Tuberculosis Control

Chapter 676, Statutes of 1993, Chapter 685, Statutes of 1994, Chapter 294, Statutes of 1997, Chapter 116, Statutes of 1997; and Chapter 763, Statutes of 2002

STATEMENT OF THE CLAIM

A. MANDATE SUMMARY

During the 1993-1994 session, two bills were passed that substantially changed the manner that Tuberculosis (TB) cases were handled. The first of the two, Chapter 676, empowered local health officers and allowed greater control over those infected or believed to be infected with TB. Upon the issuance of an order from a local health officer, an individual infected with TB or suspected of having TB must submit to an examination, be admitted to a health facility, complete a prescribed course of medication, follow a course of directly observed therapy, not be allowed into the workplace or isolated at home. In addition, an individual infected with TB or reasonably believed to have TB cannot be discharged, released, or transferred from health facilities or penal institutions without noticing the local health officer and creating a treatment plan which the local health officer must review. Health officers are required to provide notice regarding parolees with TB. Finally, local health officers are empowered to detain individuals with TB in a treatment facility upon issuance of a health officer order with specified notice requirements for up to 60 days subject to a court hearing process which involves the patient's right to counsel.

The second bill, Chapter 685, made small changes to clarify the statutes created by Chapter 676. This Chapter ensures that the health officer have the ability to delegate his duties to the head of medical services in penal institutions in addition to his deputies. This Chapter also provides that the health officer review treatment plans connected with the discharge, release or transfer of an individual infected with TB out of a hospital of penal institution within a 24 hour period.

Health and Safety Code §121357 (former §3279.3)[1] places the state department as the lead agency for TB control and prevention. Section 121358, added by Chapter 294, Statutes of 1997, sets forth that correctional facilities shall not be used to house individuals detained as part of TB control and provides for co-operation between state and local health jurisdictions in obtaining appropriate places for such housing. Section 121360.5, added by Chapter 763, Statutes of 2002, sets forth an optional program for certification of tuberculin skin test technicians.

Health and Safety Code §121361 (former §3281) currently reads:

> (a)(1) A health facility, local detention facility, or state correctional institution shall not discharge or release any of the following persons unless subdivision (e) is complied with:
> (A) A person known to have active tuberculosis disease.
> (B) A person who the medical staff of the health facility or of the penal institution has reasonable grounds to believe has active tuberculosis disease.
> (2) In addition, persons specified in this subdivision may be discharged from a health facility only after a written treatment plan described in Section 121362 is approved by a local health officer of the jurisdiction in which the health facility is located. Any treatment plan submitted for approval pursuant to this paragraph shall be reviewed by the local health officer within 24 hours of the receipt of that plan.
> (3) The approval requirement of paragraph (2) shall not apply to any transfer to a general acute care hospital when the transfer is due to an immediate need for a higher level of care, nor to any transfer from any health facility to a correctional institution. Transfers or discharges in this paragraph shall occur only after the notification and treatment plan required by Section 121362 have been received by the local health officer.
> (4) This subdivision shall not apply to any transfer within the state correctional system or to any interfacility transfer occurring within a local detention facility system.
> (b) No health facility shall, without first complying with subdivision (e), transfer a person described in subparagraph (A) or (B) of paragraph (1) of subdivision (a) to another health facility. This subdivision shall not apply to any transfer within the state correctional system or to any

[1] In 1995, the Health and Safety Code was updated and code sections renumbered. The code sections quoted reflect these changes.

interfacility transfer occurring within a local detention facility system.

(c) No state correctional institution or local detention facility shall transfer a person described in subparagraph (A) or (B) of paragraph (1) of subdivision (a) from a state to a local, or from a local to a state, penal institution unless notification and a written treatment plan are received by the chief medical officer of the penal institution receiving the person.

(d) No local detention facility shall transfer a person described in subparagraph (A) or (B) of paragraph (1) of subdivision (a) to a local detention facility in another jurisdiction unless subdivision (e) is complied with and notification and a written treatment plan are received by the chief medical officer of the local detention facility receiving the person.

(e) Any discharge, release, or transfer described in subdivision (a), (b), (c), and (d) may occur only after notification and a written treatment plan pursuant to Section 121362 has been received by the local health officer. When prior notification would jeopardize the person's health, the public safety, or the safety and security of the penal institution, the notification and treatment plan shall be submitted within 24 hours of discharge, release or transfer.

(2) When a person described in paragraph (1) of subdivision (a) is released on parole from a state correctional institution, the notification and written treatment plan specified in the subdivision shall be provided to both the local health officer for the county in which the parolee intends to reside and to the local health officer for the county in which the state correctional institution is located.

(3) Notwithstanding any other provision of law, the Department of Corrections shall inform the parole agent, and other parole officials as necessary, that the person described in paragraph (1) of subdivision (a) has active or suspected active tuberculosis disease and provide information regarding the need for evaluation or treatment. The parole agent and other parole officials shall coordinate with the local health officer in supervising the person's compliance with medical evaluation or treatment related to tuberculosis, and shall notify the local health officer if the person's parole is suspended as a result of being absconded from supervision.

(f) No health facility that declines to discharge, release, or transfer a person pursuant to this section shall be civilly or criminally liable or subject to administrative sanction therefor. This subdivision shall apply only if the health facility complies with this section in good faith.
(g) Nothing in this section shall relieve a local health officer of any other duty imposed by this chapter.

Section 121362 (former §3282) currently reads:

Each health care provider who treats a person for active tuberculosis disease, each person in charge of a health facility, or each person in charge of a clinic providing outpatient treatment for active tuberculosis disease shall promptly report to the health officer at the times that the health officer requires, but no less frequently that when there are reasonable grounds to believe that a person has active tuberculosis disease, and when a person ceases treatment for tuberculosis disease. Situations in which the provider may conclude that the patient has ceased treatment include times when the patient fails to keep an appointment, relocates without transferring care, or discontinues care. The initial disease notification report shall include an individual treatment plan that includes the patient's name, address, date of birth, tuberculin skin test results, pertinent radiologic, microbiologic, and pathologic reports whether final or pending, and any other information required by the local health officer. Subsequent reports shall provide updated clinical status and laboratory results, assessment of treatment adherence, name of current care provider if the patient transfers care, and any other information required by the local health officer. A facility discharge, release, or transfer report shall include all pertinent and updated information required by the local health officer not previously reported on any initial or subsequent report, and shall specifically include a verified patient address, the name of the medical provider who has specifically agreed to provide medical care, clinical information used to assess the current infectious state, and any other information required by the local health officer. Each health care provider who treats a person with active tuberculosis disease, and each person in charge of a health facility or a clinic providing outpatient treatment for active tuberculosis disease, shall maintain written documentation of each patient's adherence to his or her individual treatment plan. Nothing in this section shall authorize the

> disclosure of test results for human immunodeficiency virus (HIV) unless authorized by Chapter 7 (commencing with Section 120975 of, Chapter 8 (commencing with Section 121025) of, and Chapter 10 (commencing with Section 121075) of Part 4 of Division 105.
> In the case of a parolee under the jurisdiction of the Department of Corrections, the local health officer shall notify the assigned parole agent, when known, or the regional parole administrator, when there are reasonable grounds to believe the parolee has active tuberculosis disease and when the parolee ceases treatment for tuberculosis. Situations where the local health officer may conclude that the parolee has ceased treatment include times when the parolee fails to keep an appointment, relocates without transferring care, or discontinues care.

These sections mandate communication between local health officers, their staff, detention facility staff and/or detention facility medical staff, and others. A treatment plan must be created by medical staff of the detention facility prior to discharge, release, or transfer of a person infected with TB. This treatment plan must be transmitted to and reviewed by the health officer and/or staff via telephone, facsimile, courier or other means. The health officer and staff are also charged with the communication with and review of treatment plans created by medical providers and hospital staff. This information exchange will necessitate the drafting, review and establishment of policies, procedures, forms and protocols and the training to implement them for local health officers, their staff, detention facility staff and/or detention facility medical staff, and others.

Section 121363 (former §3283) currently reads:

> Each health care provider who treats a person for active tuberculosis disease shall examine, or cause to be examined, all household contacts or shall refer them to the health officer for examination. Each health care provider shall promptly notify the local health officer of the referral. When required by the local health officer, nonhousehold contacts and household contacts not examined by a health care provider shall submit to examination by the local health officer or designee. If any abnormality consistent with tuberculosis disease is found, steps satisfactory to the local health officer shall be taken to refer the person promptly to a health care provider for further investigation, and if necessary, treatment. Contacts shall be reexamined at times and in a manner as the local health officer may require. When requested by the local health officer, a

> health care provider shall report the results of any examination related to tuberculosis of a contact.

This section acts a safety net mandating that the health officer examine contacts of an individual known to have TB when a health care provider will not do so. The health officer is also required to maintain oversight of the case to ensure that contacts are reexamined properly which means increased communication as discussed above between the health officer and health care providers.

Section 121364 (former §3284) currently reads:

> (a) Within the territory under his or her jurisdiction, each local health officer may order examinations for tuberculosis infection for the purposes of directing preventative measures for persons in the territory, except those incarcerated in a state correctional institution, for whom the local health officer has reasonable grounds to determined are at heightened risk of tuberculosis exposure.
> (b) An order for examination pursuant to this section shall be in writing and shall include other terms and conditions as may be necessary to protect the public health.

This is the first of several sections that deal with the health officer order. This section addresses the order for examination and requires that health officer orders for examination be in writing.

Section 121365 (former §3285) currently reads:

> Each local health officer is hereby directed to use every available means to ascertain the existence of, and immediately investigate all reported or suspected cases of active tuberculosis disease in the jurisdiction, and to ascertain the sources of those infections. In carrying out the investigations, each local health officer shall follow applicable local rules and regulations and all general and special rules, regulations, and orders of the state department. If the local health officer determines that the public health in general or the health of a particular person is endangered by exposure to a person who is known to have active tuberculosis disease, or to a person for whom there are reasonable grounds to believe has active tuberculosis disease, the local health officer may issue any orders he or she deems necessary to protect the public health or the health of any other person, and may make application to a court for enforcement of the orders. Upon the receipt of information that any order has been violated,

the health officer shall advise the district attorney of the county in which the violation has occurred, in writing, and shall submit to the district attorney the information in his or her possession relating to the subject matter of the order, and of the violation or violations thereof.

The orders may include, but shall not be limited to, any of the following:

(a) An order authorizing the removal to, detention in, or admission into, a health facility or other treatment facility for the appropriate examination for active tuberculosis disease of a person who is known to have active tuberculosis disease, or a person for who there are reasonable grounds to believe that the per has active tuberculosis disease and who is unable or unwilling voluntarily to submit to the examination by a physician or by the local health officer. Any person whom the health officer determines should have an examination for tuberculosis disease may have the examination made by a physician and surgeon of his or her own choice who is licensed to practice medicine under Chapter 5 (commencing with Section 2000) of Division 2 of the Business and Professions Code under terms and conditions as the local health officer shall determine on reasonable grounds to be necessary to protect the public health. This section does not authorize the local health officer to mandate involuntary anergy testing.

(b) An order requiring a person who has active tuberculosis disease to complete an appropriate prescribed course of medication for tuberculosis disease and, if necessary, to follow required infectious control precautions for tuberculosis disease. This subdivision does not allow forcible or involuntary administration of medication.

(c) An order requiring a person who has active tuberculosis disease and who is unable or unwilling otherwise to complete an appropriate prescribed course of medication for tuberculosis disease to follow a course of directly observed therapy. This subdivision does not allow forcible or involuntary administration of medication.

(d) An order for the removal to, detention in, or admission into, a health facility or other treatment facility of a person if both of the following occur:

(1) The person has infectious tuberculosis disease, or who presents a substantial likelihood of having infectious tuberculosis disease, based on proven epidemiologic evidence, clinical evidence, X-ray readings, or tuberculosis laboratory test results.

(2) The local health officer finds, based on recognized infection control principles, that there is a substantial likelihood the person may transmit tuberculosis to others because of his or her inadequate separation from others.

(e) An order for the removal to, detention in, or admission into, a health facility or other treatment facility of a person if both of the following occur:

(1) The person has active tuberculosis disease, or has been reported to the health officer as having active tuberculosis disease with no subsequent report to the health officer of the completion of an appropriate prescribed course of medication for tuberculosis disease.

(2) There is a substantial likelihood, based on the person's past or present behavior, that he or she cannot be relied upon to participate in or complete an appropriate prescribed course of medication for tuberculosis disease and, if necessary, follow required infectious control precautions for tuberculosis disease. The behavior may include, but is not limited to, refusal or failure to take medication for tuberculosis disease, refusal or failure to keep appointments or treatment for tuberculosis disease, refusal or failure to complete the treatment for tuberculosis disease, or disregard for infection control precautions for active tuberculosis disease.

(f) An order for exclusion from attendance at the workplace for persons with infectious tuberculosis disease. The order may, also, exclude the person from any place when the local health officer determines that the place cannot be maintained in a manner adequate to protect others against the spread of tuberculosis disease.

(g) An order for isolation of persons with infectious tuberculosis disease to their place of residence until the local health officer has determined that they no longer have infectious tuberculosis disease.

(h) This section shall apply to all persons except those incarcerated in a state correctional institution.

(i) This section shall not be construed to require a private hospital or other private treatment facility to accept any patient without a payment source, including county responsibilities under Section 17000 of the Welfare and Institutions Code, except as required by Sections 1317 et seq. or by federal law.

This section expands on the health officer order of §121364 describing the types of health officer orders available to control the spread of TB. They include: order to detain for purposes of examination, order to complete medication, order for direct observed therapy,

order to detain to prevent spread of TB, order to detain to ensure compliance with medication regimen, order to exclude presence at work, and order to isolate at home. These orders will necessitate the drafting, review and establishment of policies, procedures, forms and protocols and the training to implement them for local health officers, their staff and others. To carry out the orders will necessitate the use of staff time to locate and detain individuals by transporting them to and from places for examination and/or housing, to ensure the individual remains at home or is excluded from the workplace as well as the costs related to the detention itself including, but not limited to, housing and use of security or law enforcement personnel.

Section 121366 (former §3285.1) currently reads:

> The local health officer may detain in a hospital or other appropriate place for examination or treatment, a person who is the subject of an order of detention issued pursuant to subdivision (a), (d) or (e) of Section 121365 without prior court order except that when a person detained pursuant to subdivision (a), (d) or (e) of Section 121365 has requested release, the local health officer shall make an application for a court order authorizing the continued detention within 72 hours after the request or, if the 72-hour period ends on a Saturday, Sunday, or legal holiday, by the end of the first business day following the Saturday, Sunday, or legal holiday, which application shall include a request for a expedited hearing. After the request for release, detention shall not continue for more than five business days in the absence of a court order authorizing detention. However, in no event shall any person be detained for more than 60 days without a court order authorizing the detention. The local health officer shall seek further court review of the detention within 90 days following the initial court order authorizing detention and thereafter within 90 days of each subsequent court review. In any court proceeding to enforce a local health officer's order for the removal or detention of a person, the local health officer shall prove the particularized circumstances constituting the necessity for the detention by clear and convincing evidence. Any person who is subject to a detention order shall have the right to be represented by counsel and upon the request of the person, counsel shall be provided.

This section sets forth the procedure by which a individual detained pursuant to a health officer order obtains court review. The responsibility for bringing the matter before the court is not on the shoulders of the detainee but rather on the health officer. The detainee need only request release to trigger a carefully timed procedure which, if not followed

precisely, will result in his automatic release. Incumbent within the procedure is the health officer's need for counsel to put forth the case in court, the detainee's right to counsel and that counsel shall be provided upon request. This court process will necessitate the drafting, review and establishment of policies, procedures, forms and protocols and the training to implement them for local health officers, their staff, their counsel, counsel's staff as well as counsel for the detainee such as the public defender, public defender staff and others. Hearings will necessitate the following be done on an expedited hearing calendar: preparation of declarations, review of records, preparation of witnesses, assembling evidence, exchange of discovery, drafting of pleadings, and any other procedures necessary to ensure the matter is well-prepared, placed on calendar and heard timely. Also necessary is the attendance at the hearing of counsel for both sides as well as witnesses from the health officer's staff, and the detainee. Other costs include, but are not limited to, transportation of the detainee to and from court, security costs, copy costs, witness fees, and filing fees.

Section 121367 (former §3285.2) currently reads:

> (a) An order of a local health officer pursuant to Section 121365 shall set forth all of the following:
> (1) The legal authority under which the order is issued, including the particular sections of state law or regulations.
> (2) An individualized assessment of the person's circumstances or behavior constituting the basis for the issuance of the order.
> (3) The less restrictive treatment alternatives that were attempted and were unsuccessful, or the less restrictive treatment alternatives that were considered and rejected, and the reasons the alternatives were rejected.
> (4) The orders shall be in writing, and shall include the name of the person, the period of time during which the order shall remain effective, the location, payer source if known, and other terms and conditions as may be necessary to protect the public health. Upon issuing an order, a copy of the order shall be served upon the person named in the order.
> (b) An order for the detention of a person shall do all of the following:
> (1) Include the purpose of the detention.
> (2) Advise the person being detained that he or she has the right to request release from detention by contacting a person designated on the local health officer's order at the telephone number stated on the order and that the detention shall not continue for more that five business days after the request for release, in the absence of a court order authorizing the detention.

(3) Advise the person being detained that, whether or not he or she requests release from detention, the local health officer is required to obtain a court order authorizing detention within 60 days following the commencement of detention and thereafter shall further seek court review of the detention within 90 days of the court order and within 90 days of each subsequent court review.
(4) Advise the person being detained that he or she has the right to arrange to be represented by counsel or to have counsel provided, and that if he or she chooses to have counsel provided, the counsel will be notified that the person has requested legal representation.
(5) Be accompanied by a separate notice that shall include, but not be limited to, all of the following additional information:
(A) That the person being detained has the right to request release from detention by contacting a person designated on the local health officer's order at a telephone number stated on the order, and that the detention shall not continue for more that five business days after the request in the absence of a court order authorizing the detention.
(B) That he or she has the right to arrange to be advised and represented by counsel or to have counsel provided, and that if he or she chooses to have counsel provided, the counsel will be notified that the person has requested legal representation.
(C) That he or she may supply the addresses or telephone numbers of not more than two individuals to receive notification of the person's detention, and that the local health officer shall, at the patient's request, provide notice within the limits of reasonable diligence to those people that the person is being detained.

This section sets forth the requirements for the issuance of a health officer order. Health officer staff must ensure that the order in writing and that it include information regarding the reasons for detention, the right to counsel and the right to request release from detention. In addition to the health officer order, this section requires the preparation of a separate notice on the issues of right to counsel, the right to request release and the ability to have others noticed of the detention. Incumbent in that notice is that health officer staff will make reasonable efforts to contact the persons designated by the detainee. Finally, a copy of the health officer order must be served on the person to be detained. This section will necessitate the drafting, review and establishment of policies, procedures, forms and protocols and the training to implement them, especially training on the proper service of legal documents, for local health officers, their staff, their counsel, counsel's staff and others.

Section 121368 (former §3285.3) currently reads:

> Notwithstanding any inconsistent provision of Section 121365, 121366 or 121367, all of the following shall apply:
> (a) A person who is detained solely pursuant to subdivision (a) of Section 121365 shall not continue to be detained beyond the minimum period of time required, with the exercise of all due diligence, to make a medical determination of whether a person who is suspected of having tuberculosis disease, has active tuberculosis or whether a person who has active tuberculosis disease has infectious tuberculosis disease. Further detention of the person shall be authorized only upon the issuance of a local health officer's order pursuant to subdivision (d) or (e) of Section 121365.
> (b) A person who is detained solely for the reasons described in subdivision (d) of Section 121365 shall not continue to be detained after he or she ceases to be infectious or after the local health officer ascertains that changed circumstances exist that permit him or her to be adequately separated from others so as to prevent transmission of tuberculosis disease after his or her release from detention.
> (c) A person who is detained for the reasons described in subdivision (e) of Section 121365 shall not continue to be detained after he or she has completed an appropriate prescribed course of medication.

This section sets forth the situations that trigger a release from detention which include those situations where the public health is no longer in danger. This section will necessitate the drafting, review and establishment of policies, procedures, forms and protocols and the training to implement them for local health officers, their staff, and others.

Section 121369 (former §3285.4) currently reads:

> For purposes of Sections 121365, 121366, and 121367, all of the following shall apply:
> (a) If necessary, language interpreters and persons skilled in communicating with vision and hearing impaired individuals shall be provided in accordance with applicable law.
> (b) Nothing in those sections shall be construed to permit or require the forcible administration of any medication without prior court order.

> (c) Any and all orders authorized under those sections shall be made by the local health officer. His or her authority to make the orders may be delegated to the person in charge of medical treatment of inmates in penal institutions within the local health officer's jurisdiction, or pursuant to Section 7. The local health officer shall not make any orders incorporating by reference any other rules or regulations.

This section requires the use of interpreters when necessary and allows the health officer to delegate his duties to the head of medical treatment in penal institutions. The use of interpreters and the delegation of authority will necessitate the drafting, review and establishment of policies, procedures, forms and protocols and the training to implement them for local health officers, their staff, detention facility staff and/or detention facility medical staff, and others.

The net effect of this legislation is to cause an increase in the paperwork that must be reviewed, created, drafted, transmitted, maintained, and in the case of a health officer order to detain, served by the health officer and staff. In addition, the health officer and staff must prepare for and appear at hearings to obtain court orders to detain. The local detention facilities are also burdened by an increase in paperwork that must be created, drafted, transmitted and maintained for purposes of releasing or transferring individuals infected with TB. Costs are incurred by housing, detaining, transporting, and following up on individuals infected with TB. The legislation necessitates that counsel to the health officer, be it county counsel, city attorney or district attorney, review legal forms, serve documents, and prepare for and appear at hearings for court orders for detention. The local public defender, private defender or conflicts attorney, when counsel is requested by the detainee, must also prepare for and appear at hearings. Finally, a program of this magnitude and complexity requires the drafting, review and establishment of policies, procedures, forms and protocols as well as training to accomplish the above-stated requirements in compliance with law. Thus, the total costs of this program are reimbursable.

The County of Santa Clara does not have complete estimates on the cost of discharging this program, but estimates that the costs will exceed $1000.00 per year.

B. LEGISLATIVE HISTORY PRIOR TO 1975

There was no requirement prior to 1975, nor in any of the intervening years, until the passage of Chapter 676, Statutes of 1993, and Chapter 685, Statutes of 1994, filed on October 4, 1993, and September 21, 1994, respectively, which mandated the use of health officer orders, notices and hearings and the creation and review of discharge, release or transfer and initial disease notification reports.

C. SPECIFIC STATUTORY SECTIONS THAT CONTAIN THE MANDATED ACTIVITIES

As related above, the mandated activities are contained in Health and Safety Code §§121361, 121362, 121363, 121364, 121365, 121366, 121367, 121368, and 121369. These sections directly relate to the reimbursable provisions of this test claim.

D. COST ESTIMATES

The County of Santa Clara does not have complete estimates on the cost of discharging this program, but estimates that the costs exceed $1000.00 per year.

E. REIMBURSABLE COSTS MANDATED BY THE STATE

The costs incurred by the County of Santa Clara as a result of the statute on which this test claim is based are all reimbursable costs as such costs are "costs mandated by the State" under Article XIII B (6) of the California Constitution, and Government Code §17500 *et seq.* of the Government Code. Section 17514 of the Government Code defines "costs mandated by the state", and specifies the following three requirements:

1. There are "increased costs which a local agency is required to incur after July 1, 1980."

2. The costs are incurred "as a result of any statute enacted on or after January 1, 1975."

3. The costs are the result of "a new program or higher level of service of an existing program within the meaning of Section 6 of Article XIIIB of the California Constitution."

All three of the above requirements for finding costs mandated by the State are met as described previously herein.

MANDATE MEETS BOTH SUPREME COURT TESTS

The mandate created by this statute clearly meets both tests that the Supreme Court in the *County of Los Angeles* v. *State of California* (1987) created for determining what constitutes a reimbursable state mandated local program. Those two tests, which the Commission on State Mandates relies upon to determine if a reimbursable mandate exists, are the "unique to government" and the "carry out a state policy" tests. Their application to this test claim is discussed below.

Mandate Is Unique to Local Government

The sections of the law claimed involve local health officers, their departments, local detention facility staff and medical staff, local government counsel and public defenders. Only local government employs health officers and staff for the control of disease and promotion of health within the jurisdiction. And, only governmental entities maintain facilities for the incarceration of individuals.

Finally, only local government employs county counsels, city attorneys, district attorneys and public defenders for equal representation of parties in an adjudication of legal cases. Thus, this requirement is unique to government.

Mandate Carries Out a State Policy

From the legislation, it is clear that the Legislature wishes carry out its charge to protect the public health through expansion and definition of the powers of the local health officer to contain the spread of TB and through mandating communication between health officers and medical personnel in hospitals, treatment facilities and detention facilities. In addition, this legislation carries out the constitutional policy of an individual's right to be heard, right to counsel and equal access to the courts by ensuring that the individual who has been detained to prevent the spread of TB has counsel and an opportunity to challenge the detention.

In summary, these statutes mandate that local government bear the burden of the increase in paperwork, the requirement of increased communication, the use of health officer orders, the hearing process to challenge health officer orders, and the requirement of counsel in putting such court cases forward. The County of Santa Clara believes that the TB control program as set forth above satisfies the constitutional requirements for a mandate.

STATE FUNDING DISCLAIMERS ARE NOT APPLICABLE

There are seven disclaimers specified in Government Code §17556 which could serve to bar recovery of "costs mandated by the State", as defined in Government Code §17556. None of the seven disclaimers apply to this test claim:

1. The claim is submitted by a local agency or school district which requests legislative authority for that local agency or school district to implement the Program specified in the statutes, and that statute imposes costs upon the local agency or school district requesting the legislative authority.

2. The statute or executive order affirmed for the State that which had been declared existing law or regulation by action of the courts.

3. The statute or executive order implemented a federal law or regulation and resulted in costs mandated by the federal government, unless the statute or executive order mandates costs which exceed the mandate in that federal law or regulation.

4. The local agency or school district has the authority to levy service charges, fees or assessments sufficient to pay for the mandated program or increased level of service.

5. The statute or executive order provides for offsetting savings to local agencies or school districts which result in no net costs to the local agencies or school districts, or includes additional revenue that was specifically intended to fund the costs of the State mandate in an amount sufficient to fund the cost of the State mandate.

6. The statute or executive order imposed duties which were expressly included in a ballot measure approved by the voters in a Statewide election.

7. The statute created a new crime or infraction, eliminated a crime or infraction, or changed the penalty for a crime or infraction, but only for that portion of the statute relating directly to the enforcement of the crime or infraction.

None of the above disclaimers have any application to the test claim herein stated by the County of Santa Clara.

CONCLUSION

The enactment of Chapter 676, Statutes of 1993 and Chapter 685, Statutes of 1994 imposed a new state mandated program and cost on the County of Santa Clara by establishing a program for the control of TB which resulted in additional burdens on local health officers, local government attorneys, and local detention facility staff. The mandated program meets all of the criteria and tests for the Commission on State Mandates to find a reimbursable state mandated program. None of the so-called disclaimers or other statutory or constitutional provisions that would relieve the State from its constitutional obligation to provide reimbursement have any application to this claim.

G. CLAIM REQUIREMENTS

The following elements of this test claim are provided pursuant to Section 1183, Title 2, of the California Code of Regulations:

Exhibit 1: Chapter 676, Statutes of 1993
Exhibit 2: Chapter 685, Statutes of 1994
Exhibit 3: Chapter 294, Statutes of 1997
Exhibit 4: Chapter 116, Statutes of 1997
Exhibit 5: Chapter 763, Statutes of 2002

CLAIM CERTIFICATION

The foregoing facts are known to me personally and if so required, I could and would testify to the statements made herein. I declare under penalty of perjury under the laws of the State of California that the statements made in this document are true and complete to the best of my personal knowledge and as to all matters, I believe them to be true.

Executed this 23 day of September, 2003, at San Jose, California, by:

David J. Elledge

Dave Elledge, Controller-Treasurer
County of Santa Clara

DECLARATION OF DAVE ELLEDGE

I, Dave Elledge, make the following declaration under oath:

I am the Controller-Treasurer for County of Santa Clara. As part of my duties, I am responsible for the complete and timely recovery of costs mandated by the State.

I declare that I have examined the County of Santa Clara's State mandated duties and resulting costs, in implementing the subject law, and find that such costs are, in my opinion, "costs mandated by the State", as defined in Government Code, Section 17514:

> " 'Costs mandated by the State' means any increased costs which a local agency or school district is required to incur after July 1, 1980, as a result of any statute enacted on or after January 1, 1975, or any executive order implementing any statute enacted on or after January 1, 1975, which mandates a new program or higher level of service of an existing program within the meaning of Section 6 of Article XIII B of the California Constitution."

I am personally conversant with the foregoing facts, and if so required, I could and would testify to the statements made herein.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct of my own knowledge, except as to the matters which are stated upon information or belief, and as to those matters, I believe them to be true.

Executed this 23 day of September, 2003, at San Jose, California.

AMENDED IN SENATE AUGUST 30, 1993
AMENDED IN SENATE AUGUST 18, 1993
AMENDED IN SENATE AUGUST 17, 1993
AMENDED IN SENATE JULY 12, 1993
AMENDED IN ASSEMBLY APRIL 15, 1993

INTRODUCED BY Assembly Member Gotch

FEBRUARY 25, 1993

An act to amend Section 3351 of, to add Sections 3003, 3006, 3054, 3279.3, 3281, 3282, 3283, 3284, 3285.1, 3285.2, 3285.3, and 3285.4 to, and to repeal and add Section 3285 of, the Health and Safety Code, relating to communicable disease.

LEGISLATIVE COUNSEL'S DIGEST

AB 803, Gotch. Communicable disease: tuberculosis.

(1) Existing law requires the State Department of Health Services to maintain a program for the control of tuberculosis.

This bill would authorize the State Director of Health Services and a local health officer to order examinations for tuberculosis infection, as defined, of certain persons.

The bill would require the department to be the lead agency for all tuberculosis control and prevention activities at the state level.

The bill would, with certain exceptions, prohibit a person known to have active tuberculosis disease, as defined, or a person for whom the medical staff has reasonable grounds to believe has active tuberculosis disease from being discharged from a licensed health facility, or penal institution, or

transferred, until certain notification and in some situations, treatment plan approval requirements are met.

The bill would require a health care provider who provides treatment to, or a person in charge of a health facility or clinic providing outpatient treatment for, a person with active tuberculosis, to report to the local health officer, as prescribed. The bill would require the health care provider to examine, or cause to be examined all household contacts of the person, as specified.

This bill would require a health officer to notify the medical officer of the parole region when there are reasonable grounds to believe that a parolee under the jurisdiction of the Department of Corrections has active tuberculosis disease. By imposing new duties upon a local entity, this bill would impose a state-mandated local program.

(2) Existing law requires a local health officer to use every available means to ascertain the existence of, and investigate, all reported or suspected cases of tuberculosis in the infection stages, to make examinations and isolate, or quarantine and isolate certain persons, following local rules and regulations, and to make an examination order and isolation or quarantine order under certain circumstances, as prescribed.

This bill would in addition authorize the local health officer, under prescribed conditions, to issue an order authorizing removal to, or admission into, a health facility or other treatment facility, an order requiring completion of an appropriate prescribed course of medication, an order to follow a course of directly observed therapy, or an order for exclusion from the workplace. The bill would authorize a health officer to issue an order for isolation of persons with infectious tuberculosis in their residence. The order would be required to include certain information, including payer source. The bill would authorize a health officer to issue an order authorizing removal to, or admission into, a health facility or other treatment facility, as prescribed. The bill would exclude persons incarcerated in a state correctional institution from being subject to one of those orders.

The bill would prohibit anything in that provision from being construed to permit or require forcible administration of medication.

This bill would authorize a health officer to remove to, or detain in, a hospital or other place for examination or

treatment persons subject to an order under this act, as prescribed.

(3) Existing law provides that any person who violates or fails to comply with an order of a health officer directing his or her isolation or examination is guilty of a misdemeanor.

This bill would instead provide that any person who violates or fails to comply with any order described in (2) is guilty of a misdemeanor. By changing the definition of a crime, the bill would impose a state-mandated local program.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that for certain costs no reimbursement is required by this act for a specified reason.

Moreover, this bill would provide that, if the Commission on State Mandates determines that this bill contains other costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

THE PEOPLE OF THE STATE OF CALIFORNIA DO ENACT AS FOLLOWS:

SECTION 1. Section 3003 is added to the Health and Safety Code, to read:

3003. As used in this division, a person has "active tuberculosis disease" when either one of the following occur:

(a) A smear or culture taken from any source has tested positive for tuberculosis and the person has not completed the appropriate prescribed course of medication for tuberculosis disease.

(b) There is radiographic, current clinical, or laboratory evidence sufficient to establish a medical diagnosis of tuberculosis for which treatment is indicated.

SEC. 2. Section 3006 is added to the Health and Safety Code, to read:

3006. As used in this division the following terms have the following meanings, unless the context indicates otherwise:

(a) "Infectious tuberculosis disease" means active or suspected active tuberculosis disease in an infectious state.

(b) "Tuberculosis infection" means the latent phase of tuberculosis, during which the infected person cannot spread tuberculosis to others.

(c) "Heightened risk of tuberculosis exposure" means likely exposure to persons with infectious tuberculosis disease.

(d) "The appropriate prescribed course of medication for tuberculosis disease" means that course recommended by the most recent guidelines of the department, the most recent guidelines of the Centers for Disease Control and Prevention, or the most recent guidelines of the American Thoracic Society.

(e) "Directly observed therapy" means the appropriately prescribed course of treatment for tuberculosis disease in which the prescribed antituberculosis medications are administered to the person or taken by the person under direct observation.

(f) An "examination" for tuberculosis infection or disease means conducting tuberculosis specific tests, including, but not limited to, Mantoux tuberculin skin tests, laboratory examination, and X-rays, as recommended by the most recent guidelines of any of the following:

(1) The local health officer.

(2) The department.

(3) The Centers for Disease Control and Prevention.

(4) The American Thoracic Society.

(g) "State correctional institution" means a prison, institution, or other facility under the jurisdiction of the Department of Corrections or the Department of the Youth Authority.

(h) "Local detention facility" is defined in Section 6031.4 of the Penal Code.

(i) "Penal institution" means either a state correctional institution or a local detention facility.

(j) "Health facility" means a licensed health facility as defined in Sections 1250, 1250.2, and 1250.3.

SEC. 3. Section 3054 is added to the Health and Safety Code, to read:

3054. (a) The state director may order examinations for tuberculosis infection in the following persons for the purpose of directing preventive measures:

(1) Persons in close contact with persons with infectious tuberculosis disease.

(2) Other persons for whom the state director has reasonable grounds to determine are at heightened risk of tuberculosis exposure.

(b) An order for examination for tuberculosis infection shall be in writing and shall include other terms and conditions as may be necessary to protect the public health.

SEC. 4. Section 3279.3 is added to the Health and Safety Code, to read:

3279.3. The state department shall be the lead agency for all tuberculosis control and prevention activities at the state level.

SEC. 5. Section 3281 is added to the Health and Safety Code, to read:

3281. (a) A health facility, local detention facility, or state correctional institution shall not discharge or release any of the following persons unless subdivision (e) is complied with:

(1) A person known to have active tuberculosis.

(2) A person who the medical staff of the health facility or of the penal institution has reasonable grounds to believe has active tuberculosis.

In addition, persons specified in this subdivision may be discharged from a health facility only after a written treatment plan described in Section 3282 is approved by a health officer.

Persons specified in this subdivision may be discharged from a penal institution only after a written treatment plan described in Section 3282 is received by a health officer. This subdivision shall not apply to transfers within the state correctional system or to interfacility transfers occurring within a local detention facility system.

(b) No health facility shall transfer a person described in paragraph (1) or (2) of subdivision (a) to another health facility unless subdivision (e) is complied with. This subdivision shall not apply to transfers within the state correctional system or to interfacility transfers occurring within a local detention facility system.

(c) No state correctional institution or local detention facility shall transfer a person described in paragraph (1) or (2) of subdivision (a) from a state to a local, or from a local to a state, penal institution unless notification and a written treatment plan are received by the chief medical officer of the penal institution receiving the person.

(d) No local detention facility shall transfer a person described in paragraphs (1) and (2) of subdivision (a) to a local detention facility in another jurisdiction unless subdivision (e) is complied with and notification and a written

treatment plan are received by the chief medical officer of the local detention facility receiving the person.

(e) Persons specified in paragraph (1) or (2) of subdivision (a), in subdivision (b), in subdivision (c), or in subdivision (d) may be discharged, released, or transferred, as the case may be, only after notification and a written treatment plan pursuant to Section 3282 has been received by the local health officer. When prior notification is not possible or would jeopardize the public safety or the safety and security of the penal institution, then the notification and treatment plan shall be submitted within 24 hours of discharge, release, or transfer.

SEC. 6. Section 3282 is added to the Health and Safety Code, to read:

3282. Each health care provider who treats a person for active tuberculosis, each person in charge of a health facility, or each person in charge of a clinic providing outpatient treatment for active tuberculosis shall promptly report to the local health officer at the times that the health officer requires, but no less frequently than when there are reasonable grounds to believe that a person has active tuberculosis, and when a person ceases treatment for tuberculosis. Situations in which the provider may conclude that the patient has ceased treatment include times when the patient fails to keep an appointment, relocates without transferring care, or discontinues care. The report shall include an individual treatment plan that indicates the name of the medical provider who has specifically agreed to provide medical care, the address of the person, and any other pertinent clinical or laboratory information required by the health officer. Each health care provider who treats a person with active tuberculosis disease, and each person in charge of a health facility or a clinic providing outpatient treatment for active tuberculosis disease, shall maintain written documentation of each patient's adherence to his or her individual treatment plans. Nothing in this section shall authorize the disclosure of test results for human immunodeficiency virus (HIV) unless authorized by Chapter 1.11 (commencing with Section 199.20) of, Chapter 1.12 (commencing with Section 199.30) of, and Chapter 1.13 (commencing with Section 199.42) of, Division 1.

In the case of a parolee under the jurisdiction of the Department of Corrections, the health officer shall notify the medical officer of the parole region when there are reasonable

grounds to believe that the parolee has active tuberculosis disease and when the parolee ceases treatment for tuberculosis. Situations where the health officer may conclude that the parolee has ceased treatment include times when the parolee fails to keep an appointment, relocates without transferring care, or discontinues care.

SEC. 7. Section 3283 is added to the Health and Safety Code, to read:

3283. Each health care provider who treats a person for active tuberculosis disease shall examine, or cause to be examined, all household contacts or shall refer them to the local health officer for examination. Each health care provider shall promptly notify the health officer of the referral. When required by the health officer, nonhousehold contacts and household contacts not examined by a health care provider shall submit to examination by the health officer or designee. If any abnormality consistent with the symptoms of tuberculosis disease is found, steps satisfactory to the health officer shall be taken to refer the person promptly to a health care provider for further investigation, and if necessary, treatment. Contacts shall be reexamined at times and in a manner as the health officer may require. When requested by the health officer, a health care provider shall report the results of any examination related to tuberculosis of a contact.

SEC. 8. Section 3284 is added to the Health and Safety Code, to read:

3284. (a) Within the territory under his or her jurisdiction, each health officer may order examinations for tuberculosis infection for the purposes of directing preventive measures for persons in the territory, except those incarcerated in a state correctional institution, for whom the health officer has reasonable grounds to determine are at heightened risk of tuberculosis exposure.

(b) An order for examination pursuant to this section shall be in writing and shall include other terms and conditions as may be necessary to protect the public health.

SEC. 9. Section 3285 of the Health and Safety Code is repealed.

SEC. 10. Section 3285 is added to the Health and Safety Code, to read:

3285. Each health officer is hereby directed to use every available means to ascertain the existence of, and immediately investigate all reported or suspected cases of active

uberculosis disease in the jurisdiction, and to ascertain the ources of those infections. In carrying out the nvestigations, each health officer shall follow applicable ocal rules and regulations and all general and special rules, egulations, and orders of the state department. If the health fficer determines that the public health in general or the ealth of a particular person is endangered by exposure to a erson who is known to have active tuberculosis disease, or to a erson for whom there are reasonable grounds to believe has ctive tuberculosis disease, the health officer may issue any rders he or she deems necessary to protect the public health or he health of any other person, and may make application to a ourt for enforcement of the orders. The orders shall be in riting, and shall include the name of the person, the period of ime during which the order shall remain effective, the ocation, payor source, and other terms and conditions as may be ecessary to protect the public health. Upon issuing an order, copy of the order shall be served upon the person named in he order. Upon the receipt of information that any order has een violated, the health officer shall advise the district ttorney of the county in which the violation has occurred, in riting, and shall submit to the district attorney the nformation in his or her possession relating to the subject matter of the order, and of the violation or violations thereof.

