable to an amorphous cluster of facts having nothing to do with parties' artful dodging of well-founded litigation. In either event, the Court's analysis invites the criticism, increasingly voiced, that this Court's decisions on threshold issues "are concealed decisions on the merits of the underlying constitutional claim." Tushnet, The New Law of Standing: A Plea for Abandonment, 62 Cornell L.Rev. 663 (1977).

***504** The Court's cases lay down no mechanistic test for determining whether a dispute ****1270** is ripe for adjudication. But past formulations are uniformly more rigorous than the one the Court now applies. The Court has observed that "[p]ast exposure to illegal conduct does not in itself show a present case or controversy," *O'Shea v. Littleton*, 414 U.S. 488, 495, 94 S.Ct. 669, 676, 38 L.Ed.2d 674 (1974), and that "general assertions or inferences" that illegal conduct will recur do not render a case ripe. *Id.*, at 497, 94 S.Ct., at 676. "A hypothetical threat is not enough." *Public Workers v. Mitchell*, 330 U.S. 75, 90, 67 S.Ct. 556, 564, 91 L.Ed. 754 (1947). There must be "actual present or immediately threatened injury resulting

from unlawful governmental action." *Laird v. Tatum*, 408 U.S. 1, 15, 92 S.Ct. 2318, 2326, 33 L.Ed.2d 154 (1972). See *Linda R. S. v. Richard D.*, 410 U.S. 614, 617, 93 S.Ct. 1146, 1148, 35 L.Ed.2d 536 (1973) (requiring "some threatened or actual injury"); *Massachusetts v. Mellon*, 262 U.S. 447, 488, 43 S.Ct. 597, 601, 67 L.Ed. 1078 (1923) (requiring that the litigant "has sustained or is immediately in danger of sustaining some direct injury"). A "substantial controversy, between parties having adverse legal interests, of sufficient immediacy and reality" is required. *Golden v. Zwickler*, 394 U.S. 103, 108, 89 S.Ct. 956, 959-960, 22 L.Ed.2d 113 (1969), quoting *Maryland Casualty Co. v. Pacific Coal & Oil Co.*, 312 U.S. 270, 273, 61 S.Ct. 510, 512, 85 L.Ed. 826 (1941).

***505** Applying these principles, I have difficulty in perceiving an existing "case or controversy" here. Since our remand, the state officials have indicated nothing more than that they have a general right to apply their statute, and to apply it to appellee if necessary.[FN4] They have not expressed a present intent or desire to transfer appellee to a mental facility pursuant to the challenged provisions. Nor have they suggested that they may transfer appellee to the Lincoln Regional Center now on the basis of the diagnosis made five years ago. And they have not suggested that they would subject appellee immediately to a "fresh" psychiatric evaluation if the District Court's injunction were lifted. The appellee has represented that he "does not reside in the psychiatric unit of the Nebraska Penal and Correctional Complex, nor is he receiving or accepting psychiatric treatment." Brief for Appellee 11-12. The brief containing that statement was filed some six months ago and some nine months after the revocation of appellee's parole.

> FN4. Appellants, to be sure, have announced their intention to continue to use the challenged procedures. That fact, however, is of small, if any, significance, for it is hardly surprising to hear state officials say that they plan to abide by the State's own laws. See *Public Workers v. Mitchell*, 330 U.S. 75, 91, 67 S.Ct. 556, 565, 91 L.Ed. 754 (1947) ("the existence of the law and the regulations" does not alone render a suit ripe). Cf. *Poe v. Ullman*, 367 U.S. 497, 81 S.Ct. 1752, 6 L.Ed.2d 989 (1961) (desuetude statute).

In sum, for all that appears, appellee has been assimilated once again into the general prison population, and appellants, at least at this time, are content to leave him where he is.[FN5] Given these facts, determining whether prison officials within two years again will seek to send appellee to a mental institution***506** "takes us into the area of speculation and conjecture." *O'Shea v. Littleton*, 414 U.S., at 497, 94 S.Ct., at 676. Cf. *Longshoremen v. Boyd*, 347 U.S. 222, 74 S.Ct. 447, 98 L.Ed. 650 (1954).

> FN5. I do not go so far as Mr. Justice STEWART does when he says that appellee is "simply one of thousands of Nebraska prisoners." *Ante*, at 1267. For purposes of the "case or controversy" requirement, appellee differs from his fellow inmates in two relevant respects: he has a recent history of perceived psychiatric problems, and in fact he was previously transferred pursuant to the challenged statutes. Cf. *O'Shea v. Littleton*, 414 U.S., at 496, 94 S.Ct., at 676 ("Of course, past wrongs are evidence bearing on whether there is a real and immediate threat of repeated injury").

It is for these reasons that I would vacate the judgment of the District Court and remand the case to that court with directions to dismiss the complaint.

U.S.Neb.,1980.
Vitek v. Jones
445 U.S. 480, 100 S.Ct. 1254, 63 L.Ed.2d 552

United States Court of Appeals,
Ninth Circuit.
Sherrie Lynn ZUKLE, Plaintiff–Appellant,
v.
The REGENTS OF THE UNIVERSITY OF CALIFORNIA, Defendant–Appellee.

No. 97–16708.
Argued and Submitted Nov. 3, 1998.
Decided Feb. 23, 1999.

Learning disabled student who was dismissed from program at medical school brought action against university regents, alleging violation of the Americans with Disabilities Act (ADA) and Rehabilitation Act. The United States District Court for the Eastern District of California, David F. Levi, J., granted summary judgment for regents, and student appealed. The Court of Appeals, O'Scannlain, Circuit Judge, held that: (1) student bore initial burden of production, and burden would then shift to university, but student bore ultimate burden of persuasion; (2) university's academic decisions were entitled to judicial deference; and (3) student's requested accommodations were not reasonable, since they would require substantial modification of school's program.

Affirmed.

Judicial deference should be accorded an educational institution's determination that a reasonable accommodation is not available to a disabled student, for purpose of student's claim of discrimination under Americans with Disabilities Act (ADA) and Rehabilitation Act; court's duty is to first find the basic facts, giving due deference to the school, and then to evaluate whether those facts add up to a professional, academic judgment that reasonable accommodation is not available. Rehabilitation Act of 1973, § 504, 29 U.S.C.A. § 794; Americans with Disabilities Act of 1990, § 202, 42 U.S.C.A. § 12132.

University's dismissal of learning disabled student from medical school program did not amount to discrimination under Americans with Disabilities Act (ADA) or Rehabilitation Act; accommodations requested by student in addition to those offered by university, such as permitting student to begin one clerkship before finishing another, reducing amount of required clinical time, and placing student on decelerated schedule, were not reasonable because they would require substantial modification of school's program and would have lowered school's academic standards. Rehabilitation Act of 1973, § 504, 29 U.S.C.A. § 794; Americans with Disabilities Act of 1990, § 202, 42 U.S.C.A. § 12132.

(Formerly 78k127.1)

For purpose of student's claim, under Americans with Disabilities Act (ADA) and Rehabilitation Act, that she was otherwise qualified to participate in medical school program, with reasonable accommodation, reasonableness is not a constant; rather, what is reasonable in a particular situation may not be reasonable in a different situation, even if the situational differences are relatively slight, and court must thus evaluate student's requests for accommodation in light of the totality of her circumstances. Rehabilitation Act of 1973, § 504, 29 U.S.C.A. § 794; Americans with Disabilities Act of 1990, § 202, 42 U.S.C.A. § 12132.

(Cite as: 166 F.3d 1041)

I

Sherrie Lynn Zukle entered the University of California, Davis School of Medicine ("Medical School") in the fall of 1991 for a four year course of study. The first two years comprise the "basic science" or "pre-clinical" curriculum, consisting of courses in the function, design and processes of the human body. The final two years comprise the "clinical curriculum." In the third year, students take six consecutive eight-week clinical clerkships. During the fourth year, students complete clerkships of varying lengths in more advanced areas. Most clerkships involve treating patients in hospitals or clinics, and oral and written exams.

From the beginning, Zukle experienced academic difficulty. During her first quarter, she received "Y" grades in Anatomy and Biochemistry.[FN1] Upon reexamination, her Biochemistry grade was converted to a "D." She did not convert her Anatomy grade at that time. In her second quarter, she received a "Y" grade in Human Physiology, which she converted to a "D" upon reexamination.

> FN1. The Medical School assigns letter grades of A, B, C, D, F, I and Y to measure academic performance. A "Y" grade in a pre-clinical course is provisional; it means that a student has earned a failing grade but will be or has been permitted to retake the exam. However, a "Y" grade in a clinical clerkship indicates unsatisfactory performance in a major portion of that clerkship and may not be converted until the student repeats that portion of the clerkship.

In April 1992, the Medical School referred Zukle to the Student Evaluation Committee ("SEC").[FN2] Although subject to dismissal ***1043** pursuant to the Medical School's bylaws,[FN3] Zukle was allowed to remain in school. The SEC (1) placed Zukle on academic probation,[FN4] (2) required her to retake Anatomy and Biochemistry, (3) required her to be tested for a learning disability, and (4) placed her on a "split curriculum," meaning that she was given three years to complete the pre-clinical program, instead of the usual two years. Zukle continued to experience academic difficulty. For the spring quarter of 1992 (while on academic probation) she received a "Y" grade in Neurobiology. In the fall, she received a "Y" grade in Medical Microbiology and in the winter she received a "Y" in Principles of Pharmacology. In total, Zukle received eight "Y" grades during the pre-clinical portion of her studies. Five were converted to "C" after reexamination, two to "D" and one to "F."

> FN2. The Medical School's Committee on Student Evaluation and Promotion, which consists of two Promotions Boards and the SEC, monitors the progress of students with academic difficulties. Promotions Board A reviews preclinical students (i.e. students in the first two years of study); Promotions Board B reviews clinical students (i.e. students in the last two years of study). Generally, the SEC meets with students and their advisors before making a recommendation to the appropriate Promotions Board. The Promotions Board then conducts an independent review of the student's performance and decides whether to accept or reject the SEC's recommendation.

> FN3. The Medical School's bylaws provide that a student is subject to dismissal if she receives two or more failing grades within one academic quarter. Zukle received two "Y" grades in her first quarter.

> FN4. The Medical School's bylaws provide that a student on academic probation is required to remedy her deficient grades, and is subject to dismissal for failure to do so or if she receives another deficient grade while on academic probation.

In November 1992, Zukle was tested for a learning disability. The results received in January 1993, revealed that Zukle suffered from a reading disability which "affects visual processing as it relates to reading comprehension and rate when under timed constraints." In short, it takes Zukle longer to read and to absorb information than the average person. [FN5] Zukle asked Christine O'Dell, Coordinator of the University's Learning Disability Resource Center, to inform the Medical School of her test results in mid-July 1993. O'Dell informed Gail Currie of the Office of Student Affairs in a letter dated July 21, 1993. O'Dell recommended that the Medical School make various accommodations for Zukle's disability and recommended various techniques for Zukle to try to increase her reading comprehension. The Medical School of-

fered all of these accommodations to Zukle.

FN5. Under timed conditions, Zukle's reading comprehension is in the 2nd percentile, whereas when untimed her comprehension is in the 83rd percentile.

After completing the pre-clinical portion of Medical School, Zukle took the United States Medical Licensing Exam, Part I ("USMLE") in June 1994. Shortly thereafter, she began her first clinical clerkship, OB–GYN. During this clerkship, Zukle learned that she had failed the USLME.[FN6] The Medical School allowed Zukle to interrupt her OB–GYN clerkship to take a six-week review course to prepare to retake the USMLE, for which the Medical School paid.

FN6. Zukle's score placed her in the 5th percentile nationally.

Before leaving school to take the USMLE review course offered in southern California, Zukle asked Donal A. Walsh, the Associate Dean of Curricular Affairs, if she could rearrange her clerkship schedule. At this point, Zukle had completed the first half of her OB–GYN clerkship. She asked Dean Walsh if, instead of completing the second half of her OB–GYN clerkship upon return from retaking the USMLE, she could start the first half of a Family Practice Clerkship, and then repeat the OB–GYN clerkship in its entirety at a later date. Zukle testified that she made this request because she was concerned about how far behind she would be when she returned from the USMLE review course. She further asserted that she thought that if she started the Family Practice clerkship (which apparently requires less reading than the OB–GYN clerkship), she would be able to read for her upcoming Medicine clerkship at night. Zukle testified that Dean Walsh, and several other faculty members, including the Instructor of Record for Family Practice and the Instructor of Record for OB–GYN, initially approved her request. Later, however, Dean Walsh denied Zukle's request and informed her that she had to complete the OB–GYN clerkship before beginning another clerkship.

***1044** In September 1994, Zukle took and passed the USMLE on her second attempt.[FN7] She returned to the Medical School and finished her OB–GYN clerkship. Without requesting any accommodations, she began her Medicine clerkship. During this clerkship, she learned that she had earned a "Y" grade in her OB–GYN clerkship. Because of this grade, Zukle was automatically placed back on academic probation.[FN8]

FN7. Zukle's score placed her in the 9th percentile nationally.

FN8. The Promotions Board had voted to remove Zukle from academic probation in October 1994. At that time, it was unaware of her OB–GYN clerkship grade. The Medical School's bylaws provide that a student who receives a "Y" grade in her third or fourth years is automatically placed on academic probation at the time of receipt of the grade.

Two weeks before the Medicine written exam, Zukle contacted her advisor, Dr. Joseph Silva, and expressed concern that she had not completed the required reading. Dr. Silva offered to speak with Dr. Ruth Lawrence, the Medicine Instructor of Record, on Zukle's behalf. According to Zukle, she then spoke with Dr. Lawrence in person and requested time off from the clerkship to prepare for the exam. Dr. Lawrence denied Zukle's request. Zukle passed the written exam, but failed the Medicine clerkship because of unsatisfactory clinical performance. On Zukle's grade sheet, Dr. Lawrence rated Zukle as unsatisfactory in clinical problem solving skills; data acquisition, organization and recording; and skill/ability at oral presentations. Dr. Lawrence also reported negative comments from the people who worked with Zukle during the clerkship. Because Zukle had earned a failing grade while on academic probation, she was again subject to dismissal pursuant to the Medical School's bylaws.

On January 13, 1995, Zukle appeared before the SEC. The SEC recommended that Zukle (1) drop her current clerkship, Pediatrics; (2) start reviewing for the OB–GYN exam, and retake it; (3) repeat the Medicine clerkship in its entirety; (4) obtain the approval of the SEC before enrolling in any more clerkships; and (5) remain on academic probation for the rest of her medical school career.

On January 17, 1995, the Promotions Board met to consider Zukle's case. The Promotions Board voted to dismiss Zukle from the Medical School for "failure

166 F.3d 1041, 132 Ed. Law Rep. 81, 9 A.D. Cases 80, 14 NDLR P 188, 99 Cal. Daily Op. Serv. 1355, 1999 Daily Journal D.A.R. 1707
(Cite as: 166 F.3d 1041)

to meet the academic standards of the School of Medicine." According to Dr. Lewis, who was a member of the Promotions Board and was present when it reached its decision, "the Promotions Board considered Plaintiff's academic performance throughout her tenure at the medical school and determined that it demonstrated an incapacity to develop or use the skills and knowledge required to competently practice medicine."

In June 1995, Zukle appealed her dismissal to an *ad hoc* Board on Student Dismissal composed of faculty and students ("the Board").[FN9] Zukle appeared before the Board on November 12, 1995, and requested that her dismissal be reconsidered and that she be given extra time to prepare prior to some of her clerkships to accommodate her disability. The Board also heard testimony from Dr. Silva, who spoke favorably on her behalf, Dr. Ernest Lewis, Associate Dean of Student Affairs and Dr. George Jordan, the Chair of the Promotions Board at the time of Zukle's dismissal. When asked about Zukle's request to remain in Medical School on a decelerated schedule, Dean Lewis testified:

> FN9. The Medical School's bylaws provide that any student who has been dismissed from the Medical School may appeal her dismissal to the Dean, who in turn may appoint an *ad hoc* board consisting of five faculty members and two students to review the appeal. The Dean is responsible for the final disposition of the appeal.

> There is a certain point when everyone has to be able to respond in the same time frame. A physician does not have extra time when in the ER, for example. Speed of appropriate reaction to crisis is essential.
> The Board on Student Dismissal voted unanimously to uphold the Promotions Board's decision of dismissal.

***1045** On January 22, 1996, Zukle filed a complaint in federal district court for damages and injunctive relief against the Regents of the University of California ("Regents"). The complaint alleged discrimination based on disability, sex and race, and sexual harassment. On June 6, 1997, the Regents filed a motion for summary judgment. The district court entered its Memorandum of Opinion and Order on August 7, 1997, granting summary judgment to The Regents on all of Zukle's claims. The court found that Zukle's "race, sex, and sexual harassment claims are unsupported by the record and do not merit discussion." On Zukle's Americans with Disabilities Act ("ADA") and Rehabilitation Act claims, the district court found that "[b]ecause the evidence before the court shows that Zukle could not meet the minimum standards of the UCD School of Medicine with reasonable accommodation, she is not an otherwise qualified individual with a disability under the Rehabilitation Act or the ADA."

[1] Zukle timely appeals from the district court's grant of summary judgment on her ADA and Rehabilitation Act claims.[FN10]

> FN10. Zukle did not raise her race, sex or sexual harassment claims in her opening brief; therefore she has waived any appeal from the district court's grant of summary judgment on these claims. *See Sanchez v. Pacific Powder Co.*, 147 F.3d 1097, 1100 (9th Cir.1998) ("Ordinarily, a party's failure to raise an issue in the opening brief constitutes a waiver of that issue.").

II

Zukle claims that she was dismissed from the Medical School in violation of Title II of the ADA and section 504 of the Rehabilitation Act. Title II of the ADA provides, in relevant part:

> no qualified individual with a disability shall, by reason of such disability, be excluded from participation in or be denied the benefits of the services, programs, or activities of a public entity, or be subjected to discrimination by any such entity.

42 U.S.C. § 12132. Title II prohibits discrimination by state and local agencies, which includes publicly funded institutions of higher education. *See id.* at § 12131(1)(B).

Title II of the ADA was expressly modeled after Section 504 of the Rehabilitation Act, which provides:

> No otherwise qualified individual with a disability ... shall, solely by reason of her or his disability, be excluded from the participation in, be denied the

> benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance....
>
> 29 U.S.C. § 794.

To make out a prima facie case under either the ADA or Rehabilitation Act Zukle must show that (1) she is disabled under the Act; (2) she is "otherwise qualified" to remain a student at the Medical School, i.e., she can meet the essential eligibility requirements of the school, with or without reasonable accommodation; (3) she was dismissed solely because of her disability; and (4) the Medical School receives federal financial assistance (for the Rehabilitation Act claim), or is a public entity (for the ADA claim). *See Dempsey v. Ladd*, 840 F.2d 638, 640 (9th Cir.1988); *cf. Willis v. Pacific Maritime Assoc.*, 162 F.3d 561, 565 (9th Cir.1998) (stating prima facie elements for ADA employment case).[FN11]

> FN11. There is no significant difference in analysis of the rights and obligations created by the ADA and the Rehabilitation Act. *See* 42 U.S.C. § 12133 ("The remedies, procedures, and rights set forth in [the Rehabilitation Act] shall be the remedies, procedures, and rights [applicable to ADA claims]."); *Bragdon v. Abbott*, 524 U.S. 624, ——, 118 S.Ct. 2196, 2202, 141 L.Ed.2d 540 (1998) (stating that courts are required to "construe the ADA to grant at least as much protection as provided by the regulations implementing the Rehabilitation Act"). Thus, courts have applied the same analysis to claims brought under both statutes, *see Doe v. Univ. of Maryland Med. Sys. Corp.*, 50 F.3d 1261, 1265 n. 9 (4th Cir.1995) ("Because the language of the two statutes is substantially the same, we apply the same analysis to both."), and courts routinely look to Rehabilitation Act case law to interpret the rights and obligations created by the ADA, *see, e.g., Collings v. Longview Fibre Co.*, 63 F.3d 828, 832 n. 3 (9th Cir.1995) ("The legislative history of the ADA indicates that Congress intended judicial interpretation of the Rehabilitation Act be incorporated by reference when interpreting the ADA."); *Theriault v. Flynn*, 162 F.3d 46, 48 n. 3 (1st. Cir.1998) ("Title II of the ADA was expressly modeled after Section 504 of the Rehabilitation Act, and is to be interpreted consistently with that provision."); *cf. Weinreich v. Los Angeles County Metro. Transp. Auth.*, 114 F.3d 976, 978 (9th Cir.1997) ("Title II of the ADA was expressly modeled after Section 504 of the Rehabilitation Act ...." (citations omitted)).

***1046** The Regents do not dispute that Zukle is disabled and that the Medical School receives federal financial assistance and is a public entity. The Regents argue, however, that Zukle was not "otherwise qualified" to remain at the Medical School. Zukle responds that she *was* "otherwise qualified" with the aid of reasonable accommodations and that the Medical School failed reasonably to accommodate her.[FN12]

> FN12. Zukle does not argue that she could meet the Medical School's essential eligibility requirements *without* the aid of reasonable accommodations. Indeed, Zukle could not make this argument. As discussed below, Zukle had failed to meet the Medical School's essential eligibility requirements at the time she was dismissed. Because she had received a failing grade while on academic probation, she was subject to dismissal pursuant to the Medical School's bylaws. Accordingly, Zukle must show that she can meet the academic standards of the Medical School *with* the aid of reasonable accommodations. *See Barnett v. U.S. Air, Inc.*, 157 F.3d 744, 748 n. 2 (9th Cir.1998).

A

The ADA defines a "qualified individual with a disability" as one who "meets the essential eligibility requirements ... for participation in [a given] program[ ] provided by a public entity" "*with or without reasonable modifications* to rules, policies, or practices...." 42 U.S.C. § 12131(2) (emphasis added); *accord Southeastern Community College v. Davis*, 442 U.S. 397, 406, 99 S.Ct. 2361, 60 L.Ed.2d 980 (1979) (holding that under the Rehabilitation Act, an otherwise qualified individual is "one who is able to meet all of a program's requirements in spite of his handicap"). In the school context, the implementing regulations of the Rehabilitation Act define an otherwise qualified individual as an individual who, although disabled, "meets the academic and technical standards requisite to admission or participation in the [school's]

education program or activity." 34 C.F.R. § 104.3(k)(3).

However, under Rehabilitation Act regulations, educational institutions are required to provide a disabled student with reasonable accommodations to ensure that the institution's requirements do not discriminate on the basis of the student's disability. *See* 34 C.F.R. § 104.44(a). Similarly, the ADA's implementing regulations require a public entity to "make reasonable modifications in policies, practices, or procedures when the modifications are necessary to avoid discrimination on the basis of disability, unless the public entity can demonstrate that making the modifications would fundamentally alter the nature of the services, program, or activity." 28 C.F.R. § 35.130(b)(7). The Supreme Court has made clear that an educational institution is not required to make fundamental or substantial modifications to its program or standards; it need only make reasonable ones. *See Alexander v. Choate*, 469 U.S. 287, 300, 105 S.Ct. 712, 83 L.Ed.2d 661 (1985).

B

[2] In order to evaluate Zukle's claim, we must clarify the burdens of production and persuasion in cases of this type. The district court correctly noted that we have not previously addressed the allocation of the burdens of production and persuasion for the "otherwise qualified"—"reasonable accommodation" prong for a prima facie case in the school context. We have, however, recently articulated the allocation of these burdens in the employment context. *See Barnett v. U.S. Air, Inc.*, 157 F.3d 744 (9th Cir.1998). In *Barnett,* we made clear that the plaintiff bears the ultimate burden of persuasion with regard to whether he is qualified, i.e., in the school context, that he is able to meet the educational institution's essential eligibility requirements with or without the aid of reasonable accommodations. *See id.* at 749 (noting that, in the employment context, the plaintiff bears the burden of proving that he can perform the essential functions of the job with or without reasonable accommodation).

We further held that when the plaintiff alleges a failure to accommodate, part of the plaintiff's initial burden includes "showing the existence of a reasonable accommodation." *Id.* at 749. In the employment context,***1047** "[o]nce the plaintiff has established the existence of a reasonable accommodation that would enable him or her to perform the essential functions of an available job, the burden switches to the defendant to show that this accommodation would constitute an undue hardship." *Id.*

Adopting a similar burden shifting framework in the school context, we hold that the plaintiff-student bears the initial burden of producing evidence that she is otherwise qualified. This burden includes the burden of producing evidence of the existence of a reasonable accommodation that would enable her to meet the educational institution's essential eligibility requirements. The burden then shifts to the educational institution to produce evidence that the requested accommodation would require a fundamental or substantial modification of its program or standards. The school may also meet its burden by producing evidence that the requested accommodations, regardless of whether they are reasonable, would not enable the student to meet its academic standards. However, the plaintiff-student retains the ultimate burden of persuading the court that she is otherwise qualified.

C

[3] Before turning to the merits of Zukle's claims, we must decide whether we should accord deference to academic decisions made by the school in the context of an ADA or Rehabilitation Act claim, an issue of first impression in this circuit.

In *Regents of the Univ. of Michigan v. Ewing*, the Supreme Court analyzed the issue of the deference a court should extend to an educational institution's decision in the due process context. *See* 474 U.S. 214, 106 S.Ct. 507, 88 L.Ed.2d 523 (1985). In *Ewing,* the plaintiff-medical student challenged his dismissal from medical school as arbitrary and capricious in violation of his substantive due process rights. *See id.* at 217, 106 S.Ct. 507. The Court held that:

> When judges are asked to review the substance of a genuinely academic decision, such as this one, they should show great respect for the faculty's professional judgment. Plainly, they may not override it unless it is such a substantial departure from accepted academic norms as to demonstrate that the person or committee responsible did not actually exercise professional judgment.

Id. at 225, 106 S.Ct. 507 (footnote omitted).

166 F.3d 1041, 132 Ed. Law Rep. 81, 9 A.D. Cases 80, 14 NDLR P 188, 99 Cal. Daily Op. Serv. 1355, 1999 Daily Journal D.A.R. 1707
(Cite as: 166 F.3d 1041)

While the Court made this statement in the context of a due process violation claim, a majority of circuits have extended judicial deference to an educational institution's academic decisions in ADA and Rehabilitation Act cases. *See* *Doe v. New York Univ.*, 666 F.2d 761 (2d. Cir.1981); *McGregor v. Louisiana State Univ. Bd. of Supervisors*, 3 F.3d 850 (5th Cir.1993); *Wynne v. Tufts Univ. Sch. of Med. ("Wynne I")*, 932 F.2d 19 (1st. Cir.1991).[FN13] *But see* *Pushkin v. Regents of the Univ. of Colorado*, 658 F.2d 1372 (10th Cir.1981) (refusing to adopt deferential, rational basis test in evaluating educational institution's decisions in Rehabilitation Act case). These courts noted the limited ability of courts, "as contrasted to that of experienced educational administrators and professionals," to determine whether a student "would meet reasonable standards for academic and professional achievement established by a university," and have concluded that " '[c]ourts are particularly ill-equipped to evaluate academic performance.' " *Doe*, 666 F.2d at 775–76 (quoting *Board of Curators of Univ. of Missouri v. Horowitz*, 435 U.S. 78, 92, 98 S.Ct. 948, 55 L.Ed.2d 124 (1978)).

> FN13. Each circuit has, however, developed its own formulation of the deference standard. *Compare* *Doe*, 666 F.2d at 776 (holding that in determining whether a plaintiff is otherwise qualified to attend medical school, "*considerable judicial deference* must be paid to the evaluation made by the institution itself, absent proof that its standards and its application of them serve no other purpose than to deny an education to handicapped persons." (emphasis added)), *with* *McGregor*, 3 F.3d at 859 ("[A]bsent evidence of discriminatory intent or disparate impact, we must accord *reasonable deference* to the [school's] academic decisions." (emphasis added)).

We agree with the First, Second and Fifth circuits that an educational institution's academic decisions are entitled to deference. Thus, while we recognize that the ultimate determination of whether an individual is otherwise qualified must be made by the ***1048** court, we will extend judicial deference "to the evaluation made by the institution itself, absent proof that its standards and its application of them serve no purpose other than to deny an education to handicapped persons." *Doe*, 666 F.2d at 776.

[4] Deference is also appropriately accorded an educational institution's determination that a reasonable accommodation is not available. Therefore, we agree with the First Circuit that "a court's duty is to first find the basic facts, giving due deference to the school, and then to evaluate whether those facts add up to a professional, academic judgment that reasonable accommodation is not available." *Wynne I*, 932 F.2d at 27–28; *see also* *McGregor*, 3 F.3d at 859 (the court must "accord deference to [the school's] decisions not to modify its programs [when] the proposed modifications entail academic decisions").

We recognize that extending deference to educational institutions must not impede our obligation to enforce the ADA and the Rehabilitation Act. Thus, we must be careful not to allow academic decisions to disguise truly discriminatory requirements. The educational institution has a "real obligation ... to seek suitable means of reasonably accommodating a handicapped person and to submit a factual record indicating that it conscientiously carried out this statutory obligation." *Wynne I*, 932 F.2d at 25–26. Once the educational institution has fulfilled this obligation, however, we will defer to its academic decisions.

III

[5] Having answered several preliminary questions, we now turn to the ultimate question—did Zukle establish a prima facie case of discrimination under the ADA or the Rehabilitation Act? As noted before, only the "otherwise qualified" prong of the prima facie case requirements is disputed by the parties. Zukle argues that she was otherwise qualified to remain at the Medical School, with the aid of the three accommodations she requested. The Medical School argues that Zukle's requested accommodations were not reasonable because they would have required a fundamental or substantial modification of its program. *See* *Alexander*, 469 U.S. at 300, 105 S.Ct. 712 (holding that institution subject to Rehabilitation Act may be required to make reasonable modifications to accommodate a disabled plaintiff, but need not make fundamental or substantial modifications).

Zukle bears the burden of pointing to the existence of a reasonable accommodation that would enable her to meet the Medical School's essential eligibility requirements. Once she meets this burden, the Medical School must show that Zukle's requested

accommodation would fundamentally alter the nature of the school's program. We must determine, viewing the evidence in the light most favorable to Zukle, if there are any genuine issues of material fact with regard to the reasonableness of Zukle's requested accommodations. *See* *Margolis v. Ryan*, 140 F.3d 850, 852 (9th Cir.1998).

[6] We note at this stage that "[r]easonableness is not a constant. To the contrary, what is reasonable in a particular situation may not be reasonable in a different situation-even if the situational differences are relatively slight." *Wynne v. Tufts Univ. Sch. of Med. ("Wynne II")*, 976 F.2d 791, 795 (1st Cir.1992). Thus, we must evaluate Zukle's requests in light of the totality of her circumstances. *See* *Barnett*, 157 F.3d at 748 ("Whether a particular accommodation is reasonable depends on the circumstances of the individual case.").

The evidence is undisputed that the Medical School offered Zukle all of the accommodations that it normally offers learning disabled students. When the Medical School first learned of Zukle's disability she was offered double time on exams, notetaking services and textbooks on audio cassettes. Further, Zukle was allowed to retake courses, proceed on a decelerated schedule and remain at the Medical School despite being subject to dismissal under the Medical School's bylaws.

Even with these accommodations, Zukle consistently failed to achieve passing grades in her courses. Though Zukle was on a decelerated schedule, she continued to receive "Y" grades in her pre-clinical years and ***1049** failed the USMLE on her first attempt. Further, although she was able to remedy some of her failing grades in her pre-clinical years, she was only able to do so by retaking exams. Moreover, she received a "Y" grade in her first clinical clerkship, automatically placing her on academic probation, and an "F" in her second. Because Zukle received a failing grade while on academic probation, she was subject to dismissal pursuant to the Medical School's bylaws. Clearly, Zukle could not meet the Medical School's essential eligibility requirements without the additional accommodations she requested.

The issue, then, is whether the ADA and Rehabilitation Act required the Medical School to provide Zukle with those additional accommodations. As noted above, the Medical School was only required to provide Zukle with *reasonable* accommodations. Accordingly, we examine the reasonableness of Zukle's requested accommodations.

A

Zukle claims that the Medical School should have granted her request to modify her schedule by beginning the first half of the Family Practice Clerkship instead of finishing the second half of her OB–GYN clerkship when she returned from retaking the USMLE. She proposed that she would then begin the Medicine clerkship, and finish Family Practice and OB–GYN at a later time.

The Regents presented evidence that granting this request would require a substantial modification of its curriculum. While the Medical School has granted some students reading time prior to the commencement of a clerkship, Dean Walsh testified that once a clerkship begins "all students are expected to complete the reading and other requirements of the clerkship, including night call and ward care, and to prepare themselves for the written exam which is given only at the end of the 8–week clerkship." Zukle's request would have entailed interrupting her OB–GYN clerkship, and starting the Medicine clerkship before finishing the Family Practice clerkship. Thus, by the time Zukle began the Medicine clerkship she would have had two uncompleted clerkships.

Dean Walsh testified that the only time the Medical School allows a student to begin a clerkship, interrupt it, and then return to that clerkship at a later point is when a student has failed the USMLE and needs time off to study. However, the student is still required to return to the same clerkship. Given that no student had been allowed to rearrange her clerkships in the manner Zukle requested and that Zukle's request would entail Zukle interrupting two courses to complete them at some later date, we have little difficulty concluding that this would be a substantial alteration of the Medical School's curriculum. *See* *Davis*, 442 U.S. at 413, 99 S.Ct. 2361 (holding that a school is not required to make substantial modifications to accommodate a handicapped student).

Zukle argues that the Medical School allowed numerous students to rearrange their clerkship schedules, and thus there is a material issue of fact as to

whether her request was reasonable. However, while the students that Zukle mentions were allowed to remedy failing grades by retaking clerkships or exams, *none* was allowed to begin a clerkship, interrupt it, begin another clerkship, and retake the second half of the first clerkship at a later point. The facts are undisputed that no student had been allowed to rearrange their clerkship schedule as Zukle requested. Indeed, Zukle admitted in the district court that "no student has been permitted to finish an interrupted course in the fashion [she] requested because it would require substantial curricular alteration." [FN14] We defer to the Medical School's academic decision to require students to complete courses once they are begun and conclude, therefore, that this requested accommodation was not reasonable.

> FN14. Zukle stated that this statement was "undisputed" in her Response to Separate Statement of Undisputed Facts.

B

Two weeks before the scheduled written exam in her Medicine clerkship, Zukle asked ***1050** Dr. Silva, her advisor, if she could have more time to prepare for the exam because she was behind in the readings. Zukle testified that she specifically requested to leave the hospital early every day so that she could spend more time preparing for the written exam in Medicine. Dr. Silva and Zukle spoke with the Instructor of Record in Zukle's Medicine clerkship, Dr. Lawrence. Dr. Lawrence told Zukle that she could not excuse her from the in-hospital part of the clerkship. Dr. Lawrence testified that she denied this request because she thought that it would be unfair to the other students.

The Medical School presented uncontradicted evidence that giving Zukle reduced clinical time would have fundamentally altered the nature of the Medical School curriculum. The Medical School presented the affidavit of Dean Lewis in which he explained the significance of the clinical portion of the Medical School curriculum:

> The third-year clinical clerkships are designed to simulate the practice of medicine.... Depending on the specialty and the setting, students are generally required to be "on call" at the hospital through an evening and night one or more times each week. Other than these call nights, students remain at the hospital or clinic during day time hours on a schedule similar to that expected of clinicians.... Releasing a student from a significant number of scheduled hours during the course of a rotation would compromise the clerkship's curricular purpose, i.e. the simulation of medical practice.

We defer to the Medical School's academic decision that the in-hospital portion of a clerkship is a vital part of medical education and that allowing a student to be excused from this requirement would sacrifice the integrity of its program. Thus, we conclude that neither the ADA nor the Rehabilitation Act require the Medical School to make this accommodation.

In any event, the evidence shows that Zukle was not prejudiced by the Medical School's failure to grant this accommodation because she in fact passed the Medicine written exam. *See Ellis v. Morehouse School of Medicine*, 925 F.Supp. 1529, 1548 (N.D.Ga.1996) (noting that student was not prejudiced by failure to accommodate because he passed exam for which he was denied accommodation). Zukle's low score on the exam did not help her Medicine grade, but Zukle failed the clerkship because of her inadequate clinical performance. Indeed, as the district court stated, because Zukle was doing so poorly in the clinical portion of the clerkship, "[g]iving [her] time off from the clinical portion to study for the test[ ] could not have helped, but could only have further damaged, her already marginal clinical skills." Thus, Zukle did not establish that she would have been able to meet the Medical School's requirements with the requested accommodation.

C

Finally, after she was dismissed, Zukle requested that the *ad hoc* Board place her on a decelerated schedule during the clinical portion of her studies. Specifically, Zukle sought eight weeks off before each clerkship to read the assigned text for that clerkship in its entirety.[FN15]

> FN15. The Regents allege that Zukle has abandoned this argument on appeal. While Zukle's presentation of this issue in her opening brief is not extensive, we do not feel that it is so lacking that she can be said to have abandoned it.

Zukle presented evidence that the Medical School regularly allowed students to proceed on a decelerated

schedule. Indeed, Zukle herself was allowed an extra year to complete the pre-clinical curriculum. However, no student had been provided the specific accommodation that Zukle requested, i.e., taking eight weeks off between clerkships. Furthermore, simply because the Medical School had granted other students' requests to proceed on a decelerated schedule, does not mean that Zukle's request was reasonable. The reasonableness of Zukle's request must be evaluated in light of Zukle's particular circumstances.

We agree with the district court that the Board's denial of Zukle's request to proceed on a decelerated schedule was a "rationally justifiable conclusion." *See Wynne II*, 976 F.2d at 793 (quoting ***1051***Wynne I*, 932 F.2d at 26). The Board noted that, even on a decelerated schedule during the pre-clinical phase, Zukle experienced severe academic difficulties: Zukle earned deficient grades in five courses and failed the USMLE exam on her first attempt even though she had taken several pre-clinical courses twice. The Board noted that there is "a fair amount of overlap on written exams of material from second-year courses and that the clinical work overlaps with the written." In sum, the evidence makes clear that the decelerated schedule would not have aided Zukle in meeting the Medical School's academic standards. Given Zukle's unenviable academic record, allowing her to remain in Medical School on a decelerated schedule would have lowered the Medical School's academic standards, which it was not required to do to accommodate Zukle. *See Davis*, 442 U.S. at 413, 99 S.Ct. 2361.[FN16]

> FN16. Furthermore, Zukle requested this accommodation after the Medical School's decision to dismiss her. At no time prior to her dismissal did she request that the Medical School place her on a decelerated schedule. Her failure to request this accommodation earlier contributes to our finding of unreasonableness. *See Wynne II*, 976 F.2d at 796 n. 3 (finding relevant to reasonableness inquiry the fact that student did not ask for accommodation "until after [the school] sent him packing and adversary proceedings were underway").

IV

In conclusion, we are persuaded that Zukle failed to establish that she could meet the essential eligibility requirements of the Medical School with the aid of reasonable accommodations. Accordingly, she failed to establish a prima facie case of disability discrimination under the ADA or the Rehabilitation Act.

AFFIRMED.

MICHAEL BOLLINGER et al., Plaintiffs and Respondents,
v.
SAN DIEGO CIVIL SERVICE COMMISSION et al., Defendants and Appellants.

No. D026130.

Court of Appeal, Fourth District, Division 1, California.
Mar. 30, 1999.

SUMMARY

The trial court granted a police officer and the city police officers' association a writ of mandate compelling the civil service commission to set aside its ratification, made during a closed session, of a hearing officer's findings of fact and recommendation that the police officer's demotion be upheld. (Superior Court of San Diego County, No. 693456, Anthony C. Joseph, Judge.)

The Court of Appeal reversed. The court held that the trial court erred in concluding that the police officer had a right, under the Ralph M. Brown Act (Gov. Code, § 54957), to written notification of his right to an open hearing of the commission's ratification deliberations, since a public agency may deliberate in closed session on complaints or charges brought against an employee without providing the statutory notice. The court further held that the commission did not violate the police officer's procedural due process rights by denying him the opportunity to respond to the hearing officer's determination before the commission made its final decision, since the hearing officer made that determination following a noticed three-day public evidentiary hearing, which, together with the police officer's opportunity to seek judicial review, satisfied due process requirements. (Opinion by Nares, J., with O'Neill, J., [FN*] concurring. Concurring opinion by Work, Acting P. J. (see p. 578).)

FN* Judge of the San Diego Superior Court, assigned by the Chief Justice pursuant to article VI, section 6 of the California Constitution.

HEADNOTES

Classified to California Digest of Official Reports

(1) Statutes § 29--Construction--Language--Legislative Intent.

Statutory interpretation presents a question of law subject to independent review. A court's analysis starts from the fundamental premise that the objective of statutory interpretation is to ascertain and effectuate legislative intent. In determining intent, the court looks first to the words themselves. When the language is clear and unambiguous, there is no need for construction. When the language is susceptible of more than one reasonable interpretation, however, the court must look to a variety of extrinsic aids, including the ostensible objects to be achieved, the evils to be remedied, the legislative history, public policy, contemporaneous administrative construction, and the statutory scheme of which the statute is a part.

(2a, 2b) Law Enforcement Officers § 11--Demotion--Administrative Hearing and Decision--Personnel Exception to Ralph M. Brown Act.

The underlying purposes of the "personnel exception" (Gov. Code, § 54957) to the open meeting requirements of the Ralph M. Brown Act (Gov. Code, § 54950 et seq.) are to protect the employee from public embarrassment and to permit free and candid discussions of personnel matters by a local governmental body. Nonetheless, a court must construe the personnel exception narrowly and the open meeting requirements liberally. Under Gov. Code, § 54957, an employee may request a public hearing only when complaints or charges are involved. Negative comments in an employee's performance evaluation do not constitute complaints or charges within the meaning of Gov. Code, § 54957.

(3) Statutes § 31--Construction--Language--Qualifying Words and Phrases.

An accepted rule of statutory construction is that qualifying words and phrases, when no contrary intention appears, refer solely to the last antecedent.

(4a, 4b, 4c) Law Enforcement Officers § 11--Demotion--Administrative Hearing and Decision--Ratification of Hearing Officer's Determination

71 Cal.App.4th 568, 84 Cal.Rptr.2d 27, 142 Lab.Cas. P 59,147, 99 Cal. Daily Op. Serv. 2877, 1999 Daily Journal D.A.R. 3710
(Cite as: 71 Cal.App.4th 568)

in Closed Session--Ralph M. Brown Act--Due Process.

In a mandamus proceeding in which a police officer objected to the civil service commission's ratification, during a closed session, of a hearing officer's findings of fact and recommendation that the police officer's demotion be upheld, the trial court erred in concluding that the police officer had a right, under the Ralph M. Brown Act (Gov. Code, § 54957), to written notification of his right to an open hearing of the commission's ratification deliberations. A public agency may deliberate in closed session whether complaints or charges brought against an employee justify dismissal or disciplinary action without providing the statutory notice. Further, the commission did not violate the police officer's procedural due process rights by denying him the opportunity to respond to the hearing officer's determination before the commission made its final decision, since the hearing officer made that determination following a noticed three-day public evidentiary hearing, which, together with the police officer's opportunity to seek judicial review, satisfied due process requirements.

[See 7 Witkin, Summary of Cal. Law (9th ed. 1988) Constitutional Law, § 581.]

(5) Statutes § 42--Construction--Aids--Legislative History--Significance of Rejection of Specific Provision.

The rejection of a specific provision contained in a legislative act as originally introduced is most persuasive that the act should not be interpreted to include what was left out.

(6) Civil Service § 9--Discharge, Demotion, Suspension, and Dismissal-- Administrative Hearing and Decision--Constitutional Procedural Due Process Requirements.

U.S. Const., 14th Amend., places procedural constraints on the actions of government that work a deprivation of interests enjoying the stature of "property" within the meaning of the due process clause. The California Constitution contains a similar provision. In cases of public employment, the employee is entitled to due process in matters involving contemplated discipline. Minimal standards of due process require that a public employee receive, prior to imposition of discipline: (1) notice of the action proposed, (2) the grounds for discipline, (3) the charges and materials upon which the action is based, and (4) the opportunity to respond in opposition to the proposed action. To be meaningful, the right to respond must afford the employee an opportunity to present his or her side of the controversy before a reasonably impartial and noninvolved reviewer who possesses the authority to recommend a final disposition of the matter. The use of a single hearing officer, whose findings and proposed decision are adopted by the public agency, complies with due process.

COUNSEL

John W. Witt and Casey Gwinn, City Attorneys, Anita M. Noone, Assistant City Attorney, and Lisa A. Foster, Deputy City Attorney, for Defendants and Appellants.

Everitt L. Bobbitt; and Sanford A. Toyen for Plaintiffs and Respondents. ***571**

NARES, J.

In this employment matter, Michael Bollinger and the San Diego Police Officers' Association (the Association) obtained a writ of mandate compelling the San Diego Civil Service Commission and Commissioners Linda LeGerrette, Robert P. Ottilie, Franne M. Ficara, Daniel E. Eaton and Al Best (collectively the Commission), to set aside its closed session ratification of a hearing officer's findings of fact and recommendation that Bollinger's demotion be upheld. The court agreed the Commission's act was void under Government Code [FN1] section 54957, a provision of the Ralph M. Brown Act (§ 54950 et seq.) (the Brown Act) because it failed to give Bollinger 24-hour written notice of his right to request a public hearing. We reverse.

FN1 Statutory references are to the Government Code except where specified otherwise.

Background

The facts are undisputed. On January 13, 1995, the San Diego Police Department demoted Bollinger from police agent to police officer II based upon his misconduct. He appealed to the Commission. A noticed public evidentiary hearing was held over three days in April and June 1995, with Commissioner Ottilie serving as the sole hearing officer. [FN2]

FN2 The City of San Diego's civil service rules at the relevant time gave the Commission the discretion to "appoint one or more of

71 Cal.App.4th 568, 84 Cal.Rptr.2d 27, 142 Lab.Cas. P 59,147, 99 Cal. Daily Op. Serv. 2877, 1999 Daily Journal D.A.R. 3710
(Cite as: 71 Cal.App.4th 568)

> its members to hear the appeal and submit findings of fact and a decision to [it]. Based on the findings of fact, the Commission may affirm, modify, or overturn the decision[.]"

The Commission's written agenda for its August 3, 1995, meeting noted it would "recess into closed session ... to ratify hearings in the cases of Michael Bollinger and [another person][.]" The Commission posted the agenda 72 hours before the hearing (§ 54954.2) and mailed a copy to the Association. Bollinger was notified of the meeting in a telephone call. During closed session, the Commission ratified Ottilie's factual findings and recommendation that Bollinger's demotion be upheld. Shortly thereafter, the Commission for the first time provided Bollinger with a copy of Ottilie's 22-page written report. Bollinger complained to no avail that he was deprived of the opportunity to respond to Ottilie's report before the full Commission made its decision.

Bollinger then filed this action for a writ of mandamus under Code of Civil Procedure section 1085. He alleged the Commission's decision was void as a matter of law under section 54947 because it failed to notify him in writing of his right to request a public hearing. The court agreed and tentatively granted the petition in a telephonic ruling; it confirmed its decision after oral argument. ***572**

Discussion

I. *Standard of Review*

(1) Statutory interpretation presents a question of law subject to independent review. (*Board of Retirement v. Lewis* (1990) 217 Cal.App.3d 956, 964 [266 Cal.Rptr. 225].) " 'Our analysis starts from the fundamental premise that the objective of statutory interpretation is to ascertain and effectuate legislative intent. [Citations.] In determining intent, we look first to the words themselves. [Citations.] When the language is clear and unambiguous, there is no need for construction. [Citation.] When the language is susceptible of more than one reasonable interpretation, however, we look to a variety of extrinsic aids, including the ostensible objects to be achieved, the evils to be remedied, the legislative history, public policy, contemporaneous administrative construction, and the statutory scheme of which the statute is a part. [Citations.]' " (*Department of Fish & Game v. Anderson-Cottonwood Irrigation Dist.* (1992) 8 Cal.App.4th 1554, 1562 [11 Cal.Rptr.2d 222], citing *People v. Woodhead* (1987) 43 Cal.3d 1002, 1007-1008 [239 Cal.Rptr. 656, 741 P.2d 154].)

II. *The Brown Act*

A

(2a) In enacting the open meeting requirements of the Brown Act in 1953, the Legislature expressly declared "the public commissions, boards and councils and the other public agencies in this State exist to aid in the conduct of the people's business. It is the intent of the law that their actions be taken openly and that their deliberations be conducted openly." (§ 54950.) Section 54953 accordingly provides "[a]ll meetings of the legislative body of a local agency shall be open and public, and all persons shall be permitted to attend any meeting of the legislative body of a local agency, except as otherwise provided in this chapter."

The Brown Act's "personnel exception" to the open meeting rule, found at section 54957, provides in relevant part: "Nothing contained in this chapter shall be construed to prevent the legislative body of a local agency from holding closed sessions ... during a regular or special meeting to consider the appointment, employment, evaluation of performance, discipline, or dismissal of a public employee or to hear complaints or charges brought against the employee by another person or employee unless the employee requests a public session.

"As a condition to holding a closed session on specific complaints or charges brought against an employee by another person or employee, the ***573** employee shall be given written notice of his or her right to have the complaints or charges heard in an open session rather than a closed session, which notice shall be delivered to the employee personally or by mail at least 24 hours before the time for holding the session. If notice is not given, any disciplinary or other action taken by the legislative body against the employee based on the specific complaints or charges in the closed session shall be null and void." [FN3]

> FN3 Ordinarily, acts of a legislative body in violation of the Brown Act are not invalid; they merely subject the member of the governing body to criminal penalties. (*Griswold v. Mt. Diablo Unified Sch. Dist.* (1976) 63 Cal.App.3d 648, 657-658 [134 Cal.Rptr. 3]; § 54959.) Section 54957 thus affords an employee wrongfully deprived of written

71 Cal.App.4th 568, 84 Cal.Rptr.2d 27, 142 Lab.Cas. P 59,147, 99 Cal. Daily Op. Serv. 2877, 1999 Daily Journal D.A.R. 3710
(Cite as: 71 Cal.App.4th 568)

notice a valuable remedy.

"[T]he underlying purposes of the 'personnel exception' are to protect the employee from public embarrassment and to permit free and candid discussions of personnel matters by a local governmental body." (*San Diego Union v. City Council* (1983) 146 Cal.App.3d 947, 955 [196 Cal.Rptr. 45].) We must nonetheless "construe the 'personnel exception' narrowly and the 'sunshine law' liberally in favor of openness [citation] ...." (*Ibid.*)

In *Furtado v. Sierra Community College* (1998) 68 Cal.App.4th 876 [80 Cal.Rptr.2d 589], the court interpreted the first paragraph of section 54957 to allow an employee to request a public hearing only where "complaints or charges" are involved. It reasoned the phrase " 'unless the employee requests a public session' " applies only to the immediately preceding phrase " 'or to hear complaints or charges brought against the employee' ...." (68 Cal.App.4th at p. 881.) (3) "An accepted rule of statutory construction is that qualifying words and phrases, where no contrary intention appears, refer solely to the last antecedent." (*Ibid.*)

(2b) The *Furtado* court held that negative comments in an employee's performance evaluation did not constitute "complaints or charges" within the meaning of section 54957. "[T]o merge employee evaluations into the category of 'complaints or charges' in order to permit an open session is effectively to rewrite the statute." (*Furtado v. Sierra Community College, supra,* 68 Cal.App.4th at p. 882.) "[T]he Legislature has drawn a reasonable compromise, leaving most personnel matters to be discussed freely and candidly in closed session, but permitting an employee to request an open session to defend against specific complaints or charges brought against him or her by another individual." (*Ibid.*; see also *Fischer v. Los Angeles Unified School District* (1999) 70 Cal.App.4th 87 [82 Cal.Rptr.2d 452] [performance evaluation of probationary teacher does not constitute the bringing of "specific complaints or charges"].)
***574**

(4a) Here, in contrast to *Furtado* and *Fischer,* the Commission concedes this matter does not involve a routine employee performance evaluation but "specific complaints or charges" other police officers brought against Bollinger. [FN4] It contends, though, that Bollinger was not entitled to 24-hour written notice of its August 3, 1995, closed session, because it was solely for the purpose of *deliberating* whether the complaints or charges justified disciplinary action rather than conducting an evidentiary hearing thereon.

FN4 Ottilie's written report shows several police officers accused Bollinger of disobeying numerous orders and failing to properly document the chain of custody of evidence.

The Commission relies upon the clause in the second paragraph of section 54957, which provides "the employee shall be given written notice of his or her right to have the complaints or charges *heard* in open session rather than a closed session[.]" (Italics added.) We also note that in the first paragraph of section 54957, the Legislature used "to consider" in reference to the "appointment, employment, evaluation of performance, discipline, or dismissal" of an employee, but used "to hear" in reference to "complaints or charges brought against the employee by another person or employee." To "consider" is to "deliberate upon[.]" (American Heritage Dict. (1981) p. 284, col. 1.) To "hear" is to "listen to in an official ... capacity[.]" (*Id.* at p. 607, col. 2.) A "hearing" is "[a] proceeding of relative formality ..., generally public, with definite issues of fact or of law to be tried, in which witnesses are heard and evidence presented." (Black's Law Dict. (6th ed. 1990) p. 721, col. 1.) The plain language of section 54957 lends itself to the interpretation the Commission urges.

The statute's legislative history further supports the Commission's position. The second paragraph of section 54957 was enacted by parallel Assembly and Senate Bills. (Stats. 1993, ch. 1136, § 12 (Assem. Bill No. 1426 (1993-1994 Reg. Sess.)); Stats. 1993, ch. 1137, § 12 (Sen. Bill No. 36 (1993-1994 Reg. Sess.)).) As originally introduced, both bills read in part: "As a condition to holding a closed session *on the complaints or charges to consider disciplinary action or to consider dismissal, the employee shall be given written notice of his or her right to have a public hearing rather than a closed session, which notice shall be delivered to the employee personally or by mail at least 24 hours before the time for holding the session." (Sen. Bill No. 36 (1993-1994 Reg. Sess.) § 17; Assem. Bill No. 1426 (1993-1994 Reg. Sess.) § 17, italics added.)*

71 Cal.App.4th 568, 84 Cal.Rptr.2d 27, 142 Lab.Cas. P 59,147, 99 Cal. Daily Op. Serv. 2877, 1999 Daily Journal D.A.R. 3710
(Cite as: 71 Cal.App.4th 568)

Later, however, the italicized language was deleted and the bills were altered to what now appears in paragraph two of section 54957, cited *ante*. (Assem. Amend. to Sen. Bill No. 36, § 12 (1993-1994 Reg. Sess.) Aug. 19, 1993; Sen. Amend. to Assem. Bill No. 1426, § 12 (1993-1994 Reg. Sess.) ***575** Sept. 8, 1993.) The Legislature thus specifically rejected the notion an employee is entitled to 24-hour written notice when the closed session is for the sole purpose of considering, or deliberating, whether complaints or charges brought against the employee justify dismissal or disciplinary action. (5) "The rejection of a specific provision contained in an act as originally introduced is 'most persuasive' that the act should not be interpreted to include what was left out. [Citations.]" (*Wilson v. City of Laguna Beach* (1992) 6 Cal.App.4th 543, 555 [7 Cal.Rptr.2d 848].) (4b) Accordingly, we conclude a public agency may deliberate in closed session on complaints or charges brought against an employee without providing the statutory notice.

B

Under the particular facts here, however, a question remains: Was Bollinger entitled to be "heard," within the meaning of section 54957, by the Commission before it recessed into closed session to deliberate whether to adopt the factual findings and recommendation of the single hearing officer?

Bollinger argues the Commission violated his procedural due process rights by denying him the opportunity to respond to Ottilie's written factual findings and recommendation before it made its final decision. The Commission counters that the evidentiary hearing before a single hearing officer, and the opportunity to seek judicial review, satisfied due process requirements. [FN5]

> FN5 Because due process principles were not raised in the trial court or in the initial appellate briefing, we asked the parties to provide supplemental letter briefs on the issue. We have taken their responses into consideration.

(6) " 'The Fourteenth Amendment to the United States Constitution "places procedural constraints on the actions of government that work a deprivation of interests enjoying the stature of 'property' within the meaning of the Due Process Clause." [Citations.] The California Constitution contains a similar provision. [Citations.]' " (*Townsel v. San Diego Metropolitan Transit Development Bd.* (1998) 65 Cal.App.4th 940, 946 [77 Cal.Rptr.2d 231].) "[I]n cases of public employment, the employee is entitled to due process in matters involving contemplated discipline." (*Robinson v. State Personnel Bd.* (1979) 97 Cal.App.3d 994, 1005 [159 Cal.Rptr. 222] (conc. opn. of Evans, J.).)

"Minimal standards of due process require that a public employee receive, prior to imposition of discipline: (1) Notice of the action proposed, (2) the grounds for discipline, (3) the charges and materials upon which the action is ***576** based, and (4) the opportunity to respond in opposition to the proposed action. (*Williams v. County of Los Angeles* (1978) 22 Cal.3d 731, 736 [150 Cal.Rptr. 475, 586 P.2d 956]; *Skelly v. State Personnel Bd.* (1975) 15 Cal.3d 194, 215 [124 Cal.Rptr. 14, 539 P.2d 774].) To be meaningful, the right to respond must afford the employee an opportunity to present his side of the controversy before a reasonably impartial and noninvolved reviewer who possesses the authority to recommend a final disposition of the matter." (*Titus v. Civil Service Com.* (1982) 130 Cal.App.3d 357, 362-363 [181 Cal.Rptr. 699]; accord, *Linney v. Turpen* (1996) 42 Cal.App.4th 763, 770 [49 Cal.Rptr.2d 813]; *Coleman v. Regents of University of California* (1979) 93 Cal.App.3d 521, 526 [155 Cal.Rptr. 589].) The use of a single hearing officer, whose findings and proposed decision are adopted by the public agency, complies with due process. (*Nat. Auto. & Cas. Co. v. Ind. Acc. Com.* (1949) 34 Cal.2d 20, 29-30 [206 P.2d 841].)

(4c) In *Titus v. Civil Service Com., supra*, 130 Cal.App.3d 357, a lieutenant in the sheriff's department received notice of his proposed discharge. He was given the materials upon which the disciplinary action was based and the opportunity to respond orally or in writing. After the employee argued his position to a chief, the chief recommended his firing. The undersheriff and two assistant sheriffs reviewed the matter and adopted the chief's recommendation. The employee appealed to the Civil Service Commission of Los Angeles County, which adopted the hearing officer's recommendation and sustained the firing.

The employee then sought a writ of mandate to compel his reinstatement, arguing his due process rights were violated when he was precluded from responding to the chief's recommendation before a

final decision was made. In affirming the lower court's denial, the court explained: "The record discloses that Chief Knox possessed the authority to recommend the ultimate disposition to the charges against appellant, subject only to review by a panel consisting of the undersheriff and two assistant sheriffs.... Appellant was permitted to present his side of the controversy. Due process requires nothing more." (*Titus v. Civil Service Com., supra,* 130 Cal.App.3d at p. 363.)

The Administrative Procedure Act (§ 11500 et seq.), applicable to certain state agencies, provides that if a contested matter is heard by an administrative law judge, the agency may adopt the written proposed decision in its entirety. In *Greer v. Board of Education* (1975) 47 Cal.App.3d 98 [121 Cal.Rptr. 542], the court held that in that instance an employee has no right to receive the hearing officer's proposed decision or present any argument to the full agency before it acts. The court noted the aggrieved party's remedy ***577** is to seek review in the superior court on the basis of the evidentiary hearing record. [FN6] (*Id.* at pp. 110-112; § 11517.)

> FN6 Here, the City of San Diego's civil service rules required that a reporter record testimony taken at the evidentiary hearing.

In *Dami v. Dept. Alcoholic Bev. Control* (1959) 176 Cal.App.2d 144, 154 [1 Cal.Rptr. 213], the court likewise held "neither the language of [section 11517] nor constitutional principle requires that the proposed decision [of the hearing officer] be served prior to the rendition of the final one." (Accord, *American Federation of Teachers v. San Lorenzo etc. Sch. Dist.* (1969) 276 Cal.App.2d 132, 136 [80 Cal.Rptr. 758]; *Stoumen v. Munro* (1963) 219 Cal.App.2d 302, 314 [33 Cal.Rptr. 305]; *Strode v. Board of Medical Examiners* (1961) 195 Cal.App.2d 291, 297-298 [15 Cal.Rptr. 879].) It is only when the agency does not adopt the hearing officer's recommendation and reviews the evidence itself that the employee has the opportunity to argue the matter to the agency. (*Hohreiter v. Garrison* (1947) 81 Cal.App.2d 384, 396 [184 P.2d 323]; § 11517, subd. (c).)

California's Civil Service Act (§ 18500 et seq.) similarly provides the board may adopt the proposed decision of its representative or may hear the matter itself. Only in the latter instance is the employee allowed to make additional argument to the board. (§ 19582.) In *Sinclair v. Baker* (1963) 219 Cal.App.2d 817 [33 Cal.Rptr. 522], the court rejected the notion due process was violated where the board adopted the hearing officer's recommendation without allowing the employee to respond. The court found dispositive the reasoning of the cases concerning the Administrative Procedure Act. (*Id.* at pp. 822-823; accord, *Fichera v. State Personnel Board* (1963) 217 Cal.App.2d 613, 620 [32 Cal.Rptr. 159] ["... due process is supplied by the hearing officer's taking of evidence, his findings and proposed decision, the decision of the board based on the findings and proposal, and by review by the court even though the last is not a trial de novo, followed by this appeal"].)

Where an administrative agency relegates the evidentiary hearing to one or more of its members, we observe the better practice would be to give the employee the opportunity to respond orally or in writing to the factual findings and recommendation before a final decision is made. [FN7] A hearing officer's report may contain critical inaccuracies and the employee's ability to address them would benefit everyone and result in a fairer process. ***578**

> FN7 In its supplemental letter brief, the Commission advises that after Bollinger's case was heard, its rules were modified to allow an employee to challenge the proposed decision in writing prior to the final decision. The provision, however, expired after six months and has apparently not been renewed.

Given the above authorities, however, we are constrained to conclude Bollinger's minimum due process rights were satisfied. He received notice of the proposed demotion and the basis therefor and had the opportunity to fully respond at a public evidentiary hearing. Ottilie was a "reasonably impartial and noninvolved reviewer," and under the City of San Diego's civil service rules, he had the authority to recommend a final disposition of the matter. Moreover, Bollinger could have sought review of the substantive merits of the Commission's decision in his petition for writ relief, based upon the record of the evidentiary hearing before Ottilie. [FN8]

> FN8 While Bollinger did seek writ relief, he raised only the Brown Act issue and failed to submit the administrative hearing record or challenge the substantive merits of the

71 Cal.App.4th 568, 84 Cal.Rptr.2d 27, 142 Lab.Cas. P 59,147, 99 Cal. Daily Op. Serv. 2877, 1999 Daily Journal D.A.R. 3710
(Cite as: 71 Cal.App.4th 568)

Commission's decision.

It follows that because Bollinger had no legal right to learn of or respond to Ottilie's factual findings and recommendation before the Commission ratified them, no portion of its August 1995 meeting can be construed as a "hearing" on complaints or charges within the meaning of section 54957. Rather, the matter was confined to deliberation which, as discussed, may be held in closed session. In sum, contrary to the trial courts' ruling, the Commission did not run afoul of the Brown Act and its action is valid. [FN9]

FN9 Given our holding, we deny without discussion Bollinger's request for sanctions under Code of Civil Procedure section 907 on the ground the Commission's appeal is frivolous.

Disposition

The judgment is reversed. Bollinger to pay the Commission's costs on appeal.

O'Neill, J., [FN*] concurred.

FN* Judge of the San Diego Superior Court, assigned by the Chief Justice pursuant to article VI, section 6 of the California Constitution.

WORK, Acting P. J.,

Concurring.-Although I concur in the opinion, I write separately to identify the narrow context of the legal issue we address in part II.A as presented to the trial court by Michael Bollinger's petition for mandate and the narrow confines of the trial court's judgment in response to that petition which is a subject of this appeal.

I also point out the procedural due process discussion in part II.B fails to consider the significance of the fact that, in this case, the hearing officer whose findings of fact and recommendation were considered by the San Diego Civil Service Commission (Commission) in executive session, was himself a commissioner and was present when his fellow commissioners ***579** considered his findings and recommendation. In response to our letter inquiry, we were advised, "The full Commission routinely meets with the hearing officer to fully discuss the proposed report of the hearing officer and ratify the findings that are prepared prior to the meeting." We were further advised that although more than three months transpired between the conclusion of the evidentiary hearing on these complaints and charges and the ratification of the hearing officer's findings and recommendation, Bollinger was first apprised of those findings and recommendation when served with a copy of the Commission's ratification decision.

A.

Bollinger's petition for mandamus sets forth one narrow issue: whether the ratification action taken by the full Commission in closed session following a public evidentiary hearing was null and void for failure to notify Bollinger in writing that he also had the right to have the Commission's later ratification deliberations in open session. The issue was posed in light of the facts of this case. Here, Bollinger's evidentiary proceedings were heard by a single member of the Commission who had been designated as a hearing officer. More than three months after its conclusion, Bollinger received oral notice of the Commission's intent to meet in closed session to determine whether to ratify the hearing officer's findings and recommendation. Bollinger did not receive a copy of the hearing officer's findings or his recommendation. In spite of the oral notice, Bollinger did not make a specific request to have the deliberative session open.

Relevant to this appeal, the trial court found that although Bollinger was orally informed the deliberations would be held in a closed session, he never made a request for a public session. Finding actual notice irrelevant, the trial court confined its decision solely to whether Government Code section 54957 requires the Commission to give Bollinger written notice of a right to have the ratification deliberations conducted in public. Therefore, the court below did not, nor do we, address the broader issue of whether, had Bollinger specifically requested that deliberative process to be open, the failure to accede to his request would be a Ralph M. Brown Act violation.

B.

Turning to the procedural due process discussion, I agree with the analysis as a stated general proposition. However, had the issue been framed in light ***580** of the facts of this case, we would have had to address it in a more meaningful context.

71 Cal.App.4th 568, 84 Cal.Rptr.2d 27, 142 Lab.Cas. P 59,147, 99 Cal. Daily Op. Serv. 2877, 1999 Daily Journal D.A.R. 3710
(Cite as: 71 Cal.App.4th 568)

First, it is true that procedural due process is usually satisfied by the mere availability of an appellate remedy. However, in a practical sense, in cases such as this, appellate review is less than meaningful to one who is denied the right to present his case, to argue its merits, and to dissect factual findings for the edification of those faceless decision makers who are empowered to remove, demote or discipline. As the question is posed in our opinion, we only decide that constitutional procedural due process did not require, although we believe it preferable, to permit Bollinger to appear before the full Commission after first receiving the hearing officer's recommended findings, for the purpose of enlightening the Commission members as to their validity and whether the evidence was fairly characterized in that report.

Be that as it may, there is an additional significant fact which we obtained from the parties upon our direct inquiry which sets this case apart from those cited. That is, the hearing officer Commission member whose findings and recommendation were ratified by the Commission was present in the closed session while his fellow Commission members engaged in the deliberations. Thus, Bollinger, who was not even apprised of the hearing officer's findings and recommendation until after they were ratified, was excluded from the Commission's “free and candid” discussion of his fate in the presence of the hearing officer who was present to defend, encourage, enlighten and “freely and candidly” respond to any concerns expressed by his fellow Commission members. Whether the hearing officer did anything more than merely sit silently and impassively while his findings and recommendation were considered and ratified by the Commission, or in fact participated in some manner during the closed proceedings, is not shown in this record. However, the fact of his presence alone, in a position to defend his findings and recommendation while preventing Bollinger from even being aware of their nature let alone having the ability to argue their validity to the Commission, transcends the procedural unfairness considered in any of the numerous cases cited by the majority. However, whether a hearing officer/commissioner's presence while his colleagues deliberate to ratify his findings in closed sessions, coupled with the failure to disclose the nature of those findings to the affected employee, denying him the opportunity to argue their validity before the commissioners meet in closed session with the hearing officer may deny the procedural due process guaranteed by the Fourteenth Amendment and article I, section 7, subdivision (a) of the California ***581** Constitution, although a significant concern, is an issue not raised in this appeal. [FN1]

FN1 During oral argument in a recent unpublished case, *Kathan v. Civil Service Com.* (Mar. 10, 1999) D028812, the city attorney advised that the commission had adopted an interim policy, pending a decision in this matter, for the commission to hold its deliberations on personnel matters arising out of complaints and charges in open session. We were told that conducting those deliberations openly had created no impediment to efficiency, appropriate disposition of those matters or candor.

Therefore, subject to the comments expressed herein, I concur. ***582**

C

COUNTY OF SACRAMENTO, Petitioner,
v.
JOHN S. CHAMBERS, as Controller, etc., Respondent.

Civ. No. 1645.

Court of Appeal, Third District, California.
March 1, 1917.

COUNTIES--CLASSIFICATION--USE OF STATE MONEYS.

Counties are not municipal corporations or, strictly speaking, corporations of any kind, but are local subdivisions of the state, created by the sovereign power without the consent of the people who inhabit them, although they possess some corporate characteristics and may be within the inhibition of sections 22 and 31 of article IV of the constitution, against the drawing or appropriation of money from the state treasury for the benefit of a corporation or any institution not under the exclusive control and management of the state and against the making of any gift of such money to any individual or municipal or other corporation.

ID.--TUBERCULOSIS LAW--ACT CONSTITUTIONAL.

The act (Stats. 1915, p. 1530) providing for the establishment and maintenance of a bureau of tuberculosis under the direction of the state board of health and granting state aid to counties for the support and care of persons afflicted with tuberculosis, is not violative of article IV, section 22, of the constitution, providing that no money shall be drawn or appropriated from the state treasury for the benefit of any corporation or institution not under the exclusive control and management of the state, or of article XI, section 13, providing that the legislature shall not delegate to a special commission the power to interfere with or supervise the affairs of counties, or of article IV, section 31, providing that the legislature shall not lend or authorize the lending of the credit of the state or of any county in aid of or to any person for the payment of any liabilities of any individual, etc.

APPLICATION for a Writ of Mandate originally made to the District Court of Appeal for the Third Appellate District to compel the State Controller to draw his warrant in favor of petitioner in payment of his claim arising under the state tuberculosis law.

The facts are stated in the opinion of the court.

***143** Hugh B. Bradford, District Attorney, and Kemper B. Campbell, Attorney for State Board of Health, for Petitioner.

U. S. Webb, Attorney-General, and Robert T. McKisick, Deputy Attorney-General, for Respondent.

HART, J.

This is an original application for a writ of mandate to compel the respondent, as state controller, to draw his warrant in favor of the petitioner for the sum of $2,299.30, in payment of the claim of said petitioner arising under an act of the legislature of 1915, entitled: "An act to provide for the establishment and maintenance of a bureau of tuberculosis under the direction of the state board of health; defining its powers and duties; providing for the granting of state aid to cities, counties, cities and counties and groups of counties for the support and care of persons afflicted with tuberculosis; making an appropriation therefor; and repealing certain acts of the legislature of the state of California." (Stats. 1915, p. 1530.)

The first section of said act provides: "The state board of health shall maintain a bureau of tuberculosis for the complete and proper registration of all tuberculosis persons within the state; for supervision over all hospitals, dispensaries, sanatoria, farm colonies, and other institutions for tuberculosis, both public and private; for advising officers of the state penal and charitable institutions regarding the ***144** proper care of tuberculosis inmates, and for such educational and publicity work as may be necessary; for administration of the fund for state aid to cities, counties, cities and counties and groups of counties for the care of patients who are county charges in city, county, or city and county tuberculosis wards or hospitals or in tuberculosis wards and hospitals maintained by any group of counties, and for the performance of such

other duties as may be assigned by the said board."

The second section provides that the state board of health shall appoint a director, who shall be duly qualified and trained in public health work. In addition to the administration of the bureau, under the supervision of the said state board, it is by said section made the duty of the director, "and he is hereby vested with full power," to inspect and investigate, and have access to all records and departments of all institutions, both public and private, where tuberculosis patients are treated. "He shall prepare annually for each institution a report of its rating on sanitary construction, enforcement of sanitary measures, adequate provision for medical and nursing attendance, provision for proper food, and such other matters of administration as may be designated. Administration of the fund for the care of patients who are county charges in city, county, and city and county tuberculosis wards and hospitals and the tuberculosis wards and hospitals maintained by any group of counties shall be based upon his reports and under the rules and regulations of the board."

Section 3 provides that any city, county, etc., establishing a tuberculosis ward or hospital shall receive from the state three dollars per week for each person in the active stages of tuberculosis, cared for therein at public expense, who is unable to pay for his support and who has no relatives legally liable and financially able to pay for his support and who has been a *bona fide* resident of such city, county, etc., for one year; provided, that the city, county, etc., shall not become entitled to receive such state aid unless the tuberculosis ward or hospital conforms to the regulations of and is approved by the state bureau of tuberculosis. "The medical superintendent of each hospital receiving state aid under this act shall render semi-annually to the state bureau of tuberculosis a report under oath showing, for the period covered by the report, (1) the number of patients in the active stages of ***145** tuberculosis cared for therein at public expense, unable to pay for their own support and having no relatives legally liable and financially able to pay therefor, and (2) the number of weeks of treatment of each of such patients."

The refusal of the respondent to draw his warrant in favor of the petitioner for the amount named in the petition is based entirely upon the claim that said statute, in so far as it authorizes the payment of the sums specified therein to cities, counties, etc., for the purposes stated in the act, is in violation of sections 22 and 31 of article IV, and section 13 of article XI of the constitution. His position, more specifically stated, is that the maintenance and support and the control of county hospitals constitute duties and burdens which the law casts upon the supervisors and the taxpayers of counties, and that the expense necessary to be incurred in supporting such hospitals is a county charge, citing sections 4223, 4041, subdivision 7, and 4307 of the Political Code. It is hence argued that, since county hospitals are not under the exclusive management and control of the state as state institutions, the proposed payment of money drawn from the treasury to counties, etc., for the purpose mentioned in the said act, is in contravention of section 22 of article IV of the constitution; 2. That counties are municipal corporations and that, therefore, the payment of such moneys to counties would involve a gift of the same, contrary to section 31 of said article; 3. That the act, in violation of section 13 of article XI of the constitution, attempts to delegate to the bureau of tuberculosis or the state board of health the power to control and supervise and thus interfere with the affairs of a county, to the extent to which the bureau or board may require the tuberculosis ward or hospital of such county to conform, in the management thereof, to the regulations established by said bureau, and to make reports thereto, as prescribed by the act.

Referring first to one of the several points made by the petitioner in support of the claim that the act in question impinges upon none of the provisions of the constitution within the inhibitions of which the respondent insists the act in question falls, it may be remarked: That it is well settled that counties are not municipal corporations or, strictly speaking, corporations of any kind. They are obviously lacking in the essentials which chiefly characterize and distinguish***146** municipal corporations, and it has often been said that they do not come within the latter class of corporations. It is true that both municipal corporations and counties are governmental agencies, but the manner and source of their creation and the purposes, respectively, to subserve which they are brought into existence and activity are entirely at variance. "Municipal corporations proper are called into existence either at the direct solicitation or by the free consent of the persons composing them, for the promotion of their own local and private advantage and convenience. On the other hand, counties are local subdivisions of the state, created by the sovereign

power of the state, of its own sovereign will, without the particular solicitation, consent, or concurrent action of the people who inhabit them. The former (municipal) is asked for, or at least assented to, by the people it embraces; and the latter organization (counties) is superimposed by a sovereign and paramount authority. … With scarcely an exception, all the powers and functions of the county organization have a direct and exclusive reference to the general policy of the state, and are, in fact, but a branch of the general administration of that policy." (1 Dillon on Municipal Corporations, 5th ed., sec. 35.) Counties, however, possess some corporate characteristics. Like all involuntary political or governmental subdivisions of the state, they are classed as *quasi* corporations. But whatever may be their proper classification, we are not prepared to say that counties are not within the inhibitions of sections 22 and 31 of article IV of the constitution, against the drawing or appropriation of money from the state treasury for the benefit of a corporation or any institution not under the exclusive control and management of the state and against the making of any gift of such money to any individual, municipal, or other corporation of whatsoever kind or character. It is undoubtedly true that the design of the sections of the constitution invoked against the act in question was to prevent the appropriation of the moneys of the state for any purpose other than that which pertains to the state, and that an appropriation by the legislature of money from the state treasury for a purpose wholly foreign to any of the essential functions of the state government would clearly and unquestionably amount to a gift within the plain meaning and intent of section 31 of article IV. (***147***Stevenson v. Colgan*, 91 Cal. 649, 651, [[25 Am. St. Rep. 230, 14 L. R. A. 459, 27 Pac. 1089]; *Bourn v. Hart*, 93 Cal. 321, [27 Am. St. Rep. 203, 15 L. R. A. 431, 28 Pac. 951].)

But we do not hesitate to express the opinion that the provision of the act in question authorizing the payment to counties of the sums to be used for the purpose therein specified is not in contravention of the sections of the constitution just adverted to. Nor are we impressed with the argument that said provision of said act is obnoxious to the objection that it offends section 13 of article XI of the constitution, in that it involves an attempt by the legislature to delegate to "a special commission," etc., the power to interfere with or supervise the affairs of counties or to "perform any municipal function whatever."

It has never been, nor will it ever be, questioned that, among the first or primary duties devolving upon a state is that of providing suitable means and measures for the proper care and treatment, at the public expense, of the indigent sick, having no relatives legally liable for their care, support, and treatment, those who are infirm and helpless from the ravages of advancing years and without means of their own or relatives upon whom the law places responsibility for their care and support, and the insane, likewise situated as to means necessary for their care, support, and safekeeping. (Cooley on Taxation, p. 204.) Nor can it for a moment be doubted that it is the duty of the state to take all necessary steps for the promotion of the health and comfort of its inhabitants and to make such regulations as may be conceived to be essential to the protection of the state and the people thereof, so far as such result may be attained, against the visitations and prevalence of deadly epidemical and endemical diseases, and to take and prosecute such health and sanitary steps and measures as will result in stamping them out, or, by recognized methods of scientific treatment, reducing to the lowest possible minimum the percentage of fatalities following therefrom. These are duties which the state owes to its inhabitants for the protection, promotion, and the preservation of their general happiness and welfare; and, as is true of the duty of the state in the matter of taking proper care of the impecunious or indigent who are afflicted with disease and who have no means for caring for themselves or relatives legally responsible for such care, they are duties ***148** which the state may perform in the exercise of its sovereignty, even in the absence of direct constitutional authority therefor--indeed, duties which it may discharge under its inherent power of police.

But we do not understand that it is claimed by the respondent that the duties to which we refer do not rest upon the state or that the state is without the power to execute them. In fact, as we understand the position of the respondent, it is not claimed by him that the sections of the constitution invoked against the validity of the legislation involved in this dispute were intended to have the effect of prohibiting the state from performing the duty or exercising the power of which we have been speaking. In such a case, these questions may arise, however: Whether the state has shifted the burden of those duties upon the counties, and, if not, whether, in the exercise of the power whereby it may

perform those duties, the state has adopted a mode or method of doing so which is not discountenanced by any of the provisions of the constitution. In this case, the fundamental proposition upon which the respondent builds up his argument against the constitutional propriety of that provision of the act in question which authorizes the payment of certain sums to the counties for the purpose stated therein is that the state has made it the duty of counties to maintain hospitals for the care, support, and treatment of the indigent sick, and that therefore the burden of supporting such hospitals is upon the counties and not upon the state.

The constitution nowhere places the burden of maintaining, supporting, caring for, and treating the indigent sick upon the counties of the state. The legislature, however, in the exercise of its duty and power to establish a system of county governments (section 4, article XI, constitution), has, in fixing and enumerating the powers of boards of supervisors of the counties, authorized said boards to establish and maintain county hospitals, prescribe rules for the government and management thereof, and appoint county physicians and the necessary officers and employees thereof, who shall hold office during the pleasure of the board (Pol. Code, sec. 4223); to build or rebuild, furnish or refurnish hospitals and almshouses (Pol. Code, sec. 4041, subd. 7); and has further provided that the necessary expenses incurred in the support of the county hospitals, almshouses, and the indigent sick and ***149** otherwise dependent poor, whose support is chargeable to the county, constitute county charges (Pol. Code, sec. 4307, subd. 7).

As stated, upon the foregoing provisions of the Political Code the argument is erected that, the state having transferred to counties the duty and burden of maintaining hospitals for the care, support, and treatment of the indigent sick, an appropriation of any moneys from the state treasury for the support of such afflicted persons amounts to a gift, and is therefore in violation of the constitution, and that the statute in question not only runs up against that inhibition of the constitution, but violates the other sections of the organic law above referred to for the reasons heretofore stated.

There is no doubt that the legislature, by the legislation above referred to, intended to and did transfer from its own shoulders and so placed upon the counties the duty and burden of caring for, supporting, and treating the classes of persons mentioned. But this does not mean that the state has thus forever surrendered all control over those matters or the right itself to exercise full and complete and exclusive jurisdiction and control over hospitals for the indigent sick and helpless paupers. As before stated, the constitution does not require this burden to be borne by the counties. The state may so transfer it to counties, however, in the exercise of its sovereignty. As we have seen, counties are mere agencies of the state, the functions of whose organization are, to the extent of the territorial limits of their geographical divisions, concerned with the administration of the general governmental policy of the state, "and are, in fact, but a branch of the general administration of that policy." All the people of the state, while not directly interested in the administration of the affairs of municipal corporations of which they are not members, are so interested in the administration of the governmental affairs of a county, whether they reside or own property therein or not, because, as stated, such administration involves, to the extent of the geographical limits of a county, the administration of the affairs and policy of the state. The state may, through its legislature, and in the exercise of its sovereign power and will, in all cases where the people themselves have not restricted or qualified such exercise of that power, apportion and delegate to the counties any of the functions which belong to it. On the other hand, the ***150** state may take back and itself resume the exercise of certain functions which it had delegated to those local agencies; and, in some cases, particularly those having reference to the state's police power, we know of no reason, constitutional or otherwise, why the state and the counties may not act conjointly and synchronously in carrying out the policies of the former. Indeed, an analogy to the latter situation may be found in the matter of the regulation by the state of the right to pursue and kill wild birds and animals. By an act of the legislature of 1909 (Stats. 1909, p. 663), the authority to issue licenses for such hunting and killing is vested not only in the state board of fish commissioners, but also in the county clerks of the various counties of the state. The act requires the last-named officials, upon application therefor, to issue such licenses, to receive the fees therefor, to account for the same to the state controller every three months, and pay all sums so received into the state treasury, they (the clerks) to receive as their compensation for the services so performed out of the state "game preservation fund" ten per cent of the amounts accounted for. (*County of Sacramento v. Pfund*, 165

Cal. 84, [130 Pac. 1041].) This so-called "game law" does not, it is true, make the collection of the licenses therein provided for a function of the county organization. But it is very clear that it does employ a part of that organization's machinery for carrying out its policy with respect to a branch of its own functions, and we doubt not that it could have devolved that duty upon the counties themselves, designating the particular officers thereof to discharge it, and have provided that the compensation for such service should be paid into the treasury of the county from the state fund mentioned in that act, in which case it would not be contended or held, as it has never been contended or held under the provisions of the present game law, that the payment for the service so performed for the state out of moneys in the state treasury would involve a gift of such moneys within the inhibition of section 31 of article IV of the constitution or an appropriation or the drawing of money from said treasury in violation of section 22 of said article. The game law, however, as before suggested, stands as a concrete example of the proposition above explained, viz.: That the true purpose of county government organizations is to perform functions which belong to the state itself, and that the latter may employ them, either jointly ***151** with itself or alone, as instrumentalities in aid of the administration or the carrying out of its own general governmental functions and policy.

The act in question does not, it seems to us, go any further than the act regulating the right to pursue and kill wild game and animals, above referred to. It does not purport to nor does it involve an appropriation of money for the support or in aid of the support of county hospitals. As a matter of fact, there is no such institution as a county hospital as a separate entity. As has been shown, the legislature has authorized or empowered the supervisors of counties to establish and maintain, at the expense of taxpayers of counties, hospitals at which the indigent sick and infirm, otherwise eligible to the public bounty in that particular, may receive proper care, support, and medical treatment. The power to maintain such establishments, like that whereby the counties may build and maintain public roads and highways, or administer public justice, is only a part of the general scheme established by the legislature whereby those political subdivisions are required to exercise and perform certain of the functions of the state which the latter, for convenience and economy, has elected to commit to them. As above declared, the state may, if it so elects, assume entire control of the matter of caring for and supporting and administering aid to the classes of persons for whose benefit county hospitals are established and maintained. It has the right and the power to establish and maintain, under its own exclusive control and management, hospitals for such purposes, and so entirely relieve counties of that duty and burden. And, having the right and the power to take upon itself entire responsibility for the support and the treatment of all such persons, it has the undoubted right and power to take exclusive or only partial control and assume corresponding liability for the care, treatment, and support of a portion or a certain class of such persons, or those only who are afflicted with a particular kind of malady. By establishing state hospitals, under its exclusive control and management, where the insane and feebleminded are maintained and given medical treatment, the state has exercised this very right and power. And it is in effect what it has done in this case.

Tuberculosis is a deadly disease, fatal almost in every instance, unless, in its earliest stages, its progress is arrested ***152** and the tubercle bacilli are destroyed. That it is a contagious disease or one that is by contact transmissible from a victim of the malady to one not so afflicted, is a thoroughly established scientific fact. By health statistics and data gathered and published by the public health department of the state government, it has been shown that over one-seventh of all the deaths in California, prior to the passage and enforcement of the law here under attack, were caused by this dread and justly dreaded disease, and that, down to the time mentioned, the ratio of deaths from tuberculosis was constantly increasing. Incidentally, it may be observed that, according to verified and authentic statistics gathered and prepared by the same official authority, there has been in California a marked and readily noticeable decrease in deaths from said cause since the passage and enforcement of this statute.

There are still in California, however, as we learn from the official reports of the said health department, large numbers of persons suffering from this deadly disease, mostly in the form of attacks upon the pulmonary organs, very many of whom are without financial means to pay for their own support and medical treatment and without relatives legally liable or financially able to give them support and the care and treatment indispensable in such cases. The existence of such conditions is obviously a positive menace to

the health of the inhabitants of the state.

But it has been demonstrated that by special scientific treatment, under favorable sanitary and general health conditions, tuberculosis, when not advanced to its final stages, may be cured; but that, unless such conditions are established and uniformly maintained, the difficulty of securing restoration of the patient, however able, persistent, and scientific may be the medical treatment, becomes in most cases insuperable.

Considering and finding all these facts, as we must assume that it did, the legislature has adjudged that drastic or at least more than the usual or ordinary precautions taken to guard and protect and preserve the public health should be provided for and taken against the spread of this well-nigh implacable destroyer of human life. That body conceived, as certainly there was real, substantial, and alarming occasion for conceiving, that measures should be adopted requiring the subjection of the disease to the strictest surveillance, to the ***153** end that spread of the disease by the indiscriminate intercommunication of its victims with the public at large might be prevented, and to special medical treatment and scientific nursing, under such scientifically arranged and maintained conditions as the latest and most scientifically conducted investigations and experiments have demonstrated to be all-essential to successful treatment of the malady. The manifest purpose of the statute is therefore twofold: 1. To succor those indigents who are afflicted with tuberculosis and who have no relatives legally liable for their support, maintenance, and treatment, or, if legally liable, having no financial means to discharge the liability; 2. To prevent the spread of the disease.

The state, to attain these ends, has, by the statute in question, and in the exercise of its sovereignty--indeed, in the exercise of its police power-- assumed the right and authority to control the matter of the care and treatment of those indigents who are legally entitled to be cared for and treated at public expense and who are afflicted with tuberculosis; but, in the place of erecting and maintaining hospitals or sanatoria for that purpose in various parts of the state, which it would have a right to do, it has employed the counties--its agents in the administration of certain of its functions of govern ment--as instrumentalities for or aids in controlling and managing that branch of its governmental duties and policy. That this is the true analysis and exposition of the object and intent of the statute in controversy here is evidenced by the provisions that, as conditions to the payment to the counties of the money therein provided for, the latter must establish tuberculosis wards or hospitals in compliance with regulations established by the state bureau of tuberculosis, that the medical superintendent of such wards or hospitals must render, semi-annually, to the said state bureau, a report under oath, showing the number of patients in the active stages of tuberculosis legitimately cared for therein at public expense and the number of weeks of treatment of each such patients, and that the director of the state bureau may have full power to inspect and investigate, and have access to all records and departments of all institutions, both public and private, where tuberculosis patients are treated, and must prepare annually for each institution a report of its rating on sanitary construction, enforcement of sanitary measures, adequate provision for medical and nursing attendance, provision ***154** for food, and such matters of administration as may be designated, etc. The latter provision--giving the state's agents the authority to inspect and investigate private tuberculosis hospitals--is indicative of the importance attached by the state to the exercise of special care in the matter of the treatment of tuberculosis and the maintenance of the most favorable sanitary conditions and surroundings wherever victims of that disease may be cared for and treated. The state undoubtedly has the right, under its police power, to adopt sanitary or other appropriate regulations, applicable to the whole state and to private as well as to public tuberculosis sanatoria, looking to the stamping out of the disease and the prevention of its increase, and thus to the protection of the public health. With respect to county tuberculosis wards or hospitals, it proposes by the law in question to do no more than this. In authorizing the payment by the state of the sum named in the act to counties maintaining such wards or hospitals according to regulations formulated and promulgated by its health department, the legislature did not intend, nor was it the object of the act, to appropriate the state's money to or for the benefit of counties, but only to facilitate the proper execution of its scheme to control in part or itself supervise the matter of the treatment of indigent tuberculosis patients, legally entitled to be taken care of at public expense. Obviously, the counties, to which these moneys are authorized to be paid, are, as to such money, mere trustees of an express trust, with absolutely no authority or right to divert the use of the same

to any other than the purpose or object for which it has been expressly appropriated by the state. As repeatedly herein declared, we can perceive no sound reason for holding that it is not within the competence of the state to enter into such an arrangement with the counties under its broad and comprehensive and essential sovereign power--that power, unhampered by constitutional restrictions, except, perhaps, as to the mode and manner of its exercise, under which the state is not only authorized, but it is its duty to make and enforce all such reasonable rules and regulations as may be necessary and conducive to the promotion and preservation of the general health, happiness, and welfare of its inhabitants. Thus it is very clear that, in enacting the law with which we are here concerned, and thereby making an appropriation of the state's money for the proper carrying out of ***155** the plan therein set forth for the care and suppression of a dangerous contagious disease, the state has not transcended but has remained within its rights as a sovereign commonwealth. Thus it does not make a gift of the public money in contravention of the thirty-first section of article IV of the constitution, nor appropriate the money of the state to the use or benefit of the corporations or associations or institutions specified in section 22 of said article. Nor, under our view as above set forth as to the nature of the power under which the state has proceeded in the enactment of the law in question, should it be necessary to suggest that the provision of the last-named section of article IV of the constitution expressly authorizing the state to grant aid to institutions conducted for the support and maintenance of certain classes of persons (minor orphans, half-orphans, etc.), even when viewed by the light of the rule of construction, *expressio unius est exclusio alterius*, does not preclude the state from the exercise of the right to apply its police power on all proper and appropriate occasions, and to pass laws, such as the one before us, whose purpose is to protect the lives, health, and general happiness of its inhabitants. And it is equally patent, for reasons already given, that the act does not authorize the state bureau of tuberculosis or the state board of health to interfere with or supervise counties, their property or affairs. As stated, the supervisory control exercised by the state under the act is over the tuberculosis patients in the hospitals of those counties conforming in their treatment of those cases to the regulations of said state bureau.

It is conceded that the petitioner maintains a tuberculosis ward in connection with its county hospital conforming in all particulars to the rules established by the state bureau of tuberculosis for the regulation thereof.

In accordance with the foregoing views, the demurrer interposed by the respondent to the petition is hereby overruled, and a writ of mandate is hereby ordered to issue out of this court directed to said respondent, commanding him to issue to and in behalf of the petitioner his warrant for the amount named in the petition.

Chipman, P. J., and Burnett, J., concurred.

No. S032327.

Supreme Court of California
Apr 27, 1995.

SUMMARY

In each of 11 criminal proceedings, involving defendants who had been charged with having committed one or more felonies involving controlled substances and who were unable to post the prescribed bail, the trial court released defendant from custody before trial on his or her own recognizance (OR), on the condition that he or she agree to submit to random drug testing and warrantless search and seizure during the period of release. (Superior Court of Santa Clara County, Nos. 161088, 161238, 161957, 163882 and 163935, John J. Garibaldi and Robert Michael Foley, Judges; Municipal Court for the Santa Clara Judicial District of Santa Clara County, Nos. C9327030, C9327239, C9327432, C9327583, C9327609 and C9327981, Marliese G. Kim, Judge.) In a consolidated proceeding, the Court of Appeal, Sixth. Dist., Nos. H011030, H011177 and H011242, concluded that a court or magistrate may, in appropriate circumstances, condition a defendant's OR release upon a defendant's agreement to submit to random drug testing and warrantless search and seizure. The court held that these OR release conditions are permissible if, after considering the specific facts and circumstances of a defendant's case, the court or magistrate determines that these facts and circumstances reasonably justify imposition of the conditions. However, because the court or magistrate in each of these proceedings failed to make an individualized determination as to the reasonableness of the conditions imposed upon defendants based upon all the circumstances presented in each defendant's case, the Court of Appeal issued writs of habeas corpus, vacating those portions of the supervised OR release orders that required submission to random drug testing and warrantless search and seizure, and allowing the prosecutor 30 days to request additional conditions of OR release for any such defendant.

The Supreme Court affirmed the judgment of the Court of Appeal. It held that a court or magistrate has the authority in granting OR release to require the defendant to comply with all reasonable conditions, even one implicating the defendant's constitutional rights, provided that the condition is reasonable under the circumstances. Pen. Code, § 1318, subd. (a)(2), added in 1988, authorizes a court to impose reasonable conditions on OR defendants. The statute is ambiguous as to whether the term "reasonable conditions" is limited to conditions assuring a defendant's appearance at subsequent court proceedings. However, the legislative history indicates that the Legislature intended to authorize courts to weigh considerations relating to public safety that extend beyond those intended to ensure subsequent court appearances. Although random drug testing and warrantless search and seizure conditions do not relate directly to the likelihood that a defendant will comply with his or her duty to attend subsequent court hearings, the conditions clearly relate to the prevention and detection of further crime and thus to the safety of the public. The court also held that the conditions did not deprive defendants of their constitutional rights to the presumption of innocence, privacy, or equal protection of the law. (Opinion by George, J., expressing the unanimous view of the court.)

HEADNOTES

Classified to California Digest of Official Reports

(1) Bail and Recognizance § 7--Release on Own Recognizance--Conditions-- Submission to Drug Testing and Warrantless Searches--Validity--As "Reasonable Condition" Under Governing Statute.

In each of 11 criminal proceedings, involving defendants who had been charged with having committed one or more felonies involving controlled substances and who were unable to post the prescribed bail, the trial court's release of defendant from custody before trial on his or her own recognizance (OR), on the condition that defendant agree to submit to random drug testing and warrantless search and seizure during the period of release, was not invalid. Pen. Code, § 1318, subd. (a)(2), added in 1988, authorizes a court to impose reasonable conditions on OR defendants. The

statute is ambiguous as to whether the term "reasonable conditions" is limited to conditions assuring a defendant's appearance at subsequent court proceedings. However, the legislative history indicates that the Legislature intended to authorize courts to weigh considerations relating to public safety that extend beyond those intended to ensure subsequent court appearances. Thus, a court or magistrate has the authority in granting OR to require the defendant to comply with all reasonable conditions, even one implicating the defendant's constitutional rights, provided that the condition is reasonable under the circumstances. Although random drug testing and warrantless search and seizure conditions do not relate directly to the likelihood that a defendant will comply with his or her duty to attend subsequent court hearings, the conditions clearly relate to the prevention and detection of further crime and thus to the safety of the public.

[See 4 **Witkin & Epstein,** Cal. Criminal Law (2d ed. 1989) § 2034.]

(2) Bail and Recognizance § 7--Release on Own Recognizance--Conditions-- Submission to Drug Testing and Warrantless Searches--Validity--As Violating Presumption of Innocence.

In releasing defendants (who had been charged with felonies involving controlled substances) before trial on their own recognizance (OR), the trial court did not violate defendants' constitutional right to the presumption of innocence by the imposition of a condition that defendants agree to submit to random drug testing and warrantless search and seizure during the period of release. The presumption of innocence is a doctrine that allocates the burden of proof in criminal trials. Although this principle lies at the foundation of the administration of our criminal law, it has no application to a determination of the rights of a pretrial detainee during confinement before his or her trial has even begun. Thus, whether a pretrial detainee is given OR release with-or without-conditions has no bearing upon the presumption of innocence to which that person is entitled at trial.

(3a, 3b) Bail and Recognizance § 7--Release on Own Recognizance-- Conditions--Submission to Drug Testing and Warrantless Searches--Validity--As Violating Right to Privacy.

In releasing defendants (who had been charged with felonies involving controlled substances) before trial on their own recognizance (OR), the trial court did not violate defendants' constitutional right to privacy by the imposition of a condition that defendants agree to submit to random drug testing and warrantless search and seizure during the period of release. First, a defendant who seeks OR release does not have the same reasonable expectation of privacy as that enjoyed by persons not charged with any crime, and by defendants who have posted reasonable bail. Because an incarcerated individual generally is subject to random drug testing and warrantless search and seizure in the interest of prison security, the conditions imposed upon defendants did not place greater restrictions upon their privacy rights than they would have experienced had they not secured OR release. Second, a pretrial detainee is not required to agree to such restrictions, but rather is subject to them only if he or she consents to their imposition in exchange for obtaining OR release. A defendant granted OR release is not entitled to unconditional, bail-free release. This does not render the consent coerced or involuntary.

(4) Searches and Seizures § 9--Constitutional Provisions--Proscription of Unreasonable Searches:Constitutional Law § 58--Right to Privacy.

The United States and California Constitutions proscribe only unreasonable searches and seizures. In determining the standard of reasonableness applicable to a particular type of search or seizure, a court must balance the nature and quality of the intrusion on the individual's interests under U.S. Const., 4th Amend., against the importance of the governmental interests alleged to justify the intrusion. In the search and seizure context, the privacy clause of Cal. Const., art. I, § 1, does not establish a broader protection than that provided by the Fourth Amendment or Cal. Const., art. I, § 13 (search and seizure).

(5a, 5b) Bail and Recognizance § 7--Release on Own Recognizance-- Conditions--Submission to Drug Testing and Warrantless Searches--Validity--As Violating Right to Equal Protection.

In releasing defendants (who had been charged with felonies involving controlled substances and who were unable to post the prescribed bail) before trial on their own recognizance (OR), the trial court did not violate defendants' constitutional right to equal protection by the imposition of a condition that defendants agree to submit to random drug testing and warrantless search and seizure during the period of release. Even if warrantless drug testing and search and seizure conditions could not be imposed upon a defendant who is able to post reasonable bail, this disparate treatment does not violate principles of equal

protection. On its face, Pen. Code, § 1318 (OR agreements; reasonable conditions), is facially neutral; it does not create wealth-based distinctions or establish any classifications whatsoever, and a defendant's ability to post bail, in itself, does not implicate equal protection principles. Also, § 1318 does not have a discriminatory purpose. Nothing contained in the statute's history suggests a legislative attempt to discriminate against indigent defendants. To the contrary, the Legislature clearly had a rational basis for concluding that public safety would be enhanced if such defendants were required to comply with reasonable conditions necessary in order to deter further criminal conduct.

(6) Constitutional Law § 85--Equal Protection--Judicial Review-- Presumptions.

The burden of establishing the unconstitutionality of a statute rests upon the party who assails it, and courts may not declare a legislative discrimination invalid unless, viewed in the light of facts made known or generally assumed, it is of such a character as to preclude the assumption that the classification rests upon some rational basis within the knowledge and experience of the legislators. A statutory discrimination will not be set aside as the denial of equal protection of the laws if any state of facts reasonably may be conceived to justify it. The equal protection clause of U.S. Const., 14th Amend., guarantees equal laws, not equal results.

COUNSEL

Stuart R. Rappaport, Public Defender, and Stephen B. Elrick, Deputy Public Defender, for Petitioners.

Ann Brick, Grossman & Gibbs and Lawrence A. Gibbs as Amici Curiae on behalf of Petitioners.

George W. Kennedy, District Attorney, and Joseph V. Thibodeaux, Deputy District Attorney, for Respondents.

Daniel E. Lungren, Attorney General, George Williamson, Chief Assistant Attorney General, Ronald A. Bass, Assistant Attorney General, Ronald E. Niver and Clifford K. Thompson, Deputy Attorneys General, Thomas Sneddon, Jr., District Attorney (Santa Barbara) and Gerald McC. Franklin, Deputy District Attorney, as Amici Curiae on behalf of Respondents.

GEORGE, J.

We granted review in this case to determine whether, in making the decision to release an accused from custody on his or her own recognizance (OR) prior to judgment, a court or magistrate may condition such release upon the defendant's agreement to submit to random drug testing and warrantless search and seizure during that period. Petitioners maintain that the imposition of such conditions is not permitted by the statutory provision governing OR release, and, in any event, violates various constitutional guarantees.

For the reasons set forth below, we conclude that neither the statutory nor the constitutional provisions upon which petitioners rely prohibit a court, in ***1138** appropriate circumstances, from conditioning OR release upon a defendant's agreement to comply with these challenged terms.

I.

The proceedings in this case were brought on behalf of 11 named individuals, each of whom had been charged with having committed one or more felonies involving controlled substances. Unable to post the bail prescribed for their offenses by the bail schedules, petitioners were given the choice of remaining in custody pending trial upon the charges, or obtaining OR release upon their agreement to comply with specified conditions, including those requiring that petitioners "[s]ubmit to drug [and, in some instances, alcohol] testing" and "[p]ermit search and seizure of his/her person, residence, and vehicle by any peace officer without a search warrant." [FN1] Several of the petitioners objected to these conditions when they initially were proposed, but the judge or magistrate refused to order OR release without them. In each case, the conditions were listed on a court-generated form entitled "Release on: Supervised Own Recognizance," and an "X" had been placed on the form in the box to the left of various conditions. These conditions were imposed categorically upon petitioners, without individualized consideration of the facts alleged in each case, such as whether an individual petitioner had any prior drug-related convictions, had admitted drug use, or had received drug test results indicating drug use.

FN1 The OR release orders contained additional conditions, including a residence requirement that compelled petitioners to re-

side within the county, a requirement that petitioners not operate a motor vehicle without possessing a valid California driver's license and proof of insurance, and a prohibition upon the possession of weapons during the pendency of the case. Because petitioners do not challenge the imposition of these additional conditions, their validity is not at issue in this case.

The record indicates that the magistrate who imposed the drug testing and search conditions upon all but two of the petitioners did so as a matter of course or as an established policy in cases involving the alleged commission of drug-related felonies. [FN2] The pretrial release officer assigned to the magistrate's court testified that the public defender routinely objected to these conditions being imposed upon petitioners (and upon other public defender clients), but that the magistrate overruled these objections without explanation for the imposition of these conditions, other than "take it or leave it." ***1139**

FN2 Because each petitioner in these proceedings was charged with having committed a felony, we need not and do not reach the question whether the OR release conditions imposed in these proceedings properly could be required of arrestees charged only with having committed a misdemeanor, such persons having a statutory right to OR release "unless the court makes a finding upon the record that an [OR] release will not reasonably assure the appearance of the defendant as required." (Pen Code., § 1270, subd. (a).)

After consolidating petitioners' cases, the Court of Appeal held that a court or magistrate may, in appropriate circumstances, condition a defendant's OR release upon a defendant's agreement to submit to random drug testing and warrantless search and seizure. In the view of the appellate court, such OR release conditions are permissible if, after considering the specific facts and circumstances of a defendant's case, the court or magistrate determines that these facts and circumstances reasonably justify their imposition. Because the court or magistrate in the present proceedings failed to make an individualized determination as to the reasonableness of the conditions imposed upon petitioners, based upon all the circumstances presented in each petitioner's case, the Court of Appeal issued writs of habeas corpus, vacating those portions of the supervised OR release orders that required submission to random drug testing and warrantless search and seizure, and allowing the prosecutor 30 days to request additional conditions of OR release for any such petitioner.

Petitioners sought review in this court, challenging that portion of the Court of Appeal's decision holding that, under certain circumstances, a court or magistrate may condition OR release upon a defendant's agreement to submit to random drug testing and warrantless search and seizure. Petitioners contend the imposition of such conditions upon OR release is contrary to the applicable California statute and violates several provisions of the federal and state Constitutions. We granted review to consider these issues. [FN3]

FN3 Because the People, represented by the Santa Clara County District Attorney's Office, did not seek review from, and do not now challenge, that portion of the Court of Appeal's decision holding that the imposition of random drug testing and warrantless search and seizure conditions upon OR releasees is permissible only when the court or magistrate has made an individualized determination that such conditions are warranted in light of the facts of the particular case, we need not and do not address the validity of the Court of Appeal's conclusion in this regard.

II.

Article I, section 12, of the California Constitution establishes a person's right to obtain release on bail from pretrial custody, identifies certain categories of crime in which such bail is unavailable, prohibits the imposition of excessive bail as to other crimes, sets forth the factors a court shall take into consideration in fixing the amount of the required bail, and recognizes that a person "may be released on his or her own recognizance in ***1140** the court's discretion." [FN4] Penal Code section 1318 sets forth a variety of requirements that an OR release agreement must satisfy. [FN5] ***1141**

FN4 Article I, section 12, of the California Constitution provides:

"A person shall be released on bail by suffi-

cient sureties, except for:

"(a) Capital crimes when the facts are evident or the presumption great;

"(b) Felony offenses involving acts of violence on another person when the facts are evident or the presumption great and the court finds based upon clear and convincing evidence that there is a substantial likelihood the person's release would result in great bodily harm to others; or

"(c) Felony offenses when the facts are evident or the presumption great and the court finds based on clear and convincing evidence that the person has threatened another with great bodily harm and that there is a substantial likelihood that the person would carry out the threat if released.

"Excessive bail may not be required. In fixing the amount of bail, the court shall take into consideration the seriousness of the offense charged, the previous criminal record of the defendant, and the probability of his or her appearing at the trial or hearing of the case.

"A person may be released on his or her own recognizance in the court's discretion."

The provisions set forth in article I, section 12, of the California Constitution were contained in Proposition 4, enacted by the voters at the June 1982 Primary Election. Proposition 4 received more votes than did Proposition 8, an omnibus initiative that, in the same election, added (among other provisions) article I, section 28, subdivision (e), to the California Constitution, providing in pertinent part: "*A person may be released on his or her own recognizance in the court's discretion, subject to the same factors considered in setting bail.*" (Italics added.)

Because Proposition 4 received more votes than did Proposition 8, the bail and OR release provisions contained in Proposition 4 are deemed to prevail over those set forth in Proposition 8. (Cal. Const., art. II, § 10, subd. (b); *Brosnahan v. Brown* (1982) 32 Cal.3d 236, 255 [186 Cal.Rptr. 30, 651 P.2d 274]; *People v. Barrow* (1991) 233 Cal.App.3d 721, 723 [284 Cal.Rptr. 679]; 4 Witkin & Epstein, Cal. Criminal Law (2d ed. 1989) Proceedings Before Trial, § 1997, pp. 2357-2359; see also *Yoshisato v. Superior Court* (1992) 2 Cal.4th 978, 987-988 [9 Cal.Rptr.2d 102, 831 P.2d 327]; *Taxpayers to Limit Campaign Spending v. Fair Pol. Practices Com.* (1990) 51 Cal.3d 744, 748-755 [274 Cal.Rptr. 787, 799 P.2d 1220]; *In re Nordin* (1983) 143 Cal.App.3d 538, 540-541 [192 Cal.Rptr. 38]; cf. *Williams v. County of San Joaquin* (1990) 225 Cal.App.3d 1326, 1332, fn. 5 [275 Cal.Rptr. 302].)

FN5 Penal Code section 1318 provides:

"(a) The defendant shall not be released from custody under an own recognizance until the defendant files with the clerk of the court or other person authorized to accept bail a signed release agreement which includes:

"(1) The defendant's promise to appear at all times and places, as ordered by the court or magistrate and as ordered by any court in which, or any magistrate before whom the charge is subsequently pending.

"(2) *The defendant's promise to obey all reasonable conditions imposed by the court or magistrate.*

"(3) The defendant's promise not to depart this state without leave of the court.

"(4) Agreement by the defendant to waive extradition if the defendant fails to appear as required and is apprehended outside of the State of California.

"(5) The acknowledgment of the defendant that he or she has been informed of the consequences and penalties applicable to violation of the conditions of release." (Italics added.)

All further references are to the Penal Code unless otherwise specified.

Pursuant to the foregoing constitutional and statutory provisions, a defendant charged with a bailable offense who seeks pretrial release from custody typically has two options: post bail and obtain release, or seek the privilege of OR release. Under section 1318, a defendant who seeks OR release may obtain such release only if he or she (1) promises to appear at all further proceedings, (2) promises not to depart from the state without leave of the court, (3) agrees to waive extradition in the event he or she fails to appear as required and is apprehended outside the State of California, and (4) promises "to obey all reasonable conditions imposed by the court or magistrate."

Petitioners contend the Court of Appeal erred, in two distinct respects, in holding that random drug testing and warrantless search and seizure conditions satisfy the "reasonable conditions" element set forth in section 1318, subdivision (a)(2). First, petitioners contend that the statute's reference to "reasonable conditions" encompasses only those conditions reasonably related to *assuring a defendant's presence in court*, and that the random drug testing and warrantless search and seizure conditions are impermissible because they do not relate to such a purpose. Second, petitioners contend that, even if section 1318 authorizes the imposition of conditions unrelated to assuring a defendant's presence in court, the statute cannot properly be interpreted to authorize the conditions at issue in the present case, which require the waiver of constitutional rights. We address each of these contentions in turn.

A.

(1) As noted, petitioners contend the random drug testing and warrantless search and seizure conditions imposed in this case fall outside the purview of the "reasonable conditions" element of section 1318, subdivision (a)(2), and therefore are invalid, because such restrictions are unrelated to assuring a defendant's appearance at subsequent court proceedings. In support of this contention, petitioners rely upon *People v. Barbarick* (1985) 168 Cal.App.3d 731, 736 [214 Cal.Rptr. 322], and *McIntosh v. Municipal Court* (1981) 124 Cal.App.3d 1083, 1085 [177 Cal.Rptr. 683], decisions that petitioners characterize as holding that OR release conditions must be reasonably related to securing a defendant's subsequent appearance in court. In response, the People contend that, to the extent the cited decisions stand for the broad proposition urged by petitioners, such holdings were abrogated in 1988 when the Legislature amended section 1318 to include the provision that OR release shall not be granted unless a defendant executes a signed release agreement that includes "[t]he defendant's promise to obey *all reasonable conditions* imposed by the court or magistrate." (§ 1318, subd. (a)(2), italics added.) Petitioners, in reply, contend that, notwithstanding its ***1142** unqualified reference to "all reasonable conditions," the statute properly should be interpreted to permit only those conditions reasonably related to assuring a defendant's appearance at future court hearings.

In interpreting statutory language, we apply well-settled rules, commencing with an examination of the language of the statute itself. (*Mercer v. Department of Motor Vehicles* (1991) 53 Cal.3d 753, 763 [280 Cal.Rptr. 745, 809 P.2d 404].) If the statute's meaning is without ambiguity, doubt, or uncertainty, the statutory language controls. (*Security Pacific National Bank v. Wozab* (1990) 51 Cal.3d 991, 998 [275 Cal.Rptr. 201, 800 P.2d 557].) But if the meaning of the statute's wording is unclear, we refer to its legislative history. (*Long Beach Police Officers Assn. v. City of Long Beach* (1988) 46 Cal.3d 736, 743 [250 Cal.Rptr. 869, 759 P.2d 504].)

As noted above, section 1318 authorizes the release of a defendant on his or her own recognizance, pursuant to the following procedure: "(a) The defendant shall not be released from custody ... until the defendant files with the clerk ... a signed release agreement which includes: [¶] (1) The defendant's promise to appear .... [¶] (2) The defendant's promise to obey all *reasonable conditions* imposed by the court or magistrate ...." (Italics added.) Because section 1318 does not define what are "reasonable conditions," or otherwise indicate what, if any, limitations should be applied to that term, we turn to the statute's legislative history.

As originally enacted in 1979, section 1318 provided for OR release simply upon a written promise to appear, to not leave the state, and to waive extradition, along with the defendant's acknowledgment that he or she was informed of the consequences and penalties for violation of these conditions. [FN6] In interpreting the original version of section 1318, the appellate courts

held that, "[i]n setting the amount of bail or other conditions of release, the primary issue, before or after conviction, is whether the detainee ***1143** will appear for subsequent court proceedings. [Citations.] .... Indeed, whether the defendant will subsequently appear is the sole issue at preconviction OR release hearings. [Citation.] Accordingly, the '... court's discretion to impose conditions upon [a preconviction] OR release is limited to conditions which are reasonably related to and attempt to insure subsequent court appearances.' (*McIntosh v. Municipal Court* (1981) 124 Cal.App.3d 1083, 1085 [177 Cal.Rptr. 683].)" (*People v. Barbarick, supra*, 168 Cal.App.3d at p. 735; see also *Van Atta v. Scott* (1980) 27 Cal.3d 424, 438 [166 Cal.Rptr. 149, 613 P.2d 210]. [FN7]) *Barbarick* held that, although "another factor the court may consider in deciding whether to release *a convicted felon* on bail is the danger to the community" (168 Cal.App.3d at p. 736, italics added), a condition that a defendant submit to search for narcotics, dangerous drugs, or marijuana, in the case of an OR release pending appeal from a *misdemeanor drug conviction*, was not "reasonably related to securing defendant's later appearance." (*Ibid.*, italics omitted.)

FN6 As enacted in 1979, former section 1318 provided:

"(a) The defendant shall not be released from custody under an own recognizance or pursuant to Section 1269d until the defendant files with the clerk of the court or other person authorized to accept bail a signed release agreement which includes:

"(1) The defendant's promise to appear at all times and places, as ordered by the court, magistrate or other person authorized by paragraph (3) of subdivision (a) of Section 1269d to release the defendant and as ordered by any court in which, or any magistrate before whom the charge is subsequently pending.

"(2) The defendant's promise not to depart this state without leave of the court.

"(3) Agreement by the defendant to waive extradition if the defendant fails to appear as required and is apprehended outside of the State of California.

"(4) The acknowledgment of the defendant that he or she has been informed of the consequences and penalties applicable to violation of the conditions of release." (Stats. 1979, ch. 873, § 12, p. 3043.)

FN7 In *Van Atta v. Scott, supra*, 27 Cal.3d 424, 438, we stated that "[t]he sole issue at the OR hearing is whether the detainee will appear for subsequent court proceedings if released," and cited, in support of that proposition, our earlier decision in *In re Underwood* (1973) 9 Cal.3d 345, 348 [107 Cal.Rptr. 401, 508 P.2d 721]. The *Underwood* decision, however, was based upon language contained in *former* article I, section 12, of the California Constitution, the bail provision that thereafter was superseded in 1982 by the passage of Proposition 4 (see *ante*, at p. 1140, fn. 4). Accordingly, insofar as the quoted statement in *Van Atta* may be understood to reflect a state constitutional limitation upon the considerations that a court or magistrate properly may take into account in determining whether to grant a defendant's request for OR release, it is clear that *Van Atta* no longer accurately embodies the state constitutional principles that govern release on bail or OR. Nothing contained in the current language of article I, section 12-which provides, in relevant part, that "[a] person may be released on his or her own recognizance in the court's discretion"-properly may be interpreted to limit a court or magistrate to imposing *only* those OR release conditions that are aimed at ensuring a defendant's appearance at future court proceedings.

In March 1988 (three years after *People v. Barbarick, supra*, 168 Cal.App.3d 731, was decided), the Attorney General sponsored and supported Assembly Bill No. 4282, which added paragraph (2) to section 1318, subdivision (a), granting the court or magistrate authority to require that, as a condition of OR release, the defendant promise to obey all reasonable conditions. (Stats. 1988, ch. 403, § 4, p. 1757.) The parties focus their arguments upon this amendment to section 1318, subdivision (a). They do not dispute the Court of Appeal's conclusion that the amendment is ambiguous

as to whether it authorizes conditions such as those challenged by petitioners, nor do they contest the appellate court's efforts to go behind the statutory language and explore its legislative history in an effort to determine the Legislature's intent. Because we agree with the parties (and with the Court of Appeal) that it is unclear from the language employed in the statute whether section 1318, subdivision (a)(2), was intended simply to assure the ***1144** future appearance of the accused, or additionally was intended to promote the integrity of the court proceedings or protect the safety of the community by encompassing waivers of Fourth Amendment rights in any or all cases, we, too, have reviewed the pertinent legislative history in an effort to discover any indications of legislative intent. (*Long Beach Police Officers Assn. v. City of Long Beach, supra*, 46 Cal.3d at p. 743; *Sand v. Superior Court* (1983) 34 Cal.3d 567, 570 [194 Cal.Rptr. 480, 668 P.2d 787].)

Viewed and analyzed in the light of basic rules relating to the interpretation of statutes, we find that, although nothing in the legislative history specifically addresses the question whether the Legislature intended to permit OR releases to be conditioned upon a waiver of Fourth Amendment rights, it is clear the Legislature intended to codify the authority of a court or magistrate, in imposing OR conditions, to weigh considerations relating to the public safety that extend beyond those intended to ensure subsequent court appearances.

In sponsoring Assembly Bill No. 4282, the Attorney General in a letter informed the bill's author that the proposed legislation "codifie[d] the court's authority to place reasonable conditions on a criminal defendant who is released upon his or her own recognizance...." The Attorney General explained the need for the "reasonable conditions" portion of the bill and its potential impact: "Existing statutes ... do not address the court's ability to impose conditions upon such release. As a result, although the judiciary has routinely imposed limitations on the defendant's behavior as a condition of own-recognizance release, these conditions vary greatly from case-to-case. Probably the most common condition is the proviso that the defendant refrain from criminal conduct while on release. In domestic violence and child molest cases it is common for the court to impose conditions to protect the victim. And when witness intimidation is a potential issue, the courts usually fashion conditions designed to protect the witness and the integrity of the judicial process. [¶] Despite this necessary, common[,] and long-standing practice, the only conditions expressly authorized by *statute* for own-recognizance release are those relating to the defendant's appearance .... (§ 1318.) [¶] AB 4282 will cure this deficiency by expressly providing that the court or magistrate may condition own-recognizance release on 'reasonable conditions.' In so doing, this bill will not only provide legislative authority and guidance for the courts, but will protect defendants from capricious release conditions." Identical letters were sent to the chairs of the Assembly Committee on Public Safety, the Senate Committee on Judiciary, and the Appropriations Committee, as well as to the Governor. *The analysis set forth in this letter was adopted virtually verbatim in the analyses of Assembly Bill No. 4282 prepared by the Assembly Committee on Public Safety and the Senate Committee on Judiciary.* ***1145**

Although the random drug testing and warrantless search and seizure conditions before us cannot be said to relate directly to the likelihood that a defendant will comply with his or her duty to attend subsequent court hearings, the conditions clearly relate to the prevention and detection of further crime and thus to the safety of the public. In this regard, the purpose of such conditions-to further public safety by seeking to prevent the commission of offenses similar to the charged offense-is identical to the purpose underlying the well-stablished examples (victim protection and prevention against witness intimidation) cited by the Attorney General in sponsoring Assembly Bill No. 4282. By enacting that bill, it therefore is clear the Legislature contemplated the authorization of conditions *unrelated* to ensuring an accused's future appearance in court, and intended to allow the court or magistrate broad discretion to impose reasonable conditions of OR release, including those related to the furtherance of public safety. [FN8]

> FN8 We reject petitioners' argument that, because the Legislature, in enacting three other statutes (§ 1203.1ab; Welf. & Inst. Code, § 729.9; and Health & Saf. Code, § 11551), expressly authorized drug testing as a condition of *probation* or *parole*, the Legislature would have included a similarly explicit provision for drug testing as a condition of OR release had it intended to permit such a

condition. In our view, the substantially broader provision added by the Legislature to section 1318-authorizing the imposition of "all reasonable conditions" upon a defendant granted OR release-provides sufficient statutory authority for conditions such as those challenged by petitioners.

We also reject petitioners' speculative argument that, because Congress codified an array of specific release conditions in 18 United States Code section 3142, the federal scheme "no doubt was known to the California Legislature when it amended [section] 1318," and that the Legislature's failure to include similarly specific release conditions therefore "was a conscious decision." Petitioners' assertion is unsupported by the legislative history of section 1318, subdivision (a)(2), and fails to address the critical question whether that statute, which specifically authorizes the imposition of "all reasonable conditions," should be interpreted as authorizing the conditions imposed upon petitioners in these proceedings.

Thus, contrary to petitioners' contention that the Legislature's amendment of section 1318 in 1988 properly should be interpreted as a codification of earlier Court of Appeal decisions suggesting that OR release conditions had to be related to assuring the defendant's appearance in court, we believe the legislative history of the 1988 amendment demonstrates that it was intended to make clear that a court or magistrate has the authority, in granting OR release, to require a defendant to promise to comply with *all* "reasonable conditions"-and not simply with those intended to assure the defendant's appearance at future court proceedings. Accordingly, we reject petitioners' contention that OR conditions requiring a defendant to agree to random drug testing or warrantless search or seizure are not "reasonable conditions" within the meaning of section 1318 simply because they do not relate to assuring the defendant's appearance in court. ***1146**

B.

Petitioners next contend that, even if section 1318, subdivision (a)(2), authorizes a court or magistrate to impose OR release conditions other than those related to assuring a defendant's appearance in court, the statute should not be interpreted to permit the imposition of conditions, such as random drug testing and warrantless search and seizure requirements, that involve a waiver of a defendant's constitutional rights. In support of their contention, petitioners cite *Frederick v. Justice Court* (1975) 47 Cal.App.3d 687 [121 Cal.Rptr. 118], a decision in which the Court of Appeal reversed a judgment of the trial court that conditioned *diversion* of the defendant's case from the criminal process upon a waiver of his right to be free from unreasonable searches and seizures. The court in *Frederick* concluded that the "lack of statutory authorization and the lack as well of a compelling necessity therefor placed the imposition of this condition of an express waiver of a constitutional right beyond the court's powers in a proceeding that is wholly and exclusively statutory." (*Id.* at p. 692; see also *Parra v. Municipal Court* (1978) 83 Cal.App.3d 690, 694 [148 Cal.Rptr. 203] [court could not require "an informal admission of guilt" as a condition of diversion]. Relying upon *Frederick* and *Parra*, petitioners argue that the imposition of release conditions that infringe upon constitutional rights is impermissible, except where the relevant statute expressly authorizes the waiver of constitutional rights and where the condition is justified by a compelling necessity.

Petitioners' reliance upon *Frederick* and *Parra* is misplaced. The diversion statutes (§ 1000 et seq.) construed by the Court of Appeal in those decisions did not include any provision authorizing a trial court to impose additional conditions upon a defendant eligible for diversion. Section 1318, subdivision (a)(2), by contrast, specifically authorizes the imposition of "all reasonable conditions" in connection with an OR release. Nothing contained within the legislative history underlying the enactment of section 1318, subdivision (a)(2), suggests the Legislature intended to preclude a court or magistrate from imposing a condition, "reasonable" under the situation presented, because of the circumstance that the condition implicates a defendant's constitutional rights. To the contrary, certain conditions cited in the committee reports that analyzed Assembly Bill No. 4282-e.g., directing a defendant to refrain from having any contact with the alleged victim-involve placing restrictions upon a defendant's constitutionally based liberty interest. Nor does the statute's legislative history support petitioners' argument that a "compelling necessity" must justify the imposition of OR release conditions.

Accordingly, we reject petitioners' contention and conclude that section 1318, subdivision (a)(2), authorizes the imposition of conditions that may ***1147** implicate a defendant's constitutional rights, provided that imposition of such conditions is reasonable under the circumstances. [FN9]

> FN9 Petitioners overlook the circumstance that, if we interpreted section 1318, subdivision (a)(2), to *preclude* a court or magistrate from conditioning OR release upon a defendant's promise to fulfill requirements unrelated to ensuring his or her appearance at future court proceedings, or upon the waiver of a constitutional right, a court or magistrate in many instances would be *less* likely to grant the request for OR release, concluding that the defendant was an inappropriate candidate for release prior to judgment in the absence of specified, reasonable conditions.

III.

Petitioners further contend that, even if random drug testing and warrantless search and seizure conditions are not necessarily barred by the applicable statute, the conditions nevertheless are constitutionally infirm, in view of their impact upon (1) the presumption of innocence to which petitioners are entitled, (2) petitioners' right of privacy, and (3) petitioners' right to equal protection of the laws. For the reasons set forth below, we reject each of these constitutional arguments.

A.

(2) Petitioners initially contend that, because they only have been charged with-and not yet convicted of-the crimes for which they were arrested, conditioning their OR release upon their agreement to submit to random drug testing and warrantless search and seizure violates the presumption of innocence to which they are entitled. Petitioners argue that, because of their status as "OR releasees," whose cases have yet to be tried, they are fundamentally different from, and entitled to greater protection than, probationers and parolees, who have been tried and convicted, and upon whom similar conditions of release have been upheld by the courts.

The United States Supreme Court rejected a claim similar to that made by petitioners in *Bell v. Wolfish* (1979) 441 U.S. 520 [60 L.Ed.2d 447, 99 S.Ct. 1861]. *Bell* involved a class action, brought on behalf of pretrial detainees and sentenced prisoners confined within New York's Metropolitan Corrections Center (MCC), that challenged various conditions and practices at MCC, including the practice of accommodating increases in the inmate population by replacing single bunks with double bunks in MCC's individual rooms and dormitories. The members of the class who were pretrial detainees alleged that the practice of "double-bunking" deprived them of their liberty without due process of law and therefore was unlawful. The lower courts agreed with this contention, relying upon the " 'presumption of innocence' as the source of the detainee's substantive right to be free from ***1148** conditions of confinement that are not justified by compelling necessity." (*Id.* at p. 532 [60 L.Ed.2d at p. 464].)

In rejecting the detainees' argument that this presumption affected the validity of the conditions of their pretrial detention, the United States Supreme Court held in *Bell*: "The presumption of innocence is a doctrine that allocates the burden of proof in criminal trials; it also may serve as an admonishment to the jury to judge an accused's guilt or innocence solely on the evidence adduced at trial and not on the basis of suspicions that may arise from the fact of his arrest, indictment, or custody, or from other matters not introduced as proof at trial. [Citations.] It is 'an inaccurate, shorthand description of the right of the accused to "remain inactive and secure, until the prosecution has taken up its burden and produced evidence and effected persuasion...." an "assumption" that is indulged in the absence of contrary evidence.' [Citation.] Without question, the presumption of innocence plays an important role in our criminal justice system. 'The principle that there is a presumption of innocence in favor of the accused is the undoubted law, axiomatic and elementary, and its enforcement lies at the foundation of the administration of our criminal law.' [Citation.] *But it has no application to a determination of the rights of a pretrial detainee during confinement before his trial has even begun.*" (441 U.S. at p. 533 [60 L.Ed.2d at pp. 464-465], italics added.)

The rule set forth in *Bell v. Wolfish, supra*, 441 U.S. 520, 533 [60 L.Ed.2d 447, 464-465], mirrors established California law. (See *Ex parte Duncan* (1879) 53 Cal. 410, 411 [no presumption of innocence attaches to a pretrial determination of the amount of bail to be set]; see also *Blunt v. United States*

(D.C.App. 1974) 322 A.2d 579, 584 ["The presumption of innocence ... has never been applied to situations other than the trial itself. To apply it to the pretrial bond situation would make any detention for inability to meet conditions of release unconstitutional."].) Clearly, whether a pretrial detainee is given OR release with-or without-conditions has no bearing upon the presumption of innocence to which that person is entitled *at trial*. We therefore reject petitioners' contention that the OR release conditions challenged in the present case infringe upon the presumption of innocence to which petitioners are entitled.

B.

(3a) Petitioners next contend the imposition of warrantless drug testing and search and seizure conditions upon OR releasees violates their right to be free from unreasonable searches and seizures, guaranteed by the Fourth Amendment to the United States Constitution and by article I, section 13, of ***1149** the California Constitution, and their rights to privacy and due process of law, guaranteed by article I, sections 1 and 15, respectively, of the California Constitution. The People contend in response that, similar to probationers and parolees, OR releasees have a diminished liberty interest, and that therefore imposition of random drug testing and warrantless search and seizure conditions does not violate constitutional guarantees.

(4) The United States and California Constitutions proscribe only *unreasonable* searches and seizures. "In determining the standard of reasonableness applicable to a particular type of 'search' or 'seizure,' a court must balance 'the nature and quality of the intrusion on the individual's Fourth Amendment interests against the importance of the governmental interests alleged to justify the intrusion.' [Citations.]" (*Berry v. District of Columbia* (D.C. Cir. 1987) 833 F.2d 1031, 1034-1035 [266 App.D.C. 127]; *Hill v. National Collegiate Athletic Assn.* (1994) 7 Cal.4th 1, 29 [26 Cal.Rptr.2d 834, 865 P.2d 633].) We also observe that, "[i]n the search and seizure context, the article I, section 1 'privacy' clause [of the California Constitution] has never been held to establish a broader protection than that provided by the Fourth Amendment of the United States Constitution or article I, section 13 of the California Constitution." (*People v. Crowson* (1983) 33 Cal.3d 623, 629 [190 Cal.Rptr. 165, 660 P.2d 389].) (3b) Our analysis as to whether OR releasees have a constitutionally protected right to be free from the challenged conditions therefore is guided by federal constitutional principles. For the reasons set forth below, we conclude that the imposition of such conditions does not violate Fourth Amendment protections.

First, petitioners' contention that the OR release conditions challenged in the present case inevitably violate the Fourth Amendment rights of OR releasees rests upon the flawed premise that a defendant who seeks OR release has the same reasonable expectation of privacy as that enjoyed by persons not charged with any crime, and by defendants who have posted reasonable bail. Unlike persons in these latter categories, however, a defendant who is unable to post reasonable bail has no constitutional right to be free from confinement prior to trial and therefore lacks the reasonable expectation of privacy possessed by a person unfettered by such confinement. Because an incarcerated individual generally is subject to random drug testing and warrantless search and seizure in the interest of prison security, the conditions challenged in the present case do not place greater restrictions upon an OR releasee's privacy rights than the releasee would have experienced had he or she not secured OR release. Viewed from this perspective, the challenged conditions do not require an OR releasee to "waive" Fourth Amendment rights that he or she would have retained had OR release been denied. Instead, the conditions simply define the degree of liberty that the ***1150** court or magistrate, in his or her discretion, has determined is appropriate to grant to the OR releasee.

Second, petitioners' contention that random drug testing and warrantless search and seizure conditions invariably violate Fourth Amendment protections ignores the circumstance that a pretrial detainee is not required to agree to such restrictions, but rather is subject to them only if he or she consents to their imposition, in exchange for obtaining OR release. Petitioners contend that an OR releasee's consent to these conditions does not represent a true and "voluntary" consent, because the consequence of refusing to give such consent is continued incarceration. When similar conditions are imposed upon a probationer, however, it is established that the individual "consents to the waiver of his Fourth Amendment rights in exchange for the opportunity to avoid service of a state prison term. Probation is not a right, but a privilege." (*People v. Bravo* (1987) 43 Cal.3d 600, 608 [238

Cal.Rptr. 282, 738 P.2d 336].) Similarly, when one who otherwise would be incarcerated prior to judgment is offered the opportunity to obtain OR release, he or she is not entitled to unconditional, bail-free release, but may obtain OR release only in the discretion of the court or magistrate, and only upon those reasonable conditions attached to the release. Although it may be true that a defendant who is faced with the choice of agreeing to the challenged conditions or remaining incarcerated has a considerable incentive to agree to the conditions, that circumstance, alone, does not render the consent coerced or involuntary. Just as a probationer may be required to consent to supervisory restrictions that could not be imposed upon the general public-" 'as a condition precedent to receiving the court's leniency' " (*Bravo, supra*, 43 Cal.3d at p. 610)-an individual who is unable to post bail and seeks OR release similarly may be required to consent to this type of restriction in exchange for receiving the leniency of an OR release.

Such restrictions, of course, are not of an unlimited nature, and it is clear that, in the context of an OR release, Fourth Amendment considerations place constraints upon the circumstances under which random drug testing and warrantless search and seizure conditions may be imposed. As noted above, section 1318, subdivision (a)(2), explicitly authorizes the imposition only of "reasonable conditions," and the "reasonableness" of an OR release condition that implicates Fourth Amendment rights depends upon both the intrusiveness of the state conduct authorized by the condition and the strength of the state's interest in imposing such a restriction in the particular circumstances. Numerous courts have weighed these competing considerations in evaluating the propriety of similar conditions in the context of probation. (See, e.g., *People v. Mason* (1971) 5 Cal.3d 759, 764 & fn. 2 [97 Cal.Rptr. 302, 488 P.2d 630], disapproved on other grounds in ***1151***People* v. *Lent* (1975) 15 Cal.3d 481, 486, fn. 1 [124 Cal.Rptr. 905, 541 P.2d 545] [upholding the validity of a probation condition that required a narcotics offender to submit to search as a condition of his probation, observing that the condition was "reasonably related to the probationer's prior criminal conduct and [was] aimed at deterring or discovering subsequent criminal offenses," and noting that "[t]he high recidivism rate for narcotics offenders makes the [search] condition particularly appropriate in narcotics cases"]; *People v. Bauer* (1989) 211 Cal.App.3d 937, 942 [260 Cal.Rptr. 62]; *People v. Keller* (1978) 76 Cal.App.3d 827, 831 [143 Cal.Rptr. 184], disapproved on other grounds in *People v. Welch* (1993) 5 Cal.4th 228, 237 [19 Cal.Rptr.2d 520, 851 P.2d 802]; see also *United States v. Oliver* (8th Cir. 1991) 931 F.2d 463, 465 [upholding drug testing as a valid condition of a drug-dependent defendant's postconviction supervised release following defendant's conviction of possession of stolen mail used to obtain checks to finance his addiction]; *United States v. Duff* (9th Cir. 1987) 831 F.2d 176 [upholding probation officer's authority to require probationer to submit to drug testing, where probation conditions required probationer to refrain from violating any law and to follow the instructions of his probation officer, but where neither the probation conditions nor the instructions explicitly authorized drug testing]; *United States v. Williams* (7th Cir. 1986) 787 F.2d 1182 [upholding sentencing court's broad discretion in fashioning conditions of probation, including drug testing, in view of defendant's status as a repeat offender and his lengthy criminal record].)

For the reasons discussed above, we reject petitioners' contention that the Fourth Amendment and the analogous provisions of the California Constitution preclude a court or magistrate from ever conditioning OR release upon the defendant's promise to comply with random drug testing or warrantless search and seizure conditions. [FN10]

FN10 In view of our holding that imposition of OR release conditions must be reasonable under the circumstances, nothing in this opinion should be construed as providing approval of random drug testing and warrantless search and seizure conditions in all cases wherein the defendant requests OR release. As is suggested by the probation cases cited above, the reasonableness of a condition necessarily depends upon the relationship of the condition to the crime or crimes with which the defendant is charged and to the defendant's background, including his or her prior criminal conduct. (Cf. Cal. Rules of Court, rule 414 [criteria affecting probation].)

C.

(5a) Finally, petitioners contend that the OR conditions at issue in the present case are constitutionally infirm on equal protection grounds, arguing that "[t]here is no rational basis for allowing person[s]

who can afford to post bail to be released without restrictive conditions, while those who ***1152** cannot do so must give up their Fourth Amendment rights....” (6) In addressing the merits of petitioners' argument, we observe that “ '[t]he burden of establishing the unconstitutionality of a statute rests on him who assails it, and ... courts may not declare a legislative discrimination invalid unless, viewed in the light of facts made known or generally assumed, it is of such a character as to preclude the assumption that the classification rests upon some rational basis within the knowledge and experience of the legislators. A statutory discrimination will not be set aside as the denial of equal protection of the laws if any state of facts reasonably may be conceived to justify it.' [Citation.]” (*Brown v. Superior Court* (1971) 5 Cal.3d 509, 520 [96 Cal.Rptr. 584, 487 P.2d 1224].) It is well settled that the equal protection clause of the Fourteenth Amendment “guarantees equal laws, not equal results.” (*Personnel Administrator of Mass.* v. Feeney (1979) 442 U.S. 256, 273 [60 L.Ed.2d 870, 883-884, 99 S.Ct. 2282].)

(5b) With these principles in mind, we assume, without deciding, that petitioners are correct in asserting that warrantless drug testing and search and seizure conditions could not be imposed upon a defendant who is able to, and does, post reasonable bail, but we conclude that, in any event, such disparate treatment does not violate principles of equal protection. On its face, section 1318 is facially neutral-it does not create wealth-based distinctions or establish any classifications whatsoever. Pursuant to section 1318, a court or magistrate may impose reasonable conditions upon any defendant, wealthy or poor, who seeks OR release. Insofar as petitioners' contention rests upon the thesis that the statute creates an impermissible wealth-based classification, because persons who can afford to post the bail set for their offense will not need to seek OR release, petitioners' argument is in essence an argument that the bail process itself is unconstitutionally discriminatory, because that process is based upon a defendant's ability to post bail. We have rejected similar contentions raised in previous cases. (See, e.g., *In re Podesto* (1976) 15 Cal.3d 921, 931-933 [127 Cal.Rptr. 97, 544 P.2d 1297].)

Nor does the statute have a discriminatory purpose. As previously noted, the legislative history underlying the 1988 amendment to section 1318 suggests that the objective of the amendment authorizing imposition of reasonable OR conditions was to further public safety. Nothing contained in this history even remotely suggests a legislative attempt to discriminate against indigent defendants. To the contrary, in view of the inability of certain defendants to post bail, the Legislature clearly had a rational basis for concluding that public safety would be enhanced if such defendants, when afforded the leniency of a bail-free release, were required to comply with those reasonable conditions that a court or magistrate, in his or her discretion, believed to be necessary in order to deter further criminal conduct. ***1153**

Accordingly, we conclude that petitioners have failed to establish that section 1318 violates the equal protection clause of either the United States Constitution or the California Constitution.

IV.

Having determined that petitioners' challenges to the decision of the Court of Appeal are without merit, we affirm the judgment of that court.

C

District Court of Appeal, First District, Division 1, California.

Paul Lewis **JONES**, a minor, by Alfred L. **Jones**, Jr., his Guardian ad Litem, Plaintiff and Appellant,
v.
Robert **CZAPKAY**; County of San Mateo, a political subdivision of the State of California; Dr. H. D. Chope, individually, and as Director of Health and Welfare Department of the County of San Mateo, State of California; Dr. James H. Bodie, individually, and as Officer in Charge of Communicable Disease Division, Health and Welfare Department of the County of San Mateo, State of California; City of Burlingame, a municipal corporation; Dr. Malcolm H. Merrill, individually, and as Director of Public Health, State Department of Public Health, State of California; Dr. Ed Kupka, individually, and as Chief, Bureau of Tuberculosis, State Department of Public Health, State of California, Defendants and Respondents.

No. 18993.
June 27, 1960.

Action brought by one who contracted tubercular meningitis, assertedly from known tuberculosis victim, to recover for injuries sustained from the victim, from certain health officers, and from city and county. The Superior Court, County of San Mateo, Frank B. Blum, J., rendered a judgment after sustaining demurrers of certain defendants, not including the known tubercular victim, and an appeal was taken. The District Court of Appeal, Bray, P. J., held that plaintiff asserted no basis for liability against the health officers, the county or the city.

Affirmed.

****184 *195** Ernest O. Meyer, James A. Himmel, San Francisco, for appellant.

Keith C. Sorenson, Dist. Atty., County of San Mateo, Redwood City, L. M. Summey, Deputy Dist. Atty., Redwood City, Robert J. Popelka, San Jose, for County of San Mateo, Dr. H. D. Chope, Director of Health & Welfare Dept., County of San Mateo and Dr. James H. Bodie, Officer in Charge of Communicable Disease Division, Health & Welfare Dept., County of San Mateo.

Stanley Mosk, Atty. Gen., Robert L. Bergman, Deputy Atty. Gen., for Dr. Malcolm H. Merrill, Director of Public Health, Dr. Ed Kupka, Chief, Bureau of T–B, State Dept. of Public Health.

Ropers, Majeski & Kane, Rodwood City, for City of Burlingame.

BRAY, Presiding Justice.

Appeal by plaintiff from a judgment after order sustaining demurrers of certain defendants without leave to amend and of other defendants with leave to amend.[FN*]

FN* Although Robert Czapkay was made a

> defendant, the record shows no appearance by him in the action, nor is his position as a defendant discussed in any of the briefs. Therefore, ‘defendants' as used herein will not include him. The first count is directed against Czapkay alone, and hence will not be discussed.

Questions Presented.

Is there any liability for communication of tuberculosis from a known tubercular victim, by

(a) Doctors Chope or Bodie in their official capacities of individually;

(b) County of San Mateo or city of Burlingame;

(c) Doctors Merrill or Kupka in their official capacities or individual?

Record.

The second count of the complaint is directed against Doctors Chope and Bodie individually. It alleges that Doctor Chope is and was the Director of the Health and Welfare ***196** Department of San Mateo County and that Doctor Bodie is and was in charge of the Communicable Disease Division of said department; that for more than 6 years past, both knew that Czapkay was afflicted with infectious and contagious tuberculosis; that about 1952 Doctor Chope as director issued and had served upon Czapkay an order isolating and quarantining him to his residence in Burlingame; that said defendants failed and neglected to enforce the provisions of the California health and safety statutes pertaining to quarantine and isolation and to place to placard on Czapkay's premises as required by section 2561, Health and Safety Code, to give any notice to the citizens and residents of Burlingame, and to plaintiff, of the existence of said communicable and infectious disease, to conduct proper or adequate investigation to insure strict compliance by Czapkay with said order; that by reason of said carelessness of defendants, plaintiff's health was endangered and plaintiff Paul Jones came in immediate communication with Czapkay, causing him to contract tubercular meningitis, damaging plaintiff in the sum of $350,000.

The third count is directed against the County of San Mateo and the two doctors in their official capacity, realleges by reference the allegations of the second count, alleges that defendant county at all times maintained a Public Health Department, that by reason of the carelessness of the defendants Central Avenue and Newlands Avenue in Burlingame, and other public streets in the cities of Burlingame and San Mateo and highways in San Mateo County were rendered dangerous, hazardous and unfit for ordinary use by the public due to their exposure to infectious and contagious tuberculosis, and the health and safety of the general public and plaintiff were endangered,****185** and thereby plaintiff by coming in direct communication with Czapkay contracted tubercular meningitis.

The fourth count is directed against the city of Burlingame and the two doctors in their official capacity, and realleges the charging portions of counts two and three, and alleges that Burlingame contracted with San Mateo County for the services of its health and welfare departments and by reason of said contract said doctors were servants, agents and employees of said Burlingame, and that because of the unfitness of Burlingame's streets as alleged, plaintiff contracted tubercular meningitis.

The fifth count is directed against Doctor Merrill individually and as Director of Public Health, State Department of Public Health, and Doctor Kupka individually and as Chief ***197** of the Bureau of Tuberculosis, State Department of Public Health. It incorporates the salient allegations of the first count and then charges that for more than 6 years defendants had full knowledge and information of Czapkay's infectious and contagious tubercular condition and that in the year 1952 were notified of the order of isolation and quarantine; that Czapkay refused hospitalization and medical treatment and was isolated to his home; that defendants were aware that no placard was attached to Czapkay's premises or notice of his disease given the public; that said defendants knowing said dangerous and hazardous condition and serious health menace failed to enforce the provisions of Health and Safety Code and to give notice to the general public, or take any steps to alleviate the condition and to protect the public health, as a result of which plaintiff contracted tubercular meningitis.

Demurrers of defendants Chope, Bodie, Merrill and Kupka were sustained with leave to amend. Those of the other defendants were sustained without leave to amend.

(a) Doctors Chope and Bodie.

The first cause of action (the one against Czapkay alone) alleges that plaintiff's contact with him occurred between February and December 16, 1957, and that as a result thereof plaintiff on or about December 9, 1957, became ill and was hospitalized with tubercular meningitis on December 16, 1957. In the other counts plaintiff does not allege the date when plaintiff became infected. The only time alleged is that in 1952 the defendants knew of Czapkay's condition and the order of quarantine was made that year.

On February, 14, 1958, plaintiff filed his claim against Doctors Chope and Bodie and the San Mateo County Board of Supervisors in conformity with section 1981, Government Code. This section requires that any claim for injury 'as a result of the negligence or carelessness of any public officer or employee occurring during the course of his service or employment or as a result of the dangerous or defective condition of any public property, alleged to be due to the negligence or carelessness of any officer or employee' must be filed within 90 days 'after the accident has occurred * * *.' Section 2561, Health and Safety Code, which provided that when a house or building has been quarantined because of a communicable disease the health officer 'shall' place on it the placard described in the section, was repealed effective September 11, 1957 (Stats.1957, ch. 205, p. 848, § 1). As plaintiff did not become infected (the 'accident' did not take place) until ***198** December 9, as alleged in the first count, or at the earliest 90 days prior to the filing of his claim, which would be November 16, 1957, no liability could attach to defendants in their official capacity for failure to comply with section 2561, Health and Safety Code, as that section then was no longer in existence. Hence, no cause of action is or can be stated against said defendants in their official capacity.

[1] As said in Bettencourt v. State of California, 1956, 139 Cal.App.2d 255 257–258, 293 P.2d 472, 474: 'Generally speaking a plaintiff can bring two types of actions for tort against public officers or employees: (1) He can sue them in their ****186** private and individual capacity. This is the normal common law tort action against an individual. * * * This type of action requires as additional to the pleading of negligence, compliance only with section 1981 (the filing of a claim). (2) He can sue them in their official capacity as municipal officers or employees. This type of action requires not only the filing of a claim under section 1981 but the requirements of section 1953 must also be alleged and proved.' Section 1953 waives sovereign immunity for county officers only for damages resulting from the defective or dangerous condition of any public property. Even if the claim against defendants in their official capacity had been filed in time, 'defective or dangerous condition of any public property' refers to *condition of property* and not to the condition of persons using the property, and therefore defendants in their official capacity are immune to the charges here made. This matter of immunity will be discussed further in connection with the demurrers of the other defendants.

[2] As to their individual capacity: The complaint alleges that they failed and neglected to conduct proper or adequate investigation to insure strict compliance by Czapkay of the quarantine order issued by the Health and Welfare Department of San Mateo County. The test for determining whether liability attaches individually to the acts of public officers depends upon whether they were either acting without the scope of their authority or were acting within the scope of their authority in a ministerial capacity only. In either event liability would attach. The complaint alleges that the doctors were acting within the scope of their employment; hence the question here is, were they acting in a ministerial capacity only, and therefore might be liable, or were they exercising their discretion?

As said in 41 Cal.Jur.2d, pp. 33–34: 'It ***199** is elementary that a public officer is liable in damages to one specially injured by his neglect or refusal to perform, or by his negligent performance, of an official ministerial duty, to the extent of the special injury, regardless of intentions, whether good or bad. * * * Although an action will not generally lie against an officer if his powers are discretionary, if discretion is exercised and a course of conduct begun a failure to exercise ordinary care will give rise to liability.'

Section 3285, Health and Safety Code, provides: 'Each health officer is hereby directed to use every available means to ascertain the existence of, and immediately to investigate, all reported or suspected cases of tuberculosis in the infectious stages within his jurisdiction and to ascertain the sources of such infections. In carrying out such investigations, each

health officer is hereby invested with full powers of inspection, examination and quarantine or isolation of all persons known to be infected with tuberculosis in an infectious stage and is hereby directed:

'(a) To make such examinations as are deemed necessary' of such persons 'and to isolate or isolate and quarantine such persons, whenever deemed necessary for the protection of the public health. * * *

'(c) Whenever the health officer shall determine that quarantine or isolation in a particular case is necessary for the preservation and protection of the public health, he shall make an isolation or quarantine order in writing * * *

'(d) * * * such order shall be served upon the person named in such order.

'(e) Upon the receipt of information that any quarantine * * * order * * * has been violated, the health officer shall advise the district attorney * * * in writing * * * of such violation * * *.'

[3] Section 3285 contains mandatory and discretionary provisions. Thus, each health officer is *directed* to use every available means to ascertain the existence of, and to investigate suspected or reported cases of tuberculosis. This is mandatory. Some discretion is given as to the type of ****187** examination to be given ('To make such examinations *as are deemed necessary*' of the suspected persons (emphasis added)); also as to whether such persons shall be isolated or quarantined or both ('and to isolate or isolate and quarantine such persons, whenever deemed necessary for the protection of the public health'). Whenever the health officer determines that quarantine or isolation is necessary, he *shall* make the order ***200** (see subdivision (c)). 'Upon the receipt of information that any quarantine * * * order * * * has been violated,' he 'shall advise the district attorney * * * and shall submit to such district attorney the information in his possession relating to the subject matter * * *.' (subdivision (e)). It is not alleged in the complaint that the defendants had received any information that the quarantine order had been violated. The basis of the charge is that said defendants after the order of quarantine was issued 'failed and neglected to enforce the provisions of the health and safety statutes * * * and to place or cause to be placed, any placard whatsoever' on Czapkay's home 'as provided by Section 2561' and to give notice to the citizens or plaintiff' of the existence of said infectious and communicable disease' and 'to conduct *proper or adequate* investigation to insure strict compliance' by Czapkay with said order. (Emphasis added.) The charge that he 'failed and neglected to enforce the provisions of the health and safety statutes' is a conclusion. Thus the only factual negligence charged against said defendants is that they failed to post the placard and to conduct proper or adequate investigations to determine if the quarantine was obeyed. Section 2561, Health and Safety Code, provided that when a house is quarantined 'the health officer *shall*' post upon it the warning placard. (Emphasis added.) As we have heretofore pointed out, section 2561 was repealed before plaintiff claims to have been infected so that the failure to post would occasion no liability upon the part of said defendants.

[4] It is impossible to determine from the complaint what is meant by failure 'to conduct proper or adequate investigation.' When a health officer determines that quarantine is necessary, the terms of the quarantine are discretionary with him. Section 3285, subdivision (c), provides that the quarantine order, among other terms, shall provide 'the period of time during which the order shall remain effective * * * and such other terms and conditions as may be necessary to protect the public health.' It no where appears what the period of time or the terms of the quarantine order were. It was issued in 1952. Plaintiff claims to have been infected in 1957. There is no allegation that the order was still in effect, or that the health officer did not within his discretion conduct investigations or take steps to ensure that the quarantine order was being obeyed. The charge is that he did not take 'proper or adequate' steps. This is entirely a conclusion of law. Moreover, if he acted within his discretion,***201** the fact that the steps turned out to be inadequate or improper would not make him liable. The officer has performed his duty when he exercises his discretion.

[5] As said in Routh v. Quinn, 20 Cal.2d 488, 491, 127 P.2d 1, 3, 149 A.L.R. 215: '* * * an indispensable factor to liability founded upon negligence is the existence of a duty of care owed by the alleged wrongdoer to the person injured, or to a class of which he is a member.' No such duty is shown here. In Stang v. City of Mill Valley, 38 Cal.2d 486, 240 P.2d 980, it was held that there was no liability imposed on a city, the city manager or fire chief, for failure to provide sufficient water for effective fire control. '* * * failure of

a governmental function * * * involves the denial of a benefit owing to the community as a whole, but it does not constitute a wrong or injury to a member thereof so as to give rise to a right of individual redress (Restatement of Torts, § 288), which right must be predicated upon the violation of a duty of care owed to the injured party.'

****188** In Tomlinson v. Pierce, 178 Cal.App.2d 112, 2 Cal.Rptr. 700, the complaint charged that the defendants, one a police officer, the other the chief of police, negligently failed to arrest an automobile driver whom they knew to be intoxicated and permitted him to remain at large, driving his car, as a result of which the driver collided with a car in which the plaintiffs' father was riding, causing the latter's death. In upholding the action of the trial court in sustaining a demurrer to this complaint without leave to amend, on the ground that no duty was shown to be owed the plaintiffs' father by the officers, the reviewing court said (178 Cal.App.2d at page 115, 2 Cal.Rptr. at page 702): 'As we construe the pleadings, plaintiffs' cause of action is founded upon the premise that when a police officer has knowledge that a member of society has formed the intention of committing a crime (i. e. knew that such person intended to drive and operate an automobile upon the public highways in an intoxicated condition at some future time), then for failure to make an arrest and detain such person, the officer becomes liable to all individuals for personal injury and property damage caused by this subsequent criminal act, and the failure to so arrest and detain him may be negligence on the part of the police officer. We find no support for this general proposition of law, either at common law, by statute or under the California decisions. It was held in Annala v. McLeod, 122 Mont. 498, 206 P.2d 811, 813, in an action against the sheriff for damages sustained by an individual through ***202** riot or mob action, no liability existed for his failure or neglect to carry out his duties; that under common law the sheriff 'is the conservator of the public peace and is not liable for an injury to person or property of an individual occasioned from riotous assembly or mob, unless made so by Constitution or statute.''

There is a strong similarity between the complaint in the Tomlinson case and that in our case. Both complaints charged that public officers failed to perform their duty in allowing a person whom they knew to be dangerous to the public to remain at large upon the streets, as a result of which the plaintiffs were injured. The Tomlinson case points out additionally that the sole proximate cause of the death of the plaintiffs' father was the manner in which the driver drove his car, and that if there was any breach of duty to the plaintiffs' father by the police officers, such breach was a remote, and not a proximate, cause of the death. Likewise, in our case, exposure to Czapkay was the sole proximate cause of plaintiff's acquiring the disease, and any breach of duty by defendant officers was only a remote cause. See also Rubinow v. County of San Bernardino, 169 Cal.App.2d 67, 336 P.2d 968.

[6] The sections of the Health and Safety Code (other than those hereinbefore mentioned) dealing with the duties of the health officer clearly show that his duties after issuing the quarantine order are discretionary rather than mandatory. Thus section 3110 provides that each health officer knowing or having reason to believe that any contagious, infectious or communicable disease exists in his jurisdiction 'shall take such measures as may be necessary to prevent the spread of the disease or occurrence of additional cases.' Section 3115 provides that upon receiving information of the existence of contagious, infectious or communicable disease each health officer shall '(a) Insure the adequate isolation of each case, and appropriate quarantine of the contacts and premises.' Section 452 provides that the county health officer shall enforce and observe statutes relating to public health and orders, regulations and rules prescribed by the State Department of Public Health. Title 17, section 2624, California Administrative Code, provides that persons having communicable tuberculosis, who fail to observe the instructions of the local health officer, 'shall be placed in strict isolation at home until such time as the local health officer feels that such isolation is no longer necessary * * *'

****189 *203** [7] We have been discussing so far the liability of health officers. Doctor Chope, the Director of the Health and Welfare Department of San Mateo County, is the health officer of that county. As to Doctor Bodie, alleged to be in charge of the Communicable Disease Division of the Health and Welfare Department, Health and Safety Code, section 451, provides for an appointment of a county health officer, but we fail to find where Doctor Bodie's office is referred to in the statutes nor do we find any duties imposed upon him. As it nowhere appears that Doctor Bodie had any mandatory duties which he is alleged to

have violated, there can be no liability on his part for failure to adequately and properly follow up the quarantine.

(b) County of San Mateo and City of Burlingame.

[8] The theory upon which plaintiff attempts to hold these defendants is that plaintiff's injury resulted from 'the dangerous or defective condition' of their property and hence the sovereign immunity which otherwise cloaks a county and city for injuries resulting from their acting in a governmental capacity is waived by section 53051, Government Code. While 'public property' as used in that section includes streets and highways (§ 53050) it is a novel conception that failing 'to conduct proper or adequate investigation to insure strict compliance' by Czapkay with the quarantine order or to notify their citizens that Czapkay had communicable tuberculosis or even knowingly allowing him to roam the streets (although there is no charge that they did the latter) constitutes a dangerous and defective condition of the streets. If this is so, then any negligence of the police in allowing a dangerous criminal on the streets, or in failing to arrest a person operating a motor vehicle in a dangerous manner would constitute a dangerous and defective condition of property. The section has always been considered to mean just what it says, that it is the *condition* of *property* that determines the waiver of the immunity and not the condition of persons on that property. The public streets complained of were not dangerous or defective either structurally or by way of their general use and operation. Neither the county nor the city is an insurer of the public ways within their respective jurisdictions against moving objects not controlled by them or wrongful acts of third parties.

Campbell v. City of Santa Monica, 1942, 51 Cal.App.2d 626, 629, 125 P.2d 561, 563, held, referring to a statute similar to the present section 53051, 'But neither this statute nor ***204** any other imposes a duty upon the city to control their use so as to avoid accidents upon them. By making and enforcing ordinances regulating the use of streets and sidewalks the city exercises a governmental power, and so for any breach thereof there is no liability.' In Shipley v. City of Arroyo Grande, 1949, 92 Cal.App.2d 748, 750, 208 P.2d 51, 53, the court said: 'A city is not liable for injuries caused by motor vehicles merely because it may appear that its streets and curbs which are in no sense dangerous for careful use could possibly be made secure against peril by a more elaborate construction or by installing one of a simpler type [citation].'

Somewhat analogous was the situation in Durst v. County of Colusa, 1958, 166 Cal.App.2d 623, 333 P.2d 789. There the plaintiff was a patient at the county hospital. It was alleged that the defendant county 'so negligently and carelessly administered and performed the blood transfusions that the plaintiff was caused to and did receive blood transfusions of a type other than that of plaintiff's' to his personal injury. The plaintiff contended that the doctrine of sovereign immunity could not apply because the county employed an incompetent and unlicensed technician to perform the laboratory tests 'and thereby created a dangerous and defective condition of public property for which it is liable under section 53051 of the Government Code.' 166 Cal.App.2d at page 625, 333 P.2d at page 790. The court held that there was no merit to this contention, as clearly the action was based upon the negligence of ****190** one of the county's employees and no dangerous or defective condition of county property was involved. The same is true of plaintiff's contention here that there is involved a dangerous and defective condition of San Mateo County's property and that of the city of Burlingame. See also Grove v. County of San Joaquin, 1958, 156 Cal.App.2d 808, 320 P.2d 161, where the plaintiff, beaten by other prisoners while he was confined in the county jail, contended that the county's failure to properly supervise the prisoners to prevent such an occurrence brought the jail within the terms, dangerous and defective condition of county property in section 53051. Also see Bryant v. County of Monterey, 1954, 125 Cal.App.2d 470, 473, 270 P.2d 897, where a similar contention was made where the plaintiff was injured by a 'kangaroo court' existing in the jail. Both cases held that there was no merit to the contentions.

[9] Plaintiff contends that whether a particular case meets the requirements of the code section, is a fact determination for ***205** the jury (see Arellano v. City of Burbank, 13 Cal.2d 248, 254, 89 P.2d 113), and that therefore it was for the jury to determine whether or not a dangerous or defective condition of public property existed here. However, the question as to the extent of the duties which are imposed by the act is one of law to be determined by the court and not by the jury. 'The scope of the Public Liability Act is a question of law to be determined by the court.' Bryant v. County of Monterey, supra, 125 Cal.App.2d 470,

473, 270 P.2d 897, 899; Campbell v. City of Santa Monica, supra, 51 Cal.App.2d 626, 629, 125 P.2d 561.

[10] Plaintiff contends that the County of San Mateo was acting in a proprietary capacity in that it contracted with the city of Burlingame for the services of the county's Health and Welfare Department. This contract did not change the legal situation. Both the county and the city were acting in a governmental capacity, in supplying health services to the citizens of Burlingame. The county was acting as the agent of the city and not in a proprietary capacity.

No cause of action was stated against either San Mateo County or the city of Burlingame.

(c) Doctors Merrill and Kupka, Officially and Individually.

The discussion and holding concerning failure to post the placard hereinbefore applied to the demurrers of defendants Chope and Bodie applies to defendants Merrill and Kupka. Plaintiff contends that these defendants are liable because of section 106, Health and Safety Code. This provides that the Director of the State Department of Health and Safety is the executive officer of the department. 'He shall administer the laws and regulations of the board pertaining to public health and shall vigilantly observe sanitary and public health conditions throughout the State and shall take all necessary precautions to protect it in its sanitary and public health relations with other States and countries. He shall perform such other duties as may be prescribed by law * * *.'

[11][12] Section 3051 provides that the state department *may* quarantine, isolate, inspect and disinfect persons, houses, etc. Section 3053 provides: 'Upon being informed by a health officer of any contagious, infectious, or communicable disease the state department *may* take such measures as are necessary to ascertain the nature of the disease and *prevent* its spread.' (Emphasis added.) The use of the word 'may' in these sections makes such powers discretionary. Executive public officers are absolutely immune from civil liability in the performance of duties requiring the exercise of discretion or ***206** judgment. White v. Brinkman, 1937, 23 Cal.App.2d 307, 317, 73 P.2d 254.

As to the statutes dealing with 'health officers' hereinbefore discussed, those statutes do not apply to officers of the State Department of Public Health. Section 3000, Health and Safety Code, provides: ****191** "Health Officer,' as used in this division, includes county, city and district health officers, and city and district health boards, but does not include advisory health boards.' The discussion concerning the nonliability of Doctors Chope and Bodie applies to Doctors Merrill and Kupka. Plaintiff has failed to point out where these defendants have violated any duty to him. Hence no cause of action is stated against them.

The demurrers were properly sustained. The judgment is affirmed.

TOBRINER and DUNIWAY, JJ., concur.

Cal.App. 1960
Jones v. Czapkay
182 Cal.App.2d 192, 6 Cal.Rptr. 182

H

Court of Appeal, Second District, Division 6, California.
Robert LEVIN, as Public Health Officer, Plaintiff and Respondent,
v.
ADALBERTO M., Defendant and Appellant.

No. B195408.
Oct. 22, 2007.
Rehearing Denied Nov. 14, 2007.
Review Denied Feb. 13, 2008.

Background: County public health officer sought enforcement of civil order of detention for tuberculosis (TB) patient. The Superior Court, Ventura County, No. 243178,Ken Riley, J., ordered enforcement and later continuation of detention order. Patient appealed.

Holdings: The Court of Appeal, Yegan, Acting P.J., held that:
(1) any delay in appointment of counsel for patient was harmless error, and
(2) patient did not have a due process right to a unanimous jury verdict on proof beyond a reasonable doubt of the justification for his detention.

Affirmed.

Court of Appeal would exercise its discretion to rule on tuberculosis (TB) patient's appeal from trial court's orders enforcing and continuing civil order of detention, despite mootness, because issues presented, those being whether delay in appointment of counsel for patient was harmless error and whether patient had due process right to unanimous jury verdict on proof beyond a reasonable doubt of justification for his detention, were likely to recur and were otherwise likely to evade appellate review due to inherently temporary nature of detention orders. U.S.C.A. Const.Amend. 14; West's Ann.Cal.Health & Safety Code § 121365(d).