Any and all orders authorized under this chapter shall be ade by the health officer, and his or her authority to make the rders may be delegated to the person in charge of medical reatment of inmates in penal institutions within the territory, r pursuant to Section 7. The health officer shall not make ny orders incorporating by reference any other rules or egulations.

The orders may include, but shall not be limited to, any of he following:

(a) An order authorizing the removal to, or admission into, a ealth facility or other treatment facility for appropriate examination for tuberculosis of a person who is known to have active tuberculosis, or a person for whom there are reasonable grounds to believe that the person has active tuberculosis and who is unable or unwilling voluntarily to submit to the examination by a physician or by the health officer. Any person whom the health officer determines should have an examination for tuberculosis may have the examination made by a physician of

of medication for tuberculosis and, if necessary, follow required contagion precautions for tuberculosis. The behavior may include, but is not limited to, refusal or failure to take medication for tuberculosis, refusal or failure to keep appointments or treatment for tuberculosis, refusal or failure to complete the treatment for tuberculosis, or disregard for contagion precautions for tuberculosis.

(f) An order for exclusion from attendance at the workplace for persons with infectious tuberculosis. The order may, also, exclude the person from any place when the health officer determines that the place cannot be maintained in a manner adequate to protect others against the spread of tuberculosis.

(g) An order for isolation of persons with infectious tuberculosis to their place of residence until the health officer has determined that they no longer have infectious tuberculosis.

(h) This section shall apply to all persons except those incarcerated in a state correctional institution.

(i) This section shall not be construed to require a private hospital or other private treatment facility to accept any patient without a payment source, including county responsibilities under Section 17000 of the Welfare and Institutions Code, except as required by Sections 1317 et seq. or by federal law.

SEC. 11. Section 3285.1 is added to the Health and Safety Code, to read:

3285.1. The health officer may remove to, or detain in, a hospital or other place for examination or treatment a person who is the subject of an order of removal or detention issued pursuant to Section 3285 without a prior court order except that when a person detained pursuant to Section 3285 has requested release, the health officer shall make an application for a court order authorizing the detention within 72 hours after the request or, if the 72-hour period ends on a Saturday, Sunday, or legal holiday, by the end of the first business day following the Saturday, Sunday, or legal holiday, which application shall include a request for an expedited hearing. After the request for release, detention shall not continue for more than five business days in the absence of a court order authorizing detention. However, in no event shall any person be detained for more than 60 days without a court order authorizing the detention. The health officer shall seek further court review of the detention within 90 days following the initial court

his or her own choice who is licensed to practice medicine under Chapter 5 (commencing with Section 2000) of Division 2 of the Business and Professions Code under terms and conditions as the health officer shall determine on reasonable grounds to be necessary to protect the public health.

(b) An order requiring a person who has active tuberculosis to complete an appropriate prescribed course of medication for tuberculosis and, if necessary, to follow required contagion precautions for tuberculosis. This subdivision does not allow the forceable or involuntary administration of medication. If an order to complete therapy is not complied with, the health officer may issue orders pursuant to subdivision (d), (e), (f), or (g).

(c) An order requiring a person who has active tuberculosis and who is unable or unwilling otherwise to complete an appropriate prescribed course of medication for tuberculosis to follow a course of directly observed therapy. This subdivision does not allow forceable or involuntary administration of medication. If an order to follow a course of directly observed therapy is not complied with, the health officer may issue orders pursuant to subdivision (d), (e), (f), or (g).

(d) An order for the removal to, or admission into, a health facility or other treatment facility of a person if both of the following occur:

(1) The person has infectious tuberculosis, or who presents a substantial likelihood of having infectious tuberculosis, based upon proven epidemiologic evidence, clinical evidence, X-ray readings, or tuberculosis laboratory test results.

(2) The health officer finds, based on recognized infection control principles, that there is a substantial likelihood the person may transmit tuberculosis to others because of his or her inadequate separation from others.

(e) An order for the removal to, or admission into, a health facility or other treatment facility of a person if both of the following occur:

(1) The person has active tuberculosis disease, or has been reported to the health officer as having active tuberculosis disease with no subsequent report to the health officer of the completion of an appropriate prescribed course of medication for tuberculosis.

(2) There is a substantial likelihood, based on the person's past or present behavior, that he or she cannot be relied upon to participate in or complete an appropriate prescribed course

order authorizing detention and thereafter within 90 days of each subsequent court review. In any court proceeding to enforce a health officer's order for the removal or detention of a person, the health officer shall prove the particularized circumstances constituting the necessity for the detention by clear and convincing evidence. Any person who is subject to a detention order shall have the right to be represented by counsel and upon the request of the person, counsel shall be provided.

SEC. 12. Section 3285.2 is added to the Health and Safety Code, to read:

3285.2. (a) An order of a health officer pursuant to Section 3285 shall set forth all of the following:

(1) The legal authority under which the order is issued, including the particular sections of state law or regulations.

(2) An individualized assessment of the person's circumstances or behavior constituting the basis for the issuance of the order.

(3) The less restrictive treatment alternatives that were attempted and were unsuccessful, or the less restrictive treatment alternatives that were considered and rejected, and the reasons the alternatives were rejected.

(b) An order for the removal and detention of a person shall do all of the following:

(1) Include the purpose of the detention.

(2) Advise the person being detained that he or she has the right to request release from detention by contacting a person designate on the health officer's order at the telephone number stated on the order and that the detention shall not continue for more than five business days after the request, in the absence of a court order authorizing the detentions.

(3) Advise the person being detained that, whether or not he or she requests release from detention, the health officer is required to obtain a court order authorizing detention within 60 days following the commencement of detention and thereafter shall further seek court review of the detention within 90 days of the court order and within 90 days of each subsequent court review.

(4) Advise the person being detained that he or she has the right to arrange to be represented by counsel or to have counsel provided, and that if he or she chooses to have counsel provided, the counsel will be notified that the person has requested legal representation.

(5) Be accompanied by a separate notice that shall include, but not be limited to, all of the following additional information:

(A) That the person being detained has the right to request release from detention by contacting a person designated on the health officer's order at a telephone number stated on the order, and that the detention shall not continue for more than five business days after the request in the absence of a court order authorizing the detention.

(B) That he or she has the right to arrange to be advised and represented by counsel or to have counsel provided, and that if he or she chooses to have counsel provided, the counsel will be notified that the person has requested legal representation.

(C) That he or she may supply the addresses or telephone numbers of friends or relatives to receive notification of the person's detention, and that the health officer shall, at the patient's request, provide notice to a reasonable number of those people that the person is being detained.

SEC. 13. Section 3285.3 is added to the Health and Safety Code, to read:

3285.3. Notwithstanding any inconsistent provision of Section 3285, 3285.1 or 3285.2, all of the following shall apply:

(a) A person who is detained solely pursuant to subdivision (a) of Section 3285 shall not continue to be detained beyond the minimum period of time required, with the exercise of all due diligence, to make a medical determination of whether a person who is suspected of having tuberculosis, has active tuberculosis or whether a person who has active tuberculosis has infectious tuberculosis. Further detention of the person shall be authorized only upon the issuance of a health officer's order pursuant to subdivision (d) or (e) of Section 3285.

(b) A person who is detained solely for the reasons described in subdivision (d) of Section 3285 shall not continue to be detained after he or she ceases to be infectious or after the health officer ascertains that changed circumstances exist that permit him or her to be adequately separated from others so as to prevent transmission of tuberculosis after his or her release from detention.

(c) A person who is detained for the reasons described in subdivision (f) of Section 3285 shall not continue to be detained after he or she has completed an appropriate prescribed course of medication.

SEC. 14. Section 3285.4 is added to the Health and Safety Code, to read:

3285.4. For the purposes of Sections 3285, 3285.1, and 3285.2, all of the following shall apply:

(a) If necessary, language interpreters and persons skilled in communicating with vision and hearing impaired individuals shall be provided in accordance with applicable law.

(b) Nothing in those sections shall be construed to permit or require the forcible administration of any medication without a prior court order.

(c) Any and all orders authorized under those sections shall be made by the health officer and his or her authority to make the orders shall be delegated only pursuant to Section 7. The health officer shall not make any orders incorporating by reference any other rules or regulations.

SEC. 15. Section 3351 of the Health and Safety Code is amended to read:

3351. Inasmuch as the orders provided for by Section 3285 are for the protection of the public health, any person who, after service upon him or her of an order of a health officer as provided in Section 3285 violates or fails to comply with the order, is guilty of a misdemeanor. Upon conviction thereof, in addition to any and all other penalties that may be imposed by law upon the conviction, the person may be ordered by the court confined until the order of the health officer shall have been fully complied with or terminated by the health officer, but not exceeding one year from the date of passing judgment upon the conviction, further, the court, upon suitable assurances that the order of the health officer will be complied with, may place any person convicted of a violation of the order of the health officer upon probation for a period not to exceed two years, upon condition that the order of the health officer be fully complied with, further, upon any subsequent violation of the order of the health officer, the probation shall be terminated and confinement as provided for in this section shall be ordered by the court.

SEC. 16. Section 3355 of the Health and Safety Code is amended to read:

3355. The district attorney of the county in which a violation of Sections 3285 and 3351 may be committed, shall prosecute all such violations and, upon the request of a health officer, shall prosecute, as provided in Section 3351, violations of any order of a health officer made and served as

provided in Section 3285 or Section 3002.

SEC. 17. No reimbursement is required by this act pursuant to Section 6 of Article XIIIB of the California Constitution because the only costs which may be incurred by a local agency or school district will be incurred because this act creates a new crime or infraction, changes the definition of a crime or infraction, changes the penalty for a crime or infraction, or eliminates a crime or infraction. Moreover, notwithstanding Section 17610 of the Government Code, if the Commission on State Mandates determines that this act contains other costs mandated by the state, reimbursement to local agencies and school districts for those costs shall be made pursuant to Part 7 (commencing with Section 17500) of Division 4 of Title 2 of the Government Code. If the statewide cost of the claim for reimbursement does not exceed one million dollars ($1,000,000), reimbursement shall be made from the State Mandates Claims Fund.

Also, notwithstanding Section 17580 of the Government Code, unless otherwise specified in this act, the provisions of this act shall become operative on the same date that the act takes effect pursuant to the California Constitution. Section 17580 of the Government Code, unless otherwise specified in this act, the provisions of this act shall become operative on the same date that the act takes effect pursuant to the California Constitution.

AMENDED IN SENATE JUNE 30, 1994
AMENDED IN ASSEMBLY MAY 6, 1993
AMENDED IN ASSEMBLY APRIL 22, 1993

INTRODUCED BY Assembly Member Gotch

FEBRUARY 25, 1993

An act to amend Sections 3003, 3006, 3281, 3282, 3283, 3284, 3285, 3285.1, 3285.2, 3285.3, 3285.4, and 3351 of the Health and Safety Code, relating to communicable disease.

LEGISLATIVE COUNSEL'S DIGEST

AB 804, Gotch. Communicable disease: tuberculosis.

Existing law requires the State Department of Health Services to maintain a program for the control of tuberculosis and administer the funds made available to it by the state for the care of tuberculosis patients.

Existing law, with certain exceptions, prohibits discharge or release of persons from certain facilities if the person is known to have tuberculosis, or if there are reasonable grounds to believe the person has tuberculosis, unless certain procedures are followed, including providing a notice and report to the local health officer.

This bill would clarify that local health officers may delegate duties and authority relating to the issuance of related orders, and would make conforming and other technical changes. The bill would require review of related treatment plans within 24 hours, and would thereby impose a state-mandated local program.

Existing law requires that related delegations of authority

by the local health officer be made pursuant to specified provisions of law relating to delegation of authority to a deputy.

This bill would provide that delegation may also be made to the person in charge of medical treatment of inmates at penal institutions. The bill would specify that in cases of court enforcement of an order, confinement may be accomplished by placement in any appropriate facility, penal institution, or dwelling specifically approved by the local health officer.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

THE PEOPLE OF THE STATE OF CALIFORNIA DO ENACT AS FOLLOWS:

SECTION 1. Section 3003 of the Health and Safety Code is amended to read:

3003. As used in this division, a person has "active tuberculosis disease" when either one of the following occur:

(a) A smear or culture taken from any source in the person's body has tested positive for tuberculosis and the person has not completed the appropriate prescribed course of medication for active tuberculosis disease.

(b) There is radiographic, current clinical, or laboratory evidence sufficient to support a medical diagnosis of tuberculosis for which treatment is indicated.

SEC. 2. Section 3006 of the Health and Safety Code is amended to read:

3006. As used in this division the following terms have the following meanings, unless the context indicates otherwise:

(a) "Infectious tuberculosis disease" means active or

suspected active tuberculosis disease in an infectious state.

(b) "Tuberculosis infection" means the latent phase of tuberculosis, during which the infected person cannot spread tuberculosis to others.

(c) "Heightened risk of tuberculosis exposure" means likely exposure to persons with infectious tuberculosis disease.

(d) "The appropriate prescribed course of medication for tuberculosis disease" means that course recommended by the health officer, the most recent guidelines of the department, the most recent guidelines of the Centers for Disease Control and Prevention, or the most recent guidelines of the American Thoracic Society.

(e) "Directly observed therapy" means the appropriately prescribed course of treatment for tuberculosis disease in which the prescribed antituberculosis medications are administered to the person or taken by the person under direct observation of a health care provider or a designee of the health care provider approved by the local health officer.

(f) An "examination" for tuberculosis infection or disease means conducting tests, including, but not limited to, Mantoux tuberculin skin tests, laboratory examination, and X-rays, as recommended by any of the following:

(1) The local health officer.

(2) The most recent guidelines of the state department.

(3) The most recent guidelines of the Centers for Disease Control and Prevention.

(4) The most recent guidelines of the American Thoracic Society.

(g) "State correctional institution" means a prison, institution, or other facility under the jurisdiction of the Department of Corrections or the Department of the Youth Authority.

(h) "Local detention facility" is defined in Section 6031.4 of the Penal Code.

(i) "Penal institution" means either a state correctional institution or a local detention facility.

(j) "Health facility" means a licensed health facility as defined in Sections 1250, 1250.2, and 1250.3.

(k) "Health officer" or "local health officer" includes his or her designee.

SEC. 3. Section 3281 of the Health and Safety Code is amended to read:

3281. (a) (1) A health facility, local detention facility,

or state correctional institution shall not discharge or release any of the following persons unless subdivision (e) is complied with:

(A) A person known to have active tuberculosis disease.

(B) A person who the medical staff of the health facility or of the penal institution has reasonable grounds to believe has active tuberculosis disease.

(2) In addition, persons specified in this subdivision may be discharged from a health facility only after a written treatment plan described in Section 3282 is approved by a local health officer of the jurisdiction in which the health facility is located. Treatment plans submitted for approval pursuant to this paragraph shall be reviewed by the local health officer within 24 hours of receipt of the plans.

(3) The approval requirement of paragraph (2) shall not apply to any transfer to a general acute care hospital when the transfer is due to an immediate need for a higher level of care, nor to any transfer from any health facility to a correctional institution. Transfers or discharges described in this paragraph shall occur only after the notification and treatment plan required by Section 3282 have been received by the local health officer.

(4) This subdivision shall not apply to transfers within the state correctional system or to interfacility transfers occurring within a local detention facility system.

(b) No health facility shall transfer a person described in subparagraph (A) or (B) of paragraph (1) of subdivision (a) to another health facility unless subdivision (e) is complied with. This subdivision shall not apply to transfers within the state correctional system or to interfacility transfers occurring within a local detention facility system.

(c) No state correctional institution or local detention facility shall transfer a person described in subparagraph (A) or (B) of paragraph (1) of subdivision (a) from a state to a local, or from a local to a state, penal institution unless notification and a written treatment plan are received by the chief medical officer of the penal institution receiving the person.

(d) No local detention facility shall transfer a person described in subparagraph (A) or (B) of paragraph (1) of subdivision (a) to a local detention facility in another jurisdiction unless subdivision (e) is complied with and notification and a written treatment plan are received by the

chief medical officer of the local detention facility receiving the person.

(e) All discharges, releases, or transfers described in subdivisions (a), (b), (c), and (d) may occur only after notification and a written treatment plan pursuant to Section 3282 has been received by the local health officer. When prior notification would jeopardize the person's health, the public safety, or the safety and security of the penal institution, then the notification and treatment plan shall be submitted within 24 hours of discharge, release, or transfer.

SEC. 4. Section 3282 of the Health and Safety Code is amended to read:

3282. Each health care provider who treats a person for active tuberculosis disease, each person in charge of a health facility, or each person in charge of a clinic providing outpatient treatment for active tuberculosis disease shall promptly report to the local health officer at the times that the health officer requires, but no less frequently than when there are reasonable grounds to believe that a person has active tuberculosis disease, and when a person ceases treatment for tuberculosis disease. Situations in which the provider may conclude that the patient has ceased treatment include times when the patient fails to keep an appointment, relocates without transferring care, or discontinues care. The initial disease notification report shall include an individual treatment plan that includes the patient name, address, date of birth, tuberculin skin test results, pertinent radiologic, microbiologic, and pathologic reports whether final or pending, and any other information required by the local health officer. Subsequent reports shall provide updated clinical status and laboratory results, assessment of treatment adherence, name of current care provider if patient transfers care, and any other information required by the local health officer. A facility discharge, release, or transfer report shall include all pertinent and updated information required by the local health officer not previously reported on initial or subsequent reports, and shall specifically include verified patient address, the name of the medical provider who has specifically agreed to provide medical care, clinical information used to assess the current infectious state, and any other information required by the local health officer. Each health care provider who treats a person with active tuberculosis disease, and each person in charge of a health facility or a clinic providing

outpatient treatment for active tuberculosis disease, shall maintain written documentation of each patient's adherence to his or her individual treatment plans. Nothing in this section shall authorize the disclosure of test results for human immunodeficiency virus (HIV) unless authorized by Chapter 1.11 (commencing with Section 199.20) of, Chapter 1.12 (commencing with Section 199.30) of, and Chapter 1.13 (commencing with Section 199.42) of, Division 1.

In the case of a parolee under the jurisdiction of the Department of Corrections, the local health officer shall notify the medical officer of the parole region or the physician and surgeon designated by the Director of Corrections when there are reasonable grounds to believe that the parolee has active tuberculosis disease and when the parolee ceases treatment for tuberculosis. Situations where the local health officer may conclude that the parolee has ceased treatment include times when the parolee fails to keep an appointment, relocates without transferring care, or discontinues care.

SEC. 5. Section 3283 of the Health and Safety Code is amended to read:

3283. Each health care provider who treats a person for active tuberculosis disease shall examine, or cause to be examined, all household contacts or shall refer them to the local health officer for examination. Each health care provider shall promptly notify the local health officer of the referral.

When required by the local health officer, nonhousehold contacts and household contacts not examined by a health care provider shall submit to examination by the local health officer or designee. If any abnormality consistent with tuberculosis disease is found, steps satisfactory to the local health officer shall be taken to refer the person promptly to a health care provider for further investigation, and if necessary, treatment.

Contacts shall be reexamined at times and in a manner as the local health officer may require. When requested by the local health officer, a health care provider shall report the results of any examination related to tuberculosis of a contact.

SEC. 6. Section 3284 of the Health and Safety Code is amended to read:

3284. (a) Within the territory under his or her jurisdiction, each local health officer may order examinations for tuberculosis infection for the purposes of directing preventive measures for persons in the territory, except those incarcerated in a state correctional institution, for whom the

local health officer has reasonable grounds to determine are at heightened risk of tuberculosis exposure.

(b) An order for examination pursuant to this section shall be in writing and shall include other terms and conditions as may be necessary to protect the public health.

SEC. 7. Section 3285 of the Health and Safety Code is amended to read:

3285. Each local health officer is hereby directed to use every available means to ascertain the existence of, and immediately investigate all reported or suspected cases of active tuberculosis disease in the jurisdiction, and to ascertain the sources of those infections. In carrying out the investigations, each local health officer shall follow applicable local rules and regulations and all general and special rules, regulations, and orders of the state department. If the local health officer determines that the public health in general or the health of a particular person is endangered by exposure to a person who is known to have active tuberculosis disease, or to a person for whom there are reasonable grounds to believe has active tuberculosis disease, the local health officer may issue any orders he or she deems necessary to protect the public health or the health of any other person, and may make application to a court for enforcement of the orders. Upon the receipt of information that any order has been violated, the health officer shall advise the district attorney of the county in which the violation has occurred, in writing, and shall submit to the district attorney the information in his or her possession relating to the subject matter of the order, and of the violation or violations thereof.

The orders may include, but shall not be limited to, any of the following:

(a) An order authorizing the removal to, detention in, or admission into, a health facility or other treatment facility for appropriate examination for active tuberculosis disease of a person who is known to have active tuberculosis disease, or a person for whom there are reasonable grounds to believe that the person has active tuberculosis disease and who is unable or unwilling voluntarily to submit to the examination by a physician or by the local health officer. Any person whom the health officer determines should have an examination for tuberculosis disease may have the examination made by a physician and surgeon of his or her own choice who is licensed to practice medicine under Chapter 5 (commencing with Section

2000) of Division 2 of the Business and Professions Code under terms and conditions as the local health officer shall determine on reasonable grounds to be necessary to protect the public health. This section does not authorize the local health officer to mandate involuntary anergy testing.

(b) An order requiring a person who has active tuberculosis disease to complete an appropriate prescribed course of medication for tuberculosis disease and, if necessary, to follow required infection control precautions for tuberculosis disease. This subdivision does not allow the forceable or involuntary administration of medication.

(c) An order requiring a person who has active tuberculosis disease and who is unable or unwilling otherwise to complete an appropriate prescribed course of medication for tuberculosis disease to follow a course of directly observed therapy. This subdivision does not allow forceable or involuntary administration of medication.

(d) An order for the removal to, detention in, or admission into, a health facility or other treatment facility of a person if both of the following occur:

(1) The person has infectious tuberculosis disease, or who presents a substantial likelihood of having infectious tuberculosis disease, based upon proven epidemiologic evidence, clinical evidence, X-ray readings, or tuberculosis laboratory test results.

(2) The local health officer finds, based on recognized infection control principles, that there is a substantial likelihood the person may transmit tuberculosis to others because of his or her inadequate separation from others.

(e) An order for the removal to, detention in, or admission into, a health facility or other treatment facility of a person if both of the following occur:

(1) The person has active tuberculosis disease, or has been reported to the health officer as having active tuberculosis disease with no subsequent report to the health officer of the completion of an appropriate prescribed course of medication for tuberculosis disease.

(2) There is a substantial likelihood, based on the person's past or present behavior, that he or she cannot be relied upon to participate in or complete an appropriate prescribed course of medication for tuberculosis disease and, if necessary, follow required infection control precautions for tuberculosis disease. The behavior may include, but is not limited to,

refusal or failure to take medication for tuberculosis disease, refusal or failure to keep appointments or treatment for tuberculosis disease, refusal or failure to complete the treatment for tuberculosis disease, or disregard for infection control precautions for active tuberculosis disease.

(f) An order for exclusion from attendance at the workplace for persons with infectious tuberculosis disease. The order may, also, exclude the person from any place when the local health officer determines that the place cannot be maintained in a manner adequate to protect others against the spread of tuberculosis disease.

(g) An order for isolation of persons with infectious tuberculosis disease to their place of residence until the local health officer has determined that they no longer have infectious tuberculosis disease.

(h) This section shall apply to all persons except those incarcerated in a state correctional institution.

(i) This section shall not be construed to require a private hospital or other private treatment facility to accept any patient without a payment source, including county responsibilities under Section 17000 of the Welfare and Institutions Code, except as required by Sections 1317 et seq. or by federal law.

SEC. 8. Section 3285.1 of the Health and Safety Code is amended to read:

3285.1. The local health officer may detain in a hospital or other appropriate place for examination or treatment, a person who is the subject of an order of detention issued pursuant to subdivision (a), (d), or (e) of Section 3285 without a prior court order except that when a person detained pursuant to subdivision (a), (d), or (e) of Section 3285 has requested release, the local health officer shall make an application for a court order authorizing the continued detention within 72 hours after the request or, if the 72-hour period ends on a Saturday, Sunday, or legal holiday, by the end of the first business day following the Saturday, Sunday, or legal holiday, which application shall include a request for an expedited hearing. After the request for release, detention shall not continue for more than five business days in the absence of a court order authorizing detention. However, in no event shall any person be detained for more than 60 days without a court order authorizing the detention. The local health officer shall seek further court review of the detention within 90 days

following the initial court order authorizing detention and thereafter within 90 days of each subsequent court review. In any court proceeding to enforce a local health officer's order for the removal or detention of a person, the local health officer shall prove the particularized circumstances constituting the necessity for the detention by clear and convincing evidence. Any person who is subject to a detention order shall have the right to be represented by counsel and upon the request of the person, counsel shall be provided.

SEC. 9. Section 3285.2 of the Health and Safety Code is amended to read:

3285.2. (a) An order of a local health officer pursuant to Section 3285 shall set forth all of the following:

(1) The legal authority under which the order is issued, including the particular sections of state law or regulations.

(2) An individualized assessment of the person's circumstances or behavior constituting the basis for the issuance of the order.

(3) The less restrictive treatment alternatives that were attempted and were unsuccessful, or the less restrictive treatment alternatives that were considered and rejected, and the reasons the alternatives were rejected.

(4) The orders shall be in writing, and shall include the name of the person, the period of time during which the order shall remain effective, the location, payer source if known, and other terms and conditions as may be necessary to protect the public health. Upon issuing an order, a copy of the order shall be served upon the person named in the order.

(b) An order for the detention of a person shall do all of the following:

(1) Include the purpose of the detention.

(2) Advise the person being detained that he or she has the right to request release from detention by contacting a person designated on the local health officer's order at the telephone number stated on the order and that the detention shall not continue for more than five business days after the request for release, in the absence of a court order authorizing the detention.

(3) Advise the person being detained that, whether or not he or she requests release from detention, the local health officer is required to obtain a court order authorizing detention within 60 days following the commencement of detention and thereafter shall further seek court review of the detention

within 90 days of the court order and within 90 days of each subsequent court review.

(4) Advise the person being detained that he or she has the right to arrange to be represented by counsel or to have counsel provided, and that if he or she chooses to have counsel provided, the counsel will be notified that the person has requested legal representation.

(5) Be accompanied by a separate notice that shall include, but not be limited to, all of the following additional information:

(A) That the person being detained has the right to request release from detention by contacting a person designated on the local health officer's order at a telephone number stated on the order, and that the detention shall not continue for more than five business days after the request in the absence of a court order authorizing the detention.

(B) That he or she has the right to arrange to be advised and represented by counsel or to have counsel provided, and that if he or she chooses to have counsel provided, the counsel will be notified that the person has requested legal representation.

(C) That he or she may supply the addresses or telephone numbers of not more than two individuals to receive notification of the person's detention, and that the local health officer shall, at the patient's request, provide notice within the limits of reasonable diligence to those people that the person is being detained.

SEC. 10. Section 3285.3 of the Health and Safety Code is amended to read:

3285.3. Notwithstanding any inconsistent provision of Section 3285, 3285.1 or 3285.2, all of the following shall apply:

(a) A person who is detained solely pursuant to subdivision (a) of Section 3285 shall not continue to be detained beyond the minimum period of time required, with the exercise of all due diligence, to make a medical determination of whether a person who is suspected of having tuberculosis disease, has active tuberculosis or whether a person who has active tuberculosis disease has infectious tuberculosis disease. Further detention of the person shall be authorized only upon the issuance of a local health officer's order pursuant to subdivision (d) or (e) of Section 3285.

(b) A person who is detained solely for the reasons described in subdivision (d) of Section 3285 shall not continue to be

detained after he or she ceases to be infectious or after the local health officer ascertains that changed circumstances exist that permit him or her to be adequately separated from others so as to prevent transmission of tuberculosis disease after his or her release from detention.

(c) A person who is detained for the reasons described in subdivision (e) of Section 3285 shall not continue to be detained after he or she has completed an appropriate prescribed course of medication.

SEC. 11. Section 3285.4 of the Health and Safety Code is amended to read:

3285.4. For the purposes of Sections 3285, 3285.1, and 3285.2, all of the following shall apply:

(a) If necessary, language interpreters and persons skilled in communicating with vision and hearing impaired individuals shall be provided in accordance with applicable law.

(b) Nothing in those sections shall be construed to permit or require the forcible administration of any medication without a prior court order.

(c) Any and all orders authorized under those sections shall be made by the local health officer. His or her authority to make the orders may be delegated to the person in charge of medical treatment of inmates in penal institutions within the local health officer's jurisdiction, or pursuant to Section 7. The local health officer shall not make any orders incorporating by reference any other rules or regulations.

SEC. 12. Section 3351 of the Health and Safety Code is amended to read:

3351. Inasmuch as the orders provided for by Section 3285 are for the protection of the public health, any person who, after service upon him or her of an order of a local health officer as provided in Section 3285 violates or fails to comply with the order, is guilty of a misdemeanor. Upon conviction thereof, in addition to any and all other penalties that may be imposed by law upon the conviction, the person may be ordered by the court confined until the order of the local health officer shall have been fully complied with or terminated by the local health officer, but not exceeding one year from the date of passing judgment upon the conviction, further, the court, upon suitable assurances that the order of the local health officer will be complied with, may place any person convicted of a violation of the order of the local health officer upon probation for a period not to exceed two years, upon condition

that the order of the local health officer be fully complied with, further, upon any subsequent violation of the order of the local health officer, the probation shall be terminated and confinement as provided for in this section shall be ordered by the court. Confinement may be accomplished by placement in any appropriate facility, penal institution, or dwelling approved for the specific case by the local health officer.

SEC. 13. Notwithstanding Section 17610 of the Government Code, if the Commission on State Mandates determines that this act contains costs mandated by the state, reimbursement to local agencies and school districts for those costs shall be made pursuant to Part 7 (commencing with Section 17500) of Division 4 of Title 2 of the Government Code. If the statewide cost of the claim for reimbursement does not exceed one million dollars ($1,000,000), reimbursement shall be made from the State Mandates Claims Fund. Notwithstanding Section 17580 of the Government Code, unless otherwise specified in this act, the provisions of this act shall become operative on the same date that the act takes effect pursuant to the California Constitution.

Senate Bill No. 391

CHAPTER 294

An act to repeal Article 6 (commencing with Section 58105) of Chapter 1 of Part 1 of Division 21 of the Food and Agricultural Code, to amend Sections 95004 and 95030 of, and to add Section 95001.5 to, to amend Sections 104380, 106805, 115065, 115080, 120955, 121200, 121260, and 121305 of, to add Sections 110241, 120970, 121358, 123255, and 123279 to, to add Chapter 1.5 (commencing with Section 124450) to Part 4 of Division 106 of, to add and repeal Section 1179.3 of, and to repeal Sections 349.109, 104485, 104550, 104569, 120450, 121205, 121215, 121220, and 124950 of, the Health and Safety Code, to amend Section 12696.05 of, and to repeal Section 12699.50 of, the Insurance Code, and to amend Section 1372 of the Penal Code, to amend Sections 4643.5, 4681.1, 4681.3, 6600.05, 7228, 14094.3, 14105.31, 14105.33, 14132.22, 14154.15, 14163, 16809.5, 16909, 16945, and 16990.5 of, to add Sections 4418.1, 4418.7, 4433, 4596.5, 4639, 7200.06, 7200.07, 7202, 7204, 7229, 7230, 7231, 7232, 7233, 14005.75, 14005.76, 14005.82, 14005.83, 14005.84, 14005.88, 14005.89, 14011.4, 14029, 14067, 14093.07, 14093.09, 14109.6, 14133.14, 14138.5, 14459.5, 14459.7, and 17000.51 to, and to add and repeal Sections 14085.7, 14085.8, 14148.99, and 16997.1 of, the Welfare and Institutions Code, relating to human services, making an appropriation therefor, and declaring the urgency thereof, to take effect immediately.

[Approved by Governor August 18, 1997. Filed with Secretary of State August 18, 1997.]

LEGISLATIVE COUNSEL'S DIGEST

SB 391, Solis. Health.

Existing law authorizes the Department of Food and Agriculture to establish a program designed to provide eligible persons with coupons that may be exchanged for fresh, nutritious foods at farmers' markets pursuant to a program established by federal law, the WIC Farmers' Market Nutrition Act of 1992.

This bill would delete this authority and would instead authorize the State Department of Health Services to establish this program.

Existing law specifies that the provisions requiring the implementation of the Comprehensive Perinatal Outreach Program shall become inoperative July 1, 1997, and shall be repealed on January 1, 1998, unless a later enacted statute revises or repeals that date.

This bill would repeal the provision repealing the program.

Existing law requires the Secretary of the Health and Welfare Agency to establish an Office of Rural Health, or an alternative

organizational structure, in one of the departments of the Health and Welfare Agency to promote a strong working relationship between the state government and local and federal agencies, universities, and other entities, develop health initiatives, and maximize the use of existing resources relating to health services.

This bill would, until July 1, 1998, require that council, through the Office of Statewide Health Planning and Development, to develop and administer a program of grants for projects located in rural areas, as determined by the council.

Existing law provides for the allocation of funds to local lead agencies for the implementation of tobacco use prevention programs, and specifies that no local lead agency shall receive an allocation of less than $110,000.

This bill would increase that minimum allocation limit to $150,000.

Existing law specifies that the provisions requiring the implementation of the Tobacco Use Prevention Program shall become inoperative July 1, 1997, and shall be repealed on January 1, 1998, unless a later enacted statute revises or repeals that date.

This bill would repeal that provision repealing the program.

Existing law specifies that the provisions requiring the implementation of the Cigarette and Tobacco Product Surtax Medical Research Program shall become inoperative July 1, 1997, and shall be repealed on January 1, 1998, unless a later enacted statute revises or repeals that date.

This bill would repeal the provision repealing that program.

Existing law specifies that the provisions requiring the reimbursement of selected primary care clinics for the delivery of medical services, including preventative health care and smoking prevention and cessation services, including case management services, to eligible beneficiaries whose income is under 200% of the federal poverty level shall become inoperative July 1, 1997, and shall be repealed on January 1, 1998, unless a later enacted statute revises or repeals that date.

This bill would repeal the provision repealing that program.

Existing federal regulations for the federal Early Intervention Program for Infants and Toddlers with Disabilities requires participating states to establish a state interagency coordinating council in order to receive federal financial assistance.

This bill would prohibit any member of the council from casting a vote on any matter that would provide direct financial benefit to that member or otherwise give the appearance of a conflict of interest.

Under existing law, the California Early Intervention Services Act, various state departments provide coordinated services to infants and toddlers with disabilities and their families. Existing law requires early intervention services to be provided directly to eligible infants and toddlers and their families through the regional center system and the local education agency system. Under existing law, the act

will repeal on January 1, 1998, unless the state terminates its participation in a specified federal program before that date.

This bill would require these services to be provided by family resource centers that provide certain services. The bill would extend the operation of the act to January 1, 2000.

Existing law establishes requirements for the certification of radon measurement laboratories, radon testing and consulting specialists, and radon mitigation contracts, and requires the application fees for certification to be deposited into the Radon Contractor Certification Fund.

This bill would instead require these fees to be deposited in the General Fund.

Existing law establishes requirements regarding the issuance of export documents for the exportation of food, drugs, or devices manufactured or produced in this state, and establishes an Export Document Program Fund.

This bill would require all fees collected by the State Department of Health Services pursuant to requests to conduct a voluntary medical device review to be deposited into the Export Document Program Fund and to be expended, upon appropriation, for the purpose of determining if the device is a new device or is substantially equivalent to a current or previously marked device.

Existing law establishes requirements regarding the licensing and regulation of sources of ionizing radiation.

This bill would amend certain of these provisions to notwithstand a provision contained in the Government Code that prohibits prescribed governmental bodies from paying certain filing fees.

Existing law requires medical expenses to be reimbursed in an amount not to exceed $25,000 when incurred due to a severe adverse reaction to an immunization required by state law.

This bill would repeal this provision.

Existing law requires, to the extent funds are appropriated, the department to establish and administer a program to provide drug treatments to persons infected with HIV.

This bill would establish additional client assistance provisions applicable if the department utilizes a contractor or subcontractor to administer any aspect of this program.

Existing law requires the State Director of Health Services to develop a list of drugs to be provided under a program for the treatment of the human immunodeficiency virus (HIV) and requires manufacturers of drugs on the list to pay the department a rebate of 15% of the average wholesale cost price of each drug.

This bill would instead require these manufacturers to pay the department a rebate that is equal to the rebate that would apply to the drug under certain provisions of federal law.

Existing law establishes the AIDS Vaccine Research and Development Grant Program.

This bill would repeal certain provisions of law relating to the creation and implementation of this program.

Existing law requires the department and each county to administer a tuberculosis control, prevention, and detention program.

This bill would prohibit individuals housed under this program, other than criminal offenders, from residing in correctional facilities. It would require the department and local health jurisdiction, by January 1, 1998, to identify a detention site for recalcitrant tuberculosis patients for each local health jurisdiction.

Existing law specifies that the provisions requiring the implementation of the Access for Infants and Mothers (AIM) Program and establishment of the continuously appropriated Perinatal Insurance Fund shall become inoperative July 1, 1997, and shall be repealed on January 1, 1998, unless a later enacted statute revises or repeals that date.

This bill would repeal the provision for the repeal of that program, and would make conforming changes to provisions authorizing the Major Risk Medical Insurance Board to adopt regulations for administration of that program.

Existing law requires the State Department of Health Services to maintain a program of maternal and child health.

This bill would authorize the department to maintain a child health program in each county, and to allocate funds to counties for these purposes that submit plans in compliance with minimum standards established by the department.

Existing law provides for various benefits through the implementation of programs for persons with developmental disabilities (consumers) through the State Department of Developmental Services. Existing law provides for the delivery of services to consumers through regional centers pursuant to contracts with the department.

This bill would require the department to contract with an independent agency or organization for the tracking and monitoring of consumers who are moved from state hospitals to the community to ensure that they are receiving necessary services and supports. The bill would require the department to monitor corrective actions taken by regional centers as a result of this tracking and monitoring and to establish a task force to review the findings of the contractor and make recommendations regarding tracking and monitoring.

The bill would provide for the provision of services on an emergency basis when the community placement of a consumer is at risk of failing and admittance to a state developmental center is likely. The bill would require the department to immediately seek admission to a state developmental center when it determines that admission is necessary to protect the health and welfare of the consumer.

This bill would require the department to contract with a nonprofit agency or agencies to provide clients' rights advocacy services, beginning January 1, 1998.

Existing law establishes area boards on developmental disabilities to protect and advocate the rights of all persons in the area who have developmental disabilities.

This bill would require the State Department of Developmental Services, by July 1, 1998, to enter into an interagency agreement with the Organization of Area Boards, on behalf of area boards, under which each area board would conduct life quality assessments of consumers at least once every 3 years or more frequently on the request of a consumer or, when appropriate, a family member, subject to appropriation of funds in the Budget Act.

Under existing law, a consumer who has been determined to be eligible for services by a regional center shall be considered eligible by any other regional center if he or she moves to another location within the state.

This bill would provide for the provision of equivalent levels and types of services when a consumer transfers from one regional center catchment area to another, pending the development of a new individual program plan.

This bill would require the governing board of a regional center to annually contract with an independent accounting firm for an audited financial statement.

Existing law requires the department to annually establish reimbursement rates for developmental services, including reimbursement rates for out-of-home care, with these rates to be reviewed by the State Council on Developmental Disabilities. Existing law requires that, in establishing reimbursement rates for out-of-home care services, one of the cost elements to be included is an adequate amount to be paid to facilities for the basic living needs of a person with developmental disabilities. The department is required to make a redetermination of basic living costs every 3 years, with the first report to be made on March 1, 1999.

This bill would, instead, require that the first report be made by March 1, 2000. The bill would provide for the increase of the rate schedule for the 1997–98 fiscal year based on the amount appropriated in the Budget Act of 1997.

Under existing law, a person cannot be tried or adjudged to punishment while that person is mentally incompetent. Existing law sets forth procedures under which a criminal defendant who was adjudged mentally incompetent and who has regained mental competence, shall be returned to the committing court, and subsequently returned to a hospital or other commitment facility based on a need for continued treatment in order to maintain competence to stand trial.

This bill would revise these procedures, and would require the State Department of Mental Health to report to the Legislature regarding specified time limits.

Existing law states legislative intent that persons committed to a secure facility for mental health treatment shall be placed in Atascadero State Hospital unless unique circumstances preclude the placement.

This bill would instead require Atascadero State Hospital to be used whenever a person is committed to a secure facility for mental health treatment and is placed in a state hospital at the direction of the department, unless unique circumstances preclude the placement.

Under existing law, the State Department of Mental Health has jurisdiction over 4 state hospitals for the care, treatment, and education of the mentally disordered.

This bill would provide for the commitment of sexually violent predators to Atascadero State Hospital. The bill would limit the number of patients whose placement has been required pursuant to the Penal Code to 980, who may be placed at Napa State Hospital and would limit the hospital's total patient population to 1,200. This bill would require the department to regularly consult with the Napa State Hospital Task Force on proposed policy or structural modifications to the hospital that may affect the Napa community.

This bill would provide for grounds privileges or passes for patients in these state hospitals whose placement has been required pursuant to the Penal Code.

Under existing law, the State Department of Mental Health is required to evaluate each patient committed to state hospitals pursuant to specified provisions of the Penal Code to determine whether they need to be treated in a secure setting, and requires the department to treat all Penal Code commitments and mentally disordered sex offenders who do not require a secure treatment setting as near to the patient's community as possible.

This bill would instead provide that prior to admission to the Napa State Hospital or Metropolitan State Hospital, the department shall evaluate these patients. The bill would provide that patients determined to be a high security risk shall be treated in the department's most secure facilities, and that those patients not needing this level of security shall be treated as near to the patient's community as possible if an appropriate treatment program is available.

This bill would prohibit the admission to Napa State Hospital of patients whose placement has been required pursuant to the Penal Code, until specified conditions are met, except as provided. The bill would prohibit placement of those patients whose placement is required under the Penal Code outside of the perimeter security fence, with certain exceptions, and would limit the number of those patients that may be placed at that facility. The bill would prohibit

placement of high security risk patients at Metropolitan State Hospital or Napa State Hospital. The bill would require the department to develop policies and procedures at each state hospital, to notify appropriate law enforcement agencies in the event of a patient escape or walkaway. The bill would require the department to issue a state hospital administrative directive to require patients whose placement has been required pursuant to the Penal Code and other patients within the secured perimeter at each state hospital to wear clothing that enables them to be readily identified.

This bill would state legislative intent to complete the 250-bed addition at Atascadero State Hospital as expeditiously as feasible and to provide funding for the construction phase of this project in the Budget Act of 1998.

Existing law provides for the Medi-Cal program, administered by the State Department of Health Services, under which qualified low-income persons are provided with health care services.

Existing law provides for extended eligibility for Medi-Cal benefits for a limited time for families whose eligibility for Medi-Cal benefits is terminated due to the loss of eligibility for assistance due to increased hours of employment, income from employment, or the loss of earned income disregards.

This bill would require the department, if federal financial participation is available, to notify beneficiaries of the availability of extended assistance under these provisions to seek a waiver from the federal government to simplify these extended benefits, to contract for an independent evaluation of changes to the program, and to develop a community outreach campaign to inform beneficiaries of the availability of extended benefits. The department would be permitted to implement the community outreach campaign through a contract that would be exempt from approval by the Director of General Services and from the Public Contract Code. The bill would also require the department to monitor participation rates and would, if federal financial participation is available, alter eligibility for these extended benefits. Since each county is required to determine Medi-Cal eligibility, modification of eligibility for extended Medi-Cal benefits would constitute a state-mandated local program.

The bill would also require the department, not later than 6 months following the effective date of the bill, to create and implement a simplified eligibility process for pregnant women and children, as described.

The bill would also require the department, not later than 6 months following the effective date of the bill, to develop and conduct a community outreach and education campaign to help people learn about and apply for Medi-Cal benefits.

Existing law authorizes the department to enter into contracts with hospitals for inpatient services to be rendered to Medi-Cal

program beneficiaries. These contracts are negotiated by the California Medical Assistance Commission.

This bill would create the Medi-Cal Medical Education Supplemental Payment Fund and the Large Teaching Emphasis Hospital and Children's Hospital Medi-Cal Medical Education Supplemental Payment Fund in the State Treasury, to be under the administrative control of the State Department of Health Services, and to consist of moneys from specified sources. The bill would require that moneys deposited in these funds qualify for federal financial participation, and would require moneys in these funds to be paid to specified types of hospitals for medical education costs incurred for services rendered to Medi-Cal beneficiaries. The bill would require the department to obtain federal matching funds to the full extent permitted by law. The bill would provide that these funds shall be continuously appropriated, thereby making an appropriation.

This bill would make these provisions inoperative on June 30, 1999, and repeal them by January 1, 2000.

This bill would state legislative intent that the University of California work with the department and the commission to develop a federal demonstration project to address future funding of graduate medical education in the state, and that implementing legislation be enacted by June 30, 1999. The bill would request the University of California to submit a progress report to the Governor and the Legislature by November 1, 1998.

Existing law relating to the Medi-Cal program requires the State Department of Health Services to establish the County Administrative Cost Control Plan to establish standards and performance criteria to which counties are required to adhere. Existing law authorizes a county to petition the department for an augmentation of its plan in order to implement a plan for the outstationing of one or more eligibility workers at alternative sites in order to facilitate receipt and processing of applications for Medi-Cal eligibility for pregnant women, infants, and children.

This bill would revise the requirements applicable to that petition process and would recast that provision to authorize a county to petition for an augmentation of its county administrative cost control plan to implement a plan for outstationing eligibility workers at all types of outstation locations meeting specified federal requirements.

Under existing law, services covered under the California Children's Services program, when provided to Medi-Cal recipients, prohibited from being incorporated into any Medi-Cal managed care contract entered into after August 1, 1994, and pursuant to specified provisions of law, until 3 years after the effective date of the contract.

This bill would, instead prohibit these services from being incorporated into a contract until August 1, 2000, and would exempt from this prohibition contracts entered into for county-organized

health systems in the Counties of San Mateo, Santa Barbara, Solano, and Napa.

Under existing law, low-income children in foster care are covered under the Medi-Cal program.

This bill would require the county child welfare agency with the responsibility for the care and placement of the child, in consultation with the child's foster care giver, to determine whether it is in the best interest of the child to enroll in a Medi-Cal managed care plan. By imposing this requirement on local agencies, this bill would impose a state-mandated local program.

Existing law, under the Medi-Cal program, provides that home and community-based services, in-home medical care services, and early and periodic screening, diagnosis, and treatment for individuals under 21 years of age may be covered if certain conditions are met.

This bill would require that any decision to transfer a child who is being case managed by the California Children's Services program to the home setting, for whom any of the above services has been requested, be made in consultation with the child's California Children's Services program case manager.

Existing law requires the department, in administering the Medi-Cal program, to enter into contracts with manufacturers of drugs for the best price and requires that the contract provide for an equalization payment amount to be remitted to the department quarterly. The law requires that the department submit an invoice to each manufacturer for the equalization payment based on supporting data.

This bill would require transmittal of the invoice and the supporting data within 30 days of the federal Health Care Financing Administration's file of manufacturer rebate information, would establish procedures for the calculation and payment of rebate interest, and would provide a procedure for contesting the invoice amount. This bill would establish certain collection procedures for rebate payments, including default and termination provisions. The bill would establish procedures for availability of drugs upon prior approval.

Existing law provides that drugs of any manufacturer who did not renew or enter into a contract within a prescribed period of time would be available only through prior approval.

This bill would delete this provision.

Existing law authorizes Medi-Cal reimbursement for transitional inpatient care, as defined, in general acute care hospitals and other specified health facilities.

Existing law provides, however, that, for the initial 2 years following implementation of reimbursement for this care, transitional inpatient care shall be made available only to persons 18 years of age or over, and that this care shall not be available to patients in acute care hospitals defined as small and rural.

This bill would indefinitely extend these limitations.

Existing law imposes certain requirements regarding the implementation of prior authorization procedures for the provision of services under the Medi-Cal program.

This bill would require the department to use certain criteria to identify providers to be placed on prior authorization for noninvasive testing procedures.

Existing law requires the department to administer certain provisions related to child health and disability prevention programs.

This bill would require the department to report to the Legislature by January 1, 1998, regarding prescribed data with respect to the programs.

Under the Medi-Cal program, the department is required to make supplemental payments to certain disproportionate share hospitals based on specified criteria. Existing law generally defines a disproportionate share hospital as a hospital that has proportionately higher costs, volume, or services related to the provision of services to Medi-Cal or other low-income patients than the statewide average. Payments are made from moneys paid by hospitals into the Medi-Cal Inpatient Payment Adjustment Fund, with this fund being continuously appropriated for specified purposes, including, for the 1994–95 and 1995–96 fiscal years, an annual transfer of $239,757,690, and for the 1996–97 fiscal year and each fiscal year thereafter, an annual transfer of $229,757,690, to the Health Care Deposit Fund.

This bill would provide that the amount to be transferred each fiscal year subsequent to the 1996–97 fiscal year to the Health Care Deposit Fund would be $154,757,690.

By increasing the amount available in the fund for appropriation to disproportionate share hospitals, this bill would make an appropriation.

This bill would authorize a local initiative entity that has performed unanticipated work resulting in additional costs attributable to the development of its local initiative health delivery system to file a claim with the department under the disproportionate share hospital reimbursement provisions for the costs due to delays in start dates.

Existing law requires a prepaid health plan to maintain financial records and to have an independent annual audit or additional audits, and requires the department to perform routine auditing of prepaid health plan contractors and affiliated subcontractors providing services under the Medi-Cal program.

This bill would require the department to make only the final report of each external review available to the Legislature within 30 calendar days of completion, and to the public upon request.

This bill would require the department to implement a management information and decision support system to integrate data from managed care plans to monitor and evaluate the quality of care, to provide the Legislature with annual progress reports, and to

provide the Legislature with system or information access with the most cost-effective technology available.

Existing law requires each county to provide aid and medical care to indigent persons. These programs are known as county general assistance programs.

Existing law prescribes a formula under which counties must provide minimum aid grant levels for general assistance recipients, but specifies that counties may reduce these levels by, among other things, the monthly actuarial value of up to $40 per month of medical care. A recent court decision held that this provision permitted a county either to make the aid grant reduction or not provide any medical care if it chose not to make the reduction.

This bill would provide that, notwithstanding this court decision, this provision was not intended, and shall not be construed, to give a county or city and county specified authority relating to the provision of health care services, except that this provision would cease to be implemented if, and only to the extent that, a final court decision holds that the provisions imposes a state-mandated local program.

This bill would also declare that it confirms and is declarative of, rather than a change in, existing law.

Existing law, operative until July 1, 1997, and repealed on January 1, 1998, provides for the provision of perinatal services, perinatal outreach, coordination, and expansion services, provides limitations on the use of funds from the Health Education Account in the Cigarette and Tobacco Products Surtax Fund for purposes of the perinatal outreach, coordination, and expansion services.

This bill would repeal the provision for the repeal of that program.

Existing law contained in the California Health Care for the Indigent Program (CHIP) provides, operative until July 1, 1997, and repealed on January 1, 1998, for the allocation of money from the Cigarette and Tobacco Products Surtax Fund to the counties to provide health care benefits, and requires each county that receives CHIP funds to submit reports containing specified information to the State Department of Health Services.

This bill would repeal the provision for the repeal of that program, and would make conforming changes to provisions for the administration of the program.

This bill would authorize the Director of Finance to authorize the augmentation or reduction of amounts appropriated in the Budget Act for the programs authorized by this act if the funds in the Cigarette and Tobacco Products Surtax Fund are insufficient to support the Budget Act appropriations for the programs authorized by this act, and, by authorizing the augmentation of those appropriated funds, this bill would result in an appropriation.

This bill would specify that the State Department of Health Services may adopt emergency regulations to implement this bill.

This bill would specify that funds appropriated in the Budget Act of 1999 for certain tobacco use prevention media campaign grant programs shall be available for expenditure only until July 1, 2000, and would make funds appropriated in the Budget Act of 1997 for the Tobacco Use Prevention Program and for the rural health improvement grant program established by this bill available for expenditure until July 1, 1999. By extending the period those appropriations would be available for expenditure, this bill would result in an appropriation.

Existing law requires the department to administer certain programs relating to AIDS.

This bill would authorize the department to use the sum of $1,600,000 appropriated pursuant to Item 4260-111-0001 of the Budget Act of 1997 for the extension of the term of contracts with entities receiving funds in the 1996–97 fiscal year to provide HIV testing services, would authorize the department to amend these contracts for the 1997–98 fiscal year, and would authorize advance payments not to exceed 25% of the expected funding, thereby making an appropriation. This provision would become inoperative on July 1, 1998, and would be repealed on January 1, 1999.

Existing law provides for the funding of clinics for the provision of health care under the seasonal and migratory workers program, the rural health services development program, and the expanded access to primary care program.

This bill would require a clinic funded under those programs to provide nonelective primary health care to all persons eligible for these programs who are impacted by a declared emergency or disaster and who present themselves for treatment at the clinic. The bill would require the department to deny payment to any clinic funded by these programs that charges patients for care without utilizing a sliding-fee scale based on income.

This bill would authorize the State Department of Health Services to adopt emergency regulations to implement this act and specified Medi-Cal benefits established by the Budget Act of 1997.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

The bill would declare that it is to take effect immediately as an urgency statute.

Appropriation: yes.

The people of the State of California do enact as follows:

SECTION 1. Article 6 (commencing with Section 58105) of Chapter 1 of Part 1 of Division 21 of the Food and Agricultural Code is repealed.

SEC. 2. Section 95001.5 is added to the Government Code, to read:

95001.5. In order to prevent any potential conflict of interest and pursuant to Section 303.604 of Title 34 of the Code of Federal Regulations, no member of the interagency coordinating council may cast a vote on any matter that would provide direct financial benefit to that member or otherwise give the appearance of a conflict of interest.

SEC. 3. Section 95004 of the Government Code, as added by Section 2 of Chapter 945 of the Statutes of 1993, is amended to read:

95004. The early intervention services specified in this title shall be provided as follows:

(a) Direct services for eligible infants and toddlers and their families shall be provided pursuant to the existing regional center system under the Lanterman Developmental Disabilities Services Act (Division 4.5 (commencing with Section 4500) of the Welfare and Institutions Code) and the existing local education agency system under appropriate sections of Part 30 (commencing with Section 56000) of the Education Code and regulations adopted pursuant thereto, and Part H of the Individuals with Disabilities Education Act (20 U.S.C. Sec. 1471 et seq.).

(b) Services shall be provided by family resource centers that provide, but are not limited to, parent-to-parent support, information dissemination and referral, public awareness, family professional collaboration activities, and transition assistance for families.

(c) Existing obligations of the state to provide these services at state expense shall not be expanded.

(d) It is the intent of the Legislature that services be provided in accordance with Sections 303.124, 303.126, and 303.527 of Title 34 of the Code of Federal Regulations.

SEC. 4. Section 95030 of the Government Code is amended to read:

95030. Unless repealed earlier pursuant to subdivision (c) of Section 95003, this division shall remain in effect only until January 1, 2000, and as of that date is repealed, unless a later enacted statute, which is chaptered before January 1, 2000, deletes or extends that date.

SEC. 5. Section 349.109 of the Health and Safety Code, as amended by Chapter 199 of the Statutes of 1996, is repealed.

SEC. 6. Section 1179.3 is added to the Health and Safety Code, to read:

1179.3. (a) (1) The Rural Health Policy Council shall develop and administer a competitive grants program for projects located in rural areas of California.

(2) The Rural Health Policy Council shall define "rural area" for the purposes of this section after receiving public input and upon recommendation of the Interdepartmental Rural Health Coordinating Committee and the Rural Health Programs Liaison.

(3) The purpose of the grants program shall be to fund innovative, collaborative, cost-effective, and efficient projects that pertain to the delivery of health and medical services in rural areas of the state.

(4) The Rural Health Policy Council shall develop and establish uses for the funds to fund special projects that alleviate problems of access to quality health care in rural areas and to compensate public and private health care providers associated with direct delivery of patient care. The funds shall be used for medical and hospital care and treatment of patients who cannot afford to pay for services and for whom payment will not be made through private or public programs.

(5) The Office of Statewide Health Planning and Development shall administer the funds appropriated by the Budget Act of 1997 for purposes of this section. Entities eligible for these funds shall include rural health providers served by the programs operated by the departments represented on the Rural Health Policy Council, which include the State Department of Alcohol and Drug Programs, the Emergency Medical Services Authority, the State Department of Health Services, the State Department of Mental Health, and the Office of Statewide Health Planning and Development. The grant funds shall be used to expand existing services or establish new services and shall not be used to supplant existing levels of service.

(b) The Rural Health Policy Council shall establish the criteria and standards for eligibility to be used in requests for proposals or requests for application, the application review process, determining the maximum amount and number of grants to be awarded, preference and priority of projects, compliance monitoring, and the measurement of outcomes achieved after receiving comment from the public at a meeting held pursuant to the Bagley-Keene Open Meeting Act (Article 9 (commencing with Section 11120) of Chapter 1 of Part 1 of Division 3 of Title 2 of the Government Code).

(c) The Office of Statewide Health Planning and Development shall periodically report to the Rural Health Policy Council on the status of the funded projects. This information shall also be available at the public meetings.

(d) This section shall become inoperative on July 1, 1998, and, as of January 1, 1999, is repealed, unless a later enacted statute, that

becomes operative on or before January 1, 1999, deletes or extends the dates on which it becomes inoperative and is repealed.

SEC. 7. Section 104380 of the Health and Safety Code is amended to read:

104380. (a) Funds appropriated to the department for local lead agencies for purposes of this article shall be allocated prospectively, on a quarterly basis in accordance with this section.

(b) No local lead agency shall be allocated less than one hundred fifty thousand dollars ($150,000).

(c) (1) Except as provided in subdivision (b), counties not listed in subdivision (d) shall receive an allocation based on each county's proportion of the statewide population.

(2) Counties that receive their allocations pursuant to paragraph (1) shall receive 73 percent of their 1990–91 fiscal year allocation.

(d) Except as provided in subdivision (b), the balance of the funds after the allocation contained in subdivision (c) have been made, shall be allocated to the following specified counties in accordance with the following percentages:

COUNTY	ALLOCATION
Alameda	4.7427%
Contra Costa	1.8032%
Fresno	2.6855%
Kern	1.7083%
Lake	0.1826%
Los Angeles	43.8057%
Mendocino	0.2664%
Merced	0.7244%
Monterey	1.2937%
Orange	5.1382%
Placer	0.3697%
Riverside	3.1828%
Sacramento	3.2922%
San Bernardino	3.7972%
San Diego	5.9971%
San Francisco	5.3898%
San Joaquin	1.7413%
San Luis Obispo	0.8096%
San Mateo	1.4582%
Santa Barbara	0.7918%
Santa Clara	5.2450%
Santa Cruz	0.7709%
Stanislaus	1.2793%

Tulare	1.3768%
Ventura	1.5472%
Yolo	0.6004%

(e) Except as provided in subdivision (b), the allocation for those counties in which a city health department which is a local lead agency as defined by subdivision (*l*) of Section 104355 is located shall be apportioned among the local lead agencies in that county based on their jurisdiction's proportionate share of the countywide population.

(f) Reductions in allocations necessary to comply with subdivision (b) shall be distributed among the counties listed in subdivision (d) proportionately based on the table contained in subdivision (d).

(g) The department shall use population estimates for 1989 for each county and for each city as specified in the Department of Finance E-1 Report.

(h) Payments shall be made prospectively, on a quarterly basis, to local jurisdictions.

(i) (1) The department shall conduct a fiscal and program review on a regular basis.

(2) If the department determines that any county is not in compliance with any provision of this chapter, the county shall submit to the department, within 60 days, a plan for complying with this article.

(3) The department may withhold funds from local lead agencies allocated funds under this section that are not in compliance with this chapter in the same manner as the department is authorized under Chapter 5 (commencing with Section 16940) of Part 4.7 of Division 9 of the Welfare and Institutions Code. The department may terminate the agreement with the noncompliant local lead agency, recoup any unexpended funds from the noncompliant local lead agency, and reallocate both the withheld and recouped funds to provide services available under this section to the jurisdiction of the noncompliant agency through an agreement with a different governmental or private nonprofit agency capable of delivering those services based on the department's local lead agency guidelines for local plans and a process determined by the department. The department may encumber and reallocate these funds no sooner than three months after the date of the first notification that the department has determined the local lead agency to be out of compliance with statutory requirements.

SEC. 8. Section 104485 of the Health and Safety Code is repealed.

SEC. 9. Section 104550 of the Health and Safety Code is repealed.

SEC. 10. Section 104569 of the Health and Safety Code, as amended and renumbered by Section 133 of Chapter 1023 of the Statutes of 1996, is repealed.

SEC. 11. Section 106805 of the Health and Safety Code is amended to read:

106805. (a) The application fees for certification are nonrefundable and shall be in the following amounts:

(1) Radon Measurement Laboratory	$300
(2) Radon Testing and Consulting Specialist	$100
(3) Radon Mitigation Contractor	$200

(b) These fees shall be deposited into the General Fund. The moneys in this fund are available, upon appropriation by the Legislature, to the department for the purposes of this article.

SEC. 12. Section 110241 is added to the Health and Safety Code, to read:

110241. All fees collected by the department pursuant to requests to conduct a voluntary medical device review shall be deposited into the Export Document Program Fund and, upon appropriation, shall be expended for the purpose of determining if the device is a new device or is substantially equivalent to a current or previously marked device.

SEC. 13. Section 115065 of the Health and Safety Code is amended to read:

115065. (a) Notwithstanding Section 6103 of the Government Code, the department shall provide by regulation a schedule of the fees that shall be paid by the following persons:

(1) Persons possessing radioactive materials under licenses issued by the department or under other state or federal licenses for the use of these radioactive materials, when these persons use these radioactive materials in the state in accordance with the regulations adopted pursuant to subdivision (d) of Section 115060.

(2) Persons generally licensed for the use of devices and equipment utilizing radioactive materials that are designed and manufactured for the purpose of detecting, measuring, gauging, or controlling thickness, density, level, interface location, radiation, leakage, or qualitative or quantitative chemical composition, or for producing light or an ionized atmosphere, if the devices are manufactured pursuant to a specific license authorizing distribution to general licensees.

(b) The revenues derived from the fees shall be used, together with other funds made available therefor, for the purpose of the issuance of licenses or the inspection and regulation of the licensees.

(c) The department may adopt emergency regulations pursuant to Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code to establish and adjust fees for radioactive materials licenses in an amount to produce estimated revenues equal to at least 95 percent of the department's costs in

carrying out these licensing requirements, if the new fees were to remain in effect throughout the fiscal year for which the fee is established or adjusted.

(d) A local agency participating in a negotiated agreement pursuant to Section 114990 shall be fully reimbursed for direct and indirect costs based upon activities governed by Section 115070. With respect to these agreements, any salaries, benefits, and other indirect costs shall not exceed comparable costs of the department.

(e) The fees for licenses for radioactive materials and of devices and equipment utilizing those materials shall be adjusted annually pursuant to Section 100425.

SEC. 14. Section 115080 of the Health and Safety Code is amended to read:

115080. (a) Notwithstanding Section 6103 of the Government Code, the department shall provide by regulation a ranking of priority for inspection, as determined by the degree of potentially damaging exposure of persons by ionizing radiation and the requirements of Section 115085, and a schedule of fees, based upon that priority ranking, that shall be paid by persons possessing sources of ionizing radiation that are subject to registration in accordance with subdivisions (b) and (e) of Section 115060, and regulations adopted pursuant thereto. The revenues derived from the fees shall be used, together with other funds made available therefor, for the purpose of carrying out any inspections of the sources of ionizing radiation required by this chapter or regulations adopted pursuant thereto. The fees shall, together with any other funds made available to the department, be sufficient to cover the costs of administering this chapter, and shall be set in amounts intended to cover the costs of administering this chapter for each priority source of ionizing radiation. Revenues generated by the fees shall not offset any general funds appropriated for the support of the radiologic programs authorized pursuant to this chapter, and the Radiologic Technology Act (Section 27), and Chapter 7.6 (commencing with Section 114960). Persons who pay fees shall not be required to pay, directly or indirectly, for the share of the costs of administering this chapter of those persons for whom fees are waived. The department shall take into consideration any contract payment from the Health Care Financing Administration for performance of inspections for Medicare certification and shall reduce this fee accordingly.

(b) A local agency participating in a negotiated agreement pursuant to Section 114990 shall be fully reimbursed for direct and indirect costs based upon activities governed by Section 115085. With respect to these agreements, any salaries, benefits, and other indirect costs shall not exceed comparable costs of the department. Any changes in the frequency of inspections or the level of reimbursement to local agencies made by this section or Section

115085 during the 1985–86 Regular Session shall not affect ongoing contracts.

(c) The fees paid by persons possessing sources of ionizing radiation shall be adjusted annually pursuant to Section 100425.

(d) The department shall establish two different registration fees for mammography equipment pursuant to this section based upon whether the equipment is accredited by an independent accrediting agency recognized under the federal Mammography Quality Standards Act (42 U.S.C. Sec. 263b).

SEC. 15. Section 120450 of the Health and Safety Code is repealed.

SEC. 16. Section 120955 of the Health and Safety Code is amended to read:

120955. (a) To the extent that state and federal funds are appropriated in the Budget Act for these purposes, the director shall establish and may administer a program to provide drug treatments to persons infected with human immunodeficiency virus (HIV), the etiologic agent of acquired immune deficiency syndrome (AIDS). The director shall develop, maintain, and update as necessary a list of drugs to be provided under this program. Drugs on the list shall include, but not be limited to, the drugs zidovudine (AZT) and aerosolized pentamidine.

(b) The director may grant funds to a county public health department through standard agreements to administer this program in that county. To maximize the recipients' access to drugs covered by this program, the director shall urge the county health department in counties granted these funds to decentralize distribution of the drugs to the recipients.

(c) The director shall establish a rate structure for reimbursement for the cost of each drug included in the program. Rates shall not be less than the actual cost of the drug. However, the director may purchase a listed drug directly from the manufacturer and negotiate the most favorable bulk price for that drug.

(d) Manufacturers of the drugs on the list shall pay the department a rebate equal to the rebate that would be applicable to the drug under Section 1927(c) of the federal Social Security Act (42 U.S.C. Sec. 1396r-8(c)), except that no rebates shall be paid to the department under this section on drugs for which the department has received a rebate under Section 1927(c) of the federal Social Security Act (42 U.S.C. Sec. 1396r-8(c)) or that have been purchased on behalf of county health departments or other eligible entities at discount prices made available under Section 256b of Title 42 of the United States Code.

(e) The department shall submit an invoice, not less than two times per year, to each manufacturer for the amount of the rebate required by subdivision (d).

(f) Drugs may be removed from the list for failure to pay the rebate required by subdivision (d), unless the department determines that removal of the drug from the list would cause substantial medical hardship to beneficiaries.

(g) The department may adopt emergency regulations to implement amendments to this chapter made during the 1997–98 Regular Session, in accordance with the Administrative Procedure Act, Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code. The initial adoption of emergency regulations shall be deemed to be an emergency and considered by the Office of Administrative Law as necessary for the immediate preservation of the public peace, health and safety, or general welfare. Emergency regulations adopted pursuant to this section shall remain in effect for no more than 180 days.

(h) Reimbursement under this chapter shall not be made for any drugs that are available to the recipient under any other private, state, or federal programs, or under any other contractual or legal entitlements, except that the director may authorize an exemption from this subdivision where exemption would represent a cost savings to the state.

SEC. 17. Section 120970 is added to the Health and Safety Code, to read:

120970. In the event the department utilizes a contractor or subcontractor to administer any aspect of the program provided for under this chapter, the following additional client assistance provisions shall apply:

(a) The contractor shall, either directly or through subcontracted pharmacy outlets, obtain and dispense the necessary drugs, in their approved forms according to the program formulary, and shall comply with all applicable provisions of the California Pharmacy Law (Chapter 9 (commencing with Section 4000) of Division 2 of the Business and Professions Code) and regulations adopted thereunder.

(b) Upon receipt of notification by the department, the contractor shall be able to accommodate additions or changes in the formulary within 10 business days.

(c) Clients shall receive drugs from a participating pharmacy either directly, through the client's designated representative, or mailed or delivered to the client's place of residence by the contractor or subcontractor, whichever the client prefers. Proof of delivery of the prescription to the client's designated address, by signature acknowledging receipt thereof, shall be required for all mail order prescriptions.

(d) Clients shall have their prescriptions filled within 24 hours of submission of prescription requests, and mail order prescriptions shall be shipped by the contractor within 48 hours of receipt of client prescription requests.

(e) The contractor shall provide 24-hour free telephone and fax machine access for physicians and surgeons, or medical care providers as authorized under state law, to call in or transmit prescriptions for mail order pharmacy.

(f) Clients shall have toll-free telephone access during business hours to speak with licensed pharmacists for medication counseling and for mail order prescription requests. The contractor shall provide consultation in the prevention of potentially harmful drug interactions in connection with prescriptions filled for clients.

(g) The contractor shall have the ability to subcontract with any willing provider, including independent and sole proprietorship pharmacies, provided the subcontractor accepts the rates offered by the contractor, supplies the contractor with timely information, and complies with necessary contract terms and conditions and other needs of the program as determined by the contractor or the department.

(h) It is the intent of the Legislature that the contractor subcontract with all willing providers accepting the terms and conditions provided for in subdivisions (a) to (g), inclusive, in order to facilitate continuity of care for clients under this chapter.

(i) All types of information, whether written or oral, concerning a client, made or kept in connection with the administration of this program shall be confidential, and shall not be used or disclosed except for purposes directly connected with the administration of the program.

(j) Information regarding program policies and procedures, including enrollment procedures, eligibility guidelines, and lists of drugs covered, shall be made available to clients in appropriate literacy levels in English, Spanish, Mandarin/Cantonese, Tagalog, and in other languages, as determined by the department.

(k) The contractor shall develop and maintain a timely and accessible grievance procedure for clients to resolve problems regarding all components of the delivery of drugs under this chapter.

SEC. 18. Section 121200 of the Health and Safety Code is amended to read:

121200. The Legislature finds and declares all of the following:

(a) Over the past five years AIDS has reached an epidemic stage and is estimated to affect 30,000 Californians by 1990.

(b) The estimated cost of medical care alone for the 4,000 AIDS cases that have occurred to date in California totals approximately two hundred fifty million dollars ($250,000,000). By the end of 1990, medical care is projected to approach three billion five hundred million dollars ($3,500,000,000) and the total public health and medical care expenditures are expected to exceed five billion dollars ($5,000,000,000).

(c) There is no cure for the AIDS virus. The long-term solution to the elimination of AIDS lies in conducting vaccine research.

(d) Much research has already been completed by the private sector and should be utilized to the maximum extent possible, including supplementing with public funds.

(e) Profitmaking corporations are (1) not eligible for most of the existing public funding sources as are institutions of higher learning and nonprofit corporations; (2) when eligible, the public funding amounts are not adequate to conduct research; and (3) private grants are only available to nonprofit corporations.

(f) Moreover, private research companies, already having established vaccine development and manufacturing capabilities, are uniquely situated to maximize available resources and to utilize both management and research staff, equipment, and technical innovations to their greatest efficiency towards the specific goal of developing and manufacturing an AIDS vaccine at the earliest possible time.

(g) Exclusion of private corporations from public funding to develop an approved vaccine will likely result in (1) a delay in the development of a vaccine to prevent AIDS; (2) continued spread of AIDS to the general population; and (3) continued increases in private and public funds to provide care to AIDS victims.

(h) It is appropriate to mandate that a grant made to a private entity to develop an AIDS vaccine, once the vaccine has been approved by the FDA for use by the general population, should be reimbursed to the state from the sale of the vaccine.

SEC. 19. Section 121205 of the Health and Safety Code is repealed.

SEC. 20. Section 121215 of the Health and Safety Code is repealed.

SEC. 21. Section 121220 of the Health and Safety Code is repealed.

SEC. 22. Section 121260 of the Health and Safety Code is amended to read:

121260. The Legislature further finds and declares all of the following:

(a) The average cost per patient in the treatment of AIDS until death is now one hundred fifty thousand dollars ($150,000). It is estimated that total costs including health care of the first 10,000 AIDS cases in the United States totaled more than six billion three hundred million dollars ($6,300,000,000). By 1990, according to the department, Californians will spend almost five billion dollars ($5,000,000,000) in medical costs alone in care and treatment of 30,000 AIDS patients, with no realistic hope for their remission or cure. This cost does not include money spent on education, research, and lost income.

(b) To date, the costs of caring for people with AIDS related complex (ARC) has not been officially calculated. However, it is safe to assume the costs are substantial over time. Experts fear that the

illnesses of ARC patients, although they may not be fatal, are severe. For example, the virus invades the brain rendering the patients incapable of caring for themselves. It is, therefore, plausible that a percentage of ARC patients will need to be institutionalized.

(c) The Legislature intends by this chapter to take uncommon action to remove the impediments to the expeditious development of an AIDS vaccine.

(d) It is further the intent of the Legislature to provide to any person, whose injury is proximately caused by the use of the vaccine, except to the extent the injuries are attributable to the comparative negligence of the claimant in the use of the vaccine, all of the following:

(1) Compensation for related medical costs associated with the care and treatment of the injury.

(2) Compensation for the loss of any and all earnings caused by the injury.

(3) Compensation for pain and suffering caused by the injury, except that in no action shall the amount of damages for noneconomic losses exceed five hundred fifty thousand dollars ($550,000).

(e) It is further the intent of the Legislature to establish the AIDS Clinical Trials Testing Fund that will be available to not more than three California manufacturers of an AIDS vaccine approved by the federal Food and Drug Administration (FDA) or the department pursuant to Part 5 (commencing with Section 109875) of Division 104 for clinical trials with humans.

(f) The AIDS Vaccine Research and Development Advisory Committee shall review requests from California manufacturers for funds from the AIDS Clinical Trials Testing Fund and shall make recommendations to the department regarding the award of funds, including the appropriate amount of funding. The department, taking into consideration the committee's recommendations, may allocate the funds to the manufacturers specified in the protocol approved by the FDA or the department pursuant to Part 5 (commencing with Section 109875) of Division 104 for administering the clinical trials.

(g) A California manufacturer seeking the approval of the FDA, rather than the department, for administering clinical trials of an AIDS vaccine may apply while FDA approval is pending to the AIDS Vaccine Research and Development Advisory Committee for the committee's recommendation that the manufacturer receive funds from the AIDS Clinical Trials Testing Fund upon FDA approval.

SEC. 23. Section 121305 of the Health and Safety Code is amended to read:

121305. For the purposes of this chapter, the following definitions apply:

(a) "AIDS" means acquired immune deficiency syndrome.

(b) "An HIV-positive individual" means an individual who is infected with the AIDS virus.

(c) "Committee" means the AIDS Vaccine Research and Development Advisory Committee.

(d) "Grant award" means an AIDS Vaccine Clinical Trial Grant Award for the Prevention of Maternal Transmission of HIV Infection.

(e) "AIDS vaccine," for the purposes of this chapter, means a vaccine that has been developed by a manufacturer and is being tested and administered for the purposes of determining whether immunization of HIV-infected pregnant women will protect against maternal transmission of the AIDS virus. Clinical trials must be conducted under an investigational new drug (IND) application on file with the federal Food and Drug Administration (FDA).

(f) "Research subject" means a person who is administered an AIDS vaccine, or a fetus of a woman administered an AIDS vaccine, or a child born to a woman administered an AIDS vaccine during pregnancy.

(g) "Researcher" means a person employed by or affiliated with a manufacturer or a research institution, who participates in the development or testing or administration of an AIDS vaccine, or who is involved in the diagnosis and treatment of a research subject.

SEC. 24. Section 121358 is added to the Health and Safety Code, to read:

121358. (a) Notwithstanding any other provision of law, individuals housed or detained through the tuberculosis control, housing, and detention program shall not reside in correctional facilities, and the funds available under that program with regard to those individuals shall not be disbursed to, or used by, correctional facilities. This section shall not be interpreted to prohibit the institutionalization of criminals with tuberculosis in correctional facilities.

(b) The department shall work with local health jurisdictions to identify a detention site for recalcitrant tuberculosis patients appropriate for each local health jurisdiction in the state. The department shall notify all counties of their designated site by January 1, 1998.

SEC. 25. Section 123255 is added to the Health and Safety Code, to read:

123255. (a) The department may maintain a maternal and child health program in each county.

(b) Notwithstanding any other provision of law, the department may allocate, for the purposes of maintaining a maternal and child health program, to a county an amount determined in a manner as the director shall provide. The total of all county allocations shall not exceed the annual appropriation for this purpose.

(c) To be considered for an allocation, the county's governing board shall submit a plan and budget for the county's program in

accordance with maternal and child health plans and priorities to be approved by the department under Title V of the Public Health Service Act (42 U.S.C. Sec. 701 et seq.). The department shall establish the procedures and format for submission of the plan and budget. The plan shall conform to the department's maternal and child health priorities that are in accordance with the core public health functions of needs assessment, policy development, and assurance.

(d) The department shall establish minimum standards that govern the basis for allocations to counties, including, but not limited to, the services to be provided, administration, staffing, fiscal accountability, and eligibility for services. The department may recoup or withhold all or part of a county's allocation for failure to comply with those standards.

(e) Claims for reimbursement shall be made in a manner as provided by the director for activities provided in accordance with the plan and budget for the fiscal year in which the expenses upon which the claim is based are incurred.

(f) There shall be no reimbursement for any of the following:

(1) Projects or programs identified unless previously approved by the department as part of the maternal and child health plan.

(2) Capital improvements.

(3) The purchase or construction of buildings except for the equipment items and remodeling expenses as may be allowed by the department on a case-by-case basis.

(g) The department and counties shall maximize the use of federal funds available to implement this section, including using state or county funds to match funds claimable under Title XIX of the federal Social Security Act (42 U.S.C. Sec. 1396 et seq.).

(h) (1) For purposes of this program, the department shall reimburse a county pursuant to this section in lieu of renewing or commencing a cooperative agreement with a county for the operation of a maternal and child health program.

(2) It is the intent of the Legislature that cooperative agreements between the department and a county for the operation of a maternal and child health program pursuant to this section be replaced by the process described in this section beginning with the 1997–98 fiscal year.

SEC. 26. Section 123279 is added to the Health and Safety Code, to read:

123279. (a) It is the intent of the Legislature in adding this section to authorize the establishment of a program designed to implement the federal WIC Farmers' Market Nutrition Act of 1992 (Public Law 102-314), which is designed to accomplish the following:

(1) Provide resources to persons who are nutritionally at risk, in the form of fresh, high-quality agricultural products from certified farmers' markets.

(2) Expand the awareness and use of certified farmers' markets and increase sales at those markets.

(b) The department may establish a program designed to implement the federal WIC Farmers Market Nutrition Act of 1992.

(c) If the program is established, the department shall develop criteria to permit any producer authorized by the department to participate in the program to sell fresh nutritious foods to recipients in exchange for nutrition coupons.

(d) If the program is established, the department shall authorize local agencies to distribute nutrition coupons to all recipients, as defined by subdivision (c) of Section 123285 of the Health and Safety Code.

(e) If the program is established, the department shall design the nutrition coupon issuance process to ensure that nutrition coupons are bearer-only, nonnegotiable, and nontransferable by the recipient and that they may be redeemed by recipients only to purchase fresh produce and redeemed for reimbursement only by authorized producers.

(f) It is the intent of the Legislature that the program established by this section to implement the federal WIC Farmers' Market Nutrition Act of 1992 (Public Law 102-314) be funded 70 percent by federal funds and 30 percent by private or other funds, as specified by the federal act.

SEC. 27. Chapter 1.5 (commencing with Section 124450) is added to Part 4 of Division 106 of the Health and Safety Code, to read:

CHAPTER 1.5. CLINIC SERVICES

124450. (a) In any emergency or disaster, as declared by the Governor, clinics funded under the seasonal agricultural and migratory workers program provided for by Chapter 3 (commencing with Section 124550), the rural health services development program provided for by Chapter 5 (commencing with Section 124600) or the expanded access to primary care program provided for by Article 2 (commencing with Section 124900) of Chapter 7 shall provide nonelective, primary health care services, utilizing a sliding-fee scale based on income, including a zero payment option, to all persons who are impacted by the emergency or disaster and who present themselves for treatment at the clinic.

(b) The department shall deny or recoup payment under Chapter 3 (commencing with Section 124550), Chapter 5 (commencing with Section 124600), and Article 2 (commencing with Section 124900) of Chapter 7, assess civil penalties, revoke or suspend the license of the clinic pursuant to Section 1229, or impose other sanctions or other penalties authorized by law, when the clinic charges patients for care and fails to utilize a sliding-fee scale based on income, including a

zero-payment option, to determine the fees to be charged to any patient pursuant to subdivision (a).