Any delay in appointment of counsel for tuberculosis (TB) patient at hearing on enforcement of civil order of detention was harmless error, since public defender was appointed at enforcement hearing, which was first day of initial 90-day period of detention, and trial court reviewed factual basis for detention at 90-day review hearing. Tuberculosis (TB) patient did not have a due process right at civil detention order enforcement hearing to a unanimous jury verdict on proof beyond a reasonable doubt of his unwillingness to complete prescribed course of medication and to follow infection control precautions, which justified detention order. U.S.C.A. Const.Amend. 14; West's Ann.Cal.Health & Safety Code §§ 121365(e)(2), 121366 et seq.

****278** Kenneth I. Clayman, Public Defender and Michael C. McMahon, Certified AppellateLaw Specialist, for Defendant and Appellant.

Noel A. Klebaum, County Counsel, County of Ventura an John E. Polich, Deputy County Counsel, for Plaintiff and Respondent.

YEGAN, Acting P.J.

***292** Adalberto M. appeals from the trial court's orders enforcing and extending a Civil Order of Detention for Tuberculosis treatment issued against him by the Public Health Officer of Ventura County requiring that he be detained while he completes a course of treatment for tuberculosis. (Health & Saf.Code, §§ 121365, subd. (d), 121366.) [FN1] He contends the orders are "void" because the trial court deprived him of due process and equal protection by 1. failing to appoint counsel to represent him before an initial hearing, and 2. failing to require a unanimous jury verdict using the reasonable doubt burden of proof on the questions of whether he could be relied upon to complete the course of treatment and follow infection control precautions. (§ 121365, subd. (e)(1).)

FN1. All statutory references are to the Health & Safety Code unless otherwise stated.

[1] Appellant has a statutory right to be represented by counsel at the hearing to enforce the Civil Order of Detention for Tuberculosis. (§ 121366.) [FN2] The trial ***293** court erred by conducting the initial hearing on August 29, 2006, without first appointing counsel or inquiring of appellant personally whether he wished to be represented by counsel. The remedy for that violation, however, is not a declaration that the initial order detaining appellant is "void." The remedy is to appoint counsel and to hold a new hearing on the question of whether appellant's detention and treatment should continue. The trial court has already cured its error by appointing counsel to represent appellant and conducting the November 20, 2006 hearing at which it reviewed the basis for appellant's detention and treatment. Here, the delay in appointing counsel was harmless. We further conclude that appellant had no due process, equal protection, or statutory right to a jury trial, unanimous verdict, or to a reasonable doubt burden of proof. Accordingly, we affirm.

FN2. Appellant contends that he has a constitutional right to counsel. The courts do not reach constitutional issues where, as here, it is unnecessary to do so. (See e.g., *People v. Leonard* (1983) 34 Cal.3d 183, 187, 193 Cal.Rptr. 171, 666 P.2d 28.)

Facts

In early August 2006, Adalberto M., a 37–year old homeless man with a history ****279** of heroin and methamphetamine use, was admitted to the Ventura County Medical Center (VCMC) after testing positive for tuberculosis (TB). TB is a highly contagious and potentially fatal disease. The next day, the director of Ventura County's tuberculosis program, Dr. Kurt Cook, issued an Order of Isolation directing appellant to stay in a motel room the county provided for him while he completed taking a course of medication. Appellant agreed to, and signed, the isolation order. Public health staff took him to a motel and stocked the room with food, drinks, a refrigerator and a microwave oven. Appellant stayed there for about six days at the county's expense. Then, he checked out, forsaking his free room, board, and medicine. He did so to purchase illegal drugs.

About one week later, appellant was having trouble breathing and sought treatment at the Santa Paula Hospital. He was taken back to VCMC by ambulance where he refused to resume taking his tuberculosis medication. On August 23, 2006, Dr. Cook issued a Civil Order of Detention pursuant to which

appellant was prevented from leaving the hospital. Appellant demanded to be released and reacted violently when hospital security guards prevented his departure, breaking a window and assaulting the security guards. He actually spat on two security guards.[FN3]

> FN3. In addition to the disgusting and degrading aspect of spitting on another person, appellant's sputum carried a potential of infecting the guards with tuberculosis. Appellant's recalcitrance culminating in the spitting incident is the obvious reason why the public health officer could not again trust appellant in a motel setting. Appellant was the architect of his own confinement. (See *infra* p. 280.)

On August 29, 2006, the trial court held an ex parte hearing on the public health officer's application to enforce the Civil Order of Detention. The ***294** application was accompanied by a declaration from Dr. Robert Levin, the Public Health Officer for Ventura County. Dr. Levin declared that appellant was provided with a copy of Dr. Cook's August 23, 2006 Civil Order of Detention. According to Dr. Levin, appellant "did not request legal counsel or otherwise object to detention." At the August 29 hearing, appellant was not represented by counsel and did not appear. He was still confined in the hospital for treatment. The trial court granted the application, extending appellant's detention for 90 days. Immediately after it had ordered appellant detained for 90 days, the trial court appointed the Public Defender's office to represent him and set a review hearing for November 13, 2006. The public defender did not seek reconsideration or any relief whatsoever until the next scheduled hearing.

At the November 2006 review hearing, county counsel, appearing for the Public Health Officer, contended that appellant's continued detention was authorized pursuant to section 121365, subdivision (e) because, although appellant was no longer contagious, his prior refusal of treatment and attempt to leave isolation demonstrated that he could not be relied upon to complete the treatment without observation. The particular strain of tuberculosis with which appellant is infected was resistant to one of the most common tuberculosis antibiotics. According to Dr. Levin, "this makes absolute adherence to the remainder of his treatment mandatory. If [appellant] is not fully compliant he will be at high risk for the development of multi-drug resistant TB which poses a dire threat to the community at large." Appellant and his counsel were both present at the November hearing. Appellant testified that, if released, he would comply with the treatment plan because he understood that he would get sick again if he stopped ****280** taking the pills. Based upon his recent recalcitrance, the trial court found clear and convincing evidence that appellant could not be relied upon to complete the course of medication if released. It renewed the detention order for another 90 days, to February 27, 2007. Appellant filed this appeal.

Statutory Framework

"Pulmonary tuberculosis is an infectious and communicable disease ... [and is] dangerous to the public health." (§ 121360; see also *Souvannarath v. Hadden* (2002) 95 Cal.App.4th 1115, 1118, 116 Cal.Rptr.2d 7.) Section 121365 directs the local health officer in each jurisdiction to "use every available means to ascertain the existence of, and immediately investigate all reported or suspected cases of active tuberculosis disease in the jurisdiction, and to ascertain the sources of those infections." When the health officer determines that "the public health in general or the health of a particular person is endangered by exposure to a person who is known to have active tuberculosis disease," or a person reasonably suspected to have ***295** the disease, the health officer "may issue any orders he or she deems necessary to protect the public health or the health of any other person, and may make application to a court for enforcement of the orders." (*Id.*)

These orders may include a mandate that a person submit to a TB test or examination (§ 121365, subd. (a)), complete an appropriate course of treatment and follow required infection control measures (§ 121365, subd. (b)), or submit to "directly observed therapy" for the disease. (§ 121365, subd. (c).) A TB patient may be ordered confined to his or her residence (§ 121365, subd. (g)), excluded from his or her workplace, or excluded from any other place "when the local health officer determines that the place cannot be maintained in a manner adequate to protect others against the spread of tuberculosis disease." (§ 121365, subd. (f).)

Here, the public health officer detained appellant pursuant to section 121365, subdivision (d). This subdivision permits "An order for the removal to,

detention in, or admission into, a health facility or other treatment facility of a person if both of the following occur: [¶] (1) The person has infectious tuberculosis disease.... [¶] (2) The local health officer finds, based on recognized infection control principles, that there is a substantial likelihood the person may transmit tuberculosis to others because of his or her inadequate separation from others."

Subdivision (e) of section 121365 permits the detention of a tuberculosis patient where the local health officer determines: "(2) There is a substantial likelihood, based on the person's past or present behavior, that he or she cannot be relied upon to participate in or complete an appropriate prescribed course of medication for tuberculosis disease and, if necessary, follow required infection control precautions for tuberculosis disease. The behavior may include, but is not limited to, refusal or failure to take medication for tuberculosis disease, refusal or failure to keep appointments or treatment for tuberculosis disease, refusal or failure to complete the treatment for tuberculosis disease, or disregard for infection control precautions for active tuberculosis disease." (*Id.*) The Public Health Officer relied on this subdivision at the November 20 hearing to support appellant's continued detention.

Section 121366 allows the local health officer to detain a tuberculosis patient in a hospital or other appropriate facility, pursuant to subdivisions (a), (d) or (e) of section 121365, without a prior court order. When a detained tuberculosis patient requests****281** release, however, the local health officer "shall make an application for a court order authorizing the continued detention within 72 hours after the request...." The application must include a request for an expedited hearing. "After the request for release, ***296** detention shall not continue for more than five business days in the absence of a court order authorizing detention. However, in no event shall any person be detained for more than 60 days without a court order authorizing the detention. The local health officer shall seek further court review of the detention within 90 days following the initial court order authorizing detention and thereafter within 90 days of each subsequent court review." (§ 121366.) The local health officer must prove the "particularized circumstances" necessitating detention "by clear and convincing evidence. Any person who is subject to a detention order shall have the right to be represented by counsel and upon request of the person, counsel shall be provided." (*Id.*)

Section 121367 mandates that the local health officer's orders be in writing and be personally served on the affected person. Among other things, the order must identify the legal authority under which it is made, the individualized circumstances necessitating the order, less restrictive treatment options that were either considered and rejected or attempted and unsuccessful, the period of time during which the order remains in effect and other conditions necessary to protect the public health. (§ 121367, subd. (a)(1)–(4).) The order must inform the affected person of his or her right to request release and provide the name and telephone number of the person to whom that request may be made. (§ 121367, subd. (b)(1).) It must inform the person that a court will review the order within 60 days, even if they do not request release. (§ 121367, subd. (b)(2).) The person must be informed of his or her right to be represented by counsel and that counsel will be appointed on request. (§ 121367, subd. (b)(4).) Finally, the order must be accompanied by a separate written notice of the right to request release and the procedure for doing so, the right to counsel, and the right to supply the addresses and telephone numbers of not more than two people to receive notice of the person's detention. (§ 121367, subd. (b)(5).)

The confinement of a person, such as appellant, who is detained pursuant to section 121365, subdivision (d) may not be continued after he or she "ceases to be infectious or after the local health officer ascertains that changed circumstances exist that permit him or her to be adequately separated from others so as to prevent transmission of tuberculosis disease after his or her release from detention." (§ 121368, subd. (b).) A person detained pursuant to section 121365, subdivision (e), "shall not continue to be detained after he or she has completed an appropriate course of medication." (§ 121368, subd. (c).) The person is entitled to an interpreter if necessary. (§ 121369, subd. (a).)

***297** *Mootness*

[2] Appellant's counsel informs the court that appellant has completed his course of treatment and has been released from detention as mandated by section 121365, subdivision (d). Appellant contends, and respondent agrees, that although his appeal arguably has become moot, we should reach the issues he has raised. We concur. The issues presented are

likely to recur and, because the course of treatment for tuberculosis typically lasts six to nine months, detention orders such as those issued in this case will likely expire before an appeal can be decided. (See, e.g., ****282***Conservatorship of Susan T.* (1994) 8 Cal.4th 1005, 1011, fn. 5, 36 Cal.Rptr.2d 40, 884 P.2d 988; *Conservatorship of Joel E.* (2005) 132 Cal.App.4th 429, 434, 33 Cal.Rptr.3d 704.) Accordingly, we exercise our inherent discretion to determine the merits of this appeal. (*Conservatorship of Manton* (1985) 39 Cal.3d 645, 647, fn. 1, 217 Cal.Rptr. 253, 703 P.2d 1147.)

Appointment of Counsel

[3] Appellant contends the trial court violated his due process and equal protection rights by authorizing his detention without first appointing counsel to represent him. Section 121366 provides: "Any person who is subject to a detention order shall have the right to be represented by counsel and upon the request of the person, counsel shall be provided." The trial court erred when it failed either to appoint counsel for appellant or obtain his personal waiver of that right.[FN4] It cured the error, however, when it appointed the Public Defender to represent appellant and then reviewed the need for appellant's continued detention at the November hearing.

> FN4. Dr. Levine testified that appellant received a copy of the order for his detention and did not request counsel. We cannot equate a "failure" to request counsel with a waiver of the right to counsel.

Appellant asserts that, because the trial court first detained appellant and then appointed counsel to represent him at the August 29 hearing, it never acquired personal jurisdiction over him and its subsequent orders are "void." He even sought habeas corpus relief. It is unclear from the record and oral argument just what remedy appellant was seeking. But in any event, physical release was certainly not appropriate. It is sufficient to now conclude that counsel should be appointed and given the opportunity to be heard before the trial court makes any order for detention for tuberculosis treatment. Delay in the appointment of counsel, as occurred here, does not necessarily irreparably prejudice the patient or taint subsequent proceedings.

A proceeding to detain and treat a tuberculosis patient is not identical, and in our view, not even similar to a criminal proceeding in which a formal ***298** plea or an interim finding or order acquires some finality and a presumption of correctness. An order of detention may be re-issued as often as necessary to protect the public health, but no single order can last longer than 90 days without court review. In addition, the order of detention must, as a matter of law, be rescinded as soon as the patient completes the course of treatment or "ceases to be infectious or after the local health officer ascertains that changed circumstances exist that permit him or her to be adequately separated from others so as to prevent transmission of tuberculosis disease after his or her release from detention." (§ 121368, subd. (b), (c).)

Here, counsel was appointed to represent appellant long before the initial 90–day period expired. As indicated, counsel was appointed on the very first day of the 90 day period. Nothing prevented appellant's counsel from making an earlier request for his release based on his non-infectious status or other changed circumstances. Moreover, at the November hearing the trial court reviewed the factual basis for appellant's detention rather than relying on findings made before counsel was appointed. In these circumstances, we conclude appellant was not prejudiced by the delay in appointing counsel and the trial court's error was harmless.

Unanimous Jury Trial and Proof Beyond a Reasonable Doubt

[4] Appellant contends he has a due process right to a unanimous jury verdict ****283** on proof beyond a reasonable doubt of his inability or unwillingness "to participate in or complete an appropriate prescribed course of medication ... and, if necessary, follow required infection control precautions ...." (§ 121365, subd. (e)(2).) He notes that unanimous jury verdicts are required in proceedings for the involuntary civil commitment of mentally ill or gravely disabled persons (Welf. & Inst.Code, § 5350, subd. (c)), and were also required for commitments under the former Mentally Disordered Sex Offender Act. (Former Welf. & Inst.Code, § 6300 et seq.) Jury trials are also afforded to parolees identified as mentally disordered offenders (Pen.Code, §§ 2966, subd. (b), 2972, subd. (a)), and to prisoners identified as sexually violent predators. (Welf. & Inst.Code, § 6603).[FN5]

> FN5. Appellant sees no difference between

> these exemplar statutory schemes and the confinement of recalcitrant tuberculosis patients. We do. Those persons described in the exemplar schemes who have been afforded more procedural protections are capable of harming society, but not a in medical way. Tuberculosis, by contrast, is a severe infectious disease. The Centers for Disease Control and Prevention (CDC) estimate that "virtually all new infections in the country today are contracted through the aerosol route from infected patients who are coughing and dispersing infective droplet nuclei into the air." (Cole and Cook, (1998) *Characterization of Infectious Aerosols in Health Care Facilities: An Aid to Effective Engineering Controls and Preventive Strategies*, 26 Am. Journal of Infection Control 453.) This is hardly surprising, when one considers that, "A cough can generate some 3000 droplet nuclei, as can talking for 5 minutes. A sneeze can generate as many as 40,000 droplets ...[,]" containing infectious tuberculosis bacilli. These droplets are, of course, dispersed into the air which we all breathe creating a fertile environment for new infections. (*Id.* at p. 455, fn. omitted.) This certainly differentiates appellant from those persons described in the exemplar schemes.

***299** The procedural protections offered by these statutes are, however, a matter of legislative preference rather than federal constitutional mandate. In fact, the United States Supreme Court has never held that due process requires either a jury trial or proof beyond a reasonable doubt in the analogous context of the civil commitment of a mentally ill or sexually dangerous person. *Kansas v. Hendricks* (1997) 521 U.S. 346, 117 S.Ct. 2072, 138 L.Ed.2d 501, noted that "States have in certain narrow circumstances provided for the forcible civil detainment of people who are unable to control their behavior and who thereby pose a danger to the public health and safety. [Citations.] We have consistently upheld such involuntary commitment statutes provided the confinement takes place pursuant to proper procedures and evidentiary standards." (*Id.* at pp. 356–357, 117 S.Ct. 2072, 138 L.Ed.2d 501.)

Those "proper procedures and evidentiary standards" do not, at least as a matter of federal constitutional law, include a requirement of trial by jury. "There is no clearly established Supreme Court law which holds that due process requires a jury trial in civil commitment proceedings...." (*Poole v. Goodno* (8th Cir.2003) 335 F.3d 705, 710–711.) To the contrary, the Ninth Circuit holds that "due process does not require a jury trial" in a civil commitment proceeding against a criminal defendant found incompetent to stand trial. (*United States v. Sahhar* (9th Cir.1990) 917 F.2d 1197, 1207; see also *Carty v. Nelson* (9th Cir.2005) 426 F.3d 1064, 1073, 1075–1076 [California's SVP Act does not violate Sixth or Fourteenth Amendments to the United States Constitution].)

Nor has the United States Supreme Court mandated proof beyond a reasonable doubt in civil commitment proceedings. In *Addington v. Texas* (1979) 441 U.S. 418, 99 S.Ct. 1804, 60 L.Ed.2d 323, a case involving the indefinite detention of ****284** mentally ill persons, the Court held that "due process requires the state to justify confinement by proof more substantial than a mere preponderance of the evidence[,]" (*id.* at p. 427, 99 S.Ct. 1804), but does not "require states to apply the strict, criminal standard[ ]" of proof beyond a reasonable doubt. (*Id.* at p. 431, 99 S.Ct. 1804.) Accordingly, the Court settled on the "clear and convincing evidence" standard of proof, which it described as "a middle level of burden of proof that strikes a fair balance between the rights of the ***300** individual and the legitimate concerns of the state." (*Id.* at p. 431, 99 S.Ct. 1804; see also *Jones v. United States* (1983) 463 U.S. 354, 103 S.Ct. 3043, 77 L.Ed.2d 694 [due process satisfied by use of preponderance of the evidence standard in federal commitment proceeding against insanity acquittee].)

As the Supreme Court noted in *Vitek v. Jones* (1980) 445 U.S. 480, 100 S.Ct. 1254, 63 L.Ed.2d 552, the fact that a person is involuntarily detained for medical treatment "does not justify dispensing with due process requirements." (*Id.* at p. 496, 100 S.Ct. 1254.) *Vitek* held that, when a prisoner is being transferred to a state mental hospital for treatment, due process requires that the prisoner be given written notice, an opportunity to be heard before a neutral decision maker, the ability to review and challenge the evidence supporting the transfer, a written statement of reasons for the decision, legal counsel and timely notice of these rights. (*Id.* at pp. 494–495, 100 S.Ct. 1254.) The Supreme Court reasoned these procedures

were required because "The question whether an individual is mentally ill and cannot be treated in prison 'turns on the meaning of the facts which must be interpreted by expert psychiatrists and psychologists.' *Addington v. Texas*, 441 U.S. at 429, 99 S.Ct. at 1811.... It is precisely '[t]he subtleties and nuances of psychiatric diagnoses' that justify the requirement of adversary hearings. *Id.* at 430, 99 S.Ct. at 1811." (*Id.*, at p. 495, 100 S.Ct. 1254.)

The California Supreme Court reached a similar conclusion in *Conservatorship of Roulet* (1979) 23 Cal.3d 219, 152 Cal.Rptr. 425, 590 P.2d 1, a case arising under the Lanterman–Petris–Short Act (LPS Act), Welf. & Inst.Code, § 5350, et seq. The LPS Act provides that a gravely disabled person is entitled to a jury trial before a conservator is appointed or reappointed to care for the person. (§ 5350, subd. (d).) In *Roulet*, our Supreme Court considered whether the jury's verdict had to be unanimous and whether the reasonable doubt standard applied. It held that the "due process clause of the California Constitution requires that proof beyond a reasonable doubt and a unanimous jury verdict be applied to conservatorship proceedings under the LPS Act." (*Conservatorship of Roulet, supra*, 23 Cal.3d at p. 235, 152 Cal.Rptr. 425, 590 P.2d 1.) The court reasoned these protections were required because a conservatorship involved deprivations of liberty, including involuntary confinement in a mental hospital, that closely resembled imprisonment and "placed a lasting stigma on [the conservatee's] reputation." (*Id.* at 223, 152 Cal.Rptr. 425, 590 P.2d 1.)

More recently, our Supreme Court "has recognized, however, that the analogy between criminal proceedings and proceedings under the LPS Act is imperfect at best and that not all of the safeguards required in the former are ***301** appropriate to the latter." (*Conservatorship of Ben C.* (2007) 40 Cal.4th 529, 538, 53 Cal.Rptr.3d 856, 150 P.3d 738.) Indeed, the LPS Act itself permits a mentally ill and imminently dangerous person to be involuntarily committed for "successive periods of increasingly longer duration ...," before the right to a jury trial attaches. An initial detention****285** of 72 hours may be obtained without judicial review of any sort. (Welf. & Inst.Code, § 5150.) After that, commitments of 14 days and 30 days are available, each requiring "a certification hearing before an appointed hearing officer.... ([Welf. & Inst.Code,] §§ 5256, 5256.1, 5262, 5270.15, 5275, 5276.) A 180–day commitment requires a superior court order. ([Welf. & Inst.Code,] § 5301.)" (*Conservatorship of Susan T.* (1994) 8 Cal.4th 1005, 1009, 36 Cal.Rptr.2d 40, 884 P.2d 988.) After these temporary commitments have lapsed, the LPS Act "authorizes the appointment of a conservator for up to one year for a person determined to be gravely disabled as a result of a mental disorder and unable or unwilling to accept voluntary treatment. ([Welf. & Inst.Code,] § 5350.) The proposed conservatee is entitled to demand a jury trial on the issue of his or her grave disability, and has a right to counsel at trial, appointed if necessary." (*Id.*, fn. omitted.) All of these statutory provisions, including those which permit involuntary commitment for up to 180 days without a jury trial, pass state constitutional muster. (*Conservatorship of Ben C., supra*, 40 Cal.4th at pp. 542–543, 53 Cal.Rptr.3d 856, 150 P.3d 738.)

Tuberculosis differs from mental illness in ways that justify fewer procedural safeguards, not more. Unlike tuberculosis, mental illness is not contagious. Tuberculosis can be definitively and objectively diagnosed, treated and pronounced cured. The disease is diagnosed by studying sputum cultures for the presence of tuberculosis organisms. It is treated with a six- or nine-month course of powerful antibiotics. Treatment may occur in a hospital or in a non-institutional setting, such as a motel room or the patient's own home. The disease is considered cured when the course of antibiotics has been completed and the sputum cultures show no tuberculosis organisms for eight weeks. No such certainty is available in the diagnosis or treatment of mental illness and some involuntarily committed people are subjected to indefinite hospitalization in environments that may resemble prisons more closely than hospitals. (*Vitek v. Jones, supra*, 445 U.S. at pp. 494–495, 100 S.Ct. 1254; *Addington v. Texas, supra*, 441 U.S. at p. 429, 99 S.Ct. 1804.)

Nevertheless, the tuberculosis control statutes at issue here provide all of the process due under *Vitek, supra* and *Conservatorship of Ben C., supra*. Patients are entitled to written notice of the basis for their detention and their right to counsel, their right to request release, and the availability of judicial review of the detention order. (§ 121367.) The trial court must review an order for the detention of a tuberculosis patient at least every 90 days and the patient must be released as soon as the conditions necessitating de-

tention have been ***302** addressed. (§ 121366; 121368, subd. (b).) Proof by clear and convincing evidence is required before a patient can be detained for treatment. (§ 121366.)

If due process does not require a jury trial or proof beyond a reasonable doubt for the temporary, 180–day civil commitment of a mentally ill person, it cannot require those procedures before a contagious and recalcitrant tuberculosis patient is detained for treatment of a similar duration. The procedures mandated by sections 121365 through 121369 satisfy federal and state due process requirements. *(Vitek v. Jones, supra,* 445 U.S. at pp. 494–495, 100 S.Ct. 1254; *Addington v. Texas, supra,* 441 U.S. at p. 431, 99 S.Ct. 1804; *Carty v. Nelson, supra,* 426 F.3d at pp. 1073–1075; *Conservatorship of Ben C., supra,* 40 Cal.4th at pp. 552–553, 53 Cal.Rptr.3d 856, 150 P.3d 738.) The trial court did not err in denying appellant's requests for a jury trial and proof beyond a reasonable doubt.

****286** *Conclusion*

There is an irony in this case which cries out for comment. Appellant contests his confinement for treatment that not only improved his health, but saved his life. His recalcitrance was both foolish and selfish. By leaving isolation, appellant put the entire community at risk. Except for a delay in the appointment of counsel, which could have been remedied by a motion for reconsideration, appellant was treated with fairness, care and compassion at every stage of his encounters with public health authorities, the police, and the courts. He was provided with medical care, room and board, an attorney and a meaningful opportunity to be heard in court, all at public expense. The public health officer "bent over backwards" to help him and safeguard the community. It was an uncontroverted medical fact that appellant had tuberculosis and, in the expert opinion of his doctor, posed a medical threat to the community if not confined. No rational judge or jury, in good conscience, under any standard of proof, could release appellant into the community until he was no longer a danger. We can find no fault on the part of those people who were trying to help appellant and simultaneously protect the other citizens of Ventura County from the spread of tuberculosis.

We do not intend to chill the right to appeal. But abstract notions of the process due to an individual, such as a jury trial, unanimous verdict, or proof beyond a reasonable doubt, must be considered in light of the factual circumstances under which these rights are claimed. The factual scenario presented here makes a poor foundation to support an expansion of the process due to a tuberculosis patient. It must be emphasized that the rights appellant seeks to engraft on the extant statutory scheme have not previously been recognized by judicial precedent.

***303** The judgment (order to continue civil detention pursuant to Health & Safety Code section 121365, subdivision (e)) is affirmed.

MENEFEE & SON et al., Plaintiffs and Appellants,
v.
DEPARTMENT OF FOOD AND AGRICULTURE et al., Defendants and Respondents

No. C000765.

Court of Appeal, Third District, California.
Mar 18, 1988.

SUMMARY

Plaintiffs sought judicial relief through injunction and/or writ of mandate from the seizure of their crops pursuant to Food & Agr. Code, § 12648, which permits the director of the Department of Food and Agriculture to seize and destroy crops that have been treated with an unauthorized economic poison. The trial court denied relief. (Superior Court of Sacramento County, No. 341855, James Timothy Ford, Judge.)

The Court of Appeal reversed and remanded with directions to enter judgment for plaintiffs, holding that Food & Agr. Code, § 12648, is unconstitutional, both on its face and as applied to plaintiffs, for failing to provide the minimum procedural due process guarantees of notice and an opportunity to be heard. Although some emergencies may justify a summary seizure of property, and contaminated food is a matter frequently requiring emergency seizure, in such circumstances the opportunity for a hearing may be postponed but not eliminated, the court held, and not only does § 12648 fail to limit its application to emergencies, it also fails to provide for any hearing whatsoever. The fact that a crop owner may institute a judicial proceeding for the return of the crop is no substitute for the requirement that an owner be accorded a fair hearing on the merits of the seizure. The court held that despite the egregiousness of the alleged misconduct and the apparent lack of a meritorious defense, the department's decision to seize the crops pursuant to § 12648 was void, and plaintiffs were entitled to a judgment in their favor. (Opinion by Sparks, J., with Puglia, P. J., and Marler, J., concurring.)

HEADNOTES

Classified to California Digest of Official Reports

(1) Agriculture § 9--Seizure of Contaminated Crops--Owner's Constitutional Rights.

A crop owner's interest in growing crops is a significant property interest that is protected by the procedural due process aspects of the state Constitution (Cal. Const., art. I, § 7), and neither the egregiousness of the owner's alleged misconduct nor the apparent lack of a meritorious defense can obviate the requirement that the owner be accorded the minimum due process protections with respect to seizure of crops for alleged violation of administrative regulations.

(2) Constitutional Law § 107--Procedural Due Process--Deprivation of Property Interests.

The procedural requirements necessary to satisfy due process necessarily vary according to the competing interests of the government and the citizen. Due process essentially guarantees a fundamentally fair decisionmaking process, and thus, at a minimum, requires notice and an opportunity for a hearing, which normally must precede even a temporary deprivation of a property interest. In some emergency situations the legitimate and overriding interests of the government may permit summary action; however, even then the opportunity for a hearing may be postponed but not eliminated. The fact that the affected party may institute a judicial action is not a sufficient opportunity for a hearing under procedural due process doctrine; otherwise, a party whose property has been taken would have the additional financial burden of instituting an action for the property's return.

[See **Am.Jur.2d,** Constitutional Law, § 813.]

(3) Agriculture § 9--Seizure of Contaminated Crops--Procedural Due Process--Failure to Provide for Preseizure Notice and Hearing.

Food & Agr. Code, § 12648, which permits the director of the Department of Food and Agriculture to seize crops treated with an unregistered economic poison without affording the grower prior notice or opportunity to be heard and without any requirement that authorization be obtained from a neutral judicial officer, does not meet the minimum constitutional requirements of procedural due process. Contaminated food is a matter that may frequently require

emergency seizure, but § 12648 is not limited in its application to emergency situations and instead broadly applies to any misuse of chemicals. The fact that summary seizure may be necessary in some instances does not validate a statute that permits ex parte seizure without any attempt to focus on the extraordinary circumstances justifying summary seizure.

(4) Agriculture § 9--Seizure of Contaminated Crops--Procedural Due Process--Failure to Provide for a Hearing.

Food & Agr. Code, § 12648, which permits the director of the Department of Food and Agriculture to seize crops treated with an unregistered economic poison, does not meet the minimum constitutional requirements of procedural due process, since it does not provide the crop owner with any hearing, either before or after the seizure. The owner is entitled to an opportunity to be heard on the merits of the taking, and the fact that the owner may institute a judicial proceeding for the return of the crop is no substitute for the requirement of a fair hearing on the merits of a seizure of property.

(5) Agriculture § 9--Seizure of Contaminated Crops--Procedural Due Process--Requirement That Owner File Suit to Contest Seizure.

Food & Agr. Code, § 12648, which permits the director of the Department of Food and Agriculture to seize crops treated with an unregistered economic poison, unconstitutionally compels the crop owner rather than the department to institute an action to review the seizure, giving the owner only 30 days to do so and providing no form of compensation in the event the deprivation proves to have been wrongful. The statute does not require notice of the type of proceeding that may be instituted, or provide for the type of judicial proceeding that would be essential to provide due process. If a judicial proceeding is the owner's first and only opportunity to have a hearing on the merits of the seizure, then the statute must require the department to bear the burden of proof on all issues.

[See **Cal.Jur.3d,** Agriculture, § 19.]

(6) Agriculture § 9--Seizure of Contaminated Crops--Procedural Due Process--Requirement That Owner File Suit to Contest Seizure--Sufficiency of Judicial Proceedings.

Food & Agr. Code, § 12648, which permits the director of the Department of Food and Agriculture to seize crops treated with an unregistered economic poison, was unconstitutional as applied to plaintiffs, who, in the absence of any notice and hearing provisions in the statute were compelled to bring an action for injunctive relief and/or writ of mandate to contest the seizure of their crops. Although these appeared to be logical remedies in the absence of any guidance from the statute, the trial court applied the abuse of discretion standard, which is inappropriate when the owner's appearance before the court is the first and only opportunity to contest the merits of the department's decision to seize a crop. As a result, the department was never required to appear before an impartial hearing officer and carry the burden of proving the facts on which it relied in seizing plaintiffs' crop, and, therefore, plaintiffs were denied the minimum due process to which they were entitled before the government could interfere with their property interests.

COUNSEL

Turner & Sullivan, Robert J. Sullivan, Mary A. O'Gara, Elizabeth Ufkes Olivera and Marily Peatman Lerner for Plaintiffs and Appellants.

John K. Van de Kamp, Attorney General, R. H. Connett, Assistant Attorney General, and William D. Cunningham, Deputy Attorney General, for Defendants and Respondents.

SPARKS, J.

In this appeal we are called upon to determine the constitutionality of Food and Agriculture Code section 12648. This section purports to empower the Director of the Department of Food and Agriculture, without a hearing and under nonemergency circumstances, to seize and destroy a crop or commodity which has been treated with an unauthorized economic poison and thereafter shifts the burden to the grower to bring a lawsuit within 30 days to contest the seizure. We hold that the challenged statute deprives the grower of procedural due process and consequently is unconstitutional.

This case arose when the director issued an order of seizure pursuant to the challenged section against plaintiffs' lettuce and endive crops. The order declared that plaintiffs' field containing the crops was a public nuisance and that it was seized and any harvest prohibited. Plaintiffs timely filed a lawsuit in which they sought judicial relief through injunction and/or writ of

mandate. They raised a number of challenges to Food and Agriculture Code section 12648 (all further statutory references are to this code unless otherwise stated) and the specific order in their case. Plaintiffs reiterate these challenges on appeal and contend that section 12648 is unconstitutional on ***778** its face and as applied in this case, and that the order of the director was the result of an unconstitutional search and seizure. [FN1]

> FN1 In a peripheral contention, plaintiffs also argue that the order constituted an abuse of discretion. In part, this contention rests on their constitutional claims. Aside from those concerns, plaintiffs contend that the finding of economic advantage was arbitrary and capricious because the order was tardy, failed to consider the public interest, and was unnecessary in light of other available civil and criminal penalties. To the extent that this contention does not rest on their constitutional claims, we find it to be without merit.

We find it unnecessary to resolve the constitutional validity of the search and seizure because we find the due process challenge to the statute to be dispositive. Section 12648 fails to provide the minimal due process protections required by the state Constitution and the order issued pursuant to it is void. We therefore reverse the judgment and direct that a new and different judgment be entered in favor of plaintiffs.

Factual and Procedural Background

The essential facts are not in dispute. The plaintiffs, Menefee & Son, Jerry Menefee and Menefee Hill Ranch Company, are the owners and operators of a field in Madera County consisting of approximately 76 acres. In January 1986 plaintiffs planted this field, called number 6, with lettuce and endive for the purpose of producing seed. [FN2] After the field was planted horned-lark birds began to attack the buds of the young seedlings. Jerry Menefee met with representatives of the Madera County Agricultural Commissioner and was advised he should use strychnine treated grain to control the birds. The treatment requires the fields to be prebaited with cracked corn and when the birds are accustomed to eating the corn to substitute strychnine treated corn. In early February 1986, the Menefee field was treated with strychnine laced corn with the assistance of the county commissioner's office. Good results were obtained, and Menefee was advised to contact the commissioner's office for further treatment if it became necessary.

> FN2 When a field is planted for seed the crop itself is not sold for consumption. Rather. the seed is harvested and sold to a dealer, who in turn sells the seed to farmers who produce crops which are sold for consumption. Plaintiffs submitted declarations from various experts which tended to show that any danger from the use of unauthorized chemicals on the crops would be dissipated since the crops were grown for seed rather than for consumption. We have no occasion to resolve that controversy.

On February 19, 1986, a biologist employed by Merced County advised Madera County officials that he overheard Jerry Menefee in a two-way radio conversation with someone named Jack. Menefee stated he had used Thimet on a lettuce field for bird control. Thimet is toxic to birds but is not ***779** authorized for use in bird control. It is also not authorized for application in lettuce or endive fields. On February 20, George Tipton, a deputy agricultural commissioner, went to the Menefee field to investigate. Thimet has a strong skunk-like odor, and as Tipton walked into the field he detected such a distinctive odor. He also observed granular material on the ground which resembled Thimet. When Menefee and his foreman came to the field Tipton spoke with them about the bird problem, but did not mention anything about the suspected use of Thimet. The following day Tipton returned to the field and took a soil sample. The sample proved positive for the presence of Thimet. On February 28, Tipton returned to the field for another soil sample. This sample proved positive for the presence of Furadan. Furadan, like Thimet, is a poison which is toxic to birds but which is not authorized for bird control or for use in lettuce and endive fields.

On June 12, 1986, the director issued an order pursuant to section 12648. The order states that the director found evidence plaintiffs had used Thimet and Furadan on field number 6 in violation of the permitted uses of those economic poisons. The order states the use of those poisons resulted in or could result in the creation of an unfair business advantage to plaintiffs in that (1) plaintiffs did not have to spend the time and effort to obtain a permit for the use of

strychnine for bird control, (2) they remained outside the permit system which places restrictions of the use of restricted materials, and (3) they had Thimet and Furadan on hand and saved the expense of purchasing an approved material. The director declared field number 6 a public nuisance, seized it and prohibited harvest, and specified that if no action was filed within 30 days the crop could be ordered destroyed. [FN3]

> FN3 The order, like section 12648 itself, did not give plaintiffs any right to contest its issuance administratively. However, it did advise plaintiffs that they could petition the director for a reduction of the total acreage and the director could, at his discretion, grant a reduction upon a clear showing that the application of chemicals was limited to an identifiable portion of the field.

On July 8, 1986, the director agreed to extend the time for plaintiffs to file an action to September 1, 1986. Plaintiffs' complaint for an injunction and/or writ of mandate was filed on July 25, 1986. The trial court issued a temporary restraining order which permitted plaintiffs to harvest the seed crop but which restrained them from selling, transferring, encumbering, or removing any part of the crop from the confines of field 6 pending a hearing for an injunction.

On August 8, 1986, the director adopted an amended order in the matter. The amended order adds a finding that the use of Thimet and Furadan resulted or reasonably could have resulted in the creation of a hazard to ***780** human health. The basis for this finding was, essentially, that since those chemicals are not registered for use with lettuce and endive they must be presumed unsafe. The order also states that exposure to Furadan can create a health hazard to field workers.

Following a hearing the trial court dissolved the temporary restraining order and denied injunctive relief and the petition for a writ of mandate. Pursuant to stipulation of the parties the court entered an order which allowed plaintiffs to harvest and store the lettuce and endive seed with appropriate restrictions pending the result of this appeal. This appeal then followed.

Discussion

At the time this dispute arose section 12648 provided: "Notwithstanding any other provision of this code, if the director finds evidence that a crop, commodity, or site has been treated with an economic poison not registered pursuant to Chapter 2 (commencing with Section 12751) for use on the crop, commodity, or site and the treatment has resulted in, or could reasonably result in, the creation of a hazard to human health or an unfair business advantage, the crop or commodity may be declared by the director to be a public nuisance and may be seized and held to prevent harvest and sale. The director shall hold the crop or commodity for 30 days, and if no action has been filed to contest the seizure, the director may order that the crop or commodity be destroyed." [FN4]

> FN4 Section 12648 was amended effective January 1, 1987. (Stats. 1986, ch. 697, § 1.) The amended version provides that the director may take action "upon making a finding" of the improper use of an economic poison and "upon making a further finding" that the use could result in a hazard to human health or an unfair business advantage.
>
> An "economic poison" is defined as including any of the following: "(a) Any spray adjuvant. [¶] (b) Any substance, or mixture of substances which is intended to be used for defoliating plants, regulating plant growth, or for preventing, destroying, repelling, or mitigating any and all insects, fungi, bacteria, weeds, rodents, or predatory animals or any other form of plant or animal life which is, or which the director may declare to be, a pest, which may infest or be detrimental to vegetation, man, animals or households, or be present in any environment whatsoever." (§ 12753.)

In making his order in this case the director expressly disclaimed an intent to rely upon other provisions of law which empower him to prevent the harvesting and use of crops after an improper chemical application and limited his order to the provisions of section 12648.

(1) Although due process of law is guaranteed by both the the federal and state Constitutions, we have no occasion to reach the federal question. ***781** By its terms, article I, section 7 of the California Constitution provides that "[a] person may not be deprived of life, liberty, or property without due process of law." There

can be no dispute that plaintiffs' interest in their growing crops is an interest that is protected by the procedural due process aspects of the state Constitution. (See *Skelly v. State Personnel Bd.* (1975) 15 Cal.3d 194, 206 [124 Cal.Rptr. 14, 539 P.2d 774].) Since a significant property interest is at stake, neither the egregiousness of the alleged misconduct nor the apparent lack of a meritorious defense can obviate the requirement that the plaintiffs be accorded minimal due process protections. (*Carrera* v. *Bertaini* (1976) 63 Cal.App.3d 721, 727 [134 Cal.Rptr. 14].)

(2) The procedural requirements that are necessary to satisfy due process necessarily vary according to the competing interests of the government and the citizen. (*Ibid*.) "Although 'due process' encompasses a broad range of safeguards, in essence the concept guarantees a fundamentally fair decision-making process." (*People* v. *Ramos* (1984) 37 Cal.3d 136, 153 [207 Cal.Rptr. 800, 689 P.2d 430].) Thus, at a minimum, due process requires notice and an opportunity for a hearing. (*Kash Enterprises, Inc. v. City of Los Angeles* (1977) 19 Cal.3d 294, 307 [138 Cal.Rptr. 53, 562 P.2d 1302].) Normally notice and an opportunity for a hearing must precede even a temporary deprivation of a property interest. (*Skelly* v. *State Personnel Bd., supra*, 15 Cal.3d at pp. 215-216.) However, in some emergency situations the legitimate and overriding interests of the government may permit summary action. (*Ibid*.; *Carrera v. Bertaini, supra*, 63 Cal.App.3d at p. 728.) In such circumstances the opportunity for a hearing may be postponed but not eliminated. (*Kash Enterprises, Inc. v. City of Los Angeles, supra*, 19 Cal.3d at p. 308.) And the fact that the affected party may institute a judicial action is not a sufficient opportunity for a hearing. As the high court emphasized in *Kash Enterprises*, "[n]ot one of the scores of recent procedural due process decisions, however, suggests that the availability of a collateral judicial remedy can sustain a seizure procedure which provides absolutely no hearing whatsoever, either before or after the taking. Acceptance of [that argument] would in effect read out almost all of the protections afforded by a contemporary procedural due process doctrine, and would place on the party whose property has been taken the additional financial burden of instituting an action for the property's return." (*Id*., at p. 309; citations omitted.)

(3) When section 12648 is measured against these minimum constitutional requirements it suffers from glaring deficiencies. It permits the director to seize the property of a person without any notice or opportunity to be heard and without any requirement that authorization be obtained from a ***782** neutral judicial officer. (See *Sokol v. Public Utilities Commission* (1966) 65 Cal.2d 247, 255-256 [53 Cal.Rptr. 673, 418 P.2d 265].) To be sure, contaminated food is a matter which frequently requires emergency seizure. (*Carrera* v. *Bertaini, supra*, 63 Cal.App.3d at p. 728.) But the challenged statute makes no effort to limit its application to emergency situations and instead broadly applies to any misuse of chemicals without regard to whether an emergency appears. The mere fact that summary seizure may be necessary in some instances does not validate a statute that permits ex parte seizure without any attempt to narrowly draw into focus the extraordinary circumstances in which summary seizure may be required. (*Skelly v. State Personnel Bd., supra*, 15 Cal.3d at p. 216; *Randone v. Appellate Department* (1971) 5 Cal.3d 536, 541 [96 Cal.Rptr. 709, 488 P.2d 13].) The facts of this case amply demonstrate this deficiency. Although the department had notice of the use of Thimet and Furadan by plaintiffs in February 1986 and had scientific confirmation of the presence of Thimet and Furadan in the field 6 soil by early March, no action was taken by the department until June 12, 1986. [FN5] Any claim that this case presents extraordinary circumstances justifying summary seizure would be specious.

> FN5 In fact the delay of the department is one of plaintiffs' primary complaints in this matter. Plaintiffs were under contract to provide 76 acres of lettuce and endive seed to Ferry-Morse Seed Company. They assert that if they had been promptly notified of the problem when the department first discovered it they could have had the option of simply discing the field and planting an alternative crop, and could have used another field to fulfill the contract to grow lettuce and endive seed. The department's delay not only meant that plaintiffs spent time and money caring for the crop which the department now seeks to destroy, it also placed them too far into the growing season to select any other alternatives.

(4) Bad as the failure to provide preseizure notice and a hearing may be, an even greater deficiency arises from the failure to provide any hearing what-

soever. Although the statute authorizes the seizure of a grower's property, "it does not accord the owner the most basic safeguard demanded by due process - an opportunity to be heard on the merits of the taking, either before or after the taking." (*Kash Enterprises, Inc.* v. *City of Los Angeles*, *supra*, 19 Cal.3d at p. 309.) The fact that an owner may institute a judicial proceeding for the return of the property is simply no substitute for the requirement that an owner be accorded a fair hearing on the merits of the seizure. (*Ibid*.; see *In re Harris* (1968) 69 Cal.2d 486, 490 [72 Cal.Rptr. 340, 446 P.2d 148].)

(5) In any event, even if we concluded that the availability of a judicial action could serve as a substitute for an administrative hearing, we would still find section 12648 deficient. It compels the owner to institute the action ***783** rather than the department. (*Ibid*.; see *Carrera v. Bertaini*, *supra*, 63 Cal.App.3d at p. 729.) It gives the owner just 30 days to institute an action or his crop will be destroyed and provides no form of compensation in the event the deprivation of property proves to have been wrongful. (*Skelly* v. *State Personnel Bd.*, *supra*, 15 Cal.3d at p. 209.) The statute does not require notice of the type of proceeding which may be instituted. (*In re Harris*, *supra*, 69 Cal.2d at p. 490.) And, even more critically, it does not provide for the type of judicial hearing which would be essential to provide due process. In short, if a judicial proceeding is the owner's first and only opportunity to have a hearing on the merits of the seizure, then it is essential that the department be required to bear the burden of proof on all issues and the statute must so provide.

(6) In this case plaintiffs instituted an action for injunctive relief and/or writ of mandate, which appear to be logical remedies in the absence of statutory guidance. The trial court, doubtless accustomed to reviewing administrative decisions, applied the usual test for review of such decisions, the abuse of discretion standard. As the trial court recognized, this is a stringent standard which makes it very difficult for the applicant to obtain relief. However, such a standard of "review" is wholly inappropriate when the owner's appearance before the court is his first and only opportunity to contest the merits of the department's decision to seize his property. The result of the proceedings in this case is that to the date of this decision the department has not yet been required to appear before an impartial hearing officer and carry the burden of proving any of the facts upon which it relies in seizing the Menefee crop. It follows that the plaintiffs have not yet been accorded the minimal due process to which they are entitled before the government may interfere with their property interests.

For these reasons we conclude that section 12648 is unconstitutional both on its face and as applied in this case. [FN6] The director's decision to seize the Menefee crops pursuant to section 12648 is void. The plaintiffs are entitled to a judgment in their favor requiring the director to vacate his decision to seize the crops, and to take no further action against the plaintiffs pursuant to section 12648. ***784**

> FN6 Our decision does not deprive the department or the director of the power to protect the public from contaminated food or to enforce economic poison regulations. Other provisions of law enable the director to seize any lot of produce which contains spray residue or other deleterious ingredients. (§ 12601 et seq.) And the violation of pesticide regulations can subject the violator to substantial criminal or civil penalties. (§§ 12996, 12998.)

The judgment is reversed and the cause is remanded to the trial court with directions to enter judgment in favor of plaintiffs in accordance with the views expressed in this opinion.

Puglia, P. J., and Marler, J., concurred.

Cal.App.3.Dist.
Menefee & Son v. Department of Food & Agriculture
199 Cal.App.3d 774, 245 Cal.Rptr. 166

END OF DOCUMENT

C

Superior Court of New Jersey, Law Division,
Essex County.
The CITY OF NEWARK, A Municipal Corporation of the State of New Jersey and Bobi Ruffin, Director, Newark Department of Health & Human Services,
Plaintiff,
v.
J.S., Defendant.

Decided Nov. 8, 1993.

City sought involuntary commitment of homeless person suffering from tuberculosis (TB). The Superior Court, Law Division, Essex County, Goldman, J.S.C., held that: (1) tuberculosis civil commitment statute would not be declared invalid, but, rather, would be construed to include rights required by contemporary standards of due process and by the Americans with Disabilities Act (ADA); (2) city established that patient presented significant risk to others unless isolated and that hospital confinement was least restrictive mode of isolation; but (3) patient would not be ordered to provide sputum samples or to take his medication as directed.

So ordered.

In order to fulfill requirement for civil commitment of one suffering from infectious disease of using "least restrictive alternative," public health officials will usually have to show that they attempted step-by-step interventions, beginning with voluntary directly observed therapy, supplemented by incentives, such as food or money reward for taking medication, and enablers, such as travel assistance, with commitment an absolute last resort. N.J.S.A. 30:9-57.

****267 *184** Lauren McGlynn, for plaintiff (Michelle Hollar-Gregory, Corporation Counsel for the City of Newark, attorney).

Paula Levy, for defendant (Zulima Farber, Public Advocate of New Jersey, attorney).

OPINION

GOLDMAN, J.S.C.

This case presents novel issues surrounding a resurging public health catastrophe, ****268** tuberculosis (TB). It requires a review of New Jersey's TB control statute to determine if it fulfills due process requirements and if it complies with the Americans with Disabilities Act of 1990 (ADA), 42 *U.S.C.A.* §§ 12101-12213. Specifically, I must decide if there is statutory authority to involuntarily commit a person with TB to a hospital and, if so, the standards and procedures that would allow such a commitment.

I hold that there is such authority and that the standards and procedures applicable to involuntary civil commitments must be followed in applications to commit persons with TB. If those procedures are scrupulously adhered to and the least restrictive means of treatment is determined, the requirements of both due process and the ADA will be fulfilled. I further hold that the procedures employed here complied with due process and the ***185** ADA, and that the plaintiff, City of Newark (Newark), proved the need for J.S.'s commitment.

On October 22, 1993, Newark filed a verified complaint with the emergent duty judge and obtained a temporary commitment order and an order to show cause. Newark sought a final order "committing [J.S.] to [a local hospital] until the State Commissioner of Health shall be satisfied that the person has recovered to the extent that he will not be a menace to the community or to members of his household or that the

person will so conduct himself that he will not constitute such a menace." This opinion amplifies oral findings rendered at the conclusion of the commitment hearing.[FN1]

> FN1. On November 8, 1993, I heard the return of the order to show cause, which was a commitment hearing. Newark's application was then limited to seeking J.S.'s confinement while he was receiving treatment for active TB. J.S. opposed any confinement and was represented by counsel.
>
> This hearing was conducted in chambers so that a speaker telephone could enable all those present to be heard by those in the hospital. A similar device was set up in J.S.'s hospital room. A court reporter was able to listen to and record the testimony from both sites. Most witnesses, including J.S.'s admitting physician, a pulmonary disease specialist, social worker, floor nurse, infectious control nurse, and the hospital vice-president and chief of social work, all testified from J.S.'s room. One witness, Kenneth Shilkret, Chief of the Tuberculosis Control Program of the New Jersey Department of Health, testified in chambers. All witnesses were sworn and cross-examined by J.S.'s counsel. Throughout the hearing J.S. interrupted proceedings to demand an opportunity to present his "side," but his counsel properly wanted to wait until Newark finished its presentation. When it was J.S.'s turn to testify, he refused to do so and voluntarily absented himself from further proceedings, which then consisted of my decision that was then rendered in open court.

The defendant, J.S., is a 40-year-old African-American male suffering from TB and HIV disease. Hospital authorities requested that Newark intervene when J.S. sought to leave the hospital against medical advice. J.S. was found dressed in street clothes, sitting in the hospital lobby. Once he wandered to the pediatrics ward. He had a prior history of disappearances and of releases against medical advice, only to return via the emergency room when his health deteriorated. Allegedly, J.S. failed to follow ***186** proper infection control guidelines or take proper medication when in the hospital and failed to complete treatment regimens following his release. In March of 1993 J.S. had been discharged and deposited in a taxicab, which was given the address of a shelter to which he was to be driven. J.S. was given an appointment at a TB clinic a bus trip away from the shelter. J.S.'s Supplemental Security Income check was being delivered to another hospital, so he had no money. He did not keep his TB clinic appointment and was labeled as "non-compliant."

A sputum sample confirmed that J.S. had *active* TB.[FN2] TB is a communicable disease caused by a bacteria or bacilli complex, mycobacterium (M.) tuberculosis. One of the ****269** oldest diseases known to affect humans, it was once known as consumption or the great "white plague" because it killed so many people. Human infection with M. tuberculosis was a leading cause of death until antituberculous drugs were introduced in the 1940s. While it can affect other parts of the body, such as lymph nodes, bones, joints, genital organs, kidneys, and skin, it most often attacks the lungs. It is transmitted by a person with what is called *active* TB by airborne droplets projected by coughing or sneezing. When the organism is inhaled into the lungs of another, TB infection can result. Usually this happens only after close and prolonged contact with a person with *active* TB. Most of those who become infected do not manifest any symptoms because the body mounts an appropriate immune response to bring the infection under control; however, those infected display a positive ***187**tuberculin skin test. The infection (sometimes called *latent* TB) can continue for a lifetime, and infected persons remain at risk for developing *active* TB if their immune systems become impaired.

> FN2. Whether a person has *active* TB and is infectious can be determined by analyzing a smear of sputum (a substance expelled from the lungs) by staining the smear (for immediate analysis) or by culturing the bacilli (which can take longer but is more sensitive). Chest x-rays may reveal the presence of disease but not its contagiousness. Glassroth, Robins & Snider, *Tuberculosis in the 1980s*, 302 New Eng.J.Med. 1441-43 (1980). Unless set forth otherwise, the sources for the medical information in this opinion were the expert testimony before me and the contents of U.S. Congress, Office of Technology As-

sessment publication, *The Continuing Challenge of Tuberculosis*, OTA-H-574 (September, 1993).

Typical symptoms of *active* TB include fatigue, loss of weight and appetite, weakness, chest pain, night sweats, fever, and persistent cough. Sputum is often streaked with blood; sometimes massive hemorrhages occur if TB destroys enough lung tissue. Fluid may collect in the pleural cavity. Gradual deterioration occurs. If *active* TB is not treated, death is common.

Only persons with *active* TB are contagious. That active state is usually easily treated through drugs. Typically a short medication protocol will induce a remission and allow a return to daily activities with safety. A failure to continue with medication may lead to a relapse and the development of MDR-TB (multiple drug resistant TB), a condition in which the TB bacilli do not respond to at least two (isoniazid and rifampin) of the primary treatments, so that the active state is not easily cured and contagiousness continues for longer periods.

Death often results because it takes time to grow cultures and to determine the drugs to which the organism is sensitive. By the time that discovery is made, it may be too late, particularly for a person whose immune system has been compromised by a co-morbidity such as HIV disease. For that reason a wide range of drugs, currently four or five, is tried initially while the cultures are grown and sensitivities detected, particularly if MDR-TB is suspected. Once sensitivities are discovered, medication can be adjusted so that ineffective drugs are eliminated and at least two effective drugs are always used. Medical treatment protocols have been established by the United States Centers for Disease Control and Prevention (CDC) and the American Thoracic Society. These protocols are being used for J.S. as they are for all patients under the supervision of New Jersey's Tuberculosis Control Program.

Active TB of the lungs is considered contagious and requires immediate medical treatment, involving taking several drugs. ***188** Usually, after only a few days of treatment, infectiousness is reduced markedly. After two to four weeks of treatment, most people are no longer contagious and cannot transmit TB to others even if they cough or sneeze while living in close quarters. Usually exposure over a prolonged time is required, and less than thirty per cent (30%) of family members living closely with an infected person and unprotected by prophylactic drugs will become infected by the patient with *active* TB. On the other hand, transmission has been known to occur with as little as a single two-hour exposure to coughing, sneezing, etc., of a person with *active* TB. To cure TB, however, continued therapy for six to twelve months may be required. Failure to complete the entire course of therapy risks a relapse and the development of MDR-TB.

MDR-TB results when only some TB bacilli are destroyed and the surviving bacilli develop a resistance to standard drugs and thus become more difficult to destroy. This resistance may involve several drugs and directly results from a patient's failure to complete therapy. There have been no reports of TDR-TB (totally drug resistant TB) in New Jersey, so J.S. can be cured if effective drugs are found in time.

TB is more serious in persons with impaired immune systems, which can result from poor health, chronic abuse of alcohol or ****270** drugs, old age, chemotherapy for cancer, or HIV infection. Such persons are more likely to develop *active* TB if they already harbor the TB bacilli. By way of example, ninety per cent of persons with *latent* TB (these persons are neither sick nor contagious) and with an intact immune system will never develop *active* TB during their entire lives. On the other hand persons with HIV disease with *latent* TB will develop *active* TB at the rate of eight per cent per year.

The human immunodeficiency virus is the cause of acquired immune deficiency syndrome (AIDS). HIV infection weakens the body's natural ability to fight disease. As the immune system deteriorates, those infected with HIV may become clinically ill ***189** with many serious illnesses. These are called opportunistic diseases and include pneumonia, some forms of cancer, fungal and parasitic diseases, certain viral diseases, direct damage to the nervous system, and TB. Persons infected with HIV are at much greater risk of developing active TB if they have latent TB. Once a person with HIV disease develops one of these opportunistic diseases, that person is classified as having AIDS.

New Jersey's statutory scheme for dealing with

TB dates from 1912 when the predecessor to *N.J.S.A.* 30:9-57 was first adopted.[FN3] Only minor amendments have been made since 1917.[FN4]

FN3. The 1912 statute provided: "11. If any person fails to obey any of said rules or regulations ["for the care of persons suffering from tuberculosis, and for the prevention and spread of such disease"], the offender may be committed to the county hospital by any judge of the Court of Common Pleas...." In *L.* 1917, *c.* 172, provisions requiring two days' notice of the time and place of the hearing were required to be served on the person whose commitment was sought.

FN4. *N.J.S.A.* 30:9-57 provides: "A person with communicable tuberculosis who fails to obey the rules or regulations promulgated in accordance with R.S. 26:4-70 by the State Department of Health for the care of tubercular persons and for the prevention of the spread of tuberculosis, or who is an actual menace to the community or to members of his household, may be committed to a hospital or institution, designated by the State Commissioner of Health with the approval of the Commissioner of Human Services for the care and custody of such person or persons by the Superior Court, upon proof of service upon him of the rules and regulations and proof of violation thereafter, or upon proof by the health officer of the municipality in which the person resides, or by the State Commissioner of Health or his authorized representative, that he is suffering from tuberculous, and is an actual menace to the community, or to members of his household. Two days' notice of the time and place of hearing shall in all cases be served upon the person to be committed. Proof of such service shall be made at the hearing. The court may also make such order for the payment for care and treatment as may be proper. The superintendent or person in charge of said hospital or institution to which such person has been committed shall detain said person until the State Commissioner of Health shall be satisfied that the person has recovered to the extent that he will not be a menace to the community or to members of his household or that the person will so conduct himself that he will not constitute such a menace."

This law allows me to enter an order committing a person to a hospital if he or she is "suffering from" TB and "is an actual ***190** menace to the community." Notice of the hearing is required and was provided. Neither the statute nor the implementing regulation, *N.J.A.C.* 8:57-1.10, provides any guidance on the procedures to follow when such applications are made, nor what standards are to be used in issuing such orders. There is no case law in New Jersey providing guidance on these and many other related issues.

The regulatory schemes in other jurisdictions vary widely. Gostin, *Controlling the Resurgent Tuberculosis Epidemic: A 50-State Survey of TB Statutes and Proposals for Reform,* 269 J.Am.Med.Assoc. 255 (1993). There are older schemes like that in New Jersey which provide little or no guidance. There are those that provide detailed procedural details to guarantee due process while still allowing detention, isolation, quarantine, or confinement in the most extreme cases.[FN5]

FN5. Isolation and quarantine are similar. "Isolation" means isolation of the infected while "quarantine" means isolation of the healthy who have been exposed to the infected but who are not yet ill themselves. Confinement and commitment are techniques to accomplish the desired isolation. Detention is a temporary commitment.

New York City's health code amendments, 24 *R.C.N.Y.* § 11.47 (1993), are important because the magnitude of Newark's TB problem****271** is exceeded only by New York City.[FN6] They are also notable because they recognize that other means short of isolation may be available to promote adherence to therapy regimens. They authorize the Commissioner of Health (Commissioner) to order adherence with the threat of isolation only after disobedience to less confining restrictions. 24 *R.C.N.Y.* § 11.47(f)(1)(iii).

FN6. Former HHS Secretary Joseph Califano colorfully describes the synergy of plagues affecting New York City in *Three-Headed Dog from Hell: The Staggering Public Health Threat Posed by AIDS, Substance*

> *Abuse and Tuberculosis*, Wash. Post, December 21, 1992, at A22. The City of Newark has been similarly ravaged.

Procedurally, New York provides for automatic release unless the Commissioner obtains an order permitting continued detention. 24 *R.C.N.Y.* § 11.47(e). Even where a person has not ***191** requested release, court review and approval is required whenever detention may last more than 60 days. *Id.* Periodic judicial review is required in all instances, and the Commissioner must prove by clear and convincing evidence that detention is necessary. *Id.* Details even require assistance for those needing language interpreters and those with hearing or vision impairments. 24 *R.C.N.Y.* § 11.47(h).

Newark's attempt to protect the health of its citizenry is an archetypical expression of police power. *Ogden v. Gibbons*, 22 *U.S.* (9 *Wheat*) 1, 6 *L.Ed.* 23 (1824) (*dicta* that a state has the power "to provide for the health of its citizens" by quarantine). *Cf.*, *Jacobson v. Massachusetts*, 197 *U.S.* 11, 25 *S.Ct.* 358, 49 *L.Ed.* 643 (1905) (compulsory vaccinations upheld against substantive due process challenge because societal interest in health can overcome individual rights). The claim of "disease" in a domestic setting has the same kind of power as the claim of "national security" in matters relating to foreign policy. Both claims are very powerful arguments for executive action. Both claims are among those least likely to be questioned by any other branch of government and therefore subject to abuse. The potential abuse is of special concern when the other interest involved is the confinement of a human being who has committed no crime except to be sick.

[1][2] Due process limits police power. The Fourteenth Amendment requires "that deprivation of life, liberty or property by adjudication be preceded by notice and opportunity for hearing appropriate to the nature of the case." *Mullane v. Central Hanover Trust Co.*, 339 *U.S.* 306, 317, 70 *S.Ct.* 652, 656, 94 *L.Ed.* 865, 873 (1950). The parameters of due process require an analysis of both the individual and governmental interests involved and the consequences and avoidability of the risks of error and abuse. *Mathews v. Eldridge*, 424 *U.S.* 319, 335, 96 *S.Ct.* 893, 903, 47 *L.Ed.*2d 18, 33 (1976). Here the clash of competing interests is at its peak. Hardly any state interest is higher than protecting its citizenry from disease. Hardly any individual interest is higher ***192** than the liberty interest of being free from confinement. The consequences of error and abuse are grave for both the state and the individual.

[3][4][5][6] The United States Supreme Court has recognized that "civil commitment for any purpose constitutes a significant deprivation of liberty that requires due process protection." *Addington v. Texas*, 441 *U.S.* 418, 425, 99 *S.Ct.* 1804, 1809, 60 *L.Ed.*2d 323 (1979). Our Supreme Court in *In re S.L.*, 94 *N.J.* 128, 462 *A.*2d 1252 (1983) had occasion to collect authority on what this meant. A person has the right to notice, counsel, and must be afforded the opportunity to present opposing evidence and argument, and to cross examine witnesses. *In re S.L.*, *supra*, 94 *N.J.* at 137, 462 *A.*2d 1252, citing *Vitek v. Jones*, 445 *U.S.* 480, 100 *S.Ct.* 1254, 63 *L.Ed.*2d 552 (1980). Illness alone cannot be the basis for confinement. *O'Connor v. Donaldson*, 422 *U.S.* 563, 95 *S.Ct.* 2486, 45 *L.Ed.*2d 396 (1975). To justify confinement it must be shown that the person is likely to pose a danger to self or to others. *State v. Krol*, 68 *N.J.* 236, 257, 344 *A.*2d 289 (1975). The proofs must show that there is a "substantial risk of dangerous conduct within the foreseeable future." *Id.*, at 260, 344 *A.*2d 289. These proofs must be shown by clear and convincing evidence. ****272***Addington v. Texas*, *supra*, 441 *U.S.* at 434, 99 *S.Ct.* at 1813, 60 *L.Ed.*2d at 335. The terms of confinement must minimize the infringements on liberty and enhance autonomy. *State v. Krol*, *supra*, 68 *N.J.* at 257-58, 344 *A.*2d 289. Periodic reviews are required. *State v. Fields*, 77 *N.J.* 282, 390 *A.*2d 574 (1978). Lesser forms of restraint must be used when they would suffice to fulfill the government interests. *In re S.L.*, *supra*, 94 *N.J.* at 138, 462 *A.*2d 1252.

Covington v. Harris, 419 *F.*2d 617 (D.C.Cir.1969), held that a court must satisfy itself that there were no less restrictive alternatives available to the "drastic curtailment" of rights inherent in the civil confinement of a person. Quoting *Shelton v. Tucker*, 364 *U.S.* 479, 488, 81 *S.Ct.* 247, 252, 5 *L.Ed.*2d 231 (1960) the court described the following "axiom of due process":

> ***193** Even though the governmental purpose be legitimate and substantial, that purpose cannot be pursued by means that broadly stifle fundamental personal liberties when the end can be more narrowly achieved. The breadth of legislative ab-

ridgement must be viewed in the light of less drastic means for achieving the same basic purpose.

[419 *F.*2d at 623]

Greene v. Edwards, 164 W.Va. 326, 263 *S.E.*2d 661 (1980) is particularly useful in helping to decide the issues here. A writ of habeas corpus was sought following Greene's involuntary confinement pursuant to the West Virginia Tuberculosis Control Act,[FN7] a statute similar to, but more detailed than, *N.J.S.A.* 30:9-57. The West Virginia Department of Health (W.Va. DOH) filed a petition, alleging that Greene was suffering from active TB, was a health menace to others, and needed commitment. Greene was given notice of the hearing but not advised that he was entitled to counsel. Counsel was later appointed, but proceedings continued without a recess to allow Greene an opportunity to confer with his attorney.

FN7. *W.Va.Code* § 26-5A-5 provides: "If such practicing physician, public health officer, or chief medical officer having under observation or care any person who is suffering from tuberculosis in a communicable state is of the opinion that the environmental conditions of such person are not suitable for proper isolation or control by any type of local quarantine as prescribed by the state health department, and that such person is unable or unwilling to conduct himself and to live in such a manner as not to expose members of his family or household or other persons with whom he may be associated to danger of infection, he shall report the facts to the department of health which shall forthwith investigate or have investigated the circumstances alleged. If it shall find that any such person's physical condition is a health menace to others, the department of health shall petition the circuit court of the county in which such person resides, or the judge thereof in vacation, alleging that such person is afflicted with communicable tuberculosis and that such person's physical condition is a health menace to others, and requesting an order of the court committing such person to one of the state tuberculosis institutions. Upon receiving the petition, the court shall fix a date for hearing thereof and notice of such petition and the time and place for hearing thereof shall be served personally, at least seven days before the hearing, upon the person who is afflicted with communicable tuberculosis, and that such person is a source of danger to others, the court shall commit the individual to an institution maintained for the care and treatment of persons afflicted with tuberculosis ..."

***194** Although these proceedings conformed to the explicit statutory requirements, the court granted the petitioner's writ of habeas corpus. The court found that the statutory scheme did not meet due process requirements, which provide that no person shall be deprived of life, liberty, or property without due process of law. *Greene v. Edwards, supra*, 263 *S.E.*2d at 662.

Analogizing Greene's rights to those of a person whose commitment is sought for reasons of an alleged mental illness, the court concluded that, because "liberty is a right of the very highest nature," procedural due process safeguards already granted to those who were mentally ill should be afforded to all persons whose confinement is sought because of TB. It listed Greene's rights:

(1) An adequate written notice detailing the grounds and underlying facts on which commitment is sought; (2) the right to counsel and, if indigent, the right to appointed counsel; (3) the right to be present to cross-examine, to confront, and to represent the witnesses; (4) the standard of proof to be by clear, cogent, and convincing evidence; and (5) the right to a verbatim****273** transcript of the proceedings for purposes of appeal.

[*Greene v. Edwards*, 263 *S.E.*2d at 663].

Greene was not released. The writ was stayed to permit new proceedings in compliance with the listed rights. Similarly, in *State v. Krol, supra*, 68 *N.J.* at 255, 344 *A.*2d 289, while our Supreme Court declared the statutory scheme unconstitutional, it also adopted a set of interim rules, many of which eventually became part of a subsequently enacted statutory scheme for the commitment of the mentally ill. *State v. Krol, supra*, 68 *N.J.* at 255-56, 344 *A.*2d 289.

[7] The ADA also limits discrimination by government. Title II, 42 *U.S.C.A.* § 12131, applies the

ADA to all governmental agencies. "[N]o qualified individual with a disability shall, by reason of such disability, be ... subjected to discrimination by any such entity." 42 *U.S.C.A.* § 12132. At first blush one might not consider involuntary confinements as subject to the ADA. Usually we think of discrimination in employment, housing, schools, transportation, public accommodations and the like. Yet for government***195** to try to confine someone based upon his or her illness alone is as wrongful an act of discrimination as denying him or her a service from government. If public entities are barred from subjecting disabled persons to discrimination, can it be seriously doubted but that they are barred from involuntarily confining them?

Whether someone with TB is disabled was answered by *School Board of Nassau County, Florida v. Arline*, 480 *U.S.* 273, 107 *S.Ct.* 1123, 94 *L.Ed.*2d 307 (1987). In *Arline* the primary issue was whether a person with TB could be considered a "handicapped individual" within the meaning of the Rehabilitation Act of 1973, as amended, 29 *U.S.C.A.* § 701. In the ADA "disability" was used by Congress instead of "handicap" to reflect currently accepted terminology. The ADA's definition of "disability" was intended to be the same as the definition of "handicapped" under the Rehabilitation Act and the Fair Housing Act. "Section-by-Section Analysis" of ADA, 56 *Fed.Reg.* 35,696 (1991). Thus, the *Arline* analysis applies to the ADA.

In *Arline*, a school teacher had latent TB for twenty years but then had three relapses into active TB within two years. Following her last relapse and allegedly fearful of another, the school board fired Ms. Arline. The board claimed that it was concerned about the potential risk to children if she should have another relapse. The United States joined with the school board and argued that the "mere belief that an individual is contagious-whether reasonable or not" justified the exclusion of the handicapped. The argument was that the reason for the discrimination was the fear of contagion rather than the disability. The Supreme Court responded to this argument forcefully:

> We do not agree with petitioners that, in defining a handicapped individual under § 504, the contagious effects of a disease can be meaningfully distinguished from the disease's physical effects on a claimant such as this. Arline's contagiousness and her physical impairment each resulted from the same underlying condition, tuberculosis. It would be unfair to allow an employer to seize upon the distinction between the effects of a disease on others and the effects of a disease on a patient and use that distinction to justify discriminatory treatment.
>
> ***196** Nothing in the legislative history of § 504 suggests that Congress intended such a result. That history demonstrates that Congress was as concerned about the effect of an impairment on others as it was about its effect on the individual.
>
> [480 *U.S.* at 282, 107 S.Ct. at 1128, 94 *L.Ed.*2d at 317]

Allowing fears to justify adverse treatment would render § 504 meaningless and would honor the most appalling prejudice in our society. The Supreme Court explained: "[s]ociety's accumulated myths and fears about disability and disease are as handicapping as are the physical limitations that flow from actual impairment." *Arline, supra*, 480 *U.S.* at 284, 107 *S.Ct.* at 1129, 94 *L.Ed.*2d at 319. Noting the grave problem faced by Ms. Arline, the Court went on to say: "[f]ew aspects of a handicap give rise to the same level of public fear and misapprehension as contagiousness." *Id.* The inability to make ****274** any distinction between a disease and its contagiousness was followed in 28 *C.F.R.* § 35.104 (1993) which explicitly mandates that tuberculosis be deemed a disability under the ADA.

The ADA is remedial legislation designed to eliminate a long history of discrimination. 42 *U.S.C.A.* § 12101. Persons with HIV disease, alcoholism, epilepsy and emotional illness are equally covered, although there are unfounded myths associated with those conditions. While a person currently using illegal drugs is not "disabled," once in a rehabilitation program or once rehabilitated, he or she is covered under the ADA. 42 *U.S.C.A.* § 12114; 28 *C.F.R.* § 35.131(a)(2)(i)-(iii) (1993). A person is covered if that person has a "record" of or is "regarded" as disabled even if there is no actual disability. 42 *U.S.C.A.* § 12102(2)(B) and (C). Thus a person who has no clinical symptoms but is discriminated against because of latent TB is nonetheless protected by the ADA. *Arline, supra*, 480 *U.S.* at 281, 107 *S.Ct.* at 1127, 94 *L.Ed.*2d at 317; 28 *C.F.R.* § 35.104 (1993).

Congress intended the ADA to apply to communicable diseases when it provided that to be protected by the ADA a person must be "qualified" and defined "qualified" as one who does "not pose a direct threat to the health or safety of others ..." 42 *U.S.C.A.* § 12113(b). This standard of "direct threat" means that discrimination***197** is permissible only if necessary to avoid a significant risk to other persons, a risk that cannot be eliminated by a reasonable accommodation. 42 *U.S.C.A.* § 12111(3).

[8] Accordingly, the ADA and its regulations require that a health officer seeking to infringe upon a diseased person's liberty by imposing detention, confinement, isolation or quarantine, must first establish, by clear and convincing evidence, that the person poses a significant risk of transmitting disease to others with serious consequences. This is not materially different from the words of *N.J.S.A.* 30:9-57, which requires proof that J.S. "is an actual menace to the community ..."

[9] While opinions of public health authorities must be respected, their decisions must be based upon the latest knowledge of epidemiology, virology, bacteriology, and public health. No court can substitute its medical judgment for those authorities brought to its attention or by the evidence before it. Public health decisions must be accorded due deference, *Arline, supra*, 480 *U.S.* at 288, 107 *S.Ct.* at 1131, 94 *L.Ed.*2d at 321 ("[C]ourts normally should defer to the reasonable medical judgments of public health officers.") Nonetheless, such deference is not appropriate if those powers are exercised in an "arbitrary, unreasonable" manner. *Jacobson, supra*, 197 *U.S.* at 28, 25 *S.Ct.* at 362, 49 *L.Ed.* at 650. Courts must guard against the risk that governmental action may be grounded in popular myths, irrational fears, or noxious fallacies rather than well-founded science.[FN8]

> FN8. That these fears are real is explained by Susan Sontag in *Illness as Metaphor* (1978), which collected the literature on TB, thought "to be an insidious implacable theft of a life." She explains how the hero's mother in Stendahl's *Armand* (1927) refuses to say "tuberculosis" because she fears that simply uttering the word will make her son sicker. Ms. Sontag explains further that TB has been used as a metaphor for all that is "unqualifiedly and unredeemably wicked.... Hitler, in his first political tract, an anti-semitic diatribe written in September 1919, accused the Jews of producing a 'racial tuberculosis among nations.' " Sontag, *supra*, at 5-7, 9, 13, 15-16, 19, 38, 44, 61-62, 83.
>
> The isolation of the chronically ill and of those perceived to be contagious appears across cultures and centuries, as does the development of complex and often ***198** pernicious mythologies about the nature, cause and transmission of illness. Tuberculosis is no exception.
>
> [*Arline, supra*, 480 *U.S.* at 284, 107 *S.Ct.* at 1129, 94 *L.Ed.*2d at 319, n. 12].

[10][11] The best way to guard against such risks is to demand an individualized, fact-specific determination as to the person under consideration. This is the key to all decision-making under the ADA. As explained by the 11th Circuit decision which *Arline, supra*, affirmed:

> The court is obligated to scrutinize the evidence before determining whether the [government's] justifications reflect a well-****275** informed judgment grounded in careful and open-minded weighing of the risks and the alternatives, or whether they are simply conclusory statements that are being used to justify reflexive reactions grounded in ignorance or capitulation to public prejudice.
>
> [*Arline v. School Board of Nassau County*, 772 *F.*2d 759, 765 (11th Cir.1985).]

Thus proof that this specific person (and not similar persons) poses a significant risk to others, a risk that may not be merely speculative, theoretical, remote or even "elevated," is required. *H.R.Rep. No. 485*, 101st Cong., 2d Sess., pt. III (Report of the Judiciary Committee) at 51 (1989), U.S.Code Cong. & Admin.News 1990, pp. 267, 474. In addition, the least restrictive means should be used to achieve the clearly defined public health goal. This is precisely what, in this context, "reasonable accommodation" means within the ADA. 42 *U.S.C.A.* § 12111(3) (only those significant risks which cannot be eliminated by reasonable accommodation can be considered "direct threats"). "A person who poses a significant risk of communicating an infectious disease to others in the workplace will not be otherwise qualified for his or

her job if reasonable accommodation will not eliminate that risk." *Arline, supra,* 480 *U.S.* at 287, 107 *S.Ct.* at 1131, 94 *L.Ed.*2d at 320, n. 16.

N.J.S.A. 30:4-27.1 to -27.23 was adopted in 1987 to codify much of what *State v. Krol, supra,* 68 *N.J.* 236, 344 *A.*2d 289, *State v. Fields, supra,* 77 *N.J.* 282, 390 *A.*2d 574, and *Addington v. Texas, supra,* 441 *U.S.* 418, 99 *S.Ct.* 1804, 60 *L.Ed.*2d 323, required. That statute provides a comprehensive set of procedures and standards reflecting modern ideas of mental health treatment and modern concepts of constitutional law. *See Senate Revenue, Finance and* ***199** *Appropriations Committee Statement on Assembly Bill No. 1813* (*L.* 1987 *c.* 116).

Some provisions establish procedures to enhance fairness and to reduce the risks of error and abuse. Persons whose confinement is sought must be provided counsel. *R.* 4:74-7(c). Such persons are entitled to adequate notice of the hearing (*N.J.S.A.* 30:4-27.13(a)) and discovery before the hearing. *R.* 4:74-7(d); *N.J.S.A.* 30:4-27.13. The hearing must be held expeditiously to avoid unnecessary confinement. *R.* 4:74-7(i); *N.J.S.A.* 30:4-27.12. The hearing must be held *in camera* if requested to protect privacy interests. *N.J.S.A.* 30:4-27.14e. Prior to the hearing an independent examination paid for by the committing authority must be provided upon request. *R.* 4:74-7(d). The person sought to be confined has the right to be present, to cross-examine witnesses and to present testimony. *N.J.S.A.* 30:4-27.14(b)-(d); *R.* 4:74-7(e). The hearing must be on the record. *R.* 1:2-2. Evidence must be under oath. *N.J.R.E.* 603. Periodic court reviews are mandated. *N.J.S.A.* 30:4-27.16. All proofs must be shown by clear and convincing evidence. *N.J.S.A.* 30:4-27.15a.

[12][13][14][15] There are additional requirements. Illness alone cannot be a basis for involuntary commitment. *In re S.L.* 94 *N.J.* 128, 137-138, 462 *A.*2d 1252 (1983). Persons may not be confined merely because they present a risk of future conduct which is socially undesirable. *State v. Krol, supra,* 68 *N.J.* at 259, 344 *A.*2d 289. A court must find that the risk of infliction of serious bodily injury upon another is probable in the reasonably foreseeable future. *N.J.S.A.* 30:4-27.2i. *State v. Krol, supra,* 68 *N.J.* at 260, 344 *A.*2d 289 explains more. History, actual conduct and recent behaviors must be considered. Dangerous conduct is not the same as criminal conduct. Dangerous conduct involves not merely violations of social norms but significant injury to persons or substantial destruction of property. The evaluation of the risk involves considering the likelihood of dangerous conduct, the seriousness of the harm that would ensue if such conduct took place, and its probability within the reasonably foreseeable future. ***200** A person's past conduct is important evidence of future conduct. If a person is only dangerous with regard to certain individuals, the likelihood of contact with such individuals must be taken into account.

As shown earlier, many commentators have suggested that the most apt analogy for commitments for medical reasons is the model of civil commitments for mental illness. This was the analogy seized upon by the ****276** West Virginia Supreme Court in *Greene, supra,* 263 *S.E.*2d 661. Professor George J. Annas recently similarly referred to the problem of TB:

> The closest legal analogy is provided by court cases that have reviewed the constitutionality of state statutes permitting the involuntary commitment of mental patients on the basis that they have a disease that causes them to be dangerous.
>
> [Annas, *Control of Tuberculosis-The Law and the Public's Health,* 328 New Eng.J. of Med. 585, 586 (1993).]

[16][17][18] It ought not be surprising that whatever may be the source, the conclusion is very much the same. The constitutional concept of due process is designed to prevent irrational discrimination by ensuring a forum that can hear opposing perspectives and by insisting that distinctions are rationally based.

> The decisive consideration where personal liberty is involved is that each individual's fate must be adjudged on the facts of his own case, not on the general characteristics of a "class" to which he may be assigned.
>
> [*State v. Krol, supra,* 68 *N.J.* at 255, 344 *A.*2d 289.]

Similarly, the ADA is designed to avoid the risk of stereotyping, bigotry and prejudice by demanding an individualized determination before any adverse

action is taken against a person with any disability. Finally, New Jersey laws regulating civil commitments are designed to meet due process demands, yet provide a mechanism for these unusual cases where public safety demands commitment.

Gostin also explains the synthesis between constitutional adjudication, the ADA, and the mental illness analogy. Gostin, *supra*, ***201** 289 J.Am.Med.Assoc. at 258-259. He refers to the problem of forcing directly observed therapy (DOT) under the ADA: [FN9]

> FN9. Directly observed therapy (DOT) is a controversial system by which therapy is assured by having medication taken when the patient is directly observed by a health care worker. This can occur by having the worker go to the patient's home or by having the patient come to a treatment site for medication. For patients who no longer have active TB, continued therapy is the true public health goal. In those cases confinement is merely the most extreme and drastic of mechanisms to assure that medicine is taken. Because therapy may only be required two or three times a week, it is easy to understand why confinement is so drastic a remedy.

> Consequently, health departments should use *compulsory* DOT only as a last resort; conceptually, it should be used as a less restrictive alternative to isolation or commitment. Directly observed therapy without the person's consent should be based on an individualized determination that the person is unable or unwilling to comply with the plan of treatment and poses a significant risk of transmission. Generalizations or stereotypes about the person's class or status such as being poor, homeless or a drug user would not provide a sufficient basis for DOT without consent. Objective evidence of noncompliance, such as recent behavior, would be required under the significant risk standard [of the ADA].

[19] Thus, it becomes possible to reconcile public health concerns, constitutional requirements, civil liberties, and the ADA all simultaneously. Good public health practice considers human rights so there is no conflict. Since coercion is a difficult and expensive means to enforce behaviors, voluntary compliance is the public health goal. Compliance is more likely when authorities demonstrate sensitivity to human rights. "Society achieved a precarious understanding in the HIV epidemic that respect for human rights was required in order to protect the public health." Gostin, *supra*, 289 J.Am.Med.Assoc. at 259.

That these interests are reconcilable does not mean that any one case will be easy to reconcile. Any individualized balancing process is a challenge. But it does mean that the principles by which that process is governed can be made clear and without conflict or contradiction. Moreover, to the extent that current laws regarding the commitment of those with TB are so ancient that they fail to meet modern standards of due process or the mandates of the ADA, it is the responsibility of our courts to ***202** ensure that there are procedures to ensure the rights of individuals****277** whose proposed confinement invokes the judicial process. *State v. Krol, supra*, 68 *N.J.* 236, 344 *A.*2d 289; *State v. Fields, supra*, 77 *N.J.* 282, 390 *A.*2d 574; *Greene v. Edwards, supra*, 263 *S.E.*2d 661. There is no need to declare the New Jersey TB control statute (*N.J.S.A.* 30:9-57) unconstitutional so long as it is interpreted to be consistent with the Constitution. There is no reason to find it in violation of the ADA so long as it is interpreted to be consistent with the ADA. It must be remembered that this statute was first enacted in 1912, yet it had provisions requiring notice and a judicial hearing. The statute required proof that the person be "an actual menace to the community or to members of his household." The Legislature intended to permit the confinement of someone with TB but only under circumstances consistent with due process. Many of the rights we now recognize were unheard of in 1912. The ADA did not exist. Declaring the statute unconstitutional and leaving citizens of New Jersey with no shield against the rare person with TB who poses a true significant risk to others would be the true frustration of legislative intent. Therefore I construe *N.J.S.A.* 30:9-57 so as to include those rights necessitated by contemporary standards of due process and by the ADA. Such a construction effectuates the legislative intent.

[20] The first step of the individualized analysis required here is to define precisely what Newark seeks. During the active phase of TB, isolation of J.S., as opposed to confinement or imprisonment, is what is required. If J.S. lived in a college dormitory with other roommates, different quarters would have to be found

for him. If J.S. lived in a private home and could be given a private bedroom or others in the household could be given prophylactic antibiotic therapy, confinement to his own home might be appropriate. J.S. is homeless, and a shelter where he would risk infecting others, including those with impaired immune systems, would probably be the worst place for him to stay. Brudney and Dobkin, *Resurgent Tuberculosis in New York City: ***203** Human Immunodeficiency Virus, Homelessness, and the Decline of Tuberculosis Control Programs*, 144 Am.Rev. of Respiratory Dis. 745 (1991); McAdam, *The Spectrum of Tuberculosis In a New York City Men's Shelter Clinic*, Chest (April, 1990); Torres, et al., *Human Immunodeficiency Virus Infection Among Homeless Men in a New York City Shelter: Association with Mycobacterium Tuberculosis Infection*, 16 Annals of Internal Med. (Oct. 1990).

Because *active* TB can be serious and can be potentially contagious by repeated contact, there are few options for the homeless with *active* TB.[FN10] As Professor Annas said:

> FN10. The defendant has not argued here that some state action has caused his homelessness and put him in the very position that results in the need for confinement. If J.S. would suggest some other alternative to hospitalization that would impose less restrictions but would achieve the same public health objective, then Newark would have the burden of showing why this less restrictive alternative was not selected.

> Although these safeguards [constitutional rights] may seem impressive, in fact the only issues likely to concern a judge in a tuberculosis commitment proceeding are two factual ones: Does the person have active tuberculosis, and does the person present a danger of spreading it to others? Since it is unlikely that any case will be brought by public health officials when the diagnosis is in doubt, the primary issues will be the danger the patient presents to others and the existence of less restrictive alternatives to confinement that might protect the public equally well.
>
> [Annas, *supra*, at 328 New Eng.J. of Med. 586.]

I find that the answers to the questions posed by Professor Annas have been provided by Newark and have been established by clear and convincing evidence. There is no question but that J.S. has active TB. There is no question but that he poses a risk to others who may be in contact with him, particularly in close quarters. Because he is homeless, there is no suggestion of any other place he could stay that would be less restrictive than a hospital.

The hearing I conducted was designed to comport to all the requirements of due process and with all the requirements of a commitment hearing under *N.J.S.A.* 30:4-27.1 ****278** to -27.23. I believe my conclusions also satisfy the ADA and *Arline*, that judicial decisions in this area be based upon, "(a) the nature of the risk ***204** how the disease is transmitted), (b) the duration of the risk (how long is the carrier infectious), (c) the severity of the risk (what is the potential harm to third parties), and (d) the probabilities the disease will be transmitted and will cause varying degrees of harm." 480 *U.S.* at 288, 107 *S.Ct.* at 1131, 94 *L.Ed.*2d at 321.

I find that J.S. presents a significant risk to others unless isolated. Hospital confinement is the least restrictive mode of isolation proposed to me. The only request at this time is that J.S. be confined until he has shown three negative sputum tests [FN11] demonstrating that his TB is no longer active. This is narrow, limited, and very reasonable, but because the time period for treatment is indefinite, I will initially set an initial court review to be held in three weeks, on Tuesday, November 30, 1993, at 1:30 p.m., unless J.S. has earlier been determined to have gone into remission from active TB. In that event J.S. will be released immediately unless Newark seeks confinement for another reason.

> FN11. Confirmed by the opinion of J.S.'s physician that he is clinically improved. This is the long time standard of the CDC *Guideline for the Prevention of TB Transmission in Hospitals*, HHS Publication No. (CDC) 82-8371 at 5 (1982).

At the November 30, 1993, hearing, Newark will have the burden of proving the need for further confinement; however, unless there is a change in condition, I will consider the evidence presented on November 8, 1993 along with whatever updates may be necessary. Only updated information need be presented. If there is no change, then the current order

will likely continue. Obviously J.S. will also have the opportunity to present evidence; however, discovery shall be provided by each side to the other and to me at least one week in advance of the hearing date.

[21] In the interim I will utilize the well-established procedures New Jersey has in place for civil commitments of the mentally ill. *N.J.S.A.* 30:4-27.1 to -27.23; *R.* 4:74-7. Although some procedures may not apply to the confinement of those with contagious diseases like TB, until and unless a more specific law is enacted, the only available and constitutional mechanism is to use ***205** these tested mental health statutes, court rules, and the case law thereunder. This is certainly preferable to declaring *N.J.S.A.* 30:9-57 unconstitutional and leaving no authority whatsoever to fulfill an essential public police power.

Thus, the order of commitment will incorporate by reference the patient's rights as set forth in the laws regarding civil commitments, to the extent feasible and practical. Those provisions relating only to mental health issues need not apply. *N.J.S.A.* 30:4-27.11d(c) explains that rights that are medically contraindicated may be avoided if there are proper written orders by J.S.'s physician. For example, the provisions regarding the opportunities to see visitors must be accomplished according to established hospital procedures for infection control. His right to outdoor activities may have to be curtailed if he refuses to wear his mask. The hospital may not have safe and suitable facilities for extended visits with persons of the opposite sex. I will not interfere with medical judgment, but I will remain available on short notice to resolve any disputes.

[22] Newark also wanted J.S. ordered to provide sputum samples and take his medication as prescribed. The testimony was that a forced sputum sample requires a bronchoscopy, a procedure involving sedation and requiring separate informed consent because of its risks. No facts were shown to justify such a diagnostic procedure where it might cause harm to J.S. As to continued treatment, testimony showed that the medications were quite toxic, dangerous, and some required painful intramuscular administration. J.S. is being asked to take many pills causing numerous side effects, including nausea and pain. The efficacy of the drugs will be unknown until receipt of sensitivity reports.

These facts cannot justify a remedy as broad as Newark seeks. J.S. has the right to refuse treatment even if this is medically unwise. ****279***Matter of Farrell*, 108 *N.J.* 335, 347, 529 *A.*2d 404 (1987) (people have the right of self-determination regarding their own bodies). He must remain isolated until he is no longer contagious. Contagiousness cannot be assessed unless he gives sputum samples.***206** While he can refuse to provide sputum samples and refuse bronchoscopy, his release from isolation may be delayed, as he will be unable to satisfy the conditions of release. The same is true with his refusal to take medication. If he refuses, he may not get better. If J.S. continues to suffer from active TB, he will be unable to satisfy the conditions of release.

[23] On the other hand if J.S. cooperates with his caregivers, provides sputum samples, and takes his medication willingly, then upon his improvement, Newark will have a difficult time proving that he needs confinement because he is not cooperative.[FN12] His in-hospital conduct will go a long way towards demonstrating his ability to follow medical therapy once released and will be considered if after his active TB is cured, J.S.'s confinement is sought because his alleged failure to follow continued therapy will make him a future risk.[FN13] I would then have to consider an order analogous to those permitted under *N.J.S.A.* 30:4-27.15c, which would simply require J.S. to take his medication.[FN14]

FN12. In order to fulfill the requirement of using the least restrictive alternative, public health officials will usually have to show that they attempted step-by-step interventions, beginning with voluntary DOT, supplemented by incentives (*e.g.*, food or money as a reward for taking medication) and enablers (*e.g.*, travel assistance). Commitment is an absolute last resort.

FN13. The CDC in its *Morbidity and Mortality Weekly Report* of February 5, 1993, report on the South Carolina experience, which suggested that "non-adherent" patients can be treated without confinement. On the other hand, the New York City experience shows that "even an approach as intense as confinement does not ensure that patients will be cured."

FN14. This is precisely what subsequently happened here. At the November 30, 1993, review hearing, Newark presented additional expert testimony and J.S.'s updated medical records showing the situation unchanged. But thereafter, J.S. began to take his medication faithfully and his active TB was arrested. On January 10, 1994, J.S. was released from confinement pursuant to a consent order in which he agreed to DOT and agreed to being committed again if he failed to take his medicine. This consent order was approved in open court in J.S.'s presence as there was no longer any need for isolation once he no longer suffered from active TB.

Amendment XIV. Citizenship; Privileges and Immunities; Due Process; Equal Protection; Apportionment of Representation; Disqualification of Officers; Public Debt; Enforcement (Refs & Annos)

➡ AMENDMENT XIV. CITIZENSHIP; PRIVILEGES AND IMMUNITIES; DUE PROCESS; EQUAL PROTECTION; APPOINTMENT OF REPRESENTATION; DISQUALIFICATION OF OFFICERS; PUBLIC DEBT; ENFORCEMENT

Section 1. All persons born or naturalized in the United States, and subject to the jurisdiction thereof, are citizens of the United States and of the State wherein they reside. No State shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States; nor shall any State deprive any person of life, liberty, or property, without due process of law; nor deny to any person within its jurisdiction the equal protection of the laws.

Section 2. Representatives shall be apportioned among the several States according to their respective numbers, counting the whole number of persons in each State, excluding Indians not taxed. But when the right to vote at any election for the choice of electors for President and Vice President of the United States, Representatives in Congress, the Executive and Judicial officers of a State, or the members of the Legislature thereof, is denied to any of the male inhabitants of such State, being twenty-one years of age, and citizens of the United States, or in any way abridged, except for participation in rebellion, or other crime, the basis of representation therein shall be reduced in the proportion which the number of such male citizens shall bear to the whole number of male citizens twenty-one years of age in such State.

Section 3. No person shall be a Senator or Representative in Congress, or elector of President and Vice President, or hold any office, civil or military, under the United States, or under any State, who, having previously taken an oath, as a member of Congress, or as an officer of the United States, or as a member of any State legislature, or as an executive or judicial officer of any State, to support the Constitution of the United States, shall have engaged in insurrection or rebellion against the same, or given aid or comfort to the enemies thereof. But Congress may by a vote of two-thirds of each House, remove such disability.

Section 4. The validity of the public debt of the United States, authorized by law, including debts incurred for payment of pensions and bounties for services in suppressing insurrection or rebellion, shall not be questioned. But neither the United States nor any State shall assume or pay any debt or obligation incurred in aid of insurrection or rebellion against the United States, or any claim for the loss or emancipation of any slave; but all such debts, obligations and claims shall be held illegal and void.

Section 5. The Congress shall have power to enforce, by appropriate legislation, the provisions of this article.

Title 29. Labor
Chapter 16. Vocational Rehabilitation and Other Rehabilitation Services (Refs & Annos)
Subchapter V. Rights and Advocacy (Refs & Annos)

➡ § 794. Nondiscrimination under Federal grants and programs

(a) Promulgation of rules and regulations

No otherwise qualified individual with a disability in the United States, as defined in section 705(20) of this title, shall, solely by reason of her or his disability, be excluded from the participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance or under any program or activity conducted by any Executive agency or by the United States Postal Service. The head of each such agency shall promulgate such regulations as may be necessary to carry out the amendments to this section made by the Rehabilitation, Comprehensive Services, and Developmental Disabilities Act of 1978. Copies of any proposed regulation shall be submitted to appropriate authorizing committees of the Congress, and such regulation may take effect no earlier than the thirtieth day after the date on which such regulation is so submitted to such committees.

(b) "Program or activity" defined

For the purposes of this section, the term "program or activity" means all of the operations of--

(1)(A) a department, agency, special purpose district, or other instrumentality of a State or of a local government; or

(B) the entity of such State or local government that distributes such assistance and each such department or agency (and each other State or local government entity) to which the assistance is extended, in the case of assistance to a State or local government;

(2)(A) a college, university, or other postsecondary institution, or a public system of higher education; or

(B) a local educational agency (as defined in section 7801 of Title 20), system of vocational education, or other school system;

(3)(A) an entire corporation, partnership, or other private organization, or an entire sole proprietorship--

(i) if assistance is extended to such corporation, partnership, private organization, or sole proprietorship as a whole; or

(ii) which is principally engaged in the business of providing education, health care, housing, social services, or parks and recreation; or

(B) the entire plant or other comparable, geographically separate facility to which Federal financial assistance is extended, in the case of any other corporation, partnership, private organization, or sole proprietorship; or

(4) any other entity which is established by two or more of the entities described in paragraph (1), (2), or (3);

any part of which is extended Federal financial assistance.

(c) Significant structural alterations by small providers

Small providers are not required by subsection (a) of this section to make significant structural alterations to their existing facilities for the purpose of assuring program accessibility, if alternative means of providing the services are available. The terms used in this subsection shall be construed with reference to the regulations existing on March 22, 1988.

(d) Standards used in determining violation of section

The standards used to determine whether this section has been violated in a complaint alleging employment discrimination under this section shall be the standards applied under title I of the Americans with Disabilities Act of 1990 (42 U.S.C. 12111 et seq.) and the provisions of sections 501 through 504, and 510, of the Americans with Disabilities Act of 1990 (42 U.S.C. 12201 to 12204 and 12210), as such sections relate to employment.

United States Code Annotated Currentness
Title 42. The Public Health and Welfare
Chapter 126. Equal Opportunity for Individuals with Disabilities (Refs & Annos)
§ 12101. Findings and purpose

(a) Findings

The Congress finds that--

(1) physical or mental disabilities in no way diminish a person's right to fully participate in all aspects of society, yet many people with physical or mental disabilities have been precluded from doing so because of discrimination; others who have a record of a disability or are regarded as having a disability also have been subjected to discrimination;

(2) historically, society has tended to isolate and segregate individuals with disabilities, and, despite some improvements, such forms of discrimination against individuals with disabilities continue to be a serious and pervasive social problem;

(3) discrimination against individuals with disabilities persists in such critical areas as employment, housing, public accommodations, education, transportation, communication, recreation, institutionalization, health services, voting, and access to public services;

(4) unlike individuals who have experienced discrimination on the basis of race, color, sex, national origin, religion, or age, individuals who have experienced discrimination on the basis of disability have often had no legal recourse to redress such discrimination;

(5) individuals with disabilities continually encounter various forms of discrimination, including outright intentional exclusion, the discriminatory effects of architectural, transportation, and communication barriers, overprotective rules and policies, failure to make modifications to existing facilities and practices, exclusionary qualification standards and criteria, segregation, and relegation to lesser services, programs, activities, benefits, jobs, or other opportunities;

(6) census data, national polls, and other studies have documented that people with disabilities, as a group, occupy an inferior status in our society, and are severely disadvantaged socially, vocationally, economically, and educationally;

(7) the Nation's proper goals regarding individuals with disabilities are to assure equality of opportunity, full participation, independent living, and economic self-sufficiency for such individuals; and

(8) the continuing existence of unfair and unnecessary discrimination and prejudice denies people with disabilities

the opportunity to compete on an equal basis and to pursue those opportunities for which our free society is justifiably famous, and costs the United States billions of dollars in unnecessary expenses resulting from dependency and nonproductivity.

(9) Redesignated (8)

(b) Purpose

It is the purpose of this chapter--

(1) to provide a clear and comprehensive national mandate for the elimination of discrimination against individuals with disabilities;

(2) to provide clear, strong, consistent, enforceable standards addressing discrimination against individuals with disabilities;

(3) to ensure that the Federal Government plays a central role in enforcing the standards established in this chapter on behalf of individuals with disabilities; and

(4) to invoke the sweep of congressional authority, including the power to enforce the fourteenth amendment and to regulate commerce, in order to address the major areas of discrimination faced day-to-day by people with disabilities.

Title 42. The Public Health and Welfare
Chapter 126. Equal Opportunity for Individuals with Disabilities (Refs & Annos)
➡ **§ 12102. Definition of disability**

As used in this chapter:

(1) Disability

The term "disability" means, with respect to an individual--

(A) a physical or mental impairment that substantially limits one or more major life activities of such individual;

(B) a record of such an impairment; or

(C) being regarded as having such an impairment (as described in paragraph (3)).

(2) Major life activities

(A) In general

For purposes of paragraph (1), major life activities include, but are not limited to, caring for oneself, performing manual tasks, seeing, hearing, eating, sleeping, walking, standing, lifting, bending, speaking, breathing, learning, reading, concentrating, thinking, communicating, and working.

(B) Major bodily functions

For purposes of paragraph (1), a major life activity also includes the operation of a major bodily function, including but not limited to, functions of the immune system, normal cell growth, digestive, bowel, bladder, neurological, brain, respiratory, circulatory, endocrine, and reproductive functions.

(3) Regarded as having such an impairment

For purposes of paragraph (1)(C):

(A) An individual meets the requirement of "being regarded as having such an impairment" if the individual establishes that he or she has been subjected to an action prohibited under this chapter because of an actual or perceived physical or mental impairment whether or not the impairment limits or is perceived to limit a major life activity.

(B) Paragraph (1)(C) shall not apply to impairments that are transitory and minor. A transitory impairment is an impairment with an actual or expected duration of 6 months or less.

(4) Rules of construction regarding the definition of disability

The definition of "disability" in paragraph (1) shall be construed in accordance with the following:

(A) The definition of disability in this chapter shall be construed in favor of broad coverage of individuals under this chapter, to the maximum extent permitted by the terms of this chapter.

(B) The term "substantially limits" shall be interpreted consistently with the findings and purposes of the ADA Amendments Act of 2008.

(C) An impairment that substantially limits one major life activity need not limit other major life activities in order to be considered a disability.

(D) An impairment that is episodic or in remission is a disability if it would substantially limit a major life activity when active.

(E)(i) The determination of whether an impairment substantially limits a major life activity shall be made without regard to the ameliorative effects of mitigating measures such as--

(I) medication, medical supplies, equipment, or appliances, low-vision devices (which do not include ordinary eyeglasses or contact lenses), prosthetics including limbs and devices, hearing aids and cochlear implants or other implantable hearing devices, mobility devices, or oxygen therapy equipment and supplies;

(II) use of assistive technology;

(III) reasonable accommodations or auxiliary aids or services; or

(IV) learned behavioral or adaptive neurological modifications.

(ii) The ameliorative effects of the mitigating measures of ordinary eyeglasses or contact lenses shall be considered in determining whether an impairment substantially limits a major life activity.

(iii) As used in this subparagraph--

(I) the term "ordinary eyeglasses or contact lenses" means lenses that are intended to fully correct visual acuity or eliminate refractive error; and

(II) the term "low-vision devices" means devices that magnify, enhance, or otherwise augment a visual image.

Constitution of the State of California 1879 (Refs & Annos)
Article I. Declaration of Rights (Refs & Annos)

➡ § 7. Due process and equal protection; pupil school assignment or transportation; privileges and immunities

Sec. 7. (a) A person may not be deprived of life, liberty, or property without due process of law or denied equal protection of the laws; provided, that nothing contained herein or elsewhere in this Constitution imposes upon the State of California or any public entity, board, or official any obligations or responsibilities which exceed those imposed by the Equal Protection Clause of the 14th Amendment to the United States Constitution with respect to the use of pupil school assignment or pupil transportation. In enforcing this subdivision or any other provision of this Constitution, no court of this state may impose upon the State of California or any public entity, board, or official any obligation or responsibility with respect to the use of pupil school assignment or pupil transportation, (1) except to remedy a specific violation by such party that would also constitute a violation of the Equal Protection Clause of the 14th Amendment to the United States Constitution, and (2) unless a federal court would be permitted under federal decisional law to impose that obligation or responsibility upon such party to remedy the specific violation of the Equal Protection Clause of the 14th Amendment of the United States Constitution.

Except as may be precluded by the Constitution of the United States, every existing judgment, decree, writ, or other order of a court of this state, whenever rendered, which includes provisions regarding pupil school assignment or pupil transportation, or which requires a plan including any such provisions shall, upon application to a court having jurisdiction by any interested person, be modified to conform to the provisions of this subdivision as amended, as applied to the facts which exist at the time of such modification.

In all actions or proceedings arising under or seeking application of the amendments to this subdivision proposed by the Legislature at this 1979-80 Regular Session, all courts, wherein such actions or proceedings are or may hereafter be pending, shall give such actions or proceedings first precedence over all other civil actions therein.

Nothing herein shall prohibit the governing board of a school district from voluntarily continuing or commencing a school integration plan after the effective date of this subdivision as amended.

In amending this subdivision, the Legislature and people of the State of California find and declare that this amendment is necessary to serve compelling public interests, including those of making the most effective use of the limited financial resources now and prospectively available to support public education, maximizing the educational opportunities and protecting the health and safety of all public school pupils, enhancing the ability of parents to participate in the educational process, preserving harmony and tranquility in this state and its public schools, preventing the waste of scarce fuel resources, and protecting the environment.

(b) A citizen or class of citizens may not be granted privileges or immunities not granted on the same terms to all citizens. Privileges or immunities granted by the Legislature may be altered or revoked.

West's Annotated California Codes Currentness
Health and Safety Code (Refs & Annos)
Division 2. Licensing Provisions (Refs & Annos)
Chapter 2. Health Facilities (Refs & Annos)
Article 1. General (Refs & Annos)
➡ **§ 1250. Definitions**

As used in this chapter, "health facility" means any facility, place, or building that is organized, maintained, and operated for the diagnosis, care, prevention, and treatment of human illness, physical or mental, including convalescence and rehabilitation and including care during and after pregnancy, or for any one or more of these purposes, for one or more persons, to which the persons are admitted for a 24-hour stay or longer, and includes the following types:

(a) "General acute care hospital" means a health facility having a duly constituted governing body with overall administrative and professional responsibility and an organized medical staff that provides 24-hour inpatient care, including the following basic services: medical, nursing, surgical, anesthesia, laboratory, radiology, pharmacy, and dietary services. A general acute care hospital may include more than one physical plant maintained and operated on separate premises as provided in Section 1250.8. A general acute care hospital that exclusively provides acute medical rehabilitation center services, including at least physical therapy, occupational therapy, and speech therapy, may provide for the required surgical and anesthesia services through a contract with another acute care hospital. In addition, a general acute care hospital that, on July 1, 1983, provided required surgical and anesthesia services through a contract or agreement with another acute care hospital may continue to provide these surgical and anesthesia services through a contract or agreement with an acute care hospital. The general acute care hospital operated by the State Department of Developmental Services at Agnews Developmental Center may, until June 30, 2007, provide surgery and anesthesia services through a contract or agreement with another acute care hospital. Notwithstanding the requirements of this subdivision, a general acute care hospital operated by the Department of Corrections and Rehabilitation or the Department of Veterans Affairs may provide surgery and anesthesia services during normal weekday working hours, and not provide these services during other hours of the weekday or on weekends or holidays, if the general acute care hospital otherwise meets the requirements of this section.

A "general acute care hospital" includes a "rural general acute care hospital." However, a "rural general acute care hospital" shall not be required by the department to provide surgery and anesthesia services. A "rural general acute care hospital" shall meet either of the following conditions:

(1) The hospital meets criteria for designation within peer group six or eight, as defined in the report entitled Hospital Peer Grouping for Efficiency Comparison, dated December 20, 1982.

(2) The hospital meets the criteria for designation within peer group five or seven, as defined in the report entitled Hospital Peer Grouping for Efficiency Comparison, dated December 20, 1982, and has no more than 76 acute care beds and is located in a census dwelling place of 15,000 or less population according to the 1980 federal census.

(b) "Acute psychiatric hospital" means a health facility having a duly constituted governing body with overall ad-

ministrative and professional responsibility and an organized medical staff that provides 24-hour inpatient care for mentally disordered, incompetent, or other patients referred to in Division 5 (commencing with Section 5000) or Division 6 (commencing with Section 6000) of the Welfare and Institutions Code, including the following basic services: medical, nursing, rehabilitative, pharmacy, and dietary services.

(c) "Skilled nursing facility" means a health facility that provides skilled nursing care and supportive care to patients whose primary need is for availability of skilled nursing care on an extended basis.

(d) "Intermediate care facility" means a health facility that provides inpatient care to ambulatory or nonambulatory patients who have recurring need for skilled nursing supervision and need supportive care, but who do not require availability of continuous skilled nursing care.

(e) "Intermediate care facility/developmentally disabled habilitative" means a facility with a capacity of 4 to 15 beds that provides 24-hour personal care, habilitation, developmental, and supportive health services to 15 or fewer persons with developmental disabilities who have intermittent recurring needs for nursing services, but have been certified by a physician and surgeon as not requiring availability of continuous skilled nursing care.

(f) "Special hospital" means a health facility having a duly constituted governing body with overall administrative and professional responsibility and an organized medical or dental staff that provides inpatient or outpatient care in dentistry or maternity.

(g) "Intermediate care facility/developmentally disabled" means a facility that provides 24-hour personal care, habilitation, developmental, and supportive health services to persons with developmental disabilities whose primary need is for developmental services and who have a recurring but intermittent need for skilled nursing services.

(h) "Intermediate care facility/developmentally disabled-nursing" means a facility with a capacity of 4 to 15 beds that provides 24-hour personal care, developmental services, and nursing supervision for persons with developmental disabilities who have intermittent recurring needs for skilled nursing care but have been certified by a physician and surgeon as not requiring continuous skilled nursing care. The facility shall serve medically fragile persons with developmental disabilities or who demonstrate significant developmental delay that may lead to a developmental disability if not treated.

(i)(1) "Congregate living health facility" means a residential home with a capacity, except as provided in paragraph (4), of no more than 12 beds, that provides inpatient care, including the following basic services: medical supervision, 24-hour skilled nursing and supportive care, pharmacy, dietary, social, recreational, and at least one type of service specified in paragraph (2). The primary need of congregate living health facility residents shall be for availability of skilled nursing care on a recurring, intermittent, extended, or continuous basis. This care is generally less intense than that provided in general acute care hospitals but more intense than that provided in skilled nursing facilities.

(2) Congregate living health facilities shall provide one of the following services:

(A) Services for persons who are mentally alert, persons with physical disabilities, who may be ventilator dependent.

(B) Services for persons who have a diagnosis of terminal illness, a diagnosis of a life-threatening illness, or both. Terminal illness means the individual has a life expectancy of six months or less as stated in writing by his or her attending physician and surgeon. A "life-threatening illness" means the individual has an illness that can lead to a possibility of a termination of life within five years or less as stated in writing by his or her attending physician and surgeon.

(C) Services for persons who are catastrophically and severely disabled. A person who is catastrophically and severely

disabled means a person whose origin of disability was acquired through trauma or nondegenerative neurologic illness, for whom it has been determined that active rehabilitation would be beneficial and to whom these services are being provided. Services offered by a congregate living health facility to a person who is catastrophically disabled shall include, but not be limited to, speech, physical, and occupational therapy.

(3) A congregate living health facility license shall specify which of the types of persons described in paragraph (2) to whom a facility is licensed to provide services.

(4)(A) A facility operated by a city and county for the purposes of delivering services under this section may have a capacity of 59 beds.

(B) A congregate living health facility not operated by a city and county servicing persons who are terminally ill, persons who have been diagnosed with a life-threatening illness, or both, that is located in a county with a population of 500,000 or more persons may have not more than 25 beds for the purpose of serving persons who are terminally ill.

(C) A congregate living health facility not operated by a city and county serving persons who are catastrophically and severely disabled, as defined in subparagraph (C) of paragraph (2) that is located in a county of 500,000 or more persons may have not more than 12 beds for the purpose of serving persons who are catastrophically and severely disabled.

(5) A congregate living health facility shall have a noninstitutional, homelike environment.

(j)(1) “Correctional treatment center” means a health facility operated by the Department of Corrections and Rehabilitation, the Department of Corrections and Rehabilitation, Division of Juvenile Facilities, or a county, city, or city and county law enforcement agency that, as determined by the state department, provides inpatient health services to that portion of the inmate population who do not require a general acute care level of basic services. This definition shall not apply to those areas of a law enforcement facility that houses inmates or wards that may be receiving outpatient services and are housed separately for reasons of improved access to health care, security, and protection. The health services provided by a correctional treatment center shall include, but are not limited to, all of the following basic services: physician and surgeon, psychiatrist, psychologist, nursing, pharmacy, and dietary. A correctional treatment center may provide the following services: laboratory, radiology, perinatal, and any other services approved by the state department.

(2) Outpatient surgical care with anesthesia may be provided, if the correctional treatment center meets the same requirements as a surgical clinic licensed pursuant to Section 1204, with the exception of the requirement that patients remain less than 24 hours.

(3) Correctional treatment centers shall maintain written service agreements with general acute care hospitals to provide for those inmate physical health needs that cannot be met by the correctional treatment center.

(4) Physician and surgeon services shall be readily available in a correctional treatment center on a 24-hour basis.

(5) It is not the intent of the Legislature to have a correctional treatment center supplant the general acute care hospitals at the California Medical Facility, the California Men's Colony, and the California Institution for Men. This subdivision shall not be construed to prohibit the Department of Corrections and Rehabilitation from obtaining a correctional treatment center license at these sites.

(k) “Nursing facility” means a health facility licensed pursuant to this chapter that is certified to participate as a provider of care either as a skilled nursing facility in the federal Medicare Program under Title XVIII of the federal Social Security Act or as a nursing facility in the federal Medicaid Program under Title XIX of the federal Social Security

Act, or as both.

(l) Regulations defining a correctional treatment center described in subdivision (j) that is operated by a county, city, or city and county, the Department of Corrections and Rehabilitation, or the Department of Corrections and Rehabilitation, Division of Juvenile Facilities, shall not become effective prior to, or if effective, shall be inoperative until January 1, 1996, and until that time these correctional facilities are exempt from any licensing requirements.

(m) "Intermediate care facility/developmentally disabled-continuous nursing (ICF/DD-CN)" means a homelike facility with a capacity of four to eight, inclusive, beds that provides 24-hour personal care, developmental services, and nursing supervision for persons with developmental disabilities who have continuous needs for skilled nursing care and have been certified by a physician and surgeon as warranting continuous skilled nursing care. The facility shall serve medically fragile persons who have developmental disabilities or demonstrate significant developmental delay that may lead to a developmental disability if not treated. ICF/DD-CN facilities shall be subject to licensure under this chapter upon adoption of licensing regulations in accordance with Section 1275.3. A facility providing continuous skilled nursing services to persons with developmental disabilities pursuant to Section 14132.20 or 14495.10 of the Welfare and Institutions Code shall apply for licensure under this subdivision within 90 days after the regulations become effective, and may continue to operate pursuant to those sections until its licensure application is either approved or denied.

END OF DOCUMENT

CHAPTER 205

An act to repeal Sections 112, 114, 252.6, 252.7, 301, 375, 376, 377, 401, 451.5, 453, 455, 478, 486, 505, 506, 507, 508, 509, 28477, and 28714, and Article 7 (Sections 410-414, inclusive) of Chapter 2 of Part 1 of Division 1; Article 3 (Sections 491-493, inclusive) of Chapter 1 of Part 2 of Division 1; Chapter 4 (Sections 800-811, inclusive) of Part 2 of Division 1, Chapters 1 (Sections 1700-1703, inclusive) and 6 (Sections 2500-2603, inclusive) of Division 3, Division 4 (Sections 3099-3342, inclusive), Division 16 (Sections 21000-21409, inclusive), and Chapter 3 (Sections 24380-24385, inclusive) of Division 20, of the Health and Safety Code; to amend and renumber Sections 116, 204, 212, 302, 303, and 304 of said code; to amend Sections 211, 300, 374, 400, 450, 500, 502, 1602, 1603, 1605, 1622, 3701, 3702, 3801, 3901, 3954, 4001, 4002, 25003, 26235, 26366.5, 26472, 26541, 26542, 26586.5, 28224, and 28295, and the title of Article 3, Chapter 2, Part 1, Division 1, and the title of Article 5, Chapter 2, Part 1, Division 1, and the title of Division 3, of said code; to add Article 7 (Section 410) to Chapter 2, Part 1, Division 1, Chapter 6 (Sections 1685 and 1686) to Division 2, Division 4 (Sections 3000-3355, inclusive), to said code; relating to the preservation of the public health and safety, including the health and safety of persons, the custody and disposition of dead bodies, the safety and protection of property, and matters incidental thereto.

(Prepared pursuant to Senate Resolution 101, General Session of 1955, to revise and consolidate the public health statutes.)

In effect September 11, 1957

[Approved by Governor April 23, 1957. Filed with Secretary of State April 24, 1957.]

The people of the State of California do enact as follows:

Repeals

SECTION 1. Sections 112, 114, 252.6, 252.7, 301, 375, 376, 377, 401, 451.5, 453, 455, 478, 486, 505, 506, 507, 508, 509, 28477, and 28714, and Article 7 (Sections 410-414, inclusive) of Chapter 2 of Part 1 of Division 1, Article 3 (Sections 491-493, inclusive) of Chapter 1 of Part 2 of Division 1, Chapter 4 (Sections 800-811, inclusive) of Part 2 of Division 1, Chapters 1 (Sections 1700-1703, inclusive) and 6 (Sections 2500-2603, inclusive) of Division 3, Division 4 (Sections 3099-3342, inclusive), Division 16 (Sections 21000-21409, inclusive), and Chapter 3 (Sections 24380-24385, inclusive) of Division 20, of the Health and Safety Code are repealed.

SEC. 2. Section 204 of the Health and Safety Code is renumbered and amended to read:

Biological products

375. It may prepare or purchase biological products and distribute them at cost.

SEC. 3. Section 211 of said code is amended to read:

Special investigations

211. It shall cause special investigations of the sources of morbidity and mortality and the effects of localities, employ-

ments, conditions and circumstances on the public health and it shall perform such other duties as may be required in procuring information for state and federal agencies regarding the effects of these conditions on the public health.

SEC. 4. Section 116 of said code is amended and renumbered to read:

213. With the approval of the Department of Finance, and for use in the furtherance of the work of the State Department of Public Health, the director may accept (a) grants of interest in real property, and (b) gifts of money from public agencies or from organizations or associations organized for scientific, educational or charitable purposes. Gifts

SEC. 5. The title of Article 3, Chapter 2, Part 1, Division 1, of said code is amended to read:

Article 3. Child Health

SEC. 5.5. Section 300 of said code is amended to read:

300. The State Department of Public Health shall maintain a program of child health. Child health program

SEC. 6. Section 302 of said code is renumbered and amended to read:

301. The department may investigate, and disseminate educational information relating to, conditions affecting the health of the children of this State. Same· Powers

SEC. 6.1. Section 303 of said code is renumbered and amended to read:

302. This article does not give the department power to force compulsory medical or physical examination of children Same Limitation

SEC. 6.2. Section 304 of said code is renumbered and amended to read:

303. Upon request the department shall advise all public officers, organizations, and agencies interested in the health and welfare of children in the State. Same· Advisory function

SEC. 6.3. The title of Article 5, Chapter 2, Part 1, Division 1, of said code is amended to read:

Article 5. Laboratory

SEC. 7. Section 374 of said code is amended to read:

374. The State Department of Public Health shall maintain a laboratory and such branch laboratories as may be necessary to perform the microbiological, physical and chemical analyses required to meet the responsibilities of the department. Laboratory

SEC. 8. Section 400 of said code is amended to read:

400. The State Department of Public Health shall maintain a program of sanitary engineering. Sanitary engineering

SEC. 9. Article 7, comprising Section 410, is added to Chapter 2 of Part 1 of Division 1 of said code, to read:

Article 7. Epilepsy

Epilepsy reports

410. The State Department of Public Health shall define epilepsy for the purposes of the reports hereinafter referred to:

(1) All physicians shall report immediately to the local health officer in writing, the name, age, and address of every person diagnosed as a case of epilepsy or similar disorders characterized by lapses of consciousness.

(2) The local health officer shall report in writing to the state department the name, age, and address, of every person reported to it as a case of epilepsy.

(3) The state department shall report to the State Department of Motor Vehicles the names, ages, and addresses, of all persons reported as cases of epilepsy by the physicians and local health officers.

(4) Such reports shall be for the information of the State Department of Motor Vehicles in enforcing the provisions of the Vehicle Code of California, and shall be kept confidential and used solely for the purpose of determining the eligibility of any person to operate a motor vehicle on the highways of this State.

SEC. 10. Section 450 of said code is amended to read:

County health ordinances, etc.

450 The board of supervisors of each county shall take such measures as may be necessary to preserve and protect the public health in the unincorporated territory of the county, including, if indicated, the adoption of ordinances, regulations and orders not in conflict with general laws, and provide for the payment of all expenses incurred in enforcing them.

SEC. 11. Section 500 of said code is amended to read:

City ordinances, etc.

500. The governing body of a city shall take such measures as may be necessary to preserve and protect the public health, including the regulation of sanitary matters in the city, and including if indicated, the adoption of ordinances, regulations and orders not in conflict with general laws.

SEC. 12. Section 502 of said code is amended to read:

Health officer

502. Every governing body of a city shall appoint a health officer, except when the city has made other arrangements, as specified in this code, for the county or district health officer to exercise the same powers and duties within the city, as are conferred upon health officers thereof by law.

SEC. 13. Section 212 of said code is amended and renumbered to read:

Safety and sanitation standards

1422. Notwithstanding the provisions of Section 1415 of this code, with the exception of subdivision (c) thereof, the state department shall prescribe, promulgate and enforce minimum standards of safety and sanitation in the physical plant, and of diagnostic, therapeutic and laboratory facilities for public medical institutions, other than federal medical institutions, University of California hospitals, and clinics, and other than institutions for mental disease, and all of such public medical institutions shall be subject to the provisions of Chapter 2 of Division 2 of the Health and Safety Code.

This section shall be operative only during such times as the Federal Social Security Act and the rules of the Department of Health, Education and Welfare promulgated thereunder require that such standards shall be established and maintained in order for this State to receive reimbursement from the Federal Government for public assistance payments made to or in behalf of patients in public medical institutions.

SEC. 14. Section 1602 of said code is amended to read:

Biologics. Distributors

1602. No person shall distribute biologics produced other than:

(a) In a laboratory licensed by the United States Department of Health, Education and Welfare, Public Health Service.

(b) In a laboratory licensed by the United States Department of Agriculture, Agricultural Research Service, Animal Inspection and Quarantine Branch.

(c) Under the provisions of this chapter.

SEC. 15. Section 1603 of said code is amended to read:

Same. Storage, etc

1603. The state department shall make rules and regulations governing the storage and transportation of all biologics by whomsoever produced and governing the production, standards of potency and truthful advertising of all biologics except those produced under license from any of the following:

(a) United States Department of Health, Education and Welfare, Public Health Service.

(b) United States Department of Agriculture, Agricultural Research Service, Animal Inspection and Quarantine Branch.

SEC. 16. Section 1605 of said code is amended to read:

Same Licensing

1605. No person shall engage in the business of preparing biologics in this State, except under a license issued by the state department or the United States Department of Health, Education and Welfare, Public Health Service or the United States Department of Agriculture, Agricultural Research Service, Animal Inspection and Quarantine Branch.

SEC. 17. Section 1622 of said code is amended to read:

Exceptions

1622. Nothing in this chapter shall be considered to be in conflict with Division 21, Chapter 2, of this code and all provisions of Division 21, Chapter 2, shall apply to biologics within the meaning of this chapter, except that the provisions of such chapter of such division shall not apply to products of:

(a) A laboratory licensed by the United States Department of Health, Education and Welfare, Public Health Service.

(b) A laboratory licensed by the United States Department of Agriculture, Agricultural Research Service, Animal Inspection and Quarantine Branch.

SEC. 18. Chapter 6, consisting of Sections 1685 and 1686, is added to Division 2 of said code, to read:

CHAPTER 6. AUDIOMETRISTS

Employment by city, etc.

1685. The governing body of a city, county, city and county or school district may employ one or more school audiometrists, each of whom shall be registered with the State Board of Public Health and possess such qualifications as

may at the date of registration be prescribed by the said state board.

The school audiometrist shall give audiometric tests with instruments meeting the standards established by the American Standards Association. Subject to Section 16483 of the Education Code, such tests may be administered to school and preschool children in school buildings and other places as are or may be used by schools for otologic examinations, and in official public health otological diagnostic clinics.

Registration. Certificates

1686. The State Board of Public Health shall, subject to the provisions of Section 1685, issue certificates of registration to school audiometrists. The said state board shall prescribe such qualifications as may be necessary for the testing of the hearing of school children.

Candidates for registration who present evidence of satisfactory experience of at least two years in the testing of hearing of school children in public or parochial schools or other tax maintained institutions of this State, or who present evidence of having satisfactorily completed a course in audiometry in a recognized university, college or institute in this State, may be issued certificates of registration without further examination.

The said state board shall require a registration fee not to exceed three dollars ($3).

SEC. 19. The title of Division 3 of said code is amended to read:

DIVISION 3. PEST ABATEMENT

SEC. 20. Division 4, comprising Sections 3000 to 3355, inclusive, is added to said code, to read:

DIVISION 4. COMMUNICABLE DISEASE PREVENTION AND CONTROL

CHAPTER 1. GENERAL PROVISIONS AND DEFINITIONS

"Health officer"

3000. "Health officer," as used in this division, includes county, city, and district health officers, and city and district health boards, but does not include advisory health boards.

"Venereal diseases"

3001. As used in this division, "venereal diseases" means syphilis, gonorrhea, chancroid, lymphopathia venereum, and granuloma inguinale.

CHAPTER 2. FUNCTIONS OF STATE DEPARTMENT

Quarantine Places

3050. The state department may establish and maintain places of quarantine or isolation.

Same Persons, etc.

3051. The state department may quarantine, isolate, inspect, and disinfect persons, animals, houses, rooms, other property, places, cities, or localities, whenever in its judgment such action is necessary to protect or preserve the public health.

Destruction of contaminated objects, animals, etc

3052. The state department may destroy such objects as bedding, carpets, household goods, furnishings, materials, clothing, or animals, when ordinary means of disinfection are considered unsafe, and when the property is in its judgment, an imminent menace to the public health.

Investigation

3053. Upon being informed by a health officer of any contagious, infectious, or communicable disease the state department may take such measures as are necessary to ascertain the nature of the disease and prevent its spread. To that end, the state department may, if it considers it proper, take possession or control of the body of any living person, or the corpse of any deceased person.

Chapter 3. Functions of Health Officers

Prevention of epidemic or recurrence

3110. Each health officer knowing or having reason to believe that any case of the diseases made reportable by regulation of the Board of Public Health, or any other contagious, infectious or communicable disease exists, or has recently existed, within the territory under his jurisdiction, shall take such measures as may be necessary to prevent the spread of the disease or occurrence of additional cases.

Orders, etc., of state department

3111. Each health officer shall enforce all orders, rules, and regulations concerning quarantine or isolation prescribed or directed by the state department.

Quarantine Places

3112. Each health officer, whenever required by the state department, shall establish and maintain places of quarantine or isolation that shall be subject to the special directions of the state department.

Limitation

3113. No quarantine shall be established by a county or city against another county or city without the written consent of the state department.

State department directives

3114. Whenever in the judgment of the state department it is necessary for the protection or preservation of the public health, each health officer shall, when directed by the state department, do the following:

(a) Quarantine or isolate and disinfect persons, animals, houses or rooms, in accordance with general and specific instructions of the state department.

(b) Destroy bedding, carpets, household goods, furnishings, materials, clothing, or animals, when ordinary means of disinfection are considered unsafe, and when the property is, in the judgment of the state department, an imminent menace to the public health.

When the property is destroyed pursuant to this section, the governing body of the locality in which the destruction occurs may make adequate provision for compensation in proper cases for those injured thereby.

Strict isolation, etc

3115. Upon receiving information of the existence of contagious, infectious, or communicable disease for which the state department may from time to time declare the need for strict isolation or quarantine, each health officer shall:

(a) Insure the adequate isolation of each case, and appropriate quarantine of the contacts and premises

(b) Follow local rules and regulations, and all general and special rules, regulations, and orders of the state department, in carrying out the quarantine or isolation.

3116. When quarantine or strict isolation is established by a health officer, all persons shall obey his rules, orders, and regulations.

Persons

3117. A person subject to quarantine or strict isolation, residing or in a quarantined building, house, structure, or other shelter, shall not go beyond the lot upon which the building, house, structure, or other shelter is situated, nor put himself in immediate communication with any person not subject to quarantine, other than the physician, the health officer or persons authorized by the health officer.

Schools

3118. No instructor, teacher, pupil, or child who resides where any contagious, infectious, or communicable disease exists or has recently existed, which is subject to strict isolation or quarantine of contacts, shall be permitted by any superintendent, principal, or teacher of any college, seminary, or public or private school to attend the college, seminary, or school, except by the written permission of the health officer.

Raising of quarantine

3119. No quarantine shall be raised until every exposed room, together with all personal property in the room, has been adequately treated, or, if necessary, destroyed, under the direction of the health officer; and until all persons having been under strict isolation are considered noninfectious.

Diseases transmitted by milk, dairies, etc.

3120. When there occurs in the household of any dairy worker, milkman, milk dealer, milk distributor, creamery worker, or pasteurizing plant operator, a case or a suspected case of diphtheria, salmonellosis, shigellosis (dysentery), typhoid fever, streptococcal infection, or any other disease known to be or suspected of being transmitted by milk, the sale or distribution of milk from those premises shall be prohibited unless written authorization for its sale or distribution is given by the health officer.

A case or suspected case of any disease known to be transmitted by milk which occurs in the household of any of the above-mentioned persons, shall be reported immediately to the health officer.

Reports Epidemic

3121. In the case of a local epidemic of disease, the health officer shall report at such times as are requested by the state department all facts concerning the disease, and the measures taken to abate and prevent its spread.

Diseases

3122. Each health officer shall immediately report by telegraph or telephone to the state department every discovered or known case or suspect case of those diseases designated for immediate reporting by the state department. Within 24 hours after investigation each health officer shall make such reports as the state department may require.

Quarantine, etc State department rules

3123. The state department may establish a list of reportable diseases and this list may be changed at any time by the

state department. Those diseases listed as reportable shall be properly reported as required to the state department by the health officer.

The state department may from time to time adopt and enforce rules and regulations requiring isolation (strict or modified) or quarantine for any of the contagious, infectious, or communicable diseases if in the opinion of the state department such action is necessary for the protection of the public health.

The health officer may require isolation (strict or modified) or quarantine for any case of contagious, infectious, or communicable disease when such action is necessary for the protection of the public health.

Reports Health officer

3124. Each health officer, other than a county health officer, in the county shall transmit to the county health officer at least weekly in writing a report showing the number and character of infectious, contagious, or communicable diseases reported, and their location.

Physician, etc

3125. All physicians, nurses, clergymen, attendants, owners, proprietors, managers, employees, and persons living, or visiting any sick person, in any hotel, lodginghouse, house, building, office, structure, or other place where any person is ill of any infectious, contagious, or communicable disease, shall promptly report that fact to the health officer, together with the name of the person, if known, the place where he is confined, and the nature of the disease, if known.

CHAPTER 4. VENEREAL DISEASE

Article 1. Prevention and Control

Program

3180. The state department shall develop and review plans and provide leadership and consultation for, and participate in, a program for the prevention and control of venereal disease.

Department cooperation with physicians, etc

3181. The state department shall cooperate in the prevention, control, and cure of venereal diseases with physicians and surgeons; medical schools: public and private hospitals, dispensaries, and clinics; public and private school, college and university authorities; penal and charitable institutions; reform and industrial schools; detention homes; federal, state, local and district health officers, and boards of health, and all other health authorities; institutions caring for the mentally ill; and with any other persons, institutions, or agencies.

Investigations, etc

3182. The state department shall investigate conditions affecting the prevention and control of venereal diseases and approved procedures for such prevention and control, and shall disseminate educational information relative thereto.

Education and publicity

3183. The state department shall conduct such educational and publicity work as it may deem necessary; and, from time to time, shall cause to be issued, free of charge, copies of such rules and regulations, pamphlets, and other literature as it deems reasonably necessary.

Clinics, etc. 3184. The state department may establish, maintain, and subsidize clinics, dispensaries, and prophylactic stations for the diagnosis, treatment, and prevention of venereal diseases, and may provide medical, advisory, financial, or other assistance to such clinics, dispensaries, and stations as may be approved by it. No clinic, dispensary, or prophylactic station shall be approved unless it meets the requirements of the board and complies with its rules and regulations.

Rural counties and cities 3185. The state department may furnish treatment for a case or for a group of cases in rural counties or cities upon the recommendation of the local health officer if adequate facilities for such treatment are not available in the county or city.

Acute cases 3186. Any state agency conducting a public hospital shall admit acute venereal disease cases, when, in the opinion of the state department or the local health officer having jurisdiction, persons infected with venereal disease may be a menace to public health.

Physician to submit specimen 3187. The state department may require any physician in attendance on a person infected or suspected of being infected with a venereal disease infection to submit such specimens as may be designated for examination, when in its opinion such procedure is reasonably necessary to carry out the provisions and purposes of this article.

Place of examinations 3188. The examination may be made in the state laboratory or in a local public health laboratory designated by the state department or in a clinical laboratory which is under the immediate supervision and direction of a clinical laboratory technologist or a licensed physician and surgeon

Additional examination 3189. Nothing in this article limits any person's freedom to have additional examinations made elsewhere than specified in this article.

Diseased persons information 3190. Every diseased person shall give all information required by this article, including the name and address of any person from whom the disease may have been contracted and to whom the disease may have been transmitted.

Periodic examination 3191. Every diseased person shall from time to time submit to approved examinations to determine the condition of the disease.

Control measures 3192. If any person subject to proper venereal disease control measures discontinues any control procedure required by this article, the agency administering the procedure prior to such discontinuance shall make reasonable efforts to determine whether such person is continuing to comply with the procedure elsewhere.

Report of cases failing to comply 3193. If it appears reasonably likely that such person is not complying with such procedure elsewhere, the agency which was administering the procedure prior to the discontinuance shall make all reasonable efforts to induce such person to comply; and if it thereafter appears reasonably likely that he has failed to comply, shall report his name and address to

the local health officer or board of health, or to the state department where there is no such local health officer or board.

Local health officers

3194. It is the duty of the local health officers to use every available means to ascertain the existence of cases of infectious venereal diseases within their respective jurisdictions, to investigate all cases that are not, or probably are not, subject to proper control measures approved by the board, to ascertain so far as possible all sources of infection, and to take all measures reasonably necessary to prevent the transmission of infection.

Inspection and quarantine

3195. Local health officers may inspect and quarantine any place or person when such procedure is necessary to enforce the rules and regulations of the board or the state department.

Prosecution by district attorney

3196 It is the duty of the district attorney of the county in which a violation of this article may occur to prosecute the person accused of the violation.

Competent testimony

3197. In any prosecution for a violation of any provision of this article, or any rule or regulation of the board made pursuant to this article, or in any quarantine proceeding authorized by this article, or in any habeas corpus or other proceeding in which the legality of such quarantine is questioned, any physician, health officer, spouse, or other person shall be competent and may be required to testify against any person against whom such prosecution or other proceeding was instituted, and the provisions of subsections 1 and 4 of Section 1881 of the Code of Civil Procedure shall not be applicable to or in any such prosecution or proceeding.

Violations Misdemeanor

3198. Any person who refuses to give any information to make any report, to comply with any proper control measure or examination, or to perform any other duty or act required by this article, or who violates any provision of this article or any rule or regulation of the state board issued pursuant to this article, or who exposes any person to or infects any person with any venereal disease; or any person infected with a venereal disease in an infectious state who knows of such condition and who marries or has sexual intercourse, is guilty of a misdemeanor.

Exception

3199. Nothing in this article shall be construed to interfere with the freedom of any adherent of teachings of any well-recognized religious sect, denomination, or organization to depend exclusively upon prayer for healing in accordance with the teachings of such religious sect, denomination, or organization. Any such person, along with any person treating him, shall be exempt from all provisions of this article regarding venereal diseases, except that the provisions of this code and the rules and regulations of the board regarding compulsory reporting of communicable diseases and the quarantine of such diseases, and regarding callings in which a person with venereal disease may not engage, shall apply.

Article 2. Prenatal Syphilitic Tests

"Approved laboratory"

3220. "Approved laboratory" as used in this article means a laboratory approved by the state department, or any other laboratory the director of which is licensed by the state department according to law.

"Standard laboratory blood test"

3221. "Standard laboratory blood test" as used in this article means a test for syphilis approved by the state department.

Blood specimen

3222. Every licensed physician and surgeon or other person engaged in prenatal care of a pregnant woman, or attending such woman at the time of delivery, shall obtain or cause to be obtained a blood specimen of such woman at the time of the first professional visit or within 10 days thereafter.

Submission for test

3223. The blood specimen thus obtained shall be submitted to an approved laboratory for a standard laboratory test for syphilis.

Designation of specimen

3224. In submitting a specimen to a laboratory the physician shall designate it as a prenatal test or a test following recent delivery.

Report form

3225. The state department shall issue a "prenatal test laboratory report form" to be distributed upon application to all laboratories approved to do tests required by this article.

Same: Triplicate copies

3226. Any laboratory doing a test required by this article shall prepare the report in triplicate.

The original shall be transmitted by the laboratory doing the test to the physician submitting the specimen.

The duplicate shall be forwarded at weekly intervals to the state department.

The triplicate shall be retained by the laboratory in its file, and shall be open at any time for inspection by an authorized representative of the state department.

Reports confidential

3227 All laboratory reports are confidential, and are not open to public inspection.

Accuracy of test

3228. In case of question concerning the accuracy of a test required by this article, it is mandatory upon the state department to accept specimens for checking purposes from any district in the State.

Violation Misdemeanor

3229. Any licensed physician and surgeon, or other person engaged in attendance upon a pregnant woman or a recently delivered woman, or any representative of a laboratory who violates any provision of this article, is guilty of a misdemeanor. However, a licensed physician and surgeon, or other person engaged in attendance upon a pregnant or recently delivered woman, whose request for a specimen is refused, is not guilty of a misdemeanor for failure to obtain it.

CHAPTER 5. TUBERCULOSIS

Program

3279. The department shall maintain a program for the control of tuberculosis and shall administer the funds made available by the State for the care of tuberculosis patients.

Pulmonary tuberculosis: Proper expenses

3280. Pulmonary tuberculosis is an infectious and communicable disease, dangerous to the public health, and all proper expenditures that may be made by any county, pursuant to this chapter, are necessary for the preservation of the public health of the county.

Health officer

3285. Each health officer is hereby directed to use every available means to ascertain the existence of, and immediately to investigate, all reported or suspected cases of tuberculosis in the infectious stages within his jurisdiction and to ascertain the sources of such infections. In carrying out such investigations, each health officer is hereby invested with full powers of inspection, examination and quarantine or isolation of all persons known to be infected with tuberculosis in an infectious stage and is hereby directed:

(a) To make such examinations as are deemed necessary of persons reasonably suspected of having tuberculosis in an infectious stage and to isolate or isolate and quarantine such persons, whenever deemed necessary for the protection of the public health.

(b) Follow local rules and regulations, and all general and special rules, regulations, and orders of the state department in carrying out such quarantine or isolation.

(c) Whenever the health officer shall determine that quarantine or isolation in a particular case is necessary for the preservation and protection of the public health, he shall make an isolation or quarantine order in writing, setting forth the name of the person to be isolated, the period of time during which the order shall remain effective, the place of isolation or quarantine, and such other terms and conditions as may be necessary to protect the public health.

(d) Upon the making of an isolation or quarantine order as provided in this section, a copy of such order shall be served upon the person named in such order.

(e) Upon the receipt of information that any quarantine or isolation order, made and served as herein provided, has been violated, the health officer shall advise the district attorney of the county in which such violation has occurred, in writing, and shall submit to such district attorney the information in his possession relating to the subject matter of such isolation or quarantine order, and of such violation or violations thereof.

Exception

3286. No examination or inspection shall be required of any person who depends exclusively on prayer for healing in accordance with the teachings of any well recognized religious sect, denomination or organization and claims exemption on such ground, except that the provisions of this code regarding compulsory reporting of communicable diseases and isolation and quarantine shall apply where there is probable cause to suspect that such person is infected with the disease in a communicable stage. Such person shall not be required to submit to any medical treatment, or to go to or be confined in a hospital or other medical institution; provided, he can be safely

quarantined and/or isolated in his own home or other suitable place of his choice.

Records

3287. The department may inspect and have access to all records of all institutions and clinics, both public and private, where tuberculosis patients are treated.

Advice

3288. The department may advise officers of state educational, correctional, and medical institutions regarding the control of tuberculosis and the care of tuberculosis patients.

Subsidy

3294. Each city, county, or group of counties may establish and maintain a tuberculosis ward, hospital, or sanatorium for the treatment of persons suffering from tuberculosis. Each city or county that establishes and maintains a tuberculosis ward, hospital, or sanatorium shall receive from the State the sum provided in Section 3300, and each county that participates jointly with one or more other counties in the establishment and maintenance of a tuberculosis ward, hospital, or sanatorium shall receive from the State the sum specified in Section 3300, for persons suffering from tuberculosis, cared for therein at public expense, who are unable to pay for their support and who have no relatives legally liable and financially able to pay for their support; except that the city or county is not entitled to receive this state aid unless the tuberculosis ward, hospital, or sanatorium conforms to the regulations of and is approved by the state department.

Pay patients

The hospitals shall be allowed to receive pay patients.

Leased facilities for violation of order

3295. The state department shall lease any facilities it deems necessary to care for persons afflicted with active contagious tuberculosis who violate the quarantine or isolation orders of the health officer as provided in Section 3351 of the Health and Safety Code. The county referring such person for such care shall not be eligible to receive subsidy for such person under the provisions of this chapter, and the State shall deduct from the subsidy payments to be made to such county an amount computed at the rate of three dollars ($3) for each patient-day the person is cared for in such facility.

Burial expenses

3296. Whenever any person confined in any state institution, as provided in Section 3351 of this code, subject to the jurisdiction of the Director of Corrections, dies, and any personal funds or personal property of such person remains in the hands of the Director of Corrections, such funds may be applied in an amount not exceeding three hundred dollars ($300) to the payment of expenses relating to burial; provided, however, that if no such funds are available, the State Department of Public Health shall reimburse the Director of Corrections for such expenses in an amount not exceeding three hundred dollars ($300).

Release

3297. If the place of confinement of a person confined under the provisions of Section 3351 is in a county other than the county in which he was convicted, upon release he shall be released in the custody of the sheriff of the county in which he was convicted, and the sheriff shall forthwith return him to the place where he was convicted. The sheriff shall prior to the

return of the person notify the health officer having jurisdiction of the area to which he will be returned of the date he will reach said area.

State aid for city or county

3298. Each city or county shall receive from the State the sum provided in Section 3300 of this code for each person suffering from tuberculosis, cared for at public expense in private hospitals or sanatoriums under contract with the city or county or who is unable to pay for his support and who has no relative legally liable and financially able to pay for his support; except that the city or county is not entitled to receive this state aid unless the tuberculosis ward, hospital or sanatorium conforms to the regulations of and is approved by the state department.

The hospitals and sanatoriums shall be allowed to receive pay patients.

Subsidy report

3299. The medical superintendent of each hospital for which state aid is received under this chapter shall render semiannually to the state department a report under oath showing, for the period covered by the report:

(a) The number of patients suffering from tuberculosis cared for at public expense, and unable to pay for care.

(b) The number of days of treatment of each such patient.

In the case of hospitals, wards, or sanatoriums operated jointly by two or more counties, the patients whose admission and care have been authorized by each county shall be reported separately.

Patient exchange

With the consent of the respective cities, counties, or groups of counties, an exchange of patients may be arranged without expense to the county except for transportation when the exchange seems necessary or desirable to assist in the patients' recovery.

County contract

Counties may contract for the care and treatment of tuberculosis patients through their boards of supervisors, after consultation with the state department, with cities, counties, or groups of counties, who maintain a tuberculosis ward or hospital for the treatment of persons suffering from tuberculosis, which conforms to the regulations of, and is approved by, the state department, and may receive from the State the tuberculosis subsidy provided by Section 3300.

Amount of subsidy

3300. The amount of the tuberculosis subsidy provided by the State to cities or counties separately providing care under this chapter for persons suffering from tuberculosis and the amount of the tuberculosis subsidy provided by the State to each county participating jointly with one or more other counties in the establishment and maintenance of a tuberculosis ward, hospital or sanatorium shall be based upon the patient days of care provided to persons whose admission and care have been authorized by that county, as follows:

(a) For the first thirty-six thousand five hundred (36,500) patient days of care during a year, the amount shall be two dollars and sixty cents ($2.60) per patient day.

(b) For the second thirty-six thousand five hundred (36,500) patient days of care during a year, the amount shall be two dollars and thirty cents ($2.30) per patient day.

(c) For all patient days of care in excess of seventy-three thousand (73,000) patient days during a year, the amount shall be one dollar and seventy-five cents ($1.75) per patient day.

(d) In addition to the amounts specified in subsections (a), (b) and (c), there shall be provided any additional amounts specified in any appropriation made therefor.

"Patient day"

As used in this section "patient day" means the period of in-patient service rendered a patient between the census taking hours on two consecutive days, and "a year" means a period of 12 months commencing on the first day of July.

Legislative intent

3301. It is the intention of the Legislature to adjust from time to time state participation in the care of persons suffering from tuberculosis in accordance with changes in the cost of caring for such patients.

Hospital central committee

3302. Each group of counties desiring to establish and maintain a tuberculosis ward or hospital for the treatment of persons suffering from tuberculosis shall appoint, by its board of supervisors, one supervisor as a delegate, who shall attend the general meetings of the delegates of each county in the group. The necessary expense incurred in attending such meetings is a county charge. The body thus formed shall be called the hospital central committee.

Delegates

3303. Each group of counties maintaining a tuberculosis hospital under this chapter may by unanimous agreement provide for a different number of delegates to the hospital central committee than the number provided for in this chapter and may provide for a method of deciding a tie vote of the hospital central committee.

Depository

3304. The hospital central committee shall designate a county within the group maintaining the hospital as the place where the business of the hospital is to be transacted and where funds of the hospital are to be kept and deposited. All county officers selected for the business of the hospital shall render all necessary assistance required by the committee in keeping with the duties of their respective offices.

Cost

3305. The delegates from each county may enter into an agreement with delegates from the other counties, on behalf of the county appointing them, binding the county to the joint enterprise and apportioning the cost of constructing, establishing, and maintaining the hospital. Money due from any county under the agreement may be collected by the hospital central committee or, on its behalf, by the board of supervisors of any county in the group, by action in the county in which the hospital is situated.

Building committee

3306. The hospital central committee may appoint a committee to supervise the construction of the hospital, approve the bills, and do the usual things required of a building committee.

Powers of hospital central committee

The hospital central committee is the governing body of the hospital. It has the same powers and duties in regard to the hospital that a board of supervisors has over a county hospital. It shall adopt rules for its government, which shall include provisions for holding meetings and for the addition of other counties to the group. It may appoint such committees as are necessary, and shall prescribe their duties.

Land

3307. Any land required may be acquired or disposed of by the hospital central committee in such manner as may be determined by a three-fourths vote of its members, if all counties comprising a group shall have had notice of the intention to acquire or dispose of the land. Title to land may be held in the name of the entire group or in the name of any county composing the group, as trustee for the use and benefit of all, as may be determined by the hospital central committee.

Expenses

3308. Each county in the group shall pay its proportionate share to the hospital central committee of an amount designated by the committee to constitute a cash revolving fund to carry on the usual work and expense of the hospital. Each month a statement of the expenses of the hospital shall be sent to the board of supervisors of each county, together with a claim for its proportionate share of the expenses. The amounts when collected shall be paid into the cash revolving fund.

Admission of patients

3309. The hospital central committee may determine and pass upon the right of admission to the hospital of applicants, subject to the limitations of this chapter.

CHAPTER 6. VIOLATIONS

Violation Misdemeanor

3350. Any person who, after notice, violates, or who, upon the demand of any health officer, refuses or neglects to conform to, any rule, order, or regulation prescribed by the state department respecting a quarantine or disinfection of persons, animals, things, or places, is guilty of a misdemeanor.

Violation of order Confinement and probation

3351. Any person who, after service upon him of an order of a health officer directing his isolation as provided in Section 3285, violates or fails to comply with the same or any provision thereof, is guilty of a misdemeanor, and, upon conviction thereof, in addition to any and all other penalties which may be imposed by law upon such conviction, may be ordered by the court confined until such order of such health officer shall have been fully complied with or terminated by such health officer, but not exceeding six months from the date of passing judgment upon such conviction; further provided, that the court, upon suitable assurances that such order of such health officer will be complied with, may place any person convicted of a violation of such order of such health officer upon probation for a period not to exceed two years, upon condition that the said order of said health officer be fully complied with; and provided further, that upon any subsequent violation of such order of such health officer, such probation shall be terminated and confinement as herein provided ordered by the court.

Subsequent conviction

3352. Upon any subsequent conviction under the provisions of Section 3351, the court may order the person confined for a period not exceeding one year for such subsequent conviction, or such other penalty as provided by said section.

Exposure: Misdemeanor

3353. Except in the case of the removal of an afflicted person in a manner the least dangerous to the public health, any person afflicted with any contagious, infectious, or communicable disease who wilfully exposes himself, and any person who wilfully exposes another person afflicted with such disease, is guilty of a misdemeanor.

Violation: Communicable or infectious disease

3354. Any person who violates any section in Chapter 3 of this division, with the exception of Section 3111, is guilty of a misdemeanor, punishable by a fine of not less than twenty-five dollars ($25) nor more than five hundred dollars ($500), or by imprisonment for a term of not more than 90 days, or by both. He is guilty of a separate offense for each day that the violation continued.

Prosecution by district attorney

3355. The district attorney of the county in which a violation of Sections 3285 and 3351 may be committed, shall prosecute all such violations and, upon the request of a health officer, shall prosecute, as provided in Section 3351, violations of any isolation order of a health officer made and served as provided in Section 3285.

SEC. 21. Section 3701 of said code is amended to read:

Drinking cups: "Common use"

3701. For the purposes of this chapter the term "common use" when applied to a drinking receptacle is defined as its use for drinking purposes by, or for, more than one person without its being thoroughly cleansed and sterilized between consecutive uses thereof by methods prescribed by or acceptable to the State Department of Public Health.

Sterilization

SEC. 22. Section 3702 of said code is amended to read:

Water containers

3702. No cask, water cooler, or other receptacle shall be used for storing or supplying drinking water to the public or to employees unless it is covered and protected so as to prevent persons from dipping the water therefrom or contaminating the water. All such containers shall be provided with a faucet or other suitable device for drawing the water.

SEC. 23. Section 3801 of said code is amended to read:

Towel "Common use"

3801. For the purpose of this chapter the term "common use" when applied to a towel means its use by, or for, more than one person without its being laundered between consecutive uses of such towel by methods prescribed by or acceptable to the State Department of Public Health.

SEC. 24. Section 3901 of said code is amended to read:

Wiping rags

3901. No person shall supply or furnish to his employees for wiping rags, or sell or offer for sale for wiping rags, any soiled wearing apparel, underclothing, bedding, or parts of soiled or used underclothing, wearing apparel, bedclothes, bedding, or soiled rags or cloths unless they have been sterilized by methods prescribed by or acceptable to the State Department of Public Health.

SEC. 5. Section 986.10 of said code is amended to read:

986.10. For the purposes of this article any veteran who is under the age of 21 shall be deemed to be of the age of majority and to be an adult person for the purpose of entering into any contract for the purchase of a farm or home from the department or any other contract with respect to such property.

SEC. 6. Section 987.01 of said code is amended to read:

987.01. The provisions of Section 987, relative to the rate of interest to be charged to veteran purchasers do not apply to assignees of such purchasers who are not veterans, but as to such assignees the rate of interest shall be as fixed by the department, compounded at periods fixed by the department.

The action of the department in refusing to permit any assignments except as provided in this section is hereby ratified and confirmed, it having at all times been the intent of the Legislature that Section 987 apply to veteran purchasers only.

CHAPTER 278

An act to maintain the Health and Safety Code by amending Sections 3300.1, 3355, 4704, 9302, 13713, 14011, 14405, 14603, 18897, 24368.4, and 26472, by amending and renumbering the second Section 33070 added by Chapter 2116 of the 1961 Statutes, and by repealing Article 15 (commencing with Section 24376.40) of former Chapter 2.6, Division 20, relating to health and safety.

[Approved by Governor May 7, 1963. Filed with Secretary of State May 7, 1963.]

The people of the State of California do enact as follows:

SECTION 1. Section 3300.1 of the Health and Safety Code is amended to read:

3300.1. A city or county receiving contributions from or on behalf of any person for whom subsidy has been or is claimed under Section 3300 shall use the total amount of all such contributions as an offset from any state subventions for this purpose in the following manner:

The total number of patient-days for which subsidy is paid by the State in each fiscal year shall be reduced by the number resulting from division of the total amount of contributions received from or on behalf of tuberculosis patients during each fiscal year, by the per diem cost; such per diem cost to be determined in accordance with Section 1473; or by the contract cost with another public agency or private hospital. This method shall apply to the total of all contributions received by cities or counties on and after July 1, 1961.

SEC. 2. Section 3355 of said code is amended to read:

3355. The district attorney of the county in which a violation of Sections 3285 and 3351 may be committed, shall prosecute all such violations and, upon the request of a health officer, shall prosecute, as provided in Section 3351, violations of any isolation or examination order of a health officer made and served as provided in Section 3285 or Section 3002.

SEC. 3. Section 4704 of said code is amended to read:

4704. Districts formed or proposed to be formed under this chapter are not subject to the "District Investigation Act of 1933" (commencing with Section 58500 of the Government Code.).

SEC. 4. Section 9302 of said code is amended to read:

9302. The proceeding shall be commenced by the filing of a verified petition with the clerk of the superior court.

The petition shall identify the plot which the cemetery district desires to have declared abandoned; state that the plot has not been used for the interment of human remains, that the present owner of the plot is unknown to the cemetery district, and that a period of at least 50 years has passed since any portion of the plot was used for interment purposes; and request that the court declare the plot abandoned.

SEC. 5. Section 12713 of said code is amended to read:

12713. The State Fire Marshal, and his deputies or salaried assistants, the chief of any city or county fire department or fire protection district, or any of their authorized representatives may remove any vehicle which is used unlawfully to transport fireworks or in which any fireworks are unlawfully kept, deposited or concealed, to the nearest garage or other place of safety or to a garage designated or maintained by the State Fire Marshal.

In the event that the State Fire Marshal, or any of his deputies or salaried assistants, the chief of any city or county fire department or fire protection district, or any of their authorized representatives, removes any such vehicle, he shall give the notices required of officers under Article 3 (commencing with Section 22850), Chapter 10, Division 11 of the Vehicle Code, and the keeper of any garage in which any such vehicle is stored may have a lien thereon for his compensation for towage and for caring for and keeping safe such vehicle and may satisfy such lien upon compliance with and under the conditions stated in Article 3 (commencing with Section 22850), Chapter 10, Division 11 of the Vehicle Code.

SEC. 6. Section 14011 of said code is amended to read:

14011. Districts formed or proposed to be formed under this chapter are not subject to any provisions of the "District Investigation Act of 1933" (commencing with Section 58500 of the Government Code).

SEC. 7. Section 14405 of said code is amended to read:

14405. A district formed or proposed to be formed under this chapter is not subject to any provisions of the "District

Investigation Act of 1933" (commencing with Section 58500 of the Government Code).

SEC. 8. Section 14603 of said code is amended to read:

14603. A district formed or proposed to be formed under this chapter is not subject to any provisions of the "District Investigation Act of 1933" (commencing with Section 58500 of the Government Code).

SEC. 9. Section 18897 of said code is amended to read:

18897. "Organized camp" means a site with program and facilities established for the primary purposes of providing an outdoor group living experience with social, spiritual, educational, or recreational objectives, for five days or more during one or more seasons of the year. The term "organized camp" does not include a motel, tourist camp, trailer park, resort, hunting camp, auto court, labor camp, penal or correctional camp nor does it include a child care institution or home-finding agency. The term "organized camp" also does not include any charitable or recreational organization which complies with the rules and regulations for recreational trailer parks provided for by subdivision (c) of Section 18013.

SEC. 10. Section 24368.4 of said code is amended to read:

24368.4. Judicial review may be had by filing a petition for a writ of mandate in accordance with the provisions of the Code of Civil Procedure. Except as otherwise provided in this section, any such petition shall be filed within 30 days after the last day on which reconsideration can be ordered. The right to petition shall not be affected by the failure to seek reconsideration before the hearing board. The complete record of the proceedings, or such parts thereof as are designated by the petitioner, shall be prepared by the hearing board and shall be delivered to the petitioner within 30 days after a request therefor by him, upon payment of the fee specified in Section 69950 of the Government Code, as now or hereinafter amended, for the transcript, the cost of preparation of other portions of the record, and for certification thereof. The complete record includes the pleadings, all notices and orders issued by the hearing board, any proposed decision by the hearing board, the final decision, a transcript of all proceedings, the exhibits admitted or rejected, the written evidence and any other papers in the case. Where petitioner, within 10 days after the last day on which reconsideration can be ordered, requests the hearing board to prepare all or any part of the record, the time within which a petition may be filed shall be extended until five days after its delivery to him. The hearing board may file with the court the original of any document in the record in lieu of a copy thereof.

SEC. 11. Section 26472 is amended to read:

26472. A food shall be deemed to be adulterated:

(a) (1) If any valuable constituent has been in whole or in part omitted or abstracted therefrom; or

(2) If any substance has been substituted wholly or in part therefor; or

(3) If damage or inferiority has been concealed in any manner; or

(4) If any substance has been added thereto or mixed or packed therewith so as to increase its bulk or weight or reduce its quality or strength or make it appear better or of greater value than it is.

(b) If it is confectionery and it bears or contains any alcohol or nonnutritive article or substance except harmless coloring, harmless flavoring, harmless resinous glaze not in excess of four-tenths of 1 per centum, harmless natural gum and pectin. This subsection shall not apply to any confectionery by reason of its containing less than one-half of 1 per centum by volume of alcohol derived solely from the use of flavoring extracts, or to any chewing gum by reason of its containing harmless nonnutritive masticatory substances.

(c) If it bears or contains a color additive other than one listed or certified by the United States Department of Health, Education, and Welfare, Food and Drug Administration.

(d) If any mineral oil has been added thereto or mixed or packed therewith contrary to the provisions of this chapter.

(e) If it be fresh meat and it contains any chemical substance containing sulphites, sulphur dioxide, benzoic acid, salts of benzoic acid or any other chemical preservative, or any substance which is not approved for use in fresh meat by the United States Department of Agriculture, Agricultural Research Service, or the Division of Animal Industry of the California State Department of Agriculture, or the California State Board of Public Health.

(f) If it be chopped or ground beef, or hamburger containing any substance other than the voluntary striated muscle of fresh beef, except those substances approved by the State Department of Public Health, or if the total fat content (determined by ether extract method of analysis) of chopped or ground beef, or hamburger is in excess of 30 percent.

Nothing in this subdivision shall be deemed to prohibit the use of monosodium glutamate in such chopped or ground beef and hamburger.

(g) Notwithstanding the provisions of Section 26461, nothing in this article shall be deemed to prohibit the use of common salt, sugar (cane or beet), maple sugar, dextrose, invert sugar, honey, corn syrup solids, corn syrup and glucose syrup, wood smoke, a vinegar, pure spices, spice oils, flavorings, saltpeter, nitrate of soda, nitrite of soda and potassium nitrite in meat food products such as sausage, corned, brined or pickled meats, hams, bacon and the like. No such substances shall increase the green or original weight by more than 10 percent of products which are not smoked or cooked, with the exception of fresh uncured beef brisket in which case the finished cured product may exceed the weight of the fresh uncured brisket by 20 percent, nor shall any such substance increase the green or original weight by more than 1 percent

of the green or original weight of products which are cooked or smoked. In the case of meat food products such as sausage, 10 percent added water shall be permitted and allowed in smoked or cooked products of such nature and 3 percent in said products which are not cooked or smoked.

(h) If it be alimentary paste and contains any artificial color derived from coal tar or vegetable substances.

(i) If it contains any saccharine or other nonnutritive sweetening agent contrary to the provisions of this chapter.

(j) If it be pork sausage or breakfast sausage and the total fat content (determined by the ether extract method of analysis) is in excess of 50 percent.

SEC. 12. The second Section 33070 of said code added by Chapter 2116 of the 1961 Statutes is amended and renumbered to read:

33070.5. A redevelopment agency may, in order to facilitate the rehousing of families and single persons who are displaced from their homes in a project area, utilize the aids made available through federal urban renewal, redevelopment and housing legislation and may use funds derived from any public or private source to carry out the purposes of this section.

SEC. 13. Article 15 (commencing with Section 24376.40) of former Chapter 2.6, Division 20, of said code is repealed.

CHAPTER 279

An act to amend Section 36.17 of the San Luis Obispo County Flood Control and Water Conservation District Act (Chapter 1294 of the Statutes of 1945), relating to revenue bonds.

[Approved by Governor May 7, 1963. Filed with Secretary of State May 7, 1963.]

The people of the State of California do enact as follows:

SECTION 1. Section 36.17 of the San Luis Obispo County Flood Control and Water Conservation District Act (Chapter 1294 of the Statutes of 1945) is amended to read:

Sec. 36.17. Notwithstanding any other provision of this act, the district may authorize, issue and sell revenue bonds pursuant to the provisions of Chapter 6 (commencing at Section 54300), Part 1, Division 2, Title 5 of the Government Code to provide funds for the acquisition, construction, improving, or financing any one or more revenue-producing enterprises for any one or more of the purposes for which the district has been formed. "Enterprise" as used in this section means a revenue-producing system, plant, works, or undertaking used for or useful in carrying out any one or more of the purposes of the district. In connection with the

(i) Industrial or agricultural vocations
(j) Fine arts

SEC. 3. Section 7503 of said code is amended to read:

7503. (a) Except as provided in subparagraphs (b) and (c) hereof, all members of the Curriculum Commission shall be appointed for a term of four years commencing March 1.

(b) The term of each person who is a member of the Curriculum Commission on the effective date of the amendment to this section enacted at the 1965 session of the Legislature and the term of each person who, after that date, is appointed to fill any vacancy in the membership of the Curriculum Commission shall terminate on the last day of February, 1969.

(c) To follow the terms that under subsection (b) expire the last day of February 1969, the State Board of Education shall appoint members to the Curriculum Commission whose terms shall commence March 1, 1969; three members for a one-year term; three members for a two-year term; three members for a three-year term; and three members for a four-year term. Thereafter, all members shall be appointed to serve a term of four years.

SEC. 4. Section 7505 of said code is amended to read:

7505. The Superintendent of Public Instruction shall be the chairman of the Curriculum Commission. In his absence, the Chief of the Division of Instruction of the State Department of Education shall be acting chairman.

SEC. 5. Section 7508.5 is added to said code, to read:

7508 5. Whenever an employee of any public school district, state college, or other public agency is appointed to membership on the Curriculum Commission, his employer shall grant him sufficient time away from his regular duties, without loss of income or other benefits to which he is entitled by reason of his employment, to attend meetings of the commission and to attend to the duties imposed upon him by reason of his membership on the commission. The employer of any such member may make available such stenographic, secretarial, and staff assistance as is reasonably necessary to enable him to execute the duties imposed upon him by reason of his membership on the commission.

CHAPTER 1552

An act to amend Sections 3285 and 3351 of the Health and Safety Code, relating to health officers.