(c) To the extent that the department enters into contracts or renews contracts with clinics identified in subdivision (b) on or after the effective date of this section, those contracts shall require clinics to utilize a sliding-fee scale based on income, including a zero-payment option, when determining fees to be assessed for patients.

SEC. 28. Section 124950 of the Health and Safety Code is repealed.

SEC. 29. Section 12696.05 of the Insurance Code is amended to read:

12696.05. The board may do all of the following:

(a) Determine eligibility criteria for the program. These criteria shall include the requirements set forth in Section 12698.

(b) Determine the eligibility of applicants.

(c) Determine when subscribers are covered and the extent and scope of coverage.

(d) Determine subscriber contribution amounts schedules. Subscriber contribution amounts shall be indexed to the federal poverty level and shall not exceed 2 percent of a subscriber's annual gross family income.

(e) Provide coverage through participating health plans or through coordination with other state programs, and contract for the processing of applications and the enrollment of subscribers. Any contract entered into pursuant to this part shall be exempt from any provision of law relating to competitive bidding, and shall be exempt from the review or approval of any division of the Department of General Services. The board shall not be required to specify the amounts encumbered for each contract, but may allocate funds to each contract based on projected and actual subscriber enrollments in a total amount not to exceed the amount appropriated for the program.

(f) Authorize expenditures from the fund to pay program expenses which exceed subscriber contributions, and to administer the program as necessary.

(g) Develop a promotional component of the program to make Californians aware of the program and the opportunity that it presents.

(h) Issue rules and regulations as necessary to administer the program. All rules and regulations issued pursuant to this subdivision that manage program integrity, revise the benefit package, or reduce the eligibility criteria below 300 percent of the federal poverty level may be adopted as emergency regulations in accordance with the Administrative Procedure Act (Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code). The adoption of these regulations shall be deemed an

emergency and necessary for the immediate preservation of the public peace, health, and safety, or general welfare. The regulations shall become effective immediately upon filing with the Secretary of State.

(i) Exercise all powers reasonably necessary to carry out the powers and responsibilities expressly granted or imposed by this part.

SEC. 30. Section 12699.50 of the Insurance Code is repealed.

SEC. 31. Section 1372 of the Penal Code is amended to read:

1372. (a) (1) If the medical director of the state hospital or other facility to which the defendant is committed, or the community program director, county mental health director, or regional center director providing outpatient services, determines that the defendant has regained mental competence, the director shall immediately certify that fact to the court by filing a certificate of restoration with the court by certified mail, return receipt requested. For purposes of this section, the date of filing shall be the date on the return receipt.

(2) The court's order committing an individual to a state hospital or other treatment facility pursuant to Section 1370 shall include direction that the sheriff shall redeliver the patient to the court without any further order from the court upon receiving from the state hospital or treatment facility a copy of the certificate of restoration. The defendant shall be returned to the committing court in the following manner: A patient who remains confined in a state hospital or other treatment facility shall be redelivered to the sheriff of the county from which the patient was committed. The sheriff shall immediately return the person from the state hospital or other treatment facility to the court for further proceedings. The patient who is on outpatient status shall be returned by the sheriff to court through arrangements made by the outpatient treatment supervisor. In all cases, the patient shall be returned to the committing court no later than 10 days following the filing of a certificate of restoration. The state shall only pay for 10 hospital days for patients following the filing of a certificate of restoration of competency. The State Department of Mental Health shall report to the fiscal and policy committees of the Legislature on an annual basis in January, on the number of days that exceed the 10-day limit.

(b) If the defendant becomes mentally competent after a conservatorship has been established pursuant to the applicable provisions of the Lanterman-Petris-Short Act, Part 1 (commencing with Section 5000) of Division 5 of the Welfare and Institutions Code, and Section 1370, the conservator shall certify that fact to the sheriff and district attorney of the county in which defendant's case is pending, defendant's attorney of record, and the committing court.

(c) When a defendant is returned to court with a certification that competence has been regained, the court shall notify either the community program director, the county mental health director, or

the regional center director and the Director of Developmental Services, as appropriate, of the date of any hearing on the defendant's competence and whether or not the defendant was found by the court to have recovered competence.

(d) Where the committing court approves the certificate of restoration to competence as to a person in custody, the court shall hold a hearing to determine whether the person is entitled to be admitted to bail or released on own recognizance status pending conclusion of the proceedings. Where the superior court approves the certificate of restoration to competence regarding a person on outpatient status, unless it appears that the person has refused to come to court, that person shall remain released either on own recognizance status, or, in the case of a developmentally disabled person, either on the defendant's promise or on the promise of a responsible adult to secure the person's appearance in court for further proceedings. Where the person has refused to come to court, the court shall set bail and may place the person in custody until bail is posted.

(e) A defendant subject to either subdivision (a) or (b) who is not admitted to bail or released under subdivision (d) may, at the discretion of the court, upon recommendation of the director of the facility where the defendant is receiving treatment, be returned to the hospital or facility of his or her original commitment or other appropriate secure facility approved by the community program director, the county mental health director, or the regional center director. The recommendation submitted to the court shall be based on the opinion that the person will need continued treatment in a hospital or treatment facility in order to maintain competence to stand trial or that placing the person in a jail environment would create a substantial risk that the person would again become incompetent to stand trial before criminal proceedings could be resumed.

(f) Notwithstanding subdivision (e), if a defendant is returned by the court to a hospital or other facility for the purpose of maintaining competency to stand trial and that defendant is already under civil commitment to that hospital or facility from another county pursuant to the Lanterman-Petris-Short Act (Part 1 (commencing with Section 5000) of Division 5 of the Welfare and Institutions Code) or as a developmentally disabled person committed pursuant to Article 2 (commencing with Section 6500) of Chapter 2 of Part 2 of Division 6 of the Welfare and Institutions Code, the costs of housing and treating the defendant in that facility following return pursuant to subdivision (e) shall be the responsibility of the original county of civil commitment.

SEC. 32. Section 4418.1 is added to the Welfare and Institutions Code, to read:

4418.1. (a) The Legislature recognizes that it has a special obligation to ensure the well-being of persons with developmental disabilities who are moved from state hospitals to the community.

(b) To ensure that persons with developmental disabilities who are moved from state hospitals to the community are receiving necessary services and supports, the department shall contract with an independent agency or organization for the tracking and monitoring of those persons, including all persons moved as a result of the Coffelt v. State Department of Developmental Services settlement agreement and any persons moved after the terms of that agreement have been met.

(c) The contractor shall be experienced in all of the following:

(1) Designing valid tracking instruments.

(2) Tracking the quality of community programs, including outcome-based measures such as health and safety, quality of life, integration, choice, and consumer satisfaction.

(3) Tracking the quality and appropriateness of community placements for persons moving from large institutions into community settings.

(4) Developing data systems.

(5) Data analysis and report preparation.

(d) The contractor shall measure consumer and family satisfaction with services provided, including case management and quality of life, including, but not limited to, health and safety, independence, productivity, integration, opportunities for choice, and delivery of needed services.

(e) The information maintained for each person shall include the person's name, address, nature of disability, medical condition, scope of community-based services and supports, and the annual data collected by the contractor.

(f) The contractor shall meet with each person, and the person's family, legal guardian, or conservator, when appropriate, no less than once a year to discuss quality of life and observe the person's services and supports. In cases where the consumer is not capable of communicating his or her responses and where there is no family member, guardian, or conservator involved, the contractor shall meet with no less than two persons familiar with the consumer. Additionally, the contractor shall interview staff and friends who know the consumer best and review records, as appropriate.

(g) If the contractor identifies any suspected violation of the legal, civil, or service rights of an individual, or if the contractor determines that the health and welfare of the individual is at risk, that information shall be provided immediately to the regional center providing case management services, the client rights advocate, and to the department.

(h) The department shall monitor the corrective actions taken by the regional center and maintain a report in the person's file. The

consumer and, when appropriate, his or her parents, legal guardian, or conservator, shall be provided with access to the person's file and be provided with copies of all reports filed with the regional center or department relative to them.

(i) The department shall establish a task force, including representatives from stakeholder organizations, to annually review the findings of the contractor and make recommendations regarding additional or differing criteria for information to be gathered by the contractor in future interviews.

(j) As of July 1, 1998, and annually thereafter, the contractor shall provide a report to the Governor, the Legislature, and the department outlining the activities and findings of this process. The reports shall be public and shall contain no personally identifying information about the persons being monitored.

SEC. 33. Section 4418.7 is added to the Welfare and Institutions Code, to read:

4418.7. (a) If the regional center determines, or is informed by the consumer's parents, legal guardian, or conservator, that the community placement of a consumer is at risk of failing, and that admittance to a state developmental center is a likelihood, the regional center shall immediately notify the department, the consumer, and the parents, legal guardian, or conservator.

(b) In these cases, the department shall immediately arrange for an assessment of the situation. If, based on the assessment, the department determines that additional or different services and supports are necessary, the department shall ensure that the regional center provides those services and supports on an emergency basis. An individual program plan meeting, including the department's representative, shall be convened as soon as possible to review the emergency services and supports and determine the consumer's ongoing needs for services and supports.

(c) If the department, in consultation with the regional center, the consumer, and the consumer's parents, legal guardian, or conservator, when appropriate, determines that admittance to a state developmental center is necessary to protect the health and welfare of the consumer, the department shall immediately seek that admission.

SEC. 34. Section 4433 is added to the Welfare and Institutions Code, to read:

4433. (a) The Legislature finds and declares all of the following:

(1) The State of California accepts its responsibility to ensure and uphold the rights of persons with developmental disabilities and an obligation to ensure that laws, regulations, and policies on the rights of persons with developmental disabilities are observed and protected.

(2) Persons with developmental disabilities are vulnerable to abuse, neglect, and deprivations of their rights.

(3) Clients' rights advocacy services provided by the regional centers, the advocacy services currently provided by the department at the state hospitals, and the services provided by the department's Office of Human Rights may have conflicts of interest, or the appearance of a conflict of interest.

(4) The services provided to individuals with developmental disabilities and their families are of such a special and unique nature that they cannot satisfactorily be provided by state agencies or regional centers and must be contracted out pursuant to paragraph (3) of subdivision (b) of Section 19130 of the Government Code.

(b) (1) To avoid the potential for a conflict of interest or the appearance of a conflict of interest, beginning January 1, 1998, the department shall contract for clients' rights advocacy services. The department shall solicit a single statewide contract with a nonprofit agency that results in at least three responsive bids that meet all of the criteria specified in paragraph (2) to perform the services specified in subdivision (d). If three responsive bids are not received, the department may rebid the contract on a regional basis, not to exceed three regional contracts and one contract for developmental centers and headquarters.

(2) Any contractor selected shall meet the following requirements:

(A) The contractor can demonstrate the capability to provide statewide advocacy services to individuals with developmental disabilities living in developmental centers and in the community.

(B) The contractor does not directly or indirectly provide services to individuals with developmental disabilities, except advocacy services.

(C) The contractor has knowledge of the service system, entitlements, and service rights of persons receiving services from regional centers and in state hospitals.

(D) The contractor can demonstrate the capability of coordinating services with the protection and advocacy agency specified in Division 4.7 (commencing with Section 4900) and the area boards.

(E) The contractor has not provided any services, except advocacy services, to, or been employed by, any regional center or the Association of Regional Center Agencies during the two-year period prior to the effective date of the contract.

(c) For the purposes of this section, the Legislature further finds and declares that because of a potential conflict of interest or the appearance of a conflict of interest, the goals and purposes of the regional center clients' rights advocacy services, the state hospitals, and the services of the Office of Human Rights, cannot be accomplished through the utilization of persons selected pursuant to the regular civil service system, nor can the services be provided through the department's contracts with regional centers.

Accordingly, contracts into which the department enters pursuant to this section are permitted and authorized by paragraphs (3) and (5) of subdivision (b) of Section 19130 of the Government Code.

(d) The contractor shall do all of the following:

(1) Provide clients' rights advocacy services to persons with developmental disabilities who are consumers of regional centers and to individuals who reside in the state developmental centers and hospitals, including ensuring the rights of persons with developmental disabilities, and assisting persons with developmental disabilities in pursuing administrative and legal remedies.

(2) Investigate and take action as appropriate and necessary to resolve complaints from, or concerning persons with, developmental disabilities residing in licensed health and community care facilities regarding abuse, and unreasonable denial, or punitive withholding, of rights guaranteed under this division.

(3) Provide consultation, technical assistance, supervision and training, and support services for clients' rights advocates that were previously the responsibility of the Office of Human Rights.

(4) Coordinate the provision of clients' rights advocacy services in consultation with the department, stakeholder organizations, and persons with developmental disabilities and their families representing California's multicultural diversity.

(5) Provide at least two self-advocacy trainings for consumers and family members.

(e) In order to ensure that individuals with developmental disabilities have access to high quality advocacy services, the contractor shall establish a grievance procedure and shall advise persons receiving services under the contract of the availability of other advocacy services, including the services provided by the protection and advocacy agency specified in Division 4.7 (commencing with Section 4900) and the area boards.

(f) The department shall contract on a multiyear basis for a contract term of up to three years, subject to the annual appropriation of funds by the Legislature.

(g) This section shall not prohibit the department and the regional centers from advocating for the rights, including the right to generic services, of persons with developmental disabilities.

SEC. 35. Section 4596.5 is added to the Welfare and Institutions Code, to read:

4596.5. (a) In order to remain informed about the quality of services in the area and protect the legal, civil, and service rights of persons with developmental disabilities pursuant to Section 4590, the Legislature finds that it is necessary to conduct life quality assessments with consumers served by the regional centers.

(b) It is the intent of the Legislature that life quality assessments described in this section be conducted by area boards, unless an independent evaluation of the life quality assessment process, that

shall be completed by April 30, 1998, identifies compelling reasons why this function should not be conducted by area boards.

(c) By July 1, 1998, the department shall enter into an interagency agreement with the Organization of Area Boards, on behalf of the area boards, to conduct the life quality assessments described in this section.

(d) Consistent with the responsibilities described in this chapter, the area board, with the consent of the consumer and, when appropriate, a family member, shall conduct life quality assessments with consumers living in out-of-home placements, supported living arrangements, or independent living arrangements no less than once every three years or more frequently upon the request of a consumer, or, when appropriate, a family member. A regional center shall annually provide the local area board with a list, including the name, address, and telephone number of each consumer, and, when appropriate, a family member, the consumer's date of birth, and the consumer's case manager, for all consumers living in out-of-home placements, supported living arrangements, or independent living arrangements, in order to facilitate area board contact with consumers and, when appropriate, family members, for the purpose of conducting life quality assessments.

(e) The life quality assessments shall be conducted by utilizing the State Department of Developmental Services' Looking at Life Quality Handbook.

(f) The assessments shall be conducted by consumers, families, providers, and others, including volunteer surveyors. Each area board shall recruit, train, supervise, and coordinate surveyors. Upon request, and if feasible, the area board shall respect the request of a consumer and, when appropriate, family member, for a specific surveyor to conduct the life quality assessment. An area board may provide stipends to surveyors.

(g) A life quality assessment shall be conducted within 90 days prior to a consumer's triennial individual program plan meeting, so that the consumer and regional center may use this information as part of the planning process.

(h) Prior to conducting a life quality assessment, the area board shall meet with the regional center to coordinate the exchange of appropriate information necessary to conduct the assessment and ensure timely followup to identified violations of any legal, civil, or service rights.

(i) Following the conduct of each life quality assessment, the area board shall develop a report of its findings and provide a copy of the report to the consumer, when appropriate, family members, and the regional center providing case management services to the consumer. In the event that a report identifies alleged violations of any legal, civil, or service right, the area board shall notify the regional center and the department of the alleged violation. The

department shall monitor the regional center to ensure that violations are addressed and resolved in a timely manner.

(j) Regional centers shall review information from the life quality assessments on a systemic basis in order to identify training and resource development needs.

(k) Effective August 1, 1999, and annually thereafter, the Organization of Area Boards shall prepare and submit a report to the Governor, the Legislature, and the department describing the activities and accomplishments related to the implementation of this section. The report shall include, but not be limited to, the number of life quality assessments conducted, the number of surveyors, including those provided stipends, a description of the surveyor recruitment process and training program, including any barriers to recruitment, the number, nature, and outcome of any identified violations of legal, civil, or service rights reported to regional centers, and recommendations for improvement in the life quality assessment process.

(*l*) Implementation of this section shall be subject to an annual appropriation of funds in the state Budget Act for this purpose.

(m) If the department finds, based on the results of the independent study described in subdivision (b), that there is a compelling reason why the area boards should not conduct the life quality assessments, it may select an alternative governmental agency or contract with a nonprofit agency to conduct the life quality assessments as described in this section. The department shall notify the Governor and the Legislature of such a finding, including the reasons for the finding and a description of the alternative method by which the department will ensure the life quality assessment process is completed.

SEC. 36. Section 4639 is added to the Welfare and Institutions Code, to read:

4639. The governing board of a regional center shall annually contract with an independent accounting firm for an audited financial statement. The audit report and accompanying management letter shall be reviewed and approved by the regional center board and submitted to the department within 60 days of completion and before April 1 of each year. Upon submission to the department, the audit report and accompanying management letter shall be made available to the public by the regional center. It is the intent of the Legislature that no additional funds be appropriated for this purpose.

SEC. 37. Section 4643.5 of the Welfare and Institutions Code is amended to read:

4643.5. (a) If a consumer is or has been determined to be eligible for services by a regional center, he or she shall also be considered eligible by any other regional center if he or she has moved to another location within the state.

(b) An individual who is determined by any regional center to have a developmental disability shall remain eligible for services from regional centers unless a regional center, following a comprehensive reassessment, concludes that the original determination that the individual has a developmental disability is clearly erroneous.

(c) Whenever a consumer transfers from one regional center catchment area to another, the level and types of services and supports specified in the consumer's individual program plan shall be authorized and secured, if available, pending the development of a new individual program plan for the consumer. If these services and supports do not exist, the regional center shall convene a meeting to develop a new individual program plan within 30 days. Prior to approval of the new individual program plan, the regional center shall provide alternative services and supports that best meet the individual program plan objectives in the least restrictive setting. The department shall develop guidelines that describe the responsibilities of regional centers in ensuring a smooth transition of services and supports from one regional center to another, including, but not limited to, pretransferring planning and a dispute resolution process to resolve disagreements between regional centers regarding their responsibilities related to the transfer of case management services.

SEC. 38. Section 4681.1 of the Welfare and Institutions Code is amended to read:

4681.1. (a) By July 1 each year, the department shall establish rates, that shall be reviewed by the state council. Payment of these rates shall be subject to the appropriation of sufficient funds for that purpose in the Budget Act. In reviewing the sufficiency of these rates that is required by March 1, 1989, the department shall take into account the findings and recommendations of the study conducted by the State Council on Developmental Disabilities pursuant to Section 4541.

(b) In establishing rates to be paid for out-of-home care, the department shall include each of the cost elements in this section as follows:

(1) Rates established for all facilities shall include an adequate amount to care for "basic living needs" of a person with developmental disabilities. "Basic living needs" shall include housing, shelter, utilities, furnishings, food, incidental transportation, housekeeping, and personal care items. The amount required for basic living needs shall be calculated each year as the average cost of these items in community care facilities. The department shall annually publish a listing of the allowable cost components of these cost items and the methodology used to determine the amounts of each item. The amount for basic living needs shall be adjusted depending on the extent to which there is a demonstrated variation

based on the size of the out-of-home facility. These amounts shall be adjusted annually to reflect cost-of-living changes. A redetermination of basic living costs shall be undertaken every three years by the State Department of Developmental Services, using the best available estimating methods. The first report shall be made on March 1, 2001. The department shall convene an advisory committee and develop a plan, including a proposal for an appropriate study methodology, for the redetermination of basic living costs. The advisory committee shall include, but not be limited to, service consumers, family members, residential service providers, and advocacy groups.

(2) Rates established for all facilities that provide direct supervision for persons with developmental disabilities shall include an amount for "direct supervision." The cost of "direct supervision" shall vary with the person's functioning in the areas of self-care and daily living skills, physical coordination and mobility, and behavioral self-control and shall reflect one of the following:

(A) Basic self-help and daily living skills, no significant limitations in physical coordination and mobility, and behavioral self-control.

(B) Poor self-help and daily living skills, some limitations in physical coordination and mobility, or some disruptive or self-injurious behavior.

(C) Severe deficits in self-care and daily living skills, severe impairments in physical coordination and mobility, or severely disruptive or self-injurious behavior.

The individual program plan developed pursuant to Section 4646 shall determine the amount of direct supervision required for each individual. The cost of direct supervision shall be calculated as the wage and benefit costs of caregiving staff depending on the level of service being provided to meet the functional needs of the person with developmental disabilities. These rates shall be adjusted annually to reflect wage changes and shall comply with all federal regulations for hospitals and residential care establishments under the federal Fair Labor Standards Act.

(3) Rates established for all facilities that provide "special services" for persons with developmental disabilities shall include an amount to pay for such "special services" for each person receiving special services. "Special services" include specialized training, treatment, supervision, or other services which the individual program plan of each person requires to be provided by the residential facility in addition to the direct supervision provided pursuant to the person's individual program plan in subdivision (b). Facilities shall be paid for providing special services for each individual to the extent that such services are specified in the person's individual program plan and the facility is a designated provider of such special services. Rates of payment for special services shall be the same as prevailing rates paid for similar services in the area.

(4) To the extent applicable, rates established for facilities shall include a reasonable amount for "unallocated services." These costs shall be determined using generally accepted accounting principles. "Unallocated services" means the indirect costs of managing a facility and includes costs of managerial personnel, facility operation, maintenance and repair, employee benefits, taxes, interest, insurance, depreciation, and general and administrative support. If a facility serves other persons in addition to developmentally disabled persons, unallocated services expenses shall be reimbursed under this section, only for the proportion of the costs associated with the care of developmentally disabled persons. The amount for unallocated services shall be adjusted depending on the extent to which there is a demonstrated variation due to such factors as facility size or administrative structure.

(5) Rates established for facilities shall include an amount to reimburse facilities for the depreciation of "mandated capital improvements and equipment" as established in the state's uniform accounting manual. For purposes of this section, "mandated capital improvements and equipment" are only those remodeling and equipment costs incurred by a facility because an agency of government has required such remodeling or equipment as a condition for the use of the facility as a provider of out-of-home care to persons with developmental disabilities.

(6) When applicable, rates established for proprietary facilities shall include a reasonable "proprietary fee."

(7) Rates established for all facilities shall include as a "factor" an amount to reflect differences in the cost of living for different geographic areas in the state.

(8) Rates established for developmentally disabled persons who are also mentally disordered may be fixed at a higher rate. The State Department of Mental Health shall establish criteria upon which higher rates may be fixed pursuant to this subdivision. The higher rate for developmentally disabled persons who are also mentally disordered may be paid when requested by the director of the regional center and approved by the Director of Developmental Services.

(c) This section shall apply to facility rates paid under the alternative residential model originally authorized in Item 4300-101-001 of the Budget Act of 1985 and as identified in the department's report of April 1987 entitled Alternative Residential Model (ARM).

(d) The department shall approve additional facilities to receive rates pursuant to this section upon the appropriation of funds for that purpose.

(e) It is the intent of the Legislature that the department phase in implementation of the alternative residential model during the fiscal years 1987–88, 1988–89, 1989–90, and 1990–91. The department

shall include all facilities providing services pursuant to this article in the alternative residential model by January 1, 1991.

(f) By April 1, 1989, the State Department of Developmental Services shall prepare draft regulations establishing quality service standards for facilities and procedures for administering the alternative residential model. The department shall confer with interested parties concerning the draft regulations by July 1, 1989. By July 1, 1990, the department shall submit to the Office of Administrative Law regulations establishing quality service standards for facilities, procedures for administering the Alternative Residential Model, and ratesetting methodology. Full statewide implementation of the Alternative Residential Model shall not occur until the department has submitted these regulations.

(g) In addition to establishing rates as required by this section, the State Department of Developmental Services shall detail obstacles to ensuring sufficient numbers of living arrangements for persons served by the department, and to providing an adequate quality of care and services to persons served by the department who reside in residential facilities, and make recommendations for overcoming these obstacles.

SEC. 39. Section 4681.3 of the Welfare and Institutions Code is amended to read:

4681.3. (a) Notwithstanding any other provision of this article, for the 1996–97 fiscal year, the rate schedule authorized by the department in operation June 30, 1996, shall be increased based upon the amount appropriated in the Budget Act of 1996 for that purpose. The increase shall be applied as a percentage, and the percentage shall be the same for all providers.

(b) Notwithstanding any other provision of this article, for the 1997–98 fiscal year, the rate schedule authorized by the department in operation on June 30, 1997, shall be increased based upon the amount appropriated in the Budget Act of 1997 for that purpose. The increase shall be applied as a percentage, and the percentage shall be the same for all providers.

SEC. 40. Section 6600.05 of the Welfare and Institutions Code is amended to read:

6600.05. Atascadero State Hospital shall be used whenever a person is committed to a secure facility for mental health treatment pursuant to Section 6600 and is placed in a state hospital under the direction of the State Department of Mental Health unless there are unique circumstances that would preclude the placement of a person at that facility. If a state hospital is not used, the facility to be used shall be located on a site or sites determined by the Director of Corrections and the Director of Mental Health. In no case shall a person committed to a secure facility for mental health treatment pursuant to Section 6600 be placed at Metropolitan State Hospital or Napa State Hospital.

SEC. 41. Section 7200.06 is added to the Welfare and Institutions Code, to read:

7200.06. (a) Of the total patient population residing at Napa State Hospital in any given fiscal year, not more than 80 percent shall be patients whose placement has been required pursuant to the Penal Code.

(b) After construction of the perimeter security fence is completed at Napa State Hospital, no patient whose placement has been required pursuant to the Penal Code shall be placed outside the perimeter security fences, with the exception of placements in the General Acute Care and Skilled Nursing Units. The State Department of Mental Health shall ensure that appropriate security measures are in place for the general acute care and skilled nursing units.

(c) After construction of the perimeter security fence is completed at Napa State Hospital, in no case shall the population of patients whose placement has been required pursuant to the Penal Code exceed 980.

SEC. 42. Section 7200.07 is added to the Welfare and Institutions Code, to read:

7200.07. Notwithstanding any other provision of law, not more than 824 patients whose placement has been required pursuant to the Penal Code shall be placed at Napa State Hospital in the 1998–99 fiscal year.

SEC. 43. Section 7202 is added to the Welfare and Institutions Code, to read:

7202. The State Department of Mental Health shall regularly consult with the Napa State Hospital Task Force, which consists of local community representatives, on proposed policy or structural modifications to Napa State Hospital that may affect the Napa community, including, but not limited to, all of the following:

(a) Changes in the patient population mix.

(b) Construction of, or significant alterations to, facility structures.

(c) Changes in the hospital security plan.

SEC. 44. Section 7204 is added to the Welfare and Institutions Code, to read:

7204. (a) Grounds privileges or passes may be earned by patients, whose placement has been required pursuant to the Penal Code, at all state hospitals. Grounds privileges shall be restricted to areas of the state hospital that are designated as secured campus areas.

(b) Off-ground privileges or passes shall not be granted to patients, whose placement has been required pursuant to the Penal Code, at state hospitals. When a patient whose placement has been required pursuant to the Penal Code leaves a state hospital for any purpose other than discharge, the patient shall be accompanied by staff at all times.

SEC. 45. Section 7228 of the Welfare and Institutions Code is amended to read:

7228. Prior to admission to the Napa State Hospital or the Metropolitan State Hospital, the State Department of Mental Health shall evaluate each patient committed pursuant to Section 1026 or 1370 of the Penal Code. A patient determined to be a high security risk shall be treated in the department's most secure facilities. A Penal Code patient not needing this level of security shall be treated as near to the patient's community as possible if an appropriate treatment program is available.

SEC. 46. Section 7229 is added to the Welfare and Institutions Code, to read:

7229. Notwithstanding any other provision of law, patients whose placement has been required pursuant to the Penal Code, above the 593 patients approved through the Budget Act of 1996, shall be admitted to Napa State Hospital only after all of the following conditions have been met:

(a) The perimeter security fence, as approved in the Budget Act of 1997, is completed. The completion of this fence is a matter of public safety and has the highest urgency to be completed as quickly as possible. It is the intent of the Legislature for the state administration to take the administrative action needed to ensure the timely construction of the perimeter security fence.

(b) An appropriately trained state hospital security force, as identified in the hospital's security plan developed in conjunction with the City of Napa, the County of Napa, local law enforcement personnel, local community leaders, and security consultants as needed, is in place to meet the security needs of the state hospital.

(c) Specialized training to level-of-care and, as necessary, nonlevel-of-care, staff has been provided to ensure the safest and most therapeutic environment possible for both patients and staff.

(d) A 30-day notification to the fiscal and policy committees of the Legislature has been provided.

SEC. 47. Section 7230 is added to the Welfare and Institutions Code, to read:

7230. Those patients determined to be high security risk patients, as described in Section 7228, shall be treated at Atascadero State Hospital or Patton State Hospital, a correctional facility, or other secure facility as defined by the State Department of Mental Health, but shall not be treated at Metropolitan State Hospital or Napa State Hospital. Metropolitan State Hospital and Napa State Hospital shall treat only low- to moderate-risk patients, as defined by the State Department of Mental Health.

SEC. 48. Section 7231 is added to the Welfare and Institutions Code, to read:

7231. The State Department of Mental Health shall develop policies and procedures, by no later than 30 days following the

effective date of the Budget Act of 1997, at each state hospital, to notify appropriate law enforcement agencies in the event of a patient escape or walkaway. Local law enforcement agencies, including local police and county sheriff departments, shall review the policies and procedures prior to final implementation by the department.

SEC. 49. Section 7232 is added to the Welfare and Institutions Code, to read:

7232. The State Department of Mental Health shall issue a state hospital administrative directive by no later than 30 days following the effective date of the Budget Act of 1997 to require patients whose placement has been required pursuant to the Penal Code, and other patients within the secured perimeter at each state hospital, to wear clothing that enables these patients to be readily identified.

SEC. 50. Section 7233 is added to the Welfare and Institutions Code, to read:

7233. It is the intent of the Legislature to complete the 250-bed addition at Atascadero State Hospital as expeditiously as feasible due to the need to provide appropriate, secure housing for patients whose placement has been required pursuant to the Penal Code. To facilitate this completion, it is the intent of the Legislature to provide funding for the construction phase of this project in the Budget Act of 1998.

SEC. 51. Section 14005.75 is added to the Welfare and Institutions Code, to read:

14005.75. (a) The Legislature finds and declares all of the following:

(1) As a result of federal welfare reform, unprecedented numbers of welfare recipients will be leaving welfare for work, and will face time limits on the receipt of aid.

(2) It is in the interest of the state both to encourage welfare recipients to seek employment and to ensure the continuity of health coverage for these recipients as they move from welfare to work.

(3) California's transitional Medi-Cal program is intended to encourage welfare recipients to seek employment and to ensure continuity of health coverage, but various procedural restrictions limit its effectiveness in achieving those goals.

(b) It is, therefore, the intent of the Legislature to streamline the transitional Medi-Cal program in order to maximize its effectiveness in assisting persons leaving welfare for work.

SEC. 52. Section 14005.76 is added to the Welfare and Institutions Code, to read:

14005.76. (a) The department shall provide a Medi-Cal beneficiary whose Medi-Cal eligibility is established pursuant to Section 1930 of the federal Social Security Act (42 U.S.C. Sec. 1396u-1) with simple and clear written notice of the availability of the transitional Medi-Cal program and the requirements for that program. This notice shall be provided at the time that Medi-Cal

eligibility is conferred to the beneficiary and at least once every six months thereafter.

(b) When a beneficiary loses Medi-Cal eligibility established pursuant to Section 1930 of the federal Social Security Act (42 U.S.C. Sec. 1396u-1) for failure to meet reporting requirements, the department shall provide the beneficiary with the notice described in subdivision (a), and a form with simple and clear instructions on how to complete and return the form to the county. The form shall be used to determine whether the beneficiary is eligible for the transitional Medi-Cal program.

(c) The notice and form described in subdivisions (a) and (b) shall be prepared by the department. The department shall seek input on the notice and form from beneficiaries of aid, beneficiary representatives, and counties.

(d) The department shall review, and if necessary for simplicity and clarity, revise the notice required by subdivision (b) of Section 14005.8 and Section 14005.81. The department shall seek input from beneficiaries, beneficiary representatives, and counties.

(e) Notwithstanding any other provision of law, this section shall become operative nine months after the effective date of this section.

(f) Notwithstanding any other provision of law, this section shall be implemented only if, and to the extent that, the department determines that federal financial participation, as provided under Title XIX of the federal Social Security Act (42 U.S.C. Sec. 1396 et seq.), is available.

SEC. 53. Section 14005.82 is added to the Welfare and Institutions Code, to read:

14005.82. (a) Any person who the department determines, pursuant to the notice and information on the form required by subdivision (b) of Section 14005.76, is eligible for transitional Medi-Cal benefits, shall be made retroactively eligible for transitional Medi-Cal benefits from the date that person loses Medi-Cal eligibility established pursuant to Section 1931 of the federal Social Security Act (42 U.S.C. Sec. 1396u-1). All information contained on the form required by subdivision (b) of Section 14005.76 is subject to verification by the county using applicable criteria.

(b) Notwithstanding any other provision of law, this section shall be implemented only if, and to the extent that, the department determines that federal financial participation, as provided under Title XIX of the federal Social Security Act (42 U.S.C. Sec. 1396 et seq.) is available.

SEC. 54. Section 14005.83 is added to the Welfare and Institutions Code, to read:

14005.83. (a) The director shall seek a waiver from the federal government to simplify the transitional Medi-Cal program described in Section 14005.81.

(b) The waiver required to be sought pursuant to subdivision (a) shall seek to include all of the following:

(1) Any family receiving Medi-Cal benefits whose Medi-Cal eligibility was established pursuant to Section 1931 of the federal Social Security Act (42 U.S.C. Sec. 1396u-1) in the month prior to becoming ineligible for those benefits due to increased hours of employment, income from employment, or the loss of earned income disregards shall be eligible for Medi-Cal coverage subject to the time limits contained in Section 14005.81.

(2) Status reports to determine ongoing eligibility for transitional Medi-Cal benefits shall be required not more frequently than every six months.

(3) Receipt of transitional Medi-Cal coverage for any portion of the initial six-month period of eligibility shall be sufficient to establish eligibility for successive six-month periods of coverage, provided other applicable eligibility requirements are met.

(c) Notwithstanding any other provision of law, this section shall be implemented only if, and to the extent that, the department determines that federal financial participation, as provided under Title XIX of the federal Social Security Act (42 U.S.C. Sec. 1396 et seq.), is available.

(d) This section shall not become operative until the director executes a declaration, which shall be retained by the director, stating that the federal approval necessary for implementation of this section has been obtained.

SEC. 55. Section 14005.84 is added to the Welfare and Institutions Code, to read:

14005.84. (a) The department shall develop and conduct a community outreach and education campaign to assist persons whose Medi-Cal eligibility is established pursuant to Section 1931 of the federal Social Security Act (42 U.S.C. Sec. 1396u-1), to learn about the availability of the transitional Medi-Cal program.

(b) Any managed care plan, local initiative, or county organized health system contracting with the department to provide services to Medi-Cal enrollees shall include in its evidence of coverage and marketing materials information about the transitional Medi-Cal program and how to apply for program benefits.

(c) To implement this section, the department may develop and execute a contract or may amend any existing or future outreach campaign contract that it has executed. Notwithstanding any other provision of law, any such contract developed and executed, or amended, as required to implement this section shall be exempt from the approval of the Director of General Services and from the Public Contract Code.

(d) Notwithstanding any other provision of law, this section shall be implemented only if, and to the extent that, the department determines that federal financial participation, as provided under

Title XIX of the federal Social Security Act (42 U.S.C. Sec. 1396 et seq.), is available.

SEC. 56. Section 14005.88 is added to the Welfare and Institutions Code, to read:

14005.88. (a) The department shall contract for an independent evaluation, to be completed no later than January 1, 2001, in order to determine the effect of changes made in the transitional Medi-Cal program by the enactment of Sections 14005.76, 14005.82, 14005.83, 14005.84, 14005.87, 14005.89, and the amendment to Section 14005.85 enacted during the first year of the 1997–98 Regular Session of the Legislature, on the employment of welfare recipients and the continuity of their health coverage.

(b) Notwithstanding any other provision of law, this section shall be implemented only if, and to the extent that, the department determines that federal financial participation, as provided under Title XIX of the federal Social Security Act (42 U.S.C. Sec. 1396 et seq.), is available.

SEC. 57. Section 14005.89 is added to the Welfare and Institutions Code, to read:

14005.89. (a) The department shall monitor participation rates for transitional Medi-Cal and seek input from beneficiaries, beneficiary representatives, and counties, on a regular basis throughout each year to consider changes in transitional Medi-Cal procedures as may be necessary to ensure that participation rates are at levels that would reasonably be expected, given aid caseload developments. Before any such changes are made, the department shall seek any federal waivers, or obtain other federal approval, that may be necessary to implement the changes.

(b) The department shall make the participation rate monitoring data described in subdivision (a) available upon request.

SEC. 58. Section 14011.4 is added to the Welfare and Institutions Code, to read:

14011.4. The department shall, subject to the requirements of federal law, and not later than six months after the effective date of this section, develop a simple referral form to be used as proof of birth, in order to initiate Medi-Cal enrollment and the establishment of benefits for newborns who are eligible for one year of automatic continuous Medi-Cal eligible benefits pursuant to Section 1902(e)(4) of the federal Social Security Act (42 U.S.C. Sec. 1396a(e)(4)). In developing the referral form, the department shall seek input from beneficiary representatives and health care providers serving pregnant women receiving, or eligible for, Medi-Cal benefits. The infant's parent or guardian, or, with the knowledge and written consent of the infant's parent or guardian, a health care provider or other hospital worker, may submit the referral form by mail or facsimile. Upon receipt of the form, the department shall, subject to

the requirements of federal law, assign a Medi-Cal number to the newborn and issue a Medi-Cal card.

SEC. 59. Section 14029 is added to the Welfare and Institutions Code, to read:

14029. Whenever a request for services authorized pursuant to subdivision (s), (t), or (v) of Section 14132 is made to the department for a child who is being case-managed by the California Children's Services program, any decision to transfer the child to the home setting shall be made only in consultation with the California Children's Services program case manager for the child.

SEC. 60. The Legislature finds and declares all of the following:

(a) It is estimated that a large number of children may meet the family income requirements for Medi-Cal, but are not enrolled in the program.

(b) Many families of uninsured children who are potentially eligible for Medi-Cal fail to successfully apply for the program because they are unaware their children may be eligible or because the application form and process are too complicated and difficult to complete.

(c) Under Public Law 104-193, eligibility for cash assistance under the Temporary Assistance for Needy Families (TANF) program may decline significantly in comparison to eligibility under the Aid to Families with Dependent Children (AFDC) program.

(d) Families who would have qualified for AFDC benefits under the eligibility requirements in effect on July 16, 1996, will be eligible for Medi-Cal benefits under Public Law 104-193.

(e) However, without adequate education and outreach about Medi-Cal, many of these families may fail to learn that they qualify and will not successfully apply for the program.

(f) Without health coverage, children are much more likely to go without crucial health care services.

(g) Almost 1.6 million children in California, or about one out of every five adolescents, lack health insurance.

(h) It is estimated that a significant number of these children may be eligible for Medi-Cal, but not enrolled.

SEC. 61. Section 14067 is added to the Welfare and Institutions Code, to read:

14067. (a) The department shall develop and conduct a community outreach and education campaign to help families learn about, and apply for, Medi-Cal, subject to the requirements of federal law. In conducting this campaign, the department may seek input from various entities and programs that serve children, including, but not limited to, the State Department of Education, counties, Women, Infants, and Children program agencies, Head Start and Healthy Start programs, and community-based organizations that deal with potentially eligible families and children.

(b) The outreach and education campaign shall be established and implemented no later than six months after the effective date of this section.

(c) In implementing this section, the department may amend any existing or future media outreach campaign contract that it has entered into pursuant to Section 14148.5. Notwithstanding any other provision of law, any such contract entered into, or amended, as required to implement this section, shall be exempt from the approval of the Director of General Services and from the provisions of the Public Contract Code.

SEC. 62. (a) It is the intent of the Legislature that the University of California work with the State Department of Health Services and the California Medical Assistance Commission to address future funding of graduate medical education in the State of California. It is further the intent of the Legislature that implementing legislation be enacted no later than June 30, 1999.

(b) The University of California, in coordination with the State Department of Health Services and the California Medical Assistance Commission, is requested to submit a progress report on efforts to develop future funding of graduate medical education to the Governor and the health policy and fiscal committees of each house of the Legislature by November 1, 1998.