[Approved by Governor July 16, 1965. Filed with Secretary of State July 23, 1965]

The people of the State of California do enact as follows:

SECTION 1. Section 3285 of the Health and Safety Code is amended to read:

3285. Each health officer is hereby directed to use every available means to ascertain the existence of, and immediately to investigate, all reported or suspected cases of tuberculosis in the infectious stages within his jurisdiction and to ascertain the sources of such infections. In carrying out such investigations, each health officer is hereby invested with full powers of inspection, examination and quarantine or isolation of all persons known to be infected with tuberculosis in an infectious stage and is hereby directed:

(a) To make such examinations as are deemed necessary of persons reasonably suspected of having tuberculosis in an infectious stage and to isolate or isolate and quarantine such persons, whenever deemed necessary for the protection of the public health.

(b) Follow local rules and regulations regarding examinations, quarantine, or isolation, and all general and special rules, regulations, and orders of the state department in carrying out such examination, quarantine or isolation.

(c) Whenever the health officer shall determine on reasonable grounds that an examination of any person is necessary for the preservation and protection of the public health, he shall make an examination order in writing, setting forth the name of the person to be examined, the time and place of the examination, and such other terms and conditions as may be necessary to protect the public health. Nothing contained in this subdivision shall be construed to prevent any person whom the health officer determines should have an examination for infectious tuberculosis from having such an examination made by a physician of his own choice who is licensed to practice medicine under the provisions of Chapter 5 (commencing with Section 2000), Division 2 of the Business and Professions Code under such terms and conditions as the health officer shall determine on reasonable grounds to be necessary to protect the public health.

(d) Whenever the health officer shall determine that quarantine or isolation in a particular case is necessary for the preservation and protection of the public health, he shall make an isolation or quarantine order in writing, setting forth the name of the person to be isolated, the period of time during which the order shall remain effective, the place of isolation or quarantine, and such other terms and conditions as may be necessary to protect the public health.

(e) Upon the making of an examination, isolation, or quarantine order as provided in this section, a copy of such order shall be served upon the person named in such order.

(f) Upon the receipt of information that any examination, quarantine, or isolation order, made and served as herein provided, has been violated, the health officer shall advise the district attorney of the county in which such violation has occurred, in writing, and shall submit to such district attorney the information in his possession relating to the subject matter

of such examination, isolation, or quarantine order, and of such violation or violations thereof.

(g) Any and all orders authorized under this section shall be made by the health officer and his authority to make such orders shall be delegated only pursuant to Section 7. The health officer shall not make any orders incorporating by reference any other rules or regulations.

SEC. 2. Section 3351 of said code is amended to read:

3351. Inasmuch as the order provided for by Section 3285 is for the protection of the public health, any person who, after service upon him of an order of a health officer directing his isolation or examination as provided in Section 3285, violates or fails to comply with the same or any provision thereof, is guilty of a misdemeanor, and, upon conviction thereof, in addition to any and all other penalties which may be imposed by law upon such conviction, may be ordered by the court confined until such order of such health officer shall have been fully complied with or terminated by such health officer, but not exceeding six months from the date of passing judgment upon such conviction; further provided, that the court, upon suitable assurances that such order of such health officer will be complied with, may place any person convicted of a violation of such order of such health officer upon probation for a period not to exceed two years, upon condition that the said order of said health officer be fully complied with; and provided further, that upon any subsequent violation of such order of such health officer, such probation shall be terminated and confinement as herein provided ordered by the court.

CHAPTER 1553

An act to amend Section 241 of the Penal Code, relating to assault and battery on peace officers.

[Approved by Governor July 16, 1965. Filed with Secretary of State July 23, 1965.]

The people of the State of California do enact as follows:

SECTION 1. Section 241 of the Penal Code is amended to read:

241. An assault is punishable by fine not exceeding five hundred dollars ($500), or by imprisonment in the county jail not exceeding six months, or by both. When it is committed against the person of a peace officer, and the person committing the offense knows or reasonably should know that such victim is a peace officer engaged in the performance of his duties, and such peace officer is engaged in the performance of his duties, the offense shall be punished by imprisonment in the state prison not exceeding two years.

As used in this subdivision, "peace officer" refers to any person designated as a peace officer in the first paragraph of

NOTES OF DECISIONS

1. Construction and application

Pol.C. § 4225 which empowered board of supervisors to appoint county health officer who should be employee of county and not county officer applied solely to unchartered counties and was inoperative in chartered counties which, under authority of their charters, had provided for health officer, regardless of particular title given him and regardless of variance in official title given to the office in various enactments. Lesem v. Getty (App. 4 Dist. 1937) 23 Cal.App.2d 57, 72 P.2d 183. Health 364

2. Health officer

The legislature distinguishes between county and city health officers and considers them together under the term "health officer" only when it expressly so provides. 38 Op.Atty.Gen. 41, 8-23-61.

3. Employment contracts

The county may not enter into a contract with the county health officer as such in an independent contractual status to circumvent the bars of Gov.C. §§ 21103, 20060, and no such contract may be drawn to cover that position once retirement has been effected. 26 Op.Atty.Gen. 14, 7-15-55.

4. Dual officeholding

An individual may hold simultaneously the positions of Monterey County Director of Health, Monterey County

Health Officer, Monterey County Local Emergency Medical Services Agency Director, and Monterey County Local Emergency Medical Services Agency Medical Director. 78 Op.Atty.Gen. 352, December 18, 1995.

5. Salary

The salary of the county health officer, who holds his office at the pleasure of the appointive power, can be increased at any time during his tenure of office. 17 Op.Atty.Gen. 143, 4-6-51.

➡ § 120130. List of reportable diseases and conditions; establishment and contents; regulations for isolation or quarantine; isolation or quarantine by health officer; publication of list; penalties; electronic reporting requirement

(a) The department shall establish a list of reportable diseases and conditions. For each reportable disease and condition, the department shall specify the timeliness requirements related to the reporting of each disease and condition, and the mechanisms required for, and the content to be included in, reports made pursuant to this section. The list of reportable diseases and conditions may include both communicable and noncommunicable diseases. The list may include those diseases that are either known to be, or suspected of being, transmitted by milk or milk-based products. The list shall also include, but not be limited to, diphtheria, listeria, salmonella, shigella, streptococcal infection in food handlers or dairy workers, and typhoid. The list may be modified at any time by the department, after consultation with the California Conference of Local Health Officers. Modification of the list shall be exempt from the administrative regulation and rulemaking requirements of Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code, and shall be implemented without being adopted as a regulation, except that the revised list shall be filed with the Secretary of State and printed in the California Code of Regulations as required under subdivision (d). Those diseases listed as reportable shall be properly reported as required to the department by the health officer.

(b) The department may from time to time adopt and enforce regulations requiring strict or modified isolation, or quarantine, for any of the contagious, infectious, or communicable diseases, if in the opinion of the department the action is necessary for the protection of the public health.

(c) The health officer may require strict or modified isolation, or quarantine, for any case of contagious, infectious, or communicable disease, when this action is necessary for the protection of the public health.

(d) The list established pursuant to subdivision (a) and any subsequent modifications shall be published in Title 17 of the California Code of Regulations.

(e) Notwithstanding any other provision of law, no civil or criminal penalty, fine, sanction, finding, or denial, suspension, or revocation of licensure for any person or facility may be imposed based upon a failure to provide the notification of a reportable disease or condition that is required under this section, unless the disease or condition that is required to be reported was printed in the California Code of Regulations at least six months prior to the date of the claimed failure to report.

(f) Commencing July 1, 2009, or within one year of the establishment of a state electronic laboratory reporting system, whichever is later, a report generated pursuant to this section, or Section 121022, by a laboratory shall be submitted

electronically in a manner specified by the department. The department shall allow laboratories that receive incomplete patient information to report the name of the provider who submitted the request to the local health officer.

(g) The department may through its Internet Web site and via electronic mail advise out-of-state laboratories that are known to the department to test specimens from California residents of the new reporting requirements.

HISTORICAL AND STATUTORY NOTES

2006 Main Volume

Section 2 of Stats.2004, c. 262 (A.B.1091), provides:

"SEC. 2. This act is an urgency statute necessary for the immediate preservation of the public peace, health, or safety within the meaning of Article IV of the Constitution and shall go into immediate effect. The facts constituting the necessity are:

"In order to facilitate accurate and efficient reporting of reportable diseases and conditions to the proper authorities at the earliest possible time, it is necessary that this act take effect immediately."

2011 Electronic Update

2008 Legislation

Section 2 of Stats.2008, c. 249 (A.B.2658), provides:

"SEC. 2. Section 1.5 of this bill incorporates amendments to Section 120130 of the Health and Safety Code proposed by both this bill and SB 356 [vetoed]. It shall only become operative if (1) both bills are enacted and become effective on or before January 1, 2009, (2) each bill amends Section 120130 of the Health and Safety Code, and (3) this bill is enacted after SB 356 [vetoed], in which case Section 1 of this bill shall not become operative."

An amendment of this section by § 1.5 of Stats.2008, c. 249 (A.B.2658), failed to become operative under the provisions of § 2 of that Act.

Section affected by two or more acts at the same session of the Legislature, see Government Code § 9605.

Section 3 of Stats.2008, c. 249 (A.B.2658), provides:

"SEC. 3. No reimbursement is required by this act pursuant to Section 6 of Article XIII B of the California Constitution because the only costs that may be incurred by a local agency or school district will be incurred because this act creates a new crime or infraction, eliminates a crime or infraction, or changes the penalty for a crime or infraction, within the meaning of Section 17556 of the Government Code, or changes the definition of a crime within the meaning of Section 6 of Article XIII B of the California Constitution."

2010 Legislation

Stats.2010, c. 470 (A.B.2541), in subd. (f), in the first sentence, inserted ", or Section 121022," and deleted ", except that this electronic reporting requirement shall not apply to reports of HIV infections" following "specified by the department"; and in subd. (g), substituted "through its Internet Web site" for "on its Web site".

Sections 4 and 5 of Stats.2010, c. 470 (A.B.2541), provide:

"SEC. 4. Section 1.5 of this bill incorporates amendments to Section 120130 of the Health and Safety Code proposed by both this bill and AB 2786 [vetoed]. It shall only become operative if (1) both bills are enacted and become effective on or before January 1, 2011, (2) each bill amends Section 120130 of the Health and Safety Code, and (3) this bill is enacted after AB 2786 [vetoed], in which case Section 1 of this bill shall not become operative.

"SEC. 5. No reimbursement is required by this act pursuant to Section 6 of Article XIII B of the California Constitution for certain costs that may be incurred by a local agency or school district because, in that regard, this act creates a new crime or infraction, eliminates a crime or infraction, or changes the penalty for a crime or infraction, within the meaning of Section 17556 of the Government Code, or changes the definition of a crime within the meaning of Section 6 of Article XIII B of the California Constitution.

"However, if the Commission on State Mandates determines that this act contains other costs mandated by the state, reimbursement to local agencies and school districts for those costs shall be made pursuant to Part 7 (commencing with Section 17500) of Division 4 of Title 2 of the Government Code."

An amendment of this section by § 1.5 of Stats.2010, c. 470 (A.B.2541), failed to become operative under the provisions of § 4 of that Act.

NOTES OF DECISIONS

Confidentiality 2
Construction with other laws 1

1. Construction with other laws

The Business and Professions Code and the Administrative Code permit promulgation of a regulation requiring the reporting by clinical laboratories of results of positive laboratory tests for reportable communicable diseases to local health authority, and such reporting does not constitute "diagnosis" within meaning of Bus. & Prof.C. § 2141 (repealed), relating to practice of medicine without a license. 28 Op.Atty.Gen. 244 (1956).

2. Confidentiality

All venereal disease records compiled and kept by local health departments are confidential and a health officer receiving a subpoena for such record may assert a privilege pursuant to Evid.C. § 1040. 53 Op.Atty.Gen. 10, 1-13-70.

The state board of public health may promulgate a regulation to disseminate the identities of persons known to be infected with viral hepatitis to licensed blood banks for the sole purpose of screening donors, provided such regulation

further directs that the information is to remain confidential and to be used only for such screening. 51 Op.Atty.Gen. 217, 10-29-68.

CA Jur. 3d Health and Sanitation § 39, Quarantine.

NOTES OF DECISIONS

1. Construction and application

Statutes, providing that state department of health may quarantine, isolate, and disinfect persons, houses, etc., that upon being informed by health officer of any contagious or communicable disease, department may take such measures as are necessary to ascertain nature of disease and prevent its spread, by use of term "may" impose discretionary and not mandatory powers. Jones v. Czapkay (App. 1 Dist. 1960) 6 Cal.Rptr. 182, 182 Cal.App.2d 192. Health 386

The statutory duty of health officers to take all measures necessary to prevent transmission of venereal disease is mandatory, and in the enforcement of such mandate, health officers are vested with full power of quarantine. Ex parte Martin (App. 1948) 83 Cal.App.2d 164, 188 P.2d 287. Health 386

2. Purpose

The power and authority granted to health officers under § 2522 (repealed) and other sections was for the purpose of preventing and suppressing communicable and contagious diseases to protect those persons infected and to protect the general public from such communicable and contagious diseases. 4 Op.Atty.Gen. 146 (1944).

3. Consent of parent or guardian

Under former §§ 2522, 2524, 2558, 2573 (repealed), a physician who is acting under the direction of the county health officer may make examination of minor male or female persons applying at the clinic requesting diagnostic services for a suspected venereal disease, without knowledge or consent of parent or guardian. 1 Op.Atty.Gen. 541 (1943).

4. Evidence to support quarantine

To sustain quarantine of person allegedly having venereal disease, law required only probable cause to believe that person has communicable infectious disease. In re King (App. 1932) 128 Cal.App. 27, 16 P.2d 694. Health 386

Health authorities might place under quarantine a person afflicted with an infectious or contagious disease, as defined in Pol.C. § 2979a (repealed), only where reasonable ground exists to support the belief that such person was so afflicted. Ex parte Arata (App. 2 Dist. 1921) 52 Cal.App. 380, 198 P. 814. Health 386

Petitioners, arrested without warrant for violation of rooming house ordinance, could not be held by the chief of police without bail and under pretended quarantine, by reason of a general instruction given by the health department of the city, and without any knowledge being had on the part of the health department, or its inspectors, which would give rise to reasonable cause, or even suspicion, that petitioners were afflicted with contagious or infectious venereal disease. Ex parte Dillon (App. 2 Dist. 1919) 44 Cal.App. 239, 186 P. 170. Habeas Corpus 540; Health 386

One infected with a contagious disease, declared to be such by Pol.C. § 2979a (repealed), as amended by Stats.1917, p. 171, may be subjected to quarantine regulations by the health commissioner of a city, without its first being judicially established by some proceeding in court that he or she was so infected. Ex parte Johnston (App. 1919) 40 Cal.App. 242, 180 P. 644. Health 386

5. Animals

In this state, public authorities have the right to quarantine or destroy diseased animals and certain diseased animals are public nuisances. Chisholm v. California Jockey Club (App. 1958) 164 Cal.App.2d 367, 330 P.2d 676.

2 Witkin Cal. Crim. L. 3d Crimes Against Peace Welf § 368, (S 368) Communicable Diseases.

NOTES OF DECISIONS

1. Construction and application

This statute does not apply to officers of the state department of public health. Jones v. Czapkay (App. 1 Dist. 1960) 6 Cal.Rptr. 182, 182 Cal.App.2d 192.

2. Purpose

This statute requiring each health officer knowing or having reason to believe existence of a reportable disease or of a contagious, infectious, or communicable disease to take necessary measures to prevent spread of disease or occurrence of additional cases and § 3125 requiring all physicians, etc., to report fact of illness from infectious or communicable disease to health officer together with name of person ill, etc., were enacted to protect public against spread of con-

tagious, communicable diseases. Derrick v. Ontario Community Hospital (App. 4 Dist. 1975) 120 Cal.Rptr. 566, 47 Cal.App.3d 145. Health 384; Health 399

3. Validity of regulations

Where not exceeding 9 persons in a city were supposed to have died from the bubonic plague, and no living persons were known to have contracted the disease, a regulation establishing a general quarantine district, embracing a territory covering 12 blocks, in which more than 10,000 persons resided, which prohibits persons from entering or leaving such district, but permits free intercourse between all persons within it, cannot be upheld as a reasonable regulation for preventing the spread of the disease, but its effect must necessarily be, if the disease exists within the district, to facilitate its spread among all the persons confined within its limits. Jew Ho v. Williamson, 1900, 103 F. 10. Health 386; Municipal Corporations 191

Where the board of health of San Francisco adopted a resolution declaring its belief in the existence of bubonic plague in the city, and, in connection with the quarantine officer of the United States for the port, promulgated and enforced an order prohibiting any Chinese or Asiatic person from leaving the city without first submitting to inoculation with a serum supposed to be a preventive, but the administration of which to a person who had been exposed to the disease was dangerous to life and contrary to medical authority, the resolution had no reasonable relation to the protection of the health of the inhabitants of the city, and was illegal and void, as an unconstitutional invasion of the rights of the persons against whom it was directed. Wong Wai v. Williamson, 1900, 103 F. 1. Health 385; Municipal Corporations 191

Police regulation for protecting public health, if tending to effect its object, will be sustained. Ex parte Gray (1929) 206 Cal. 497, 274 P. 974. Health 352

4. Discretion of authorities

A large discretion is necessarily vested in state or municipal authorities in determining what is a proper exercise of the police powers of the state for the protection of the public health, and what measures are necessary to meet particular conditions or emergencies; but their determination is not final, and is subject to supervision by the courts, and they may not, under the guise of protecting the public, arbitrarily interfere with private business, or impose unusual and unnecessary restrictions upon lawful occupations, and whether they have done so in a particular case is a judicial question. Jew Ho v. Williamson, 1900, 103 F. 10. Health 354; Health 382

Except for duty to report occurrence of certain diseases to state department of public health, local public health officer is vested with considerable discretion as to what actions he should take to control spread of infectious disease. Derrick v. Ontario Community Hospital (App. 4 Dist. 1975) 120 Cal.Rptr. 566, 47 Cal.App.3d 145. Health 384; Health 399

Provisions of Health and Safety Code dealing with duties of health officers in issuing tuberculosis quarantine orders make those duties discretionary rather than mandatory. Jones v. Czapkay (App. 1 Dist. 1960) 6 Cal.Rptr. 182, 182 Cal.App.2d 192. Health 386

5. Evidence of disease

A health officer is not required to first determine that one is afflicted with an infectious or communicable disease before subjecting such person to quarantine, all that is required being that there be probable cause to believe that person so held has such a disease. Ex parte Martin (App. 1948) 83 Cal.App.2d 164, 188 P.2d 287. Health 386

The necessary proof in cases of quarantine is analogous to that required on a preliminary examination before magistrate prior to commitment on criminal charge, extent of inquiry being merely as to existence of reasonable cause pending opportunity for further investigation or examination. Ex parte Martin (App. 1948) 83 Cal.App.2d 164, 188 P.2d 287. Health 386

Health authorities might place under quarantine a person afflicted with an infectious or contagious disease, as defined in Pol.C. § 2979a (repealed), only where reasonable ground existed to support the belief that such person was so afflicted. Ex parte Arata (App. 2 Dist. 1921) 52 Cal.App. 380, 198 P. 814. Health 386

Mere suspicion that an individual was afflicted with an isolable disease was not sufficient to give a health officer "reason to believe" that such person was so afflicted, under Pol.C. former § 2979a (repealed), making it the duty of health officers to protect the public against spread of such disease from persons whom such officers have "reason to believe" were afflicted with such diseases. In re Shepard (App. 2 Dist. 1921) 51 Cal.App. 49, 195 P. 1077. Health 386

It might be assumed that under the laws relating to public health, inspection and quarantine might be made of persons upon reasonable ground that the persons so subjected to inspection or quarantine were afflicted with contagious or infectious diseases, such as were enumerated in Pol.C. former § 2979a (repealed). Ex parte Dillon (App. 2 Dist. 1919) 44 Cal.App. 239, 186 P. 170. Habeas Corpus 701.1

Petitioners, arrested without warrant for violation of rooming house ordinance, could not be held by the chief of police without bail and under pretended quarantine, by reason of a general instruction given by the health department of the city, and without any knowledge being had on the part of the health department, or its inspectors, which would give rise to reasonable cause, or even suspicion, that petitioners were afflicted with contagious or infectious venereal disease. Ex parte Dillon (App. 2 Dist. 1919) 44 Cal.App. 239, 186 P. 170. Habeas Corpus 540; Health 386

6. Quarantine

The duty of health officers to take all measures necessary to prevent transmission of venereal disease is mandatory, and in the enforcement of such mandate, health officers are vested with full power of quarantine. Ex parte Martin (App. 1948) 83 Cal.App.2d 164, 188 P.2d 287. Health 386

While Pol.C. former § 2979a (repealed), did not expressly confer on city and county health officer right to take possession or control of body of one afflicted with infectious disease, as it did on state board of health, isolation of one so afflicted was reasonable and proper measure to prevent increase and spread of such disease within powers conferred on such officer by such act, and one so isolated cannot secure release from quarantine under writ of habeas corpus. In re Fisher (App. 1925) 74 Cal.App. 225, 239 P. 1100. Health 386

Where sufficient reasonable cause exists to believe that a person is afflicted with a quarantinable disease, the health authorities may examine into the case, and in a proper way determine the fact; but preliminary investigation must be made without delay, and, if quarantining is found justifiable, only such quarantine measures as are reasonably necessary to protect the public health may be resorted to. Ex parte Dillon (App. 2 Dist. 1919) 44 Cal.App. 239, 186 P. 170. Health 386

7. Place of quarantine

Under §§ 2554, 2555, 2556 (repealed), county health officers, may quarantine individuals infected with a venereal disease in county or city jails where no other public institutions are available or where an emergency has arisen, or where the afflicted person is under confinement in the city or county jail and is quarantined, and will not be detrimental

to other prisoners. 4 Op.Atty.Gen. 146 (1944).

8. Liability of officers

Exposure of plaintiff to known tubercular victim was sole proximate cause of plaintiff's acquiring the disease, and any breach of duty by health officers in failing to conduct proper or adequate investigation to insure strict compliance by patient with quarantine orders could constitute only a remote cause which could not form basis for imposition of liability upon them. Jones v. Czapkay (App. 1 Dist. 1960) 6 Cal.Rptr. 182, 182 Cal.App.2d 192. Health 384

9. Animals

Section 1905, relating to rabies control and this statute, relating to communicable diseases, authorized local health officers to establish rabies quarantine of skunks, and department of public health is authorized to enact additional regulations pursuant to § 1905. 38 Op.Atty.Gen. 176 (1961).

10. Review

In a suit to enjoin the enforcement of quarantine regulations adopted because of the supposed existence of a contagious disease in the locality quarantined, the court will not, under ordinary circumstances, undertake to review the finding of the proper health authorities that the disease exists and the quarantine is necessary. Jew Ho v. Williamson, 1900, 103 F. 10. Health 386; Injunction 85(2)

§ 120280. Refusal to comply with isolation order; offense; confinement by court order; probation

Inasmuch as the orders provided for by Section 121365 are for the protection of the public health, any person who, after service upon him or her of an order of a local health officer as provided in Section 121365 violates or fails to comply with the order, is guilty of a misdemeanor. Upon conviction thereof, in addition to any and all other penalties that may be imposed by law upon the conviction, the person may be ordered by the court confined until the order of the local health officer shall have been fully complied with or terminated by the local health officer, but not exceeding one year from the date of passing judgment upon the conviction, further, the court, upon suitable assurances that the order of the local health officer will be complied with, may place any person convicted of a violation of the order of the local health officer upon probation for a period not to exceed two years, upon condition that the order of the local health officer be fully complied with, further, upon any subsequent violation of the order of the local health officer, the probation shall be terminated and confinement as provided for in this section shall be ordered by the court. Confinement may be accomplished by placement in any appropriate facility, penal institution, or dwelling approved for the specific case by the local health officer.

NOTES OF DECISIONS

Construction and application 2
Discretion of legislature 3
Validity of prior law 1

1. Validity of prior law

Stats.1915, p. 1530 (repealed) was a valid exercise of the sovereign power and police power of the state to take all the necessary steps for the promotion of the health and comfort of its inhabitants and to make regulations essential to the protection of the state and the people thereof against the prevalence of disease, as the true purpose of county government organizations, is to perform functions which belong to the state itself, and the state may employ them jointly with itself or alone as instrumentalities in aid of the administration or carrying out of its own general governmental functions and policy. Sacramento County v. Chambers (App. 1917) 33 Cal.App. 142, 164 P. 613.

2. Construction and application

In order to accomplish purpose for which this chapter dealing with tuberculosis was enacted, court should give chapter a broad and liberal construction. Application of Halko (App. 2 Dist. 1966) 54 Cal.Rptr. 661, 246 Cal.App.2d 553. Health 356; Health 384

3. Discretion of legislature

Legislature is vested with broad discretion in determining what are contagious and infectious diseases and in adopting means for preventing the spread thereof. Application of Halko (App. 2 Dist. 1966) 54 Cal.Rptr. 661, 246 Cal.App.2d 553. Health 384

➡ § 121358. Correctional facilities; institutionalization of criminals with tuberculosis; program funds; notification of detention sites

(a) Notwithstanding any other provision of law, individuals housed or detained through the tuberculosis control, housing, and detention program shall not reside in correctional facilities, and the funds available under that program with regard to those individuals shall not be disbursed to, or used by, correctional facilities. This section shall not be interpreted to prohibit the institutionalization of criminals with tuberculosis in correctional facilities.

(b) The department shall work with local health jurisdictions to identify a detention site for recalcitrant tuberculosis patients appropriate for each local health jurisdiction in the state. The department shall notify all counties of their designated site by January 1, 1998.

Treatises and Practice Aids

2 Witkin Cal. Crim. L. 3d Crimes Against Peace Welf § 368, (S 368) Communicable Diseases.

NOTES OF DECISIONS

1. Construction and application

County was prohibited from using its jail to detain noncompliant tuberculosis (TB) patients; clause in statute prohibiting the use of state TB funding to support jail detentions did not overcome the clause prohibiting jail detentions or compel construction of statute which made such detentions elective at the county level. Souvannarath v. Hadden (App. 5 Dist. 2002) 116 Cal.Rptr.2d 7, 95 Cal.App.4th 1115. Health 384

2. Construction with other laws

Reference to "the tuberculosis control, housing, and detention program" in statute prohibiting detention of noncompliant tuberculosis (TB) patients in correctional facilities does not restrict application of statute to only State Department of Health Services (DHS) tuberculosis control schemes nor does it distinguish between the "state" program and county's purported "local" program. Souvannarath v. Hadden (App. 5 Dist. 2002) 116 Cal.Rptr.2d 7, 95 Cal.App.4th 1115. Health 384

3. Judicial notice

Court of Appeal would take judicial notice of the legislative history of statute prohibiting detention of noncompliant tuberculosis (TB) patients in correctional facilities. Souvannarath v. Hadden (App. 5 Dist. 2002) 116 Cal.Rptr.2d 7, 95 Cal.App.4th 1115. Evidence 33

4. Discretion of health officer

Although a local health officer may have been granted broad general discretion to select the place of detention for noncompliant tuberculosis (TB) patients, that discretion was intended by the Legislature to be circumscribed by the flat statutory prohibition against jail detention. Souvannarath v. Hadden (App. 5 Dist. 2002) 116 Cal.Rptr.2d 7, 95 Cal.App.4th 1115. Health 384

Article 1. General Provisions (Refs & Annos)

➡ § 6031.4. Local detention facility defined

(a) For the purpose of this title, "local detention facility" means any city, county, city and county, or regional facility used for the confinement for more than 24 hours of adults, or of both adults and minors, but does not include that portion of a facility for the confinement of both adults and minors which is devoted only to the confinement of minors.

(b) In addition to those provided for in subdivision (a), for the purposes of this title, "local detention facility" also includes any city, county, city and county, or regional facility, constructed on or after January 1, 1978, used for the confinement, regardless of the length of confinement, of adults or of both adults and minors, but does not include that portion of a facility for the confinement of both adults and minors which is devoted only to the confinement of minors.

(c) "Local detention facility" also includes any adult detention facility, exclusive of any facility operated by the California Department of Corrections or any facility holding inmates pursuant to Section 2910.5, Chapter 4 (commencing with Section 3410) of Title 2 of, Chapter 9.2 (commencing with Section 6220) of Title 7 of, Chapter 9.5 (commencing with Section 6250) of Title 7 of, or Chapter 9.6 (commencing with Section 6260) of Title 7 of, Part 3, that holds local prisoners under contract on behalf of cities, counties, or cities and counties. Nothing in this subdivision shall be construed as affecting or authorizing the establishment of private detention facilities.

(d) For purposes of this title, a local detention facility does not include those rooms that are used for holding persons for interviews, interrogations, or investigations, and are either separate from a jail or located in the administrative area of a law enforcement facility.

CHAPTER 415

An act to amend Section 1290 of, to add Section 27 to, to add Division 101 (commencing with Section 100100), Division 102 (commencing with Section 102100), Division 103 (commencing with Section 104100), Division 104 (commencing with Section 106500), Division 105 (commencing with Section 120100), Division 106 (commencing with Section 123100), and Division 107 (commencing with Section 127000) to, to repeal Sections 26, 850, 1250.9, 1250.10, and 1260 of, to repeal Article 1 (commencing with Section 200), Article 1.5 (commencing with Section 225), Article 1.7 (commencing with Section 230), Article 1.7 (commencing with Section 235), Article 1.8 (commencing with Section 242), Article 1.9 (commencing with Section 246.1), Article 2 (commencing with Section 248), Article 2.1 (commencing with Section 275, Article 2.4 (commencing with Section 283), Article 2.6 (commencing with Section 289), Article 2.9 (commencing with Section 295), Article 3 (commencing with Section 300), Article 3.1 (commencing with Section 309.7), Article 3.2 (commencing with Section 309.100), Article 3.3 (commencing with Section 310), Article 3.4 (commencing with Section 320), Article 3.45 (commencing with Section 324.7), Article 3.5 (commencing with Section 325), Article 3.6 (commencing with Section 340), Article 3.7 (commencing with Section 349), Article 4 (commencing with Section 350), Article 4.5 (commencing with Section 360), Article 4.6 (commencing with Section 372), Article 5 (commencing with Section 374), Article 5.5 (commencing with Section 380), Article 5.7 (commencing with Section 390), Article 6 (commencing with Section 400), Article 6.1 (commencing with Section 402), Article 6.5 (commencing with Section 405), Article 7 (commencing with Section 410), Article 7.2 (commencing with Section 412), Article 7.7 (commencing with Section 417), Article 7.8 (commencing with Section 418), Article 8 (commencing with Section 420), Article 8.1 (commencing with Section 421), Article 8.5 (commencing with Section 423), Article 8.7 (commencing with Section 424.10), Article 9.5 (commencing with Section 426), Article 10 (commencing with Section 427), Article 10.2 (commencing with Section 427.10), Article 11 (commencing with Section 428), Article 13 (commencing with Section 429.11), Article 13.1 (commencing with Section 429.13), Article 14.5 (commencing with Section 429.35), and Article 15 (commencing with Section 429.40), Article 16 (commencing with Section 429.50), Article 17 (commencing with Section 429.60), Article 18 (commencing with Section 429.70), Article 18.5 (commencing with Section 429.90), Article 19 (commencing with Section 429.94, and Article 20 (commencing with Section 429.994) of Chapter 2 of

Part 1 of Division 1 of, to repeal Article 8 (commencing with Section 1630) of Chapter 4 of Division 2 of, to repeal Chapter 1 (commencing with Section 100), Chapter 1.4 (commencing with Section 140), Chapter 1.5 (commencing with Section 150), Chapter 1.7 (commencing with Section 175), Chapter 1.8 (commencing with Section 185), Chapter 1.85 (commencing with Section 188), Chapter 1.9 (commencing with Section 190), Chapter 1.10 (commencing with Section 195), Chapter 1.11 (commencing with Section 199.20), Chapter 1.12 (commencing with Section 199.30), Chapter 1.13 (commencing with Section 199.42), Chapter 1.14 (commencing with Section 199.45), Chapter 1.15 (commencing with Section 199.55), Chapter 1.16 (commencing with Section 199.70), Chapter 1.17 (commencing with Section 199.81), Chapter 1.19 (commencing with Section 199.86), Chapter 1.20 (commencing with Section 199.95), Chapter 3 (commencing with Section 430) of, Chapter 4 (commencing with Section 436), and Chapter 5 (commencing with Section 436.50) of Part 1 of Division 1 of, to repeal Chapter 1 (commencing with Section 450), Chapter 2 (commencing with Section 600), Chapter 3 (commencing with Section 700), Chapter 6 (commencing with Section 954), Chapter 7 (commencing with Section 1000), Chapter 7.5 (commencing with Section 1010), and Chapter 8 (commencing with Section 1100) of Part 2 of Division 1 of, to repeal Chapter 7 (commencing with Section 1700) of Division 2 of, to repeal Chapter 2 (commencing with Section 1800), Chapter 3 (commencing with Section 1900), Chapter 4 (commencing with Section 2100), Chapter 5.5 (commencing with Section 2425), and Chapter 9 (commencing with Section 2950) of Division 3 of, to repeal Chapter 6.5 (commencing with Section 5474.20) of Part 3 of Division 5 of, to repeal Chapter 1 (commencing with Section 15000) of Division 12.5 of, to repeal Chapter 1.5 (commencing with Section 19010) of Part 3 of Division 13 of, to repeal Chapter 1 (commencing with Section 24000), Chapter 1.2 (commencing with Section 24160), Chapter 1.5 (commencing with Section 24180), Chapter 3 (commencing with Section 24380), Chapter 3.5 (commencing with Section 24385), Chapter 4 (commencing with Section 24400), Chapter 4.3 (commencing with Section 24425), Chapter 4.5 (commencing with Section 24450), Chapter 5 (commencing with Section 24800), Chapter 6 (commencing with Section 25000), Chapter 6.1 (commencing with Section 25015), Chapter 6.99 (commencing with Section 25572), Chapter 7 (commencing with Section 25600), Chapter 7.1 (commencing with Section 25620), Chapter 7.2 (commencing with Section 25625), Chapter 7.3 (commencing with Section 25650), Chapter 7.4 (commencing with Section 25660), Chapter 7.5 (commencing with Section 25700), Chapter 7.6 (commencing with Section 25800), Chapter 7.7 (commencing with Section 25880), Chapter 7.8 (commencing with Section 25882), Chapter 7.9 (commencing with Section 25884),

Chapter 8 (commencing with Section 25895), Chapter 9 (commencing with Section 25898), Chapter 10 (commencing with Section 25900), Chapter 10.2 (commencing with Section 25906), Chapter 10.5 (commencing with Section 25920), Chapter 10.7 (commencing with Section 25930), Chapter 10.8 (commencing with Section 25940), Chapter 11 (commencing with Section 25950), Chapter 12 (commencing with Section 25960), Chapter 12.7 (commencing with Section 25967), Chapter 13 (commencing with Section 25970), Chapter 13.7 (commencing with Section 25989.500), Chapter 14 (commencing with Section 25990), Chapter 14.5 (commencing with Section 25995), and Chapter 14.7 (commencing with Section 25996.950) of Division 20 of, to repeal Part 1.5 (commencing with Section 437.01), Part 1.8 (commencing with Section 443), Part 1.85 (commencing with Section 444), Part 1.95 (commencing with Section 446), Part 1.96 (commencing with Section 447.70), Part 1.97 (commencing with Section 448), Part 3 (commencing with Section 1170), Part 3.5 (commencing with Section 1175), Part 6 (commencing with Section 1180), Part 6.9 (commencing with Section 1189.101), and Part 7 (commencing with Section 1190) of Division 1 of, to repeal Part 1 (commencing with Section 3700) and Part 2 (commencing with Section 4100) of Division 5 of, to repeal Division 2.3 (commencing with Section 1795), Division 4 (commencing with Section 3000), Division 9 (commencing with Section 10000), Division 9.5 (commencing with Section 10800), Division 9.7 (commencing with Section 10900), Division 10.1 (commencing with Section 11670), Division 17 (commencing with Section 23000), Division 21 (commencing with Section 26000), and Division 22 (commencing with Section 27000) of, the Health and Safety Code, relating to reorganization of the Health and Safety Code.

[Approved by Governor August 10, 1995. Filed with Secretary of State August 11, 1995.]

LEGISLATIVE COUNSEL'S DIGEST

SB 1360, Committee on Health and Human Services. Reorganization of the Health and Safety Code: public health.

Existing law sets forth in the Health and Safety Code various provisions relating to health and safety. Existing law requires the State Director of Health Services to conduct a comprehensive review of the statutes governing the protection of the public health as principally embodied in that code.

This bill would repeal existing provisions of the Health and Safety Code relating to public health and reenact those provisions into 7 new divisions in the Health and Safety Code for the purpose of

reorganizing the public health component of the Health and Safety Code and would make other technical changes.

This bill would state the intent of the Legislature to reorganize and clarify portions of the Health and Safety Code and thereby facilitate its administration. It would further state the Legislature's intent that the changes made to the Health and Safety Code, as reorganized by this bill, have only technical and nonsubstantive effect.

This bill would state the finding of the Legislature that the reorganization of the Health and Safety Code pursuant to this bill, in view of the nonsubstantive statutory changes made, will not result in new or additional costs to local agencies.

This bill would provide that any section of any act, other than the code maintenance act (SB 975), enacted in 1995 that takes effect on or before January 1, 1996, and that amends, amends and renumbers, adds, repeals and adds, or repeals a section that is amended, amended and renumbered, added, repealed and added, or repealed by this act, shall prevail over the amendment, amendment and renumbering, addition, repeal and addition, or repeal of that section by this act.

The people of the State of California do enact as follows:

SECTION 1. Section 27 is added to the Health and Safety Code, to read:

27. For purposes of this code:

(a) ''Communicable Disease Prevention and Control Act'' means Sections 104730, 104830 to 104860, inclusive, 113150, 113155, Part 1 (commencing with Section 120100) of, Chapter 1 (commencing with Section 120325, but excluding Section 120380) of Part 2 of, Part 3 (commencing with Section 120500) of, and Part 5 (commencing with Section 121350) of, Division 105.

(b) ''Hereditary Disorders Act'' means Article 1 (commencing with Section 124975) of Chapter 1 of Part 5 of Division 106, and Sections 125050, 125055, 125060, and 125065.

(c) ''Maternal and Child Health Program Act'' means Section 120380, Chapter 4 (commencing with Section 103925) of Part 2 of Division 102, Article 4 (commencing with Section 116875) of Chapter 5 of Part 12 of Division 104, Article 1 (commencing with Section 123225) of Chapter 1 of Part 2 of Division 106, Article 2 (commencing with Section 125000) of Chapter 1 of Part 5 of Division 106, and Sections 125075 to 125110, inclusive.

(d) ''Miscellaneous Food, Food Facility, and Hazardous Substances Act'' means Chapter 4 (commencing with Section 108100), Chapter 6 (commencing with Section 108675), and Chapter 7 (commencing with Section 108750) of Part 3 of, Chapter 3 (commencing with Section 111940), Chapter 4 (commencing with Section 111950), Chapter 5 (commencing with Section 112150), Chapter 6 (commencing with Section 112350), Chapter 7

(commencing with Section 112500), Chapter 8 (commencing with Section 112650), Chapter 9 (commencing with Section 112875), Chapter 10 (commencing with Section 113025), and Article 3 (commencing with Section 113250) of Chapter 11, of Part 6 of, and Chapter 4 (commencing with Section 113700) of Part 7 of, Division 104.

(e) ''Primary Care Services Act'' means Chapter 1 (commencing with Section 124400), Chapter 2 (commencing with Section 124475), Chapter 3 (commencing with Section 124550), Chapter 4 (commencing with Section 124575), Chapter 5 (commencing with Section 124600), Chapter 6 (commencing with Section 124800), and Article 1 (commencing with Section 124875) of Chapter 7 of, Part 4 of Division 106.

(f) ''Radiologic Technology Act'' means Sections 106965 to 107120, inclusive, and Chapter 6 (commencing with Section 114840) of Part 9 of Division 104.

SEC. 2. Section 1290 of the Health and Safety Code is amended to read:

1290. (a) Except as provided in subdivision (b) or (c), any person who violates this chapter or Section 127050 or 128600, or who willfully or repeatedly violates any rule or regulation adopted under this chapter or Section 127050 or 128600 is guilty of a misdemeanor and upon conviction thereof shall be punished by a fine not to exceed one thousand dollars ($1,000) or by imprisonment in the county jail for a period not to exceed 180 days, or by both the fine and imprisonment.

(b) Any person who violates Section 1286 is guilty of an infraction and shall be punished by a fine of not more than one hundred dollars ($100).

(c) Any person who willfully or repeatedly violates this chapter or Chapter 2.4 (commencing with Section 1417), excluding Sections 1425 and 1432, or any rule or regulation adopted under this chapter, relating to the operation or maintenance of a long-term health care facility as defined in Section 1418, is guilty of a misdemeanor and upon conviction thereof shall be punished by a fine not to exceed two thousand five hundred dollars ($2,500) or by imprisonment in the county jail for a period not to exceed 180 days, or by both.

In determining the punishment to be imposed upon a conviction under this subdivision, the court shall consider all relevant facts, including, but not limited to, the following:

(1) Whether the violation exposed the patient to the risk of death or serious physical harm.

(2) Whether the violation had a direct or immediate relationship to the health, safety, or security of the patient.

(3) Evidence, if any, of willfulness.

(4) The number of repeated violations.

(5) The presence or absence of good faith efforts by the defendant to prevent the violation.

(d) For the purposes of this section, ''willfully'' or ''willful'' means the person doing an act or omitting to do an act intends the act or omission, and knows the relevant circumstances connected therewith.

SEC. 3. Division 101 (commencing with Section 100100) is added to the Health and Safety Code to read:

DIVISION 101. ADMINISTRATION OF PUBLIC HEALTH

PART 1. CALIFORNIA DEPARTMENT OF HEALTH SERVICES

CHAPTER 1. ORGANIZATION OF THE DEPARTMENT

100100. There is in the state government in the Health and Welfare Agency, a State Department of Health Services.

100105. The department is under the control of an executive officer known as the Director of Health Services, who shall be appointed by the Governor, subject to confirmation by the Senate, and hold office at the pleasure of the Governor. The director shall receive the annual salary provided by Article 1 (commencing with Section 11550) of Chapter 6 of Part 1 of Division 3 of Title 2 of the Government Code.

Upon recommendation of the director, the Governor may appoint not to exceed two chief deputies of the department who shall hold office at the pleasure of the Governor. The salaries of the chief deputies shall be fixed in accordance with law.

100110. The director shall have the powers of a head of the department pursuant to Chapter 2 (commencing with Section 11150) of Part 1 of Division 3 of Title 2 of the Government Code.

100115. There is in the department a Division of Rural Health. The division shall administer Chapter 3 (commencing with Section 124550) and Chapter 4 (commencing with Section 124575) of Part 4 of Division 106, Section 101300, and Article 1 (commencing with Section 124600) of Chapter 5 of Part 4 of Division 106.

100117. The Legislature finds and declares all of the following:

(a) The AIDS pandemic continues to devastate California. Over 44,000 Californians have died of AIDS since 1981, and it is estimated that one out of every 200 Californians is infected with HIV, the virus believed to cause AIDS. Education remains the best tool to prevent the ongoing spread of HIV.

(b) The seroprevalence rate of HIV-infected persons is increasing dramatically in some groups. The incidence rate among women, people of color, at-risk youth, substance abusers, rural residents and their sexual partners is increasing, as is the rate of infection among

gay and bisexual men, especially in urban areas. It is clear that targeted financial resources must be directed to conduct effective HIV education and risk reduction.

(c) Many AIDS service providers, community-based organizations, and other advocacy groups lack the technical assistance necessary for them to access public and private grant moneys to serve their clients.

(d) In addition to prevention education efforts, there are additional unmet financial needs in the war against HIV infection and AIDS. These unmet needs include, but are not limited to, care and treatment of those with HIV, expanded medical and social behavioral research, funding for HIV antibody testing at both anonymous and confidential test sites throughout California, housing and financial assistance for those with HIV and their families, and mental health programs for people with HIV and those at risk for contracting AIDS.

(e) Numerous state agencies and departments conduct HIV-related programs, including the State Department of Health Services, the State Department of Social Services, the Department of Corrections, the State Department of Alcohol and Drug Programs, the State Department of Education, the State Department of Mental Health, the Department of the Youth Authority, and the University of California. Coordination of the various state funded programs will enhance the service delivery of HIV-related programs to Californians in need.

(f) An evaluation of state prevention and education efforts was conducted by the Institute for Health Policy Studies at the University of California, San Francisco and published in March of 1993. This report, entitled ''HIV Prevention in California,'' noted both positive achievements of state-run programs as well as opportunities for improvement. Among the primary recommendations of the study was the need to legislatively identify the Office of AIDS in the State Department of Health Services as the lead agency on HIV and AIDS to ensure the goal of state program coordination.

100119. There is in the State Department of Health Services an Office of AIDS. The State Department of Health Services, Office of AIDS, shall be the lead agency within the state, responsible for coordinating state programs, services, and activities relating to the human immunodeficiency virus (HIV), acquired immune deficiency syndrome (AIDS), and AIDS related conditions (ARC). Among its responsibilities, the State Department of Health Services, Office of AIDS, shall coordinate Sections 120875, Section 120880, Chapter 2 (commencing with Section 120800), Chapter 4 (commencing with Section 120900), Chapter 6 (commencing with Section 120950), Chapter 8 (commencing with Section 121025), Chapter 9 (commencing with Section 121050), Chapter 10 (commencing with Section 121075), Chapter 11 (commencing with Section 121150),

Chapter 12 (commencing with Section 121200), Chapter 13 (commencing with Section 121250), and Chapter 14 (commencing with Section 121300), of Part 4 of Division 105. Any reference in those provisions to the State Department of Health Services shall be deemed a reference to the Office of AIDS.

100120. All officers or employees of the department employed after July 1, 1978, shall be appointed by the director.

100125. Notwithstanding any other provision of state law, the department shall develop a proposal for consolidation of various programs affecting the health of mothers and children. The department, in developing the proposal, shall consult with the State Maternal Child and Adolescent Health Board, the California Conference of Local Health Officers, the California State Association of Counties, the Primary Care Clinic Advisory Committee, and other organizations interested in health services for women and children, as determined by the department, that shall assist it in identifying waivers of state and federal requirements that would be necessary to implement the proposal. The proposal shall consider administrative cost savings that may result from this consolidation. The department shall obtain waivers from state and federal requirements that the department determines are necessary to make the proposal viable. Any problem in obtaining the waivers shall be reported to the Legislature with the proposals. The department shall submit its proposal to the Legislature on or before January 1, 1984. Programs may include, but need not be limited to, the following:

(a) California Children's Services.
(b) WIC—Special Supplemental Food.
(c) Child Health and Disability Prevention.
(d) California Immunization Assistance Program.
(e) Children and Youth Project.
(f) Dental Disease Prevention.
(g) Rural Health.
(h) Indian Health.
(i) Pediatric Renal Failure Centers.
(j) Prepaid Health Plans.
(k) Family Planning.
(*l*) Infant Medical Dispatch Centers Program.
(m) Childhood Lead Program.
(n) Tuberculosis Control Program.
(o) Venereal Disease.
(p) SSI Disabled Children's Program.
(q) Other maternal and child health programs, including, but not limited to, the following:
(1) Sickle Cell.
(2) Prenatal Testing.
(3) Tay Sachs.
(4) Huntington's Disease.

(5) Prenatal Access.
(6) High Risk Followup.
(7) O.B. Access.
(8) Perinatal Health Clinics.
(9) Primary Care Clinics.
(10) Maternal and Child Health Grants.

Consolidation may include combining two or more specialized programs or the development of a single planning, evaluation, budgeting and reporting process for two or more programs that share a common target population. The department may submit more than one proposal for consolidation if two or more groupings of programs merit consolidation.

Each proposal shall be developed after a review by the department of consolidation efforts proposed or developed by the counties. In the design of the proposal, the department shall consider how state level plans may assist further development of these local efforts.

The department shall consult with the Department of Finance to develop a simplified budget and reporting format for programs that are recommended for consolidation.

The Department of Finance shall make modifications in the California Fiscal Information System as it deems necessary to accommodate the proposed program consolidation.

The Office of Statewide Health Planning and Development shall consult with the department with respect to the implementation of this section. The office shall incorporate recommendations for the consolidation of maternal, child, and adolescent health services in applicable policy plans adopted after January 1, 1983.

100130. Each state level consolidation proposal shall include plans for the development of the following:

(a) Common eligibility standards for programs included within the consolidated proposal, or, if federal law requires different eligibility standards for these programs, a common method for determining eligibility.

(b) A single form for the collection of necessary data from individuals, or a uniform format shared by all programs included in the consolidated proposal.

(c) A single form for reporting service delivery to the state.

(d) Shared plans, budgets, and fiscal accountability mechanisms, including audit procedures.

(e) Common intake points for services included in the consolidated system, that include eligibility determination, referral services, and follow through.

(f) A unified case management system.

(g) A method of determining the needs of, and developing services for, special populations.

(h) Implementation plans that propose solutions to any identified significant barriers or gaps in service.

100135. The director may seek and grant waivers that the department determines are reasonably necessary for the implementation of the department's proposed consolidations.

100140. It is the intent of the Legislature that the duties and responsibilities provided for in Sections 100125 and 100130 be accomplished by utilizing existing staff resources, and that no additional funding be provided other than that appropriated by the Legislature in the annual Budget Act.

CHAPTER 2. GENERAL POWERS OF THE DEPARTMENT

Article 1. General Provisions

100150. The State Department of Health Services succeeds to and is vested with all the duties, powers, purposes, responsibilities, and jurisdiction of the State Department of Health as they relate to public health, licensing and certification of health facilities, except community care facility licensing to which the State Department of Social Services succeeds, and any other functions performed by the Division of Public Health of the State Department of Health on July 1, 1978, unless the function is transferred to a different state agency or department as a result of another provision of the statutes of the 1977–78 Regular Session of the Legislature amending this section.

''State department,'' ''department,'' or ''State Department of Health'' as used in this code, except in Article 7.5 (commencing with Section 416) of Chapter 2 of Part 1 of Division 1 or as otherwise specified in this code, means the State Department of Health Services.

The Office of Statewide Health Planning and Development shall assume the functions and responsibilities of the Facilities Construction Unit of the former State Department of Health, including, but not limited to, those functions and responsibilities performed pursuant to the following provisions of law: Sections 13113 and 127050; Article 1 (commencing with Section 129000) of Chapter 1 of, and Chapter 2 (commencing with Section 129375) of, Part 6 of, and Part 7 (commencing with Section 129675) of, Division 107.

100155. The department may use the unexpended balance of funds available for use in connection with the performance of the functions of the State Department of Health to which the department has succeeded pursuant to Section 100150.

100160. All officers and employees of the State Department of Health heretofore performing any duty, power, purpose, responsibility, or jurisdiction to which the department has succeeded, who, on July 1, 1978, are serving in the state civil service, other than as temporary employees, and engaged in the performance of a function vested in the department by Section 100150 shall be transferred to the department. The status, positions, and rights of

these persons shall not be affected by the transfer and shall be retained by them as officers and employees of the department, pursuant to the State Civil Service Act except as to positions exempted from civil service.

100165. The department shall have possession and control of all records, papers, officers, equipment, supplies, moneys, funds, appropriations, land or other property, real or personal, held for the benefit or use of any state agency whose functions are vested in the department by Section 100150.

100170. The department may commence and maintain all proper and necessary actions and proceedings for any or all of the following purposes:

(a) To enforce its regulations.

(b) To enjoin and abate nuisances dangerous to health.

(c) To compel the performance of any act specifically enjoined upon any person, officer, or board, by any law of this state relating to the public health.

(d) To protect and preserve the public health.

It may defend all actions and proceedings involving its powers and duties. In all actions and proceedings it shall sue and be sued under the name of the department.

100175. The department may abate public nuisances.

100180. The department may advise all local health authorities, and, when in its judgment the public health is menaced, it shall control and regulate their action.

100185. (a) The department may perform any of the following activities relating to the protection, preservation, and advancement of public health:

(1) Studies.

(2) Demonstrations of innovative methods.

(3) Evaluations of existing projects.

(4) Provision of training programs.

(5) Dissemination of information.

(b) In performing an activity specified in subdivision (a), the department may do any of the following:

(1) Perform the activity directly.

(2) Enter into contracts, cooperative agreements, or other agreements for the performance of the activity.

(3) Apply for and receive grants for the performance of the activity.

(4) Award grants for the performance of the activity.

100190. The department may provide for consultant and advisory services and for the training of technical and professional personnel in educational institutions and field training centers approved by the department, and for the establishment and maintenance of field training centers in local health departments and in the department.

100195. The department shall cause special investigation of the preparation and sale of drugs and food and their adulteration.

100200. The department shall perform duties as required by law for the detection and prevention of the adulteration of articles used for food and drink, and for the punishment of persons guilty of violation of any law providing against their adulteration.

100205. The department shall examine and may prevent the pollution of sources of public domestic water and ice supply.

100210. The department shall maintain a program of Drinking Water and Environmental Management.

100215. The department may maintain a mental health service that shall advise and assist local departments of health and education in the establishment of mental health services, particularly in connection with maternal and child health conferences and in the schools of the state.

The department may conduct these activities as may be required in the development of mental health services as related to public health.

This section does not authorize any form of compulsory medical or physical examination, treatment, or control of any person.

100220. With the approval of the Department of Finance, and for use in the furtherance of the work of the department, the director may accept (a) grants of interest in real property, and (b) gifts of money from public agencies or from organizations or associations organized for scientific, educational, or charitable purposes.

100225. The department shall enforce Section 383b of the Penal Code.

100230. (a) Any person who willfully sells, keeps for sale, or offers for sale any food, drug, device, or cosmetic knowing, after a written notice from either (1) a manufacturer, wholesaler, distributor, or importer, or (2) the department or a local health officer that the product linked to an outbreak of illness, injury, or product tampering is being ordered removed from sale by the department pursuant to Section 100180, shall, upon conviction, be punished by a fine of not less than two thousand dollars ($2,000) nor more than ten thousand dollars ($10,000) for each day of violation, or by imprisonment in the county jail for not more than one year, or by both a fine and imprisonment.

(b) If a second or subsequent violation is committed after a previous conviction under this section has become final, the person shall be punished by a fine of not less than five thousand dollars ($5,000) nor more than twenty-five thousand dollars ($25,000) for each day of violation, or by imprisonment in the state prison, or by both a fine and imprisonment.

(c) Notwithstanding any other provision of law, the court may suspend the minimum fines provided for in this section if it

determines that there are circumstances in mitigation and the court states on the record its reasons for suspending the minimum fine.

100235. Whenever any person violates any provision of Section 100230, the court may, as a condition of probation, order the defendant to pay, in lieu of any fine, any expenses, both direct and indirect, incurred by a local health department or the department in monitoring compliance with the order pursuant to Section 100180, including, but not limited to, the costs of conducting inspections and imposing embargoes. The total costs payable to the department and local health departments collectively imposed pursuant to this section shall not exceed the maximum fine for the offense of which the defendant is convicted.

Any amount collected under this section shall be paid to the local health department incurring the expenses or, if to reimburse costs of the department, into the General Fund.

Article 2. State Laboratories

100250. The department shall maintain a laboratory and branch laboratories as may be necessary to perform the microbiological, physical and chemical analyses required to meet the responsibilities of the department.

100255. The department may prepare or purchase biological products and distribute them at cost.

Article 3. Regulatory Authorization and Review

100275. (a) The department may adopt and enforce regulations for the execution of its duties.

(b) All regulations heretofore adopted by the department or its predecessors relating to public health, the licensing and certification of health facilities, except the licensing of community care facilities, or any other function performed by the Division of Public Health of the department, and in effect immediately preceding July 1, 1978, shall remain in effect and shall be fully enforceable unless and until readopted, amended, or repealed by the director or as otherwise provided by Section 25 or other provisions of law. This subdivision shall not apply to any regulation relating to a function transferred to a different state agency or department as a result of another provision of the statutes enacted during the 1977–78 Regular Session.

100280. (a) The director shall adopt emergency regulations pursuant to Section 1267.7 implementing Chapter 327 of the Statutes of 1982, effective July 1, 1983, in accordance with Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code. The adoption of regulations shall be deemed to be an emergency, and necessary for the immediate preservation of the public peace, health and safety, or general welfare.

(b) Notwithstanding Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code, regarding the duration of emergency regulations, any regulations adopted by any state agency in order to implement this section, shall remain in effect until June 30, 1984.

100285. (a) Notwithstanding Section 11346.1 of the Government Code regarding the duration of emergency regulations, any regulations adopted by the director pursuant to Section 100280 and in effect on June 27, 1984, shall remain in effect until emergency regulations adopted pursuant to subdivision (b) become effective.

(b) The director shall adopt emergency regulations pursuant to Section 1267.7, to be effective August 1, 1984, in accordance with Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code. The adoption of the regulations shall be deemed to be an emergency and necessary for the immediate preservation of the public peace, health and safety, or general welfare.

(c) The director shall transmit emergency regulations adopted pursuant to subdivision (b) directly to the Secretary of State for filing, and the regulations shall become effective immediately upon filing.

(d) Upon completion of the formal regulation adoption process and prior to the expiration of the 120-day duration period of emergency regulations, the director shall transmit directly to the Secretary of State for filing the adopted regulations, the rulemaking file, and the certification of compliance, as required by subdivision (e) of Section 11346.1 of the Government Code.

(e) Notwithstanding Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code, any regulations adopted by the director pursuant to this section and any documentation filed with those regulations shall not be subject to any review, approval, disapproval, or repeal by the Office of Administrative Law.

100290. Notwithstanding any other provision of law, the department shall submit all of its regulations on matters related to statutory responsibilities delegated to or enforced by local health departments, except emergency regulations, to the California Conference of Local Health Officers for review and comment prior to adoption. If the department deems it appropriate to implement the proposed regulations or parts thereof, contrary to the recommendations of the conference, the department shall make a public finding summarizing the reasons for acting contrary to these recommendations.

100295. The department, after consultation with and approval by the Conference of Local Health Officers, shall by regulation establish standards of education and experience for professional and technical personnel employed in local health departments and for the organization and operation of the local health departments. These

standards may include standards for the maintenance of records of services, finances and expenditures, that shall be reported to the director in a manner and at times as the director may specify.

100300. When a dispute arises as to the interpretation or enforcement of regulations of the department that are being enforced by a city, city and county, county, or district, a request for clarification or interpretation may be submitted to the department. The department shall make a determination of the proper interpretation and required enforcement when so requested by a party to the dispute.

In making its determination the department may conduct a hearing where all interested parties may present relative comments or arguments.

Determinations of the department made pursuant to this section shall be transmitted to the concerned local agency and the involved party or parties within 60 days after the receipt of the request. The determination of the department shall be binding upon the local agency and the parties subject to the regulations of the department, except when the matter may be subject to judicial review.

100305. Notwithstanding any other provision of law, the department by regulation may provide for the issuance and renewal on a two-year basis of licenses, certificates of registration, or other indicia of authority issued pursuant to this code by the department.

The department may by regulation set the fee for the two-year license, certificate of registration, or other indicia, not to exceed twice the annual fee for issuance or renewal set by statute.

100310. Notwithstanding any other provision of law, but to the extent consistent with applicable federal law or regulation, the director may, after a request by a board of supervisors of an affected county and after a public hearing held in accordance with Section 11346 of the Government Code, waive regulations pertaining to the provision of hospital services in a hospital operated by a county or under contract to a county for a county with a population of 200,000 or less on January 1, 1980, if the director makes a finding that the waiver would not affect adversely the health and safety of persons in the county.

The authority contained in this section shall be in addition to, and shall not supersede or limit, any other provision of law authorizing the waiver by the department of requirements contained in regulations adopted by the department relating to health facilities.

Article 4. Population, Public Health, and Environmental Study

100325. The department shall cause special investigations of the sources of morbidity and mortality and the effects of localities, employments, conditions and circumstances on the public health and the department shall perform other duties as may be required in

procuring information for state and federal agencies regarding the effects of these conditions on the public health.

100330. All records of interviews, written reports, and statements procured by the department or by any other person, agency, or organization acting jointly with the department, in connection with special morbidity and mortality studies shall be confidential insofar as the identity of the individual patient is concerned and shall be used solely for the purposes of the study. The furnishing of this information to the department or its authorized representative, or to any other co-operating individual, agency or organization in any special study, shall not subject any person, hospital, sanitarium, rest home, nursing home, or other organization furnishing this information to any action for damages. This section shall not apply to general morbidity and mortality studies customarily and continuously conducted by the department that do not involve patient identification.

Nothing in this section shall prohibit the publishing by the department of statistical compilations relating to morbidity and mortality studies that do not identify individual cases and sources of information or religious affiliations.

100335. The department may do all of the following activities:

(1) Make a continuing study of births, deaths, marriages, and divorces, in order to provide a continuing analysis of trends to state agencies and to the Legislature.

(2) Request and receive demographic and population data from the Department of Finance.

(3) Make any additional collection of data necessary to describe and analyze fertility, family formation and dissolution, abortion practices, and other factors related to population dynamics, public health, and the environment.

(4) Assess the health, environmental, and related effects of current and projected population.

(5) Formulate recommendations for programs, consistent with individual rights and the integrity of the environment, to respond to projected trends.

100340. The department may report to the Legislature, on the fifth calendar day of every second regular legislative session, on its findings related to public health, the environment, and population trends and distribution, and may make recommendations concerning the consequences of projected growth and change pertinent to the planning and legislative concerns of the state.

CHAPTER 3. ADDITIONAL ADMINISTRATIVE PROVISIONS

Article 1. Advance Payments to Small Contractors

100350. The Legislature finds that many programs of the department are hindered by the length of time required for the state

to execute contracts and pay vendor claims. These programs include, but are not limited to, community hypertension, rural health services development, family planning, genetic counseling, supplemental feeding program for women, infants, and children, sickle cell disease and newborn screening projects. This hardship is particularly felt by new or small community-based public or private nonprofit agencies with modest reserves and cash-flow problems. It is the intent of the Legislature that advance payment authority be established for the department in order to alleviate those problems for those types of contractors to the extent possible.

Notwithstanding any other provision of law, the department may, to the extent funds are available, provide for advance payments for services to be performed under any contract, with a total annual contract amount of two hundred thousand dollars ($200,000) or less, that the department determines has been entered into with any small, community-based public or private nonprofit agency with modest reserves and potential cash-flow problems. These programs include, but are not limited to, the following:

(a) Community hypertension.

(b) Genetic disease programs.

(c) Supplemental feeding programs for women, infants and children.

(d) Sickle cell disease.

(e) Newborn screening projects.

(f) Rural health programs.

(g) Indian health programs.

No advance payment or aggregate of advance payments made pursuant to this section shall exceed 25 percent of the total annual contract amount. No advance payment should be made pursuant to this section if the applicable federal law prohibits advance payment.

Article 2. Public Health Federal Fund

100375. The Public Health Federal Fund in the State Treasury is hereby created. All grants of money received by the state from the United States, the expenditure of which is administered through or under the direction of the department, shall, on order of the Controller, be deposited in the Public Health Federal Fund.

100380. All money in the Public Health Federal Fund is hereby appropriated to the department, without regard to fiscal years, for expenditure for the purposes for which the money deposited therein is made available by the United States.

100385. The department and the Controller shall keep a record of the classes and sources of income deposited in, or transferred to, the Public Health Federal Fund, and of the disbursements and transfers therefrom.

100390. The Director of Finance and the Controller may approve any general plan that meets the following requirements:

(a) Any expenditures that are a proper charge against the money made available by the United States and deposited in the Public Health Federal Fund may be paid in the first instance from any appropriation from the General Fund, expenditures from which are administered through or under the direction of the department.

(b) Any expenditures that are a proper charge against an appropriation from any special fund in the State Treasury, expenditures from which are administered through or under the direction of the department, may be paid in the first instance from any appropriation from the General Fund, expenditures from which are administered through or under the direction of the department.

(c) The General Fund shall be reimbursed for expenditures made therefrom that are a proper charge against the Public Health Federal Fund or against any appropriation from any special fund.

Such a general plan may provide for advance transfers from the Public Health Federal Fund to the General Fund, based on estimates of expenditures that will be subject to reimbursement from the Public Health Federal Fund pursuant to the plan, and may provide for reimbursements to the Public Health Federal Fund, when necessary.

Request for reimbursement or transfer pursuant to the plan shall be furnished to the Controller in writing by the department, accompanied by financial statements as the plan may provide; and on order of the Controller, the required amount shall be transferred in accordance with the plan.

Article 3. Special Deposit Funds

100400. All grants or donations of money received by the state from sources other than the United States, the expenditure of which is administered through or under the direction of the department, shall, on order of the Controller, be deposited in the Special Deposit Fund, subject to Article 2 (commencing with Section 16370) of Chapter 2 of Part 2 of Division 4 of Title 2 of the Government Code. The Controller shall designate, by name, separate accounts within the Special Deposit Fund covering the accountability for each class of grant or donation deposited pursuant to this section; and the department and the Controller shall keep a record of the classes and sources of income deposited in, or transferred to, each of the accounts in the Special Deposit Fund, and of the disbursements therefrom.

All moneys deposited in the Special Deposit Fund pursuant to this section shall be available, without regard to fiscal years, for expenditure for the purposes for which the money was made available to the state.

Article 4. Fees or Charges for Issuance and Renewal of Documents

100425. (a) The fees or charges for the issuance or renewal of any permit, license, registration, or document pursuant to Sections 1639.5, 1676, 1677, 2202, 2805, 11887, 100720, 100860, 106700, 106890, 106925, 107080, 107090, 107095, 107160, 110210, 110470, 111130, 111140, 111630, 112405, 112510, 112750, 112755, 113060, 113065, 115035, 115065, 115080, 116205, 117923, 117995, 118045, 118210, and 118245 shall be adjusted annually by the percentage change printed in the Budget Act for those items appropriating funds to the department. After the first annual adjustment of fees or charges pursuant to this section, the fees or charges subject to subsequent adjustment shall be the fees or charges for the prior calendar year. The percentage change shall be determined by the Department of Finance, and shall include at least the total percentage change in salaries and operating expenses of the state department. However, the total increase in amounts collected under this section shall not exceed the total increased cost of the program or service provided.

(b) The department shall publish annually a list of the actual numerical fee charges for each permit, license, certification, or registration governed by this section. This adjustment of fees and publication of the fee list shall not be subject to the requirements of Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code.

100430. (a) The fees or charges for a record search or for the issuance of any license, permit, registration, or any other document pursuant to Sections 26832, 26840, and 26859 of the Government Code, or Sections 102525, 102625, 102670, 102725, 102750, 103050, 103065, 103225, 103325, 103400, 103425, 103450, 103525, 103590, 103595, 103625, 103650, 103675, 103690, 103695, 103700, 103705, 103710, 103715, 103720, 103725, and 103730 of this code, may be adjusted annually by the percentage change determined pursuant to Section 100425.

The base amount to be adjusted shall be the statutory base amount of the fee or charge plus the sum of the prior adjustments to the statutory base amount. Whenever the statutory base amount is amended, the base amount shall be the new statutory base amount plus the sum of adjustments to the new statutory base amount calculated subsequent to the statutory base amendment. The actual dollar fee or charge shall be rounded to the next highest whole dollar.

(b) Beginning January 1, 1983, the department shall annually publish a list of the actual numerical fee charges as adjusted pursuant to this section. This adjustment of fees and the publication of the fee list shall not be subject to the requirements of Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code.

100435. For the fee specified in Section 26840 of the Government Code, the adjustment authorized by Section 100430 shall apply only to the portion of the fee designated for the State Registrar of Vital Statistics. Any increase in this component of the fee shall be added to the total fee authorized by Section 26840 of the Government Code.

100440. For the fee specified in subdivision (c) of Section 103625, the adjustment authorized by Section 100430 shall apply to the additional fee charged to applicants other than public agency applicants for certified copies of marriage or marriage dissolution records, as well as to the other fees imposed by that section.

100445. (a) The fees or charges required to accompany an application for the issuance or renewal of any license pursuant to Sections 1403, 1575.9, and 1729 shall be adjusted annually, commencing July 1, 1988, by the percentage change printed in the Budget Act and determined by dividing the General Fund appropriation to the Licensing and Certification Division in the current state fiscal year by the General Fund appropriation to the Licensing and Certification Division in the preceding state fiscal year. Commencing July 1, 1988, the fees or charges subject to adjustment pursuant to this subdivision shall be the fees or charges that would have been payable in the prior calendar year without regard to the provisions of subdivision (b).

(b) The fees or charges required to accompany an application for the issuance or renewal of any license pursuant to Section 1729 shall also be adjusted annually, commencing July 1, 1988, by a percentage determined by dividing the total amount of federal funds available for home health agencies during the federal fiscal year ending on September 30 of the year immediately preceding the effective date of the change in fees, less federal funds available for home health agencies for the federal fiscal year that began on October 1 of the year immediately preceding the effective date of the change in fees, by the total estimated revenue derived pursuant to Section 1729 for the fiscal year beginning July 1 of the year immediately preceding the effective date of the change in fees.

(c) The department shall by July 1 of each year publish a list of the actual numerical fee charges as adjusted pursuant to this section. This adjustment of fees and the publication of the fee list shall not be subject to the requirements of Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code.

100450. (a) The fees or charges required to accompany an application for the issuance or renewal of any license pursuant to Section 1300 of the Business and Professions Code or pursuant to Section 1616 shall be adjusted annually by the percentage change printed in the Budget Act and determined by dividing the General Fund appropriation to Laboratory Field Services in the current state fiscal year by the General Fund appropriation to Laboratory Field

Services in the preceding state fiscal year. The fees or charges subject to adjustment pursuant to this subdivision shall be the fees or charges that would have been payable in the prior calendar year without regard to the provisions of subdivision (c).

(b) Commencing January 1, 1995, upon establishment of the Clinical Laboratory Improvement Fund, the annual adjustment required under subdivision (a) and printed in the annual Budget Act shall be determined by dividing the current fiscal year appropriation to the Clinical Laboratory Improvement Fund by the General Fund appropriation to Laboratory Field Services of the State Department of Health Services in the preceding fiscal year. Thereafter, the annual adjustment required by subdivision (a) and printed in the annual Budget Act shall be determined by dividing the current fiscal year appropriation to the Clinical Laboratory Improvement Fund by the Clinical Laboratory Improvement Fund appropriation in the preceding fiscal year.

(c) The fees or charges shall also be adjusted annually by a percentage determined by dividing the total amount of federal funds available for all programs in Laboratory Field Services of the State Department of Health Services during the federal fiscal year ending on September 30 of the year immediately preceding the effective date of the change in fees, less federal funds available for the federal fiscal year which began on October 1 of the year immediately preceding the effective date of the change in fees as indicated in any grant award letter received from the federal Department of Health and Human Services on or before November 1 of that federal fiscal year, by the total estimated revenue derived pursuant to Section 1300 of the Business and Professions Code and Section 1616 for the fiscal year beginning July 1 of the year immediately preceding the effective date of the change in fees.

(d) The department shall by January 1 of each year publish a list of actual numerical fee charges as adjusted pursuant to this section. This adjustment of fees and the publication of the fee list shall not be subject to the requirements of Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code.

Article 5. Review of Statutes

100475. (a) The director shall conduct a comprehensive review of the statutes governing the protection of the public health, as principally embodied in this code. The review shall be conducted by the director in cooperation with county and city representatives and the California Conference of Local Health Officers and shall produce the following:

(1) A list of those sections of law that should be deleted due to ambiguity, conflict with other statutes, inappropriateness, or obsolescence.

(2) A reorganization by chapter and section for all public health laws.

(3) Recommendations regarding new or expanded legislation that should be added to balance or provide equity, avoid conflict, or meet defined needs.

(4) A process to provide continuous review of public health statutes and regulations to avoid obsolescence and identify need for new legislation.

(b) A report shall be submitted to the Legislature at the conclusion of the review, but no later than April 1, 1993. The report shall address the objectives of the review, specified in subdivision (a) and shall be jointly submitted by the director, county and city representatives, and the California Conference of Local Health Officers, with addendums as appropriate to further explain the recommendations of any party.

Article 6. Richmond Laboratory and Office Facility

100500. (a) The Director of General Services may acquire real property in order to construct a laboratory and office facility or remodeling an existing facility in the City of Richmond, for the use of the State Department of Health Services.

(b) Revenue bonds, negotiable notes, and negotiable bond anticipation notes may be issued by the State Public Works Board pursuant to the State Building Construction Act of 1955 (Part 10b (commencing with Section 15800) of Division 3 of Title 2 of the Government Code) to finance the acquisition and construction of a new laboratory and office facility, or remodeling of an existing facility for the State Department of Health Services in the City of Richmond. The amount of the bonds plus the cost of equipment shall not exceed fifty-four million five hundred thousand dollars ($54,500,000) as necessary for land acquisition including, but not limited to, land needed for planned future expansion of the laboratory and office facility, environmental studies, preliminary plans, working drawings, construction, furnishings, equipment, and all related betterments and improvements. Notwithstanding Section 13332.11 of the Government Code, the State Public Works Board may authorize the augmentation of the amount authorized under this section for the project by an amount not to exceed 10 percent of the amount appropriated for this project.

(c) The State Public Works Board may borrow funds for project costs from the Pooled Money Investment Account pursuant to Sections 16312 and 16313 of the Government Code.

(d) The amount of revenue bonds, negotiable notes, or negotiable bond anticipation notes to be sold shall equal the cost of acquisition, including land, construction, preliminary plans, and working drawings, construction management and supervision, other costs relating to the design, construction, or remodeling of the facilities, and any additional sums necessary to pay interim and permanent financing costs. The additional amount may include interest and a reasonable required reserve fund. At least 30 days prior to the signing of the agreement for the acquisition, construction, or remodeling of the Richmond facility pursuant to subdivision (b), the State Director of Health Services and the Director of General Services shall jointly report to the Joint Legislative Budget Committee and the fiscal committees of each house of the Legislature. The report shall specify (1) the terms of the proposed agreement, (2) how the acquisition, construction, or remodeling will meet the needs of the State Department of Health Services for laboratory facilities in the East Bay area, and (3) implementation plans for the Richmond facility, including project planning guides and cost estimates for the project.

100505. It is the intent of the Legislature to fully utilize current state real property assets and to encourage joint land use between public entities. Therefore, it is the Legislature's intent that the development of the State Department of Health Services' laboratory and office facility, as authorized by Section 100500 occur on property owned by the Regents of the University of California, commonly known as the Richmond Field Station in Richmond, California.

100510. (a) Subject to the approval by the Regents of the University of California and the Public Works Board, of a land exchange agreement that is consistent with this section, a land exchange shall occur in which the state-owned real property located at 2151 Berkeley Way, Berkeley, shall be exchanged for real property located on the University of California, Richmond Field Station, owned by the Regents of the University of California, to allow the department to construct a laboratory and office facility pursuant to Section 100500 and planned future expansion to meet its programmatic needs.

(b) In exchange for no more than 11.5 acres on the northwest corner of the Richmond Field Station, with the understanding that the department shall negotiate with the regents for additional land to provide whatever additional employee parking is necessary, and upon vacating the property at 2152 Berkeley Way, the department shall transfer title to the real property located at 2151 Berkeley Way, Berkeley, to the Regents of the University of California under all of the following conditions:

(1) The department shall be responsible for the future demolition of the building, and any other improvements, located at 2151 Berkeley Way, Berkeley. The demolition of this property shall begin within six months of the department vacating the property 2152

Berkeley Way, Berkeley and be completed with all due diligence but no later than two years from the beginning date of demolition.

(2) The department and the University of California shall each be responsible for ensuring the property they exchange is free of contamination to the extent provided by law.

(3) The department shall consult with representatives of local environmental organizations, the University of California at Berkeley, and the City of Richmond regarding the site plan of the laboratory and office facility on the Richmond Field Station to meet the department's programmatic needs, and to resolve environmental concerns on the property.

(4) The sale of the department property located at 2002 Acton Street, Berkeley, shall be commenced by the Department of General Services on behalf of the department at the time the new laboratory and office facility at the Richmond Field Station is occupied. The sale of this property shall be to a private entity causing the property to revert to the tax rolls, with the proceeds deposited in the General Fund.

(5) Within 12 months of the transfer of title of the property at 2151 Berkeley Way, Berkeley, the regents shall offer for sale, lease, or exchange, for nontax exempt uses, that portion of the property bounded on the west by Shattuck Avenue, on the south by Berkeley Way, on the north by Hearst, and on the east by a marking of approximately 135 feet from the west boundary of the property. The proceeds of the sale, lease, or exchange of this property shall be to the credit of the Regents of the University of California.

(c) The Regents of the University of California shall, by June 1, 1995, either preliminarily approve or disapprove the exchange of real properties between the University of California and the department as provided for in this section. The regents, the Public Works Board, and the department shall give final approval or disapproval of the real property exchange as specified in this section within three months of their receipt of final environmental documentation as required by the California Environmental Quality Act, Division 13 (commencing with Section 21000) of the Public Resources Code on the department's project at the Richmond Field Station site.

(d) In the event the City of Richmond should approve the relocation of the railroad tracks currently located north of the Richmond Field Station site, the city shall be responsible for necessary mitigation measures to ensure that the relocation of the railroad tracks does not negatively affect the scientific work and studies being conducted by the department.

(e) It is the intent of the Legislature that both parties receive equal value as a result of the land exchange agreement described in subdivision (a). The determination of equal value shall be approved by the Regents of the University of California and the State Public

Works Board prior to the final approval of the land exchange agreement.

(f) This section shall not apply to the University of California, except to the extent that the Regents of the University of California, by appropriate resolution, make it applicable.

100515. In the event the regents do not preliminarily approve this project by June 1, 1995, or final approval is not forthcoming from the Regents, the board, or the department after completion of the final environmental documentation pursuant to Section 100510, the department shall obtain property elsewhere in the City of Richmond for the critically needed laboratory. Upon completion of the new department facility in Richmond, the property at 2151 Berkeley Way, Berkeley, shall, as determined by the department, either:

(a) Be retained by the department to meet additional facility needs. Any future development by the department of 2151 Berkeley Way, Berkeley, shall, to the extent feasible, include joint use between the department and the University of California Berkeley School of Public Health.

(b) Be sold to a private entity by the Department of General Services on behalf of the department in order to cause the property to revert to the tax rolls. Any proceeds from the sale of 2151 Berkeley Way, Berkeley, shall be deposited in the General Fund.

Article 7. Contract Uniformity

100525. It is the Legislature's intent in enacting this article to promote efficiency in the administration of multiple contracts between nonprofit organizations and the divisions of the department by requiring uniform provisions concerning fringe benefits. Nothing contained in this article shall be construed to mandate any personnel policies, procedures, or fringe benefits as a condition of contracting with the state. In addition, this article shall not supersede or amend any agreement that may have been entered into, or may be entered into in the future, between a nonprofit corporation and its employees, agents, or employee representative organization.

100530. Notwithstanding any other provision of law, the department shall review the following categorical programs and develop a procedure by which a contracting nonprofit organization is notified at the execution of a contract of the terms and conditions relating to the allowable costs associated with personnel, primary care grants-in-aid, maternal and child health, family planning, women, infant and children, dental disease prevention, child health and disability prevention, California children's services, preventive health care for the aging, rural health services, farmworker health services, California health services corps, American Indian health services, genetically handicapped programs, hypertension, perinatal health services, immunization, adolescent family life, and other

programs that the department wishes to include within the scope of this article.

100535. Nothing contained in this article shall conflict with any mandate imposed by laws or regulations of the state or federal government.

100540. The department shall take the steps necessary to achieve uniformity among contracts.

Article 8. Consolidation of Contracts

100550. Notwithstanding any other provisions of state law or any division in the allocation of funds in the Budget Act, the department may, within its authority to contract with a provider for the provision of health services, enter into a single contractual instrument encompassing services in any number of health services subject areas, limited to the following: primary care, maternal and child health, woman, infant, and child care, family planning, rural health services, migrant and seasonal farmworker care, child health and disability prevention, genetic disease, hypertension, grants-in-aid, American Indian health, adult health care, and dental care, except that federally funded programs requiring separate accounting and reporting shall preserve the separate accounting and reporting for contracts executed pursuant to this article.

100555. To the extent that a reduction in administrative costs would thereby result, any agency or agencies authorized to conduct audits under any state health services program that is the subject of a contract with a provider shall conform the scope of any audit to include other health services programs encompassed by the contract for which the agency or agencies have authority to conduct audits.

100560. Notwithstanding any other provision of state law, any contract under this article shall be subject to review and approval by the Department of General Services.

100565. No provision of this article shall be construed to prohibit the department from providing under any contract entered into under this article for reimbursement on the basis of negotiated rates, capitation, fee-for-service, or any other method designed to reduce administrative costs.

100570. In order to implement this article, the department may establish a single account wherein all funds for eligible programs may be deposited for purposes of contracting in a single form.

Article 9. Pest Spray Reports

100575. (a) By the 10th of each month, a person engaged in the business of pest control under the authority of a license issued pursuant to Article 1 (commencing with Section 11701), Chapter 4, Division 6 of the Food and Agricultural Code shall file a spray report

with the county agricultural commissioner of each county in which the person has treated property during the previous month.

(b) The spray report shall include the name and address of the person and, for each property treated, the following information:

(1) The name and address of the owner of the property treated.

(2) The name and address of the owner of the crop treated.

(3) The type of crop treated.

(4) The date, time, and method of treatment.

(5) The type, quantity, and concentration of each pesticide used in the treatment.

(6) The type of insect or pest to be controlled.

(7) The number of trees or acres treated.

(8) Any other information that the department may deem necessary in view of conditions that may constitute a menace to life, health, or safety of individuals living or working in areas where pesticides are applied.

(c) Spray reports filed pursuant to this section are public records that shall be made available by the county agricultural commissioners for public inspection.

CHAPTER 4. REGULATION OF LABORATORY SERVICES

Article 1. (Reserved)

Article 2. Licensing of Laboratories

100700. The department shall adopt and publish rules and regulations to be used in approving and governing the operation of laboratories engaging in the performance of tests referred to in Sections 100710 and 100715, including the qualifications of the employees who perform the tests, that it determines are reasonably necessary to ensure the competence of the laboratories and employees to prepare, analyze, and report the results of the tests.

100710. The testing by or for law enforcement agencies of blood, urine, or tissue for the purposes of determining the concentration of ethyl alcohol in the blood of persons involved in traffic accidents or in traffic violations shall be performed only by a laboratory approved and licensed by the director for the performance of these tests.

100715. The testing of breath samples by or for law enforcement agencies for purposes of determining the concentration of ethyl alcohol in the blood of persons involved in traffic accidents or in traffic violations shall be performed in accordance with regulations adopted by the department.

The regulations shall establish the procedures to be used by law enforcement agencies in administering breath tests for the purposes of determining the concentration of ethyl alcohol in a person’s blood. The regulations shall be adopted and published in accordance with

Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code.

100720. Each laboratory in the state that performs the tests referred to in Sections 100710 and 100715, shall be licensed by the director. Each of these laboratories, other than a laboratory operated by the state, city or county or other public agency shall upon application for licensing pay a fee to the department in an amount, to be determined by the department, that will reimburse the department for the costs incurred by the department in the issuance and renewal of these licenses. On or before each January 1 of each year thereafter, each of these laboratories shall pay to the department a fee so determined by the department.

100725. On or after January 1, 1971, the department shall enforce this chapter and regulations adopted by the board.

100730. On or after January 1, 1971, the department shall annually publish a list of approved and licensed laboratories engaging in the performance of tests referred to in Sections 100710 and 100715.

100735. Every approved and licensed laboratory shall be periodically inspected by the department. Reports of each inspection shall be prepared on forms furnished by the department and shall be filed with the department.

100740. Any license issued pursuant to Section 100720 may be suspended or revoked by the director for any of the reasons set forth in Section 100750. The director may refuse to issue a license to any applicant for any of the reasons set forth in Section 100745. The proceedings under this article shall be conducted in accordance with Chapter 5 (commencing with Section 11500) of Part 1 of Division 3 of Title 2 of the Government Code, and the director shall have the powers and duties granted therein.

100745. The director may deny a license if the applicant or any partner, officer or director thereof:

(a) Fails to meet the qualifications established by the department pursuant to this article for the issuance of the license applied for.

(b) Was previously the holder of a license issued under this article that was revoked and never reissued or that was suspended and the terms of the suspension have not been fulfilled.

(c) Has committed any act involving dishonesty, fraud, or deceit whereby another was injured or whereby the applicant has benefited.

100750. The director may suspend, revoke, or take other disciplinary action against a licensee as provided in this article if the licensee or any partner, officer or director thereof:

(a) Violates any of the regulations adopted by the department pursuant to this article.

(b) Commits any act of dishonesty, fraud, or deceit whereby another is injured or whereby the licensee benefited.

(c) Misrepresents any material fact in obtaining a license.

100755. The director may take disciplinary action against any licensee after a hearing as provided in this article by any of the following:

(a) Imposing probation upon terms and conditions set forth by the director.

(b) Suspending the license.

(c) Revoking the license.

100760. Upon the effective date of any order of suspension or revocation of any license governed by this article, the licensee shall surrender the license to the director.

100765. All accusations against licensees shall be filed within three years after the act or omission alleged as the ground for disciplinary action, except that with respect to an accusation alleging a violation of subdivision (c) of Section 100750, the accusation may be filed within two years after the discovery by the department of the alleged facts constituting the misrepresentation prohibited by that section.

100770. After suspension of the license upon any of the grounds set forth in this article, the director may reinstate the license upon proof of compliance by the applicant with all provisions of the decision as to reinstatement. After revocation of a license upon any of the grounds set forth in this article, the license shall not be reinstated or reissued within a period of one year after the effective date of revocation.

100775. Any ampoules and their contents employed in a breath alcohol analysis test may be destroyed by the law enforcement agency in possession of them one year after the date of collection of the breath sample.

Article 3. Environmental Laboratories

100825. (a) The department may certify laboratories that perform, for regulatory purposes, analyses of drinking water, waste water, hazardous wastes, and contaminated soils or sediments, or any combination of these, through the issuance of certificates pursuant to this article. The department may also certify laboratories that perform analyses for pesticide residues pursuant to Section 110490.

(b) In any arrangement between laboratories that involves the transfer of samples or portions of samples, the analyzing laboratory shall be identified in all sample reports and shall be the laboratory for purposes of certification.

(c) For the purposes of this article:

(1) ‘‘Certificate’’ means a certificate issued under this article.

(2) ‘‘Laboratory’’ means any facility or vehicle that is owned by a person or persons, or by a public or private entity, and that is equipped and operated to carry out analyses in any of the fields of testing listed in Section 100860.

(3) ‘‘Pesticide’’ means any substance that alone, in chemical combination, or in any formulation with one or more substances, is an ‘‘economic poison’’ within the meaning of Section 12753 of the Food and Agricultural Code or a ‘‘pesticide’’ as defined in the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. Sec. 136 et seq.).

(4) ‘‘Regulatory purposes’’ means the use of laboratory analysis required by a regulatory governmental agency for determining compliance with this section or Chapter 1 (commencing with Section 116275), Chapter 2 (commencing with Section 116300), and Chapter 3 (commencing with Section 116350) of Part 11 of Division 104, Chapter 6.5 (commencing with Section 25100) of, Chapter 6.7 (commencing with Section 25280) of, and Chapter 6.8 (commencing with Section 25300) of, Division 20, or Division 7 (commencing with Section 13000) of the Water Code, or the regulations adopted under any of the provisions set forth in this paragraph.

100830. The department shall adopt regulations governing the administration and enforcement of this article. Until these regulations are adopted, regulations adopted under Sections 25198.2 and 116390 shall remain in effect. Regulations adopted by the department under this article shall specify conditions for recognizing on the basis of reciprocity the certification of laboratories located outside of the State of California for activities regulated under this article by another state or by an agency of the United States government. Certification by another jurisdiction may be recognized for purposes of this article with regard to one or several program activities, including, but not limited to, onsite inspections, the analysis of performance evaluation samples, or the evaluation of personnel qualifications.

100835. (a) The department may adopt regulations for the following:

(1) Quality assurance programs in effect at the laboratory.

(2) Laboratory facilities.

(3) Methods.

(4) Equipment.

(5) Proficiency evaluation.

(6) Fields of testing.

(7) Qualifications of laboratory directors and other laboratory personnel.

(8) Fees, inspections, hearings and other matters necessary to the administration and enforcement of this article.

(9) Any other area concerning the operation or maintenance of a laboratory not inconsistent with this article as may be necessary to carry out this article.

(b) If any regulations governing the minimum standards for certification of laboratories that perform analysis of food relate to the testing of raw agricultural commodities or dairy products, those

regulations shall be adopted, in cooperation with the Department of Food and Agriculture.

100840. Any laboratory desiring certification under this article shall file with the department a verified application on forms prescribed by the department containing all of the following:

(a) The names of the applicant and the laboratory.

(b) The location of the laboratory.

(c) A list of fields of testing for which the laboratory is seeking certification, selected from the activities listed in subdivision (a) of Section 100860.

(d) Evidence satisfactory to the department that the applicant has the ability to comply with this article and the regulations adopted under this article.

(e) Any other information required by the department for administration or enforcement of this article or regulations adopted under this article.

100845. (a) Each certificate issued pursuant to this article shall be issued to the owner of the laboratory and shall expire 24 months from the date of issuance. Application for renewal shall be filed with the department within a time period specified by regulation. Failure to make timely application for renewal shall result in expiration of the certificate.

(b) A certificate shall be forfeited by operation of law prior to its expiration date when one of the following occurs:

(1) The owner sells or otherwise transfers the ownership of the laboratory, except that the certificate shall remain in force 90 days, if the department receives written assurance and appropriate documentation within 15 days after the change has occurred that one or more of the conditions in subdivision (c) are met. The department shall accept or reject the assurance in writing within 30 days after it has been received.

(2) There is a change in the location of the laboratory (except a mobile laboratory) or structural alteration that may affect adversely the quality of analysis in the fields of testing for which the laboratory has been certified or is seeking certification, without prior written notification to the department.

(3) The certificate holder surrenders the certificate to the department.

(c) Upon change of ownership of a laboratory, the department may extend a certificate to the expiration date of the original certificate upon written assurance by the new owner that the operation of the laboratory will continue so as not to adversely affect the conditions regulated by this article.

(d) The department shall be notified in writing within 15 days whenever there is a change of director or other person in charge of a laboratory certified under this article. The notification shall include

documentation of the qualifications of the new director or other person in charge of the laboratory.

100850. (a) Upon the filing of an application for certification and after a finding by the department that there is full compliance with this article and regulations adopted under this article, the department shall issue to the owner a certificate in the fields of testing identified in Section 100860.

(b) The department shall deny or revoke a certificate if it finds any of the following:

(1) The laboratory fails to report acceptable results in the analysis of performance evaluation samples.

(2) The laboratory fails to pass an onsite inspection.

(3) The laboratory is not in compliance with any other provision of this article or regulations adopted under this article.

(c) Provided that there is compliance with all other provisions of this article, a certificate may be restricted by the department to the fields of testing of Section 100860 or subgroups thereof as defined by regulation for which acceptable results have been produced and onsite inspection was passed.

(d) Upon the filing of a complete application for a certificate pursuant to subdivision (a), the department may issue an interim certificate pending the completion of onsite inspection and an analysis of performance evaluation samples. An interim certificate shall be nonrenewable and shall remain in effect until a certificate is either granted under subdivision (a) or denied under subdivision (b), but not later than one year after the date of issuance.

100852. (a) Notwithstanding any other provision of law, the department may issue a certificate to the owner of a laboratory in a field of testing or method adopted by the federal Environmental Protection Agency pursuant to Part 136 of Title 40 of the Code of Federal Regulations, as amended September 11, 1992, as published in the Federal Register (57 FR 41830), or Part 141 of Title 40 of the Code of Federal Regulations, as amended July 17, 1992, as published in the Federal Register (57 FR 31776), and as subsequently amended and published in the Federal Register.

(b) Notwithstanding any other provision of law, the department shall not be required to meet the requirements of Chapter 3.5 (commencing with Section 11340) of the Government Code in order to issue a certificate pursuant to subdivision (a).

100855. Upon denial of any application for a certificate, or revocation of a certificate, the department shall immediately notify the applicant by certified mail, return receipt requested, of the denial and the reasons for the denial. Within 20 days of receipt, the applicant may present the department with a written petition for a hearing. Upon receipt in proper form by the department, the petition shall be set for hearing. The proceedings shall be conducted in accordance with Chapter 5 (commencing with Section 11500) of

Part 1 of Division 3 of Title 2 of the Government Code and the department has all the powers granted in that chapter.

100860. (a) At the time of application and annually thereafter, from the date of the issuance of the certificate, a laboratory shall pay an annual certification fee. The fee shall consist of a basic nonrefundable fee of eight hundred seventy-nine dollars ($879) and an additional fee of three hundred ninety-six dollars ($396) for certification in each of the following fields of testing for which accreditation is sought: (1) microbiology of drinking water and waste water; (2) inorganic chemistry and physical properties of drinking water excluding toxic chemical elements; (3) analysis of toxic chemical elements in drinking water; (4) organic chemistry of drinking water (measurement by gc/ms combination); (5) organic chemistry of drinking water (excluding measurements by gc/ms combination); (6) radiochemistry; (7) shellfish sanitation; (8) aquatic toxicity bioassays; (9) physical properties testing of hazardous waste; (10) inorganic chemistry and toxic chemical elements of hazardous waste; (11) extraction tests of hazardous waste; (12) organic chemistry of hazardous waste (measurement by gc/ms combination); (13) organic chemistry of hazardous waste (excluding measurements by gc/ms combination); (14) bulk asbestos analysis; (15) substances regulated under the California Safe Drinking Water and Toxic Enforcement Act and not included in other listed groups; (16) waste water inorganic chemistry, nutrients, and demand; (17) toxic chemical elements in waste water; (18) organic chemistry of waste water (measurements by gc/ms combination); (19) organic chemistry of waste water (excluding measurements by gc/ms combination); (20) inorganic chemistry and toxic chemical elements of pesticide residues in food; (21) organic chemistry of pesticide residues in food (measurement by gc/ms combination); (22) organic chemistry of pesticide residues in food (excluding measurement by gc/ms combination); (23) operation of a mobile laboratory in any one of the above fields of testing in addition to activity in the same field of testing in a certified stationary laboratory under the same owner.

Fees for certification in a specified field of testing may be refunded if the department nullifies the application due to failure by the laboratory to complete the application process in the time and manner prescribed by regulation.

(b) In addition to the payment of certification fees, laboratories located outside the State of California shall reimburse the department for travel and per diem necessary to perform onsite inspections.

(c) If reciprocity with another jurisdiction is established by regulation as described in Section 100830, the regulations may provide for the waiver of certification fees for program activities considered equivalent.

(d) Fees collected under this section shall be adjusted annually as specified in Section 100425. The adjustment shall be rounded to the nearest whole dollar. It is the intent of the Legislature that the programs operated under this article be fully fee-supported.

(e) State and local government-owned laboratories in California established under Section 101150 or performing work only in a reference capacity as a reference laboratory are exempt from the payment of the fee prescribed under subdivision (a).

(f) In addition to the payment of certification fees, laboratories certified or applying for certification in fields of testing (20), (21), or (22) under subdivision (a) shall pay the department a fee of four hundred dollars ($400) for the preparation and handling of each performance evaluation sample set.

(g) For the purpose of this section, a reference laboratory is a laboratory owned and operated by a governmental regulatory agency for the principal purpose of analyzing samples referred by other laboratories for confirmatory analysis. Reference laboratories carry out quality assurance functions for other laboratories and may carry out unusual, highly specialized, and difficult analyses not generally available through commercial laboratories, and a limited number of routine analyses, for regulatory purposes only, and without assessing per-sample fees for the services.

100865. In order to carry out the purpose of this article, any duly authorized representative of the department may do the following:

(a) Enter and inspect a laboratory that is certified pursuant to this article or that has applied for certification.

(b) Inspect and photograph any portion of the laboratory, equipment, any activity, any samples taken, copy and photograph any records, reports, test results, or other information related solely to certification under this article or regulations adopted pursuant to this article.

(c) It shall be a misdemeanor for any person to prevent, interfere with, or attempt to impede in any way, any duly authorized representative of the department from undertaking the activities authorized by this section.

100870. (a) Any laboratory that is certified or has applied for certification or for renewal of certification under this article, shall analyze performance evaluation samples provided directly or indirectly by the department. The department shall have the authority to contract with third parties for the provision of performance evaluation samples. The samples shall be tested by the laboratory according to methods specifically approved for this purpose by the United States government or the department, or alternate methods of demonstrated adequacy or equivalence, as determined by the department. Performance evaluation sample sets shall be provided not less than twice, nor more than four times, a year

to each certified laboratory that performs analyses of food for pesticide residues.

(b) The department may provide directly or indirectly performance evaluation samples to a laboratory for the purpose of determining compliance with this article with or without identifying the department.

(1) When the department identifies itself, all of the following shall apply:

(A) The results of the testing shall be submitted to the department on forms provided by the department on or before the date specified by the department, and shall be used in determining the competency of the laboratory.

(B) There shall be no charge to the department for the analysis.

(2) When the department does not identify itself, the department shall pay the price requested by the laboratory for the analyses.

100875. Whenever the department determines that any person has violated or is violating this article or any certificate, regulation, or standard issued or adopted pursuant to this article, the director may issue an order directing compliance forthwith or directing compliance in accordance with a time schedule set by the department.

100880. If the department determines that a laboratory is in violation of this article or any regulation or order issued or adopted pursuant to this article, the department may issue a citation to the owner of the laboratory.

(a) The citation shall be served personally or by registered mail.

(b) Each citation shall be in writing and shall describe with particularity the nature of the violation, including a reference to the statutory provision, order, or regulation alleged to have been violated.

(c) The citation shall fix the earliest feasible time for elimination or correction of the condition constituting the violation.

(d) Citations issued pursuant to this section shall specify a civil penalty for each violation, not to exceed one thousand dollars ($1,000), for each day that the violation occurred.

(e) If the owner fails to correct a violation within the time specified in the citation, the department may assess a civil penalty as follows:

(1) For failure to comply with any citation issued for a violation of this article or a regulation, an amount not to exceed two hundred fifty dollars ($250) for each day that the violation continues beyond the date specified for correction in the citation.

(2) For failure to comply with any citation issued for violation of any department-issued order, an amount not to exceed two hundred dollars ($200) per day for each day the violation continues beyond the date specified for correction in the citation.

100885. (a) Any person who operates a laboratory that performs work that requires certification under Section 25198, 25298.5, 25358.4, 110490, or 116390 of this code, or Section 13176 of the Water Code, who is not certified to do so, may be enjoined from so doing by any court of competent jurisdiction upon suit by the department.

(b) When the department determines that any person has engaged in, or is engaged in, any act or practice that constitutes a violation of this article, or any regulation or order issued or adopted thereunder, the department may bring an action in the superior court for an order enjoining these practices or for an order directing compliance and affording any further relief that may be required to ensure compliance with this article.

100890. (a) Any person who knowingly makes any false statement or representation in any application, record, or other document submitted, maintained, or used for purposes of compliance with this article, may be liable, as determined by the court, for a civil penalty not to exceed five thousand dollars ($5,000) for each separate violation or, for continuing violations, for each day that violation continues.

(b) Any person who operates a laboratory for purposes specified pursuant to Section 25198, 25298.5, 25358.4, 110490, or 116390 of this code, or Section 13176 of the Water Code that requires certification, who is not certified by the department pursuant to this article, may be liable, as determined by the court, for a civil penalty not to exceed five thousand dollars ($5,000) for each separate violation or, for continuing violations, for each day that violation continues.

(c) A laboratory that advertises or holds itself out to the public or its clients as having been certified for any of the fields of testing referred to in Section 100860 without having a valid and current certificate in each field of testing identified by the advertisement or other representation may be liable, as determined by the court, for a civil penalty not to exceed one thousand dollars ($1,000) or, for continuing violations, for each day that violation continues.

(d) Each civil penalty imposed for any separate violation pursuant to this section shall be separate and in addition to any other civil penalty imposed pursuant to this section or any other provision of law.

100895. (a) Any person who knowingly does any of the following acts may, upon conviction, be punished by a fine of not more than twenty-five thousand dollars ($25,000) for each day of violation, or by imprisonment in the county jail not to exceed one year, or by both the fine and imprisonment:

(1) Makes any false statement or representation in any application, record, report, or other document submitted, maintained, or used for the purposes of compliance with this article.

(2) Has in his or her possession any record required to be maintained pursuant to this article that has been altered or concealed.

(3) Destroys, alters, or conceals any record required to be maintained pursuant to this article.

(4) Withholds information regarding an imminent and substantial danger to the public health or safety when the information has been requested by the department in writing and is required to carry out the department's responsibilities pursuant to this article.

(b) If the conviction under subdivision (a) is for a violation committed after a first conviction of the person under this section, the person may be punished by imprisonment in the state prison for up to 24 months, or in the county jail for not to exceed one year, or by a fine of not less than two thousand dollars ($2,000) or more than fifty thousand dollars ($50,000) per day of violation, or by both the fine and imprisonment.

100900. The remedies provided by this article are cumulative and shall not be construed as restricting any remedy, provisional or otherwise, provided by law for the benefit of any party, and no judgment under this article shall preclude any party from obtaining additional relief based upon the same facts.

100905. The department may suspend or revoke any certificate issued under of this article for any of the following reasons:

(a) Violation by the owner of the laboratory of any of the provisions of this article or any regulation adopted under this article.

(b) Aiding, abetting, or permitting the violation of any provision of this article or regulations adopted under this article.

(c) Proof that the certificateholder or owner has made false statements in any material regard on the application for certification.

(d) Conviction of an owner of the laboratory of any crime that is substantially related to the qualifications or duties of that owner and that is related to the functions of the laboratory. For purposes of this subdivision, a ''conviction'' means a plea or verdict of guilty or a conviction following a plea of nolo contendere. Action to revoke or suspend the certificate may be taken when: (1) the time for appeal has elapsed, or (2) the judgment of conviction has been affirmed on appeal, or (3) when an order granting probation is made suspending the imposition of sentence, notwithstanding a subsequent order pursuant to Section 1203.4 of the Penal Code permitting withdrawal of a plea of guilty and entry of a plea of not guilty, or (4) setting aside a verdict of guilty, or (5) dismissing the accusation, information, or indictment. The department shall take into account all judicial decisions on rehabilitation furnished by the owner of the laboratory.

100910. Proceedings for the suspension or revocation of a certificate under this article shall be conducted in accordance with Chapter 5 (commencing with Section 11500) of Part 1 of Division 3

of Title 2 of the Government Code, and the department shall have all powers granted pursuant to that chapter.

100915. The department may temporarily suspend a certificate prior to any hearing, when it has determined that this action is necessary to protect the public. The department shall notify the owner of the temporary suspension and the effective date thereof and at the same time shall serve the owner with an accusation. Upon receipt of a notice of defense by the owner, the matter shall be set for hearing within 15 days. The hearing shall be held as soon as possible but no later than 30 days after receipt of the notice. The temporary suspension shall remain in effect until the hearing is completed and the department has made a final determination on the merits. However, the temporary suspension shall be deemed vacated if the department fails to make a final determination on the merits within 60 days after the original hearing has been completed.

100920. Fees and civil penalties collected under this article shall be deposited in the Environmental Laboratory Improvement Fund, that is hereby created. Moneys in the fund shall be available for expenditure by the department for the purposes of this article, upon appropriation by the Legislature.

PART 2. CALIFORNIA CONFERENCE OF LOCAL HEALTH OFFICERS

CHAPTER 1. ORGANIZATION

100925. There is hereby established a California Conference of Local Health Officers. The department shall consult with the conference in establishing standards as provided in this part and may consult on other matters affecting health. The conference may consult with, advise, and make recommendations to the department, other departments, boards, commissions and officials of federal, state, and local government, the Legislature, and any other organization or association on matters affecting health. The conference shall consist of all legally appointed local health officers in the state. It shall organize, adopt bylaws, and shall annually elect officers.

Actual and necessary expenses, including any necessary registration fee, incident to attendance at not more than two meetings per year of the conference shall be a legal charge against the local governmental unit. Actual and necessary expenses incident to attendance at special meetings of the committees of the conference called by the director shall be a legal charge against any funds available for administration of this part, Section 100295, Chapter 3 (commencing with Section 101175) of Part 3, and Part 3 (commencing with Section 124300) of Division 106.

100930. Nothing in this part, Section 100295, Chapter 3 (commencing with Section 101175) of Part 3, and Part 3

(commencing with Section 124300) of Division 106 or in any regulation prescribed by the department in accordance herewith shall compel any practitioner who treats the sick by prayer in the practice of the religion of any well-recognized church, sect, denomination, or organization or any persons covered by Sections 2731 and 2800 of the Business and Professions Code to give any information about a disease or disability that is not infectious, contagious, or communicable or authorize any compulsory education, medical examination, or medical treatment.

CHAPTER 2. GENERAL POWERS AND DUTIES

100950. The department shall administer this part, Section 100295, Chapter 3 (commencing with Section 101175) of Part 3, and Part 3 (commencing with Section 124300) of Division 106 and shall adopt necessary regulations. These regulations shall be adopted only after consultation with and approval by the California Conference of Local Health Officers. Approval of these regulations shall be by majority vote of those present at an official session.

CHAPTER 3. ADDITIONAL ADMINISTRATIVE PROVISIONS (RESERVED)

PART 3. LOCAL HEALTH DEPARTMENTS

CHAPTER 1. ORGANIZATION AND APPOINTMENT OF HEALTH OFFICERS

101000. Each board of supervisors shall appoint a health officer who is a county officer.

101005. The county health officer shall be a graduate of a medical college of good standing and repute. His or her compensation shall be determined by the board of supervisors.

101010. Immediately after the appointment of the health officer, the board of supervisors shall notify the director of the appointment and the name and address of the appointee.

CHAPTER 2. POWERS AND DUTIES OF LOCAL HEALTH OFFICERS AND LOCAL HEALTH DEPARTMENTS

Article 1. County Health Officers

101025. The board of supervisors of each county shall take measures as may be necessary to preserve and protect the public health in the unincorporated territory of the county, including, if indicated, the adoption of ordinances, regulations and orders not in conflict with general laws, and provide for the payment of all expenses incurred in enforcing them.

101030. The county health officer shall enforce and observe in the unincorporated territory of the county, all of the following:

(a) Orders and ordinances of the board of supervisors, pertaining to the public health and sanitary matters.

(b) Orders, including quarantine and other regulations, prescribed by the department.

(c) Statutes relating to public health.

101035. The county health officer shall advise on medical matters any board or body vested with the management of any county pension or retirement system and shall attend the meetings of the board or body when requested by the board or body.

101040. The county health officer may take any preventive measure that may be necessary to protect and preserve the public health from any public health hazard during any ''state of war emergency,'' ''state of emergency,'' or ''local emergency,'' as defined by Section 8558 of the Government Code, within his or her jurisdiction.

''Preventive measure'' means abatement, correction, removal or any other protective step that may be taken against any public health hazard that is caused by a disaster and affects the public health. Funds for these measures may be allowed pursuant to Sections 29127 to 29131, inclusive, and 53021 to 53023, inclusive, of the Government Code and from any other money appropriated by a county board of supervisors or a city governing body to carry out the purposes of this section.

The county health officer, upon consent of the county board of supervisors or a city governing body, may certify any public health hazard resulting from any disaster condition if certification is required for any federal or state disaster relief program.

101045. The county health officer shall investigate health and sanitary conditions in every county jail, every other publicly operated detention facility in the county, and all private work furlough facilities and programs established pursuant to Section 1208 of the Penal Code, at least annually. Private work furlough facilities and programs shall pay an annual fee to the county health officer commensurate with the annual cost of those investigations, as determined by the county health officer. He or she may make additional investigations of any county jail or other detention facility of the county as he or she determines necessary. He or she shall submit a report to the Board of Corrections, the sheriff or other person in charge of the jail or detention facility, and to the board of supervisors. In any city having a health officer, the city health officer shall investigate health and sanitary conditions in every city jail and other detention facility at least annually. He or she may make additional investigations of any city jail or detention facility as he or she determines necessary. He or she shall submit a report to the

Board of Corrections, the person in charge of the jail or detention facility, and to the city governing body.

Whenever requested by the sheriff, the chief of police, local legislative body, or the Board of Corrections, but not more often than twice annually, the county health officer or, in cities having a city health officer, the city health officer, shall investigate health and sanitary conditions in any of the jails and detention facilities described in this section, and submit a report to each of the officers and agencies authorized in this section to request the investigation and to the Board of Corrections.

The investigating officer shall determine if the food, clothing, and bedding is of sufficient quantity and quality that at least shall equal minimum standards and requirements prescribed by the Board of Corrections for the feeding, clothing and care of prisoners in all local jails and detention facilities, and if the sanitation requirements required by Article 11 (commencing with Section 114250) of Chapter 4 of Part 7 of Division 107 for restaurants have been maintained.

101050. (a) The county health officer shall prepare a list of family planning and birth control clinics located in the county for distribution by the county clerk pursuant to Section 26808 of the Government Code. The list shall include information about the availability of pregnancy testing services provided pursuant to Section 123380.

(b) This section shall be inoperative from July 1, 1993, to June 30, 1994, inclusive.

101055. (a) The county health officer shall furnish all hospitals within the county, and all physicians and surgeons upon request, copies of the list prepared pursuant to Section 101050 in sufficient numbers as they may need for voluntary distribution to patients.

(b) This section shall be inoperative from July 1, 1993, to June 30, 1994, inclusive.

101060. The county health officer may designate a nonprofit food distribution agency to coordinate and facilitate the donation of food and food products to nonprofit, charitable corporations, from available sources, including restaurants, grocery stores, or food distributors.

Article 2. Local Health Emergencies

101075. As used in this article:

(a) ''Hazardous waste'' means a waste, or combination of wastes, that because of its quantity, concentration, or physical, chemical, or infectious characteristics may do any of the following:

(1) Cause, or significantly contribute to an increase in mortality or an increase in serious irreversible, or incapacitating reversible, illness.

(2) Pose a substantial present or potential hazard to human health or environment when improperly treated, stored, transported, or disposed of, or otherwise managed.

(b) ‘‘Waste’’ means either of the following:

(1) Any material for which no use or reuse is intended and that is to be discarded.

(2) Any material that spills, escapes, or is released from any manufacturing, industrial, commercial, or other plant, facility, or process, or that escapes or is released during the transporting or transferring from one place to another, or during the pumping, processing, storing, or packaging of any material in, to, or from such a plant, facility, or process, or that enters or may enter an uncontained air space or a surface water course that is not totally contained on the contiguous property of the plant, facility, or process, or which enters, or may enter, the groundwater underlying such plant, facility, or process.

101080. Whenever a release, spill, escape, or entry of waste occurs as described in paragraph (2) of subdivision (b) of Section 101075 and the director or the local health officer reasonably determines that the waste is a hazardous waste or medical waste, or that it may become a hazardous waste or medical waste because of a combination or reaction with other substances or materials, and the director or local health officer reasonably determines that the release or escape is an immediate threat to the public health, the director may declare a health emergency and the local health officer may declare a county health emergency in the county or any area thereof affected by the threat to the public health. Whenever a local health emergency is declared by a local health officer pursuant to this section, the local health emergency shall not remain in effect for a period in excess of seven days unless it has been ratified by the board of supervisors. The board of supervisors shall review, at least every 14 days until the local health emergency is terminated, the need for continuing the local health emergency and shall proclaim the termination of the local health emergency at the earliest possible date that conditions warrant the termination.

101085. (a) After the declaration of a health emergency or a county health emergency pursuant to Section 101080, the director or local health officer may do any or all of the following:

(1) Require any person or organization that the director or local health officer shall specify to furnish any information known relating to the properties, reactions, and identity of the material that has been released, spilled, or escaped. The director or local health officer may require information to be furnished, under penalty of perjury, by the person, company, corporation, or other organization that had custody of the material, and, if the material is being transferred or transported, by any person, company, corporation, or organization that caused the material to be transferred or transported. This

information shall be furnished to the director or local health officer upon request in sufficient detail, as determined by the director or local health officer, as required to take any action necessary to abate the health emergency or county health emergency or protect the health of persons in the county, or any area thereof, who are, or may be affected. However, the burden, including costs, of furnishing the information shall bear a reasonable relationship to the need for the information and the benefits to be obtained therefrom.

(2) Provide the information, or any necessary portions thereof, or any other necessary information available to the director or local health officer to state or local agencies responding to the health emergency or county health emergency or to medical and other professional personnel treating victims of the local health emergency.

(3) Sample, analyze, or otherwise determine the identifying and other technical information relating to the health emergency or county health emergency as necessary to respond to or abate the county health emergency and protect the public health.

(b) This section does not limit or abridge any of the powers or duties granted to the State Water Resources Control Board and to each regional water quality control board by Division 7 (commencing with Section 13000) of the Water Code. This section also does not limit or abridge the powers or duties granted to the State Air Resources Board or to any air pollution control district by Division 26 (commencing with Section 39000).

This section does not limit or abridge any of the powers or duties granted to the Director of Food and Agriculture or to any county agricultural commissioner by Division 6 (commencing with Section 11401) or by Division 7 (commencing with Section 12501) of the Food and Agricultural Code.

101090. When requested by the person furnishing the information furnished pursuant to Section 101085, the portions of the information that might disclose trade secrets or secret processes shall not be made available for inspection by the public, but shall be made available to governmental agencies for use in abatement of the health emergency or county health emergency and in judicial review or enforcement proceedings involving the person furnishing the information.

101095. Any person failing or refusing to furnish technical, toxicological, or other information required pursuant to Section 101085, or falsifying any information provided therein is guilty of a misdemeanor and is also subject to any other criminal or civil penalties provided by statute.

Article 3. Public Health Nurses

101100. The governing body of a city may employ one or more public health nurses, each of whom shall be a registered nurse possessing qualifications prescribed by the department on the date of his or her employment.

101105. The public health nurse shall attend to matters pertaining to the health and sanitary conditions of the city as the governing body may assign. Compensation for the public health nurse shall be determined by that body.

101110. The board of supervisors in each county may employ one or more public health nurses, each of whom shall be a registered nurse possessing qualifications prescribed by the department on the date of employment.

101115. The public health nurse shall attend to matters pertaining to the health and sanitary conditions of the county as the board of supervisors may assign. Compensation for the public health nurse shall be determined by that board.

Article 4. Dental Professionals

101125. The governing body of a city may employ one or more dentists or dental hygienists, each of whom shall be a licensed dentist or dental hygienist.

101130. The dentist or dental hygienist shall attend to dental conditions of the city as the governing body may assign. Compensation for the dentist or dental hygienist shall be determined by that body.

101135. The board of supervisors in each county may employ one or more dentists or dental hygienists, each of whom shall be a licensed dentist or dental hygienist.

101140. The dentist or dental hygienist shall attend to such dental conditions of the county, as the board of supervisors may assign. Compensation for the dentist or dental hygienist shall be determined by that board.

Article 5. Municipal and County Laboratories

101150. To protect the community against infectious disease, any city or county may establish a bacteriological and chemical laboratory for the examination of specimens from suspected cases of disease and for the examination of milk, waters, and food products.

101155. The cost of establishing and maintaining the laboratory is a legal expenditure from any city or county funds that are for disbursement under the direction of the city or county health officer for the protection of public health.

101160. Any city or county laboratory established for the purposes set forth in this article shall use only equipment and employ only technical personnel that meets with the approval of the state department.

CHAPTER 3. STATE AID FOR LOCAL HEALTH ADMINISTRATION

Article 1. Definitions and General Policy

101175. The rapid increase in the population of the state and the increasing industrialization in both the urban and rural areas necessitate the provision of effective public health services to all the people of the state.

In many areas within the state local health departments lack the necessary funds, and the local population lack the means to furnish funds, to provide effective public health services.

The Legislature therefore seeks to further the provision of necessary public health services by granting financial assistance to local health departments thus enabling them to meet present and future health needs in an efficient and effective manner. The funds granted are to augment local appropriations provided for public health purposes, and shall not be used to replace local appropriations.

The administrative pattern providing public health services to all the people of the state will vary in different areas. It is generally recognized that the minimum population necessary for efficient administration of a local health department is approximately 50,000. To attain this desirable population minimum it will be necessary in some areas for two or more counties to unite and establish a single administrative public health jurisdiction.

101180. ''Population,'' for the purpose of this chapter, shall be determined by the most recent United States decennial census; provided, however, whenever it appears to the department that the population of any city or county, changed sufficiently to warrant adjustment, the department for purposes of this chapter may request the Population Research Unit of the Department of Finance to determine the population for cities or counties.

101185. For the purposes of this chapter a ''local health department'' shall be interpreted to mean any one of the following public health administrative organizations:

(a) Local health district created pursuant to former Chapter 6 (commencing with Section 880) of Part 2 of Division 1 of the Health and Safety Code, that includes territory in one or more counties, and that includes at least all of the cities that have less than 50,000 population in the county or counties.

(b) A local health department serving one or more counties that shall on September 19, 1947, and thereafter, provide services to all

cities whose population is less than 50,000 in addition to the unincorporated territory of the county or counties.

(c) A county health department that does not serve all of the cities of less than 50,000 population, but that has the provisional approval of the department, in accordance with Section 101225.

(d) The health department of a city of 50,000 or greater population, except that the governing body of the city by resolution may declare its intention to be included under the jurisdiction of the county health department, or of the local health district serving other territory in the county, as provided by existing statutes.

(e) The local health department of any county that had under its jurisdiction on September 19, 1947, a population in excess of 1,000,000, or the local health department of any city and county.

Article 2. Qualification for Financial Assistance

101200. Local health departments qualifying for assistance as provided in this chapter, on or after September 19, 1947, shall receive financial aid as of the date of their becoming eligible.

Article 3. State Aid

101225. Provisional approval may be given by the department to a county health department that meets minimum standards as specified in this part, Section 100295, and Part 3 (commencing with Section 124300) of Division 106, but that does not serve all cities of less than 50,000 population within the county.

101230. From the appropriation made for the purposes of this article, allocation shall be made to the administrative bodies of qualifying local health departments in the following manner:

(a) A basic allotment as follows:

To the administrative bodies of local health departments serving the territory in one or more counties a basic allotment of sixteen thousand dollars ($16,000) per county or sixty cents ($0.60) per capita per county, whichever is less; however, if a county is divided into two or more local health department jurisdictions, the basic allotment shall be divided between the departments in proportion to the population served by each department, except that no funds shall be available to any city of less than 50,000 population for the maintenance of an independent health department.

(b) A per capita allotment, determined as follows:

After deducting the amounts allowed for the basic allotment as provided in this section, the balance of the appropriation shall be allotted on a per capita basis to the administrative body of each local health department in the proportion that the population of that local health department jurisdiction bears to the population served by all qualified local health departments of the state.

101235. The department succeeds to and is vested with the duties, purposes, responsibilities, and jurisdiction heretofore exercised by the State Department of Benefit Payments with respect to the processing, audit, and payment of funds appropriated for the purposes of this article to the administrative bodies of qualifying local health departments.

101240. The department shall have possession and control of all records, papers, equipment, and supplies held for the benefit or use of the Director of Benefit Payments in the performance of his or her duties, powers, purposes, responsibilities, and jurisdiction that are vested in the department by Section 101235.

101245. All officers and employees of the Director of Benefit Payments who are serving in the state civil service, other than as temporary employees, on July 1, 1978, and who are engaged in the performance of a function vested in the department by Section 101235 shall be transferred to the department. The status, positions, and rights of these persons shall not be affected by the transfer and shall be retained by them as officers and employees of the department pursuant to the State Civil Service Act, except for positions exempt from civil service.

101250. After determining the total amounts available to each area, the department shall notify the governing body of each local health department of that amount, and of the conditions governing its availability.

101255. No funds appropriated for the purposes of this article shall be allocated to any local health department unless the governing body of the local health department has appropriated an amount equal to at least twice the per capita allotment provided in subdivision (b) of Section 101230 for the same period from local funds for the support of the local health department. These local funds shall be wholly exclusive of any state or federal funds received or receivable. Actual expenditures of local funds, exclusive of state or federal funds received, shall be not less than the proportion of total expenditures.

101260. No funds appropriated for the purposes of this article shall be allocated to any local health department whose professional and technical personnel and whose organization and program do not meet the minimum standards established by the department.

101265. The basic and per capita allotments shall be paid quarterly to the administrative body of each qualifying local health department. Each quarterly payment may be adjusted on a basis of the actual expenditures during the previous quarter, if the adjustment is necessary to maintain the minimum proportional relationship of state and local expenditures as outlined in Section 101255. The department shall certify the amounts to be paid to each local health department each quarter to the Controller, who shall thereupon draw the necessary warrants, and the State Treasurer shall

pay to the administrative body of each local health department the certified amount. Any payments may be withheld by the department if a local health department fails to continue to meet the minimum standards established, provided that not less than 45 days' advance notice of intention to withhold payments, and the reasons therefor, shall be given to the governing body of the local health department.

Article 4. Transfer of Environmental Health and Sanitation Services

101275. Notwithstanding Section 101260, a county board of supervisors or health district board may, with the concurrence of the director, transfer the total function of providing environmental health and sanitation services and programs to a comprehensive environmental agency of the county other than the county or district health department. Such a county or district shall continue to receive funds appropriated for the purposes of this article if it complies with all other minimum standards established by the department and if the environmental health and sanitation services and programs are maintained at levels of quality and efficiency equal to or higher than the levels of the services and programs formerly provided by the county or district health department.

101280. If a transfer authorized by Section 101275 is made:

(a) Each agency shall employ as the immediate supervisor of the environmental health and sanitation services a director of environmental health who is a registered environmental health specialist and the agency shall employ an adequate number of registered environmental health specialists to carry on the program of environmental health and sanitation services.

(b) Wherever, in any statute, regulation, resolution, or order, a power is granted to, or a duty is imposed upon, a county or district health officer, county health department, or county health district pertaining to environmental health and sanitation services and programs transferred by the board of supervisors or health district board, these powers and duties shall be delegated by the local health officer to the director of environmental health, who shall thereafter administer these powers and duties.

(c) The department shall adopt regulations pertaining to minimum program and personnel requirements of environmental health and sanitation services and programs. The department shall periodically review these programs to determine if minimum requirements are met.

(d) Whenever the board of supervisors or health district board determines that the expenses of its environmental health director in the enforcement of any statute, order, quarantine, or regulation prescribed by a state officer or department relating to environmental health and sanitation are not met by any fees prescribed by the state,

the board may adopt an ordinance or resolution prescribing fees that will pay the reasonable expenses of the environmental health director incurred in enforcement. The schedule of fees prescribed by ordinance or resolution of the board of supervisors or health district board shall be applicable in the area in which the environmental health director enforces any statute, order, quarantine, rule, or regulation prescribed by a state officer or department relating to environmental health and sanitation.

101285. Notwithstanding Section 101260, the county board of supervisors may, with the concurrence of the county officer providing the services, transfer all or any portion of the function of providing vector control services to any mosquito abatement district or vector control district formed pursuant to Chapter 5 (commencing with Section 2200) of Division 3. A county that chooses to transfer the services shall continue to receive funds appropriated for the purposes of this article if it complies with all other minimum standards and if the vector control program is maintained at a level that meets the minimum standards set by the department.

Article 5. Local Public Health Service Contract Options

101300. (a) (1) The board of supervisors of a county with a population of less than 40,000 may enter into a contract with the department and the department may enter into a contract with that county to organize and operate a local public health service in that county.

(2) Notwithstanding paragraph (1), only those counties that contracted with the department pursuant to Section 1157 in the 1990–91 fiscal year may contract with the department in the 1991–92 fiscal year ; the amount of county funding established in the contracts for the 1991–92 fiscal year shall be at least equal to the value of the services provided in the 1990–91 fiscal year.

(3) The department may conduct the local public health service either directly, or by contract with other agencies, or by some combination of these methods as agreed upon by the department and the board of supervisors of the county concerned.

(4) The board of supervisors may create a county board of public health or similar local advisory group.

(b) Any county proposing to contract with the department pursuant to this section in the 1992–93 fiscal year and each fiscal year thereafter shall submit to the department a notice of intent to contract adopted by the board of supervisors no later than March 1 of the fiscal year preceding the fiscal year for which the agreement will be in effect in accordance with procedures established by the department. A county may withdraw this notice no later than May 1 of the fiscal year preceding the fiscal year for which the agreement will be in effect in accordance with procedures established by the

department. If a county fails to withdraw its notice by this date, it shall be responsible for any and all necessary costs incurred by the department in providing or preparing to provide public health services in that county.

(c) A county contracting with the department pursuant to this section shall not be relieved of its public health care obligation under Section 101025.

(d) (1) Any county contracting with the department pursuant to this section shall pay, by the 15th of each month, the agreed contract amount.

(2) If a county does not make the agreed monthly payment, the department may terminate the county's participation in the program.

(e) The counties and the department shall work collectively to ensure that expenditures do not exceed the funds available for the program in any fiscal year.

(f) The Legislature hereby determines that an expedited contract process for contracts under this section is necessary. Contracts under this section shall be exempt from Chapter 2 (commencing with Section 10290) of Part 2 of Division 2 of the Public Contract Code.

(g) The state shall not incur any liability except as specified in this section.

(h) This section shall become operative July 1, 1991.

101305. Any counties that were eligible for organization and operation of local public health services by the department pursuant to Section 1157 as of January 1, 1988, shall continue to be eligible, notwithstanding an increase in total population beyond the 40,000 population limit of that section.

This section shall remain in effect until January 1, 1998, and on that date is repealed, unless a later enacted statute, that becomes effective on or before January 1, 1998, deletes or extends that date.

101307. (a) Counties contracting with the department pursuant to Section 101300 may enter into a contract with the department whereby the department's program that administers the Section 101300 contract agrees to assume responsibility for some or all of the administrative activities for some or all of the public health categorical programs of that county listed in subdivision (g). The responsibility for the provision of services under those programs shall remain with the county board of supervisors.

(b) For the purposes of this section, ''public health categorical programs'' means a public health program that is funded by federal or state allocation supported by specific legislation or regulations, and that is identified by the department to be implemented by local jurisdictions.

(c) Administrative costs, associated with the administration of those contracts between the department and the counties pursuant

to this section, shall be capped at the maximum allowable under each of the public health categorical programs.

(d) Each county intending to contract with the department for the fiscal year commencing July 1, 1994, shall submit to the department a notice of intent to contract adopted by the board of supervisors within 60 days of the effective date of this section. For each fiscal year thereafter, a notice of intent to contract adopted by the board of supervisors shall be submitted no later than August 1 of the fiscal year preceding the fiscal year for which the agreement will be in effect, in accordance with procedures established by the department. A county may withdraw this notice no later than September 15 of the fiscal year preceding the fiscal year for which the agreement will be in effect in accordance with procedures established by the department. If a county fails to withdraw its notice by this date, it shall be responsible for any and all necessary costs incurred by the department in providing or preparing to provide public health services in that county pursuant to this section.

(e) As a condition of contracting with the department, the department may establish uniform standards, forms, and procedures for conducting the administrative activities for those categorical programs.

(f) Any county that elects to contract with the department pursuant to this section shall, after receipt of program funds, pay by the 15th of each month, the agreed-upon contract amount for reimbursement for departmental costs of administration services. If a county does not make the agreed monthly payment, the department may after 60 days' written notice to the county terminate the services provided by the department pursuant to this section.

(g) The programs that may be subject to this section include, but are not limited to, all of the following:

(1) All maternal and child health programs, including, but not limited to, the following:

(A) California Children's Services, Article 5 (commencing with Section 123800) of Chapter 3 of Part 2.

(B) Child Health and Disability Prevention Program, Article 6 (commencing with Section 124025) of Chapter 3 of Part 2.

(C) Perinatal Health Care, Article 4 (commencing with Section 123550) of Chapter 2 of Part 2.

(2) The California Aids Program, Chapter 2 (commencing with Section 120800) of Part 4 of Division 105.

(3) Tobacco Use Prevention, Article 1 (commencing with Section 104350) of Chapter 1 of Part 3 of Division 103.

101310. In the event a health emergency is declared by the board of supervisors in a county or by a local health district board, or in the event a county health emergency is declared by the county health officer pursuant to Section 101080, the local health officer, shall have supervision and control over all environmental health and sanitation

programs and personnel employed by the county or district during the state of emergency.

CHAPTER 4. ADDITIONAL ADMINISTRATIVE PROVISIONS

Article 1. Enforcement, Fees, Reimbursements, and Taxes

101325. Whenever the governing body of any city or county determines that the expenses of its health officer or other officers or employees in the enforcement of any statute, order, quarantine, or regulation prescribed by a state officer or department relating to public health, requires or authorizes its health officer or other officers or employees to perform specified acts that are not met by fees prescribed by the state, the governing body may adopt an ordinance or resolution prescribing fees to pay the reasonable expenses of the health officer or other officers or employees incurred in the enforcement, and may authorize a direct assessment against the real property in cases where the real property is owned by the operator of a business and the property is the subject of the enforcement. The schedule of fees prescribed by ordinance or resolution of the governing body shall be applicable in the area in which the local health officer or other officers or employees enforce any statute, order, quarantine, or regulation prescribed by a state health officer or department relating to public health.

101330. On or before August of each year, the officer designated by the governing body to collect fees authorized by Section 101325, shall prepare a list of parcels of real property that are subject to these fees. On or before the tenth day of August of each year, the officer shall transmit the list to the county auditor and the auditor shall enter the amounts of the assessments against the respective parcels of land as they appear on the current assessment roll.

101335. The tax collector shall include the amounts of the assessments entered on the assessment roll pursuant to Section 101330 on bills for taxes levied against lots and parcels of land, and the assessments shall be listed separately on the tax bills. Thereafter, the assessment amounts shall be collected at the same time and in the same manner as county taxes are collected.

If a county collects the assessments on behalf of a city, the county may deduct its reasonable costs incurred for its collections services before remitting the balance to the city treasury.

101340. All laws applicable to the levy, collection, and enforcement of county taxes are applicable to special assessments made pursuant to this article and Article 4.

101345. In those instances where direct assessment is not authorized by Section 101325, if the officer charged with the billing and collection of the fees is a county officer, the officer may, with the approval of the governing body, record without fee, in the office of

the county recorder, a certificate specifying the amount, interest, penalty due, and the name and last known address of the person liable for these fees. If the officer charged with the billing and collection of these fees is a city officer, the officer, with the approval of the governing body may, in those instances where direct assessment is not authorized by Section 101325, record with reasonable fee charge, in the office of the county recorder a certificate specifying the amount, interest, penalty due, name, and last known address of the person liable for these fees. From the time of recording of the certificate, the amount required to be paid together with interest and penalty constitutes a lien upon all real property in the county owned or later acquired by the liable person. The lien created by recording this certificate shall have the force, effect, and priority of a judgment lien and shall continue for 10 years from the time of the recording unless released or otherwise discharged prior to that time. Prior to recording the lien with the county recorder, the lienor shall notify the person liable for the fees by certified mail of the intent to record the certificate.

101350. Any board of supervisors may levy a special sanitary tax, not to exceed one-half mill on the one dollar of assessed valuation, on all the property in the county, outside of any city.

The tax shall be in addition to all other taxes, and the fund created shall be used to prevent the introduction of, and to eradicate, dangerous, infectious, or communicable diseases, and for general sanitation purposes.

Article 2. County Health Administration for Cities

101375. When the governing body of a city in the county consents by resolution or ordinance, the county health officer shall enforce and observe in the city all of the following:

(a) Orders and quarantine regulations prescribed by the department and other regulations issued under this code.

(b) Statutes relating to the public health.

101380. The resolution or ordinance shall be adopted and a certified copy served on the clerk of the board of supervisors on or before the first day of March of any year, and the services of the county health officer in the city shall commence on the first day of July following service of notice. The services shall continue indefinitely until the governing body of the city terminates them by adoption of a resolution and ordinance and service of a certified copy on the clerk of the board of supervisors on or before the first day of March of any subsequent year. The services of the county health officer shall terminate on the first day of July following service of notice.

Article 3. Contracts for Local Health Administration

101400. The board of supervisors may contract with a city in the county, and the governing body of a city may contract with the county for the performance by health officers or other county employees of any or all enforcement functions within the city related to ordinances of public health and sanitation, and all inspections and other related functions.

101405. Whenever a contract has been duly entered into, the county health officer and his or her deputies shall exercise the same powers and duties in the city as are conferred upon health officers of the city by law.

101410. In the contract the city may provide, as specified in Section 101400, for payment by the city to the county to the county treasurer at times specified in the contract and shall be in an amount to repay the county for the entire cost of the services performed for the city as required in the enforcement of ordinances under the terms of the contract, as nearly as can be estimated or ascertained.

101415. The board of supervisors may contract with the governing body of a city in the county to secure the performance by the city health officer or other city health employees of any or all functions related to public health in any unincorporated territory adjacent to the city.

101420. Payment for the services specified in Section 101415 in the unincorporated territory shall be made by the county to the city treasurer.

101425. The board of supervisors or the governing body of any city or local health district may contract with the county superintendent of schools or with the governing board of any school district located wholly or partially in the county, city, or local health district for the performance by local health officers or other public health department employees of any or all of the functions and duties set forth in Chapter 9 (commencing with Section 49400) of Part 27 of the Education Code, relating to the health supervision of school buildings and of pupils enrolled in the schools of any or all elementary and high school districts over which the county superintendent of schools, or the governing board or a school district, has jurisdiction.

The contract may specify payment dates as agreed upon by the parties to the contract; payment shall be made as specified in the contract to the county treasurer, city treasurer or local health district.

Article 4. City Health Ordinances, Boards, and Officers

101450. The governing body of a city shall take measures necessary to preserve and protect the public health, including the regulation of sanitary matters in the city, and including if indicated, the adoption of ordinances, regulations and orders not in conflict with general laws.

101455. This article does not prevent the appointment by the governing body of a board of health that shall be advisory to the health officer.

101460. Every governing body of a city shall appoint a health officer, except when the city has made other arrangements, as specified in this code, for the county or district health officer to exercise the same powers and duties within the city, as are conferred upon city health officers by law.

101465. Immediately after the appointment of the city health officer the governing body shall notify the director of the appointment and the name and address of the appointee.

101470. Each city health officer shall enforce and observe all of the following:

(a) Orders and ordinances of the governing body of the city pertaining to the public health.

(b) Orders, quarantine and other regulations, concerning the public health, prescribed by the department.

(c) Statutes relating to the public health.

101475. The city health officer may take any preventive measure that may be necessary to protect and preserve the public health from any public health hazard during any ''state of war emergency,'' ''state of emergency,'' or ''local emergency,'' as defined by Section 8558 of the Government Code, within his or her jurisdiction.

''Preventive measure'' means abatement, correction, removal or any other protective step that may be taken against any public health hazard that is caused by a disaster and affects the public health. Funds for these measures may be allowed pursuant to Sections 29127 to 29131, inclusive, and 53021 to 53023, inclusive, of the Government Code and from any other money appropriated by a board of supervisors of a county or governing body of a city to carry out the purposes of this section.

The city health officer, with consent of the board of supervisors of a county or the governing body of the city, may certify any public health hazard resulting from any disaster condition if certification is required for any federal or state disaster relief program.

CHAPTER 4. ACTIONS AGAINST PUBLIC ENTITIES

101500. All claims for money or damages against the district are governed by Part 3 (commencing with Section 900) and Part 4 (commencing with Section 940) of Division 3.6 of Title 1 of the Government Code or by other statutes or regulations that are expressly applicable.

PART 4. SPECIAL HEALTH AUTHORITIES

CHAPTER 1. SONOMA COUNTY DENTAL HEALTH AUTHORITY

101525. (a) The Legislature finds and declares that it is necessary that a special authority be established in Sonoma County in order to meet the problems of the delivery of publicly assisted and indigent dental health care in the county. Because there is no general law under which this authority could be formed, the adoption of a special act and the formation of a special authority is required.

(b) The Board of Supervisors of Sonoma County may, by ordinance, establish the Sonoma County Dental Health Authority to receive state funds and technical assistance for the purpose of managing a dental health care delivery program for indigent persons and Medi-Cal recipients covered under the Denti-Cal program. The enabling ordinance shall specify the membership of the authority, the qualifications of members, the manner of appointment, selection, or removal of members, and their term of office, and any other matters that the board of supervisors deems necessary or convenient for the conduct of the authority's activities. The authority so established shall be considered an entity separate from the county, shall file the statement required by Section 53051 of the Government Code, and shall have the rights, powers, duties, privileges conferred by this chapter, the power to acquire, possess, and dispose of real or personal property, as may be necessary for the performance of its functions, to employ personnel and contract for services required to meet its obligations, and to sue or be sued. Any obligations of the authority, statutory, contractual, or otherwise, shall be the obligations solely of the authority and shall not be the obligations of the county or of the state unless expressly provided for in a contract or grant agreement between the authority and the county or the state.

(c) The authority shall bill the Medi-Cal program for services provided to Medi-Cal recipients.

(d) In the event the authority no longer functions for the purposes for which it was established, the board of supervisors may, by ordinance, terminate the authority at that time as the authority's then existing obligations have been satisfied or the authority's assets have been exhausted. Prior to the termination of the authority, the board of supervisors shall notify the department of its intent to terminate the authority and shall provide the department with an accounting of the assets and liabilities of the authority.

(e) Any assets of the authority shall be disposed of pursuant to provisions contained in the grant agreement entered into between the state and the authority pursuant to this chapter.

(f) Notwithstanding the provisions of this chapter, the department may not enter into any arrangement with the authority

to provide case management or fiscal intermediary services for dental health care provided to Medi-Cal recipients.

101530. (a) The department shall allocate any funds appropriated for that purpose to the Sonoma County Dental Health Authority for the provision of dental care and dental hygiene services for Medi-Cal to recipients covered under the Denti-Cal program, and for indigent persons in Sonoma County.

(b) The department shall permit the Sonoma County Dental Health Authority to impose a fee upon any indigent persons served by the program, commensurate with their ability to pay. An additional fee shall not be imposed upon Medi-Cal recipients for services covered by that program.

101535. (a) The department, after consultation with the Sonoma County Dental Health Authority, shall report to the Legislature on or before December 31, 1989, on the effectiveness of the pilot project provided for under this chapter. The report shall contain recommendations as to whether the program should be continued or expanded.

(b) The report shall include, but not be limited to, all of the following information, which the department shall take into consideration in its recommendation:

(1) The number of indigent patients served.

(2) The number of dentists, dental auxiliaries, and other persons who volunteer in the provision of dental care to the indigent patients.

(3) The dollar amount billed to the Denti-Cal program, which provides reimbursement for dental care services under the Medi-Cal program.

(4) The dollar amount paid to the pilot project by Denti-Cal.

(5) The dollar amount of treatment denied by Denti-Cal.

(6) The dollar amount paid by patients.

(7) The dollar amount of supplies and equipment donated to the program.

(8) The dollar amount paid by the project for overhead.

(9) The number of hours of service by volunteers.

CHAPTER 2. MONTEREY COUNTY SPECIAL HEALTH CARE AUTHORITY

Article 1. General Provisions

101550. The Board of Supervisors of the County of Monterey may by ordinance or resolution order the formation of the Monterey County Special Health Care Authority under this chapter that shall include all of the incorporated and unincorporated areas of the county.

101555. This chapter shall be known and may be cited as the Monterey County Special Health Care Authority Act.

101560. Unless the context otherwise requires, this article governs the construction of this chapter. As used in this chapter:

(a) ‘‘Authority’’ means the Monterey County Special Health Care Authority.

(b) ‘‘Board’’ means the Monterey County Special Health Care Authority Board.

(c) ‘‘County’’ means the County of Monterey.

(d) ‘‘Health care system’’ means any system established to arrange for the provision of medical services.

(e) ‘‘Public agency’’ means the United States, the State of California, any political subdivision, county, municipality, district, or agency of the State of California or of the United States and any department, bureau or commission of the State of California or of the United States.

(f) ‘‘Person’’ means any individual, firm, partnership, association, corporation, limited liability company, trust, business trust, or the receiver or trustee or conservator for any of the above, but does not include a public agency.

(g) ‘‘The professional advisory board’’ means that advisory board to the authority’s board composed of nine health and medical care professionals appointed by the Monterey County Board of Supervisors, five of whom shall be nominated by the Monterey County Medical Society, with at least one to be a member of the Monterey County Chapter of the American Academy of Family Practice, one of whom shall be nominated by Natividad Medical Center, one of whom shall be nominated by the Monterey County Hospital Administrators’ Association, and two of whom shall be nominated by other organizations in the County of Monterey representing other professional health care providers.

(h) ‘‘The community advisory board’’ means that advisory board to the authority’s board appointed by the Monterey County Board of Supervisors which is comprised of 15 persons who represent community and consumer interests and who do not directly earn their income from the provision of medical or health services.

(i) For the purposes of this part, the term ‘‘medical services or medical benefits’’ does not include dental care or dental benefits.

(j) For the purposes of this part, the term ‘‘health care’’ does not include dental care.

Article 2. Board of Directors

101575. The government of the authority shall be vested in a board of directors that shall consist of nine members, selected as follows:

(a) Five members, one from each supervisorial district, shall be appointed by the Monterey County Board of Supervisors.

(b) One member, who shall be a current member of the professional advisory board, shall be nominated by the authority's professional advisory board and confirmed by the Monterey County Board of Supervisors and serve a one-year term.

(c) One member, who shall be a current member of the community advisory board, shall be nominated by the authority's community advisory board and confirmed by the Monterey County Board of Supervisors and serve a one-year term.

(d) Two members, both of whom shall be residents of Monterey County, shall be appointed by the Governor. The Governor shall make the appointments from a list containing at least three nominations by the Monterey County Board of Supervisors.

101580. The board at its first meeting, and thereafter annually at the first meeting in January, shall elect a chair who shall preside at all meetings, and a vice chair who shall preside in his or her absence. In the event of their absence or inability to act, the members present, by an order entered in the minutes, shall select one of their members to act as chair pro tem, who, while so acting, shall have all of the authority of the chair.

101585. The board shall establish rules for its proceedings.

101590. A majority of the members of the board shall constitute a quorum for the transaction of business, and all official acts of the board shall require the affirmative vote of a majority of the members of the board.

101595. The acts of the board shall be expressed by motion, resolution, or ordinance.

101600. Except for initial staggered terms that may be established by the board, the term of office of each member shall be four years and, in addition, such time as necessary until the appointment and qualification of his or her successor.

101605. The bodies that originally nominated or appointed a member whose term has expired shall nominate or appoint the successor for a full term of four years, except that members who are nominated by the professional advisory board or by the community advisory board shall serve a one-year term.

101610. Any vacancy on the board shall be filled for the unexpired term by nomination or appointment by the bodies that originally nominated or appointed the member whose office has become vacant.

101615. The Professional Advisory Board shall review and comment on all proposed policies and actions of the board dealing with arrangements for health care within the board of jurisdiction.

101620. The Community Advisory Board shall review and comment on matters relating to the accessibility and availability of services arranged by the board.

Article 3. Powers of the Board

101625. The authority is hereby declared to be a body corporate and politic and shall have power:

(a) To have perpetual succession.

(b) To sue and be sued in the name of the authority in all actions and proceedings in all courts and tribunals of competent jurisdiction.

(c) To adopt a seal and alter it at pleasure.

(d) To take by grant, purchase, gift, devise, or lease, to hold, use and enjoy, and to lease, convey or dispose of, real and personal property of every kind, within or without the boundaries of the authority, necessary or convenient to the full exercise of its powers. The board may lease, mortgage, sell, or otherwise dispose of any real or personal property within or without the boundaries of the authority necessary to the full or convenient exercise of its powers.

(e) To make and enter into contracts with any public agency or person for the purposes of this chapter.

(f) To appoint and employ an executive director and other employees as may be necessary, including legal counsel, establish their compensation and define their powers and duties. The board shall prescribe the amounts and forms of fidelity bond of its officers and employees. The cost of these bonds shall be born by the authority. The employees and each of them shall serve at the pleasure of the board. The authority may also contract for the services of an independent contractor.

(g) To incur indebtedness.

(h) To purchase supplies, equipment, materials, property, or services.

(i) To establish policies relating to its purposes.

(j) To acquire or contract to acquire, rights-of-way, easements, privileges, or property of every kind within or without the boundaries of the authority, and construct, equip, maintain, and operate any and all works or improvements within or without the boundaries of the authority necessary, convenient, or proper to carry out any of the provisions, objects or purposes of this chapter, and to complete, extend, add to, repair, or otherwise improve any works or improvements acquired by it.

(k) To make contracts and enter into stipulations of any nature upon the terms and conditions that the board finds are for the best interest of the authority for the full exercise of the powers granted in this chapter.

(*l*) To accept gifts, contributions, grants, or loans from any public agency or person for the purposes this chapter.

The authority may do any and all things necessary in order to avail itself of gifts, contributions, grants or loans, and cooperate under any federal or state legislation in effect on January 25, 1982 or enacted after that date.

(m) To invest any surplus money in its treasury in the same manner as the County of Monterey and according to the same laws.

(n) To negotiate with service providers rates, charges, fees, rents, and to establish classifications of health care systems operated by the authority.

(o) To develop and implement health care delivery systems to promote quality care and cost efficiency.

(p) To provide health care delivery systems for any or all of the following:

(1) For all persons who are eligible to receive medical benefits under the Medi-Cal Act (Chapter 7 (commencing with Sec. 14000), Part 3, Division 9, Welfare and Institutions Code) in Monterey County through waiver, pilot project, or otherwise.

(2) For all persons in Monterey County who are eligible to receive medical benefits under both Titles XVIII and XIX of the Social Security Act.

(3) For all persons from Monterey County or any city in that county who are eligible to receive health care under Parts 4.5 (commencing with Section 16700) and 5 (commencing with Section 17000) of Division 9 of the Welfare and Institutions Code.

(q) To insure against any accident or destruction of its health care system or any part thereof. It may insure against loss of revenues from any cause. The district may also provide insurance as provided in Part 6 (commencing with Section 989) of Division 3.6 of Title 1 of the Government Code.

(r) To exercise powers that are expressly granted and powers that are reasonably implied from those express powers and necessary to carry out the purposes of this chapter.

(s) To do any and all things necessary to carry out the purposes of Part 3 of Division 1.

101630. Notwithstanding any other provision of law:

(a) The state or any state agency may enter into contracts with the authority for the authority to obtain or arrange for health care under the authority's health care systems, for all persons who are eligible to receive medical benefits under the Medi-Cal Act (Chapter 7 (commencing with Sec. 14000), Part 3. Division 9, Welfare and Institutions Code) in Monterey County through waiver, pilot project, or otherwise.

(b) The County of Monterey or any city in the County of Monterey may enter into contracts with the authority to obtain or provide health care services for all persons from Monterey County or any city in that county who are eligible to receive health care under Parts 4.5 (commencing with Section 16700) and 5 (commencing with Section 17000) of Division 9 of the Welfare and Institutions Code.

(c) The department shall pursue waivers of federal law as necessary, in order to carry out this section.

101635. All claims for money or damages against the authority are governed by Part 3 (commencing with Section 900) and Part 4 (commencing with Section 940) of Division 3.6 of Title 1 of the Government Code or by other statutes or regulations expressly applicable.

101640. The Board of Supervisors of the County of Monterey may by ordinance or resolution order the dissolution of the authority by declaring that there is no need for the authority to function in the county. The dissolution shall become effective 180 days after the date of adoption of the resolution or ordinance ordering the dissolution.

As of the effective date of the dissolution of the authority, the authority shall be dissolved, disincorporated and extinguished, its existence shall be terminated and all of its corporate powers shall cease, except for winding up the affairs of the authority.

For the purpose of winding up the affairs of the dissolved authority, the County of Monterey shall be the successor.

Upon the effective date of dissolution, control over all of the moneys or funds, including on hand and moneys due, but uncollected, and all property, real or personal, of the authority shall be vested in the County of Monterey for the purpose of winding up the affairs of the authority.

The powers of the county in winding up the affairs of the authority and the distribution of assets of the authority, shall be in accordance with Article IV (commencing with Section 56500) of Chapter 9 of Part 4 of Division 1 of Title 6 of the Government Code.

This chapter shall prevail over the Government Code in case of any inconsistencies.

Monterey County shall remain a separate and distinct governmental agency separate and apart from the authority and shall have no liability for any debt, obligation or contract of any kind owed or incurred by the authority other than to wind up the affairs of the authority in accordance with this section and solely with the assets of the authority.

101645. (a) The board may by ordinance or resolution provide that each director of the authority board be paid a sum not to exceed fifty dollars ($50) remuneration from authority funds, for each board or committee meeting attended, but not exceeding the sum of one hundred dollars ($100) per month, plus actual expenses incurred in attending board or committee meetings at rates payable to officers and employees of the authority for their attendance at meetings within the scope of their employment.

(b) The board may, by ordinance or resolution, provide that each member of the professional advisory board be paid a sum not to exceed twenty-five dollars ($25) remuneration from authority funds, for each board or committee meeting attended, but not exceeding the sum of fifty dollars ($50) per month, plus his or her reasonable expenses for participating in authority business.

(c) The board may by ordinance or resolution provide that each member of the community advisory board be paid a sum not to exceed fifteen dollars ($15) remuneration from authority funds, for each board or committee meeting attended, but not exceeding the sum of thirty dollars ($30) per month, plus his or her reasonable expenses for participating in authority business.

(d) This section shall not apply to staff members of the authority.

101650. The board shall inform the Monterey County Board of Supervisors in writing of any amendment proposed by the authority to the Monterey County Special Health Care Authority Act prior to the authority requesting any legislative action on the amendment.

The board shall inform the Monterey County Board of Supervisors in writing of any change proposed by the authority to any state or federal rule or regulation that may have fiscal impact on the program or an impact on the quality of medical services or medical benefits prior to the authority requesting any change.

CHAPTER 3. SANTA BARBARA COUNTY SPECIAL HEALTH CARE AUTHORITY

Article 1. General Provisions

101675. This chapter shall be known and may be cited as the Santa Barbara Regional Health Authority Act.

101680. The Board of Supervisors of the County of Santa Barbara may, by ordinance or resolution, order the formation of the Santa Barbara Regional Health Authority under this chapter that shall include all of the incorporated and unincorporated areas of the county.

101685. Unless the context otherwise requires, this article governs the construction of this chapter. As used in this chapter:

(a) ''Authority'' means the Santa Barbara Regional Health Authority.

(b) ''Board'' means the Santa Barbara Regional Health Authority Board of Directors.

(c) ''County'' means the County of Santa Barbara.

(d) ''Health care system'' means any system established to arrange for the provision of medical services.

(e) ''Public agency'' means the United States, the State of California, any political subdivision, county, municipality, district, or agency of the State of California or of the United States and any department, bureau or commission of the State of California or of the United States.

(f) ''Person'' means any individual, firm, partnership, association, corporation, limited liability company, trust, business trust, or the receiver or trustee or conservator for any of the above, but does not include a public agency.

(g) ‘‘Professional advisory boards’’ means the boards appointed by the board of directors of the authority pursuant to its rules which shall consist of a representative cross-section of professional providers of health care services within the county.

(h) ‘‘Community advisory boards’’ means advisory boards to the authority’s board appointed by the board of directors of the authority which shall consist of persons who represent community and consumer interests and who do not directly earn their income from the provision of medical health services.

101690. The governing body of the authority shall be vested in a board of directors that shall consist of 11 members appointed by the county’s board of supervisors as follows:

(a) Three members shall be elected or appointed officers or employees of the county, at least one of whom shall be a member of the board of supervisors.

(b) Three members shall be county residents consisting of one who shall be a recipient of Medi-Cal, provided for under Sections 14000 and following, of the Welfare and Institutions Code, one of whom shall be a recipient of Medicare, provided for under Title XVIII of the federal Social Security Act, and one of whom shall be a representative of a community business that does not provide health care.

(c) Five members shall be representatives of providers of health care services in the county including: (1) two physicians, one of whom shall be appointed from a list established by the County Medical Society and the other from a list established by the hospitals within the county. One of the appointed physicians shall be a resident of and in practice in the fourth or fifth supervisorial district of the county; (2) two hospital administrators, one from hospitals located in either the first, second or third supervisorial districts of the county and the other from either the fourth or fifth supervisorial districts; and (3) one nonhospital or nonphysician health care provider.

101695. The board, at its first meeting, and annually thereafter at the first meeting in January, shall elect a chair who shall preside at all meetings, and a vice chair who shall preside in his or her absence. In the event of their absence or inability to act, the members present, by an order entered in the minutes, shall select one of their members to act as chair pro tempore, who, while so acting, shall have all of the authority of the chair.

101700. The board shall establish rules for its proceedings. There shall be at least four meetings per year. Board members shall be entitled to one hundred dollars ($100) remuneration from authority funds, for each board meeting attended and the authority may pay remuneration to board members attending meetings of committees of the board except that remuneration for attending board meetings and board committee meetings shall not exceed the sum of two hundred dollars ($200) per month, plus actual expenses incurred in

attending meetings at rates payable to county officers and employees. The per diem rate of one hundred dollars ($100) may be increased by the board subject to approval by the board of supervisors.

101705. A majority of the members of the board shall constitute a quorum for the transaction of business, and all official acts of the board shall require the affirmative vote of a majority of the members of the board.

101710. The acts of the board shall be expressed by motion, resolution or ordinance.

101715. Except for initial staggered terms that may be established by the board, the term of office of each noncounty member shall be two years and, in addition, time as necessary until the appointment and qualification of his or her successor. County officers or employees shall serve at the pleasure of the board of supervisors.

101720. Any vacancy on the board shall be filled for the unexpired term by the county's board of supervisors.

101725. Professional advisory and community advisory boards shall review and comment on proposed policies and actions of the board dealing with the arrangements for health care within the jurisdiction of the authority.

101730. The board may allow as a charge against the authority, reimbursement to members of professional and community advisory boards, of actually incurred expenses in attending meetings in amounts allowed by the board of supervisors to county officers and employees.

Article 2. Powers of the Authority

101750. The authority is hereby declared to be a body corporate and politic and it shall have power:

(a) To have perpetual succession.

(b) To sue and be sued in the name of the authority in all actions and proceedings in all courts and tribunals of competent jurisdiction.

(c) To adopt a seal and alter it at pleasure.

(d) To take by grant, purchase, gift, devise, or lease, to hold, use and enjoy, and to lease, convey or dispose of, real and personal property of every kind, within or without the boundaries of the authority, necessary or convenient to the full exercise of its powers. The board may lease, mortgage, sell, or otherwise dispose of any real or personal property within or without the boundaries of the authority necessary to the full or convenient exercise of its powers.

(e) To make and enter into contracts with any public agency or person for the purposes of this chapter. Members of the board shall be disqualified from voting on contracts in which they have a financial interest. Notwithstanding any other provision of law, members shall not be disqualified from continuing to serve as a

member of the board and a contract may not be avoided solely because of a member's financial interest.

(f) To appoint and employ an executive director and other employees as may be necessary, including legal counsel, fix their compensation and define their powers and duties. The board shall prescribe the amounts and forms of fidelity bond of its officers and employees. The cost of these bonds shall be borne by the authority. The authority may also contract for the services of an independent contractor.

(g) To incur indebtedness not exceeding revenue in any year.

(h) To purchase supplies, equipment, materials, property, or services.

(i) To establish policies relating to its purposes.

(j) To acquire or contract to acquire, rights-of-way, easements, privileges, or property of every kind within or without the boundaries of the authority, and construct, equip, maintain, and operate any and all works or improvements within or without the boundaries of the authority necessary, convenient, or proper to carry out any of the provisions, objects or purposes of this chapter, and to complete, extend, add to, repair, or otherwise improve any works or improvements acquired by it.

(k) To make contracts and enter into stipulations of any nature upon the terms and conditions that the board finds are for the best interest of the authority for the full exercise of the powers granted in this chapter.

(*l*) To accept gifts, contributions, grants or loans from any public agency or person for the purposes of this chapter. The authority may do any and all things necessary in order to avail itself of the gifts, contributions, grants or loans, and cooperate under any federal or state legislation in effect on March 25, 1982 or enacted after that date.

(m) To manage its moneys and to provide depository and auditing services pursuant to either of the methods applicable to special districts as set forth in the Government Code.

(n) To negotiate with service providers rates, charges, fees and rents, and to establish classifications of health care systems operated by the authority. Members of the board who are county officers and employees may vote to approve arrangements and agreements between the authority and the county as a service provider and these directors shall not thus be disqualified solely for the reason that they are employed by the county.

(o) To develop and implement health care delivery systems to promote quality care and cost efficiency and to provide appeal and grievance procedures available to both providers and consumers.

(p) To provide health care delivery systems for any or all of the following:

(1) For all persons who are eligible to receive medical benefits under the Medi-Cal Act, as set forth in Sections 14000 and following,

of the Welfare and Institutions Code in the county through waiver, pilot project, or otherwise.

(2) For all persons in the county who are eligible to receive medical benefits under both Titles XVIII and XIX of the federal Social Security Act.

(3) For all persons in the county who are eligible to receive medical benefits under Title XVIII of the federal Social Security Act.

(4) For all persons in the county who are eligible to receive medical benefits under publicly supported programs if the authority, and participating providers acting pursuant to subcontracts with the authority, agree to hold harmless the beneficiaries of the publicly supported programs if the contract between the sponsoring government agency and the authority does not ensure sufficient funding to cover program benefits.

(q) To insure against any accident or destruction of its health care system or any part thereof. It may insure against loss of revenues from any cause. The authority may also provide insurance as provided in Part 6 (commencing with Section 989) of Division 3.6 of Title 1 of the Government Code.

(r) To exercise powers that are expressly granted and powers that are reasonably implied from express powers and necessary to carry out the purposes of this chapter.

(s) To do any and all things necessary to carry out the purposes of this chapter.

101755. Notwithstanding any other provision of law, the state or any state agency may enter into contracts with the authority for the authority to obtain or arrange for health care under the authority's health care systems, for all persons who are eligible to receive medical benefits under the Medi-Cal Act, as set forth in Section 14000 et seq., of the Welfare and Institutions Code, in Santa Barbara County through waiver, pilot project, or otherwise.

101760. Notwithstanding any other provision of this chapter, the board of supervisors of the county may review major administrative decisions of the authority, excluding those involving personnel matters, upon appeal by the affected person and upon a majority vote of the board of supervisors. The board of supervisors may either approve, modify, reflect or repeal these decisions. The action of the board of supervisors shall be deemed to constitute a final administrative remedy. The board of supervisors and the authority shall mutually develop and agree on rules and regulations setting forth review procedures and guidelines to determine which decisions of the authority are major so as to confer appellate jurisdiction upon the board of supervisors. The board of supervisors shall adopt the mutually agreed upon rules and regulations by resolution or ordinance.

This section shall not be operative until adopted by resolution by the board of supervisors.

101765. Any licensed provider eligible to receive Medi-Cal reimbursement under law and who enters into a written contract with the authority under terms and conditions approved by the department shall be able to participate in this program as a provider. A written agreement shall not be required if any of the following circumstances apply:

(a) The provider renders any medically necessary emergency health care on a nonroutine basis.

(b) The provider renders services that are duly authorized by the authority, if the services are either seldom used or are rendered outside of the county.

101770. All claims for money or damages against the authority are governed by Part 3 (commencing with Section 900) and Part 4 (commencing with Section 940) of Division 3.6 of Title 1 of the Government Code, except as provided in those parts, or by other statutes or regulations expressly applicable to those parts.

101775. In the formation of the authority pursuant to this chapter, Section 54773 et seq., of the Government Code is not applicable.

101780. The board of supervisors may, by ordinance or resolution, order the dissolution of the authority by declaring that there is no need for the authority to function in the county. The dissolution shall become effective 180 days after the date of adoption of the resolution or ordinance ordering the dissolution.

As of the effective date of the dissolution of the authority, the authority shall be dissolved, disincorporated and extinguished; its existence shall be terminated and all of its corporate powers shall cease, except for winding up the affairs of the authority.

For the purpose of winding up the affairs of the dissolved authority, the County of Santa Barbara shall be the successor.

Upon the effective date of dissolution, control over all of the moneys or funds, including on hand and moneys due, but uncollected, and all property, real or personal, of the authority shall be vested in the County of Santa Barbara for the purpose of winding up the affairs of the authority.

The powers of the county in winding up the affairs of the authority and the distribution of assets of the authority, shall be in accordance with Article 4 (commencing with Section 56500) of Chapter 9 of Part 4 of Division 1 of Title 6 of the Government Code. The liability of the county as successor shall be limited to the assets of the authority.

101785. If the board of supervisors does not, by ordinance or resolution, order the formation of the authority under this chapter prior to January 1, 1986, this chapter is repealed as of January 1, 1986, unless a later enacted statute, chaptered before that date, deletes or extends that date.

On or before January 15, 1986, the board of supervisors shall report to the Secretary of State as to whether it has established the authority.

CHAPTER 4. VOLUNTARY HEALTH FACILITY PHILANTHROPIC SUPPORT ACT

101800. This Chapter shall be known and may be cited as the Voluntary Health Facility and Clinic Philanthropic Support Act.

101805. The Legislature finds and declares that, while there continues to be a need to focus on the deficiencies in the health care system and on corrective reform measures that might be taken, there is also need for focus on the enhancement of its strengths. Existing philanthropic support for health facilities and clinics is a strength which must be preserved and enhanced under any reform measure for all of the following reasons:

(a) Philanthropy imbues members of the community with a sense of pride in their voluntary nonprofit health facilities and clinics and creates a setting in which members of the community are willing to devote time and effort to improve health care available in the community in a way that government regulation could never replace.

(b) Philanthropy allows voluntary nonprofit institutions to conduct research and to engage in other innovative efforts to improve health care in California.

(c) Philanthropy provides required discretionary dollars for voluntary nonprofit institutions, which, in part, substitute for the absence of profits.

(d) Philanthropy allows hospitals to replace wornout and obsolete facilities when, in a period of high inflation, historical costs accumulated through depreciation are totally insufficient to provide for such replacement.

(e) Philanthropy pays for necessary expenditures that otherwise would have to be paid by patients or by government.

(f) Philanthropy may be discouraged by certain shortsighted actions of administrative agencies which, while purporting to serve a short-term purpose, seriously deter the vast benefits to the health care field inuring directly from philanthropy and voluntarism.

(g) Recent amendments to the federal tax laws to broaden the use of the standard deduction also have the effect of eliminating important incentives for philanthropy.

101810. It is, therefore, the intent of the Legislature to create an environment in which philanthropy and voluntarism in the health care field and the vast benefits arising from it for the citizens of California can be encouraged. The Legislature hereby declares it to be the policy of this state that philanthropic support for health care be encouraged and expanded, especially in support of experimental and innovative efforts to improve the health care delivery system.

101815. For purposes of any state law, whether enacted before or on or after January 1, 1980, which in any manner provides for regulation, review, or reporting of the budget, rates, or revenues of

health facilities, as defined in Section 1250, or clinics, as defined in Section 1204, including the provisions of Part 1.7 (commencing with Section 440), none of the following shall be treated directly, or indirectly, as revenues allocable to the cost of care provided by the health facility or clinic:

(a) A donor-designated or restricted grant, gift, endowment, or income therefrom, as defined in Section 405.423(b) of Title 42 of the Code of Federal Regulations, insofar as permitted by federal law.

(b) A grant or gift, or income from such grant or gift, which is not available for use as operating funds because of its designation by the governing board or entity of the health facility or clinic.

(c) A grant or similar payment which is made by a governmental entity and which is not available, under the terms of the grant or payment, for use as operating funds.

(d) Amounts attributable to the sale or mortgage of any real estate or other capital assets of the health facility or clinic which it acquired through a gift or grant, and which are not available for use as operating funds under the terms of the gift or grant or because of designation as provided in subdivision (b).

(e) A depreciation fund which is created by the health facility or clinic in order to meet a condition imposed by a third party for the third party's financing of a capital improvement of the health facility or clinic, provided the fund is used exclusively to make payments to such third party for the financing of such capital improvement.

(f) Funds used to defray the expense of fundraising.

101820. No state law shall be construed in such a way as to discourage philanthropic support of health facilities and clinics, or to otherwise hinder the use of such support for purposes determined by the recipients to be in the best interests of the physicians and patients it serves.

However, in enacting this article and Section 14106.2 of the Welfare and Institutions Code, the Legislature does not intend to place any restrictions on cost containment measures relating to health facilities which may be enacted in the future.

SEC. 4. Division 102 (commencing with Section 102100) is added to the Health and Safety Code, to read:

DIVISION 102. VITAL RECORDS AND HEALTH STATISTICS

PART 1. VITAL RECORDS

CHAPTER 1. GENERAL PROVISIONS

102100. Each live birth, fetal death, death, and marriage that occurs in the state shall be registered as provided in this part on the prescribed certificate forms. In addition, a report of every judgment of dissolution of marriage, legal separation, or nullity decree shall be

filed with the State Registrar, as provided in this part. All confidential information included in birth, fetal death, death, and marriage certificates and reports of dissolution of marriage, legal separation, or nullity that are required to be filed by this part, shall be exempt from the California Public Records Act contained in Chapter 3.5 (commencing with Section 6250) of Division 7 of Title 1 of the Government Code.

102105. The department is charged with the uniform and thorough enforcement of this part throughout the state, and may adopt additional regulations for its enforcement.

102110. The State Registrar shall adopt regulations specifying both of the following:

(a) Procedures to assure the confidentiality of the confidential portion of the certificate of live birth, specified in subdivision (b) of Section 102425, and the medical and health report, specified in Section 102445.

(b) Procedures regarding access to records required by this part.

102115. The department may make and enforce regulations for the embalming, cremation, interment, disinterment and transportation of the dead in matters relating to communicable diseases.

102120. The State Registrar shall inform all local registrars which diseases are to be considered infectious, contagious, or communicable and dangerous to the public health, as decided by the department, in order that when deaths occur in which the diseases are involved, proper precautions may be taken to prevent their spread.

102125. All certificates of live birth, fetal death, or death shall be written legibly, in durable black ink, and a certificate is not complete and correct that does not supply all of the items of information called for, or satisfactorily account for their omission.

102130. All certificates of registry of marriage shall be written legibly and shall be photographically and micrographically reproducible. A certificate of registry of marriage is not complete and correct that does not supply all of the items of information called for, or satisfactorily account for their omission.

102135. (a) All physicians, informants, funeral directors, clergy, or judges and all other persons having knowledge of the facts, shall supply upon the prescribed forms any information that they possess regarding any birth, fetal death, death, or marriage upon demand of the state or local registrar.

(b) All physicians, informants, funeral directors, clergy, judges, public employees, or other persons who supply upon prescribed forms information that they possess regarding any birth, fetal death, death, or marriage shall in no case use a derogatory, demeaning, or colloquial racial or ethnic descriptor.

102140. No alteration or change in any respect shall be made on any certificate after its acceptance for registration by the local registrar, or on other records made in pursuance of this part, except where supplemental information required for statistical purposes is furnished.

102145. Every person in charge of a hospital or other institution to which persons are admitted for treatment or confinement shall make a record of the personal, medical and other information for each patient sufficient and adequate for the completion of a birth or death certificate.

102150. (a) When objection is made by either parent to the furnishing of information requested in items (3), (9), and (10) in the confidential portion of the certificate of live birth, specified in subdivision (b) of Section 102425, this information shall not be required to be entered on that portion of the certificate of live birth.

(b) A parent is not required to disclose his or her social security number as required by paragraph (14) of subdivision (b) of Section 102425 if the parent has good cause for not disclosing his or her social security number. Good cause shall be defined by regulations adopted by the State Department of Social Services.

102155. ''Absence of conflicting information relative to parentage'' as used in Chapter 5 (commencing with Section 102625) or Chapter 11 (commencing with Section 103225) includes entries such as ''unknown,'' ''not given,'' ''refused to state,'' or ''obviously fictitious names.''

CHAPTER 2. ADMINISTRATION

Article 1. State Administration

102175. The director shall be the State Registrar of Vital Statistics.

102180. The State Registrar is charged with the execution of this part in this state, and has supervisory power over local registrars, so that there shall be uniform compliance with all of the requirements of this part.

102185. The State Registrar may investigate cases of irregularity or violations of this part.

102190. When the State Registrar deems it necessary, he or she shall report cases of violation of any of the provisions of this part to the district attorney of the county where the violation occurred, with a statement of the facts and circumstances; and the district attorney shall forthwith initiate and promptly follow up with the necessary court proceedings.

102195. The Attorney General shall assist in the enforcement of this part upon request of the State Registrar.

102200. The State Registrar shall prescribe and furnish all record forms for use in carrying out the purposes of this part, or shall

prescribe the format, quality, and content of forms electronically produced in each county, and no record forms or formats other than those prescribed shall be used.

102205. The State Registrar shall prepare and issue detailed instructions as may be required to procure the uniform observance of this part and the maintenance of a satisfactory system of registration.

102210. The State Registrar shall establish registration districts within the State for the purposes of this part.

102215. The State Registrar of Vital Statistics may call into conference the local registrars or their chief deputies, in groups and at places within the state as may be designated by him or her, to meet with him or her or his or her duly authorized representatives, for the purpose of discussing problems dealing with registration of births, fetal deaths, deaths, and marriages, in order to promote uniformity of policy and procedure throughout the state in matters pertaining to vital registration; provided further, that the actual and necessary expenses incident to attendance at not more than one such meeting per year shall with the prior approval of the local legislative body be a legal charge against the local governmental unit.

102220. The State Registrar shall carefully examine the certificates received from the local registrars of births, deaths, and fetal deaths, and if they are incomplete or unsatisfactory shall require any further information that may be necessary to make the record complete and satisfactory.

102225. The State Registrar shall carefully examine the marriage certificates received from the county recorders, and if they are incomplete or unsatisfactory shall require any further information that may be necessary to make the record complete and satisfactory. Any certificates that are determined to be incomplete or unsatisfactory shall be returned to the county recorder within 90 days after receipt by the State Registrar. If a certificate is not returned to the county recorder within 90 days, the State Registrar shall register the certificate as presented.

102230. The State Registrar shall arrange and permanently preserve the certificates in a systematic manner and shall prepare and maintain a comprehensive and continuous index of all certificates registered.

102235. Notwithstanding any other provisions of law relating to retention of public records, the State Registrar may cause the original records of birth, death and marriage filed under this part to be destroyed if all of the following requirements have been met:

(a) One year has elapsed since the date of registration of the records.

(b) The birth, death, or marriage records have been reproduced onto microfilm or optical disk or by any other technique that does not permit additions, deletions, or changes to the original document in

compliance with the minimum standards or guidelines, or both, recommended by the American National Standards Institute or the Association for Information and Image Management for recording of permanent records or nonpermanent records, whichever applies.

(c) Adequate provisions are made that the permanent storage medium reflects additions or corrections to the records.

(d) A permanent copy is maintained in a manner that permits it to be used for all purposes served by the original record.

(e) A permanent copy has been stored at a separate physical location in a place and manner that will reasonably assure its preservation indefinitely against loss or destruction.

102240. Any certified photographic reproduction of any record stored on a permanent storage medium under this chapter shall be deemed to be a certification of the original record.

102245. On and after January 1, 1978, whenever the State Registrar receives a death certificate from a local registrar, the State Registrar shall determine whether the state records contain the birth certificate of the deceased or a reproduction thereof as authorized under this chapter. If the State Registrar has such a record of birth, it shall be revised to indicate the date of the death of the registrant, or, alternatively, a notation to that effect shall be entered in the State Registrar's index of births adjacent to the name of the deceased. The State Registrar, pursuant to an ongoing program, shall distribute, without charge, on a monthly basis to each county, a list of deceased registrants to enable local registrars and recorders to update their files. Upon receipt of such a list the local registrar or county recorder shall revise the local records or indexes accordingly.

Subject to the availability of funds appropriated for that purpose, the State Registrar may similarly revise or index birth records of registrants whose death certificates were filed prior to January 1, 1978.

102247. (a) There is hereby created in the State Treasury the Health Statistics Special Fund. The fund shall consist of revenues including, but not limited to, all of the following:

(1) Fees or charges remitted to the State Registrar for record search or issuance of certificates, permits, registrations, or other documents pursuant to Chapter 3 (commencing with Section 26800) of Part 3 of Division 2 of Title 3 of the Government Code, and Chapter 4 (commencing with Section 102525), Chapter 5 (commencing with Section 102625), Chapter 8 (commencing with Section 103050), and Chapter 15 (commencing with Section 103600), of Part 1, of Division 102.

(2) Funds remitted to the State Registrar by the federal Social Security Administration for participation in the enumeration at birth program.

(3) Funds remitted to the State Registrar by the National Center for Health Statistics pursuant to the federal Vital Statistics Cooperative Program.

(4) Funds deposited into the Vital Records Improvement Account pursuant to Section 103640.

(5) Any other funds collected by the State Registrar, except Children's Trust Fund fees collected pursuant to Section 18966 of the Welfare and Institutions Code, fees allocated to the Judicial Council pursuant to Section 1852 of the Family Code, and fees collected pursuant to Section 103645, all of which shall be deposited into the General Fund.

(b) Moneys in the Health Statistics Special Fund shall be expended by the State Registrar for the purpose of funding its existing programs and programs that may become necessary to carry out its mission, upon appropriation by the Legislature.

(c) Health Statistics Special Fund moneys shall be expended only for the purposes set forth in this section and Section 102249, and shall not be expended for any other purpose or for any other state program.

(d) It is the intent of the Legislature that the Health Statistics Special Fund provide for the following:

(1) Registration and preservation of vital event records and dissemination of vital event information to the public.

(2) Data analysis of vital statistics for population projections, health trends and patterns, epidemiologic research, and development of information to support new health policies.

(3) Development of uniform health data systems that are integrated, accessible, and useful in the collection of information on health status.

(e) This section shall become operative on July 1, 1995.

102249. (a) The State Registrar shall expend funds in the Health Statistics Special Fund, upon appropriation by the Legislature, for all of the following:

(1) Support existing programs within the State Registrar's office.

(2) Implement and support new programs within the State Registrar's office that meet its goals and objectives.

(3) Build a data system that will support policy analysis and program decisions at all levels, be useful to health care providers, local and community agencies, and the state, and ultimately benefit consumers of health care services.

(4) Develop and maintain public health data bases.

(5) Access and analyze data in order to develop and evaluate California's health policy.

(6) Conduct special studies and prepare statistical reports concerning the health status of Californians.

(7) Develop and maintain an automation system for vital event registration.

(8) Disseminate vital event information and statistical reports to the public.

(b) This section shall become operative on July 1, 1995.

102250. (a) There is a State Vital Record Improvement Account in the Health Statistics Special Fund.

(b) The remainder of the moneys in the account that are not subject to local allocations on July 1, 1995, pursuant to subdivision (a) of former Section 10040, shall be utilized by the State Registrar to improve and automate the processing of vital records maintained by the State Registrar.

(c) This section shall become operative July 1, 1995.

Article 2. Local Administration

102275. The health officer of any approved local health department, as defined in Article 1 (commencing with Section 101175) of Part 3 of Division 101 and approved thereunder, is the local registrar in and for all registration districts within that health jurisdiction and shall perform all the duties of local registrar of births and deaths.

102280. In other areas, the State Registrar shall appoint a local registrar of births and deaths for each registration district, whose term of office shall be four years. The State Registrar may remove such appointee forthwith for failure or neglect to perform his or her duty.

102285. The county recorder is the local registrar of marriages and shall perform all the duties of the local registrar of marriages.

102290. Each assistant or deputy of a local registrar may perform all of the duties of the local registrar in the name and place of his or her principal.

102295. Each local registrar is hereby charged with the enforcement of this part in his or her registration district under the supervision and direction of the State Registrar and shall make an immediate report to the State Registrar of any violation of this law coming to his or her knowledge.

102300. Each local registrar shall supply blank forms to persons who require them.

102305. The local registrar of births and deaths shall carefully examine each certificate before acceptance for registration and, if any are not completed in a manner consistent with the policies established by the State Registrar, he or she shall require further information to be furnished as may be necessary to make the record consistent with those policies before acceptance for registration.

102310. The local registrar of marriages shall carefully examine each certificate before acceptance for registration and, if it is incomplete or unsatisfactory, he or she or she shall require any

further information to be furnished as may be necessary to make the record satisfactory before acceptance for registration.

102315. The local registrar shall affix his or her signature to each certificate in attest to the date of acceptance for registration in his or her office.

102320. The local registrar shall number the certificates of live birth, fetal death, and death consecutively in separate series, beginning with number one for the first event in each calendar year.

102325. The local registrar shall number each certificate of marriage consecutively beginning with the number one for either the first event occurring, or first event registered in, each calendar year. Numbering may be based on either the year that the event occurs or the year of registration.

102330. The local registrar shall make a complete and accurate copy of each certificate accepted for registration and shall preserve it in his or her office as the local registrar's copy of the record in the manner directed by the State Registrar.

102335. Each local registrar of births and deaths, except a local registrar of a city and county shall transmit to the county recorder for a special county record at the same time the original certificates are forwarded to the State Registrar a copy of each original birth certificate and death certificate.

In lieu of the procedure outlined above in this section, the county recorder may make the copies of certificates for the special county record, in which case the original certificates shall be transmitted by the local registrar to the county recorder for this purpose, after which the county recorder shall forward the original certificates to the State Registrar pursuant to Section 102345.

102340. Any local registrar serving a county-wide health jurisdiction of over 550,000 population, as determined by the official 1950 census, and in whose office is maintained a central depository of birth and death records, is excepted from Section 102335.

102345. (a) The local registrar of births and deaths shall transmit each week to the State Registrar all original certificates accepted for registration by him or her during the preceding week.

(b) This section shall become operative on January 1, 1993.

102350. The county board of supervisors may, by resolution, require the local registrar to send a copy of each certificate of death to the physician and surgeon whose statement appears on the certificate pursuant to Section 102825.

102355. The local registrar of marriages shall transmit to the State Registrar on or before the fifth day of each month all original certificates of registry of marriage accepted for registration by him or her during the preceding month. Certificates shall be batched by calendar year of event prior to transmission. Certificates may be transmitted at more frequent intervals by arrangement with the State Registrar.

102360. The local registrar of births and deaths shall furnish to the registrar of voters or county clerk not later than the 15th day of each month a notification of all deceased persons 18 years of age and over whose deaths were registered with him or her or of whose deaths he or she was notified by the state registrar of vital statistics during the preceding month. This notification shall include at least the name, social security number, sex, age, birthplace, birthdate, place of residence, and date and place of death for each decedent. Copies of this notification list shall be sent at the same time to the county welfare department and the local district social security office.

102365. Notwithstanding any other law to the contrary, a local registrar of births and deaths, after one year from the date of registration and with the approval of, and under the supervision of, the State Registrar, may dispose of the local registrar's copies of the records, if both of the following exist:

(a) The original copies of the records are on file in the office of the State Registrar.

(b) Copies of the records are on file in the office of the county recorder. If the county recorder does not have copies of the records, he or she may accept the local registrar's copies as a special county record of the events.

102370. The county recorder is hereby authorized to receive original records or abstracts of records of any birth or death that were filed with any political subdivision prior to July 1, 1905, and to retain them as a special county record of the events.

102375. Special county records of birth certificates and death certificates transmitted and filed with the county recorder under this article shall be open for inspection by the public in accordance with regulations adopted by the department for local registrars.

Nothing in this section shall authorize the use of a certificate marked pursuant to subdivision (a) of former Section 10056.5 by any person compiling a business contact list.

102380. The county recorder and the local registrar of births and deaths, with the approval and under the supervision of the State Registrar and with the approval of the board of supervisors of any county or city and county by ordinance, may authorize the transfer of special county records of deaths and marriages and local registrar's records of deaths for events that occurred subsequent to July 1, 1905, to a private nonprofit agency or public agency that shall preserve the records for local public use. The receiving agency shall protect and preserve the records to assure access for any person who has a need or interest in reviewing the records, and shall prohibit the photocopying or sale of copies of the records, but may convert the records to microform format.

If the office of the local registrar or the county recorder does not have copies of the records, that office is hereby authorized to accept them from the county recorder or local registrar.

102385. If a public agency or private nonprofit agency that receives copies of records pursuant to this section is unable to assure the continued preservation and protection of those records for public use, the records shall be returned to the contributing local registrar or county recorder.

102390. Any record of death and marriage transferred to a public agency or private nonprofit agency pursuant to Section 102380 is exempt from Sections 102230 and 103245.

102395. Special county records of birth, death, and marriage and the local registrar's records of birth, death, and marriage shall be subject to Sections 26205.5 and 26205.7 of the Government Code.

CHAPTER 3. LIVE BIRTH REGISTRATION

Article 1. Duty of Registering Live Birth

102400. Each live birth shall be registered with the local registrar of births and deaths for the district in which the birth occurred within 10 days following the date of the event.

102405. For live births that occur in a hospital, the administrator of the hospital or a representative designated by the administrator in writing may sign the birth certificate certifying the fact of birth instead of the attending physician and surgeon, certified nurse midwife, or principal attendant if the physician and surgeon, certified nurse midwife, or principal attendant is not available to sign the certificate; and shall be responsible for registering the certificate with the local registrar within the time specified in Section 102400.

102410. For those live births occurring in a hospital, and upon a parent's request, a footprint shall be taken of the child prior to discharge from the facility and shall be made available to the parents. The footprint shall be placed on a sheet of paper that is separate from the birth certificate, shall only be prepared for the parents prior to discharge from the hospital, and need not be retained or kept on file.

102415. For live births that occur outside of a hospital, the physician in attendance at the birth; or in the absence of a physician, either one of the parents shall be responsible for entering the information on the certificate, securing the required signatures, and for registering the certificate with the local registrar.

Article 2. Content of Certificate of Live Birth

102425. (a) The certificate of live birth for any live birth occurring on or after January 1, 1980, shall contain those items necessary to establish the fact of the birth and shall contain only the following information:

(1) Full name and sex of child.

(2) Date of birth, including month, day, hour, and year.

(3) Planned place of birth and place of birth.

(4) Full name of father, birthplace, and date of birth of father including month, day, and year.

(5) Full birth name of mother, birthplace, and date of birth of mother including month, day, and year.

(6) Multiple births and birth order of multiple births.

(7) Signature, and relationship to child, of a parent or other informant, and date signed.

(8) Name, title, and mailing address of attending physician and surgeon or principal attendant, signature, and certification of live birth by attending physician and surgeon or principal attendant or certifier, date signed, and name and title of certifier if other than attending physician and surgeon or principal attendant.

(9) Date accepted for registration and signature of local registrar.

(10) A state birth certificate number and local registration district and number.

(11) A blank space for entry of date of death with a caption reading ‘‘Date of Death.’’

(b) In addition to the items listed in subdivision (a), the certificate of live birth shall contain the following medical and social information, provided that the information is kept confidential pursuant to Sections 102430 and 102447 and is clearly labeled ‘‘Confidential Information for Public Health Use Only’’:

(1) Birth weight.

(2) Pregnancy history.

(3) Race and ethnicity of mother and father.

(4) Residence address of mother.

(5) A blank space for entry of census tract for mother’s address.

(6) Month prenatal care began and number of prenatal visits.

(7) Date of last normal menses.

(8) Description of complications of pregnancy and concurrent illnesses, congenital malformation, and any complication of labor and delivery, including surgery; provided that this information is essential medical information and appears in total on the face of the certificate.

(9) Mother’s and father’s occupations and kind of business or industry.

(10) Education level of mother and father.

(11) Principal source of pay for prenatal care, which shall include all of the following: Medi-Cal, health maintenance organization or prepaid health plan, private insurance companies, medically indigent, self-pay, other sources which shall include, Medicare, workers’ compensation, Title V, other government or nongovernment programs, no charge, and other categories as determined by the State Department of Health Services.

This paragraph shall become inoperative on January 1, 1999, or on the implementation date of the decennial birth certificate revision due to occur on or about January 1, 1999, whichever occurs first.

(12) Expected principal source of pay for delivery, which shall include all of the following: Medi-Cal, health maintenance organization or prepaid health plan, private insurance companies, medically indigent, self-pay, other sources which shall include, Medicare, workers' compensation, Title V, other government or nongovernment programs, no charge, and other categories as determined by the State Department of Health Services.

This paragraph shall become inoperative on January 1, 1999, or on the implementation date of the decennial birth certificate revision due to occur on or about January 1, 1999, whichever occurs first.

(13) An indication of whether or not the child's parent desires the automatic issuance of a Social Security number to the child.

(14) On and after January 1, 1995, the social security numbers of the mother and father, unless subdivision (b) of Section 102150 applies.

(c) Item 8, specified in subdivision (b), shall be completed by the attending physician and surgeon or the attending physician's and surgeon's designated representative. The names and addresses of children born with congenital malformations, who require followup treatment, as determined by the child's physician and surgeon, shall be furnished by the physician and surgeon to the local health officer, if permission is granted by either parent of the child.

(d) The parent shall only be asked to sign the form after both the public portion and the confidential medical and social information items have been entered upon the certificate of live birth.

(e) The State Registrar shall instruct all local registrars to collect the information specified in this section with respect to certificates of live birth. The information shall be transcribed on the certificate of live birth in use at the time and shall be limited to the information specified in this section.

Information relating to concurrent illnesses, complications of pregnancy and delivery, and congenital malformations shall be completed by the physician and surgeon, or physician's and surgeon's designee, inserting in the space provided on the confidential portion of the certificate the appropriate number or numbers listed on the VS-10A supplemental worksheet. The VS-10A supplemental form shall be used as a worksheet only and shall not in any manner be linked with the identity of the child or the mother, nor submitted with the certificate to the State Registrar. All information transferred from the worksheet to the certificate shall be fully explained to the parent or other informant prior to the signing of the certificate. No questions relating to drug or alcohol abuse may be asked.

(f) If the implementation date of the decennial birth certificate revision occurs prior to January 1, 1999, within 30 days of this

implementation date the State Department of Health Services shall file a letter with the Secretary of the Senate and with the Chief Clerk of the Assembly, so certifying.

102430. (a) The second section of the certificate of live birth as specified in subdivision (b) of Section 102425 shall be confidential. Access to that portion of any certificate of live birth shall be limited to the following:

(1) Department staff.

(2) Local registrar's staff and local health department staff when approved by the local registrar or local health officer, respectively.

(3) Persons with a valid scientific interest as determined by the State Registrar, who are engaged in demographic, epidemiological or other similar studies related to health, and who agree to maintain confidentiality as prescribed by this part and by regulation of the State Registrar.

(4) The parent who signed the certificate or, if no parent signed the certificate, the mother.

(5) The person named on the certificate.

(6) Any person who has petitioned to adopt the person named on the certificate, subject to Section 102705 of the Health and Safety Code and Sections 9200 and 9203 of the Family Code.

(b) The department shall maintain an accurate record of all persons who are given access to the confidential portion of the certificate. The record shall include: the name of the person authorizing access; name, title, and organizational affiliation of persons given access; dates of access; and specific purpose for which information is to be used. The record of access shall be open to public inspection during normal operating hours of the department.

(c) All research proposed to be conducted using the confidential medical and social information on the birth certificate shall first be reviewed by the appropriate committee constituted for the protection of human subjects that is approved by the federal Department of Health and Human Services and has a general assurance pursuant to Part 46 of Title 45 of the Code of Federal Regulations. No information shall be released until the request for information has been reviewed by the Vital Statistics Advisory Committee and the committee has recommended to the State Registrar that the information shall be released.

102440. Notwithstanding Sections 102425 and 102430, the department may transmit to the Social Security Administration the information necessary to issue a Social Security number to a child in a case where the child's parent has requested the issuance pursuant to paragraph (13) of subdivision (b) of Section 102425.

102445. After public hearing and consultation with the Vital Statistics Advisory Committee, the State Registrar shall adopt regulations specifying the contents of a medical and health report and shall supply the necessary forms to hospitals and local registrars.

The contents of the report shall be limited to the medical, health, or social data necessary to evaluate or improve maternal and child health, as determined by the State Registrar.

The State Registrar shall make a finding that the specific items of information included in the report are not available from other sources at a comparable cost and that sufficient resources and a research design are available to analyze the data collected.

102447. Notwithstanding Section 102430, a parent's social security number contained in the confidential medical and social information portion of the child's certificate of live birth shall be accessible to the State Department of Social Services and district attorneys for the purposes of operating the Child Support Enforcement Program, as specified in Title IV-D of the federal Social Security Act.

102450. (a) For each registration of live birth submitted to the local registrar pursuant to Section 102400, the hospital administrator, or the person's representative, shall submit a completed medical and health report that meets the requirements of Section 102445. For live births that occur outside of a hospital, the medical and health report shall be completed and submitted by the local registrar when the local registrar receives the certificate of live birth for registration from the person designated in Section 102415.

(b) The medical and health report shall be submitted to the State Registrar by the local registrar for filing. Such report shall not be kept on file in the offices of the local registrars.

102455. (a) The medical and health report required pursuant to Section 102445 shall be clearly labeled ''Confidential Information for Public Health Use Only.'' The parent or informant shall be informed of the purposes for collecting the information, its confidential nature, and that completing the specific items is voluntary.

(b) When objection is made by either parent to the furnishing of information requested in a specific item or items in the medical and health report that information shall not be entered.

(c) The mother, father or child shall not be identified by name or any other means in the medical and health report.

102460. With the exception of statistical tabulation purposes, the medical and health report shall be kept confidential and access to the report shall be limited to the following persons:

(a) State and local registrar's staff.

(b) State and local health department staff.

(c) Persons with a valid educational or scientific interest, as determined by the State Registrar, who are engaged in demographic and epidemiological studies for health purposes.

The department shall maintain an accurate record of all persons who are given access to the report. The record shall include: the name of the persons authorizing access; name, title, and organizational affiliation of persons given access; dates of access; and specific purpose for which information is to be used. The record of

access shall be open to public inspection during normal operating hours of the department.

102465. (a) The State Registrar shall appoint a Vital Statistics Advisory Committee that shall have the following duties:

(1) Review and make recommendations to the State Registrar as to the adequacy of procedures to assure accuracy and confidentiality of personal health and medical information.

(2) Review the findings of the committee for the protection of human subjects pursuant to subdivision (c) of Section 102430 and make recommendations to the State Registrar regarding all requests for studies that propose to use confidential information with respect to whether a legitimate scientific interest is presented and whether the significance of the project justifies use of the confidential information.

(3) Assure that all research conducted using the data from birth certificates is consistent with guidelines provided by an appropriately constituted committee for the protection of human subjects of the department, as specified in subdivision (c) of Section 102430.

(4) Review and make recommendations to the State Registrar as to proposals for addition or deletion of items on the certificate of live birth and advise the State Registrar on the content and format of the certificate.

(5) Take testimony and make recommendations to the State Registrar regarding changes in the birth registration system.

(b) The Vital Statistics Advisory Committee shall include representatives from the users, providers, and informant groups who are involved in the process of the provision and collection of information for and the use of the certificate of live birth, and shall include the chairpersons of the Assembly Health Committee and the Senate Health and Welfare Committee or their designated representative, and shall have a majority of lay persons in its composition. The State Registrar shall make every effort to ensure that committee membership is representative of the community at large. Consideration shall be given to providing access to relevant classes of persons including, but not limited to, women, men, racial and ethnic minorities, in proportion to their representation in the affected population.

Membership on the committee shall be for a term of three years, appointments to be made on a staggered basis to allow for one-third membership to change annually.

102470. The State Registrar shall publish within 30 days of receipt of recommendations by the Vital Statistics Advisory Committee, made pursuant to Section 102465, (1) a list of the recommendations adopted, and (2) a list of the recommendations not adopted, with reasons for the action.

102475. (a) Any person who releases a copy of the confidential portion of the certificate of live birth, except as specifically provided by this part, shall be guilty of a misdemeanor, punishable by a fine of five hundred dollars ($500) or six months in jail. The criminal penalty shall not preclude suit for civil or punitive damages by any individuals harmed by the unauthorized release.

(b) Any person who is the subject of, or the source of information for, a birth certificate, who has reason to believe there has been linkage of confidential information with his or her identity and disclosure of the confidential information to a person not specified in subdivision (a) of Section 102430, shall have a civil right of action against the person releasing the information and may seek punitive damages.

Article 3. Foundling Registration

102500. A certificate of finding of an unidentified live child of less than one year of age shall be registered with the local registrar of births and deaths by the person or institution with whom the child is placed, within four days following the finding.

102505. The certificate shall include the name, sex, color or race, the date and place of finding, and the name of the person or institution with whom the child is placed.

102510. The person or institution with whom the child is placed shall give the child a name; the place in which the child is found shall be known as the legal place of birth; and the date of birth shall be determined as closely as possible and shall be known as the legal date of birth.

102515. The certificate of finding shall be handled in the same manner and shall serve all the purposes of a certificate of live birth.

102520. If the child is later identified and a certificate of birth found or obtained, the fact shall be reported to the State Registrar and he or she shall enter this upon the certificate of finding, with citation to the certificate of birth.

CHAPTER 4. DELAYED REGISTRATION OF BIRTH

Article 1. General Provisions

102525. This chapter is not exclusive of Chapters 3 (commencing with Section 102400) and 12 (commencing with Section 103450), but offer an alternative method of establishing a record of birth.

102530. Delayed certificates of birth issued pursuant to this chapter shall not be considered as evidence in any action or proceeding involving estates of decedents or in any proceeding to establish heirship unless the affidavit of at least one person who knew the facts was filed at the time of obtaining the certificate.

102535. An application may be filed with the State Registrar for the delayed registration of birth of any person born in this state whose birth is not registered. The application may be made only by the person whose birth is being registered if he or she is 18 years of age or over at the time of filing the application. If the person whose birth is being registered is under 18 years of age at the time of filing the application, the application may be made only by his or her mother, father, legal guardian, or the attending physician or principal attendant at birth.

Article 2. Application

102550. The application shall be made on the forms prescribed and furnished by the State Registrar and shall contain information and shall be accompanied by affidavits and documentary evidence as required to enable the State Registrar to determine whether the birth did in fact occur at the place and date alleged.

Article 3. Evidence

102575. ''Affidavit,'' as used in this chapter, is defined as a written statement executed under oath by a person who at the time of birth was at least 5 years old and had knowledge of the facts of birth and shall include the full name of the person whose birth is being registered, the names of his or her parents, the date and place of his or her birth and the basis of the affiant's knowledge of these facts.

102580. ''Documentary evidence,'' as used in this chapter, is defined as original or certified copies of a record that was executed at least five years prior to the date of application, and that substantiates the date and place of birth of the person whose birth is being registered; except that if the person whose birth is being registered is under 12 years of age the record shall have been executed only at least two years before the date of application. Examples of documentary evidence that shall generally be considered acceptable are hospital records of birth, baptismal certificates or other church records, school records, census records, social security records, military service records, voting registration records, birth certificate of child of person whose birth is being registered, certificates of registry of marriage, and newspaper notices of birth.

102585. For births that are being registered under this chapter there shall be required documentary evidence and affidavits as follows:

(a) Two pieces of documentary evidence, at least one of which shall support the parentage.

(b) One piece of documentary evidence and one affidavit executed by the physician or other principal attendant.

(c) One piece of documentary evidence and two affidavits executed by either the mother, father, or other persons having knowledge of the facts of birth.

Article 4. Registration

102600. Upon receipt by the State Registrar of an application for delayed registration of birth and payment of the required fee, he or she shall review the application together with the affidavits and documentary evidence accompanying it and shall accept the application if the application and evidence submitted comply with this chapter. After acceptance by the State Registrar the application shall constitute a delayed certificate of birth, and the State Registrar shall permanently preserve the certificates in a systematic manner and shall prepare and maintain a comprehensive and continuous index of all the certificates.

102605. The State Registrar shall send a certified copy of the delayed certificate of birth to the applicant without additional cost.

102610. The State Registrar shall send certified copies of the delayed certificate of birth to the local registrar and the county recorder within which area the birth occurred and in whose offices copies of records of the year of occurrence of the event are on file.

CHAPTER 5. CERTIFICATES OF BIRTH FOLLOWING ADOPTION, LEGITIMATION, COURT DETERMINATION OF PATERNITY, AND ACKNOWLEDGMENT

Article 1. Adoption

102625. The clerk of the court shall complete a report upon a form provided for that purpose and forward the report to the State Registrar within five days after a decree of adoption has been entered declaring a child legally adopted by any court in the state. The report shall be forwarded within five days after an interlocutory decree of adoption becomes a final decree of adoption, and not earlier.

102630. The court reports of adoption that are received by the State Registrar for births that occurred in another state, the District of Columbia, in any territory of the United States, or Canada shall be transmitted to the registration authority of the place of birth.

102635. A new birth certificate shall be established by the State Registrar upon receipt of a report of adoption from any court of record that has jurisdiction of the child of this state, another state, the District of Columbia, in any territory of the United States, or in any foreign country, for any child born in California and whose certificate of birth is on file in the office of the State Registrar.

102640. When requested by the adopting parent or parents, a new certificate shall not be established by the State Registrar.

102645. The new birth certificate shall bear the name of the child as shown in the report of adoption, the names and ages of his or her adopting parents, the date and place of birth, and no reference shall be made in the new birth certificate to the adoption of the child. The new certificate shall be identical with a birth certificate registered for the birth of a child of natural parents, except, when requested by the adopting parents, the new birth certificate shall not include the specific name and address of the hospital or other facility where the birth occurred, the color and race of the parents, or both.

102650. Notwithstanding other provisions in this article, when a child is adopted by an unmarried man or woman, the new certificate shall, if the adopting parent so requests, reflect the fact that it is a single-parent adoption.

102660. If both adopting parents were in the home at the time of the initial placement of the child for adoption the newly amended birth record may include the names of both adopting parents despite the death of one of the adopting parents, upon receipt of an order from the court granting the adoption that directs under the authority of Section 8615 of the Family Code that the names of both adopting parents shall be included on the newly amended birth record.

102670. Notwithstanding any other provision of law, an adopting parent who has adopted a child for whom an amended record has already been prepared under authority of this article may have another amended record prepared for the child, upon application, furnishing a copy of the court order made in an action brought pursuant to Section 8615 of the Family Code, and payment of the required fee.

102675. At any time after the issuance of a new birth certificate another amended certificate may be issued, at the request of the adopting parents, that omits any or all of the following:

(a) The specific name and address of the hospital or other facility where the birth occurred.

(b) The city and county of birth.

(c) The color and race of the parents.

102680. The new birth certificate shall supplant any birth certificate previously registered for the child and shall be the only birth certificate open to public inspection.

102685. When a new birth certificate is established under this article, the State Registrar shall inform the local registrar and the county recorder whose records contain copies of the original certificate, who shall forward the copies to the State Registrar for filing with the original certificate, if it is practical for him or her to do so. If it is impractical for him or her to forward the copy to the State Registrar, he or she shall effectually seal a cover over the copy in a manner as not to deface or destroy the copy and forward a verified statement of his or her action to the State Registrar. Thereafter the

information contained in the record shall be available only as provided in this article.

102690. For court reports of adoptions received from any court of record of this State, another state, the District of Columbia, or in any territory of the United States, that has jurisdiction of a child born in this State and for whom no original record of birth is on file in the Office of the State Registrar the court report of adoption shall constitute a court order delayed birth registration; provided, the court report contains a statement of the date and place of birth.

102695. A court report of adoption received from any court of record in this State, wherein the birth occurred outside the United States, the Territories of the United States, or Canada shall constitute a court order delayed registration of birth; provided, the court report contains a statement of the date and place of birth.

102700. The court report of adoption shall be filed with the original record of birth, that shall remain as a part of the records of the State Registrar.

102705. All records and information specified in this article, other than the newly issued birth certificate, shall be available only upon the order of the superior court of the county of residence of the adopted child or the superior court of the county granting the order of adoption.

No such order shall be granted by the superior court unless a verified petition setting forth facts showing the necessity of the order has been presented to the court and good and compelling cause is shown for the granting of the order. The clerk of the superior court shall send a copy of the petition to the State Department of Social Services and the department shall send a copy of all records and information it has concerning the adopted person with the name and address of the natural parents removed to the court. The court must review these records before making an order and the order should so state. If the petition is by or on behalf of an adopted child who has attained majority, these facts shall be given great weight, but the granting of any petition is solely within the sound discretion of the court.

The name and address of the natural parents shall be given to the petitioner only if he or she can demonstrate that the name and address, or either of them, are necessary to assist him or her in establishing a legal right.

102710. The State Registrar shall furnish a certified copy of the newly amended record of birth prepared under authority of this article to the registrant without additional cost.

Article 2. Adjudication of Facts of Parentage

102725. Whenever the existence or nonexistence of the parent and child relationship has been determined by a court of this state or

a court of another state, and upon receipt of a certified copy of the court order, application, and payment of the required fee, the State Registrar shall establish a new birth certificate for the child in the manner prescribed in Article 1 (commencing with Section 102625), if the original record of birth is on file in the office of the State Registrar.

102730. All records and information specified in this article, other than the newly issued birth certificate, shall be available only upon order of a court of record.

102735. The State Registrar shall furnish a certified copy of the newly amended record of birth prepared under authority of this article to the registrant without additional cost.

Article 3. Acknowledgement of Paternity

102750. Whenever the mother and father acknowledge paternity of a child by affidavit, and in the absence of conflicting information on the originally registered certificate of live birth, an application including the affidavits may be filed with the office of the State Registrar upon a form provided for that purpose.

102755. Upon receipt of the application and payment of the required fee, and in the absence of conflicting information on the originally registered certificate of live birth, the State Registrar shall review the application for acceptance for filing, and if accepted shall establish a new birth certificate for the child in the manner prescribed in Article 1 (commencing with Section 102625), if the original record of birth is on file in the office of the State Registrar.

102760. All records and information specified in this article, other than the newly issued birth certificate, shall be available only upon order of a court of record.

102765. The State Registrar shall furnish a certified copy of the new record of birth prepared under authority of this article to the registrant with additional cost.

CHAPTER 6. DEATH REGISTRATION

Article 1. Duty of Registering Death

102775. Each death shall be registered with the local registrar of births and deaths in the district in which the death was officially pronounced or the body was found, within eight calendar days after death and prior to any disposition of the human remains.

102780. A funeral director, or person acting in lieu thereof, shall prepare the certificate and register it with the local registrar.

102785. The State Registrar, at his or her discretion, may incorporate computer or telephone facsimile technology, or both, in the statewide program of death and fetal death registration,

including, but not limited to, the issuing of permits for disposition of human remains.

Nothing in this section shall limit the ability of local districts to file certificates of death and fetal death manually within the local registration districts.

102790. The funeral director shall obtain the required information other than medical and health section data from the person or source best qualified to supply this information.

102795. The medical and health section data and the time of death shall be completed and attested to by the physician and surgeon last in attendance, or in the case of a patient in a skilled nursing or intermediate care facility at the time of death, by the physician and surgeon last in attendance or by a licensed physician assistant under the supervision of the physician and surgeon last in attendance if the physician and surgeon or licensed physician assistant is legally authorized to certify and attest to these facts, and if the physician assistant has visited the patient within 72 hours of the patient's death. In the event the licensed physician assistant certifies the medical and health section data and the time of death, then the physician assistant shall also provide on the document the name of the last attending physician and surgeon and provide the coroner with a copy of the certificate of death. However, the medical health section data and the time of death shall be completed and attested to by the coroner in those cases in which he or she is required to complete the medical and health section data and certify and attest to these facts.

102800. The medical and health section data and the physician's or coroner's certification shall be completed by the attending physician within 15 hours after the death, or by the coroner within three days after examination of the body.

The physician shall within 15 hours after the death deposit the certificate at the place of death, or deliver it to the attending funeral director at his or her place of business or at the office of the physician.

102805. An embalmer may authorize his or her signature to be affixed to the certificate after he or she has embalmed a body, as required by this chapter, by a written special power of attorney that shall be retained for a period of one year.

Article 2. Responsibility of Attending Physician

102825. The physician and surgeon last in attendance, or in the case of a patient in a skilled nursing or intermediate care facility at the time of death, the physician and surgeon last in attendance or a licensed physician assistant under the supervision of the physician and surgeon last in attendance, on a deceased person shall state on the certificate of death the disease or condition directly leading to death, antecedent causes, other significant conditions contributing to death and any other medical and health section data as may be

required on the certificate; he or she shall also specify the time in attendance, the time he or she last saw the deceased person alive, and the hour and day on which death occurred, except in deaths required to be investigated by the coroner. The physician and surgeon or physician assistant shall specifically indicate the existence of any cancer as defined in subdivision (e) of Section 103885, of which the physician and surgeon or physician assistant has actual knowledge.

A physician and surgeon may designate, one or more other physicians and surgeons who have access to the physician and surgeon's records, to act as agent for the physician and surgeon for purposes of the performance of his or her duties under this section, provided that any person so designated acts in consultation with the physician and surgeon.

Article 3. Responsibility of Coroner

102850. A physician and surgeon, physician assistant, funeral director, or other person shall immediately notify the coroner when he or she has knowledge of a death that occurred or has charge of a body in which death occurred under any of the following circumstances:

(a) Without medical attendance.

(b) During the continued absence of the attending physician and surgeon.

(c) Where the attending physician and surgeon or the physician assistant is unable to state the cause of death.

(d) Where suicide is suspected.

(e) Following an injury or an accident.

(f) Under circumstances as to afford a reasonable ground to suspect that the death was caused by the criminal act of another.

Any person who does not notify the coroner as required by this section is guilty of a misdemeanor.

102855. The coroner whose duty it is to investigate such deaths shall ascertain as many as possible of the facts required by this chapter.

102860. The coroner shall state on the certificate of death the disease or condition directly leading to death, antecedent causes, other significant conditions contributing to death and other medical and health section data as may be required on the certificate, and the hour and day on which death occurred. The coroner shall specifically indicate the existence of any cancer, as defined in subdivision (e) of Section 103885, of which he or she has actual knowledge.

The coroner shall within three days after examining the body deliver the death certificate to the attending funeral director.

102865. In any case involving an infant under the age of one year where the gross autopsy results in a presumed diagnosis of sudden

infant death syndrome, the coroner shall, within 24 hours of the gross autopsy, notify the local health officer, as defined in Section 123740.

102870. In deaths investigated by the coroner or medical examiner where he or she is unable to establish the identity of the body or human remains by visual means, fingerprints, or other identifying data, the coroner or medical examiner may have a qualified dentist, as determined by the coroner or medical examiner, carry out a dental examination of the body or human remains. If the coroner or medical examiner with the aid of the dental examination and other identifying findings is still unable to establish the identity of the body or human remains, he or she shall prepare and forward the dental examination records to the Department of Justice on forms supplied by the Department of Justice for that purpose.

The Department of Justice shall act as a repository or computer center, or both, with respect to those dental examination records. The Department of Justice shall compare the dental examination records with dental records filed with it pursuant to Section 11114 of the Penal Code, shall determine which scoring probabilities are the highest for purposes of identification, and shall submit the information to the coroner or medical examiner who prepared and forwarded the dental examination records.

Not later than three years following implementation of the dental identification program required by this section and Section 11114 of the Penal Code, the Department of Justice shall submit a report on the program to the Legislature.

Article 4. Content of Certificate of Death

102875. The certificate of death shall be divided into two sections. The first section shall contain those items necessary to establish the fact of the death, including all of the following and those other items as the State Registrar may designate:

(a) Personal data concerning decedent including full name, sex, color or race, marital status, name of spouse, date of birth and age at death, birthplace, usual residence, and occupation and industry or business.

(b) Date of death, including month, day, and year.

(c) Place of death.

(d) Full name of father and birthplace of father, and full maiden name of mother and birthplace of mother.

(e) Informant.

(f) Disposition of body information including signature and license number of embalmer if body embalmed or name of embalmer if affixed by attorney-in-fact; name of funeral director, or person acting as such; and date and place of interment or removal.

(g) Certification and signature of attending physician or certification and signature of coroner when required to act by law.

(h) Date accepted for registration and signature of local registrar.

The second section shall contain those items relating to medical and health data, including all of the following and other items as the State Registrar may designate:

(a) Disease or conditions leading directly to death and antecedent causes.

(b) Operations and major findings thereof.

(c) Accident and injury information.

102880. (a) A certificate of death shall include information as to whether the decedent has performed military service and, if so, the period of military service.

(b) The sum of twenty-two thousand five hundred dollars ($22,500) is hereby appropriated from the General Fund to the Vital Statistics Branch of the department to revise the certificate of death in accordance with this section.

(c) This section shall remain in effect only until January 1, 1995, and as of that date is repealed, unless a later enacted statute, that is chaptered before January 1, 1995, deletes or extends that date.

Article 5. American Indians

102900. The Legislature finds and declares all of the following:

(a) Birth and death certificate-linking studies done by the department in 1974 and repeated in 1984, show unacceptably high rates of error in the completion of death certificate information recording ethnicity for American Indian infants.

(b) Official vital data on deaths for American Indians in the State of California indicate an implausible death rate equal to one-half of the United States rate for all races and one-quarter of the rate for American Indians in all states.

(c) Good demographic data on the American Indian people within the state does not exist and the data that does exist is fragmented and difficult to access and compile.

(d) The lack of accurate vital data on American Indians in California results in a significant loss of federal funds for the provision of health care and promotion services to American Indian people residing in 37 rural counties within the state.

102905. (a) The Rural Health Division of the department shall cause to be undertaken a three-year study for the purpose of establishing more valid statistics regarding American Indian death rates, including rates for the 10 leading causes of death for American Indians within the 37 designated rural Indian counties as follows: Humboldt, Shasta, Siskiyou, Modoc, Del Norte, Mendocino, Lake, Sonoma, Glenn, Butte, Colusa, Plumas, Yuba, Yolo, Tehama, Sutter, El Dorado, Nevada, Placer, Sierra, Tulare, Tuolumne, Amador, Mariposa, Calaveras, Fresno, Kings, Madera, Mono, Inyo, Riverside,

San Bernardino, Imperial, Lassen, Santa Barbara, Trinity, and San Diego.

(b) This study shall enlist the fullest possible participation of the Indian community and specifically the Indian clinics currently providing health care services to rural Indians of the state. This project shall be administered in a manner that allows for input from, and consultation with, concerned tribes and tribal organizations and American Indian-controlled health care corporations.

(c) This study shall identify methods to improve the quality of official state data on Indian mortality and carry out activities to achieve that goal, including the provision of training and the development of educational materials for morticians and coroners operating within the state.

102910. For the purpose of conducting the three-year study required pursuant to Section 102905, the department is hereby encouraged to contract with a federally recognized tribe or tribal organization or an American Indian-controlled health care corporation or research institution having a record of good standing with the Commissioner of Corporations and the Indian Health program within the department, and established competence in the area of records management.

102915. The study shall be conducted in three phases, as follows:

(a) Phase one of the study shall include research design and data acquisition, including funds for the purchase of data from tribal, federal, state, and county sources and the encoding of this data to a computer-readable form.

(b) Phase two of the study shall include a computerized matching of the American Indian-specific data with the officially known deaths within the state for a selected two-year period, and all necessary statistical analysis and validation of any findings.

(c) Phase three shall include the dissemination of the findings from the study, including efforts to improve the collection of vital event data on the American Indian population within the state.

102920. The department shall report to the Legislature on or before January 1, 1994, on the implementation of this article. The department also shall report to the Legislature, on or before four years after the date that the initial funding is received to implement this article, on the results of the study required by this article.

102925. The state department shall begin to implement the activities referred to in Sections 102905, 102910, 102915, and 102920 only upon an appropriation for the specific purpose of funding the activities.

CHAPTER 7. FETAL DEATH REGISTRATION

Article 1. Duty of Registering Fetal Death

102950. Each fetal death in which the fetus has advanced to or beyond the twentieth week of uterogestation shall be registered with the local registrar of births and deaths of the district in which the fetal death was officially pronounced within eight calendar days following the event and prior to any disposition of the fetus.

102955. A funeral director, or if there is no funeral director, the person acting in lieu thereof, shall prepare the certificate and register it with the local registrar.

102960. A funeral director shall obtain the required information other than medical and health section data from the person or source best qualified to supply this information.

Article 2. Responsibility of Attending Physician

102975. The physician, if any, in attendance on the delivery of a fetus shall within 15 hours after the delivery state on the certificate of fetal death the time of fetal death or delivery, the direct causes of the fetal death, the conditions, if any, that gave rise to these causes, and other medical and health section data as may be required on the certificate, and shall sign the certificate in attest to these facts.

The physician shall within 15 hours after the death deposit the certificate at the place of death, or deliver it to the attending funeral director at his or her place of business or at the office of the physician.

Article 3. Responsibility of Coroner

103000. All other fetal deaths required to be registered under this chapter shall be handled as are deaths without medical attendance.

103005. The coroner shall within three days after examination of the fetus state on the certificate of fetal death the time of fetal death, the direct causes of the fetal death, the conditions, if any, that gave rise to these causes, and other medical and health section data as may be required on the certificate, and shall sign the certificate in attest to these facts. The coroner shall within three days after examining the body deliver the death certificate to the attending funeral director.

Article 4. Content of Certificate of Fetal Death

103025. The certificate of fetal death shall contain items as may be designated by the State Registrar and shall be divided into two sections; the first section shall contain those items necessary to establish the fact of the fetal death and the second section shall contain those items relating to medical and health data.

CHAPTER 8. PERMITS FOR DISPOSITION OF HUMAN REMAINS

103050. No person shall dispose of human remains unless (a) there has been obtained and filed with a local registrar a death certificate, as provided in Chapter 6 (commencing with Section 102775) of this part, and (b) there has been obtained from a local registrar a permit for disposition.

103055. (a) If the certificate of death is properly executed and complete, the local registrar of births and deaths shall issue a permit for disposition, that in all cases, shall specify any one of the following:

(1) The name of the cemetery where the remains shall be interred.

(2) Burial at sea as provided in Section 7117.

(3) The address of the location where the cremated remains will be kept, as provided in Section 7054.6, under the conditions the state registrar may approve, including, but not limited to, conditions in keeping with public sensibilities, applicable laws, and reasonable assurances that the disposition will be carried out in accordance with the prescribed conditions and will not constitute a private or public nuisance.

(b) Notwithstanding any other provisions of this part relative to issuance of a permit for disposition, whenever the death occurred from a disease declared by the state department to be infectious, contagious, or communicable and dangerous to the public health, no permit for the disposition of the body shall be issued by the local registrar, except under those conditions as may be prescribed by the state department and local health officers.

103060. A permit for disposition for the purpose of removing cremated remains from the place of cremation or interment shall include a description of the final place of disposition sufficient to identify the place and shall be issued by the local registrar to the person having the right to control the disposition of the remains under Section 7100 upon the application of that person.

A permit for disposition shall be issued under this section only upon the signed acknowledgement by the person making application that trespass and nuisance laws apply to the disposition and that the permit gives no right of unrestricted access to property not owned by the person for the purpose of disposing of the remains.

The person to whom the permit for disposition was issued shall sign the permit, endorse upon it the date of final disposition and, within 10 days, return the first copy of the permit so endorsed to the local registrar of the district in which the disposition took place. The third copy of the permit shall be returned to the office of issuance. After one year the local registrar may destroy any original or duplicate permit retained by him or her pursuant to this section.

103065. (a) Upon the presentation of a certificate of death properly executed and completed in accordance with the policies

and procedures of the county coroner in which the death occurred that are not in conflict with state law, the permit for disposition required by Sections 103050, 103055, and 103060 shall be issued by any local registrar pursuant to this section. The local registrar issuing the permit for disposition pursuant to this section shall promptly forward the death certificate and a duplicate of the permit for disposition to the local registrar of the district in which death occurred or the body was found.

(b) The applicant for a permit under this section shall pay a fee of six dollars ($6) to the issuing registrar. Thirty percent of the fee shall be transferred by the issuing registrar to the local registrar of the county where the death occurred and 40 percent shall be transferred to the State Registrar for the administration of this section.

(c) Applicants for a permit for disposition pursuant to this section shall not be subject to Section 103675.

103070. The body of any person whose death occurs in this state, or whose body is found in the state, or that is brought in from outside the state, shall not be temporarily held pending disposition more than eight calendar days after death, unless a permit for disposition is issued by the local registrar of the registration district in which the death occurred or the body was found.

103075. The permit shall accompany the body to its destination, where, if within this state, it shall be delivered to the person in charge of the place of interment.

103080. The person in charge of the place of interment, or the funeral director or person acting as funeral director if no person is in charge, shall sign the permit, endorse upon it the date of interment or cremation, and, within 10 days, return the first copy of the permit so endorsed to the local registrar of the district in which the interment took place. The third copy of the permit shall be returned to the office of issuance. After one year the local registrar may destroy any original or duplicate permit retained by the local registrar pursuant to this section.

103085. When human remains are transported from outside the state into a registration district in California for interment, the permit for disposition, issued in accordance with the law and health regulations of the place where the death occurred, shall be accepted by the local registrar of the district into which the human remains have been transported, as a basis upon which he or she shall issue a local permit, noting upon the face of the permit the fact that human remains were shipped in for interment and the place of death.

103090. This chapter does not prevent a funeral director from removing a body from the registration district where the death occurred or the body was found to another registration district in the same or another county in a funeral director’s conveyance for the purpose of preparing the body for interment or shipment.

103095. A permit issued in one county or city is valid and sufficient in any county it specifies as the place of interment.

103100. If any cemetery is located partly in one registration district and partly in another, only one permit shall be required for interment and a permit authorizing interment in the cemetery shall entitle interment to be made within or without the district to which the permit is directed. The permit shall be returned to the registration district in which the interment is made irrespective of the district to which it is directed. The local registrar of the district in which the interment is made shall forthwith file the permit on presentation without charge.

103105. Permits for the disinterment or removal of interred remains shall be required, as specified in Part 2 (commencing with Section 7500) of Division 7.

CHAPTER 9. MARRIAGE REGISTRATION

Article 1. General Provisions

103125. The forms for the application for license to marry, the certificate of registry of marriage including the license to marry, and the marriage certificate shall be prescribed by the State Registrar.

Article 2. Duty of Registering

103150. Each marriage that is performed shall be registered by the person performing the ceremony as provided by Chapter 2 (commencing with Section 420) of Part 3 of Division 3 of the Family Code.

Article 3. Content of Certificate of Registry of Marriage

103175. The certificate of registry of marriage shall contain as nearly as can be ascertained all of the following and other items as the State Registrar may designate: The first section shall include the personal data of parties married, including the date of birth, full name, birthplace, residence, names and birthplaces of the parents, maiden name of the mothers, the number of previous marriages, marital status, and the maiden name of the female if previously married; the second section shall include the signatures of parties married, license to marry, county and date of issue of license, and the marriage license number; and the third section shall include the certification of the person performing the ceremony, that shall show his or her official position including the denomination if he or she is a priest, minister or clergyman, and the signature and address of one or more witnesses to the marriage ceremony. The person performing the marriage ceremony shall also type or print his or her name and

address on the certificate. The certificate shall not contain any reference to the race or color of parties married.

103180. (a) Sections 103150 and 103175 do not apply to marriages entered into pursuant to Section 307 of the Family Code. Subdivisions (b) and (c) govern the registration and the content of the License and Certificate of Declaration of Marriage of those marriages.

(b) Each marriage entered into pursuant to Section 307 of the Family Code shall be registered by the parties entering into the marriage or by a witness who signed under paragraph (2) of subdivision (a) of Section 307 within four days after the ceremony with the local registrar of marriages for the county in which the License and Certificate of Declaration of Marriage was issued.

(c) The License and Certificate of Declaration of Marriage entered into pursuant to Section 307 of the Family Code shall contain as nearly as can be ascertained the following:

(1) The personal data of parties married, including the date of birth, full name, birthplace, residence, names and birthplaces of their parents, maiden name of their mothers, the number of previous marriages, marital status, and the maiden name of the female, if previously married and if her name has been changed.

(2) The license to marry.

(3) The county and date of issuance of the license.

(4) The marriage license number.

(5) The certification of the parties entering into the marriage, that shall show the following:

(A) The fact, time, and place of entering into the marriage.

(B) The signature and address of two witnesses to the marriage ceremony.

(C) The religious society or denomination of the parties married, and that the marriage was entered into in accordance with the rules and customs of that religious society or denomination.

(6) The signatures of the parties married.

(7) Any other items that the State Registrar shall designate.

The License and Certificate of Declaration of Marriage shall not contain any reference to the race or color of parties married or to a person performing or solemnizing the marriage.

CHAPTER 10. FINAL DECREES OF DISSOLUTION OF MARRIAGE, OR LEGAL SEPARATION

103200. The county clerk of each county shall send a copy of every judgment of dissolution of marriage, of legal separation, and of declaration of nullity to the State Registrar monthly. If a judgment of dissolution of marriage is vacated, the county clerk shall send a copy of the order or dismissal to the State Registrar.

103205. The State Registrar shall maintain a comprehensive and continuous index of all decrees received under Section 103200.

CHAPTER 11. AMENDMENT OF RECORDS

Article 1. Amendment of a Record of Birth, Death or Marriage

103225. Whenever the facts are not correctly stated in any certificate of birth, death, fetal death, or marriage already registered, the person asserting that the error exists may make an affidavit under oath stating the changes necessary to make the record correct, that shall be supported by the affidavit of one other credible person having knowledge of the facts, and file it with the state or local registrar.

103230. Section 103225 shall be applicable to certificates of birth only in the absence of conflicting information relative to parentage on the originally registered certificate of birth.

103235. If the amendment relates to a certificate that has not been transmitted to the State Registrar, the local registrar shall review the amendment for acceptance for filing, and if accepted shall file the amendment and shall note the fact of the amendment, with its date, on the otherwise unaltered original certificate.

103240. If the amendment relates to a certificate that has been transmitted to the State Registrar, the amendment shall be transmitted to the State Registrar who shall review it for acceptance for filing.

103245. If the amendment is accepted, the State Registrar shall transmit copies of the amendment to the local registrar and county recorder in whose offices copies of the original record and information are on file.

103250. The State Registrar shall send a certified copy of the newly amended record of birth, death or marriage to the applicant without additional charge, except for those amendments that are filed within one year of the date of occurrence of the event.

103255. The amendment shall be filed with and become a part of the record to which it pertains.

103260. (a) A person born in this state whose birth is registered in this state, or the person's conservator, or if a minor, the person's parent or guardian, may submit a written request to the state registrar for a new birth certificate on the ground that his or her existing birth certificate contains a derogatory, demeaning, or colloquial racial descriptor. For purposes of this section, a derogatory, demeaning, or colloquial racial descriptor means any term that the registrant determines is insulting to a racial group.

(b) The State Registrar shall review the request, and if the request identifies the term that the registrant has determined is a derogatory, demeaning, or colloquial racial descriptor, identifies the accurate racial descriptor, and is accompanied with the payment of the fee required by Section 103700, then the State Registrar shall issue a new birth certificate with the accurate racial descriptor identified in the

request and shall transmit copies of the new birth certificate to the following:

(1) The local registrar and county recorder in whose offices copies of the previously issued birth certificate are on file. Upon receipt of the new birth certificate, the local registrar and county recorder shall transmit any copies of the previously issued birth certificate to the State Registrar if it is practical for him or her to do so. If it is impractical for him or her to forward all the copies to the state registrar, he or she shall effectually seal a cover over the copy in a manner as not to deface or destroy the copy and forward a verified statement of his or her action to the state registrar.

(2) The registrant.

(c) The new birth certificate shall supplant any previously issued birth certificate registered for the registrant and shall be the only birth certificate of the registrant open to public inspection. The request and previously issued birth certificate shall remain as part of the records of the State Registrar. All records and information referred to in this section, other than the newly issued birth certificate, shall be available only upon the written request of the registrant or an order of a court of competent jurisdiction.

Article 2. Amendment of a Death Record of a Previously Unidentified Body

103275. The coroner having jurisdiction shall register with the local registrar of births and deaths a certificate of death giving the name of the person and all statistical particulars that have been discovered concerning him or her, in the case of the identification of a person previously unidentified at the time of the original registration of the death.

103280. This amendment to the record shall be handled in the manner prescribed in Article 1 (commencing with Section 103225).

Article 3. Amendment of Medical and Health Section Data on Death, Fetal Death, and Live Birth Records

103300. Notwithstanding other provisions in this part relative to amendment of records, whenever the information originally furnished in the medical and health data section of any record of death, fetal death or live birth is modified by supplemental information relative thereto, the certifying physician or coroner having knowledge of this information may make a declaration as provided in Section 2015.5 of the Code of Civil Procedure stating the changes necessary to make the information correct and file it with the state or local registrar.

103305. This amendment shall be handled in the manner prescribed in Article 1 (commencing with Section 103225).

Article 4. Supplemental Name Reports

103325. When any certificate of birth of a living child is registered without the name of the child being entered thereon, the local registrar shall make out and deliver to the parents of the child a special blank for a supplemental report of the name of the child.

103330. The parents shall complete the report and return it to the local registrar as soon as the child is named.

103335. The State Registrar shall send a certified copy of the newly amended record of birth to the applicant without additional cost, except for those amendments that are filed within one year of the date of occurrence of the event.

103340. This amendment to the record shall be handled in the manner prescribed in Article 1 (commencing with Section 103225).

Article 5. Amendment of Birth Certificate to Delete Racial Slurs

103350. The purpose of this article is to provide a remedy for correction of birth certificates that contain entries regarding race or color that, in the opinion of the registrant, constitute racial slurs or are otherwise offensive.

103355. Any person who was born in this state and whose birth is registered in this state may apply to the State Registrar for the establishment and issuance of a new birth certificate and the sealing of the original if the person certifies that the entry or entries in the original birth certificate regarding race or color contain a term or terms that in the opinion of the registrant, constitute racial slurs or are otherwise offensive. The application shall identify the offensive terms to be deleted and indicate the proper entries for race or color to be substituted. The determination as to whether the entries to be deleted are offensive shall be left to the judgment of the applicant and the State Registrar shall give deference to that determination.

103360. Upon receipt of the application and payment of the required fee, the State Registrar shall establish a new birth certificate for the person.

103365. The entry for race or color in the new certificate shall be as indicated in the application. No reference shall be made in the new birth certificate that it is not the original birth certificate of the registrant. The new birth certificate shall supplant any birth certificate previously registered for the registrant and shall be the only birth certificate open to public inspection.

103370. The State Registrar shall transmit a certified copy of a birth certificate newly established under this article to the registrant without additional charge.

103375. When a new birth certificate is established pursuant to this article, the State Registrar shall inform the local registrar and the county recorder whose records contain copies of the original

certificate, who shall forward the copies to the State Registrar for filing with the original certificate, if it is practical for him or her to do so. If it is impractical for him or her to forward the copy to the State Registrar, he or she shall effectually seal a cover over the copy in a manner as not to deface or destroy the copy and forward a verified statement of his or her action to the State Registrar.

Article 6. Amendment of Birth Record to Reflect Court Order Change of Name

103400. Whenever a person born in this state has his or her name changed by order of a court of this state, another state, the District of Columbia, or any territory of the United States, an application including an affidavit of this fact may be filed with the office of the State Registrar upon a form provided for that purpose.

103405. Upon receipt of the application, affidavit, certified copy of the court order and payment of the required fee, the State Registrar shall review the amendment for acceptance for filing, and if accepted, shall file the amendment and shall note the fact of the amendment on the otherwise unaltered original birth certificate. The amendment shall be filed with and become a part of the record to which it pertains, if the original record of birth is on file in the office of the State Registrar.

103410. The State Registrar shall furnish a certified copy of the newly amended record of birth prepared under authority of this article to the registrant without additional cost.

Article 7. Revision of Birth Records to Reflect Change of Sex

103425. Whenever a person born in this state has undergone surgical treatment for the purpose of altering his or her sexual characteristics to those of the opposite sex, a new birth certificate may be prepared for the person reflecting the change of gender and any change of name accomplished by an order of a court of this state, another state, the District of Columbia, or any territory of the United States. A petition for the issuance of a new birth certificate in those cases shall be filed with the superior court of the county where the petitioner resides.

103430. (a) The petition shall be accompanied by an affidavit of a physician documenting the sex change, and a certified copy of the court order changing the applicant’s name (if applicable).

(b) The petition shall be heard at the time appointed by the court and objections may be filed by any person who can, in those objections, show to the court good reason against the change of birth certificate. At the hearing, the court may examine on oath the petitioner, and any other person having knowledge of facts relevant to the application. At the conclusion of the hearing the court shall

make an order to issue a new certificate, or dismissing the petition, as to the court may seem right and proper.

(c) A certified copy of the decree of the court ordering the new birth certificate, shall within 30 days from the date of the decree, be filed with the State Registrar. Upon receipt thereof together with the fee prescribed by Section 103725, the State Registrar shall establish a new birth certificate for the applicant.

(d) The new birth certificate shall indicate the sex of the registrant as it has been surgically altered and shall reflect any change of name specified in the application if accompanied by a court order, as prescribed by Section 103425. No reference shall be made in the new birth certificate, nor shall its form in any way indicate, that it is not the original birth certificate of the registrant.

103435. In lieu of separate proceedings, a single petition for a change of name and issuance of a new birth certificate reflecting a change of gender may be filed with the superior court. With respect to such a petition, the court shall follow the procedure set forth in Title 8 (commencing with Section 1275) of Part III of the Code of Civil Procedure. A certified copy of the decree of the court issued pursuant to this section shall within 30 days be filed with both the Secretary of State and the State Registrar. Upon its receipt, the State Registrar shall establish a new birth certificate as provided in this article.

103440. The new birth certificate shall supplant any birth certificate previously registered for the applicant and shall be the only birth certificate open to public inspection. The application and supporting affidavit shall be filed with the original record of birth, that shall remain as a part of the records of the State Registrar. All records and information specified in this article, other than the newly issued birth certificate, shall be available only upon written request of the registrant or an order of a court of record.

When a new birth certificate is established under this article, the State Registrar shall transmit copies of the newly established birth certificate for filing to the local registrar and the county recorder whose records contain copies of the original certificate, who shall forward the copies of the original certificate to the State Registrar for filing with the original certificate, if it is practical for him or her to do so. If it is impractical for him or her to forward the copy to the State Registrar, he or she shall effectually seal a cover over the copy of the original certificate in a manner as not to deface or destroy the copy and forward a verified statement of his or her action to the State Registrar. Thereafter the information contained in the record shall be available only upon written request of the registrant or on order of a court of record.

103445. The State Registrar shall transmit a certified copy of a birth certificate newly established under this article to the registrant without additional charge.

CHAPTER 12. COURT PROCEEDINGS TO ESTABLISH RECORD OF BIRTH, DEATH OR MARRIAGE

103450. A verified petition may be filed by any beneficially interested person with the county clerk of the superior court in and for (a) the county in which the birth, death or marriage is alleged to have occurred, or (b) the county of residence of the person whose birth or marriage it is sought to establish, or (c) the county in which the person was domiciled at the date of death, if the person has died, for an order to judicially establish the fact of, and the time and place of a birth, death or marriage that is not registered or for which a certified copy is not obtainable.

103455. The petition shall be verified and shall contain all the facts necessary to enable the court to determine the fact of and the time and place of the birth, death, or marriage upon the proofs adduced in behalf of the petitioner at the hearing.

103460. If the time and place of birth are not known, the petition shall contain all of the facts known to the petitioner or otherwise available and a statement of the probable time and place of birth as accurately as the circumstances permit. The petition shall be verified as to the known facts only.

103465. Upon the filing of the petition a hearing shall be fixed by the clerk and at the convenience of the court set at a time not less than five nor more than 10 days after the filing of the petition. The hearing may be held in chambers. The court, for good cause, may continue the hearing beyond the 10-day period.

103470. The fee for filing the petition shall be six dollars ($6), plus the law library fee of the county. In counties having more than one superior court judge, the petition may be heard by any judge thereof hearing probate matters, or if a probate department has been designated for hearing probate matters, the clerk shall assign the matter to the probate department for hearing.

103475. If, upon the hearing, the allegations of the petition are established to the satisfaction of the court, the court may make an order determining that the birth, death, or marriage did in fact occur at the time and place shown by the proofs adduced at the hearing.

103480. If the time and place of birth are not known, the court shall receive and consider evidence and testimony as may be available and from the facts adduced may, by order, fix the time and place that the court finds to be a probable time and place of birth of the person in relation to whom the petition has been filed, as the time and place of birth. The time and place so fixed shall thereafter for all purposes be the time and place of birth of the person.

103485. The order shall be made in the form and upon the blank prescribed and furnished by the State Registrar and shall become effective upon a filing of a certified copy with the State Registrar.

Every order determining the date of birth made pursuant to this chapter shall establish a presumption that the matter contained therein is a true and accurate statement of the time of birth. The presumption established by this section is a presumption affecting the burden of proof.

103490. The State Registrar shall send certified copies of the court order delayed certificate to the local registrar and the county recorder within which area the event occurred and in whose offices copies of records of the year of occurrence of the event are on file, except that if the event occurred outside the State, a certified copy shall be sent only to the county recorder of the county in which the petitioner resides.

CHAPTER 13. RECORDING CERTIFICATION OF FOREIGN BIRTHS AND DEATHS

103500. A certification of birth or of birth data issued by an agency of the government of the United States to authenticate a birth of a child to a United States citizen outside of the United States may be recorded in the office of a county recorder in the last county of permanent residence of one or both parents of the child if the last permanent residence in the United States of one or both parents of the child was in California. A certification of death or death data issued by an agency of the government of the United States to authenticate the death of a United States citizen outside of the United States may be recorded in the office of the county recorder in the last county of permanent residence if the last permanent residence in the United States of the citizen was in California.

103505. A certification of birth outside of the United States, upon recordation by the county recorder, shall be indexed in the county recorder's birth index in the year of occurrence of the birth.

CHAPTER 14. CERTIFIED COPY AND VERIFICATION OF RECORDS

103525. The State Registrar, local registrar or county recorder shall, upon request and payment of the required fee, supply to any applicant a certified copy of the record of any birth, fetal death, death, marriage, or marriage dissolution registered with the official.

When the original forms of certificates of live birth furnished by the State Registrar contain a printed section at the bottom containing medical and social data or labeled ''Confidential Information for Public Health Use Only,'' that section shall not be reproduced in a certified copy of the record except as specifically authorized in Section 102430.

103530. Certified copies of certificates of births shall be issued only when the applicant for the certified copy is able to furnish

information, exclusive of file numbers, adequate for identification and location of the amended record.

103535. Upon application of a parent, the local registrar or county recorder shall request a copy of a new birth certificate amended under Article 1 (commencing with Section 102625) of this chapter and Article 2 (commencing with Section 102725) of Chapter 5, from the State Registrar. When such a request is received, the State Registrar shall send a copy of the new certificate to the local registrar or county recorder who shall then issue certified copies from the document. The copy of the new certificate returned to the local registrar or county recorder under this procedure shall be filed in the same manner as the copies of other certificates representing births that occurred during the same time period.

103540. Prior to issuing a certified copy of a birth record, the State Registrar, local registrar, or county recorder shall determine whether their respective birth records or index to the records have been revised pursuant to Section 102245 to indicate the death of the registrant whose birth record is requested. If the records or index have been so revised, the certified copy provided the applicant shall display the legend ''DECEASED,'' which shall be indelibly printed or stamped, in boldface style not less than one-half inch in height, within near proximity to the space reserved for the registrant's name. The State Registrar shall adopt regulations to implement this section.

103545. Certified copies of birth, fetal death, death, and marriage records may be made only by the State Registrar, by duly appointed and acting local registrars during their term of office, and by county recorders.

103550. Any birth, fetal death, death, or marriage record that was registered within a period of one year from the date of the event under the provisions of this part, or any copy of the record or part thereof, properly certified by the State Registrar, local registrar, or county recorder, is prima facie evidence in all courts and places of the facts stated therein.

103555. A short form of certification of birth registration that shall contain only identification information may be issued by the State Registrar, by the county recorder, or by any local registrar.

103560. A short form of certification of death registration, including only identification information and excluding the medical statement of the cause of death, may be issued by the State Registrar, county recorder, or any local registrar, upon forms prescribed and furnished by the State Registrar.

103565. The Office of the State Registrar, upon request, may furnish the United States Public Health Service with vital statistics relating to births, deaths, marriages, and marriage dissolutions for utilization in the national vital statistics program. Such vital statistics may be furnished on a contract reimbursement or other satisfactory basis that will insure that the reimbursement shall not be less than the

cost to the state nor exceed the federal government's fair share of the cost of the statewide vital statistics registration and reporting system.

103570. A certification limited to a statement as to the date of birth of any child needed for admission to school or for the purpose of securing employment shall be issued without fee by the local registrar or county recorder upon request of any parents or guardian.

103575. The state or local registrar or county recorder may, without fee verify a date and place of birth, when the applicant can present sufficient information to identify the birth record.

103580. The State Registrar, local registrar or county recorder may use a printed, stamped or photographically reproduced facsimile signature in certifying to a record in his or her office provided the certification has the seal of his or her office affixed thereto.

103585. Certified copies or certification of abstract information required to be filed under authority of Chapter 10 (commencing with Section 103200) in the offices of the State Registrar and county clerks shall not include information relative to occupation, highest school grade completed, color or race, religious denomination, previous marriages ended by death, divorce or annulment, or children.

103590. (a) The State Registrar shall, upon request and payment of a fee, as provided in subdivision (c), supply to any applicant a decorative heirloom certificate, as described in subdivision (b), of any birth registered with that official.

When the original form of the certificate of a live birth furnished by the State Registrar contains a printed section at the bottom containing medical and social data or labeled ''Confidential Information for Public Health Use Only,'' that section shall not be reproduced in the copy of the record. If the original form of the certificate of live birth has been sealed, the information on the sealed certificate shall not be included on the decorative heirloom certificate.

(b) The decorative heirloom certificate issued under subdivision (a) shall be of a distinctive design as determined by the department and shall include the seal of the State of California and a facsimile of the State Registrar's signature, but shall include no elected official's signature. The certificate shall only contain identification information, as determined by the State Registrar.

(c) The fee required for the decorative heirloom birth certificate issued pursuant to this section shall be thirty-two dollars ($32) until December 31, 1988, at which time the fee shall be reduced to thirty dollars ($30). Until December 31, 1988, not less than ten dollars ($10) of the fee shall be allocated to the State Children's Trust Fund established in Section 18969 of the Welfare and Institutions Code. After December 31, 1988, not less than fifteen dollars ($15) of the fee shall be allocated to the State Children's Trust Fund. The remainder

of the fee shall be utilized to reimburse the State Department of Health Services and the State Registrar, in part, for the administrative costs of developing, preparing, and providing the decorative heirloom certificate.

103595. (a) The State Registrar shall, upon request and payment of a fee, as provided in subdivision (c), supply to any applicant a decorative heirloom certificate, as described in subdivision (b), of any marriage registered with that official.

(b) The decorative heirloom certificate issued under subdivision (a) shall be of a distinctive design as determined by the state department and shall include the seal of the State of California and a facsimile of the State Registrar's signature, but shall include no elected official's signature. The certificate shall only contain identification information, as determined by the State Registrar.

(c) The fee required for the decorative heirloom certificate issued pursuant to this section shall be fifteen dollars ($15). The fee shall be utilized to reimburse the state department for the administrative costs of developing, preparing, and providing the decorative heirloom certificate and for a public awareness and advertising program to inform the public of the availability of the decorative heirloom certificate. The fee shall be deposited into the General Fund.

CHAPTER 15. FEES OF STATE AND LOCAL REGISTRARS

Article 1. General Provisions

103600. The State Registrar and local registrars shall keep a true and correct account of all fees received by them.

103605. The money collected by the State Registrar shall be deposited with the Treasurer for credit to the Health Statistics Special Fund, except for the Children's Trust Fund fees collected pursuant to Section 18966 of the Welfare and Institutions Code, the fees allocated to the Judicial Council pursuant to Section 1852 of the Family Code, and the fees collected pursuant to Section 103645, all of which shall be deposited in the General Fund.

This section shall become operative on July 1, 1995.

103610. The money collected by the local registrar shall be paid by him or her into the county or city treasury.

103615. Notwithstanding any other provision of law, no fees other than those provided for in this part shall be charged for the registration of births and deaths or for the issuance of any permits for disposition of human remains.

Article 2. Fee for Certified Copy or Search of Records

103625. (a) A fee of three dollars ($3) shall be paid by the applicant for a certified copy of a fetal death or death record.

(b) (1) A fee of three dollars ($3) shall be paid by a public agency or licensed private adoption agency applicant for a certified copy of a birth certificate that the agency is required to obtain in the ordinary course of business. A fee of seven dollars ($7) shall be paid by any other applicant for a certified copy of a birth certificate. Four dollars ($4) of any seven-dollar ($7) fee is exempt from subdivision (e) and shall be paid to either a county children's trust fund or to the State Children's Trust Fund, in conformity with Article 5 (commencing with Section 18965) of Chapter 11 of Part 6 of Division 9 of the Welfare and Institutions Code.

(2) (A) As a pilot project, Contra Costa, Los Angeles, Orange, Sacramento, San Diego, Santa Clara, and Tulare Counties may increase the fee for a certified copy of a birth certificate by up to three dollars ($3), through December 31, 1996, for the purpose of providing dependency mediation services in the juvenile court. Public agencies shall be exempt from paying this portion of the fee. However, if a county increases this fee, neither the revenue generated from the fee increase nor the increased expenditures made for these services shall be considered in determining the court's progress towards achieving its cost reduction goals pursuant to Section 68113 of the Government Code if the net effect of the revenue and expenditures is a cost increase. In each county participating in the pilot project up to 5 percent of the revenue generated from the fee increase may be apportioned to the county recorder for the additional accounting costs of the program.

(B) On or before December 31, 1995, each participating county shall submit an independent study of the project to the Legislature. The study shall consider the effectiveness of mediation, the cost-avoidance realized, what model of juvenile court mediation should be promoted statewide, and at what point mediation is most effective.

(C) The presiding judge of the superior court of each participating county shall designate a person who will facilitate access to case files and any other data necessary for the independent study.

(D) Variables to be evaluated and measured to indicate the success of the pilot projects shall include, but not be limited to:

(i) At least 75 percent of all participants should be satisfied or very satisfied with the dependency mediation process.

(ii) The range of creative solutions for resolution of the families' problems within the development of the court ordered plan shall increase by 10 percent.

(iii) At least 70 percent of matters coming before the court should be settled in less time using dependency mediation than if adjudicated.

(iv) Dependency mediation shall result in a 25 percent reduction in foster care placements.

(c) A fee of three dollars ($3) shall be paid by a public agency applicant for a certified copy of a marriage record, that has been filed with the county recorder or county clerk, that the agency is required to obtain in the ordinary course of business. A fee of six dollars ($6) shall be paid by any other applicant for a certified copy of a marriage record that has been filed with the county recorder or county clerk. Three dollars ($3) of any six-dollar ($6) fee is exempt from subdivision (e) and shall be transmitted monthly by each local registrar, county recorder, and county clerk to the state for deposit into the General Fund as provided by Section 1852 of the Family Code.

(d) A fee of three dollars ($3) shall be paid by a public agency applicant for a certified copy of a marriage dissolution record obtained from the State Registrar that the agency is required to obtain in the ordinary course of business. A fee of six dollars ($6) shall be paid by any other applicant for a certified copy of a marriage dissolution record obtained from the State Registrar.

(e) Each local registrar, county recorder, or county clerk collecting a fee pursuant to this section shall transmit 15 percent of the fee for each certified copy to the State Registrar by the 10th day of the month following the month in which the fee was received.

(f) The additional three dollars ($3) authorized to be charged to applicants other than public agency applicants for certified copies of marriage records by subdivision (c) may be increased pursuant to Section 100430.

103630. If the information supplied by the applicant is not sufficient to enable the State Registrar to supply the certified copy of any record for which application is made and the applicant, after written request by the State Registrar, does not furnish the necessary information within 30 days of the date of the request, the State Registrar shall retain the fee.

103635. Overpayment of the required fee received in the office of the State Registrar shall be retained, except any overpayment shall be refunded upon written request of the applicant within one year or when overpayment is in excess of two dollars ($2).

103640. (a) Commencing January 1, 1992, in addition to the fees prescribed by subdivisions (a) to (d), inclusive, of Section 103625, all applicants for certified copies of the records described in those subdivisions shall pay an additional fee of two dollars ($2), that shall be collected by the State Registrar, the local registrar, county recorder, or county clerk, as the case may be.

(b) Except as provided in paragraph (2), the local public official charged with the collection of the additional fee established pursuant to subdivision (a) may create a Vital and Health Statistics Trust Fund. The fees collected by local public officials pursuant to subdivision (a) shall be distributed as follows:

(1) Commencing January 1, 1992, and ending December 31, 1992, one dollar ($1) of each two dollars ($2) collected shall be deposited with the State Registrar in the State Vital Record Improvement Account established pursuant to Section 102250.

(2) Commencing January 1, 1993, ninety cents ($0.90) of each two dollars ($2) collected shall be deposited with the State Registrar in the State Vital Record Improvement Account established pursuant to Section 102250.

(3) The remainder of each two dollars ($2) collected shall be deposited into the collecting agency's Vital and Health Statistics Trust Fund.

(4) Any local public official that does not establish a local Vital and Health Statistics Trust Fund shall forward the entire two dollars ($2) fee to the State Registrar, who shall deposit the fees into the State Vital Record Improvement Account established pursuant to Section 102250.

(5) Fees collected by the State Registrar shall be deposited into the State Vital Record Improvement Account established pursuant to Section 102250.

(c) Moneys in each Vital and Health Statistics Trust Fund shall be available to the public official charged with the collection of fees pursuant to this section to defray the administrative costs of collecting and reporting with respect to those fees and for the other costs, as follows:

(1) Modernization of vital record operations, including improvement, automation, and technical support of vital record systems.

(2) Improvement in the collection and analysis of health-related birth and death certificate information, and other community health data collection and analysis, as appropriate.

(d) Funds collected pursuant to this section shall not be used to supplant existing funding that is necessary for the daily operation of vital record systems. It is the intent of the Legislature that funds collected pursuant to this section be used to enhance service to the public, to improve analytical capabilities of state and local health authorities in addressing the health needs of newborn children, maternal health problems, and to analyze the health status of the general population.

(e) Each county shall annually submit a report to the State Registrar by March 1, containing information on the amount of revenues collected pursuant to this section for the previous calendar year and on how the revenues were expended and for what purpose.

(f) This section shall remain in effect only until January 1, 1997, and as of that date is repealed, unless a later enacted statute, which is enacted before January 1, 1997, deletes or extends that date.

(g) It is the intent of the Legislature that the Vital Record Improvement Project be completed by January 1, 1997, and that the one dollar ($1) surcharge used to fund this project be discontinued at that time.

(h) This section shall become operative on July 1, 1995.

103645. (a) In addition to the fees prescribed by subdivisions (a) to (d), inclusive, of Section 103625, any applicant for a certified copy of any records described in those subdivisions shall pay an additional fee of one dollar ($1) to the State Registrar. Each local registrar, county recorder, or county clerk collecting the additional fee pursuant to this section shall transmit the entire fee to the State Registrar by the 10th day of the month following the month in which the fee was received.

(b) This section shall remain in effect only until January 1, 1997, and as of that date is repealed unless a later enacted statute that is enacted before January 1, 1997, deletes or extends that date.

103650. The fee for any search of the files and records performed by the custodian of the records for a specific record when no certified copy is made shall be paid in advance by the applicant. The fee shall be the same as the fee required in Section 103625.

103655. No fee shall be charged any publisher or editor of, or reporter employed by, a newspaper of general circulation or a news service to inspect, in the course and scope of his or her position or employment, any certificate of live birth, fetal death, or marriage, or any other certificate required by this part to be filed in the Office of the State Registrar or the office of any local registrar or county recorder, or any index of the certificates.

103660. No fee shall be charged by the State Registrar or local registrar of births and deaths for services rendered to any public entity, except for issuance of a permit for disposition of human remains or for making a copy of a record.

As used in this section, ‘‘public entity’’ includes the state, the Regents of the University of California, a county, city, district, public authority, public agency, and any other political subdivision or public corporation in the state.

Article 3. Other Fees

103675. Except as otherwise provided in Section 103065, the fee for issuance of a permit for disposition of human remains is two dollars ($2) payable to the local registrar of births and deaths by the applicant for the permit, when the permit is issued during regularly scheduled office hours of the local registrar of births and deaths.

103680. (a) Effective January 1, 1991, an additional fee of three dollars ($3) for issuance of a permit for disposition of human remains pursuant to Section 103675 shall be payable to the local registrar of births and deaths by the applicant for the permit. This amount shall be exempt from any adjustment made pursuant to Section 100430.

(b) Notwithstanding any other provision of law, the local registrar of births and deaths shall pay into the Peace Officers' Training Fund, by the 10th of the month following the end of each calendar quarter one dollar ($1) of the fee collected pursuant to subdivision (a) for the training of peace officer members of county coroners' offices. The remaining funds collected pursuant to subdivision (a) shall be paid into the county treasury to be expended for indigent burial.

103685. An additional fee of three dollars ($3) shall be paid for the issuance of a permit for disposition, when the permit is required to be issued outside the regularly scheduled office hours of the local registrar of births and deaths.

103690. Notwithstanding any other provision of law, the local registrar of births and deaths shall pay to the State Registrar by the 10th of the month following the end of each calendar quarter one-half of the fees collected under authority of Section 103675.

103695. A fee of eleven dollars ($11) shall be paid to the State Registrar by the applicant at the time of application for a delayed birth registration under Chapter 4 (commencing with Section 102525) or a court order to establish a record of birth, death, or marriage pursuant to Chapter 12 (commencing with Section 103450). Upon acceptance of the application the State Registrar shall retain the fee.

103700. A fee of eleven dollars ($11) shall be paid to the State Registrar by the applicant for an amendment to a birth, death, or marriage record under provisions of Articles 1 (commencing with Section 103225), 4 (commencing with Section 103325), and 5 (commencing with Section 103350) of Chapter 11, except for those amendments that are filed within one year of the date of occurrence of the event.

103705. A fee of eleven dollars ($11) shall be paid to the State Registrar by the applicant for the preparation of an amended record that shall include a certified copy of the newly amended record under Section 102670.

103710. A fee of eleven dollars ($11) shall be paid to the State Registrar by the applicant or when applicable, by the county clerk for the establishment of an amended record of birth under Articles 1 (commencing with Section 102625), and 2 (commencing with Section 102725) of Chapter 5, except where the required fee has been paid or an exception to the fee is provided under Section 103730.

103715. A fee of eleven dollars ($11) shall be paid to the State Registrar by the applicant for the establishment of a new record of

birth under Article 3 (commencing with Section 102750) of Chapter 5.

103720. A fee of eleven dollars ($11) shall be paid to the State Registrar by the applicant for the establishment of an amended record of birth under Article 6 (commencing with Section 103400) of Chapter 11.

103725. A fee of eleven dollars ($11) shall be paid to the State Registrar by the applicant for establishment of a new record of birth under Article 7 (commencing with Section 103425) of Chapter 11.

103730. A fee of eleven dollars ($11) for each individual being adopted shall be paid to the county clerk at the time of filing the petition in an adoption proceeding, except for agency adoptions in which the adoption fee is waived and a statement from the agency to this effect is filed with the petition, and that fee shall be paid monthly by the county clerk to the State Registrar of Vital Statistics for the services required by statute of that office.

CHAPTER 16. COMPENSATION OF APPOINTED LOCAL REGISTRARS OF BIRTHS AND DEATHS

103750. For local registrars serving under authority of Section 102280 the State Registrar shall quarterly certify to the auditors of the several counties the number of births and deaths properly registered, with the names of the local registrars and the amounts due each at the rates fixed by this part.

103755. All amounts shall be paid by the treasurer of the county in which the registration district is located, upon warrants drawn by the auditor; provided, that no fee shall be paid by the county to any local registrar who is also a city or county officer or employee and whose salary is by law the sole compensation for his or her services.

103760. Each local registrar entitled to compensation shall be paid the sum of fifty cents ($0.50) for each birth certificate and each death certificate properly and completely made out and registered with him or her, and correctly recorded and promptly returned by him or her to the State Registrar and out of the fees he or she shall pay the subregistrar the sum of thirty cents ($0.30) in each case where the certificate is registered with the subregistrar.

103765. If no births or no deaths were registered during any week the local registrar is entitled to be paid the sum of fifty cents ($0.50) for each report to that effect, but only if the report is made promptly as required by this part.

CHAPTER 17. PENALTIES

Article 1. Misdemeanors

103775. Every person, except a parent informant for a certificate of live birth, who is responsible for supplying information who refuses or fails to furnish correctly any information in his or her possession that is required by this part, or furnishes false information affecting any certificate or record required by this part, is guilty of a misdemeanor.

103780. Every person who willfully alters or knowingly possesses more than one altered document, other than as permitted by this part, or falsifies any certificate of birth, fetal death, death, or registry of marriage, or any record established by this part is guilty of a misdemeanor.

103785. Every person who is required to fill out a certificate of birth, fetal death, death, or registry of marriage and register it with the local registrar, or deliver it, upon request, to any person charged with the duty of registering it, and who fails, neglects, or refuses to perform such duty in the manner required by this part is guilty of a misdemeanor.

103790. Every local registrar, deputy registrar, or subregistrar, who fails, neglects, or refuses to perform his or her duty as required by this part and by the instructions and directions of the State Registrar thereunder, is guilty of a misdemeanor.

103795. Any person who uses any information from a certificate of live birth that is stamped with the notation authorized under subdivision (a) of Section 10056.5 is guilty of a misdemeanor.

Article 2. Felony

103800. Any person who willfully makes or files or causes to be made or filed a false certificate or affidavit under Chapter 4 (commencing with Section 102525) is guilty of a felony. The subject is also liable to the State of California for a civil penalty in the amount of five thousand dollars ($5,000). The civil penalty may be recovered in an action filed by the Attorney General in any court of competent jurisdiction. A penalty so recovered shall be paid into the State Treasury to the credit of the General Fund.

PART 2. POPULATION AND PUBLIC HEALTH SURVEILLANCE

CHAPTER 1. BIRTH DEFECTS MONITORING PROGRAM

103825. The Legislature hereby finds and declares that birth defects, stillbirths, and miscarriages represent problems of public

health importance about which too little is known; that these conditions lead to severe mental anguish on the part of parents and relatives and frequently to high medical care costs; and that a system to obtain more information about these conditions could result in development of preventive measures to decrease their incidence in the future. Therefore, it is the intent of the Legislature in enacting this section to accomplish all of the following:

(a) To maintain an ongoing program of birth defects monitoring statewide. ''Birth defect'' as used in this chapter means any medical problem of organ structure, function, or chemistry of possible genetic or prenatal origin.

(b) To provide information on the incidence, prevalence, and trends of birth defects, stillbirths, and miscarriages.

(c) To provide information to determine whether environmental hazards are associated with birth defects, stillbirths, and miscarriages.

(d) To provide information as to other possible causes of birth defects, stillbirths, and miscarriages.

(e) To develop prevention strategies for reducing the incidence of birth defects, stillbirths, and miscarriages.

(f) To conduct interview studies about the causes of birth defects.

(g) To affirm the authority of the state department to contract with a qualified entity to operate the birth defects monitoring program statewide.

103830. The director shall maintain a system for the collection of information, necessary to accomplish the purposes of this chapter. The director shall require health facilities, with 15 days' notice, to make available to authorized program staff the medical records of children suspected or diagnosed as having birth defects, including the medical records of their mothers. In addition, health facilities shall make available the medical records of mothers suspected or diagnosed with stillbirths or miscarriages and other records of persons who may serve as controls for interview studies about the causes of birth defects. If it is necessary to photocopy records made available under this section, copying expenses shall be paid by the state department.

''Health facilities'' as used in this section means general acute care hospitals, and physician-owned or operated clinics, as defined in Section 1200, that regularly provide services for the diagnosis or treatment of birth defects, genetic counseling, or prenatal diagnostic services.

103835. The birth defects monitoring program shall operate statewide. It is the intent of the Legislature that the adequacy of program resources shall be assessed annually, and that the annual assessment shall include a consideration of at least all the following factors:

(a) The numbers of births in the state.

(b) The scope of program activities.

(c) Any urgent situation requiring extraordinary commitment of present or planned program staff or resources.

103840. The director shall use the information collected pursuant to Section 103830 and information available from other reporting systems and health providers to conduct studies to investigate the causes of birth defects, stillbirths, and miscarriages and to determine and evaluate measures designed to prevent their occurrence. The department's investigation of poor reproductive outcomes shall not be limited to geographic, temporal, or occupational associations, but may include investigation of past exposures.

103845. The director shall appoint an advisory committee to advise on the implementation of this chapter. Each of the disciplines of epidemiology, hospital administration, biostatistics, maternal and child health and public health shall be represented on the committee. At least one of the members shall be a representative of the manufacturing industry.

103850. (a) All information collected and analyzed pursuant to this chapter shall be confidential insofar as the identity of the individual patient is concerned and shall be used solely for the purposes provided in this chapter. Access to the information shall be limited to authorized program staff, and persons with a valid scientific interest, who meet qualifications as determined by the director, who are engaged in demographic, epidemiological or other similar studies related to health, and who agree, in writing, to maintain confidentiality.

(b) The department shall maintain an accurate record of all persons who are given access to the information in the system. The record shall include: the name of the person authorizing access; name, title, and organizational affiliation of persons given access; dates of access; and the specific purpose for which information is to be used. The record of access shall be open to public inspection during normal operating hours of the state department.

(c) All research proposed to be conducted by persons other than program staff, using the information in the system, shall first be reviewed and approved by the director and the State Committee for the Protection of Human Subjects. Satisfaction of the terms of the director's rules for data access shall be deemed to establish a valid scientific interest for purposes of subdivision (a), entitling the researcher to review records collected pursuant to Section 103830 and to contact case subjects and controls.

(d) Whenever program staff, pursuing program objectives, deems it necessary to contact case subjects and controls, program staff shall submit a protocol describing the research to the director and to the State Committee for the Protection of Human Subjects. Once a protocol is approved by that committee, program staff shall be deemed to have established a bona fide research purpose, and shall be entitled to complete the approved project and contact case

subjects and controls without securing any additional approvals or waivers from any entity.

(e) Nothing in this section shall prohibit the publishing by the department of statistical compilations relating to birth defects, stillbirth, or miscarriage that do not in any way identify individual cases or individual sources of information.

(f) Any person who, in violation of a written agreement to maintain confidentiality, discloses any information provided pursuant to this section, or who uses information provided pursuant to this section in a manner other than as approved pursuant to this section may be denied further access to any confidential information maintained by the department. That person shall also be subject to a civil penalty of five hundred dollars ($500). The penalty provided in this section shall not be construed as restricting any remedy, provisional or otherwise, provided by law for the benefit of the department or any person.

103855. The department may enter into a contract for the establishment and implementation of the birth defects monitoring program. The contract shall include provisions requiring full compliance with all the requirements of this chapter. The term of the contract may be in excess of one year, but no longer than three years. Funds shall be allocated in accordance with the state Budget Act. Funds withheld from the contractor at the conclusion of a fiscal year until specified tasks are completed shall be released promptly on proof of substantial completion, and shall not be offset against any funding for the subsequent fiscal year.

CHAPTER 2. CALIFORNIA TUMOR REGISTRY

103875. (a) The department shall conduct a program of epidemiological assessments of the incidence of cancer. The program shall encompass all areas of the state for which cancer incidence data are available. The program shall include the monitoring of cancers associated with suspected carcinogens encountered by the general public both in occupational locations and in the environment generally.

(b) The program shall be under the direction of the director, who may enter into contracts as are necessary for the conduct of the program and may accept, on behalf of the state, grants of public or private funds for the program. The director shall analyze available incidence data and prepare reports and perform studies as necessary to identify cancer hazards to the public health and their remedies.

(c) It is the intent of the Legislature that an appropriation be included in each Budget Act in an amount sufficient to provide for the annual cost of the program.

103880. The Resource for Cancer Epidemiology of the department shall investigate and formulate a set of options and

implementation plans for utilizing the California Tumor Registry in epidemiological research on the effects of Agent Orange exposure on Vietnam veterans. The options and plans shall take into consideration the existing programs and capabilities of the Department of Veterans Affairs, and shall be reported to the Legislature by June 30, 1985.

This section shall remain in effect only until January 1, 1995, and as of that date is repealed, unless a later enacted statute, that is chaptered before January 1, 1995, deletes or extends that date.

103885. (a) The director shall establish a statewide system for the collection of information determining the incidence of cancer, using population-based tumor registries modeled after the Cancer Surveillance Program of Orange County. As of the effective date of this section the director shall begin phasing in the statewide cancer reporting system. By July 1, 1988, all county or regional registries shall be implemented or initiated. By July 1, 1990, the statewide cancer reporting system shall be fully operational. Within 60 days of the effective date of this section, the director shall submit an implementation and funding schedule to the Legislature.

(b) The department may designate any demographic parts of the state as regional cancer incidence reporting areas and may establish regional cancer registries, with the responsibility and authority to carry out the intent of this section in designated areas. Designated regional registries shall provide, on a timely basis, cancer incidence data as designated by the state department to the department. The department may contract with an agency, including, but not limited to, a health systems agency, single county health department, multicounty health department grouping, or nonprofit professional association, representing a designated cancer reporting region for the purposes of collecting and collating cancer incidence data.

(c) The director shall designate cancer as a disease required to be reported in the state or any demographic parts of the state in which cancer information is collected under this section. All cancers diagnosed or treated in the reporting area shall thereafter be reported to the representative of the department authorized to compile the cancer data, or any individual, agency, or organization designated to cooperate with that representative.

(d) (1) Any hospital or other facility providing therapy to cancer patients within an area designated as a cancer reporting area shall report each case of cancer to the department or the authorized representative of the department in a format prescribed by the department. If the hospital or other facility fails to report in a format prescribed by the department, the department’s authorized representative may access the information from the hospital or the facility and report it in the appropriate format. In these cases, the hospital or other health facility shall reimburse the state department or the authorized representative for its cost to access and report the information.

(2) Any physician and surgeon, dentist, podiatrist, or other health care practitioner diagnosing or providing treatment for cancer patients shall report each cancer case to the department or the authorized representative of the department except for those cases directly referred to a treatment facility or those previously admitted to a treatment facility for diagnosis or treatment of that instance of cancer.

(e) Any hospital or other facility that is required to reimburse the department or its authorized representative for the cost to access and report the information pursuant to subdivision (d) shall provide payment to the department or its authorized representative within 60 days of the date this payment is demanded. In the event any hospital or other facility fails to make the payment to the department or its authorized representative within 60 days of the date the payment is demanded, the department or its authorized representative may, at its discretion, assess a late fee not to exceed $1^1/_2$ percent per month of the outstanding balance. Further, in the event that the department or its authorized representative takes a legal action to recover its costs and any associated fees, and the department or its authorized representative receives a judgment in its favor, the hospital or other facility shall also reimburse the department or its authorized representative for any additional costs it incurred to pursue the legal action. Late fees and payments made to the department by hospitals or other facilities pursuant to this subdivision shall be considered as reimbursements of the additional costs incurred by the department.

(f) All physicians and surgeon, hospitals, outpatient clinics, nursing homes and all other facilities, individuals or agencies providing diagnostic or treatment services to patients with cancer shall grant to the department or the authorized representative access to all records that would identify cases of cancer or would establish characteristics of the cancer, treatment of the cancer, or medical status of any identified cancer patient. Willful failure to grant access to those records shall be punishable by a fine of up to five hundred dollars ($500) each day access is refused. Any fines collected pursuant to this subdivision shall be deposited in the General Fund.

(g) All information reported pursuant to this section shall be confidential as provided in Section 100330, except that the department and any regional cancer registry designated by the department shall use the information to determine the sources of malignant neoplasms and evaluate measures designed to eliminate, alleviate, or ameliorate their effect. The department and any regional cancer registry designated by the department may enter into agreements to furnish confidential information to other states' cancer registries, federal cancer control agencies, local health officers, or health researchers for the purposes set forth in this subdivision if those out-of-state registries, agencies, officers, or

researchers agree in writing to maintain the confidentiality of the information, and in the case of researchers, if they have obtained the approval of their committee for the protection of human subjects established in accordance with Part 46 (commencing with Section 46.101) of Title 45 of the Code of Federal Regulations.

(h) For the purpose of this section, ‘‘cancer’’ means all malignant neoplasms, regardless of the tissue of origin, including malignant lymphoma, Hodgkins disease, and leukemia, but excluding basal cell and squamous cell carcinoma of the skin.

(i) Nothing in this section shall preempt the authority of facilities or individuals, providing diagnostic or treatment services to patients with cancer, to maintain their own facility-based tumor registries.

(j) It is the intent of the Legislature that the department, in establishing a system pursuant to this section, maximize the use of available federal funds.

CHAPTER 3. DISORDERS CHARACTERIZED BY LAPSES OF CONSCIOUSNESS

103900. (a) Every physician and surgeon shall report immediately to the local health officer in writing, the name, date of birth, and address of every patient at least 14 years of age or older whom the physician and surgeon has diagnosed as having a case of a disorder characterized by lapses of consciousness. However, if a physician and surgeon reasonably and in good faith believes that the reporting of a patient will serve the public interest, he or she may report a patient’s condition even if it may not be required under the department’s definition of disorders characterized by lapses of consciousness pursuant to subdivision (d).

(b) The local health officer shall report in writing to the Department of Motor Vehicles the name, age, and address, of every person reported to it as a case of a disorder characterized by lapses of consciousness.

(c) These reports shall be for the information of the Department of Motor Vehicles in enforcing the Vehicle Code, and shall be kept confidential and used solely for the purpose of determining the eligibility of any person to operate a motor vehicle on the highways of this state.

(d) The department, in cooperation with the Department of Motor Vehicles, shall define disorders characterized by lapses of consciousness based upon existing clinical standards for that definition for purposes of this section and shall include Alzheimer’s disease and those related disorders that are severe enough to be likely to impair a person’s ability to operate a motor vehicle in the definition. The department, in cooperation with the Department of Motor Vehicles, shall list those circumstances that shall not require reporting pursuant to subdivision (a) because the patient is unable

to ever operate a motor vehicle or is otherwise unlikely to represent a danger that requires reporting. The department shall consult with professional medical organizations whose members have specific expertise in the diagnosis and treatment of those disorders in the development of the definition of what constitutes a disorder characterized by lapses of consciousness as well as definitions of functional severity to guide reporting so that diagnosed cases reported pursuant to this section are only those where there is reason to believe that the patients' conditions are likely to impair their ability to operate a motor vehicle. The department shall complete the definition on or before January 1, 1992.

(e) The Department of Motor Vehicles shall, in consultation with the professional medical organizations specified in subdivision (d), develop guidelines designed to enhance the monitoring of patients affected with disorders specified in this section in order to assist with the patients' compliance with restrictions imposed by the Department of Motor Vehicles on the patients' licenses to operate a motor vehicle. The guidelines shall be completed on or before January 1, 1992.

(f) A physician and surgeon who reports a patient diagnosed as a case of a disorder characterized by lapses of consciousness pursuant to this section shall not be civilly or criminally liable to any patient for making any report required or authorized by this section.

CHAPTER 4. REYES SYNDROME

103925. (a) The Legislature finds and declares the following:

(1) The cause and the cure of Reyes Syndrome are unknown, and the number of incidences of this disease is also unknown.

(2) Where the scope of a medical problem is unknown, the amount of research funds is usually small. Therefore, it is necessary to define the extent of this medical problem.

(b) A physician and surgeon attending a patient diagnosed as having Reyes Syndrome shall report that condition, within seven days of the diagnosis, to the department on report forms prescribed by the department.

SEC. 5. Division 103 (commencing with Section 104100) is added to the Health and Safety Code, to read:

DIVISION 103. DISEASE PREVENTION AND HEALTH PROMOTION

PART 1. CHRONIC DISEASE

CHAPTER 1. CARDIOVASCULAR DISEASE

104100. The Legislature finds and declares that high blood pressure, also known as hypertension, is a widespread and serious public health problem in California. This condition, when untreated, is a major contributor to heart disease, stroke, kidney disease, and related cardiovascular morbidity and mortality. Although high blood pressure can be effectively controlled through the use of now well established antihypertensive drugs, treatment is not always adequately utilized.

It is estimated that there are two million adults in California who have high blood pressure. It is further estimated, based on national data, that no more than 71 percent of all adult Californians with high blood pressure are aware of their condition, and that of those who are aware, only 40 percent are being effectively treated. Thus, of some two million California adults with high blood pressure, only about 568,000 have their condition adequately controlled. Unless the problem of uncontrolled high blood pressure among some 1,432,000 adults is promptly addressed, many of these individuals will experience preventable serious illness, disability and death. In addition, the state will continue to face unnecessary medical and welfare costs resulting from high blood pressure and its resulting effects. Consequently, it is necessary to provide for expanded statewide efforts, interface with relevant federal legislation, establish and maintain appropriate guidelines, and enhance high blood pressure control activities at the community level. Coordination of local and state efforts in the planning, implementation, and evaluation of high blood pressure control activities is required, in order to improve allocations and utilization of resources to control high blood pressure in the states population.

104105. The department shall conduct a program for the control of high blood pressure. The program shall include, but not be limited to, all of the following:

(a) Support of local community high blood pressure control programs to improve the quality and distribution of high blood pressure control services.

(b) Promotion of consumer participation in high blood pressure control efforts.

(c) Statewide coordination of high blood pressure control activities.

(d) Planning, including development, adoption, periodic review, and revision of a state plan for high blood pressure control; and assistance to local agencies in their planning efforts.

(e) Gathering, analysis, and dissemination of epidemiologic data and information on high blood pressure and its resulting effects, and support of high blood pressure research.

(f) Development and maintenance of a clearinghouse for high blood pressure information, materials, and services.

(g) Promotion of local and regional councils on high blood pressure control.

(h) Evaluation of high blood pressure control efforts.

(i) Education of patients, health professionals, and the general public.

104110. Local community high blood pressure control programs may include any or all of the following program components:

(a) Screening.

(b) Detection.

(c) Referral and followup.

(d) Diagnostic evaluation.

(e) Adherence management.

(f) Dropout retrieval.

(g) Patient education.

(h) Public education.

(i) Provider education.

(j) Such other components consistent with applicable federal program requirements as the department may deem desirable in controlling high blood pressure and are reflected in the state plan for high blood pressure control.

104115. The department may enter into contracts with local public and private nonprofit agencies for the purpose of operating community high blood pressure control programs.

104120. The department shall establish standards for applications for funding, review of proposals, funding awards, technical assistance, monitoring, and evaluation of local programs as it may deem necessary for the implementation of this chapter.

104125. No services provided pursuant to this chapter shall substitute for other obligations of a unit of local government, including those required by state law.

Funds appropriated to carry out the purposes of this chapter shall be supplemental to those available from the federal government and shall not duplicate, nor shall they replace, any commitments made by the federal government to support high blood pressure control, including any formula allocations for which California would be eligible whether or not this chapter is enacted into law.

104130. Local community high blood pressure control programs funded pursuant to this chapter shall make maximum use of third party payments and other resources to support their efforts.

104135. The department may receive and expend funds for high blood pressure control pursuant to this chapter from federal and other available sources and may use such funds, along with available state funds, to support a unified high blood pressure control program.

104140. It is the intent of the Legislature that the department shall utilize available federal funds for carrying out the purposes of this chapter.

CHAPTER 2. CANCER (Reserved)

CHAPTER 3. CHRONIC OBSTRUCTIVE PULMONARY DISEASE (Reserved)

CHAPTER 4. DIABETES (Reserved)

CHAPTER 5. BLINDNESS AND OTHER CHRONIC DISEASE

104300. The department shall maintain a program for the prevention of blindness, including, but not limited to:

(a) Studies to determine the number, distribution, and nature of conditions leading to blindness among the population of the state.

(b) Investigations into the causes of blindness for the purpose of developing control procedures.

(c) Consultations with, and assistance to, local agencies directed toward education for the prevention of blindness, the early identification of conditions leading to blindness, and the application of methods for reducing the amount of blindness resulting from preventable conditions.

104305. The department may enter into agreements with any public or private organization, agency, or individual to carry out its duties and responsibilities with respect to the prevention of blindness.

PART 2. INJURY PREVENTION AND CONTROL

CHAPTER 1. UNINTENTIONAL INJURY STUDY AND CONTROL

104325. The department may maintain a program of accidental injury study and control, including but not limited to, all of the following:

(a) The conduct of studies to determine the health and human components of accidental injury.

(b) The study of factors associated with prompt and efficient emergency treatment of accidental injuries.

(c) The study of human and environmental factors in the occurrence of accidental injury.

(d) The development of control programs to reduce the frequency and severity of accidental injuries resulting from health and other human factors, either alone or in combination with environmental factors.

(e) Consultation with and assistance to local health departments and other agencies in the development and maintenance of programs for the prevention and control of accidental injuries.

104330. The department may enter into agreements with any public or private organization, agency, or individual to carry out its duties and responsibilities with respect to accidental injury study and control. In any situation where these activities may duplicate or overlap the activities of another state department or agency, the department shall confer with that department or agency in order to avoid duplication.

PART 3. RISK REDUCTION

CHAPTER 1. TOBACCO CONTROL

Article 1. Tobacco Use Prevention

104350. (a) The Legislature finds and declares as follows:

(1) Smoking is the single most important source of preventable disease and premature death in California.

(2) More than 30 percent of coronary heart disease cases are attributable to cigarette smoking.

(3) More than 30 percent of all annual cancer deaths are attributable to smoking, with lung cancer now the leading cancer killer in women as well as men.

(4) Smoking is responsible for one-quarter of all deaths caused by fire.

(5) Involuntary smoking is a cause of disease, including lung cancer, in healthy nonsmokers.

(6) More than 80 percent of chronic obstructive lung diseases including emphysema and chronic bronchitis are attributable to smoking.

(7) Tobacco-related disease places a tremendous financial burden upon the persons with the disease, their families, the health care delivery system, and society as a whole. California spends five billion six hundred million dollars ($5,600,000,000) a year in direct and indirect costs on smoking-related illnesses.

(8) The elimination of smoking is the number one weapon against four of the five leading causes of death in California.

(9) Keeping children and young adults from beginning to use tobacco and encouraging all persons to quit tobacco use shall be the highest priority in disease prevention for the State of California. More

than 60 percent of all smokers begin smoking by the age of 14, and 90 percent begin by the age of 19.

(10) The State of California shall play a leading role in promoting a smoke-free society by the year 2000 and thereby supporting the National Health Status Objectives for the year 2000 relating to smoking and tobacco use.

(b) It is the intent of the Legislature, therefore, to require the department, local lead agencies, and the State Department of Education to cooperatively and individually conduct activities directed at the prevention of tobacco use and tobacco-related diseases. The campaign shall focus on health promotion, disease prevention, and risk reduction, utilizing a ''wellness'' perspective that encourages self-esteem and positive decisionmaking techniques. It is also the intent of the Legislature that, for the purpose of program planning and program evaluation, the department provide data and technical information on tobacco-related diseases, tobacco use and its consequences, and effective personal and community interventions to prevent tobacco use.

104355. The following definitions shall apply to this article:

(a) ''Grantee'' means any public or private nonprofit entity approved by the department or the State Department of Education to receive funds pursuant to this article. Grantees may include, but are not limited to, hospitals, community clinics, local health departments, voluntary health organizations, Indian tribes, colleges and universities, county offices of education, school districts, health maintenance organizations, professional health associations, and professional health education associations.

(b) ''Tobacco-related disease'' means any of the following:

(1) Coronary heart disease.

(2) Cerebrovascular disease.

(3) Cancer, including cancers of the lung, larynx, esophagus, bladder, pancreas, and mouth.

(4) Chronic obstructive lung diseases, including emphysema, chronic bronchitis, asthma, and related lung disorders.

(5) Conditions where smoking or tobacco use has been determined to be a risk factor for excess disability and illness, including burns due to smoking-related fires.

(c) ''Tobacco use'' means the consumption of tobacco products by burning, chewing, inhalation, or other forms of ingestion.

(d) ''Voluntary health organization'' means a nonprofit organization organized for purposes related to health, including, but not limited to, an organization devoted to the research of cancer, heart disease, or diseases of the lung.

(e) ''Committee'' means the Tobacco Education Oversight Committee.

(f) ''The department'' means the State Department of Health Services.

(g) ‘‘Service provider’’ means an agency or organization that enters into an agreement with the local lead agency or state department to provide services under this article.

(h) ‘‘Direct services’’ means the provision of preventive health education services to targeted populations.

(i) ‘‘Local plan’’ means a plan submitted pursuant to Section 104400.

(j) ‘‘Preventive health education against tobacco use’’ means programs of instruction intended to dissuade individuals from beginning to smoke, to encourage smoking cessation, or to provide information on the health effects of tobacco on the user, children, and nonsmokers. These programs may include a focus on health promotion, disease prevention, and risk reduction, utilizing a ‘‘wellness perspective’’ that encourages self-esteem and positive decisionmaking techniques.

(k) ‘‘Targeted populations’’ means those population groups specified in Sections 104360 and 104385.

(*l*) ‘‘Local lead agencies’’ means those agencies designated as local lead agencies pursuant to Section 104400.

104360. The following target populations, at a minimum, shall be the focus of the campaign implemented pursuant to this article:

(a) School-age youth and their families in the schools and in the community.

(b) Black, Hispanic, Native American, and Asian-Pacific American populations, pregnant women, and current smokers.

104365. (a) There is hereby created the Tobacco Education and Research Oversight Committee in state government that shall advise the department and the State Department of Education with respect to policy development, integration, and evaluation of tobacco education programs funded under this article, and for development of a master plan for the future implementation of tobacco education programs.

(b) The Tobacco Education Oversight Committee shall be composed of 13 members to be appointed as follows:

(1) Two members representing volunteer health organizations dedicated to the reduction of tobacco use appointed by the Speaker of the Assembly.

(2) One member representing an organization that represents health care employees appointed by the Senate Rules Committee.

(3) One member of a professional education association, such as an association of teachers, appointed by the Senate Rules Committee.

(4) One member of a university facility with expertise in programs intended to reduce tobacco use appointed by the Governor.

(5) Two representatives of a target population group appointed by the Governor.

(6) One representative of the department appointed by the Governor.

(7) One representative of the State Department of Education appointed by the Superintendent of Public Instruction.

(8) One member representing the interests of the general public appointed by the Governor.

(9) One representative of local health departments appointed by the Governor.

(10) One member representing a volunteer health organization dedicated to the reduction of tobacco associated injury appointed by the Governor.

(11) One member from the Tobacco Related Disease Research Program appointed by the Governor.

(c) Members shall serve for a term of two years, renewable at the option of the appointing authority. The initial appointments of members shall be for two or three years, to be drawn by random lot at the first meeting. The committee shall be staffed by the department's coordinator of the program created pursuant to Section 104375.

(d) The committee shall meet as often as it deems necessary, but shall meet not less than four times per year.

(e) The members of the committee shall serve without compensation, but shall be reimbursed for necessary travel expenses incurred in the performance of the duties of the committee.

104370. The committee shall be advisory to the department, the University of California, and State Department of Education for the following purposes:

(a) Evaluation of research, school- and community-based programs funded under this article as necessary in order to assess the overall effectiveness of efforts made by the programs to reduce the use of tobacco products. In order to evaluate tobacco education, research, and cessation programs, the committee shall seek the cooperation and assistance of the department, the State Department of Education, county offices of education, local lead agencies, administrative representatives, target populations, school officials, and researchers. A principal measurement of effectiveness shall be reduction of smoking rates among a given target population.

(b) Facilitation of programs directed at reducing and eliminating tobacco use that are operated jointly by more than one agency or entity. The committee shall propose strategies for the coordination of proposed programs administered by the department, the University of California, and the State Department of Education in order to avoid the duplication of services and to maximize the public benefit of the programs.

(c) Make recommendations to the department, the University of California, and the State Department of Education regarding the most appropriate criteria for the selection of, standards of the

operation of, and the types of programs to be funded under this article.

(d) Reporting to the Legislature on or before January 1 of each year on the number and amount of tobacco education programs funded by the Health Education Account, created by Section 30122 of the Revenue and Taxation Code, the amount of money in the account, any moneys previously appropriated to the department, the University of California, and the State Department of Education but unspent by the departments, a description and assessment of all programs funded under this article, and recommendations for any necessary policy changes or improvements for tobacco education programs.

(e) Ensuring that the most current research findings regarding tobacco use prevention are applied in designing the tobacco education programs administered by the department and the State Department of Education. The department and the State Department of Education shall apply the most current findings and recommendations of research including research funded by the Research Account of the Cigarette and Tobacco Products Surtax Fund created by Section 30122 of the Revenue and Taxation Code.

(f) Based on the results of programs supported by this article and any other proven methodologies available to the committee, produce a comprehensive master plan for implementing tobacco education programs throughout this state for the prevention and cessation of tobacco use. The master plan shall include implementation strategies for each target population specified in Section 104360 for programs throughout this state. The Tobacco Education and Research Oversight Committee shall submit the master plan to the Legislature on or before January 1, 1991, and shall be updated every two years thereafter until a progress report is completed on January 15, 2000. The master plan and its revisions shall include recommendations on administrative arrangements, funding priorities, integration and coordination of approaches by the department, the University of California, and the State Department of Education and their support systems, as well as progress reports relating to each target population. The master plan shall establish a goal of achieving a 75-percent reduction in tobacco consumption in California by the year 1999.

104375. (a) To prevent tobacco-related diseases and diminish tobacco use, the department shall establish within the department a program on tobacco use and health to reduce tobacco use in California by conducting health education interventions and behavior change programs at the state level, in the community, and other nonschool settings.

(b) The department shall conduct statewide surveillance of tobacco-related behaviors, knowledge, and attitudes and evaluate the department’s local and state tobacco control programs under this article. At a minimum, these evaluation activities shall utilize

scientifically appropriate methods for monitoring the annual progress of the program in reducing the adult smoking prevalence from the 1993 benchmark rate of 20 percent and reducing cigarette consumption from the 1993 per capita benchmark rate of 4.84 packs per quarter. These surveillance and evaluation activities may include, but need not be limited to, the following:

(1) Be based on sound evaluation principles and include, to the extent feasible, elements of controlled experimental methods.

(2) Monitor the overall statewide effect of health education efforts on smoking and tobacco use, and, to the extent feasible, the resulting effects on health.

(3) Monitor the effect of the programs on individual target populations identified by this article or designated by the department as meriting special attention.

(4) Provide an evaluation of the comparative effectiveness of individual program designs that shall be used in funding decisions and program modifications.

(5) Incorporate other aspects into the evaluation that have been identified by the department in consultation with state and local advisory groups, local lead agencies, and other interested parties.

(6) Funds permitting, utilize a sample size that is adequate to produce county, regional, and ethnic specific estimates.

(c) The department shall produce or contract for, and update biennially, a description of programs determined to be effective in reducing smoking and tobacco use, and the identification of portions of target populations that need information regarding the hazards of tobacco use. The department, in consultation with the State Department of Education, shall conduct, or contract for an evaluation of the effectiveness of the tobacco use prevention and education program as implemented in the public schools that receive funding for tobacco use prevention education pursuant to Sections 104420, 104425, 104435, and 104445. The purpose of the evaluation shall be to direct the most efficient allocation of resources appropriated under this article to accomplish the maximum prevention and reduction of tobacco use. The comprehensive evaluation shall be designed to measure the extent to which programs funded pursuant to this article promote the goals identified in this article and in Proposition 99 of the November 1988 general election. All information resulting from the evaluation shall be made available to the State Department of Education for purposes of improving its ability to implement and oversee the provision of effective tobacco use prevention education programs. The evaluator shall:

(1) Assess the effectiveness of tobacco use prevention education programs designed to prevent and reduce tobacco use among students. In support of this primary goal, the evaluation shall:

(A) Report findings on the effectiveness of programs and strategies currently in use in California schools that prevent and reduce tobacco use.

(B) Select a research strategy that will identify formal and informal factors that might account for differences in tobacco use by students, including, but not limited to, formal education prevention strategies.

(C) Incorporate in the evaluation quantitative as well as qualitative data. The data shall include, but are not limited to:

(i) Student data, including attitudes, knowledge, and behavior based upon a statistically valid random sample of school districts and students.

(ii) Curriculum data, including diversity of curricula, evidence of appropriateness to grade level, gender, and ethnicity, and the extent of the inclusion of prevention approaches identified in research literature.

(iii) School data, including intensity of emphasis on tobacco use prevention and evidence of counseling or treatment referral systems.

(iv) Community data, including the existence of parent networks and the participation of community service organizations including local lead agencies, in prevention.

(2) Develop and test a regular tobacco use prevention and education information system for use by the State Department of Education, using the resulting information to establish the extent of implementation of tobacco use prevention education programs statewide and the degree of student exposure to these programs at selected grade levels.

(3) Ensure provision of a fourth administration of a statewide, biennial survey of attitudes toward tobacco and prevalence of tobacco use among public school students. To the extent possible, existing survey data shall be utilized.

(4) Provide recommendations to the Legislature and the State Department of Education on tobacco use prevention education program changes.

(5) Assist the State Department of Education in identifying and developing instructional materials and curricula in school-based programs, designed to enhance the prevention of and encouraging the cessation of the continuing use of, tobacco products. The materials and curricula shall address the specific needs of persons in grades 4 to 12, inclusive, and in adult education programs.

(d) School districts shall agree, as a condition of receiving money pursuant to this article, to participate in the evaluation if chosen by the evaluator.

(e) (1) The department shall contract with one or more qualified agencies for production and implementation of an ongoing public awareness of tobacco-related diseases by developing an information campaign using a variety of media approaches. The department shall

issue a request for proposals biennially. Any media campaign funded with this part shall stress the importance of both preventing the initiation of tobacco use and quitting smoking and shall be based on professional market research and surveys necessary to determine the most effective method of diminishing tobacco use among specified target populations. Initial media efforts shall be directed to specific target populations. The contractors selected shall be provided with all available survey information resulting from ongoing programs funded under this article. Priority shall be given to minor children, ages 6 to 14, inclusive. The medium used shall be determined to be the most effective at reaching this targeted age group. With respect to the broadcast media, the message shall be aired at times expected to reach the priority age group. With respect to the print media, publications to be used shall be those that appeal to the priority age group.

(2) No media campaign funded pursuant to this article shall feature in any manner the image or voice of any elected public official or candidate for elected office, or directly represent the views of any elected public official or candidate for elected office.

(f) The department shall provide or contract for training, consultation, support, and continuing education to health professionals, and others interested in developing programs and services directed at preventing tobacco use and promoting smoking cessation, utilizing, when available and determined appropriate by the department, the expertise of universities in this state and schools of public health. The training, consultation, support, and continuing education shall include advice and support in creating a smoke-free environment.

(g) The department shall conduct an awards program to acknowledge the outstanding achievements of those communities, organizations, and groups that have fostered movement toward a smoke-free society or have reduced the consumption of tobacco.

(h) The department shall issue guidelines for local plans for education against tobacco use. The guidelines shall require local public health departments to provide services directed at preventing tobacco use and promoting smoking cessation to the target populations enumerated in Section 104360 and to persons under 19 years of age who no longer attend school and to youth attending school who are not served through State Department of Education funded programs. The guidelines shall require for each target population to be served a description of the services to be provided, an estimate of the number to be served, an estimate of the success rate, and a method to determine to what extent goals have been achieved. Beginning with the 1990–91 fiscal year, and for each fiscal year thereafter, the guidelines shall require local lead agencies to describe how local funding decisions will take into account evaluations of program effectiveness and efficiency. The guidelines

shall require the submission of a budget and information on staffing configurations.

(i) By December 31, 1989, the department shall issue guidelines for fiscal year 1989–90 and by July 1, 1990, the department shall issue guidelines to local lead agencies on how to prepare a local plan for a comprehensive community intervention program against tobacco use.

(j) The department shall provide technical assistance to local lead agencies for the development of plans required by Section 104400 so that the local lead agencies are able to comply with the schedule for the submission of plans specified in Section 104400. The technical assistance shall include, but not be limited to, the following:

(1) Developing and disseminating preventive health education program options for local communities.

(2) Providing training, consultation, and technical assistance to local health departments, local advisory committees, and service providers.

(k) The department shall receive and approve local plans submitted by local lead agencies and provide technical assistance and guidance as necessary to ensure the compliance of the local lead agencies with this article. Every effort shall be made to approve or provide a list of necessary amendments to a local plan within 30 days of receipt of the local plan. The department may authorize a local lead agency to begin implementation of its local plan on a provisional basis, with final approval of the local plan contingent on satisfying conditions specified by the department.

(*l*) The department shall work in collaboration with the public and private sectors in implementing the activities required of the department and provide access upon request to local plans, program statistics, and other readily available information.

(m) The department shall provide staff, assistance, and support needed by the committee.

(n) In consultation with the committee, the department shall develop a comprehensive master plan for implementing tobacco education programs throughout the state for the prevention and cessation of tobacco use.

(o) The department shall consult regularly with the University of California regarding trends in the frequency and the cost of treating tobacco-related diseases and the success of research efforts to reduce tobacco use and limit its adverse health effects.

(p) The department shall establish, in consultation with the State Department of Education and county offices of education, a data collection and data management program to study effective tobacco use interventions. Under this program the department may contract for studies and evaluations in school-based and community-based programs. The department shall consult with the State Department

of Education regarding the collection and evaluation of program data.

(1) The department shall require, by contract, that local lead agencies use a uniform management data and information system that will permit comparisons of workload, unit costs, and outcome measurements on a statewide basis. The department shall specify data reporting requirements for local lead agencies and their subcontractors.

(2) The department shall approve local lead agency and grantee computer software and hardware in order to ensure systemwide compatibility and capacity to expand. Departmental guidelines for local plans shall require local lead agencies to set forth their hardware and software plans and needs.

(3) The department may contract for the development or operation of a computerized management information system.

(4) The department shall consult the State Department of Education regarding computer software and hardware systems for school-based programs.

104380. (a) Funds appropriated to the department for local lead agencies for purposes of this article shall be allocated prospectively, on a quarterly basis in accordance with this section.

(b) No local lead agency shall be allocated less than one hundred ten thousand dollars ($110,000).

(c) (1) Except as provided in subdivision (b), counties not listed in subdivision (d) shall receive an allocation based on each county's proportion of the statewide population.

(2) Counties that receive their allocations pursuant to paragraph (1) shall receive 73 percent of their 1990–91 fiscal year allocation.

(d) Except as provided in subdivision (b), the balance of the funds after the allocation contained in subdivision (c) have been made, shall be allocated to the following specified counties in accordance with the following percentages:

COUNTY	ALLOCATION
Alameda	4.7427%
Contra Costa	1.8032%
Fresno	2.6855%
Kern	1.7083%
Lake	0.1826%
Los Angeles	43.8057%
Mendocino	0.2664%
Merced	0.7244%
Monterey	1.2937%
Orange	5.1382%
Placer	0.3697%

Riverside	3.1828%
Sacramento	3.2922%
San Bernardino	3.7972%
San Diego	5.9971%
San Francisco	5.3898%
San Joaquin	1.7413%
San Luis Obispo	0.8096%
San Mateo	1.4582%
Santa Barbara	0.7918%
Santa Clara	5.2450%
Santa Cruz	0.7709%
Stanislaus	1.2793%
Tulare	1.3768%
Ventura	1.5472%
Yolo	0.6004%

(e) Except as provided in subdivision (b), the allocation for those counties in which a city health department which is a local lead agency as defined by subdivision (*l*) of Section 104355 is located shall be apportioned among the local lead agencies in that county based on their jurisdiction's proportionate share of the countywide population.

(f) Reductions in allocations necessary to comply with subdivision (b) shall be distributed among the counties listed in subdivision (d) proportionately based on the table contained in subdivision (d).

(g) The department shall use population estimates for 1989 for each county and for each city as specified in the Department of Finance E-1 Report.

(h) Payments shall be made prospectively, on a quarterly basis, to local jurisdictions.

(i) (1) The department shall conduct a fiscal and program review on a regular basis.

(2) If the department determines that any county is not in compliance with any provision of this chapter, the county shall submit to the department, within 60 days, a plan for complying with this article.

(3) The department may withhold funds from counties that are not in compliance with this chapter in the same manner as the department is authorized under Chapter 5 (commencing with Section 16940) of Part 4.7 of Division 9 of the Welfare and Institutions Code.

104385. (a) The department shall award and administer grants for projects directed at the prevention of tobacco-related diseases. The purpose of the grant program is to conduct health education and

promotion activities targeted to high-risk persons and groups in order to reduce the number of persons beginning to use tobacco, continuing to use tobacco, or developing tobacco-related diseases. The grants shall provide funds to eligible grantees, as determined by the department. In awarding grants, the department shall select a variety of projects and grantees.

(b) The department shall develop criteria and standards for the allocation of grant awards which consider the need to balance target populations to be served, project types of rural suburban and urban projects, and consider the current regional availability of similar services. Target populations may include, but not be limited to, children, young adults, pregnant women, low-income individuals, Black, Hispanic, Native American, and Asian-Pacific Islander populations, current smokers, and school-aged youth no longer attending school classes. The grant awards may also be made to school districts for nonclassroom, districtwide efforts to reduce tobacco use. The department shall develop mechanisms to evaluate all programs and shall require any program funded under this article to provide statistics on the impact of the program.

(c) The department shall give priority to grantees who do the following:

(1) Demonstrate community support for the project.

(2) Design the project to coordinate with other community services including local health programs, school-based programs, or voluntary health organizations.

(3) Design the project to utilize and enhance existing services and resources.

(4) Serve a target population at high risk of starting tobacco use or developing tobacco-related illnesses.

(5) Demonstrate an understanding of the role community norms have in influencing behavioral change regarding tobacco use.

(6) Indicate promising innovative approaches to diminishing tobacco use among target groups and permit those approaches to be replicated by others.

104390. (a) The department may provide program support services to local tobacco use prevention programs, that shall include, but need not be limited to, all of the following:

(1) Data collection.

(2) Educational materials.

(3) Evaluation.

(4) Technical assistance.

(5) Training.

(6) Transfer of information among programs.

(b) Services funded under this section may be awarded through a competitive request for proposal process or directly to another state agency, the Regents of the University of California, the federal

government, or an auxiliary organization of the California State University.

(c) Grantees of services under this section shall demonstrate the ability to do both of the following:

(1) Improve the delivery of local tobacco use prevention programs directed at the targeted populations.

(2) Design programs to provide statewide and regional services to support local implementation of tobacco use prevention programs.

104395. The department shall expand the Child Health and Disability Prevention (CHDP) Program contained in Article 6 (commencing with Section 124025) of Chapter 3 of Part 2 of Division 106 as follows:

(a) Any child between birth and 90 days after entrance into first grade, all persons under 21 years of age who are eligible for the California Medical Assistance Program, and any person under 19 years of age whose family income is not more than 200 percent of the federal poverty level shall be eligible for services under the program in the county of which they are a resident. The department shall adopt regulations specifying which age groups shall be given certain types of screening tests and recommendations for referral.

(b) The first source of referral under the program shall be the child's usual source of health care. If referral is required and no regular source of health care can be identified, the facility or provider providing health screening and evaluation services shall provide a list of three qualified sources of care, without prejudice for or against any specific source.

(c) The department shall issue protocols for an antitobacco education component of the child health and disability prevention medical examination. The protocols shall include the following: dissuading children from beginning to smoke, encouraging smoking cessation, and providing information on the health effects of tobacco use on the user, children, and nonsmokers. The protocols shall also include a focus on health promotion, disease prevention, and risk reduction, utilizing a ''wellness'' perspective that encourages self-esteem and positive decisionmaking techniques, and referral to an appropriate community smoking cessation program.

(d) Notwithstanding any other provision of law, the department shall ensure that a portion of the funds in the Child Health Disability Prevention Program budget is used to facilitate the integration of the medical and dental components of all aspects of that program.

(e) The department shall expand its support and monitoring of county child health and disability prevention program efforts to provide all of the following:

(1) Review of a representative, statistically valid, randomly selected sample of child health and disability prevention health assessments, including, but not limited to, dental assessments, which result in the discovery of conditions which require followup diagnosis

and treatment, including but not limited to dental treatment, and which qualify for services under this section. The purpose of the survey and followup reviews of local programs is to determine whether necessary diagnosis and treatment services are being provided, and the degree to which those services comply with the intent of the act that added this subdivision. These survey reviews shall include all counties and shall be conducted at least three times a year.

(2) At least once a year, as part of regular visits to county child health and disability prevention programs to provide technical assistance, support services and monitoring and evaluation of program performance, department staff shall review the effectiveness of the mandated treatment program. The purpose of this review is to assure that the county is providing appropriate followup services for conditions discovered during child health and disability prevention health assessments. This review shall be done in conjunction with the ongoing survey activity of the Child Health and Disability Prevention Branch of the department and shall utilize data resulting from that activity.

(3) If the department establishes that a county has failed to provide treatment services mandated by the act that added this subdivision, the department shall require the county to submit a plan of correction within 90 days. If the department finds that substantial correction has not occurred within 90 days following receipt of the correction plan, it may require the county to enter into a contract pursuant to Section 16934.5 of the Welfare and Institutions Code for the remainder of the fiscal year and the following fiscal year, and for this purpose shall withhold the same percentage of funds as are withheld from other counties participating in the program pursuant to Section 16934.5 of the Welfare and Institutions Code.

104400. (a) (1) Except as provided in paragraph (2), each county health department or city health department as provided in Section 16800 of the Welfare and Institutions Code shall be the lead local agency for its county. The local lead agency shall have the overall responsibility for the success of the programs funded pursuant to this article in its county.

(2) Counties contracting with the department for the provision of health care services pursuant to Section 16809 of the Welfare and Institutions Code may elect to enter into an arrangement with the department for the administration and provision of funds and services subject to this article in their counties. In those cases, the department shall act as the local lead agency for that county.

(b) The local lead agency shall do all of the following:

(1) Provide, or contract for, preventive health education against tobacco services to targeted populations.

(2) Establish a coordinated information, referral, outreach, and intake system for preventive health education against tobacco services for targeted populations.

(3) Administer funds in accordance with this article, and department guidelines.

(4) Establish a uniform data collection system in compliance with standards and guidelines issued by the department, and submit audit and fiscal reports as required by the department.

(5) Coordinate services authorized by this article within and between county service providers.

(6) Provide technical assistance to service providers.

(7) Review, and suggest improvements to proposed county school district antitobacco plans. Prepare a letter for the county officer of education setting forth conclusions of the review. Work closely with the county office of education to ensure effective coordination of local school and nonschool antitobacco efforts.

(8) Coordinate activities with other governmental agencies.

(c) The local plans described in paragraph (4) of subdivision (b) shall include all of the following:

(1) A description of the targeted population, including age, race, ethnicity, language, education, income levels, its status as urban or rural, transportation needs, and any other information which the local lead agency determines is relevant.

(2) Local data on smoking and tobacco use among the targeted population.

(3) Goals for how many persons of the targeted population will be reached by health education, how many will participate in a smoking prevention or cessation program, and how many will quit or not start smoking as a result.

(4) A description of the direct services to be provided under the plan, including the services to be provided to the targeted populations enumerated in Section 104360 and schoolage youth who do not receive services through public school programs.

(5) Cost estimates for programs identified in the plan.

104405. Local lead agencies shall obtain the involvement and participation of local community organizations with special experience and expertise in community health education against tobacco usage, including representatives of high-risk populations. Local lead agencies shall include in their plan submitted pursuant to Section 104400 a description of how they shall fulfill this requirement. Representatives of these local groups shall assist and advise the local lead agency in all aspects of the local plan implemented pursuant to this article.

104410. The following goals and priorities shall govern funding services provided under this article pursuant to local plans:

(a) The provisions of preventive health education against tobacco use aimed at targeted populations, including pregnant women,

mothers of young children, and minorities, school dropouts, and other school-aged youth who would otherwise be unserved.

(b) The provisions of preventive health education against tobacco use aimed at school-age youth and their families in the community.

(c) The provision of preventive health education against tobacco use aimed at the workplace and the community.

104415. (a) Local lead agencies shall attempt to ensure that preventive education against tobacco use for targeted populations is provided in a way that reaches all geographic areas of the county.

(b) In choosing among eligible service providers available to serve the targeted populations described in subdivision (a), the local lead agency shall give priority to programs presently providing preventive health education, case management services to the targeted populations which are compatible with preventive health education against tobacco use, or other services in which preventive health education against tobacco use can be incorporated in a logical and efficient manner.

104420. The State Department of Education shall provide the leadership for the successful implementation of this article in programs administered by local public and private schools, school districts, and county offices of education. The State Department of Education shall do all of the following:

(a) Provide a planning and technical assistance program to carry out its responsibilities under this article.

(b) Provide guidelines for schools, school districts, and school district consortia to follow in the preparation of plans for implementation of antitobacco use programs for schoolage populations. The guidelines shall:

(1) Require the applicant agency to select one or more model program designs and shall permit the applicant to modify the model program designs to take special local needs and conditions into account.

(2) Require the applicant agency to prepare for each target population to be served a description of the service to be provided, an estimate of the number to be served, an estimate of the success rate and a method to determine to what extent goals have been achieved.

(3) Require plan submissions to include a staffing configuration and a budget setting forth use and distribution of funds in a clear and detailed manner.

(c) Prepare model program designs and information for local schools, local school districts, consortia, and county offices of education to follow in establishing direct service programs to targeted populations. Model program designs shall, to the extent feasible, be based on studies and evaluations that determine which service delivery systems are effective in reducing tobacco use and are cost-effective. The State Department of Education shall consult with

the department, and school districts with existing antitobacco programs in the preparation of model program designs and information.

(d) Provide technical assistance for local schools, local school districts, and county offices of education regarding the prevention and cessation of tobacco use. In fulfilling its technical assistance responsibilities, the State Department of Education may establish a center for tobacco use prevention that shall identify, maintain, and develop instructional materials and curricula encouraging the prevention or cessation of tobacco use. The State Department of Education shall consult with the department and others with expertise in antitobacco materials or curricula in the preparation of these materials and curricula.

(e) Monitor the implementation of programs that it has approved under this article to ensure successful implementation.

(f) Prepare guidelines within 180 days of the effective date of this article for a school-based program of outreach, education, intervention, counseling, peer counseling, and other activities to reduce and prevent smoking among schoolage youth.

(g) Assist county offices of education to employ a tobacco use prevention coordinator to assist local schools and local public and community agencies in preventing tobacco use by pupils.

(h) Train the tobacco use prevention coordinators of county offices of education so that they are:

(1) Familiar with relevant research regarding the effectiveness of various kinds of antitobacco use programs.

(2) Familiar with department guidelines and requirements for submission, review, and approval of school-based plans.

(3) Able to provide effective technical assistance to schools and school districts.

(i) Establish a tobacco use prevention innovation program effort directed at specific pupil populations.

(j) Establish a competitive grants program to develop innovative programs promoting the avoidance, abatement, and cessation of tobacco use among pupils.

(k) Establish a tobacco-free school recognition awards program.

(*l*) As a condition of receiving funds pursuant to this article, the State Department of Education, county offices of education, and local school districts shall ensure that they coordinate their efforts toward smoking prevention and cessation with the lead local agency in the community where the local school district is located.

(m) (1) Develop, in coordination with the county offices of education, a formula that allocates funds for school-based, antitobacco education programs to school districts and county offices of education for all students in grades 4 to 8, inclusive, on the basis of the average daily attendance (ADA) of pupils. School districts shall

provide tobacco-use prevention instruction for students, grades 4 to 8, inclusive, that address the following essential topics:

(A) Immediate and long-term undesirable physiologic, cosmetic, and social consequences of tobacco use.

(B) Reasons that adolescents say they smoke or use tobacco.

(C) Peer norms and social influences that promote tobacco use.

(D) Refusal skills for resisting social influences that promote tobacco use.

(2) Develop a competitive grants program administered by the State Department of Education directed at students in grades 9 to 12, inclusive. The purpose of the grant program shall be to conduct tobacco-use prevention and cessation activities targeted to high-risk students and groups in order to reduce the number of persons beginning to use tobacco, or continuing to use tobacco. The State Department of Education shall consult with local lead agencies, the Tobacco Education and Research Oversight Committee, and representatives from nonprofit groups dedicated to the reduction of tobacco-associated disease in making grant award determinations. Grant award amounts shall be determined by available funds. The State Department of Education shall give priority to programs, including, but not limited to, the following:

(A) Target current smokers and students most at risk for beginning to use tobacco.

(B) Offer or refer students to cessation classes for current smokers.

(C) Utilize existing anti-smoking resources, including local anti-smoking efforts by local lead agencies and competitive grant recipients.

(n) (1) Allocate funds for administration to county offices of education for implementation of Tobacco Use Prevention Programs. The funds shall be allocated according to the following schedule based on average daily attendance in the prior year credited to all elementary, high, and unified school districts, and to all county superintendents of schools within the county as certified by the Superintendent of Public Instruction:

(A) For counties with over 400,000 average daily attendance, thirty cents ($0.30) per average daily attendance.

(B) For counties with more than 100,000 and less then 400,000 average daily attendance, sixty-five cents ($0.65) per average daily attendance.

(C) For counties with more than 50,000 and less than 100,000 average daily attendance, ninety cents ($0.90) per average daily attendance.

(D) For counties with more than 25,000 and less than 50,000 average daily attendance, one dollar ($1) per average daily attendance.

(E) For counties with less than 25,000 average daily attendance, twenty-five thousand dollars ($25,000).

(2) In the event that funds appropriated for this purpose are insufficient, the Superintendent of Public Instruction shall prorate available funds among participating county offices of education.

(o) Allocate funds appropriated by the act adding this subdivision for local assistance to school districts and county offices of education based on average daily attendance reported in the second principal apportionment in the prior fiscal year. Those school districts and county offices of education that receive one hundred thousand dollars ($100,000) or more of local assistance pursuant to this part shall target 30 percent of those funds for allocation to schools that enroll a disproportionate share of students at risk for tobacco use.

(p) (1) Provide that all school districts and county offices of education that receive funding under subdivision (o) make reasonable progress toward providing a tobacco-free environment in school facilities for students and employees.

(2) All school districts and county offices of education that receive funding pursuant to paragraph (1) shall adopt and enforce a tobacco-free campus policy no later than July 1, 1995. The policy shall prohibit the use of tobacco products, any time, in district-owned or leased buildings, on district property and in district vehicles. Information about the policy and enforcement procedures shall be communicated clearly to school personnel, parents, students, and the larger community. Signs stating ''Tobacco use is prohibited'' shall be prominently displayed at all entrances to school property. Information about smoking cessation support programs shall be made available and encouraged for students and staff. Any school district or county office of education that does not have a tobacco-free district policy implemented by July 1, 1995, shall not be eligible to apply for funds from the Cigarette and Tobacco Products Surtax Fund in the 1995–96 fiscal year and until the tobacco-free policy is implemented. Funds that are withheld from school districts that fail to comply with the tobacco-free policy shall be available for allocation to school districts implementing a tobacco-use prevention education program, pursuant to subdivision (m).

104425. (a) The State Department of Education shall award and administer grants for projects directed at the prevention of tobacco use among school-age children. The purpose of the grant program is to conduct health education and tobacco information activities targeted to school-age children in order to reduce the number of persons beginning to use, or continuing to use, tobacco. The grants shall provide funds to eligible grantees, as determined by the State Department of Education. The State Department of Education shall select a variety of grantees and innovative and promising projects.

(b) The State Department of Education shall develop criteria and standards for the allocation of grant awards, that consider the need

to balance (1) target populations to be served; (2) project type; (3) rural, suburban, and urban projects, and consider the local availability of similar services. The department shall evaluate all grant programs by employing statistics that describe the impact of a grant program.

(c) The State Department of Education shall give priority to grantees who do the following:

(1) Design the project to coordinate with other community services including local health agencies, voluntary health organizations, and parent organizations.

(2) Design the project to utilize and develop existing services and resources.

(3) Demonstrate an understanding of the role that society, the environment, and community norms have in influencing tobacco usage.

(4) Indicate promising innovative approaches to diminishing tobacco use among school-age children and permit those approaches to be replicated by others.

104430. (a) The State Department of Education shall make available funds appropriated to it from the Health Education Account in the Cigarette and Tobacco Products Surtax Fund for the implementation of Section 104425 according to the following schedule:

(1) (A) Not less than two-thirds of that amount shall be awarded to local educational agencies. Funds allocated pursuant to paragraphs (2) and (3) shall not be considered funds for distribution to local educational agencies.

(B) Not less than two hundred thousand dollars ($200,000) of the amount subject to subparagraph (A) shall be made available for proportionate awards to applicant education centers pursuant to Article 6 (commencing with Section 33380) of Chapter 3 of Part 20 of the Education Code, for tobacco use prevention projects.

(2) Not less than two hundred thousand dollars ($200,000) of the amount awarded pursuant to Section 104425 shall be used for the support of statewide program evaluation.

(3) Not more than nine hundred thousand dollars ($900,000) of the amount awarded pursuant to Section 104425 shall be awarded as grants for technical assistance, implementation strategies, and regional coordinating activities related to tobacco use prevention pursuant to subdivision (c) of Section 104425.

(b) Any amount that exceeds the amounts specified in subdivision (a) shall be allocated for competitive grants pursuant to subdivision (c) of Section 104425.

(c) On and after January 1, 1992, funding to which this section applies shall be made available only upon a determination by the Legislative Analyst and the Tobacco Education Oversight Committee, in the evaluation required by Section 104460, indicating

that the tobacco use prevention program meets the purpose of this article.

104435. County offices of education shall do all of the following:

(a) Provide technical assistance and training to school districts and consortia of school districts regarding planning and preparation of antitobacco programs plans pursuant to State Department of Education guidelines.

(b) Receive and approve plans submitted by school districts and provide technical assistance and guidance as necessary to ensure the compliance of school districts with this article. Every effort shall be made to approve or provide a list of necessary amendments to a school district plan within 30 days of receipt. The county office of education may authorize a school district to begin implementation of its plan on a provisional basis, with final approval of the local plan contingent on satisfying specified conditions.

(c) Certify to the State Department of Education that a school district has met the conditions specified in the department's guidelines and that funds reserved for the school district's antitobacco programs may be released.

(d) Provide for appropriate coordination between school districts programs and local antitobacco use programs funded by the local lead agency.

104440. Local lead agencies shall be ineligible for awards under the competitive grants program, unless the local lead agency is participant within a consortium of community-based organizations or nonprofit organizations.

104445. In awarding grants under the competitive grants program, the department shall give preference to all of the following:

(a) Nonprofit or community-based organizations.

(b) Current contractors that meet both of the following requirements:

(1) Have demonstrated effectiveness and capacity in providing tobacco education services.

(2) Serve populations and areas with substantial unmet service needs.

(c) Proposals that provide new or expanded services to geographic areas or target populations underserved, as determined by the department.

104450. (a) The State Department of Education shall develop a common reporting format for districts receiving tobacco-use-prevention funds under this article.

(b) The format required by subdivision (a) shall be designed to provide annual data on all of the following:

(1) Tobacco-use-prevention education program expenditures.

(2) Tobacco-use-prevention education program instructional and other services to targeted and general student populations.

(3) Tobacco-use-prevention education program staff development and parent training.

(4) Other information determined to be appropriate by the department.

(c) The information provided by the format required by subdivision (a) shall be in a quantitative format that describes the number of individuals who are served and the number of individuals receiving each type of service.

(d) In addition to the requirements of subdivision (c), the information to be provided by the format required by subdivision (a) shall include, at a minimum, all of the following:

(1) (A) The number of students receiving tobacco-use-prevention instruction and the type of curriculum used.

(B) The format required by subdivision (a) shall show, by category, those students listed for the purpose of subparagraph (A), in each target group listed in Section 104360.

(2) Other programmatic activities directly targeted to students, and the number of students participating in each.

(3) The types of staff development or other tobacco-use-prevention training and, by staff classification, the number of staff members receiving the training.

(4) The number of parents receiving training and the types of training provided.

(5) The types of programs geared toward community involvement and the number of people served by each type.

(6) The types of services provided to target populations that are in addition to services provided to other students.

(7) The number and size of schools that are tobacco-free.

(8) The ways in which money appropriated for the purpose of this article has been spent, including the following categories: salaries, including, but limited to, personnel, and substitute teacher costs; benefits; travel; consultant services; operating expenses, including, but not limited to, curriculum and instructional materials, supplies, other; capital outlay; and indirect costs.

(e) (1) Each county office of education shall provide to the State Department of Education an annual report on district expenditures and services within its respective county pursuant to the common reporting format developed by the State Department of Education.

(2) The county shall provide an annual report of the information required in paragraph (8) of subdivision (d).

(f) (1) For the 1991–92 fiscal year and fiscal years thereafter, the State Department of Education shall report to the Legislature on local district expenditures and services statewide.

(2) The department shall make the report required by paragraph (1) on or before January 1 of each year.

104455. (a) The State Department of Education shall monitor and ensure implementation of district and county offices of education

tobacco-free policies and tobacco-use prevention education programs in districts receiving funding from the Cigarette and Tobacco Products Surtax Fund through procedures in the Coordinated Compliance Review Manual provided to school districts by the Superintendent of Public Education.

(b) The department shall develop and adopt yearly quantifiable targets for the reduction of tobacco use in those programs funded on a competitive grant basis for secondary school implementation.

104460. (a) Each school district receiving funds from the Cigarette and Tobacco Products Surtax Fund shall make all of the following services available to every pregnant minor and minor parent enrolled in the school district:

(1) Referral to perinatal and related support services.

(2) Outreach services and assessment of smoking status.

(3) Individualized counseling and advocacy services.

(4) Motivational messages.

(5) Cessation services, if appropriate.

(6) Incentives to maintain a healthy lifestyle.

(7) Followup assessment.

(8) Maintenance and relapse prevention services.

(b) Where appropriate, those services listed in subdivision (a) shall be integrated with existing programs for pregnant minors and minor parents.

(c) Each district plan submitted in application for funds under this article shall include a description of the availability of the services required by this section.

104465. (a) The department shall annually set aside three million dollars ($3,000,000) appropriated for the purposes of the competitive grants program established pursuant to this article in order to support efforts to link the statewide media campaign to local communities and to provide regional public and community relations or media initiatives.

(b) Local community initiatives may include, but are not limited to, all of the following:

(1) Encouraging volunteer efforts.

(2) Local media programming.

(3) Provision of assistance in, and facilitation of, public and community events.

(c) The efforts described in subdivision (b) shall be directed principally to the target communities described in Section 24161.5.

(d) Regular application procedures for competitive grants under this article shall apply to applications for grants under this section.

(e) Funds awarded pursuant to this section shall be awarded in the same manner as other competitive grants under this article.

104470. The State Department of Education shall make periodic reports to the committee regarding the status and funding of tobacco education programs funded under this article as required by the

committee. The reports shall include an overview of program and grant expenditures funded under this article.

104475. There is hereby created under the authority of the Controller the Tobacco Education Fund.

104480. All guidelines, criteria, standards, and requirements specified in this article are exempt from the requirements of Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code, and shall be implemented without being adopted as regulations.

104485. This article shall remain operative only until July 1, 1996, and shall remain in effect only until January 1, 1997, and as of that date is repealed, unless a later enacted statute, which is effective on or before January 1, 1997, deletes or extends that date.

Article 2. Cigarette and Tobacco Products Surtax Medical Research Program

104500. (a) (1) The Legislature finds that the efforts to reduce smoking in California have led to a drop in the consumption of tobacco. Although not on target to meet the goal of achieving a 75-percent reduction in tobacco consumption in California by the year 1999, the results are encouraging.

(2) The Legislature further finds that as a result of the success of the programs, the money received from the taxation of tobacco has been dropping. The Legislature declares this a sign of success, not a matter of concern.

(3) The Legislature further notes that programs, organizations, and individuals receiving money from the Cigarette and Tobacco Products Surtax Fund are receiving money from a declining revenue source. The Legislature finds that this success has led to an obvious concern and fear among recipients that ‘‘their money’’ is shrinking every year.

(4) The Legislature finds that, assuming the success of the antismoking efforts continue, there will be necessary reductions in spending in the years to come.

(5) The Legislature declares its intention to seek full analysis of all programs receiving money under Proposition 99 and declares its intention to critically evaluate how the money is being spent and whether the spending is achieving the results desired.

(6) The Legislature specifically rejects the notion that every dollar of expenditure made by every program, organization, or activity is of equal value. Instead, the Legislature declares its intention to choose between competing programs and to allocate moneys to those programs and activities that are most successful in meeting the goals of the initiative.

(b) It is the intent of the Legislature to provide for the continuation of the Cigarette and Tobacco Products Surtax Research

Program to support research into tobacco-related disease. It is the intent of the Legislature that this program be administered by the University of California and that this program be administered pursuant to the following principles:

(1) The research program established should adhere to the objectives stated in the provisions of the initiative act entitled Cigarette and Tobacco Products Surtax regarding research: ''The Research Account . . . shall only be available for tobacco-related disease research.''

(2) All research funds shall be awarded on the basis of scientific merit as determined by an open, competitive peer review process that assures objectivity, consistency, and high quality. All qualified investigators, regardless of institutional affiliation, shall have equal access and opportunity to compete for the funds in the Research Account.

(3) The peer review process for the selection of grants awarded under this program shall be modeled on that used by the National Institutes of Health in its grant-making process.

(4) Awardees shall be reimbursed for the full cost, both direct and indirect, of conducting the sponsored research consistent with federal guidelines governing all federal research grants and contracts.

104505. The Legislature hereby requests the University of California to continue to administer a comprehensive grant program to support research efforts related to the prevention, causes, and treatment of tobacco-related diseases. It is the intent of the Legislature that the program incorporate the principles and organizational elements specified in this article, including, but not limited to, a program office with a director and other necessary staff, a scientific advisory committee, and research review panels.

104510. For the purposes of this article:

(a) ''Grantee'' means any qualifying public, private, or nonprofit agency or individual including, but not limited to, colleges, universities, hospitals, laboratories, research institutions, local health departments, voluntary health agencies, health maintenance organizations, and individuals conducting research in California.

(b) ''Indirect costs'' includes such items as use allowance for research facilities, heating, lighting, library services, health and safety services, project administration, and building maintenance, as defined by federal cost accounting guidelines for federally sponsored research.

(c) ''Tobacco-related disease'' includes, but is not limited to, the following:

(1) Coronary heart disease.

(2) Cerebrovascular disease.

(3) Cancer, including cancers of the lung, larynx, esophagus, bladder, pancreas, and mouth. It is the intent of the Legislature that

the university further research the epidemiological link between smoking and breast cancer and prostate cancer.

(4) Chronic obstructive lung disease, including emphysema, chronic bronchitis, asthma, and related lung disorders.

(5) Other conditions or diseases that smoking or tobacco use has been established to be a risk factor for excess disability and illness.

(d) ''Tobacco-related disease research'' includes, but is not limited to, research in the fields of biomedical science, the social and behavioral sciences, public policy, epidemiology, and public health.

(e) ''Public policy research'' means research that investigates and evaluates various programs and strategies used by governmental, private, and nonprofit organizations to control tobacco use.

(f) ''University'' means the University of California.

104515. It is the intent of the Legislature that the university establish a scientific advisory committee to provide advice to the president of the university as to the direction, scope, and progress of the research program.

(a) Responsibilities of the committee may include, but are not limited to:

(1) Provision of advice on program priorities and emphasis.

(2) Provision of advice on overall program budget.

(3) Participation in periodic program evaluation.

(4) Assistance in developing guidelines to assure fairness, neutrality, and adherence to the principles of merit and quality in the conduct of the program.

(5) Assistance in developing appropriate linkages to nonacademic entities, including, but not limited to, voluntary organizations, health care delivery institutions, industry, government agencies, and public officials.

(b) Responsibilities of the committee may additionally include:

(1) Development of criteria and standards for grant awards.

(2) Development of administrative procedures relative to the solicitation, review, and award of grants to ensure an impartial, high quality peer review system.

(3) Development and supervision of research review panels.

(4) Review of research review panel reports and recommendations for grant awards.

(5) Development and oversight of mechanisms for the dissemination of research results.

(c) It is the intent of the Legislature that the committee consist of at least nine members representing a range of scientific expertise and experience appointed by the president of the university from nominations submitted by relevant organizations, as follows:

(1) Three members from voluntary health organizations dedicated to the reduction of tobacco use.

(2) One member with expertise in the field of biomedical research.

(3) One member with expertise in the field of behavioral or social research.

(4) One member from professional medical or health organizations.

(5) One member from an independent research university in California.

(6) One member drawn from other institutions engaged in research directed at tobacco-related diseases.

(7) One member representing tobacco control for the department.

(8) One member representing a community-based provider of health education and prevention services.

(d) Committee membership shall be drawn from the ranks of bona fide scientists and individuals fully conversant with the norms of scientific inquiry.

(e) Members shall serve at the pleasure of the President of the University of California. Membership may be staggered in such a way as to maintain a full committee while ensuring a reasonable degree of continuity of expertise and consistency of direction.

(f) Members shall serve without compensation, but may receive reimbursement for travel and other necessary expenses actually incurred in the performance of their official duties.

(g) The Legislature hereby declares that public policy research is an area of compelling interest because of its potential to determine the best methods for reducing tobacco use on a wide scale among Californians. The scientific advisory committee shall give a high priority to proposals for grant awards to fund public policy research.

104520. It is the intent of the Legislature that the university utilize peer review panels modeled upon the National Institutes of Health peer review process to review all research grants. The membership of these panels shall vary depending on the subject matter of proposals and review requirements, and shall draw on the most qualified individuals from appropriate institutions within and outside the State of California and from within and without the University of California system. The work of the peer review panels shall be administered pursuant to policies and procedures established by the scientific advisory committee. In order to avoid conflicts of interest and to ensure access to qualified reviewers, the university may utilize reviewers not only from California but also from outside the state. When serving on peer review panels, individuals who have submitted grant applications for funding by this program shall be governed by conflict-of-interest provisions consistent with the National Institutes of Health Manual, Chapter 4510 (item h).

104525. Research projects funded under this article may include, but are not limited to:

(a) Individual investigator-generated grants. These grants may be awarded to an institution on behalf of a principal investigator for a

discrete project related to the investigator's interests and competence.

(b) New investigator grants. These grants may be awarded to an institution to support the work of promising individuals in the initial stages of their research careers.

(c) Center grants. These grants may be awarded to institutions on behalf of a principal investigator and a group of collaborating investigators providing support for long-term multidisciplinary programs of research and development.

(d) Conference grants. These grants may be awarded for funding of conferences in California to coordinate, exchange, and disseminate information related to specific research efforts. These grants may fund honoraria and travel expenses for invited participants from outside California.

104530. It is the intent of the Legislature that the university, as lead agency, do all of the following:

(a) Provide overall direction and coordination of the program.

(b) Provide staff assistance to the advisory committee and review panels.

(c) Provide for periodic program evaluation, to assure that work funded is consistent with program goals.

(d) Maintain a system of financial reporting and accountability.

(e) Transmit programmatic as well as financial reports to the state, including an annual report on grants made, grants in progress, program accomplishments, and future program directions.

(f) Provide for the systematic dissemination of research results to the public and the health care community, and to provide for a mechanism to disseminate the most current research findings in the areas of smoking cessation and the prevention of tobacco use in order that these findings may be applied to the implementation of the Health Education Account.

(g) Develop policies and procedures to facilitate the translation of research results into commercial applications wherever appropriate.

(h) Undertake an outreach program to inform interested parties of the availability of grants for public policy research in the area of tobacco control.

104535. It is the intent of the Legislature that projects funded under this article be reimbursed for actual costs, including direct costs and indirect costs incurred by a research institution consistent with federal guidelines. Indirect cost rates shall not exceed those allowable by the federal government for federally sponsored research. With respect to those institutions that have not negotiated a federal indirect cost reimbursement rate, the university will request information to verify the indirect cost rates.

104540. It is the intent of the Legislature that no more than 5 percent of the Research Account be used for the purposes of the administration of this article.

104545. No provision of this article shall apply to the University of California unless the regents of the university, by resolution, make that provision so applicable.

104550. This article shall become inoperative on July 1, 1996, and, as of January 1, 1997, is repealed, unless a later enacted statute, which becomes effective on or before January 1, 1997, deletes or extends the dates on which it becomes inoperative and is repealed.

CHAPTER 2. NUTRITION

Article 1. California Nutrition Monitoring Development Act

104575. This article shall be known and may be cited as the ''California Nutrition Monitoring Development Act of 1986.''

104580. The Legislature declares that the purposes of this article are to determine the availability and types of nutrition monitoring information that is currently available in specified federal, state and local government programs and in selected private sector programs; to determine what additional information is needed to help legislators, state and local agencies and nongovernment users, to operate cost-effective services and to target funds where most needed; and to assess the feasibility of establishing a prototype state-local data system that will provide regular reports on the: nutritional status and nutrition related health problems of California's population, dietary intake and food consumption patterns, nutrition education information, including knowledge and attitude regarding nutrition, quality and healthfulness of the food supply, nutrition programs and service availability, including population served, service statistics, frequency and periodicals of data collection and types of reports, related socioeconomic factors, and on the state's ability to provide for food and nutrition services where needed.

104585. (a) The department shall assess the availability and adequacy of existing state and local food and nutrition data systems. All state departments and agencies that are required to provide data pursuant to this article are encouraged to participate to the fullest extent possible in all aspects of this program and to make their data available to counties upon request.

(b) The state departments from which existing data shall be provided for project purposes shall include the State Departments of Health Services, Aging, Education, and Social Services. Upon request of the department, these departments shall provide existing nutrition-related data collection forms, documentation, and reports, including, but not limited to, the following programs:

(1) In the Department of Aging: Congregate Nutrition Services, Home Delivered Nutrition Services, and the Brown Bag Network.

(2) In the State Department of Education: National School Lunch Program, the National School Breakfast Program, the Child Care Food Program, the Special Milk Program, the Nutrition Education and Training Program, and the various commodities programs.

(3) In the department: Special Supplemental Food Program for Women, Infants and Children (WIC), the Comprehensive Perinatal Care Program, the Genetics Disease Program, the Child Health and Disability Prevention Program, California Children's Services, County Health Services, Primary Health Services Development, Indian Health Program, Medical Care Services (Medi-Cal), Adult Health, and Vital Statistics.

(4) In the State Department of Social Services: the Food Stamp Program.

(c) The department may require any other state agency, department, board, or commission, with the exception of the University of California, to provide existing nutrition-related data, as described in this article. The department may request the University of California to provide this data in the case of the University of California Cooperative Extension Program, the Home Economics Program, and the Expanded Food and Nutrition Education Program. Additionally, other programs in local government and the private sector, such as local public health and social services departments, food banks, pantries, and meal programs, voluntary health organizations, and charitable social service agencies shall be encouraged to provide available nutrition monitoring information.

104590. (a) The department shall conduct a survey of state agencies and of counterpart local and private sector programs which now collect or use nutrition data or both. The department shall determine user needs for and applications of data, the adequacy of existing data systems, the costs compared to benefits of collecting this information, and recommendations about future data needs.