SEC. 63. Section 14085.7 is added to the Welfare and Institutions Code, to read:

14085.7. (a) The Medi-Cal Medical Education Supplemental Payment Fund is hereby created in the State Treasury. Notwithstanding Section 13340 of the Government Code, the fund shall be continuously appropriated to, and under the administrative control of, the department for the purposes specified in this section. Except as otherwise limited by this section, the fund shall consist of all of the following:

(1) All public moneys transferred by public agencies to the department for deposit into the fund, as permitted under Section 433.51 of Title 42 of the Code of Federal Regulations or any other applicable federal medicaid laws.

(2) All private moneys donated by private individuals or entities to the department for deposit in the fund as permitted under applicable federal medicaid laws.

(3) Any amounts appropriated to the fund by the Legislature.

(4) Any interest that accrues on amounts in the fund.

(b) Any public agency transferring moneys to the fund may, for that purpose, utilize any revenues, grants, or allocations received from the state for health care programs or purposes, unless otherwise prohibited by law. A public agency may also utilize its general funds or any other public moneys or revenues for purposes of transfers to the fund, unless otherwise prohibited by law.

(c) The department shall have the discretion to accept or not accept moneys offered to the department for deposit in the fund. If the department accepts moneys pursuant to this section, the department shall obtain federal matching funds to the full extent permitted by law. The department shall accept only those funds that are certified by the transferring or donating entity as qualifying for federal financial participation under the terms of the Medicaid Voluntary Contribution and Provider-Specific Tax Amendments of 1991 (P.L. 102-234) or Section 433.51 of Title 42 of the Code of Federal Regulations, as applicable, and may return any funds transferred or donated in error.

(d) Moneys in the fund shall be used as the source for the nonfederal share of payments to hospitals under this section. Moneys shall be allocated from the fund by the department and matched by federal funds in accordance with customary Medi-Cal accounting procedures for purposes of payments under subdivision (e). Distributions from the fund shall be supplemental to any other amounts that hospitals receive under the contracting program.

(e) For purposes of recognizing medical education costs incurred for services rendered to Medi-Cal beneficiaries, payments from this fund shall be negotiated between the California Medical Assistance Commission and hospitals contracting under this article that meet the definition of university teaching hospitals or major (nonuniversity) teaching hospitals as set forth on page 51 and as listed on page 57 of the department's report dated May 1991, entitled "Hospital Peer Grouping." Payments from the fund shall be used solely for the purposes identified in the contract between the hospital and the state.

(f) The state shall be held harmless from any federal disallowance resulting from this section. A hospital receiving supplemental reimbursement pursuant to this section shall be liable for any reduced federal financial participation resulting from the implementation of this section with respect to that hospital. The state may recoup any federal disallowance from the hospital.

(g) This section shall become inoperative on June 30, 1999, and, as of January 1, 2000, is repealed, unless a later enacted statute, that becomes effective on or before January 1, 2000, deletes or extends the dates on which it becomes inoperative and is repealed.

SEC. 64. Section 14085.8 is added to the Welfare and Institutions Code, to read:

14085.8. (a) The Large Teaching Emphasis Hospital and Children's Hospital Medi-Cal Medical Education Supplemental Payment Fund is hereby created in the State Treasury.

(b) Notwithstanding Section 13340 of the Government Code, the fund shall be continuously appropriated to, and under the administrative control of, the department for the purposes specified in this section.

(c) Except as otherwise limited by this section, the fund shall consist of all of the following:

(1) All public moneys transferred by public agencies to the department for deposit into the fund, as permitted under Section 433.51 of Title 42 of the Code of Federal Regulations or any other applicable federal medicaid laws.

(2) All private moneys donated by private individuals or entities to the department for deposit in the fund as permitted under applicable federal medicaid laws.

(3) Any amounts appropriated to the fund by the Legislature.

(4) Any interest that accrues on amounts in the fund.

(d) Any public agency transferring moneys to the fund may, for that purpose, utilize any revenues, grants, or allocations received from the state for health care programs or purposes, unless otherwise prohibited by law. A public agency may also utilize its general funds or any other public moneys or revenues for purposes of transfers to the fund, unless otherwise prohibited by law.

(e) The department may accept or not accept moneys offered to the department for deposit in the fund. If the department accepts moneys pursuant to this section, the department shall obtain federal matching funds to the full extent permitted by law. The department shall accept only those funds that are certified by the transferring or donating entity as qualifying for federal financial participation under the terms of the Medicaid Voluntary Contribution and Provider-Specific Tax Amendments of 1991 (P.L. 102-234) or Section 433.51 of Title 42 of the Code of Federal Regulations, as applicable, and may return any funds transferred or donated in error.

(f) Moneys in the fund shall be used as the source for the nonfederal share of payments to hospitals under this section. Moneys shall be allocated from the fund by the department and matched by federal funds in accordance with customary Medi-Cal accounting procedures for purposes of payments under subdivision (g). Distributions from the fund shall be supplemental to any other amounts that hospitals receive under the contracting program.

(g) (1) For purposes of recognizing medical education costs incurred for services rendered to Medi-Cal beneficiaries, contracts for payments from the fund may, at the discretion of the California Medical Assistance Commission, be negotiated between the commission and hospitals contracting under this article that are defined as either of the following:

(A) A large teaching emphasis hospital, as set forth on page 51 and listed on page 57 of the department's report dated May 1991, entitled "Hospital Peer Grouping," and meets the definition of eligible hospital as defined in paragraph (3) of subdivision (a) of Section 14105.98.

(B) A children's hospital pursuant to Section 10727 and meets the definition of eligible hospital as defined in paragraph (3) of subdivision (a) of Section 14105.98.

(2) Payments from the fund shall be used solely for the purposes identified in the contract between the hospital and the state.

(h) The state shall be held harmless from any federal disallowance resulting from this section. A hospital receiving supplemental reimbursement pursuant to this section shall be liable for any reduced federal financial participation resulting from the implementation of this section with respect to that hospital. The state may recoup any federal disallowance from the hospital.

(i) This section shall become inoperative on June 30, 1999, and, as of January 1, 2000, is repealed, unless a later enacted statute, that becomes effective on or before January 1, 2000, deletes or extends the dates on which it becomes inoperative and is repealed.

SEC. 65. Section 14093.07 is added to the Welfare and Institutions Code, to read:

14093.07. For purposes of this article the following definitions apply:

(a) "Foster child" means any child who has been taken into custody or placed by a juvenile court pursuant to Article 6 (commencing with Section 300) of Chapter 2 of Part 1 of Division 2 or Section 601 or 602.

(b) "Medi-Cal managed care plan" means any person or entity that has entered into a contract with the director pursuant to Article 2.7 (commencing with Section 14087.3), Article 2.9 (commencing with Section 14088), or Article 2.91 (commencing with Section 14089) of this chapter or pursuant to Article 1 (commencing with Section 14200) of Chapter 8.

(c) "Out-of-county placement" means any foster care placement in which the child has been placed outside of the county with the responsibility for the care and placement of the child.

SEC. 66. Section 14093.09 is added to the Welfare and Institutions Code, to read:

14093.09. (a) No child in foster care shall be required to enroll in a Medi-Cal managed care plan. A foster child may be voluntarily enrolled in a Medi-Cal managed care plan only when the county child welfare agency with responsibility for the care and placement of the child, in consultation with the child's foster caregiver, determines that it is in the best interest of the child to do so and the department determines that enrollment is available to the child.

(b) Whenever a foster child is placed in an out-of-county placement, the county child welfare agency with responsibility for the care and placement of the child shall determine, in consultation with the child's foster caregiver, if the child should remain in, or has enrolled in, a Medi-Cal managed care plan in the county where the child will be placed or in the county with responsibility for the care

and placement of the child, as long as the department determines that enrollment is available for the child.

(c) The State Department of Health Services shall establish for Medi-Cal managed care plans urgent disenrollment procedures that provide for disenrollment of foster children in out-of-county placements within two working days of receipt by the department's enrollment contractor, or the department, if the department has no enrollment contractor, of a request for disenrollment made by the child welfare services agency, the foster caregiver, or other person authorized to make medical decisions on behalf of the foster child.

(d) Medi-Cal managed care plans shall process and pay appropriately documented claims submitted by out-of-plan providers for services provided to foster children in out-of-county placements while they are Medi-Cal members of the plan. This section shall not be construed to prevent a plan from requiring prior authorization for nonemergency services consistent with the plan's established policies and procedures.

SEC. 67. Section 14094.3 of the Welfare and Institutions Code is amended to read:

14094.3. (a) Notwithstanding this article or Section 14093.05 or 14094.1, CCS covered services shall not be incorporated into any Medi-Cal managed care contract entered into after August 1, 1994, pursuant to Article 2.7 (commencing with Section 14087.3), Article 2.8 (commencing with Section 14087.5), Article 2.9 (commencing with Section 14088), Article 2.91 (commencing with Section 14089), Article 2.95 (commencing with Section 14092); or either Article 2 (commencing with Section 14200), or Article 7 (commencing with Section 14490) of Chapter 8, until August 1, 2000, except for contracts entered into for county organized health systems in the Counties of San Mateo, Santa Barbara, Solano and Napa.

(b) Notwithstanding any other provision of this chapter, providers serving children under the CCS program who are enrolled with a Medi-Cal managed care contractor but who are not enrolled in a pilot project pursuant to subdivision (c) shall continue to submit billing for CCS covered services on a fee-for-service basis until CCS covered services are incorporated into the Medi-Cal managed care contracts described in subdivision (a).

(c) (1) The department may authorize a pilot project in Solano County in which reimbursement for conditions eligible under the CCS program may be reimbursed on a capitated basis pursuant to Section 14093.05, and provided all CCS program's guidelines, standards, and regulations are adhered to, and CCS program's case management is utilized.

(2) During the time period described in subdivision (a), the department may approve, implement, and evaluate limited pilot projects under the CCS program to test alternative managed care models tailored to the special health care needs of children under the

CCS program. The pilot projects may include, but need not be limited to, coverage of different geographic areas, focusing on certain subpopulations, and the employment of different payment and incentive models. Pilot project proposals from CCS program-approved providers shall be given preference. All pilot projects shall utilize CCS program-approved standards and providers pursuant to Section 14094.1.

(d) (1) The department shall submit to the appropriate committees of the Legislature an evaluation of pilot projects established pursuant to subdivision (c) based on at least one full year of operation.

(2) The evaluation required by paragraph (1) shall address the impact of the pilot projects on outcomes as set forth in paragraph (4) and, in addition, shall do both of the following:

(A) Examine the barriers, if any, to incorporating CCS covered services into the Medi-Cal managed care contracts described in subdivision (a).

(B) Compare different pilot project models with the fee-for-service system. The evaluation shall identify, to the extent possible, those factors that make pilot projects most effective in meeting the special needs of children with CCS eligible conditions.

(3) CCS covered services shall not be incorporated into the Medi-Cal managed care contracts described in subdivision (a) before the evaluation process has been completed.

(4) The pilot projects shall be evaluated to determine if:

(A) All children enrolled with a Medi-Cal managed care contractor described in subdivision (a) identified as having a CCS eligible condition are referred in a timely fashion for appropriate health care.

(B) All children in the CCS program have access to coordinated care that includes primary care services in their own community.

(C) CCS program standards are adhered to.

(e) For purposes of this section, CCS covered services include all program benefits administered by the program specified in Section 123840 of the Health and Safety Code regardless of the funding source.

(f) Nothing in this section shall be construed to exclude or restrict CCS eligible children from enrollment with a managed care contractor or from receiving from the managed care contractor with which they are enrolled primary and other health care unrelated to the treatment of the CCS eligible condition.

SEC. 68. Section 14105.31 of the Welfare and Institutions Code is amended to read:

14105.31. For purposes of the Medi-Cal contract drug list, the following definitions shall apply:

(a) "Single-source drug" means a drug that is produced and distributed under an original New Drug Application approved by the

federal Food and Drug Administration. This shall include a drug marketed by the innovator manufacturer and any cross-licensed producers or distributors operating under the New Drug Application, and shall also include a biological product, except for vaccines, marketed by the innovator manufacturer and any cross-licensed producers or distributors licensed by the federal Food and Drug Administration pursuant to Section 262 of Title 42 of the United States Code. A drug ceases to be a single-source drug when the same drug in the same dosage form and strength manufactured by another manufacturer is approved by the federal Food and Drug Administration under the provisions for an Abbreviated New Drug Application.

(b) "Best price" means the negotiated price, or the manufacturer's lowest price available to any class of trade organization or entity, including, but not limited to, wholesalers, retailers, hospitals, repackagers, providers, or governmental entities within the United States, that contracts with a manufacturer for a specified price for drugs, inclusive of cash discounts, free goods, volume discounts, rebates, and on- or off-invoice discounts or credits, shall be based upon the manufacturer's commonly used retail package sizes for the drug sold by wholesalers to retail pharmacies.

(c) "Equalization payment amount" means the amount negotiated between the manufacturer and the department for reimbursement by the manufacturer, as specified in the contract. The equalization payment amount shall be based on the difference between the manufacturer's direct catalog price charged to wholesalers and the manufacturer's best price, as defined in subdivision (b).

(d) "Manufacturer" means any person, partnership, corporation, or other institution or entity that is engaged in the production, preparation, propagation, compounding, conversion, or processing of drugs, either directly or indirectly by extraction from substances of natural origin, or independently by means of chemical synthesis, or by a combination of extraction and chemical synthesis, or in the packaging, repackaging, labeling, relabeling, and distribution of drugs.

(e) "Price escalator" means a mutually agreed upon price specified in the contract, to cover anticipated cost increases over the life of the contract.

(f) "Medi-Cal pharmacy costs" or "Medi-Cal drug costs" means all reimbursements to pharmacy providers for services or merchandise, including single-source or multiple-source prescription drugs, over-the-counter medications, and medical supplies, or any other costs billed by pharmacy providers under the Medi-Cal program.

(g) "Medicaid rebate" means the rebate payment made by drug manufacturers pursuant to Section 1927 of the federal Social Security Act (42 U.S.C. Sec. 1396r-8).

(h) "State rebate" means any negotiated rebate under the Drug Discount Program in addition to the medicaid rebate.

(i) "Date of mailing" means the date that is evidenced by the postmark date by the United States Postal Service or other common mail carrier on the envelope.

(j) This section shall remain in effect only until January 1, 1999, and as of that date is repealed, unless a later enacted statute, which is enacted before January 1, 1999, deletes or extends that date.

SEC. 69. Section 14105.33 of the Welfare and Institutions Code is amended to read:

14105.33. (a) The department may enter into contracts with manufacturers of single-source and multiple-source drugs, on a bid or nonbid basis, for drugs from each major therapeutic category, and shall maintain a list of those drugs for which contracts have been executed.

(b) (1) Contracts executed pursuant to this section shall be for the manufacturer's best price, as defined in Section 14105.31, which shall be specified in the contract, and subject to agreed upon price escalators, as defined in that section. The contracts shall provide for an equalization payment amount, as defined in Section 14105.31, to be remitted to the department quarterly. The department shall submit an invoice to each manufacturer for the equalization payment amount, including supporting utilization data from the department's prescription drug paid claims tapes within 30 days of receipt of the Health Care Financing Administration's file of manufacturer rebate information. In lieu of paying the entire invoiced amount, a manufacturer may contest the invoiced amount pursuant to procedures established by the federal Health Care Financing Administration's Medicaid Drug Rebate Program Releases or regulations by mailing a notice, that shall set forth its grounds for contesting the invoiced amount, to the department within 38 days of the department's mailing of the state invoice and supporting utilization data. For purposes of state accounting practices only, the contested balance shall not be considered an accounts receivable amount until final resolution of the dispute pursuant to procedures established by the federal Health Care Financing Administration's Medicaid Drug Rebate Program Releases or regulations that results in a finding of an underpayment by the manufacturer. Manufacturers may request, and the department shall timely provide, at cost, Medi-Cal provider level drug utilization data, and other Medi-Cal utilization data necessary to resolve a contested department-invoiced rebate amount.

(2) The department shall provide for an annual audit of utilization data used to calculate the equalization amount to verify the accuracy of that data. The findings of the audit shall be documented in a written audit report to be made available to manufacturers within 90 days of receipt of the report from the auditor. Any manufacturer may

receive a copy of the audit report upon written request. Contracts between the department and manufacturers shall provide for any equalization payment adjustments determined necessary pursuant to an audit.

(3) Utilization data used to determine an equalization payment amount shall exclude data from both of the following:

(A) Health maintenance organizations, as defined in Section 300e(a) of Title 42 of the United States Code, including those organizations that contract under Section 1396b(m) of Title 42 of the United States Code.

(B) Capitated plans that include a prescription drug benefit in the capitated rate, and that have negotiated contracts for rebates or discounts with manufacturers.

(c) In order that Medi-Cal beneficiaries may have access to a comprehensive range of therapeutic agents, the department shall ensure that there is representation on the list of contract drugs in all major therapeutic categories. Except as provided in subdivision (a) of Section 14105.35, the department shall not be required to contract with all manufacturers who negotiate for a contract in a particular category. The department shall ensure that there is sufficient representation of single-source and multiple-source drugs, as appropriate, in each major therapeutic category.

(d) (1) The department shall select the therapeutic categories to be included on the list of contract drugs, and the order in which it seeks contracts for those categories. The department may establish different contracting schedules for single-source and multiple-source drugs within a given therapeutic category.

(2) The department shall make every attempt to complete the initial contracting process for each major therapeutic category by January 1, 1999.

(e) (1) In order to fully implement subdivision (d), the department shall, to the extent necessary, negotiate or renegotiate contracts to ensure there are as many single-source drugs within each therapeutic category or subcategory as the department determines necessary to meet the health needs of the Medi-Cal population. The department may determine in selected therapeutic categories or subcategories that no single-source drugs are necessary because there are currently sufficient multiple-source drugs in the therapeutic category or subcategory on the list of contract drugs to meet the health needs of the Medi-Cal population. However, in no event shall a beneficiary be denied continued use of a drug which is part of a prescribed therapy in effect as of September 2, 1992, until the prescribed therapy is no longer prescribed.

(2) In the development of decisions by the department on the required number of single-source drugs in a therapeutic category or subcategory, and the relative therapeutic merits of each drug in a therapeutic category or subcategory, the department shall consult

with the Medi-Cal Contract Drug Advisory Committee. The committee members shall communicate their comments and recommendations to the department within 30 business days of a request for consultation, and shall disclose any associations with pharmaceutical manufacturers or any remuneration from pharmaceutical manufacturers.

(3) In order to expedite implementation of paragraph (1), the requirements of Sections 14105.37, 14105.38, subdivisions (a), (c), (e), and (f) of Sections 14105.39, 14105.4, and 14105.405 are waived for the purposes of this section until January 1, 1994.

(f) In order to achieve maximum cost savings, the Legislature declares that an expedited process for contracts under this section is necessary. Therefore, contracts entered into on a nonbid basis shall be exempt from Chapter 2 (commencing with Section 10290) of Part 2 of Division 2 of the Public Contract Code.

(g) In no event shall a beneficiary be denied continued use of a drug that is part of a prescribed therapy in effect as of September 2, 1992, until the prescribed therapy is no longer prescribed.

(h) Contracts executed pursuant to this section shall be confidential and shall be exempt from disclosure under the California Public Records Act (Chapter 3.5 (commencing with Section 6250) of Division 7 of Title 1 of the Government Code).

(i) The department shall provide individual notice to Medi-Cal beneficiaries at least 60 calendar days prior to the effective date of the deletion or suspension of any drug from the list of contract drugs. The notice shall include a description of the beneficiary's right to a fair hearing and shall encourage the beneficiary to consult a physician to determine if an appropriate substitute medication is available from Medi-Cal.

(j) In carrying out the provisions of this section, the department may contract either directly, or through the fiscal intermediary, for pharmacy consultant staff necessary to initially accomplish the treatment authorization request reviews.

(k) (1) Manufacturers shall calculate and pay interest on late or unpaid rebates. The interest shall not apply to any prior period adjustments of unit rebate amounts or department utilization adjustments.

(2) For state rebate payments, manufacturers shall calculate and pay interest on late or unpaid rebates for quarters that begin on or after the effective date of the act that added this subdivision.

(3) Following final resolution of any dispute pursuant to procedures established by the federal Health Care Financing Administration's Medicaid Drug Rebate Program Releases or regulations regarding the amount of a rebate, any underpayment by a manufacturer shall be paid with interest calculated pursuant to subdivisions (m) and (n), and any overpayment, together with

interest at the rate calculated pursuant to subdivisions (m) and (n), shall be credited by the department against future rebates due.

(*l*) Interest pursuant to subdivision (k) shall begin accruing 38 calendar days from the date of mailing of the invoice, including supporting utilization data sent to the manufacturer. Interest shall continue to accrue until the date of mailing of the manufacturer's payment.

(m) Except as specified in subdivision (n), interest rates and calculations pursuant to subdivision (k) for medicaid rebates and state rebates shall be identical and shall be determined by the federal Health Care Financing Administration's Medicaid Drug Rebate Program Releases or regulations.

(n) If the date of mailing of a state rebate payment is 69 days or more from the date of mailing of the invoice, including supporting utilization data sent to the manufacturer, the interest rate and calculations pursuant to subdivision (k) shall be as specified in subdivision (m), however the interest rate shall be increased by 10 percentage points. This subdivision shall apply to payments for amounts invoiced for any quarters that begin on or after the effective date of the act that added this subdivision.

(o) If the rebate payment is not received, the department shall send overdue notices to the manufacturer at 38, 68, and 98 days after the date of mailing of the invoice, and supporting utilization data. If the department has not received a rebate payment, including interest, within 180 days of the date of mailing of the invoice, including supporting utilization data, the manufacturer's contract with the department shall be deemed to be in default and the contract may be terminated in accordance with the terms of the contract. For all other manufacturers, if the department has not received a rebate payment, including interest, within 180 days of the date of mailing of the invoice, including supporting utilization data, all of the drug products of those manufacturers shall be made available only through prior authorization effective 270 days after the date of mailing of the invoice, including utilization data sent to manufacturers.

(p) If the manufacturer provides payment or evidence of payment to the department at least 40 days prior to the proposed date the drug is to be made available only through prior authorization pursuant to subdivision (o), the department shall terminate its actions to place the manufacturers' drug products on prior authorization.

(q) The department shall direct the state's fiscal intermediary to remove prior authorization requirements imposed pursuant to subdivision (o) and notify providers within 60 days after payment by the manufacturer of the rebate, including interest. If a contract was in place at the time the manufacturers' drugs were placed on prior authorization, removal of prior authorization requirements shall be

contingent upon good faith negotiations and a signed contract with the department.

(r) A beneficiary may obtain drugs placed on prior authorization pursuant to subdivision (o) if the beneficiary qualifies for continuing care status. To be eligible for continuing care status, a beneficiary must be taking the drug when its manufacturer is placed on prior authorization status. Additionally, the department shall have received a claim for the drug with a date of service that is within 100 days prior to the date the manufacturer was placed on prior authorization.

(s) A beneficiary may remain eligible for continuing care status, provided that a claim is submitted for the drug in question at least every 100 days and the date of service of the claim is within 100 days of the date of service of the last claim submitted for the same drug.

(t) Drugs covered pursuant to Sections 14105.43 and 14133.2 shall not be subject to prior authorization pursuant to subdivision (o), and any other drug may be exempted from prior authorization by the department if the director determines that an essential need exists for that drug, and there are no other drugs currently available without prior authorization that meet that need.

(u) It is the intent of the Legislature in enacting subdivisions (k) to (t), inclusive, that the department and manufacturers shall cooperate and make every effort to resolve rebate payment disputes within 90 days of notification by the manufacturer to the department of a dispute in the calculation of rebate payments.

(v) This section shall remain in effect only until January 1, 1999, and as of that date is repealed, unless a later enacted statute, which is enacted before January 1, 1999, deletes or extends that date.

SEC. 70. Section 14109.6 is added to the Welfare and Institutions Code, to read:

14109.6. Notwithstanding Section 14109, effective September 1, 1997, and pursuant to Section 1396a(n) of Title 42 of the United States Code, as amended by Section 4714 of the federal Balanced Budget Act of 1997, the reimbursement rate for costs specified in Section 14109 for all services, including, but not limited to, hospital inpatient services, shall, to the extent feasible, not exceed the reimbursement rate for similar services established under this chapter. Effective for dates of service on or after September 1, 1997, the reimbursement rates established under this chapter for hospital inpatient services shall be no greater than the amounts paid by the Medicare program for similar services. Notwithstanding the provisions of this section, Section 14109.5 shall remain in effect for dates of service prior to September 1, 1997. It is the intent of the Legislature that regulations and the amendments to the medicaid state plan previously adopted pursuant to Section 14109.5 shall remain in effect for purposes of this section until amended or otherwise modified by the department.

SEC. 71. Section 14132.22 of the Welfare and Institutions Code is amended to read:

14132.22. (a) (1) Transitional inpatient care services, as described in this section and provided by a qualified health facility, is a covered benefit under this chapter, subject to utilization controls and subject to the availability of federal financial participation. These services shall be available to individuals needing short-term medically complex or intensive rehabilitative services, or both.

(2) The department shall seek any necessary approvals from the federal Health Care Financing Administration to ensure that transitional inpatient care services, when provided by a general acute care hospital, will be considered for purposes of determining whether a hospital is deemed to be a disproportionate share hospital pursuant to Section 1396r-4(b) of Title 42 of the United States Code or any successor statute.

(3) Transitional inpatient care services shall be available to Medi-Cal beneficiaries who do not meet the criteria for eligibility for the subacute program provided for pursuant to Section 14132.25, but who need more medically complex and intensive rehabilitative services than are generally available in a skilled nursing facility, and who are clinically stable and no longer need the level of diagnostic and ancillary services provided generally in an acute care facility.

(b) For purposes of this section, "transitional inpatient care" means the level of care needed by an individual who has suffered an illness, injury, or exacerbation of a disease, and whose medical condition has clinically stabilized so that daily physician services and the immediate availability of technically complex diagnostic and invasive procedures usually available only in the acute care hospital are not medically necessary, and when the physician assuming the responsibility of treatment management of the patient in transitional care has developed a definitive and time-limited course of treatment. The individual's care needs may be medical, rehabilitative, or both. However, the individual shall fall within one of the two following patient groups:

(1) "Transitional medical patient," which means a medically stable patient with short-term transitional care needs, whose primary barrier to discharge to a residential setting is medical status rather than functional status. These patients may require simple rehabilitation therapy, but not a rehabilitation program appropriate for multiple interrelated areas of functional disability.

(2) "Transitional rehabilitation patient," which means a medically stable patient with short-term transitional care needs, whose primary barrier to discharge to a residential setting is functional status, rather than medical status, and who has the capacity to benefit from a rehabilitation program as determined by a physiatrist or physician otherwise skilled in rehabilitation medicine. These patients may have unresolved medical problems, but these problems must be

sufficiently controlled to allow participation in the rehabilitation program.

(c) In implementing the transitional inpatient care program the department shall consider the differences between the two patient groups described in paragraphs (1) and (2) of subdivision (b) and shall assure that each group's specific health care needs are met.

(d) Transitional inpatient care services shall be made available only to qualifying Medi-Cal beneficiaries who are 18 years of age or older.

(e) Transitional inpatient care services shall not be available to patients in acute care hospitals defined as small and rural pursuant to Section 124840 of the Health and Safety Code.

(f) (1) Transitional inpatient care services may be provided by general acute care hospitals that are licensed pursuant to Chapter 2 (commencing with Section 1250) of Division 2 of the Health and Safety Code. General acute care hospitals may provide transitional inpatient care services in the acute care hospital, an acute rehabilitation center, or the distinct part skilled nursing unit of the acute care hospital. Licensed skilled nursing facilities, as defined in subdivision (c) of Section 1250 of the Health and Safety Code that are certified to participate as a nursing facility in the Medicare and medicaid programs, pursuant to Titles XVIII and XIX of the federal Social Security Act, and licensed congregate living health facilities, as defined in Section 1265.7 of the Health and Safety Code, that are certified to participate as a nursing facility in the Medicare and medicaid programs pursuant to Titles XVIII and XIX of the federal Social Security Act, may also provide the services described in subdivision (b).

(2) Costs of providing transitional inpatient care services in nonsegregated parts of the distinct part skilled nursing unit of the acute care hospital shall be determinable, in the absence of distinct and separate cost centers established for this purpose. Costs of providing transitional inpatient care services in nondistinct parts of the acute care hospital shall be determinable, in the absence of distinct and separate cost centers established for this purpose. A separate and distinct cost center shall be maintained or established for each unit in freestanding certified nursing facilities in which the services described in subdivision (b) are provided, in order to identify and segregate costs for transitional inpatient care patients from costs for other patients who may be served within the parent facility.

(g) In order to participate as a provider in the transitional inpatient care program, a facility shall meet all applicable standards necessary for participation in the Medi-Cal program and all of the following:

(1) If the health facility is a freestanding certified nursing facility, it shall be located in close proximity to a general acute care hospital

with which the facility has a transfer agreement in order to support the capability to respond to medical emergencies.

(2) The health facility shall demonstrate, to the department, competency in providing high quality care to all patients for whom the facility provides care, experience in providing high quality care to the types of transitional inpatient care patients the facility proposes to serve, and the ability to provide transitional inpatient care to patients pursuant to this chapter.

(3) The health facility shall enter into a provider agreement with the department for the provision of transitional inpatient care. The provider agreement shall specify whether the facility is authorized to serve transitional medical patients or transitional rehabilitation patients or both, depending on the facility's demonstrated ability to meet standards specific to each patient group. Continuation of the provider agreement shall be contingent upon the facility's continued compliance with all the applicable requirements of this section and any other applicable laws or regulations.

(h) In determining a facility's qualifications for initial participation, an onsite review shall be conducted by the department. Subsequent review shall be conducted onsite as necessary, but not less frequently than annually. Initial and subsequent reviews shall be conducted by appropriate department personnel, which shall include a registered nurse and other health professionals where appropriate. The department shall develop written protocols for reviews.

(i) Transitional inpatient care services shall be available to patients receiving care in an acute care hospital. Under specified circumstances, as set forth in regulations, transitional inpatient care shall be available to patients transferring directly from a nursing facility level of care, a physician's office, a clinic, or from the emergency room of a general acute care hospital, provided they have received a comprehensive medical assessment conducted by a physician, and the physician determines, and documents in the medical record, that the patient has been clinically stable for the 24 hours preceding admission to the transitional inpatient care program.

(j) A health facility providing transitional inpatient care shall accept and retain only those patients for whom it can provide adequate, safe, therapeutic, and effective care, and as identified in its application for participation as a transitional inpatient care provider. The facility's determination to accept a patient into the transitional inpatient care unit shall be based on its preadmission screening process conducted by appropriate facility personnel.

(k) The department shall establish a process for providing timely, concurrent authorization and coordination, as required, of all medically necessary services for transitional inpatient care.

(*l*) The department shall adopt regulations specifying admission criteria and an admission process appropriate to each of the transitional inpatient care patient groups specified in subdivision (b). Patient admission criteria to transitional inpatient care shall include, but not be limited to, the following:

(1) Prior to admission to transitional inpatient care, the patient shall be determined to have been clinically stable for the preceding 24 hours by the attending physician and the physician assuming the responsibility of treatment management of the patient in the transitional inpatient care program.

(2) The patient shall be admitted to transitional inpatient care on the order of the physician assuming the responsibility of the management of the patient, with an established diagnosis, and an explicit time-limited course of treatment of sufficient detail to allow the facility to initiate appropriate assessments and services. No patient shall be transferred from an acute care hospital to a transitional inpatient care program that is in a freestanding certified nursing facility if the patient's attending physician documents in the medical record that the transfer would cause physical or psychological harm to the patient.

(3) (A) Medical necessity for transitional care shall include, but not be limited to, one or more of the following:

(i) Intravenous therapy.

(ii) Rehabilitative services.

(iii) Wound care.

(iv) Respiratory therapy.

(v) Traction.

(B) The department shall develop regulations further defining the services to be provided pursuant to clauses (i) to (v), inclusive, and the circumstances under which these services shall be provided.

(m) Registered nurses shall be assigned to the transitional inpatient care unit at all times and in sufficient numbers to allow for the ongoing patient assessment, patient care, and supervision of licensed and unlicensed staff. Participating facilities shall assure that staffing is adequate in number and skill mix, at all times, to address reasonably anticipated admissions, discharges, transfers, patient emergencies, and temporary absences of staff from the transitional care unit including, but not limited to, absences to attend meetings or inservice training. All licensed and certified health care personnel shall hold valid, current licensure or certification.

(n) Continued medical assessments shall be of sufficient frequency as to adequately review, evaluate, and alter plans of care as needed in response to patients' medical progress.

(o) The department shall develop a rate of reimbursement for transitional inpatient care services for providers as specified in subdivision (f). Reimbursement rates shall be specified in regulation

and in accordance with methodologies developed by the department and may include the following:

(1) All inclusive per diem rates.

(2) Individual patient specific rates according to the needs of the individual transitional care patient.

(3) Other rates subject to negotiation with the health facility.

(p) Reimbursement at transitional inpatient care rates shall only be implemented when funds are available for this purpose pursuant to the annual Budget Act. Funds expended to implement this section shall be used by providers to assure safe, therapeutic and effective patient care by staffing at levels which meet patients' needs, and to ensure that these providers have the needed resources and staff to provide quality care to transitional inpatient care patients.

(q) (1) The department shall reimburse physicians for all medically necessary care provided to transitional inpatient care patients and shall establish Medi-Cal physician reimbursement rates commensurate with those for visits to nontransitional acute care patients in acute care hospitals.

(2) It is the intent of this subdivision to cover physician costs not included in the per diem rate.

(r) No later than January 1, 1999, the department shall evaluate, and make recommendations regarding, the effectiveness and safety of the transitional inpatient care program. The evaluation shall be developed in consultation with representatives of providers, facility employees, and consumers. The department may contract for all or a portion of the evaluation. The evaluation shall be for the purpose of determining the impact of the transitional inpatient care program on patient care, including functional outcomes, if applicable, on whether the care costs less than other alternatives, and whether it results in the deterioration of patient health and safety as compared to other placements. The evaluation shall also be for the purpose of determining the effect on patients other than those receiving transitional inpatient care in participating facilities. The evaluation shall include:

(1) Data on patient mortality, patients served, length of stay, and subsequent placement or discharge.

(2) Data on readmission to acute care and emergency room transfers.

(3) Staffing standards in the facilities.

(4) Other outcome measures and indicia of patient health and safety otherwise required to be reported by federal or state law.

(s) The department shall develop regulations to amend Sections 51540 to 51556, inclusive, of Title 22 of the California Code of Regulations, to exclude the cost of transitional inpatient care services rendered in general acute care hospitals from the hospital's inpatient services reimbursement.

(t) The department may adopt emergency regulations as necessary to implement this section in accordance with the Administrative Procedure Act (Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code). The initial adoption of emergency regulations shall be deemed to be an emergency and considered by the Office of Administrative Law as necessary for the immediate preservation of public peace, health and safety, or general welfare. Emergency regulations adopted pursuant to this section shall remain in effect for no more than 180 days. If the department adopts emergency regulations to implement this section, the department shall obtain input from interested parties to address the unique needs of medically complex and intensive rehabilitative patients qualifying for transitional inpatient care. Notwithstanding the requirements of this section, the department shall, if it adopts emergency regulations to implement this section, address the following major subject areas:

(1) Patient selection and assessment criteria, including but not limited to, preadmission screening, patient assessments, physician services, and interdisciplinary teams.

(2) Facility participation criteria and agreements, including but not limited to, facility licensing and certification history, demonstration to the department of a preexisting history in providing care to medically complex or intensive rehabilitative patients, data reporting requirements, demonstration of continued ability to provide high quality of care to all patients, nurse staffing requirements, ancillary services, and staffing requirements.

(u) This section shall remain in effect only until January 1, 2000, and as of that date is repealed, unless a later enacted statute, that is enacted on or before January 1, 2000, deletes or extends that date.

SEC. 72. Section 14133.14 is added to the Welfare and Institutions Code, to read:

14133.14. The criteria that the department shall use to identify providers to be placed on prior authorization for noninvasive testing procedures shall include, but not be limited to, Medi-Cal trend analysis, provider profiling data, provider and beneficiary history data, or appropriateness of the services as related to diagnosis, volume of services, utilization patterns, and specialty of provider. The existing prior authorization appeals process shall be available to these providers for denial of services.

SEC. 73. Section 14138.5 is added to the Welfare and Institutions Code, immediately preceding Section 14139, to read:

14138.5. The State Department of Health Services shall report to the Legislature, by January 1, 1998, for the 1996–97 fiscal year and by January 1, 1999, for the period from October 1, 1997, to October 1, 1998, on all of the following data with respect to the child health and disability prevention program provided for pursuant to Article 6

(commencing with Section 124025) of Chapter 3 of Part 2 of Division 106 of the Health and Safety Code:

(a) The number of children, by age and by county, enrolled in each plan contracting with the department or with the California Medical Assistance Commission.

(b) The improved reporting capabilities of the new contract for the Management Information System/Decision Support System (MIS/DSS), with specific emphasis on how it can be used to gather data from the PM 160 forms that are useful for analytical purposes.

(c) Information on what actions are being taken to ensure compliance with Child Health and Disability Prevention Program examination requirements.

(d) The statewide percentage of all children enrolled in managed care plans, by age, who received a comprehensive Child Health and Disability Prevention Program examination, and the percentage of all children enrolled who received a comprehensive Child Health and Disability Prevention Program examination, by county and by plan.

(e) The number of children in each plan, by age, who are current on periodicity health assessments, with appropriate documentation. If the capability to report this information does not exist, a timeline of when the information will be available and the barriers that exist to reporting the information.

(f) The number of children in each plan, by county and by age, who were referred for followup diagnosis or treatment following a Child Health and Disability Prevention Program comprehensive examination.

(g) The number of children in each plan, by county and by age, who received needed diagnosis and treatment as a result of a Child Health and Disability Prevention Program examination. If the capability to report this information does not exist, a timeline of when it will be available and the barriers that exist to reporting this information.

SEC. 74. Section 14148.99 of the Welfare and Institutions Code is repealed.

SEC. 75. Section 14154.15 of the Welfare and Institutions Code is amended to read:

14154.15. (a) Any county may petition the department for an augmentation of its County Administrative Cost Control Plan in order to implement a plan, as provided for in Section 1105 of the federal Social Security Act (42 U.S.C. Sec. 1305), for the outstationing of one or more eligibility workers at all types of outstation locations, as defined in Section 435.904(c)(3) of Title 42 of the Code of Federal Regulations in order to facilitate receipt and processing of applications for Medi-Cal eligibility for pregnant women, infants and children as specified by Title XIX of the Social Security Act (42 U.S.C. Sec. 1396 and following). In order to participate pursuant to this

section, a county welfare department shall petition under this section in accordance with guidelines established by the department. The petition shall include, but not be limited to, information about the need for outstation workers at alternative sites and the language skills needed by the outstation workers.

(b) In reviewing a petition from a county for an augmentation of its County Administrative Cost Control Plan for outstationing purposes, the department shall take into account the likely success rate of applications processed by the proposed outstationed eligibility workers, the amount of travel and training time required to implement and continue the outstationing plan, and other productivity factors associated with the outstationing plan.

(c) The department may approve those proposed augmentations which, based on its review of the outstationing plan, offer potential to increase eligibility determinations and access to Medi-Cal perinatal services by pregnant women and Medi-Cal services by infants and children specified by Title XIX of the Social Security Act (42 U.S.C., Sec. 1396 and following). The department shall review the approved plan annually to determine if the plan shall be renewed, altered, discontinued, or incorporated into the county administrative funding base.

(d) In addition to any augmentations authorized by this section, the department may, at its discretion, advance administrative funding to a county welfare department for which it approves an augmentation of its County Administrative Cost Control Plan, to cover the initial incremental costs of outstationed eligibility workers under this section.

(e) The department shall conduct a one-time outreach plan to educate county welfare directors, county health officers, and county elected officials on the opportunities and advantages of outstationing Medi-Cal eligibility workers to facilitate access by pregnant women to Medi-Cal perinatal services and Medi-Cal eligibility for infants and children.

SEC. 76. Section 14163 of the Welfare and Institutions Code is amended to read:

14163. (a) For purposes of this section, the following definitions shall apply:

(1) "Public entity" means a county, a city, a city and county, the University of California, a local hospital district, a local health authority, or any other political subdivision of the state.

(2) "Hospital" means a health facility that is licensed pursuant to Chapter 2 (commencing with Section 1250) of Division 2 of the Health and Safety Code to provide acute inpatient hospital services, and includes all components of the facility.

(3) "Disproportionate share hospital" means a hospital providing acute inpatient services to Medi-Cal beneficiaries that meets the

criteria for disproportionate share status relating to acute inpatient services set forth in Section 14105.98.