(b) The department shall assess the degree to which data is available to monitor the California Model Standards for Nutrition Services (guidelines for local health departments), the 1990 Nutrition Objectives for the Nation (national health priorities), the nutrition surveillance programs of the United States Centers for Disease Control (prenatal and pediatric surveillance and behavioral risk factors survey related to chronic diseases) and other similar public health objectives.

(c) The department shall outline a process for developing a prototype state-local nutrition monitoring system. The prototype system shall be scientifically sound and, insofar as is practicable, compatible with those employed by the United States Department of Agriculture, the United States Department of Health and Human Services, the National Public Health Reporting System, and recommendations by other recognized authorities. The department shall review existing or proposed systems such as the Statewide

Environmental and Evaluation Program System (SWEEPS) and the Nutrition Management Information and Surveillance System (Nutri-MISS) respectively for their applicability to this purpose.

104595. The department shall analyze the results of the California Nutrition Monitoring Development Act of 1986 in a report to the Governor and the Legislature. Where feasible and appropriate, other reports on nutritional status within the department shall be consolidated into one nutrition monitoring report. This report shall include all of the following components:

(a) The types of data to be collected and reported on shall include, but are not limited to, the data described in Section 104580 for purposes of carrying out this article.

(b) Based upon the findings of subdivision (a), the department shall identify those areas in which existing data is meeting user needs, areas in which users have identified deficiencies or inefficiencies, and areas in which data collection efforts are not occurring. The department shall recommend specifications for a suitable data system using microcomputer technology where feasible. The system shall involve state and local government agencies and the private sector.

(c) Using the data collected in subdivisions (a) and (b), the department shall identify options for providing data of the type and timeliness needed by local users.

(d) The department shall submit its report and recommendations to the Governor and the Legislature no later than January 1, 1988.

104600. The department, using applicable state procedures, may contract for any of the services required by this article, in which case the contractor or contractors shall have demonstrated expertise in the fields of nutrition monitoring and epidemiology, nutrition program operations, and community organization.

Article 2. ''5 A Day—For Better Health'' Program

104650. (a) The department shall establish and implement, to the extent funds are available pursuant to subdivision (d) which are other than state general funds, a ''5 A Day—For Better Health'' program for the purpose of promoting public awareness of the need to increase the consumption of fruits and vegetables as part of a low-fat, high-fiber diet in order to improve health and prevent major chronic diseases, including diet-related cancers.

(b) The department may promote the ''5 A Day—For Better Health'' program to the public through channels, including, but not limited to, print and electronic media, retail, grocers, schools, and other government programs. For purposes of this article, ''public'' includes, but is not limited to, the general adult population, adults with lower educational attainment, schoolage children and youth, and high-risk groups determined by the department.

(c) The department may, at its sole discretion, contract with qualified organizations for general or specialized services to implement this article, including personnel, marketing, public relations, research, evaluation, and administration.

(d) The department is encouraged to investigate all available funding sources, public and private, for the purposes of this article, including application for public and private grants.

104655. Notwithstanding any other provision of law, nothing shall operate to prohibit contributions to the program created pursuant to this article by organizations and commissions subject to Division 22 (commencing with Section 64001) of the Food and Agricultural Code.

CHAPTER 3. ORAL HEALTH

Article 1. General Provisions (Reserved)

Article 2. State Oral Health Program

104750. The department shall maintain a dental program including, but not limited to, the following:

(a) Development of comprehensive dental health plans within the framework of the State Plan for Health to maximize utilization of all resources.

(b) Provide the consultation necessary to coordinate federal, state, county, and city agency programs concerned with dental health.

(c) Encourage, support, and augment the efforts of city and county health departments in the implementation of a dental health component in their program plans.

(d) Provide evaluation of these programs in terms of preventive services.

(e) Provide consultation and program information to the health professions, health professional educational institutions, and volunteer agencies.

(f) For purposes of this article ''State Plan for Health'' means that comprehensive state plan for health being developed by the department pursuant to Public Law 89-749 (80 Stat. 1180).

104755. The director shall appoint a dentist licensed in the State of California to administer the dental program.

104760. Nothing in this article authorizes the department to compel dental examinations or services.

104765. The department shall have the power to receive for the dental program any financial aid granted by any private, federal, state, district, or local or other grant or source, and the division shall use such funds to carry out the provisions and purposes of this article.

Article 3. Dental Disease Prevention Programs

104770. The Legislature finds that 95 percent of all children in California have dental disease in the form of dental caries and periodontal disease. Dental disease in childhood can and does result in significant lifetime disability, dental pain, missing teeth, time lost from school and work, and the need for dentures. Poor nutrition in childhood is a major contributing factor in lifetime dental disability. The cost of treating the results of dental disease is close to two billion dollars ($2,000,000,000) per year in California, of which approximately one hundred million dollars ($100,000,000) is paid by the State of California for Denti-Cal treatment costs alone.

The Legislature also finds that dental disease in children and the resultant abnormalities in adults can be prevented by education and treatment programs for children. It is the intent of the Legislature in enacting this article to establish for children in preschool through sixth grade, and in classes for individuals with exceptional needs, preventive dental programs which shall be financed and have standards established at the state level and which shall be operated at the local level.

104775. A community dental disease prevention program may be offered to school children in preschool through sixth grade, and in classes for individuals with exceptional needs, by a local sponsor. A local sponsor may be a city or county health department, county office of education, superintendent of schools office, school district or other public or private nonprofit agency approved by the department. The program shall include, but not be limited to, the following:

(a) Educational programs, focused on development of personal practices by pupils, that promote dental health. Emphasis shall include, but not be limited to, causes and prevention of dental diseases, nutrition and dental health, and the need for regular dental examination with appropriate repair of existing defects.

(b) Preventive services including, but not limited to, ongoing plaque control and supervised application of topical prophylactic agents for caries prevention, in accordance with this article or other preventive agents approved by the department. Services shall not include dental restoration, orthodontics, or extraction of teeth. Any acts performed, or services provided, under this article constituting the practice of dentistry shall be performed or provided by, or be subject to the supervision of, a licensed dentist in accordance with Chapter 4 (commencing with Section 1600) of Division 2 of the Business and Professions Code.

104780. An advisory board, including representatives from education, dental professions, and parent groups shall be designated by the local sponsor to advise on dental health programs funded under this article. The use of existing advisory bodies is encouraged.

The board shall hold public meetings at least twice a year after appropriate notification in order that interested parties may provide input regarding the dental health needs of the community.

104785. The minimal standards of the community dental disease prevention program shall be determined by the department in accordance with the purposes of this article, and may be revised periodically as deemed necessary by the department to further the purposes of this article.

104790. The local health officer of each local health department interested in participating in the community dental disease prevention program, or his or her designee, in cooperation with the appropriate education personnel and the local advisory board, shall submit a proposal for the program to the department annually. The proposal shall include the methods by which the program will be implemented in each jurisdiction and program results reported. However, this function shall be the responsibility of the department for all counties that contract with the state for health services under Section 101300. These contract counties, at the option of the board of supervisors, may provide services pursuant to this article in the same manner as other county programs, provided the option is exercised six months prior to the beginning of each fiscal year.

If the local health officer elects not to submit a program proposal, the department may solicit program proposals from other public or private nonprofit agencies and contract directly with the agencies. These proposals shall meet the same requirements as specified for local health officers in this section.

104795. The department shall review the program proposals and approve programs that meet criteria established pursuant to Section 104785. The department shall, through contractual arrangements, reimburse local sponsors with approved programs at an amount of four dollars and fifty cents ($4.50) in fiscal year 1986–87, and each fiscal year thereafter, per participating child per year for administration and services, pursuant to Section 104775.

104800. The local health officer or other sponsor may utilize or contract with, or both utilize and contract with, other local public and private nonprofit agencies, as well as school districts and county superintendents of schools, in conducting the program. The Legislature recognizes that these agencies, districts, and schools are currently engaged in a limited number of dental disease prevention projects and it is the intent of the Legislature that this participation be continued.

104805. The State Department of Education shall assist the department in developing and evaluating educational programs in dental health and dental disease prevention. These programs may include, but are not limited to, teacher and program coordinator in-service workshops, development and review of appropriate

educational materials, and evaluation of classroom dental health education presentations.

104810. It shall be the responsibility of the governing board of each school district participating in the program and the governing authority of each private school participating in the program to cooperate with the local sponsor administering the community dental disease prevention program in carrying out the program in any school under their jurisdiction. Each participating school shall maintain participation records for each child and the necessary educational materials and supplies for plaque control and other required dental disease prevention methods provided by the program. Nothing in this article shall require participation by a public or private school in a program established pursuant to this article.

104815. No child shall receive a preventive agent as part of a program established pursuant to this article unless the child's parent or guardian has given written notice to the governing body of the public or private school that the child may receive a preventive agent.

104820. It is the intent of the Legislature that the program established by this article shall, in fiscal years subsequent to the fiscal year in which this section is enacted, be funded according to customary budget procedures.

104825. It is the intent of the Legislature that the program established by this article shall be placed in effect in the areas of greatest identified need as determined by the department, in cooperation with the State Department of Education.

Article 4. Topical Dental Decay Inhibitors

104830. Pupils of public and private elementary and secondary schools, except pupils of community colleges, shall be provided the opportunity to receive within the school year the topical application of fluoride or other decay-inhibiting agent to the teeth in the manner approved by the department. The program of topical application shall be under the general direction of a dentist licensed in the state and may include self-application.

104835. Treatment as specified in this article shall be evidenced by a written record made on a form prescribed by the department. A copy of the record shall be given to the parent or guardian of the child, or if the person receiving the treatment is an adult, the copy shall be given to him or her.

104840. The county health officer of each county shall organize and operate a program so that treatment is made available to all persons specified in Section 104830. He shall also determine how the cost of such a program is to be recovered. To the extent that the cost to the county is in excess of that sum recovered from persons treated,

the cost shall be paid by the county in the same manner as other expenses of the county are paid.

104845. The governing board of each school district and the governing authority of each private school shall cooperate with the county health officer in carrying out the program in any school under its jurisdiction. The governing board of any school district may use any funds, property, and personnel of the district for that purpose.

104850. Treatment shall be provided for a person only if the parent or guardian or responsible relative or adult who has assumed responsibility for his or her care and custody (in the case of a minor), or the person (if an adult), files with the governing board of the school district or the governing authority of the private school, as the case may be, a letter provided by the district or authority pursuant to Section 104855, stating that such treatment is desired.

104855. The governing board of each school district and the governing authority of each private school shall distribute to each pupil's parent or guardian or responsible relative or adult who has assumed responsibility for his or her care and custody (in the case of a minor), or the pupil (if an adult), a letter which may be returned to such district or authority in which the person to receive the letter may indicate that the treatment is desired and the pupil is to receive the treatment or that the pupil is not to receive the treatment for one of the following reasons: (i) the pupil has received the treatment from a dentist, or (ii) the treatment is not desired.

104860. The department shall adopt and enforce all regulations necessary to carry out this article.

104865. In enacting this article, it is the intent of the Legislature to provide a means for the eventual achievement of the topical application of fluoride or other decay-inhibiting agent to the teeth of all school pupils in this state. However, it is understood that this treatment is not a substitute for regular professional dental care. This article is designed to provide for the keeping of adequate records of treatment so that appropriate public agencies and the persons treated will be able to ascertain that a person has been so treated.

CHAPTER 4. DIETHYLSTILBESTEROL (DES)

104875. For purposes of identifying persons who have been exposed to the potential hazards of diethylstilbestrol while pregnant or prenatally and of educating the public concerning the findings and early detection of associated malignancies and other abnormalities, the department shall establish, promote, and maintain a public and professional information campaign on diethylstilbestrol. The campaign shall be conducted throughout the state and shall include, but not be limited to, a concerted effort at reaching those persons or the offspring of persons who have been exposed to diethylstilbestrol while pregnant or prenatally in order to encourage them to seek

medical care for screening, early detection, or treatment and follow-up of any diethylstilbestrol-related condition.

104880. The department shall identify at least one program for screening and follow-up care for each health service area for purposes of referral of persons exposed to diethylstilbestrol while pregnant or prenatally. The department shall consider the provider's compliance with state- and federally-mandated standards, the location in relation to the geographical distribution of persons exposed to diethylstilbestrol, and the capacity of the provider to properly screen for breast cancer, vaginal cancer, cervical cancer, vaginal adenosis, and any other malignancy and abnormal conditions resulting from exposure to diethylstilbestrol. The department shall designate existing facilities presently serving the diethylstilbestrol-exposed population as screening programs pursuant to this section. However, if existing facilities are not available, training for screening and follow-up may be offered to the personnel in existing facilities and clinics.

104885. The department may request and shall receive from any department, division, board, bureau, commission, or agency of the state or of any political subdivision thereof such assistance and data as will enable it to properly carry out its activities and effectuate the purposes set forth in this chapter. The department may also enter into any contract for services as it deems necessary with a private agency or concern upon such terms and conditions as it deems appropriate.

104890. The department shall present to the Legislature, on or before December 1, 1982, information on the diethylstilbestrol program.

104895. It is the intention of the Legislature in enacting this chapter that funding for this program in subsequent fiscal years be through the normal budgetary process.

PART 4. OLDER ADULTS

CHAPTER 1. AGING

104900. (a) The department shall provide appropriate flu vaccine to local governmental or private, nonprofit agencies at no charge in order that the agencies may provide the vaccine, at a minimal cost, at accessible locations in the order of priority first, for all persons 60 years of age or older in this state and then to any other high-risk groups identified by the United States Public Health Service. The department and the State Department of Aging shall prepare, publish, and disseminate information regarding the availability of the vaccine and the effectiveness of the vaccine in protecting the health of older persons.

(b) The department may provide appropriate pneumonia vaccine to local governmental or private, nonprofit agencies at no charge in order that the agencies may provide the vaccine, at a minimal cost, at accessible locations for groups identified as high risk by the United States Public Health Service.

(c) The program shall be designed to utilize voluntary assistance from public or private sectors in administering the vaccines. However, local governmental or private, nonprofit agencies may charge and retain a fee not exceeding two dollars ($2) per person to offset administrative operating costs.

(d) Except when the department determines that it is not feasible to utilize federal funds due to excessive administrative costs, the department shall seek and utilize available federal funds to the maximum extent possible for the cost of the vaccine, the cost of administering the vaccine and the minimal fee charged under this section, including reimbursement under the Medi-Cal program for persons eligible therefor to the extent permitted by federal law.

(e) Administration of the vaccine shall be performed either by a physician, a registered nurse, or a licensed vocational nurse acting within the scope of their professional practice acts. The physician under whose direction the registered nurse or a licensed vocational nurse is acting shall require the nurse to satisfactorily demonstrate familiarity with (1) contraindication for the administration of such immunizing agents, (2) treatment of possible anaphylactic reactions, and (3) the administration of treatment, and reactions to such immunizing agents.

(f) No private, nonprofit volunteer agency whose involvement with an immunization program governed by this section is limited to the provision of a clinic site or promotional and logistical support pursuant to subdivision (c), or any employee or member thereof, shall be liable for any injury caused by an act or omission in the administration of the vaccine or other immunizing agent to a person 60 years of age or older or to members of high-risk groups identified by the United States Public Health Service, if the immunization is performed pursuant to this section in conformity with applicable federal, state, or local governmental standards and the act or omission does not constitute willful misconduct or gross negligence. As used in this subdivision, ''injury'' includes the residual effects of the vaccine or other immunizing agent. It is the intent of the Legislature in adding this subdivision to affect only the liability of private, nonprofit volunteer agencies and their members that are not health facilities as defined in Section 1250.

(g) Nothing in this section shall be construed to require physical presence of a directing or supervising physician, or the examination by a physician of persons to be tested or immunized.

104905. The department shall provide staff and budgetary support for planning, evaluation, education, research design,

funding, and medical leadership for health promotion and preventive health services for older adults.

For purposes of this section, ‘‘older adults’’ means persons 55 years of age or older.

104910. The California Commission on Aging shall allocate 5 percent of community grant funds pursuant to Title III of the Older Americans Act of 1965, as amended, (P.L. 89-73; 79 Stat. 218) or forty thousand dollars ($40,000), whichever is the lesser amount, to experiment with the use of available mobile medical services units to provide outpatient medical care for the aging.

104915. The department shall maintain a program to promote availability of medical and health care for the aging. The department may contract with public or private organizations for conducting pilot projects designed to determine the most effective and most efficient methods of providing medical and health care services for the aging.

For purposes of this chapter, the term ‘‘aging’’ means persons who are eligible for old age benefits under the Social Security Act. Such program may include, but is not limited to:

(a) Technical and financial assistance to local agencies for pilot projects developing or testing new or innovative systems for assuring the availability of medical and health care for the aging. Pilot projects may include, but are not limited to:

(1) Mobile health clinics.

(2) Mobile health teams.

(3) Patient transportation systems.

(4) Patient surveillance and referral systems.

(b) Studies of the health and medical care of the aging of the state.

(c) Coordination with similar programs of the federal government, other states, and public or private organizations.

(d) Development of recommendations for improved systems of medical and health care.

(e) Collection and summarization of statistics describing needs for and effectiveness of various methods of providing health and medical care.

104920. It is the intent of the Legislature that the California Commission on Aging be the coordinating agency of all programs for the aging in this state, except those programs designated elsewhere by the Governor or Legislature. It is further the intent of the Legislature that the commission cooperate with the department to evaluate and further coordinate programs for outpatient medical services for the aging.

CHAPTER 2. PREVENTIVE HEALTH CARE FOR THE AGING
(Reserved)

CHAPTER 3. GERIATRICS PROGRAMS

105100. (a) The Legislature finds that approximately 12.9 percent of all Californians will be over 65 years of age by the year 2000. As the number of elderly and the amount spent for their health care have increased, serious problems have arisen regarding the availability, quality, and appropriateness of the health services received by the elderly.

The Legislature also finds that there is a need to increase knowledge with respect to the major diseases and disabilities affecting older adults, and to improve the quality of long-term care available to chronically ill and functionally impaired persons.

The Legislature recognizes the vital role that physicians and registered nurses play in the delivery of health care to the elderly and chronically ill. The Legislature also recognizes the desirability of a multidisciplinary approach to meeting the needs of those persons.

(b) The Legislature further recognizes the leadership role taken by the University of California in addressing the needs of the elderly. It is the intent of the Legislature to further encourage the gerontological pursuits of the University of California.

105105. It is the purpose of the Legislature, in enacting this chapter, to establish academic geriatric resource programs at the University of California medical or other health science campuses. A multidisciplinary approach shall be utilized in the development of these programs. The programs shall include, but not be limited to, one or more of the following elements:

(a) Preclinical, clinical, or postgraduate educational programs in geriatrics for health science students to instruct and train them in recognizing and responding to the needs and dynamics of the geriatric care of elderly patients.

(b) Provision of continuing education in geriatrics for health care providers and the general public.

(c) A teaching nursing home program to research nursing home health care practices and to instruct and train health science students about geriatric care.

105110. For purposes of this chapter, the following definitions apply:

(a) ''Academic geriatric resource program'' means a program which includes one of the elements specified in Section 105105.

(b) ''Nursing home'' means a licensed skilled nursing or licensed intermediate care facility, as defined by Section 1250.

(c) ''Teaching nursing home'' means a licensed skilled nursing or licensed intermediate care facility, as defined by Section 1250, which is owned or operated by, or affiliated with, a University of California

or private university campus with a medical or health sciences center, for the purpose of providing training, patient care, research, and community service.

105115. The Regents of the University of California shall be the agency with the responsibility for making grants for the Academic Geriatric Resource Program.

105120. Commencing January 1, 1986, on January 1 of each year, the Regents of the University of California shall submit a progress report to the Legislature regarding the grant programs established pursuant to the provisions of this chapter. The report shall include, but not be limited to, all of the following elements:

(a) A description of the progress made in implementing the programs.

(b) The number of academic geriatric resource programs established.

(c) The characteristics of the programs.

(d) The costs of the programs.

105125. No provision of this chapter shall be applicable to the University of California unless the Regents of the University of California, by resolution, make that provision applicable.

105130. The department shall seek any Medicaid waivers necessary to implement this chapter.

105135. (a) It is the intent of the Legislature that the Division of Licensing of the Medical Board of California strongly urge those organizations responsible for the development of physician licensing examinations to include within those examinations increased emphasis on medical problems of the elderly.

(b) The Medical Board of California shall report to the Legislature its initial findings regarding the intent declared in subdivision (a) by January 1, 1986, and shall submit a subsequent report on or before January 1, 1987.

105140. (a) In addition to the other programs provided under this chapter, it is the intent of the Legislature to encourage the Regents of the University of California to monitor existing physician licensing requirements, and any additional requirements developed in response to Section 105135. It is also the intent of the Legislature that the regents review programs and offerings in the schools of medicine to ensure that graduates of those schools are adequately prepared to meet the licensing requirements in geriatric medicine and any other educational requirements in geriatric medicine deemed appropriate by the regents.

(b) It is the intent of the Legislature that the regents request the medical and other health science schools of the University of California to consider the need for additional emphasis on geriatrics in their curricula. The regents are hereby requested to provide a status report on this need to the Governor and the Legislature by January 1, 1987.

PART 5. ENVIRONMENTAL AND OCCUPATIONAL EPIDEMIOLOGY

CHAPTER 1. OCCUPATIONAL HEALTH AND DISEASE CONTROL

105150. (a) Local health departments, as defined in Section 101185, shall provide services in occupational health to promote the health of employed persons, including educational, consultative, statistical, investigative, and other activities appropriate thereto.

(b) This section shall become operative on July 1, 1994.

CHAPTER 2. OCCUPATIONAL HEALTH AND DISEASE PREVENTION

Article 1. Occupational Health and Disease Prevention Program

105175. (a) The department shall, by no later than January 1, 1987, establish and thereafter maintain a program on occupational health and occupational disease prevention, including, but not limited to, the following:

(1) Investigations into the causes of morbidity and mortality from work-induced diseases.

(2) Development of recommendations for improved control of work-induced diseases.

(3) Maintenance of a thorough knowledge of the effects of industrial chemicals and work practices on the health of California workers.

(4) Provision of technical assistance in matters of occupational disease prevention and control to the Department of Industrial Relations and other governmental and nongovernmental agencies, organizations, and private individuals.

(5) Collection and summarization of statistics describing the causes and prevalence of work-induced diseases in California.

(b) The functions provided for in subdivision (a) are intended to implement within the department a continuing research and development capability and a repository of hazardous substances capability which will reinforce and strengthen the administration of the California Occupational Safety and Health Act of 1973, Part 1 (commencing with Section 6300) of Division 5 of the Labor Code, including the capability to recommend occupational health standards to the California Occupational Safety and Health Standards Board. Whenever the repository identifies data gaps for any chemical regulated by the California Occupational Safety and Health Act of 1973, the department shall notify the Division of Occupational Safety and Health of the Department of Industrial Relations of its finding.

(c) The department shall submit a report to the Legislature by January 1, 1988, reviewing the activities of the program described in each paragraph of subdivision (a).

(d) Upon the request of the department, and in furtherance of the goals of the occupational disease prevention program, employers shall provide to the department the results of monitoring data, both exposure and medical, which has been collected pursuant to Cal-OSHA standards and regulations.

(e) The state department shall have access without delay to any place of employment during regular working hours and at other reasonable times to conduct investigations necessary to carry out the purposes of this article and Article 2 (commencing with Section 105185), including, but not limited to, research, health hazard evaluation, and epidemiological surveillance. In connection with the investigation, the department may question privately any employer, owner, operator, agent, or employee and review and copy records collected pursuant to Cal-OSHA standards and regulations, and other related records.

(f) The repository maintained pursuant to this section and Section 147.2 of the Labor Code shall contain the report issued pursuant to Sections 13124 and 13125 of the Food and Agricultural Code. Whenever a request for toxicity information is received concerning a chemical discussed in that report, the department shall notify the requestor of the nature and extent of any data gaps identified in the report with respect to that chemical. Whenever the repository receives a request about toxicity information on any other chemical, in addition to providing available information about the known toxic effects of exposure to the chemical, the repository shall also notify the requester of a determination by any state agency or federal agency that the chronic health effects testing data on the chemical is inadequate or incomplete. State agencies that maintain information on the toxic effects of chemicals shall provide the repository with access to that information.

105180. In any situation where these activities may duplicate or overlap the activities of another state department or agency such as the Department of Industrial Relations or Division of Industrial Safety, the department shall avoid duplication.

Article 2. Occupational Lead Poisoning Prevention

105185. (a) The department shall establish and maintain an occupational lead poisoning prevention program, including, but not limited to, the following:

(1) Developing a system for monitoring laboratory reports of cases of adult lead toxicity, to create an occupational lead poisoning registry.

(2) Following up reported cases of occupational lead poisoning to ascertain the source of lead exposure.

(3) Conducting investigations in cases where take-home exposure may be occurring, where there is a likelihood of identifying

additional cases, or where a previously unidentified risk factor may be present.

(4) Conducting training of employers, employees, and health professionals regarding prevention of occupational lead poisoning.

(5) Making recommendations for the prevention of lead poisoning.

(b) In any situation where the activities specified in subdivision (a) may duplicate or overlap the activities of any other state department or agency, including the Department of Industrial Relations, the department shall coordinate with the other departments or agency and take actions to avoid program and service duplication.

(c) The department may adopt regulations to implement this section and Sections 105190 and 105195. Any regulations adopted shall be considered and adopted as emergency regulations in accordance with Section 11346.1 of the Government Code.

105190. (a) A fee shall be paid annually to the State Board of Equalization by employers in industries identified by the four-digit Standard Industrial Classification (S.I.C., 1987 Edition) established by the United States Department of Commerce and for which the State Board of Equalization has received information from the department of documented evidence of potential occupational lead poisoning.

(b) The department shall provide to the State Board of Equalization on or before the first day of November of each year, all information for the prior three-year period obtained by the California Blood Lead Registry, regarding evidence of potential occupational lead poisoning by the Standard Industrial Classification. Based on this information, the State Board of Equalization shall determine whether an employer is within Category A of the Standard Industrial Classification or within Category B of the Standard Industrial Classification and shall implement the fee schedule set forth in subdivision (c). For the purpose of this subdivision and subdivision (c), a Category A Standard Industrial Classification code is a Standard Industrial Classification code listed in Section 105195 for which there have been less than 20 persons with elevated blood lead levels reported to the California Blood Lead Registry in the prior three-year period. A Category B Standard Industrial Classification code is a Standard Industrial Classification code listed in Section 105195 for which there have been 20 or more persons with elevated blood lead levels reported to the California Blood Lead Registry in the prior three-year period. An elevated blood lead level is a level greater than or equal to 25 micrograms of lead per deciliter of blood.

(c) For employers with 10 or more employees, but less than 100 employees, in a Category A Standard Industrial Classification code, the annual fee shall be one hundred seventy-five dollars ($175). For

employers with 100 or more employees, but less than 500 employees, in a Category A Standard Industrial Classification code, the annual fee shall be three hundred fifty dollars ($350). For employers with 500 or more employees in a Category A Standard Industrial Classification code, the annual fee shall be eight hundred seventy-five dollars ($875). For employers with 10 or more employees, but less than 100 employees, in a Category B Standard Industrial Classification code, the annual fee shall be two hundred fifty dollars ($250). For employers with 100 or more employees, but less than 500 employees, in a Category B Standard Industrial Classification code, the annual fee shall be seven hundred dollars ($700). For employers with 500 or more employees in a Category B Standard Industrial Classification code, the annual fee shall be two thousand dollars ($2,000). For the purpose of this subdivision, an employer is any person defined in Section 25118 of the Health and Safety Code. Employers with fewer than 10 employees are not subject to any fees pursuant to this section.

(d) The annual fee imposed in subdivision (b) shall be adjusted annually by the State Board of Equalization to reflect increases or decreases in the cost of living during the prior fiscal year as measured by the Consumer Price Index issued by the United States Department of Labor or a successor agency of the federal government. This adjustment of fees shall not be subject to the requirements of Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code.

(e) In no event shall the annual fee exceed the cost of the program described in Section 105185. The department may exempt from payment of fees those employers who demonstrate that lead is not present in their places of employment. The cost of the program described in Section 105185 shall not exceed the amount of revenue collected from the annual fee.

(f) The fee imposed pursuant to subdivision (b) shall be paid by each employer which is identified in the schedule in accordance with Part 22 (commencing with Section 43001) of Division 2 of the Revenue and Taxation Code and shall be deposited in the Occupational Lead Poisoning Prevention Account of the General Fund, which is hereby created, to be expended for the purposes of the Occupational Lead Poisoning Prevention Program, including the cost of administering the fees by the State Board of Equalization, upon appropriation by the Legislature.

105195. (a) Sections 105185 and 105190 shall apply to the following industries:

(1) 1622 Bridges, tunnels, and elevated highways.
(2) 1721 Painting, paper hanging, and decorating.
(3) 1791 Structural steel erection.
(4) 1795 Wrecking and demolition work.
(5) 2759 Commercial printing.

(6) 2816 Inorganic pigments manufacture.
(7) 2819 Industrial inorganic chemicals.
(8) 2821 Plastics materials and resins.
(9) 2892 Explosives manufacture.
(10) 2899 Chemical preparations.
(11) 3069 Fabricated rubber products.
(12) 3087 Custom compounding of purchased plastics resins.
(13) 3089 Plastic products.
(14) 3229 Pressed and blown glass.
(15) 3231 Products of purchased glass.
(16) 3253 Ceramic walls and floor tiles.
(17) 3262 Vitreous china food utensils.
(18) 3269 Pottery products.
(19) 3313 Electrometalurgical products.
(20) 3331 Primary copper.
(21) 3339 Primary nonferrous metals, except copper and aluminum.
(22) 3341 Secondary nonferrous metals.
(23) 3356 Nonferrous rolling, drawing, extruding.
(24) 3363 Aluminum die castings.
(25) 3364 Nonferrous die castings.
(26) 3365 Aluminum foundries.
(27) 3366 Copper foundries.
(28) 3369 Nonferrous foundries.
(29) 3399 Primary metal products.
(30) 3411 Metal cans manufacture.
(31) 3431 Metal sanitary ware.
(32) 3432 Plumbing fittings and brass goods.
(33) 3441 Fabricated structural metal.
(34) 3484 Small arms.
(35) 3491 Industrial valves.
(36) 3492 Fluid power valves and hose fittings.
(37) 3494 Valves and pipe fittings.
(38) 3496 Miscellaneous fabricated wire products.
(39) 3497 Metal foil and leaf.
(40) 3585 Refrigeration and heating equipment.
(41) 3599 Machinery, except electrical.
(42) 3624 Carbon and graphite products.
(43) 3661 Telephone and telegraph apparatus.
(44) 3662 Radio and television communication equipment.
(45) 3663 Radio and television equipment.
(46) 3669 Communications equipment.
(47) 3674 Semiconductors and related devices.
(48) 3691 Storage batteries.
(49) 3692 Primary batteries, dry and wet.
(50) 3699 Electrical equipment and supplies.
(51) 3711 Motor vehicles and car bodies.

(52) 3714 Motor vehicle parts and accessories.
(53) 3721 Aircraft.
(54) 3953 Marking devices.
(55) 3812 Search and navigation equipment.
(56) 3829 Measuring and controlling devices.
(57) 5064 Electrical appliances, television, and radios.
(58) 5093 Scrap and waste materials.
(59) 7538 General automotive repair shops.
(60) 7539 Automotive repair shops.
(61) 7997 Membership sports and recreation clubs.
(62) 7999 Amusement and recreation.

(b) (1) If the department determines that the potential for occupational lead poisoning exists in industries not covered by this section, based on new evidence, the department shall have the authority to add Standard Industrial Classification codes by regulation. Multiple case reports of occupational lead toxicity shall be a criterion for adding Standard Industrial Classification codes covered by this section for the purpose of fee assessment.

(2) If the department determines that lead use and lead exposure no longer exist in an industry covered by this section, based on new evidence, the department shall delete the Standard Industrial Classification code or individual industries within a Standard Industrial Classification code by regulation. If the department otherwise determines that the potential for occupational lead poisoning no longer exists in an industry covered by this section, based on new evidence, the department shall have the authority to delete Standard Industrial Classification codes or individual industries with a Standard Industrial Classification code by regulation. If the department determines that lead use and lead exposure no longer exist in the operations of an employer in an industry covered by this section, based on evidence submitted by the employer, the department may waive the fee of that employer.

105197. (a) A program is hereby established within the department to meet the requirements of the Residential Lead-Based Paint Hazard Reduction Act of 1992 (42 U.S.C. Sec. 4851 and following) and Title X of the Housing and Community Development Act of 1992 (P.L. 102-550).

(b) The department shall implement and administer the program. The department shall have powers and authority consistent with the intent of, and shall promulgate regulations to establish the program as an authorized state program pursuant to, Title IV, Section 402 to 404, inclusive, of the Toxic Substances Control Act (15 U.S.C. Sec. 2601 and following).

(c) Regulations regarding accreditation of training providers that are promulgated pursuant to subdivision (b) shall include, but not be limited to, provisions governing accreditation of providers of health and safety training to employees who engage in or supervise

lead-related construction work as defined in Section 6716 of the Labor Code, and certification of employees who have successfully completed that training. Regulations regarding accreditation of training providers shall, as a condition of accreditation, require providers to offer training that meets the requirements of Section 6717 of the Labor Code. The department shall, not later than August 1, 1994, adopt regulations establishing fees for the accreditation of training providers, the certification of individuals, and the licensing of entities engaged in lead-related occupations. The fees imposed under this subdivision shall be established at levels not exceeding an amount sufficient to cover the costs of administering and enforcing the standards and regulations promulgated under this section. The fees established pursuant to this subdivision shall not be imposed on any state or local government or nonprofit training program.

(d) All regulations affecting the training of employees shall be adopted in consultation with the Division of Occupational Safety and Health. The regulations shall include provisions for allocating to the division an appropriate portion of funds to be expended for the program for the division's cost of enforcing compliance with training and certification requirements. The department shall adopt regulations to establish the program on or before August 1, 1994.

(e) The department shall review and amend its training, certification, and accreditation regulations promulgated under this section as is necessary to ensure continued eligibility for federal and state funding of lead-hazard reduction activities in the state.

CHAPTER 3. PESTICIDE POISONING

105200. Any physician and surgeon who knows, or has reasonable cause to believe, that a patient is suffering from pesticide poisoning or any disease or condition caused by a pesticide shall promptly report that fact to the local health officer by telephone within 24 hours and by a copy of the report required pursuant to subdivision (a) of Section 6409 of the Labor Code within seven days, except that the information which is available to the physician and surgeon is all that is required to be reported as long as reasonable efforts are made to obtain the information.

Each local health officer shall immediately notify the county agricultural commissioner and, at his or her discretion, shall immediately notify the Director of Environmental Health Hazard Assessment of each report received and shall report to the Director of Pesticide Regulation, the Director of Environmental Health Hazard Assessment, and the Director of Industrial Relations, on a form prescribed by the Director of Environmental Health Hazard Assessment, each case reported to him or her pursuant to this section within seven days after receipt of the report.

The Office of Environmental Health Hazard Assessment shall designate a phone number or numbers for use by local health officers in the immediate notification of the office of a pesticide poisoning report. The office shall from time to time establish criteria for use by the local health officers in determining whether the circumstances of a pesticide poisoning warrants the immediate notification of the office.

In no case shall the treatment administered for pesticide poisoning or a condition suspected as pesticide poisoning be deemed to be first aid treatment.

Any physician and surgeon who fails to comply with the reporting requirements of this section or any regulations adopted pursuant to this section shall be liable for a civil penalty of two hundred fifty dollars ($250). For the purposes of this section, failure to report a case of pesticide poisoning involving one or more employees in the same incident shall constitute a single violation. The Division of Occupational Safety and Health of the Department of Industrial Relations shall enforce these provisions by issuance of a citation and notice of civil penalty in a manner consistent with Section 6317 of the Labor Code. Any physician and surgeon who receives a citation and notice of civil penalty may appeal to the Occupational Safety and Health Appeals Board in a manner consistent with Section 6319 of the Labor Code.

Each local health officer shall maintain the ability to receive and investigate reports of pesticide poisoning at all times pursuant to Section 12982 of the Food and Agricultural Code.

105205. The Office of Environmental Health Hazard Assessment shall develop and implement, in cooperation with local health officers and state and local medical associations, a program of medical education to alert physicians and other health care professionals to the symptoms, diagnosis, treatment, and reporting of pesticide poisoning.

105210. After consultation with the county agricultural commissioner or the Director of Agriculture, the local health officer may, upon his determination that pesticide poisoning is serious and that an outbreak in pesticide poisoning or any disease or condition caused by pesticide poisoning has occurred in his county, request assistance by the state department. Upon such request, the director shall provide the local health officer with the necessary staff and technical assistance to conduct an epidemiologic investigation of the outbreak, and where appropriate, shall make recommendation to control or prevent such poisoning outbreaks.

105215. Any public employee, as defined in Section 811.4 of the Government Code, whose responsibilities include matters relating to health and safety, protection of the environment, or the use or transportation of any pesticide and who knows, or has reasonable cause to believe, that a pesticide has been spilled or otherwise

accidentally released, shall promptly notify the local health officer or the notification point specified in the local hazardous materials response plan, where such a plan has been approved by the State Office of Emergency Services and is in operation. The operator of the notification point shall immediately notify the local health officer of the pesticide spill report.

The local health officer shall immediately notify the county agricultural commissioner and, at his or her discretion, shall immediately notify the Director of Environmental Health Hazard Assessment of each report received. Within seven days after receipt of any report, the local health officer shall notify the Director of Pesticide Regulation, the Director of Environmental Health Hazard Assessment, and the Director of Industrial Relations, on a form prescribed by the Director of Environmental Health Hazard Assessment, of each case reported to him or her pursuant to this section.

The Office of Environmental Health Hazard Assessment shall designate a phone number or numbers for use by local health officers in the immediate notification of the office of a pesticide spill report. The office of shall from time to time establish criteria for use by the local health officers in determining whether the circumstances of a pesticide spill warrants the immediate notification of the office.

105220. The Director of Environmental Health Hazard Assessment shall maintain a file of all the reporting forms received from local health officers pursuant to Section 105215 at the repository of current data on toxic materials established pursuant to Section 147.2 of the Labor Code. The file shall be open to the public and shall be indexed at least to the extent of the following:

(a) The county of the accidental release.

(b) The type of pesticide involved.

105225. Each public employer of a public employee subject to Section 105215 shall post in one or more prominent places frequented by such employee a notice informing such employee of the responsibility imposed by Section 105215.

CHAPTER 4. RESIDENTIAL LEAD-BASED PAINT HAZARD REDUCTION

105250. (a) A program is hereby established within the department to meet the requirements of the Residential Lead-Based Paint Hazard Reduction Act of 1992 (42 U.S.C. Sec. 4851 and following) and Title X of the Housing and Community Development Act of 1992 (P.L. 102-550).

(b) The department shall implement and administer the program. The department shall have powers and authority consistent with the intent of, and shall adopt regulations to establish the program as an authorized state program pursuant to, Title IV, Section

402 to 404, inclusive, of the Toxic Substances Control Act (15 U.S.C. Sec. 2601 and following).

(c) Regulations regarding accreditation of training providers that are promulgated pursuant to subdivision (b) shall include, but not be limited to, provisions governing accreditation of providers of health and safety training to employees who engage in or supervise lead-related construction work as defined in Section 6716 of the Labor Code, certification of employees who have successfully completed that training. Regulations regarding accreditation of training providers shall, as a condition of accreditation, require providers to offer training that meets the requirements of Section 6717 of the Labor Code. The department shall, not later than August 1, 1994, adopt regulations establishing fees for the accreditation of training providers, the certification of individuals, and the licensing of entities engaged in lead-related occupations. The fees imposed under this subdivision shall be established at levels not exceeding an amount sufficient to cover the costs of administering and enforcing the standards and regulations promulgated under this section. The fees established pursuant to this subdivision shall not be imposed on any state or local government or nonprofit training program.

(d) All regulations affecting the training of employees shall be adopted in consultation with the Division of Occupational Safety and Health. The regulations shall include provisions for allocating to the division an appropriate portion of funds to be expended for the program for the division's cost of enforcing compliance with training and certification requirements. The department shall adopt regulations to establish the program on or before August 1, 1994.

(e) The department shall review and amend its training, certification, and accreditation regulations promulgated under this section as is necessary to ensure continued eligibility for federal and state funding of lead-hazard reduction activities in the state.

CHAPTER 5. CHILDHOOD LEAD POISONING PREVENTION

105275. This chapter shall be known, and may be cited as, the Childhood Lead Poisoning Prevention Act of 1991.

105280. For purposes of this chapter, the following definitions apply:

(a) ''Appropriate case management'' means health care referrals, environmental assessments, and educational activities, performed by the appropriate person, professional, or entity, necessary to reduce a child's exposure to lead and the consequences of the exposure, as determined by the United States Centers for Disease Control, or as determined by the department pursuant to Section 105300.

(b) ''Lead poisoning'' means the disease present when the concentration of lead in whole venous blood reaches or exceeds levels constituting a health risk, as specified in the most recent United

States Centers for Disease Control guidelines for lead poisoning as determined by the department, or when the concentration of lead in whole venous blood reaches or exceeds levels constituting a heath risk as determined by the department pursuant to Section 105300.

(c) ''Department'' means the State Department of Health Services.

(d) ''Health assessment'' has the same meaning as prescribed in Section 6800 of Title 17 of the California Code of Regulations.

(e) ''Screen'' means the medical procedure by which the concentration of lead in whole venous blood is measured.

(f) ''Health care'' means the identification, through evaluation and screening, if indicated, of lead poisoning, as well as any followup medical treatment necessary to reduce the elevated blood lead levels.

(g) ''Environmental lead contamination'' means the persistent presence of lead in the environment, in quantifiable amounts, that results in ongoing and chronic exposure to children.

105285. (a) After July 1, 1992, but on or before July 1, 1993, the department shall adopt regulations establishing a standard of care, at least as stringent as the most recent United States Centers for Disease Control screening guidelines, whereby all children shall be evaluated for risk of lead poisoning by health care providers during each child's periodic health assessment. The regulations shall be developed in consultation with medical experts, environmental experts, appropriate professional organizations, and the public, as determined by the department.

(b) The standard of care shall provide that, upon evaluation, those children determined to be ''at risk'' for lead poisoning, according to the regulations adopted pursuant to subdivision (a), shall be screened.

(c) The standard of care shall provide that no child shall be screened pursuant to this article if the parent or guardian of the child refuses to consent to the screening.

(d) The standard of care shall provide that health care providers shall be responsible only for evaluation of all children, for screening of children determined to be at risk, and for medically necessary followup services.

(e) The standard of care established pursuant to this section shall not become operative before April 1, 1993.

105290. On or after April 1, 1993, in those instances in which a child is identified with lead poisoning, the department shall ensure appropriate case management. The department may contract with any public or private entity, including local agencies, to conduct the case management.

105295. The department shall collect and analyze all information necessary to effectively monitor appropriate case management efforts. The department shall prepare a biennial report describing

the effectiveness of appropriate case management efforts. This report shall be made available to local health departments and the general public.

105300. Notwithstanding Section 124130, the department shall have broad regulatory authority to fully implement and effectuate the purposes of this chapter. The authority shall include, but is not limited to, the following:

(a) The development of protocols to be utilized in screening and the procedures for changing those protocols when more accurate or efficient technologies become available.

(b) The designation of laboratories which are qualified to analyze whole blood specimens for concentrations of lead and the monitoring of those laboratories for accuracy.

(c) The development of reporting procedures by laboratories.

(d) Reimbursement for state-sponsored services related to screening and appropriate case management.

(e) Establishment of lower concentrations of lead in whole blood than those specified by the United States Centers for Disease Control for the purpose of determining the existence of lead poisoning.

(f) Establishment of lower acceptable levels of the concentration of lead in whole blood than those specified by the United States Centers for Disease Control for the purpose of determining the need to provide appropriate case management for lead poisoning.

(g) Development of appropriate case management protocols.

(h) Notification to the child's parent or guardian of the results of blood lead testing and environmental assessment.

(i) The establishment of a periodicity schedule for evaluation for childhood lead poisoning.

105305. The program implemented pursuant to this chapter shall be fully supported from the fees collected pursuant to Section 105310. Notwithstanding the scope of activity mandated by this chapter, in no event shall this chapter be interpreted to require services necessitating expenditures in any fiscal year in excess of the fees, and earnings therefrom, collected pursuant to Section 105310. This chapter shall be implemented only to the extent fee revenues pursuant to Section 105310 are available for expenditure for purposes of this chapter.

105310. (a) There is hereby imposed a fee on manufacturers and other persons formerly, presently, or both formerly and presently engaged in the stream of commerce of lead or products containing lead, or who are otherwise responsible for identifiable sources of lead, which have significantly contributed historically, currently contribute, or both have significantly contributed historically and contribute currently to environmental lead contamination.

(b) After July 1, 1992, but on or before January 1, 1993, the department shall, by regulation, establish specific fees to be assessed on manufacturers and other parties formerly, presently, or both

formerly and presently engaged in the stream of commerce of lead or products containing lead, or who are otherwise responsible for identifiable sources of lead which, as determined by the department, have significantly contributed historically, currently contribute, or both have significantly contributed historically and contribute currently to environmental lead contamination.

To the maximum extent practicable, the fees shall be assessed on the basis of the following criteria:

(1) A person's past and present responsibility for environmental lead contamination.

(2) A person's ''market share'' responsibility for environmental lead contamination.

This section shall not apply to, and no fee shall be assessed upon, any retailer of lead or products containing lead.

(c) The fee shall be assessed and collected annually by the State Board of Equalization. The first payment of these fees shall be due on or before April 1, 1993. The annual fee assessment in subdivision (a) shall be adjusted by the department to reflect both of the following:

(1) The increase in the annual average of the California Consumers Price Index, as recorded by the California Department of Industrial Relations, for the most recent year available.

(2) The increase or decrease in the number of children in California who are receiving services pursuant to this article.

This adjustment of fees shall not be subject to the requirements of Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code.

(d) (1) No fee shall be assessed upon a person if that person can demonstrate, as determined by the department, that his or her industry did not contribute in any manner, as described in this section, to environmental lead contamination.

(2) No fee shall be assessed upon a party if that party demonstrates, as determined by the department, that the lead, or the product containing lead, with which it is currently, or was historically, associated does not currently, or did not historically, result in quantifiably persistent environmental lead contamination.

(e) The fee imposed pursuant to this section shall be administered and collected by the board of Equalization in accordance with Part 22 (commencing with Section 43001) of Division 2 of the Revenue and Taxation Code. The fees shall be deposited in the Childhood Lead Poisoning Prevention Fund, which is hereby created in the State Treasury. Moneys in the fund shall be expended for the purposes of this chapter, including the State Board of Equalization's costs of collection and administration of fees, upon appropriation by the Legislature. All interest earned on the moneys which have been deposited into the Childhood Lead Poisoning Prevention Fund shall be retained in that fund.

(f) The fees collected pursuant to this section and the earnings therefrom shall be used solely for the purposes of implementing this chapter. The department shall not collect fees pursuant to this section in excess of the amount reasonably anticipated by the department to fully implement this chapter. The department shall not spend more than it collects from the fees and the earnings in implementing this chapter. In no fiscal year shall the department collect more than sixteen million dollars ($16,000,000) in fees, as adjusted for inflation pursuant to subdivision (b).

(g) It is the intent of the Legislature, in subsequent legislation, to appropriate and deposit into the Childhood Lead Poisoning Prevention Fund the sum of one hundred twenty-eight thousand dollars ($128,000) from the General Fund on July 1, 1992, to the Controller for allocation as loans as follows:

(1) Seventy-eight thousand dollars ($78,000) to the department, for the purposes of adopting regulations to establish the fee schedule authorized by this section. The State Board of Equalization shall repay the amount of this appropriation, on or before June 30, 1993, with interest at the pooled money investment rate, from fees collected pursuant to this section.

(2) Fifty thousand dollars ($50,000) to the State Board of Equalization, for the purposes of implementing this section. The State Board of Equalization shall repay the amount of this appropriation on or before June 30, 1993, with interest at the pooled money investment rate, from fees collected pursuant to this section.

(h) Regulations adopted for fee assessment and collection pursuant to this section shall be exempt from review by the Office of Administrative Law.

CHAPTER 6. SAFER MEDICAL DEVICES

105325. The Legislature hereby finds and declares all of the following:

(a) More than 700,000 California health care workers and professionals, such as nurses, physicians and surgeons and housekeeping staff, daily put their lives at risk of infection from deadly, bloodborne diseases in order to provide health care for all Californians.

(b) Nationally, more than 1,000 health care personnel a year are infected with Hepatitis B, and 250 die of this disease.

(c) Approximately 30 cases of occupational exposure to HIV have been conclusively documented by the federal Centers for Disease Control.

(d) Studies estimate that it is likely that several hundred health care workers nationwide have been infected with HIV on the job.

(e) Some bloodborne diseases, including infection with HIV, can be prevented only through avoiding exposure to the pathogen.

(f) In 1989, the federal Occupational Safety and Health Administration estimated that health care personnel suffer 889,000 exposures to bloodborne diseases annually nationwide and that 790,000 of these exposures results from injuries from sharp instruments, including needle sticks.

(g) During a six-month period, more than 200 exposures of health care personnel to blood and other bodily fluids were documented at a single hospital, the Medical Center at the University of California, San Francisco.

(h) While most health care employers have implemented rigorous, universal infection control procedures, requiring gloving and other protective equipment, exposure to bloodborne diseases continues to be a major risk for health care workers.

(i) As the federal Occupational Safety and Health Administration has noted, gloving and other protective devices cannot prevent puncture injuries from needles and other sharp instruments.

(j) Medical devices, such as needles and intravenous tubing, are reviewed by the federal Food and Drug Administration for patient safety and efficacy but are not reviewed by any state or federal agency for worker safety.

(k) It is estimated that improved product design of medical devices, such as needles, syringes, connectors for intravenous tubes, and vacuum tubes used to draw blood could reduce injuries involving exposure to blood by as much as 85 percent.

105330. It is the intent of the Legislature in enacting this chapter to reduce exposure of health care personnel to deadly, bloodborne diseases by encouraging the development and use of medical devices that are designed to assure worker safety as well as the safety of patients and the efficacy of the device.

105335. (a) The program on occupational health and occupational disease prevention of the department shall do all of the following:

(1) In coordination with the Division of Occupational Safety and Health, review and analyze existing studies, data, and other information on safety-enhanced product design of medical devices that place health care workers at risk of exposure to bloodborne diseases including, but not limited to, syringes and intravenous tubing that have sharp points.

(2) Collect and evaluate information from health facilities that are using medical devices that have been redesigned to enhance worker safety.

(3) To the extent that funding is available, conduct demonstration projects to test the use of safety enhanced medical devices at health facilities that volunteer to participate in these projects.

(4) Report to the Legislature and the Department of Industrial Relations its findings regarding the use of safety-enhanced product design for medical devices. These findings shall include analysis and

recommendations regarding projected cost savings to health facilities, actual improvement in worker safety, and continued patient safety and efficacy.

(b) The duties required by this section shall be performed to the extent that the department obtains funds from private sources and the federal government.

CHAPTER 7. INDOOR ENVIRONMENTAL QUALITY

105400. The Legislature finds and declares that:

(a) The people of the State of California have a primary interest in the quality of the indoor environment in which they live.

(b) As people spend greater portions of time each day indoors, the environmental quality of our buildings becomes increasingly important.

(c) Changes in building design, materials, construction, and operation have resulted in significant changes in indoor environmental quality.

(d) Activities and use of chemical products, appliances, power equipment, wear and tear of structural decorative materials, thermal factors, and mechanical ventilation are degrading the indoor environment, thereby creating mounting dangers to the public health, safety, and welfare.

105405. (a) The department through its Indoor Air Quality Program shall develop nonbinding guidelines for the reduction of exposure to volatile organic compounds (VOC) from construction materials in newly constructed or remodeled office buildings. At a minimum, the department shall consider all of the following:

(1) The type of building to which the guidelines shall apply.

(2) The methodology for identifying indoor sources of VOC.

(3) The bake-out procedures prior to occupancy for newly constructed buildings.

(4) The procedures for VOC reduction during and after major remodeling of occupied buildings.

(5) The need to establish mandatory regulations rather than nonbinding guidelines for the procedures to reduce VOC exposure in newly constructed buildings and during the remodeling of buildings and, in addition, the need for regulation regarding the occupancy of a newly constructed building or a building undergoing remodeling where VOC reduction is to be a consideration.

(6) The need to establish an ad hoc group of building construction material manufacturers, builders, building owners and managers, organized labor, sheetmetal contractors, plumbing contractors, mechanical engineers, architects, and building inspectors to advise the department on procedures and costs related to implementing the proposed guidelines.

(b) The department shall develop and submit the nonbinding guidelines to the Legislature, and file copies with the Department of General Services and the State Building Standards Commission, by January 1, 1992.

(c) The guidelines developed by the department pursuant to this section shall be nonbinding and voluntary, and shall therefore, be exempt from the procedures for adoption of regulations, including the review and approval by the Office of Administrative Law, pursuant to Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of the Government Code.

105410. The Legislature, in view of the findings and declarations specified in Section 105400, declares that the public interest shall be safeguarded by a coordinated, coherent state effort to protect and enhance the indoor environmental quality in residences, public buildings, and offices in the state.

105415. For the purpose of this chapter, ''indoor environmental quality'' means the environment inside a residential dwelling, including a house or apartment, or inside a school, office, public building, or other facility to which the general public has access. The term ''indoor environmental quality'' shall not include industrial working environments.

105420. The department shall coordinate efforts to assess, protect, and enhance indoor environmental quality.

105425. The department shall conduct and promote the coordination of research, investigations, experiments, demonstrations, surveys, and studies relating to the causes, effects, extent, prevention, and control of indoor pollution.

105430. (a) If model construction standards and techniques for controlling radon levels within new buildings are developed by the United States Environmental Protection Agency, the State Department of Health Services may adopt the standards and incorporate them into any radon assessment and mitigation plan which may be completed by the department and which becomes operative after January 1, 1990, unless the Department of Housing and Community Development adopts radon mitigation building standards, in which case the State Department of Health Services shall adopt no standards other than the standards adopted by the Department of Housing and Community Development.

Any radon assessment and mitigation plan shall include appropriate measures designed to detect, avoid, or dissipate dangerous levels of radon gas at potential building sites or during construction of new residential buildings in areas affected by radon. Any of those measures shall be appropriately delineated so as to apply only to certain at-risk buildings and geographic areas, and the plan shall specify construction projects, building characteristics, and geographical areas to which the measures apply, to assure ease of compliance and consistency with the findings and assessment of the

United States Environmental Protection Agency regarding radon risks. The plan may include reasonable provisions for testing and detection of radon at potential building sites as well as measures to provide for the appropriate radon-dissipating ventilation and insulation of new residential construction consistent with prevailing techniques.

(b) If regulations are adopted by the department to implement any radon assessment and mitigation plan completed by the department after January 1, 1990, no city, county, or other governmental agency may issue a permit to construct any building subject to state department regulation to any applicant who does not first comply with testing or building standards which may be implemented pursuant to this section.

(c) Any building standards which may be adopted pursuant to this section shall become effective as provided by Section 17958.

(d) In developing regulations pursuant to this section, the state department shall consider the methods and techniques which can provide an adequate level of safety at the lowest cost in order to reduce the impact on housing prices.

(e) Subdivisions (a) to (d), inclusive, shall only become operative if federal funds are available to the department for the purposes specified in this section, as determined by the department.

PART 6. DISASTER PREPAREDNESS (Reserved)

SEC. 6. Division 104 (commencing with Section 106500) is added to the Health and Safety Code, to read:

DIVISION 104. ENVIRONMENTAL HEALTH

PART 1. ENVIRONMENTAL HEALTH PERSONNEL

CHAPTER 1. LEGISLATIVE INTENT (Reserved)

CHAPTER 2. PERSONNEL (Reserved)

CHAPTER 3. ADMINISTRATIVE

106500. (a) The chief and those inspectors of the Food and Drug Section as he or she may designate, are peace officers for the purpose only of carrying out the duties of their employment. The authority of the peace officer shall extend to any place in the state as to any public offense committed, or which there is reasonable cause to believe has been committed, within this state that is a violation of any provision of Division 8.5 (commencing with Section 22950) of the Business and Professions Code, Part 5 (commencing with Section 109875), or the Miscellaneous Food, Food Facility, and Hazardous

Substances Act (Section 27), or Chapter 4 (commencing with Section 41301) of Division 16 of the Food and Agricultural Code. This authority shall further extend to violations of any penal provision of this code, the Business and Professions Code, or the Penal Code, that are discovered in the course of and arise in connection with the employment of these officers.

(b) Any inspector of the Food and Drug Section shall have the authority, as a public officer, to arrest, without a warrant, any person who, in his or her presence, has violated, or as to whom there is probable cause to believe has violated, any provision of Part 5 (commencing with Section 109875) or the Miscellaneous Food, Food Facility, and Hazardous Substances Act (Section 27), or Chapter 4 (commencing with Section 41301) of Division 16 of the Food and Agricultural Code.

In any case in which an arrest authorized by this subdivision is made for an offense declared to be a misdemeanor, and the person arrested does not demand to be taken before a magistrate, the arresting inspector may, instead of taking the person before a magistrate, follow the procedure prescribed by Chapter 5C (commencing with Section 853.5) of Title 3 of Part 2 of the Penal Code. That chapter shall thereafter apply with reference to any proceeding based upon the issuance of a citation pursuant to this authority.

(c) There shall be no civil liability on the part of and no cause of action shall arise against any person, acting pursuant to subdivision (b) and within the scope of his or her authority, for false arrest or false imprisonment arising out of any arrest that is lawful or that the arresting inspector, at the time of the arrest, had reasonable cause to believe was lawful. No inspector shall be deemed an aggressor or lose his or her right to self-defense by the use of reasonable force to effect the arrest or to prevent escape or to overcome resistance.

(d) The chief and inspectors of the Food and Drug Section may serve all processes and notices throughout the state.

CHAPTER 4. PROFESSIONAL CERTIFICATION

Article 1. Registered Environmental Health Specialists

106600. It is the intent of the Legislature in adopting this article to safeguard the health, safety, and general welfare of the public by the registration of those environmental health professionals practicing as environmental health specialists who have completed an approved environmental health or science curriculum and who are qualified to work, or are working, within the scope of the field of environmental health as defined by this article.

In adopting this article, it is recognized that the field of environmental health is a dynamic field that is continually evolving

into new and complex areas of concern. This article recognizes the existence of overlapping functions with other professions carrying out specific activities that may include some aspects of the field of environmental health. The title of a person registered under this article shall be environmental health specialist. Use of the term ''sanitarian'' or ''registered sanitarian'' in statutes and regulations shall mean ''registered environmental health specialists.'' A valid registered sanitarian registration shall on January 1, 1989, be a valid registration as an environmental health specialist. The department shall provide a new certificate of registration to that effect.

106605. This article does not require registration of individuals, such as industrial hygienists, health physicists, safety engineers, civil engineers, land surveyors, other registered professional engineers, or others with overlapping functions. This article does not require registration of individuals performing duties described in subdivision (e) of Section 106615, unless those individuals represent themselves as registered environmental health specialists. It is not the intent of this article to require local health departments to employ only registered environmental health specialists, environmental health specialist trainees, or those qualified for registration in jobs involving those overlapping functions. It is the sole purpose of this article to safeguard the health, safety, and general welfare of the public from adverse environmental factors, to register those environmental health professionals practicing as environmental health specialists who have completed an approved environmental health or science curriculum, and are qualified to work, or are working, in the public or private sector in the field of environmental health within the scope of practice as defined in this article, and to protect the public from individuals performing as environmental health specialists without proper qualifications.

106610. The department may, upon recommendation of the Environmental Health Specialist Registration Committee appointed pursuant to Section 106675, adopt any regulations necessary to accomplish the purposes of this article.

106615. The words and phrases defined in this section shall have the following meaning, unless the context clearly indicates otherwise:

(a) ''Department'' means the State Department of Health Services.

(b) ''Committee'' means the Environmental Health Specialist Registration Committee.

(c) ''Registered environmental health specialist'' means an environmental health professional educated and trained within the field of environmental health who is registered in accordance with the provisions of this article. A registered environmental health specialist registered under this article also meets the requirements for registration as an environmental assessor pursuant to Section 25570.

(d) ‘‘Environmental health specialist trainee’’ means a person who possesses (1) a minimum of a bachelor’s degree, including 30 semester units of basic sciences, from a department approved educational institution or an educational institution of collegiate grade listed in the directory of accredited institutions of postsecondary education compiled by the American Council on Education, but who has not completed the specific coursework and experience requirements in the field of environmental health as required by Section 106660 for registration, and (2) who is engaged in an approved environmental health training plan.

(e) ‘‘Scope of practice in environmental health’’ means the practice of environmental health by registered environmental health specialists in the public and private sector within the meaning of this article and includes, but is not limited to, organization, management, education, enforcement, consultation, and emergency response for the purpose of prevention of environmental health hazards and the promotion and protection of the public health and the environment in the following areas: food protection; housing; institutional environmental health; land use; community noise control; recreational swimming areas and waters; electromagnetic radiation control; solid, liquid, and hazardous materials management; underground storage tank control; onsite septic systems; vector control; drinking water quality; water sanitation; emergency preparedness; and milk and dairy sanitation pursuant to Section 33113 of the Food and Agricultural Code. Activities of registered environmental health specialists shall be regulated by the department upon the recommendation of the committee.

(f) ‘‘Certificate of registration’’ means a signed document issued by the department as evidence of registration and qualification to practice as a registered environmental health specialist under this article. The certificate shall bear the designation ‘‘registered environmental health specialist’’ and shall show the name of the person, date of issue, registration number, and seal.

(g) ‘‘Experience requirement’’ means on-the-job training and experience, as stated in this article, that all environmental health specialist trainees shall complete prior to obtaining eligibility for the environmental health specialist examination.

(h) ‘‘Approved environmental health training plan’’ means a training program in an organization that plans to utilize environmental health specialist trainees and has on file with the department a copy of its training plan that conforms with the requirements of Section 106665, and that has been approved by the committee.

(i) ‘‘Director’’ means the director.

106620. Except for the design of onsite septic systems, nothing in this article shall authorize registered environmental health

specialists to design any of the fixed works defined in Section 6731 of the Business and Professions Code.

106625. The governing body of a local health department may employ on a full-time basis one or more registered environmental health specialists, each of whom shall be a registered environmental health specialist as provided for in this article for the purpose of the enforcement of statutes related to public health, and the regulations of the department, and any local ordinances of a local health department that relate to activities under subdivision (e) of Section 106615. However, any person who is known as an environmental health specialist trainee may be employed to work under the supervision of a registered environmental health specialist, until he or she is qualified by examination as provided under Section 106670, for a period which shall not exceed three years. Prior to employment, the trainee shall have a current evaluation letter from the department stating that the education qualifications specified in Section 106660 have been met.

106630. Any person may make an application to the department to be registered as an environmental health specialist. The department shall accept complete applications if accompanied by the required fees.

(a) Application submission, completion and notification.

(1) Receipt of an application for a certificate of registration as an environmental health specialist shall be deemed to be the date the application is date stamped by the department.

(2) An application for a certificate of registration as an environmental health specialist is considered complete when a completed application form supplied by the department, proof of successful passage of the registered environmental health specialist examination, as specified in Section 106670, and the initial biennial registration fee are received by the department.

(3) Written notification by the department to applicants shall be deemed to occur on the date the notifications are postmarked.

(b) Application review period.

The department shall notify the applicant in writing within 15 working days of receipt of an application for a certificate of registration as an environmental health specialist that the application is completed and accepted for filing, or that the application is deficient and what specific information, documentation, or fee, is required to complete the application.

(c) Application decision period.

The department, within three calendar days of filing of a completed application, shall reach a decision regarding the application for a certificate of registration as an environmental health specialist.

(d) The department shall issue certificates of registration to qualified applicants.

(e) Duplicate certificate/card of registration shall be issued to individuals who hold valid registration as an environmental health specialist upon payment of ten dollars ($10) for a duplicate certificate and five dollars ($5) for a duplicate registration card.

106635. The requirements for registration of environmental health specialists shall be a minimum of a bachelor's degree from a department approved educational institution or an educational institution of collegiate grade listed in the directory of accredited institutions of postsecondary education compiled by the American Council on Education, with coursework prescribed as follows:

	Basic Requirements	Experience	Training
I.	30 semester or 45 quarter basic science units including each of the following: General Chemistry Lecture and Laboratory General Physics Lecture and Laboratory or Organic Chemistry Lecture and Laboratory General Microbiology Lecture and Laboratory General Biological Science Lecture and Laboratory Calculus or College Algebra	18 months	600 hrs.
II.	45 semester or 68 quarter basic science units including the following: Three of the required science courses shall include a laboratory: General Chemistry Organic Chemistry General Physics General Microbiology General Biological Science Calculus or College Algebra	one year	450 hrs.
III.	30 semester or 45 quarter basic science units including each of the following: General Chemistry Lecture and Laboratory General Physics Lecture and Laboratory or Organic Chemistry Lecture and Laboratory General Microbiology Lecture and Laboratory General Biological Science Lecture and Laboratory	9 months	300 hrs.

	Calculus or College Algebra plus Three semester or four quarter unit courses in each of the following: Epidemiology Statistics Public Administration or Environmental Health Administration and; 10 semester or 15 quarter units in environmental health science, including one or more of the following: water quality, waste management, food and consumer protection, housing and institution sanitation, vector control, recreational health, air quality, milk and dairy products, occupational health, electromagnetic radiation, noise control, toxicology, soil science, or land use development.		
IV.	45 semester or 68 quarter basic science units including the following: Three of the following required science courses shall include a laboratory: General Chemistry Organic Chemistry General Physics General Microbiology General Biological Science Calculus or College Algebra plus Three semester or four quarter unit courses in each of the following: Epidemiology Statistics Public Administration or Environmental Health Administration and; 10 semester or 15 quarter units in Environmental Health Science, including one or more of the following:	6 months	200 hrs.

	water quality, waste management, food and consumer protection, housing and institution sanitation, vector control, recreational health, air quality, milk and dairy products, occupational health, electromagnetic radiation, noise control, toxicology, soil science, or land use development.		
V.	Possess a minimum of a bachelor's degree in environmental health from an institution approved by the committee, which includes: One year of lecture and laboratory coursework in each of the following: General Chemistry General Physics General Biological Science, and One semester course in: Calculus or College Algebra Organic Chemistry General Microbiology with Laboratory Public Administration or Environmental Health Administration Epidemiology Statistics Field Orientation Course in Environmental Health Fifteen semester units of environmental health science courses selected from: water quality, waste management, food and consumer protection, housing and institution sanitation, vector control, recreational health, air quality, milk and dairy products, occupational health, electromagnetic radiation, noise control, toxicology, soil science, or land use development.	None required	None required

All basic science coursework including mathematics shall be equal to that acceptable in an approved environmental health degree program.

106640. Educational institutions requesting approval of their environmental health degree program shall first submit their program to the committee for review. If the program meets the prescribed curricula in Section 106635 it shall be submitted to the department for approval.

106645. Those persons who meet the educational, experience, and training requirements of Section 106635 shall be eligible for admission to the examination for registration as an environmental health specialist.

106650. Any person who has applied for environmental health specialist registration, or who is enrolled in an approved environmental health science curriculum, or who is certified by his or her employer as serving as an environmental health specialist trainee in an approved environmental health program on or before December 31, 1988, shall be admitted to the written examination on the basis of the requirements existing on December 31, 1988.

106655. A person who possesses a minimum of a bachelor's degree from a department-approved educational institution or an educational institution of collegiate grade listed in the directory of accredited institutions of postsecondary education compiled by the American Council on Education and has been employed as a certified dairy inspector in the State of California for at least 24 months immediately prior to applying for admission to the environmental health specialist registration examination, shall be eligible for admission to the examination for registration as an environmental health specialist.

106660. Any person meeting the educational qualifications pursuant to Section 106635, but who does not meet the experience requirement of that section, may make application to the department on a form prescribed by the department for acceptance as an environmental health specialist trainee. The department shall accept complete applications if accompanied by the required fees.

106665. An approved environmental health training plan shall include program elements in the training, duration of training, and types of training.

(a) Program elements, duration of training, and experience are as follows:

(1) All environmental health specialist trainees, shall complete a basic training period in an approved program. The training period shall include training in at least six elements, with three of the elements selected from the following basic elements:

(A) Food protection.

(B) Solid or liquid waste management, or both.

(C) Water supply.

(D) Housing and institutions.

(E) Bathing places.

(F) Vector control.

(G) Hazardous materials management or underground tank program, or both.

The remaining three elements may include any other basic element or any of the following elements: air sanitation, safety and accident prevention, land development and use, disaster sanitation,

electromagnetic radiation, milk and dairy products, noise control, occupational health, and rabies and animal disease control.

(2) Training in each of three basic elements shall be not less than 20 percent of the total required training hours. Time spent in the remaining three elements shall be not less than 40 percent of the total required training hours. The employer shall designate the methods, elements, and types of training or experience for the remaining part of the time required for entrance to the registered environmental health specialist examination as specified in Section 106670. The specified training may be cumulative and scheduled at the discretion of the employing agency over this period.

(3) The training may be accomplished by assignments chosen by the employing agency and under the supervision of a registered environmental health specialist.

(4) For those environmental health specialist trainees requiring more than one year of experience, the additional experience will be in one or more elements of environmental health listed in this section and may be outside of a local environmental health program.

(5) Training and experience gained working for governmental or a nonprofit entity, or both, may be counted toward the first-year training experience requirement if the training and experience is determined by the department to be equivalent to what would be gained in a local environmental health jurisdiction.

(b) Types of training:

The training program shall be integrated into the environmental health specialist trainee's job assignment and shall include items (1) and (2) and may include items (3), (4), and (5):

(1) A minimum of 20 hours per month of field instruction with direct supervision by a registered environmental health specialist for the first six months of employment. (The total minimum requirement in this area shall be 150 hours.)

(2) Independent time with adequate supervision and guidance.

(3) Office training with pretesting and posttesting.

(4) Lectures.

(5) Adequate office time to review and study.

(c) Requirements for certification of training:

(1) Environmental health specialist trainees shall receive their training from the department or agency that has a training plan approved by the committee.

(2) A daily log for the certification of the environmental health specialist trainee shall be maintained by the Director of Environmental Health.

(A) A daily log covering elements and hours spent of all training shall be kept by the environmental health specialist trainees, and verified by the trainer or supervisor on a weekly basis.

(B) Short narrative reports or copies of the monthly schedule of the environmental health specialist trainee's training and progress

shall be submitted by the training coordinator to the director every month throughout the traineeship.

(C) The Director of Environmental Health shall review the trainee's records on a monthly basis and shall certify on a quarterly basis that the records of training are accurate.

(D) The Director of Environmental Health shall notify the department within 30 days of the date an environmental health specialist trainee is hired or terminated.

(E) Copies of the environmental health specialist trainee's log, as well as the narrative reports or copies of monthly schedules shall be retained in the personnel file of the environmental health specialist trainee for at least one year after the environmental health specialist trainee successfully completes the registered environmental health specialist examination.

(3) When an environmental health specialist trainee completes the training program, the Director of Environmental Health shall forward certification to the department. This certification shall include the program areas, length of time, dates for the areas of training and a statement that the environmental health specialist trainee followed the approved training plan.

(d) Those jurisdictions that cannot provide the required training elements within their jurisdictions shall initiate a program of training exchange with another jurisdiction having an approved training program.

106670. (a) On and after January 1, 1989, only persons who meet the educational and experience requirements as established under Section 106635 shall be eligible for admission to examination for registration as an environmental health specialist.

(b) The professional examination shall be prescribed by the department with the concurrence of the committee, and a passing score on the examination shall be required prior to registration.

(c) An applicant who twice fails to pass the written examination shall not be eligible to be reexamined a third time until at least one year has elapsed from the date of the second examination. An applicant who fails the third examination shall not be eligible to take the examination a fourth time until two years have elapsed from the date of the third examination. Thereafter, the examination may not be taken more frequently than once in two years. Reapplication shall be made by submitting a new application with the required fee.

106675. (a) An Environmental Health Specialist Registration Committee shall be appointed to advise and to make recommendations to the department with respect to, and to take other actions as described in this article for the establishment of rules and regulations necessary to ensure, the proper administration and enforcement of the registration of environmental health specialists whose duties in public health and environmental health require knowledge and skills in the physical, biological, and environmental

health sciences and whose performance of professional duties is necessary for the promotion of life, health, and well being of the public.

The members of the former Sanitarian Registration Certification Committee shall serve as members of the new committee until the expiration of their terms.

(b) The committee shall consist of the Chief of the Environmental Planning and Local Health Services Branch, department, or the designee of the chief, who shall serve as executive officer but who shall not vote, and the following 10 members who are residents of the state:

(1) Two members appointed by the director from the California Conference of Directors of Environmental Health who shall be environmental health specialists with at least two years' experience as directors of environmental health in this state.

(2) Three members appointed by the director, each of whom shall be a qualified, practicing environmental health specialist registered in California for a period of five or more years. For purposes of this subdivision:

(A) One member shall be employed in the public sector at the time of appointment.

(B) One member shall be employed in the private sector at the time of appointment.

(C) One member shall be from the California Environmental Health Association.

(3) One member appointed by the director from the California Conference of Local Health Officers.

(4) Two members appointed by the director from the environmental health faculty of those California universities and colleges with approved curricula leading to a degree in environmental health.

(5) Two public members who have not been engaged at any time within five years immediately preceding their appointment in pursuits that lie within the field of environmental health or the profession regulated by the committee of which they are members. The Senate Rules Committee shall appoint one public member and the Speaker of the Assembly shall appoint one public member.

106680. The terms of the members of the committee first appointed shall be determined by lot and shall expire as follows: two members on January 1, 1985; two members on January 1, 1986; three members on January 1, 1987; and three members on January 1, 1988. Thereafter, appointments shall be for a four-year term. Committee members may serve no more than two successive terms. Each member shall serve on the committee until the appointment and qualification of his or her successor or until one year shall have elapsed since the expiration of the term for which he or she was appointed, whichever occurs first. Vacancies occurring prior to the

expiration of the terms shall be filled by appointment for the unexpired term. The director, upon the recommendation of the committee by a two-thirds vote, may remove an appointee member for misconduct in office, incompetency, neglect of duty, or other sufficient cause after due notice and hearing.

106685. (a) The members of the committee shall, annually, in the month of April, elect from their number a chairperson and a secretary.

(b) The committee shall meet at least twice annually and at other times as it may determine to evaluate applications for registration as environmental health specialists, to review and update examinations, to prepare and recommend reports relative to the administration of this article, and to transact all other business as may be necessary to carry out the provisions of this article.

(c) The committee may hold informal hearings for denial, suspension, refusal to renew, and revocation of registrations for environmental health specialists as provided in Section 106715.

(d) The committee may hold informal hearings for the purpose of administrative items, make the necessary determinations in conjunction therewith, and issue recommendations to the department consistent with the findings. The department may designate the committee to appoint one or more of its members to serve as a hearing agent. The agent or representatives shall conduct hearings in the manner provided by law.

(e) Six members of the committee shall constitute a quorum and special meetings of the committee shall be called by the executive officer upon written request by two members of the committee.

(f) The members of the committee shall serve without compensation, but shall receive their actual and necessary expenses incurred in the performance of their duties on the committee. However, no funds shall be disbursed for those purposes without the prior approval of the department.

106690. (a) The committee shall keep a record of its proceedings.

(b) The department shall maintain a register of all applications for registration and retain examination papers and records pertaining thereto for a length of time to be determined by the department.

(c) The department shall maintain a current registry of all registered environmental health specialists and all environmental health specialist trainees in the state.

(d) Individuals registered under of this article are responsible for assuring that the department has a current mailing address for them.

106695. A registered environmental health specialist may maintain registration under a retired biennial registration provided the following requirements are met:

(a) Has been a working registered environmental health specialist in California for at least 10 years in an area covered in subdivision (e)

of Section 106615, unless receiving an on-the-job disability before the 10 years of service as a registered environmental health specialist has elapsed.

(b) Is at least 50 years old or collecting retirement benefits, or both.

(c) Not working in a job requiring registration as an environmental health specialist. A person who pays a retired biennial fee shall be registered only as an inactive retired registered environmental health specialist.

106700. (a) A nonreturnable fee, shall be paid by a person for each application for registration, application for examination, and biennial renewal.

(b) Fees shall not exceed the actual administrative costs of the program. Fees, except retired and penalty fees, shall be subject to Section 100425. The actual dollar figure charged shall be rounded to the nearest whole dollar amount. The biennial renewal fee-retired shall be twenty-five dollars ($25).

(c) The nonreturnable biennial renewal fee, shall be paid by each registered environmental health specialist on or before the first day of January of every second year, or on any other date that is determined by the department. Each registered environmental health specialist registered pursuant to this article, shall first pay the biennial fee at the time of initial registration to cover the calendar year in which registration is acquired and the following calendar year. Registrations not maintained as required by this subdivision are suspended and remain invalid during the period of suspension. Suspended registrations become revoked three years after the date of suspension. Notwithstanding the provisions of the Government Code, the executive officer shall revoke suspended registrations after three years from the date of suspension for nonpayment of fees.

(d) An additional penalty fee equal to 50 percent of the biennial renewal fee for each year of delinquency or portion thereof shall be paid by each person who fails to pay the fee required by subdivision (c) within 30 days of the established due date. All accumulated penalty fees shall be paid prior to any revalidation of registration.

(e) The department shall receive and account for all money received pursuant to this article and shall deposit it with the Treasurer who shall keep the money in a separate fund to be known as the ‘‘Registered Environmental Health Specialist Fund,’’ that fund is hereby created.

(f) Notwithstanding Section 13340 of the Government Code, funds collected pursuant to the provisions of this article are continuously appropriated without regard to fiscal year to pay expenses of the department to administer the provisions of this article.

(g) The following fees are hereby established and shall be annually adjusted as required by subdivision (b):

(1) Application fee — sixty-nine dollars ($69).
(2) Examination fee — sixty dollars ($60).
(3) Biennial renewal fee — active eighty-seven dollars ($87).

106705. The department upon recommendation of the committee, may, by regulation, establish the requirement and standards for continuing education for registered environmental health specialists. The standards shall be established in a manner to assure that a variety of forms of continuing education are available to registered environmental health specialists.

106710. A valid registration as an environmental health specialist under this article shall only be issued to a person who has:

(a) Met the applicable education and experience requirements.
(b) Successfully passed the examination for registration.
(c) Submitted a complete application in accordance with Section 106630.
(d) Paid the fees required in Section 106700.
(e) Not committed acts specified in subdivision (a) of Section 106715.

106715. (a) Notwithstanding any other provisions of this article, the department upon the recommendation of the committee may suspend, deny, refuse to renew, or revoke a registration certificate issued under the provisions of this article after sufficient notice and an opportunity for a hearing and upon findings that the registered environmental health specialist has:

(1) Knowingly made a false statement of fact required to be revealed in the application for registration.
(2) Been convicted of a crime, if the crime is related to the qualifications, functions, and duties of an environmental health specialist.
(3) Knowingly made a false statement of fact required to be revealed in an application for, or renewal of, registration.
(4) Committed an act of deceit, misrepresentation, violation of contract, fraud, negligence, professional incompetence, or unethical practice.

(b) The procedure to deny, suspend, refuse to renew, or revoke an environmental health specialist registration certificate pursuant to this section shall be as follows:

(1) All cases, complaints, or allegations charging a violation of this subdivision shall be made in writing and submitted to the department.
(2) The department shall make a preliminary investigation by:
(A) Obtaining copies of all pertinent written documents (laws, reports, contacts, and correspondence).
(B) Interviewing, in person or by telephone, of all individuals involved with the issue.
(3) The department shall compile the information into a confidential case document that includes:

(A) A description of the complaint.
(B) A chronology of events.
(C) Results of the interviews.
(D) Copies of the written documents.

(4) The case document shall be submitted to each member of the committee requesting their recommendation whether or not the information warrants further investigation and an informal hearing.

(5) The department shall review committee recommendations and the preliminary investigation findings and then decide whether to dismiss the complaint or proceed to an informal committee hearing. Dismissal of the charges shall be followed by a letter to both complainant and the registered environmental health specialist involved explaining the department's action.

(6) If the decision is made to proceed with an informal hearing, the department shall request the committee to appoint one or more hearing officers to hear the case.

(A) All parties shall be notified of the time and place of the hearing.

(B) An investigation of the issue may be made by an independent professional investigator if it is felt warranted by the department and the committee. The investigation results shall be submitted to the department, committee hearing officers, complainant, and respondent prior to the hearing.

(C) The informal hearing shall permit the right to be heard (with an attorney, if desired) and the proceedings recorded.

(D) Upon the finding that a violation of this section occurred, the following disciplinary ranges may be recommended to the department by committee:

(i) Knowingly made a false statement of fact required to be revealed in the application for registration.

(I) Maximum: Revocation.

(II) Minimum: Fifteen-day suspension. Range depends on whether or not the registration was falsely approved.

(ii) Been convicted of a crime, if the crime is related to the qualifications, functions, and duties of a registered environmental health specialist.

(I) Maximum: Deny, refuse to renew, or revocation of registration.

(II) Minimum: Ninety days actual suspension.

(iii) Knowingly made a false statement of fact required to be revealed in an application for, or renewal of registration.

(I) Maximum: Revocation.

(II) Minimum: Seven day actual suspension.

(iv) Committed an act of deceit, misrepresentation, violation of contract, fraud, negligence, professional incompetence, or unethical practice.

(I) Maximum: Revocation.

(II) Minimum: Ninety days suspension stayed for three years on the following conditions of probation.

—Forty-five days actual suspension.

—The respondent shall obey all laws and regulations related to the practice of environmental health.

(c) Department action to implement denial, suspension, refusal to renew, or revocation of registration under this chapter shall be in accordance with Chapter 5 (commencing with Section 11500) of Part 1 of Division 3 of Title 2 of the Government Code, and the department shall have all the powers granted by that chapter. In the event of conflict between that chapter and this article, Chapter 5 shall prevail.

106720. The department and the committee may use the following criteria to evaluate the potential for rehabilitation or actual rehabilitation of a person prior to denying, suspending, or revoking registration.

(a) The nature and severity of the act, crime, or violation under consideration as grounds for denial, suspension, or revocation.

(b) The time that has elapsed since commission of the act, crime, or violation.

(c) The extent to which the applicant has complied with any terms of parole, probation, restitution, or other sanctions imposed upon the applicant.

(d) Evidence of rehabilitation or lack of rehabilitation of the applicant.

106725. The department shall, upon application therefor and upon payment of the current application and biennial renewal fees, as determined by the department upon the recommendation of the committee by a two-thirds vote, not to exceed one hundred dollars ($100), issue a certificate of registration as an environmental health specialist to any person who holds a certificate of registration as a sanitarian or an environmental health specialist issued by the proper authority of any state or territory, or possession of the United States, if the requirements for the registration of sanitarians or environmental health specialists under which the certificate was issued are consistent with the provisions of this article and at the time the certificate was granted were at least as stringent as those specified in Section 106635.

106730. This article does not affect or replace any other requirements or qualifications imposed pursuant to state or federal law on persons involved in activities under subdivision (e) of Section 106615.

106735. Only a person who has qualified as a registered environmental health specialist and who holds a valid registration certificate issued in conformance with Section 106710 for use in this state shall have the right and privilege of using the title ‘‘registered environmental health specialist’’ and to use the abbreviation

‘‘R.E.H.S.’’ after the person’s name. Only a person who has qualified as a registered environmental health specialist trainee and has a letter of acceptance issued by the department shall have the right and privilege of using the title ‘‘registered environmental health specialist trainee.’’

Except as permitted in Section 106600 any use of the words ‘‘registered sanitarian’’ or other use of the words ‘‘registered environmental health specialist’’ to denote a working title is prohibited.

A person who violates any provision of this section is guilty of a misdemeanor and may be fined a sum not to exceed one thousand dollars ($1,000) or imprisoned for not more than 180 days, or both.

Article 2. Radon Specialists and Laboratories

106750. This article establishes requirements for the certification of radon measurement laboratories, radon testing and consulting specialists, and radon mitigation contractors.

106755. ‘‘Radon measurement laboratory’’ means a commercial laboratory that analyzes radon detectors or tests for radon or radon decay products. A radon measurement laboratory shall meet the provisions for certification of this article.

106760. ‘‘Radon testing and consulting specialist’’ means an individual person who performs radon or radon progeny measurements in buildings; who provides professional or expert advice on radon and radon progeny measurements, radon entry routes, and other radon related activities; and who is knowledgeable in the health risk associated from exposure to radon. A radon testing and consulting specialist shall meet the provisions for certification of this article.

106765. ‘‘Radon mitigation contractor’’ means an individual person, corporation, company, or other association that repairs or alters a building or design for the purpose, in whole or in part, of reducing the concentration of radon in the indoor atmosphere. A radon mitigation contractor or the operating supervisor of the radon mitigation contractor shall meet the provisions for certification of this article.

106770. ‘‘Department’’ means the State Department of Health Services.

106775. Except as provided in Section 106850, no person may test for, analyze, or mitigate against, the presence of radon in any building or on any building lot, design a radon mitigation system, purvey radon testing equipment or radon mitigation equipment to the general public, or represent or advertise that he or she may so test, mitigate, or purvey, unless that person has first applied for and obtained certification for the activity from the department pursuant

to this article, that certification has not expired or been revoked or suspended.

106780. A certification issued under this article is valid for not more than two years and shall expire on December 31 of the second calendar year after it is issued. The certification shall be issued in the form and manner determined by the department.

106785. An application for renewal of a radon certificate shall be filed not later than 90 days before the expiration of an existing certification.

106790. The application for certification, or renewal of certification, shall be submitted in writing on forms provided by the department.

106795. The application shall be accompanied with the following:

(a) A nonrefundable application fee in the amount provided in Section 106805.

(b) Written evidence that the applicant has the minimum qualifications as required by Sections 106815 to 106855, inclusive, to perform the activity for which certification is sought.

106800. Applications for more than one type of certification may be combined and submitted as one application, if all of the requirements for each type of certification provided in this article are met.

106805. The application fees for certification are nonrefundable and shall be in the following amounts:

(a) Radon Measurement Laboratory	$300
(b) Radon Testing and Consulting Specialist	$100
(c) Radon Mitigation Contractor	$200

These fees shall be deposited into the Radon Contractor Certification Fund, that is hereby created. The moneys in this fund are available, upon appropriation by the Legislature, to the department for the purposes of this article.

106810. The state may enter into a reciprocal agreement with any other state under which each state recognizes the other's radon certification program, if that other reciprocal state's program meets this state's basic requirements. Each reciprocal agreement shall be published in the quarterly bulletin published pursuant to Section 106840.

106815. An applicant for certification under this article shall meet the minimum qualifications in Sections 106815 to 106855, inclusive.

106820. A person shall not be certified or recertified as a radon testing and consulting specialist unless the applicant meets all of the following qualifications:

(a) The applicant submits written evidence of successful completion of a minimum of 16 hours of a classroom course of study

in radon measurement meeting the standards adopted by the department. The department shall adopt the guidelines for the classroom training course of the National Radon Measurement Proficiency Program of the federal Environmental Protection Agency as the standards for the classroom course of study pursuant to Section 106855.

(b) The applicant provides a quality assurance and quality control program meeting the standards adopted by the department. The department shall adopt the guidelines for the quality assurance and quality control program provided in the National Radon Measurement Proficiency Program of the federal Environmental Protection Agency as the standards for the quality assurance and quality control program pursuant to Section 106855.

(c) For renewal of certification, the applicant submits written evidence of successful participation in each radon proficiency program applicable to radon testing and consulting specialists offered by the federal Environmental Protection Agency since the date of the prior application for certification, or shows good cause for not participating in each of those programs in which the applicant did not participate.

106825. (a) A laboratory shall not be certified or recertified as a radon measurement laboratory unless the laboratory complies with the applicable requirements in Sections 106775 to 106805, inclusive.

(b) A radon measurement laboratory certification authorizes the laboratory to perform radon analysis utilizing only those types of devices for which it is certified.

(c) A laboratory shall not be certified or recertified as a radon measurement laboratory unless the applicant meets all of the following qualifications:

(1) The applicant submits written evidence of successful completion by an operating supervisor of the laboratory of a classroom course of study in radon measurement meeting the standards adopted by the department. The department shall adopt the guidelines for the classroom training course of the National Radon Measurement Proficiency Program of the federal Environmental Protection Agency as the standards for the classroom course of study pursuant to Section 106855.

(2) The laboratory provides (a) quality assurance and quality control program meeting the standards adopted by the department. The department shall adopt the guidelines for the quality assurance and quality control program provided in the National Radon Measurement Proficiency Program of the federal Environmental Protection Agency as the standards for the quality assurance and quality control program pursuant to Section 106855.

(3) For renewal of certification, the applicant submits written evidence of successful participation by the operating supervisor of the laboratory in each radon proficiency program applicable to

radiation measurement laboratories offered by the federal Environmental Protection Agency since the date of the prior application for certification, or shows good cause for not participating in each of those programs in which the applicant's operating supervisor did not participate.

106830. (a) A contractor shall not be certified as a radon mitigation contractor unless the applicant complies with the applicable requirements in Sections 106775 to 106805, inclusive.

(b) A contractor shall not be certified or recertified as a radon mitigation contractor unless the applicant meets all of the following qualifications:

(1) The applicant submits written evidence of successful completion of a radon contractors proficiency program meeting the standards adopted by the department. The department shall adopt the guidelines for the National Radon Contractors Proficiency Program of the federal Environmental Protection Agency as the standards for the radon contractors proficiency program pursuant to Section 106855.

(2) For renewal of certification, the applicant submits written evidence of successful participation in each radon proficiency program applicable to radon contractors offered by the federal Environmental Protection Agency offered since the date of prior application, or shows good cause for not participating in each of those programs in which the applicant's operating supervisor did not participate.

106835. An employee of the State of California or any employee of an agency of the United States working in the radon program, and who meets the experience and educational requirement for certification in any of the categories set forth in this article, shall be certified in that category. A certification under this section is valid only for purposes of that person's employment and shall not authorize the employee to perform any private consulting within the State of California.

106840. The department shall, on or before March 1, 1992, and quarterly thereafter publish, and work with associations representing certified radon testers and mitigators to widely disseminate, a list of persons and entities certified under this article, and, to the extent the information is available, the list of persons and entities of reciprocal states that are known to operate in this state.

106845. This article does not apply to a person in any of the following circumstances:

(a) The person is testing for, or mitigating radon in a building that the person owns or occupies.

(b) The person is designing or constructing mitigation measures to prevent against radon infiltration or accumulation in new construction.

(c) The person is performing scientific research regarding testing or mitigation of radon, but only if the person informs the owner and the occupant of the building of all of the following:

(1) That the person is not certified by the department to test for, or to mitigate against, radon.

(2) Any test results are neither certified or valid for legal purposes.

(3) Any mitigation methods suggested or used are experimental.

(d) The person or entity is purveying radon equipment that is approved by the department for sale to the general public that is manufactured or designed by a person or entity that is certified under this article, or the person or entity is purveying radon equipment to a person or entity that is certified under this article.

106850. A person or entity that is certified in another state, that has a reciprocal agreement with this state pursuant to Section 106810, may conduct those activities in this state for which the person or entity is certified in that other state.

106855. (a) The federal guidelines prescribed in this article shall become state standards unless the department finds the federal guidelines do not promote the intent and purposes of this article. Notwithstanding Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code, and except as provided in subdivision (b), a federal guideline that becomes a state standard pursuant to this article shall take effect in this state 30 days after it becomes effective as a federal guideline.

(b) Any person who will be adversely affected by adoption of the federal guideline in this state may, within the 30 days prior to its becoming effective as a standard in this state, file with the department, in writing, objections and a request for a hearing. The timely filing of substantial objections to the adoption of a federal guideline that has become effective as a state standard, stays the adoption of the federal guideline as a state standard in this state until the department conducts a hearing and decides the issue.

106860. The department may revoke or suspend a certification for any of the following reasons:

(a) Any misstatement in the application or in any supplementary statement.

(b) Any condition revealed by the application, supplementary statement, report, record, or other evidence, that would warrant the department's refusal to grant a registration on an original application.

(c) A violation of any law relating to, or failure to observe any of the applicable terms or provisions of, registration, or any other applicable rule, regulation, code, or order adopted pursuant to this section.

(d) Being discontinued or removed, or having the operating supervisor discontinued or removed, from the federal Environmental Protection Agency's Radon and Radon Progeny

Measurement Proficiency Program or its Radon Contractors Program during the term of the certification.

Article 3. Water Treatment Plant Operators

106875. The department shall, upon recommendation of the advisory committee established by Section 116925, certify persons as to their qualifications to supervise or operate water treatment plants, as defined by Section 116920. The certification shall indicate the classification of water treatment plant that the person is qualified to operate.

106880. After consulting with the advisory committee as to time and place, the state department shall hold at least one examination each year for the purpose of examining candidates for certification.

106885. All persons responsible for the operation of water treatment plants shall possess a certificate, as defined by Section 116910, of appropriate grade in accordance with the regulations referred to in Section 116950.

106890. It is the intent of the Legislature that the program authorized pursuant to this article and Chapter 6 (commencing with Section 116900) of Part 12 be entirely self-supporting, and for this purpose the board is authorized to establish fee schedules for the issuance and renewal of certificates that shall provide revenues that shall not exceed the amount necessary, but shall be sufficient, to recover all costs incurred in the administration of this article and Chapter 6 (commencing with Section 116900) of Part 12.

106895. A person employed as a water treatment plant operator, as defined by Section 116915, on the effective date of this article and Chapter 6 (commencing with Section 116900) of Part 12 shall be issued an appropriate certificate provided that he or she gives evidence of competence, training, education, experience, or a combination of the qualifications acceptable to the director as prescribed by the regulations referred to in Section 116950.

106900. The director, with the approval of the advisory committee, shall establish the criteria and standards for education and training of existing and prospective water treatment plant operators and shall provide the criteria and standards for use in statewide technical education and training programs.

106905. All preentry and postentry educational programs shall be tailored to the needs of all segments of the population without respect to race, color, or creed.

106910. The department, with the approval of the advisory committee, shall establish and publish criteria to classify the type of water treatment plants with regard to plant size, character of water and required degree of treatment, and other physical conditions affecting treatment plants. The department, with the approval of the advisory committee, shall establish the level of skill, knowledge, and

experience necessary to supervise or operate successfully water treatment facilities to protect the public health.

Article 4. Vector Control Technicians

106925. (a) Except as otherwise provided in subdivision (b) or (h), every government agency employee who handles, applies, or supervises the use of any pesticide for public health purposes, shall be certified by the department as a vector control technician in at least one of the following categories commensurate with assigned duties, as follows:

(1) Mosquito control.

(2) Terrestrial invertebrate vector control.

(3) Vertebrate vector control.

(b) The department may establish, by regulation, exemptions from the requirements of this section that are deemed reasonably necessary to further the purposes of this section.

(c) The department shall establish by regulation minimum standards for continuing education for any government agency employee certified under Section 116110 and regulations adopted pursuant thereto, who handles, applies, or supervises the use of any pesticide for public health purposes.

(d) An official record of the completed continuing education units shall be maintained by the department. If a certified technician fails to meet the requirements set forth under subdivision (c), the department shall suspend the technician's certificate or certificates and immediately notify the technician and the employing agency. The department shall establish by regulation procedures for reinstating a suspended certificate.

(e) The department shall charge and collect a nonreturnable renewal fee of twenty-five dollars ($25) to be paid by each continuing education certificant on or before the first day of July, or on any other date that is determined by the department. Each person employed in a position on September 20, 1988, that requires certification shall first pay the annual fee the first day of the first July following that date. All new certificants shall first pay the annual fee the first day of the first July following their certification.

(f) The department shall collect and account for all money received pursuant to this section and shall deposit it in the Mosquitoborne Disease Surveillance Account provided for in Section 25852 of the Government Code. Notwithstanding Section 25852 of the Government Code, fees deposited in the Mosquitoborne Disease Surveillance Account pursuant to this section shall be available for expenditure upon appropriation by the Legislature to implement this section.

(g) Fees collected pursuant to this section shall be subject to the annual fee increase provisions of Section 100425.

(h) Employees of the Department of Food and Agriculture and county agriculture departments holding, or working under the supervision of an employee holding, a valid Qualified Applicator Certificate in Health Related Pest Control issued by the licensing and certification program of the Department of Food and Agriculture shall be exempt from this section.

Article 5. Radiological Technologists

106950. Every person charged with the performance of any duty under the laws of this State relating to the preservation of the public health, who wilfully neglects or refuses to perform the same, is guilty of a misdemeanor.

106955. No person shall operate or maintain any X-ray fluoroscope, or other equipment or apparatus employing roentgen rays, in the fitting of shoes or other footwear or in the viewing of bones in the feet. This section shall not apply to any licensed physician and surgeon, podiatrist, chiropractor, or any person practicing a licensed healing art, or any technician working under the direct and immediate supervision of those persons. Any person violating this section shall be guilty of a misdemeanor.

106960. It shall be unlawful for any person to implant foreign materials within the scalp of any other person for the purpose of preventing or alleviating baldness. ''Foreign materials'' shall include, but shall not be limited to, synthetic fibers and strands of human hair from another person. A violation of this section shall be a misdemeanor.

This section shall not be applicable to procedures for the transplantation of a person's own hair or to procedures for the fixation of hairpieces, toupees, or wigs.

106965. (a) It shall be unlawful for any person to administer or use diagnostic or therapeutic X-ray on human beings in this state after July 1, 1971, unless that person has been certified or granted a permit pursuant to subdivision (b) or (c) of Section 114870 or pursuant to Section 114885, is acting within the scope of that certification or permit, and is acting under the supervision of a licentiate of the healing arts.

(b) On and after July 15, 1993, it shall be unlawful for any person to perform mammography in this state unless that person has a current and valid certificate in mammographic radiologic technology issued pursuant to subdivision (b) of Section 114870, is acting within the scope of that certificate, and is acting under the supervision of a licentiate of the healing arts. Nothing in this article shall be construed as authorizing a person licensed under the Chiropractic Initiative Act to administer, use, or supervise the use of mammographic X-ray equipment.

106970. It shall be unlawful for any person to direct, order, assist, or abet a violation of Section 106965.

106975. Section 106965 shall not apply to any of the following persons:

(a) Licentiates of the healing arts.

(b) Students in an approved school for radiologic technologists and in schools of medicine, podiatry or chiropractic when the students are operating X-ray machines under the supervision of an instructor who is a certified radiologic technologist or a certified supervisor or operator; and students of dentistry, dental hygiene and dental assisting when the students are operating X-ray machines under the supervision of an instructor who is a licensed dentist.

(c) Any person employed by an agency of the government of the United States while performing the duties of employment.

(d) Persons temporarily exempted pursuant to Section 107020.

(e) A licensed dentist; or person who, under the supervision of a licensed dentist, operates only dental radiographic equipment for the sole purpose of oral radiography. This exemption applies only to those persons who have complied with the requirements of Section 1656 of the Business and Professions Code.

(f) A person who has been certified or granted a limited permit pursuant to subdivision (b) or (c) of Section 114870 and who performs dental radiography in a dental X-ray laboratory upon the written order of a licensed dentist.

106980. Certification in radiologic technology pursuant to subdivision (b) or (c) of Section 114870 shall not authorize any of the following:

(a) The use of diagnostic, mammographic, or therapeutic X-ray equipment except under the supervision of a certified supervisor or operator.

(b) The interpretation of any radiograph or a diagnosis based upon it.

(c) The reporting of any diagnosis to a patient except as ordered by a licentiate of the healing arts.

(d) The use of any title or designation indicating or implying the right to practice any of the healing arts.

106985. (a) Notwithstanding Section 2052 of the Business and Professions Code or any other provision of law, a radiologic technologist certified pursuant to the Radiologic Tecnology Act (Section 27) may, under the direct supervision of a licensed physician and surgeon, assist a licensed physician and surgeon in completing an injection to administer contrast materials, manually or by utilizing a mechanical injector, after the performance of venipuncture or arterial puncture by a person authorized to perform those tasks.

(b) Nothing in this section shall be construed to grant radiologic technologists the authority to perform venipuncture or arterial puncture, or to administer contrast materials.

(c) ‘‘Direct supervision,’’ for purposes of this section, means the direction of procedures authorized by this section by a licensed physician and surgeon who shall be physically present in the room during the performance of the procedures and actually observing the procedures.

106990. A radiologic technologist certified pursuant to subdivision (b) of Section 114870 may use the title, certified radiologic technologist (CRT). No other person shall use the designation. The department may prescribe appropriate titles for use by categories of persons granted permits pursuant to subdivision (c) of Section 114870 and may limit the use of the titles.

106995. The department shall prescribe minimum qualifications for granting of permits and certificates in radiologic technology in any classification, as well as continuing education requirements for holders of these permits and certificates in order to protect the public health and safety.

107000. Except as provided in Sections 107035, 107040, or 25685, and in addition to the requirements as may be prescribed pursuant to Section 106995, each applicant for certification as a radiologic technologist pursuant to subdivision (b) of Section 114870 shall submit evidence satisfactory to the department that he or she has satisfactorily completed a course in an approved school for radiologic technologists, or has completed a course of study and training in radiologic technology that in the opinion of the department is equivalent to the minimum requirements of a course in an approved school for radiologic technologists.

107005. Except as provided in Section 107035, in order to be certified as a radiologic technologist pursuant to subdivision (b) of Section 114870, an applicant shall pass a written examination approved by the department and administered by the department or by the other agency or organization designated by the department.

107010. The department may accept in lieu of its own examination a certificate of another agency or organization that certifies radiologic technologists, provided the certificate was issued on the basis of qualifications and an examination deemed by the department to be reasonably equivalent to the standards established by the department.

107015. The department shall certify as a radiologic technologist any applicant who meets the requirements of the Radiologic Technology Act (Section 27).

107020. The department may issue a permit authorizing the temporary practice of radiologic technology to any applicant for certification who has complied with the experience and education requirements of Section 107000, 107035, 107040, or 25685, and is awaiting examination. A permit shall convey the same rights as a certificate for the period for which it is issued in the classification for

the applicant is eligible, and shall be valid until 90 days after the date of the next examination held pursuant to Section 107025, except that if the applicant does not take the examination the permit shall expire on the date of the examination.

107025. The department shall hold at least one examination each year, for applicants for certification, at the times and places as the department may determine.

107030. Not less than two months prior to the date of each examination, the department shall cause a notice thereof to be published in two or more newspapers of general circulation, and at least one radiologic technologist magazine, all of which are published within the state.

107035. Any officer, employee, or designated agent of the department may enter at all reasonable times upon any private or public property for the purpose of inspecting and determining whether or not there is compliance with or violation of the Radiologic Technology Act (Section 27), or of the regulations adopted pursuant thereto, and the owner, occupant, or person in charge of the property shall permit the entry and inspection.

107040. Whenever, in the judgment of the department, any person has engaged in or is about to engage in any acts or practices that constitute or will constitute a violation of any provision of the Radiologic Technology Act (Section 27), or any rule, regulation, or order issued thereunder, and at the request of the department, the Attorney General may make application to the superior court for an order enjoining this acts or practices, or for an order directing compliance, and upon a showing by the department that the person has engaged in or is about to engage in any acts or practices, a temporary or permanent injunction, restraining order, or other order may be granted.

107045. (a) The department shall approve schools for radiologic technologists that, in the judgment of the department, will provide instruction adequate to prepare individuals to meet requirements for certification as radiologic technologists under the Radiologic Technology Act (Section 27).

(b) The department shall provide for reasonable standards for approved schools, for procedures for obtaining and maintaining approval, and for revocation of approval where standards are not maintained.

107050. When approving a school for radiologic technologists, the department may take into consideration accreditation, approval, or certification of the school by other agencies or organizations if the department finds that accreditation, approval, or certification was granted on the basis of standards that will afford the same protection to the public as the standards provided by the Radiologic Technology Act (Section 27) or the regulations adopted pursuant thereto.

107055. The department may inspect schools for radiologic technologists prior to approval and at other times as it deems necessary to determine that the purposes of the Radiologic Technology Act (Section 27) are being met, and may require any reports from schools as it deems necessary to carry out the purposes of the Radiologic Technology Act (Section 27).

107060. The department may enter into an agreement with another state agency to perform all or part of the functions necessary in order to approve and maintain approval of schools for radiologic technologists.

107065. Every holder of a certificate or a permit issued pursuant to the Radiologic Tecnology Act (Section 27) may be disciplined as provided in Sections 107065 and 107670. The proceedings under Sections 107065 and 107670 shall be conducted in accordance with Chapter 5 (commencing with Section 11500) of Part 1 of Division 3 of Title 2 of the Government Code, and the department shall have all of the powers granted therein.

107070. Certificates and permits may be denied, revoked, or suspended by the department, for any of the following reasons:

(a) Habitual intemperance in the use of any alcoholic beverages, narcotics, or stimulants to the extent as to incapacitate for the performance of professional duties.

(b) Incompetence or gross negligence in performing radiologic technology functions.

(c) Conviction of practicing one of the healing arts without a license in violation of Chapter 5 (commencing with Section 2000) of Division 2 of the Business and Professions Code.

(d) Procuring a certificate or permit by fraud, or misrepresentation, or because of mistake.

(e) Use of a designation implying certification as a radiologic technologist by one not so certified.

(f) Nonpayment of fees prescribed in accordance with Section 107080.

(g) Violation of Section 106965 or 106980 or any other provision of the Radiologic Technology Act (Section 27) or regulation of the department.

(h) Conviction, either within or outside of this state, of a felony or misdemeanor involving moral turpitude, that was committed during the performance of radiologic technology duties. A plea or verdict of guilty or a conviction following a plea of nolo contendere made to a charge of a felony or misdemeanor involving moral turpitude, that was committed during the performance of radiologic technology duties, is deemed to be a conviction within the meaning of this section. However, upon recommendation of either the court that imposed or suspended sentence of the parole or probation authority having a person under surveillance or having discharged him or her from surveillance that the person has responded to correctional and

rehabilitative processes to a degree that might warrant waiver of the provisions of this section, the department may, at its discretion, take no action pursuant to this subdivision.

107075. Any person who violates or aids or abets the violation of any of the provisions of the Radiologic Technology Act (Section 27) or regulation of the department adopted pursuant to that act is guilty of a misdemeanor.

107080. (a) The application fee for any certificate or permit issued pursuant to the Radiologic Tecnology Act (Section 27) shall be established by the department in an amount as it deems reasonably necessary to carry out the purpose of that act.

(b) The fee for any examination conducted pursuant to the Radiologic Tecnology Act (Section 27) after failure of that examination within the previous 12 months shall be fixed by the department in an amount it deems reasonably necessary to carry out that act.

(c) The annual renewal fee for each certificate or permit shall be fixed by the department in an amount it deems reasonably necessary to carry out the Radiologic Tecnology Act (Section 27) .

(d) The penalty fee for renewal of any certificate or permit if application is made after its date of expiration shall be five dollars ($5) and shall be in addition to the fee for renewal prescribed by subdivision (c).

(e) The fee for a duplicate certificate or permit shall be one dollar ($1).

(f) No fee shall be required for a certificate or permit or a renewal thereof except as prescribed in the Radiologic Technology Act (Section 27).

107085. Failure to pay the annual fee for renewal on or before the expiration date of the certificate or permit shall automatically suspend the certificate or permit. If the prescribed fee is not paid within six months following the date, the certificate or permit shall be revoked. A certificate or permit revoked for nonpayment of the renewal fee may be reinstated within five years from the time of revocation upon payment of the penalty fee plus twice the annual renewal fee. If the application for reinstatement is not made within five years from the date of suspension of the certificate or permit, the certificate or permit shall be canceled and shall not be subject to reinstatement.

107090. The department may establish a schedule of fees for permits issued pursuant to subdivisions (c) and (e) of Section 114870, and Sections 114885 and 107115, if the revenue from the fees is related to the costs of administering the Radiologic Technology Act (Section 27).

107095. The department may establish a schedule of fees to be paid by schools applying for approval as approved schools for radiologic technologists and, on an annual basis, by schools that are

included on the department's list of approved schools for radiologic technologists.

107100. (a) All fees payable under the Radiologic Technology Act (Section 27) shall be collected by and paid to the department for deposit into the Radiation Control Fund established pursuant to Section 114980.

(b) This section shall become operative on July 1, 1993.

107110. It shall be unlawful for any licentiate of the healing arts to administer or use diagnostic, mammographic, or therapeutic X-ray on human beings in this state after January 1, 1972, unless that person is certified pursuant to subdivision (e) of Section 114870 or Section 114885, and is acting within the scope of that certification.

Article 6. Nuclear Medicine Technology

107115. A licentiate of the healing arts who is certified by an examining board in radiology recognized by the department shall be granted a certificate to supervise the operation of X-ray machines and to operate X-ray machines without restrictions.

107120. The department shall keep certificate and permit holders apprised of significant changes in the practice of radiologic technology and changes in regulation of the practice of radiologic technology through a biannual report. The report shall be furnished to certified radiological technologists and limited permit holders and may be furnished to appropriate licentiates of the healing arts.

107150. ''Nuclear medicine technology'' means that technology applied under the supervision of a physician and surgeon or a licensed clinical bioanalyst, when performing in vitro procedures, that pertains to the utilization of radiopharmaceuticals for the diagnosis and treatment of disease in humans and includes: (1) the standardization of radiopharmaceutical dosages prior to administering the preparation of radiopharmaceutical agents in accordance with department regulations, (2) the administration of radiopharmaceuticals in accordance with statute or regulation, and (3) the calibration and use of radiation detection instruments and equipment to obtain clinical information. Nuclear medicine technology includes in vitro tests performed in a licensed clinical laboratory that use a radioactive marker substance not administered to human subjects and in vivo nuclear medicine procedures that involve administration of a radioactive marker substance to humans.

107155. (a) Any person not currently licensed as a physician and surgeon pursuant to Chapter 5 (commencing with Section 2000) of Division 2 of the Business and Professions Code, or as a clinical laboratory technologist, bioanalyst, or clinical chemist pursuant to Chapter 3 (commencing with Section 1200) of Division 2 of the Business and Professions Code, who performs nuclear medicine

technology shall be subject to the standards of competence established by the department pursuant to this article.

(b) Nothing in this article shall be construed to limit the existing authority of, or scope of practice of, a physician and surgeon, clinical laboratory technologist, bioanalyst, or clinical chemist granted pursuant to their licenses, or to further require persons to establish competence to perform in vitro tests.

(c) In vitro procedures using radioactive materials shall be performed in a licensed clinical laboratory.

(d) This article shall not apply to any of the following persons:

(1) Any person employed by an agency of the United States government, while performing the duties of the employment.

(2) A licensed clinical laboratory technologist who administers a radioactive marker test substance to a human subject to perform a measurement on a sample containing the radioactive marker test substance that has been removed from the subject.

(3) A registered pharmacist who handles radioactive drugs in accordance with the California State Board of Pharmacy regulations contained in the most recent version of Sections 1708.3 to 1708.8, inclusive, of Article 2 of Chapter 17 of Title 16 of the California Code of Regulations.

107160. (a) The department shall provide by regulation a schedule of fees that shall be paid by persons applying to establish their competence to perform nuclear medicine technology. The revenue derived from the fees shall be sufficient to cover all costs incurred in the administration of this article.

(b) The fees paid by applicants shall be adjusted annually, pursuant to Section 100425, and the adjusted fee amounts shall be rounded off to the nearest whole dollar.

107165. The establishment of a person as competent to perform nuclear medicine technology may be denied, revoked, or suspended by the department, for any of the following reasons:

(a) Habitual intemperance in the use of any alcoholic beverages, narcotics, or stimulants to an extent as to incapacitate for the performance of professional duties.

(b) Incompetence or negligence in performing nuclear medicine technology functions.

(c) Establishment of competence to perform nuclear medicine technology by fraud, or misrepresentation, or because of mistake.

(d) Use of a designation indicating that a person is established by the department as competent to perform nuclear medicine technology by a person who has not been established by the department as competent to perform nuclear medicine technology.

(e) Violation of the provisions of this article or regulations adopted pursuant thereto.

The proceedings for denial, revocation, or suspension pursuant to this section shall be conducted in accordance with Chapter 5

(commencing with Section 11500) of Part 1 of Division 3 of Title 2 of the Government Code, and the department shall have all of the powers granted therein.

107170. Any person who violates this article or any regulation adopted pursuant thereto shall be guilty of a misdemeanor.

107175. The department shall enforce this article.

CHAPTER 4. CALIFORNIA HAZARDOUS SUBSTANCES ACT

Article 1. General Provisions and Definitions

108100. This chapter shall be known as the California Hazardous Substances Act.

108105. Unless the provisions or the context otherwise requires, these definitions, rules of construction, and general provisions shall govern the construction of this chapter.

108110. The term ‘‘art or craft material’’ means any raw or processed material or manufactured product marketed or being represented by the manufacturer, repackager or retailer as being suitable for use in any phase of the creation of any work of visual or graphic art of any medium. These mediums may include, but shall not be limited to, paintings, drawings, prints, sculpture, ceramics, enamels, jewelry, stained glass, plastic sculpture, photographs, and leather and textile goods. The term shall not include economic poisons subject to the Federal Insecticide, Fungicide, and

Rodenticide Act (61 Stats. 163) or Chapter 2 (commencing with Section 12751) of Division 7 of the Food and Agricultural Code; or to drugs, devices, or cosmetics, that are subject to the Federal Food, Drug and Cosmetics Act (52 Stats. 1040) or Part 5 (commencing with Section 109875).

108115. ''Department'' means the State Department of Health Services.

108120. As used in this chapter, ''federal act'' means the Federal Hazardous Substances Act (74 Stats. 372; 15 U.S.C., Sec. 1261, et seq.).

108125. The term ''hazardous substance'' means:

(a) Any substance or mixture of substances that (1) is toxic, (2) is corrosive, (3) is an irritant, (4) is a strong sensitizer, (5) is flammable or combustible, or (6) generates pressure through decomposition, heat, or other means; if the substance or mixture of substances may cause substantial personal injury or substantial illness during or as a proximate result of any customary or reasonably foreseeable handling or use, including reasonably foreseeable ingestion by children.

(b) Any substances that the department by regulation finds pursuant to the provisions of Section 108320 meet the requirements of subdivision (a) of this section.

(c) Any radioactive substance, if, with respect to the substance as used in a particular class of article or as packaged, the department determines by regulation that the substance is sufficiently hazardous to require labeling in accordance with this chapter in order to protect the public health.

(d) Any toy or other article intended for use by children that the department determines, by regulation, pursuant to the provisions of Section 108320, presents an electrical, mechanical, or thermal hazard.

108130. The term ''hazardous substance'' shall not apply to any of the following:

(a) Foods, drugs, or cosmetics subject to the Federal Food, Drug, and Cosmetic Act (52 Stat. 1040) or Part 5 (commencing with Section 109875).

(b) Substances intended for use as fuels when stored in containers and used in the heating, cooking, or refrigeration system of a house.

(c) Source material, special nuclear material, or byproduct material, as defined in the Atomic Energy Act of 1954 (68 Stat. 919), as amended, and regulations issued pursuant thereto by the Atomic Energy Commission.

(d) Fertilizing materials regulated by Chapter 5 (commencing with Section 14501) of Division 7 of the Food and Agricultural Code.

(e) Livestock remedies regulated by Chapter 4 (commencing with Section 14200) of Division 7 of the Food and Agricultural Code.

(f) Economic poisons regulated by Chapter 2 (commencing with Section 12751) of Division 7 of the Food and Agricultural Code, except as provided in Section 108135.

(g) Economic poisons subject to the Federal Insecticide, Fungicide, and Rodenticide Act (61 Stat. 163), except as provided in Section 108135.

(h) Injurious substances as defined and regulated by Article 112 (commencing with Section 5225) of Group 16 of Subchapter 7 of Chapter 4 of Title 8 of the California Code of Regulations.

108135. The term ''hazardous substance'' shall apply to any article that is not itself an economic poison within the meaning of the Federal Insecticide, Fungicide and Rodenticide Act or Chapter 2 (commencing with Section 12751) of Division 7, of the Food and Agricultural Code, but that is a hazardous substance within the meaning of Section 108125 by reason of bearing or containing an economic poison.

108140. The term ''human carcinogen'' means any substance listed as a human carcinogen by the International Agency for Research on Cancer.

The term ''potential human carcinogen'' means one of the following:

(1) Any substance that does not meet the definition of human carcinogen, but for which there exists sufficient evidence of carcinogenicity in animals, as determined by the International Agency for Research on Cancer.

(2) Any chemical shown to be changed by the human body into a human carcinogen.

108145. The term ''toxic'' shall apply to any substance, other than a radioactive substance, that has the capacity to produce personal injury or illness to man through ingestion, inhalation, or absorption through any body surface.

108150. The term ''toxic substance causing chronic illness'' means any of the following:

(1) Human carcinogens.

(2) Potential human carcinogens.

(3) Any substance included in the list of hazardous substances prepared by the Director of Industrial Relations, pursuant to Section 6382 of the Labor Code, notwithstanding exemptions made for substances on the list that are used in particular forms, circumstances, or concentrations, if the health hazard presented by the substance is not the subject of label statements required by federal law.

108155. ''Highly toxic'' means any substance that falls within any of the following categories:

(a) Produces death within 14 days in half or more than half of a group of 10 or more laboratory white rats each weighing between 200 and 300 grams, at a single dose of 50 milligrams or less per kilogram of body weight, when orally administered.

(b) Produces death within 14 days in half or more than half of a group of 10 or more laboratory white rats each weighing between 200 and 300 grams, when inhaled continuously for a period of one hour

or less at an atmospheric concentration of 200 parts per million by volume or less of gas or vapor or two milligrams per liter by volume or less of mist or dust, provided the concentration is likely to be encountered by man when the substance is used in any reasonably foreseeable manner.

(c) Produces death within 14 days in half or more than half of a group of 10 or more rabbits tested in a dosage of 200 milligrams or less per kilogram of body weight, when administered by continuous contact with the bare skin for 24 hours or less.

108160. If the department finds that available data on human experience with any substance indicate results different from those obtained on animals with the dosages or concentrations stated in Section 108155, the human data shall take precedence.

108165. ''Corrosive'' means any substance which in contact with living tissue will cause destruction of tissue by chemical action; but shall not refer to action on inanimate surfaces.

108170. ''Irritant'' means any substance not corrosive within the meaning of Section 108165 that on immediate, prolonged, or repeated contact with normal living tissue will induce a local inflammatory reaction.

108175. ''Strong sensitizer'' means a substance that will cause on normal living tissue through an allergic or photodynamic process a hypersensitivity that becomes evident on reapplication of the same substance and that is designated by the department. Before designating any substance as a strong sensitizer, the department, upon consideration of the frequency of occurrence and severity of the reaction, shall find that the substance has a significant potential for causing hypersensitivity.

108180. The term ''extremely flammable'' shall apply to any substance that has a flashpoint at or below 20 degrees Fahrenheit, as determined by the Tagliabue open-cup tester, the term ''flammable'' or ''combustible'' shall apply to any substance that has a flashpoint of above 20 degrees to and including 80 degrees Fahrenheit, as determined by the Tagliabue open-cup tester, and the term ''combustible'' shall apply to any substance that has a flashpoint above 80 degrees Fahrenheit to and including 150 degrees, as determined by the Tagliabue open-cup tester; except that the flammability or combustibility of solids and of the contents of self-pressurized containers shall be determined by methods found by the department to be generally applicable to the materials or containers, respectively, and established by regulations issued by it, which regulations shall also define the terms ''flammable'' and ''combustible'' and ''extremely flammable'' in accord with those methods.

108185. ''Radioactive substance'' means a substance that emits ionizing radiation.

108190. ‘‘Label’’ means a display of written, printed, or graphic matter upon the immediate container of any substance or, in the case of an article that is unpackaged or is not packaged in an immediate container intended or suitable for delivery to the ultimate consumer, a display of the matter directly upon the article involved, or upon a tag or other suitable material affixed thereto, and a requirement made by, or pursuant to, this chapter that any word, statement, or other information appear on the label shall not be considered to be complied with unless the word, statement, or other information also appears (a) on the outside container or wrapper, if any there be, unless it is easily legible through the outside container or wrapper and (b) on all accompanying literature where there are directions for use, written or otherwise.

108195. The term ‘‘immediate container’’ does not include package liners.

108200. The term ‘‘misbranded hazardous substance’’ means a hazardous substance (including a toy or other article intended for use by children, that is a hazardous substance, or that bears or contains a hazardous substance in the manner as to be susceptible of access by a child to whom the toy or other article is entrusted) intended, or packaged in a form suitable for use in the household or by children if the packaging or labeling of the substance is in violation of an applicable regulation issued pursuant to Section 108685 or 108700, or if the substance, except as otherwise provided by, or pursuant to, Section 108320, 108355, or 108360, fails to bear a label that states conspicuously, as prescribed in Chapter 8 (commencing with Section 108800): (1) the name and place of business of the manufacturer, packer, distributor, or seller; (2) the common or usual name or the chemical name, if there be no common or usual name, of the hazardous substance or of each component that contributes substantially to its hazard, unless the department by regulation permits or requires the use of a recognized generic name; (3) the signal word ‘‘DANGER’’ on substances that are extremely flammable, corrosive, or highly toxic; (4) the signal word ‘‘WARNING’’ or ‘‘CAUTION’’ on all other hazardous substances; (5) an affirmative statement of the principal hazard or hazards, such as ‘‘Flammable,’’ ‘‘Combustible,’’ ‘‘Vapor harmful,’’ ‘‘Causes burns,’’ ‘‘Absorbed through skin,’’ or similar wording descriptive of the hazard; (6) precautionary measures describing the action to be followed or avoided, except when modified by the department pursuant to Section 108320, 108325, 108330, 108355, or 108360; (7) instructions, when necessary or appropriate, for first aid treatment; (8) the word ‘‘Poison’’ for any hazardous substance that is defined as ‘‘highly toxic’’ by Section 108155; (9) instructions for handling and storage of packages that require special care in handling or storage; and (10) the statement ‘‘Keep out of the reach of children,’’ or its practical equivalent, or if the article is intended for use by children

and is not a banned hazardous substance, adequate direction for the protection of children from the hazard. The term ‘‘misbranded hazardous substance’’ also includes a household substance as defined in subdivision (b) of Section 108680 if it is a substance described in Section 108125 and its packaging or labeling is in violation of an applicable regulation issued pursuant to Section 108685 or 108700.

108205. The term ‘‘banned hazardous substance’’ means either:

(a) Any toy, or other article intended for use by children, that is a hazardous substance, or that bears or contains a hazardous substance in the manner as to be susceptible of access by a child to whom the toy or other article is entrusted.

(b) Any hazardous substance intended or packaged in a form suitable, for use in the household, that the department by regulation classifies as a ‘‘banned hazardous substance’’ on the basis of a finding that, notwithstanding the cautionary labeling as is or may be required under this chapter for that substance, the degree or nature of the hazard involved in the presence or use of that substance in households is that the objective of the protection of the public health and safety can be adequately served only by keeping that substance, when so intended or packaged, out of the channels of intrastate commerce.

108210. (a) An article may be determined to present an electrical hazard if, in normal use or when subjected to reasonably foreseeable damage or abuse, its design or manufacture may cause personal injury or illness by electric shock.

(b) An article may be determined to present a mechanical hazard if, in normal use or when subjected to reasonably foreseeable damage or abuse, its design or manufacture presents an unreasonable risk of personal injury or illness from any of the following:

(1) Fracture, fragmentation, or disassembly of the article.

(2) Propulsion of the article or any part or accessory thereof.

(3) Points or other protrusions, surfaces, edges, openings, or closures.

(4) Moving parts.

(5) Lack or insufficiency of controls to reduce or stop motion.

(6) As a result of self-adhering characteristics of the article.

(7) Because the article, or any part or accessory thereof, may be aspirated or ingested.

(8) Because of instability.

(9) Because of any other aspect of the article’s design or manufacture.

(c) An article may be determined to present a thermal hazard if, in normal use or when subjected to reasonably foreseeable damage or abuse, its design or manufacture presents an unreasonable risk of personal injury or illness because of heat as from heated parts, substances, or surfaces.

108215. The department, by regulation, shall exempt from subdivision (a) of Section 108205 (1) articles such as chemical sets, that by reason of their functional purpose require the inclusion of the hazardous substance involved or necessarily present an electrical, mechanical, or thermal hazard and that bear labeling giving adequate directions and warnings for safe use and are intended for use by children who have attained sufficient maturity, and may reasonably be expected to read and heed the directions and warnings and (2) fireworks subject to control under Part 2 (commencing with Section 12500) of Division 11.

108220. Proceedings for the issuance, amendment, or repeal of regulations pursuant to subdivision (b) of Section 108205 and Section 108215 shall be in the manner prescribed in Section 108335. If the department, however, finds that the distribution for household use of the hazardous substance involved presents an imminent hazard to the public health, it may by order publish a notice of the findings, and thereupon the substance when intended or offered for household use or when so packaged as to be suitable for that use shall be deemed to be a ''banned hazardous substance'' pending the completion of proceedings relating to the issuance of the regulations.

108225. Notwithstanding any other provision of this chapter, no substance or article shall be deemed to violate any provision of this chapter except Article 6 (commencing with Section 108500), if the substance or article complies with federal law.

Article 2. Articles For Children

108230. A determination by the department that a toy or other article intended for use by children presents an electrical, mechanical, or thermal hazard shall be made by regulation.

108235. If, before or during the making of a determination pursuant to Section 108230, the department finds that, because of an electrical, mechanical, or thermal hazard, distribution of the toy or other article involved presents an imminent hazard to the public health and the department by regulation gives notice of the finding, the toy or other article shall be deemed to be a banned hazardous substance for purposes of this chapter until the proceeding has been completed. If not yet initiated when the regulation is adopted, a proceeding shall be initiated as promptly as possible.

Article 3. Prohibitions

108240. The manufacture, production, preparation, compounding, packing, selling, offering for sale, or keeping for sale within the State of California, or the introduction into this state from any other state, territory, or the District of Columbia, or from any

foreign country, of any package of a misbranded hazardous substance or banned hazardous substance is prohibited.

108245. Any person who imports or receives from any other state or territory or the District of Columbia or from any foreign country, or who having so received delivers for pay or otherwise or offers to deliver to any other person, any misbranded hazardous substance or banned hazardous substance or any person who shall manufacture or produce, prepare or compound, or pack or sell, or offer for sale, or keep for sale in the State of California any misbranded hazardous substance or banned hazardous substance, shall be guilty of a misdemeanor punishable as provided in Section 108295.

108250. The packing, selling, offering for sale, or keeping for sale of a hazardous substance in a reused food, drug, or cosmetic container or in a container that, though not a reused container, is identifiable as a food, drug, or cosmetic container by its labeling or by other identification, is unlawful. Such an act shall result in the hazardous substance being in a misbranded package. As used in this section, the terms ''cosmetic,'' ''drug'' and ''food'' shall have the same meaning as in Chapter 1 (commencing with Section 109875) of Part 5.

108255. The department may by regulation prohibit the use of any other container for hazardous substances if it determines that the container may be mistaken for a food, drug, or cosmetic container and has a closure that presents a health hazard due to ease of opening.

108260. The alteration, mutilation, destruction, obliteration, or removal of the whole or any part of the labeling of, or the doing of any other act with respect to a hazardous substance is unlawful if the act results in the article being a misbranded hazardous substance or banned hazardous substance.

108265. It shall be unlawful to refuse to permit entry or inspection authorized by Section 108370 or to permit access to and copying of any record as authorized by Section 108300.

108270. No person shall be prosecuted under this chapter if, after receipt of a hazardous substance, he or she can establish a guarantee or undertaking signed by, and containing the name and address of, the person residing in the United States from whom he or she received in good faith the hazardous substance, to the effect that the hazardous substance is not a misbranded hazardous substance or a banned hazardous substance within the meaning of these terms, as defined by this chapter.

108275. If the guarantee is to the effect that the article is not misbranded or banned within the meaning of the Federal Hazardous Substances Act (Public Law 86-813, 74 Stat. 372), it shall be sufficient for all the purposes of this chapter and have the same force and effect as though it referred to this chapter whether given by a person residing in the United States or elsewhere.

108280. The giving of a guarantee referred to in Section 108270 that is false, is prohibited, except by a person who relied upon a

guarantee to the same effect signed by, and containing the name and address of, the person residing in the United States from whom he or she received in good faith the hazardous substance.

108285. No person shall be prosecuted under this chapter if the hazardous substance is shipped or delivered for shipment for export to any foreign country, in a package marked for export on the outside of the shipping container and labeled in accordance with the specifications of the foreign purchaser and in accordance with the laws of the foreign country, but if the hazardous substance is sold or offered for sale in domestic commerce, this section shall not apply.

108290. The use by any person to his or her own advantage, or revealing other than to the department or any agent of the department or to the courts when relevant in any judicial proceeding under this chapter, of any information acquired under authority of this chapter concerning any method of process that as a trade secret is entitled to protection is prohibited.

108295. Any person who violates any of the provisions of this chapter is guilty of a misdemeanor, and upon conviction shall be punished by a fine of not less than fifty dollars ($50) or more than one thousand dollars ($1,000), or by imprisonment in the county jail for a term not exceeding six months, or by both fine and imprisonment.

If the violation is committed with intent to defraud or mislead, or after a conviction of the person under this section has become final, the person shall be subject to imprisonment for not more than one year in the county jail, or a fine of not more than two thousand dollars ($2,000), or both the imprisonment and fine.

108300. For the purpose of enforcing this chapter, carriers engaged in commerce, and persons receiving or holding hazardous substances shall upon the request of an agent of the department, permit the agent, at reasonable times, to have access to and to copy all records showing the movement of any hazardous substance, or the holding thereof during or after the movement, and the quantity, shipper, and consignee thereof, provided, that evidence obtained under this section shall not be used in a criminal prosecution of the person from whom obtained, provided, further, that carriers shall not be subject to this chapter by reason of their receipt, carriage, holding, or delivery of hazardous substances in the usual course of business as carriers.

As used in this section, ‘‘carrier’’ means a person engaged in transporting property from one place to another and who has no other interest in the ownership of the property.

108305. Before any violation of this chapter is reported to the district attorney of the county, or the prosecuting officer of the city, for institution of a criminal proceeding the person against whom the proceeding is contemplated may be given appropriate notice and an opportunity to present his or her view, either orally or in writing, with regard to each contemplated proceeding.

Article 4. Repurchase

108310. As under this article:

(a) ‘‘Manufacturer’’ includes an importer for resale.

(b) A dealer who sells at wholesale an article or substance shall, with respect to that sale, be considered the distributor of that article or substance.

108315. In the case of any article or substance sold on or after the effective date of this section by its manufacturer, distributor, or dealer that is a banned hazardous substance, whether or not it was at the time of its sale, the article or substance shall, in accordance with regulations of the department, be repurchased as follows:

(a) The manufacturer of any such article or substance shall repurchase it from the person to whom he or she sold it, and shall do the following:

(1) Refund that person the purchase price paid for the article or substance.

(2) If that person has repurchased the article or substance pursuant to subdivision (b) or (c) reimburse him or her for any amounts paid in accordance with subdivision (b) or (c) for the return of the article or substance in connection with its repurchase.

(3) If the manufacturer requires the return of the article or substance in connection with his or her repurchase of it in accordance with this subdivision, reimburse that person for any reasonable and necessary expenses incurred in returning it to the manufacturer.

(b) The distributor of any article or substance shall repurchase it from the person to whom he or she sold it, and shall do the following:

(1) Refund that person the purchase price paid for the article or substance.

(2) If that person has repurchased the article or substance pursuant to subdivision (c), reimburse him or her for any amounts paid in accordance with that subdivision for the return of the article or substance in connection with its repurchase.

(3) If the distributor requires the return of the article or substance in connection with his or her repurchase of it in accordance with this subdivision, reimburse that person for any reasonable and necessary expenses incurred in returning it to the distributor.

(c) In the case of any article or substance sold at retail by a dealer, if the person who purchased it from the dealer returns it to him or her, the dealer shall refund the purchaser the purchase price paid for it and reimburse him or her for any reasonable and necessary transportation charges incurred in its return.

Article 5. Administration

108320. The department may adopt regulations regarding hazardous substances as it determines are necessary to adequately

enforce and administer this chapter. Any violation of the regulations shall be deemed to be a violation of this chapter.

108325. Whenever in the judgment of the department the action will promote the objectives of this chapter by avoiding or resolving uncertainty as to its application, the department may by regulation declare to be a hazardous substance, for the purpose of this chapter, any substance or mixture of substances that it finds meet the requirements of Section 108125.

108330. If the department finds that the requirements of Section 108200 are not adequate for the protection of the public health and safety in view of the special hazard presented by any particular hazardous substance, it may by regulation establish reasonable variations or additional label requirements as it finds necessary for the protection of the public health and safety; and any hazardous substance intended, or packaged in a form suitable, for use in the household or by children, that fails to bear a label in accordance with regulations shall be deemed to be a misbranded hazardous substance.

108335. The regulations shall be adopted by the department in the manner prescribed by Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code. The regulations shall conform as nearly as practicable with regulations promulgated by the United States Department of Health, Education, and Welfare, Food and Drug Administration.

108340. To the extent that the requirements of this chapter are identical with the federal act, all regulations and any amendments to regulations adopted pursuant to the federal act that are in effect on the effective date of this section or that are adopted on or after the date are the hazardous substances regulations of this state.

108345. A federal regulation adopted pursuant to this chapter takes effect in this state 30 days after it becomes effective as a federal regulation. Any person who will be adversely affected by adoption of a federal regulation in this state may, within the 30 days prior to its becoming effective in this state, file with the state department, in writing, objections and a request for a hearing. The timely filing of substantial objections to a regulation that has become effective under the federal act, stays the adoption of the regulation in this state.

108350. If substantial objections are made to a federal regulation within 30 days prior to its becoming effective in this state or to a proposed regulation within 30 days after it is published, the state department, after notice, shall conduct a public hearing to receive evidence on issues raised by the objections. Any interested person or his or her representatives shall be heard. The state department shall act upon objections by order and shall mail the order to objectors by certified mail as soon after the hearing as practicable. The order shall be based on evidence contained in the record of the hearing. If the order concerns a federal regulation, the state department may adopt, rescind, or modify it. If the order concerns a proposed regulation, the

state department may withdraw it or set an effective date for the regulation as published or as modified by the order. The effective date shall be at least 60 days after publication of the order.

108355. If the department finds that, because of the size of the package involved or because of the minor hazard presented by the substance contained therein, or for other good and sufficient reasons, full compliance with the labeling requirements otherwise applicable under this chapter is impracticable or is not necessary for the adequate protection of the public health and safety, the department may exempt the substance from these requirements to the extent it determines to be consistent with adequate protection of the public health and safety.

108360. The department may exempt from the requirements established by, or pursuant to, this chapter any container of a hazardous substance with respect to which it finds that adequate requirements satisfying the purposes of this chapter have been established by, or pursuant to, any other law enacted by the Legislature.

108365. The department may appoint agents as it may deem necessary.

108370. The department or its duly authorized agent shall have free access to all reasonable hours to any factory, warehouse, or establishment in which hazardous substances are manufactured, processed, packed, or held for introduction into commerce, or to enter any vehicle being used to transport or hold hazardous substances, in commerce, for either of the following purposes:

(a) Inspecting the factory, warehouse, establishment, or vehicle to determine if any of the provisions of this chapter are being violated.

(b) To secure samples or specimens of any hazardous substances. If the agent obtains any sample, prior to leaving the premises, he or she shall give to the owner, operator, or agent in charge a receipt describing the samples obtained. If an analysis is made of the sample, a copy of the results of the analysis shall be furnished promptly to the owner, operator, or agent in charge.

108375. Whenever a duly authorized agent of the department finds, or has probable cause to believe, that any hazardous substance is so misbranded as to be dangerous or fraudulent or is a banned hazardous substance, he or she shall affix to the article a tag or other appropriate marking, giving notice that the article is, or is suspected of being, misbranded and has been detained or quarantined, and warning all persons not to remove or dispose of the article by sale or otherwise until permission for removal or disposal is given by the department or the court.

108380. Whenever the findings of the department show, after investigation and examination, that any hazardous substance found

in the possession of any person is misbranded, or banned, the hazardous substance may be seized and quarantined.

108385. A hazardous substance found to be misbranded, or to be a banned hazardous substance may, by order of a court or judge, or in the absence of the order, with the written consent of the owner thereof, be seized or destroyed.

108390. When a misbranded hazardous substance or a banned hazardous substance is detained or quarantined under this article, the department shall commence proceedings in the name of the people of the State of California against the article in the superior court of the county or city and county in which the article is detained or quarantined by petitioning the court for a judgment to forfeit, condemn, and destroy the article. Upon the filing of the petition, the clerk of the court shall fix a time and place for the hearing thereof, and cause notices thereof to be prepared notifying all persons who may claim an interest in the article of the time and place of the hearing. A copy of the petition and notice shall be posted for 14 days in at least three public places in the city or city and county where the court is held, and in a conspicuous place where the article is detained or quarantined. A copy of the petition and notice shall also be served upon each person in possession of the article and on each owner or claimant whose name and address is known. The service may be made by personal service or by registered mail by mailing a copy of the notice and petition by registered mail to the last known address of the person. At any time prior to the date of the hearing any person in possession of the article, or owner thereof or claimant thereto, may file an answer that may include a prayer for a judgment of release of the article or relief in accordance with Sections 108400 and 108405. At the time set for the hearing, the court shall commence to hear and determine the proceeding, but may, for good cause shown, continue the hearing to a day certain; provided, the court shall finally determine all the issues presented by the petition.

108395. If the court finds that a detained or quarantined article is misbranded, after entry of the decree the article shall be destroyed at the expense of the claimant thereof, under the supervision of the agent of the department. All court costs and fees, and storage and other proper expenses, shall be taxed against the claimant of the article or his or her agent.

108400. If the misbranding can be corrected by proper labeling or processing of the article, after entry of the decree and after costs, fees, and expenses have been paid and a good and sufficient bond, conditioned that the article shall be so labeled or processed, has been executed, the court may by order direct that the article be delivered to the claimant thereof for the labeling or processing under the supervision of an agent of the department. The expense of the supervision shall be paid by the claimant.

108405. The bond shall be returned to the claimant of the article on representation to the court by the department that the article is no longer in violation of this chapter, and that the expenses of the supervision have been paid.

108410. The department shall cause to be published from time to time reports summarizing any judgments, decrees, or court orders that have been rendered under this chapter, including the nature of the charge and the disposition thereof.

The department shall also cause to be disseminated information regarding hazardous substances in situations involving, in the opinion of the department, imminent danger to health. Nothing in this section shall be construed to prohibit the department from collecting, reporting, and illustrating the results of the investigations of the department.

108415. In addition to the remedies heretofore provided, the department is hereby authorized to bring an action in superior court and the court shall have jurisdiction upon hearing and for cause shown, to grant a temporary or permanent injunction restraining any person from violating any provision of this chapter. Any proceeding under this section shall conform to the requirements of Chapter 3 (commencing with Section 525) of Title 7 of Part 2 of the Code of Civil Procedure, except that the department shall not be required to allege facts necessary to show or tending to show lack of adequate remedy at law or to show or tending to show irreparable damage or loss.

108420. If any provision of this chapter is declared unconstitutional, or the applicability thereof to any person or circumstance is held invalid, the constitutionality of the remainder of the chapter and the applicability thereof to other persons and circumstances shall not be affected thereby.

Article 6. Art or Craft Materials

108500. For the purposes of this article, an art or craft material shall be presumed to contain an ingredient that is a toxic substance causing chronic illness if the ingredient, whether an intentional ingredient or an impurity, is 1 percent or more by weight of the mixture or product, or if the department determines that the toxic or carcinogenic properties of the art or craft material are such that labeling is necessary for the adequate protection of the public health and safety.

108505. The Legislature finds and declares that there exists a significant danger to the public health and safety from exposure to art or craft material that contains toxic chemicals. This health risk threatens not only professional artists and craftspersons, but art teachers, students at every educational level, hobbyists, and children.

Toxic substances may be employed during the course and scope of creating art or craft objects of all varieties.

The Legislature additionally finds and declares that present labeling of ingredients and hazards of art or craft material is insufficient to adequately protect the consumers of this state from chronic adverse health effects. Because many persons do not know what toxic chemical substances they work with, proper precautionary actions cannot be taken. Disclosure of toxic ingredients, their possible adverse effects on health, and instructions for safe handling, will substantially minimize unnecessary exposure to excessive risk.

Additionally, the Legislature finds and declares that it is consistent to impose upon those who manufacture, repackage, distribute, and sell art or craft material a duty to convey to consumers information about the potential health hazards of the products they manufacture.

Therefore, the Legislature intends by this article to ensure that consumers be provided information concerning the nature of the toxic substances with which they are working and the known and suspected health hazards of these substances, and to ensure the uniformity of labeling standards, so that materials with similar hazards also have essentially similar labels.

108510. No person shall distribute, sell, offer for sale, or expose for sale any art or craft material containing toxic substances causing chronic illness on which the person:

(a) Has failed to affix a conspicuous label containing the signal word ‘‘WARNING,’’ to alert users of potential adverse health effects.

(b) Has failed to affix a conspicuous label warning of the health-related dangers of the art or craft material.

(1) If the product contains a human carcinogen, the warning shall contain the statement: ‘‘CANCER HAZARD! Overexposure may create cancer risk.’’

(2) If the product contains a potential human carcinogen, and does not contain a human carcinogen, the warning shall contain the statement: ‘‘POSSIBLE CANCER HAZARD! Overexposure might create cancer risk.’’

(3) If the product contains a toxic substance causing chronic illness, the warning shall contain, but not be limited to, the following statement or statements where applicable:

(A) May cause sterility or damage to reproductive organs.

(B) May cause birth defects or harm to developing fetus.

(C) May be excreted in human milk causing harm to nursing infant.

(D) May cause central nervous system depression or injury.

(E) May cause numbness or weakness in the extremities.

(F) Overexposure may cause damage to (specify organ).

(G) Heating above (specify degrees) may cause hazardous decomposition products.

(4) If a product contains more than one chronically toxic substance, or if a single substance can cause more than one chronic health effect, the required statements may be combined into one warning statement.

(c) Has failed to affix on the label a list of ingredients that are toxic substances causing chronic illness.

(d) Has failed to affix on the label a statement or statements of safe use and storage instructions, conforming to the following list. The label shall contain, but not be limited to, as many of the following risk statements as are applicable:

(1) Keep out of reach of children.

(2) When using, do not eat, drink, or smoke.

(3) Wash hands after use and before eating, drinking, or smoking.

(4) Keep container tightly closed.

(5) Store in well ventilated area.

(6) Avoid contact with skin.

(7) Wear protective clothing (specify type).

(8) Wear NIOSH certified masks for dusts, mists, or fumes.

(9) Wear NIOSH certified respirator with appropriate cartridge for (specify type).

(10) Wear NIOSH certified supplied-air respirator.

(11) Use window exhaust fan to remove vapors and assure adequate ventilation (specify explosion proof if necessary).

(12) Use local exhaust hood (specify type).

(13) Do not heat above (specify degrees) without adequate ventilation.

(14) Do not use or mix with (specify material).

(e) Has failed to affix on the label a statement on where to obtain more information, such as ''call your local poison control center for more health information.''

(f) Has failed to affix on the label the name and address of the manufacturer.

(g) If all of the above information cannot fit on the package label, a package insert shall be required to convey all the necessary information to the consumer. In this event, the label shall contain a statement to refer to the package insert, such as ''CAUTION: see package insert before use.'' For purposes of this section, ''package insert'' means a display of written, printed, or graphic matter upon a leaflet or suitable material accompanying the art supply. The language on this insert shall be nontechnical and nonpromotional in tone and content.

Art or craft material offered for sale in containers that contain less than one fluid ounce (30 milliliters) or one ounce net (29 grams) shall be deemed to comply with this section if there is affixed on the container a precautionary label that includes the words ''USE WITH CAUTION: Contains Hazardous Substances.''

The requirements set forth in subdivisions (a) to (g), inclusive, shall not be considered to be complied with unless the required words, statements, or other information appear on the outside container or wrapper, or on a package insert that is easily legible through the outside container or wrapper and is painted in a color in contrast with the product or the package containing the product.

(h) Pursuant to Section 108355, the department may exempt a material from full compliance with this article. In considering this exemption, the department shall take into consideration the potential for reasonably foreseeable misuse of a material by a child.

(i) If an art or craft material complies with labeling standards D-4236 of the American Society for Testing and Materials (ASTM), the material complies with the provisions of this article, unless the department determines that the label on an art or craft material does not satisfy the purposes of this article.

108515. (a) The manufacturer of any art or craft material sold, distributed, offered for sale, or exposed for sale in this state shall supply to a national poison control network approved by the director the formulation information required by that network for dissemination to poison control centers. Failure to file formulation information with an approved poison control network is a violation of this chapter.

(b) The requirements set forth in Section 108510 shall not be considered to be complied with unless all required words, statements, or other information accompany art or craft materials from manufacturer to consumer, not excluding any distributor, packager, repackager, or retailer.

CHAPTER 5. CONSUMER PRODUCTS

Article 1. Water Heater Warning Labels

108525. A warning label shall be affixed near the thermostat of all new water heaters to be sold in the state for residential use. This warning shall read as follows:

‘‘Warning: Setting of the water heater thermostat in excess of 130 degrees Fahrenheit or 54 degrees centigrade may cause accidental scalding or other injury, particularly to children or elderly persons.’’

The Legislature does not intend by the enactment of this section to impose any duty on public utilities to affix this warning label or otherwise warn their customers relative to existing water heaters.

Article 2. Toy Safety

108550. ‘‘Toy,’’ as used in this article, means an article designed and made for the amusement of a child or for his or her use in play.

108555. (a) No person shall manufacture, sell, or exchange, have in his or her possession with intent to sell or exchange, or expose or offer for sale or exchange to any retailer, any toy that is contaminated with any toxic substance or that is any of the following:

(1) Is coated with paints and lacquers containing compounds of lead of which the lead content (calculated as Pb) is in excess of that permitted by federal regulations contained in Section 1500.17 of Title 16 of the Code of Federal Regulations adopted pursuant to the Federal Hazardous Substances Act, Chapter 30 (commencing with Section 1261) of Title 15 of the United States Code, or soluble compounds of antimony, arsenic, cadmium, mercury, selenium or barium, introduced as such. Compounds shall be considered soluble if quantities in excess of 0.1 percent are dissolved by 5 percent hydrochloric acid after stirring for 10 minutes at room temperature.

(2) Consists in whole or in part of a diseased, contaminated, filthy, putrid, or decomposed substance.

(3) Has been produced, prepared, packed, shipped, or held under unsanitary or other conditions whereby it may have become contaminated with filth or hazardous materials or otherwise rendered injurious to health.

(4) Is stuffed, padded, or lined with materials that are toxic or that would otherwise be hazardous if ingested, inhaled, or contacted.

(5) Is a stuffed, padded, or lined toy that is not securely wrapped or packaged.

(b) The department and local health officers shall enforce this article.

(c) Violation of this section is a misdemeanor punishable by a fine not exceeding one thousand dollars ($1,000) for each violation or by imprisonment in the county jail for a period not exceeding one year, or both.

108560. (a) All toys offered for sale or exchange, shall contain a label with the name and place of business of the manufacturer, distributor, or importer in the United States.

(b) It is unlawful to fail to provide any information required by this section upon the request of the department.

108565. (a) Whenever a duly authorized representative of the department or a local health officer finds, or has probable cause to believe, that any toy is or would be in violation of this article, he or she shall affix to the toy or a component thereof a tag or other appropriate marking, and shall give notice that the toy is suspected of being in violation of this article, that the toy has been embargoed, and that no person shall remove the toy until permission for removal or disposal is given by an authorized agent of the department, the local health officer, or the court.

(b) A local health officer shall notify the department within 48 hours of any action taken by the local health officer pursuant to subdivision (a).

108570. No person shall knowingly remove, sell, or dispose of a detained or embargoed toy without permission of an authorized agent of the department, the local health officer, or the court. Violation of this section is a misdemeanor punishable by a fine not exceeding one thousand dollars ($1,000) for each violation or by imprisonment in the county jail for a period not exceeding one year, or both.

108575. When an authorized agent of the department or the local health officer finds, or has reasonable cause to believe, that an embargo will be violated, he or she may remove the embargoed toy to a place of safekeeping.

108580. When a toy is alleged to be in violation of this article, the department or the local health officer shall commence proceedings in the superior court, or lower court in whose jurisdiction the toy is located, for condemnation of the article.

108585. (a) No person shall knowingly manufacture, sell, or offer for sale any toy that is designed to depict torture or resemble an instrument specifically designed for torture, or that specifically resembles a bomb or grenade.

(b) This section shall not apply to any model of an aircraft, ship, motor vehicle, railroad engine, car, or rocketship or other spacecraft, or to any part of the model.

(c) Violation of this section is a misdemeanor punishable by a fine of not more than six hundred dollars ($600).

Article 3. Beer Dispensing Equipment Safety

108600. As used in this article, unless the context requires otherwise:

(a) ‘‘Beer dispensing equipment’’ means any machine, tool, or implement used in the operation of dispensing beer.

(b) ‘‘Commercial establishment’’ means any owner or operator of a business that uses beer dispensing equipment.

(c) ‘‘Retail distributor’’ means any person engaged in the manufacture, rental, lease, sale, or distribution of beer dispensing equipment.

108605. On or after January 1, 1984, a visually inspectable without disassembly, pressure-relief rupture apparatus or other pressure relief device that performs equivalently shall be required on beer dispensing equipment manufactured, rented, leased, sold, or distributed that uses an external source of pressure, other than hand pumping. This apparatus is not required to be placed directly on the keg itself. On or after January 1, 1984, a warning shall be clearly displayed on or securely attached to all beer kegs. The word ‘‘WARNING’’, ‘‘ATTENTION’’, or other suitable wording shall appear in capital letters. The remainder of the warning shall read substantially as follows: ‘‘This keg will rupture and may cause injury

if overpressured with compressed air or CO_2. Tapping system and pressure regulator should be equipped with a pressure-relief (blowoff) device. If you are not familiar with tapping equipment, consult your retailer or the local beer distributor.''

108610. Any commercial establishment or retail distributor that violates the provisions of this article shall be subject to a civil penalty not to exceed five hundred dollars ($500) for each violation.

Article 4. Bucket Labeling

108625. A manufacturer, distributor, or seller of plastic or metal four-gallon to six-gallon, inclusive, straight sided, slightly tapered, open head, industrial containers, as defined by the American Society for Testing and Materials (ASTM), intended for use, sale, distribution, or any other purpose within the state, irrespective of point of origin, shall ensure that the industrial containers bear warning labels, that shall be applied prior to release for shipment into the stream of commerce, and shall meet all of the following requirements:

(a) The labels shall be a permanent paper, plastic, silk screened, or an offset printed label and shall be easily removable only by the use of tools or a solvent.

(b) The labels shall be at least five inches in height, by two and three-quarters inches in width or any larger size as the labeler may voluntarily choose, and shall be centered on each side of the bucket near where the handle is inserted. The label on one side shall be in Spanish, and the label on the other side shall be in English.

(c) The label shall contain on a contrasting background both the word ''WARNING'' in block print and the words ''Children Can Fall Into Bucket and Drown—Keep Children Away From Buckets With Even a Small Amount of Water.''

(d) The label shall contain a picture of a child reaching into an industrial container and shall include an encircled slash and a triangle with an exclamation point upon a contrasting field before the word ''WARNING''.

108630. Any person subject to the labeling requirements of this article is exempt from those requirements if the person has a label that is in substantial compliance with the requirements of this article.

108635. Any person who violates this article is guilty of a misdemeanor and shall be subject to Chapter 5 (commencing with Section 17200) of Part 2 of Division 7 of the Business and Professions Code.

108640. This article shall become operative on September 1, 1993, and shall remain in effect unless or until preempted by federal law. Notwithstanding this section, any industrial containers, as defined in Section 108625, manufactured prior to September 1, 1993, shall not be subject to this article.

Article 5. Charcoal Hazards

108650. No person shall sell or offer for sale charcoal intended for use in the cooking or preparation of food, unless the package containing the charcoal has affixed a warning label on the outside visible surface pursuant to Section 108660.

108655. The warning label required pursuant to Section 108650 shall be the same as the following:

> WARNING: Do Not Use for Indoor Heating or Cooking Unless Ventilation Is Provided for Exhausting Fumes to Outside. Toxic Fumes May Accumulate and Cause Death.

108660. For bags of charcoal, the warning label specified in Section 108655 shall appear within a heavy borderline in a color sharply contrasting to that of the background, on both front and back panels in the upper 25 percent of the panels of the bag at least two inches below the seam, and at least one inch above any reading material or design elements in type size as follows: The signal word ''WARNING'' shall appear in capital letters at least three-eighths inch in height; the remaining text of the warning shall be printed in letters at least three-sixteenths inch in height.

108665. Any violation of any provision of this chapter shall be a misdemeanor.

CHAPTER 6. POISON PREVENTION PACKAGING ACT

Article 1. Definitions and General Provisions

108675. This chapter shall be known and may be cited as the ''California Poison Prevention Packaging Act.''

108680. Unless the provisions or the context otherwise requires, these definitions, rules of construction, and general provisions shall govern the construction of this chapter. As used in this chapter:

(a) ''Department'' means the State Department of Health.

(b) ''Household substance'' means any substance that is customarily produced or distributed for sale for consumption or use, or customarily stored by individuals in or about the household and is one of the following:

(1) A hazardous substance as that term is defined in Section 108125.

(2) A food, drug, or cosmetic, as those terms are defined in Sections 109900, 109925, and 109935, that (i) is toxic, (ii) is corrosive, (iii) is an irritant, (iv) is a strong sensitizer, (v) is flammable or

combustible, or (vi) generates pressure through decomposition, heat, or other means; if it may cause substantial personal injury or substantial illness during or as a proximate result of any customary or reasonably foreseeable handling or use, including reasonably foreseeable ingestion by children.

(3) A substance intended for use as fuel when stored in a portable container and used in the heating, cooking, or refrigeration system of a residential dwelling.

(c) ''Package'' means the immediate container or wrapping in which any household substance is contained for consumption, use, or storage by individuals in or about the household, and, for purposes of household substances, also means any outer container or wrapping used in the retail display of any such substance to consumers.

''Package'' does not include the following:

(1) Any shipping container or wrapping used solely for the transportation of any household substance in bulk or in quantity to manufacturers, packers, or processors, or to wholesale or retail distributors thereof.

(2) Any shipping container or outer wrapping used by retailers to ship or deliver any household substance to consumers unless it is the only container or wrapping.

(d) ''Special packaging'' means packaging that is designed or constructed to be significantly difficult for children under five years of age to open or obtain a toxic or harmful amount of the substance contained therein within a reasonable time and not difficult for normal adults to use properly, but does not mean packaging that all such children cannot open or obtain a toxic or harmful amount of within a reasonable time.

(e) ''Labeling'' means all labels and other written, printed, or graphic matter upon any household substance or its package, or accompanying the substance.

(f) ''Federal act'' means the ''Poison Prevention Packaging Act of 1970'' (15 U.S.C. Sec. 1471 et seq.).

Article 2. Regulations

108685. The department shall, pursuant to Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code, adopt regulations establishing standards for the special packaging of any household substance in accordance with this chapter if the regulations do not differ in substance or proscribe or require conduct that differs from the federal act or regulations issued pursuant to the federal act and if the department finds as follows:

(a) The degree or nature of the hazard to children in the availability of the substance, by reason of its packaging, is such that special packaging is required to protect children from serious

personal injury or serious illness resulting from handling, using, or ingesting the substance.

(b) The special packaging to be required by the standard is technically feasible, practicable, and appropriate for the substance.

108690. In establishing a standard under Section 108685, the department shall consider all of the following:

(a) The reasonableness of the standard.

(b) Available scientific, medical, and engineering data concerning special packaging and concerning childhood accidental ingestions, illness, and injury caused by household substances.

(c) The manufacturing practices of industries affected by the standard.

(d) The nature and use of the household substance.

108695. To the extent that the requirements of this chapter are identical with the federal act, all regulations and any amendments to the regulations adopted pursuant to the federal act, that are in effect on January 1, 1978, or that are adopted on or after that date, shall be the poison prevention packaging regulations of this state.

108700. Any federal regulation adopted by the department pursuant to this chapter shall take effect in this state 30 days after it becomes effective as a federal regulation. Any person who would be adversely affected by adoption of the federal regulation in this state may, within the 30 days prior to its becoming effective in this state, file with the state department, in writing, objections and a request for a hearing. The timely filing of substantial objections to a regulation that has become effective under the federal act, shall stay the adoption of the regulation in this state as a state regulation.

108705. If substantial objections are made to a federal regulation within 30 days prior to its becoming effective in this state or to a proposed regulation within 30 days after it is published, the department, after notice, shall conduct a public hearing to receive evidence on issues raised by the objections. Any interested person or his or her representative shall be heard at the hearing. The department shall act upon objections by order and shall mail the order to objectors by certified mail within a reasonable period of time after the hearing. The order shall be based on evidence contained in the record of the hearing. If the order concerns a proposed regulation of the department, the department may withdraw it or set an effective date for the regulation as published or as modified by the order. The effective date shall be at least 60 days after publication of the order.

108710. Nothing in this chapter shall authorize the department to prescribe specific packaging designs, product content, or package quantity, except as provided in subdivision (b) of Section 108715. In the case of a household substance for which special packaging is required pursuant to a regulation under this chapter, the department

may prohibit the packaging of the substance in packages that it determines are unnecessarily attractive to children.

Article 3. Marketing of Conventional Packages

108715. For the purposes of making any household substance that is subject to a standard established under Section 108685 readily available to elderly or handicapped persons unable to use the substance when packaged in compliance with the standard, the manufacturer or packer, may package any household substance, subject to the standard in packaging of a single size that does not comply with that standard if both of the following are present:

(a) The manufacturer or packer also supplies the substance in packages that comply with the standards.

(b) The packages of the substance, that do not meet the standard, shall bear conspicuous labeling stating: ''This package for household without young children.'' The department regulation may prescribe a substitute statement to the same effect for packaging too small to accommodate the labeling.

108720. If a household substance subject to such a standard is dispensed pursuant to an order of a physician, dentist, or other licensed medical practitioner authorized to prescribe the substance, then it may be dispensed in noncomplying packages only when directed in the order or when requested by the purchaser.

108725. If a household substance subject to such a standard is packaged pursuant to subdivision (b) of Section 108715 in a noncomplying package, and the department determines that the substance is not also being supplied by a manufacturer or packer in popular size packages that comply with the standard, the department may, after giving the manufacturer or packer an opportunity to comply with the purposes of this chapter, require by order that the substance be packaged by the manufacturer or packer exclusively in special packaging complying with the standard if it finds, after opportunity for hearing, that the exclusive use of a special packaging is necessary to accomplish the purposes of this chapter.

CHAPTER 7. CHILDREN'S POISON PREVENTION PACKAGING ACT

108750. This chapter shall be known and may be cited as the Children's Poison Protection Act of 1990.

108755. As used in this chapter:

(a) ''Household'' means any product used under any of the following circumstances:

(1) Directly on humans or pets.

(2) In, on, or around any structure, vehicle, article, surface, or area associated with the household, including, but not limited to,

nonagricultural outbuildings, noncommercial greenhouses, pleasure boats, and recreational vehicles.

(3) In or around any preschool or day care facility.

(b) ''Liquid'' means a liquid preparation that flows readily in its natural state at room temperature containing one or more soluble chemical substances usually dissolved in water or other solvents. ''Solvent'' includes, but is not limited to, aqueous acids (acetic, hydrochloric, and nitric acids) and nonaqueous solutions (spirits, liniments).

(c) ''Toxic household product'' means any substance or mixture of substances that are customarily produced or distributed for sale for use in or about the household, or are customarily stored by individuals in or about the household, and the substance or mixture of substances have the capacity to produce significant personal injury or illness to humans when orally ingested in moderate amounts.

''Toxic household product'' shall not include any of the following:

(1) Products that contain hydrocarbons in which the only known toxicity is through lung aspiration of minute amounts and not absorption through the stomach.

(2) Products that are intended for use in or around the mouth or are reasonably expected to be used orally or ingested.

(3) Economic poisons packaged in containers of more than one gallon liquid or more than 10 pounds dry weight.

(4) With the exception of products containing 2.5 percent or more by weight camphor in liquid formulations, any drug, as defined in the federal Food, Drug, and Cosmetic Act (21 U.S.C. Sec. 301 et seq.) and the Sherman Food, Drug, and Cosmetic Law (Part 5 (commencing with Section 109875)).

(5) Products that, immediately upon ingestion, cause severe damage or irritation to the mouth or tongue, or are fatal upon a single taste.

(6) Products packaged in pressurized aerosol containers.

(7) Products containing ethylene glycol that are described in paragraphs (7), (9), and (38) of subdivision (a) of Section 1500.83 of Part 1500 of Title 16 of the Code of Federal Regulations.

108760. (a) Except as provided in subdivision (b), any toxic household product that contains any substance listed in subdivision (a) of Section 108765, and manufactured on and after January 1, 1992, and sold in California, shall include within the product a bittering agent that is nontoxic, in a concentration so as to render the product aversively bitter, unless the product is packaged with child-resistant safety closures in accordance with the federal Poison Prevention Packaging Act of 1970 (15 U.S.C. Sec. 1471 et seq.) and regulations adopted thereunder (16 C.F.R. 1700.1 et seq.).

(b) Any toxic household product that (1) is required to be registered with the Environmental Protection Agency under the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. Sec.

135 et seq.), (2) is formulated for outdoor or food use economic poisons purposes, and (3) will be reformulated to include a bittering agent, shall comply with subdivision (a) no later than two years from the date when the Environmental Protection Agency has approved a bittering agent for use in outdoor or food use economic poisons.

108765. (a) Manufacturers of toxic household products that contain any of the following substances shall comply with Section 108760, unless the manufacturer documents that there are no signs of toxicity at an oral dose of five grams of product per kilogram of body weight, or the product's container, when full, contains a dose less than that which has previously been documented by the manufacturer to be nontoxic:

(1) Acetonitrile.
(2) Sodium bromate (600 mg or more).
(3) Potassium bromate (50 mg or more).
(4) Carbamates (used in insecticide formulations).
(5) Chlorinated hydrocarbon insecticides and solvents (5 percent or more by weight).
(6) Cyanide.
(7) Diquat.
(8) Ethylene glycol (10 percent or more by weight).
(9) Organophosphate insecticides.
(10) Metaldehyde.
(11) Methanol (methyl alcohol)(4 percent or more by weight).
(12) Phenol (10 percent or more by weight).
(13) Pine oil, in concentrations of 20 percent or more.
(14) Strychnine formulations.

(b) Due to the lack of long-term testing results for dermal exposure of available bittering agents, manufacturers of toxic household products that contain any of the following substances in liquid formulations shall, in lieu of complying with Section 108760, package their products with child-resistant safety closures in accordance with the federal Poison Prevention Packaging Act of 1970 (15 U.S.C. Sec. 1471 et seq.) and regulations adopted thereunder (16 C.F.R. 1700.1 et seq.):

(1) Camphor (2.5 percent or more by weight).
(2) Diethyltoluamide (5 percent or more by weight).
(3) Ethylhexanediol (5 percent or more by weight).