(4) "Disproportionate share list" means the annual list of disproportionate share hospitals for acute inpatient services issued by the department pursuant to Section 14105.98.

(5) "Fund" means the Medi-Cal Inpatient Payment Adjustment Fund.

(6) "Eligible hospital" means, for a particular state fiscal year, a hospital on the disproportionate share list that is eligible to receive payment adjustment amounts under Section 14105.98 with respect to that state fiscal year.

(7) "Transfer year" means the particular state fiscal year during which, or with respect to which, public entities are required by this section to make an intergovernmental transfer of funds to the Controller.

(8) "Transferor entity" means a public entity that, with respect to a particular transfer year, is required by this section to make an intergovernmental transfer of funds to the Controller.

(9) "Transfer amount" means an amount of intergovernmental transfer of funds that this section requires for a particular transferor entity with respect to a particular transfer year.

(10) "Intergovernmental transfer" means a transfer of funds from a public entity to the state, that is local government financial participation in Medi-Cal pursuant to the terms of this section.

(11) "Licensee" means an entity that has been issued a license to operate a hospital by the department.

(12) "Annualized Medi-Cal inpatient paid days" means the total number of Medi-Cal acute inpatient hospital days, regardless of dates of service, for which payment was made by or on behalf of the department to a hospital, under present or previous ownership, during the most recent calendar year ending prior to the beginning of a particular transfer year, including all Medi-Cal acute inpatient covered days of care for hospitals that are paid on a different basis than per diem payments.

(13) "Medi-Cal acute inpatient hospital day" means any acute inpatient day of service attributable to patients who, for those days, were eligible for medical assistance under the California state plan, including any day of service that is reimbursed on a basis other than per diem payments.

(14) "OBRA 1993 payment limitation" means the hospital-specific limitation on the total annual amount of payment adjustments to each eligible hospital under the payment adjustment program that can be made with federal financial participation under Section 1396r-4(g) of Title 42 of the United States Code as implemented pursuant to the Medi-Cal State Plan.

(b) The Medi-Cal Inpatient Payment Adjustment Fund is hereby created in the State Treasury. Notwithstanding Section 13340 of the

Government Code, the fund shall be continuously appropriated to, and under the administrative control of, the department for the purposes specified in subdivision (d). The fund shall consist of the following:

(1) Transfer amounts collected by the Controller under this section, whether submitted by transferor entities pursuant to applicable provisions of this section or obtained by offset pursuant to subdivision (j).

(2) Any other intergovernmental transfers deposited in the fund, as permitted by Section 14164.

(3) Any interest that accrues with respect to amounts in the fund.

(c) Moneys in the fund, which shall not consist of any state general funds, shall be used as the source for the nonfederal share of payments to hospitals pursuant to Section 14105.98. Moneys shall be allocated from the fund by the department and matched by federal funds in accordance with customary Medi-Cal accounting procedures, and used to make payments pursuant to Section 14105.98.

(d) Except as otherwise provided in Section 14105.98 or in any provision of law appropriating a specified sum of money to the department for administering this section and Section 14105.98, moneys in the fund shall be used only for the following:

(1) Payments to hospitals pursuant to Section 14105.98.

(2) Except for the amount transferred pursuant to paragraph (3), transfers to the Health Care Deposit Fund as follows:

(A) In the amount of two hundred thirty-nine million seven hundred fifty-seven thousand six hundred ninety dollars ($239,757,690), for the 1994–95 and 1995–96 fiscal years.

(B) In the amount of two hundred twenty-nine million seven hundred fifty-seven thousand six hundred ninety dollars ($229,757,690) for the 1996–97 fiscal year.

(C) In the amount of one hundred fifty-four million seven hundred fifty-seven thousand six hundred ninety dollars ($154,757,690) for the 1997–98 fiscal year and each fiscal year thereafter.

(D) Notwithstanding any other provision of law, the amount specified in this paragraph shall be in addition to any amounts transferred to the Health Care Deposit Fund arising from changes of any kind attributable to payment adjustment years prior to the 1993–94 payment adjustment year. These transfers from the fund shall be made in six equal monthly installments to the Medi-Cal local assistance appropriation item (Item 4260-101-001 of the annual Budget Act) in support of Medi-Cal expenditures. The first installment shall accrue in October of each transfer year, and all other installments shall accrue monthly thereafter from November through March.

(3) In the 1993–94 fiscal year, in addition to the amount transferred as specified in paragraph (2), fifteen million dollars ($15,000,000) shall also be transferred to the Medi-Cal local assistance appropriation item (Item 4260-101-001) of the Budget Act of 1993.

(e) For the 1991–92 state fiscal year, the department shall determine, no later than 70 days after the enactment of this section, the transferor entities for the 1991–92 transfer year. To make this determination, the department shall utilize the disproportionate share list for the 1991–92 fiscal year, which shall be issued by the department no later than 65 days after the enactment of this section, pursuant to paragraph (1) of subdivision (f) of Section 14105.98. The department shall identify each eligible hospital on the list for which a public entity is the licensee as of July 1, 1991. The public entity that is the licensee of each identified eligible hospital shall be a transferor entity for the 1991–92 transfer year.

(f) The department shall determine, no later than 70 days after the enactment of this section, the transfer amounts for the 1991–92 transfer year.

The transfer amounts shall be determined as follows:

(1) The eligible hospitals for 1991–92 shall be identified. For each hospital, the applicable total per diem payment adjustment amount under Section 14105.98 for the 1991–92 transfer year shall be computed. This amount shall be multiplied by 80 percent of the eligible hospital's annualized Medi-Cal inpatient paid days as determined from all Medi-Cal paid claims records available through April 1, 1991. The products of these calculations for all eligible hospitals shall be added together to determine an aggregate sum for the 1991–92 transfer year.

(2) The eligible hospitals for 1991–92 involving transferor entities as licensees shall be identified. For each hospital, the applicable total per diem payment adjustment amount under Section 14105.98 for the 1991–92 transfer year shall be computed. This amount shall be multiplied by 80 percent of the eligible hospital's annualized Medi-Cal inpatient paid days as determined from all Medi-Cal paid claims records available through April 1, 1991. The products of these calculations for all eligible hospitals with transferor entities as licensees shall be added together to determine an aggregate sum for the 1991–92 transfer year.

(3) The aggregate sum determined under paragraph (1) shall be divided by the aggregate sum determined under paragraph (2), yielding a factor to be utilized in paragraph (4).

(4) The factor determined in paragraph (3) shall be multiplied by the amount determined for each hospital under paragraph (2). The product of this calculation for each hospital in paragraph (2) shall be divided by 1.771, yielding a transfer amount for the particular transferor entity for the transfer year.

(g) For the 1991–92 transfer year, the department shall notify each transferor entity in writing of its applicable transfer amount or amounts no later than 70 days after the enactment of this section.

(h) For the 1992–93 transfer year and subsequent transfer years, transfer amounts shall be determined in the same procedural manner as set forth in subdivision (f), except:

(1) The department shall use all of the following:

(A) The disproportionate share list applicable to the particular transfer year to determine the eligible hospitals.

(B) The payment adjustment amounts calculated under Section 14105.98 for the particular transfer year. These amounts shall take into account any projected or actual increases or decreases in the size of the payment adjustment program as are required under Section 14105.98 for the particular year in question, including any decreases resulting from the application of the OBRA 1993 payment limitation. Subject to the installment schedule in paragraph (5) of subdivision (i) regarding transfer amounts, the department may issue interim, revised, and supplemental transfer requests as necessary and appropriate to address changes in payment adjustment levels that occur under Section 14105.98. All transfer requests, or adjustments thereto, issued to transferor entities by the department shall meet the requirements set forth in subparagraph (E) of paragraph (5) of subdivision (i).

(C) Data regarding annualized Medi-Cal inpatient paid days for the most recent calendar year ending prior to the beginning of the particular transfer year, as determined from all Medi-Cal paid claims records available through April 1 preceding the particular transfer year.

(D) The status of public entities as licensees of eligible hospitals as of July 1 of the particular transfer year.

(E) (i) Except as provided in subparagraph (ii), transfer amounts calculated by the department may be increased or decreased by a percentage amount consistent with the Medi-Cal State Plan.

(ii) For the 1995–96 transfer year, the nonfederal share of the secondary supplemental payment adjustments described in paragraph (9) of subdivision (y) of Section 14105.98 shall be funded as follows:

(I) Ninety-nine percent of the nonfederal share shall be funded by a transfer from the University of California.

(II) One percent of the nonfederal share shall be funded by transfers from those public entities that are the licensees of the hospitals included in the "other public hospitals" group referred to in clauses (ii) and (iii) of subparagraph (B) of paragraph (9) of subdivision (y) of Section 14105.98. The transfer responsibilities for this one percent shall be allocated to the particular public entities on a pro rata basis, based on a formula or formulae customarily used by

the department for allocating transfer amounts under this section. The formula or formulae shall take into account, through reallocation of transfer amounts as appropriate, the situation of hospitals whose secondary supplemental payment adjustments are restricted due to the application of the limitation set forth in clause (v) of subparagraph (B) of paragraph (9) of subdivision (y) of Section 14105.98.

(III) All transfer amounts under this subparagraph shall be paid by the particular transferor entities within 30 days after the department notifies the transferor entity in writing of the transfer amount to be paid.

(2) For the 1993–94 transfer year and subsequent transfer years, transfer amounts shall be increased on a pro rata basis for each transferor entity for the particular transfer year in the amounts necessary to fund the nonfederal share of the total supplemental lump-sum payment adjustment amounts that arise under Section 14105.98. For purposes of this paragraph, the supplemental lump-sum payment adjustment amounts shall be deemed to arise for the particular transfer year as of the date specified in Section 14105.98. Transfer amounts to fund the nonfederal share of the payments shall be paid by the transferor entities for the particular transfer year within 20 days after the department notifies the transferor entity in writing of the additional transfer amount to be paid.

(3) The department shall prepare preliminary analyses and calculations regarding potential transfer amounts, and potential transferor entities shall be notified by the department of estimated transfer amounts as soon as reasonably feasible regarding any particular transfer year. Written notices of transfer amounts shall be issued by the department as soon as possible with respect to each transfer year. All state agencies shall take all necessary steps in order to supply applicable data to the department to accomplish these tasks. The Office of Statewide Health Planning and Development shall provide to the department quarterly access to the edited and unedited confidential patient discharge data files for all Medi-Cal eligible patients. The department shall maintain the confidentiality of that data to the same extent as is required of the Office of Statewide Health Planning and Development. In addition, the Office of Statewide Health Planning and Development shall provide to the department, not later than March 1 of each year, the data specified by the department, as the data existed on the statewide data base file as of February 1 of each year, from all of the following:

(A) Hospital annual disclosure reports, filed with the Office of Statewide Health Planning and Development pursuant to Section 443.31 or 128735 of the Health and Safety Code, for hospital fiscal years that ended during the calendar year ending 13 months prior to the applicable February 1.

(B) Annual reports of hospitals, filed with the Office of Statewide Health Planning and Development pursuant to Section 439.2 or 127285 of the Health and Safety Code, for the calendar year ending 13 months prior to the applicable February 1.

(C) Hospital patient discharge data reports, filed with the Office of Statewide Health Planning and Development pursuant to subdivision (g) of Section 443.31 or 128735 of the Health and Safety Code, for the calendar year ending 13 months prior to the applicable February 1.

(D) Any other materials on file with the Office of Statewide Health Planning and Development.

(4) For the 1993–94 transfer year and subsequent transfer years, the divisor to be used for purposes of the calculation referred to in paragraph (4) of subdivision (f) shall be determined by the department. The divisor shall be calculated to ensure that the appropriate amount of transfers from transferor entities are received into the fund to satisfy the requirements of Section 14105.98 for the particular transfer year. For the 1993–94 transfer year, the divisor shall be 1.742.

(5) For the 1993–94 fiscal year, the transfer amount that would otherwise be required from the University of California shall be increased by fifteen million dollars ($15,000,000).

(6) Notwithstanding any other provision of law, the total amount of transfers required from the transferor entities for any particular transfer year shall not exceed the sum of the following:

(A) The amount needed to fund the nonfederal share of all payment adjustment amounts applicable to the particular payment adjustment year as calculated under Section 14105.98. Included in the calculations for this purpose shall be any decreases in the program as a whole, and for individual hospitals, that arise due to the provisions of Section 1396r-4(f) or (g) of Title 42 of the United States Code.

(B) The amount needed to fund the transfers to the Health Care Deposit Fund, as referred to in paragraphs (2) and (3) of subdivision (d).

(7) (A) Except as provided in subparagraph (B) and in paragraph (2) of subdivision (j), and except for a prudent reserve not to exceed two million dollars ($2,000,000) in the Medi-Cal Inpatient Payment Adjustment Fund, any amounts in the fund, including interest that accrues with respect to the amounts in the fund, that are not expended, or estimated to be required for expenditure, under Section 14105.98 with respect to a particular transfer year shall be returned on a pro rata basis to the transferor entities for the particular transfer year within 120 days after the department determines that the funds are not needed for an expenditure in connection with the particular transfer year.

(B) The department shall determine the interest amounts that have accrued in the fund from its inception through June 30, 1995,

and, no later than January 1, 1996, shall distribute these interest amounts to transferor entities, as follows:

(i) The total amount transferred to the fund by each transferor entity for all transfer years from the inception of the fund through June 30, 1995, shall be determined.

(ii) The total amounts determined for all transferor entities under clause (i) shall be added together, yielding an aggregate of the total amounts transferred to the fund for all transfer years from the inception of the fund through June 30, 1995.

(iii) The total amount determined under clause (i) for each transferor entity shall be divided by the aggregate amount determined under clause (ii), yielding a percentage for each transferor entity.

(iv) The total amount of interest earned by the fund from its inception through June 30, 1995, shall be determined.

(v) The percentage determined under clause (iii) for each transferor entity shall be multiplied by the amount determined under clause (iv), yielding the amount of interest that shall be distributed under this subparagraph to each transferor entity.

(C) Regarding any funds returned to a transferor entity under subparagraph (A), or interest amounts distributed to a transferor entity under subparagraph (B), the department shall provide to the transferor entity a written statement that explains the basis for the particular return or distribution of funds and contains the general calculations used by the department in determining the amount of the particular return or distribution of funds.

(i) (1) For the 1991–92 transfer year, each transferor entity shall pay its transfer amount or amounts to the Controller, for deposit in the fund, in eight equal installments. Except as provided below, the first installment shall accrue on July 25, 1991, and all other installments shall accrue on the fifth day of each month thereafter from August through February.

(2) Notwithstanding paragraph (1), no installment shall be payable to the Controller until that date which is 20 days after the department notifies the transferor entity in writing that the payment adjustment program set forth in Section 14105.98 has first gained federal approval as part of the Medi-Cal program. For purposes of this paragraph, federal approval requires both (i) approval by appropriate federal agencies of an amendment to the Medi-Cal State Plan, as referred to in subdivision (o) of Section 14105.98, and (ii) confirmation by appropriate federal agencies regarding the availability of federal financial participation for the payment adjustment program set forth in Section 14105.98 at a level of at least 40 percent of the percentage of federal financial participation that is normally applicable for Medi-Cal expenditures for acute inpatient hospital services.

(3) If any installment that would otherwise be payable under paragraph (1) is not paid because of the provisions of paragraph (2), then subparagraphs (A) and (B) shall be followed when federal approval is gained.

(A) All installments that were deferred based on the provisions of paragraph (2) shall be paid no later than 20 days after the department notifies the transferor entity in writing that federal approval has been gained, in an amount consistent with subparagraph (B).

(B) The installments paid pursuant to subparagraph (A) shall be paid in full.

(4) All installments for the 1991–92 transfer year that arise in months after federal approval is gained shall be paid by the fifth day of the month or 20 days after the department notifies the transferor entity in writing that federal approval has been gained, whichever is later.

(5) (A) Except as provided in subparagraphs (B) and (C), for the 1992–93 transfer year and subsequent transfer years, each transferor entity shall pay its transfer amount or amounts to the Controller, for deposit in the fund, in eight equal installments. The first installment shall be payable on July 10 of each transfer year. All other installments shall be payable on the fifth day of each month thereafter from August through February.

(B) For the 1994–95 transfer year, each transferor entity shall pay its transfer amount or amounts to the Controller, for deposit in the fund, in five equal installments. The first installment shall be payable on October 5, 1994. The next four installments shall be payable on the fifth day of each month thereafter from November through February.

(C) For the 1995–96 transfer year, each transferor entity shall pay its transfer amount or amounts to the Controller, for deposit in the fund, in five equal installments. The first installment shall be payable on October 5, 1995. The next four installments shall be payable on the fifth day of each month thereafter from November through February.

(D) Except as otherwise specifically provided, subparagraphs (A) to (C), inclusive, shall not apply to increases in transfer amounts described in paragraph (2) of subdivision (h) or to additional transfer amounts described in subdivision (o).

(E) All requests for transfer payments, or adjustments thereto, issued by the department shall be in writing and shall include (i) an explanation of the basis for the particular transfer request or transfer activity, (ii) a summary description of program funding status for the particular transfer year, and (iii) the general calculations used by the department in connection with the particular transfer request or transfer activity.

(6) A transferor entity may use any of the following funds for purposes of meeting its transfer obligations under this section:

(A) General funds of the transferor entity.

(B) Any other funds permitted by law to be used for these purposes, except that a transferor entity shall not submit to the Controller any federal funds unless those federal funds are authorized by federal law to be used to match other federal funds. In addition, no private donated funds from any health care provider, or from any person or organization affiliated with such a health care provider, shall be channeled through a transferor entity or any other public entity to the fund. The transferor entity shall be responsible for determining that funds transferred meet the requirements of this subparagraph.

(j) (1) If a transferor entity does not submit any transfer amount within the time period specified in this section, the Controller shall offset immediately the amount owed against any funds which otherwise would be payable by the state to the transferor entity. The Controller, however, shall not impose an offset against any particular funds payable to the transferor entity where the offset would violate state or federal law.

(2) Where a withhold or a recoupment occurs pursuant to the provisions of paragraph (2) of subdivision (r) of Section 14105.98, the nonfederal portion of the amount in question shall remain in the fund, or shall be redeposited in the fund by the department, as applicable. The department shall then proceed as follows:

(A) If the withhold or recoupment was imposed with respect to a hospital whose licensee was a transferor entity for the particular state fiscal year to which the withhold or recoupment related, the nonfederal portion of the amount withheld or recouped shall serve as a credit for the particular transferor entity against an equal amount of transfer obligations under this section, to be applied whenever the transfer obligations next arise. Should no such transfer obligation arise within 180 days, the department shall return the funds in question to the particular transferor entity within 30 days thereafter.

(B) For other situations, the withheld or recouped nonfederal portion shall be subject to paragraph (7) of subdivision (h).

(k) All amounts received by the Controller pursuant to subdivision (i), paragraph (2) of subdivision (h), or subdivision (o), or offset by the Controller pursuant to subdivision (j), shall immediately be deposited in the fund.

(*l*) For purposes of this section, the disproportionate share list utilized by the department for a particular transfer year shall be identical to the disproportionate share list utilized by the department for the same state fiscal year for purposes of Section 14105.98. Nothing on a disproportionate share list, once issued by the department, shall be modified for any reason other than mathematical or typographical errors or omissions on the part of the department or the Office of Statewide Health Planning and Development in preparation of the list.

(m) Neither the intergovernmental transfers required by this section, nor any elective transfer made pursuant to Section 14164, shall create, lead to, or expand the health care funding or service obligations for current or future years for any transferor entity, except as required of the state by this section or as may be required by federal law, in which case the state shall be held harmless by the transferor entities on a pro rata basis.

(n) No amount submitted to the Controller pursuant to subdivision (i), paragraph (2) of subdivision (h), or subdivision (o), or offset by the Controller pursuant to subdivision (j), shall be claimed or recognized as an allowable element of cost in Medi-Cal cost reports submitted to the department.

(o) Whenever additional transfer amounts are required to fund the nonfederal share of payment adjustment amounts under Section 14105.98 that are distributed after the close of the particular payment adjustment year to which the payment adjustment amounts apply, the additional transfer amounts shall be paid by the parties who were the transferor entities for the particular transfer year that was concurrent with the particular payment adjustment year. The additional transfer amounts shall be calculated under the formula that was in effect during the particular transfer year. For transfer years prior to the 1993–94 transfer year, the percentage of the additional transfer amounts available for transfer to the Health Care Deposit Fund under subdivision (d) shall be the percentage that was in effect during the particular transfer year. These additional transfer amounts shall be paid by transferor entities within 20 days after the department notifies the transferor entity in writing of the additional transfer amount to be paid.

(p) (1) Ten million dollars ($10,000,000) of the amount transferred from the Medi-Cal Inpatient Payment Adjustment Fund to the Health Care Deposit Fund due to amounts transferred attributable to years prior to the 1993–94 fiscal year is hereby appropriated without regard to fiscal years to the State Department of Health Services to be used to support the development of managed care programs under the department's plan to expand Medi-Cal managed care.

(2) These funds shall be used by the department for both of the following purposes: (A) distributions to counties or other local entities that contract with the department to receive those funds to offset a portion of the costs of forming the local initiative entity, and (B) distributions to local initiative entities that contract with the department to receive those funds to offset a portion of the costs of developing the local initiative health delivery system in accordance with the department's plan to expand Medi-Cal managed care.

(3) Entities contracting with the department for any portion of the ten million dollars ($10,000,000) shall meet the objectives of the

department's plan to expand Medi-Cal managed care with regard to traditional and safety net providers.

(4) Entities contracting with the department for any portion of the ten million dollars ($10,000,000) may be authorized under those contracts to utilize their funds to provide for reimbursement of the costs of local organizations and entities incurred in participating in the development and operation of a local initiative.

(5) To the full extent permitted by state and federal law, these funds shall be distributed by the department for expenditure at the local level in a manner that qualifies for federal financial participation under the medicaid program.

(q) (1) Any local initiative entity that has performed unanticipated additional work for the purposes identified in subparagraph (B) of paragraph (2) of subdivision (p) resulting in additional costs attributable to the development of its local initiative health delivery system, may file a claim for reimbursement with the department for the additional costs incurred due to delays in start dates through the 1996–97 fiscal year. Any such claim shall be filed by the local initiative entity not later than 90 days after the effective date of the act adding this subdivision, and shall not seek extra compensation for any sum that is or could have been asserted pursuant to the contract disputes and appeals resolution provisions of the local initiative entity's respective two-plan model contract. All claims for unanticipated additional incurred costs shall be submitted with adequate supporting documentation including, but not limited to, all of the following:

(A) Invoices, receipts, job descriptions, payroll records, work plans, and other materials that identify the unanticipated additional claimed and incurred costs.

(B) Documents reflecting mitigation of costs.

(C) To the extent lost profits are included in the claim, documentation identifying those profits and the manner of calculation.

(D) Documents reflecting the anticipated start date, the actual start date, and reasons for the delay between the dates, if any.

(2) In determining any amount to be paid, the department shall do all of the following:

(A) Conduct a fiscal analysis of the local initiative entity's claimed costs.

(B) Determine the appropriate amount of payment, after taking into consideration the supporting documentation and the results of any audit.

(C) Provide funding for any such payment, as approved by the Department of Finance through the deficiency process.

(D) Complete the determination required in subparagraph (B) within six months after receipt of a local initiative entity's completed claim and supporting documentation. Prior to final determination,

there shall be a review and comment period for that local initiative entity.

(E) Make reasonable efforts to obtain federal financial participation. In the event federal financial participation is not allowed for this payment, the state's payment shall be 50 percent of the total amount determined to be payable.

SEC. 77. Section 14459.5 is added to the Welfare and Institutions Code, to read:

14459.5. (a) As delegated by the federal government, the department has responsibility for monitoring the quality of all medicaid services provided in the state. A key component of this monitoring function is the performance of annual, independent, external reviews of the quality of services furnished under each state contract with a health maintenance organization, as specified by the federal Health Care Financing Administration.

(b) The Legislature finds and declares that the final report obtained from the external reviews will provide valid and reliable information regarding health care outcomes and the overall quality of care delivered by the managed care plans.

(c) The department shall make only the final report of each external review available, within 30 calendar days of completion, to the fiscal and health policy committees of the Legislature, and shall make only the final report available for public viewing upon request by any individual or organization.

SEC. 78. Section 14459.7 is added to the Welfare and Institutions Code, to read:

14459.7. (a) The department shall implement a Management Information System/Decision Support System (MIS/DSS) for the Medi-Cal Program, that shall integrate data from managed care plans to monitor and evaluate the quality of care provided to beneficiaries, including access to services, establish provider rates, and analyze ways to improve both the managed care and fee-for-service systems.

(b) The department shall provide the fiscal and health policy committees of the Legislature with an annual progress and status report on the implementation of the MIS/DSS. The annual progress and status report shall include a description of the current status of the project, including a list of the specific project objectives that have and have not been met at the time of the report and a comparison of the actual progress of the project with the most recent project schedule approved by the Legislature. The report also shall include estimated expenditures and staffing for the current fiscal year and proposed expenditures and staffing for the next fiscal year as well as a summary of cumulative total project expenditures to date and a projection of future expenditures necessary to complete the project.

(c) The department shall provide system or information access to the fiscal and health policy committees of the Legislature, with the most cost-effective technology available, by the conclusion of the

third phase of this multiphase project. Access shall include both the management information system and ad hoc report systems, or their equivalent, with safeguards to block access to individual patient identities. Public access shall be provided to at least the management information system summary presentation, or an equivalent, by the time of project completion.

SEC. 79. Section 16809.5 of the Welfare and Institutions Code is amended to read:

16809.5. (a) Funds appropriated for the purposes of this section shall be allocated on a monthly basis.

(b) Money allocated for the purposes of this section may be used to expand the scope of benefits, to fund special projects which alleviate problems of access to health and dental care under the County Medical Services Program and to compensate hospitals and other emergency health service providers for emergency treatment of out-of-county indigent patients and shall not be used to fund existing levels of service.

(c) Funds available from appropriations for the purposes of this chapter may be utilized to fund increased program costs due to caseload increases and provider rate increases.

SEC. 80. Section 16909 of the Welfare and Institutions Code is amended to read:

16909. (a) Any county which receives funds pursuant to this part shall deposit them in a special revenue fund or trust fund established solely for this purpose, in a hospital services account, a physician services account, and other county health services account, and any other account or subaccount the department may require, before transferring or expending them for any of the uses allowed in this part.

(b) Any county subject to the requirements of subdivision (a) shall deposit the funds in the special revenue fund or trust fund before transferring the funds to the county emergency medical services fund, as provided in subdivision (c) of Section 16933 and Section 16951.

(c) (1) Interest on each fund, account, or subaccount shall accrue to the benefit of the fund, account, or subaccount, and shall be expended for the same purposes as the other funds in the account or subaccount.

(2) Interest or other increments resulting from funds transferred to the county for noncounty hospitals pursuant to paragraph (1) or (2) of subdivision (b) of Section 16946 shall be expended under paragraph (1) or (2) of subdivision (b) of Section 16946.

(d) Counties shall submit a report that displays cost and utilization data for each account in the trust fund established pursuant to this section, to the department on a semiannual, preliminary annual, and final annual basis, in a form prescribed by the department.

(e) Data required by subdivision (d) shall include, but not be limited to, all of the following:

(1) For the Hospital Services Account, the data shall include all of the following:

(A) Inpatient stay, including child health and disability prevention followup treatment, including the following information:

(i) Facility name.

(ii) Amount paid by the county.

(iii) Number of discharges.

(iv) Patient days.

(B) Outpatient visits, including child health and disability prevention followup treatment, including the following information:

(i) Facility name.

(ii) Amount paid by the county.

(iii) Number of visits.

(C) Emergency room.

(i) Facility name.

(ii) Amount paid by the county.

(iii) Number of visits.

(2) For the Physician Services Account, the data shall include all of the following:

(A) Emergency services, including the following information:

(i) The number of providers.

(ii) The number of visits.

(iii) The amount paid by the county.

(B) Obstetrics, including the following information:

(i) The number of providers.

(ii) The number of visits.

(iii) The amount paid by the county.

(C) Pediatrics, including the following information:

(i) The number of providers.

(ii) The number of visits.

(iii) The amount paid by the county.

(D) Child health and disability prevention followup treatment, including the following information:

(i) The number of providers.

(ii) The number of visits.

(iii) The amount paid by the county.

(3) For the other county health services account, the data shall include all of the following:

(A) For funds expended for hospital services, those data in paragraph (1) of subdivision (e).

(B) For funds expended for physician services, those data in paragraph (2) of subdivision (e).

(C) For funds expended for services other than those provided and billed for by a hospital or physician, the data shall include:

(i) The number of providers by type of service.

(ii) The number of visits or units, or both, by type of service.

(iii) The amount paid by the county by type of service.

(D) Child health and disability prevention followup treatment, including the following information:

(i) The number of providers.

(ii) The number of visits.

(iii) The amount paid by the county.

(f) The Director of Health Services shall withhold, in part or in whole, payment of moneys governed by Chapter 4 (commencing with Section 16930) and Chapter 5 (commencing with Section 16940) of this part to a county, until the reports specified in this section have been submitted to the department in the form and according to the procedures established by the department.

SEC. 81. Section 16945 of the Welfare and Institutions Code is amended to read:

16945. (a) The department shall annually verify and transmit to each MISP county and each CMSP county the figures specified in subdivision (c), using data supplied by the office.

(b) (1) For purposes specified in subdivision (c), the office shall use data from the quarterly reports required by Section 128740 of the Health and Safety Code.

(2) For the 1989–90 fiscal year computations, the office shall use the 1988 calendar year data, as adjusted by the office, existing on the statewide file on September 1, 1989.

(3) For the computations for fiscal years after the 1989–90 fiscal year, the office shall use the data from the quarterly reports for the calendar year preceding the computational fiscal year, as adjusted by the office, existing on the statewide file on April 15 immediately preceding the computational fiscal year.

(4) (A) Except as provided in subparagraphs (B), (C), and (D), the definitions, procedures, and data elements specified in Chapter 3 (commencing with Section 16920) shall be used in all computations required in subdivision (c).

(B) For the 1991–92 fiscal year, the following definitions shall be used in all computations required in subdivision (c):

(i) "Uncompensated care charges" means the sum of the charges related to patients falling within the charity-other category in the 1990 calendar year and 25 percent of the charges related to patients falling within the bad debts category in the first two quarters of the 1990 calendar year, as both categories of charges are reported quarterly to the office pursuant to Section 128740 of the Health and Safety Code.

(ii) "Uncompensated care costs" means that amount calculated by applying an overall hospital cost-to-charge ratio, calculated by dividing gross operating expenses by gross inpatient and outpatient revenue, as reported quarterly to the office, to uncompensated care charges.

(C) For the 1992–93 fiscal year, the following definitions shall be used in all computations required in subdivision (c):

(i) "Uncompensated care charges" means the charges related to patients falling within charity-other, as reported quarterly to the office pursuant to Section 128740 of the Health and Safety Code.

(ii) "Uncompensated care costs" means that amount calculated by applying an overall hospital cost-to-charge ratio, calculated by dividing gross operating expenses by gross inpatient and outpatient revenue, as reported quarterly to the office, to uncompensated care charges.

(D) For the 1993–94, 1994–95, 1995–96, 1996–97 and subsequent fiscal years, the following definitions shall be used in all computations required in subdivision (c):

(i) (I) For county hospitals and for all hospitals operating in counties with no county hospital, "uncompensated care charges" means the charges related to patients falling within charity-other, gross inpatient revenue-county indigent programs and gross outpatient revenue-county indigent programs, as reported quarterly to the office pursuant to Section 128740 of the Health and Safety Code.

(II) For noncounty hospitals operating in a county with a county hospital, "uncompensated care charges" means the charges related to patients falling within charity-other and county indigent programs contractual adjustments, as reported quarterly to the office pursuant to Section 128740 of the Health and Safety Code.

(ii) "Uncompensated care costs" means that amount calculated by applying an overall hospital cost-to-charge ratio, calculated by dividing gross operating expenses less other operating revenue by gross inpatient and outpatient revenue, as reported quarterly to the office, to uncompensated care charges.

(c) The office shall compute the following data on uncompensated care costs reported by hospitals located within each MISP county and each CMSP county:

(1) The sum of uncompensated care costs for all hospitals.

(2) The sum of uncompensated care costs for all noncounty hospitals.

(3) The sum of uncompensated care costs for all county hospitals.

(4) The uncompensated care costs of each hospital within the county.

(5) The percentage derived from dividing the result of paragraph (2) by the result of paragraph (1).

(6) The percentage derived from dividing the result of paragraph (3) by the result of paragraph (1).

(7) The percentage for each individual hospital derived from dividing each noncounty hospital's uncompensated care cost in paragraph (4) by the amount in paragraph (2).

(d) The office shall transmit to the department the data specified in subdivision (c) within 30 days of the dates specified in paragraph (2) of subdivision (b) and paragraph (3) of subdivision (b) of this section.

SEC. 82. Section 16990.5 of the Welfare and Institutions Code is amended to read:

16990.5. (a) The following definitions shall govern the construction of this section, unless the context requires otherwise:

(1) "Capital outlay" means net disproportionate share hospital revenues used for projects that involve the acquisition, construction, renovation, improvement, modernization, expansion, or replacement of a plant, building, or fixed or movable equipment, including debt service for facilities used in the provision of county health care services or mental health services.

(2) "County health care services" means those services described in subdivision (a) of Section 16801.

(3) "County financial maintenance of effort" means the level of financial support required of a county pursuant to Section 16990.

(4) "Net disproportionate share hospital revenues" means the amount determined by subtracting the total intergovernmental transfers made by a county pursuant to Sections 14163 and 14164 from the total amount of the payment adjustments paid to the county's hospital or hospitals pursuant to Section 14105.98. This calculation shall reflect any amendment to Sections 14163 and 14164, including amendments to paragraph (2) of subdivision (d) of Section 14163.

(5) "Mental health services" means those programs transferred or otherwise financed pursuant to Chapters 89 and 91 of the Statutes of 1991.

(b) (1) Each county shall deposit all net disproportionate share hospital revenues into a fund or funds other than the county general fund, and shall retain those revenues until utilized for the purposes described in this section.

(2) All disproportionate share hospital revenues are intended to support health care services rendered by disproportionate share hospitals, including, but not limited to, health or mental health services and health or mental health capital outlays. Net disproportionate share hospital revenues shall not be used to supplant or offset county general funds or other funds that were expended or encumbered for those purposes prior to July 1, 1991.

(3) Net disproportionate share hospital revenues shall be included in computing county financial maintenance of effort only as set forth in subdivision (c).

(c) For the 1991–92 fiscal year, and for each fiscal year thereafter, for purposes of computing county financial maintenance of effort, net disproportionate share hospital revenues deposited in accordance with subdivision (b) shall be treated as follows:

(1) Net disproportionate share hospital revenues utilized for a county for mental health services, or for capital outlay for health or mental health services, shall not be counted as revenue in the computation of county financial maintenance of effort.

(2) Net disproportionate share hospital revenues that are not utilized as described in paragraph (1) shall be counted as revenue in the computation of a county's financial maintenance of effort only to the extent that by not counting those revenues for a particular fiscal year, a county's net county costs for county health care services exceeds the amount of county funds required to satisfy the requirements of Section 16990 for the particular fiscal year.

(3) Net disproportionate share hospital revenues counted as revenue in the calculation of county financial maintenance of effort for a particular year pursuant to paragraph (2) shall not be counted as revenue in the calculation of county financial maintenance of effort relating to any subsequent fiscal year.

(d) Net disproportionate share hospital revenues may not be used for deposits required by Sections 17608.05 and 17608.10 or as county funds required by Section 16990.

SEC. 83. Section 16997.1 of the Welfare and Institutions Code is repealed:

SEC. 84. Section 17000.51 is added to the Welfare and Institutions Code, to read:

17000.51. (a) Notwithstanding the decision in Caulk v. Superior Court, CO15355, June 27, 1997, a county's discretion granted pursuant to Section 17000.5 to include, as part of a general assistance aid grant, in-kind aid with a monthly actuarial value of up to forty dollars ($40) per month of medical care, was not intended, and shall not be construed, to do any of the following:

(1) Satisfy, in whole or in part, the duty of a county or a city or county to provide health care services to indigent and dependent poor persons under Section 17000.

(2) Permit a county or a city and county to cease providing health care services under Section 17000.

(3) Affect the eligibility of indigent and dependent poor persons for health care services under Section 17000.

(b) Subdivision (a) shall cease to be implemented if, and only to the extent that, a final court decision holds that subdivision (a) imposes a state-mandated local program.

(c) Subdivision (a) confirms, and is declarative of, rather than a change in, existing law, as provided for in Chapter 6 of the Statutes of 1996, which was intended only to provide a county or city and county with the discretion to reduce its general assistance grant level by up to forty dollars ($40) per month.

SEC. 85. (a) (1) Of the amount appropriated in Item 4260-111-0001 of the Budget Act of 1997, the State Department of Health Services may use the sum of one million six hundred thousand

dollars ($1,600,000) for the extension of the term of contracts with entities receiving funds in the 1996–97 fiscal year to provide HIV testing services.

(2) Notwithstanding any other provision of law, the State Department of Health Services may enter into amendments to the contracts described in paragraph (1) for the 1997–98 fiscal year, to be effective as of June 30, 1997. Any such amendment shall be exempt from the approval of the Director of General Services and from the provisions of the Public Contract Code.

(3) The department may make advance payments, not to exceed 25 percent of the expected amount of funding for the particular contract amendment, prior to the execution of the amendment. These advance payments shall be made only for services specified in the particular contract that was in effect prior to June 30, 1997, and that are provided after June 30, 1997.

(b) This section shall become inoperative on July 1, 1998, and, as of January 1, 1999, is repealed.

SEC. 86. In the event that funds in the Cigarette and Tobacco Products Surtax Fund are insufficient to support the Budget Act appropriations for the programs affected by this act, the Director of Finance may authorize the augmentation or reduction of the amounts appropriated in the Budget Act for the programs affected by this act pursuant to Section 27 of the Budget Act or any other provision of the Budget Act that governs deficiencies.

SEC. 87. Moneys in the Hospital Services Account, the Physician Services Account, the Health Education Account, and the Unallocated Account in the Cigarette and Tobacco Products Surtax Fund shall not be transferred to any other fund or account in the State Treasury, except as provided in this act or other legislation, and except for purposes of investment as provided in Article 4 (commencing with Section 16470) of Chapter 3 of Part 2 of Division 4 of Title 2 of the Government Code. All interest or other increment resulting from investment shall be deposited to the respective account.

SEC. 88. (a) Notwithstanding any provision of law, funds appropriated by the Budget Act of 1997 for the tobacco use competitive grants program set forth in Section 104385 of the Health and Safety Code and the tobacco prevention media campaign set forth in subdivision (e) of Section 104375 of the Health and Safety Code shall be available for expenditure without regard to fiscal year until July 1, 2000.

(b) Notwithstanding any provision of law, funds appropriated by the Budget Act of 1997 for the evaluation of the State Department of Education's tobacco use prevention education program pursuant to subdivision (c) of Section 104375 of the Health and Safety Code, for the State Department of Education's allocation of funds for school-based tobacco use prevention pursuant to Sections 104425 and

104430 of the Health and Safety Code, for the tobacco use prevention program set forth in Section 104400 of the Health and Safety Code, and for the rural health improvement grants established in Section 1179.3 of the Health and Safety Code, shall be available for expenditure without regard to fiscal year until July 1, 1999.

SEC. 89. Due to the necessity to implement the mandates of Article 2 (commencing with Section 30121) of Chapter 2 of Part 13 of Division 2 of the Revenue and Taxation Code, any contract made pursuant to any provision of this act referred to in Section 91 shall not be subject to Part 2 (commencing with Section 10100) of the Public Contract Code.

SEC. 90. In the event that this act is not enacted until after July 1, 1997, all programs authorized or amended by this act by the amendment of Sections 16909 and 16945 of the Welfare and Institutions Code, and by those sections referred to in the following sentence, shall be deemed to be operative for the entire 1997–98 fiscal year. Also, by repealing Sections 349.109, 104485, 104550, 104569, and 124950 of the Health and Safety Code, Section 12699.50 of the Insurance Code, Sections 14148.99 and 16997.1 of the Welfare and Institutions Code, and by deleting subdivision (e) of Section 16809.5 of the Welfare and Institutions Code, it is the intent of the Legislature to continue the effect and operation of the provisions affected by those repealed and deleted provisions. If this act is not enacted until after July 1, 1997, those affected provisions shall again become operative on the effective date of this act.

SEC. 91. If any provision of this act or its application is held invalid, that invalidity shall not affect other provisions or applications that can be given effect without the invalid provision or application, and to this end the provisions of this act are severable.