108770. (a) It is unlawful for any person to distribute or sell a toxic household product or cause a toxic household product to be distributed or sold in this state if it does not meet the requirements of this chapter.

(b) The prohibition contained in subdivision (a) shall not apply to a person engaged in the business of wholesale or retail distribution of a toxic household product, unless the person is engaged in the manufacture of the product, or has knowledge that a toxic household

product that he or she is distributing or selling is in violation of this chapter.

(c) Nothing in this section shall be construed to exempt a distributor of a house brand from any provision of this chapter.

108775. (a) Any person may bring a civil action in a court of competent jurisdiction to enforce the requirements of this chapter. The court may grant injunctive relief in any action brought pursuant to this section.

(b) Exemplary damages, as provided for in Section 3294 of the Civil Code, may also be awarded in any action brought pursuant to this section.

(c) Whenever the person bringing the action pursuant to this section is the prevailing party, he or she shall be awarded attorney's fees and costs by the court.

108780. Any person who violates any provision of this chapter shall be liable for a civil penalty not to exceed five thousand dollars ($5,000) for each day of violation, that shall be assessed and recovered in a civil action brought in the name of the people of the State of California by the Attorney General in any court of competent jurisdiction.

108785. All civil penalties collected pursuant to Section 108780 shall be deposited in the Children's Poison Protection Act of 1990 Fund, that is hereby created in the State Treasury. Money in the fund shall be allocated by the Emergency Medical Services Authority, when appropriated thereto by the Legislature, to the California Regional Poison Control Centers for the purpose of their poisoning prevention education programs.

CHAPTER 8. LEAD IN TABLEWARE

108800. Cautionary statements that are required by law, or regulations adopted pursuant to law, to be printed upon the labels of containers in which dangerous drugs, poisons, and other harmful substances are packaged shall be printed in the English language in a conspicuous place in type of conspicuous size in contrast to the typography, layout, or color of the other printed matter on the label.

108805. Unless a specific color is prescribed, the cautionary statements may be printed in any color, but preferably red, upon a plain and distinctly contrasting background.

108810. The words ''safe,'' ''safely,'' ''safety,'' or words having the same meaning that would detract from the value of the cautionary statement shall not be used upon the labels of containers of dangerous drugs, poisons, and other highly toxic substances.

108815. Nothing in this chapter shall apply to products produced by a laboratory licensed under Section 351 of Title III of the Public Health Service Act (Public Law 410, Chapter 373, Seventy-eighth Congress, Second Session).

108820. Any violation of this chapter is a misdemeanor.
108825. This chapter shall become operative January 1, 1960.

CHAPTER 9. CONTROL OF LEAD RELEASE FROM TABLEWARE

Article 1. Definitions

108850. The Legislature finds and declares all of the following:
(a) The program maintained by the United States Food and Drug Administration to regulate the amount of lead and cadmium released from ceramic, metal, and other dishware and tableware is inadequate to protect Californians from the importation and sale of unsafe tableware in this state.
(b) Recent inspection and sampling conducted by local and state health departments in California has demonstrated that significant amounts of unsafe tableware are in fact being imported and sold in California.
(c) The standards established by the federal government for acceptable lead and cadmium release are likely inadequate to fully protect public health and may be inconsistent with requirements that already exist in California law governing exposure to lead and cadmium.
(d) It is the intent of the Legislature that the department, first, establish its own program to protect the public from unsafe tableware and, second, develop standards for lead and cadmium release from tableware that are consistent with existing state law.
108855. For purposes of this chapter the following definitions shall apply:
(a) ''Director'' means the Director of Health Services.
(b) ''Department'' means the State Department of Health Services.
(c) ''Distributor'' means any person who brings tableware into California from another state for sale.
(d) ''Importer'' means any person who brings tableware into California from another country for sale.
(e) ''Manufacturer'' means any person who makes tableware sold in California.
(f) ''Small business'' means any manufacturer, importer, or distributor whose gross annual revenue for the sale of tableware is thirty thousand dollars ($30,000) or less.
(g) ''Tableware'' means any glazed ceramic, enamel metalware, or pewter article, container, or utensil that may be used in the preparation, serving, or storage of food or drink.

Article 2. Standards

108860. It is unlawful to manufacture, process, import, sell, deliver, hold for sale, supply, or offer for sale in this state any tableware that releases a level of lead or cadmium in violation of the standards contained in the Compliance Policy Guides 7117.06 and 7117.07 as described in 54 Federal Register 23485 or any subsequent, more stringent standards adopted by the United States Food and Drug Administration, as determined by the director.

108865. On or before January 1, 1993, the department shall evaluate the standards specified in Section 108860 to determine whether they are adequate to protect the public health, including, but not limited to, the health of children and other sensitive groups of the population, and shall report the results of this evaluation to the Legislature. The evaluation and report shall specifically include recommendations regarding standards governing the release of lead and cadmium from tableware that would be necessary to adequately protect the public health and shall include comparisons with other public health standards governing exposure to lead and cadmium. The report shall also identify any additional studies necessary to adequately evaluate the public health impacts of exposures to lead and cadmium.

108870. (a) Except as provided in subdivisions (c) and (d), each piece of tableware sold, or offered for sale, in this state shall be permanently and indelibly marked with the name of the manufacturer or importer responsible for the sale of the tableware in California.

(b) For the purposes of this section, permanently and indelibly marked means fired or manufactured into the glazed tableware.

(c) This section shall not apply to any tableware that is manufactured without lead or cadmium as an intentionally added ingredient or as an unintentional contaminant.

(d) This section shall not apply to any tableware product that is of a peculiar structure or too small to accommodate the name of the manufacturer or importer in accordance with subdivision (a), provided that the product either (1) is permanently and indelibly marked with a registered trademark that is on file with the department, or is described and depicted in a certificate of registration that is on file with the department, or (2) is part of a tableware set or pattern, one or more pieces that are marked in accordance with subdivision (a).

Article 3. Enforcement

108875. The department is responsible for the administration and enforcement of this chapter. The department shall annually report to the Legislature concerning the number and findings of inspections

performed and samples taken to determine compliance with this chapter.

108880. (a) For fiscal years 1991–92 and 1992–93, the department shall levy a fee of five hundred dollars ($500) for each manufacturer, importer, and distributor of tableware sold in this state to be used for the implementation of this chapter, except that the department shall levy a fee of one hundred fifty dollars ($150) for small businesses. A penalty of 10 percent per month shall be added to any fee that is not paid when due. The fee shall not exceed the costs of administering and enforcing this chapter for the 1991–92 and 1992–93 fiscal years.

No later than July 1993, the department shall establish and implement a fee schedule that assesses an annual fee upon manufacturers, importers, and distributors of tableware sold in California. The fees shall be based on the reasonable anticipated costs that will be incurred by the department, and by local health officers if an agreement is executed pursuant to Section 108885, to implement and enforce this chapter. In calculating the necessary fees, the department shall include any civil penalties generated pursuant to Section 100425. Commencing in fiscal year 1993–94, the fee established pursuant to this subdivision shall be adjusted pursuant to Section 100425 and shall further be adjusted annually by reducing the fee by an amount equal to the total amount of civil penalties collected pursuant to Section 108900 during the previous calendar year, divided by the total number of manufacturers, importers, and distributors having paid fees during the previous calendar year. The fee collected pursuant to subdivision (a) shall terminate upon implementation of the fee schedule developed pursuant to this subdivision. The fee schedule shall provide for the recovery of all costs of implementing this chapter, including the cost of establishing the fee schedule as prescribed in this section. In the event that the department's reasonable costs in any one fiscal year exceed the available fees for that year, the department shall, as necessary, delay any activities in administering this chapter that will incur costs exceeding available fees until the following year. All moneys collected as fees pursuant to this section shall be expended in carrying out this chapter.

108885. The department and a health officer, as defined in Section 111015, may enter into an agreement designating the local health department of a city, county, city and county, or local health district as the department's authorized agent for the purposes of enforcing this chapter. If an agreement is executed pursuant to this section, the department shall make fee revenues available to the health officer for performing duties relating to enforcing this chapter.

108890. (a) For the purposes of enforcing this chapter, any authorized agent of the department may, upon presenting

credentials showing that he or she is an authorized agent of the department and at a reasonable time, do any of the following:

(1) Enter any factory, warehouse, or establishment in which any tableware is manufactured, held, distributed, used, or sold.

(2) Enter any vehicle that is being used to transport or hold tableware.

(3) Enter any place where any tableware is suspected of being held or sold in violation of this chapter.

(4) Inspect any factory, warehouse, establishment, vehicle, or place in which any tableware is manufactured, held, transported, distributed, used, or sold, and all equipment, raw materials, finished and unfinished materials, containers, and tableware therein. The inspection shall include any record, file, paper, process, control, and facility that has a bearing on whether the tableware complies with this chapter.

(5) Secure any sample or specimen of any tableware or of any release of lead or cadmium from tableware. If the agent obtains any samples prior to leaving the premises, he or she shall leave a receipt describing any sample obtained. The department shall secure only the quantity of tableware that is reasonably necessary to conduct the tests to determine the release of lead or cadmium as determined appropriate by the department.

(6) Have access to all records of carriers in commerce relating to the movement in commerce of any tableware, or the holding for sale of the tableware, and the quantity, shipper, and consignee.

(b) It is unlawful for any person to refuse to permit entry or inspection, the taking of samples or other evidence, including photographs, or access to copying of any record as authorized by this chapter, or to conceal the samples or evidence, or withhold evidence concerning them.

108895. The department may publish or publicly distribute any information regarding tableware, including results of tests and investigations, after assuring the accuracy of those tests and investigations, as the department considers necessary for the protection of public health and safety of the consumer or for the protection of the consumer from fraud.

108900. (a) The department may impose a civil penalty payable to the department upon any person who violates any provision of this chapter or any regulation adopted pursuant to this chapter in the amount of not more than five thousand dollars ($5,000) per day. Each day a violation continues shall be considered a separate violation.

(b) If, after examination of a possible violation and the facts surrounding that possible violation, the department concludes that a violation has occurred, the department may issue a complaint to the person charged with the violation. The complaint shall allege the acts or failures to act that constitute the basis for the violation and the amount of the penalty. The complaint shall be served by personal

service or by certified mail and shall inform the person so served of the right to a hearing.

(c) Any person served with a complaint pursuant to subdivision (c) may, within 20 days after service of the complaint, request a hearing by filing with the department a notice of defense. A notice of defense is deemed to have been filed within the 20-day period if it is postmarked within the 20-day period. If a hearing is requested by the person, it shall be conducted within 90 days after the receipt by the department of the notice of defense. If no notice of defense is filed within 20 days after service of the complaint, the department shall issue an order setting the penalty as proposed in the complaint unless the department and the person have entered into a settlement agreement, in that case the department shall issue an order setting the penalty in the amount specified in the settlement agreement. When the person has not filed a notice of defense or where the department and the person have entered into a settlement agreement, the order shall not be subject to review by any court or agency.

(d) Any hearing required under this section shall be conducted by a departmental hearing officer appointed by the director. The department shall adopt regulations establishing a hearing process to review complaints. Until the department adopts these regulations, all hearings shall be conducted in accordance with Chapter 5 (commencing with Section 11500) of Part 1 of Division 3 of Title 2 of the Government Code, except that hearings shall be conducted by a departmental hearing officer appointed by the director. The department shall have all the powers granted in that chapter.

(e) Orders setting civil penalties under this section shall become effective and final upon issuance thereof, and payment shall be made within 30 days of issuance. A copy of the order shall be served by personal service or by certified mail upon the person served with the complaint.

(f) Within 30 days after service of a copy of a decision issued by the director, any person so served may file with the superior court a petition for writ of mandate for review of the decision. Any person who fails to file the petition within this 30-day period may not challenge the reasonableness or validity of the decision or order of the director in any judicial proceeding brought to enforce the decision or order or for other remedies. Section 1094.5 of the Code of Civil Procedure shall govern any proceedings conducted pursuant to this subdivision. In all proceedings pursuant to this subdivision, the court shall uphold the decision of the director if the decision is based upon substantial evidence in the whole record. The filing of a petition for writ of mandate shall not stay any corrective action required pursuant to this chapter or the accrual of any penalties assessed pursuant to this section. This subdivision does not prohibit the court from granting any appropriate relief within its jurisdiction.

(g) The remedies under this section are in addition to, and do not supersede, or limit, any and all other remedies, civil or criminal.

(h) If the violation is committed after a previous imposition of a penalty under this section that has become final, or if the violation is committed with intent to mislead or defraud, or if the violation concerns tableware primarily used by children or marketed for children, the person shall be subject to imprisonment for not more than one year in the county jail or imprisonment in state prison, or a fine of not more than ten thousand dollars ($10,000), or both the imprisonment and fine.

108905. (a) Whenever an authorized agent of the department finds, or has probable cause to believe, that any tableware has the potential to release amounts of lead or cadmium in violation of this chapter, he or she shall affix to the tableware a detention tag, embargo tag, or other similar marking, as determined appropriate by the authorized agent. The tag or other marking shall give notice that the tableware is suspected of releasing amounts of lead or cadmium in violation of this chapter and that no person shall remove or dispose of the tableware by sale or otherwise until permission for removal or disposal is given by an authorized agent of the department or the court.

(b) For the purposes of this section, an authorized agent has probable cause to believe that tableware has the potential to release amounts of lead or cadmium in violation of this chapter when, but not limited to instances when, the tableware tests positive for lead or cadmium release using the field test described in the document published by the United States Food and Drug Administration entitled Analytical Letters Vol. 21, 1988, pages 2145 to 2154, inclusive, or any other test for lead release subsequently approved for field use by the United States Food and Drug Administration and determined by the department to be at least as effective a test for lead or cadmium release as the test described in this subdivision.

(c) If a field test conducted pursuant to subdivision (b) tests positive for lead release, the department shall use the Association of Official Analytical Chemists/American Society for Testing and Material 24-hour test method, or any other test subsequently approved by the federal Food and Drug Administration determined by the department to be at least as effective a test for lead or cadmium release as the test described in this subdivision. The department shall conduct or obtain those tests within a reasonable time after embargoing affected tableware, and shall release any tableware found not to violate the standards of this chapter within a reasonable time after the laboratory test has been completed. For any food establishment, as defined in Section 113780, the department shall conduct or obtain those tests within a reasonable time, not to exceed 10 days, after embargoing affected tableware, and shall

release any tableware found not to violate the standards of this chapter within 96 hours after the laboratory test has been conducted.

(d) If an item of tableware is found to violate this chapter, the manufacturer, importer, retailer, and distributor shall, at the option of the holder of the tableware, either provide the holder of the tableware with comparable replacement tableware acceptable to the holder or be liable to the holder of the tableware for the cost of purchasing comparable replacement tableware.

(e) No person shall remove, sell, or dispose of detained or embargoed tableware without permission of an authorized agent of the department or a court.

108910. Any tableware that violates this chapter shall also be governed by the procedures set forth in Sections 111875, 111880, 111885, 111895, 111900, 111910, and 111915. Except for use of the procedures set forth in those sections, nothing in this section shall be interpreted as making this chapter part of Part 5 (commencing with Section 109875).

108915. This chapter shall become operative on July 1, 1991.

PART 4. DRUGS, DEVICES, AND COSMETICS

CHAPTER 1. DEFINITIONS (Reserved)

CHAPTER 2. POWERS AND DUTIES (Reserved)

CHAPTER 3. ENFORCEMENT AND PENALTIES (Reserved)

CHAPTER 4. TREATMENT OF CANCER AND OTHER SERIOUS DISEASES

Article 1. Intent and Definitions

109250. The effective diagnosis, care, treatment or cure of persons suffering from cancer is of paramount public importance. Vital statistics indicate that approximately 16 percent of the total deaths in the United States annually result from one or another of the forms of cancer. It is established that accurate and early diagnosis of many forms of cancer, followed by prompt application of methods of treatment that are scientifically proven, either materially reduces the likelihood of death from cancer or may materially prolong the useful life of individuals suffering therefrom.

Despite intensive campaigns of public education, there is a lack of adequate and accurate information among the public with respect to presently proven methods for the diagnosis, treatment, and cure of cancer. Various persons in this state have represented and continue to represent themselves as possessing medicines, methods, techniques, skills, or devices for the effective diagnosis, treatment, or cure of cancer, whose representations are misleading to the public,

with the result that large numbers of the public, relying on the representations, needlessly die of cancer, and substantial amounts of the savings of individuals and families relying on the representations are needlessly wasted.

It is, therefore, in the public interest that the public be afforded full and accurate knowledge as to the facilities and methods for the diagnosis, treatment, and cure of cancer available in this state and that to that end there be provided means for testing and investigating the value or lack thereof of alleged cancer remedies, devices, drugs, or compounds, and informing the public of the facts found, and protecting the public from misrepresentation in these matters.

The importance of continuing scientific research to determine the cause or cure of cancer is recognized, and the department shall administer this article and Article 2 (commencing with Section 109300) with due regard for the importance of bona fide scientific research and the clinical testing in hospitals, clinics, or similar institutions of new drugs or compounds.

109255. There is in the department a Cancer Advisory Council composed of nine physicians and surgeons licensed to practice medicine in, and residing in, this state, three persons who are not physicians and surgeons, two persons representing nonprofit cancer research institutes recognized by the National Cancer Institute, and the director of the department, who shall be an ex officio member. The members of the council shall be appointed by the Governor to serve for terms of four years. The Governor, in appointing the first members, shall appoint at least one member from the faculty of each of the schools teaching medicine and surgery and located in this state that are approved by the Medical Board of California. The Governor shall endeavor to maintain one member from the faculty of each school in making subsequent appointments.

109260. The members of the council, other than the director of the department, shall receive no compensation for their services, but shall be allowed their actual necessary traveling expenses incurred in the discharge of their duties.

Except as provided in Section 109390 the council is not required to conduct meetings open to the public in accordance with Article 9 (commencing with Section 11120) of Chapter 1 of Part 1 of Division 3 of Title 2 of the Government Code.

109265. The council shall annually elect one of its members to serve as chairman. The council shall meet at least twice each year, and as often in addition as necessary, for the purpose of carrying out its duties.

109270. The department shall:

(a) Prescribe reasonable regulations with respect to the administration of this article and Article 2 (commencing with Section 109300).

(b) Investigate violations of this article and Article 2 (commencing with Section 109300), and report the violations to the appropriate enforcement authority.

(c) Secure the investigation and testing of the content, method of preparation, efficacy, or use of drugs, medicines, compounds, or devices proposed to be used, or used, by any individual, person, firm, association, or other entity in the state for the diagnosis, treatment, or cure of cancer, prescribe reasonable regulations with respect to the investigation and testing, and make findings of fact and recommendations upon completion of any such investigation and testing.

(d) Adopt a regulation prohibiting the prescription, administration, sale or other distribution of any drug, substance, or device found to be harmful or of no value in the diagnosis, prevention or treatment of cancer.

(e) Hold hearings in respect of those matters involving compliance with this article and Article 2 (commencing with Section 109300) and subpoena witnesses and documents. Any or all hearings may be held before the Cancer Advisory Council. Any administrative action to be taken by the department as a result of the hearings shall be taken only after receipt of the recommendations of the council. Prior to issuance of a cease and desist order under Section 109345, a hearing shall be held. The person furnishing a sample under Section 109295 shall be given due notice of the hearing and an opportunity to be heard.

(f) Contract with independent scientific consultants for specialized services and advice.

In the exercise of the powers granted by this section, the department shall consult with the Cancer Advisory Council.

109275. (a) Physicians and surgeons shall inform patients being treated for any form of breast cancer of the alternative efficacious methods of treatment by providing the patient with the written summary described in subdivision (c).

(b) The failure of a physician and surgeon to inform a patient, by means of a standardized written summary developed by the department on the recommendation of the Cancer Advisory Council in accordance with subdivision (c), in layman's language and in a language understood by the patient, of alternative efficacious methods of treatment that may be medically viable, including surgical, radiological, or chemotherapeutic treatments or combinations thereof, when the patient is being treated for any form of breast cancer, constitutes unprofessional conduct within the meaning of Chapter 5 (commencing with Section 2000) of Division 2 of the Business and Professions Code.

(c) (1) A standardized written summary in layman's language and in a language understood by the patient shall be developed by the department with the recommendations of the Cancer Advisory

Council, and shall be printed and made available by the Medical Board of California to physicians and surgeons, for the purposes of informing the patient of the advantages, disadvantages, risks and descriptions of the procedures with regard to medically viable and efficacious alternative methods of treatment for breast cancer as required by subdivision (a).

(2) Commencing no later than January 1, 1995, and every three years thereafter, the department shall review the written summary and shall revise the written summary if the department determines that new or revised information should be included in the written summary.

(3) At the next revision of the standardized written summary required by this section, the department shall incorporate all of the following additional information:

(A) Information regarding methods of treatment for breast cancer that are in the investigational or clinical trial stage and are recognized for treatment by the Physician's Data Query of the National Cancer Institute.

(B) Available reference numbers, including, but not limited to, the ''800'' telephone numbers for the National Cancer Institute and the American Cancer Society, in order for breast cancer patients to obtain the most recent information.

(C) A discussion of breast reconstruction surgery, including, but not limited to, problems, benefits, and alternatives.

(D) Statistics on the incidence of breast cancer.

(d) Prior to performance of a biopsy, the physician and surgeon shall note on the patient's chart that he or she has given the patient the written summary required by this section.

(e) The Medical Board of California shall establish a distribution system for the breast cancer treatment alternatives written summary that is linked to the process of biennial renewal of physician and surgeon licenses.

109280. A standardized written summary in layman's language and in a language understood by patients shall be developed by the department on the recommendation of the Cancer Advisory Council and printed and made available by the Medical Board of California to physicians and surgeons, concerning the advantages, disadvantages, risks, and descriptions, of procedures with regard to medically viable and efficacious alternative methods of treatment of prostate cancer. Physicians and surgeons are urged to make the summary available to patients when appropriate.

109285. For the purposes of this article and Article 2 (commencing with Section 109300) ''cancer'' means all malignant neoplasms regardless of the tissue of origin, including malignant lymphoma, Hodgkins disease, and leukemia.

109290. No person may undertake to treat or alleviate cancer by use of drugs, surgery, or radiation unless the person holds a license

issued under a law of this state expressly authorizing the diagnosis and treatment of disease by use of drugs, surgery, or radiation.

109295. On written request by the department, delivered personally or by mail, any individual, person, firm, association, or other entity engaged, or representing himself, or itself, as engaged, in the diagnosis, treatment, alleviation, or cure of cancer shall furnish the department with the sample as the department may deem necessary for adequate testing of any drug, medicine, compound, or device used or prescribed by the individual, person, firm, association, or other entity in the diagnosis, treatment, alleviation, or cure of cancer, and shall specify the formula of any drug or compound and name all ingredients by their common or usual names, and shall, upon like request by the department, furnish further necessary information as it may request as to the composition and method of preparation of and the use that any drug, compound, or device is being put by the individual, person, firm, association, or other entity. This section shall apply to any individual, person, firm, association, or other entity that renders health care or services to individuals who have or believe they have cancer. This section also applies to any individual, person, firm, association, or other entity that by implication causes individuals to believe they have cancer.

The failure to either provide the sample, disclose the formula, or name the ingredients as required by this section shall be conclusively presumed that the drug, medicine, compound or device that is the subject of the department's request has no value in the diagnosis, treatment, alleviation, or cure of cancer.

Article 2. Prohibitions and Enforcement

109300. The sale, offering for sale, holding for sale, delivering, giving away, prescribing or administering of any drug, medicine, compound, or device to be used in the diagnosis, treatment, alleviation, or cure of cancer is unlawful and prohibited unless (1) an application with respect thereto has been approved under Section 505 of the federal Food, Drug and Cosmetic Act, or (2) there has been approved an application filed with the board setting forth:

(a) Full reports of investigations that have been made to show whether or not the drug, medicine, compound, or device is safe for the use, and whether the drug, medicine, compound, or device is effective in the use;

(b) A full list of the articles used as components of the drug, medicine, compound, or device;

(c) A full statement of the composition of the drug, medicine, compound, or device;

(d) A full description of the methods used in, and the facilities and controls used for, the manufacture, processing, and packing of the drug, medicine, or compound or in the case of a device, a full

statement of its composition, properties, and construction and the principle or principles of its operation;

(e) Such samples of the drug, medicine, compound, or device and of the articles used as components of the drug, medicine, compound, or device as the board may require; and

(f) Specimens of the labeling and advertising proposed to be used for the drug, medicine, compound, or device.

109305. Within 180 days after the filing of an application provided for in subdivision (2) of Section 109300 or an additional period as may be agreed upon by the board and the applicant, the board shall either:

(a) Approve the application if it finds that none of the grounds for denying approval specified in Section 109315 applies.

(b) Give the applicant notice for an opportunity for a hearing before the board on the question whether the application is approvable. If the applicant elects to accept the opportunity for hearing by written request within 30 days after the notice, the hearing shall commence not more than 90 days after the expiration of the 30 days unless the board and the applicant otherwise agree. Any hearing shall thereafter be conducted on an expedited basis and the board order thereon shall be issued within 90 days after the date fixed by the board for filing final briefs.

Prior to approving the application or giving the applicant notice for an opportunity for a hearing, the board shall have received a written report from the Cancer Advisory Council setting forth its recommendations on the action the board should take. The report shall be signed by a majority of the members of the council.

109310. In the case of any drug, medicine, compound or device for that an approval of an application filed pursuant to this article and Article 1 (commencing with Section 109250) is in effect, the applicant shall establish and maintain the records, and make the reports to the board, of data relating to clinical experience and other data or information, received or otherwise obtained by the applicant with respect to the drug, medicine, compound, or device, as the board may prescribe on the basis of a finding that the records and reports are necessary in order to enable the board to determine, or facilitate a determination, whether there is or may be ground for suspension of the application.

Every person required under this section to maintain records, and every person in charge of custody thereof, shall, upon request of an agent of the board, permit the agent at all reasonable times to have access to and copy and verify the records.

109315. The board shall issue an order refusing to permit the application to become effective, if, after due notice to the applicant and opportunity for a hearing, the board finds any of the following:

(a) The investigations, reports that are required to be submitted to the board pursuant to subdivision (2) of Section 109300 do not include adequate tests by all methods reasonably applicable to show

whether or not a drug, medicine, compound, or device is safe for use in the diagnosis, treatment, alleviation, or cure of cancer.

(b) The results of tests specified in subdivision (a) show that a drug, medicine, compound or device is unsafe for use under the conditions specified in subdivision (a) or do not show that the drug, medicine, compound, or device is safe for use under the conditions.

(c) The methods used in, and the facilities and controls used for, the manufacture, processing, and packing of a drug, medicine, compound, or device are inadequate to preserve its identity, strength, quality, and purity and with respect to a device are inadequate to preserve its safety or effectiveness.

(d) Upon the basis of the information submitted to it as part of the application, or upon the basis of any other information before it with respect to a drug, medicine, compound, or device, it has insufficient evidence to determine whether the drug, medicine, compound, or device is safe for use under the conditions specified in subdivision (a).

(e) Evaluated on the basis of the information submitted to it as part of the application and any other information before it with respect to the drug, medicine, compound, or device, there is a reasonable doubt that the drug, medicine, compound, or device will have the effect it purports or is represented to have under the conditions of use prescribed, recommended, or suggested in the proposed labeling or advertising thereof.

(f) The application contains any untrue statement of a material fact.

109320. (a) The board shall issue an order withdrawing approval of an application concerning any drug, medicine, compound, or device if, after due notice to the applicant and opportunity for a hearing, the board finds any of the following:

(1) That clinical or other experience, tests, or other scientific data show that the drug, medicine, compound, or device is unsafe for use under the conditions of use upon the basis that the application was approved;

(2) That new evidence of clinical experience, not contained in the application or not available to the board until after the application was approved, or tests by new methods, or tests by methods not deemed reasonably applicable when the application was approved, evaluated together with the evidence available to the board when the application was approved, shows that the drug, medicine, compound, or device is not shown to be safe for use under conditions of use upon the basis that the application was approved; or

(3) On the basis of new information with respect to the drug, medicine, compound, or device, evaluated together with the evidence available to the board when the application was approved, that there is a lack of substantial evidence that the drug, medicine, compound, or device will have the effect it purports or is represented

to have under the conditions of use prescribed, recommended, or suggested in the labeling or advertising thereof; or

(4) That the application contains any untrue statement of a material fact.

(b) If the board finds that there is an imminent hazard to the public health, it may suspend the approval of the application immediately.

(c) The board may also, after due notice and opportunity for hearing, withdraw the approval of an application with respect to any drug, medicine, compound, or device under this section if the board finds any of the following:

(1) That the applicant has failed to establish a system for maintaining required records, or has repeatedly or deliberately failed to maintain the records or to make required reports, or the applicant has refused to permit access to, or copying or verification of, the records.

(2) That on the basis of new information before the board, evaluated together with the evidence before it when the application was approved, the methods used in, or the facilities and controls used for, the manufacture, maintenance, processing, and packing of the drug, medicine, compound, or device are inadequate to assure and preserve its identity, strength, quality, and purity and with respect to a device are inadequate to preserve its safety or effectiveness and were not made adequate within a reasonable time after receipt of written notice from the board specifying the matter complained of.

(3) That on the basis of new information before it, evaluated together with the evidence before it when the application was approved, the labeling of the drug, medicine, compound, or device, based on a fair evaluation of all material facts, is false or misleading in any particular and was not corrected within a reasonable time after receipt of written notice from the board specifying the matter complained of.

(d) Any order under this section shall state the findings upon which it is based.

109325. This article and Article 1 (commencing with Section 109250) shall not apply to the use of any drug, medicine, compound, or device intended solely for legitimate and bona fide investigational purposes by experts qualified by scientific training and experience to investigate the safety and therapeutic value thereof unless the department shall find that the drug, medicine, compound, or device is being used in diagnosis or treatment for compensation and profit. In order to qualify for an exemption under this section there shall be on file with the federal Department of Health, Education, and Welfare a current and unrevoked investigational new drug application issued pursuant to subdivision (i) of Section 505 of the federal Food, Drug, and Cosmetic Act (21 U.S.C. Sec. 355(i)), or the following conditions shall be complied with:

(a) The label of the drug, medicine, compound, or device shall bear the statement ‘‘Caution: New drug (or medicine or compound or device). Use in the diagnosis, treatment, alleviation, or cure of cancer limited by law to investigational use.’’

(b) The drug, medicine, compound, or device has had adequate testing on appropriate experimental animals to demonstrate a lack of toxicity and hazard sufficient to permit its use in or on human beings and to establish with clarity the margins of safety ordinarily recognized by experts qualified by scientific training and experience to investigate the safety and effectiveness of the drugs, substances, or devices.

(c) The drug, medicine, compound, or device is to be used solely for investigational use by, or under the direction of, an expert qualified by scientific training and experience to investigate the safety and effectiveness of the drug, medicine, compound, or device.

(d) A written statement signed by the expert has been filed with the board. The statement shall show what facilities the expert will use for the investigation to be conducted by him or her, and that the drug, medicine, compound, or device will be used solely by him or her or under his or her direction for the investigation. The statement shall contain information identifying any assistant or agent of the expert who uses the drug, medicine, compound, or device under the direction of the expert.

(e) Complete records of the investigation shall be kept by the expert and all records shall be made available by the expert for inspection upon the request of any agent of the board at any reasonable hour as long as the expert desires exemption.

(f) The expert shall inform any persons who participate in the investigation as patients, that the drug, medicine, compound, or device is being used for investigational purposes and shall obtain the consent of the persons or their representatives.

109330. Section 109300 does not apply to any device used within the scope of his or her license privileges by a physician and surgeon or dentist licensed as such in this state.

109335. The failure of any individual, person, firm, association, or other entity representing himself, or itself, as engaged in the diagnosis, treatment, alleviation, or cure of cancer to comply with any of the regulations adopted under this article and Article 1 (commencing with Section 109250) is a misdemeanor. A third, and subsequent violations, of this section is a felony.

This article and Article 1 (commencing with Section 109250) shall not apply to any person who depends exclusively upon prayer for healing in accordance with the teachings of a bona fide religious sect, denomination, or organization, nor practitioner thereof.

109340. The investigation or testing of any product shall not be deemed to imply or indicate any endorsement of the qualifications or value of any product. No person shall make any representation that

investigation or testing hereunder constitutes any approval or endorsement of his or her, or its, activities by the Cancer Advisory Council or the department. The investigation or testing of any product shall not be deemed to imply or indicate that the product is useless or harmful and during testing no person shall make any representation, except to the department or Cancer Advisory Council, that the product under test is discredited or that it has been found useless or harmful.

109345. Following an investigation or testing of the content or composition of any drug, medicine, compound, or device used by any individual, person, firm, association, or other entity in the diagnosis, treatment, alleviation, or cure of cancer, and after hearing as provided in Section 109270, the department, upon recommendation of the Cancer Advisory Council, may direct that any individual, person, firm, association, or other entity shall cease and desist any further prescribing, recommending, or use of any drug, medicine, compound, or device, or any substantially similar drug, medicine, compound, or device, in the diagnosis or treatment of cancer.

In the investigation or testing required by this article and Article 1 (commencing with Section 109250) to determine the value or lack thereof of any drug, medicine, compound or device in the diagnosis, treatment, or cure of cancer, the department shall, as it deems necessary or advisable, utilize the facilities and findings of its own laboratories or other appropriate laboratories, clinics, hospitals, and nonprofit cancer research institutes recognized by the National Cancer Institute, within this State or the facilities and findings of the Federal Government, including the National Cancer Institute. Upon a recommendation by the Cancer Advisory Council, the department shall arrange, by contract, for investigation by and submission to it of findings, conclusions, or opinions of trained scientists in the appropriate departments of universities, medical schools, clinics, hospitals, and nonprofit cancer research institutes recognized by the National Cancer Institute, and the submission to it of findings, conclusions, or opinions of other qualified scientists. Prior to the issuance of a cease and desist order under this section, the Cancer Advisory Council, by the affirmative vote of at least 11 of its members, at least one of whom shall not be a physician and surgeon, shall make a written finding of fact based on the investigation that the drug, medicine, compound, or device so investigated has been found to be either definitely harmful or of no value in the diagnosis, treatment, alleviation, or cure of cancer and the department must be satisfied beyond a reasonable doubt that the written findings of the fact are true.

109350. The department may direct that any individual, person, firm, association, or other entity shall cease and desist any further prescribing, recommending or use of any drug, medicine, compound or device for that no application has been approved under this article

and Article 1 (commencing with Section 109250) unless its use is exempt under Section 109325 or Section 109330.

109355. (a) Any violation of this article and Article 1 (commencing with Section 109250), of the regulations adopted thereunder or of a cease and desist order issued by the department under Section 109345 or 109350 may be enjoined by the superior court in any county, on application of the department.

(b) Proceedings under this section shall be governed by Chapter 3 (commencing with Section 525) of Title 7 of Part 2 of the Code of Civil Procedure.

109360. Any person against whom an injunction or cease and desist order has been issued, under this article and Article 1 (commencing with Section 109250), may not undertake to use in the diagnosis, treatment, alleviation or cure of cancer any new, experimental, untested, or secret drug, medicine, compound, or device for that there is no approved application on file or that does not qualify for an exemption, without first submitting an application to the department.

109365. It is unlawful for any person, with the intent to defraud, to falsely represent and provide for compensation a device, substance, method or treatment as effective to diagnose, arrest, prevent, or cure cancer. Nothing in this section shall abridge the existent rights of the press.

109370. Except as provided in Section 109335, a violation of this article and Article 1 (commencing with Section 109250) is punishable by imprisonment in the county jail for a period not exceeding one year, or in the state prison, or by a fine not exceeding ten thousand dollars ($10,000), or by both the imprisonment and fine.

109375. The director shall investigate possible violations of this article and Article 1 (commencing with Section 109250) and report violations to the appropriate enforcement authority.

109380. County health officers, district attorneys and the Attorney General shall cooperate with the director in the enforcement of this article and Article 1 (commencing with Section 109250).

109385. The department, upon recommendation of the Cancer Advisory Council, may from time to time publish reports based on its investigation or testing of any drug, medicine, compound, or device prescribed, recommended, or used by any individual, person, firm, association, or other entity, and when, in the opinion of a majority of the members of the Cancer Advisory Council, the use of any drug, medicine, compound, or device in the diagnosis, treatment or cure of cancer constitutes an imminent danger to health or a gross deception of the public, the department may take appropriate steps to publicize the same.

109390. All hearings authorized by this article and Article 1 (commencing with Section 109250) shall be conducted in accordance

with Chapter 5 (commencing with Section 11500) of Part 1, Division 3, Title 2 of the Government Code.

109395. No provision of this article and Article 1 (commencing with Section 109250) shall preclude reconsideration of an application for use of any drug, medicine, compound or device for the diagnosis, treatment, alleviation or cure of cancer if new evidence or matter is presented to the department and the reconsideration is predicated upon compliance with the applicable sections of the law, and presentation of data developed subsequent to the applicable ruling of the board.

Article 3. AIDS Fraud (Reserved)

Article 4. Unlawful Advertising of Drugs and Devices (Reserved)

Article 5. Labeling, Sale, and Use of DMSO

109500. As used in this article, ''DMSO'' means dimethyl sulfoxide.

109505. DMSO sold in California other than by prescription shall be labeled by the manufacturer, distributor, or seller to contain a description of all of the contents in the solution, statement of purity, the percent of DMSO in the solution, and the manufacturer's name and address.

The label shall contain (a) the name and address of the distributor of the DMSO, if any, (b) the name and address of the manufacturer of the finished DMSO, and (c) the manufacturer's lot or control number. Finished DMSO means DMSO that requires no further manufacture prior to retail sale other than packaging or labeling. Whenever DMSO is sold or otherwise supplied, other than by prescription, the seller or supplier shall give additional printed material to the person receiving the DMSO that provides adequate warning against use that may be dangerous to the health of the user, and information that prescriptive DMSO is available from a physician.

The label of DMSO sold pursuant to this section shall contain the following statement: ''It is unlawful to represent in any way that this product is useful or safe to use for medicinal purposes.'' The label shall include appropriate precautionary measures for proper handling and first aid treatment and a warning statement to keep the product out of reach of children.

CHAPTER 5. IMITATION CONTROLLED SUBSTANCES

Article 1. Provisions and Definitions

109525. This chapter shall be known as the ''California Imitation Controlled Substances Act.''

109530. Unless the context otherwise requires, the definitions in this article govern the construction of this chapter.

109535. ''Controlled substance'' means a substance as defined in Section 11007.

109540. ''Distribute'' means the actual, constructive, or attempted transfer, delivery, or dispensing to another of an imitation controlled substance.

109545. ''Manufacture'' means the production, preparation, compounding, processing, encapsulating, packaging or repackaging, labeling or relabeling, of an imitation controlled substance.

109550. ''Imitation controlled substance'' means (a) a product specifically designed or manufactured to resemble the physical appearance of a controlled substance, that a reasonable person of ordinary knowledge would not be able to distinguish the imitation from the controlled substance by outward appearances, or (b) a product, not a controlled substance, that, by representations made and by dosage unit appearance, including color, shape, size, or markings, would lead a reasonable person to believe that, if ingested, the product would have a stimulant or depressant effect similar to or the same as that of one or more of the controlled substances included in Schedules I through V, inclusive, of the Uniform Controlled Substances Act, pursuant to Chapter 2 (commencing with Section 11053) of Division 10.

109555. The provisions of this chapter are cumulative, and shall not be construed as restricting any remedy, provisional or otherwise, provided by law for the benefit of any party.

Article 2. Offenses and Penalties

109575. Any person who knowingly manufactures, distributes, or possesses with intent to distribute, an imitation controlled substance is guilty of a misdemeanor and shall, if convicted, be subject to imprisonment for not more than six months in the county jail or a fine of not more than one thousand dollars ($1,000), or both the imprisonment and fine.

109580. Any person 18 years of age or over who violates Section 109575 by knowingly distributing an imitation controlled substance to a person under 18 years of age is guilty of a misdemeanor and shall, if convicted, be subject to imprisonment for not more than one year in the county jail or a fine of not more than two thousand dollars ($2,000), or both the imprisonment and fine. Upon a second or

subsequent conviction of this offense, the person shall be subject to imprisonment for not more that one year in the county jail and a fine of not less than six thousand dollars ($6,000).

109585. No civil or criminal liability shall be imposed by virtue of this chapter on any person registered under the California Uniform Controlled Substances Act who manufactures, distributes, or possesses an imitation controlled substance for use by a practitioner, as defined in Section 11026, in the course of lawful professional practice or research.

109590. All imitation controlled substances shall be subject to forfeiture in accordance with the procedures set forth in Chapter 8 (commencing with Section 11470) of Division 10.

PART 5. SHERMAN FOOD, DRUG, AND COSMETIC LAWS

CHAPTER 1. GENERAL PROVISIONS AND DEFINITIONS

109875. This part shall be known as the Sherman Food, Drug, and Cosmetic Law.

109880. Unless the context otherwise requires, the definitions set forth in this article govern the construction of this part.

109885. ''Advertisement'' means any representations, including, but not limited to, statements upon the products, its packages, cartons, and any other container, disseminated in any manner or by any means, for the purpose of inducing, or that is likely to induce, directly or indirectly, the purchase or use of any food, drug, device, or cosmetic.

109890. ''Antibiotic drug'' means any drug intended for use by man or other animal and that contains any quantity of any chemical substance produced by a micro-organism or the chemically synthesized equivalent and that, in dilute solutions, has the capacity to inhibit or destroy micro-organisms.

109895. ''Color additive'' means a substance that satisfies both of the following requirements:

(a) It is a dye, pigment, or other substance made by a process of synthesis or similar artifice, or extracted, isolated, or otherwise derived, with or without intermediate or final change of identity, from a vegetable, animal, mineral, or other source.

(b) When added or applied to a food, drug, device, or cosmetic, or to the human body or any part of the body, it is capable, alone or through reaction with any other substance, of imparting color to the food, drug, device, or cosmetic, or to the human body or the part of the human body, to which it is added or applied.

The term ''color additive'' does not include any material that the department, by regulation, determines is used, or intended to be used, solely for a purpose or purposes other than coloring.

The term ‘‘color,’’ as used in this section, includes black, white, and intermediate grays.

This section does not apply to any pesticide chemical, soil, or plant nutrient, or other agricultural chemical, solely because of its effect in aiding, retarding, or otherwise affecting, directly or indirectly, the growth or other natural physiological process of produce of the soil and thereby affecting its color, whether before or after harvest.

109900. ‘‘Cosmetic’’ means any article, or its components, intended to be rubbed, poured, sprinkled, or sprayed on, introduced into, or otherwise applied to, the human body, or any part of the human body, for cleansing, beautifying, promoting attractiveness, or altering the appearance.

The term ‘‘cosmetic’’ does not include soap.

109905. ‘‘Counterfeit’’, as used in respect to any food, drug, device, or cosmetic, means a food, drug, device, or cosmetic that bears or whose package or labeling bears, without authorization, the trademark, trade name, or other identifying mark, imprint, or device, or any likeness or trademark, trade name, or other identifying mark, imprint, or device of a manufacturer, processor, packer, or distributor, other than the actual manufacturer, processor, packer, or distributor, or that falsely purports or is represented to be the product of, or to have been packed or distributed by, the other manufacturer, processor, packer, or distributor.

109910. ‘‘Department’’ means the State Department of Health Services.

109915. ‘‘Director’’ means the State Director of Health Services.

109920. ‘‘Device’’ means any instrument, apparatus, implement, machine, contrivance, implant, in vitro reagent, or other similar or related article, including any component, part, or accessory, that is any of the following:

(a) Recognized in the official National Formulary or the United States Pharmacopoeia, or any supplement to them.

(b) Intended for use in the diagnosis of disease or other condition, or in the cure, mitigation, treatment, or prevention of disease in humans or any other animal.

(c) Intended to affect the structure or any function of the body of humans or any other animal and that does not achieve any of its principal intended purposes through chemical action within or on the body of humans or other animals and that is not dependent upon being metabolized for the achievement of any of its principal intended purposes.

109925. ‘‘Drug’’ means any of the following:

(a) Any article recognized in an official compendium.

(b) Any article used or intended for use in the diagnosis, cure, mitigation, treatment, or prevention of disease in human beings or any other animal.

(c) Any article other than food, that is used or intended to affect the structure or any function of the body of human beings or any other animal.

(d) Any article used or intended for use as a component of any article designated in subdivision (a), (b), or (c) of this section.

The term ''drug'' does not include any device.

Any food for which a claim, (as described in Sections 403(r)(1)(B) (21 U.S.C. Sec. 343(r)(1)(B)) and 403(r)(3) (21 U.S.C. Sec. 343(r)(3)) or Sections 403(r)(1)(B) (21 U.S.C. Sec. 343(r)(1)(B)) and 403(r)(5)(D) (21 U.S.C. Sec. 343(r)(5)(D)) of the federal act), is made in accordance with the requirements set forth in Section 403(r) (21 U.S.C. Sec. 343(r)) of the federal act, is not a drug under subdivision (b) solely because the label or labeling contains such a claim.

109930. ''Federal act'' means the federal Food, Drug, and Cosmetic Act, as amended (21 U.S.C. Sec. 301 et seq.).

109935. ''Food'' means any of the following:

(a) Any article used or intended for use for food, drink, confection, condiment, or chewing gum by man or other animal.

(b) Any article used or intended for use as a component of any article designated in subdivision (a).

109940. ''Food additive'' means any substance, the intended use of which results or may reasonably be expected to result, directly or indirectly, in the substance becoming a component of the food or otherwise affecting characteristics of the food. This includes any substance or radiation source intended for use in producing, manufacturing, packing, treating, packaging, transporting, or holding any food.

The term ''food additive'' does not include any of the following:

(a) A pesticide chemical in or on a raw agricultural commodity.

(b) A pesticide chemical that is used, or intended for use, in the production, storage, or transportation of any raw agricultural commodity.

(c) A color additive.

(d) Any substance used in accordance with a sanction or approval granted prior to the enactment of the Food Additives Amendment of 1958 (72 Stat. 1784), pursuant to the federal act; the Poultry Products Inspection Act (71 Stat. 441; 21 U.S.C. Sec. 451 et seq.); the Meat Inspection Act of March 4, 1907 (34 Stat. 1260), as amended and extended (21 U.S.C. Sec. 71 et seq.); or the Food and Agricultural Code of this state.

109945. ''Food and drug inspector'' means any authorized agent of the Bureau of Food and Drug of the department, who shall have the powers set forth in Section 106500.

109950. ''Immediate container'' does not include any package liner.

109955. ‘‘Label’’ means a display of written, printed, or graphic matter upon a food, drug, device, or cosmetic or upon its immediate container.

109960. ‘‘Labeling’’ means any label or other written, printed, or graphic matter upon a food, drug, device, or cosmetic or upon its container or wrapper, or that accompanies any food, drug, device, or cosmetic.

109965. ‘‘Local health department’’ means the health department of a city, county, city and county, or local health district that qualifies for state assistance pursuant to Chapter 3 (commencing with Section 101175) of Part 3 of Division 101, or any city health department of a city that has had its own health department for 12 years or more.

109970. ‘‘Manufacture’’ means the preparation, compounding, propagation, processing, or fabrication of any food, drug, device, or cosmetic. The term ‘‘manufacture’’ includes repackaging or otherwise changing the container, wrapper, or labeling of any food, drug, device, or cosmetic in furtherance of the distribution of the food, drug, device, or cosmetic. The term ‘‘manufacture’’ does not include repackaging from a bulk container by a retailer at the time of sale to its ultimate consumer.

109975. ‘‘New device’’ means any of the following:

(a) Any device the composition, construction, or properties of which are such that the device is not generally recognized, among experts qualified by scientific training and experience to evaluate the safety and effectiveness of devices, as having been adequately shown, through scientific investigations to be safe and effective for use under the conditions prescribed, recommended, or suggested in the labeling or advertising thereof.

(b) Any device the composition, construction, or properties of which are such that the device, as a result of such investigation to determine its safety and effectiveness for use under these conditions, has become so recognized, but which has not, otherwise than in the investigations, been used to a material extent or for a material time under the conditions.

109980. ‘‘New drug’’ means either of the following:

(a) Any drug the composition of which is such that the drug is not generally recognized, among experts qualified by scientific training and experience to evaluate the safety and effectiveness of drugs, as safe and effective for use under the conditions prescribed, recommended, or suggested in the labeling or advertising thereof.

(b) Any drug the composition of which is such that the drug, as a result of investigations to determine its safety and effectiveness for use under these conditions, has become so recognized, but that has not, otherwise than in the investigations, been used to a material extent or for a material time under the conditions.

109985. ‘‘Official compendium’’ means the latest edition of the United States Pharmacopoeia, the latest edition of the Homeopathic Pharmacopoeia of the United States, or the latest edition of the National Formulary, or any supplement to any of these.

109990. ‘‘Package’’ means any container or wrapper that may be used by a manufacturer, producer, jobber, packer, or dealer for enclosing or containing any food, drug, device, or cosmetic.

The term ‘‘package’’ does not include any of the following:

(a) Any shipping container or outer wrapping used solely for the transportation of a food, drug, device, or cosmetic in bulk quantity to any manufacturer, packer, processor, or wholesale or retail distributor.

(b) Any shipping container or outer wrapping used by any retailer to ship or deliver any food, drug, device, or cosmetic to any retail consumer if the container or wrapping bears no printed matter pertaining to any food, drug, device, or cosmetic.

109995. ‘‘Person’’ means any individual, firm, partnership, trust, corporation, limited liability company, company, estate, public or private institution, association, organization, group, city, county, city and county, political subdivision of this state, other governmental agency within the state, and any representative, agent, or agency of any of the foregoing.

110000. ‘‘Pesticide chemical’’ means any substance that alone, in chemical combination, or in formulation with one or more substances, is an ‘‘economic poison’’ within the meaning of Section 12753 of the Food and Agricultural Code of this state or the Federal Insecticide, Fungicide, and Rodenticide Act (61 Stat. 163; 7 U.S.C. Sec. 135 et seq.), and that is used in the production, storage, or transportation of any raw agricultural commodity.

110005. ‘‘Potentially hazardous food’’ means any food capable of supporting growth of infections or toxicogenic micro-organisms when held at temperatures above 45 degrees Fahrenheit.

110010. ‘‘Prescription’’ means an oral order given individually for the patient for whom prescribed directly from the prescriber to the furnisher or indirectly by means of a written order signed by the prescriber that bears the name and address of the prescriber, the license classification of the prescriber, the name and address of the patient, the name and quantity of drug or device prescribed, the directions for use, and the date of issue.

110015. ‘‘Principal display panel’’ means that part of a label most likely to be displayed, presented, shown, or examined under normal and customary conditions of display for retail sale.

110020. ‘‘Raw agricultural commodity’’ means any food in its raw or natural state. It includes, but is not limited to, any fruit that is washed, colored, or otherwise treated in its unpeeled natural form prior to marketing.

110025. ‘‘Substantial evidence’’ means evidence consisting of adequate and well-controlled investigations, including clinical investigations, by experts qualified by scientific training and experience to evaluate the effectiveness of the drug or device involved, on the basis of that it could be fairly and responsibly concluded by the experts that the drug or device will have the effect it purports or is represented to have under the conditions of use prescribed, recommended, or suggested in the labeling, proposed labeling, or advertising of any drug or device.

110030. The provisions of this part regarding the selling of any food, drug, device, or cosmetic include, but are not limited to, all of the following:

(a) The manufacture, production, processing, and packing of any food, drug, device, or cosmetic.

(b) The exhibition, offer, possession, or holding of any food, drug, device, or cosmetic for sale, dispensing, giving, supplying, or applying in the conduct of any establishment.

(c) The sale, dispensing, giving, supplying, or applying of any food, drug, device, or cosmetic in the conduct of any establishment.

110035. All regulations pertaining to any food, drug, device, or cosmetic adopted by the department that are in effect on the effective date of this part shall remain in effect until the department adopts regulations pursuant to this part which repeal the regulations.

110040. This part shall be so construed as to not be in conflict with the Food and Agricultural Code, or with the Alcoholic Beverage Control Act, Division 9 (commencing with Section 23000) of the Business and Professions Code, and the regulations adopted pursuant thereto.

CHAPTER 2. ADMINISTRATION

Article 1. General

110045. The department shall administer and enforce this part.

110050. The Food Safety Fund is hereby created as a special fund in the State Treasury. All moneys collected by the department under Section 110470 and under Article 7 (commencing with Section 110810) of Chapter 5 shall be deposited in the Food Safety Fund, for use by the department, upon appropriation by the Legislature, for the purposes of providing funds necessary to carry out and implement the inspection provisions of this part relating to food and the registration provisions of Article 7 (commencing with Section 110810) of Chapter 5.

110055. All money collected by the department under Sections 111830, 111885, and 111905 shall be deposited into the State Treasury to the credit of the General Fund.

110060. The director and authorized agents of the department shall have the powers set forth in Sections 100165 and 106500.

110065. The department may adopt any regulations that it determines are necessary for the enforcement of this part. The regulations shall be adopted by the department in the manner prescribed by Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code. The department shall, insofar as practicable, make these regulations conform with those adopted under the federal act or by the United States Department of Agriculture or by the Internal Revenue Service of the United States Treasury Department.

110070. Whenever public health or other considerations in this state require, the department may adopt, upon its own motion, or upon the petition of any interested party, regulations that prescribe tolerances, included but not limited to zero tolerances, for poisonous or deleterious substances, food additives, pesticide chemicals, or color additives. The department may also prescribe the conditions under which a food additive or a color additive may be safely used and may grant exemptions for a food additive or color additive when it is to be used solely for investigational or experimental purposes.

A petitioner shall establish, by data submitted to the department, that a necessity exists for such regulations and that its effect will not be detrimental to the public health. If the data furnished by the petitioner is not sufficient to allow the department to determine whether such regulations should be adopted, the department may require additional data to be submitted. Failure to comply with this requirement shall be sufficient grounds to deny the request.

110075. In adopting regulations, pursuant to Section 110070 of this part, the department shall consider all of the following factors that the petitioner shall furnish:

(a) The name and all pertinent information concerning the poisonous or deleterious substance, food additive, pesticide chemical, or color additive, including its chemical identity and composition, its proposed use, including directions, recommendations, and suggestions, its proposed labeling, and all other relevant data bearing on its physical or other technical effect, and the quantity required to produce that effect.

(b) The probable composition of any substance formed in or on a food, drug, device, or cosmetic resulting from the use of the substance.

(c) The probable consumption and effect of the substance in the diet of man or any other animal.

(d) Safety factors that, in the opinion of qualified experts, are generally recognized as appropriate for the use of animal experimentation data.

(e) Practicable methods of analysis for determining the identity and quantity of all of the following:

(1) Any substance which is in or on the food, drug, device, or cosmetic.

(2) Any substance formed in or on the food, drug, device, or cosmetic because of the use of the substance.

(3) The pure substance and its anticipated breakdown products and impurities.

(f) Facts supporting the contention that the use of the substance will serve a useful purpose.

110080. (a) All pesticide regulations and any amendments to these regulations adopted pursuant to the federal act or the Food and Agricultural Code, in effect on November 23, 1970, or adopted on or after this date, are the pesticide regulations in this state. The department may, by regulation, prescribe tolerances for pesticides in processed foods in this state whether or not these tolerances are in accordance with the regulations adopted pursuant to the federal act or the Food and Agricultural Code.

(b) Except as otherwise provided in this subdivision, the department shall evaluate the tolerance prescribed, or an exemption from a tolerance granted, for a pesticide in processed foods and make a determination whether or not the existing tolerance, or the exemption from a tolerance, is protective of the public health whenever any one of the following occurs:

(1) The Director of Food and Agriculture designates the pesticide as a restricted material pursuant to subdivisions (a) and (b) of Section 14004.5 of the Food and Agricultural Code.

(2) The Director of Food and Agriculture refuses to register or cancels the registration of the pesticide pursuant to Section 12825, or suspends the registration of the pesticide pursuant to Section 12826, of the Food and Agricultural Code, upon determining that the pesticide is detrimental to the public health and safety.

(3) The Director of Food and Agriculture adopts regulations restricting worker entry into areas treated with the pesticide pursuant to Section 12981 of the Food and Agricultural Code.

(4) The pesticide is the subject of a proceeding pursuant to a determination by the Environmental Protection Agency under paragraph (3)(i)(A), (3)(ii)(A), (3)(ii)(B), or (3)(iii) of subsection (a) of Section 162.11 of Title 40 of the Code of Federal Regulations.

The requirement to evaluate a tolerance prescribed, or an exemption from a tolerance granted, for a pesticide does not apply if the department finds that any of the actions described in paragraphs (1) to (4), inclusive, occurred for reasons that are not related to the question whether or not the existing tolerance, or the exemption from a tolerance, adequately protects the public health. If the department makes such a finding, the reasons for the finding shall be stated in writing.

(c) The determination required by subdivision (b), and the reasons for the determination, shall be stated in writing. If the

determination is required because any of the actions described in paragraphs (1) to (4), inclusive, of subdivision (b) occurs after January 1, 1985, the determination shall be completed within one year of the date of the action. If the determination is required because any of those actions occurred prior to January 1, 1985, the determination shall be completed by January 1, 1990.

(d) In any case where the department, after consultation with the Department of Food and Agriculture, determines, pursuant to subdivision (b), that the tolerance prescribed, or an exemption from a tolerance granted, for a pesticide is not protective of the public health, the department shall, if it does not act immediately pursuant to subdivision (a), transmit notice of its determination to the responsible federal agencies and shall request that they take action, pursuant to the federal act, to modify the tolerance or an exemption from a tolerance. If, after one year from the date the notice is transmitted, the department finds that the responsible federal agencies have failed to take appropriate action to protect the public health, the department shall exercise its authority pursuant to subdivision (a) to prescribe a tolerance that is protective of the public health and shall notify the responsible federal agencies of its action.

110085. All food additive regulations and any amendments to the regulations adopted pursuant to the federal act in effect on November 23, 1970, or adopted on or after that date, are the food additive regulations of this state. The department may, by regulation, prescribe conditions under which a food additive may be used in this state whether or not these conditions are in accordance with the regulations adopted pursuant to the federal act.

110090. All color additive regulations and any amendments to the regulations adopted pursuant to the federal act, in effect on November 23, 1970, or adopted on or after that date, are the color additive regulations of this state. The department may, by regulation, prescribe conditions under which a color additive may be used in this state whether or not those conditions are in accordance with regulations adopted pursuant to the federal act.

110095. All special dietary use regulations and any amendments to regulations adopted pursuant to the federal act, in effect on November 23, 1970, or adopted on or after that date, are the special dietary use regulations of this state. If the department finds that it is necessary to inform purchasers of the value of a food for special dietary use, it may adopt any special dietary use regulation, whether or not the regulation is in accordance with the regulations adopted pursuant to the federal act.

110100. (a) All food labeling regulations and any amendments to those regulations adopted pursuant to the federal act, in effect on January 1, 1993, or adopted on or after that date shall be the food labeling regulations of this state.

(b) The department may, by regulation, adopt additional food labeling regulations. Prior to the adoption of any food labeling regulation pursuant to this subdivision, the department shall seek comments from consumer groups and representatives of the food industry that have been identified by the department as being affected by the proposed regulation.

110105. All good manufacturing practices regulations for any food, drug, device, or cosmetic and any amendments to the regulations adopted pursuant to the federal act in effect on November 23, 1970, or adopted on or after such date, are the good manufacturing practices regulations of this state. If the department finds that it is necessary for the protection of consumers, it may adopt interpretative regulations as necessary to define ''current good manufacturing practice'' as used in this part.

110110. (a) All regulations relating to (1) new drug applications, except for abbreviated new drug applications, adopted pursuant to Section 505 of the federal act (21 U.S.C. Sec. 355), (2) applications for premarket approval of new devices, adopted pursuant to Section 515 of the federal act (21 U.S.C. Sec. 360e), and (3) postmarketing reports, recordkeeping, and other postapproval requirements for approved new drug applications or approved new device premarket approval applications, adopted pursuant to the federal act, that are in effect on January 1, 1993, or that are adopted on or after that date, shall be the new drug and new device application regulations of this state.

(b) The department may, by regulation, adopt any new drug or new device application regulation that it determines is necessary for the administration and enforcement of this part, whether or not the regulation is in accordance with the regulations adopted pursuant to the federal act.

110115. A federal regulation adopted pursuant to this part takes effect in this state 30 days after it becomes effective as a federal regulation. Any person who will be adversely affected by adoption of the federal regulation in this state may, within the 30 days prior to its becoming effective in this state, file with the department, in writing, objections and a request for a hearing. The timely filing of substantial objections to a regulation that has become effective under the federal act, stays the adoption of the regulation in this state.

110120. If no substantial objections are received and no hearing is requested within 30 days after publication of a newly proposed state regulation, it shall take effect on the date set by the department. The effective date shall be at least 60 days after the time for filing objections has expired.

110125. If substantial objections are made to a federal regulation within 30 days prior to its becoming effective in this state or to a proposed regulation within 30 days after it is published, the department, after notice, shall conduct a public hearing to receive

evidence on issues raised by the objections. Any interested person or his or her representative may be heard. The department shall act upon objections by order and shall mail the order to objectors by certified mail as soon after the hearing as practicable. The order shall be based on evidence contained in the record of the hearing. If the order concerns a federal regulation, the department may adopt, rescind, or modify it. If the order concerns a proposed regulation, the department may withdraw it or set an effective date for the regulation as published or as modified by the order. The effective date shall be at least 60 days after publication of the order.

110130. Hearings authorized or required by this part shall be conducted by the department or agent as the department may designate for that purpose.

110135. Before any alleged violation of this part is reported to the Attorney General, a district attorney, or a city attorney for the institution of a criminal proceeding, the person against whom this proceeding is contemplated may be given appropriate notice and an opportunity to show cause why he or she should not be prosecuted and to present additional facts that may mitigate the action. The showing may be presented either orally or in writing, in person, or by attorney.

Article 2. Inspection and Sampling

110140. For purposes of enforcement of this part, any authorized agent of the department may, upon presenting appropriate credentials and at a reasonable time, do any of the following:

(a) Enter any factory, warehouse, or establishment in which any food, drug, device, or cosmetic is manufactured, packed, or held; enter any vehicle that is being used to transport or hold the food, drug, device, or cosmetic; or enter any place where any food, drug, device, or cosmetic is suspected of being held in violation of this part.

(b) Inspect any factory, warehouse, establishment, vehicle, or place, and all pertinent equipment, raw material, finished and unfinished materials, containers, and labeling in the factory, warehouse, establishment, vehicle, or place. In the case of any factory, warehouse, establishment, or consulting laboratory in which any food, drug, device, or cosmetic is manufactured, packed, or held, inspection shall include any record, file, paper, process, control, and facility that has a bearing on whether the food, drug, device, or cosmetic is adulterated or misbranded, or falsely advertised within the meaning of this part or whether it has been or is being manufactured, packed, transported, sold, or offered for sale in violation of this part.

110145. The inspection authorized by Section 110140 shall not include any of the following:

(a) Financial data.

(b) Sales data, other than shipment data.

(c) Pricing data.

(d) Personnel data, except data as to qualifications of technical and professional personnel.

(e) Research data, except data relating to any new drug or antibiotic drug that is subject to reporting and inspection under this part or the federal act.

110150. An authorized agent of the department may secure any sample or specimen of any food, drug, device, or cosmetic. If the agent obtains any samples prior to leaving the premises, he or she shall leave a receipt describing any sample obtained.

110155. An authorized agent of the department shall have access to all records of carriers in commerce relating to the movement in commerce of any food, drug, device, or cosmetic, or the holding of that food, drug, device, or cosmetic during or after the movement, and the quantity, shipper, and consignee of the food, drug, device, or cosmetic. Evidence obtained under this section shall not be used in a criminal prosecution of the person from whom it is obtained. The carrier shall not be subject to the other provisions of this part by reason of their receipt, carriage, holding, or delivery of any food, drug, device, or cosmetic in the usual course of business as carriers.

110160. It is unlawful for any person to refuse to permit entry or inspection, the taking of samples or other evidence, or access to copying of any record as authorized by this part, or to conceal the samples or evidence, or withhold evidence concerning them.

110165. It is unlawful for any person to use to his or her own advantage, or to reveal to any person other than to the director or officers or employees of this department, or to the courts when relevant in any judicial proceeding under this part, any information acquired under authority of this part concerning any method or process which as a trade secret is entitled to protection.

Article 3. Publicity

110170. The department may publish reports summarizing all judgments and court orders that have been rendered under this part, including the nature of the charge and the disposition of the charge.

110175. The department may distribute information regarding any food, drug, device, or cosmetic as the department considers necessary for the protection of the health and safety of the consumer or for his or her protection from fraud.

110180. The department may collect, report, or illustrate the results of any investigation of the department.

Article 4. Export Documents

110185. Any person who ships to another state or country a food, drug, or device manufactured or produced in this state may request the department to issue an export document to reference the shipment of the food, drug, or device or a person who manufactures or produces the food, drug, or device. The requesting person shall submit to the department all of the following:

(a) Each request for referencing the shipment of a food, drug, or device shall include all of the following information:

(1) Copies of any labels, labeling, and advertising affixed to or accompanying the food, drug, or device.

(2) If not clearly evident from the materials submitted pursuant to paragraph (1) both of the following:

(A) The name and place of business of the manufacturer or producer of the food, drug, or device.

(B) The identity of the food, drug, or device.

(3) The quantity of the food, drug, or device being shipped.

(4) The name of the state or country to which the food, drug, or device is being shipped.

(5) The date and means of shipment of the food, drug, or device.

(6) Additional statements the requesting person wishes to have incorporated into the export document.

(7) The name and telephone number of a person to whom the department may refer questions or requests for additional information about the request.

(b) Each request for referencing a person who manufactures or produces foods, drugs, or devices shall include all of the following information:

(1) The name and place of business of the person and whether the products manufactured or produced are foods, drugs, or devices.

(2) The name of the state or country to which the export document will be sent.

(3) Additional statements the requesting person wishes to have incorporated into the export document.

(4) The name and telephone number of a person to whom the department may refer questions or requests for additional information about the request.

110190. Any person who ships to another state or country a food, drug, device, or cosmetic manufactured or produced in this state may request the department to issue an export document to reference the shipment of the food, drug, device, or cosmetic. The food, drug, device, or cosmetic shall be manufactured or produced in this state by a person who has a valid registration, license, certificate, or permit issued by the department under this part or the Miscellaneous Food, Food Facility, and Hazardous Substances Act (Section 27). For each

request, the requesting person shall submit to the department all of the following:

(a) All original labels, labeling, and advertising affixed to, accompanying, or relating to the food, drug, device, or cosmetic. The department may accept copies if submission of original labels, labeling, or advertising is impractical.

(b) If not clearly evident from the materials submitted pursuant to subdivision (a), the requester shall submit both of the following:

(1) The name, place of business, and the type and number of the registration, license, certificate, or permit issued by the department to the manufacturer or producer of the food, drug, device, or cosmetic.

(2) The identity of the food, drug, device, or cosmetic being shipped.

(c) The name of the state or country to which the food, drug, device, or cosmetic is being shipped.

(d) The approximate date of shipment of the food, drug, device, or cosmetic.

(e) Additional statements the requesting person wishes to have incorporated into the export document.

(f) The name and telephone number of the requesting person to whom the department may refer questions or requests for additional information.

(g) The one-time fee required by paragraph (1) of subdivision (a) of Section 110210, if the fee has not yet been paid, and the minimum charge required by paragraph (2) of subdivision (a) of Section 110210.

110195. Each export document issued by the department shall do all of the following:

(a) The reference of the shipment of a food, drug, or device in the export document shall do all of the following:

(1) Identify the name and place of business of the manufacturer or producer of the food, drug, or device.

(2) Identify the food, drug, or device being shipped and its quantity.

(3) Identify the state or country to which the food, drug, or device is being shipped.

(4) Identify the date and means of shipment of the food, drug, or device.

(5) Describe the department’s authority over the food, drug, or device to be shipped and its manufacturer or producer, including, but not limited to, the expiration date of any applicable license, registration, certificate, or permit issued by the department.

(6) State that the department does not object to the sale of the food, drug, or devise in this state or the shipment of the food, drug, or devise to any other state or country.

(b) The reference of a person who manufactures or produces foods, drugs, or devices shall do all of the following:

(1) Identify the state or country to which the export document will be sent.

(2) Describe the department's authority over the person, including, but not limited to, the expiration date of any applicable license, registration, certificate, or permit issued by the department.

(3) State that the person is regularly engaged in the business of selling foods, drugs, or devices in this state.

(c) Each export document issued by the department may, in the department's sole discretion, include additional statements requested by the person who requested the export document.

(d) Each export document issued by the department shall be signed by the Chief of the Food and Drug Branch of the department, or his or her designee. The Chief or his or her designee may issue an export document prepared by the department or by the requesting person.

110200. (a) Each export document issued by the department shall do all of the following:

(1) Identify either or both of the following:

(A) The name and place of business of the manufacturer or producer of the food, drug, device, or cosmetic.

(B) The name and place of business of the distributor of the food, drug, device, or cosmetic.

(2) Identify the food, drug, device, or cosmetic being shipped.

(3) Identify the state or country to which the food, drug, device, or cosmetic is being shipped.

(4) Identify the approximate date of shipment.

(5) Describe the department's authority over the food, drug, device, or cosmetic to be shipped and its manufacturer or producer.

(6) State that the department does not object to the sale of the food, drug, device, or cosmetic in this state or the shipment of the food, drug, device, or cosmetic to any other state or country.

(b) Each export document issued by the department may, in the department's sole discretion, include additional statements requested by the person who requested the export document.

(c) Each export document issued by the department shall be issued by the Chief of the Food and Drug Branch of the department, or his or her designee. The chief or his or her designee may issue an export document prepared by the department or by the requesting person.

(d) The export document shall expire 180 days after its issue date.

110210. (a) Each person requesting the department to issue an export document shall pay nonreturnable fees as follows:

(1) A one-time fee of one hundred dollars ($100).

(2) A fee for service charge at the rate of eighty dollars ($80) per hour, at a minimum of twenty-five dollars ($25) per request.

(3) Any attendant costs incurred by the department, including, but not limited to, the costs of additional inspection, priority mailing, or notary service necessitated by the request.

(b) The fee amounts shall be adjusted annually pursuant to Section 100425.

(c) In no case shall the fees exceed the reasonable costs of the department in administering this article.

(d) The department shall provide to the person who pays the fees a statement or invoice that describes the costs paid from the fees.

110220. (a) The department may refuse to accept any request where the information required to be submitted by this article is incomplete.

(b) The department may refuse to issue an export document, or may invalidate an export document, if it finds, or has probable cause to believe, any of the following:

(1) The food, drug, device, or cosmetic, or requesting person violated any provision of this part, the Miscellaneous Food, Food Facility, and Hazardous Substances Act (Section 27), or any regulation adopted pursuant to this part or that act.

(2) Any information required to be submitted by this article is incomplete or false.

(3) The requesting person has not paid all outstanding fees required by this article.

(4) The food, drug, device, or cosmetic is not manufactured or produced in this state.

(5) The food, drug, device, or cosmetic is intended to be exported under Section 110655, 110790, 111315, 111460, 111720, or 111785.

(6) The food is a raw agricultural commodity or dairy product regulated by the Department of Food and Agriculture or a poultry or meat product regulated by the United States Department of Agriculture.

(c) If the department refuses to issue an export document, or invalidates an export document, the department shall inform the requesting person in writing of the reasons for the refusal or invalidation. The requesting person may request reconsideration by forwarding a written request to the Chief of the Division of Environmental Health of the department. The request for reconsideration must be postmarked or received by the department no later than 30 days after the date of the department's refusal or invalidation, and shall include a complete statement of all arguments and evidence that support the request for reconsideration. The Chief of the Division of Environmental Health shall notify the requesting person of his or her decision within 30 days. The decision of the Chief of the Division of Environmental Health shall be final.

(d) It is the intent of the Legislature that the department shall respond to each request for issuance of an export document within

five working days of receipt of the request by the Food and Drug Branch of the department.

110225. It is unlawful for any person to knowingly supply the department with false material facts in a request for an export document or to falsely represent that the department has issued an export document.

110230. Any person who has a valid registration, license, certificate, or permit issued by the department to manufacture or produce a food, drug, device, or cosmetic in this state may request the department to issue an official copy of the valid registration, license, certificate, or permit.

110235. (a) Each person requesting the department to issue an official copy of a valid registration, license, certificate, or permit shall pay nonreturnable fees as follows:

(1) Fifteen dollars ($15) per official copy.

(2) Any attendant costs incurred by the department, including, but not limited to, the costs of additional inspection, priority mailing, or notary service necessitated by the request.

(b) The fee amount shall be adjusted annually pursuant to Section 100425.

(c) The department shall provide to the person who pays the fees a statement or invoice that describes the costs paid from the fees.

110240. There is established an Export Document Program Fund within the General Fund. All fees collected pursuant to Sections 110210 and 110235 shall be deposited into the Export Document Program Fund and, upon appropriation, shall be expended by the department for the purpose of administering this article.

CHAPTER 3. GUARANTEES

110245. No dealer shall be prosecuted under this part for a violation concerning any food, drug, device, or cosmetic that is contained in an original, unbroken, and undamaged package that bears the original labeling if all of the following requirements are satisfied:

(a) He or she has used reasonable care in the storage and handling of the food, drug, device, or cosmetic.

(b) He or she received the food, drug, device, or cosmetic in the usual channels of trade as first-class merchantable stock and not as seconds or damaged articles or job lots purchased under conditions that indicate that the food, drug, device, or cosmetic was not usual first-class merchandise.

(c) He or she can produce a guarantee to the effect that the food, drug, device, or cosmetic is not adulterated, misbranded, or falsely advertised, within the meaning of this part, or that it is not a food, drug, device, or cosmetic which, pursuant to this part, may not be sold or offered for sale in this state.

110250. The guarantee shall be dated prior to the date of sale of the food, drug, device, or cosmetic and it shall be signed by the wholesaler, jobber, manufacturer, or other person located or residing in this state from whom the dealer received the food, drug, device, or cosmetic in good faith.

110255. A guarantee may be either a general guarantee or a special guarantee and shall be produced prior to the time of reporting an alleged violation to the Attorney General, the district attorney, or a city attorney for prosecution.

110260. A general guarantee shall guarantee without condition or restriction any food, drug, device, or cosmetic that is produced, prepared, compounded, packed, distributed, or sold by the guarantor as not adulterated, mislabeled, misbranded, falsely advertised, or that the article is not an article under this part that may not be sold or offered for sale.

110265. A special guarantee shall guarantee in the same manner as a general guarantee the particular food, drug, device, or cosmetic listed in an invoice of the food, drug, device, or cosmetic, and shall be attached to, or shall fully identify, the invoice.

110270. All guarantees shall contain the name and address of the guarantor making the sale of food, drug, device, or cosmetic. A guarantee shall protect the person only when the food, drug, device, or cosmetic covered by the guarantee remains identical, both as to composition and labeling, with the food, drug, device, or cosmetic as composed and labeled when originally received from the guarantor.

110275. It is unlawful for any person to give a guarantee or undertaking that is false.

110280. If the guarantee is to the effect that the food, drug, device, or cosmetic is not in violation within the meaning of the federal act, it shall be sufficient for all the purposes of this part, and shall have the same force and effect as though it referred to this part, unless, pursuant to this part, the standard for the food, drug, device, or cosmetic concerned is higher than the standard for a like food, drug, device, or cosmetic under the federal act. In that case, this part shall prevail over the federal act.

110285. In any case where the department has adopted a regulation prescribing a tolerance, including, but not limited to, a zero tolerance, for a poisonous or deleterious substance, food additive, pesticide chemical, or color additive in processed foods, the department may require manufacturers to guarantee that foods they market in the state comply with the tolerance. The department may require a guarantee periodically but in no case more often than once each calendar quarter.

CHAPTER 4. PACKAGING, LABELING, AND ADVERTISING

Article 1. General

110290. In determining whether the labeling or advertisement of a food, drug, device, or cosmetic is misleading, all representations made or suggested by statement, word, design, device, sound, or any combination of these, shall be taken into account. The extent that the labeling or advertising fails to reveal facts concerning the food, drug, device, or cosmetic or consequences of customary use of the food, drug, device, or cosmetic shall also be considered.

110295. The requirement that any word, statement, or other information appear on the label shall not be considered to be complied with unless the word, statement, or other information also appears on the outside container or wrapper of the retail package of any food, drug, device, or cosmetic, or is easily legible through the outside container or wrapper.

110300. It is unlawful for any person to forge, counterfeit, simulate, falsely represent, or without proper authority use, any mark, stamp, tag, label, or other identification device that is authorized or required by regulations adopted pursuant to this part or the federal act.

110305. It is unlawful for any person to use on the labeling of any drug or device, or any advertisement relating to any drug or device, any representation or suggestion that an application with respect to the drug or device is effective under Section 111550 or that the drug or device complies with that section.

110310. It is unlawful for any manufacturer, packer, or distributor of a prescription drug or device offered for sale in this state to fail to maintain for transmittal or to fail to transmit to any practitioner licensed by applicable state law to administer the drug or device who makes written request for information as to the drug or device true and correct copies of all printed matter that is required to be included in any package in which that drug or device is distributed or sold. Nothing in this section shall be construed to exempt any person from any labeling requirement imposed by or under other provisions of this part.

110315. It is unlawful for any person, with the intent to deceive, to place, or cause to be placed upon any food, drug, device, or cosmetic, or its package, the trade name or other identifying mark or imprint of another person or any likeness of the trade name or other identifying mark or imprint of another person.

110320. It is unlawful for any person to sell, dispense, dispose of, hold, or conceal any food, drug, device, or cosmetic or its package, with knowledge that the trade name or other identifying marks, imprint, or likeness of the trade name or other identifying mark or

imprint of another person has been placed on the food, drug, device, or cosmetic or its package in a manner prohibited by Section 110315.

110325. It is unlawful for any person to possess, make, sell, dispose of, cause to be made, or conceal any punch, die, plate, or other device that may be used to render a food, drug, device, or cosmetic or its package or labeling a counterfeit.

110330. It is unlawful for any person to do any act that causes any food, drug, device, or cosmetic to be a counterfeit, or to sell, dispense, or hold for sale or dispensing, the counterfeit food, drug, device, or cosmetic.

110335. The department may adopt regulations exempting from any labeling or packaging requirements of this part any food, drug, device, or cosmetic that is in accordance with the practice of the trade, to be processed, labeled, or repacked in substantial quantities at establishments other than those where originally processed and packed, on condition that the food, drug, device, or cosmetic is not adulterated or misbranded under the provisions of this part upon removal from the processing, labeling, or repacking establishment. Such food, drug, device, or cosmetic is subject to all other applicable provisions of this part.

All regulations relating to the exemptions that are in effect on the effective date of this part, or that are adopted on or after that date, pursuant to the federal act, are automatically effective in this state. The department may, however, adopt any additional regulations concerning exemptions.

Article 2. Fair Packaging and Labeling

110340. All labels of foods, drugs, devices, or cosmetics shall conform with the requirements of the declaration of net quantity of contents of Section 4 of the Fair Packaging and Labeling Act (80 Stat. 1296; 15 U.S.C., Sec. 1451) and the regulations adopted pursuant thereto. Foods, drugs, devices, and cosmetics exempted from the requirements of Section 4 of the Fair Packaging and Labeling Act, however, are also exempt from this article.

110345. The label of any package of a food, drug, device, or cosmetic that bears a representation as to the number of servings of the commodity contained in the package shall bear a statement of the net quantity, in terms of weight, measure, or numerical count, of each serving.

110350. It is unlawful for any person to distribute, or cause to be distributed, in commerce any packaged food, drug, device, or cosmetic if any qualifying words or phrases appear in conjunction with the separate statement of the net quantity of contents required by Section 110340.

This section, however, does not prohibit supplemental statements, at other places on the package, describing in nondeceptive terms the

net quantity of contents. Such supplemental statements of net quantity of contents shall not include any term qualifying a unit of weight, measure, or count that tends to exaggerate the amount of the commodity contained in the package.

110355. Whenever the department determines that regulations containing prohibitions or requirements, other than those prescribed by Section 110340, are necessary to prevent the deception of consumers or to facilitate value comparisons as to any food, drug, device, or cosmetic, the department shall adopt regulations with respect to that commodity.

110360. The department may establish and define standards for the characterization of the size of a package that encloses any food, drug, device, or cosmetic, that may be used to supplement the label statement of net quantity of contents of packages containing the commodity. This section, however, does not authorize any limitation on the size, shape, weight, dimension, or number of packages that may be used to enclose any food, drug, device, or cosmetic.

110365. The department may regulate the placement upon any package that contains any food, drug, device, or cosmetic or upon any label affixed to the article, of any printed matter stating or representing by implication that the article is offered for retail sale at a price lower than the ordinary and customary retail sale price or that a retail sale price advantage is accorded to any purchaser of the article by reason of the size of that package or the quantity of its contents.

110370. The department may require that the label on each package of a food, drug, device, or cosmetic bear the common or usual name of the article, if any, and in case the article consists of two or more ingredients, the common or usual name of each ingredient listed in order of decreasing predominance by weight. This section, however, does not require that any trade secret be divulged.

110375. The department may prohibit the nonfunctional slack fill of packages containing any food, drug, device, or cosmetic.

As used in this section, ''nonfunctional slack-filled'' means that a package is filled to substantially less than its capacity for any reason other than any of the following:

(a) Protection of the contents of the package.

(b) The requirements of machines used for enclosing the contents in the package.

110380. All regulations and their amendments pertaining to foods, drugs, devices, and cosmetics that are in effect on the effective date of this part, or that are adopted on or after that date, pursuant to the Fair Packaging and Labeling Act (80 Stat. 1296; 15 U.S.C. Sec. 1451 et seq.) shall be the regulations of this state. The department may, when necessary, prescribe any packaging and labeling regulation for foods, drugs, devices, and cosmetics whether or not the regulation is in accordance with regulations adopted under the Fair

Packaging and Labeling Act. No regulations shall be adopted that are contrary to the labeling requirements for the net quantity of contents required pursuant to Section 4 of the Federal Fair Packaging and Labeling Act and the regulations adopted pursuant to that section.

110385. It is unlawful for any person to distribute in commerce any food, drug, device, or cosmetic, if its packaging or labeling does not conform to the provisions of this article or to regulations adopted pursuant to this article. This section does not apply to persons engaged in business as wholesale or retail distributors of foods, drugs, devices, or cosmetics, except to the extent that they are engaged in the packaging or labeling of the commodities or they prescribe or specify the manner in which the commodities are packaged or labeled. This section shall not be construed to repeal, invalidate, or supersede any other section of this part.

Article 3. Advertising

110390. It is unlawful for any person to disseminate any false advertisement of any food, drug, device, or cosmetic. An advertisement is false if it is false or misleading in any particular.

110395. It is unlawful for any person to manufacture, sell, deliver, hold, or offer for sale any food, drug, device, or cosmetic that is falsely advertised.

110398. It is unlawful for any person to advertise any food, drug, device, or cosmetic that is adulterated or misbranded.

110400. It is unlawful for any person to receive in commerce any food, drug, device, or cosmetic that is falsely advertised or to deliver or proffer for delivery any such food, drug, device, or cosmetic.

110403. It is unlawful for any person to advertise any drug or device represented to have any effect in any of the following conditions, disorders, or diseases:

(a) Appendicitis.
(b) Blood disorders.
(c) Bone or joint diseases.
(d) Kidney disease or disorders.
(e) Cancer.
(f) Carbuncles.
(g) Disease, disorder, or condition of the eye.
(h) Diabetes.
(i) Diphtheria.
(j) Gall bladder disease or disorder.
(k) Heart and vascular diseases.
(*l*) High blood pressure.
(m) Diseases or disorders of the ear or auditory apparatus, including hearing loss and deafness.
(n) Measles.
(o) Meningitis.

(p) Mental disease or mental retardation.
(q) Paralysis.
(r) Pneumonia.
(s) Poliomyelitis.
(t) Prostate gland disorders.
(u) Conditions of the scalp, affecting hair loss, or baldness.
(v) Alcoholism.
(w) Periodontal diseases.
(x) Epilepsy.
(y) Goiter.
(z) Endocrine disorders.
(aa) Sexual impotence.
(ab) Sinus infection.
(ac) Encephalitis.
(ad) Tumors.
(ae) Venereal disease.
(af) Tuberculosis.
(ag) Ulcers of the stomach.
(ah) Varicose ulcers.
(ai) Scarlet fever.
(aj) Typhoid fever.
(ak) Whooping cough.
(a*l*) Acquired immune deficiency syndrome (AIDS).
(am) AIDS-related complex (ARC).
(an) Diseases, disorders, or conditions of the immune system.

110405. An advertisement that is not unlawful under Section 110390 is not unlawful under Section 110403 if it is disseminated only to members of the medical, dental, pharmaceutical, or veterinary professions, or appears only in the scientific periodicals of these professions, or is disseminated only for the purpose of public health education by persons not commercially interested, directly or indirectly, in the sale of drugs or devices.

110408. Whenever the department determines that an advance in medical science has made any type of self-medication safe and effective as to any of the conditions, disorders, or diseases named in Section 110403, the department shall, by regulation, authorize the advertisement of any such drug or device as having a curative or therapeutic effect for the disease, subject to conditions and restrictions as the department may consider necessary to the interests of public health.

110410. Section 110403 shall not be construed as indicating that self-medication for conditions, disorders, or diseases other than those named is safe or efficacious.

110413. No publisher, radio or television broadcast licensee, or agency or medium for the dissemination of an advertisement, except the manufacturer, packer, distributor, or seller of the food, drug, device, or cosmetic to which a false advertisement relates, shall be

liable under this article for the dissemination of the false advertisement, unless he or she has refused to furnish the department with the name and address of the manufacturer, packer, distributor, seller, or advertising agency, residing in this state who caused him or her to disseminate the advertisement.

110415. It shall be unlawful to advertise or otherwise represent chopped or ground beef or hamburger in violation of Section 110805.

110420. (a) Any fragrance advertising insert contained in a newspaper, magazine, mailing, or other periodically printed material shall contain only microencapsulated oils. Glue tabs or binders shall be used to prevent premature activation of the fragrance advertising insert.

''Fragrance advertising insert'' means a printed piece with encapsulated fragrance applied to it that is activated by opening a flap or removing an overlying ply of paper.

Paperstocks employed in the manufacture of fragrance advertising inserts shall have a maximum porosity of 20 Sheffield units or 172 Gurley-Hill units.

(b) Any person who distributes fragrance advertising inserts in violation of this section, is guilty of an infraction and shall, if convicted, be subject to a fine of one hundred dollars ($100) for each distribution. The fine shall apply to each mass mailing or distribution, and to each mass publication of a magazine or newspaper in violation of this section. The fine shall not apply, however, to each individual letter, magazine, newspaper, or fragrance advertising insert so distributed. Section 111825 is not applicable to violations of this section.

(c) This section shall become operative on January 1, 1992.

CHAPTER 5. FOOD

Article 1. Generally

110425. Beer, that is subject to the Alcoholic Beverage Control Act, Division 9 (commencing with Section 23000) of the Business and Professions Code, shall only be subject to the provisions of this chapter that relate to adulteration and misbranding.

110430. Whenever the department finds that a class of food distributed in this state may, by reason of contamination with micro-organisms during manufacture, packing, or storage, be injurious to the health of any man or other animal that consumes it and that the injurious nature cannot be adequately determined after this food has entered commerce, the department shall adopt regulations providing for the issuance of permits to manufacturers, processors, or packers of the class of food. These permits shall establish conditions governing the manufacture, packing, or storage of the class of food for the period of time as may be necessary to

protect the public health. The regulations shall prescribe a date after which no person shall introduce or deliver for introduction into commerce any food manufactured, packed, or stored by any manufacturer, processor, or packer, unless the person holds a permit issued by the department as provided by the regulations.

110435. The department may suspend immediately, upon written or oral notice, any permit issued pursuant to Section 110430 if it is found that any of the conditions of the permit have been violated. The holder of a permit so suspended may at any time apply for reinstatement of the permit. The department shall, after prompt hearing and inspection of the establishment, reinstate the permit immediately, if it is found that adequate measures have been taken to comply with and maintain the conditions of the permit.

110440. Any authorized agent of the department shall have access to any factory or establishment that operates under permit from the department for the purpose of ascertaining whether or not the conditions of the permit are being complied with. Denial of access for such inspection shall be grounds for suspension of the permit until the access is freely given by the holder of the permit or his or her agent.

110445. Any added poisonous or deleterious substance, or any food additive, pesticide chemical, preservative, or color additive, shall be considered unsafe for use with respect to any food unless there is in effect a regulation adopted pursuant to Section 110080, 110085, or 110090, that limits the quantity and the use, or intended use, of the substance to the terms prescribed by the regulation.

110450. On or before September 1, 1985, the department shall, within the limits of available resources, prepare and submit to the Legislature a program for detecting and monitoring chemical and pesticide residues in processed foods. In preparing the program, the department shall do all of the following:

(a) Establish a list of chemical and pesticides developed from a knowledge of chemicals used in the food industry in processed foods and from the 96 pesticides on the Department of Food and Agriculture residue scan, for which analysis will be done by the department. The list shall include an explanation of why the listed chemicals and pesticides were selected. The Department of Food and Agriculture shall cooperate with the department in establishing the list required by this subdivision. In selecting the chemicals and pesticides to be placed on the list, the department shall make use of the following criteria:

(1) Chemicals that have been identified as having possible carcinogenic, reproductive, or mutagenic effects.

(2) Patterns of use in California.

(3) Quantities of use in California.

(4) Chemicals appearing as residues in processed food because of environmental persistence or resistance to degradation under

conditions existing in the processing, manufacturing, milling, or shipping of processed foods sold in California.

(5) Chemicals that have the potential of chronic toxicity due to low continuous exposure.

The department may revise the list and is authorized to add or remove chemicals or pesticides based on relevant information that becomes available to it after the list has been established and based on its experience in detecting the presence of chemical substances in processed foods under the sampling and testing program developed pursuant to subdivision (b).

(b) The department shall design a sampling and testing program that does all of the following:

(1) Samples and tests processed food products that form a significant portion of the diet of the general population, and that may contain residues of the chemical substances on the list established pursuant to subdivision (a).

(2) Provides for specific testing of individual chemicals on the list established pursuant to subdivision (a) when a chemical cannot be detected using multiresidue testing procedures and when the department determines that the chemical may be the cause of chronic health effects.

(3) Lists the foods to be sampled, the stages of processing in which the foods will be sampled, the sampling frequency, and the techniques used in sampling.

(4) A description of plans for sampling processed imported foods from other states and countries.

(c) As used in this section, ‘‘processed food’’ means any food chemically or physically altered from a raw agricultural commodity by chemical, mechanical, thermal, or other processes.

110455. (a) On or before July 1, 1990, the department shall commence and maintain a program for monitoring processed foods for pesticide residues, chemicals, microbes, and other contaminants. In designing the program, the department shall take into consideration any information developed pursuant to Section 110450.

(b) The department shall consult with the Department of Food and Agriculture in designing the pesticide residue component of the monitoring program, to facilitate focusing the testing in areas of greatest concern. Among the pesticides to be reviewed for possible monitoring shall be those contained in the lists of pesticides identified in Section 12535 of the Food and Agricultural Code.

(c) In the development and ongoing operation of the department’s monitoring program, the department shall consider, in establishing priorities:

(1) Potential concentration effects that may occur during processing.

(2) Targeting foreign and domestic imported processed foods according to their estimated California market share.

(3) The extent to which processed foods are a part of the infant and child diet.

Article 2. Registration

110460. Every person upon first engaging in the manufacture, packing, or holding of processed food in this state shall immediately register with the department. The registration is valid for one calendar year from the date of validation by the department of the completed registration form. The department shall provide to each registrant a validated copy of the completed registration form, sent to the mailing address shown on the form, as evidence of valid registration.

110465. A separate registration is required for each place of manufacture, packing, or holding.

110470. A registration form provided by the department shall be completed annually and accompanied by a nonreturnable registration fee. The registration or renewal of registration shall set forth all applicable information called for by the registration form.

The fee for registration or renewal of registration shall be as follows:

Holding Food Only:

Size of Establishment	Fee
0–10,000 square feet	$250
Over 10,000 square feet	375

Manufacturing or Packing Food:

*****

Number of Employees	Size of Establishment	Fee
0 – 5	0 – 5,000 square feet	$250
6 – 20	0 – 5,000 square feet	375
More than 20	0 – 5,000 square feet	500
0 – 5	Over 5,000 square feet	375
6 – 20	Over 5,000 square feet	500
More than 20	Over 5,000 square feet	625

A penalty of 1 percent per month shall be added to any registration fee not paid when due.

The fee amount shall be adjusted annually pursuant to Section 100425.

110475. Any person registered pursuant to this article shall immediately notify the department of any change in the information reported on the registration form.

110480. The registration provisions of this chapter shall not apply to any of the following:

(a) Any person who has a valid bottled water or water vending machine license issued pursuant to Article 12 (commencing with Section 111070).

(b) Any person who has a valid pet food license issued pursuant to Chapter 10 (commencing with Section 113025) of Part 6.

(c) Any retail food facility as defined in Chapter 4 (commencing with Section 113700) of Part 7.

(d) Any person who has a valid cold storage license issued pursuant to Chapter 6 (commencing with Section 112350) of Part 6.

(e) Any person who has a valid cannery license issued pursuant to Chapter 8 (commencing with Section 112650) of Part 6.

(f) Any person who has a valid shellfish certificate issued pursuant to Chapter 5 (commencing with Section 112150) of Part 6.

(g) Any person who has a valid frozen food locker plant license issued pursuant to Chapter 7 (commencing with Section 112500) of Part 6.

(h) Any person who has a valid winegrower's license or wine blender's license pursuant to Division 9 (commencing with Section 23000) of the Business and Professions Code.

(i) Any person who has a valid milk products plant, margarine, imitation ice cream, imitation ice milk, or a products resembling milk products plant license, issued pursuant to Division 15 (commencing with Section 32501) of the Food and Agricultural Code.

110485. In addition to the fee paid pursuant to Section 110470, each registrant shall pay a surcharge of one hundred dollars ($100) to the Department of Pesticide Regulation, in a form and manner that the Director of Pesticide Regulation prescribes. This section shall not apply to those registrants the Director of Pesticide Regulation determines should not be assessed due to a determination of limited applicability pursuant to Sections 12535, 12536, 12797, 12798, 13134, and 13135 of the Food and Agricultural Code or Section 110455 of this code to those registrants, or because substantial economic hardship would result to individual registrants. Revenue received pursuant to this section shall be deposited in the Food Safety Account in the Department of Pesticide Regulation Fund. A penalty of 10 percent per month shall be added to any surcharge not paid when due.

110490. (a) A laboratory that performs analyses of foods for pesticide chemical residues for other persons shall be accredited pursuant to Article 3 (commencing with Section 100825) of Chapter

4 of Part 1 of Division 101. This subdivision shall not apply to any of the following:

(1) A laboratory operated by a government agency.

(2) A laboratory not operated for commercial purposes that performs pesticide chemical residue analysis on foods for research or quality control for the internal use of the person initiating the analysis. For purposes of this section, ''commercial purposes'' means that the laboratory performs pesticide chemical residue analysis on the foods primarily for the purpose of making a profit.

(b) A laboratory accredited pursuant to Section 12591 of the Food and Agricultural Code shall not be required to be accredited under this section until January 1, 1992.

(c) A laboratory that performs analyses of foods for pesticide chemical residues, but that is not required by subdivision (a) to be accredited may apply for accreditation pursuant to Article 3 (commencing with Section 100825) of Chapter 4 of Part 1 of Division 101.

(d) This section shall become operative on January 1, 1991, or 60 days after the initial set of regulations adopted pursuant to Sections 100830 and 100835 becomes effective, whichever is later.

110495. (a) Every laboratory or other person which performs or which brokers or otherwise arranges for the performance of pesticide chemical analysis on food shall report to the appropriate state agency any finding of pesticide chemical residues in a food for which no chemical residue tolerance has been established or that is in excess of federal or state residue tolerances or tolerances for a pesticide suspended, banned, or otherwise not permitted by the Department of Pesticide Regulation or the Environmental Protection Agency, if the food is in the channels of trade. The report shall be made as soon as possible, and in any event, not later than 24 hours after the analyzing laboratory makes the finding. Findings on raw agricultural commodities and dairy products shall be reported to the Department of Food and Agriculture. Findings on raw agricultural commodities shall also be reported to the Department of Pesticide Regulation. Findings on all other foods shall be made to the State Department of Health Services.

(b) For the purpose of reporting findings regarding raw agricultural commodities, ''in the channels of trade'' means the point at which the raw agricultural commodities leave the farm, including raw agricultural commodities bound for processing up to the point that processing is initiated. For the purpose of reporting findings in processed foods, ''in the channels of trade'' means at the point the processed food leaves the direct control of the processor, which means either that the product is not located on the premises owned by, or under the control of, the processor or a portion of the product has been released for sale or use.

Article 3. Standard of Identity, Quality, and Fill

110505. Definitions and standards of identity, quality, and fill of container, and any amendments to the definitions and standards, adopted pursuant to the federal act in effect on the effective date of this part, or adopted on or after that date, are the definitions and standards of identity, quality, and fill of container in this state. The department may, by regulation, establish definitions and standards of identity, quality, and fill of container for any food whether or not the definitions and standards are in accordance with the federal regulations, when in its judgment such action will promote honesty and fair dealing in the interest of consumers. This section shall not apply to wine.

110510. In prescribing a definition and standard of identity for any food or class of food in which optional ingredients are permitted, the department shall designate the optional ingredients that shall be named on the label. This section shall not apply to wine.

110515. A temporary permit which is granted by the Food and Drug Administration of the Department of Health, Education and Welfare of the United States for interstate shipment of experimental packs of food that vary from the requirements of federal definitions and standards of identity is automatically effective in this state under the provisions provided in the permit. The department shall issue a permit when no federal permit exists and when the experimental packs are to be manufactured and tested only within this state. The permit is subject to any term or condition that the department may prescribe.

110520. Definitions and standards of identity and quality for distilled spirits and their amendments adopted by the Internal Revenue Service of the Treasury Department of the United States in effect on the effective date of this part, or adopted on or after that date, are the definitions and standards of identity and quality for distilled spirits in this state. The department may, by regulation, establish definitions and standards of identity and quality for any distilled spirit whether or not the definitions and standards are in accordance with regulations adopted by the Internal Revenue Service of the Treasury Department of the United States, when in its judgment the action will promote honesty and fair dealing in the interest of the consumers.

110525. The department may, by regulation, establish definitions and standards of identity and quality for wine. Such definitions and standards may incorporate in whole or in part, the regulations adopted by the Secretary of the Treasury pursuant to the Federal Alcohol Administration Act, pertaining to the standards of identity and quality for wine. Standards of identity and quality for wine adopted pursuant to this section may differ from or be inconsistent with the standards promulgated by the Secretary of the Treasury

pursuant to the Federal Alcohol Administration Act. No standard of size, type, or fill of container for any wine subject to the provisions of the Alcoholic Beverage Control Act, Division 9 (commencing with Section 23000) of the Business and Professions Code, shall be adopted, but containers of wine sold in this state shall conform to the then current standards for the containers, including standards of fill, established by the Secretary of the Treasury pursuant to the Federal Alcohol Administration Act.

Article 4. Enrichment of Food and Food Products

110530. When a definition and standard of identity for an enriched food has been established pursuant to Section 110505, only the enriched form of the food shall be sold at retail in California.

110535. The nonenriched form of a food identified and standardized pursuant to Section 110505 may be used as an ingredient of another food only if it comprises less than 25 percent of the total ingredients, or it comprises 25 percent or more of the total ingredients and vitamins and minerals have been added to make it nutritionally equivalent to the enriched form of the ingredient.

110540. The department shall conduct a study of feasible methods for the packaging and sale of food products that will afford the greatest protection to the public from the adulteration of those products. The study shall be conducted in conjunction with the Department of Food and Agriculture, as well as representatives of consumer groups and food producers and retailers.

In carrying out this study, the department shall cooperate with the federal Food and Drug Administration to avoid unnecessary duplication. The department shall also evaluate the applicability of federal recommendations on food product safety to the needs of California. The department shall complete the study and report its findings to the Legislature on or before March 1, 1984.

Article 5. Adulterated Food

110545. Any food is adulterated if it bears or contains any poisonous or deleterious substance that may render it injurious to health of man or any other animal that may consume it. The food is not considered adulterated if the substance is a naturally occurring substance and if the quantity of the substance in the food does not render it injurious to health.

110550. Any food is adulterated if it bears or contains any added poisonous or deleterious substance that is unsafe within the meaning of Section 110445.

110555. Any food is adulterated if it is, bears, or contains any food additive that is unsafe within the meaning of Section 110445. If, however, a pesticide chemical has been used in or on a raw

agricultural commodity in conformity with an exemption granted or a tolerance prescribed under this part or the Food and Agricultural Code and the raw agricultural commodity has been subject to processing, such as canning, cooking, freezing, dehydrating, or milling, the residue of a pesticide chemical remaining in or on the processed food shall not be deemed unsafe if the residue in or on the raw agricultural commodity has been removed to the extent possible in good manufacturing practice, and the concentration of the residue in the processed food when ready to eat is not greater than the tolerance prescribed for the raw agricultural commodity.

110560. Any food is adulterated if it consists in whole or in part of any diseased, contaminated, filthy, putrid, or decomposed substance, or if it is otherwise unfit for food.

110565. Any food is adulterated if it has been produced, prepared, packed, or held under insanitary conditions whereby it may have become contaminated with filth, or whereby it may have been rendered unwholesome, diseased, or injurious to health.

110570. Any food is adulterated if it is, in whole or in part, the product of any diseased animal, any animal that has died otherwise than by slaughter, or any animal that has been fed on the uncooked offal from a slaughterhouse.

110575. Any food is adulterated if its container is composed, in whole or in part, of any poisonous or deleterious substance that may render the contents injurious to health.

110580. Any food is adulterated if it has been intentionally subjected to ionizing radiation unless the use of the radiation was in conformity with a regulation or exemption in effect pursuant to Section 110070.

110585. Any food is adulterated if any one of the following conditions exist:

(a) If any valuable constituent has been in whole or in part omitted or abstracted therefrom.

(b) If any substance has been substituted wholly or in part therefor.

(c) If damage or inferiority has been concealed in any manner.

(d) If any substance has been added thereto or mixed or packed therewith so as to increase its bulk or weight or reduce its quality or strength or make it appear better or of greater value than it is.

110590. Any food is adulterated if it is confectionery and any one of the following conditions exist:

(a) It has partially or completely embedded therein any nonnutritive object, provided that this subdivision shall not apply in the case of any nonnutritive object if, in the judgment of the department as provided by regulation, the object is of practical functional value to the confectionery product and would not render the product injurious or hazardous to health.

(b) It bears or contains any alcohol in excess of 5 percent by weight.

(c) It bears or contains any nonnutritive substance, provided that this subdivision shall not apply to a safe nonnutritive substance that is in or on confectionery by reason of its use for some practical functional purpose in the manufacture, packaging, or storage of the confectionery if the use of the substance does not promote deception of the consumer or otherwise result in adulteration or misbranding in violation of any provision of this act; and provided further that the department may, for the purpose of avoiding or resolving uncertainty as to the application of this clause, issue regulations allowing or prohibiting the use of particular nonnutritive substances.

110595. Any food is adulterated if it bears or contains any color additive that is unsafe within the meaning of Section 110445.

110600. Any food is adulterated if it is fresh meat and it contains any preservative or other chemical substance not approved for use in fresh meat by the department, the United States Department of Agriculture, or the Department of Food and Agriculture of this state.

110605. Any food is adulterated if it is chopped or ground beef or hamburger unless it is composed of voluntary striated muscle of fresh beef that does not contain any substance that is not approved by the department and unless it has a total fat content that is not in excess of 30 percent by weight.

110610. Any food is adulterated if it is pork sausage or breakfast sausage and it has a total fat content that is in excess of 50 percent by weight.

110615. The methods of analysis used in determining the fat content of products described in Sections 110605 and 110610 shall be those prescribed by the current issue of ''Official and Tentative Methods of Analysis of the Association of Official Analytical Chemists,'' and the supplements thereto.

110620. It is unlawful for any person to manufacture, sell, deliver, hold, or offer for sale any food that is adulterated.

110625. It is unlawful for any person to adulterate any food.

110630. It is unlawful for any person to receive in commerce any food that is adulterated or to deliver or proffer for delivery any such food.

110635. While any regulation relating to a substance referred to in Section 110080, 110085, or 110090 is in effect, any food bearing or containing a substance in accordance with the regulation shall not be considered to be adulterated.

110640. The director, with the assistance of the Department of Food and Agriculture, and in cooperation with the federal Food and Drug Administration and Environmental Protection Agency, shall identify those pesticides most likely to leave residue in processed foods.

110645. Whenever the director has been notified by the Director of Food and Agriculture pursuant to Section 12582 of the Food and Agricultural Code, the director shall immediately notify the processor, if known, by telephone, with immediate written confirmation, and take appropriate action pursuant to Section 110045.

110650. This article does not prohibit the addition of fluorine or fluorine compounds to water intended for sale to the public as bottled water for domestic use in the manner and to the extent as may be approved by the department. The label of the bottled water shall, however, satisfy all of the labeling requirements prescribed by this part.

110655. Any food intended for export shall not be deemed to be adulterated within the provisions of this part if it satisfies all of the following requirements:

(a) It accords to the specifications of the foreign purchaser.

(b) It is not in conflict with the laws of the importing country.

(c) It is labeled on the outside of the shipping package to show that it is intended for export.

If the article is sold or offered for sale in domestic commerce, this section shall not exempt it from any of the provisions of this part.

Article 6. Misbranded Food

110660. Any food is misbranded if its labeling is false or misleading in any particular.

110665. Any food is misbranded if its labeling does not conform with the requirements for nutrition labeling as set forth in Section 403(q) (21 U.S.C. Sec. 343(q)) of the federal act and the regulations adopted pursuant thereto. Any food exempted from those requirements under the federal act shall also be exempt under this section.

110670. Any food is misbranded if its labeling does not conform with the requirements for nutrient content or health claims as set forth in Section 403(r) (21 U.S.C. Sec. 343(r)) of the federal act and the regulations adopted pursuant thereto. Any food exempted from those requirements under the federal act shall also be exempt under this section.

110675. Any food is misbranded if it is in package form, unless it bears a label containing all of the following information:

(a) The name and place of business of the manufacturer, packer, or distributor.

(b) An accurate statement of the quantity of the contents in terms of weight, measure, or numerical count.

Reasonable variations from the requirements of subdivision (b) shall be permitted. Requirements for placement and prominence of the information required by subdivision (b), and exemptions as to

small packages, shall be established in accordance with regulations adopted pursuant to Sections 110100 and 110380.

110680. Any food is misbranded if its labeling or packaging does not conform to the requirements of Chapter 4 (commencing with Section 110290).

110685. Any food is misbranded if it is offered for sale under the name of another food, or if it is an imitation of another food for which a definition and standard of identity has been established by regulation and its label does not bear, in type of uniform size and prominence the word ''imitation,'' and immediately following, the name of the food imitated.

110690. Any food is misbranded if its container is so made, formed, or filled as to be misleading.

110695. Any food is misbranded if it is a confectionery and contains alcohol in excess of $^1/_2$ of 1 percent by weight and that fact does not appear on the label for the food.

110700. Any food is misbranded if it is a potentially hazardous processed food that is preserved by refrigeration at temperatures of 45 degrees Fahrenheit or lower and it is not conspicuously labeled ''Perishable Keep Refrigerated.''

110705. Any food is misbranded if any word, statement, or other information required pursuant to this part to appear on the label or labeling is not prominently placed upon the label or labeling with conspicuousness, as compared with other words, statements, designs, or devices in the labeling and in terms as to render it likely to be read and understood by the ordinary individual under customary conditions of purchase and use.

110710. Any food is misbranded if it purports to be, or is represented as, a food for which a definition and standard of identity has been established under Section 110505 and the label fails to bear the name of the food specified in the standard or otherwise fails to conform to the definition and standard.

110715. Any food is misbranded if it purports to be, or is represented as, a food for which a standard of quality or fill has been prescribed by regulation under Section 110505 and its quality or fill is below the standard unless its label bears, in a manner and form as specified by regulation, a statement that it is below the standard.

110720. Any food for which no standard of identity exists is misbranded unless it bears a label clearly stating the common or usual name of the food.

110725. (a) Any food fabricated from two or more ingredients is misbranded unless it bears a label clearly stating the common or usual name of each ingredient, and if the food purports to be a beverage containing vegetable or fruit juice, a statement with appropriate prominence on the information panel of the total percentage of fruit or vegetable juice contained in the food. Any spice, flavoring, or color not required to be certified under Section 110090, except any spice,

flavoring, or color sold as such, may be designated as spice, flavoring, or color without naming each.

(b) Exemptions may be established by the department, when compliance with any requirement of this section is impractical or results in deception or unfair competition.

(c) In adopting any regulations relating to this section, the department shall take into consideration the current regulations established by the Secretary of Health and Human Services under authority contained in the federal act.

(d) Notwithstanding Section 110040 or any other provision of law, as used in this section, the term ''food'' includes, but is not limited to, meat. The term ''food'' does not, however, include any alcoholic beverage.

(e) This section shall not apply to any food sold for consumption on or off the premises of any restaurant in the course of its business as a restaurant, or to any milk or dairy product.

110730. The requirements of Sections 110720 and 110725 do not apply to any food that is packaged at the direction of retail purchasers at the time of sale if the ingredients are disclosed to the purchasers by other means in accordance with the regulations adopted by the department.

110735. Any food is misbranded if it purports to be, or is represented, for special dietary uses as prescribed by regulation under Section 110095 and its label does not bear information concerning any vitamin or mineral content, or other dietary property as the department prescribes, by regulation, as necessary to fully inform purchasers as to the food's value for that use.

110740. Any food is misbranded if it bears or contains any artificial flavoring, artificial coloring, or chemical preservative, unless its labeling states that fact. Exemptions may be established by the department.

110745. Any food is misbranded if it is intended as a component of another food and when used in accordance with the directions of the purveyor, it will result in the final food being adulterated or misbranded.

110750. Any food is misbranded if it is a color additive and it is not in conformity with the requirements for color additives prescribed under the provisions of Section 110090.

110755. Any food is misbranded if its packaging or labeling is in violation of an applicable regulation issued pursuant to Section 108685 or 108700.

110760. It is unlawful for any person to manufacture, sell, deliver, hold, or offer for sale any food that is misbranded.

110765. It is unlawful for any person to misbrand any food.

110770. It is unlawful for any person to receive in commerce any food that is misbranded or to deliver or proffer for delivery any such food.

110775. It is unlawful for any person to alter, mutilate, destroy, obliterate, or remove the label, or any part of the labeling, of any food if the act results in the food being misbranded.

110780. It is unlawful for any person to manufacture, pack, or hold processed food in this state unless in an establishment duly registered, as provided in this part.

110785. It is unlawful for any person to willfully make a false statement or representation, or knowingly fail to disclose a fact required to be disclosed in the application for registration or renewal of registration, as provided in Article 2 (commencing with Section 110460).

110790. Any food intended for export shall not be deemed to be misbranded under this part if it satisfies all of the following requirements:

(a) It accords to the specifications of the foreign purchaser.

(b) It is not in conflict with the laws of the importing country.

(c) It is labeled on the outside of the shipping package to show that it is intended for export.

If the article is sold or offered for sale in domestic commerce, this section shall not exempt it from any of the provisions of this part.

110795. (a) The department may adopt regulations that name and describe the characteristics of salmon and any other fish or other seafood it considers appropriate. The department shall consult with the Department of Fish and Game, the Joint Committee on Fisheries and Aquaculture, consumers, commercial fishermen, aquaculturists, and seafood processors, wholesalers, restaurateurs, and other retailers before adopting these regulations. The department shall not adopt any regulation that conflicts with the common name of any fish designated by the Department of Fish and Game pursuant to Section 8023 of the Fish and Game Code.

(b) In addition to the consultations required by subdivision (a), the department shall consult and seek the recommendations of the groups named in that subdivision concerning the possible need for, or desirability of, any further legislation or regulations affecting seafood labeling. The department shall report to the Legislature the results of the consultations required by this subdivision, and make recommendations to the Legislature concerning any legislation it considers appropriate, on or before January 1, 1986.

(c) No regulation adopted pursuant to this section shall deviate from a pertinent United States standard where the fish or seafood product specified is packed or processed as a standardized product under a United States standard.

(d) Nothing in this section or in regulations adopted pursuant to this section shall be construed to require the use of more than the common family name of any fish or seafood by any restaurant in menus or advertisements.

110800. (a) Any label of any retail cut of beef, veal, lamb, or pork held for sale in a retail food production and marketing establishment or a frozen food locker plant shall clearly identify the species (beef, veal, lamb, or pork) and the primal cut from which it is derived, and the retail name.

This section shall not apply to ground beef or hamburger, boneless stewing meat, cubed steaks, sausage, or soupbones.

(b) ''Primal cuts'' include only the following in the various species:

Beef	Veal	Lamb	Pork
Chuck	Shoulder	Shoulder	Shoulder
Rib	Rib	Rib	—
Loin	Loin	Loin	Loin
Shank	Shank	Shank	—
Brisket	Breast	Breast	—
Plate	Breast	Breast	—
Flank	Flank	—	—
Round	Round or leg	Leg	Leg or ham

Cuts derived from other than the above primal cuts need only show species and the retail name.

(c) It is unlawful and constitutes misbranding for any person to sell or offer for sale in a retail food production and marketing establishment or frozen food locker plant any retail cut of beef that is labeled in violation of this section.

110805. No chopped or ground beef or hamburger that is offered for sale in any retail food production and marketing establishment or frozen food locker plant shall be advertised, labeled, or otherwise held out in any manner to describe or suggest its quality or relative leanness or fat content unless the label, advertisement, or other representation accurately discloses the maximum fat content thereof by one of the following designations:

(a) Does not exceed 30 percent fat.

(b) Does not exceed 22 percent fat.

(c) Does not exceed 15 percent fat.

No designation such as, but not limited to, ''lean,'' ''super lean,'' ''premium,'' ''deluxe'' or similar terms descriptive of quality, leanness, or fat content shall be included on the label unless the label also contains the fat-weight designation specified in subdivision (a), (b), or (c). However, as an alternative to including the fat-weight designation on the label, the fat-weight designation required by this section may be disclosed by means of a sign placed immediately adjacent to the counter on which the chopped or ground beef or hamburger is displayed. Such a sign shall be within plain view of

prospective purchasers and shall display the appropriate designation specified in subdivision (a), (b), or (c) in boldface print.

Chopped or ground beef or hamburger that is processed from primal cuts of round or sirloin shall not be required to disclose the maximum fat content if there is no reference to leanness or other quality designation relating to fat content other than the primal cut from which the product is derived; provided, in the case of ground beef or hamburger processed from the primal cut of chuck when the primal cut designated is being used, the fat content of the chopped ground beef or hamburger shall not exceed 26 percent.

All labeling and advertising for chopped or ground beef or hamburger processed from the primal cut chuck shall disclose the maximum fat weight designated as, ''Does not exceed 26 percent fat.''

It is unlawful and constitutes misbranding for any person to sell or offer for sale in a retail food production and marketing establishment or frozen food locker plant any chopped or ground beef or hamburger that is labeled in violation of this section.

Article 7. The California Organic Foods Act of 1990

110810. This article shall be known, and may be cited as, the California Organic Foods Act of 1990.

110815. The following words and phrases, when used in this article, shall have the following meanings:

(a) ''Administered'' means ingested, injected, or otherwise topically or internally introduced to livestock, fowl, or fish.

(b) ''Applied'' means introduced, incorporated within, added to, or placed upon any seed, crop, plant, livestock, fowl, fish, soil, or growing medium, and shall also mean used in, on, or around any facility or area in which food is kept.

(c) ''Area'' means the physical space surrounding food where there is more than a negligible chance of a prohibited material being absorbed by, incorporated into, or adhered to the food, soil, or growing medium. The area may differ significantly depending on the circumstances. Except in the case of the production of food, area shall not include any physical space surrounding food if an intervening event, such as the use of a cleaning method for processing equipment, or the passage of time, has made the chance of a prohibited material being absorbed by, incorporated into, or adhered to the food, negligible.

(d) ''Botanicals'' means substances derived solely from plants or plant parts.

(e) ''Endemic disease'' means a disease in animal or fish that is either universal or common to a species within the geographic region.

(f) ''Enforcement authority'' means the governmental unit with primary enforcement jurisdiction, as provided in Section 110925.

(g) ‘‘Field’’ means a contiguous area of land for agricultural production that is managed with a consistent set of production methods.

(h) ‘‘Feed’’ means any substance used or intended for consumption by livestock, fowl, or fish to provide nourishment, including range and pasturage vegetation.

(i) ‘‘Growing medium’’ means a substance that provides nutrients for plants or fungi but which is separate from the land surface of the world.

(j) ‘‘Handled’’ means shipped, packed, repacked, sold for resale, warehoused, wholesaled, imported into the state, or stored by other than a grower, producer, processor, or retailer of that food.

(k) ‘‘Management unit’’ means the physical facilities and equipment associated with crop production that is not confined to a field, such as animal production, greenhouse production, or seed sprouting. Management units shall be described by the location and function of the physical facilities and equipment, and other aspects as determined by the enforcement authority. In the case of animal production, the management units shall also be described by the quantity and source of each group of animals that is managed together as a unit.

(*l*) ‘‘Processed’’ means cooking, baking, heating, drying, mixing, grinding, crushing, pressing, churning, separating, extracting juices or other materials, peeling, fermenting, eviscerating, preserving, dehydrating, freezing, or manufacturing that materially alters the flavor, keeping quality, or any other property, or the making of any substantial change of form. ‘‘Processed’’ does not include refrigeration at temperatures that are above the freezing point nor any other treatment that merely retards or accelerates the natural processes of ripening or decomposition.

(m) ‘‘Produced’’ means grown, raised, harvested, handled, or stored under the control of the grower or producer.

(n) ‘‘Producer,’’ ‘‘handler,’’ and ‘‘processor’’ means any person who has, respectively, produced, handled, or processed any food.

(o) ‘‘Production,’’ ‘‘handling,’’ and ‘‘processing’’ means the process by which any food is, respectively, produced, handled, and processed.

(p) ‘‘Prohibited materials’’ means any of the following:

(1) When used in connection with the production, handling, or processing of meat, fowl, or fish:

(A) Any drug, medication, hormone or growth regulator, whether or not synthetic, or any other synthetic substance, including, but not limited to, any substance administered to stimulate or regulate growth or tenderness, and any subtherapeutic dose of antibiotic. The use of a drug or medication for medical treatment of a specific and manifest malady diagnosed and prescribed by a licensed veterinarian, or under the general supervision of a licensed

veterinarian, shall be permitted, but not within 90 days prior to slaughter or twice the withdrawal time specified by the federal Food and Drug Administration, whichever is longer. In addition, vaccines may be administered for prevention of an endemic disease or as required by law. Vitamin and mineral supplements also may be administered.

(B) Any feed administered to livestock, fowl, or fish that does not comply with the requirements of regulations adopted pursuant to Section 14904 of the Food and Agricultural Code.

(C) Any artificial rumen stimulants, such as plastic pellets.

(D) Any manure intentionally fed or refed.

(E) Any synthetically compounded substance applied postslaughter to the meat, fowl, or fish itself, or to its packaging, including preservatives.

(F) Any substance applied to any area where livestock, fowl, or fish or meat, fowl, or fish products are handled or kept at any time that does not consist entirely of microorganisms, microbiological products, or substances consisting of, or derived or extracted solely from, plant, animal, or mineral-bearing rock substances. Prohibited materials shall not include the application of botanicals, lime-sulfur, gypsum, soaps, and detergents. Prohibited materials shall include the application of petroleum solvents, diesel, and other petroleum fractions.

(2) When used in connection with the production, distribution, or processing of dairy products or eggs:

(A) Any drug, medication, hormone, or growth regulator, whether or not synthetic, and any other synthetic substance, including, but not limited to, any substance administered to stimulate or regulate growth, milk or egg production, and any subtherapeutic dose of antibiotic. The use of a drug or medication for medical treatment of a specific and manifest malady diagnosed and prescribed by a licensed veterinarian, or under the general supervision of a licensed veterinarian, shall be permitted, but not less than 30 days prior to taking of the milk or laying of eggs, or twice the withdrawal time specified by the federal Food and Drug Administration, whichever is longer. In addition, vaccines may be administered for prevention of an endemic disease or as required by law. Vitamin and mineral supplements may also be administered.

(B) Any feed administered to livestock within one year of the taking of the milk, or to fowl within six months of the laying of eggs, that does not comply with the requirements of regulations adopted pursuant to Section 14904 of the Food and Agricultural Code.

(C) Any artificial rumen stimulants, such as plastic pellets.

(D) Any manure intentionally fed or refed.

(E) Any substance applied to any area where livestock, fowl, or fish, or meat, dairy, fowl, or fish products are handled or kept at any time that does not consist entirely of micro-organisms,

microbiological products, or substances consisting of, or derived or extracted solely from, plant, animal, or mineral-bearing rock substances. Prohibited materials shall not include the application of botanicals, lime-sulfur, gypsum, soaps, and detergents. Prohibited materials shall include the application of petroleum solvents, diesel, and other petroleum fractions.

(3) When used in connection with the production, handling, or processing of raw agricultural commodities and any other food not specified in paragraphs (1) and (2), any synthetically compounded fertilizer, pesticide, growth regulator, or any other substance that does not consist entirely of micro-organisms, microbiological products, or substances consisting of, or derived or extracted solely from plant, animal, or mineral-bearing rock substances. Before harvest, prohibited materials shall not include the application of bordeaux mixes and trace elements for known deficiencies as determined by plant or animal tissue or by soil testing, soluble aquatic plant products, botanicals, lime-sulfur, gypsum, dormant oils, summer oils, fish emulsion, soaps, and detergents, except for petroleum solvents, diesel, and other petroleum fractions, used as weed or carrot oils. Prohibited materials shall not include the application of soaps and detergents.

(4) Water, including substances dissolved in water, shall not be a prohibited material, even if it contains incidental contamination from a prohibited material, if the prohibited material was not added by, or under the direction or control of, the producer, handler, processor or retailer.

(q) ‘‘Retailer’’ means a person engaged in the sale to consumers of food sold as organic and not engaged in the production, handling or processing of food sold as organic.

(r) ‘‘Sold as organic’’ means any use of the terms ‘‘organic,’’ ‘‘organically grown,’’ ‘‘naturally grown,’’ ‘‘ecologically grown,’’ or ‘‘biologically grown,’’ or grammatical variations of those terms, whether orally or in writing, in connection with any food grown, handled, processed, sold, or offered for sale in this state, including, but not limited to, any use of these terms in labeling or advertising of any food and any ingredient in a multi-ingredient food, except as provided in Section 110880.

(s) ‘‘Substance’’ includes all components of a substance, including active and inert ingredients.

(t) ‘‘Synthetically compounded’’ means formulated or manufactured by a process that chemically changes a substance extracted from naturally occurring plant, animal, or mineral sources, excepting microbiological processes.

110820. Except as otherwise provided in this article, no food shall be sold as organic unless it consists entirely of any of the following:

(a) Raw agricultural commodities that meet the following requirements:

(1) The commodity has been produced and handled without any prohibited material or color additive having been applied, and without irradiation.

(2) In the case of any raw agricultural commodity produced from seed, the seed has not been treated with any prohibited material. If untreated seed is not available, seed treated with a fungicide may be used, except for seed used for sprouts, as described in paragraph (6).

(3) Prior to January 1, 1995, in the case of perennial crops, no prohibited material shall have been applied to the crop, field, management unit, or area where the commodity is grown for 12 months prior to the appearance of flower buds. During the 1995 calendar year, in the case of perennial crops, no prohibited material shall have been applied to the crop, field, management unit, or area where the commodity is grown for 24 months prior to harvest. Commencing January 1, 1996, in the case of perennial crops, no prohibited material shall have been applied to the crop, field, management unit, or area where the commodity is grown for 36 months prior to harvest.

(4) Prior to January 1, 1995, in the case of annual or two-year crops, no prohibited material shall have been applied to the field, management unit, or area where the commodity is grown for 12 months prior to seed planting or transplanting. During the 1995 calendar year, in the case of annual or two-year crops, no prohibited material shall have been applied to the crop, field, management unit, or area where the commodity is grown for 24 months prior to harvest. Commencing January 1, 1996, in the case of annual or two-year crops, no prohibited material shall have been applied to the crop, field, management unit, or area where the commodity is grown for 36 months prior to harvest.

(5) In the case of any raw agricultural commodity that is grown in any growing medium, such as fungi grown in compost or transplants grown in potting mix:

(A) The growing medium must have been manufactured or produced:

(i) Without any prohibited material having been included in the medium.

(ii) Without any prohibited material having been applied to the area where the medium is manufactured or produced during seeding or inoculation of the medium.

(iii) Using methods that will minimize the migration or accumulation of any pesticide chemical residue in food grown in the medium.

(B) No prohibited material shall have been applied to the area where the commodity is grown during seeding or inoculation. If a prohibited material is applied in the area prior to seeding or inoculation, a residue test shall be performed on the commodity grown from that seeding or inoculation.

(6) In the case of any raw agricultural commodity that is grown directly from seed and harvested within 18 days of germination, including, by way of example, sprouts, no prohibited material shall have been applied to the seed, and no prohibited material shall have been applied to the area where the commodity is grown after introduction of the seed. After January 1, 1992, the seed shall have been produced, handled, and processed in accordance with this article.

(b) Processed food manufactured only from raw agricultural commodities as described in subdivision (a), except as follows:

(1) Water, air, and salt may be added to the processed food.

(2) Ingredients other than raw agricultural commodities as described in subdivision (a) may be added to the processed food if these ingredients are included in the national list adopted by the United States Secretary of Agriculture pursuant to Section 6517 of the federal Organic Foods Production Act (7 U.S.C. Sec. 6501 et seq.) and do not represent more than 5 percent of the weight of the total finished product, excluding salt and water.

(c) Processed food manufactured only from a combination of raw agricultural commodities as described in subdivision (a) and processed food as described in subdivision (b).

(d) Meat, fowl, fish, dairy products, or eggs that are produced, distributed, and processed without any prohibited material having been applied or administered.

110825. No food that contains any prohibited material residue as a result of spray drift or any other contamination beyond the control of the producer, handler, processor, or retailer, may be sold as organic unless the amount of residue does not exceed 5 percent of the federal Environmental Protection Agency tolerance level.

110830. (a) No food grown, handled, processed, sold, advertised, represented, or offered for sale in this state, shall be sold as organic unless it also is prominently labeled, invoiced, and represented as follows, or with substantially similar language:

(1) For raw agricultural commodities:

ORGANICALLY GROWN IN ACCORDANCE WITH THE CALIFORNIA ORGANIC FOODS ACT OF 1990.

(2) For processed food:

ORGANICALLY GROWN AND PROCESSED IN ACCORDANCE WITH THE CALIFORNIA ORGANIC FOODS ACT OF 1990.

(3) For unprocessed meat, fowl, fish, dairy products, or eggs:

ORGANICALLY PRODUCED IN ACCORDANCE WITH THE CALIFORNIA ORGANIC FOODS ACT OF 1990.

(b) For unpackaged food sold as organic to consumers, physical attachment to the food of the applicable language set forth in subdivision (a) shall not be required if the language appears prominently on or near the bin or container holding the food.

(c) For food certified by a registered certification organization in accordance with Sections 110850 to 110870, inclusive, or Section 46009 of the Food and Agricultural Code, the term ''CERTIFIED'' may be used in labeling food sold as organic by the producer and by any handler if the name of the registered certification organization precedes or follows that term in the same size type, and if subdivisions (a) and (b) have been met.

(d) When unprocessed food that has been certified by two or more registered certification organizations, is commingled by a handler or retailer, but is not processed, the food shall thereafter be labeled as set forth in paragraph (1) or (3) of subdivision (a), and subdivisions (b) and (c), with the name of each certification organization that has certified any of the food.

(e) Except as provided in subdivision (f), when less than all of the ingredients in a multi-ingredient food are produced, handled, and, if applicable, processed in accordance with Section 110820, the food shall not be sold as organic. However, those ingredients produced, handled, and processed in accordance with Section 110820 may be described using the terms contained in subdivision (r) of Section 110815 on the principal display panel of the food if the terms are clearly used only to modify those ingredients and only if 100 percent of those ingredients are produced in accordance with Section 110820. The use of the terms shall be limited to no greater than three-quarters of the type size of the statement of identity.

Additionally or alternatively, those ingredients produced, handled, and processed in accordance with Section 110820 may be described using the terms contained in subdivision (r) of Section 110815 on the ingredient list on the packaging, if all other provisions of this article are met.

(f) No food may be advertised or labeled as ''organic when available'' or similar terminology that leaves in doubt whether the food is being sold as organic.

(g) The provisions of this article relating to the labeling of meat and meat products and poultry and poultry products shall not be interpreted to authorize any labeling of those products, that is subject to the jurisdiction of federal labeling laws, in a manner inconsistent with those federal labeling laws.

(h) Notwithstanding subdivision (a), until January 1, 1992, any person may utilize existing supplies of labels that conform to the requirements of former Section 26569.13.

110835. The director may adopt regulations listing specific substances that are in compliance or not in compliance with

subdivision (p) of Section 110815 for use in the processing of foods under the enforcement jurisdiction of the department.

110840. (a) All persons who produce raw agricultural commodities that are sold as organic shall keep accurate and specific records of the following:

(1) For each field or management unit, all substances applied to the crop, soil, growing medium, growing area, irrigation or postharvest wash or rinse water, or seed, including all substances applied during the time periods specified in paragraphs (3) to (6), inclusive, of subdivision (a) of Section 110820, the quantity of each substance applied, and the date of each application. All substances shall be identified by brand name, if any, and by source.

(2) The quantity harvested from each field or management unit, the size of the field or management unit, the field number, and the date of harvest.

(3) The name and address and, if applicable, the registration numbers issued pursuant to Section 110875 of this code or Section 46002 of the Food and Agricultural Code of all handlers, processors, or retailers to whom the food is sold or otherwise transferred, the quantity of food sold or otherwise transferred, and the date of the transaction.

(b) All persons who produce meat, fowl, fish, dairy products, or eggs sold as organic shall keep accurate and specific records of the following:

(1) Unless the livestock, fowl, or fish was raised or hatched by the producer, the name and address and, if applicable, the registration numbers issued pursuant to Section 110875 of this code or Section 46002 of the Food and Agricultural Code of all suppliers of livestock, fowl, or fish and the date of the transaction.

(2) The name and address and, if applicable, the registration numbers issued pursuant to Section 110875 of this code or Section 46002 of the Food and Agricultural Code of all suppliers of feed, the quantity of feed purchased, and the date of the transaction.

(3) All substances administered and fed to the animal, including all feed, medication and drugs, and all substances applied in any area in which the animal, milk, or eggs are kept, including the quantity administered or applied, and the date of each application. All substances shall be identified by brand name, if any, and by source.

(4) The name and address and, if applicable, the registration numbers issued pursuant to Section 110875 of this code or Section 46002 of the Food and Agricultural Code of all handlers, processors, or retailers to whom the food is sold or otherwise transferred, the quantity of food sold or otherwise transferred, and the date of the transaction.

(c) All persons who handle food sold as organic shall keep accurate and specific records of the following:

(1) The name and address and, if applicable, the registration numbers issued pursuant to Section 110875 of this code or Section 46002 of the Food and Agricultural Code of all suppliers of the food, the quantity of food purchased or otherwise transferred, and the date of the transaction.

(2) Invoices for each shipment from the supplier that state that the food may be sold as organic.

(3) If the food is labeled or represented to be certified, invoices from the supplier or separate written documentation from a certification organization that states that the food is certified under this article.

(4) All pesticide chemicals applied to the food while in the control of the handler, including the quantity applied, and the date of each application. All pesticide chemicals shall be identified by brand name, if any, and by source.

(5) All substances routinely applied in or around any area or container in which the food is kept. All substances shall be identified by brand name, if any, and by source. This record may be provided in the form of a single list of substances used.

(6) The name and address and, if applicable, the registration numbers issued pursuant to Section 110875 of this code or Section 46002 of the Food and Agricultural Code of all persons to whom the food is sold or otherwise transferred, the quantity of food sold or otherwise transferred, and the date of the transaction.

(d) All persons who process food sold as organic shall keep accurate and specific records of the following:

(1) The name and address and, if applicable, the registration numbers issued pursuant to Section 110875 of this code or Section 46002 of the Food and Agricultural Code of all suppliers of the food, the quantity of food purchased or otherwise transferred, and the date of the transaction.

(2) Invoices for each shipment from the supplier that state that the food may be sold as organic.

(3) If the food is labeled or represented to be certified, invoices from the supplier or separate written documentation from a certification organization that states that the food is certified under this article.

(4) All substances applied to the food or used in its processing, all substances applied to the food while in the control of the processor, and all substances applied in or around any area or container in which the food is kept, including the quantity of substances applied and the date of each application. All substances shall be identified by brand name, if any, and by source.

(5) The name and address and, if applicable, the registration numbers issued pursuant to Section 110875 of this code or Section 46002 of the Food and Agricultural Code of all handlers, processors, or retailers to whom the food is sold or otherwise transferred, the

quantity of food sold or otherwise transferred, and the date of the transaction.

(e) All persons who sell, at retail, food sold as organic shall keep accurate and specific records of the following:

(1) The name and address and, if applicable, the registration numbers issued pursuant to Section 110875 of this code or Section 46002 of the Food and Agricultural Code of all suppliers of the food, the quantity of food purchased or otherwise transferred, and the date of the transaction.

(2) Invoices for each shipment from the supplier that state that the food may be sold as organic.

(3) If the food is labeled or represented to be certified, invoices from the supplier or separate written documentation from a certification organization that states that the food is certified under this article.

(4) All pesticide chemicals applied to the food while in the control of retailer, including the quantity applied, and the date of each application. All pesticide chemicals shall be identified by brand name, if any, and by source.

(5) All substances routinely applied in or around any area or container in which the food is kept. All substances shall be identified by brand name, if any, and by source. This record may be provided in the form of a single list of substances used. One list may be kept at the retailer's headquarters office if all individual stores operated by that retailer utilize only the substances on the list.

Paragraphs (1) and (2) shall not apply to a person who both produces and sells, at retail, the same food. The records required to be kept pursuant to paragraphs (1) to (4), inclusive, of this subdivision may be kept at the retailer's warehouse or headquarters office.

(f) All records required to be kept under this section shall be maintained by producers for not less than three years and by handlers and processors for not less than two years from the date that the food is sold, and shall be maintained by retailers for not less than one year from the date that the food is received by the retailer. These records shall be made available for inspection at any time by the director or the Director of Food and Agriculture and by each certification organization that certifies the food, if any, for purposes of carrying out this article and Chapter 10 (commencing with Section 46000) of Division 17 of the Food and Agricultural Code.

110845. (a) Notwithstanding any other provision of law, any producer, handler, processor, or retailer of food sold as organic shall immediately make available for inspection by, and shall upon request, within 72 hours of the request, provide a copy to, the director, the Attorney General, any prosecuting attorney, any governmental agency responsible for enforcing laws related to the production or handling of food sold as organic, or the Secretary of

Food and Agriculture of any record required to be kept under this section for purposes of carrying out this article and Chapter 10 (commencing with Section 46000) of Division 17 of the Food and Agricultural Code. Records acquired pursuant to this subdivision shall not be public records as that term is defined in Section 6252 of the Government Code and shall not be subject to Chapter 3.5 (commencing with Section 6250) of Division 7 of Title 1 of the Government Code.

(b) Upon written request of any person that establishes cause for the request, the director and the Secretary of Food and Agriculture shall obtain and provide to the requesting party within 10 working days of the request a copy of any of the following records required to be kept under this article that pertain to a specific product sold or offered for sale, and that identify substances applied, administered, or added to that product, except that financial information about an operation or transaction, information regarding the quantity of a substance administered or applied, the date of each administration or application, information regarding the identity of suppliers or customers, and the quantity or price of supplies purchased or products sold shall be removed before disclosure and shall not be released to any person other than persons and agencies authorized to acquire records under subdivision (a):

(1) Records of a producer, as described in paragraph (1) of subdivision (a) and in paragraph (3) of subdivision (b) of Section 110840.

(2) Records of a handler, as described in paragraphs (4) and (5) of subdivision (c) of Section 110840, records of previous handlers, if any, and producers as described in paragraph (1) of subdivision (a) of, paragraph (3) of subdivision (b) of, and paragraphs (4) and (5) of subdivision (c) of, Section 110840, without identifying the previous handlers or producers, and, if applicable, records obtained as required in subdivision (d).

(3) Records of a processor, as described in paragraph (4) of subdivision (d) of Section 110840, except for processing aids that are not residual in the product and spices and seasonings exempt from labeling requirements in Parts 145 and 146 of Title 21 of the Code of Federal Regulation, records of previous processors and handlers, if any, and producers as described in paragraph (1) of subdivision (a) of, paragraph (3) of subdivision (b) of, paragraphs (4) and (5) of subdivision (c) of, and paragraph (4) of subdivision (d) of, Section 110840, without identifying the previous processors, handlers, or producers, and, if applicable, records obtained as required in subdivision (d).

(4) Records of a retailer, as described in paragraphs (4) and (5) of subdivision (e) of Section 110840, records of previous processors and handlers, if any, and producers as described in paragraph (1) of subdivision (a) of, paragraph (3) of subdivision (b) of, paragraphs

(4) and (5) of subdivision (c), and paragraph (4) of subdivision (d) of, Section 110840, without identifying the previous processors, handlers, or producers, and, if applicable, records obtained as required in subdivision (d).

This subdivision shall be the exclusive means of public access to records required to be kept by producers, processors, handlers, and retailers under this article.

A person required to provide records pursuant to a request under this subdivision, may petition the director or the Secretary of Food and Agriculture to deny the request based on a finding that the request is of a frivolous or harassing nature. The secretary or director may, upon the issuance of such a finding, waive the information production requirements of this subdivision for the specific request for information that was the subject of the petition.

(c) Information specified in subdivision (b) that is required to be released upon request shall not be considered a ''trade secret'' under Section 110165, Section 1060 of the Evidence Code, or the Uniform Trade Secrets Act (Title 5 (commencing with Section 3426) of Part 1 of Division 4 of the Civil Code).

(d) The director or the Secretary of Food and Agriculture may charge the person requesting records a reasonable fee to reimburse him or her self or the source of the records for the cost of reproducing the records requested.

(e) Any person who first imports into this state, for resale, food sold as organic shall obtain and provide to the enforcement authority, upon request, proof that the products being sold have been certified by an accredited certifying organization or have otherwise been produced in compliance with this article.

(f) The director shall not be required to obtain records not in his or her possession in response to a subpoena. Prior to releasing records required to be kept pursuant to this chapter in response to a subpoena, the director shall delete any information regarding the identity of suppliers or customers and the quantity or price of supplies purchased or products sold.

110850. (a) Commencing January 1, 1996, all organic products shall be certified by a registered certifying organization, and food shall be sold as organic only in accordance with this section, subdivisions (c) and (d) of Section 110830, Sections 110855 to 110870, inclusive, and Section 46009 of the Food and Agricultural Code. The Secretary of Food and Agriculture, director, and the county agricultural commissioners shall carry out this subdivision to the extent that adequate funds are made available for that purpose.

(b) Food sold as organic may be certified only by a certification organization registered pursuant to subdivisions (c) and (d), by the director pursuant to subdivision (f), by a certification organization registered pursuant to Section 46009 of the Food and Agricultural Code, or by the Secretary of Food and Agriculture or a county

agricultural commissioner pursuant to Section 46009 of the Food and Agricultural Code or a federally accredited certification organization.

(c) In order to be registered, a certification organization shall meet all of the following minimum qualifications:

(1) Be the certification organization for at least five legally separate and distinct, financially unrelated, and independently controlled persons involved in the production or processing of food sold as organic.

(2) Be a legally separate and distinct entity from any person whose food is certified by the organization. A certification organization shall be considered legally separate and distinct notwithstanding the fact that persons or representatives of persons whose food is certified serve as directors, officers, or in other capacities for the certification organization, so long as those persons or representatives of those persons do not exercise decisionmaking authority over certification of that particular food.

(3) Have no financial interest in the sale of the food, except that fees charged by the certification organization to cover the reasonable costs of operating the certification organization do not constitute a financial interest for purposes of this section.

(d) Effective January 1, 1992, a certification organization which certifies processed food sold as organic, except for processed meat, fowl, or dairy products, shall register with the director and shall thereafter annually renew the registration unless no longer engaged in the activities requiring the registration. Registration shall be on a form provided by the director, shall include the filing of a certification plan as specified in Section 110865 and payment of the fee specified in subdivision (f). The director shall make forms available for this purpose on or before December 1, 1993. The registration form shall include a written statement affirming compliance with all requirements for certification organizations specified in Section 110850 to 110870, inclusive, and confirmation that each component of the organization's certification plan has been filed as specified in Section 110865. The director shall reject a registration submission that is incomplete or not in compliance with this article.

(e) Commencing July 31, 1991, the director may, upon the request of a sufficient number of persons to fund the program's cost, establish and maintain a certification program for processors of food sold as organic and shall establish and collect a fee from all processors of food certified under that program to cover all of the department's costs of administering the program. The certification program shall be subject to all provisions regarding certification organizations contained in this article, except that the requirements of subdivisions (c) and (d) shall not apply, and the program shall meet all of the

requirements for federal certification programs, including federal accreditation.

(f) The registration fee shall be five hundred dollars ($500), unless the certification organization is also registered as a certifier of producers by the Secretary of Food and Agriculture under Section 46009 of the Food and Agricultural Code, in which case the registration fee shall be one hundred dollars ($100).

(g) The director may audit the organization's certification procedures and records at any time. Records of certification organizations not otherwise required to be released upon request or made publicly available shall not be released by the director except to other employees of the department, the Department of Food and Agriculture, a county agricultural commissioner, the Attorney General, any prosecuting attorney, or any government agency responsible for enforcing laws related to the activities of the person subject to this part.

110855. Prior to initial certification of a producer, a registered certification organization shall conduct at least one initial physical inspection of the premises where the food to be certified is produced. This inspection shall include the recordkeeping system necessary for compliance with Section 110840 and the area or facility at which the food is produced.

110860. (a) A registered certification organization shall no less often than, at the end of each calendar quarter, prepare a list by name of all persons whose production or processing of food is certified or pending certification by the certification organization. This list shall be filed with the department or the Department of Food and Agriculture, as applicable, by the certification organization and made publicly available within 30 days after the end of each quarter.

(b) A registered certification organization or a federally accredited certification organization shall, at least annually, physically inspect the premises where the food to be certified is produced and processed. The inspection shall include an examination of recordkeeping.

110865. A registered certification organization shall adopt and adhere to a certification plan filed annually and made publicly available. Except in the case of a certification program established pursuant to subdivision (e) of Section 110850, a certification plan shall be filed as part of the registration required pursuant to subdivision (d) of Section 110850. A certification plan shall at minimum include a detailed description of all of the following elements of the certification organization's program:

(a) Minimum information required from producers or processors regarding growing or processing practices and methods for verifying that information.

(b) Qualifications of and training requirements for all inspectors.

(c) Procedures for inspection, including frequency and items covered.

(d) Procedures for soil and tissue sampling and analysis.

(e) Criteria for certification.

(f) Process for certification decisionmaking, including identification of persons with decisionmaking authority.

110870. (a) Only food that has been produced, handled, and processed in accordance with this article may be certified by a registered certification organization.

(b) Processed or multiingredient food sold as organic may only be certified if all the organic ingredients are certified.

110875. (a) Every person engaged in this state in the processing or handling of processed food sold as organic, including the handling or processing of fish or seafood sold as organic, except for processors and handlers of processed meat, fowl, or dairy products, shall register with the director, and shall thereafter annually renew the registration unless no longer so engaged. Processors and handlers of processed food that are registered with the department pursuant to Article 2 (commencing with Section 110460) shall register under this section in conjunction with the annual renewal of their registration pursuant to that article. All others required to register under this subdivision shall register within 30 days of forms being made available for this purpose. Any processor or handler of processed foods required to register under this subdivision that does not pay the registration fee required by subdivision (c) within 30 days of the date on which the fee is due and payable shall pay a penalty of 1 percent per month on the unpaid balance.

(b) Registration shall be on a form provided by the director and shall be valid for a period of one calendar year from the date of validation of the completed registration form. The director shall make forms available for this purpose on or before January 1, 1994. The information provided on the registration form shall include all of the following:

(1) The nature of the registrant’s business, including the types and quantities of each type of product that are sold as organic.

(2) The total current annual gross sales in dollars of products sold as organic.

(3) The names of all certification organizations and governmental entities, if any, providing certification to the registrant pursuant to this article.

(c) A registration form shall be accompanied by payment of a nonrefundable registration fee of one hundred dollars ($100), payable to the department.

(d) To the extent feasible, the director shall coordinate the registration and fee collection procedures of this section with similar licensing or registration procedures applicable to registrants.

(e) The director shall reject a registration submission that is incomplete or not in compliance with this article.

(f) The director shall provide a validated copy of the completed registration form to the registrant.

(g) Registration forms shall be made available to the public for inspection and copying at the main office of the department. Copies of registration forms shall also be made available by mail, upon written request and payment of a reasonable fee, as determined by the director. Registration information regarding quantity of products sold and gross sales volume in dollars shall be deleted prior to public inspection and copying and shall not be released to any person except other employees of the department, the Department of Food and Agriculture, a county agricultural commissioner, the Attorney General, any prosecuting attorney, or any government agency responsible for enforcing laws related to the activities of the person subject to this part.

(h) The requirements of this section shall not apply to retailers of food sold as organic.

110880. This article shall apply to all food sold as organic within the state, wherever produced, handled, or processed, and to all food produced, handled, or processed in the state, wherever sold as organic; except that in lieu of registration under this article, the director may recognize a certification program operating outside the state that certifies processed food sold as organic, except for processed meat, fowl, or dairy products, as functionally equivalent to a certification organization registered under Section 110850, so long as that program meets minimum standards substantially similar to those contained in subdivision (c) of Section 110850 and Sections 110855 to 110870, inclusive. The director may administratively establish a procedure whereby certification organizations operating outside the state may apply for and receive recognition.

110885. This article shall not apply to the term ‘‘natural’’ when used in the labeling or advertising of a food.

110890. (a) It is unlawful for any person to sell, offer for sale, advertise, or label any food in violation of this article.

(b) Notwithstanding subdivision (a), a person engaged in business as a distributor or retailer of food who in good faith sells, offers for sale, labels, or advertises any food in reliance on the representations of a producer, processor, or other distributor that the food may be sold as organic, shall not be found to violate this article unless the distributor either: (1) knew or should have known that the food could not be sold as organic; (2) was engaged in producing or processing the food; or (3) prescribed or specified the manner in which the food was produced or processed.

110895. (a) It is unlawful for any person to certify food in violation of this article.

(b) It is unlawful for any person to certify food as organic unless duly registered as a certification organization pursuant to Section 110850.

(c) It is unlawful for any person to willfully make a false statement or representation, or knowingly fail to disclose a fact required to be disclosed, in registration for a certification organization pursuant to Section 110850.

110900. (a) It is unlawful for any person to produce, handle, or process food sold as organic unless duly registered pursuant to Section 110875.

(b) It is unlawful for any person to willfully make a false statement or representation, or knowingly fail to disclose a fact required to be disclosed, in registration pursuant to Section 110875.

110905. It is unlawful for any person to forge, falsify, fail to retain, fail to obtain, or fail to disclose records pursuant to Sections 110840 and 110845.

110910. It is unlawful for any person to advertise, label, or otherwise represent that any fertilizer or pesticide chemical may be used in connection with the production, processing, or distribution of food sold as organic if that fertilizer or pesticide chemical contains a prohibited material.

110915. (a) In lieu of prosecution, the director may levy a civil penalty against any person who violates this article or any regulation adopted pursuant to this article in an amount not more than five thousand dollars ($5,000) for each violation. The amount of the penalty assessed for each violation shall be based upon the nature of the violation, the seriousness of the effect of the violation upon effectuation of the purposes and provisions of this article, and the impact of the penalty on the violator, including the deterrent effect on future violations.

(b) Notwithstanding the penalties prescribed in subdivision (a), if the director finds that a violation was not intentional, the director may levy a civil penalty of not more than two thousand five hundred dollars ($2,500) for each violation.

(c) For a first offense, in lieu of a civil penalty as prescribed in subdivisions (a) and (b), the director may issue a notice of violation, if he or she finds that the violation is minor.

(d) A person against whom a civil penalty is levied shall be afforded an opportunity for a hearing before the director, upon request made within 30 days after the date of issuance of the notice of penalty. At the hearing, the person shall be given the right to review the director’s evidence of the violation and the right to present evidence on his or her own behalf. If no hearing is requested, the civil penalty shall constitute a final and nonreviewable order.

(e) If a hearing is held, review of the decision of the director may be sought by any person within 30 days of the date of the final order

of the director pursuant to Section 1094.5 of the Code of Civil Procedure.

(f) A civil penalty levied by the director pursuant to this section may be recovered in a civil action brought in the name of the state.

110920. No fee established and collected pursuant to this article shall exceed the department's costs of regulating and enforcing the provisions of this article related to the function for which the fee is established.

110925. Any fees and civil penalties collected pursuant to this article shall be deposited in the General Fund and, upon appropriation by the Legislature, shall be expended to fulfill the responsibilities of the director as specified in this article.

110930. The director shall, to the extent funds are available, enforce this article applicable to all processors and handlers of processed food sold as organic, including handlers and processors of fish and seafood sold as organic, except for processors and handlers of processed meat, fowl, and dairy products.

110935. (a) The director shall maintain in a central location, and make publicly available for inspection and copying, upon request, a list of all penalties levied within the past five years, including the amount of each penalty, the party against whom the penalty was levied, and the nature of the violation. The list also shall be available by mail, upon written request and payment of a reasonable fee, as determined by the director.

(b) On or before January 1, 1994, the director, in cooperation with the Director of Food and Agriculture, shall prepare a report to the Legislature describing enforcement activities under this article and Chapter 10 (commencing with Section 46000) of Division 17 of the Food and Agricultural Code and containing recommendations regarding the need for, and means of, improved enforcement of this article and Chapter 10 (commencing with Section 46000) of Division 17 of the Food and Agricultural Code.

110940. (a) Any person may file a complaint with the director concerning suspected noncompliance with this article by a person over whom the director has responsibility as provided in this article.

(b) The director shall, to the extent funds are available, establish a procedure for handling complaints, including, provision of a written complaint form, and procedures for commencing an investigation within three working days of receiving a written complaint regarding fresh food, and within seven working days for other food, and completing an investigation and reporting findings and enforcement action taken, if any, to the complainant within 90 days thereafter.

(c) The director may establish minimum information requirements to determine the verifiability of a complaint and may provide for rejection of a complaint that does not meet the

requirements. The director shall provide written notice of the reasons for rejection to the person filing the complaint.

(d) The responsibilities of the director under this section shall be carried out to the extent funds are available.

110945. This article shall apply notwithstanding any other provision of law that is inconsistent with this article. Nothing in this article is intended to repeal any other provision of law not inconsistent with this article.

110950. The director may adopt any regulations as are reasonably necessary to assist in the implementation of, or to make more specific, the provisions of, this article.

110955. Any reference in law to former Section 26569.11, whether existing or hereinafter enacted, shall be interpreted to refer to this article and Chapter 10 (commencing with Section 46000) of Division 17 of the Food and Agricultural Code as the successor section.

Article 8. Potentially Hazardous Food

110960. It is unlawful for any person to hold or display any potentially hazardous refrigerated food at any temperature above 45 degrees Fahrenheit.

Article 9. Frozen Foods

110965. (a) No retail food production and marketing establishment shall advertise, label, or otherwise hold out as fresh any meat or fish that has been previously frozen.

(b) For purposes of this section:

(1) ‘‘Frozen’’ means any meat or fish stored in a room or compartment in which the temperature is plus five degrees Fahrenheit or lower.

(2) ‘‘Retail food production and marketing establishment’’ means any room, building, or place, or portion thereof, maintained, used, or operated for, or in conjunction with, the retail sale of food, or preparation of food. ‘‘Retail food production and marketing establishment’’ does not include any food facility, such as any ‘‘mobile food preparation unit’’ any ‘‘vehicle,’’ and any ‘‘vending machine’’ as defined in Chapter 4 (commencing with Section 113700) of Part 7; any wholesale food manufacturing, distributing, or storage establishment, including, but not limited to, the licensed premises or branch office of any winegrower, any brandy manufacturer, or any wine blender, subject to Chapter 4 (commencing with Section 111950) of Part 6; any frozen food locker plant subject to Chapter 7 (commencing with Section 112500) of Part 6; any health facility subject to Chapter 2 (commencing with Section 1250) of Division 2 and Section 127050; any community care facility subject to Chapter 3 (commencing with Section 1500) of Division 2; or any ‘‘official

establishment'' subject to Chapter 4 (commencing with Section 18650) of Part 3 of Division 9 of the Food and Agricultural Code.

(c) On and after the effective date of the act that added this subdivision to this section during the 1993–94 Regular Session, Section 26661 of the Food and Agricultural Code shall apply, to the exclusion of any provision of this section, with respect to the advertising, labeling, or otherwise holding out, of poultry.

110975. The following definitions apply to this article:

(a) ''Ice'' means the product obtained as the result of freezing water by natural, mechanical, or artificial means.

(b) ''Natural ice'' means the product obtained as the result of freezing water by natural means.

110980. In addition to the requirements of this article, unless ice is otherwise specifically excluded, regulations specifying good manufacturing practices applicable to food generally pursuant to Section 110105 shall be applicable to the manufacture of ice.

110985. No person shall make ice from, or cut natural ice from, water that does not comply with primary drinking water standards adopted by the department pursuant to Section 116365. No person shall sell or offer for sale for human consumption or food preservation ice made or cut in violation of this article.

110990. Unless water from a public water system, as defined in Section 116275, is used in the manufacture of ice, the manufacturer shall, on a quarterly basis, obtain from an approved laboratory, a bacterial analysis of the water used. The analysis shall be submitted to the department, indicating whether the water is pure and wholesome.

110995. Any person or entity who manufactures, transports, stores, or sells ice shall comply with all of the following:

(a) A room in which ice is manufactured shall be used for no other purpose than the manufacture of ice and the production of refrigeration, and may contain refrigeration equipment and machinery. This subdivision shall not apply to any food facility as defined in Section 113785.

(b) Ice storage or processing areas shall be maintained in a clean and sanitary condition and no noxious or offensive odors, smoking, or other air pollution shall be permitted therein.

(c) Cover tops for tank cans shall have a smooth, painted, or treated surface, and shall be cleaned daily. Water used for cleaning shall not be permitted to drip into freezing cans. Only potable water shall be used in sprays and in the thaw tanks for the removal of ice from cans. Water coverage tanks shall be covered and provided with filtered vents.

(d) Crushed, cubed, or shaved ice, intended for human consumption, shall be stored in a manner that prevents its pollution or contamination.

(e) Soil, waste, or drain pipes shall not be installed or maintained above any ice platform, loading space, ice container, ice storage room, dip tank or any place where leakage from the pipes may drop into, or upon any ice or upon any area or equipment used in the manufacture of ice, unless a safety device shall be installed under the pipes drained to an open receptacle or drain so as to prevent pollution of ice, water, or equipment used in the manufacture of the ice.

(f) Block ice-loading platforms shall be washed with water as often as necessary to keep them in a clean and sanitary condition, but not less than once each day.

(g) Block ice pullers and block ice storage-room employees shall wear rubber overshoes while on duty. The rubber overshoes shall be removed when the employee leaves the storage or tank room, except that if the rubber overshoes are not removed, they shall be cleaned and disinfected before reentering the storage or tank room. The use of street shoes without rubber overshoes in these areas is prohibited.

(h) All frozen unpackaged ice blocks intended for sale for human consumption or for the refrigeration of food products shall be washed thoroughly with potable water. Ice manufactured for industrial purposes need not be washed prior to shipping but shall be handled and stored separately from ice intended for human consumption.

(i) Ice shall be handled only with clean tongs, ice-carrying bags, scoops, or other sanitary containers, and shall not be directly handled with bare hands.

(j) Single service supplies shall be stored, dispensed, and handled in a sanitary manner and shall be used only once.

(k) Persons not directly involved in the manufacture, processing, packaging, or storing of ice, in the maintenance of facilities and equipment used therefore, or in the management, supervision, or inspection thereof, shall not be permitted in any area where ice is manufactured, processed, packaged, or stored, unless personal cleanliness and hygienic practices are taken to prevent contamination of the product. These areas shall have signs posted to this effect.

(*l*) Bacteriological tests of the finished ice shall be conducted not less than biannually, chemical and physical tests annually, and radiological tests every four years, to insure that ice manufactured for human consumption or for the refrigeration of food products complies with the primary drinking water standards adopted by the department pursuant to Section 116365.

(m) No ice produced out of state shall be sold or distributed within this state unless it complies with this article.

111000. (a) Filter beds and any filtering equipment shall be designed to protect ice from contamination and shall be subject to periodic treatment and cleaning.

(b) All equipment and utensils used in ice production areas shall be of easily cleanable construction, shall be kept clean and in good repair, and shall be handled and stored in a sanitary manner. Materials used as ice contact surfaces shall be smooth, nontoxic, and nonabsorbent. Ice cans shall be leakproof and the inner surfaces of the containers shall be free of corrosion.

(c) Freezing tank covers shall be designed and constructed to protect ice containers from splash, drip, and other contamination, shall be easily cleanable, and shall be kept clean and in good repair. The covers shall be equipped with rings or similar devices when hooks are used for pulling. Can or tank covers, and the ledges or sides of the tank upon which the cover rests, shall be cleaned as often as necessary to keep them in a sanitary condition.

(d) Conveyor surfaces shall be of impervious material and shall protect ice from contaminants that may result from shredding, flaking, peeling, or fragmentation of the conveyor surface.

(e) Equipment lubrication shall not contaminate the ice and only food grade lubricants shall be used.

(f) All product storage and holding areas to be refrigerated shall be cleaned as often as necessary to keep them free of contamination.

(g) Air used for water agitation shall be filtered or otherwise treated to remove dust, dirt, insects, and extraneous material. Filters shall be placed upstream from the compressor and shall be easily removable for cleaning or replacement.

(h) The compressor or blower used to supply air or water agitation shall be designed to deliver oil-free air.

(i) Air lines and core or vacuum devices shall be used as needed to produce ice free of rust or other foreign materials.

111005. In addition to the requirements of this article, ice shall be considered a food subject to all the sanitation requirements applicable to food generally pursuant to Article 1 (commencing with Section 110425), except those provisions that specifically exclude ice.

111010. Any truck, vehicle, or other equipment used for delivery, distribution, or selling ice, shall comply with all of the following:

(a) It shall be constructed and maintained to provide adequate and reasonable protection to the ice transported therein. Care shall be taken to prevent its contact with any contaminants, or other substances that would take the ice out of compliance with the drinking water standards prescribed by this article.

(b) All cubed, crushed, or shaved ice shall be kept in clean receptacles or containers that shall be kept covered while the vehicle is in motion.

Article 11. Local Enforcement

111015. ''Health officer,'' as used in this article, means the health officer appointed by a county board of supervisors pursuant to

Section 101000, by the governing body of a city pursuant to Section 101460, by the governing body of a city and county, or by a local health district board pursuant to former Section 940, that is continued in effect as to any existing district by Section 3 of Chapter 380 of the Statutes of 1959.

111020. The department, upon the request of a health officer, may authorize the local health department of a city, county, city and county, or local health district to enforce this part, and the regulations adopted pursuant to this part that pertain to retail food establishments, as defined by regulation, if the department determines that the local health department has sufficient personnel with adequate training to do so. The enforcement shall be limited to the area under the jurisdiction of the local health department.

111025. The department may revoke any authorization made pursuant to this article, if it determines, after a hearing conducted pursuant to Chapter 5 (commencing with Section 11500) of Part 1 of Division 3 of Title 2 of the Government Code that the local health department authorized pursuant to this article is not enforcing this part or the regulations adopted pursuant to this part, or no longer has an adequate staff qualified to do so.

111030. A local health department that is authorized by the department to enforce this part may make inspections, take samples, make laboratory examinations, impose and remove embargoes, hold informal hearings, certify facts to the district attorney, and institute proceedings for the forfeiture, condemnation, and destruction of food found to be adulterated or misbranded. The action shall be instituted in the name of the city, county, city and county, or district of which the local health department is a part, and shall conform to the requirements of this part and the regulations adopted by the department pursuant to this part.

111035. For the purposes of this article, the health officer and his or her deputies shall have the same powers and authority as an inspector of the Bureau of Food and Drug of the department.

111040. When an examination or analysis made pursuant to this part shows that any provision of this chapter has been violated, written notice of that fact together with a copy of the findings shall be furnished to each party from whom the sample was obtained, or who issued the product guarantee.

111045. The health officer shall set a time for an informal hearing, at which the parties may be heard before him or her or his or her representatives. A notice in writing shall be served upon the interested parties at least 15 days prior to the hearing. The informal hearing shall be private and limited to questions of fact. Appearances may be made in person or by attorney. Testimony may be taken and evidence introduced as to the correctness of the findings made by the person making the examination or performing the analysis.

111050. If the examination or analysis is found to be correct, or if any party fails to appear after notice has been duly given, the health officer may certify the facts found to the district attorney of the county. No publication shall be made until after the hearing is concluded.

111055. This article shall not be construed as repealing, either directly or by implication, any of the existing sections of this chapter, but shall be construed as constituting an alternative method of enforcing this part.

111060. This article shall not affect any previous authorization by the department to a local health department of a county, city, or city and county to enforce this part.

111065. The department may adopt regulations relating to the operation of a local health department as it considers necessary to fully effect this article, including, but not limited to, requirements relating to reporting of activities and the numbers and qualification of personnel.

Article 12. Bottled, Vended, Hauled, and Processed Water

111070. (a) ''Bottled water,'' means any water that is placed in a sealed container at a water-bottling plant to be used for drinking, culinary, or other purposes involving a likelihood of the water being ingested by humans. Bottled water shall not include water packaged with the approval of the department for use in a public emergency.

(b) ''Vended water'' means any water that is dispensed by a water-vending machine, retail water facility, or water from a private water source, or other water as defined in Section 111170 that is not placed by a bottler in sealed containers, and that is dispensed by a water-vending machine, retail water facility, water hauler, or any other person or facility for drinking, culinary, or other purposes involving a likelihood of the water being ingested by humans. ''Vended water,'' does not include water from a public water system that has not undergone additional treatment. Water sold without further treatment is not ''vended water'' and shall be labeled in accordance with paragraph (10) of subdivision (a) of Section 111170.

(c) ''Water-bottling plant'' means any facility in which bottled water is produced.

(d) A ''water-vending machine'' means any self-service device that, upon insertion of a coin, coins, or token, or upon receipt of payment by any other means, dispenses a unit volume of water to be used for drinking, culinary, or other purposes involving a likelihood of the water being ingested by humans.