SEC. 92. (a) The State Department of Health Services may adopt emergency regulations to implement this act in accordance with the Administrative Procedure Act (Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code).

(b) (1) The State Department of Health Services may adopt emergency regulations to implement any new Medi-Cal benefits established by the Budget Act of 1997 in accordance with the Administrative Procedure Act (Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code).

(2) In the regulations described in paragraph (1), the department may define terms and prescribe requirements applicable to those benefits, including, but not limited to, the following:

(A) The provider types and size of provider office that are eligible for payment for providing this benefit.

(B) The criteria required to be met for payment.

(C) The reimbursement rates for the services.

(D) Any certificate or license requirements that are required to be met by individuals providing the services.

(c) The initial adoption of emergency regulations described in subdivisions (a) and (b) following the effective date of this section and one readoption of those initial regulations shall be deemed to be emergency and necessary for the immediate preservation of the public peace, health and safety, or general welfare. Initial emergency regulations and the first readoption of those regulations shall be exempt from review by the Office of Administrative Law. The emergency regulations authorized by this section and the readoption of those regulations shall be submitted to the Office of Administrative Law for filing with the Secretary of State and publication in the California Code of Regulations and shall remain in effect for no more than 180 days.

SEC. 93. Notwithstanding Section 17610 of the Government Code, if the Commission on State Mandates determines that this act contains costs mandated by the state, reimbursement to local agencies and school districts for those costs shall be made pursuant to Part 7 (commencing with Section 17500) of Division 4 of Title 2 of the Government Code. If the statewide cost of the claim for reimbursement does not exceed one million dollars ($1,000,000), reimbursement shall be made from the State Mandates Claims Fund.

Notwithstanding Section 17580 of the Government Code, unless otherwise specified, the provisions of this act shall become operative on the same date that the act takes effect pursuant to the California Constitution.

SEC. 94. This act is an urgency statute necessary for the immediate preservation of the public peace, health, or safety within the meaning of Article IV of the Constitution and shall go into immediate effect. The facts constituting the necessity are:

In order to timely provide for the administration of this act relating to public health for the entire 1997–98 fiscal year, it is necessary that this act take effect immediately.

O

Senate Bill No. 362

CHAPTER 116

An act to amend Section 121361 of the Health and Safety Code, relating to communicable diseases.

[Approved by Governor July 27, 1997. Filed with Secretary of State July 28, 1997.]

LEGISLATIVE COUNSEL'S DIGEST

SB 362, Maddy. Tuberculosis: health facility.

Existing law prohibits a health facility, local detention facility, or state correctional institution from discharging, releasing, or transferring any person known to have or when the facility or institutional medical staff have reasonable grounds to believe the person has active tuberculosis, unless notification and a written treatment plan have been received by the local health officer, except as specified.

This bill would provide that no health facility that declines to discharge, release, or transfer a person pursuant to that provision shall be civilly or criminally liable or subject to administrative sanction as a result, if the health facility complies with that provision and acts in good faith. The bill would also provide that the local health officer under this provision is not relieved of any other duty imposed under state law governing tuberculosis control.

The people of the State of California do enact as follows:

SECTION 1. Section 121361 of the Health and Safety Code is amended to read:

121361. (a) (1) A health facility, local detention facility, or state correctional institution shall not discharge or release any of the following persons unless subdivision (e) is complied with:

(A) A person known to have active tuberculosis disease.

(B) A person who the medical staff of the health facility or of the penal institution has reasonable grounds to believe has active tuberculosis disease.

(2) In addition, persons specified in this subdivision may be discharged from a health facility only after a written treatment plan described in Section 121362 is approved by a local health officer of the jurisdiction in which the health facility is located. Treatment plans submitted for approval pursuant to this paragraph shall be reviewed by the local health officer within 24 hours of receipt of the plans.

(3) The approval requirement of paragraph (2) shall not apply to any transfer to a general acute care hospital when the transfer is due

to an immediate need for a higher level of care, nor to any transfer from any health facility to a correctional institution. Transfers or discharges described in this paragraph shall occur only after the notification and treatment plan required by Section 121362 have been received by the local health officer.

(4) This subdivision shall not apply to transfers within the state correctional system or to interfacility transfers occurring within a local detention facility system.

(b) No health facility shall transfer a person described in subparagraph (A) or (B) of paragraph (1) of subdivision (a) to another health facility unless subdivision (e) is complied with. This subdivision shall not apply to transfers within the state correctional system or to interfacility transfers occurring within a local detention facility system.

(c) No state correctional institution or local detention facility shall transfer a person described in subparagraph (A) or (B) of paragraph (1) of subdivision (a) from a state to a local, or from a local to a state, penal institution unless notification and a written treatment plan are received by the chief medical officer of the penal institution receiving the person.

(d) No local detention facility shall transfer a person described in subparagraph (A) or (B) of paragraph (1) of subdivision (a) to a local detention facility in another jurisdiction unless subdivision (e) is complied with and notification and a written treatment plan are received by the chief medical officer of the local detention facility receiving the person.

(e) All discharges, releases, or transfers described in subdivisions (a), (b), (c), and (d) may occur only after notification and a written treatment plan pursuant to Section 121362 has been received by the local health officer. When prior notification would jeopardize the person's health, the public safety, or the safety and security of the penal institution, then the notification and treatment plan shall be submitted within 24 hours of discharge, release, or transfer.

(f) No health facility that declines to discharge, release, or transfer a person pursuant to this section shall be civilly or criminally liable or subject to administrative sanction therefor. This subdivision shall apply only if the health facility complies with this section and acts in good faith.

(g) Nothing in this section shall relieve a local health officer of any other duty imposed by this chapter.

O

Senate Bill No. 843

CHAPTER 763

An act to amend Sections 121361 and 121362 of, and to add and repeal Section 121360.5 of, the Health and Safety Code, relating to communicable diseases.

[Approved by Governor September 20, 2002. Filed with Secretary of State September 21, 2002.]

LEGISLATIVE COUNSEL'S DIGEST

SB 843, Perata. Omnibus Tuberculosis Control and Prevention Act of 2002.

Existing law establishes various communicable disease prevention and control programs, including one for tuberculosis. That program provides for testing of various persons for tuberculosis by prescribed licensed health professionals.

This bill would enact the Omnibus Tuberculosis Control and Prevention Act of 2002.

This bill would until January 1, 2006, permit any local health department to provide for certification, by the local health officer, of tuberculin skin test technicians, as defined, in accordance with specified requirements.

Existing law requires each health care provider who treats a person for active tuberculosis disease, each person in charge of a health facility, or each person in charge of a clinic providing outpatient treatment for active tuberculosis disease to promptly provide a disease notification report and written treatment plan to the local health officer at the times that the health officer requires, but no less frequently than when there are reasonable grounds to believe that a person has active tuberculosis disease, and when a person ceases treatment for tuberculosis disease.

Existing law prohibits a health facility, local detention facility, or state correctional institution from discharging or releasing a person known to have active tuberculosis disease or a person the medical staff of the health facility or of the penal institution has reasonable grounds to believe has active tuberculosis disease, unless the notification report and individual treatment plan requirements specified above have been met.

This bill would provide that when a person described above is released on parole from a state correctional institution, the notification and written treatment plan shall be provided to both the local health officer for the county in which the parolee intends to reside and the local health officer for the county in which the state correctional institution is

located. It would require the Department of Corrections to inform the parole agent, and other parole officials as necessary, that the person has active or suspected active tuberculosis disease and provide information regarding the need for evaluation or treatment. In addition, the bill would require the parole agent and other parole officials to coordinate with the local health officer in supervising the person's compliance with medical evaluation or treatment related to tuberculosis, and to notify the local health officer if the person's parole is suspended as a result of having absconded from supervision. The imposition of new duties on local health officers in connection with these provisions would create a state-mandated local program.

Existing law provides that in the case of a parolee under the jurisdiction of the Department of Corrections, the local health officer shall notify the medical officer of the parole region or the physician and surgeon designated by the Director of Corrections when there are reasonable grounds to believe that the parolee has active tuberculosis disease and when the parolee ceases treatment for tuberculosis.

This bill would instead require the local health officer to notify the assigned parole agent, when known, or the regional parole administrator.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

The people of the State of California do enact as follows:

SECTION 1. (a) The Legislature finds and declares all of the following:

(1) Each year, approximately 3,000 Californians develop tuberculosis (TB). Tuberculosis is a contagious disease transmitted through the air by bacteria when a person with active tuberculosis disease coughs or sneezes, and another person breathes in the tuberculosis bacteria.

(2) For each reported case of active tuberculosis disease, public health officials identify 10 or more individuals who have been directly exposed to the disease and are at risk of developing latent tuberculosis infection. These individuals who have been exposed to the disease are

at the highest risk of developing active tuberculosis disease soon after exposure. Finding and screening individuals who have been recently exposed to active tuberculosis disease, referred to as "contact investigation," is essential in preventing outbreaks of tuberculosis in communities.

(3) Public health officials estimate that as many as 3.4 million Californians may now be infected (latent tuberculosis infection) with the bacteria that can cause active tuberculosis disease. If undetected and untreated, an estimated 5 to 10 percent of persons in California, or 170,000 to 340,000 people, with latent tuberculosis infection will, throughout the course of their lives, develop active tuberculosis disease, thus continuing the cycle of transmission.

(4) Because persons with latent tuberculosis infection have no symptoms, the only way to detect their infection is by a tuberculin skin test.

(5) Tuberculin skin tests may now be placed and measured only by certain licensed health professionals, which do not include public health tuberculosis workers who are not licensed health professionals, but who are employed by, or under contract with, a city or county health department.

(6) The National Institute of Medicine's report on tuberculosis clearly recommends increased efforts at contact investigation, targeted skin testing, and bringing under treatment those individuals with latent tuberculosis infection in order to prevent the progression to active, transmissible, tuberculosis disease.

(b) It is the intent of the Legislature to enact legislation to permit any city or county health department to provide for certification, by the local health officer, of tuberculin skin test technicians, who are public health tuberculosis workers, and to authorize tuberculin skin test technicians to place and measure skin tests for tuberculosis for the local health department, in order to increase the number of persons qualified to administer tests and to thereby more effectively, and more cost-effectively, control the spread and contagion of this communicable disease.

SEC. 2. This act shall be known, and may be cited, as the Omnibus Tuberculosis Control and Prevention Act of 2002.

SEC. 3. Section 121360.5 is added to the Health and Safety Code, to read:

121360.5. (a) Any city or county health department may provide for one-year certification of tuberculin skin test technicians by local health officers.

(b) For purposes of this section, a "certified tuberculin skin test technician" is an unlicensed public health tuberculosis worker

employed by, or under contract with, a local public health department, and who is certified by a local health officer to place and measure skin tests in the local health department's jurisdiction.

(c) A certified tuberculin skin test technician may perform the functions for which he or she is certified only if he or she meets all of the following requirements:

(1) The certified tuberculin skin test technician is working under the direction of the local health officer or the tuberculosis controller.

(2) The certified tuberculin skin test technician is working under the supervision of a licensed health professional.

(d) A certified tuberculin skin test technician may perform intradermal injections only for the purpose of placing a tuberculin skin test and measuring the test result.

(e) A certified tuberculin skin test technician may not be certified to interpret, and may not interpret, the results of a tuberculin skin test.

(f) In order to be certified as a tuberculin skin test technician by a local health officer, a person shall meet all of the following requirements, and provide to the local health officer appropriate documentation establishing that he or she has met those requirements:

(1) The person has a high school diploma, or its equivalent.

(2) The person has completed a standardized course approved by the California Tuberculosis Controllers Association (CTCA), which shall include at least 24 hours of instruction in all of the following areas: Didactic instruction on tuberculosis control principles and instruction on the proper placement and measurement of tuberculin skin tests, equipment usage, basic infection control, universal precautions, and appropriate disposal of sharps, needles, and medical waste, client preparation and education, safety, communication, professional behavior, and the importance of confidentiality.

A certification of satisfactory completion of this CTCA-approved course shall be dated and signed by the local health officer, and shall contain the name and social security number of the tuberculin skin test technician, and the printed name, the jurisdiction, and the telephone number of the certifying local health officer.

(3) The person has completed practical instruction including placing at least 30 successful intradermal tuberculin skin tests, supervised by a licensed physician or registered nurse at the local health department, and 30 correct measurements of intradermal tuberculin skin tests, at least 15 of which are deemed positive by the licensed physician or registered nurse supervising the practical instruction. A certification of the satisfactory completion of this practical instruction shall be dated and signed by the licensed physician or registered nurse supervising the practical instruction.

(g) The certification may be renewed, and the local health department shall provide a certificate of renewal, if the certificate holder has completed inservice training, including all of the following:

(1) At least three hours of a CTCA-approved standardized training course to assure continued competency. This training shall include, but not be limited to, fundamental principles of tuberculin skin testing.

(2) Practical instruction, under the supervision of a licensed physician or registered nurse at the local health department, including the successful placement and correct measurement of 10 tuberculin skin tests, at least five of which are deemed positive by the licensed physician or registered nurse supervising the practical instruction.

(h) The local health officer or the tuberculosis controller may deny or revoke the certification of a tuberculin skin test technician if the local health officer or the tuberculosis controller finds that the technician is not in compliance with this section.

(i) This section shall remain in effect only until January 1, 2006, and as of that date is repealed, unless a later enacted statute, that is enacted before January 1, 2006, deletes or extends that date.

SEC. 4. Section 121361 of the Health and Safety Code is amended to read:

121361. (a) (1) A health facility, local detention facility, or state correctional institution shall not discharge or release any of the following persons unless subdivision (e) is complied with:

(A) A person known to have active tuberculosis disease.

(B) A person who the medical staff of the health facility or of the penal institution has reasonable grounds to believe has active tuberculosis disease.

(2) In addition, persons specified in this subdivision may be discharged from a health facility only after a written treatment plan described in Section 121362 is approved by a local health officer of the jurisdiction in which the health facility is located. Any treatment plan submitted for approval pursuant to this paragraph shall be reviewed by the local health officer within 24 hours of receipt of that plan.

(3) The approval requirement of paragraph (2) shall not apply to any transfer to a general acute care hospital when the transfer is due to an immediate need for a higher level of care, nor to any transfer from any health facility to a correctional institution. Transfers or discharges described in this paragraph shall occur only after the notification and treatment plan required by Section 121362 have been received by the local health officer.

(4) This subdivision shall not apply to any transfer within the state correctional system or to any interfacility transfer occurring within a local detention facility system.

(b) No health facility shall, without first complying with subdivision (e), transfer a person described in subparagraph (A) or (B) of paragraph (1) of subdivision (a) to another health facility. This subdivision shall not apply to any transfer within the state correctional system or to any interfacility transfer occurring within a local detention facility system.

(c) No state correctional institution or local detention facility shall transfer a person described in subparagraph (A) or (B) of paragraph (1) of subdivision (a) from a state to a local, or from a local to a state, penal institution unless notification and a written treatment plan are received by the chief medical officer of the penal institution receiving the person.

(d) No local detention facility shall transfer a person described in subparagraph (A) or (B) of paragraph (1) of subdivision (a) to a local detention facility in another jurisdiction unless subdivision (e) is complied with and notification and a written treatment plan are received by the chief medical officer of the local detention facility receiving the person.

(e) (1) Any discharge, release, or transfer described in subdivisions (a), (b), (c), and (d) may occur only after notification and a written treatment plan pursuant to Section 121362 has been received by the local health officer. When prior notification would jeopardize the person's health, the public safety, or the safety and security of the penal institution, the notification and treatment plan shall be submitted within 24 hours of discharge, release, or transfer.

(2) When a person described in paragraph (1) of subdivision (a) is released on parole from a state correctional institution, the notification and written treatment plan specified in this subdivision shall be provided to both the local health officer for the county in which the parolee intends to reside and the local health officer for the county in which the state correctional institution is located.

(3) Notwithstanding any other provision of law, the Department of Corrections shall inform the parole agent, and other parole officials as necessary, that the person described in paragraph (1) of subdivision (a) has active or suspected active tuberculosis disease and provide information regarding the need for evaluation or treatment. The parole agent and other parole officials shall coordinate with the local health officer in supervising the person's compliance with medical evaluation or treatment related to tuberculosis, and shall notify the local health officer if the person's parole is suspended as a result of having absconded from supervision.

(f) No health facility that declines to discharge, release, or transfer a person pursuant to this section shall be civilly or criminally liable or subject to administrative sanction therefor. This subdivision shall apply

only if the health facility complies with this section and acts in good faith.

(g) Nothing in this section shall relieve a local health officer of any other duty imposed by this chapter.

SEC. 5. Section 121362 of the Health and Safety Code is amended to read:

121362. Each health care provider who treats a person for active tuberculosis disease, each person in charge of a health facility, or each person in charge of a clinic providing outpatient treatment for active tuberculosis disease shall promptly report to the local health officer at the times that the health officer requires, but no less frequently than when there are reasonable grounds to believe that a person has active tuberculosis disease, and when a person ceases treatment for tuberculosis disease. Situations in which the provider may conclude that the patient has ceased treatment include times when the patient fails to keep an appointment, relocates without transferring care, or discontinues care. The initial disease notification report shall include an individual treatment plan that includes the patient's name, address, date of birth, tuberculin skin test results, pertinent radiologic, microbiologic, and pathologic reports, whether final or pending, and any other information required by the local health officer. Subsequent reports shall provide updated clinical status and laboratory results, assessment of treatment adherence, name of current care provider if the patient transfers care, and any other information required by the local health officer. A facility discharge, release, or transfer report shall include all pertinent and updated information required by the local health officer not previously reported on any initial or subsequent report, and shall specifically include a verified patient address, the name of the medical provider who has specifically agreed to provide medical care, clinical information used to assess the current infectious state, and any other information required by the local health officer. Each health care provider who treats a person with active tuberculosis disease, and each person in charge of a health facility or a clinic providing outpatient treatment for active tuberculosis disease, shall maintain written documentation of each patient's adherence to his or her individual treatment plan. Nothing in this section shall authorize the disclosure of test results for human immunodeficiency virus (HIV) unless authorized by Chapter 7 (commencing with Section 120975) of, Chapter 8 (commencing with Section 121025) of, and Chapter 10 (commencing with Section 121075) of Part 4 of Division 105.

In the case of a parolee under the jurisdiction of the Department of Corrections, the local health officer shall notify the assigned parole agent, when known, or the regional parole administrator, when there are

reasonable grounds to believe that the parolee has active tuberculosis disease and when the parolee ceases treatment for tuberculosis. Situations where the local health officer may conclude that the parolee has ceased treatment include times when the parolee fails to keep an appointment, relocates without transferring care, or discontinues care.

SEC. 6. Notwithstanding Section 17610 of the Government Code, if the Commission on State Mandates determines that this act contains costs mandated by the state, reimbursement to local agencies and school districts for those costs shall be made pursuant to Part 7 (commencing with Section 17500) of Division 4 of Title 2 of the Government Code. If the statewide cost of the claim for reimbursement does not exceed one million dollars ($1,000,000), reimbursement shall be made from the State Mandates Claims Fund.

EXHIBIT B

DEPARTMENT OF FINANCE

GRAY DAVIS, GOVERNOR

915 L STREET ■ SACRAMENTO CA ■ 95814-3706 ■ WWW.DOF.CA.GOV

November 3, 2003

Ms. Paula Higashi, Executive Director
Commission on State Mandates
980 Ninth Street, Suite 300
Sacramento, CA 95814

Dear Ms Higashi:

As requested in your letter of October 7, 2003, the Department of Finance has reviewed the test claim submitted by the County of Santa Clara (claimant) asking the Commission to determine whether specified costs incurred under Chapter 676, Statutes of 1993 (AB 803, Gotch), as amended by Chapter 685, Statutes of 1994 (AB 804, Gotch), Chapter 116, Statutes of 1997 (SB 362, Maddy), and Chapter 763, Statutes of 2002 (SB 843, Perata), are reimbursable state mandated costs (Claim No. CSM-03-TC-14 "Tuberculosis Control").

Commencing with Page 1 of the test claim, the claimant has identified a number of new activities related to the manner in which local health officers manage and control the spread and treatment of Tuburculosis within the State of California, which it asserts are reimbursable state mandates. As the result of our review, we have concluded that the referenced statutes may have resulted in a new State mandated program on the county. If the Commission reaches the same conclusion at its scheduled hearing on the matter, the nature and extent of the specific activities required can be addressed in the parameters and guidelines, which will then have to be developed for the program. We note that in our review of the proposed Parameters and Guidelines, we expect that the County will be very specific regarding actual activities necessary to comply with existing law, especially since the statutes are nearly ten years old.

As required by the Commission's regulations, we are including a "Proof of Service" indicating that the parties included on the mailing list, which accompanied your October 7, 2003 letter, have been provided with copies of this letter via either United States Mail or, in the case of other state agencies, Interagency Mail Service.

If you have any questions regarding this letter, please contact Mr. Tom Lutzenberger, Principal Program Budget Analyst at (916) 445-6423, or Mr. Keith Gmeinder, state mandates claims coordinator for the Department of Finance, at (916) 445-8913.

Sincerely,

Terrie G. Tatosian
Program Budget Manager

DECLARATION OF TOM LUTZENBERGER
DEPARTMENT OF FINANCE
CLAIM NO. CSM-03-TC-14

1. I am currently employed by the State of California, Department of Finance (Finance), am familiar with the duties of Finance, and am authorized to make this declaration on behalf of Finance.

2. We concur that the Chapter 676, Statutes of 1993, (AB 803, Gotch), as amended by Chapter 685, Statutes of 1994 (AB 804, Gotch), Chapter 116, Statutes of 1997 (SB 362, Maddy), and Chapter 763, Statutes of 2002 (SB 843, Perata), sections relevant to this claim are accurately quoted in the test claim submitted by claimants and, therefore, we do not restate them in this declaration.

I certify under penalty of perjury that the facts set forth in the foregoing are true and correct of my own knowledge except as to the matters therein stated as information or belief and, as to those matters, I believe them to be true.

RESPONSE TO DEPARTMENT OF FINANCE

On Original Test Claim
Chapter 676, Statutes of 1993, Chapter 685, Statutes of 1994, Chapter 294, Statutes of 1997, and Chapter 763, Statutes of 2002
Claim no. CSM-03-TC-14

Tuberculosis Control

The following are comments and responses to the letters of the Department of Finance, dated November 3, 2003, regarding the original test claim as submitted by the County of Santa Clara.

A. Department of Finance's Comments

"As the result of our review, we have concluded that the referenced statutes may have resulted in a new State mandated program and cost on the county. If the Commission reaches the same conclusion at its scheduled hearing on the matter, the nature and extent of the specific activities required can be addressed in the parameters and guidelines, which will then have to be developed for the program."

The Department of Finance has taken the position that a new state-mandated program may exist and thus is not in opposition to the position of the claimants.

CERTIFICATION

The foregoing facts are known to me personally and if so required, I could and would testify to the statements made herein. I declare under penalty of perjury under the laws of the State of California that the statements made in this document are true and complete to the best of my personal knowledge and as to all matters, I believe them to be true.

Executed this 29 day of January, 2004, at San Jose, California, by:

Dave Elledge
Controller-Treasurer
County of Santa Clara

PROOF OF SERVICE BY MAIL

I, the undersigned, declare as follows:

I am a resident of the County of Sacramento, and I am over the age of 18 years and not a party to the within action. My place of employment is 4320 Auburn Blvd., Suite 2000, Sacramento, CA 95841.

On February 5, 2004, I served:

RESPONSE TO DEPARTMENT OF FINANCE

On Original Test Claim
Chapter 676, Statutes of 1993, Chapter 685, Statutes of 1994, Chapter 294, Statutes of 1997, and Chapter 763, Statutes of 2002
Claim no. CSM-03-TC-14

Tuberculosis Control

by placing a true copy thereof in an envelope addressed to each of the persons listed on the mailing list attached hereto, and by sealing and depositing said envelope in the Untied States mail at Sacramento, California, with postage thereon fully prepaid.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct, and that this declaration was executed this 5th day of February, 2004, at Sacramento, California.

RECEIVED
AUG 2 5 2004
COMMISSION ON
STATE MANDATES

BEFORE THE COMMISSION ON STATE MANDATES

STATE OF CALIFORNIA

In the Matter of The Test Claim of the County of Santa Clara Tuberculosis Control September 23, 2003	DEPARTMENT'S HEARING BRIEF Claim No. 03-TC-14

Chapters 60, 102, 103, 104 & 106, Statutes of 1939; Chapter 205, Statutes of 1957; Chapter 676, Statutes of 1993, Chapter 685; Statutes of 1994, Chapter 294; Statutes of 1997; Chapter 116, Statutes of 1997; Chapter 763, Statutes of 2002

The Department contends that the test claim should fail for the following reasons:

1. Many of the claims do not meet the definition of "costs mandated by the state" (Gov. Code §17514), because many of the statutory requirements of the tuberculosis control program predate January 1, 1975. Much of the program was in place by 1957.

2. The county, through HOAC, requested this legislation (Gov. Code §17556(a). The Health Officer's Association of California (HOAC), the separate non-profit lobby body of the statutorily established California Conference of Local Health Officers (CCLHO), sponsored the Gotch Bill and three of the five subsequent amendments. All the statutory provisions at issue in this test claim were sponsored by HOAC, which could not have

sponsored them without the consent of the member counties. HOAC's request should be imputed to its member counties, under Government Code §17556(a).

3. The 1993 statute, and following revisions, require those due process rights, under the federal and state constitutions, which had been declared law by action of the courts. The 1993 statute sets forth due process rights that courts have concluded are required under Art. 1 §7(a) of the California Constitution and the Fifth and Fourteenth Amendment to the United States Constitution. (Gov. Code §17556(b)(c).) See Bloom v. State of Ill., U.S. Ill.1968, 88 S.Ct. 1477, 391 U.S. 194, 20 L.Ed.2d 522; U.S. v. Crouch, C.A.5("Tex.) 1966, 84F.3d 1497, certiorari denied 117 S.Ct. 736, 519 U.S. 1076, 136 L.Ed.2d 676.)

4. Non-criminal detention proceedings are discretionary (Health & Safety Code §§ 121365, 121366, 121367, 121368, 121369). Hearing costs that are incurred as a result of discretionary actions do not constitute a "new program or higher level of service" which would trigger the right to state reimbursement. (Gov. Code §17556(c).) (San Diego Unified School District v. Commission on State Mandates, 16 Cal.Rptr.3d. 466, 2004 WL 1715008 (Cal.) See also Department of Finance v. Commission on State Mandates, May 22, 2003, 30 Cal.4th 727.)

5. Offsetting savings in several areas may result in no net cost to the local agency (Gov. Code §17556(e)), for example, outpatient treatment instead of patient confinement in a facility, as required by 1939 and 1957 law; reduction in the number of TB examinations performed by the local health officer; Medi-Cal or Medicare subsidized health examinations for eligible beneficiaries; reduced exposure to monetary damages resulting from violation of due process rights.

6. Should the Commission determine that there is a "new program or higher level of service," cost to the local agency is minimal, (or drastically reduced) because the State has provided instructions, model documents & materials (hard copy and fill-in forms) both in hard copy and on-line.

////

I. THE COUNTIES ARE BARRED FROM RECOVERY OF COSTS BECAUSE THEY HAVE REQUESTED STATUTORY AUTHORITY TO IMPLEMENT THE TUBERCULOSIS PROGRAM (Gov. Code §17556(a))

HOAC (Health Officer's Association of California) sponsored the Gotch Bill (Ch. 676, Stat. 1993, AB 803) and three of the five subsequent amendments (Ch. 685, Stat. 1994, AB 804; Ch. 116, Stat. 1997, SB 362; Ch 763. Stat. 2002, SB 843).

Some of the provisions of the Gotch Bill, and these subsequent amendments, are the subject of this test claim.

HOAC (Health Officers Association of California) is the separate non-profit lobbying body of the California Conference of Local Health Officers (CCLHO), composed of all the CCLHO members. CCLHO is the statutorily established organization of all the Local Health Officers from the California counties (Health & Safety Code §§100925-100950).

HOAC could not have sponsored these bills without the consent of the member counties. Thus the Counties, through HOAC, sponsored the Gotch Bill.

Although there is no case law yet on this point, Gov. Code § 17556(a) should be imputed to the counties, because the statutory amendments were requested by their lobbying association, which represents them in the California Legislature.

II. EXAMINATIONS AND REVIEW OF REPORTS DOES NOT CONSTITUTE A NEW PROGRAM OR HIGHER LEVEL OF CARE (Gov. Code §17514)

(Health & Safety Codes §§ 121361, 121362, 121363, 121364)
(Cited statutes dated1993 to 2002.)

The local health officer (hereafter "LHO"), in most instances, is relieved of the responsibility to personally perform the examinations, but retains his authority to ensure all patients are treated. 1957 law directed the LHO to make examinations of persons known to be infected, or suspected of being infected with TB. (See Health & Safety Code

§3285(a) which remained unchanged in the l961 and l965 amendments, and until 1993.) Pre-1975 law also permitted persons to be examined by a licensed physician "under such terms and conditions as the health officer shall determine..." (§3285(c).

Health & Safety Code § 121361, in very broad outline, prohibits a health facility, local detention facility, or state correctional institution from transferring, discharging or releasing a known or suspected TB patient without a written treatment plan approved by the LHO. The LHO must review the treatment plans within 24 hours in most instances. Certain exceptions apply to transfers between facilities, correctional institutions, etc. Correctional institutions must notify the LHO and provide treatment plans for parolees released.

The requirement that the LHO review treatment plans and other documents is less burdensome than the previous requirement to examine the patients.

Health & Safety Code § 121362 sets forth, in detail, the required content of the reports which the LHO will review (the initial disease notification, including treatment plan, lab results, etc; subsequent reports, and facility discharge; release or transfer reports, etc.), and the records that must be maintained by the health care provider.

If the LHO were required to examine suspected TB patients, the LHO would, as a physician, write treatment plans meeting the standards described in §121362 (patient identifying information, observations, symptoms, lab results, etc.)

Health & Safety Code §121363 requires health care providers either to examine the patient for active TB or to refer him/her to the local health officer and to notify the local health officer of the referral. Non-household contacts & household contacts not examined by the health care provider shall be required to submit to examination by the LHO if so required by the LHO.

Likewise, it is not a higher level of service to require an LHO to examine patients referred by health care providers. Pre-1975 law (H&S §3285(a)(c)) required the

LHOs to examine persons suspected of infection with TB, and permitted examination by health care providers.

Health & Safety Code §121364 permits the LHO to order examinations (rather than perform them) and requires that order to be in writing. This may be a reduction in cost, since the LHO would not have to write a treatment plan, etc.

As stated above, pre-1975 law required the LHO to examine persons suspected of infection with TB. Even if some examinations are performed at publicly supported clinics, there may be an offsetting savings for those persons eligible for non-county public benefits such as Medi-Cal and Medicare.

III. DUE PROCESS RIGHTS UNDER NON-CRIMINAL PROCEEDINGS ARE NOT COSTS MANDATED BY THE STATE (Gov. Code §17556(b)(c))

Health & Safety Codes §§121365-121369 set forth the requirements for civil detention. Prior law permitted only criminal sanctions (prosecution for a misdemeanor) for violation of a LHO order in violation of quarantine, etc. (Health & Saf. §2602 (1939 law) and Health & Saf. Code § 3285(e), (pre-1975 law.) Due process rights under state and U.S. constitutions, would be enforced by an application for habeas corpus. In such an application, the court held that a tuberculosis patient is entitled to due process of law. (Application of Eric Halko, (App.2 Dist. 1966) 54 Cal.Rptr.661, 246 Cal.App.2d 553, 1966.)

Due process requirements of criminal law, as it has developed, including the notice, time limits, right to counsel, right to an interpreter, etc., are set forth in the new civil detention statutes. However, these rights would also apply today in the criminal courts. The due process rights set forth in these non-criminal proceedings are similar to those now required in criminal proceedings. Other than a clarification of court-established due process rights, the only significant difference between 1993 and

pre-1975 statutes is that mandatory detention may be provided in a civil (non-criminal) setting.

There should be no increased costs to provide due process rights in the civil proceeding, instead of the criminal setting. Even should it be found that it is more costly than criminal prosecution, the number of tuberculosis patients requiring such actions should be minimal.

Additionally, most of §121365 is included in pre-1975 law. (See Health & Saf. Code §§3285(b)(c)(d)(f).)

Costs may potentially be reduced under the new non-criminal procedure.

IV. HEARINGS COSTS THAT ARE INCURRED AS A RESULT OF DISCRETIONARY ACTIONS ARE NOT A "NEW PROGRAM OR HIGHER LEVEL SERVICE" (Gov. Code §17556(b)(c))

Costs resulting from the discretionary action of the LHO in civil detention of a tuberculosis patient would not constitute a "new program or higher level of service." (See (San Diego Unified School District v. Commission on State Mandates, 16 Cal.Rptr.3d. 466, 2004 WL 1715008 (Cal.) See also Department of Finance v. Commission on State Mandates, May 22, 2003, 30 Cal.4th 727.)

Civil detention of tuberculosis patients is a series of discretionary actions by the LHO. (Health & Saf. Code §§121365-121369.) The LHO still has available to him/her the criminal enforcement provisions. (Health & Saf. §§2600, 2602(1939 law); §3285(d)(e)(f)(pre-l975 law), §121365 current law).)

Health & Safety Code §121365 requires the LHO to investigate reported or suspected TB. The LHO **shall** follow applicable local and state law in doing so (See §2555, §3285(b) (1957). The LHO **may** issue any orders he/she deems necessary and **may** apply to the court for enforcement of the order. (See also §3285(d)(e), §3350, 3351, 3354, 3355) (1957).)

The LHO **shall** advise the district attorney of violations in writing and submit all the information to the district attorney. This mandatory language is contained in 1957 law (§3285(e)). The order **may** include various listed measures. The order **may** include various listed measures. Other requirements of §121365 are triggered by the LHO's discretionary action: "...the LHO **may** issue any orders he deems necessary... **may** apply to court for enforcement of the order(s)...If the order is violated, the LHO **shall** advise the district attorney."

Health & Safety Code §121366 states that the LHO **may** detain a person in a hospital or other appropriate place. Due process rights are listed here.

Health & Safety Code §121367 describes the (minimum) required contents of an order pursuant to §121365, and includes time limits for review, notice of right to counsel, etc., should the LHO choose to exercise his discretion under §121366.

Health & Safety Code §121368 states that **if** a person is detained pursuant to §121365(a) (for examination) the person cannot be detained, without a court order, beyond the minimum time required for examination, unless he/she meets the requirements of §121365(d)(e), without obtaining a court order.

Health & Safety Code §121369 requires language interpreters and persons skilled in communicating with vision/hearing impaired individuals, in accordance with applicable law. This requirement is triggered only by the discretionary action of the local health officer pursuant to §§121365.

V. OFFSETTING SAVINGS RESULT IN NO NEW COSTS (Gov. Code §17556(e))

1. Costs of the mandated services are wholly or partially offset by reduction in costs of other services. These include:

a. Outpatient treatment of TB patients without the cost of confinement will reduce costs per patient. Confinement was the only option under 1939, 1957 (pre-1975) law.

b. Reduction in TB examinations performed by LHO (with requirement under good medical practice of creating treatment plans, etc.).

c. Advent of Medi-Cal, Medicare, subsequent to 1957 law, will reduce cost burden of examination, outpatient treatment for indigents.

2. Delineation of due process rights in statute decreases potential liability to the local jurisdiction.

The case of Souvannarath v. Hadden (95 Cal. App.4th, 1115(2002) cost Fresno County several million dollars or more. That case was decided on more narrow grounds, but the court commented unfavorably on the complete lack of due process.

3. Documents, model forms, resource materials, etc., provided by the State, mostly through contractors, reduce requirements to generate documents from scratch, ensure accurate information, thus reducing costs. (Exhibit 9 contains a sample of materials developed by the Public Health Institute (PHI) under a contract with the state. See www.phlaw.org.) These include a Model Civil Detention Order, and related forms. Additionally, in 2000 DHS has sent hard copy or email model forms and other documents (the CDHS/CTCA Joint Guidelines, Civil Detention Plan, Informational Binder). Binder included the current statues, requirements and forms to claim reimbursement from the state (these documents not attached). Sample Patient Assessments and sample orders are supplied for use by local health officers in writing their own patient assessments and orders. Model Legal Orders for TB (2004) includes (1) model legal order form for civil detention of persistently non-adherent tuberculosis (TB) patients and

///

///

///

///

///

///

(2) recommendations concerning constitutional protections that could be afforded TB patients who receive legal orders for work exclusion and home isolation. (Not all documents are attached.)

Respectfully submitted,

JEANETTE L. SMITH

Ex. 1

CHAPTER 6. QUARANTINE OF DISEASES.

Article 1. Definitions.

"Health officer."

2500. "Health officer," as used in this chapter, includes county, town, city, and district health officers, and city and district health boards, but does not include advisory health boards.

Article 2. Functions of State Department.

Places of quarantine.

2521. The State department may establish and maintain places of quarantine or isolation.

2522. The State department may quarantine, isolate, inspect, and disinfect persons, animals, houses, rooms, other property, places, cities, or localities, whenever in its judgment such action is necessary to protect or preserve the public health. Persons and objects.

2523. The State department may destroy bedding, carpets, household goods, furnishings, materials, clothing, or animals, which, in its judgment, are an imminent menace to the public health. Destruction of objects.

2524. Upon being informed by a health officer of any contagious, infectious, or communicable disease the State department may take such measures as are necessary to ascertain the nature of the disease and prevent its spread. To that end, the State department may, if it considers it proper, take possession or control of the body of any living person, or the corpse of any deceased person. Additional measures.

Article 3. Functions of Health Officers.

2554. Each health officer and coroner, knowing or having reason to believe that any case of cholera, plague, yellow fever, malaria, leprosy, diphtheria, scarlet fever, smallpox, typhus fever, typhoid fever, paratyphoid fever, anthrax, glanders, epidemic cerebro-spinal meningitis, tuberculosis, pneumonia, dysentery, erysipelas, uncinariasis or hookworm, trachoma, dengue, tetanus, measles, German measles, chickenpox, whooping cough, mumps, pellagra, beriberi, Rocky Mountain spotted (or tick) fever, syphilis, gonococcus infection, rabies, poliomyelitis, or any other contagious or infectious disease exists, or has recently existed, within the territory under his jurisdiction, shall take such measures as may be necessary to prevent the spread of the disease. Duty to prevent spread of certain diseases.

2555. Every health officer shall enforce all orders, rules, and regulations concerning quarantine prescribed or directed by the State department. Enforcement of laws and rules.

2556. Each health officer, whenever required by the State department, shall establish and maintain places of quarantine or isolation that shall be subject to the special directions of the State department. Places of quarantine.

2557. No quarantine shall be established by a county or city against another county or city without the written consent of the State department. Quarantine against another city or county.

2558. Whenever in the judgment of the State department it is necessary for the protection or preservation of the public health, each health officer shall, when directed by the State department, do the following: Instructions of State department.

(a) Quarantine and disinfect persons, animals, houses or rooms, in accordance with general and specific instructions of the State department.

(b) Destroy bedding, carpets, household goods, furnishings, materials, clothing, or animals, when ordinary means of disinfection are considered unsafe, and when the property is, in the judgment of the State department, an imminent menace to the public health.

Compensation for destroyed property.

When property is destroyed pursuant to this section, the governing body of the locality in which the destruction occurs may make adequate provision for compensation in proper cases for those injured thereby.

Quarantine.

2559. Upon receiving information of the existence of: Asiatic cholera, yellow fever, typhus fever, plague, smallpox, scarlet fever, diphtheria, or any other contagious, infectious, or communicable disease that the State department may from time to time declare quarantinable, each health officer shall:

(a) Quarantine each case.

(b) Follow local rules and regulations, and all general and special rules, regulations, and orders of the State department, in carrying out the quarantine.

Report of quarantine.

2560. Each health officer who establishes any quarantine shall promptly transmit to the State department a copy of all quarantine rules, orders, and regulations, and of all subsequent changes in them, adopted by him.

Notice of quarantine.

2561. When all or any part of a building, house, structure, tent, or other place is quarantined because of a contagious, infectious, or communicable disease, the health officer shall fasten firmly on its most conspicuous part a yellow placard, upon which shall be printed the following words:

"Keep out. These premises have been quarantined by order of the ------. Note—Under the provisions of the Health and Safety Code of the State of California anyone entering or leaving these premises without the permission of the health officer is guilty of a misdemeanor."

The word "quarantined" shall be printed in plain and legible letters at least two and one-half inches in height.

The placard shall not be removed except by the health officer, nor shall it be defaced or obscured.

Quarantine rules.

2562. When quarantine is established by a health officer, all persons shall obey his rules, orders, and regulations.

Obedience to quarantine.