(e) ''Water hauler,'' means any person who hauls water in bulk by any means of transportation if the water is to be used for drinking, culinary, or other purposes involving a likelihood of the water being ingested by humans.

''In bulk,'' as used in this subdivision, means containers having capacities of 250 gallons or greater.

(f) ''Retail water facility'' means any commercial establishment where vended water is sold, and placed in customer's containers, or placed in containers sold or given to customers who come to the establishment to obtain water.

(g) ''Private water source,'' means a privately owned source of water, other than a public water system, that is used for bottled or vended water and meets the requirements of an approved source for bottled water as defined in Section 129.3 of Title 21 of the Code of Federal Regulations.

(h) ''Bottled water distributor'' means any person, other than an employee or representative of a bottled water plant, who delivers bottled water directly to customers.

111075. (a) Any person who processes, packages, distributes, transfers, or stores bottled water or vended water shall comply with the good manufacturing practices described in Part 129 of Title 21 of the Code of Federal Regulations.

(b) Prior to bottling or vending water, the water shall be subjected to filtration and effective germicidal treatment by ozone, ultraviolet, carbon dioxide, or an equivalent disinfection process approved by the department, except that the requirements for filtration and germicidal treatment shall not apply to mineral water as defined in and from a source that is subject to the council directive of the European Economic Community pertaining to natural mineral waters, dated July 15, 1980, or that is subject to any other natural mineral water standard in the country of origin that prohibits filtration and germicidal treatment, so long as both of the following conditions are met:

(1) The source and product are certified by the responsible authority in the country of origin as complying with microbiological standards at least equal to the standards of this article.

(2) The product complies with microbiological standards of this article.

(c) Bottled or vended water that originates from a surface water source that is not protected from surface contamination shall be subjected to ozonation, filtration, or another effective process that removes or destroys the cysts of the parasite Giardia lamblia. For the purposes of this section, a spring house, catchment basin, storage tank, or bore hole adjacent to a natural spring water source as defined in paragraphs (3) and (8) of subdivision (e) of Section 111170, is not a surface water source.

(d) Ollas or other water-holding dispensers, both refrigerated and nonrefrigerated, water-vending machines, and water dispensers in retail water facilities, shall be examined for cleanliness each time they are serviced by the distributor, bottler, retail water facility, or water-vending machine operator. When necessary, these dispensers

shall be sanitized according to the methods described in Part 129 of Title 21 of the Code of Federal Regulations.

(e) Sanitary operations, equipment procedures, and process controls used in the treatment, storage, transport, or dispensing of water at a retail water facility shall comply with the good manufacturing practices described in the following provisions of Part 129 of Title 21 of the Code of Federal Regulations: subdivisions (a) to (c), inclusive, of Section 129.37; Section 129.40; and subdivisions (a), (c), (d), and (h) of Section 129.80.

(f) Sanitary operations, equipment, procedures, and process controls used in the treatment, storage, transfer, transport, or dispensing of water by water haulers, shall comply with the good manufacturing practices described in the following provisions of Part 129 of Title 21 of the Code of Federal Regulations: subdivisions (a) and (b) of Section 129.37; Section 129.40; and subdivisions (a), (c), (d), and (h) of Section 129.89.

(g) The design and construction of wells, bore holes, catchment basins, spring houses, storage tanks, or other water-contact equipment used by private water sources shall comply with the requirements of the local regulatory authority. Sanitary operations, equipment procedures, and transfer controls used in the treatment, storage, transfer, or dispensing of water by private water source operators shall comply with the good manufacturing practices described in the following provisions of Part 129 of Title 21 of the Code of Federal Regulations: subdivision (a) of Section 129.37; Section 129.40; and subdivisions (a), (c), (d), (g), and (h) of Section 129.80.

(h) Bottled water may be processed through lines used also for other food products under the following conditions:

(1) Process lines, including storage tanks and associated equipment, shall be used exclusively for the production of bottled water, except for filling equipment, that may be used also for filling other food products.

(2) Before being used for the bottling of water, filling equipment that is designed to be cleaned in-place and that is used for filling other food products shall be thoroughly cleansed and sanitized in-place in accordance with the manufacturer’s specifications and in compliance with Section 129.80 of Title 21 of the Code of Federal Regulations and the supplementary procedures that follow in paragraphs (3) to (7), inclusive, of this section.

(3) Immediately following completion of filling operations for any other food product other than water, the filler shall be thoroughly rinsed internally and externally with potable water.

(4) In accordance with filler manufacturer’s instructions, any parts that are not designed to be cleaned in-place shall be disassembled and removed. All of these parts shall be cleansed and sanitized prior to reassembly using appropriate cleansing and

sanitizing procedures, as specified in subdivisions (c) and (d) of Section 129.80 of Title 21 of the Code of Federal Regulations.

(5) All surfaces of the filler that do not contact food products shall be cleaned manually so as to render all surfaces clean and free of any residues.

(6) The filler shall be prepared and all appropriate connections made in accordance with the filler manufacturer's instructions to place the filler in the clean-in-place mode. The following procedures shall be followed:

(A) An alkaline cleaning solution of appropriate strength shall be recirculated through the filler to provide effective cleaning of all product contact surfaces, with a minimum recirculation time of 20 minutes at a temperature between 140 and 170 degrees Fahrenheit.

(B) The cleaning solution shall be drained and followed with a potable water rinse-to-drain for the removal of all residual cleaner alkalinity. This step may be supplemented by the application of an acidified rinse prior to the potable water rinse in order to neutralize any residual alkalinity on product contact surfaces.

(7) Following reassembly of all parts to place the filler into the product mode and just prior to bottling water, the filler shall be sanitized in-place in accordance with procedures specified in subdivision (d) of Section 129.80 of Title 21 of the Code of Federal Regulations.

(8) Any alternate cleaning, rinsing, or sanitizing operations or processes not described in this section shall be approved in writing by the department.

(i) Bottled water and bulk waters sold at retail shall not contact equipment, lines, tanks, or vehicles used for processing, packaging, holding, or hauling of any nonfood product.

111080. The quality standard requirements for bottled water and vended water, including mineral water, shall include all standards prescribed by Section 103.35 of Subpart B of Part 103 of Title 21 of the Code of Federal Regulations, except that water labeled as mineral water shall exceed 500 milligrams per liter of total dissolved solids and may exceed the quality standards for chloride, copper, manganese, iron, sulfate, and zinc prescribed in Section 103.35 of Title 21 of the Code of Federal Regulations. The department may develop additional standards for chloride, copper, manganese, iron, sulfate, or zinc in mineral water that the department determines are reasonably necessary to protect the public health. In addition, bottled water and vended water, when bottled, shall comply with the following quality standards and any additional quality standards adopted by regulation that the department determines are reasonably necessary to protect the public health:

(a) Bottled water and vended water shall meet all maximum contaminant levels set for public drinking water that the department determines, after public comment, are necessary or appropriate so

that bottled water may present no adverse effect on public health. New or revised maximum contaminant levels or monitoring provisions adopted for bottled water by the United States Food and Drug Administration under the federal Food, Drug and Cosmetic Act that are more stringent than the state requirements for bottled water are incorporated into this chapter and are effective on the date established by the federal provisions unless otherwise established by regulations of the department.

(b) Bottled and vended water shall not exceed 10 parts per billion of total triahalomethanes or five parts per billion of lead unless the department establishes a lower level by regulation.

(c) Bottled and vended water shall contain no chemicals in concentrations that the United States Food and Drug Administration or the state department has determined may have an adverse effect on public health.

(d) Mineral water producers that bottle 5,000 gallons, or less, per week shall have until February 1, 1990, to comply with the quality standards for bottled water pursuant to this paragraph. Mineral water producers may present to the department data on consumption of mineral water and the health effects of inorganic elements that may be present as listed in the bottled water quality standards prescribed by Section 103.35 of Subpart B of Part 103 of Title 21 of the Code of Federal Regulations.

111085. Polycarbonate resins manufactured after January 1, 1988, and intended for use in fabricating containers for water products defined in this article shall not contain in excess of three parts per million residual methylene chloride or in excess of 200 parts per million residual monochlorobenzene unless the department establishes a lower level by regulation. For the purpose of monitoring compliance with this section, the concentration of methylene chloride and monochlorobenzene shall not exceed one part per billion in water. ''Polycarbonate resins'' means the substances defined by Section 177.1580 of Title 21 of the Code of Federal Regulations except as modified by this section.

111090. Any owner or operator of a water-vending machine or other device from which any operator or customer dispenses vended water shall comply with the following standards of design, construction and sanitation and any additional standards adopted by regulation that the department determines are reasonably necessary to protect the public health. The water-vending machines or devices shall do all of the following:

(a) Comply with the construction and performance standards established by the department or by an independent authority approved by the department.

(b) Be designed and constructed to permit easy cleaning and maintenance of all exterior and interior surfaces.

(c) Have all parts and surfaces that come into contact with the water constructed of approved, corrosive-resistant and nonabsorbent material capable of withstanding repeated cleaning and sanitizing treatment.

(d) Have a recessed or guarded corrosion-resistant dispensing spout.

(e) Be designed so that all treatment of the vended water by distillation, ion exchange, filtration, ultraviolet light, reverse osmosis, mineral addition, or any other acceptable process is done in an effective manner.

(f) Have an effective system of handling drip, spillage, and overflow of water.

(g) Have a backflow prevention device approved by the department for all connections with the water supply.

(h) Dispense water disinfected by ultraviolet light or other method approved by the department prior to delivery into the customer's container.

(i) Be equipped with monitoring devices designed to shutdown operation of the machine when the disinfection unit fails to function, or shall be monitored daily at startup and manually shutdown whenever the unit fails to function.

(j) Be equipped with a self-closing, tight-fitting door on the vending compartment, or enclosing the vending spout to protect the vending spout when the water-vending machine is not in use. As an alternative, water-vending machines or other water-dispensing devices may be enclosed in a room with tight-fitting walls, ceilings, and one of the following: a self-closing door, an effective air screen device, or an alternative effective device approved by the department.

(k) Comply with the American Water Works Association (AWWA) specifications for granular activated carbon if used in the treatment of potable water (AWWA B604-74).

(*l*) Be maintained in a clean and sanitary condition, free from dirt and vermin.

(m) Use a state approved and regulated public water supply or private water source.

(n) Be located in an area that can be maintained in a clean condition and in a manner that avoids insect and rodent harborage.

(o) Be equipped with monitoring devices designed to shut down the labeled purified water delivery system if treatment of water by the machine does not result in a total dissolved solids content of less than 10 milligrams per liter in the purified water. Alternatively, machines shall be monitored daily at startup and manually shutdown whenever the total dissolved solids content exceeds 10 milligrams per liter in the purified water.

111095. It shall be unlawful to operate a bottled plant water plant, water-vending machine, retail water facility, or private water source in violation of the minimum health standards of this article.

111100. It is unlawful for any person to operate a water vending machine in this state that does not satisfy the minimum standards prescribed by this article for the design, construction, and sanitation of water-vending machines.

111105. The department, upon the request of a local health officer, may authorize the local health officer to implement and enforce those provisions of this article that relate to water-vending machines, retail water facilities, and water haulers under the terms and conditions specified by the department.

111110. No water-vending machine shall be used in this state that does not at least satisfy the minimum standards adopted by the department.

111115. The department shall require that each water-vending machine, retail water treatment plant, water hauler vehicle and facility, and private water source be maintained in a clean and sanitary condition at all times.

111120. (a) No person shall operate a water-bottling plant, a private water source, or be a bottled water distributor in this state except pursuant to a license issued by the department. If a person has a valid water-bottling plant license issued by the department, additional license fees for a private water source operator, a retail water facility, a water hauler, or a bottled water distributor based and operating at the same address, shall not be required.

(b) No person shall own or operate a water-vending machine or a retail water facility or be a water hauler, except pursuant to a license issued by the department or to a permit issued by a local health department.

(c) It shall be unlawful for any person to bottle, collect, treat, hold, distribute, haul, vend, or sell bottled water, vended water, operate a retail water facility, or operate a private water source without the license as required by this article. Any bottled water or vended water dispensed by a retail water facility or a private water source that is not licensed in compliance with this article is misbranded and may be embargoed pursuant to subdivision (e) of Section 111120.

(d) It shall be unlawful for a water bottler, distributor, vendor, retail water facility operator, or private water source operator to sell or otherwise distribute water that is adulterated, as defined in Section 110445, 110545, 110560, or 110565, or that is misbranded as defined in Article 6 (commencing with Section 110660) of Chapter 5.

(e) For the purposes of enforcing this section, water may be embargoed pursuant to Section 111860 in its immediate container, well, spring, spring vault, holding tank, water hauling vehicle, retail water treatment system, spigot, or pipe if there is reasonable cause to believe that it is adulterated.

(f) Any retail water facility, water vendor, or water hauler that violates this article may be subjected to the same penalty and enforcement procedure provided for violation of this article by a water bottling facility.

111125. No bottled water produced in an out-of-state bottling plant shall be sold or distributed within this state unless either the out-of-state bottler or the distributor shall have first obtained a bottler's or distributor's license.

111130. (a) The department shall charge and collect a fee for each license application submitted in accordance with the fee schedule in Table 1, that shall be an amount reasonably necessary to produce sufficient revenue to enforce this article. The fees collected shall be adjusted annually as required by Section 100425. New applicants for a water bottling plant license shall pay Category 2 fees for the first license year.

(b) The water-bottling plant and bottled water distributor categories shall be determined by dividing by 52 the number of gallons produced or shipped into California during the previous year. If the result is an average of 5,000 gallons or less per week, the firm is Category 1. If the average exceeds 5,000 gallons per week, the firm is Category 2.

Table 1

License Fees

License Class	Annual Fee
Water–Bottling Plant	
Category 1	$310
Category 2	875
Water–Vending Machine	10.25
Water Hauler	310
Retail Water Facility	310
Private Water Source Operator	310
Bottled Water Distributor	310

(c) The owners or operators of each water-bottling plant, retail water facility, private water source, each water hauler in California and bottlers or distributors of water bottled out-of-state shall make application for a license on forms provided by the department. Applications and license fees shall be submitted for each calendar year.

(d) Each water-vending machine owner or operator shall make application each calendar year for a license for all machines on forms provided by the department. A decal or seal provided by the department indicating a license fee has been paid shall be affixed in a prominent place to each water-vending machine in service.

111135. The department may deny any license application or revoke or suspend any license issued for cause. The department shall inform the person of any denial, revocation, or suspension in writing, stating with particularity reasons for the denial, revocation, or suspension.

''Cause,'' as used in this section, means a violation of any provision of this chapter or any regulation adopted pursuant thereto.

111140. The department shall charge and collect a fee for each department evaluation required to issue a new license for a water-vending machine model or a retail water facility to determine compliance with standards established by this article. The fee shall be three hundred dollars ($300) and shall be adjusted annually as required by Section 100425.

111145. (a) The department shall require each bottler, distributor, or vendor of bottled water, each owner or operator of any water-vending machine, each water hauler, each retail water facility operator, each private water source operator, and each applicant for a license, to test for all substances necessary to establish conformance to standards adopted pursuant to Section 111080 at the times and frequencies the department may reasonably establish.

(b) Each product dispensed by a water-vending machine or a retail water facility shall be sampled and analyzed for coliform bacteria at least once every six months. The analysis shall be submitted to the department indicating whether the water is pure and wholesome. Analysis of vended water or water from retail water facilities shall be submitted to the local health officers if the local health officers are authorized by the department pursuant to subdivision (b) of Section 111105.

(c) Purified waters from retail water facilities shall be analyzed by the operator for dissolved solids by conductivity measurement not less frequently than once every seven days.

(d) Purified water from vending machines shall be analyzed by the operator for the dissolved solids by conductivity measurement each time the vending machine is serviced.

111150. (a) All sources of bottled water, vended water, and water dispensed by a retail water facility shall be monitored annually for the presence of volatile organic compounds of potential public health concern, as specified by the United States Environmental Protection Agency in Tables 2 and 14 contained in Volume 50 of the Federal Register on pages 46904, 46923, and 46924 on November 13, 1985, or as reasonably specified by the department as a condition of licensure.

(b) In lieu of source water monitoring required by this section, a water bottler, water vendor, or a retail water facility may document that the source monitoring required by this section is conducted by another entity approved by the department, or may comply with the treatment requirements of subdivision (c).

(c) Detection in the source water of a volatile organic compound, except trihalomethanes, for which source monitoring is required pursuant to this section shall be followed immediately by a program of periodic monitoring by the water bottler, water vendor, or retail water facility to confirm the presence or absence in the source water of the volatile organic compound. If the volatile organic compound is confirmed to be present in the source water it shall be treated using granular activated carbon treatment or an equivalent treatment operated in accordance with good manufacturing practices as provided in Section 129.80 of Title 21 of the Code of Federal Regulations until the time that the concentration of the volatile organic compound does not exceed either one part per billion, or any United States Environmental Protection Agency or United States Food and Drug Administration level for drinking water, or a maximum contaminant level established by the department for bottled water.

(d) The department may exempt any water bottler, water vendor, or retail water facility from the monitoring requirements of this section for any source based on a showing satisfactory to the department that the source (1) does not contain the volatile organic compound for which monitoring is required and (2) is not vulnerable to contamination by the volatile organic compound because for surface water sources the compounds are not applied, manufactured, stored, disposed or shipped upstream, and for groundwater sources, the compounds are not applied, manufactured, stored, disposed, or shipped in the groundwater recharge basin.

111155. Notwithstanding any other provisions of this article, the department may require any bottler, distributor, or vendor of bottled water, any owner or operator of a water-vending machine, any water hauler, any retail water facility operator, any private water source operator, or any applicant for a license to test and submit results to the department for any substance, including organic chemical contaminants, at any time that the department believes the substance may be present in the water source and threaten the public health.

111160. (a) Upon a determination by the department that a particular water source is subject to potential contamination, the department shall notify the bottler, distributor, or vendor of bottled water, the owner and operator of any water-vending machine, any water hauler, any retail water facility operator, or any private water source operator of the specific contaminants or class of contaminants that pose a potential health risk.

(b) Within 90 days after notification by the department, the bottler, distributor, vendor of bottled water, the owner and operator of any water-vending machine, any water hauler, any retail water facility operator, or any private water source operator shall conduct

an analysis of the water source and submit the results of the analysis to the department.

(c) If evidence of contamination is found, the department may, by order, require the bottler, distributor, vendor of bottled water, or the owner and operator of any water-vending machine, any water hauler, any retail water facility operator, or any private water source operator to conduct a source and product water analysis for the contaminants of concern in accordance with conditions specified by the department. The water analysis shall be conducted and reported on an annual basis, unless the department finds that reasonable action requires either more frequent or less frequent analysis.

(d) The department may, by order, require the bottler, distributor, vendor of bottled water, the owner and operator of any water-vending machine, any water hauler, any retail water facility operator, or any private water source operator to reduce or eliminate the concentration of any chemical that the department determines may have an adverse effect on public health. Until an enforceable standard has been established for a chemical that may have an adverse effect on human health, the department may require treatment techniques to reduce the concentration of the contaminants that require treatment, in the department's judgment, to prevent known or anticipated adverse effects on the health of persons. The treatment system shall be designed to meet criteria designated by the department or by an independent authority approved by the department.

(e) The department may grant variances from the requirements of subdivision (d), if the bottler, distributor, vendor of bottled water, the owner and operator of any water-vending machine, any water hauler, any retail water facility operator, or any private water source operator demonstrates either of the following:

(1) That the prescribed treatment technique is not necessary to protect the health of consumers because its water source is not subject to, nor is it likely to be subject to, significant chemical contamination.

(2) An alternative treatment technique is at least as efficient in lowering the level of contaminants to be controlled.

111165. All testing of bottled water, bottled water sources, water distributed by water haulers, water from retail water facility, and water from vending machines shall be done by laboratories approved by the department, laboratories certified by the United States Environmental Protection Agency, laboratories certified by the primary enforcement authority in states that have been granted primacy by the United States Environmental Protection Agency, or laboratories certified (accredited) by a third-party organization acceptable to a primacy state.

111170. (a) Labeling and advertising of bottled water and vended water shall conform with this section and Chapter 4

(commencing with Section 110290) and Part 101 of Title 21 of the Code of Federal Regulations.

(b) Each container of bottled water sold in this state, each water-vending machine, and each container provided by retail water facilities located in this state shall be clearly labeled in an easily readable format. Retail water facilities that do not provide labeled containers shall post, in a location readily visible to consumers, a sign conveying required label information.

(c) Water-vending machines, retail water facilities, and private water sources that sell water at retail shall display in a position clearly visible to customers the following information:

(1) The name and address of the operator.

(2) The fact that the water is obtained from an approved public water supply or licensed private water source.

(3) A statement describing the treatment process used.

(4) If no treatment process is utilized a statement to that effect.

(5) A telephone number that may be called for further information, service, or complaints.

(d) Bottled water may be labeled ''drinking water,'' notwithstanding the source or characteristics of the water, only if it is processed pursuant to the Food and Drug Administration Good Manufacturing Practices contained in Section 103.35 and Parts 110 and 129 of Title 21 of the Code of Federal Regulations, Sections 12235 to 12285, inclusive, of Title 17 of the California Code of Regulations, and any other requirements established by the department pursuant to Sections 111145, 111150, and 111155. Any vended water and any water from a retail water facility may be labeled ''drinking water,'' notwithstanding the source or characteristics of the water, only if it is processed pursuant to Article 10 (commencing with Section 114200) of Chapter 4 of Part 7 and any other requirements established by the department pursuant to Sections 111145, 111150, and 111155.

111175. (a) In addition to the requirements of Section 111170, if a bottler, distributor, water hauler, retail water facility operator, or vending machine operator provides information in the labeling or advertising stating or implying that this water is of a specific water type (for example, ''spring water'') or treated in a specific manner (for example, ''purified''), the type or treatment shall be clearly labeled in an easily readable format. In order to be so labeled, the source or treatment shall conform to the following criteria:

(1) ''Artesian well water'' means water from a well tapping an aquifer in which the water level will stand above the bottom of the confining bed of the aquifer, and in which the hydraulic pressure of the water in the aquifer is greater than the force of gravity. Artesian well water shall not be altered by the addition or deletion of minerals or by blending it with water from a nonartesian well water source,

except that artesian well water may be filtered and shall be treated with ozone or an equivalent disinfection process.

(2) ‘‘Fluoridated water’’ means water containing naturally occurring or added fluoride. The label shall specify whether fluoride is naturally occurring or is added. Any water that meets the designation of this paragraph shall contain not less than 1.0 milligrams per liter fluoridization and otherwise comply with the Food and Drug Administration quality standards set forth in Section 103.35(d)(2) of Title 21 of the Code of Federal Regulations.

(3) ‘‘Mineral water’’ means bottled water or vended water containing more than 500 milligrams per liter of total dissolved solids and originating entirely from an underground source, that may be a well, artesian well, or spring. Bottled or vended mineral water may be derived from a natural orifice or from a bore hole adjacent to the natural orifice. If it is derived from a natural orifice or from a bore hole adjacent to the natural orifice, the water shall be from the same underground stratum and be of the same quality and composition as the water derived from the natural orifice without external force. Mineral water may not be altered by the addition or deletion of minerals or by blending it with water from a nonmineral water source, except that mineral water may be filtered and shall be treated with ozone or an equivalent disinfection process approved by the department and shall be treated to reduce the concentrations of any naturally occurring substance that exceeds the bottled water safety standards established by the department. Mineral water may be collected and transported by pipes, tunnels, trucks, or similar devices. Any water that meets the criteria of this paragraph may also be labeled ‘‘natural mineral water.’’

(A) Mineral water that contains carbon dioxide as it emerges from the source and is bottled directly with its entrapped gas, or from which the gas is mechanically separated and later reintroduced into the water at the time of bottling shall be labeled ‘‘naturally carbonated’’ or ‘‘naturally sparkling.’’

(B) Mineral water that contains carbon dioxide, other than that naturally occurring in the source product, shall be labeled with the words ‘‘carbonation added’’ or ‘‘carbon dioxide added’’ when the carbonation is obtained from a natural or manufactured source.

(4) ‘‘Mineralized water’’ means bottled or vended water that meets the requirements of ‘‘mineral water’’ except that the water contains added minerals.

(5) ‘‘Natural water’’ means bottled or vended spring, artesian well, or well water that is unmodified by mineral addition or deletion, except ‘‘natural water’’ may be filtered and shall be sanitized with ozone or an equivalent disinfection process and treated to reduce the concentration of any substance that exceeds safety standards established by the department.

(6) ‘‘Naturally sparkling water’’ means bottled water or vended water with a carbon dioxide content from the same source as the water. ‘‘Sparkling,’’ ‘‘carbonated,’’ or ‘‘carbonation added’’ means bottled water or vended water that contains carbon dioxide.

(7) ‘‘Purified water’’ means water produced by distillation, deionization, reverse osmosis, or other method meeting the definition of purified water in the 21st edition of the United States Pharmacopeia. Water that meets the designation of this paragraph, and is vaporized, then condensed, may be labeled ‘‘distilled water.’’

(8) ‘‘Spring water’’ means water that issues by natural forces out of the earth at a particular place. Bottled or vended spring water may be derived from the natural orifice or from a bore hole adjacent to the natural orifice. If it is derived from the natural orifice by external force or from a bore hole adjacent to the natural orifice, the water shall be from the same underground stratum and be of the same quality and composition as the water derived from the natural orifice without external force. Spring water may not be altered by the addition or deletion of minerals or by blending it with water from a nonspring water source, except that spring water may be filtered and shall be treated with ozone or an equivalent disinfection process. Spring water may be collected and transported by pipes, tunnels, trucks, or similar devices.

(9) ‘‘Well water’’ means water from a hole bored into the ground that taps the water of an aquifer, except that well water may be filtered and shall be treated with ozone or an equivalent disinfection process. Well water may not be altered by the addition or deletion of minerals or by blending it with water from a nonwell water source.

(10) Notwithstanding any other provision of this section, water from a public water system that is unprocessed by the bottler or vendor shall be labeled as ‘‘unprocessed public drinking water.’’

111180. Except as provided in Section 111080, any bottled water or vended water, the quality of which is below the quality required by this article, shall be labeled with a statement of substandard quality, as prescribed by Section 103.35 of Title 21 of the Code of Federal Regulations.

111185. Any bottler, distributor, vendor of bottled water, or owner or operator of any water-vending machine or retail water facility, whose corporate name or trademark contains the words ‘‘spring’’ or ‘‘springs,’’ or any derivative of either of these words, or ‘‘well,’’ ‘‘artesian well,’’ or ‘‘natural’’ shall label each bottle or vending machine with the source of the water in typeface at least equal to the size of the typeface of the corporate name or trademark, if the source of the bottled or vended water is different from the source stated in the corporate name or trademark. Retail water facilities that do not provide labeled containers shall post, in a location readily visible to consumers, a sign conveying required label information.

111190. (a) A bottled water, as defined in Section 111170, with natural or added carbonation, may be prepared with added flavors, extracts, essences, or fruit juice concentrates derived from a spice or fruit and comprising less than 1 percent by weight of the final product. The final product shall contain no sweeteners, or additives other than the flavors, extracts, essences, or fruit juice concentrates and carbon dioxide and shall be designated on labels and in advertising as follows:

(1) The common or usual name of the characterizing flavor shall accompany the designation of the bottled water product type as defined in subdivision (b) of Section 111170.

(2) The product may be designated as ''natural'' only if it meets the requirements for the designation as defined in paragraphs (5) and (6) of subdivision (b) of Section 111170, and naturally derived flavors, extracts, or essences are used.

(b) Products labeled pursuant to this section shall comply with all other provisions of this article. Products with one type or one source of bottled water that are labeled pursuant to this section shall not be blended with water that is not bottled water or that is of another bottled water type.

111195. The department, prior to issuing a license, shall review all labels prepared pursuant to this article, and may require any changes in order to comply with this article.

Article 13. Hamburger and Imitation Hamburger

111200. As used in this article, the following definitions shall apply:

(a) ''Hamburger'' means chopped fresh or frozen beef, or a combination of both fresh or frozen beef, with or without the addition of beef fat as such, and with or without the addition of seasoning. Hamburger shall not contain more than 30-percent fat, and shall not contain added water, binders, or extenders. Beef cheek meat (trimmed beef cheeks) may be used in the preparation of hamburger to the extent of 25 percent, and if in excess of natural proportions, its presence shall be declared on the label in the ingredient statement, if any, and otherwise contiguous to the name of the product.

(b) ''Imitation hamburger'' means chopped fresh or frozen beef, or a combination of both fresh or frozen beef, with or without the addition of beef fat as such, and with or without the addition of seasoning. Imitation hamburger may contain binders and extenders, with or without the addition of partially defatted beef tissue, without added water or with added water only in amounts that the products' characteristics are essentially that of a meat pattie.

(c) ''Restaurant'' means restaurants, itinerant restaurants, vehicles, vending machines, or institutions including hospitals, schools, asylums, eleemosynaries, and all other places where food is

served to the public for consumption on the premises of sale that are not included within the definitions of the terms restaurants, itinerant restaurants, vehicles, and vending machines.

111205. (a) If imitation hamburger is sold or served in restaurant a list of ingredients thereof shall appear on the menu, or, if there is no menu, the information shall be posted as state department shall by regulations require. No list of ingredients, however, shall be required for imitation hamburger that contains not more than 10 percent added protein and water, and that does not contain other binders or extenders.

(b) No restaurant shall use the terms ''hamburger,'' ''burger,'' or any other cognate thereof in any advertisement, or menu to refer to any imitation hamburger. A restaurant selling or serving imitation hamburger may refer to the product as imitation hamburger or by any other term that accurately informs the customer of the nature of the food product that he or she is sold or served.

111210. It is unlawful and constitutes misbranding for any person to advertise, offer for sale, sell, or serve as hamburger or imitation hamburger in any restaurant any product that does not come within the definitions of those terms contained in Section 111200. It is unlawful and constitutes misbranding for any person to violate any provision of this article or any regulation adopted pursuant thereto.

111215. It is the public policy of this state to require restaurants selling hamburger and imitation hamburger to accurately inform the consumer public of the contents of foods.

111220. This article shall be enforced by the same persons and in the same manner as provided in Article 7 (commencing with Section 28690) of Chapter 11 of Division 22.

CHAPTER 6. DRUGS AND DEVICES

Article 1. General Provisions

111225. As used in this chapter, with respect to a drug or drug ingredient, ''established name'' means either of the following:

(a) The name designated pursuant to Section 508 of the federal act (21 U.S.C. Sec. 358).

(b) If there is no such name and the drug or ingredient is an article recognized in an official compendium, then the official title in the compendium is the established name.

If neither subdivision (a) or (b) of this section applies, the common or usual name, if any, of the drug or of the ingredient is the established name. When an article is recognized in the United States Pharmacopoeia and in the Homeopathic Pharmacopoeia under different official titles, the official title used in the United States Pharmacopoeia shall apply unless it is labeled and offered for sale as a homeopathic drug. If it is labeled and offered for sale as a

homeopathic drug, the official title used in the Homeopathic Pharmacopoeia shall apply.

111230. Any drug represented in its labeling or advertisement as an antiseptic shall be considered to be represented as a germicide, except in the case of a drug that is purported to be or represented as, an antiseptic for inhibitory use as a wet dressing, ointment, dusting powder, or other use involving prolonged contact with the body.

111235. Whenever a drug is recognized in both the United States Pharmacopoeia and the Homeopathic Pharmacopoeia of the United States, it shall be subject to the requirements of the United States Pharmacopoeia unless it is labeled and offered for sale as a homeopathic drug. If it is labeled and offered for sale as a homeopathic drug, it shall be subject to the provisions of the Homeopathic Pharmacopoeia of the United States and not to those of the United States Pharmacopoeia.

111240. Any added poisonous or deleterious substance, or color additive, shall be considered unsafe for use with respect to any drug or device unless there is in effect a regulation adopted pursuant to Section 110090 that prescribes its use in or on drugs or devices.

111245. The department may establish performance standards for devices, that shall be designed to provide reasonable assurance of safe and effective performance and, where appropriate, requiring the use and prescribing the form and content of labeling for the proper installation, maintenance, operation, or use of the device. However, if a performance standard is established for a device pursuant to Section 514 of the federal act (21 U.S.C. Sec. 360d) or Section 521 of the federal act (21 U.S.C. Sec. 360k), it shall be the performance standard of this state for device.

Article 2. Adulterated Drugs or Devices

111250. Any drug or device is adulterated if it consists, in whole or in part, of any filthy, putrid, or decomposed substance.

111255. Any drug or device is adulterated if it has been produced, prepared, packed, or held under conditions whereby it may have been contaminated with filth, or whereby it may have been rendered injurious to health.

111260. Any drug or device is adulterated if the methods, facilities, or controls used for its manufacture, processing, packing, or holding do not conform to, or are not operated or administered in conformity with current good manufacturing practice to assure that the drug or device meets the requirements of this part as to safety and has the identity and strength, and meets the quality and purity characteristics that it purports or is represented to possess.

111265. Any drug or device is adulterated if it is packaged and its container is composed, in whole or in part, of any poisonous or

deleterious substance that may render the contents injurious to health.

111270. Any drug or device is adulterated if it bears or contains for the purpose of coloring only a color additive that is unsafe within the meaning of Section 111240.

111275. Any drug or device is adulterated if it is a color additive, the intended use of which in or on drugs or devices is for the purpose of coloring only, and it is unsafe within the meaning of Section 111240.

111280. Any drug is adulterated if it purports to be, or is represented as, a drug that is recognized in an official compendium, and its strength differs from, or its quality or purity falls below, the standards set forth in the compendium. Such determination as to strength, quality, or purity shall be made in accordance with the tests or methods of assay set forth in the compendium, or in the absence of or inadequacy of the tests or methods of assay, those prescribed under authority of this part. No drug defined in an official compendium shall be deemed to be adulterated under this section because it differs from the standard of strength, quality, or purity set forth in the compendium, if its difference in strength, quality, or purity from the standard is plainly stated on the label.

111285. Any drug or device is adulterated if its strength differs from, or its purity or quality is below, that which it is represented to possess.

111290. Any drug or device is adulterated if any substance has been mixed or packed with it so as to reduce its quality or strength or if any substance has been substituted, wholly or in part, for the drug or device.

111295. It is unlawful for any person to manufacture, sell, deliver, hold, or offer for sale any drug or device that is adulterated.

111300. It is unlawful for any person to adulterate any drug or device.

111305. It is unlawful for any person to receive in commerce any drug or device that is adulterated or to deliver or proffer for delivery any drug or device.

111310. While any regulation described in Section 110090 relating to any color additive is in effect, any drug or device that bears or contains the color additive in accordance with the regulation shall not be considered adulterated.

111315. Any drug or device intended for export shall not be deemed to be adulterated under this part if it satisfies all of the following requirements:

(a) It accords to the specifications of the foreign purchaser.

(b) It is not in conflict with the laws of the importing country.

(c) It is labeled on the outside of the shipping package to show that it is intended for export.

If the article is sold or offered for sale in domestic commerce, this section shall not exempt it from any of the provisions of this part.

111320. Any device is adulterated that fails to meet the applicable performance standard, if any, as provided in Section 111245.

111325. A drug or device is deemed adulterated under the laws of this state if it is subject to regulations issued by the United States Food and Drug Administration as set forth in Parts 200, 211, 314, and 800 of Volume 21 of the Code of Federal Regulations, as amended, relating to tamper-resistant packaging, but is not in compliance therewith.

Article 3. Misbranded Drugs or Devices

111330. Any drug or device is misbranded if its labeling is false or misleading in any particular.

111335. Any drug or device is misbranded if its labeling or packaging does not conform to the requirements of Chapter 4 (commencing with Section 110290).

111340. Any drug or device is misbranded unless it bears a label containing all of the following information:

(a) The name and place of business of the manufacturer, packer, or distributor.

(b) An accurate statement of the quantity of the contents in terms of weight, measure, or numerical count.

Reasonable variations from the requirements of subdivision (b) shall be permitted. Requirements for placement and prominence of the information and exemptions as to small packages shall be established in accordance with regulations adopted pursuant to Section 110380.

111345. Any drug or device is misbranded if any word, statement, or other information required by or under this part to appear on the label or labeling is not prominently placed on the label or labeling with conspicuousness, as compared with other words, statements, designs, or devices in the labeling, and in terms as to render it likely to be read and understood by the ordinary individual under customary conditions of purchase and use.

111350. Any drug is misbranded if it is for use by man and contains any quantity of the narcotic or hypnotic substances alpha-eucaine, barbituric acid, beta-eucaine, bromal, cannabis, carbromal, chloral, coca, cocaine, codeine, heroin, marijuana, morphine, opium, paraldehyde, peyote, or sulfonmethane; or any chemical derivative of those substances, that derivative, after investigation, has been found to be and designated as habit forming, by regulations adopted by the department, unless its label bears the name and quantity or proportion of the substance or derivative and in juxtaposition therewith the statement, ‘‘Warning—may be habit forming.’’

Regulations designating habit-forming drugs issued pursuant to Section 502(d) of the federal act (21 U.S.C. Sec. 352(d)) are the regulations designating habit-forming drugs in this state. However,

the department may, by regulation, designate habit-forming drugs whether or not these habit-forming drugs are in accordance with the regulations adopted under the federal act.

111355. (a) Any drug is misbranded unless its label bears, to the exclusion of any other nonproprietary name except the applicable, systematic chemical name or the chemical formula, all of the following information:

(1) The established name of the drug, if any.

(2) If it is fabricated from two or more ingredients, the established name and quantity of each active ingredient, including the kind and quantity or proportion of any alcohol, and also including, whether active or not, the established name and quantity or proportion of any bromides, ether, chloroform, acetanilide, acetophenetidin, antipyrine, atropine, hyoscine, hyoscyamine, codeine, arsenic, digitalis, digitalis glycosides, mercury, ouabain, strophanthin, strychnine, barbituric acid, or any derivative or preparation of any substances contained therein.

(b) The requirement for stating the quantity of the active ingredients of any drug, including the quantity or proportion of any alcohol, and also including, whether active or not, the quantity or proportion of any bromides, ether, chloroform, acetanilide, acetophenetidin, antipyrine, atropine, hyoscine, hyoscyamine, codeine, arsenic, digitalis, digitalis glycosides, mercury, ouabain, strophanthin, strychnine, barbituric acid, or any derivative or preparation of any substances contained therein, shall apply to all drugs, including prescription drugs and nonprescription drugs. However, the requirement for declaration of quantity shall not apply to nonprescription drugs that are also cosmetics, as defined in Section 201(i) of the federal Food, Drug, and Cosmetic Act (21 U.S.C. Sec. 321(i)) and that are labeled in compliance with federal labeling requirements concerning declaration of ingredients including active ingredients and also the quantity and proportion of any alcohol, except that the quantity or proportion of the following ingredients, whether active or not, shall be declared: bromides, ether, chloroform, acetanilide, acetophenetidin, antipyrine, atropine, hyoscine, hyoscyamine, codeine, arsenic, digitalis, digitalis glycosides, mercury, ouabain, strophanthin, strychnine, barbituric acid, or any derivative or preparation of any substances contained therein. The department may exempt any nonprescription drug from the requirement of stating the quantity of the active ingredients, other than those specifically named in this subdivision, upon a showing by the applicant through evidence satisfactory to the department that the granting of the exemption will not endanger the public health. For any prescription drug the established name of the drug or ingredient, as the case may be, on the label and on any labeling on which a name for the drug or ingredient is used shall be printed

prominently and in type at least half as large as that used thereon for any proprietary name or designation for the drug or ingredient.

The changes made in this section by Chapter 943 of the Statutes of 1978 shall not apply to any drug shipped by a manufacturer or packer to a retailer or wholesaler before January 1, 1980. Any such drugs so shipped shall comply with this section on and after January 1, 1981.

111360. Any drug subject to Section 111470 is misbranded unless the manufacturer, packer, or distributor of the drug includes, in all advertisements and other descriptive matter issued or caused to be issued by the manufacturer, packer, or distributor with respect to that drug, a true statement of all of the following:

(a) The established name, printed prominently and in a type at least half as large as that used for any proprietary name of the drug.

(b) The formula showing quantitatively each ingredient of the drug to the extent required for labels under Section 111355.

(c) The name and place of business of the manufacturer that produced the finished dosage form of the drug, as prescribed by regulations issued by the department. This subdivision applies only to advertisements or descriptive matter issued for drugs manufactured in finished dosage form on or after April 1, 1973.

(d) Such other information, in brief summary relating to side effects, contraindications, and effectiveness as shall be required by regulations promulgated by the department.

Regulations relating to side effects, contraindications, and effectiveness issued pursuant to Section 502(n) of the federal act (21 U.S.C. Sec. 352(n)) are the regulations establishing information requirements relating to side effects, contraindications and effectiveness in this state. The department may, by regulation, make other requirements relating to side effects, contraindications, and effectiveness whether or not in accordance with the regulations adopted under the federal act.

111365. Any drug subject to Section 111470 is misbranded unless the established name of the prescription drug or prescription drug ingredient is printed on the label prominently and in type at least half as large as that used for the proprietary name or designation on the label, labeling, or advertising.

The department may, by regulation, establish exemptions from the requirements of this section when compliance with this section is not considered necessary for the protection of health and safety.

111375. Any drug or device is misbranded unless its labeling bears all of the following information:

(a) Adequate directions for use.

(b) Such adequate warnings against use in pathological conditions or by children where its use may be dangerous to health.

(c) Adequate warning against unsafe dosage or methods or duration of administration or application.

Warnings shall be in a manner and form as are necessary for the protection of users.

If the department determines that any requirement of subdivision (a), as applied to any drug or device, is not necessary for the protection of the public health, the department may adopt regulations exempting the drug or device from these requirements.

Any drug or device exempted under Section 502(f) of the federal act (21 U.S.C. Sec. 352(f)) is exempt from the requirement of this section. The department, however, may adopt any regulation including a drug or device within, or excluding a drug or device from the requirements of this section, whether or not the inclusion or exclusion of the drug or device is in accord with the federal act.

111380. Any drug is misbranded if it purports to be a drug that is recognized in an official compendium and it is not packaged and labeled as prescribed in the official compendium. The method of packaging, however, may be modified with the consent of the department.

111385. Any drug or device is misbranded if the department determines that the drug or device is liable to deterioration, unless it is packaged in that form and manner and its label bears a statement of the precautions, as the department, by regulation, may require as necessary for the protection of public health. Such regulations shall not be established for any drug or device recognized in an official compendium, unless the department has informed the appropriate body, charged with the revision of the official compendium, of the need for that packaging or labeling requirements and that body has not prescribed the requirements in a reasonable length of time.

111390. Any drug or device is misbranded if its container is so made, formed, or filled as to be misleading.

111395. Any drug is misbranded in any of the following cases:

(a) It is an imitation of another drug.

(b) It is offered for sale under the name of another drug.

(c) The contents of the original package have been, wholly or partly, removed and replaced with other material in the package.

111400. Any drug or device is misbranded if it is dangerous to health when used in the dosage, or with the frequency or duration prescribed, recommended, or suggested in its labeling.

111405. Any drug is misbranded if it is, or purports to be, or is represented as, a drug composed wholly or partly of insulin, unless both of the following requirements are satisfied:

(a) It is from a batch to which a certificate or release has been issued pursuant to Section 506 (21 U.S.C. Sec. 356) of the federal act.

(b) The certificate or release is in effect with respect to the drug.

111410. Any drug is misbranded if it is, purports to be, or is represented as a drug composed, wholly or partly, of any antibiotic drug, or any derivative thereof, unless both of the following requirements are satisfied:

(a) It is from a batch to which a certificate or release has been issued pursuant to Section 507 of the federal act (21 U.S.C. Sec. 357).

(b) The certificate or release is in effect with respect to that drug. This section shall not, however, apply to any drug or class of drugs exempted by regulations adopted pursuant to Section 507(c) or 507(d) of the federal act (21 U.S.C. Sec. 357(c) or 357(d)).

111415. Any drug is misbranded if it is a color additive, intended for use in or on drugs for the purpose of coloring only and its packaging and labeling fail to conform to the packaging and labeling requirements adopted pursuant to Section 110090.

111420. A drug or device is misbranded if a trademark, trade name, or other identifying mark, imprint, or device of another person, or any likeness of the trademark, trade name, or other identifying mark, imprint, or device of another person, has been placed on the drug or device, or upon its container.

111425. A drug or device is misbranded if it was manufactured in this state in an establishment not duly licensed as provided in this part.

111430. A drug or device is misbranded if it was manufactured in an establishment not duly registered with the Secretary of Health, Education, and Welfare of the United States.

111435. Any drug is misbranded if its packaging or labeling is in violation of an applicable regulation issued pursuant to Section 108685 or 108700.

111440. It is unlawful for any person to manufacture, sell, deliver, hold, or offer for sale any drug or device that is misbranded.

111445. It is unlawful for any person to misbrand any drug or device.

111450. It is unlawful for any person to receive in commerce any drug or device that is misbranded or to deliver or proffer for delivery any drug or device.

111455. It is unlawful for any person to alter, mutilate, destroy, obliterate, or remove the label or any part of the labeling of any drug or device if the act results in the drug or device being misbranded.

111460. Any drug or device intended for export shall not be deemed to be misbranded under this part if it satisfies all of the following requirements:

(a) It accords to the specifications of the foreign purchaser.

(b) It is not in conflict with the laws of the importing country.

(c) It is labeled on the outside of the shipping package to show that it is intended for export.

If the article is sold or offered for sale in domestic commerce, this section shall not exempt it from any of the provisions of this part.

111465. A drug or device is deemed misbranded under the laws of this state if it is subject to regulations issued by the United States Food and Drug Administration relating to tamper-resistant packaging, as set forth in Parts 200, 211, 314, and 800 of Volume 21 of

the Code of Federal Regulations, as amended, but is not in compliance therewith.

111470. The following drugs or devices, that are intended for use by man, shall be sold only upon a written prescription of a practitioner licensed by law to prescribe the drug or device, or upon an oral prescription of the licensee that is reduced promptly to writing and filed by the pharmacist, or by refilling the written or oral prescription if the refilling is authorized by the prescriber either in the original prescription or by oral order that is reduced promptly to writing and filed by the pharmacist:

(a) A habit forming drug to which Section 111350 applies.

(b) A drug or device that, because of its toxicity or other potentiality for harmful effect, or the method of its use, or the collateral measures necessary to its use, is not safe for use except under the supervision of a practitioner licensed by law to administer the drug or device.

(c) A drug or device for which adequate directions cannot be written for persons, who are not practitioners licensed by law to prescribe the drug or device, for safe and effective self-medication or treatment by those persons, who are not practitioners licensed by law to prescribe the drug or device.

(d) A drug or device that is limited by an effective application under Section 505 of the federal act (21 U.S.C. Sec. 355) or Section 111550 to use under the professional supervision of a practitioner licensed by law to administer the drug or device.

If any prescription for the drug does not indicate the number of times it may be refilled, if any, the prescription may not be refilled unless the pharmacist obtains a new order from the practitioner.

111475. The act of selling a drug or device contrary to Section 111470 shall be deemed to be an act that results in the drug or device being misbranded while held for sale.

111480. Any drug or device sold by filling or refilling a written or oral prescription of a practitioner licensed to prescribe the drug or device shall be exempt from the labeling requirements of Sections 111335, 111340, 111350, 111355, 111360, 111365, 111375, 111380, 111385, 111395, 111415, and 111420, if the drug or device bears a label displaying all the following:

(a) Except where the prescriber orders otherwise, either the manufacturer’s trade name of the drug, or the generic name and the name of the manufacturer. Commonly used abbreviations may be used. Preparations containing two or more active ingredients may be identified by the manufacturer’s trade name or the commonly used name or the principal active ingredients.

(b) The directions for the use of the drug or device.

(c) The name of the patient(s).

(d) The name of the prescriber.

(e) The date of issue.

(f) The name, address of the furnisher, and prescription number or other means of identifying the prescription.

(g) The strength of the drug or drugs dispensed.

(h) The quantity of the drug or drugs dispensed.

(i) The expiration date of the effectiveness of the drug or device if the information is included on the original label of the manufacturer of the drug or device.

If a pharmacist dispenses a prescribed drug by means of a unit dose medication system, as defined by administrative regulation, for a patient in a skilled nursing, intermediate care or other health care facility, the requirements of this section will be satisfied if the unit dose medication system contains the aforementioned information or the information is otherwise readily available at the time of drug administration.

The exemption shall not apply to any drug or device dispensed in the course of the conduct of a business of dispensing drugs or devices pursuant to diagnosis by mail, or to a drug or device dispensed in violation of Section 111470.

111485. The department may, by regulation, remove any drug or device subject to Sections 111350 and 111550 from the requirements of Section 111470, when the requirements are not necessary for the protection of the public health. Any drug removed from the prescription requirements of the federal act by regulations adopted pursuant to the federal act is removed from the requirements of Section 111470. The department may, however, by regulation, continue the applicability of Section 111470 for any drug or device, or make these sections inapplicable to any drug or device, whether or not the inclusion or exclusion of the drug or device is in accordance with the regulations adopted pursuant to the federal act.

111490. A drug or device that is subject to Section 111470 is misbranded if at any time prior to dispensing, its label fails to bear the statement ''Caution: federal law prohibits dispensing without prescription,'' or ''Caution: state law prohibits dispensing without prescription,'' or ''Caution: federal law restricts this device to sale by or on the order of a ____,'' the blank to be filled in with the designation of the practitioner licensed to use or order use of the device. A drug or device to which Section 111470 does not apply is misbranded if at any time prior to dispensing its label bears the caution statement quoted in the preceding sentence.

111495. Nothing in this article shall be construed to relieve any person from any requirement prescribed by or under authority of law with respect to drugs now included or that may hereafter be included within the classification stated in Division 10 (commencing with Section 11000) or in the applicable federal law relating to controlled substances.

111500. A physician, dentist, podiatrist, or veterinarian may personally furnish his or her own patient with drugs as are necessary

in the treatment of the condition for which he or she attends the patient provided that the drug is properly labeled to show all the information required in Section 111480 except the prescription number.

111505. For purposes of Section 111510, the following definitions shall apply:

(a) ‘‘Distributor’’ means any corporation, person, or other entity, not engaged in the manufacture of a legend drug product, who distributes for resale and distribution a legend drug product under the label of the corporation, person, or entity.

(b) ‘‘Legend drug’’ means any controlled substance subject to the Federal Controlled Substances Act (Title II, P.L. 91-513) or subject to the Uniform Controlled Substances Act, Division 10 (commencing with Section 11000), and any drug described in Section 4211 of the Business and Professions Code or Section 111470.

(c) ‘‘Solid dosage forms’’ means capsules or tablets intended for oral administration.

(d) ‘‘Code imprint’’ means a series of letters or numbers assigned by the manufacturer or distributor to a specific drug, or marks or monograms unique to the manufacturer, distributor, or both. The National Drug Code may be used as a code imprint.

111510. (a) No legend drug in solid dosage form may be manufactured or distributed for sale in this state unless it is clearly marked or imprinted with a code imprint identifying the drug and the manufacturer or distributor of the drug. Manufacturers or distributors who only repack an already finished dosage form of a legend drug shall not have the responsibility to do the imprint.

(b) On or before July 1, 1982, manufacturers or distributors of legend drugs, depending on whether the manufacturer’s or distributor’s code imprint will appear on the surface of the solid dosage form, shall provide to the department a list of their legend drugs and the intended code imprints. The department shall provide for the distribution of the information required to be submitted under this subdivision to all poison control centers in the state. Manufacturers, distributors, and the department shall provide to any licensed health care provider, upon request, lists of legend drugs and code imprints provided to the department under this section, but may charge a reasonable fee to cover copying and postage costs. Updated lists shall be provided to the department annually or as changes or revisions occur.

(c) The department may grant exemptions from the requirements of this section upon application of a manufacturer or distributor indicating size or other characteristics that render the product impractical for the imprinting required by this section.

(d) A legend drug that does not meet the requirements is misbranded.

(e) It is the intent of the Legislature that all legend drugs having solid dosage forms be imprinted regardless of by whom they are distributed.

(f) This section shall apply to all legend drugs sold in California on or after January 1, 1983.

(g) Pharmacists, pharmacies, and licensed wholesalers shall only be liable for knowing and willful violations of this section, except that no liability shall accrue if the pharmacist acts pursuant to Section 4229.5 of the Business and Professions Code.

(h) The provisions of subdivisions (a) to (g), inclusive, shall not apply to any of the following:

(1) Drugs purchased by a pharmacy, pharmacist, or licensed wholesaler prior to January 1, 1983, and held in stock for resale.

(2) Drugs that are the subject of an investigation pursuant to Section 111590 or 111595.

(3) Drugs that are manufactured by or upon the order of a practitioner licensed by law to prescribe or administer drugs and that are to be used solely by the patient for whom prescribed.

Article 4. Experimental Use of Drugs

111515. As used in this article, ‘‘experimental drug’’ means any of the following:

A drug intended for investigational use under Section 111595.

111520. No person shall prescribe or knowingly administer an experimental drug to another person in violation of this article.

111525. Prior to prescribing or administering an experimental drug, consent to the use of the drug shall be obtained in the method and manner specified in Chapter 1.3 (commencing with Section 24170) of Division 20.

111530. (a) Notwithstanding the provisions of Section 24175, if the subject is a minor, consent shall be provided by a parent or guardian of the subject and shall also be provided by the subject if the subject is seven years of age or older.

(b) Consent given pursuant to this section shall only be for the prescribing or administering of an experimental drug that is related to maintaining or improving the health of the subject or related to obtaining information about a pathological condition of the subject.

111535. Consent given pursuant to Section 111525 may be revoked at any time by either verbal or written communication to the practitioner supervising the administration of the experimental drug.

111540. Prior to administering an experimental drug, the experimental activity as a whole, including the consent procedures required by Section 111525, shall be reviewed and approved by a committee for the protection of human subjects that is acceptable, as determined by the department. A committee for the protection of

human subjects that operates under a general or special assurance approved by the federal Department of Health, Education, and Welfare pursuant to Part 46 of Title 45 of the Code of Federal Regulations shall be an acceptable committee for purposes of this section. A copy of the consent procedures approved by a committee for the protection of human subjects shall be filed with the department prior to the commencement of the experiment.

111545. A person having an ownership interest in a skilled nursing facility or intermediate care facility, as those terms are defined in Section 1250, may not prescribe an experimental drug for a patient in the facility.

Article 5. New Drugs or Devices

111550. No person shall sell, deliver, or give away any new drug or new device unless it satisfies either of the following:

(a) It is a new drug, and a new drug application has been approved for it and that approval has not been withdrawn, terminated, or suspended under Section 505 of the federal act (21 U.S.C. Sec. 355); or it is a new device for which a premarket approval application has been approved, and that approval has not been withdrawn, terminated, or suspended under Section 515 of the federal act (21 U.S.C. Sec. 360e).

(b) The department has approved a new drug or device application for that new drug or new device and that approval has not been withdrawn, terminated, or suspended. Any person who files a new drug or device application with the department shall submit, as part of the application, all of the following information:

(1) Full reports of investigations that have been made to show whether or not the new drug or device is safe for use and whether the new drug or device is effective in use under the conditions prescribed, recommended, or suggested in the labeling or advertising of the new drug or device.

(2) A full list of the articles used as components of the new drug or device.

(3) A full statement of the composition of the new drug or device.

(4) A full description of the methods used in, and the facilities and controls used for, the manufacture, processing, and packing of the new drug or in the case of a new device, a full statement of its composition, properties, and construction and the principles of its operation.

(5) Samples of the new drug or device and of the articles used as components of the drug or device as the department may require.

(6) Specimens of the labeling and advertisements proposed to be used for the new drug or device.

111555. Within 180 days after the filing of an application provided for in Section 111550, or an additional period as shall be agreed upon

by the department and the applicant, the department shall do either of the following:

(a) Approve the application, if it finds that none of the grounds for denying approval specified in Section 111550 apply.

(b) Give the applicant written notice for an opportunity for a hearing before the department on the question of whether the application is approvable. If the applicant elects to accept the opportunity for hearing by written request within 30 days after the notice, the hearing shall commence not more than 90 days after the expiration of the 30 days unless the department and the applicant otherwise agree. Any such hearing shall thereafter be conducted on an expedited basis and the department's order thereon shall be issued within 90 days after the date fixed by the department for filing final briefs.

111560. The department shall issue an order refusing to approve an application if, after written notice to the applicant and after giving him or her an opportunity for a hearing, the department makes any of the following findings:

(a) That the reports of investigation, that are required to be submitted to the department pursuant to Section 111550, do not include adequate tests by all methods reasonably applicable to show whether or not the new drug or device is safe for use under the conditions prescribed, recommended, or suggested in the proposed labeling and advertisement of the new drug or device.

(b) That the results of the tests submitted pursuant to Section 111550 to show whether or not the new drug or device is safe for use under the conditions prescribed, recommended, or suggested in the proposed labeling and advertisement of the new drug or device show that the drug or device is unsafe for use under these conditions or do not show that the new drug or device is safe for use under the conditions prescribed, recommended, or suggested in the proposed labeling and advertisement.

(c) That the methods, facilities, and controls used in the manufacture, processing, or packing of the new drug or device are inadequate to preserve its identity, strength, quality, purity, composition, or other characteristics.

(d) That upon the basis of information submitted as part of the application, or upon the basis of any other information before it with respect to the new drug or device, that the department has insufficient information to determine whether the drug or device is safe for use under the conditions prescribed, recommended, or suggested in the proposed labeling and advertisement.

(e) That evaluated on the basis of the information submitted as part of the application and any other information before it with respect to the new drug or device, that there is a lack of substantial evidence that the new drug or device will have the effect it purports or is represented to have under the conditions of use prescribed,

recommended, or suggested in the proposed labeling or advertisement of the new drug or device.

(f) That based on an evaluation by the department of all material facts, that the proposed labeling or advertising of the new drug or device is false or misleading in any particular.

111565. An order pursuant to Section 111560 refusing approval of a new drug application or a new device application shall be revoked whenever the department finds that the facts justify the action.

111570. In the case of any new drug or device for which an approval of an application filed pursuant to Section 111550 is in effect, the applicant shall establish and maintain records, and make reports to the department, of data relating to clinical experience and other data or information, received or otherwise obtained by the applicant with respect to the new drug or device, as the department may by general regulation, or by order with respect to the application, prescribe. Any regulation or order issued pursuant to this section or pursuant to Section 111595 shall have due regard for the professional ethics of the medical profession and the interest of patients and shall provide, where the department determines that it is reasonably necessary, for the examination upon request, by the persons to whom the regulation or order is applicable, of similar information received or otherwise obtained by the department. Every person required pursuant to this section to maintain records, and every person in charge or in custody of the records, shall, upon request of an authorized agent of the department, permit the agent at all reasonable time to have access to, and copy and verify, the records.

111575. The department shall issue an order withdrawing approval of an application concerning any new drug or device if, after giving written notice to the applicant and an opportunity for a hearing, the department makes any of the following findings:

(a) That clinical or other experience, tests, or other scientific data show that the new drug or device is unsafe for use under the conditions of use upon the basis of which the application was approved.

(b) That new evidence of clinical experience, not contained in the application or not available to the department until after the application was approved, or tests by new methods, or tests by methods not deemed reasonably applicable when the application was approved, evaluated together with the evidence available to the department when the application was approved, shows that the new drug or device is not shown to be safe for use under the conditions of use upon the basis of which the application was approved.

(c) On the basis of new information with respect to the new drug or device, evaluated together with the evidence available to the department when the application was approved, that there is a lack of substantial evidence that the new drug or device will have the effect it purports or is represented to have, under the conditions of

use prescribed, recommended, or suggested in the labeling or advertising of the new drug or device.

(d) That the application contains any untrue statement of a material fact.

(e) That the applicant has failed to establish a system for maintaining required records, or has repeatedly or deliberately failed to maintain the records or to make required reports, or the applicant has refused to permit access to, or copying or verification of, the records.

(f) That on the basis of new information before the department, evaluated together with the evidence before it when the application was approved, the methods used in, or the facilities and controls used for, the manufacture, processing, and packing of the new drug or device are inadequate to assure and preserve its identity, strength, quality, purity, composition, and characteristics as determined by qualified experts selected by the department, and were not made adequate within a reasonable time after receipt of written notice from the department specifying the matter complained of.

(g) That on the basis of new information before it, evaluated together with the evidence before it when the application was approved, the labeling or advertisement of the new drug or device, based on an evaluation of all material facts, is false or misleading in any particular and is not corrected within a reasonable time after receipt of written notice from the department specifying the matter complained of.

111580. When the department finds that there is an imminent hazard to the public health, it may suspend the approval for the application immediately.

111585. An order pursuant to Section 111575 or 111580 withdrawing approval of an application concerning any new drug or device shall be revoked whenever the department finds that the facts justify the action.

111590. Section 111550 does not apply to a drug or device intended solely for investigational use by experts qualified by scientific training and experience to investigate the safety and effectiveness of drugs or devices if the investigation is conducted in accordance with the requirements of Section 505(i) of the federal act (21 U.S.C. Sec. 355(i)) or Section 520(g) thereof (21 U.S.C. Secs. 352 and 360) and the regulations adopted pursuant to the federal act.

111595. Section 111550 does not apply to any drug or device intended solely for investigational use by experts qualified by scientific training and experience to investigate the safety and effectiveness of drugs or devices if all the following conditions are complied with:

(a) The submission to the department, before any clinical testing of a drug or device is undertaken, of reports, by the manufacturer or the sponsor of the investigation of the drug or device, of preclinical

tests including tests on animals, of the drug or device adequate to justify the proposed clinical testing.

(b) The manufacturer or the sponsor of the investigation of a drug or a device proposed to be distributed to investigators for clinical testing obtaining a signed, notarized agreement from each of the investigators that patients to whom the drug or device is administered will be under his or her personal supervision, or under the supervision of investigators responsible to him or her, and that he or she will not supply the drug or device to any other investigator, or to clinics, for administration to human beings.

(c) The establishment and maintenance of the records, and the making of the reports to the department, by the manufacturer or the sponsor of the investigation of the drug or device, of data, including but not limited to, analytical reports by investigators, obtained as a result of the investigational use of the drug or device, as the department finds will enable it to evaluate the safety and effectiveness of the drug or device in the event of the filing of an application pursuant to Section 111550.

(d) The manufacturer, or the sponsor of the investigation, require experts using the drugs or devices for investigational purposes to certify to the manufacturer or sponsor that they will comply with the requirements of Article 4 (commencing with Section 111515).

(e) Any other conditions as the department shall adopt as regulations necessary for the protection of the public health. The federal regulations adopted pursuant to Section 505(i) of the federal act (21 U.S.C. Sec. 355(i)) or Section 520(g) thereof (21 U.S.C. Secs. 352 and 360) shall be the regulations for exemptions from Section 111550 in this state. However, the department may prescribe, by regulation, any condition for exemption from Section 111550 whether or not the condition is in accordance with regulations adopted under the federal act.

111600. (a) In making determinations on requests for approval of AIDS-related drugs, as defined in subdivision (b), in accordance with Section 111550, or for exemptions from these requirements, for purposes of investigations of these drugs, pursuant to Section 111595, the department shall employ persons to conduct reviews of requests for drug marketing approval for AIDS-related drugs, or exemptions from the approval requirements as specified in that section. The AIDS Vaccine Research and Development Advisory Committee shall review and advise the department in its actions under this section.

Where necessary, the department shall enter into contracts with appropriate and qualified persons or entities for the review of these requests, including persons with significant experience in conducting or reviewing clinical trials of drugs or physicians with significant experience in treating AIDS patients.

No person may contract with the department for the review of a request under this subdivision if the person has a financial interest or a conflict of interest involving the drug being evaluated.

(b) ''AIDS-related drug'' means either of the following:

(1) A vaccine to protect against human immunodeficiency virus (HIV) infection.

(2) Antiviral agent, immune modulator, or other agent to be administered to persons who have been infected with HIV, to counteract the effects of this infection, or any drug to treat opportunistic infections associated with AIDS.

(c) The department, not later than July 1, 1988, and annually thereafter, shall report to the Legislature on the activities conducted pursuant to this section.

(d) The immunities provided for in Sections 818.4 and 821.6 of the Government Code shall apply whenever the department grants approval pursuant to Section 111550 or an exemption from the approval requirements pursuant to Section 111595, for an AIDS-related drug.

111605. (a) In making determinations on requests for approval of AIDS-related drugs, as defined in subdivision (b), in accordance with Section 111550, or for exemptions from these requirements, for purposes of investigations of these drugs, pursuant to Section 111595, the department shall employ persons to conduct reviews of requests for drug marketing approval for AIDS-related drugs, or exemptions from the approval requirements as specified in that section. The AIDS Vaccine Research and Development Advisory Committee shall review and advise the department in its actions under this section.

Where necessary, the department shall enter into contracts with appropriate and qualified persons or entities for the review of these requests, including persons with significant experience in conducting or reviewing clinical trials of drugs or physicians with significant experience in treating AIDS patients.

No person may contract with the department for the review of a request under this subdivision if the person has a financial interest or a conflict of interest involving the drug being evaluated.

(b) ''AIDS-related drug'' means either of the following:

(1) A vaccine to protect against human immunodeficiency virus (HIV) infection.

(2) Antiviral agent, immune modulator, or other agent to be administered to persons who have been infected with HIV, to counteract the effects of this infection, or any drug to treat opportunistic infections associated with AIDS.

(c) The immunities provided for in Sections 818.4 and 821.6 of the Government Code shall apply whenever the department grants approval pursuant to Section 111550 or an exemption from the

approval requirements pursuant to Section 111595, for an AIDS-related drug.

111610. Section 111550 does not apply to any of the following:

(a) A drug or device that is sold in this state, or introduced into interstate commerce, at any time prior to the enactment of the federal act, if its labeling and advertising contained the same representations concerning the conditions of its use.

(b) Any drug that is licensed under the Public Health Service Act of July 1, 1944 (58 Stats. 682, as amended; 42 U.S.C. Sec. 201 et seq.) or under the eighth paragraph of the heading of Bureau of Animal Industry of the act of March 4, 1913 (37 Stat. 832–833; 21 U.S.C. Sec. 151 et seq.), commonly known as the ''Virus-Serum-Toxin Act.''

(c) Any antibiotic drug that is subject to Section 111445.

Article 6. Licenses

111615. No person shall manufacture any drug or device in this state unless he or she has a valid license from the department. The license is valid for one calendar year from the date of issue, unless it is revoked. The license is not transferable.

The department may require any manufacturer, wholesaler, or importer of any prescription ophthalmic device in this state to obtain a license.

111620. A separate license is required for each place of manufacture.

111625. A license application shall be completed annually and accompanied by an application fee as prescribed in Section 111630. This fee is not refundable if the license is refused.

111630. The department shall by regulation establish the application form and set the fee for licensure and renewal of a license. The penalty for failure to apply for renewal of a license within 30 days after its expiration is ten dollars ($10) and shall be added to the renewal fee and be paid by the applicant before the renewal license may be issued. All moneys collected as fees shall be expended when appropriated by the Legislature in the carrying out of the provisions of this part and the regulations adopted pursuant to this part.

Any person licensed pursuant to this section shall immediately notify the department of any change in the information reported in the license application.

111635. Prior to issuing or renewing a license required by Section 111615, the department shall inspect each place of business to determine ownership, adequacy of facilities, and personnel qualifications.

111640. The department shall make investigations or inspections authorized by Article 2 (commencing with Section 110410) of Chapter 2 as it deems necessary to carry out this chapter.

111645. Any violation of any provision of this part or any regulation adopted pursuant to this part shall be grounds for denying a license or for suspending or revoking a license. Proceedings for the denial, suspension, or revocation of a license shall be conducted in accordance with Chapter 5 (commencing with Section 11500) of Part 1 of Division 3 of Title 2 of the Government Code, and the department shall have all the powers granted in that chapter.

111650. Drug manufacturers who have obtained a license or who are applying for a license pursuant to this article shall submit to the California State Board of Pharmacy information as the Board of Pharmacy deems reasonably necessary to carry out its drug distribution responsibilities including, but not limited to, information on drug inventories or restricted dangerous drugs. Failure of any manufacturer to report the information to the Board of Pharmacy in a timely fashion shall be grounds for the department to deny, suspend, or revoke the manufacturer's license.

The California State Board of Pharmacy may adopt regulations that are reasonably necessary to implement this section.

111655. The licensing provisions of this chapter shall not apply to any of the following:

(a) Any pharmacy that maintains establishments in conformance with provisions of the Pharmacy Law, Chapter 9 (commencing with Section 4000) of Division 2 of the Business and Professions Code, regulating the practice of pharmacy, and that is regularly engaged in dispensing prescription drugs or devices, upon prescriptions of any person licensed to administer the drugs or devices to patients under the care of the person in the course of his or her professional practice, and that does not manufacture, prepare, propagate, compound, or process drugs or devices for sale other than in the regular course of his or her business of dispensing or selling drugs or devices at retail.

(b) Any pharmacy that solely engages in providing drugs or devices to a person licensed by law to administer the drug or device for his or her use in the course of his or her professional practice.

(c) Any pharmacy that solely provides drugs or devices to another pharmacy in order to meet a temporary inventory shortage.

(d) Any person who is licensed by law to prescribe or administer drugs or devices and who manufactures, prepares, propagates, compounds, or processes drugs or devices solely for use in the course of his or her professional practice.

(e) Any person who manufactures, prepares, propagates, compounds, or processes any drug or device solely for use in nonclinical research, teaching, or chemical analysis and not for sale.

(f) Any wholesaler, as defined in Section 4038 of the Business and Professions Code.

(g) Any such other class of persons as the department may by regulation exempt from the application of this article upon a finding

that licensing by a class of persons in accordance with this article is not necessary for the protection of the public health.

(h) Any registered dispensing optician licensed pursuant to the provisions of Chapter 5.5 (commencing with Section 2550) of Division 2 of the Business and Professions Code, who is regularly engaged in dispensing or selling prescription lenses and frames, and not engaged in the manufacture, preparation, processing or assembling of lenses or frames for sale other than in the regular course of his or her business of dispensing or selling lenses or frames at retail.

CHAPTER 7. COSMETICS

Article 1. General Provisions and Definitions

111660. As used in this chapter, ''hair dye'' does not include any eyelash dye or eyebrow dye.

111665. Any color additive shall be considered unsafe for use with respect to any cosmetic unless there is in effect a regulation adopted pursuant to Section 110090 that prescribes its use in cosmetics.

Article 2. Adulterated Cosmetics

111670. A cosmetic is adulterated if it bears or contains any poisonous or deleterious substance that may render it injurious to users under the conditions of use prescribed in the labeling or advertisement of the cosmetic, or under conditions of use as are customary or usual.

111675. Section 111670 shall not apply to coal tar hair dye, that is conspicuously labeled as follows:

''Caution—this product contains ingredients that may cause skin irritation on certain individuals and a preliminary test according to accompanying directions should first be made. This product must not be used for dyeing the eyelashes or eyebrows; to do so may cause blindness.''

The labeling shall also bear adequate directions for such preliminary testing.

111680. Any cosmetic is adulterated if it consists in whole or in part of any filthy, putrid, or decomposed substance.

111685. Any cosmetic is adulterated if it has been produced, prepared, packed, or held under insanitary conditions whereby it may have become contaminated with filth, or whereby it may have been rendered injurious to health.

111690. Any cosmetic is adulterated if its container is composed, in whole or in part, of any poisonous or deleterious substance that may render the contents injurious to health.

111695. Any cosmetic is adulterated if it is not a hair dye and it is, or it bears or contains, a color additive that is unsafe within the meaning of Section 111665.

111700. It is unlawful for any person to manufacture, sell, deliver, hold, or offer for sale any cosmetic that is adulterated.

111705. It is unlawful for any person to adulterate any cosmetic.

111710. It is unlawful for any person to receive in commerce any cosmetic that is adulterated or to deliver or proffer for delivery any such cosmetic.

111715. While any regulation relating to any color additive referred to in Section 111665 is in effect, any cosmetic that bears or contains a color additive in accordance with these regulations shall not be considered adulterated.

111720. Any cosmetic intended for export shall not be deemed to be adulterated under this part if it satisfies all of the following requirements:

(a) It accords to the specifications of the foreign purchaser.

(b) It is not in conflict with the laws of the importing country.

(c) It is labeled on the outside of the shipping package to show that it is intended for export.

If the article is sold or offered for sale in domestic commerce, this section shall not exempt it from any of the provisions of this part.

111725. A cosmetic is deemed adulterated under the laws of this state if it is subject to regulations issued by the United States Food and Drug Administration relating to tamper-resistant packaging, as set forth in Part 700 of Volume 21 of the Code of Federal Regulations, as amended, but is not in compliance therewith.

Article 3. Misbranded Cosmetics

111730. Any cosmetic is misbranded if its labeling is false or misleading in any particular.

111735. Any cosmetic is misbranded if its labeling or packaging does not conform to the requirements of Chapter 4 (commencing with Section 110290).

111740. Any cosmetic is misbranded if it is in package form and it does not bear a label containing all of the following information:

(a) The name and place of business of the manufacturer, packer, or distributor.

(b) An accurate statement of the quantity of the contents in terms of weight, measure, or numerical count.

Reasonable variations shall be permitted from the requirements of subdivision (b) of this section. Requirements for placement and prominence of the information and exemptions as to small packages shall be established by regulations adopted pursuant to Section 110380.

111745. A cosmetic is misbranded if any word, statement, or other information required pursuant to this part to appear on the label or labeling is not prominently placed upon the label or labeling with conspicuousness, as compared with other words, statements, designs, or devices, in the labeling, and in terms as to render it likely to be read and understood by the ordinary individual under customary conditions of purchase and use.

111750. Any cosmetic is misbranded if its container is so made, formed, or filled as to be misleading.

111755. A cosmetic is misbranded if it is a color additive, unless its packaging and labeling are in conformity with the packaging and labeling requirements applicable to color additives prescribed under the provisions of Section 110090. This section does not apply to packages of color additives that, with respect to their use for cosmetics, are marketed and intended for use only in or on hair dyes.

111760. Any cosmetic is misbranded if its packaging or labeling is in violation of an applicable regulation issued pursuant to Section 108685 or 108700.

111765. It is unlawful for any person to manufacture, or sell any cosmetic that is misbranded.

111770. It is unlawful for any person to misbrand any cosmetic.

111775. It is unlawful for any person to receive in commerce any cosmetic that is misbranded, or to deliver or proffer for delivery any cosmetic.

111780. It is unlawful for any person to alter, mutilate, destroy, obliterate, or remove the label or any part of the labeling of any cosmetic if the act results in the cosmetic being misbranded, while held for sale.

111785. Any cosmetic intended for export shall not be deemed to be misbranded under this part if it satisfies all of the following requirements:

(a) It accords to the specifications of the foreign purchaser.

(b) It is not in conflict with the laws of the country to which it is intended for export.

(c) It is labeled on the outside of the shipping package to show that it is intended for export.

If the article is sold or offered for sale in domestic commerce, this section shall not exempt it from any of the provisions of this part.

111790. A cosmetic is deemed misbranded under the laws of this state if it is subject to regulations issued by the United States Food and Drug Administration relating to tamper-resistant packaging, as set forth in Part 700 of Volume 21 of the Code of Federal Regulations, as amended, but is not in compliance therewith.

Article 4. Voluntary Registration

111795. (a) Any person who manufactures a cosmetic in this state may register with the department. Any registration issued under this article shall be valid for one calendar year from the date of issue, unless it is suspended or revoked. The registration shall not be transferable.

(b) A separate registration shall be required for each place of manufacture.

111800. A registration application form provided by the department shall be completed annually and accompanied by an application fee of three hundred fifty dollars ($350). This fee shall not be returnable if the registration is denied. The fee amount shall be adjusted annually pursuant to Section 100425. All fees collected pursuant to this section shall be deposited into the Export Document Program Fund established by Section 110240.

111805. Any person registered pursuant to this article shall immediately notify the department of any change in the information reported in the registration application.

111810. (a) Prior to issuing a registration under Section 111795, the department shall inspect each place of business to determine ownership, adequacy of facilities, personnel qualifications, and compliance with this part. The department shall annually inspect each registrant.

(b) The department shall provide to each registrant a validated copy of the completed registration application form, sent to the mailing address shown on the form, as evidence of valid registration.

111815. The department shall make any investigations or inspections authorized by Article 2 (commencing with Section 110410) of Chapter 2 as it deems necessary to carry out this article.

111820. Any violation of this part or any regulation adopted pursuant to this part shall be grounds for denying a registration or for suspending or revoking a registration. Proceedings for the denial, suspension, or revocation of the registration shall be conducted in accordance with Chapter 5 (commencing with Section 11500) of Part 1 of Division 3 of Title 2 of the Government Code, and the department shall have all the powers granted in that chapter.

CHAPTER 8. PENALTIES AND REMEDIES

Article 1. Penalties

111825. Any person who violates any provision of this part or any regulation adopted pursuant to this part shall, if convicted, be subject to imprisonment for not more than one year in the county jail or a fine of not more than one thousand dollars ($1,000), or both the imprisonment and fine. If the violation is committed after a previous

conviction under this section that has become final, or if the violation is committed with intent to defraud or mislead, the person shall be subject to imprisonment for not more than one year in the county jail, imprisonment in state prison, or a fine of not more than ten thousand dollars ($10,000), or both the imprisonment and fine.

111830. Upon conviction of any violation of this part, or any regulation adopted pursuant to this part, the court may require, as a condition of probation under Section 1203.1 of the Penal Code, that the defendant pay to the department the reasonable costs incurred by the department in investigating and prosecuting the action, including, but not limited to, the costs of storage and testing. This payment shall be in addition to any other costs that a court is authorized to require a defendant to pay under Section 1203.1 of the Penal Code.

111835. One-half of all fines collected by any court or judge for any violation of any provision of this part shall be paid into the State Treasury to the credit of the General Fund.

Article 2. Proceedings

111840. The Attorney General, any district attorney, or any city attorney to whom the department reports any violation of this part shall begin appropriate proceedings in the proper court.

111845. The department is not required to institute proceedings under this part for minor violations of this part, if the department believes that the public interest will be adequately served in the circumstances by a suitable written notice or warning.

111850. When the state asserts a violation of this part, the state need not negative any exemption or exception from the requirements of this part in any pleading or in any trial, hearing, or other proceeding. The burden of proof with respect to any exemption or exception rests upon the person claiming its benefit.

111855. (a) If any person violates any provision of this part, or any regulation adopted pursuant to this part, the department may assess a civil penalty against that person as provided by this section.

(b) The penalty may be in an amount not to exceed one thousand dollars ($1,000) per day. Each day a violation continues shall be considered a separate violation.

(c) If, after examination of a possible violation and the facts surrounding that possible violation, the department concludes that a violation has occurred, the department may issue a complaint to the person charged with the violation. The complaint shall allege the acts or failures to act that constitute the basis for the violation and the amount of the penalty. The complaint shall be served by personal service or by certified mail and shall inform the person so served of the right to a hearing.

(d) Any person served with a complaint pursuant to subdivision (c) of this section may, within 20 days after service of the complaint, request a hearing by filing with the department a notice of defense. A notice of defense is deemed to have been filed within the 20-day period if it is postmarked within the 20-day period. If a hearing is requested by the person, it shall be conducted within 90 days after the receipt by the department of the notice of defense. If no notice of defense is filed within 20 days after service of the complaint, the department shall issue an order setting the penalty as proposed in the complaint unless the department and the person have entered into a settlement agreement, in which case the department shall issue an order setting the penalty in the amount specified in the settlement agreement. When the person has not filed a notice of defense or where the department and the person have entered into a settlement agreement, the order shall not be subject to review by any court or agency.

(e) Any hearing required under this section shall be conducted by a departmental hearing officer appointed by the director. The department shall adopt regulations establishing a hearing process to review complaints. Until the department adopts these regulations, all hearings shall be conducted in accordance with Chapter 5 (commencing with Section 11500) of Part 1 of Division 3 of Title 2 of the Government Code, except that hearings shall be conducted by a departmental hearing officer appointed by the director. The department shall have all the powers granted in that chapter.

(f) Orders setting civil penalties under this section shall become effective and final upon issuance thereof, and payment shall be made within 30 days of issuance. A copy of the order shall be served by personal service or by certified mail upon the person served with the complaint.

(g) Within 30 days after service of a copy of a decision issued by the director, any person so served may file with the superior court a petition for writ of mandate for review of the decision. Any person who fails to file the petition within this 30-day period may not challenge the reasonableness or validity of the decision or order of the director in any judicial proceeding brought to enforce the decision or order or for other remedies. Section 1094.5 of the Code of Civil Procedure shall govern any proceedings conducted pursuant to this subdivision. In all proceedings pursuant to this subdivision, the court shall uphold the decision of the director if the decision is based upon substantial evidence in the whole record. The filing of a petition for writ of mandate shall not stay any corrective action required pursuant to this part or the accrual of any penalties assessed pursuant to this section. This subdivision does not prohibit the court from granting any appropriate relief within its jurisdiction.

(h) The remedies under this section are in addition to, and do not supersede, or limit, any and all other remedies, civil or criminal.

Article 3. Seizure and Embargo

111860. Whenever an authorized agent of the department finds, or has probable cause to believe, that any food, drug, device, or cosmetic is adulterated, misbranded, or falsely advertised within the meaning of this part, or the sale of any food, drug, device, or cosmetic would be in violation of this part, that agent shall affix to the food, drug, device, cosmetic, or component thereof, a tag or other appropriate marking. He or she shall give notice that the food, drug, device, or cosmetic is, or is suspected of being, adulterated, misbranded, falsely advertised, or the sale of which would be in violation of this part and has been embargoed, and that no person shall remove or dispose of the food, drug, device, or cosmetic by sale or otherwise until permission for removal or disposal is given by an authorized agent of the department or the court.

111865. It is unlawful for any person to remove, sell, or dispose of a detained or embargoed food, drug, device, or cosmetic without permission of an authorized agent of the department or the court.

111870. When an authorized agent of the department has found that a food, drug, device, or cosmetic that is embargoed, is not adulterated, misbranded, falsely advertised, or the sale of which is not otherwise in violation of this part, that agent shall remove the tag or other marking.

111875. When an authorized agent of the department finds, or has reasonable cause to believe, that the embargo will be violated, that agent may remove the embargoed food, drug, device, or cosmetic to a place of safekeeping.

111880. When a food, drug, device, or cosmetic is alleged to be adulterated, misbranded, falsely advertised, or the sale of which is otherwise in violation of this part, the department shall commence proceedings in the superior court or lower court in whose jurisdiction the food, drug, device, or cosmetic is located, for condemnation of the article.

111885. If the court finds that an embargoed food, drug, device, or cosmetic is adulterated, misbranded, falsely advertised, or the sale of which is otherwise in violation of this part, the food, drug, device, or cosmetic shall, after entry of the judgment, be destroyed at the expense of the claimant or owner, under the supervision of an authorized agent of the department. All court costs and fees and all reasonable costs incurred by the department in investigating and prosecuting the action, including, but not limited to, the costs of storage and testing, shall be taxed against the claimant or owner of the food, drug, device, or cosmetic or his or her agent. When the adulteration or misbranding can be corrected by proper labeling or processing of the food, drug, device, or cosmetic, or when the false advertisement can be corrected and when all provisions of this part can be complied with, then, after entry of the judgment and after

costs, fees, and expenses have been paid and a good and sufficient bond, conditioned that the food, drug, device, or cosmetic will be brought into compliance, the court may, by order, direct that the food, drug, device, or cosmetic be delivered to the claimant or owner to be brought into compliance by labeling, processing, or other means under the supervision of an authorized agent of the department. The expense of the supervision shall be paid by the claimant or owner. The bond shall be discharged when the court finds that the food, drug, device, or cosmetic is no longer held for sale in violation of this part and that all of the expenses of supervision have been paid.

111890. Whenever an authorized agent of the department finds any meat, meat products, seafood, poultry, vegetable, fruit, or other food that is unsound, or that contains any filthy, decomposed, or putrid substance, or that may be poisonous or deleterious to health, or otherwise unsafe, that agent may declare the food to be a nuisance and the department, or its authorized agent, shall condemn or destroy it, or render it unsalable as human food by decharacterization.

111895. Any superior or lower court of this state may condemn any food, drug, device, or cosmetic under provisions of this part. In the absence of such an order, the food, drug, device, or cosmetic may be destroyed under the supervision of an authorized agent of the department who has the written consent of the owner, his or her attorney, or authorized representative.

Article 4. Injunctions

111900. The Attorney General or any district attorney, on behalf of the department, may bring an action in superior court and the court shall have jurisdiction upon hearing and for cause shown, to grant a temporary or permanent injunction restraining any person from violating any provision of this part. Any proceeding under the provisions of this section shall conform to the requirements of Chapter 3 (commencing with Section 525) of Title 7 of Part 2 of the Code of Civil Procedure, except that the department shall not be required to allege facts necessary to show, or tending to show, lack of adequate remedy at law, or to show, or tending to show, irreparable damage or loss.

111905. In addition to the injunctive relief provided in Section 111900, or as a nonpunitive alternative to Section 111915, the court, after finding any person has violated this part, shall award to the department all reasonable costs incurred by the department in investigating and prosecuting the action, including, but not limited to, the costs of storage and testing, as determined by the court. The award shall be paid to the department by the person found by the court to have violated this part.

111910. (a) Notwithstanding the provisions of Section 111900 or any other provision of law, any person may bring an action in superior court pursuant to this section and the court shall have jurisdiction upon hearing and for cause shown, to grant a temporary or permanent injunction restraining any person from violating any provision of Article 7 (commencing with Section 110810) of Chapter 5. Any proceeding under this section shall conform to the requirements of Chapter 3 (commencing with Section 525) of Title 7 of Part 2 of the Code of Civil Procedure, except that the person shall not be required to allege facts necessary to show, or tending to show, lack of adequate remedy at law, or to show, or tending to show, irreparable damage or loss, or to show, or tending to show, unique or special individual injury or damages.

(b) In addition to the injunctive relief provided in subdivision (a), the court may award to that person, organization, or entity reasonable attorney's fees as determined by the court.

(c) This section shall not be construed to limit or alter the powers of the department and its authorized agents to bring an action to enforce this chapter pursuant to Section 111900 or any other provision of law.

111915. In addition to injunctive relief, the court may impose as a civil penalty, damages in the maximum sum of one thousand dollars ($1,000) for each day the violation is continued. Damages shall be paid one-half to this state and one-half to the county in which the action is brought if brought by the Attorney General, or entirely to the county if brought by a district attorney.

PART 6. WHOLESALE FOOD

CHAPTER 1. DEFINITIONS (Reserved)

CHAPTER 2. POWERS AND DUTIES (Reserved)

CHAPTER 3. ENFORCEMENT AND PENALTIES

111940. (a) If any person violates any provision of Chapter 4 (commencing with Section 111950), Chapter 5 (commencing with Section 112150), Chapter 6 (commencing with Section 112350), Chapter 7 (commencing with Section 112500), Chapter 8 (commencing with Section 112650), Chapter 10 (commencing with Section 113025), or Article 3 (commencing with Section 113250) of Chapter 11, or Chapter 4 (commencing with Section 108100) of Part 3, or any regulation adopted pursuant to these provisions, the department may assess a civil penalty against that person as provided by this section.

(b) The penalty may be in an amount not to exceed one thousand dollars ($1,000) per day. Each day a violation continues shall be considered a separate violation.

(c) If, after examination of a possible violation and the facts surrounding that possible violation, the department concludes that a violation has occurred, the department may issue a complaint to the person charged with the violation. The complaint shall allege the acts or failures to act that constitute the basis for the violation and the amount of the penalty. The complaint shall be served by personal service or by certified mail and shall inform the person so served of the right to a hearing.

(d) Any person served with a complaint pursuant to subdivision (c) of this section may, within 20 days after service of the complaint, request a hearing by filing with the department a notice of defense. A notice of defense is deemed to have been filed within the 20-day period if it is postmarked within the 20-day period. If a hearing is requested by the person, it shall be conducted within 90 days after the receipt by the department of the notice of defense. If no notice of defense is filed within 20 days after service of the complaint, the department shall issue an order setting the penalty as proposed in the complaint unless the department and the person have entered into a settlement agreement, in that case the department shall issue an order setting the penalty in the amount specified in the settlement agreement. When the person has not filed a notice of defense or where the department and the person have entered into a settlement agreement, the order shall not be subject to review by any court or agency.

(e) Any hearing required under this section shall be conducted by a departmental hearing officer appointed by the director. The department shall adopt regulations establishing a hearing process to review complaints. Until the department adopts these regulations, all hearings shall be conducted in accordance with Chapter 5 (commencing with Section 11500) of Part 1 of Division 3 of Title 2 of the Government Code, except that hearings shall be conducted by a departmental hearing officer appointed by the director. The department shall have all the powers granted in that chapter.

(f) Orders setting civil penalties under this section shall become effective and final upon issuance thereof, and payment shall be made within 30 days of issuance. A copy of the order shall be served by personal service or by certified mail upon the person served with the complaint.

(g) Within 30 days after service of a copy of a decision issued by the director, any person so served may file with the superior court a petition for writ of mandate for review of the decision. Any person who fails to file the petition within this 30-day period may not challenge the reasonableness or validity of the decision or order of the director in any judicial proceeding brought to enforce the

decision or order or for other remedies. Section 1094.5 of the Code of Civil Procedure shall govern any proceedings conducted pursuant to this subdivision. In all proceedings pursuant to this subdivision, the court shall uphold the decision of the director if the decision is based upon substantial evidence in the whole record. The filing of a petition for writ of mandate shall not stay any corrective action required pursuant to the Miscellaneous Food, Food Facility, and Hazardous Substances Act (Section 27) or the accrual of any penalties assessed pursuant to this section. This subdivision does not prohibit the court from granting any appropriate relief within its jurisdiction.

(h) The remedies under this section are in addition to, and do not supersede, or limit, any and all other remedies, civil or criminal.

111945. In addition to injunctive relief, the court may impose as a civil penalty, damages up to a maximum amount of one thousand dollars ($1,000) for each day the violation is continued. Damages shall be paid one-half to the State Treasury, and one-half to the county where the action is brought.

CHAPTER 4. WHOLESALE FOOD PROCESSORS

Article 1. Food Processing Establishments

111950. ''Food,'' as used in this chapter, includes all articles used for food, drink, confectionery, or condiment, whether simple or compound, and all substances and ingredients used in the preparation thereof.

111955. ''Food processing establishment,'' as used in this chapter, shall mean any room, building or place or portion thereof, maintained, used or operated for the purpose of commercially storing, packaging, making, cooking, mixing, processing, bottling, canning, packing, slaughtering or otherwise preparing or handling food except restaurants.

111960. Every food processing establishment shall be properly lighted, drained, plumbed, and ventilated; and shall be conducted with strict regard to the influence of lighting, drainage, plumbing, and ventilation upon the health of persons therein employed, and upon the purity and wholesomeness of the food therein produced, prepared for sale, manufactured, packed, stored, kept, handled, sold, or distributed.

111965. The floors, side walls, ceiling, furniture, receptacles, utensils, implements, and machinery of every food processing establishment shall at no time be kept in an unclean, unhealthful, or unsanitary condition.

Any of the following is deemed to be ''an unclean, unhealthful, or unsanitary condition'':

(a) If food in the process of manufacture, preparation, packing, storing, sale, or distribution is not securely protected from flies, dust, or dirt, and from all other foreign or injurious contamination.

(b) If refuse, dirt, and waste products subject to decomposition and fermentation incident to the manufacture, preparation, packing, storing, selling, and distributing of food, are not removed daily.

(c) If all trucks, trays, boxes, baskets, buckets, other receptacles, chutes, platforms, racks, tables, shelves, knives, saws, cleavers, and all other utensils, receptacles, and machinery used in moving, handling, cutting, chopping, mixing, canning, and all other processes employed in the preparation of food are not thoroughly cleaned daily.

(d) If the clothing of employees is unclean or if they dress, undress, or leave or store their clothing in the place where the food is produced, prepared, manufactured, packed, sold or distributed.

111970. No live animal or fowl shall be kept or allowed in any establishment where food is prepared, manufactured, kept, stored, offered for sale or sold unless the establishment is exclusively devoted to the slaughter, processing and/or sale of the animal or fowl. This section does not apply to dogs used by uniformed employees of private patrol operators and operators of a private patrol service who are licensed pursuant to Chapter 11.5 (commencing with Section 7580) of Division 3 of the Business and Professions Code, while those employees are acting within the course and scope of their employment as private patrolmen.

The state department may adopt regulations as it determines are reasonably necessary under this section for the protection of the public health and safety.

111975. The side walls and ceilings of every bakery, confectionery, hotel, or restaurant kitchen shall be well plastered or ceiled with metal or lumber, or shall be oil painted or kept well lime washed, or otherwise kept in a good sanitary condition.

111980. All interior woodwork of every bakery, confectionery, hotel, or restaurant kitchen shall be kept well oiled or painted with oil paint, and shall be kept washed clean with soap and water, or otherwise kept in a good sanitary condition.

111985. Every building, room, basement, or cellar occupied or used for the preparation, manufacture, packing, storage, sale, or distribution of food shall have an impermeable floor, made of cement, or of tile laid in cement, brick, wood, or other suitable, nonabsorbent material that can be flushed and washed clean with water.

111990. Where practicable, the doors, windows, and other openings of every food producing or distributing establishment shall be fitted with stationary or self-closing screen doors and wire window screens, of not coarser than 14 mesh wire gauze.

111995. Every building, room, basement, or cellar occupied or used for the production, preparation, manufacture, packing, canning, sale, or distribution of food shall have convenient toilet or

toilet-rooms, separate and apart from the room or rooms where the process of production, preparation, manufacture, packing, canning, selling, or distributing is conducted.

112000. The floors of toilet-rooms shall be made of cement, or of tile laid in cement, wood, brick, or other nonabsorbent material, and shall be washed and scoured daily.

112005. The toilets shall be furnished with separate ventilating pipes or flues discharging either into soil pipes or on the outside of the building in which they are situated.

112010. Lavatories and washrooms shall be adjacent to toilet-rooms and shall be supplied with soap, running water, and towels, and shall be maintained in a clean and sanitary condition.

112015. Employees and others who handle the material from which food is prepared or the finished product shall before beginning work and immediately after visiting a toilet or lavatory, wash their hands and arms thoroughly in clean water.

112020. No employee or other person shall sit or lie upon any table, bench, trough, shelf, or other equipment that is intended for use in connection with any food manufacturing process.

112025. No employee or other person shall expectorate or discharge any substance from his or her nose or mouth on the floor or interior side wall of any building, room basement, or cellar where the production, preparation, manufacture, packing, storing, or sale of any food is conducted.

112030. No person shall, nor shall any person be allowed to, reside or sleep in any room of a bake-shop, public diningroom, hotel or restaurant kitchen, confectionery, or other place where food is prepared, produced, manufactured, served, or sold.

112035. No employer shall require or permit any person to work, in a food processing establishment or vehicle used for the production, preparation, manufacture, sale, or transportation of food if the person is infected with any contagious, infectious, or communicable disease that can be transmitted by the food involved.

112040. The department, its inspectors and agents, and all local health officers and inspectors may at all times enter any building, room, basement, cellar, or other place occupied or used, or suspected of being occupied or used, for the production, preparation, manufacture, storage, sale, or distribution of food, and inspect the premises and all utensils, implements, receptacles, fixtures, furniture, and machinery used.

112045. If upon inspection any building, room, basement, cellar, or other place, or any vehicle, employer, employee, or other person is found to be in violation of or violating any of the provisions of this article, or if the production, preparation, manufacture, packing, storing, sale, or distribution of food is being conducted in a manner detrimental to the health of the employees or to the character or quality of the food being produced, prepared, manufactured, packed,

stored, sold, distributed, or conveyed, the person making the inspection shall at once make a written report of the violation to the district attorney of the county, who shall prosecute the violator. He or she shall make a like report to the department. The department, from time to time, may publish the reports in its monthly bulletin.

112050. Every building, room, basement, cellar, or other place or thing kept, maintained, or operated in violation of this article, and all food produced, prepared, manufactured, packed, stored, kept, sold, distributed, or transported in violation of this article, is a public nuisance dangerous to health. Any such nuisance may be abated or enjoined in an action brought for that purpose by the local or state department or may be summarily abated in the manner provided by law for the summary abatement of public nuisances dangerous to health.

112055. The sections contained in this article are to be known as the California Food Sanitation Act.

Article 2. Food Containers

112060. ''Bottle,'' as employed in this article, includes any bottle or any glass or crockery food container, other than one not previously used, that is used or sold for use in the manufacture, production, preparation, compounding, blending, or packing for sale of any food, drug, or liquor.

112065. This article is not applicable to containers subject to Division 15 (commencing with Section 32501) of the Food and Agricultural Code.

112070. The provisions of this article in reference to sterilization procedures and methods in cleaning bottles, as in this article defined, shall apply to all persons cleaning previously used bottles who are engaged in the business of packaging food, drugs, or liquors and to all persons maintaining a place of business for the cleaning and resale of the bottles sold for and to be used for packing a food, drug or liquor.

The sale for use of any such bottle by any person not licensed by the board as herein provided, when the use intended by purchaser is to package for sale a food, drug or liquor produced or packaged by the purchaser is unlawful, except in the case of a sale to a purchaser for export out of this state or who is engaged in the business of packaging food, drugs, or liquors at a fixed place of business in this state and is equipped to cleanse and sterilize bottles as in this article provided.

112075. The department shall issue a license to an applicant therefor upon the receipt of the evidence as the department may require showing that the applicant is properly equipped for the cleansing and sterilization of bottles as provided in this article, or at its option upon the recommendation of a city, county or city and county health officer. This license is nontransferable.

The license provisions of this article shall not apply to food, drug or liquor manufacturers or packers who buy bottles for their own use and purposes, but do apply to any other person, firm or corporation engaged in the business of cleaning, sterilizing and reselling bottles to manufacturers or packers except as hereinabove provided.

112080. An establishment is deemed properly equipped for the cleansing and sterilization of bottles if it maintains and employs the following standards:

(a) Cleanses and sterilizes bottles by first soaking them in a hot caustic solution of not less than 120 degrees F. for a period of not less than five minutes which temperature shall be indicated by a thermometer. The solution shall contain not less than $2^1/_2$ percent of caustic soda expressed in terms of sodium hydrates.

(b) Changes the cleansing solution frequently so as to prevent its becoming foul and insanitary.

(c) Thoroughly rinses the bottles after the soaking.

112085. All bottles shall be cleansed and sterilized as specified in Section 112080, and shall be kept free from rust or contamination.

112090. A licensee shall issue a certificate of sterilization with each shipment of bottles to a purchaser, stating that the licensee has cleansed and sterilized the bottles in the manner required by this article.

112095. If any licensee fails to maintain his or her equipment and to cleanse or sterilize any bottle in the manner required by this article, and issues a certificate knowing its contents to be untrue the state department may revoke or suspend his or her license after a hearing. The proceedings for the revocation or suspension of a license shall be conducted in accordance with Chapter 5 (commencing with Section 11500) of Part 1 of Division 3 of Title 2 of the Government Code, and the state department shall have all the powers granted therein.

112100. Any purchaser of a bottle who shows a certificate of sterilization signed by a licensed seller thereof complies sufficiently with this article.

112105. Nothing in this article prohibits the sale for use of any uncleansed or unsterilized bottle to a purchaser who is licensed under this article.

112110. Food containers manufactured from second-hand tin plate and intended for the packing of hermetically sealed canned food products intended to be used for human consumption shall not be so used unless the tin plate from which they are manufactured has, prior to their manufacture, been cleansed and sterilized by thorough immersion in boiling water, and then dried on hot rolls or by the use of heated air.

The board may inspect any place where the containers are manufactured for the purpose of enforcing this section.

112115. The provisions of this article with the exception of the licensing provisions may be enforced by any local enforcement division, which shall be construed to mean the local health department, headed by the duly appointed, qualified and acting health officer of any county, city or city and county. The territory may include one or more counties, cities, or cities and counties.

112120. A nonalcoholic soft drink, whether or not carbonated, shall be deemed to be misbranded if in a bottle or other closed container unless the name and address of the bottler or distributor thereof appears on the container by being molded, printed, or otherwise labeled thereon, or the name and address is shown on the crown or cap of the container if the container is a permanently and distinctively branded bottle. The beverage shall not be deemed to be misbranded under this section if in a bottle or other closed container on which is molded, printed or otherwise labeled the product name, trademark or brand of the distributor or bottler thereof and if a sworn affidavit has been filed with the department stating the name, trademark, or brand of the beverage, a full and complete description of each territory or area of the state in which the beverage is to be distributed, and the names and addresses of the persons as are responsible for the Miscellaneous Food, Food Facility, and Hazardous Substances Act (Section 27) in the bottling and distribution of the beverage in each territory or area of the state in which the beverage is distributed. Nothing in this section shall be deemed to exempt any bottler or distributor of a beverage or beverages from any provision of Part 5 (commencing with Section 109875).

Article 3. Closed Containers

112125. Except when sold in bulk for manufacturing purposes, it is unlawful to sell or otherwise dispose of at retail jams, jellies, preserves, marmalades, peanut butter, horse-radish, mayonnaise, or salad dressings other than in closed containers approved by the department, when the department determines that any other method of sale or disposition of any such food or food product is conducive to its contamination by flies, insects, dust, dirt, or foreign material of any kind whatsoever.

Article 4. Violations

112130. Any person, whether as principal or agent, employer or employee, who violates any of the provisions of this chapter is guilty of a misdemeanor punishable upon conviction by a fine of not more than one thousand dollars ($1,000), or by imprisonment in the county jail for not more than six months, or by both the fine and imprisonment. Each day’s violation is a separate and distinct offense.

CHAPTER 5. SANITARY CONTROL OF SHELLFISH

Article 1. Declaration of Policy and Definitions

112150. The Legislature finds and declares that the public health interest requires that the people of this state be protected from adulterated shellfish grown and harvested in state waters for sale to the public and for introduction into interstate commerce. This protection is a matter of statewide concern and the purpose of this chapter is to establish uniform sanitation standards for the growing waters, harvesting, shucking, packing, repacking, and handling of shellfish and shellstock intended for human consumption.

112155. Unless the context otherwise requires, the definitions set forth in this article govern the construction of this chapter.

(a) ''Shellfish'' means native or nonnative bivalve mollusks, which include oysters, rock scallops, clams, and mussels, either fresh or frozen, and either shucked or in the shell.

(b) ''Shellstock'' means shellfish which remain in their shells.

(c) ''Growing area'' means any offshore ocean, coastal estuarine, or freshwater area that may be classified by the department for natural shellfish growth or artificial shellfish propagation and includes open seawater systems.

(d) ''Approved area'' means a shellfish-growing area not adversely affected by sewage or other wastes.

(e) ''Conditionally approved area'' means a shellfish-growing area that may be occasionally affected by sewage or other wastes.

(f) ''Prohibited area'' means a shellfish-growing area not certified because of its proximity to a waste discharge or because the area is influenced by other detrimental environmental factors.

(g) ''Restricted area'' means a shellfish-growing area subjected to a limited degree of pollution which makes it unsafe to harvest shellfish for direct marketing but where harvesting for relaying or depuration may be permitted.

(h) ''Other wastes'' means wastes, such as, but not limited to, animal, industrial, radiological, and agricultural wastes which would render shellfish unsafe or unfit for human consumption.

(i) ''Department'' means the State Department of Health Services.

(j) ''Director'' means the State Director of Health Services.

(k) ''Person'' includes any individual, partnership, corporation, limited liability company, and association.

(*l*) ''Closed area'' means an area that the shellfish taken therefrom have been declared to be unsafe or unfit for human consumption.

Article 2. General Requirements

112160. (a) The director may declare any area within the jurisdiction of this state to be a closed area if it is determined that shellfish taken from the growing area may be unsafe or unfit for human consumption.

(b) The director shall close to the taking of shellfish for a period deemed advisable any waters to which shellfish from a closed area may have been transferred.

(c) The director shall establish by order the areas that he or she declares unsafe or unfit for shellfish harvesting and shall modify or revoke the order in accordance with the results of chemical, toxicologic, and bacteriological surveys conducted by the department. The director shall file the order in the office of the department, and shall furnish copies of the orders describing closed areas to the Department of Fish and Game, the State Water Resources Control Board, and to any interested person without charge.

(d) Prior to the director's declaration that shellfish-growing waters may be unsafe and shellfish grown in these waters may not be taken for human consumption, the department shall do all of the following:

(1) Give at least 20 days' notice of its intended action. The notice shall include a statement of either the terms or substance of the intended action or a description of the subject and issues involved, and the time when, the place where, and the manner in which, interested persons may present their views thereon.

(2) Afford all interested persons reasonable opportunity to submit data, views, or arguments orally or in writing. The department shall consider fully all written and oral submissions respecting the proposed action.

(e) If the department finds that the shellfish harvested from an area is unsafe or unfit for human consumption and states in writing its reasons for that finding, it may proceed without prior notice or hearing to take emergency action. The action may be effective for a period of not longer than 30 days, during which time the department shall initiate the procedures contained in subdivision (d).

112165. (a) The department shall adopt regulations regarding all of the following:

(1) The classification and minimum requirements for growing and harvesting areas, for relaying and depuration procedures, and for aquaculture facilities that are used for the cultivation and production of shellfish.

(2) Specifications for plant facilities and for the harvesting, transporting, storing, handling, packing, and repacking of shellfish.

(3) Fees.

(b) The department may adopt any regulations that it determines are necessary to interpret and enforce the provisions of this chapter. The regulations shall be adopted by the department in the manner prescribed by Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code.

(c) The regulations shall conform, so far as possible, to the standards that are adopted by the National Shellfish Sanitation Program that pertain to the evaluation of shellfish-growing areas and handling facilities, but shall provide for regulating other wastes or contaminants not covered by the National Shellfish Sanitation Program that would render shellfish unsafe or unfit for human consumption.

112170. (a) The director, or the director's duly authorized agent, shall conduct sanitary surveys of any shellfish growing water as deemed necessary to assure each of the following:

(1) Any shellfish grown in the water is safe as an article of food and meets bacteriological, chemical, and toxicologic standards as prescribed by regulation.

(2) Any shellfish grown in prohibited or restricted areas is either relayed to or depurated in approved water for a period of time as necessary to meet bacteriological, chemical, and toxicologic standards, as prescribed by regulation.

(3) For good cause shown, a shellfish grower or harvester may request the resurvey of restricted or unapproved growing water, and the director, or the director's duly authorized agent, shall conduct the sanitary resurvey.

(b) If it is found that the shellfish and growing water are in compliance with the regulations promulgated under this chapter, the director shall issue a certificate attesting to the compliance to the lawful grower or harvester of the shellfish.

112175. It is unlawful for any person to engage in commercial shellfish cultivation or the harvesting for human consumption of shellfish from naturally occurring populations, except as provided for in Sections 5670, 7850, 8500, and 15101 of the Fish and Game Code and in regulations adopted by the department pursuant to this chapter, with regard to growing areas, relaying and depuration procedures, and aquaculture facilities.

112180. The director, or the director's duly authorized agent, may, at any reasonable hour of the day, do any of the following:

(a) Enter and inspect any facility or area used for cultivation, production, depuration, processing, transporting, or sale of shellfish.

(b) Obtain samples of water and shellfish. Upon request, split samples shall be given to the person from whose property the samples were obtained.

(c) Inspect all shellfish plants and the practices followed in the handling and packaging of shellfish. If it is found that the operator is

complying with the regulations promulgated under this chapter, the director shall issue a certificate attesting to the compliance.

(d) Cause a reinspection to be made at any time and may revoke the certificate upon refusal of the operator to permit an inspection or free access at all reasonable hours, or upon a finding that the plant is not being operated in compliance with the regulations promulgated under this chapter.

(e) No revocation, suspension, annulment, or withdrawal of any certificate is lawful unless, prior to the institution of department proceedings, the department gave notice by mail, to the certificate holder, of facts or conduct that warrants the intended action, and the certificate holder was given an opportunity to show compliance with all lawful requirements for the retention of the certificate, pursuant to Section 112265. This section does not preclude the department from taking immediate action in accordance with subdivision (e) of Section 112160.

112185. It is unlawful for any person to take, sell, offer, or hold for sale any shellfish from an area declared by the director to be unsuitable for harvesting for human consumption, without complying with all regulations adopted by the department to ensure that the shellfish have been purified.

The intent of this section is not to prohibit the transplanting of shellfish from restricted or prohibited growing areas, if permission for the transplanting is first obtained from the Department of Fish and Game pursuant to Section 237 of Title 14 of the California Code of Regulations.

112190. It is unlawful for any person to sell, offer, or hold for sale any shellstock or shucked shellfish that has not been harvested from a growing area which has been certified by the department or that has not been purified in accordance with Section 112170.

112195. It is unlawful for any person to sell, offer, or hold for sale any shellstock or shucked shellfish that has not been handled and packaged in accordance with specifications under this chapter, and regulations adopted pursuant to this chapter.

112200. It is unlawful for any person to sell, offer, or hold for sale any shellfish where the facilities for packaging and handling of the shellfish do not comply with regulations adopted by the department under this chapter.

112205. It is unlawful for any person to operate a shellfish plant engaged in the handling and packaging of shellfish, either shucked or in the shell, without a valid certificate issued by the department for each plant or place of business.

112210. It is unlawful for any person to sell, offer, or hold for sale any shellstock or shucked shellfish without a label that bears a valid certificate number and is in compliance with Chapter 4 (commencing with Section 110290) of Part 5.

112215. It is unlawful for any person to sell, offer, or hold for sale any shellfish not in a container bearing a valid certificate number from a state or a nation whose shellfish certification program conforms to the then current Manual of Recommended Practice for Sanitary Control of the Shellfish Industry, issued by the United States Public Health Service.

112220. The provisions of Sections 112210 and 112215, with respect to labeling requirements, shall not apply to any of the following:

(a) Shellstock held in dry storage under refrigerated conditions not for shipment or sale.

(b) Shellstock sold on premises when the sale is the ultimate point of sale.

112225. Any shellfish that are held or offered for sale at retail or for human consumption, and that have not been handled and packaged in accordance with the specifications fixed by the department under this chapter, or that are not in a certified container as provided in Sections 112210 and 112215, or that are otherwise found by the director to be unfit for human consumption, are subject to immediate condemnation, seizure, and confiscation by the director or the director's duly authorized agent. The shellfish shall be held, destroyed, or otherwise disposed of as directed by the director.

112230. The director may suspend or revoke any certificate issued pursuant to this chapter for any violation of this chapter or the regulations adopted pursuant thereto.

Article 3. Fees

112235. The department shall charge and collect a fee for each certificate issued. The amount of the fee shall be established by regulation.

Article 4. Penalties

112240. Any person who willfully violates any provision of this chapter, or any regulation adopted pursuant to this chapter, is guilty of a misdemeanor and shall, if convicted, be subject to imprisonment for not more than six months in the county jail or a fine of not less than one hundred dollars ($100) nor more than five hundred dollars ($500), or both. If the violation is committed after a previous conviction under this section that has become final, or if the violation is committed with the intent to defraud or mislead, the person shall be subject to imprisonment for not more than one year in the county jail or a fine of not more than one thousand dollars ($1,000), or both.

112245. One-half of all fines collected by any court or judge for any violation of any provision of this chapter shall be paid into the State Treasury to the credit of the General Fund.

Article 5. Proceedings

112250. (a) The Attorney General, any district attorney, or any city attorney to whom the department reports any violation of this chapter shall begin appropriate proceedings in the proper court.

(b) Before any alleged violation of this chapter is reported to the Attorney General, a district attorney, or a city attorney for the institution of a criminal proceeding, the person against whom this proceeding is contemplated may be given appropriate notice and an opportunity to show cause why he or she should not be prosecuted and to present additional facts that may mitigate the action. The showing may be presented either orally or in writing, in person, or by attorney.

112255. The department is not required to institute proceedings under this chapter for minor violations of this chapter, if the department believes that the public interest will be adequately served in the circumstances by a suitable written notice or warning.

112260. When the state asserts a violation of this chapter, the state need not negate any exemption or exception from the requirements of this chapter in any pleading, or in any trial, hearing, or other proceeding. The burden of proof with respect to any exemption or exception rests upon the person claiming its benefits.

112265. (a) Except to the extent otherwise provided in Section 112160 and subdivision (e) of Section 112180, or when a violation is asserted pursuant to Section 112240, when the department asserts a violation of this chapter, all affected persons shall be afforded an opportunity for an administrative hearing after 20 days notice.

(b) The notice shall include all of the following:

(1) A statement of the time, place, and nature of the hearing.

(2) A statement of the legal authority and jurisdiction under which the hearing is to be held.

(3) A reference to the particular sections of the statutes, regulations, and rules involved.

(4) A short and plain statement of the matters asserted.

(c) Opportunity shall be afforded all persons to respond and present evidence on the issues involved.

(d) Hearings authorized or required by this chapter shall be conducted by the department or any agent as the department may designate for that purpose.

(e) Oral proceedings or any part thereof shall be transcribed at the request of any person. The person requesting the transcription shall bear the cost of the transcript.

(f) Final decisions or orders adverse to any person shall be in writing or stated in the record. A final decision shall include findings of fact and conclusions of law, that shall be separately stated. Persons shall be notified either personally or by mail of any decision or order.

112270. In lieu of administrative proceedings pursuant to Section 112265, the department may proceed under Section 119940.

112275. A person who has exhausted all administrative remedies available within the department and who is aggrieved by a final decision or order is entitled to judicial review pursuant to this chapter.

112280. All regulations applicable to this chapter, and currently in effect at the time this chapter takes effect, shall remain in effect until the department adopts regulations pursuant to Section 112165.

CHAPTER 6. COLD STORAGE

Article 1. Definitions and General Provisions

112350. Unless the context otherwise requires, the definitions set forth in this article govern the construction of this chapter.

112355. ''Cold storage'' means a place artificially refrigerated to a temperature above zero of 45 degrees Fahrenheit or below. It does not include any place where food that is privately owned and not held for resale is stored inside of lockers or compartments that are not more than 25 cubic feet in capacity, and which lockers or compartments are leased to private individuals for their exclusive use.

112360. ''Cold stored'' means the keeping of articles of food in cold storage for a period exceeding ten days.

112365. ''Article of food'' means any article of food used for human consumption. It includes fresh meat and fresh meat products (except in process of manufacture), fresh and dried fruit or vegetables, fish, shellfish, game, poultry, eggs, butter, and cheese, but not malt beverages.

112370. ''Storer'' means a person who offers articles of food for cold storage.

112375. This chapter does not apply to any cold storage or refrigerating plant or warehouse that is maintained or operated by a restaurant, hotel, exclusively wholesale or retail establishment, cannery, winery, brewery, or other food processing place that is used for the storage of food and which place is owned by or is for the exclusive use of the occupant owner or maintainer thereof, and said food is not stored for other persons.

112380. The term ''locker plant'' as used in this chapter shall mean any building or portion thereof that is artificially cooled to or below a temperature above zero of 45 degrees Fahrenheit and used exclusively for the storage of any article of food for the sole use of the storer, and that article or articles of food are not for resale.

If any article or articles of food stored in locker plants are for resale and/or to be used for manufacturing purposes, said locker plant is

subject to the license provisions of this chapter and all sections thereof.

Article 2. Licenses

112385. Any person desiring to operate a cold storage or refrigerating warehouse for storing articles of food shall make application in writing to the board for a license for that purpose, stating the location of his or her plant or plants. For the purpose of securing the proper enforcement of this chapter, those buildings or structures that are served by a central refrigerating plant shall be considered as one cold storage or refrigerating warehouse or plant, and subject to one license.

112390. On receipt of the application the board shall examine into the sanitary condition of the plant.

112395. If it finds the plant to be in a sanitary condition and otherwise properly equipped for the business of cold storage, the state department, upon the payment of the license fee specified in this chapter, shall issue a license authorizing the applicant to operate a cold storage or refrigerating warehouse for a period of not more than one year.

112400. No person, firm, or corporation shall engage in the operation of a cold storage or refrigerating warehouse for storing articles of food without having obtained from the state department a license for each such place of business. This license is nontransferable.

112405. Each application for a license under this chapter shall be accompanied by a fee of fifty dollars ($50). Each license issued under this chapter shall expire on December 31st of each calendar year. License fees of fifty dollars ($50) are due on the first of January of each year. The fee for licenses initially issued after January 1st of each year shall not be prorated.

112410. The director shall keep a full and correct account of all fees received under this chapter. At least once each month he or she shall deposit all the fees with the Treasurer for credit to the General Fund.

Article 3. Licensee Regulations

112415. If any place or portion of a place for which a license is issued is deemed by the department to be in an unsanitary condition, the department shall give written notification to the licensee of the condition, stating in particular the matters found to be unsanitary.

112420. Upon failure of the licensee to correct the situation within a designated time the department shall prohibit the licensee from using the place or specified portion until such time as it is restored to a sanitary condition.

112425. Every licensee shall keep an accurate record of receipts and withdrawals of articles of food, and the department shall have free access to these records at any time.

112430. When requested by the department or an agent thereof, any licensee shall within a reasonable time submit a report setting forth in itemized particulars the quantity of food products held by him or her in cold storage.

Article 4. General Regulations

112435. No storer shall place in cold storage any article of food whose keeping qualities have been impaired by disease, taint, or deterioration, or that has not been slaughtered, handled, and prepared for storage in accordance with food laws pertaining thereto and the regulations as may be prescribed by the state department for the sanitary preparation of food products for cold storage.

112440. Any article of food intended for use other than human consumption shall, before being cold stored, be marked by the owner in accordance with forms prescribed by the department in a way as to indicate plainly that the article is not to be sold for human food.

112445. Each separate lot of food, when deposited in cold storage, shall be marked plainly with the lot number covering that particular lot of articles of food indicated and recorded on the records maintained on the premises.

112450. The department shall inspect and supervise all cold storage or refrigerating warehouses, and make the inspection of the entry of articles of food therein as it deems necessary to secure the proper enforcement of this chapter.

112455. The department and its duly authorized employees shall be permitted access to cold storage or refrigerating warehouses at all reasonable times for purposes of inspection and enforcing this chapter.

112460. The department may also appoint at the salary as it may designate, any person it deems qualified to make any inspection required by this chapter.

112465. No person shall keep any article of food in cold storage for more than twelve calendar months, except with the consent of the board. Thirty days prior to the expiration of the 12-month period, the licensee shall send notice to the board advising them of this fact. Duplicate notice shall be sent to the owner of the food.

112470. The department shall, upon application, grant permission to extend the period of storage beyond 12 months for a particular consignment of goods, if the goods in question are found, upon examination, to be in proper condition for further storage at the end of 12 months. The length of time for which further storage is allowed shall be specified in the order granting the permission.

112475. For the purpose of determining whether or not food locker plants come under the provisions of this chapter, the operators or owners of all such frozen food locker plants shall make available, upon request to any agent of the department, the names and addresses of any and all persons, firms, or corporations renting, leasing, or occupying the lockers or compartments.

112480. Unless otherwise permitted by this article, it is unlawful to represent or advertise as fresh goods articles of food that have been placed in cold storage. This section shall not apply to vegetables, fruit or other foods sold as ''fresh frozen'' and so labeled, when stored at or below zero degrees Fahrenheit, or to eggs held in cold storage for 30 days or less.

112485. It is unlawful to return to cold storage any article of food that has once been released from such storage and placed on the market for sale to consumers. However, nothing in this section prevents the transfer of goods from one cold storage or refrigerating warehouse to another, if the transfer is not made for the purpose of evading any provision of this chapter.

112490. The department may make regulations to secure the proper enforcement of this chapter, including regulations with respect to the sanitary preparation of articles of food for cold storage, the use of marks, tags, or labels, and the display of signs.

Article 5. Violations

112495. Any person violating any of the provisions of this chapter, or any rule or regulation issued pursuant to this chapter, shall upon conviction be punished for the first offense by a fine not exceeding one thousand dollars ($1,000) or by imprisonment for not more than 90 days, or by both. The punishment for a second offense is the same, except that the maximum fine is two thousand dollars ($2,000).

CHAPTER 7. FROZEN FOODS

112500. When used in this chapter, unless the context otherwise requires:

(a) ''Food'' means any article used by man for food, drink, confectionery or condiment, or which enters into the composition thereof, whether simple, blended, mixed or compounded.

(b) ''Locker'' means the individual sections or compartments of a capacity of not to exceed 25 cubic feet in the locker room of a frozen food locker plant.

(c) ''Frozen food locker plant'' means an establishment in which space in the individual lockers is rented, leased, or loaned to individuals, firms, or corporations, for the storage of food for their own use and which is artificially cooled for the purpose of preserving

the food. The term includes service locker plant, storage locker plant, and branch locker plant.

(d) ‘‘Service locker plant’’ means a frozen food locker plant in which patrons’ foods are prepared or packaged by the operator of the plant before the foods are placed in the lockers for storage.

(e) ‘‘Storage locker plant’’ means a frozen food locker plant, the operator of which does not prepare or package the foods of patrons.

(f) ‘‘Branch locker plant’’ means a frozen food locker plant in any location or establishment artificially cooled in which space in individual lockers is rented, leased, or loaned to individuals, firms, or corporations for the storage of food for their own use after preparation for storage in a central or parent plant.

(g) ‘‘Frozen’’ means food frozen in a room or compartment in which the temperature is plus 5 degrees Fahrenheit or lower.

(h) ‘‘Temperature’’ means the average air temperature in refrigerated rooms.

(i) ‘‘Department’’ means the State Department of Health Services.

(j) ‘‘Operator’’ means any person, firm or corporation operating or maintaining a frozen food locker plant.

(k) ‘‘Processor’’ means an establishment in which, for compensation directly or indirectly, meat or meat products are cut, wrapped, or frozen to be delivered for frozen storage by the ultimate consumer.

112505. No person hereafter shall engage within this State in the business of operating any frozen food locker plant without having applied for and obtained from the director of the department a license for each such place of business. Applications for the license shall be made in writing to the director of the department, on the forms and with the pertinent information as he or she may deem necessary. These licenses shall be granted promptly as a matter of right unless conditions exist that are grounds for denial of a license, as hereinafter set forth.

112510. The annual license fee for a frozen food locker plant shall be twenty-five dollars ($25). Such fees shall be paid into the General Fund.

112515. Upon receipt of the application for a license accompanied by the required fee, the department shall promptly inspect the plant to be licensed and shall issue a license; provided, the plant, its equipment, facilities and its surrounding premises, and its operations comply with this chapter and regulations pertaining to this chapter. The department shall inspect all frozen food locker plants licensed under this chapter, whenever the department considers the inspection necessary. The department and its representatives shall have access to the plants at all reasonable times for the purpose of making inspections.

112520. The license issued hereunder shall be in a form as the department shall prescribe and shall be under the seal of the department and shall set forth the name of the licensee, the location for which the license is issued, the period of the license and other information as the department may determine. Licenses shall be for a term of one calendar year and shall be renewed annually. The license is nontransferable. The original license or a certified copy thereof shall be conspicuously displayed by the licensee in the locker plant for which the license is issued.

112525. The floors, walls and ceilings of frozen food locker plants shall be of a construction and finish that they can be conveniently maintained in a clean and sanitary condition. The lockers in any plant shall be so constructed as to protect the contents from contamination, deterioration or injury. Lockers with perforated bottoms shall be provided with a suitable unperforated liner or tray.

112530. Any frozen food locker plant using a toxic gas refrigerant shall have at least one gas mask of a type approved by the department and shall keep the same where it will be readily accessible.

112535. All rooms of a frozen food locker plant shall at all times be maintained in a clean and sanitary condition. All equipment and utensils shall be cleaned when put into use and shall be thoroughly cleaned after each day's use and shall be so stored or protected as not to become contaminated. Lockers shall be thoroughly cleaned before they are leased or put into the possession of any patron. The premises and surroundings of the plants shall be maintained in a clean and sanitary condition. The food stored shall be protected from filth, flies, dust, dirt, insects, vermin and any other contamination and from any unclean or filthy practice in the handling thereof or caring therefor. No food shall be stored in a condition or in a manner as to cause injury to or deterioration of articles of food in adjacent lockers.

112540. Frozen food locker plants shall have an ample water supply readily available and the water that comes in contact with any food product or the equipment shall be uncontaminated. Such plants shall be provided with adequate toilet facilities so located as to be readily accessible to employees and equipped with adequate washing fixtures or have such fixtures or facilities convenient thereto and shall be supplied with running water, single soap and single towel service. The doors of all toilet rooms shall be full length and self-closing and no toilet room shall open directly into any room in which foods are prepared, processed, chilled, frozen or stored. Toilet facilities and rooms shall be kept in a clean and sanitary condition.

112545. The director shall publish and declare reasonable regulations as are consistent with the enforcement of the provisions of this chapter providing for adequate cleanliness and sanitation to protect public health.

112550. The refrigeration system for a frozen food locker plant shall be equipped with reliable controls for the maintenance of

uniform temperatures as required in the various refrigerated rooms and shall be of adequate capacity to provide under extreme conditions of outside temperature and activity of the plant, the following temperatures in the several rooms, respectively:

(a) In pre-cool, chill, or aging rooms, temperatures shall be commensurate with good commercial practice.

(b) In locker rooms, temperature shall not exceed plus five (5) degrees Fahrenheit, with customary commercial variations.

The foregoing temperatures shall not be construed as prohibiting variations therefrom as may occur during short periods of time incidental to operating conditions beyond the control of the operator.

112555. Any processor, prior to delivery to the consumer, shall quick-freeze all meat or meat products in a blast-type freezing room at zero degrees Fahrenheit with one side of the package exposed to circulated air, or in a still-air-type freezing room at a minimum of minus 10 degrees Fahrenheit with one surface side of each package in direct contact with coils of a freezing plate. This section shall not apply to the sale of retail cuts of meat sold over the counter.

112560. Thermometers in good order shall be provided in all rooms held under low temperature at locations therein that will reflect true storage temperatures of foods in the rooms.

112565. No frozen food locker plant shall be licensed under this chapter unless the following facilities are provided:

Sufficient chill or aging room space, freezing facilities, locker room, and facilities for cutting, preparing, wrapping and packaging meats and meat products, except that storage locker plants and branch locker plants need install only locker room facilities as specified in Section 112550.

112570. A branch plant may be operated only in conjunction with a parent locker plant that shall have processing facilities sufficiently large for the locker plant and all branch plants.

112575. Storage of fish and game by patrons shall comply with federal and state fish and game laws. All pertinent abstracts of state and federal fish and game regulations shall be furnished by the department and shall be conspicuously displayed in the locker plant.

112580. Every operator of a frozen food locker plant, shall keep a record showing names and addresses of renters of lockers and the records shall be available for examination by the Director of Food and Agriculture or his or her representatives, or the department or its representatives, during business hours of the plants.

112585. Only food for human consumption, or clean, sanitary byproducts therefrom to be used for food, shall be stored in the frozen food locker plant. Each package of food wrapped and frozen for storage shall be labeled designating the product and identifying the processor.

112590. The person owning or operating a frozen food locker plant shall have a lien upon all property therein for all charges due

from the owner of the property. The lien may be secured and enforced in the same manner as warehousemen's liens are secured and enforced.

112595. Operators of frozen food locker plants operating solely as such shall not be construed to be warehousemen or public utilities, nor shall receipts or other instruments issued by those persons in the ordinary conduct of their locker business be construed to be warehouse receipts or subject to the laws applicable thereto.

112600. Cold storage or refrigerating warehouses subject to Chapter 6 (commencing with Section 112350) shall be exempt from the licensing provisions of this chapter.

112605. The licensing provisions of this chapter shall not apply to retail premises in which individual frozen food lockers are not rented, leased, loaned, or otherwise furnished to individuals, firms or corporations, or processors.

112610. The department, after notice and hearing, may revoke the license issued for any frozen food locker plant for failure to comply with the provisions of this chapter. The proceedings under this section shall be conducted in accordance with Chapter 5 of Part 1 of Division 3 of Title 2 of the Government Code, and the department shall have all the powers granted therein.

112615. In the event the director suspends or revokes any license, the licensee may obtain judicial review of the order by filing a petition for a writ of mandate in accordance with the Code of Civil Procedure in the superior court of the county in which the licensed premises are located within thirty (30) days from the date notice in writing of the director's order revoking or suspending the license has been served upon said licensee.

112620. The liability of the owner or operator of lockers for loss of goods in lockers or in the owner's or operator's care shall be limited to negligence of the owner or operator or his or her employee.

112625. Upon the signed petition of at least 25 owners or operators of frozen food locker plants licensed under this chapter, the director shall within 10 days after receipt of said petition, cause to be held at places and at times as he or she may provide, a public hearing for the purpose of gathering facts and data for the revision, correction or amendment of any rule or regulation issued pertaining to this chapter.

112630. This chapter shall be known as the ''Frozen Food Locker Plant Act of 1951.''

112635. Any person who violates any of the provisions of this chapter is guilty of a misdemeanor, and upon conviction shall be punished by a fine of not less than fifty dollars ($50) nor more than one thousand dollars ($1,000), or by imprisonment in the county jail for a term not exceeding six months, or by both the fine and imprisonment.

CHAPTER 8. CANNERIES

Article 1. Definitions and Scope

112650. ''State board,'' or ''State Board of Public Health,'' as used in this chapter, means the State Department of Health Services.

112655. ''Meat or meat products'' as used in this chapter, means any meat or meat product or poultry or poultry product that is not subject to the inspection of the Bureau of Meat Inspection or the Bureau of Poultry Inspection of the Department of Food and Agriculture, or of the Meat Inspection Division or Poultry Division of the United States Department of Agriculture, or of an approved municipal inspection department or establishment.

112660. ''Food product,'' as used in this chapter, includes any fish or fish product, meat or meat product, or any other food product.

112665. The operation of noncommercial canning centers by community canning centers, schools, churches, other organizations, or housewives who pack hermetically sealed canned food products for their own consumption and do not sell the canned food, is exempt from the licensing provisions of this chapter.

112670. In lieu of a license, a permit to operate a canning center shall be issued without cost by the department upon the submission of evidence as the department requires to show that the persons operating the center are qualified and that the center is properly equipped and meets all other provisions of this chapter.

112675. Food products that do not require the use of a pressure cooker but necessitate acidulation and pH determinations come within this chapter.

112680. No act that is unlawful under Part 5 (commencing with Section 109875), relating to the adulterating, mislabeling, misbranding, false advertising, and sale of foods, is lawful by reason of this chapter.

Article 2. Cannery Inspection Board

112685. There is in the state government a Cannery Inspection Board consisting of the following six members:

(a) The director of the state department, who shall act as chairman.

(b) One man appointed by the director who shall have had at the time of his or her appointment at least 10 years experience in or with canning technology and has a degree in chemistry, bacteriology or medicine.

(c) Four men appointed by the state department who are experienced, have substantial investments and are actively engaged in the canning industry at the time of their appointment.

One of the four appointive members shall be engaged in the canning of animal food.

112690. Each appointed member holds office for a term of one year or until his or her successor is appointed.

112695. Members of the board serve without compensation. The board shall meet at least quarterly.

112700. The Cannery Inspection Board shall, subject to the approval of the department, estimate the cost of the separate inspection and laboratory control required to be made for each food product subject to this chapter.

112705. The estimate shall be made prior to the opening of the canning season for each product having a canning season of less than three consecutive months, and prior to each quarter for each product having a canning season of more than three consecutive months.

112710. For the purpose of prorating the estimated cost of inspection and laboratory control, the Cannery Inspection Board, subject to the approval of the department, shall estimate the number of cases to be packed, the number of tons to be packed, or the number of man-hours necessary to be employed, whichever in its discretion is most equitable as a basis of proration.

112715. Based on the estimates required by the last three sections, the Cannery Inspection Board, subject to the approval of the department, shall determine the probable cost of inspection and laboratory control per thousand cases, per ton, or per man-hour, whichever in its discretion is most equitable.

112720. The cost of laboratory control and research on products subject to this chapter shall be prorated by the Cannery Inspection Board in the same manner as the costs of inspection are prorated by it.

112725. If the delegation of discretion to determine whether the case, ton, or man-hour basis is most equitable as a basis of prorating the cost of inspection and laboratory control is held invalid as an unlawful delegation of legislative power, the invalidity shall not affect the validity of the remaining portions of this chapter. The Legislature hereby declares that if it had known that the delegation of the discretion would be declared invalid as an unlawful delegation of legislative power, it would have designated the man-hour basis of proration as the most equitable basis of proration. In the event of an invalidity, the cost of inspection and laboratory control shall be prorated on the man-hour basis.

Article 3. Proration of Costs

112730. At the end of each quarter, or at the close of any canning season that does not exceed three consecutive months, the state department shall determine the actual cost of inspection and laboratory control of each separate food product for the preceding

quarter or preceding canning season, and shall prorate the cost to each person licensed under this chapter on the basis of cases packed, tons packed, or number of man-hours necessary to be employed, whichever has been determined by the Cannery Inspection Board, with the approval of the state department, to be most equitable.

112735. In making any separate inspection and laboratory control for any food product, the state department shall not spend more than the amount estimated by the Cannery Inspection Board as the cost of the inspection without the approval of the Cannery Inspection Board.

112740. In making estimates, determinations, assessments, and prorations under this article and Article 2 (commencing with Section 112685), the Cannery Inspection Board and the state department may include as a part of the cost of inspection a reasonable charge for standby services of inspectors.

112745. In lieu of all other procedures in this article and Article 2 (commencing with Section 112685), each person licensed under this chapter may be assessed at an estimated annual hourly rate set by the Cannery Inspection Board with the approval of the department and of the State Director of Finance. The annual rate shall be set for each industry group based on the estimated cost.

Article 4. Licenses and Licensees

112750. It is unlawful for any person to engage in the noncommercial canning of salmon, or in the commercial canning of any fish or fish product, meat or meat product, or any other food product for the use of man or animal, the sterilization of which in the opinion of the department requires the use of a pressure cooker or a retort, without first obtaining a license from the department.

112755. The department shall issue an annual license, that is nontransferable, to any person on the receipt of fifty dollars ($50) per plant, and evidence as the board may require to show that (1) the applicant is properly equipped with a retort or pressure cooker that has recording thermometers, indicating thermometers, and pressure gauges to carry out regulations as the department may adopt for the sterilization of food products for the canning of which a license is sought and (2) the applicant is in compliance with the sanitary regulations of the department. The applicant shall be deemed to be in compliance with the sanitary regulations unless the applicant has been given written notice by the department not less than 60 days prior to the expiration of the existing license that the cannery does not comply with the sanitary regulations, and the applicant has subsequently failed to bring the cannery into compliance therewith.

112760. Any person who has been denied the annual license provided in this chapter may obtain a hearing by the department by mailing a written request therefor to the department. The

department shall give the applicant at least 10 days notice of the hearing and shall hold such hearing within 30 days of the receipt of the request.

112765. In addition to the annual license fee, the department shall demand from each licensee a cash deposit for the payment of his or her pro rata share of the estimated cost of inspection and laboratory control as the department may deem necessary.

112770. If the deposit made by any licensee is insufficient to meet the actual cost of an inspection and laboratory control of any product determined by the department, the latter shall demand from the licensee, and the licensee shall immediately pay to the department, in addition to the license fee payable by the licensee, the difference between the deposit and his or her pro rata share of the actual cost of the inspection and laboratory control.

112775. If at the end of the calendar year, or at the end of any canning season of less than three consecutive months the deposit made by any licensee under this chapter is greater than the actual cost prorated to the licensee, the difference shall be refunded if requested by the licensee in accordance with law. If the difference is not so refunded, it shall be credited toward the required deposit for the next calendar year or canning season.

112780. No food product subject to the inspection required by this chapter shall be shipped by the licensee who packed it until the licensee has either paid his or her pro rata share of the estimated cost of inspection or has furnished the department a cash deposit for the payment of his or her pro rata share of the cost.

112785. The department may after notice and opportunity for hearing suspend or revoke a license issued under this chapter for any of the following causes:

(a) Nonpayment of the pro rata share of the cost of inspection and laboratory control, or failure to comply with a demand for a cash deposit or other security by the holder of the license.

(b) Noncompliance with any of the regulations of the department.

(c) Operation of an insanitary cannery after due notice by registered mail has been received.

(d) Inadequate ratproofing of a cannery throughout.

(e) Willful packing of any canned food commodity that has been rejected by an agent of the department.

(f) Packing of any canned food commodity subject to this chapter without notifying the department before packing.

112790. After conviction for a violation of Part 5 (commencing with Section 109875), the license of the person convicted may be suspended for a period of from 1 to 30 days.

112795. Proceedings for the suspension and revocation of licenses shall be conducted in accordance with Chapter 5 (commencing with Section 11500), Part 1, Division 3, Title 2 of the Government Code; and the department has all the powers granted therein.

Article 5. General Provisions

112800. No person shall permit another to operate a steam-controlled retort used in the commercial canning industry for the sterilization of food products, unless the latter first obtains a permit from the department. The department may pass upon and determine the qualifications of the applicant with a view to the preservation of the public health.

Any permit granted is revocable by the department whenever in its judgment the public health requires such action.

112805. It is unlawful for any person to place upon the label of any bottle, can, jar, carton, case, box, barrel, or any other receptacle, vessel, or container of whatever material or nature that may be used by a packer, manufacturer, producer, jobber, or dealer for enclosing any canned food product, fish or fish product, or meat or meat product, any statement relative to the product having been inspected, unless the statement has been approved in writing by the department.

Approval of a statement is revocable at any time by the department upon written notice.

112810. Any food product packed in violation of this chapter may be quarantined by the department until a laboratory examination has established that the product meets the requirements of this chapter.

112815. Any person who packs any food product that has been quarantined by the department shall pay the department all reasonable costs of any laboratory examination, determined by the Cannery Inspection Board, subject to the approval of the department, to be necessary to ascertain that the seized product was packed in violation of this chapter.

112820. The Division of Cannery Inspections has supervision over the inspection and examination of raw fish and fish products preparatory to canning.

The cost of the inspection and examination shall be determined and paid in the manner provided in Article 2 (commencing with Section 112685).

Article 6. Rules and Enforcement

112825. The department may make regulations as it deems necessary for the proper enforcement of this chapter, and the regulations shall have the force and effect of law.

112830. No rule or regulation or amendment thereto shall be adopted unless submitted by the department to the Cannery Inspection Board at least five days prior to the date of adoption.

112835. The state board shall enforce its regulations and the provisions of Part 5 (commencing with Section 109875), relating to the canning of food products, through the Chief of the Bureau of

Cannery Inspections and other employees as it deems necessary. The state board shall, so far as practicable, acquaint each licensee subject to this chapter with its regulations, and upon request therefor by any licensee shall furnish a copy of the regulations.

112840. The district attorney of the county in which any violation of this chapter occurs shall prosecute the person accused of the violation.

Article 7. Funds

112845. All money received by the department under this chapter shall be paid at least once each month to the Treasurer, and on order of the Controller, shall be deposited in the General Fund in the State Treasury.

112850. Notwithstanding Section 112845, the department and the Department of Finance may authorize the deposit in the Special Deposit Fund of cash deposits received by the department under the provisions of Section 112765; and in that event, upon the determination by the department that all or a part of any deposit is due the state for payment on account of the depositor's pro rata share of costs incurred by the state under this chapter, the amount so determined shall, on order of the State Controller, be transferred from the Special Deposit Fund to the General Fund.

All money deposited in the Special Deposit Fund under the provisions of this section shall be subject to the provisions of Article 2 (commencing with Section 16370) of Chapter 2 of Part 2 of Division 4 of Title 2 of the Government Code.

Article 8. Violations

112855. Any person who does not obtain a license required of him or her by this chapter, or who engages in canning operations after his or her license has been suspended or revoked, or who otherwise violates this chapter, is guilty of a misdemeanor, and upon conviction is punishable by a fine of not less than fifty dollars ($50) nor more than one thousand dollars ($1,000), or by imprisonment in the county jail for not exceeding six months.

CHAPTER 9. OLIVE OIL

112875. ''Olive oil,'' as used in this chapter, means the edible oil obtained from the fruit of the olive tree (olea europea L.).

112880. ''Imitation olive oil,'' as used in this chapter, means the mixture of any edible oil artificially colored or flavored to resemble olive oil.

112885. Unless a license so to do is first obtained from the department, it is unlawful for any person in this state to engage in the

packaging or manufacture of olive oil, or in the wholesale distribution of olive oil where his or her name and address will appear upon olive oil containers of one pint capacity or larger, as the distributor and his or her name will appear upon the containers as the only California addressee.

112890. On receipt of an application showing that the applicant is properly equipped to package or manufacture olive oil, or is a wholesale distributor of olive oil whose name and address will appear upon olive oil containers as distributor and whose name also will appear upon those containers as the only California addressee, the department shall, free of charge, issue the applicant a license, not transferable, but good until revoked, to package, manufacture, or distribute olive oil as the case may be.

The department may revoke or suspend the license after a hearing. The proceedings for the revocation or suspension of a license shall be in accordance with Chapter 5 (commencing with Section 11500) of Part 1 of Division 3 of Title 2 of the Government Code, and the department shall have all the powers granted in that chapter.

112895. It is unlawful to manufacture, sell, offer for sale, give away, or to possess imitation olive oil in the state.

This section does not prohibit the blending of olive oil with other edible oils, if the blend is not labeled as olive oil or imitation olive oil, is clearly labeled as a blended vegetable oil, and if the contents and proportions of the blend are prominently displayed on the label.

112900. The use of any artificial color or flavor in the manufacture or blending of olive oil is prohibited.

112905. It is unlawful to prepare, express, mix, or blend olive pomace or meats with any bland fixed oil other than olive oil.

112910. All records of those licensed under the provisions of this chapter that concern the amounts of olive oil produced, purchased, or produced and purchased, or the sale, distribution, or sale and distribution of any olive oil, shall be open to inspection upon demand of any agent of the department.

112915. It is unlawful to reuse any olive oil container, can, or drum for repacking any fixed oil intended to be used for food purposes, except on the premises of the processor.

112920. All olive oil for technical purposes shall be denatured with an odoriferous substance so as to render it unfit for food purposes.

112925. It is unlawful to sell or offer for sale olive oil containing more than 5 percent free fatty acid without first denaturing the oil and making it unfit for human consumption.

112930. The department shall enforce this chapter.

112935. Any person violating any of the provisions of this chapter is guilty of a misdemeanor, and upon conviction shall be punished by a fine of not less than five hundred dollars ($500) nor more than one thousand dollars ($1,000), or by imprisonment in the county jail for not exceeding one year, or by both fine and imprisonment.

CHAPTER 10. PROCESSED PET FOODS

Article 1. Definitions

113025. ‘‘Processed pet food’’ means a food for pets that has been prepared by heating, drying, semidrying, canning, or by a method of treatment prescribed by regulation of the department. The term includes, special diet, health foods, supplements, treats and candy for pets, but does not include fresh or frozen pet foods subject to the control of the Department of Food and Agriculture of this state.

113030. ‘‘Pet’’ means any household animal including but not limited to cats or dogs and other carnivores whether or not for exhibition.

113035. ‘‘Pet food ingredients’’ means each of the constituent materials making up a processed pet food. Pet food ingredients of animal or poultry origin shall be only from animals or poultry slaughtered or processed in an approved or licensed establishment. Such animal or poultry ingredients condemned for human food but passed for animal food in an establishment inspected by the United States Department of Agriculture or the Department of Food and Agriculture of this state may be used for pet food, provided it is properly denatured or handled in accordance with this chapter and regulations of the department and the regulations of the Department of Food and Agriculture of this state so as to render the ingredients safe for pet food. Animals or poultry classified as ‘‘deads’’ are prohibited.

113040. Incubator reject eggs may not be used in food for human consumption but may be used for animal food or animal-food products.

113045. The term ‘‘advertisement’’ means all representations disseminated in any manner or by any means for the purpose of inducing, or that are likely to induce, directly or indirectly, the purchase of processed pet food. An advertisement shall be deemed false if it is false or misleading in any particular.

113050. If an article is alleged to be misbranded because the labeling is misleading, or if an advertisement is alleged to be false because it is misleading, then in determining whether the labeling or advertisement is misleading, there shall be taken into account, among other things, not only misrepresentations made or suggested by statement, word, design, device, sound, or in any combination thereof, but also the extent to which the labeling or advertisement fails to reveal facts material in the light of representations or material with respect to consequences that may result from the use of the article to which the labeling or advertisement relates under the conditions of use prescribed in the labeling or advertisement thereof or under conditions of use as are customary or usual.

113055. This chapter shall be known, and may be cited, as the Pure Pet Food Act of 1969.

Article 2. Licenses and Registration Certificates

113060. Every person who manufactures a processed pet food in California shall first obtain a license from, and every person who manufactures a processed pet food for import into California from another state shall first obtain a registration certificate from, the department. Each license or registration certificate is good for one calendar year from the date of issue and is nontransferable.

An application for a license or registration certificate shall be made on an application form provided by the department.

113065. A separate license shall be required for each processing plant located in California.

The annual license fee shall be one hundred dollars ($100). The annual registration fee shall be one hundred dollars ($100). The penalty for failure to apply for renewal of a license or registration certificate within 30 days after the expiration is thirty dollars ($30) and shall be added to the renewal fee and be paid by the applicant before the renewal license or registration certificate may be issued. All fees collected shall be expended as appropriated by the Legislature in the carrying out of the provisions of this chapter and the regulations adopted thereto.

The annual license fee for a pet food canner also licensed under Chapter 8 (commencing with Section 112650) is one hundred dollars ($100). No additional fee is payable by such a person for a license issued to him or her under that chapter.

113070. An annual license or registration certificate shall be issued only when the following provisions have been met:

(a) Inspection of the manufacturing facilities demonstrates that they are properly equipped and are operated in a sanitary manner.

(b) In the case of an out-of-state manufacturer, the application for a registration certificate is accompanied by a certificate issued by a federal, state, or local health agency certifying that the processed pet foods manufactured conform to the requirements of this chapter or the regulations adopted hereunder.

(c) The applicant submits to the department the label that would be attached to the container of each type of processed pet food and a complete list of the pet food ingredients thereof in their order of predominance by weight.

Article 3. Prohibited Acts and Penalties

113075. The following acts and the causing thereof within the State of California are hereby prohibited:

(a) The manufacture, sale, or delivery, holding or offering for sale of any pet food ingredient or processed pet food that is adulterated or misbranded.

(b) The adulteration or misbranding of any pet food ingredient or processed pet food.

(c) The dissemination of any false advertising.

(d) The refusal to permit entry or inspection, or to permit the taking of a sample.

(e) The removal, sale, or disposal of a detained or embargoed processed pet food without permission of an authorized agent or the court.

(f) The giving of a guaranty or undertaking that is false, except by a person who relied on a guaranty or undertaking to the same effect signed by, and containing the name and address of, the person residing in the State of California from whom he or she received in good faith the pet food ingredient or the processed pet food.

(g) The receipt in commerce of any pet food ingredient or processed pet food that is adulterated, misbranded or falsely advertised and the delivery or proffered delivery thereof for pay or otherwise.

(h) Failure to obtain a license as required by this chapter.

(i) Use of any pet food ingredient that fails to conform to the standard of identity for the pet food ingredient as adopted pursuant to Section 113115.

113080. (a) Any person who violates any of the provisions of this chapter or the regulations promulgated under this chapter is subject to imprisonment for not more than six months or a fine of not more than one thousand dollars ($1,000), or both that imprisonment and fine; but if the violation is committed after a conviction of that person under this section has become final, or the violation is committed with intent to defraud or mislead, the person shall be subject to imprisonment for not more than one year, or a fine of not more than one thousand dollars ($1,000), or both imprisonment and fine.

(b) No person shall be subject to the penalties of subdivision (a) for having violated provisions of this chapter if he or she establishes a guaranty or undertaking signed by, and containing the name and address of, the person residing in the State of California from whom he or she received in good faith the article, to the effect that the article conforms to all provisions of this chapter, designating this chapter.

If the guaranty is to the effect that the article is not in violation within the meaning of the federal act, as provided in Section 303 (c) of the federal act, it shall be sufficient for all the purposes of this chapter and have the same force and effect as though it referred to this chapter, unless at any time the standard for the article concerned under this chapter is higher than the standard for a like article under the federal act.

(c) No publisher, radio or television broadcast licensee, or agency or medium for the dissemination of an advertisement, except the manufacturer, packer, distributor, or seller of the article to which a false advertisement relates, shall be liable under this section for the dissemination of false advertisement, unless he or she has refused, on the request of the department, to furnish the department the name and post office address of the manufacturer, packer, distributor, seller, or advertising agency, residing in the State of California who caused him or her to disseminate the advertisement.

113085. In addition to other remedies herein provided, the department may bring an action in the superior court, and the court shall have jurisdiction upon hearing and for cause shown, to grant a temporary or permanent injunction restraining any person from violating any provision of this chapter. Any proceeding under this section shall conform to the requirements of Chapter 3 (commencing with Section 525) of Title 7 of Part 2 of the Code of Civil Procedure, except that the department shall not be required to allege facts necessary to show or tending to show lack of adequate remedy at law or to show or tending to show irreparable damage or loss.

Article 4. Adulteration

113090. A pet food ingredient or a processed pet food shall be deemed to be adulterated:

(a) If it bears or contains any poisonous or deleterious substance that may render it injurious to health; but in case the substance is not an added substance, the pet food shall not be considered adulterated under this subdivision if the quantity of the substance in pet food does not ordinarily render it injurious to health.

(b) If it bears or contains any added poisonous or deleterious substance, any food additive, any pesticide chemical, or any color additive that is unsafe within the meaning of the Federal Food, Drug and Cosmetic Act, or Part 5 (commencing with Section 109875), or Division 7 (commencing with Section 12501) of the Food and Agricultural Code.

(c) If it contains a pet food ingredient for which a standard of identity has been established and the pet food ingredient fails to meet that standard.

(d) If it has been produced, prepared, packed or held under insanitary conditions whereby it may have become contaminated with filth, or whereby it may have been rendered diseased, unwholesome or injurious to health.

(e) If its container is composed, in whole or in part, of any poisonous or deleterious substance that may render the contents injurious to health.

(f) If any valuable constituent has been in whole or in part omitted or abstracted therefrom.

(g) If any substance has been substituted wholly or in part therefor.

(h) If damage or inferiority has been concealed in any manner.

(i) If any substance has been added thereto or mixed or packed therewith so as to increase its bulk or weight or reduce its quality or strength or make it appear better or of greater value than it is.

Article 5. Misbranding

113095. A pet food ingredient or processed pet food shall be deemed to be misbranded:

(a) If its labeling is false or misleading in any particular.

(b) If its container is so made, formed or filled as to be misleading.

(c) If in package form, unless it bears a label containing (1) the name and place of business of the manufacturer, packer, or distributor; and (2) an accurate statement of the quantity of the contents in terms of weight, measure or numerical count.

Under clause (2) of subdivision (c), reasonable variation shall be permitted, and exemptions as to small packages shall be established, by regulations prescribed by the department.

(d) If any word, statement or other information required by or under authority of this chapter to appear on the label or labeling is not prominently placed thereon with conspicuousness (as compared with other words, statements, designs or emblems, in the labeling) and in terms as to render it likely to be read and understood by the ordinary individual under customary conditions of purchase and use.

113100. A pet food shall be deemed to be misbranded if it is not subject to Section 113105, unless its label bears (a) the common or usual name of the food, if any there be, and (b) in case it is fabricated from two or more ingredients, the common or usual name of each ingredient listed in descending order of predominance in the product. Spices, flavorings, and colorings, other than those sold as such, may be designated as spices, flavorings, and colorings, without naming each.

113105. A processed pet food shall be deemed to be misbranded if it purports to be or is represented as a food for which a definition and standard of identity has been prescribed by regulations as provided by Section 113115 unless (a) it conforms to the definition and standard, and (b) its label bears the name of the processed pet food specified in the definition and standard, and, insofar as may be required by regulations, the common names of optional pet food ingredients present in processed pet food. Spices, flavorings, and colorings, other than those sold as such, may be designated as spices, flavorings, and colorings, without naming each.

113110. A processed pet food shall be deemed to be misbranded:

(a) If it purports to be or is represented for special dietary uses, unless its label bears information concerning its vitamin, mineral, and

other dietary properties as the department determines to be, and by regulations prescribes as, necessary in order fully to inform purchasers as to its value for those uses.

(b) If it bears or contains any artificial flavoring, artificial coloring, or chemical preservative, unless it bears labeling stating that fact. To the extent that compliance with the requirements of this paragraph is impracticable, exemptions shall be established by regulations promulgated by the department.

Article 6. Administration

113115. When in the judgment of the department the action will promote honesty and fair dealing in the interest of the ultimate purchaser, the department may promulgate regulations establishing for any processed pet food or pet food ingredient any of the following:

(a) A reasonable definition and standard of identity.

(b) A reasonable standard of quality or fill of container.

(c) The method of treatment of products or ingredients to render them safe for pet feeding.

(d) Labeling information necessary to fully inform the purchaser thereof.

113120. This chapter shall be administered by the department in accordance with Part 5 (commencing with Section 109875).

CHAPTER 11. MISCELLANEOUS FOOD LAWS

Article 1. Dairy Product Safety

113150. (a) When there occurs, in the household of any dairy worker, milkman, milk dealer, milk distributor, creamery worker, or pasteurizing plant operator, a case or a suspected case of a milk transmitted disease listed pursuant to Section 120130, the sale or distribution of milk from those premises is prohibited unless written authorization for its sale or distribution is given by the health officer.

(b) A case or suspected case of any disease that occurs in the household of any of the above-mentioned persons, and that is known to be transmitted by milk, shall be reported immediately to the health officer.

113155. The department shall cooperate with the Department of Food and Agriculture in the inspection of any milk products plants associated with diseases reported pursuant to Section 120130. The Department of Food and Agriculture shall consult with the department prior to condemning milk or milk products that are determined to be contaminated based on a finding of illnesses listed pursuant to Section 120130.

Article 2. Beverage Containers

113200. As used in this chapter with the exception of Article 4 (commencing with Section 113300), unless the context requires otherwise:

(a) ''Beverage'' means beer or other malt beverages and mineral waters, soda water and similar carbonated soft drinks in liquid form and intended for human consumption.

(b) ''Beverage container'' means the individual, separate, sealed glass, metal or plastic bottle, can, jar or carton containing a beverage.

(c) ''Flip-top container'' means a metal beverage container so designed and constructed that a part of the container is severable in opening the containers.

(d) ''In this state'' means within the exterior limits of the State of California and includes all territory within these limits owned by or ceded to the United States of America.

(e) ''Non-flip-top container'' means a metal beverage container so designed and constructed that no part of the container is severable in opening the container.

113205. On and after January 1, 1979, no person shall sell or offer for sale in this state any metal beverage container so designed and constructed that a part of the container is severable in opening the container. Nothing in this section shall prohibit the sale in California of the containers for shipment out of state.

Any person who violates the provisions of this section is guilty of an infraction.

113210. The Secretary of the Resources Agency may extend permission to a manufacturer to sell flip-top containers for one or more periods of time for a total period not to exceed one year after January 1, 1979. The subsequent resale of these flip-top containers by other persons at wholesale or retail, empty or filled with beverages at any time subsequent to January 1, 1979, shall not be a violation of Section 113205.

In order to be eligible for an extension of permission to sell flip-top containers after January 1, 1979, a manufacturer shall file a request for extension by July 1, 1978, with the Secretary of the Resources Agency and shall accompany the request with a report that will indicate:

(a) The percentage of the total production of metal beverage containers made by the manufacturer in the calendar years of 1976 and 1977, and to May 31, 1978, that were non-flip-top containers manufactured for use within this state.

(b) The percentage of production of metal beverage containers the manufacturer shifted from flip-top containers to non-flip-top containers in the calendar years 1976 and 1977, and to May 31, 1978, for use within this state.

(c) The projected date when all production of metal beverage containers manufactured for use in this state will be non-flip-top containers.

(d) A general statement of the procedures the manufacturer is employing to effect the changeover to production of only non-flip-top containers for use within this state, and specific economic information regarding the manufacturer's planned investment in conversion to new equipment and techniques to effect the changeover to production of only non-flip-top containers for use within this state.

The secretary shall make public disclosure of all reports received.

113215. The Secretary of the Resources Agency shall conduct hearings upon the requests for extension prior to making decisions, so that members of the public and manufacturers may be heard, and shall receive evidence and make findings of fact. The secretary shall cause public notification of the time and place of the hearings 30 days prior to each hearing.

In order to grant an extension of permission to sell flip-top containers after January 1, 1979, the Secretary of the Resources Agency must make a determination that the manufacturer requesting the extension has made good faith efforts to comply with the act, but is unable to meet the time requirement for conversion, and that the manufacturer will suffer severe economic hardship as a direct result of the requirements of conversion.

If an extension is granted, the Secretary of the Resources Agency may require reports as often as he or she deems necessary, indicating the progress of the manufacturer toward compliance.

113220. There shall be no administrative appeal of the secretary's decision regarding a request for an extension. Judicial review of the decision of the Secretary of the Resources Agency on any request for an extension may be made by the manufacturer. In addition, any member of the public, without damages, at his or her own expense, has standing to bring an action for the purpose of inquiring into the validity of a decision of the secretary on the grounds of the abuse of discretion where the findings are unsupported by the evidence. This section shall not be construed to prohibit the use of any other remedy available under any other provision of law.

113225. (a) On and after July 1, 1981, or after a date one year after the determination by the State Solid Waste Management Board that degradable plastic connectors are commercially available, whichever date occurs later, no beverage shall be sold or offered for sale at retail in this state in beverage containers connected to each other with plastic rings or similar plastic devices that are not classified by the State Solid Waste Management Board as degradable, except as provided in subdivision (c).

(b) For the purposes of this section, ''degradable'' means all of the following:

(1) Degradation by biologic processes, photodegradation, chemodegradation, or degradation by other natural degrading processes.

(2) Degradation at a rate that is equal to, or greater than, the degradation by a process specified in paragraph (1) of other commercially available plastic devices.

(3) Degradation, that, as determined by the board, will not produce or result in a residue or byproduct that, during or after the process of degrading, would be a hazardous or extremely hazardous waste identified pursuant to Chapter 6.5 (commencing with Section 25100) of Division 20.

(c) This section shall not apply to plastic devices that the Solid Waste Management Board finds conform to either one of the following:

(1) Plastic devices that do not contain an enclosed hole or circle of more than $1^1/_2$ inches in diameter or that do not contain a hole.

(2) Plastic devices in which the ring is broken at the time the beverage container is removed from the ring.

(d) Any person who sells at wholesale or distributes to a retailer for sale at retail in this state a beverage in containers that are connected to each other in violation of the provisions of this section is guilty of an infraction and shall be punished by a fine not exceeding one thousand dollars ($1,000).

Article 3. Frozen Foods

113250. ''Low acid frozen food'' means a food that, by virtue of its low acid content, does not preclude the growth of Clostridium botulinum.

113255. Low acid frozen food shall be packaged in a container of distinctive appearance so as to indicate to the purchaser that the package is not ordinary canned goods of a nonperishable nature.

113260. The container shall bear a suitable legend to warn consumers that the product must be kept frozen until ready for use and that the contents should not be heated before opening.

113265. Low acid foods that are to be frozen and packaged in hermetically sealed metal containers, shall not be cooked in the container before freezing.

113270. The department shall enforce this chapter with the exception of Article 4 (commencing with Section 113300).

113275. The department may make regulations to secure the proper enforcement of this chapter, including regulations with respect to the sanitary preparation of articles of food for freezing, the use of containers, marks, tags, or labels, and the display of signs.

113280. Any person, firm, corporation, or agent violating any of the provisions of this chapter with the exception of Article 4 (commencing with Section 113300), or any rule or regulation issued

pursuant to this chapter with the exception of Article 4 (commencing with Section 113300), shall upon conviction be punished for the first offense by a fine not more than one thousand dollars ($1,000), or by imprisonment in the county jail for not more than six months, or by both.

Article 4. Food Crop Growing

113300. At the time stated in the notice the legislative body shall hear and consider all objections or protests, if any, to the imposition of the fees or charges as set forth in said notice and may continue the hearing from time to time.

113305. Upon the conclusion of the hearing, the legislative body may adopt, revise, change, reduce or modify the fees or charges or may overrule any or all objections and make its determination, which shall be final.

113310. The Legislature finds and declares that the people of the State of California have a primary interest in the sanitary conditions under which food crops are grown and harvested for human consumption and in the health and related sanitary conditions under which the workers are employed in the growing and harvesting of food crops.

The Legislature hereby finds and declares that the provision of sanitary and handwashing facilities for those employed in the growing and harvesting of food crops is necessary to the preservation of sanitation and health and that facilities are necessary to maintain the dignity of workers.

113315. For the purposes of this article ‘‘food crop’’ shall mean all fruits and vegetables intended for human consumption.

113320. For the purpose of this article ‘‘food crop growing and harvesting operation’’ shall mean any field activity or operation wherein a food crop is grown and harvested, where five or more employees are working as a crew, unit, or group for a period of two or more hours.

113325. Every employer shall provide or cause to be provided toilet and handwashing facilities for every food crop growing and harvesting operation.

113330. Employees shall use the toilet and handwashing facilities provided.

113335. Toilet facilities shall provide privacy and shall be so designed as to keep human excreta from contaminating the crop and to keep flies away from the excreta. Toilet paper shall be provided. Toilet facilities shall be maintained in a clean and sanitary condition.

113340. Handwashing facilities shall be such as to afford an opportunity to wash hands in clean water using soap or other suitable cleansing agent and to dispose of used wash water without nuisance or contamination of food crop.

113345. Toilet and handwashing facilities for food crop harvesting operations shall be provided at convenient locations. For the purpose of this article ‘‘convenient’’ means within a five-minute walk of place of work.

When, because of layout of access roads, ground terrain, or other physical conditions, it is not possible to comply with the foregoing requirement, toilet and handwashing facilities shall be located at the point of vehicular access closest to the workers.

113350. (a) Except as provided in Section 18930, the department, after consultation with the State Departments of Food and Agriculture and Industrial Relations, may make and adopt reasonable regulations in accordance with this article pursuant to Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code and may adopt and submit building standards for approval pursuant to Chapter 4 (commencing with Section 18935) of Part 2.5 of Division 13. The regulations shall be at least as effective as those adopted pursuant to Section 6712 of the Labor Code.

(b) No part of this article shall be construed to abridge or limit in any manner the jurisdiction of the Division of Occupational Safety and Health pursuant to Division 5 (commencing with Section 6300) of the Labor Code.

113355. The primary responsibility for enforcement of this article shall be vested in the local health officers; county agricultural commissioners may participate in enforcement. The State Departments of Health Services, Industrial Relations, and Food and Agriculture may also enforce this article.

Any agency enforcing this article shall report any violation to all field offices of the Employment Development Department located in the county where the violation occurs. The report shall identify the employer responsible for the violation, the nature of the violation, and the location of the food crop growing and harvesting operation where the violation occurs. The Employment Development Department shall not refer persons for employment to any employer or food crop growing and harvesting operation identified in the report until the agency reporting the violation certifies that the violation has been corrected.

113360. Any person who knowingly and willfully violates any of the provisions of this article, or of the regulations adopted under this article, is guilty of a misdemeanor.

PART 7. RETAIL FOOD

CHAPTER 1. DEFINITIONS (Reserved)

CHAPTER 2. POWERS AND DUTIES (Reserved)

CHAPTER 3. ENFORCEMENT AND PENALTIES (Reserved)

CHAPTER 4. RETAIL FOOD PRACTICES

Article 1. General Provisions

113700. This chapter shall be known and may be cited as the California Uniform Retail Food Facilities Law.

113705. The Legislature finds and declares that the public health interest requires that there be uniform statewide health and sanitation standards for retail food facilities to assure the people of this state that food will be pure, safe, and unadulterated. It is the intention of the Legislature to occupy the whole field of health and sanitation standards for these food facilities, and the standards set forth in this chapter and regulations adopted pursuant to its provisions shall be exclusive of all local health and sanitation standards relating to these facilities.

113710. The department shall adopt regulations to implement and administer this chapter.

113715. Nothing in this chapter shall prohibit a local governing body from adopting an evaluation or grading system for food facilities, from adopting an employee health certification or employee training program, from prohibiting any type of food facility, or from regulating the provision of patron toilet and handwashing facilities.

113720. In all laws and regulations, references to Chapter 6 (commencing with Section 28190), Chapter 11 (commencing with Section 28520), and Chapter 14 (commencing with Section 28800), of Division 22 of the Health and Safety Code, or to the California Bakery Sanitation Law, the California Restaurant Act, and the Retail Food Production and Marketing Establishments Law, shall mean this chapter or the California Uniform Retail Food Facilities Law.

113725. Primary responsibility for enforcement of this chapter shall be with local health agencies. Nothing in this chapter shall prevent the department from taking any necessary program or enforcement actions for the protection of the public health and safety.

Whenever the enforcement of the requirements of this chapter by any local enforcement agency is satisfactory to the department, the enforcement of this chapter shall not be duplicated by the department. The department may investigate to determine

satisfactory enforcement of this chapter by a local enforcement agency.

113730. Any construction, alteration, remodeling, or installation of equipment in a food establishment pursuant to this chapter shall be in accordance with applicable building codes and shall be approved by the enforcement officer.

Article 2. Definitions

113735. ''Adulterated'' means food that bears or contains any poisonous or deleterious substance that may render the food impure or injurious to health.

113740. ''Approved'' means acceptable to the department or health authority based on a determination of conformity with current public health principles, practices, and generally recognized industry standards.

113745. ''Certified farmers' market'' means a location certified by the county agricultural commissioner and operated as specified in Article 6.5 (commencing with Section 1392) of Title 3 of the California Code of Regulations.

113750. ''Commissary'' means a food establishment in which food, containers, equipment, or supplies are stored or handled for use in vehicles, mobile food preparation units, food carts, or vending machines.

113755. ''Employee'' means any person working in a food facility covered by this chapter.

113760. ''Enforcement agency'' means the department and all local health agencies.

113765. ''Enforcement officer'' means the director, agents, or sanitarians appointed by the Director of Health Services, and all local health officers, directors of environmental health, and their duly authorized registered sanitarians and sanitarian trainees.

113770. ''Equipment'' means all cooking units, hoods, cutting blocks, processing machines, tables, refrigerators, sinks, dish machines, steam tables, and other items used in a food facility.

113775. ''Food'' means any raw or processed substance, ice, beverage, or ingredient intended to be used as food, drink, confection, or condiment for human consumption.

113780. ''Food establishment'' means any room, building, or place, or portion thereof, maintained, used, or operated for the purpose of storing, preparing, serving, manufacturing, packaging, transporting, salvaging, or otherwise handling food at the retail level. ''Food establishment'' includes a restricted food service transient occupancy establishment, as defined in Section 113870.

''Food establishment'' does not include a commercial food processing establishment as defined in Section 111955, at the wholesale level, a vehicle, vending machine, satellite food

distribution facility, temporary food facility, open-air barbecue, certified farmers' market, stationary mobile food preparation unit, or mobile food preparation unit.

113785. (a) ''Food facility'' means all of the following:

(1) Any food establishment, vehicle, vending machine, produce stand, swap meet prepackaged food stand, temporary food facility, satellite food distribution facility, stationary mobile food preparation unit, and mobile food preparation unit.

(2) Any place used in conjunction with the operations described in paragraph (1), including, but not limited to, storage facilities for food-related utensils, equipment, and materials.

(3) A certified farmers' market, for purposes of permitting and enforcement.

(b) ''Food facility'' does not include any of the following:

(1) A cooperative arrangement wherein no permanent facilities are used for storing or handling food, or a private home, church, private club, or other nonprofit association that gives or sells food to its members and guests at occasional events, as defined in Section 113825, or a for-profit entity that gives or sells food at occasional events, as defined in Section 113825, for the benefit of a nonprofit association, if the for-profit entity receives no monetary benefit, other than that resulting from recognition for participating in the event.

(2) Premises set aside for winetasting, as that term is used in Section 23356.1 of the Business and Professions Code and in the regulations adopted pursuant to that section, if no food or beverage is offered for sale for onsite consumption.

113790. ''Food preparation'' means packaging, processing, assembling, portioning, or any operation that changes the form, flavor, or consistency of food, but does not include trimming of produce.

113795. ''Frozen food'' means a food maintained at a temperature at which all moisture therein is in a solid state, not to exceed O degrees Celsius (32 degrees Fahrenheit).

113800. ''Hearing Officer'' means a local health officer, a director of environmental health, or his or her designee.

113805. ''Hot dog'' means a whole cured, cooked sausage that is skinless or stuffed in a casing and that is also known as a frankfurter, frank, furter, wiener, red hot, vienna, bologna, garlic bologna, or knockwurst, and that may be served in a bun or roll.

113810. ''Impound'' means the legal control exercised by the enforcement officer over the use, sale, disposal, or removal of any food or equipment.

113815. ''Mobile food preparation unit'' means any vehicle or portable food service unit upon which food is prepared for service, sale, or distribution at retail. Mobile food preparation unit shall not include vehicles from which prepackaged food or approved

unpackaged food is sold or offered for sale as prescribed by Article 11 (commencing with Section 114250).

113820. ‘‘Multiservice utensil’’ means a utensil manufactured and approved for use more than one time.

113825. ‘‘Occasional event’’ means an event that occurs not more than three days in any 90-day period.

113830. ‘‘Open-air barbecue facility’’ means an unenclosed facility for barbecuing food, where the food is prepared out of doors by cooking directly over hot coals, heated lava, hot stones, gas flame, or other method approved by the state department, on equipment suitably designed and maintained for use out of doors, that is operated by a food establishment, stationary mobile food preparation unit, or temporary food facility.

113835. ‘‘Permit’’ means a written authorization to operate issued by a local enforcement officer.

113840. ‘‘Person’’ means any individual, firm, partnership, joint venture, association, limited liability company, corporation, estate, trust, receiver, syndicate, city, county, or other political subdivision, or any other group or combination acting as a unit.

113845. ‘‘Potentially hazardous food’’ means food capable of supporting rapid and progressive growth of microorganisms that may cause food infections or food intoxications. ‘‘Potentially hazardous food’’ does not include edible shell eggs, foods that have a pH level of 4.6 or below, a water activity (Aw) value of 0.85 or less under standard conditions, or food products in hermetically sealed containers processed to prevent spoilage.

113850. ‘‘Produce’’ means any fruit or vegetable in its raw or natural state.

113855. ‘‘Produce stand’’ means a food establishment that sells, offers for sale, or gives away only produce or shell eggs, or both.

113860. ‘‘Refrigeration unit’’ means a mechanical unit that extracts heat from an area through liquification and evaporation of a fluid by a compressor, flame, or thermoelectric device. Refrigeration unit also includes a cold plate permanently connected to a compressor or any other unit approved by the department.

113865. ‘‘Remodeled’’ means construction, building, or repair to the food facility that requires a permit from the local building authority.

113870. ‘‘Restricted food service transient occupancy establishment’’ means an establishment of 20 guestrooms or less, that provides overnight transient occupancy accommodations, that serves food only to its registered guests, that serves only a breakfast or similar early morning meal, and with respect to which the price of the food is included in the price of the overnight transient occupancy accommodation. For purposes of this section, ‘‘restricted food service transient occupancy establishment’’ refers to an establishment as to which the predominant relationship between the

occupants thereof and the owner or operator of the establishment is that of innkeeper and guest. For purposes of this section, the existence of some other legal relationships as between some occupants and the owner or operator shall be immaterial.

113875. ‘‘Retail’’ means the storing, preparing, serving, manufacturing, packaging, transporting, salvaging, or otherwise handling food for dispensing or sale directly to the consumer.

113880. ‘‘Satellite food distribution facility’’ means either of the following:

(a) A location where only prepackaged, unit servings of food are distributed, that have been prepared or stored in an approved food facility operated by a school, governmental agency, or nonprofit organization.

(b) A stand, kiosk, cart, or other semi-permanent, remote, food-dispensing facility located within a defined and securable perimeter, including, but not limited to, an amusement park, stadium, arena, or enclosed shopping mall that operates a food establishment on the site.

113885. ‘‘Single service utensil’’ means a utensil that is manufactured and approved for use only once and that shall be discarded after use.

113890. ‘‘Stationary mobile food preparation unit’’ means a mobile food preparation unit that operates at a state, county, district, or citrus fair or any approved occasional event and that remains in a fixed position during food preparation and its hours of operation.

113895. ‘‘Temporary food facility’’ means a food facility operating out of temporary facilities approved by the enforcement officer at a fixed location for a period of time not to exceed 25 days in any 90-day period in conjunction with a single event or celebration.

113898. ‘‘Utensil’’ means any kitchenware, tableware, cutlery, glassware, container, implement, high chair tray, or other item with which food comes in contact during storage, transportation, display, preparation, serving, sale, or through use by an employee or consumer.

113900. ‘‘Vehicle’’ means any motorized or nonmotorized conveyance or portable food service unit upon which prepackaged food or approved unpackaged food is sold or offered for sale at retail. ‘‘Vehicle’’ does not include a mobile food preparation unit or a stationary mobile food preparation unit.

113903. ‘‘Vending machine’’ means any self-service device that, upon insertion of money or tokens, dispenses food without the necessity of replenishing the device between each vending operation. ‘‘Vending machine’’ does not include any device dispensing exclusively peanuts, nuts, popcorn, ballgum, or hard candy; prepackaged candy, cookies, crackers, or similar snacks and beverages that are not potentially hazardous as defined in Section 113845, and prepackaged ice.

113905. ‘‘Swap meet prepackaged food stand’’ means a food facility, other than a vehicle, operated at a swap meet, by a swap meet operator or its lessee, that offers for sale, or gives away, only prepackaged foods.

113908. ‘‘Prepackaged food’’ means any properly labeled processed food, prepackaged to prevent any direct human contact with the food product upon distribution from the manufacturer, and prepared at a facility approved by the enforcement agency.

113910. As used in this chapter, ‘‘swap meet’’ and ‘‘swap meet operator’’ shall have the meanings set forth in Section 21661 of the Business and Professions Code.

Article 3. Plan Review and Permits

113915. A person proposing to build or remodel a food facility shall submit complete plans and specifications to the local enforcement agency for review and approval pursuant to the requirements of this chapter. The plans shall be approved or rejected within 20 working days after receipt by the local enforcement agency and the applicant shall be notified of the decision. Unless the plans are approved or rejected within 20 working days, they shall be deemed approved. The building department shall not issue a building permit for a food facility until after it has received plan approval by the local enforcement officer.

113920. (a) A food facility shall not be open for business without a valid permit.

(b) A permit shall be issued by the local enforcement agency when investigation has determined that the proposed facility and its method of operation will conform to the requirements of this chapter. A permit, once issued, is nontransferable. A permit shall be valid only for the person, location, type of food sales, or distribution activity approved and, unless suspended or revoked for cause, for the time period indicated.

(c) Any fee for the permit and related services shall be determined by the local governing body. Fees shall be sufficient to cover the actual expenses of administering and enforcing this program, including the expenses of inspecting and impounding any utensil suspected of releasing lead or cadmium in violation of Section 108860 as authorized by Section 113930. All moneys collected as fees shall be expended in carrying out this chapter.

(d) A permit shall be posted in a conspicuous place in the food facility or in the office of a vending machine business.

Article 4. Enforcement and Inspection

113925. Enforcement officers are charged with the enforcement of this chapter and all regulations adopted pursuant to it.

An enforcement officer may enter, inspect, issue citations, and secure any sample, photographs, or other evidence from any food facility, or any facility suspected of being a food facility, for the purpose of enforcing this chapter. A written report of the inspection shall be made and a copy shall be supplied or mailed to the owner, manager, or operator of the food facility.

113930. (a) Based upon inspection findings or other evidence, an enforcement officer may do any of the following:

(1) Impound any food that is found to be, or suspected of being, contaminated or adulterated.

(2) Impound equipment or utensils that are found to be unsanitary or in such disrepair that food, equipment, or utensils may become contaminated or adulterated, and inspect, impound, or inspect and impound any utensil that is suspected of releasing lead or cadmium in violation of Section 108860. The enforcement officer may attach a tag to the food, equipment, or utensils that shall be removed only by the enforcement officer following verification that the condition has been corrected.

(b) No food, equipment, or utensils impounded pursuant to subdivision (a) shall be used unless the impoundment has been released.

(c) Within 30 days the enforcement agency that has impounded the food, equipment, or utensils pursuant to subdivision (a) shall commence proceedings to release the impounded materials or to seek administrative or legal remedy for its disposition.

113935. Any person who violates any provision of this chapter or regulation adopted pursuant to this chapter is guilty of a misdemeanor. Each offense shall be punished by a fine of not less than twenty-five dollars ($25) or more than one thousand dollars ($1,000) or by imprisonment in the county jail for a term not exceeding six months, or by both fine and imprisonment.

113940. The owner, manager, or operator of any food facility is responsible for any violation by an employee of any provision of this chapter or any regulation adopted pursuant to this chapter. Each day the violation occurs shall be a separate and distinct offense.

113945. A violation of any provision of this chapter or regulation adopted pursuant to this chapter relating to facilities held in common or shared by more than one food facility shall be deemed a violation for which the owner, manager, or operator of each food facility is responsible.

Article 5. Permit Suspension or Revocation

113950. Any permit may be suspended or revoked by a local enforcement officer for a violation of this chapter. Any food facility for which the permit has been suspended shall close and remain closed until the permit has been reinstated. Any food facility for

which the permit has been revoked shall close and remain closed until a new permit has been issued.

Whenever a local enforcement officer finds that a food facility is not in compliance with the requirements of this chapter, a written notice to comply shall be issued to the permittee. If the permittee fails to comply, the local enforcement officer shall issue to the permittee a notice setting forth the acts or omissions with which the permittee is charged, and informing him or her of a right to a hearing, if requested, to show cause why the permit should not be suspended or revoked. A written request for a hearing shall be made by the permittee within 15 calendar days after receipt of the notice. A failure to request a hearing within 15 calendar days after receipt of the notice shall be deemed a waiver of the right to a hearing. When circumstances warrant, the hearing officer may order a hearing at any reasonable time within this 15-day period to expedite the permit suspension or revocation process.

The hearing shall be held within 15 calendar days of the receipt of a request for a hearing. Upon written request of the permittee, the hearing officer may postpone any hearing date, if circumstances warrant the action.

113955. The hearing officer shall issue a written notice of decision to the permittee within five working days following the hearing. In the event of a suspension or revocation, the notice shall specify the acts or omissions with that the permittee is charged, and shall state the terms of the suspension or that the permit has been revoked.

113960. (a) If any immediate danger to the public health or safety is found, unless the danger is immediately corrected, an enforcement officer may temporarily suspend the permit and order the food facility immediately closed. Immediate danger to the public health and safety means any condition, based upon inspection findings or other evidence, that can cause food infection, food intoxication, disease transmission, or hazardous condition, including, but not limited to, unsafe food temperature, sewage contamination, nonpotable water supply, or an employee who is a carrier of a communicable disease.

(b) Whenever a permit is suspended as the result of an immediate danger to the public health or safety, the enforcement officer shall issue to the permittee a notice setting forth the acts or omissions with which the permittee is charged, specifying the pertinent code section, and informing the permittee of the right to a hearing.

(c) At any time within 15 calendar days after service of a notice pursuant to subdivision (b), the permittee may request in writing a hearing before a hearing officer to show cause why the permit suspension is not warranted. The hearing shall be held within 15 calendar days of the receipt of a request for a hearing. A failure to request a hearing within 15 calendar days shall be deemed a waiver of the right to a hearing.

113965. The enforcement agency may, after providing opportunity for a hearing, modify, suspend, or revoke a permit for serious or repeated violations of any of the requirements of this code or for interference in the performance of the duty of the enforcement officer.

113970. A permit may be reinstated or a new permit issued if the enforcement agency determines that conditions which prompted the suspension or revocation no longer exist.

Article 6. General Sanitation Requirements

113975. This article governs general sanitation requirements for food facilities as defined in this chapter.

113980. All food shall be manufactured, produced, prepared, compounded, packed, stored, transported, kept for sale, and served so as to be pure, free from contamination, adulteration, and spoilage; shall have been obtained from approved sources; shall otherwise be fully fit for human consumption; and shall conform to the applicable provisions of the Sherman Food, Drug, and Cosmetic Law (Part 5 (commencing with Section 109875)).

113985. Any food facility that serves or sells over the counter directly to the consumer an unlabeled or unpackaged food that is a confectionery that contains alcohol in excess of $^1/_2$ of 1 percent by weight shall provide written notice to the consumer of that fact. The notice shall be prominently displayed or be provided in some other manner, as determined by the department. The department shall adopt regulations to govern the notice required by this section in order to effectuate the purposes of this section.

Article 7. Sanitation Requirements for Food Facilities

113990. This article governs sanitation requirements for food facilities as defined in this chapter.

113995. All potentially hazardous food shall be held at or below 7 degrees Celsius (45 degrees Fahrenheit) or shall be kept at or above 60 degrees Celsius (140 degrees Fahrenheit) at all times. A thermometer accurate to plus or minus 1 degree Celsius (2 degrees Fahrenheit) shall be provided for each refrigeration unit, shall be located to indicate the air temperature in the warmest part of the unit and, except for vending machines, shall be affixed to be readily visible. Containers of potentially hazardous food displayed for service may be placed in an ice bed or held by a similar means that maintains the food at or below 7 degrees Celsius (45 degrees Fahrenheit). Except for vending machines, an accurate easily readable metal probe thermometer suitable for measuring the temperature of food shall be readily available on the premises.

114000. Raw duck, that otherwise would be readily perishable, shall be exempt from the provisions of Section 113995 for a period not to exceed two hours, if the duck will subsequently be cooked at or above a temperature of 177 degrees Celsius (350 degrees Fahrenheit) for at least 60 minutes.

(a) Whole Chinese-style roast duck shall be exempted from Section 113995 for a period not to exceed four hours after the duck is prepared, since the methods used to prepare these foods inhibit the growth of microorganisms that can cause food infections or food intoxications.

Nothing in this section shall be construed to supersede any provision of this chapter except the provisions specified in this section.

(b) For the purpose of this section, ''Chinese-style roast duck'' shall include, but is not limited to, Chinese-style barbecue duck, dry hung duck, and Peking duck. Chinese-style roast duck means duck that is prepared as follows:

(1) The abdominal cavity is cleaned.

(2) The duck is marinated.

(3) The cavity is closed prior to cooking.

(4) The duck is roasted at a temperature of 177 degrees Celsius (350 degrees Fahrenheit) or more for at least 60 minutes.

114005. The local enforcement agency may approve the use of legally obtained donated fish and game by nonprofit organizations authorized to serve meals to indigent persons.

''Fish,'' as used in this section, shall be defined as that term is used in Section 45 of the Fish and Game Code.

''Game,'' as used in this section, means any game bird, as defined in Section 3500 of the Fish and Game Code, or game mammal, as defined in Section 3950 of the Fish and Game Code.

114010. All food shall be prepared, stored, displayed, dispensed, placed, transported, sold, and served as to be protected from dirt, vermin, unnecessary handling, droplet contamination, overhead leakage, or other contamination.

114015. (a) (1) No unpackaged food that has been served to any person or returned from any eating area shall be served again or used in the preparation of other food.

(2) No food prepared or stored in a private home shall be used, stored, served, offered for sale, sold, or given away in a food facility.

(3) Except as provided in paragraph (4), a private home shall not be used for the purpose of giving away, selling, or handling food at retail, as defined in Section 113875.

(4) Nonperishable, prepackaged food may be given away, sold, or handled from a private home.

(b) Except as provided in subdivision (c) of Section 114080, every bakery product shall have a protective wrapping which shall bear a label which complies with the labeling requirements prescribed by

the Sherman Food, Drug, and Cosmetic Law (Part 5 (commencing with Section 109875)). Bakery products sold directly to a restaurant, catering service, retail bakery, or sold over the counter directly to the consumer by the manufacturer or bakery distributor shall be exempt from this subdivision. French style, hearth-baked, or hard-crusted loaves and rolls shall be considered properly wrapped if contained in an open-end bag of sufficient size to enclose the loaves or rolls.

114020. All employees preparing, serving, or handling food or utensils shall wear clean, washable outer garments, or other clean uniforms, and shall keep their hands clean. All employees shall wash their hands and arms with cleanser and warm water before commencing work, immediately after using toilet facilities, and at other times as are necessary to prevent contamination of food. Legible signs shall be posted in each toilet room directing attention to this requirement. All employees shall wear hairnets, caps, or other suitable coverings to confine all hair when required to prevent the contamination of food or utensils. Employees serving food shall use tongs or other implements, rather than their hands. No employee shall expectorate or use tobacco in any form in any area where food is prepared, served, or stored or utensils are cleaned or stored. No employee shall commit any act that may result in contamination or adulteration of any food, food contact surface, or utensil. The employer shall post and maintain ''No Smoking'' signs in food preparation, food storage, utensil cleaning, and utensil storage areas.

When information as to the possibility of disease transmission is presented to an enforcement officer, he or she shall investigate conditions and take appropriate action. The enforcement officer may, after investigation and for reasonable cause, require any or all of the following measures to be taken:

(a) The immediate exclusion of any employee from the affected food facility.

(b) The immediate closing of the food facility until, in the opinion of the enforcement officer, no further danger of disease outbreak exists. Any appeal of the closure shall be made in writing within five days to the applicable enforcement agency.

(c) A medical examination of any employee, with any laboratory examination that may be indicated. Should a medical examination be refused by an employee, the enforcement officer may require the immediate exclusion of the refusing employee from that or any other food facility until an acceptable medical or laboratory examination shows that the employee is not affected with a disease in a communicable form.

114025. No insecticide, rodenticide, or other poisonous substance shall be stored in any food preparation area, except in a separate enclosure provided for that purpose. All poisonous substances, detergents, bleaches, cleaning compounds, or any other injurious or poisonous material shall be specifically and plainly labeled as to

contents and hazardous use and shall be stored only in their original, labeled container. None of these products shall be used or stored in a manner that may cause contamination or adulteration of food, food contact surfaces, or utensils.

114030. A food facility shall at all times be so constructed, equipped, maintained, and operated as to prevent the entrance and harborage of animals, birds, and vermin, including, but not limited to, rodents and insects.

114035. Each food facility shall be provided with any facilities and equipment necessary to store or dispose of all waste material. All food waste and rubbish containing food waste shall be kept in leakproof and rodentproof containers and shall be contained so as to minimize odor and insect development by covering with close-fitting lids or placement in a disposable bag that is impervious to moisture and then sealed. Trash containers inside a food facility need not be covered during periods of operation. All food waste and rubbish shall be removed and disposed of in a sanitary manner as frequently as may be necessary to prevent the creation of a nuisance.

114040. The premises of each food facility shall be kept clean and free of litter, rubbish, and vermin.

114045. (a) Except as otherwise provided in subdivision (b), no live animal, bird, or fowl shall be kept or allowed in any food facility.

(b) Subdivision (a) does not prohibit the presence, in any room where food is served to the public, guests, or patrons, of a guide dog, signal dog, or service dog, as defined by Section 54.1 of the Civil Code, accompanied by a totally or partially blind person, deaf person, person whose hearing is impaired, or handicapped person, or dogs accompanied by persons licensed to train guide dogs for the blind pursuant to Chapter 9.5 (commencing with Section 7200) of Division 3 of the Business and Professions Code.

(c) Subdivision (a) does not apply to dogs under the control of uniformed law enforcement officers or of uniformed employees of private patrol operators and operators of a private patrol service who are licensed pursuant to Chapter 11.5 (commencing with Section 7580) of Division 3 of the Business and Professions Code, while these employees are acting within the course and scope of their employment as private patrol persons.

(d) The persons and operators described in subdivisions (b) and (c) are liable for any damage done to the premises or facilities by the dog.

(e) The dogs described in subdivisions (b) and (c) shall be excluded from food preparation and utensil wash areas. Aquariums and aviaries shall be allowed if enclosed so as not to create a public health problem.

114050. All food facilities and all equipment, utensils, and facilities shall be kept clean, fully operative, and in good repair.

114055. Frozen food shall be kept frozen except as provided in Section 114085.

114060. (a) Manual sanitization shall be accomplished in the final sanitizing rinse by one of the following:

(1) Contact with a solution of 100 ppm available chlorine solution for 30 seconds.

(2) Contact with a solution of 25 ppm available iodine for one minute.

(3) Contact with a solution of 200 ppm quaternary ammonium for one minute.

(4) Contact with water of at least 82 degrees Celsius (180 degrees Fahrenheit) for 30 seconds.

(b) In-place sanitizing shall be as described in paragraph (1), (2), (3), or (4) of subdivision (a).

(c) Other methods may be used if approved by the department.

(d) Testing equipment and materials shall be provided to adequately measure the applicable sanitization method.

114065. All new and replacement equipment shall meet or be equivalent to applicable National Sanitation Foundation (NSF) standards or, in the absence of applicable NSF standards, be approved by the enforcement officer.

114070. Sulfites shall not be added to potentially hazardous foods.

Article 8. Sanitation Requirements for Food Establishments

114075. This article governs sanitation requirements for food establishments, as defined in this chapter.

114080. (a) Adequate and suitable space shall be provided for the storage of food. Except for large or bulky food containers, all food shall be stored at least 15 centimeters (6 inches) off the floor or under other conditions that are approved. Containers may be stored on dollies, racks, or pallets not meeting this height requirement, if these items are easily movable. All cartons, boxes, or other materials used in the packaging of any food shall be protected at all times from dirt, vermin, and other forms of contamination or adulteration. All returned or damaged food products and food product from which the label has been removed shall be separated and stored in a separate area and in a manner that will prevent adulteration of other foods and shall not contribute to a vermin problem. Bulk food not stored in original packaging shall be stored in containers identifying the food by common name.

(b) Unpackaged food may be displayed in bulk for customer self-service under the following conditions:

(1) Produce and food requiring further processing may be displayed on open counters or in containers.

(2) Salad bars, buffet-type food service, and other ready-to-eat food shall:

(A) Be shielded so as to intercept a direct line between the customer's mouth and the food being displayed, or shall be in a container that has a tight-fitting, securely attached lid, or may be dispensed from approved mechanical dispensers.

(B) Be stored so as to be protected from vermin or other contamination.

(C) When displayed in a self-service container, shall be provided with a utensil with a handle for dispensing the product.

(3) Except for salad bar and buffet-type food service, a label is conspicuously displayed in plain view of the customer and securely attached to each self-service container, or in clear relationship thereto, that contains all of the following:

(A) The common name of the product.

(B) A declaration of the ingredients used by their common or usual name in descending order of predominance by weight. The declaration shall be provided in writing to the food establishment by the manufacturer, packer, or distributor.

(3) Nonfood items shall be displayed and stored in an area separate from food.

(c) Unpackaged food may be displayed and sold in bulk in other than self-service containers if both of the following conditions are satisfied:

(1) The food is served by an employee of the food establishment directly to a consumer.

(2) The food is displayed in clean, sanitary, and covered or otherwise protected containers.

(d) If the director makes a specific finding that a disease is actually transmitted by the method of dispensing unpackaged foods, as prescribed by this section, the director may establish by regulation greater restrictions on the sale of that food than are required by this section. These regulations shall bear directly on the specific relationship between the disease actually transmitted and the dispensing methods permitted by this section.

114085. (a) All frozen food shall be kept at a temperature that will keep the food in the frozen state until ready for processing or preparation. No food that has been thawed shall be refrozen unless it has been cooked or processed.

(b) Potentially hazardous frozen foods shall be thawed only:

(1) In refrigeration units.

(2) Under potable running water of sufficient velocity to flush loose food particles into the sink drain.

(3) In a microwave oven.

(4) As part of the cooking process.

114090. (a) All utensils and equipment shall be scrapped, cleaned, or sanitized as circumstances require.

(b) All food establishments in which food is prepared or in which multiservice kitchen utensils are used shall have at least a

two-compartment metal sink with two integral metal drainboards. Additional drainage space may be provided that is not necessarily attached to the sink. The sink compartments and drainage facilities shall be large enough to accommodate the largest utensil or piece of equipment to be cleaned therein. A one-compartment sink that is in use on January 1, 1985, may be continued in use until replaced.

(c) All food establishments in which multiservice consumer utensils are used shall clean the utensils in one of the following ways:

(1) Handwashing of utensils using a three-compartment metal sink with dual integral metal drainboards where the utensils are first washed by hot water and a cleanser until they are clean, then rinsed in clear, hot water before being immersed in a final warm solution meeting the requirements of Section 114060.

(2) Machine washing of utensils in machines using a hot water or chemical sanitizing rinse shall conform to National Sanitation Foundation (NSF) standards, and shall be installed and operated in accordance with those standards. The machines shall be of a type, and shall be installed and operated as approved by the department. The velocity, quantity, and distribution of the washwater, type and concentration of detergent used therein, and the time the utensils are exposed to the water, shall be sufficient to clean the utensils. The quantity and pressure of rinse water and the time of exposure shall provide bactericidal effectiveness equivalent to that provided by compliance with NSF standards, or more restrictive standards if approved by the department. All new spray-type dish machines designed for hot water sanitizing shall be equipped with a self-sealing temperature and pressure test plug. The test plug shall be located immediately upstream of the rinse manifold in a horizontal position and on the machine exterior.

(3) A two-compartment metal sink, having metal drainboards, equipped for hot water sanitization, that is in use on January 1, 1985, may be continued in use until replaced.

(4) Other methods may be used after approval by the department.

(d) Hot and cold water under pressure shall be provided through a mixing valve to each sink compartment in all food establishments constructed on or after January 1, 1985.

(e) All utensil washing equipment, except undercounter dish machines, shall be provided with two integral metal drainboards of adequate size and construction. One drainboard shall be attached at the point of entry for soiled items and one shall be attached at the point of exit for cleaned and sanitized items. Where an undercounter dish machine is used, there shall be two metal drainboards, one for soiled utensils and one for clean utensils, located adjacent to the machine. The drainboards shall be sloped and drained to an approved waste receptor. This requirement may be satisfied by using the drainboards appurtenant to sinks as required in subdivision (b)

and paragraph (1) of subdivision (c), if the facilities are located adjacent to the machine.

(f) The handling of cleaned and soiled utensils, equipment, and kitchenware shall be undertaken in a manner that will preclude possible contamination of cleaned items with soiled items.

(g) All utensils, display cases, windows, counters, shelves, tables, refrigeration units, sinks, dishwashing machines, and other equipment or utensils used in the preparation, sale, service, and display of food shall be made of nontoxic, noncorrosive materials, shall be constructed, installed, and maintained to be easily cleaned, and shall be kept clean and in good repair.

(h) Utensils and equipment shall be handled and stored so as to be protected from contamination. Single-service utensils shall be obtained only in sanitary containers or approved sanitary dispensers, stored in a clean, dry place until used, handled in a sanitary manner, and used once only.

114095. An adequate, protected, pressurized, potable supply of hot water, at least 49 degrees Celsius (120 degrees Fahrenheit), and cold water shall be provided. The water supply shall be from a water system approved by the health officer or the state department. Any hose used for conveying potable water shall be constructed of nontoxic materials, shall be used for no other purpose, and shall be clearly labeled as to its use. The hose shall be stored and used so as to be kept free of contamination. The potable water supply shall be protected with a back flow or back siphonage protection device, as required by applicable plumbing codes.

114100. All plumbing and plumbing fixtures shall be installed in compliance with local plumbing ordinances, shall be maintained so as to prevent any contamination, and shall be kept clean, fully operative, and in good repair.

All liquid wastes shall be disposed of through the plumbing system that shall discharge into the public sewerage or into an approved private sewage disposal system.

All steam tables, ice machines and bins, food preparation sinks, display cases, and other similar equipment that discharge liquid waste shall have this waste conveyed by a closed system, such as by a tube or rigid pipe, to an approved sewer line and disposed therein by an indirect connection. Drainage from refrigeration units shall be conducted in a sanitary manner to a floor sink or other approved device by an indirect connection or to a properly installed and functioning evaporator. Indirect waste receptors shall be located to be readily accessible for inspection and cleaning. Dishwashing machines may be connected directly to the sewer immediately downstream from a floor drain or they may be drained through an approved indirect connection.

114105. In each food establishment, there shall be provided clean toilet facilities in good repair for use by employees. The number of

toilet facilities required shall be in accordance with local building and plumbing ordinances. Toilet facilities whose construction begins on or after January 1, 1985, and that are provided for use by patrons, shall be so situated that patrons do not pass through food preparation, food storage, or utensil washing areas. Toilet rooms shall be separated from other portions of the food establishment by well-fitting, self-closing doors or by other methods approved by the enforcement officer. Toilet rooms shall not be used for the storage of food, equipment, or supplies. Toilet tissue shall be provided in a permanently installed dispenser at each toilet.

114110. Amusement parks, stadiums, arenas, retail shopping centers, and similar premises, that include food facilities and toilet facilities within their boundaries, shall not be required to provide toilet facilities for employee use within each food establishment, as specified by Section 114105, if approved toilet facilities are located within 300 feet of each food establishment and are readily available for use by employees. Food establishments subject to this section shall be provided with handwashing facilities for employee use, as required by Section 114115.

114115. Handwashing facilities shall be provided within or adjacent to toilet rooms and shall be equipped with an adequate supply of hot and cold running water under pressure. Facilities constructed on or after January 1, 1985, shall have that water provided from a combination faucet, or water from a premixing faucet that supplies warm water for a minimum of 10 seconds while both hands are free for washing. The number of handwashing facilities required shall be in accordance with local building and plumbing ordinances. Handwashing cleanser and single-use sanitary towels or hot-air blowers shall be provided in dispensers at, or adjacent to, handwashing facilities. Food establishments beginning construction or extensive remodeling on or after January 1, 1985, shall provide facilities exclusively for handwashing within, or adjacent to, each kitchen.

114120. Clean toilet facilities, in good repair, shall be provided for patrons, guests, or invitees on property used in connection with, or in, each food establishment with more than 20,000 square feet of floor space.

For the purposes of this section, the gas pump area of a service station that is maintained in conjunction with a food establishment shall not be considered as property used in connection with the food establishment or be considered in determining the square footage of floorspace of the food establishment.

There shall be at least one separate toilet facility for men and one separate toilet facility for women. Toilet rooms shall be separated by well-fitted, self-closing doors that prevent passage of flies, dust, or odors.

Handwashing facilities, in good repair, shall be provided for patrons, guests, or invitees within or adjacent to toilet rooms and shall be equipped with hot and cold running water. Handwashing detergent or soap and sanitary towels or hot-air blowers shall be provided at handwashing facilities in permanently installed dispensing devices. Notwithstanding any other provision of law, other than Section 114125, a violation of this section shall be an infraction.

114125. The requirements of Section 114120 for restroom facilities that are accessible to patrons, guests, or invitees on the property may be satisfied by permitting access by those persons to the toilet and handwashing facilities that are required by other provisions of this chapter.

However, if the requirements of Section 114120 are satisfied by permitting access by those persons to the toilet and handwashing facilities that are required by other provisions of this chapter, a violation of these provisions shall be a misdemeanor punishable pursuant to Section 113935.

114130. Sections 114120 and 114125 apply only to food establishments as to which construction is commenced on or after July 1, 1984.

114135. A room, enclosure, or designated area, separated from toilets, food storage, food preparation areas, and utensil washing areas, shall be provided where employees may change and store clothes. No employee shall store clothing or personal effects in any other area on the premises.

114140. Ventilation shall be provided to remove gases, odors, steam, heat, grease, vapors, or smoke from the food establishment.

All areas shall have sufficient ventilation to facilitate proper food storage and to provide a reasonable condition of comfort for any employee, consistent with the job performed by the employee. On or after January 1, 1985, there shall be provided mechanical exhaust ventilation at or above all newly installed cooking equipment as required in Article 10.4 (commencing with Section 13670) of Title 17 of, and Chapter 4-20 (commencing with Section 4-2000) of Part 4 of Title 24 of, the California Administrative Code.

The provisions of this section shall not apply to cooking equipment when that equipment has been submitted to the department for evaluation, and it has found that the equipment does not produce toxic gases, smoke, grease, vapors, and heat when operated under conditions recommended by the manufacturer.

Toilet rooms shall be vented to the outside air by means of an openable, screened window, an air shaft, or a light-switch-activated exhaust fan, consistent with the requirements of local building codes.

114145. Each food establishment, except produce stands and swap meet prepackaged food stands, shall be fully enclosed in a building consisting of floors, walls, and overhead structure that meet

the minimum standards prescribed by this chapter. Food establishments that are not fully enclosed on all sides and that are in operation on January 1, 1985, shall not be required to meet the requirement for a fully enclosed structure pursuant to this section. This section shall not be construed to require the enclosure of dining areas or open-air barbecue facilities.

114150. (a) Except in sales areas of retail food establishments and as otherwise provided in subdivision (d), the floor surfaces in all areas in which food is prepared, packaged, or stored, where any utensil is washed, where refuse or garbage is stored, where janitorial facilities are located, and, except with respect to areas relating to guestroom accommodations and the private accommodations of owners and operators in restricted food service transient occupancy establishments, as defined in Section 113870, in all toilet and handwashing areas, and in employee change and storage areas shall be smooth and of durable construction and nonabsorbent material that is easily cleaned.

These floor surfaces shall be coved at the juncture of the floor and wall with a 10 millimeter ($^3/_8$ inch) minimum radius coving and shall extend up the wall at least 10 centimeters (4 inches) except in areas where food is stored only in unopened bottles, cans, cartons, sacks, or other original shipping containers.

(b) Upon new construction or extensive remodeling on or after January 1, 1985, floor drains shall be installed as follows:

(1) In floors that are water-flushed for cleaning.

(2) In areas where pressure spray methods for cleaning equipment are used.

Floor surfaces in areas pursuant to this subdivision shall be sloped 1:50 to the floor drains.

(c) Upon new construction or extensive remodeling on or after January 1, 1985, floor sinks, funnel drains, or equivalent devices shall be installed to receive discharges of water or other fluid waste from equipment.

(d) Except for dining and serving areas, the use of sawdust, wood shavings, peanut hulls, or similar materials is prohibited.

(e) This section shall not prohibit the use of approved dust-arresting floor sweeping and cleaning compounds during floor cleaning operations or the use of approved antislip floor finishes or materials in areas where necessary for safety reasons.

(f) Food establishments that are in operation on January 1, 1985, and in which sawdust is used as an absorbent in meat holding units may continue this use until the floor is replaced.

114155. The walls and ceilings of all rooms, except for bar areas, rooms where food is stored in unopened containers, and dining areas, shall be of a durable, smooth, nonabsorbent, washable surface. Walls and ceilings of food preparation and utensil washing areas and interior surfaces of walk-in refrigeration units shall also be

light-colored. Wall areas adjacent to bar sinks shall be smooth, nonabsorbent, and washable surface. Acoustical paneling may be utilized providing it is installed not less than 1.8 meters (6 feet) above the floor. Any perforations shall not penetrate the entire depth of the panel, shall not be greater than 3 millimeters ($^1/_8$ inch) in any dimension, and shall not comprise more than 25 percent of the exposed panel surface. The paneling shall otherwise meet the requirements of this section.

Conduits of all types shall be installed within walls as practicable. When otherwise installed, they shall be mounted or enclosed so as to facilitate cleaning.

114160. Adequate and suitable space shall be provided for the storage of clean linens, including apparel, towels, and cleaning cloths.

Soiled linens, apparel, towels, tablecloths, and cleaning cloths shall be kept in cleanable containers provided only for this purpose and shall not be reused until they have been laundered.

114165. (a) A room, area, or cabinet separated from any food preparation or storage area, or utensil washing or storage area, shall be provided for the storage of cleaning equipment and supplies, such as mops, buckets, brooms, cleansers, and waxes.

(b) Any food establishment constructed or extensively remodeled on or after January 1, 1985, shall be equipped with at least one of the following to be used exclusively for general cleaning purposes and for the disposal of mop bucket wastes and other liquid wastes:

(1) A one-compartment, nonporous janitorial sink.

(2) A slab, basin, or floor constructed of concrete or equivalent material, curbed and sloped to a drain. Such facilities shall be connected to approved sewerage and provided with hot and cold running water through a mixing valve and protected with a backflow protection device.

114170. In every room and area in which any food is prepared, manufactured, processed, or packaged, or in which utensils are cleaned, sufficient natural or artificial lighting shall be provided to produce an intensity of not less than 215 lux (20 footcandles) as measured 76 centimeters (30 inches) above the floor, except that the working surfaces on which alcoholic beverages are prepared or where utensils used in the preparation or service of alcoholic beverages are cleaned, shall be provided with at least 108 lux (10 footcandles) of light. Food and utensil storage rooms, refrigeration storage, and toilet and dressing rooms shall be provided with at least 108 lux (10 footcandles) of light. Light fixtures in areas where food is prepared or where open food is stored or where utensils are cleaned shall be of shatterproof construction or shall be protected with shatterproof shields and shall be readily cleanable.

During general cleanup activities, at least 215 lux (20 footcandles) of light, measured 76 centimeters (30 inches) above the floor, shall

be provided in the area being cleaned, including, but not limited to, areas where alcoholic beverages are prepared or served.

114175. No sleeping accommodations shall be maintained or kept in any room where food is prepared, stored, or sold. All living and sleeping quarters shall be separated from the food establishment. No door or other opening shall be permitted in the partition that separates the food establishment from the living or sleeping quarters.

114180. (a) The department shall adopt and approve first aid instructions designed and intended for use in removing food that may become stuck in a person's throat. These instructions shall be limited to first aid techniques not involving the use of any physical instrument or device inserted into the victim's mouth or throat.

(b) The department shall supply to the proprietor of every on-site eating establishment adopted and approved instructions pursuant to subdivision (a). The proprietor shall post the instructions in a conspicuous place or places, which may include an employee notice board, in order that the instructions may be consulted by anyone attempting to provide relief to a victim in a choking emergency.

(c) In the absence of other evidence of noncompliance with this section, the fact that the instructions were not posted as required by this section at the time of a choking emergency shall not in and of itself subject the proprietor or his or her employees or independent contractors to liability in any civil action for damages for personal injuries or wrongful death arising from a choking emergency.

(d) Nothing in this section shall impose any obligation on any person to remove, assist in removing, or attempt to remove food that has become stuck in another person's throat. In any action for damages for personal injuries or wrongful death, neither the proprietor nor any person who removes, assists in removing, or attempts to remove the food in accordance with instructions adopted by the department shall be liable for any civil damages as a result of any acts or omissions by the person in rendering emergency assistance.

Article 9. Open Air Barbecue Facilities

114185. This article governs sanitation requirements for open-air barbecue facilities as defined in this chapter.

114190. Notwithstanding the provisions of this chapter, neither the state department nor any city, county, or city and county shall require the enclosure of an open-air barbecue facility if the appropriate enforcement officer determines that the barbecue facility meets all of the following requirements:

(a) The facility is operated on the same premises as, in reasonable proximity to, and in conjunction with, a food establishment, temporary food facility, or stationary mobile food preparation unit.

(b) All food waste and rubbish containing food waste is handled in accordance with the requirements of Section 114035.

(c) The facility is operated in compliance with Articles 6 (commencing with Section 113975) and 7 (commencing with Section 113990), except for Sections 114030, 114045, and 114060.

(d) The multiservice utensils and equipment used in conjunction with the open-air barbecue facility are made of nontoxic materials, are constructed and maintained in a manner so they can be easily cleaned, and are kept clean and in good repair.

(e) Food and beverages served out of doors are dispensed from units approved by the enforcement officer. No other food may be prepared or stored in the out of doors, except for food cooked on the open-air barbecue unit.

(f) (1) Except as otherwise provided in paragraph (2), no live animals, birds, or fowl shall be kept or allowed in an area within 20 feet of any area where food or beverage is prepared, stored, kept, or served.

(2) Paragraph (1) does not prohibit the presence, in any area where food is served to the public, guests, or patrons, of a guide dog, signal dog, or service dog, as defined by Section 54.1 of the Civil Code, accompanied by a totally or partially blind person, deaf person, person whose hearing is impaired, or handicapped person, or dogs accompanied by persons licensed to train guide dogs for the blind pursuant to Chapter 9.5 (commencing with Section 7200) of Division 3 of the Business and Professions Code.

(3) Paragraph (1) does not apply to dogs under the control of uniformed law enforcement officers or of uniformed employees of private patrol operators and operators of a private patrol service who are licensed pursuant to Chapter 11.5 (commencing with Section 7580) of Division 3 of the Business and Professions Code, while those employees are acting within the course and scope of their employment as private patrol persons.

(4) Those persons and operators described in paragraphs (2) and (3) are liable for any damage done to the premises or facilities by the dog.

(g) If the barbecue facility is a permanent structure, it is equipped with an impervious and easily cleaned floor surface that extends a minimum of five feet from the open-air barbecue facility on all open sides.

(h) The barbecue facility is located in an area reasonably protected from dust, as determined by the enforcement officer.

(i) The barbecue facility is not operated in, or out of, any motor vehicle or in any area or location that may constitute a fire hazard, as determined by the enforcement officer. For the purposes of this section, a motor vehicle does not include a stationary mobile food preparation unit, as defined in Section 113890.

(j) Sanitary facilities, including, but not limited to, toilet facilities and handwashing facilities shall be available for use within 200 feet of the barbecue facility and shall comply with all provisions of this chapter. Sanitary facilities that do not meet the requirements of this chapter shall not be located closer to the barbecue facility than the sanitary facilities required to be provided by this section.

114195. No air pollution control district or air quality management district shall require the enclosure of an open-air barbecue facility if the appropriate enforcement officer determines that the barbecue facility meets all requirements prescribed by Section 114190.

Article 10. Vending Machines

114200. This article governs sanitation requirements for vending machines as defined in this chapter.

114205. Each vending machine or machine location shall have posted in a prominent place a sign indicating the owner’s name, address, and telephone number.

114210. All food shall be stored and packaged in clean, protected containers, and handled, transported, and vended in a sanitary manner. Wet storage of packaged products is prohibited.

Potentially hazardous food shall be dispensed to the consumer in the original package into which it was placed at the commissary or processing plant. Bulk potentially hazardous food is prohibited.

114215. All food contact surfaces shall be cleaned and sanitized either in place in a machine so designed and approved or by removing from the machine and cleaning and sanitizing at an approved facility.

All food contact surfaces when removed from the machine after cleaning and sanitizing shall be protected from contamination before being returned to the machine.

A record of cleaning and sanitizing shall be maintained by the operator in each machine and shall be current for at least the past 30 days.

114220. Single-service containers that are used in machines dispensing products in bulk, shall be obtained in sanitary packages, shall be stored in a clean, dry place until used, and shall be handled in a sanitary manner. The containers shall be stored in the original package until introduced into the container magazine or dispenser of the vending machine. The containers stored within the vending machine shall be protected from manual contact, dirt, vermin, and other contamination.

114225. Each vending machine shall be located in a room, area, or space that shall minimize the potential for contamination of food. The floor area upon which vending machines are located shall be

smooth, of cleanable construction, and capable of withstanding repeated washing and scrubbing.

114230. Water used in vending machines shall be potable.

114235. While in transit to machine locations, food, single-service containers, and equipment shall be protected from dirt, vermin, and other contamination.

114240. On or after January 1, 1985, all vending machines shall be constructed in accordance with National Sanitation Foundation or National Automatic Merchandizing Association standards, or the equivalent thereof.

114245. Vending machines shall meet all the requirements of Article 6 (commencing with Section 113975) and applicable sections of Article 7 (commencing with Section 113990).

Article 11. Vehicles

114250. This article governs sanitation requirements for vehicles as defined in this chapter.

114255. The name, address, and telephone number of the owner, operator, permittee, business name, or commissary shall be clearly and permanently indicated on both sides of a vehicle exterior. The name shall be in letters at least 8 centimeters (3 inches) high and shall have strokes at least 1 centimeter ($^3/_8$ inch) wide, and shall be of a color contrasting with the vehicle exterior. Letters for address and telephone numbers shall not be less than 2.5 centimeters (1 inch) high.

114260. (a) Equipment on a vehicle, including the interior of cabinet units or compartments, shall be equipped so as to have smooth, easily accessible, and easily cleanable surfaces. Unfinished wooden surfaces are not permitted. Construction joints shall be tightly fitted and sealed so as to be readily cleanable. Equipment, including utensils, shall be constructed of nontoxic materials and shall be readily cleanable.

(b) All food displayed, sold, or offered for sale from vehicles shall be prepackaged at a facility approved by the enforcement agency except as provided in Sections 114265 and 114275.

(c) During operation, no food shall be stored, displayed, or served from any place other than the vehicle.

(d) Food condiments shall be protected from contamination and, where available for self-service, shall be prepackaged or available only from approved dispensing devices.

(e) During transportation and storage, food and food contact surfaces shall be protected from contamination.

(f) All vehicles shall operate out of a commissary or other facility approved by the enforcement agency. Vehicles shall report to the commissary at least once each operating day for cleaning and servicing operations. In addition, vehicles whereon nonprepackaged

hot dogs are handled shall be properly stored at a commissary or other facility approved by the enforcement agency so as to be protected from unclean or unsanitary conditions.

(g) Food products remaining after each day's operation shall be stored only in an approved food facility.

(h) Utensils and equipment shall be handled and stored so as to be protected from contamination. Single-service utensils shall be obtained only in sanitary containers or approved sanitary dispensers, stored in a clean, dry place until used, handled in a sanitary manner, and used once only.

(i) All waste water shall be drained to an approved water receptor.

(j) Potentially hazardous foods shall be maintained at or below 7 degrees Celsius (45 degrees Fahrenheit) or at or above 60 degrees Celsius (140 degrees Fahrenheit) at all times.

(k) Vehicular food sales shall be conducted within 60 meters (200 feet) of approved and readily available toilet and handwashing facilities or as otherwise approved by the enforcement officer to ensure proper sanitary facilities are available to the vehicle employee.

114265. (a) The following foods may be sold from vehicles in an unpackaged state, provided the storage, display, and dispensing methods are approved by the enforcement agency:

(1) Popcorn.

(2) Nuts.

(3) Produce.

(4) Pretzels and similar bakery products.

(5) Candy.

(6) Hot dogs.

(7) Snow cones.

(8) Whole fish and whole aquatic invertebrates.

(9) Frozen ice cream bars that meet the requirements of subdivision (d).

(10) Cappuccino, espresso, cafe latté, cafe macchiato, mocha, hot chocolate, and other coffee-based or cocoa-based beverages that may contain cream, milk, or similar dairy products, to be made and immediately served to the consumer.

(b) Hot and cold beverages that are not potentially hazardous, as defined in Section 113845, may be sold from approved bulk dispensing units.

(c) (1) Vehicles selling or offering for sale nonprepackaged foods, as specified in subdivision (a), except produce and approved beverages made without cream, milk, or similar dairy products, shall be equipped with a food compartment as specified in subdivision (a) of Section 114275.

(2) In addition, those vehicles handling nonprepackaged hot dogs, popcorn, frozen ice cream bars, snow cones, or beverages described

in paragraph (10) of subdivision (a) shall comply with subdivisions (b), (c), (d) and (e) of Section 114275.

(3) Vehicles selling unpackaged frozen ice cream bars and beverages described in paragraph (10) of subdivision (a) shall have overhead protection, utensils and equipment equal or equivalent to National Sanitation Foundation Standards, a commissary for cleaning utensils, compartments, and vessels used for product storage, and shall also meet all sanitary design and operating requirements of the local enforcement officials. Vehicles selling unpackaged frozen ice cream bars or holding cream, milk, or similar dairy products shall be equipped with refrigeration units, as described in Section 113860.

(4) Those vehicles handling unpackaged whole fish and aquatic invertebrates shall comply with subdivision (e) of Section 114275, for drainage of waste water from display and storage compartments.

(d) Frozen ice cream bars may be sold from vehicles in an unpackaged state if the frozen ice cream bars are prepackaged at a facility approved by the enforcement agency pursuant to subdivision (b) of Section 114260 and unpackaged for the purpose of adding condiments.

114270. All potentially hazardous food shall be prepackaged in an approved facility except as provided in Section 114275. A tamale shall be considered prepackaged if dispensed to the customer in its original, inedible wrapper.

114275. Vehicles on which nonprepackaged hot dogs, popcorn, or snowcones are sold or offered for sale shall, in addition to the requirements of Section 114260, be constructed and equipped as follows:

(a) The food compartment shall be completely closed. The opening to the food compartment shall be sufficiently large to permit food assembly and service operations and shall be provided with a tightly fitted closure that, when closed, protects interior surfaces from dust, debris, and vermin. All food compartments and food contact surfaces shall be constructed so as to be smooth, easily accessible, and easily cleanable.

(b) A one-compartment metal sink furnished with warm running water that is at least 38 degrees Celsius (101 degrees Fahrenheit) and cold water. The sink shall be of a size suitable for washing hands and utensils.

(c) Handwashing cleanser and single-service towels.

(d) A water supply tank of at least 18 liters (5 gallons) capacity.

(e) A waste water tank of at least 28 liters (7.5 gallons) capacity.

114280. Vehicles on which nonprepackaged hot dogs, popcorn, or snowcones are sold or offered for sale that operate exclusively on premises wherein approved toilet, handwashing, and utensil washing facilities are readily available and within 60 meters (200 feet) shall be exempt from the requirements of subdivisions (b) through (e) of Section 114275.

Vehicles subject to this section which were in operation as of July 1, 1986, shall not be required to meet the requirements of this article relating to utensil washing facilities, as long as an approved reserve supply of utensils is maintained on the vehicle.

Article 12. Mobile Food Preparation Units, Stationary Mobile Food Preparation Units, and Commissaries

114285. This article governs sanitation requirements for mobile food preparation units, stationary mobile food preparation units, and commissaries as defined in this chapter.

114290. (a) All mobile food preparation units, stationary mobile food preparation units, and commissaries shall meet the applicable requirements in Article 6 (commencing with Section 113975), Article 7 (commencing with Section 113990), and Article 8 (commencing with Section 114075), unless specifically exempted from any of these provisions as provided in this article, and shall meet Article 10 (commencing with Section 13600) of, and Article 10.1 (commencing with Section T17-13611) of Subchapter 2 of Chapter 5 of Part 1 of Title 17 of the California Code of Regulations, except that a hose used for filling water tanks and used for cleaning the interior of a mobile food preparation unit from a commissary that services mobile food preparation units is not required to be kept at least four feet above the ground at all times if the hose is equipped with a quick disconnect device, retrofitted on the end of the hose so that it seals the opening when not in use. Hoses inside the mobile preparation unit and potable water tank connectors shall have matching connecting devices. Devices for external cleaning may not be used inside the mobile preparation unit for potable water purposes. Hoses and faucets equipped with quick connect and disconnect devices for these purposes shall be deemed to meet the requirements of Section T17-13613 of Title 17 of the California Code of Regulations. Mobile food preparation units and stationary mobile food preparation units shall be exempt from the requirements of Sections 114105 and 114135, and subdivision (b) of Section 114165.

(b) Each stationary mobile food preparation unit shall be certified pursuant to Article 10 (commencing with Section 13600) of Subchapter 2 of Chapter 5 of Part 1 of Title 17 of the California Code of Regulations before commencing operation each calendar year. The local enforcement agency shall address all applicable construction standards and submit proof of certification to the state department. Construction recertification within a calendar year shall not be required unless either of the following occurs:

(1) Where structural modifications are made.

(2) Where otherwise required by the state department.

The state department may issue an annual certificate of compliance for each certified vehicle, as required by regulation.

114295. All mobile food preparation units shall operate out of a commissary or other facility approved by the enforcement agency. Mobile food preparation units shall report to the commissary at least once each operating day for cleaning and servicing operations, except as otherwise approved by the enforcement officer.

114300. Stationary mobile food preparation units may include a staffed counter that serves hot and cold beverages that are not a potentially hazardous food as defined in Section 113845, and that are dispensed from approved bulk dispensing units.

114305. (a) The enforcement agency may permit storage of supplies and food, that is not a potentially hazardous food as defined in Section 113845, in unopened containers adjacent to a stationary mobile food preparation unit, or in unopened containers in a nearby temporary storage unit.

(b) As used in this section, ‘‘unopened container’’ means a factory sealed container that has not been previously opened, that is suitably constructed to be resistant to contamination from moisture, dust, insects, and rodents.

Article 13. Temporary Food Facilities

114310. This article governs sanitation requirements for temporary food facilities as defined in this chapter.

114315. (a) Floors shall be smooth and cleanable. The use of sawdust or similar materials is prohibited.

(b) Walls and ceilings shall be constructed of either wood, canvas, plastic, or similar material and fine mesh fly screening and shall completely enclose the facility. Facilities wherein all food and beverage is prepackaged at a facility approved by the local enforcement officer shall not be required to be fully enclosed with fly screening. Food service openings shall be equipped with tightfitting closures to minimize the entrance of insects.

(c) Except where all food and beverage is prepackaged, handwashing and utensil washing facilities approved by the enforcement officer shall be provided within temporary food facilities.

(d) Facilities for the sanitary disposal of all liquid waste shall be subject to the approval of the enforcement officer.

(e) At least one toilet facility for each 15 employees shall be provided within 60 meters (200 feet) of each temporary food facility.

(f) Food contact surfaces shall be smooth, easily cleanable, and nonabsorbent.

114320. (a) All food shall be prepared in a food establishment or on the premises of a temporary food facility. No food or beverage stored or prepared in a private home may be offered for sale, sold, or given away from a temporary food facility.

(b) All food and beverage shall be protected at all times from unnecessary handling and shall be stored, displayed and served so as to be protected from contamination.

(c) Potentially hazardous food and beverage shall be maintained at or below 7 degrees Celsius (45 degrees Fahrenheit) or at or above 60 degrees Celsius (140 degrees Fahrenheit) at all times.

(d) Ice used in beverages shall be protected from contamination and shall be maintained separate from ice used for refrigeration purposes.

(e) All food and food containers shall be stored off the floor on shelving or pallets located within the facility.

(f) Smoking is prohibited in temporary food facilities.

(g) (1) Except as provided in paragraph (2), live animals, birds, or fowl shall not be kept or allowed in temporary food facilities.

(2) Paragraph (1) does not prohibit the presence, in any room where food is served to the public, guests, or patrons, of a guide dog, signal dog, or service dog, as defined by Section 54.1 of the Civil Code, accompanied by a totally or partially blind person, deaf person, person whose hearing is impaired, or handicapped person, or dogs accompanied by persons licensed to train guide dogs for the blind pursuant to Chapter 9.5 (commencing with Section 7200) of Division 3 of the Business and Professions Code.

(3) Paragraph (1) does not apply to dogs under the control of uniformed law enforcement officers or of uniformed employees of private patrol operators and operators of a private patrol service who are licensed pursuant to Chapter 11.5 (commencing with Section 7580) of Division 3 of the Business and Professions Code, while these employees are acting within the course and scope of their employment as private patrol persons.

(4) The persons and operators described in paragraphs (2) and (3) are liable for any damage done to the premises or facilities by the dog.

(5) The dogs described in paragraphs (2) and (3) shall be excluded from food preparation and utensil wash areas. Aquariums and aviaries shall be allowed if enclosed so as not to create a public health problem.

(h) All garbage shall be disposed of in a manner approved by the enforcement officer.

(i) Employees preparing or handling food shall wear clean clothing and shall keep their hands clean at all times.

114325. The enforcement officer may establish additional structural or operational requirements as necessary to ensure that food is of a safe and sanitary quality.

114330. Open-air barbecue facilities may be operated adjacent to temporary food facilities with the approval of the enforcement officer and subject to the requirements of Article 9 (commencing with Section 114185).

Article 14. Produce Stands

114335. This article governs sanitation requirements for produce stands as defined in this chapter.

114340. (a) Produce stands operated by a producer selling or offering for sale produce or shell eggs, or both, are exempt from this chapter, provided the produce stand is operated on premises controlled by the producer.

(b) For purposes of this section, ‘‘producer’’ means a person or entity who produces shell eggs, fruits, nuts, or vegetables by practice of the agricultural arts upon land that the person or entity controls.

(c) Except as otherwise provided in this chapter, all other produce stands shall meet the requirements of Article 6 (commencing with Section 113975), Article 7 (commencing with Section 113990), and Article 8 (commencing with Section 114075).

(d) Notwithstanding subdivision (c), all other produce stands shall also meet all of the following requirements:

(1) All food shall be stored at least 46 centimeters (18 inches) off the floor, except that food stored in a walk-in refrigeration unit shall be stored at least 13 centimeters (5 inches) off the floor.

(2) Food preparation is prohibited.

(3) Foods, other than trimmed produce and shell eggs, shall not be kept at these food establishments. This shall not apply to retail dairy processing rooms.

(e) A produce stand shall have no more than one side open to the outside air during business hours.

Article 15. Certified Farmers’ Markets

114345. This article governs general sanitation requirements for certified farmers’ markets, as defined in this chapter.

114350. Certified farmers’ markets shall meet the provisions of Article 6 (commencing with Section 113975) and, in addition, shall meet all of the following requirements:

(a) All food shall be stored at least 15 centimeters (6 inches) off the floor or ground or under any other conditions which are approved.

(b) Food preparation is prohibited at certified farmers’ markets with the exception of the food samples. Distribution of food samples is allowed provided that the following sanitary conditions exist:

(1) Samples shall be kept in approved, clean, covered containers.

(2) All food samples shall be distributed by the producer in a sanitary manner.

(3) Clean, disposable plastic gloves shall be used when cutting food samples.

(4) Food intended for sampling shall be washed, or cleaned in another manner, of any soil or other material by potable water in order that it is wholesome and safe for consumption.

(5) Potable water shall be available for hand washing and sanitizing as approved by the local enforcement agency.

(6) Potentially hazardous food samples shall be maintained at or below 45 degrees fahrenheit. All other food samples shall be disposed of within two hours after cutting.

(7) Utensil and hand washing water shall be disposed of in a facility connected to the public sewer system or in a manner approved by the local enforcement agency.

(8) Utensils and cutting surfaces shall be smooth, nonabsorbent, and easily cleaned or disposed of as approved by the local environmental health agency.

(c) Approved toilet and hand washing facilities shall be available within 60 meters (200 feet) of the premises of the certified farmers' market or as approved by the enforcement officer.

(d) No live animals, birds, or fowl shall be kept or allowed within 6 meters (20 feet) of any area where food is stored or held for sale. This subdivision does not apply to guide dogs, signal dogs, or service dogs when used in the manner specified in Section 54.1 of the Civil Code.

(e) All garbage and rubbish shall be stored, and disposed of, in a manner approved by the enforcement officer.

(f) Notwithstanding Article 11 (commencing with Section 114250), vendors selling food adjacent to and under the jurisdiction and management of a certified farmers' market may store, display, and sell from a table or display fixture apart from the vehicle, in a manner approved by the local enforcement agency.

(g) This section shall be repealed on January 1, 1997.

114350. Certified farmers' markets shall meet the provisions of Article 6 (commencing with Section 113975) and, in addition, shall meet all of the following requirements:

(a) All food shall be stored at least 15 centimeters (6 inches) off the floor or ground or under any other conditions which are approved.

(b) Food preparation is prohibited.

(c) Approved toilet and hand washing facilities shall be available within 60 meters (200 feet) of the premises of the certified farmers' market or as approved by the enforcement officer.

(d) No live animals, birds, or fowl shall be kept or allowed within 6 meters (20 feet) of any area where food is stored or held for sale. This subdivision does not apply to guide dogs, signal dogs, or service dogs when used in the manner specified in Section 54.1 of the Civil Code.

(e) All garbage and rubbish shall be stored, and disposed of, in a manner approved by the enforcement officer.

(f) This section shall become operative on January 1, 1997.

Article 16. Swap Meet Prepackaged Food Stands

114360. (a) Swap meet prepackaged food stands operated by a swap meet operator offering prepackaged food for sale at a swap meet shall meet the requirements of Article 6 (commencing with Section 113975), Article 7 (commencing with Section 113990), and Article 8 (commencing with Section 114075).

(b) Notwithstanding subdivision (a), swap meet prepackaged food stands shall also meet the following requirements:

(1) Food preparation is prohibited.

(2) Foods, other than prepackaged foods, shall not be kept at these food facilities.

(3) Foods that are potentially hazardous as defined in Section 113845 may not be sold.

Article 17. Satellite Food Distribution Facilities

114363. This article governs general sanitation requirements for satellite food distribution facilities as defined in this chapter.

114365. All satellite food distribution facilities shall be subject to the applicable provisions of Article 6 (commencing with Section 113975) and Article 7 (commencing with Section 113990) and, in addition, shall meet all of the following requirements:

(a) All utensils and equipment shall be scrapped, cleaned, or sanitized as circumstances require.

(b) Utensils and equipment shall be handled and stored so as to be protected from contamination. Single-service utensils shall be contained only in sanitary containers or approved sanitary dispensers, stored in a clean, dry place until used, handled in a sanitary manner, and used once only.

Article 18. Restricted Food Service Transient Occupancy Establishments

114368. This article governs general sanitation requirements for restricted food service transient occupancy establishments, as defined in Section 113870.

114370. Except as otherwise set forth in this article, restricted food service transient occupancy establishments shall meet the applicable requirements in Article 6 (commencing with Section 113975), Article 7 (commencing with Section 113990), and Article 8 (commencing with Section 114075).

114375. For purposes of Section 114015, a restricted food service transient occupancy establishment shall not be deemed to be a ‘‘private home’’ solely because the owner or operator thereof resides

on the premises or prepares on the premises food for his or her consumption and that of his or her family.

114380. Notwithstanding Section 114020, restricted food service transient occupancy establishments shall not be required to post signs in toilet rooms in guestrooms.

114385. Restricted food service transient occupancy establishments shall be exempt from Section 114045; provided, however, that no live animal, bird, or fowl shall be kept or allowed in any portion of the premises where food for the registered guests of the establishment is used, stored, served, offered for sale, or given away. Aquariums and aviaries shall be allowed if enclosed so as not to create a public health problem.

114390. Restricted food service transient occupancy establishments shall be exempt from Section 114065; provided, however, that the enforcement officer shall have the right to disapprove any new or replacement equipment that would create a public health problem.

114395. Restricted food service transient occupancy establishments shall be exempt from the provisions of Section 114135; provided, however, that no person shall store clothing or personal effects in any area used for the storage or preparation of food.

114400. (a) All utensils and equipment shall be scrapped, cleaned, or sanitized as circumstances require.

(b) Restricted food service transient occupancy establishments shall comply with the provisions of subdivisions (b) to (e), inclusive, of Section 114090 or, at the option of the owner or operator of the establishment, shall utilize a domestic or commercial dishwasher for the purpose of cleaning and sanitizing multiservice kitchen utensils and multiservice consumer utensils; provided, however, that the dishwasher is capable of providing heat to the surface of the utensils of a temperature of at least 165 degrees Fahrenheit. Except as otherwise set forth in this subdivision, restricted food service transient occupancy establishments shall comply with Section 114090.

114405. Notwithstanding Section 114100, food preparation sinks in restricted food transient occupancy establishments need not have indirect sewer connections.

114410. Restricted food service transient occupancy establishments shall be exempt from the provisions of Section 114140; provided, however, that ventilation shall be provided to remove gases, odors, steam, heat, grease, vapors and smoke from the food establishment. In the event that the enforcement officer determines that the ventilation must be mechanical in nature, the ventilation shall be accomplished by methods approved by the department.

114415. In restricted food service transient occupancy establishments, only new and replacement walls and ceilings (or their coverings) need comply with Section 114155; provided,

however, that all walls and ceilings (and their coverings) must be maintained in a clean and sanitary condition.

114420. Restricted food service transient occupancy establishments shall be exempt from the provisions of subdivision (b) of Section 114165; provided, however, that hot water must be available for janitorial purposes and that waste water from janitorial activities cannot be disposed of in any sink used for washing utensils or for the preparation of food.

114425. Restricted food service transient occupancy establishments shall be exempt from Section 114175. However, no sleeping accommodations shall be allowed in any area where food is stored, prepared, or served.

114430. All food intended for consumption by guests shall be from an approved source. The use of home canned foods and meat and dairy products from unapproved sources is prohibited.

Article 19. Food Facility Food Donations

114435. Any food facility may donate, free of charge, food to a food bank or to any other nonprofit charitable organization for distribution to persons free of charge.

114440. For the purposes of this article, ‘‘nonprofit charitable organization’’ means any organization that was organized and is operating for charitable purposes and meets the requirements of Section 214 of the Revenue and Taxation Code.

114445. For the purposes of this article, ‘‘food bank’’ means a surplus food collection and distribution system operated and established to assist in bringing donated food to nonprofit charitable organizations and individuals for the purpose of reducing hunger and nutritional needs.

114450. No food facility that donates food as permitted by this article shall be subject to civil or criminal liability or penalty for violation of any laws, regulations, or ordinances regulating the labeling or packaging of the donated product or, with respect to any other laws, regulations, or ordinances, for a violation occurring after the time of the donation.

114455. The immunities provided in this article and by Section 1714.25 of the Civil Code are in addition to any other immunities provided by law including those provided by Chapter 5 (commencing with Section 58501) of Part 1 of Division 21 of the Food and Agricultural Code.

CHAPTER 4. RADIATION PROTECTION ACT OF 1988

Article 1. Radiation Protection

114650. (a) As used in this chapter:

(1) ''Office'' means the Office of Emergency Services.

(2) ''Department'' means the State Department of Health Services.

(3) ''Emergency planning zone'' means a zone identified in state and local government emergency plans where immediate decisions for effective public protective action may be necessary.

(4) ''Ingestion pathway zone'' means the 50-mile radius around each of the state's nuclear powerplants in which protective actions may be required to protect the food chain in the event of an emergency.

(5) ''Site'' means the location of a nuclear powerplant and its surrounding emergency planning zone.

(6) ''Plume emergency phase'' means the period beginning at the onset of an emergency at a nuclear powerplant when immediate decisions for public protective actions are needed.

(7) ''Ingestion pathway phase'' means the period beginning after any release of radioactive material from a nuclear powerplant accident when the plume emergency phase has ceased, and reliable environmental measurements are available for making decisions on additional protective actions to protect the food chain. The main concern is to prevent exposure from ingestion of contaminated water or food, such as milk, fresh vegetables, or aquatic foodstuffs.

(8) ''Recovery and reentry phase'' means the period when actions designed to reduce radiation levels in the environment to acceptable levels for unrestricted use are commenced, and ending when all recovery actions have been completed.

(9) ‘‘Local government’’ means a city or county that provides emergency response for a nuclear powerplant emergency.

(10) ‘‘Local jurisdiction’’ means an entity that provides emergency response for a nuclear powerplant emergency in accordance with the plans of a local government.

(11) ‘‘Interjurisdictional Planning Committee’’ means the planning committee, comprised of representatives of the Counties of Orange and San Diego, the Cities of Dana Point, San Clemente, San Juan Capistrano, the Camp Pendleton Marine Corps Base, the State Department of Parks and Recreation, and the Southern California Edison Company, established as a mechanism for coordinating integrated preparedness and response in the event of an emergency at the San Onofre Nuclear Generating Station.

114655. The Legislature hereby finds and declares as follows:

(a) Existing law requires the development of a nuclear powerplant emergency response program by state and local jurisdictions based on federal and state criteria.

(b) The office, in consultation with the department and the counties, has investigated the consequences of a serious nuclear powerplant accident and has established emergency planning zones for direct plume exposure and ingestion radiation pathways. These zones imply mutually supportive emergency planning and preparedness arrangements by all levels of government.

(c) An integrated emergency planning program is necessary for the benefit of the citizens within the planning zones.

(d) It is the intent of the Legislature that the office should be responsible for the coordination and integration of all emergency planning programs and response plans. The department has the lead technical role in the ingestion pathway and recovery and reentry phases. The office will coordinate the department’s support to local government. The state provides support to local government during the plume emergency phase and has the lead role in the ingestion pathway and recovery and reentry phases.

(e) It is the intent of the Legislature that local government shall be responsible for developing and maintaining an organization capable of implementing protective actions which safeguard public health and safety. Local government has the lead role in the plume emergency phase, and supports the state in the ingestion pathway and recovery and reentry phases.

(f) It is further the intent of the Legislature that nothing in this chapter shall limit the activities of any government carrying out its general responsibilities pertaining to the public health and safety aspects of emergency response.

Article 2. Responsibilities of the Department

114660. (a) The office shall be responsible for the coordination and integration of all emergency planning programs and response plans. The office shall also coordinate resources and activities to implement protective measures for safeguarding public health and safety.

(b) The office shall perform the following duties and functions:

(1) Coordinate the activities of all state agencies relating to preparation and implementation of the State Nuclear Powerplant Emergency Response Plan. The office shall be the focal point for coordinating nuclear powerplant emergency preparedness activities with local jurisdictions, other state agencies, federal agencies and other organizations.

(2) Exercise explicit, ultimate authority for allocating funds from the Nuclear Planning Assessment Special Account to local jurisdictions.

(3) Participate in exercises of the state's nuclear emergency response plan at least biennially to ensure that state personnel are adequately trained to respond in the event of an actual emergency. The exercises shall include the department and other relevant state agencies, and the office shall activate the State Operations Center of the office for each exercise.

(4) Perform an independent accident assessment, at the time of an emergency, in conjunction with the department. The office shall also review protective action recommendations given to local jurisdiction representatives in the dose assessment center.

(5) Coordinate planning guidance to state agencies and local jurisdictions.

(6) Develop and maintain the State Nuclear Powerplant Emergency Response Plan and procedures necessary to carry out those responsibilities and review and approve state agency plans in draft prior to publication.

(7) Exercise discretionary authority regarding the formation of interagency agreements with state agencies having local emergency responsibilities. The purpose of the interagency agreement is to ensure state agencies have updated emergency plans and trained emergency response personnel to respond during the plume emergency phase.

(8) Annually prepare and submit a report to any joint committee and Senate and Assembly policy committee with jurisdiction over emergency and disaster services which includes all of the following:

(A) A description of the purpose of all nuclear emergency response exercises in the state involving local and state authorities.

(B) A description of state and local government roles in each exercise.

(C) An accounting of revenues from each utility and a description of expenditures of special account funds by each jurisdiction and the state.

(D) A description of all nuclear emergency response training and education efforts undertaken by the state and local agencies, and identification of any additional training and educational needs.

(E) Recommendations consistent with this chapter.

(9) Conduct a study similar to that described in Section 8610.3 of the Government Code, for any nuclear powerplant with a generating capacity of 50 megawatts or more that is proposed for certification in this state.

114665. (a) The department shall have the lead technical role in the ingestion pathway and recovery and reentry phases of a nuclear powerplant emergency. The department shall ensure that its ingestion pathway and recovery and reentry plan is prepared, and shall provide guidelines for local government ingestion pathway and recovery and reentry plans.

(b) The department shall maintain plans for communicating public health information during the ingestion pathway and recovery and reentry emergency phases. The department shall also maintain a radiation emergency screening team, and shall maintain designation of medical facilities to care for any casualties.

(c) The department shall perform the following duties and functions:

(1) Act as the responsible entity for ensuring that ingestion pathway and recovery and reentry plans are maintained and ready to be implemented, including necessary training and exercises, in coordination with affected counties and the office.

(2) Establish protective action guidelines for ingestion pathway and recovery and reentry operations with due regard for compatibility with the recommendations of the Environmental Protection Agency.

(3) Establish criteria for, coordinate development and maintenance by counties of, and annually review an information catalogue of food, water, and animal resources for the 50-mile ingestion pathway zone around the San Onofre and Diablo Canyon nuclear generating stations.

(4) Establish measurement standards and procedures to assess radioactivity in exposure pathways, including, but not limited to, food, water, and animals, which are compatible with the Environmental Protection Agency's standards and procedures.

(5) Support local government nuclear emergency planning, training, exercises, and response in coordination with the office.

(6) Maintain plans for coordinating the dissemination of public health information during the recovery and reentry phase of a nuclear powerplant emergency.

(7) Maintain a Radiation Emergency Screening Team, also known as the Radiological Advisory Team and develop guidelines for the team. The team shall not be authorized to make decisions within the jurisdiction of emergency planning and response organizations. The guidelines for the team shall meet, but not be limited to, the following requirements:

(A) The team shall include individuals with expertise in medicine, radiation biology, radiation casualty management, emergency preparedness and disaster response, public health, and government and responsibilities.

(B) The team shall be available to advise the department on its nuclear powerplant emergency planning.

(C) The team shall be available for immediate response, 24 hours a day, during the emergency phase of a nuclear powerplant accident. Upon the request of the department, the team shall provide advice and counsel regarding initial patient management and casualty evacuation, and shall provide radiation exposure medical advice to field and hospital medical care providers. Activation of the department's emergency ''call-down'' list will provide the method of notification.

(D) Individuals shall be designated to serve as backup for members of the team who are unable to immediately respond to a radiation emergency.

(8) Maintain guidelines for the designation for one or more medical facilities which would be capable of managing and caring for casualties caused by a nuclear radiation accident.

(A) The facilities shall have the capability to provide the following:

(i) Provide radiologic and microbiologic isolation, as prescribed by the department, for 10 to 25 casualties.

(ii) Perform radioactivity measurements.

(iii) To quickly mobilize and augment the treatment staff to care for a sudden influx of casualties.

(B) In maintaining the team guidelines, the department shall consider input from other relevant groups or organizations, such as the California Conference of Local Health Officers, the California Medical Association, the California Association of Hospitals, and the University of California medical facilities.

(C) The department shall consider geographic location and critical and supportive care available when developing guidelines.

(D) The department shall designate facilities in accordance with the guidelines developed pursuant to subparagraph (A) of paragraph (8) of subdivision (c), and shall maintain a list of designated facilities.

114670. It is the intent of the Legislature to provide necessary funding for medical facilities designated by the department to enable each facility to be effective in receiving casualties from a nuclear radiation accident.

Article 4. Local Jurisdictions

114675. The Interjurisdictional Planning Committee for the San Onofre nuclear emergency response plan, shall appoint a chairperson who will be a discussion leader and decisionmaking facilitator during a nuclear powerplant accident.

114680. Any local jurisdiction within an Emergency Planning Zone, with responsibility to conduct nuclear response planning, shall annually provide nuclear emergency training to individuals within that zone who may be responsible for an evacuation or sheltering action, including, but not limited to, public school teachers, bus drivers, peace officers, public works officials, and fire officials.

114685. The office shall do all of the following: (a) When the Emergency Broadcast System is activated within an Emergency Planning Zone during a nuclear powerplant emergency, notify counties adjacent to the Emergency Planning Zone and provide these counties with details of the emergency. (b) Exercise explicit, ultimate authority for allocating funds from the Nuclear Planning Assessment Special Account to local jurisdictions. Purposes for which the office may approve reimbursement include expenditures related to equipment that is used by local jurisdictions primarily for nuclear powerplant emergency planning and response activities, prorated according to the percentage of use for these activities. (c) Ensure that counties within the Public Education Zones have a primary and backup communications capability with the county emergency operations centers located within the Emergency Planning Zones. (d) Consider, along with the local jurisdictions and the utilities, that emergency response personnel, as well as the public, may respond differently to a nuclear powerplant emergency than to a naturally occurring emergency, and to take this difference into account when developing training and education programs for nuclear powerplant emergencies. (e) Participate in exercises of the state’s nuclear emergency response plan at least once a year to ensure that state personnel are adequately trained to respond in the event of an actual emergency. The exercises shall include the department and other relevant state agencies and the office shall activate the State Operations Center of the office for each exercise. (f) In cooperation with local emergency response authorities and utilities operating nuclear power facilities, evaluate the primary and backup communications systems mandated by federal requirements for nuclear emergency response plans. If the office determines that a primary or backup communications system does not meet those requirements, the office shall report this determination to the utility and to the Federal Emergency Management Agency. (g) Investigate the feasibility, costs, and possible funding mechanisms for providing programmable transceivers for emergency response vehicles that may have to respond to a nuclear power plant emergency. The office

shall report to the director of the office and any joint committee and Senate and Assembly policy committee with jurisdiction over emergency and disaster services its findings and recommendations by December 31, 1989. (h) Commencing January 1, 1990, annually prepare and submit a report to any joint committee and Senate and Assembly policy committee with jurisdiction over emergency and disaster services that includes all of the following: (1) A description of the purpose of all nuclear emergency response exercises in the state involving local and state authorities. (2) A description of the office's role in each exercise. (3) An accounting of revenues spent from the Nuclear Planning Assessment Special Account from each utility, a description of expenditures of special account funds by each jurisdiction and the state, and explanations for any denied funding requests. (4) A description of all nuclear emergency response training and education efforts undertaken by the office, and identification of any additional training and education needs of state and local agencies, including specific reference to any agency that has not demonstrated adequate training of management and line personnel. (5) Recommendations consistent with this section.

Article 6. Responsibilities of Other Agencies

114690. The Department of Transportation shall include within its criteria for funding repair and construction projects the need for adequate emergency evacuation routes.

114695. State and local law enforcement agencies shall ensure that traffic flow plans for areas outside the Emergency Planning Zones adequately reflect the possible evacuation of residents outside the Emergency Planning Zones. State and local law enforcement agencies shall ensure that traffic flow plans take into consideration that some evacuation routes may be impassable under certain weather conditions and that these agencies should have plans for designating alternative routes.

114700. State law enforcement agencies shall ensure that officers who may be needed to respond during a nuclear powerplant emergency receive the necessary training, as well as refresher courses at least once per year.

CHAPTER 5. CONTAINMENT OF RADIOACTIVE MATERIALS

Article 1. Control of Radioactive Contamination of the Environment

114705. The Legislature finds and declares that radioactive contamination of the environment may subject the people of the State of California to unnecessary exposure to ionizing radiation unless it is properly controlled. It is therefore declared to be the

policy of this state that the department initiate and administer necessary programs of surveillance and control of those activities that could lead to the introduction of radioactive materials into the environment.

114710. As used in this article the following terms have the meanings described in this section.

(a) ''Department'' means the State Department of Health Services.

(b) ''Environment'' means all places outside the control of the person responsible for the radioactive materials.

(c) ''Field tracer study'' is any project, experiment, or study that includes provision for deliberate introduction of radioactive material into the environment for experimental or test purposes.

(d) ''Person'' includes any association of persons, copartnership or corporation.

(e) ''Radiation,'' or ''ionizing radiation,'' means gamma rays and X-rays; alpha and beta particles, high-speed electrons, neutrons, protons, and other nuclear particles; but not sound or radio waves, or visible, infrared, or ultraviolet light.

(f) ''Radioactive material'' means any material or combination of materials that spontaneously emits ionizing radiation.

(g) ''Radioactive waste'' means any radioactive material that is discarded as nonusable.

(h) ''Significant'' or ''significantly,'' as applied to radioactive contamination, means concentrations or amounts of radioactive material as are likely to expose persons to ionizing radiation equal to or greater than the guide levels published by the Federal Radiation Council.

(i) ''Radiological monitoring'' means the measurement of the amounts and kinds of radioactive materials in the environment.

114715. No person shall bury, throw away, or in any manner dispose of radioactive wastes within the state except in a manner and at locations as will result in no significant radioactive contamination of the environment.

114720. The department may, by written order, prohibit the disposal of radioactive wastes by any person when, upon investigation, it has determined that the disposal violates Section 114715.

114725. The department may, by written order, prohibit the storage, packaging, transporting, or loading of radioactive wastes if there is a reasonable likelihood that the activities will result in significant radioactive contamination of the environment.

114730. The person to whom an order has been issued pursuant to Section 114720 or 114725 may appeal the order of the department to any court of competent jurisdiction.

114735. The department may bring an action in a court of competent jurisdiction to enjoin the storage, packaging,

transporting, loading, or disposal of radioactive wastes in violation of any written order issued by the department pursuant to Section 114720 or 114725. The court may, if it appears necessary, enjoin any person from using radioactive material who thereby produces radioactive waste that the court finds is being disposed of in violation of this article.

114740. The department shall maintain surveillance over the storage, packaging, transporting, and loading of radioactive material within this state regardless of the material's ultimate destination. In carrying out its duties under this section, the department may enter into an agreement with the Division of Occupational Safety and Health and other state and local agencies to conduct any appropriate inspection and enforcement activities. Any agreement with state and local agencies shall not duplicate work to be done pursuant to agreement with the Division of Occupational Safety and Health, nor shall work done by the Division of Occupational Safety and Health duplicate work agreed to be done by other state and local agencies. Licensees of the Nuclear Regulatory Commission and the facilities of the Department of Energy and the Department of Defense are exempt from this section.

114745. No person shall operate a nuclear reactor, nuclear fuel reprocessing plant, or other installation, as defined by the department, that could, as a result of routine operations, accident, or negligence, significantly contaminate the environment with radioactive material, without first instituting and maintaining an adequate program of radiological monitoring. The proposed program shall be submitted to the department for review and acceptance as to its adequacy.

114750. No person shall conduct any field tracer study unless detailed plans of the study have been approved by the department. In reviewing proposed field tracer studies, the department shall consider at least the following elements:

(a) That there is shown to be a substantial public interest in the information intended to be obtained by the study.

(b) That the study will be performed by persons or agencies competent to handle and use the radioactive material safely and with due regard for potential effects on public health.

(c) That the study is planned so as to impose the least possible exposure to ionizing radiation consistent with achieving the study's desired objectives.

(d) That there is no likelihood that any person will be exposed to ionizing radiation in excess of guide levels published by the Federal Radiation Council. The department may, as a condition to its approval of a field tracer study, require a representative of the department to be present during the study.

114755. The department shall monitor radioactive materials in the environment, including radioactive materials in media such as

air, milk, food, and water in locations and with a frequency as the department may deem necessary to determine radiation exposure to the people of the state from the materials.

114760. The department shall, at least once per month, make public to news media the results of its monitoring of radioactive materials.

114765. Any regulations relating to radioactive material cargo, including, but not limited to, packing, marking, loading, handling, and transportation, shall be reviewed and made compatible with the federal regulations adopted pursuant to the federal Department of Transportation Docket No. HM-164, Notice No. 80-1, within 60 days of the date the federal regulations become effective.

114770. The department, utilizing available funds and in cooperation with the Department of Fish and Game and the Joint Committee on Fisheries and Aquaculture, shall do all of the following:

(a) Cooperate with any federal agency that conducts monitoring of marine life or ocean waters, or both, at the sites of radioactive waste dumping off the California coast to determine the effects of the dumping.

(b) Purchase and test samples of seafood taken in the vicinity of the Farallon Islands radioactive waste dump site to determine whether the seafood contains radioactivity beyond natural and artificial background levels.

(c) Establish a scientific advisory committee on ocean dumping of radioactive waste. The committee shall include, but not be limited to, scientists from the staffs of the department, the Department of Fish and Game, the California Coastal Commission, the Senate Office of Research, the Assembly Office of Research, the faculties of the University of California and the California State University, and private nonprofit marine resource and public policy organizations. The advisory committee shall meet at least once a year and design the procedures for the testing required by subdivision (b), subject to approval by the department. The advisory committee shall also analyze the results of the monitoring conducted pursuant to subdivision (a) and the testing conducted pursuant to subdivision (b), and make any recommendations that it deems appropriate to the department, the Department of Fish and Game, and the Legislature. The members of the committee shall serve without compensation.

(d) Take emergency action pursuant to the general authority contained in the Sherman Food, Drug, and Cosmetic Law (Part 5 (commencing with Section 109875)) to prohibit the commercial sale of seafood for human consumption if, in the judgment of the director, samples analyzed pursuant to subdivision (b), are found to contain radioactivity that poses a threat to human health.

114775. The department, utilizing available funds and in cooperation with the Department of Fish and Game and the Joint

Committee on Fisheries and Aquaculture, shall do all of the following:

(a) Cooperate with any federal agency that conducts monitoring of marine life or ocean waters, or both, at the sites of radioactive waste dumping off the California coast to determine the effects of the dumping.

(b) Purchase and test samples of seafood taken in the vicinity of the Farallon Islands radioactive waste dump site to determine whether the seafood contains radioactivity beyond natural and artificial background levels.

(c) Make annual reports to the Legislature on the implementation of this section, including any recommendations for legislation it deems necessary to protect the health of Californians.

(d) Take emergency action pursuant to the general authority contained in the Sherman Food, Drug, and Cosmetic Law (Part 5 (commencing with Section 109875)) to prohibit the commercial sale of seafood for human consumption if, in the judgment of the director, samples analyzed pursuant to subdivision (b), are found to contain radioactivity that poses a threat to human health.

114780. (a) The Legislature finds and declares that the dumping of radioactive waste, including the scuttling of radioactive nuclear submarines, into the Pacific Ocean, could adversely affect the California coastal zone.

(b) The California Coastal Commission, in cooperation when appropriate with the department, the Department of Justice, the Department of Fish and Game, and the Joint Committee on Fisheries and Aquaculture, shall use any means available to the commission, pursuant to law, to prevent any dumping of radioactive waste in the Pacific Ocean by any public or private entity, unless the commission finds that the dumping would be consistent with the goals and policies of Division 20 (commencing with Section 30000) of the Public Resources Code.

Article 2. Radiation Monitoring Devices for Nuclear Power Plants

114785. Each privately owned and publicly owned public utility operating a nuclear powerplant with a generating capacity of 50 megawatts or more shall establish a system of offsite radiation monitoring devices as specified by the Nuclear Regulatory Commission pursuant to Regulatory Guide 1.97 or related standards. The utility shall consult with the department and the appropriate county emergency services agency regarding the type, number, and locations of the radiation monitoring devices. The consultation with the department and the appropriate county emergency services agency shall be completed prior to submitting a plan to the Nuclear Regulatory Commission regarding the radiation monitoring devices.

114790. The information transmitted to the radiation monitoring displays in the technical support center or emergency operating facility of a nuclear powerplant shall be simultaneously transmitted to the Office of Emergency Services State Warning Center.

114795. The funds expended by privately owned utilities complying with this article shall be allowed for ratemaking purposes by the Public Utilities Commission. Publicly owned utilities shall include funds expended complying with this article in their rates.

114800. In no event shall a plant operator be required to spend more than one million dollars ($1,000,000) in capital outlay for a nuclear powerplant site in complying with this article.

114805. Nothing in this article shall require powerplant modifications or the conduct of operations that may be in conflict with conditions of the license to operate issued by the Nuclear Regulatory Commission or with other activities authorized by the Nuclear Regulatory Commission, or that may be in conflict with regulations of the Environmental Protection Agency.

114810. Failure to comply with this article shall not constitute the basis for an action in a court of law or in an administrative proceeding to enjoin or prevent the operation or start-up of a nuclear facility.

Article 3. Transportation of Radioactive Materials

114815. For the purposes of this article the term ''radioactive materials'' shall include any material or combination of materials that spontaneously emits ionizing radiation.

114820. (a) The department, with the assistance of the Office of Emergency Services, the State Energy Resources Conservation and Development Commission, and the Department of the California Highway Patrol shall, with respect to any fissile radioactive material coming within the definition of ''fissile class II,'' ''fissile class III,'' ''large quantity radioactive materials,'' or ''low-level radioactive waste'' provided by the regulations of the United States Department of Transportation (49 C.F.R. 173.389), do all of the following:

(1) Study the adequacy of current packaging requirements for radioactive materials.

(2) Study the effectiveness of special routing and timing of radioactive materials shipments for the protection of the public health.

(3) Study the advantages of establishing a tracking system for shipments of most hazardous radioactive materials.

(b) A report on these studies, together with recommendations for any necessary changes in transportation regulations, shall be submitted by the department to the Legislature on or before July 1, 1982.

(c) The department, with the assistance of the Office of Emergency Services, the State Energy Resources Conservation and

Development Commission, and the Department of the California Highway Patrol, shall extend the nuclear threat emergency response plan to include radioactive materials in transit and provide training for law enforcement officers in dealing with those threats.

(d) Subject to Section 114765, the department, in cooperation with the Department of the California Highway Patrol, shall adopt, in accordance with Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code, reasonable regulations that, in the judgment of the department, promote the safe transportation of radioactive materials. The regulations shall (1) prescribe the use of signs designating radioactive material cargo; shall designate, in accordance with the results of the studies done pursuant to subdivision (a), the manner in which the shipper shall give notice of the shipment to appropriate authorities; (2) prescribe the packing, marking, loading, and handling of radioactive materials, and the precautions necessary to determine whether the material when offered is in proper condition to transport, but shall not include the equipment and operation of the carrier vehicle; and (3) be reviewed and amended, as required, pursuant to Section 114765. The regulations shall be compatible with those established by the federal agency or agencies required or permitted by federal law to establish the regulations.

(e) Subject to Section 114765, the Department of the California Highway Patrol, after consulting with the department, shall adopt regulations specifying the time at which shipments may occur and the routes that are to be used in the transportation of cargoes of hazardous radioactive materials, as those materials are defined in regulations of the department.

114825. Regulations adopted by the department pursuant to Section 114820 may be enforced, within their respective jurisdictions, by any authorized representatives of the department, the Division of Industrial Safety of the Department of Industrial Relations, the Public Utilities Commission, the health department of any city or county, the Department of the California Highway Patrol, or any traffic officer as defined by Section 625 of the Vehicle Code.

114830. It is the legislative intention in enacting this article that the regulations adopted by the department pursuant to this article shall apply uniformly throughout the state, and no state agency, city, county, or other political subdivision of this state, including a chartered city or county, shall adopt or enforce any ordinance or regulation that is inconsistent with the regulations adopted by the department pursuant to this article.

114835. A violation of any regulation adopted by the department pursuant to Section 114820 is a misdemeanor.

CHAPTER 6. RADIOLOGIC TECHNOLOGY

Article 1. Declaration of Policy

114840. The Legislature finds and declares that the public health interest requires that the people of this state be protected from excessive and improper exposure to ionizing radiation. It is the purpose of this chapter to establish standards of education, training, and experience for persons who use X-rays on human beings and to prescribe means for assuring that these standards are met.

114845. The Legislature finds and declares that the public health interest requires that increased steps be taken to ensure the accuracy of mammograms, including increased inspections and calibration of equipment, competency requirements for radiologic technologists, accreditation of mammography facilities, and the use of computers to read mammograms.

Article 2. Definitions

114850. As used in this chapter:

(a) ''Department'' means the State Department of Health Services.

(b) ''Committee'' means the Radiologic Technology Certification Committee.

(c) ''Radiologic technology'' means the application of X-rays on human beings for diagnostic or therapeutic purposes.

(d) ''Radiologic technologist'' means any person other than a licentiate of the healing arts making application of X-rays to human beings for diagnostic or therapeutic purposes pursuant to subdivision (b) of Section 114870.

(e) ''Limited permit'' means a permit issued pursuant to subdivision (c) of Section 114870 to persons to conduct radiologic technology limited to the performance of certain procedures or the application of X-ray to specific areas of the human body, except for a mammogram.

(f) ''Approved school for radiologic technologists'' means a school that the department has determined provides a course of instruction in radiologic technology that is adequate to meet the purposes of this chapter.

(g) ''Supervision'' means responsibility for, and control of, quality, radiation safety, and technical aspects of all X-ray examinations and procedures.

(h) ''Licentiate of the healing arts'' means a person licensed under the provisions of the Medical Practice Act, and a person licensed under the provisions of the initiative act entitled ''An act prescribing the terms upon which licenses may be issued to practitioners of chiropractic, creating the State Board of Chiropractic Examiners and

declaring its powers and duties, prescribing penalties for violation thereof, and repealing all acts and parts of acts inconsistent herewith,'' approved by electors November 7, 1922, as amended, or under the ''Osteopathic Act.''

(i) ''Certified supervisor or operator'' means a licentiate of the healing arts who has been certified under subdivision (e) of Section 114870 or 107115 to supervise the operation of X-ray machines or to operate X-ray machines, or both.

(j) ''Student of radiologic technology'' means a person who has started and is in good standing in a course of instruction that, if completed, would permit the person to be certified a radiologic technologist or granted a limited permit upon satisfactory completion of any examination required by the department. ''Student of radiologic technology'' does not include any person who is a student in a school of medicine, chiropractic, podiatry, dentistry, dental radiography, or dental hygiene.

(k) ''Mammogram'' means an X-ray image of the human breast.

(*l*) ''Mammography'' means the procedure for creating a mammogram.

Article 3. Radiologic Technology Certification

114855. The department shall appoint a certification committee to assist, advise, and make recommendations for the establishment of regulations necessary to insure the proper administration and enforcement of this chapter, and for those purposes to serve as consultants to the department. The appointments shall be made from lists of at least three nominees for each position submitted by appropriate professional associations and societies designated by the Director of Health Services, and provisions shall be made for orderly rotation of membership.

114860. The committee shall consist of the director or his or her designate, who shall serve as chairperson ex officio, but who shall not vote, and the following 11 members who are residents of the state:

(a) Six physicians and surgeons licensed to practice medicine in this state, three of whom shall be certified in radiology by the American Board of Radiology. At least one of the radiologists shall be representative of the hospital practice of radiology.

(b) Two persons with at least five years' experience in the practice of radiologic technology. At least one of these persons shall be representative of the hospital practice of radiologic technology. Except for the appointment of these two persons to the first committee, every person thereafter appointed to the committee under this subdivision shall be certified as a radiologic technologist.

(c) One radiological physicist, qualified in the use of physics in the practice of medicine.

(d) One podiatrist licensed to practice podiatry in this state.

(e) One chiropractic practitioner licensed to practice chiropractic in this state.

114865. Members of the committee shall serve without compensation but shall receive their actual and necessary expenses incurred in the performance of the duties of their office.

Article 4. Committee Administration and Regulations

114870. The department shall:

(a) Upon recommendation of the committee, adopt regulations as may be necessary to accomplish the purposes of this chapter.

(b) Provide for certification of radiologic technologists, without limitation as to procedures or areas of application, except as provided in Section 106980. Separate certificates shall be provided for diagnostic radiologic technology, for mammographic radiologic technology, and for therapeutic radiologic technology. If a person has received accreditation to perform mammography from a private accreditation organization, the department shall consider this accreditation when deciding to issue a mammographic radiologic technology certificate.

(c) Provide, as may be deemed appropriate, for granting limited permits to persons to conduct radiologic technology limited to the performance of certain procedures or the application of X-ray to specific areas of the human body, except for mammography, prescribe minimum standards of training and experience for these persons, and prescribe procedures for examining applicants for limited permits. The minimum standards shall include a requirement that persons granted limited permits under this subdivision shall meet those fundamental requirements in basic radiological health training and knowledge similar to those required for persons certified under subdivision (b) of this section as the department determines are reasonably necessary for the protection of the health and safety of the public.

(d) Provide for the approval of schools for radiologic technologists.

(e) Provide, upon recommendation of the committee, for certification of licentiates of the healing arts to supervise the operation of X-ray machines or to operate X-ray machines, or both, prescribe minimum standards of training and experience for these licentiates of the healing arts, and prescribe procedures for examining applicants for certification. This certification may limit the use of X-rays to certain X-ray procedures and the application of X-rays to specific areas of the human body.

(f) Upon recommendation of the committee, exempt from certification requirements licentiates of the healing arts who have successfully completed formal courses in schools certified by the department and who have successfully passed a roentgenology

technology and radiation protection examination approved by the department and administered by the board that issued his or her license.

114875. The department may, upon application, on a form prescribed and supplied by the department, by a licentiate of the healing arts, approve the licentiate to give on-the-job training, based on instructional standards prescribed by the department, to a student of radiologic technology if the following requirements are complied with:

(a) The training is restricted to applicants for limited permits in one category or an approved combination of categories.

(b) The training is given by a certified supervisor or operator.

(c) The didactic instruction and clinical experience are equivalent to that required of approved schools for radiologic technology limited permits and shall be outlined by the department in a manual or syllabus.

(d) On-the-job training may not exceed one year for any one student.

(e) There shall not be at any one time more than one student per licentiate.

(f) Records, subject to department inspection, shall be kept of hours of didactic training given the student and the number and kind of clinical procedures performed by the student. If the licentiate does not choose to give both clinical and didactic on-the-job training, as prescribed by the department, that portion not given by the licentiate shall be taken in a school approved by the department pursuant to Section 114870.

The department may establish and collect fees in an amount sufficient to defray the cost incurred by the department in administering the program of on-the-job training authorized by this section.

114880. Any regulations adopted by the department pursuant to subdivision (a) of Section 114870 shall be adopted only after consultation with and approval of the committee. Approval of those regulations shall be made by six affirmative votes of those present at an official meeting of the committee.

114885. The department shall, upon individual application, grant special permits to persons, excepting those persons from specific provisions of this chapter or of the regulations issued thereunder, if the department finds to its satisfaction that there is substantial evidence that the people in the locality of this state, in which the exemption is sought, would be denied adequate medical care because of unavailability of certified or certifiable radiologic technologists. Those special permits shall be granted for limited periods of time to be prescribed by the department in accordance with the purposes of this chapter, and the permits may be renewed.

114890. Notwithstanding Section 107075, any person who violates any provision of this chapter relating to mammography or regulations adopted pursuant to those provisions is guilty of a misdemeanor and shall, upon conviction, be punished by a fine not to exceed five thousand dollars ($5,000) per day, per offense or by imprisonment in the county jail not to exceed 180 days, or by both the fine and imprisonment.

114895. (a) Any person who intentionally or through gross negligence violates any provision of this chapter relating to mammography, or any rule or regulation adopted relating to mammography, or who fails or refuses to comply with a cease and desist order or other order of the department issued thereunder, which action causes a substantial danger to the health of others, shall be liable for a civil penalty not to exceed five thousand dollars ($5,000) per day, per offense.

(b) The remedies under this section are in addition to, and do not supersede or limit, any and all other remedies, civil or criminal.

CHAPTER 7. ATOMIC ENERGY DEVELOPMENT

Article 1. Short Title

114900. This chapter may be cited and shall be known as the California Atomic Energy Development Law.

Article 2. Declaration of Policy

114905. The Legislature finds and declares that the peacetime uses of atomic energy and radiation can be instrumental in improving the health, welfare and economic productivity of the people of the State of California if properly utilized, and may be hazardous to the health and safety of the public if carelessly or excessively employed. It is therefore declared to be the policy of the state to:

(a) Encourage the constructive development of industries producing or utilizing atomic energy and radiation and to eliminate unnecessary exposure of the public to ionizing radiation.

(b) Have state agencies retain their traditional jurisdictions wherever possible.

(c) Have various departments and agencies of the state that are concerned with atomic energy and radiation and its various applications develop programs designed to protect the people of the state from unnecessary exposure to radiation.

(d) Assure the coordination of the programs of the state agencies and the laws, regulations incident thereto and to insure the coordination of these activities with the development and regulatory activities of local agencies, other states and the government of the United States, including the Atomic Energy Commission.

(e) Keep the public, labor, industry, and all other legitimate interests as completely informed as possible on all matters relating to peacetime atomic energy and radiation development and control in this state.

114907. ''Atomic energy'' means all forms of energy released in the course of nuclear transformation.

114908. As used in this chapter, ''secretary'' means the Secretary of the Resources Agency.

Article 3. Coordination of Atomic Energy Development

114910. The secretary shall perform the liaison function between the state and the federal government, including the United States Atomic Energy Commission, and between this state and other states in matters pertaining to atomic energy development.

114915. The secretary shall coordinate the programs, and regulations of the several departments and agencies of the state and the cities and counties relating to atomic energy development, and shall so far as may be practicable coordinate the studies conducted and the recommendations and proposals made in this state on these subjects with like activities in other states and by the federal government and with the policies and regulations of the United States Atomic Energy Commission.

The departments and agencies of the state which are concerned with atomic energy development, and the cities and counties, shall keep the secretary currently informed as to their activities and programs relating to atomic energy development.

114920. No rule or regulation applying to atomic energy development, or amendment thereto or repeal thereof, that any state agency may propose to adopt, unless it is an emergency regulation, shall be noticed under Section 11346.4 of the Government Code prior to 30 days after it has been submitted to the secretary for comments, recommendations, or suggestions as he or she may deem necessary or desirable with respect thereto, unless the secretary in writing waives all or a portion of the 30-day period.

114925. Whenever the secretary determines that an existing or proposed regulation is inconsistent with any regulation of another agency of the state, he or she may, after consultation with the agencies involved, find that the proposed regulation is inconsistent with a regulation of the other agency and shall issue an order to that effect, in which event the proposed rule or regulation shall not become effective. The secretary may, in the alternative, upon a similar determination, direct the appropriate agency to amend or repeal the existing regulation to achieve consistency with the proposed regulation.

114930. The secretary may, when he or she deems necessary or appropriate, recommend to any state department or other state

agency the adoption, amendment, or repeal of regulations relating to atomic energy development.

114935. The secretary shall keep the Governor and the various interested state departments and agencies and the cities and counties informed of private and public activities affecting the peacetime uses of atomic energy.

114940. The secretary shall disseminate to the public factual data and information and interpretations thereof concerning atomic energy development and the uses of radiation in the state with the view to providing a reliable source of accurate information relating to the benefits and hazards of such development and uses. Data and information relating to hazards of radiation shall be developed and disseminated in cooperation with the State Department of Health, as provided for in paragraph (3) of subdivision (e) of Section 115000.

114945. The secretary may consult with and seek the advice of technically qualified persons within and without the state to advise on matters relating to atomic energy, particularly with regard to regulations relating to atomic energy development usage.

114950. The department shall keep current information on the permits or licenses issued by the United States Atomic Energy Commission in the state and, along with current information on the radiation sources licensed or registered under the provisions of Section 115060, shall transmit the information upon request to any state department or agency or member of the public.

114955. Nothing contained in this chapter shall impair the authority or jurisdiction of the State Water Resources Control Board or any of the regional water quality control boards in this state to regulate the discharge of waste for the protection of the quality of waters of this state.

CHAPTER 8. RADIATION CONTROL LAW

Article 1. General

114960. This chapter shall be known, and may be cited, as the Radiation Control Law.

114965. It is the policy of the State of California, in furtherance of its responsibility to protect the public health and safety, to institute and maintain a regulatory program for sources of ionizing radiation so as to provide for: (a) compatibility with the standards and regulatory programs of the federal government, (b) an integrated effective system of regulation within the State, and (c) a system consonant insofar as possible with those of other states.

114970. It is the purpose of this chapter to effectuate the policies set forth in Section 114965 by providing for programs to:

(a) Effectively regulate sources of ionizing radiation for the protection of the occupational and public health and safety.

(b) Promote an orderly regulatory pattern within the State, among the states, and between the federal government and the State, and facilitate intergovernmental co-operation with respect to use and regulation of sources of ionizing radiation to the end that duplication of regulation may be minimized.

(c) Establish procedures for assumption and performance of certain regulatory responsibilities with respect to byproduct, source, and special nuclear materials.

(d) Permit maximum utilization of sources of ionizing radiation consistent with the health and safety of the public.

114975. Rules and regulations adopted under this chapter shall be adopted in accordance with Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code, and Sections 25733 and 114920 of this code.

114980. (a) The Radiation Control Fund is hereby created as a special fund in the State Treasury. All moneys, including fees, penalties, interest earned, and fines collected under Sections 107160, 107100, 115045, 115065, and 115080, and the regulations adopted pursuant to those sections, shall be deposited in the Radiation Control Fund to cover the costs related to the enforcement of this chapter, Article 6 (commencing with Section 107150) of Chapter 4 of Part 1, and the Radiologic Technology Act (Section 27), and shall be available for expenditure by the department only upon appropriation by the Legislature. In addition to any moneys collected by, or on behalf of, the department for deposit in the Radiation Control Fund, all interest earned by the Radiation Control Fund shall be deposited in the Radiation Control Fund.

(b) This section shall become operative on July 1, 1993.

114985. As used in this chapter:

(a) ''Secretary'' means the Secretary of the Resources Agency.

(b) ''Ionizing radiation'' means gamma rays and X-rays; alpha and beta particles, high-speed electrons, neutrons, protons, and other nuclear particles; but not sound or radio waves, or visible, infrared, or ultraviolet light.

(c) ''Person'' means any individual, corporation, partnership, limited liability company, firm, association, trust, estate, public or private institution, group, agency, political subdivision of this state, any other state or political subdivision or agency thereof, and any legal successor, representative, agent, or agency of the foregoing, other than the United States Nuclear Regulatory Commission, the United States Department of Energy, or any successor thereto, and other than federal government agencies licensed by the United States Nuclear Regulatory Commission, under prime contract to the United States Department of Energy, or any successor thereto.

(d) ''Byproduct material'' means any radioactive material, except special nuclear material, yielded in, or made radioactive by exposure

to the radiation incident to, the process of producing or utilizing special nuclear material.

(e) ''Source material'' means (1) uranium, thorium, or any other material which the department declares by rule to be source material after the United States Nuclear Regulatory Commission, or any successor thereto, has determined the material to be such; or (2) ores containing one or more of the foregoing materials, in such concentration as the department declares by rule to be source material after the United States Nuclear Regulatory Commission, or any successor thereto, has determined the material in such concentration to be source material.

(f) ''Special nuclear material'' means (1) plutonium, uranium 233, uranium enriched in the isotope 233 or in the isotope 235, and any other material which the department declares by rule to be special nuclear material after the United States Nuclear Regulatory Commission, or any successor thereto, has determined the material to be such, but does not include source material; or (2) any material artificially enriched by any of the foregoing, but does not include source material.

(g) ''General license'' means a license, pursuant to regulations promulgated by the department, effective without the filing of an application, to transfer, acquire, own, possess or use quantities of, or devices or equipment utilizing, byproduct, source, or special nuclear materials or other radioactive material occurring naturally or produced artificially.

(h) ''Specific license'' means a license, issued after application, to use, manufacture, produce, transfer, receive, acquire, own, or possess quantities of, or devices or equipment utilizing, byproduct, source, or special nuclear materials or other radioactive material occurring naturally or produced artificially.

(i) ''Registration'' means the reporting of possession of a source of radiation and the furnishing of information with respect thereto, in accordance with subdivision (b) of Section 115060.

(j) ''Department'' means the State Department of Health Services.

(k) ''Director'' means the State Director of Health Services.

(*l*) ''Federal research and development activity'' means any activity of the Secretary of Energy conducted at any research facility owned or operated by the United States Department of Energy.

(m) ''Low-level waste'' means radioactive waste not classified as high-level radioactive waste, transuranic waste, spent nuclear fuel, or the byproduct material defined in Section 11(e)(2) of the Atomic Energy Act of 1954 (42 U.S.C. Sec. 2014 (e)(2)). For purposes of this subdivision, the following definitions shall apply:

(1) ''High-level radioactive waste'' means either of the following:

(A) The highly radioactive material resulting from the reprocessing of spent nuclear fuel, including liquid waste produced

directly in reprocessing and any solid material derived from this liquid waste that contains fission products in sufficient concentrations.

(B) Other highly radioactive material that the Nuclear Regulatory Commission, consistent with existing law, determines by rule requires permanent isolation.

(2) ''Spent nuclear fuel'' means fuel that has been withdrawn from a nuclear reactor following irradiation, the constituent elements of which have not been separated by reprocessing.

(3) ''Transuranic waste'' means any waste containing more than 100 nanocuries of alpha emitting transuranic nuclides with half-life greater than five years per gram of waste material.

(n) ''Mammogram'' means an X-ray image of the human breast.

(o) ''Mammography'' means the procedure for creating a mammogram.

(p) ''Mammography quality assurance'' means the detection of a change in X-ray and ancillary equipment that adversely affects the quality of films and the glandular radiation dose, and the correction of this change.

(q) ''Mammogram certification'' means a certification, issued by the department after registration, that the equipment dedicated to or used for mammography meets the standards prescribed pursuant to this chapter.

Article 3. Control Agency

114990. The department is designated as the agency responsible for the issuance of licenses. In carrying out its duties under this section, the department may enter into an agreement with the Division of Occupational Safety and Health and other state and local agencies to conduct technical evaluations of license applications prior to issuance of licenses. The agreements shall also include provisions for conducting inspections in accordance with Section 115095.

114995. The authority of the department to issue licenses pursuant to Section 114990 is not affected by any requirements to conduct studies or planning efforts specified in Section 115005.

115000. The department shall, for the protection of public health and safety do all of the following:

(a) Develop programs for evaluation of hazards associated with use of sources of ionizing radiation.

(b) Develop programs, with due regard for compatibility with federal programs, for licensing and regulation of byproduct, source, and special nuclear materials, and other radioactive materials.

(c) Except as provided in Section 18930, adopt regulations relating to control of other sources of ionizing radiation.

(d) Issue any regulations that may be necessary in connection with proceedings under Article 4 (commencing with Section 115060).

(e) Collect and disseminate information relating to control of sources of ionizing radiation, including all of the following:

(1) Maintenance of a file of all license applications, issuances, denials, amendments, transfers, renewals, modifications, suspensions, and revocations.

(2) Maintenance of a file of all regulations relating to regulation of sources of ionizing radiation, pending or adopted, and proceedings thereon.

(3) Disseminate information regarding the evaluation of hazards associated with the use of sources of ionizing radiation.

Nothing in this chapter shall be construed as precluding the Division of Occupational Safety and Health from adopting and enforcing regulations relating to matters within its jurisdiction consistent with, in furtherance of, and designed to implement this chapter and the regulations adopted thereunder.

115005. In addition to the requirements imposed by Section 115000, the department shall develop an overall plan, in consultation with other state, regional, and federal agencies, for the management, treatment, and disposal of low-level radioactive waste generated within California. The plan shall contain, at a minimum, all of the following elements:

(a) Specific contingency plans to address the needs of the state for the short-term storage of low-level radioactive waste in the event of a precipitous closure of existing out-of-state commercial waste disposal facilities and to evaluate feasible alternatives for meeting the state's needs. This element of the plan shall include, but is not limited to, all of the following factors:

(1) The amount and kinds of low-level radioactive waste generated by California licensees and current disposal locations.

(2) The size and nature of an interim storage facility required to meet California's interim low-level radioactive waste disposal needs.

(3) The cost of developing and operating an interim storage site by the department or contracting organizations.

(4) Criteria for the siting of an interim storage site, including, but not limited to, all of the following:

(A) Proximity to population.

(B) Geologic stability.

(C) Proximity to ground or surface water.

(D) Availability of transportation.

(E) General public health and economic considerations.

This element of the plan shall be completed and submitted to the appropriate committees of each house of the Legislature on or before December 31, 1982.

(b) A classification scheme for the separation of low-level waste that will facilitate the management, treatment, storage, and ultimate disposal of the waste. This classification scheme shall consider the matters as possible de minimus radiation levels for specific radionuclides, the quantity and specific activity of the material, its persistence, toxicity, chemical form, reactivity, and the principal radionuclides present. The classification scheme shall also include the specifications necessary to determine which classes of waste may or may not be accepted for storage in an interim storage facility stablished pursuant to Section 115045, that may or may not be held by the licensee for decay to specified residual radioactivity levels and that require long-term isolation from the environment, as the case may be, for the protection of the public health and safety. The department may require as a condition of licensure the submission of information necessary to determine the total amount of waste produced in each class of the classification scheme. The department may, by regulation, adopt the classification scheme establishing which wastes may or may not be accepted at an interim storage facility or at a treatment or disposal facility.

This element of the plan shall be completed and submitted to the appropriate committees of each house of the Legislature on or before December 31, 1982.

(c) Siting criteria for potential land burial disposal sites and treatment facilities within the state. In establishing these criteria, the department shall consider the following factors, including, but not limited to:

(1) The present and projected future uses of land, water, and natural resources.

(2) The proximity of the site to major population centers.

(3) The presence of active earthquake faults.

(4) Geologic and other natural barriers which protect against surface or groundwater contamination.

(5) The effectiveness of engineered barriers, waste treatment, and waste packaging in ensuring isolation of the waste from the environment.

(6) Transportation of radioactive materials as it relates to public health and safety.

(7) The relative economic impact of location and operation of treatment or disposal facilities.

This element of the plan shall be completed and submitted to the appropriate committees of each house of the Legislature on or before December 31, 1982.

(d) A plan of action to minimize the environmental, occupational, and public health impact of low-level radioactive waste and to protect the public health and safety by encouraging a reduction in the amount and toxicity of waste produced. This activity shall include conducting or having studies conducted that evaluate the technical

and economic feasibility of (1) reducing the volume, reactivity, and chemical and radioactive hazard of the waste, (2) cleaning contaminated, nonactivated metals and other materials to permit their recycle and reuse, and (3) substituting nonradioactive or short-lived radioactive materials for those radionuclides that require long-term isolation from the environment. The results of these studies, along with the departmental recommendations for their implementation, shall be reported by the department to the appropriate committees of the Legislature on or before December 31, 1983.

(e) Within six months after September 28, 1983, the Governor shall direct the appropriate state agency or agencies, as determined by the Governor, to conduct and complete a study that identifies those regions of the state within which it is likely the criteria developed pursuant to subdivision (c) could be met. The state agency or agencies, so directed, may also request, when appropriate, the assistance of state or federal agencies or private organizations.

115010. (a) The department shall not grant any license to receive radioactive material from other persons for disposal on land unless all of the following requirements are satisfied:

(1) The land on which the radioactive wastes are to be buried is owned by the federal or state government.

(2) The department determines that the site is consistent with the public health and safety.

(3) The applicant for the license will comply with the emergency regulations adopted by the department pursuant to subdivision (b).

(b) Not later than six months after September 28, 1983, the department shall adopt emergency regulations for the licensing of those persons engaged in the disposal of low-level radioactive waste and for implementing this section and Sections 115015, 115020, and 115030.

The emergency regulations shall be consistent with the federal regulations found in Sections 301 through 311, inclusive, of Part 20 of Title 10 and in Part 61 of Title 10 of the Code of Federal Regulations (Federal Register, Vol. 47, No. 28, page 57446, December 27, 1982) and shall be adopted solely for the purposes of clarifying and rendering specific, for application in California, these federal regulations and implementing this section and Sections 115015, 115020, and 115030.

(c) The emergency regulations specified in subdivision (b) shall be adopted by the department in accordance with Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code, and for the purposes of that chapter, including Section 11349.6 of the Government Code, the adoption of these regulations is an emergency and shall be considered by the Office of Administrative Law as necessary for the immediate preservation of the public peace, health and safety, and general

welfare. Notwithstanding Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code, any emergency regulations adopted by the department pursuant to this subdivision shall not be repealed by the Office of Administrative Law and shall remain in effect until revised or repealed by the department.

(d) The department may, by emergency regulation adopted in accordance with subdivision (c), establish and collect a fee for the issuance or renewal of a license specified in subdivision (a).

115015. The department may limit the number of licenses issued pursuant to Sections 114990, 115010, and 115020 authorizing the receipt of radioactive material from other persons for disposal on land.

115020. (a) All applicants filing a statement of capabilities and notice of intention to file an application for a license to receive radioactive materials from other persons for disposal on land shall file the statement and notice within three months after the department adopts the emergency regulations specified in subdivision (b) of Section 115010. Within 45 days after the termination of that three-month filing period, the department shall evaluate the statements of capabilities and notices of intent. The director shall determine, within that 45-day period, whether the department has received one or more statements and notices that are likely to result in the filing of an application for a license satisfying the requirements of Section 115010.

(b) If the director determines, within the 45-day period specified in subdivision (a), that the department has received one or more statements of capabilities and notices of intent which are likely to result in the filing of an application for a license, the department shall, within the 45-day period, select one of the applicants who filed the statement of capabilities and notice of intent to file a license application as a license designee.

(c) The department shall adopt emergency regulations establishing procedures for the review and evaluation of the statements of capabilities and notices of intent, as specified in subdivision (a), and for the selection of a license designee, as specified in subdivision (b). These emergency regulations shall be adopted by the department in accordance with subdivision (c) of Section 115010 and shall include procedures for soliciting, evaluating, ranking, and designating license designees and for selecting alternative license designees based upon the ranking.

(d) The department may solicit additional statements of capabilities and notices of intent if a license designee withdraws or becomes ineligible for licensing, or if a license is issued and is then suspended, revoked, or terminated.

(e) The department may, by emergency regulations adopted in accordance with subdivision (c) of Section 115010, establish and collect a fee for filing a statement of capabilities and notice of intent.

(f) The department may require that a person selected as a license designee pursuant to this section post a bond of up to one million dollars ($1,000,000) to guarantee that the person will carry out the activities connected with completing the license application and obtaining the license. The department shall, by emergency regulation adopted in accordance with subdivision (c) of Section 115010, establish standards for the forfeiture of the bond.

115025. (a) If, within 45 days after the termination of the three-month filing period specified in subdivision (a) of Section 115020, the director determines that the department has not received a statement of capabilities and a notice of intent to file an application for a license to receive radioactive materials from other persons for disposal on land that is likely to result in the filing of an application that satisfies the requirements of Section 115010, the director shall notify the Secretary of the Resources Agency.

(b) Within one year after receiving the notification specified in subdivision (a), the Secretary of the Resources Agency shall file with the department an application for a license to receive radioactive materials from other persons for disposal on land at a site within a region identified pursuant to subdivision (e) of Section 115005 and that is owned, operated, or both, by the state.

(c) (1) Upon the request of the Resources Agency, the Director of Finance may provide a loan from the General Fund to the Resources Agency for the purposes of implementing this section. The Resources Agency shall repay any loans made pursuant to this section pursuant to the terms and conditions prescribed by the Department of Finance, including interest at the rate set by the Pooled Money Investment Board pursuant to Section 16314 of the Government Code.

(2) The Director of Finance shall not provide more than two million dollars ($2,000,000) pursuant to this subdivision during the 1983–84 fiscal year. The amount for loans in the 1984–85 fiscal year, and subsequent fiscal years, shall be specified annually in the Budget Act and the total of all loans made pursuant to this subdivision shall not exceed fifteen million dollars ($15,000,000).

(d) If a radioactive materials disposal site that is owned, operated, or both, by the state is established pursuant to this section, the Secretary of the Resources Agency shall establish a schedule of fees to be charged each person who disposes of radioactive materials at the site. The schedule of fees shall be set at an amount sufficient to reimburse the state for any costs incurred in developing, constructing, and operating the site.

115030. The department may require that all schedules of fees charged for the disposal of radioactive material by a person owning

or operating a site licensed pursuant to Section 115010 are to be submitted to the department prior to their implementation. The department may determine, following a public hearing and based upon written findings, if the fees to be charged are reasonable and may require the owner or operator to modify the fee schedule if so determined by the department.

115035. In addition to the fees authorized to be levied pursuant to Section 115065, the department may, by regulation, set fees to be paid for the disposal in the state of low-level radioactive waste, set in an amount sufficient to pay the costs of the regulatory activities specified in paragraphs (2) and (3) of subdivision (E) of Article 4 of the Southwestern Low-Level Radioactive Waste Disposal Compact, as specified in Section 115255.

115040. (a) The license designee shall file periodic financial reports with the department as directed by the department. These reports shall provide detailed information on past and projected expenditures for development and operation of the low-level radioactive waste disposal site according to progammatic function, including, but not limited to, all of the following:

(1) Program management.
(2) Candidate sites selection.
(3) Site characterization.
(4) Environmental.
(5) Public and agency involvement.
(6) Licensing and permitting.
(7) Site development.
(8) Land acquisition.
(9) Financing.
(10) Operations.

(b) The license designee shall file reports with the department, as directed by the department, that identify, quantify, and explain major causes of actual and projected cost overruns and cost underruns with regard to the cost projections provided in the statement of capabilities and notice of intent.

(c) The Legislature finds and declares that the purpose of this section is to identify minimum financial reporting requirements for the costs of developing and operating the state's low-level radioactive waste disposal facility. This section does not limit the authority of the department to require the license designee to furnish any additional information that the department determines to be necessary to fulfill its duties under this chapter, including Section 115030.

115045. (a) The department is authorized, pursuant to subdivision (d), to establish and operate, or contract for the establishment and contract for operation, of one or more low-level radioactive waste interim storage facilities for the exclusive use of persons located in California who are licensed by the department or the United States Nuclear Regulatory Commission.

(b) In addition to the fees authorized to be levied pursuant to Section 115065, the department is authorized to set and collect fees, by regulation, to be paid by generators in California of low-level radioactive waste in an amount sufficient to support the development and operation of the facilities including the surveillance and repair of damaged packages, maintenance of the facilities, decontamination, decommissioning, and postclosure maintenance of these facilities, recordkeeping systems, and other activities as the department finds necessary to ensure the safe operation of such a facility. In no event shall any fee be set in an amount that exceeds the amount reasonably necessary to implement this section. The department is also authorized to require the operators or the users of the facilities to post bonds or possess adequate insurance as may be reasonably necessary to protect the state against such liabilities as storage and ultimate disposal costs for abandoned waste and against claims arising out of accidents or failures of the storage facility.

(c) All users of any facility operated pursuant to this section must all meet state and federal orders, requirements, or regulations for handling and management of low-level radioactive waste including those prescribed pursuant to subdivision (b) of Section 115005.

(d) No low-level radioactive waste interim storage facility may be established pursuant to subdivision (a) until all of the following occurs:

(1) The department has fulfilled the requirements of subdivisions (a) and (b) of Section 115005 and has submitted its findings to the Legislature.

(2) The establishment of the interim storage facility is consistent with the elements of the low-level radioactive waste disposal plan specified in subdivisions (a) and (b) of Section 115005.

(3) The department files a notice with the Legislature, while in session, 60 days before establishing the facility.

(e) In addition to any other grounds authorizing the department, or any person with whom it contracts, to cease the operation of a low-level radioactive waste interim storage facility, any such facility shall cease accepting low-level radioactive waste for interim storage (1) no later than five years after the date it commences operating or (2) if the director determines that an alternate disposal site is available to California licensees in the western region of the United States, whichever event occurs first.

(f) Within seven years of commencing operation of any interim storage facility all wastes stored at the facility shall be transferred to a permanent land burial disposal site or permanently disposed of by some other treatment or means of disposal and the facility shall be closed and thereafter, to the extent necessary, as determined by the department, decontaminated and decommissioned.

(g) This section shall remain in effect for a period of eight years from the date of the establishment of a low-level radioactive waste interim storage facility pursuant to this section, and as of that date is repealed. The director shall report the date the facility is established to the appropriate committees of each house of the Legislature and the Legislative Counsel Bureau.

115050. The Governor shall negotiate and enter into interstate agreements, interstate compacts, or agreements with compacts, for the purpose of establishing access to, or maintaining access to, land disposal facilities for low-level radioactive waste generated in California. The terms of the agreement or compact may include, but are not limited to, a provision that the other parties to the agreement or compact will have reciprocal access to California permanent disposal facilities, when operational.

The Governor shall report to the Legislature on the status of these negotiations within four months after September 28, 1983, and every four months thereafter, until an agreement or compact is entered into or the negotiations are terminated.

Any agreement or compact that proposes membership for California in a compact made pursuant to the Low-Level Radioactive Waste Policy Act (42 U.S.C. Secs. 2021b to 2021d, inclusive) or any interstate agreement or agreement with a compact that includes a provision that the other parties to the agreement will have reciprocal access to California permanent disposal facilities, when operational, shall be submitted to the Legislature for ratification by statute.

115055. The director shall appoint, in consultation with the Chairperson of the Senate Committee on Rules and the Speaker of the Assembly, an advisory committee to advise the department regarding methods for minimizing the environmental impact of low-level wastes, criteria for siting low-level waste treatment and burial facilities, alternatives to land burial of low-level waste, and waste classification schemes.

The committee shall include representatives from the field of medicine, and from research, industrial, environmental, and public health organizations, who have demonstrated expertise and experience with radioactive materials, waste management, the health effects of exposure to low-level waste, or the environmental impact associated with the storage of low-level waste. The director shall appoint to the advisory committee the director of environmental health of the county where a low-level waste disposal facility is sited.

Article 4. Licensing and Regulation of Sources of Ionizing Radiation

115060. (a) The department shall provide by rule or regulation for general or specific licensing of persons to receive, possess, or

transfer radioactive materials, or devices or equipment utilizing these materials. That rule or regulation shall provide for amendment, suspension, or revocation of licenses.

(b) The department may require registration and inspection of sources of ionizing radiation other than those that require a specific license, and compliance with specific safety standards to be adopted by the department.

(c) The department may exempt certain sources of ionizing radiation or kinds of uses or users from the licensing or registration requirements set forth in this section when the department makes a finding that the exemption of these sources of ionizing radiation or kinds of uses or users will not constitute a significant risk to the health and safety of the public.

(d) Regulations adopted pursuant to this chapter may provide for recognition of other state or federal licenses as the department may deem desirable, subject to registration requirements as the department may prescribe.

(e) The department shall adopt registration and certification regulations for mammography equipment. These regulations shall include, but not be limited to, all of the following requirements:

(1) An X-ray machine used for mammography shall be specifically designed for mammography and inspected by the department, or deemed satisfactory by the department based upon evidence of certification by the American College of Radiology mammography accreditation program, or an accreditation program that the department deems equivalent before it is certified.

(2) That all persons who have a certificate for mammography equipment follow a quality assurance program to be adopted by the department to ensure the protection of the public health and safety.

(3) That quality assurance tests, as determined by the department, are performed on all mammography equipment located in a mobile van or unit after each relocation of the mobile van or unit to a different location for the purpose of providing mammography. This equipment shall be recalibrated if images are not of diagnostic quality as determined by the department. A written record of the location of mobile vans or units with dates and times shall be maintained and available for inspection by the department.

(4) On or after July 15, 1993, all mammography equipment shall be registered with and certified by the department. If this mammography equipment is certified by a private accreditation organization, the department shall take into consideration evidence of this private certification when deciding to issue a mammogram certification.

(5) All licenses, permits, and certificates issued by the department pursuant to this chapter and the Radiologic Technology Act (Section 27) relating to the use of mammography equipment shall be publicly

posted pursuant to this section and regulations adopted by the department.

(f) To further ensure the quality of mammograms, the department shall require all mammogram facilities, other than mobile units or vans, to operate quickly and efficiently so as to ensure that the facilities are able to develop mammograms of diagnostic quality prior to when the patient leaves the facility.

115065. (a) The department shall provide by regulation a schedule of the fees that shall be paid by the following persons:

(1) Persons possessing radioactive materials under licenses issued by the department or under other state or federal licenses for the use of these radioactive materials, when these persons use these radioactive materials in the state in accordance with the regulations adopted pursuant to subdivision (d) of Section 115060.

(2) Persons generally licensed for the use of devices and equipment utilizing radioactive materials that are designed and manufactured for the purpose of detecting, measuring, gauging, or controlling thickness, density, level, interface location, radiation, leakage, or qualitative or quantitative chemical composition, or for producing light or an ionized atmosphere, if the devices are manufactured pursuant to a specific license authorizing distribution to general licensees.

(b) The revenues derived from the fees shall be used, together with other funds made available therefor, for the purpose of the issuance of licenses or the inspection and regulation of the licensees.

(c) The department may adopt emergency regulations pursuant to Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code to establish and adjust fees for radioactive materials licenses in an amount to produce estimated revenues equal to at least 95 percent of the department's costs in carrying out these licensing requirements, if the new fees were to remain in effect throughout the fiscal year for which the fee is established or adjusted.

(d) A local agency participating in a negotiated agreement pursuant to Section 114990 shall be fully reimbursed for direct and indirect costs based upon activities governed by Section 115070. With respect to these agreements, any salaries, benefits, and other indirect costs shall not exceed comparable costs of the department.

(e) The fees for licenses for radioactive materials and of devices and equipment utilizing those materials shall be adjusted annually pursuant to Section 100425.

115070. The frequency of inspections of radioactive materials shall be based on priorities established by the United States Nuclear Regulatory Commission.

115075. In addition to the annual adjustment of the fees authorized by this chapter pursuant to Section 100425, on or before January 1, 1991, the director may adopt emergency regulations in

accordance with Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code, to establish and adjust these fees, and for purposes of that chapter, including Section 11349.6 of the Government Code, an adoption of these regulations is an emergency and shall be considered by the Office of Administrative Law as necessary for the immediate preservation of the public peace, health and safety, and general welfare.

115080. (a) The department shall provide by regulation a ranking of priority for inspection, as determined by the degree of potentially damaging exposure of persons by ionizing radiation and the requirements of Section 115085, and a schedule of fees, based upon that priority ranking, that shall be paid by persons possessing sources of ionizing radiation that are subject to registration in accordance with subdivisions (b) and (e) of Section 115060, and regulations adopted pursuant thereto. The revenues derived from the fees shall be used, together with other funds made available therefor, for the purpose of carrying out any inspections of the sources of ionizing radiation required by this chapter or regulations adopted pursuant thereto. The fees shall, together with any other funds made available to the department, be sufficient to cover the costs of administering this chapter, and shall be set in amounts intended to cover the costs of administering this chapter for each priority source of ionizing radiation. Revenues generated by the fees shall not offset any general funds appropriated for the support of the radiologic programs authorized pursuant to this chapter, and the Radiologic Technology Act (Section 27), and Chapter 7.6 (commencing with Section 114960). Persons who pay fees shall not be required to pay, directly or indirectly, for the share of the costs of administering this chapter of those persons for whom fees are waived. The department shall take into consideration any contract payment from the Health Care Financing Administration for performance of inspections for Medicare certification and shall reduce this fee accordingly.

(b) A local agency participating in a negotiated agreement pursuant to Section 114990 shall be fully reimbursed for direct and indirect costs based upon activities governed by Section 115085. With respect to these agreements, any salaries, benefits, and other indirect costs shall not exceed comparable costs of the department. Any changes in the frequency of inspections or the level of reimbursement to local agencies made by this section or Section 115085 during the 1985–86 Regular Session shall not affect ongoing contracts.

(c) The fees paid by persons possessing sources of ionizing radiation shall be adjusted annually pursuant to Section 100425.

115085. The average inspection frequency for ionizing radiation machines shall be once each year for mammography X-ray units, once every three years for high-priority sources of ionizing radiation,

and once every four and one-quarter years for medium-priority sources. Sources of ionizing radiation used in dentistry shall be screened for defects by mail or other offsite methodology not less frequently than once every five years, with physical inspection of the 50 percent, determined by the department to be most in need of inspection, to average at least once every six years.

115090. In making the determination of whether to grant, deny, amend, revoke, suspend, or restrict a certification, registration, or license, the department may consider those aspects of a person's background that, in its judgment, bear materially on that person's ability to fulfill her or his obligations, including but not limited to technical competency and her or his current or prior record in areas involving ionizing radiation.

Article 5. Inspection

115095. Any officer, employee, or agent of the department or of any state or local agency with which an agreement has been made pursuant to Section 114990 shall have the power to enter at all reasonable times upon any private or public property within the jurisdiction of the agency for the purpose of determining whether or not there is compliance with or violation of this chapter, building standards published in the State Building Standards Code relating to buildings in which there are sources of ionizing radiation, or of the regulations adopted pursuant to this chapter, and the owner, occupant, or person in charge of the property shall permit that entry and inspection. Entry into areas under the jurisdiction of the federal government shall be effected only with the concurrence of the federal government or its duly designated representative.

115100. (a) The person responsible for registering mammographic X-ray equipment shall be responsible for assuring that the mammographic X-ray equipment under his or her jurisdiction has been inspected and that mammography quality assurance tests are performed by a medical physicist, health physicist, or other individual with qualifications similar to those approved by the department and prescribed in the May 1990 version of the ''Rules of Good Practice for Supervision and Operation of Mammographic X-Ray Equipment,'' as approved by the Radiologic Technology Certification Committee.

(b) If the department adopts regulations on or after January 1, 1993, that provide similar or stronger protection of a patient's health and safety than the ''Rules of Good Practice for Supervision and Operation of Mammographic X-Ray Equipment,'' as determined by the department, then those rules shall no longer apply to this section.

Article 6. Records

115105. The department shall require each person who acquires, possesses or uses a source of ionizing radiation to maintain records relating to its receipt, storage, transfer or disposal, and other records as the department may require, subject to exemptions as may be provided by regulations.

115110. The department shall require each person who possesses or uses a source of ionizing radiation to maintain appropriate records showing the radiation exposure of all individuals for whom personnel monitoring is required by regulations of the department. Copies of these records and those required to be kept in accordance with Section 115105 shall be submitted to the department upon request.

The department shall adopt reasonable regulations, compatible with those of the United States Atomic Energy Commission, pertaining to reports of exposure of personnel. The regulations shall require that reports of excessive exposure be made to the individual exposed and to the department, and shall make provision for periodic and terminal reports to individuals for whom personnel monitoring is required. Section 6411 of the Labor Code shall not be construed as exempting any person from making any report required by this section.

115115. (a) The person responsible for registering mammographic X-ray equipment or a certified supervisor, as defined in subdivision (i) of Section 114850, shall establish and maintain a Mammography Quality Assurance Program that includes:

(a) A Mammography Quality Assurance Manual for the identification of mammography quality assurance tests performed, test frequency, test equipment used, maintenance and calibration of test equipment, and the qualifications of individuals who perform the tests in order to ensure compliance with the May 1990 version of ''Rules of Good Practice for Supervision and Operation of Mammographic X-Ray Equipment'' or the regulations of the department.

(b) A ''Mammography X-Ray Equipment and Facility Accreditation Certificate'' issued by the department that shall be posted on each X-ray machine specifically dedicated for the purpose of mammography.

Article 7. Federal-State Agreements

115120. The Governor, on behalf of this state, may enter into agreements with the federal government providing for discontinuance of certain of the federal government's responsibilities with respect to sources of ionizing radiation and the assumption thereof by this state. The agreements shall become effective only when ratified by law.

115125. Any person who, on the effective date of an agreement under Section 115120, possesses a license issued by the federal government shall be deemed to possess the same pursuant to a license issued under this chapter. The license shall expire either 90 days after receipt from the department of a notice of expiration of the license, or on the date of expiration specified in the federal license, whichever is the earlier.

Article 8. Inspection Agreements and Training Programs

115130. The department, on behalf of this state, may enter into an agreement or agreements with the federal government, other states, or interstate agencies, whereby this state will perform on a co-operative basis with the federal government, other states, or interstate agencies, inspections or other functions relating to control of sources of ionizing radiation.

115135. The department and any other appropriate state agency may institute training programs for the purpose of qualifying personnel to carry out this chapter, and may make those personnel available for participation in any program or programs of the federal government, other states, or interstate agencies in furtherance of the purposes of this chapter.

115140. Ordinances, resolutions or regulations, now or hereafter in effect, of the governing body of a city or county relating to radioactive materials or other sources of radiation shall not be superseded by this chapter, provided that the ordinances or regulations are and continue to be consistent with the provisions of this chapter, amendments thereto, and regulations thereunder. No city or county shall require the payment of a fee in connection with the activities governed by Section 115065 when a fee is required by rules or regulations adopted pursuant to that section, and no city or county shall require the payment of a fee in connection with the activities governed by Section 115080 when a fee is required by rules or regulations adopted pursuant to that section.

Article 10. Administrative Procedure

115145. (a) In any proceeding under this chapter for granting or amending any license, or for determining compliance with, or granting exceptions from, regulations adopted in accordance with this chapter, the department shall afford an opportunity for a hearing on the record upon the request of any person whose interest may be affected by the proceeding, and shall admit that person as a party to the proceeding.

(b) Proceedings for the suspension or revocation of licenses under this chapter shall be conducted in accordance with Chapter 5 (commencing with Section 11500) of Part 1 of Division 3 of Title 2 of

the Government Code, and the department shall have all the powers granted therein.

(c) The adoption, repeal, or amendment of regulations pursuant to this chapter shall be accomplished in conformity with Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code.

115150. Whenever the department finds that an emergency exists requiring immediate action to protect the public health and safety, the department may, without notice or hearing, issue a regulation or order reciting the existence of the emergency and requiring that action be taken as is deemed necessary to meet the emergency. Notwithstanding any provision of this chapter, the regulation or order shall be effective immediately. Any person to whom the regulation or order is directed shall comply therewith immediately, but on application to the department shall be afforded a hearing within 15 days. On the basis of the hearing, the emergency regulation or order shall be continued, modified, or revoked within 30 days after the hearing.

115155. Any final order entered in any proceeding under Sections 115145 and 115150 shall be subject to judicial review in the manner prescribed in Chapter 5 (commencing with Section 11500) of Part 1 of Division 3 of Title 2 of the Government Code.

Article 11. Injunction Proceedings

115160. Whenever, in the judgment of the department, any person has engaged in or is about to engage in any acts or practices that constitute or will constitute a violation of any provision of this chapter, or any rule, regulation or order issued thereunder, and at the request of the department, the Attorney General may make application to the superior court for an order enjoining the acts or practices, or for an order directing compliance, and upon a showing by the department that the person has engaged in or is about to engage in any such acts or practices, a permanent or temporary injunction, restraining order, or other order may be granted.

Article 12. Uses

115165. It shall be unlawful for any person to use, manufacture, produce, knowingly transport, transfer, receive, acquire, own, or possess, any source of ionizing radiation unless licensed by or registered with the department in accordance with this chapter and regulations issued thereunder.

115170. It is unlawful for any person to manufacture, construct, produce, transfer, acquire, use, or possess any of the materials or facilities for which a permit or license is required under the provisions of the Atomic Energy Act of 1954 (Public Law 85-256)

unless he or she shall have first obtained a permit or license. Violation of this section is a misdemeanor.

Article 13. Impounding of Materials

115175. The department shall have the authority in the event of an emergency to impound or order the impounding of sources of ionizing radiation in the possession of any person who is not equipped to observe or fails to observe this chapter or any rules or regulations issued thereunder.

115180. The term ‘‘decontamination,’’ as used in this chapter, means the reduction of the level of contamination from radioactive material to the level that the department determines is reasonably necessary to eliminate the hazard to public health that is caused by the contamination of any object, building, structure, or premises. Any order by the department pursuant to Section 115185 shall prescribe the level to which the contamination is required to be reduced in order to eliminate the hazard to the public health.

115185. If the department determines that any object, building, structure, or premises is contaminated by radioactive material and constitutes a hazard to the public health, it shall order the person who has control of the object, building, structure, or premises to cease to use or occupy and to exercise due caution to prevent others from using or occupying the object, building, structure, or premises, except to the extent necessary to accomplish the decontamination, or to the extent necessary to accomplish the disposal of the object, building, or structure as radioactive waste. The normal use or occupancy of the object, building, structure, or premises may not be resumed until decontamination has been accomplished and a release obtained from the department.

If the person who has control of the object, building, structure, or premises fails to comply with the department’s order to decontaminate, the department may impound or seize the object, building, structure, or premises. The department after impounding or seizure of an object, building, structure, or premises, may decontaminate the object, building, structure, or premises.

115190. If the department determines that the object, building, structure, or premises does not warrant decontamination because of its low value, it shall so notify in writing the person who had control of the object, building, structure, or premises. The person so notified may decontaminate the object, building, structure, or premises, but if he or she fails to do so within 15 days after the notice, the department may cause the object, building, structure, or premises to be disposed of as radioactive waste.

115195. If the department causes the object, building, structure or premises to be decontaminated, the department shall, upon the completion of the decontamination, return the impounded article or

seized building, structure, or premises to the person who had control of the article, building, structure, or premises prior to the impounding or seizure. The person who has control of the object, building, structure, or premises and was responsible for its contamination shall pay the department for the reasonable and necessary costs incurred by the department in seizing and decontaminating or in seizing and disposing of the object, building, structure, or premises.

115200. If the contamination of the object, building, structure, or premises resulted from the negligence of another person, then the department may require that person to pay all reasonable and necessary costs incurred by the department in seizing and decontaminating or disposing of the object, building, structure, or premises and may maintain any action necessary to recover those costs.

115205. (a) A lien in favor of the people of California shall be imposed upon any object, building, structure, or premises for the reasonable amount of expenses and costs incurred by the department in carrying out the provisions of Section 115185, 115190, 115195, or 115200 if the owner of the property or of any interest therein is the person responsible for the contamination, and to the extent of the interest of that person. Notice of lien or notice of intent to impose a lien shall be posted by the department upon any object, building, structure, or premises impounded or seized by the department and notice of lien or notice of intent to impose a lien shall be filed with the county recorder of the county in which they are located.

The lien shall not become effective until the notice of lien, particularly identifying the property, the interest subject to the lien and the name of the owner of record of the property, and the amount of the lien, is recorded in the office of the county recorder in the county where the property is located. Upon the recordation, the lien shall have the same force, effect and priority as if it had been a judgment lien imposed upon real property that was not exempt from execution, except that it shall attach only to the property described in the notice and impounded or seized by the department, and shall continue for 10 years from the time of the recording of the notice unless sooner released or otherwise discharged.

(b) The department may at any time release all or any portion of the property subject to a lien imposed pursuant to subdivision (a) from the lien or subordinate the lien to other liens and encumbrances if it determines that the amount owed is sufficiently secured by a lien on other property or that the release or subordination of the lien will not jeopardize the collection of the amount owed. A certificate by the department to the effect that any property has been released from the lien or that the lien has been subordinated to other liens and encumbrances shall be conclusive evidence that the property has

been released or that the lien has been subordinated as provided in the certificate.

115210. (a) The city attorney of the city or the district attorney of the county in which any violations of this chapter occur, occurred, or will occur, or the Attorney General, at the request of the department, may institute on behalf of the people of California any civil action necessary to carry out this chapter, including, but not restricted to, the enforcement of liens, the obtaining of injunctions, or the imposition of civil penalties.

(b) If the civil penalties are awarded and the action is brought by a city attorney or district attorney, the penalty shall be paid directly to the city or county. If no penalty is awarded or paid, or both, the state shall have no obligation to make any payment to the city or county.

If the civil penalty is awarded and the action is brought by the Attorney General, the penalty shall be deposited in the General Fund.

Article 14. Penalties

115215. (a) Any person who violates this chapter, or rules, regulations, or orders in effect adopted pursuant to this chapter, is guilty of a misdemeanor and shall, upon conviction, be punished by a fine not to exceed one thousand dollars ($1,000) or by imprisonment in the county jail for a period not to exceed 180 days, or by both the fine and imprisonment.

(b) Any person who knowingly disposes or causes the disposal of any radioactive material regulated by this chapter, or who reasonably should have known that the person was disposing or causing the disposal of the material, at a facility within the state that does not have a license for disposal issued by the department pursuant to this chapter, or at any point in the state that is not authorized according to this chapter, or by any other local, state, or federal agency having authority over radioactive materials, and is in violation of this chapter, or any regulation or order adopted pursuant to this chapter, is guilty of a public offense, and upon conviction, may be punished as follows:

(1) If the disposal is found to have caused a substantial danger to the public health or safety, the person may be punished by imprisonment in the county jail for not more than one year or by imprisonment in the state prison for 16, 24, or 36 months, except as otherwise provided in paragraph (2). The court may also impose, upon a person convicted of violating this subdivision, a fine of not more than one hundred thousand dollars ($100,000) for each day of violation, except as otherwise provided in paragraph (2).

(2) If the act that violated this subdivision caused great bodily injury or caused a substantial probability that death could result, the

person convicted may be punished by imprisonment in the state prison for three, five, or seven years and may be fined not more than two hundred fifty thousand dollars ($250,000) for each day of violation.

(c) Any person who knowingly transports or causes the transportation of any radioactive material regulated by this chapter, or who reasonably should have known that the person was causing the transportation of the material, to a facility in the state that does not have a license from the department issued pursuant to this chapter, to any point in the state that is not authorized by this chapter, or to any point in the state that is not authorized by any other local, state, or federal agency having authority over radioactive materials, and is in violation of this chapter, or any regulation or order adopted pursuant to this chapter, is guilty of a public offense and, upon conviction, may be punished as follows:

(1) If the transportation is found to have caused a substantial danger to the public health or safety, the person may be punished by imprisonment in the county jail for not more than one year or by imprisonment in the state prison for 16, 24, or 36 months, except as otherwise provided in paragraph (2). The court may also impose, upon a person convicted of violating this subdivision, a fine of not more than one hundred thousand dollars ($100,000) for each day of violation, except as provided by paragraph (2).

(2) If the transportation that violated this subdivision caused great bodily injury or caused a substantial probability that death could result, the person convicted may be punished by imprisonment in the state prison for three, five, or seven years and may be fined not more than two hundred fifty thousand dollars ($250,000) for each day of violation.

(d) Notwithstanding any other provision of this chapter, radioactive materials used in medical treatment or result from medical treatment, that are disposed, stored, handled, or transported in a manner authorized pursuant to this chapter, are exempt from subdivisions (b) and (c).

(e) Notwithstanding subdivision (a), any person who violates any provision of this chapter relating to mammography or regulations adopted pursuant to those provisions is guilty of a misdemeanor and shall, upon conviction thereof, be punished by a fine not to exceed five thousand dollars ($5,000), per day of offense, or by imprisonment in the county jail not to exceed 180 days, or both the fine and imprisonment.

115220. (a) Any person who intentionally or through gross negligence violates any provision of this chapter, or any rule or regulation adopted pursuant thereto, or who fails or refuses to comply with a cease and desist order or other order of the department issued thereunder, and that action causes a substantial danger to the health of others, shall be liable to the department for

a civil penalty not to exceed five thousand dollars ($5,000) per day, per offense.

(b) The remedies under this section are in addition to, and do not supersede or limit, any and all other remedies, civil or criminal.

Article 15. Effective Date of Licensing Provisions

115225. Subdivision (a) of Section 115060 and other provisions of this chapter relating to licensing and the enforcement thereof shall become effective only upon execution of an agreement pursuant to Section 115120. Section 115080 shall become operative on July 1, 1962.

Article 16. Agreement Between the United State Atomic Energy Commission and the State of California

115230. The Legislature of the State of California hereby ratifies and approves that certain agreement designated as the ''Agreement between the United States Atomic Energy Commission and the State of California for Discontinuance of Certain Commission Regulatory Authority and Responsibility within the State Pursuant to Section 274 of the Atomic Energy Act of 1954, as Amended,'' that was approved by the Chairman of the Atomic Energy Commission on the ninth day of March 1962, under authority of Section 274 of the Atomic Energy Act of 1954, as amended (Public Law 86-373), and by the Governor of California on the 12th day of March 1962, under authority of and in conformity with Section 115120; and the provisions of this agreement shall become effective in accordance with Article IX of the agreement set forth in Section 115235.

115235. The provisions of said agreement are as follows:

Article I

Subject to the exceptions provided in Articles II, III, and IV, the Commission shall discontinue, as of the effective date of this Agreement, the regulatory authority of the Commission in the State under Chapters 6, 7, and 8, and Section 161 of the Act with respect to the following materials:

A. Byproduct materials;

B. Source materials; and

C. Special nuclear materials in quantities not sufficient to form a critical mass.

Article II

This Agreement does not provide for discontinuance of any authority and the Commission shall retain authority and responsibility with respect to regulation of:

A. The construction and operation of any production or utilization facility;

B. The export from or import into the United States of byproduct, source, or special nuclear material, or of any production or utilization facility;

C. The disposal into the ocean or sea of byproduct, source, or special nuclear waste materials as defined in regulations or orders of the Commission;

D. The disposal of other byproduct, source, or special nuclear material as the Commission from time to time determines by regulation or order should, because of the hazards or potential hazards thereof, not be so disposed of without a license from the Commission.

Article III

Notwithstanding this Agreement, the Commission may from time to time by rule, regulation, or order, require that the manufacturer, processor, or producer of any equipment, device, commodity, or other product containing source, byproduct, or special nuclear material shall not transfer possession or control of the product except pursuant to a license or an exemption from licensing issued by the Commission.

Article IV

This Agreement shall not affect the authority of the Commission under Subsection 161 b. or i. of the Act to issue rules, regulations, or orders to protect the common defense and security, to protect restricted data or to guard against the loss or diversion of special nuclear material.

Article V

The State will use its best efforts to maintain continuing compatibility between its program and the program of the Commission for the regulation of like materials. To this end the State will use its best efforts to keep the Commission informed of proposed changes in its regulations, and licensing, inspection, and enforcement policies and criteria, and of proposed requirements for the design and distribution of products containing source, byproduct, or special nuclear material, and to obtain the comments and assistance of the Commission thereon.

Article VI

The Commission will use its best efforts to keep the State informed of proposed changes in its regulations, and licensing, inspection, and enforcement policies and criteria and to obtain the comments and assistance of the State thereon.

Article VII

The Commission and the State agree that it is desirable to provide for reciprocal recognition of licenses for the materials listed in Article I licensed by the other party or by any agreement State. Accordingly, the Commission and the State agree to use their best efforts to develop appropriate rules, regulations, and procedures by which such reciprocity will be accorded.

Article VIII

The Commission, upon its own initiative after reasonable notice and opportunity for hearing to the State, or upon request of the Governor of the State, may terminate or suspend this Agreement and reassert the licensing and regulatory authority vested in it under the Act if the Commission finds that such termination or suspension is required to protect the public health and safety.

Article IX

This Agreement, upon ratification by law of the State, shall become effective on the ninety-first day after the adjournment of the First Extraordinary Session of the 1962 California Legislature or on September 1, 1962, whichever is later, and shall remain in effect unless, and until such time as it is terminated pursuant to Article VIII.

Article 17. Southwestern Low Level Radioactive Waste Disposal Compact

115250. The Legislature of the State of California hereby enacts and ratifies the agreement set forth in Section 115255 and designated as the ''Southwestern Low-Level Radioactive Waste Disposal Compact,'' entered into pursuant to the Low-Level Radioactive Waste Policy Act, as amended by the Low-Level Radioactive Waste Policy Amendments Act of 1985 (42 U.S.C. Sec. 2021b to 2021j, incl.). This compact shall become effective in accordance with Article 7 of the compact as set forth in Section 115255.

115255. The provisions of the Southwestern Low-Level Radioactive Waste Disposal Compact are as follows:

Article 1. Compact Policy and Formation

The party states hereby find and declare all of the following:

(A) The United States Congress, by enacting the Low-Level Radioactive Waste Policy Act, Public Law 96-573, as amended by the Low-Level Radioactive Waste Policy Amendments Act of 1985 (42 U.S.C. Sec. 2021b to 2021j, incl.), has encouraged the use of interstate compacts to provide for the establishment and operation of facilities for regional management of low-level radioactive waste.

(B) It is the purpose of this compact to provide the means for such a cooperative effort between or among party states to protect the citizens of the states and the states' environments.

(C) It is the policy of party states to this compact to encourage the reduction of the volume of low-level radioactive waste requiring disposal within the compact region.

(D) It is the policy of the party states that the protection of the health and safety of their citizens and the most ecological and economical management of low-level radioactive wastes can be accomplished through cooperation of the states by minimizing the amount of handling and transportation required to dispose of these wastes and by providing facilities that serve the compact region.

(E) Each party state, if an agreement state pursuant to Section 2021 of Title 42 of the United States Code, or the Nuclear Regulatory Commission if not an agreement state, is responsible for the primary regulation of radioactive materials within its jurisdiction.

Article 2. Definitions

As used in this compact, unless the context clearly indicates otherwise, the following definitions apply:

(A) ''Commission'' means the Southwestern Low-Level Radioactive Waste Commission established in Article 3 of this compact.

(B) ''Compact region'' or ''region'' means the combined geographical area within the boundaries of the party states.

(C) ''Disposal'' means the permanent isolation of low-level radioactive waste pursuant to requirements established by the Nuclear Regulatory Commission and the Environmental Protection Agency under applicable laws, or by a party state if that state hosts a disposal facility.

(D) ''Generate,'' when used in relation to low-level radioactive waste, means to produce low-level radioactive waste.

(E) ‘‘Generator’’ means a person whose activity, excluding the management of low-level radioactive waste, results in the production of low-level radioactive waste.

(F) ‘‘Host county’’ means a county, or other similar political subdivision of a party state, in which a regional disposal facility is located or being developed.

(G) ‘‘Host state’’ means a party state in which a regional disposal facility is located or being developed. The State of California is the host state under this compact for the first 30 years from the date the California regional disposal facility commences operations.

(H) ‘‘Institutional control period’’ means that period of time in which the facility license is transferred to the disposal site owner in compliance with the appropriate regulations for long-term observation and maintenance following the postclosure period.

(I) ‘‘Low-level radioactive waste’’ means regulated radioactive material that meets all of the following requirements:

(1) The waste is not high-level radioactive waste, spent nuclear fuel, or byproduct material (as defined in Section 11e(2) of the Atomic Energy Act of 1954 (42 U.S.C. Sec. 2014(e)(2))).

(2) The waste is not uranium mining or mill tailings.

(3) The waste is not any waste for which the federal government is responsible pursuant to subdivision (b) of Section 3 of the Low-Level Radioactive Waste Policy Amendments Act of 1985 (42 U.S.C. Sec. 2021c(b)).

(4) The waste is not an alpha emitting transuranic nuclide with a half-life greater than five years and with a concentration greater than 100 nanocuries per gram, or Plutonium-241 with a concentration greater than 3,500 nanocuries per gram, or Curium-242 with a concentration greater than 20,000 nanocuries per gram.

(J) ‘‘Management’’ means collection, consolidation, storage, packaging, or treatment.

(K) ‘‘Major generator state’’ means a party state that generates 10 percent of the total amount of low-level radioactive waste produced within the compact region and disposed of at the regional disposal facility.

If no party state other than California generates at least 10 percent of the total amount, ‘‘major generator state’’ means the party state which is second to California in the amount of waste produced within the compact region and disposed of at the regional disposal facility.

(L) ‘‘Operator’’ means a person who operates a regional disposal facility.

(M) ‘‘Party state’’ means any state that has become a party in accordance with Article 7 of this compact.

(N) ‘‘Person’’ means an individual, corporation, partnership, or other legal entity, whether public or private.

(O) ‘‘Postclosure period’’ means that period of time after completion of closure of a disposal facility during which the licensee

shall observe, monitor, and carry out necessary maintenance and repairs at the disposal facility to assure that the disposal facility will remain stable and will not need ongoing active maintenance. This period ends with the beginning of the institutional control period.

(P) ''Regional disposal facility'' means a nonfederal low-level radioactive waste disposal facility established and operated under this compact.

(Q) ''Site closure and stabilization'' means the activities of the disposal facility operator taken at the end of the disposal facility's operating life to assure the continued protection of the public from any residual radioactivity or other potential hazards present at the disposal facility.

(R) ''Transporter'' means a person who transports low-level radioactive waste.

(S) ''Uranium mine and mill tailings'' means waste resulting from mining and processing of ores containing uranium.

Article 3. The Commission

(A) There is hereby established the Southwestern Low-Level Radioactive Waste Commission.

(1) The commission shall consist of one voting member from each party state to be appointed by the Governor, confirmed by the Senate of that party state, and to serve at the pleasure of the Governor of each party state, and one voting member from the host county. The appointing authority of each party state shall notify the commission in writing of the identity of the member and of any alternates. An alternate may act in the member's absence.

(2) The host state shall also appoint that number of additional voting members of the commission that is necessary for the host state's members to compose at least 51 percent of the membership on the commission. The host state's additional members shall be appointed by the host state Governor and confirmed by the host state Senate.

If there is more than one host state, only the state in which is located the regional disposal facility actively accepting low-level radioactive waste pursuant to this compact may appoint these additional members.

(3) If the host county has not been selected at the time the commission is appointed, the Governor of the host state shall appoint an interim local government member, who shall be an elected representative of a local government. After a host county is selected, the interim local government member shall resign and the Governor shall appoint the host county member pursuant to paragraph (4).

(4) The Governor shall appoint the host county member from a list of at least seven candidates compiled by the board of supervisors of the host county.

(5) In recommending and appointing the host county member pursuant to paragraph (4), the board of supervisors and the Governor shall give first consideration to recommending and appointing the member of the board of supervisors in whose district the regional disposal facility is located or being developed. If the board of supervisors of the host county does not provide a list to the Governor of at least seven candidates from which to choose, the Governor shall appoint a resident of the host county as the host county member.

(6) The host county member is subject to confirmation by the Senate of that party state and shall serve at the pleasure of the Governor of the host state.

(B) The commission is a legal entity separate and distinct from the party states and shall be so liable for its actions. Members of the commission shall not be personally liable for actions taken in their official capacity. The liabilities of the commission shall not be deemed liabilities of the party states.

(C) The commission shall conduct its business affairs pursuant to the laws of the host state and disputes arising out of commission action shall be governed by the laws of the host state. The commission shall be located in the capital city of the host state in which the regional disposal facility is located.

(D) The commission's records shall be subject to the host state's public records law, and the meetings of the commission shall be open and public in accordance with the host state's open meeting law.

(E) The commission members are public officials of the appointing state and shall be subject to the conflict of interest laws, as well as any other law, of the appointing state. The commission members shall be compensated according to the appointing state's law.

(F) Each commission member is entitled to one vote. A majority of the commission constitutes a quorum. Unless otherwise provided in this compact, a majority of the total number of votes on the commission is necessary for the commission to take any action.

(G) The commission has all of the following duties and authority:

(1) The commission shall do, pursuant to the authority granted by this compact, whatever is reasonably necessary to ensure that low-level radioactive wastes are safely disposed of and managed within the region.

(2) The commission shall meet at least once a year and otherwise as business requires.

(3) The commission shall establish a compact surcharge to be imposed upon party state generators. The surcharge shall be based upon the cubic feet of low-level radioactive waste and the radioactivity of the low-level radioactive waste and shall be collected by the operator of the disposal facility.

The host state shall set, and the commission shall impose, the surcharge after congressional approval of the compact. The amount of the surcharge shall be sufficient to establish and maintain at a reasonable level funds for all of the following purposes:

(a) The activities of the commission and commission staff.

(b) At the discretion of the host state, a third-party liability fund to provide compensation for injury to persons or property during the operational, closure, stabilization, and postclosure and institutional control periods of the regional disposal facility. This subparagraph does not limit the responsibility or liability of the operator, who shall comply with any federal or host state statutes or regulations regarding third-party liability claims.

(c) A local government reimbursement fund, for the purpose of reimbursing the local government entity or entities hosting the regional disposal facility for any costs or increased burdens on the local governmental entity for services, including, but not limited to, general fund expenses, the improvement and maintenance of roads and bridges, fire protection, law enforcement, monitoring by local health officials, and emergency preparation and response related to the hosting of the regional disposal facility.

(4) The surcharges imposed by the commission for purposes of subparagraphs (b) and (c) of paragraph (3) and surcharges pursuant to paragraph (3) of subdivision (E) of Article 4 shall be transmitted on a monthly basis to the host state for distribution to the proper accounts.

(5) The commission shall establish a fiscal year that conforms to the fiscal years of the party states to the extent possible.

(6) The commission shall keep an accurate account of all receipts and disbursements. An annual audit of the books of the commission shall be conducted by an independent certified public accountant, and the audit report shall be made a part of the annual report of the commission.

(7) The commission shall prepare and include in the annual report a budget showing anticipated receipts and disbursements for the subsequent fiscal year.

(8) The commission may accept any grants, equipment, supplies, materials, or services, conditional or otherwise, from the federal or state government. The nature, amount and condition, if any, of any donation, grant, or other resources accepted pursuant to this paragraph and the identity of the donor or grantor shall be detailed in the annual report of the commission.

However, the host state shall receive, for the uses specified in subparagraph (E) of paragraph (2) of subsection (d) of Section 2021e of Title 42 of the United States Code, any payments paid from the special escrow account for which the Secretary of Energy is trustee pursuant to subparagraph (A) of paragraph (2) of subsection (d) of Section 2021 (e) of Title 42 of the United States Code.