2563. A person subject to quarantine, residing or in a quarantined building, house, structure, or tent, shall not go beyond the lot upon which the building, house, structure, or tent is situated, nor put himself in immediate communication with any person not subject to quarantine, other than the health officer and the physician. The health officer main-

taining the quarantine shall appoint, or have appointed, a suitable person to perform necessary outside services for the necessary wants of the persons quarantined. The person appointed shall not enter the building, house, structure, or tent, nor shall he come in personal contact with any of the persons quarantined. He shall leave at the entrance of the building, house, structure, or tent, or at such other place as may be designated by the health officer, all articles that he may bring thereto. He shall strictly observe the orders of the health officer.

Exclusion of diseased person from school.

2564. No instructor, teacher, pupil, or child affected with any contagious, infectious, or communicable disease that is quarantined, or that is subject to being quarantined or reported, or who resides in any house, building, structure, tent, or other place where the disease exists or has recently existed, shall be permitted by any superintendent, principal, or teacher of any college, seminary, or public or private school to attend the college, seminary, or school, except by the written permission of the health officer.

Disinfection.

2565. No quarantine shall be raised until every exposed room, together with all personal property in the room, has been thoroughly disinfected, or, if necessary, destroyed, by or under the direction of the health officer; and until all persons quarantined have taken a thorough antiseptic bath and have put on clothing free from contagion.

Removal of milk bottles from quarantined area.

2566. No milk man shall remove milk bottles or other receptacles for milk from any building, house, structure, tent, or other place in which a contagious, infectious, or communicable disease exists or has existed, nor from any place within any quarantined district, nor at any time after a quarantine has been removed, without the written permission of the health officer; and until the milk bottles or other receptacles have been disinfected and cleaned to the satisfaction of that officer.

Person from quarantined place not to deal in milk.

2567. It is unlawful for any milkman, milk dealer, or milk distributor in whose house any case of cholera, typhus fever, plague, scarlet fever, diphtheria, membranous croup, leprosy, anthrax, glanders, cerebro-spinal meningitis, whooping cough, typhoid fever, dysentery, trachoma, or tetanus exists, to continue the sale or distribution of milk until the health officer has appointed, at the expense of the county where the milkman, dealer, or distributor lives, a person to superintend his dairy, or other place where or from which he sells, delivers, or distributes milk, and all his cows, bottles, vessels, and milk utensils. The person appointed shall strictly require that any person attending to the cows, dairy, sheds, milk cans, bottles, vessels, and milk utensils, shall not have access to, nor have any communication with the persons who reside in, the

infected house, except with the permission and under the inspection of the health officer.

Reports.

2568. In case of a local epidemic of disease, the health officer shall report at such times as are requested by the State department all facts concerning the disease, and the measures taken to abate and prevent its spread.

Telegraphic reports.

2569. Each health officer shall immediately report by telegraph to the State department every discovered or known case of plague, Asiatic cholera, yellow fever, or typhus fever. Within twenty-four hours after investigation he shall report the cause, source, and extent of contagion and infection, and all acts done and measures adopted. He shall also make such further reports as the State department may require.

Report of new cases.

2570. Each health officer placing any case under quarantine shall, within twenty-four hours thereafter, report it fully, in writing, to the State department.

Reportable diseases.

2571. The following shall be properly reported in writing to the State department by the health officer:

Chicken-pox, erysipelas, pneumonia, epilepsy, uncinariasis, or hookworm, epidemic cerebro-spinal meningitis, trachoma, whooping-cough, mumps, dengue, dysentery, tuberculosis, typhoid fever, tetanus, malaria, leprosy, measles, German measles, glanders and anthrax affecting human beings, rabies, pellagra, beri-beri, syphilis, gonococcus infection, poliomyelitis, and any other disease which appears to have become epidemic.

This list of reportable diseases may be changed at any time by the State department.

When to be quarantined.

The diseases enumerated in this section, and such others as from time to time may be added by the State department, shall be quarantined whenever in the opinion of the State department that action is necessary for the protection of the public health, and shall be isolated whenever in the opinion of the department or health officer, isolation is necessary for the protection of the public health.

(Amended by Stats. 1939, Ch. 375.)

[ORIGINAL SECTION.]

2571. The following shall be properly reported in writing to the State department by the health officer:

Chicken-pox, erysipelas, pneumonia, uncinariasis or hookworm, epidemic cerebro-spinal meningitis, trachoma, whooping-cough, mumps, dengue, dysentery, tuberculosis, typhoid fever, tetanus, malaria, leprosy, measles, German measles, glanders and anthrax affecting human beings, rabies, pellagra, beri-beri, syphilis, gonococcus infection, poliomyelitis, and any other disease which appears to have become epidemic.

This list of reportable diseases may be changed at any time by the State department.

The diseases enumerated in this section, and such others as from time to time may be added by the State department, shall be quarantined whenever in the opinion of the State department that action is necessary for the protection of the public health, and shall be isolated whenever in the opinion of the department or health officer, isolation is necessary for the protection of the public health.

Written report.

2572. Each health officer, other than a county health officer, in the county shall transmit to the county health officer at least weekly in writing a report showing the number and character of infectious, contagious, or communicable diseases reported, and their location.

Report to health officer.

2573. All physicians, nurses, clergymen, attendants, owners, proprietors, managers, employees, and persons living, or visiting any sick person, in any hotel, lodging house, house, building, office, structure, or other place where any person is ill of any infectious, contagious, or communicable disease, shall promptly report that fact to the health officer, together with the name of the person, if known, the place where he is confined, and the nature of the disease, if known.

Application of sections to quarantine.

2574. Unless otherwise directed by the State department, sections 2559, 2561 to 2563, inclusive, 2565 to 2567 inclusive, and 2569 to 2571, inclusive, of this chapter shall be strictly observed in all cases of quarantine.

Article 4. Violations.

Penalty for violation of rule.

2600. Any person who, after notice, violates, or who, upon the demand of any health officer, refuses or neglects to conform to, any rule, order, or regulation prescribed by the State department respecting a quarantine or disinfection of persons, animals, things, or places, is guilty of a misdemeanor.

Wilful exposure.

2601. Except in the case of the removal of an afflicted person in a manner the least dangerous to the public health, any person afflicted with any contagious, infectious, or communicable disease who wilfully exposes himself; and any person who wilfully exposes another person afflicted with such disease in any public place or thoroughfare is guilty of a misdemeanor.

Penalty.

2602. Any person who violates any section in article 3 of this chapter, with the exception of 2555, is guilty of a misdemeanor, punishable by a fine of not less than twenty-five nor more than five hundred dollars, or by imprisonment for a term of not more than ninety days, or by both. He is guilty of a separate offense for each day that the violation continues.

Chapter 8. Pest Abatement Districts.

Article 1. Definitions and General Provisions.

"Pest."

2800. "Pest," as used in this chapter includes any plant, animal, insect, fish, or other matter or material, not under human control, which is offensive to the senses or interferes with the comfortable enjoyment of life, and is not protected under any other provision of law, and includes any plant that

Withdrawal of funds.

2873. The funds of the district shall be withdrawn from the treasury upon the warrant of the district board.

Transfer of funds.

2874. The board of supervisors, from time to time, may order a temporary transfer of money from other available funds in the county treasury to the credit of the district fund. The transfer shall be made only upon resolution adopted by the board of supervisors directing the treasurer to make the transfer. It shall not exceed eighty-five per cent of the taxes accruing to the district, and shall not be made prior to the first day of the fiscal year nor after the last Monday in April of the current fiscal year. Any funds transferred shall be replaced from the taxes accruing to the district before any other obligation of the district is met from those taxes.

Article 5. Annexation.

Annexation.

2900. At any time after the incorporation of a district, land contiguous to it may be annexed upon a petition of the owner, if the board of supervisors finds that the annexation will benefit both the land to be annexed and the district.

Article 6. Dissolution.

Petition.

2920. Upon the application of registered voters in the district equal to the number required for a petition to initiate proceedings for the formation of the district, the board of supervisors may, after notice of hearing published in the manner prescribed in this chapter for the notice of a hearing on the organization petition, dissolve the district, if it appears to the board that the dissolution is proper. The dissolution of a district shall not have any effect on any taxes previously levied.

Ex-officio board.

2921. Upon the dissolution the board of supervisors shall succeed to all the powers and jurisdiction of the district board for the purpose of winding up the affairs of the district. It may continue to levy such taxes as are necessary in winding up the affairs of the district.

Obligations.

2922. No district shall be finally dissolved until all outstanding obligations of the district, including the repayment of funds transferred to the credit of the district from other funds of the county, have been fully paid and discharged.

DIVISION IV. TUBERCULOSIS.

CHAPTER 1. PREVENTORIA.

Expenditures declared proper.

3099. Pulmonary tuberculosis is an infectious and communicable disease, dangerous to the public health, and all proper expenditures that may be made by any county, pur-

suant to this chapter, are necessary for the preservation of the public health of the county, within the meaning of sections 450 to 456.

Subsidy.

3100. Each city, county, or group of counties which maintains a tuberculosis ward or hospital for the treatment of persons suffering from tuberculosis and maintains a preventorium in conjunction therewith, shall receive from the State the sum of three dollars per week for each patient cared for in the preventorium at public expense who:

(a) Is susceptible to tuberculosis.

(b) Is unable to pay for his support.

(c) Has no relative legally liable and financially able to pay for his support.

(d) Has been for one year a bona fide resident of the city, county, or of one of the counties of the group of counties.

(e) Is a citizen of the United States.

No city, county, or group of counties shall be entitled to receive the State aid unless the tuberculosis preventorium conforms to the regulations of, and is approved by, the State department.

(Amended by Stats. 1939, Ch. 1070.)

[ORIGINAL SECTION.]

3100. Each city, county, or group of counties which maintains a tuberculosis ward or hospital for the treatment of persons in the active stages of tuberculosis and maintains a preventorium in conjunction therewith, shall receive from the State the sum of three dollars per week for each patient cared for in the preventorium at public expense who:

(a) Is susceptible to tuberculosis.

(b) Is unable to pay for his support.

(c) Has no relative legally liable and financially able to pay for his support.

(d) Has been for one year a bona fide resident of the city, county, or of one of the counties of the group of counties.

(e) Is a citizen of the United States.

No city, county, or group of counties shall be entitled to receive the State aid unless the tuberculosis preventorium conforms to the regulations of, and is approved by, the State department.

Reports.

3101. The medical superintendent of each preventorium receiving State aid under this chapter shall render semi-annually to the State department a report under oath showing for the period covered by the report:

(a) The number of persons susceptible to tuberculosis cared for at public expense and unable to pay for care.

(b) The number of weeks each such patient has been treated.

CHAPTER 2. HOSPITALS.

Subsidy.

3300. Each city, county, or group of counties may establish and maintain a tuberculosis ward or hospital for the treatment of persons suffering from tuberculosis. Each city, county, or group of counties that establishes and maintains a tuberculosis ward or hospital shall receive from the State the sum of three dollars per week for each person suffering from tuberculosis, cared for therein at public expense, who

is unable to pay for his support and who has no relative legally liable and financially able to pay for his support and who has been a bona fide resident of the State for one year; except that the city, county, or group of counties is not entitled to receive this State aid unless the tuberculosis ward or hospital conforms to the regulations of and is approved by the Bureau of Tuberculosis.

The hospitals shall be allowed to receive pay patients. Pay patients.

(Amended by Stats. 1939, Ch. 1070.)

[ORIGINAL SECTION.]

3300. Each city, county, or group of counties may establish and maintain a tuberculosis ward or hospital for the treatment of persons in the active stages of tuberculosis. Each city, county, or group of counties that establishes and maintains a tuberculosis ward or hospital shall receive from the State the sum of three dollars per week for each person suffering from tuberculosis, cared for therein at public expense, who is unable to pay for his support and who has no relative legally liable and financially able to pay for his support and who has been a bona fide resident of the State for one year; except that the city, county, or group of counties is not entitled to receive this State aid unless the tuberculosis ward or hospital conforms to the regulations of and is approved by the bureau of tuberculosis.

The hospitals shall be allowed to receive pay patients.

3301. The medical superintendent of each hospital receiving State aid under this chapter shall render semiannually to the bureau of tuberculosis a report under oath showing, for the period covered by the report: Reports.

(a) The number of patients suffering from tuberculosis cared for at public expense, and unable to pay for care.

(b) The number of weeks of treatment of each such patient.

With the consent of the respective cities, counties, or groups of counties, an exchange of patients may be arranged through the bureau of tuberculosis without expense to the county except for transportation when the exchange seems necessary or desirable to assist in the patients' recovery. Exchange of patients.

3302. Each group of counties desiring to establish and maintain a tuberculosis ward or hospital for the treatment of persons suffering from tuberculosis shall appoint, by its board of supervisors, one supervisor as a delegate, who shall attend the general meetings of the delegates of each county in the group. The necessary expense incurred in attending such meetings is a county charge. The body thus formed shall be called the hospital central committee. Hospital central committee.

3303. Each group of counties maintaining a tubercular hospital under this chapter may by unanimous agreement provide for a different number of delegates to the hospital central committee than the number provided for in this chapter and may provide for a method of deciding a tie vote of the hospital central committee. Number of delegates.

3304. The hospital central committee shall designate a county within the group maintaining the hospital as the place Depository.

where the business of the hospital is to be transacted and where funds of the hospital are to be kept and deposited. All county officers selected for the business of the hospital shall render all necessary assistance required by the committee in keeping with the duties of their respective offices.

Cost.

3305. The delegates from each county may enter into an agreement with delegates from the other counties, on behalf of the county appointing them, binding the county to the joint enterprise and apportioning the cost of constructing, establishing, and maintaining the hospital. Money due from any county under the agreement may be collected by the hospital central committee or, on its behalf, by the board of supervisors of any county in the group, by action in the county in which the hospital is situated.

Building committee.

3306. The hospital central committee may appoint a committee to supervise the construction of the hospital, approve the bills, and do the usual things required of a building committee.

Powers of hospital central committee.

The hospital central committee is the governing body of the hospital. It has the same powers and duties in regard to the hospital that a board of supervisors has over a county hospital. It shall adopt rules for its government, which shall include provisions for holding meetings and for the addition of other counties to the group. It may appoint such committees as are necessary, and shall prescribe their duties.

Land.

3307. Any land required may be acquired or disposed of by the hospital central committee in such manner as may be determined by a three-fourths vote of its members, if all counties comprising a group shall have had notice of the intention to acquire or dispose of the land. Title to land may be held in the name of the entire group or in the name of any county composing the group, as trustee for the use and benefit of all, as may be determined by the hospital central committee.

Expenses.

3308. Each county in the group shall pay its proportionate share to the hospital central committee of an amount designated by the committee to constitute a cash revolving fund to carry on the usual work and expense of the hospital. Each month a statement of the expenses of the hospital shall be sent to the board of supervisors of each county, together with a claim for its proportionate share of the expenses. The amounts when collected shall be paid into the cash revolving fund.

Admission of patients.

3309. The hospital central committee may determine and pass upon the right of admission to the hospital of applicants, subject to the limitations of this chapter.

CHAPTER 3. CONVALESCENT COLONIES.

(Ch. 3 added by Stats. 1939, Ch. 919.)

Subsidy. 3325. Each city, city and county, county or group of counties which maintains a convalescent colony for the care and treatment of persons suffering from tuberculosis shall receive from the State the sum of $3 per week for each person suffering from tuberculosis, cared for in the convalescent colony at public expense, who is unable to pay for his own support and who has no relative legally liable and financially able to pay for his support, and who has been a bona fide resident of the State for one year.

No city, city and county, county or group of counties shall be entitled to receive the State aid unless the convalescent colony conforms to the regulations of, and is approved by the Bureau of Tuberculosis in the Department of Public Health.

(Added by Stats. 1939, Ch. 919.)

Reports. 3326. The superintendent of each convalescent colony receiving State aid under this chapter, shall render semi-annually to the Bureau of Tuberculosis in the Department of Public Health a report under oath showing for the period covered by the report:

a. The number of persons suffering from tuberculosis cared for therein at public expense and unable to pay for their care.

b. The number of weeks each such person has been cared for.

(Added by Stats. 1939, Ch. 919.)

CHAPTER 4. PAYMENT AND EXPENDITURES OF SUBSIDY FUNDS.

(Ch. 4 added by Stats. 1939, Ch. 919.)

Fund. 3340. In order to be eligible to receive State funds made available by this division on or after July 1, 1940, the governing body of each city, county, city and county, or group of counties entitled thereto shall establish a "special tuberculosis subsidy fund."

(Added by Stats. 1939, Ch. 919.)

Use of fund. 3341. All amounts paid to any city, county, city and county or group of counties in accordance with the provisions of this division shall be deposited in the "special tuberculosis subsidy fund." Such moneys shall be expended by the city, county, city and county or group of counties receiving it exclusively for the care and treatment of persons suffering from tuberculosis, and in the maintenance, construction or acquisition of facilities or supplies necessary for the care and treatment of such persons.

(Added by Stats. 1939, Ch. 919.)

Cause for denial of subsidy.

3342. The failure to comply with any of the provisions of this chapter shall constitute sufficient reason to deny further payments of State funds accruing to any city, county, city and county or group of counties under this division.

(Added by Stats. 1939. Ch. 919.)

DIVISION V. SANITATION.

PART 1. SANITARY PROVISIONS.

CHAPTER 1. COMMON DRINKING CUPS.

Common drinking cups.

3700. No person conducting, having charge of, or control of, any hotel, restaurant, saloon, soda fountain, store, theater, public hall, public or private school, church, hospital, club, office building, park, playground, lavatory or washroom, barber shop, railroad train, boat, or any other public place, building, room, or conveyance, shall provide or expose for common use, or permit to be so provided or exposed, or allow to be used in common, any cup, glass, or other receptacle used for drinking purposes.

"Common use."

3701. For the purposes of this chapter the term "common use" when applied to a drinking receptacle is defined as its use for drinking purposes by, or for, more than one person without its being thoroughly cleansed and sterilized in boiling water or steam between consecutive uses thereof; except, that the State Department of Public Health may prescribe other acceptable methods of sterilization that may be used in place of the methods specified in this chapter.

Sterilization.

Water containers.

3702. No cask, water cooler, or other receptacle shall be used for storing or supplying drinking water to the public or to employees unless it is covered and protected so as to prevent persons from dipping the water therefrom or contaminating the water. All containers shall be provided with a faucet or other suitable device for drawing the water; except that jugs, cans, buckets, and similar receptacles without faucets or other devices for withdrawing water may be used if the water is protected against contamination and is withdrawn by pouring only.

Enforcement.

3703. The State department and all health officers of counties, cities, and health districts shall enforce the provisions of this chapter.

Penalties.

3704. Violation of any provision of this chapter is a misdemeanor punishable by a fine not exceeding twenty-five dollars for each offense.

Ex. 2

CHAPTER 205

An act to repeal Sections 112, 114, 252.6, 252.7, 301, 375, 376, 377, 401, 451.5, 453, 455, 478, 486, 505, 506, 507, 508, 509, 28477, and 28714, and Article 7 (Sections 410-414, inclusive) of Chapter 2 of Part 1 of Division 1; Article 3 (Sections 491-493, inclusive) of Chapter 1 of Part 2 of Division 1; Chapter 4 (Sections 800-811, inclusive) of Part 2 of Division 1, Chapters 1 (Sections 1700-1703, inclusive) and 6 (Sections 2500-2603, inclusive) of Division 3, Division 4 (Sections 3099-3342, inclusive), Division 16 (Sections 21000-21409, inclusive), and Chapter 3 (Sections 24380-24385, inclusive) of Division 20, of the Health and Safety Code; to amend and renumber Sections 116, 204, 212, 302, 303, and 304 of said code; to amend Sections 211, 300, 374, 400, 450, 500, 502, 1602, 1603, 1605, 1622, 3701, 3702, 3801, 3901, 3954, 4001, 4002, 25003, 26235, 26366.5, 26472, 26541, 26542, 26586.5, 28224, and 28295, and the title of Article 3, Chapter 2, Part 1, Division 1, and the title of Article 5, Chapter 2, Part 1, Division 1, and the title of Division 3, of said code; to add Article 7 (Section 410) to Chapter 2, Part 1, Division 1, Chapter 6 (Sections 1685 and 1686) to Division 2, Division 4 (Sections 3000-3355, inclusive), to said code; relating to the preservation of the public health and safety, including the health and safety of persons, the custody and disposition of dead bodies, the safety and protection of property, and matters incidental thereto.

(Prepared pursuant to Senate Resolution 101, General Session of 1955, to revise and consolidate the public health statutes.)

In effect September 11, 1957

[Approved by Governor April 23, 1957. Filed with Secretary of State April 24, 1957.]

The people of the State of California do enact as follows:

Repeals

SECTION 1. Sections 112, 114, 252.6, 252.7, 301, 375, 376, 377, 401, 451.5, 453, 455, 478, 486, 505, 506, 507, 508, 509, 28477, and 28714, and Article 7 (Sections 410-414, inclusive) of Chapter 2 of Part 1 of Division 1, Article 3 (Sections 491-493, inclusive) of Chapter 1 of Part 2 of Division 1, Chapter 4 (Sections 800-811, inclusive) of Part 2 of Division 1, Chapters 1 (Sections 1700-1703, inclusive) and 6 (Sections 2500-2603, inclusive) of Division 3, Division 4 (Sections 3099-3342, inclusive), Division 16 (Sections 21000-21409, inclusive), and Chapter 3 (Sections 24380-24385, inclusive) of Division 20, of the Health and Safety Code are repealed.

SEC. 2. Section 204 of the Health and Safety Code is renumbered and amended to read:

Biological products

375. It may prepare or purchase biological products and distribute them at cost.

SEC. 3. Section 211 of said code is amended to read:

Special investigations

211. It shall cause special investigations of the sources of morbidity and mortality and the effects of localities, employ-

DIVISION 3. PEST ABATEMENT

SEC. 20. Division 4, comprising Sections 3000 to 3355, inclusive, is added to said code, to read:

DIVISION 4. COMMUNICABLE DISEASE PREVENTION AND CONTROL

CHAPTER 1. GENERAL PROVISIONS AND DEFINITIONS

"Health officer"

3000. "Health officer," as used in this division, includes county, city, and district health officers, and city and district health boards, but does not include advisory health boards.

"Venereal diseases"

3001. As used in this division, "venereal diseases" means syphilis, gonorrhea, chancroid, lymphopathia venereum, and granuloma inguinale.

CHAPTER 2. FUNCTIONS OF STATE DEPARTMENT

Quarantine Places

3050. The state department may establish and maintain places of quarantine or isolation.

Same Persons, etc.

3051. The state department may quarantine, isolate, inspect, and disinfect persons, animals, houses, rooms, other property, places, cities, or localities, whenever in its judgment such action is necessary to protect or preserve the public health.

Destruction of contaminated objects, animals, etc

3052. The state department may destroy such objects as bedding, carpets, household goods, furnishings, materials, clothing, or animals, when ordinary means of disinfection are considered unsafe, and when the property is in its judgment, an imminent menace to the public health.

Investigation

3053. Upon being informed by a health officer of any contagious, infectious, or communicable disease the state department may take such measures as are necessary to ascertain the nature of the disease and prevent its spread. To that end, the state department may, if it considers it proper, take possession or control of the body of any living person, or the corpse of any deceased person.

CHAPTER 3. FUNCTIONS OF HEALTH OFFICERS

Prevention of epidemic or recurrence

3110. Each health officer knowing or having reason to believe that any case of the diseases made reportable by regulation of the Board of Public Health, or any other contagious, infectious or communicable disease exists, or has recently existed, within the territory under his jurisdiction, shall take such measures as may be necessary to prevent the spread of the disease or occurrence of additional cases.

Orders, etc., of state department

3111. Each health officer shall enforce all orders, rules, and regulations concerning quarantine or isolation prescribed or directed by the state department.

Quarantine Places

3112. Each health officer, whenever required by the state department, shall establish and maintain places of quarantine or isolation that shall be subject to the special directions of the state department.

Limitation

3113. No quarantine shall be established by a county or city against another county or city without the written consent of the state department.

State department directives

3114. Whenever in the judgment of the state department it is necessary for the protection or preservation of the public health, each health officer shall, when directed by the state department, do the following:

(a) Quarantine or isolate and disinfect persons, animals, houses or rooms, in accordance with general and specific instructions of the state department.

(b) Destroy bedding, carpets, household goods, furnishings, materials, clothing, or animals, when ordinary means of disinfection are considered unsafe, and when the property is, in the judgment of the state department, an imminent menace to the public health.

When the property is destroyed pursuant to this section, the governing body of the locality in which the destruction occurs may make adequate provision for compensation in proper cases for those injured thereby.

Strict isolation, etc

3115. Upon receiving information of the existence of contagious, infectious, or communicable disease for which the state department may from time to time declare the need for strict isolation or quarantine, each health officer shall:

(a) Insure the adequate isolation of each case, and appropriate quarantine of the contacts and premises

(b) Follow local rules and regulations, and all general and special rules, regulations, and orders of the state department, in carrying out the quarantine or isolation.

3116. When quarantine or strict isolation is established by a health officer, all persons shall obey his rules, orders, and regulations.

Persons

3117. A person subject to quarantine or strict isolation, residing or in a quarantined building, house, structure, or other shelter, shall not go beyond the lot upon which the building, house, structure, or other shelter is situated, nor put himself in immediate communication with any person not subject to quarantine, other than the physician, the health officer or persons authorized by the health officer.

Schools

3118. No instructor, teacher, pupil, or child who resides where any contagious, infectious, or communicable disease exists or has recently existed, which is subject to strict isolation or quarantine of contacts, shall be permitted by any superintendent, principal, or teacher of any college, seminary, or public or private school to attend the college, seminary, or school, except by the written permission of the health officer.

Raising of quarantine

3119. No quarantine shall be raised until every exposed room, together with all personal property in the room, has been adequately treated, or, if necessary, destroyed, under the direction of the health officer; and until all persons having been under strict isolation are considered noninfectious.

Diseases transmitted by milk, dairies, etc.

3120. When there occurs in the household of any dairy worker, milkman, milk dealer, milk distributor, creamery worker, or pasteurizing plant operator, a case or a suspected case of diphtheria, salmonellosis, shigellosis (dysentery), typhoid fever, streptococcal infection, or any other disease known to be or suspected of being transmitted by milk, the sale or distribution of milk from those premises shall be prohibited unless written authorization for its sale or distribution is given by the health officer.

A case or suspected case of any disease known to be transmitted by milk which occurs in the household of any of the above-mentioned persons, shall be reported immediately to the health officer.

Reports Epidemic

3121. In the case of a local epidemic of disease, the health officer shall report at such times as are requested by the state department all facts concerning the disease, and the measures taken to abate and prevent its spread.

Diseases

3122. Each health officer shall immediately report by telegraph or telephone to the state department every discovered or known case or suspect case of those diseases designated for immediate reporting by the state department. Within 24 hours after investigation each health officer shall make such reports as the state department may require.

Quarantine, etc State department rules

3123. The state department may establish a list of reportable diseases and this list may be changed at any time by the

state department. Those diseases listed as reportable shall be properly reported as required to the state department by the health officer.

The state department may from time to time adopt and enforce rules and regulations requiring isolation (strict or modified) or quarantine for any of the contagious, infectious, or communicable diseases if in the opinion of the state department such action is necessary for the protection of the public health.

The health officer may require isolation (strict or modified) or quarantine for any case of contagious, infectious, or communicable disease when such action is necessary for the protection of the public health.

Reports Health officer

3124. Each health officer, other than a county health officer, in the county shall transmit to the county health officer at least weekly in writing a report showing the number and character of infectious, contagious, or communicable diseases reported, and their location.

Physician, etc

3125. All physicians, nurses, clergymen, attendants, owners, proprietors, managers, employees, and persons living, or visiting any sick person, in any hotel, lodginghouse, house, building, office, structure, or other place where any person is ill of any infectious, contagious, or communicable disease, shall promptly report that fact to the health officer, together with the name of the person, if known, the place where he is confined, and the nature of the disease, if known.

CHAPTER 4. VENEREAL DISEASE

Article 1. Prevention and Control

Program

3180. The state department shall develop and review plans and provide leadership and consultation for, and participate in, a program for the prevention and control of venereal disease.

Department cooperation with physicians, etc

3181. The state department shall cooperate in the prevention, control, and cure of venereal diseases with physicians and surgeons; medical schools: public and private hospitals, dispensaries, and clinics; public and private school, college and university authorities; penal and charitable institutions; reform and industrial schools; detention homes; federal, state, local and district health officers, and boards of health, and all other health authorities; institutions caring for the mentally ill; and with any other persons, institutions, or agencies.

Investigations, etc

3182. The state department shall investigate conditions affecting the prevention and control of venereal diseases and approved procedures for such prevention and control, and shall disseminate educational information relative thereto.

Education and publicity

3183. The state department shall conduct such educational and publicity work as it may deem necessary; and, from time to time, shall cause to be issued, free of charge, copies of such rules and regulations, pamphlets, and other literature as it deems reasonably necessary.

Clinics, etc. 3184. The state department may establish, maintain, and subsidize clinics, dispensaries, and prophylactic stations for the diagnosis, treatment, and prevention of venereal diseases, and may provide medical, advisory, financial, or other assistance to such clinics, dispensaries, and stations as may be approved by it. No clinic, dispensary, or prophylactic station shall be approved unless it meets the requirements of the board and complies with its rules and regulations.

Rural counties and cities 3185. The state department may furnish treatment for a case or for a group of cases in rural counties or cities upon the recommendation of the local health officer if adequate facilities for such treatment are not available in the county or city.

Acute cases 3186. Any state agency conducting a public hospital shall admit acute venereal disease cases, when, in the opinion of the state department or the local health officer having jurisdiction, persons infected with venereal disease may be a menace to public health.

Physician to submit specimen 3187. The state department may require any physician in attendance on a person infected or suspected of being infected with a venereal disease infection to submit such specimens as may be designated for examination, when in its opinion such procedure is reasonably necessary to carry out the provisions and purposes of this article.

Place of examinations 3188. The examination may be made in the state laboratory or in a local public health laboratory designated by the state department or in a clinical laboratory which is under the immediate supervision and direction of a clinical laboratory technologist or a licensed physician and surgeon

Additional examination 3189. Nothing in this article limits any person's freedom to have additional examinations made elsewhere than specified in this article.

Diseased persons information 3190. Every diseased person shall give all information required by this article, including the name and address of any person from whom the disease may have been contracted and to whom the disease may have been transmitted.

Periodic examination 3191. Every diseased person shall from time to time submit to approved examinations to determine the condition of the disease.

Control measures 3192. If any person subject to proper venereal disease control measures discontinues any control procedure required by this article, the agency administering the procedure prior to such discontinuance shall make reasonable efforts to determine whether such person is continuing to comply with the procedure elsewhere.

Report of cases failing to comply 3193. If it appears reasonably likely that such person is not complying with such procedure elsewhere, the agency which was administering the procedure prior to the discontinuance shall make all reasonable efforts to induce such person to comply; and if it thereafter appears reasonably likely that he has failed to comply, shall report his name and address to

the local health officer or board of health, or to the state department where there is no such local health officer or board.

Local health officers

3194. It is the duty of the local health officers to use every available means to ascertain the existence of cases of infectious venereal diseases within their respective jurisdictions, to investigate all cases that are not, or probably are not, subject to proper control measures approved by the board, to ascertain so far as possible all sources of infection, and to take all measures reasonably necessary to prevent the transmission of infection.

Inspection and quarantine

3195. Local health officers may inspect and quarantine any place or person when such procedure is necessary to enforce the rules and regulations of the board or the state department.

Prosecution by district attorney

3196 It is the duty of the district attorney of the county in which a violation of this article may occur to prosecute the person accused of the violation.

Competent testimony

3197. In any prosecution for a violation of any provision of this article, or any rule or regulation of the board made pursuant to this article, or in any quarantine proceeding authorized by this article, or in any habeas corpus or other proceeding in which the legality of such quarantine is questioned, any physician, health officer, spouse, or other person shall be competent and may be required to testify against any person against whom such prosecution or other proceeding was instituted, and the provisions of subsections 1 and 4 of Section 1881 of the Code of Civil Procedure shall not be applicable to or in any such prosecution or proceeding.

Violations Misdemeanor

3198. Any person who refuses to give any information to make any report, to comply with any proper control measure or examination, or to perform any other duty or act required by this article, or who violates any provision of this article or any rule or regulation of the state board issued pursuant to this article, or who exposes any person to or infects any person with any venereal disease; or any person infected with a venereal disease in an infectious state who knows of such condition and who marries or has sexual intercourse, is guilty of a misdemeanor.

Exception

3199. Nothing in this article shall be construed to interfere with the freedom of any adherent of teachings of any well-recognized religious sect, denomination, or organization to depend exclusively upon prayer for healing in accordance with the teachings of such religious sect, denomination, or organization. Any such person, along with any person treating him, shall be exempt from all provisions of this article regarding venereal diseases, except that the provisions of this code and the rules and regulations of the board regarding compulsory reporting of communicable diseases and the quarantine of such diseases, and regarding callings in which a person with venereal disease may not engage, shall apply.

Article 2. Prenatal Syphilitic Tests

"Approved laboratory"

3220. "Approved laboratory" as used in this article means a laboratory approved by the state department, or any other laboratory the director of which is licensed by the state department according to law.

"Standard laboratory blood test"

3221. "Standard laboratory blood test" as used in this article means a test for syphilis approved by the state department.

Blood specimen

3222. Every licensed physician and surgeon or other person engaged in prenatal care of a pregnant woman, or attending such woman at the time of delivery, shall obtain or cause to be obtained a blood specimen of such woman at the time of the first professional visit or within 10 days thereafter.

Submission for test

3223. The blood specimen thus obtained shall be submitted to an approved laboratory for a standard laboratory test for syphilis.

Designation of specimen

3224. In submitting a specimen to a laboratory the physician shall designate it as a prenatal test or a test following recent delivery.

Report form

3225. The state department shall issue a "prenatal test laboratory report form" to be distributed upon application to all laboratories approved to do tests required by this article.

Same: Triplicate copies

3226. Any laboratory doing a test required by this article shall prepare the report in triplicate.

The original shall be transmitted by the laboratory doing the test to the physician submitting the specimen.

The duplicate shall be forwarded at weekly intervals to the state department.

The triplicate shall be retained by the laboratory in its file, and shall be open at any time for inspection by an authorized representative of the state department.

Reports confidential

3227 All laboratory reports are confidential, and are not open to public inspection.

Accuracy of test

3228. In case of question concerning the accuracy of a test required by this article, it is mandatory upon the state department to accept specimens for checking purposes from any district in the State.

Violation Misdemeanor

3229. Any licensed physician and surgeon, or other person engaged in attendance upon a pregnant woman or a recently delivered woman, or any representative of a laboratory who violates any provision of this article, is guilty of a misdemeanor. However, a licensed physician and surgeon, or other person engaged in attendance upon a pregnant or recently delivered woman, whose request for a specimen is refused, is not guilty of a misdemeanor for failure to obtain it.

CHAPTER 5. TUBERCULOSIS

Program

3279. The department shall maintain a program for the control of tuberculosis and shall administer the funds made available by the State for the care of tuberculosis patients.

3280. Pulmonary tuberculosis is an infectious and communicable disease, dangerous to the public health, and all proper expenditures that may be made by any county, pursuant to this chapter, are necessary for the preservation of the public health of the county. Pulmonary tuberculosis: Proper expenses

3285. Each health officer is hereby directed to use every available means to ascertain the existence of, and immediately to investigate, all reported or suspected cases of tuberculosis in the infectious stages within his jurisdiction and to ascertain the sources of such infections. In carrying out such investigations, each health officer is hereby invested with full powers of inspection, examination and quarantine or isolation of all persons known to be infected with tuberculosis in an infectious stage and is hereby directed: Health officer

(a) To make such examinations as are deemed necessary of persons reasonably suspected of having tuberculosis in an infectious stage and to isolate or isolate and quarantine such persons, whenever deemed necessary for the protection of the public health.

(b) Follow local rules and regulations, and all general and special rules, regulations, and orders of the state department in carrying out such quarantine or isolation.

(c) Whenever the health officer shall determine that quarantine or isolation in a particular case is necessary for the preservation and protection of the public health, he shall make an isolation or quarantine order in writing, setting forth the name of the person to be isolated, the period of time during which the order shall remain effective, the place of isolation or quarantine, and such other terms and conditions as may be necessary to protect the public health.

(d) Upon the making of an isolation or quarantine order as provided in this section, a copy of such order shall be served upon the person named in such order.

(e) Upon the receipt of information that any quarantine or isolation order, made and served as herein provided, has been violated, the health officer shall advise the district attorney of the county in which such violation has occurred, in writing, and shall submit to such district attorney the information in his possession relating to the subject matter of such isolation or quarantine order, and of such violation or violations thereof.

3286. No examination or inspection shall be required of any person who depends exclusively on prayer for healing in accordance with the teachings of any well recognized religious sect, denomination or organization and claims exemption on such ground, except that the provisions of this code regarding compulsory reporting of communicable diseases and isolation and quarantine shall apply where there is probable cause to suspect that such person is infected with the disease in a communicable stage. Such person shall not be required to submit to any medical treatment, or to go to or be confined in a hospital or other medical institution; provided, he can be safely Exception

quarantined and/or isolated in his own home or other suitable place of his choice.

Records

3287. The department may inspect and have access to all records of all institutions and clinics, both public and private, where tuberculosis patients are treated.

Advice

3288. The department may advise officers of state educational, correctional, and medical institutions regarding the control of tuberculosis and the care of tuberculosis patients.

Subsidy

3294. Each city, county, or group of counties may establish and maintain a tuberculosis ward, hospital, or sanatorium for the treatment of persons suffering from tuberculosis. Each city or county that establishes and maintains a tuberculosis ward, hospital, or sanatorium shall receive from the State the sum provided in Section 3300, and each county that participates jointly with one or more other counties in the establishment and maintenance of a tuberculosis ward, hospital, or sanatorium shall receive from the State the sum specified in Section 3300, for persons suffering from tuberculosis, cared for therein at public expense, who are unable to pay for their support and who have no relatives legally liable and financially able to pay for their support; except that the city or county is not entitled to receive this state aid unless the tuberculosis ward, hospital, or sanatorium conforms to the regulations of and is approved by the state department.

Pay patients

The hospitals shall be allowed to receive pay patients.

Leased facilities for violation of order

3295. The state department shall lease any facilities it deems necessary to care for persons afflicted with active contagious tuberculosis who violate the quarantine or isolation orders of the health officer as provided in Section 3351 of the Health and Safety Code. The county referring such person for such care shall not be eligible to receive subsidy for such person under the provisions of this chapter, and the State shall deduct from the subsidy payments to be made to such county an amount computed at the rate of three dollars ($3) for each patient-day the person is cared for in such facility.

Burial expenses

3296. Whenever any person confined in any state institution, as provided in Section 3351 of this code, subject to the jurisdiction of the Director of Corrections, dies, and any personal funds or personal property of such person remains in the hands of the Director of Corrections, such funds may be applied in an amount not exceeding three hundred dollars ($300) to the payment of expenses relating to burial; provided, however, that if no such funds are available, the State Department of Public Health shall reimburse the Director of Corrections for such expenses in an amount not exceeding three hundred dollars ($300).

Release

3297. If the place of confinement of a person confined under the provisions of Section 3351 is in a county other than the county in which he was convicted, upon release he shall be released in the custody of the sheriff of the county in which he was convicted, and the sheriff shall forthwith return him to the place where he was convicted. The sheriff shall prior to the

return of the person notify the health officer having jurisdiction of the area to which he will be returned of the date he will reach said area.

State aid for city or county

3298. Each city or county shall receive from the State the sum provided in Section 3300 of this code for each person suffering from tuberculosis, cared for at public expense in private hospitals or sanatoriums under contract with the city or county or who is unable to pay for his support and who has no relative legally liable and financially able to pay for his support; except that the city or county is not entitled to receive this state aid unless the tuberculosis ward, hospital or sanatorium conforms to the regulations of and is approved by the state department.

The hospitals and sanatoriums shall be allowed to receive pay patients.

Subsidy report

3299. The medical superintendent of each hospital for which state aid is received under this chapter shall render semiannually to the state department a report under oath showing, for the period covered by the report:

(a) The number of patients suffering from tuberculosis cared for at public expense, and unable to pay for care.

(b) The number of days of treatment of each such patient.

In the case of hospitals, wards, or sanatoriums operated jointly by two or more counties, the patients whose admission and care have been authorized by each county shall be reported separately.

Patient exchange

With the consent of the respective cities, counties, or groups of counties, an exchange of patients may be arranged without expense to the county except for transportation when the exchange seems necessary or desirable to assist in the patients' recovery.

County contract

Counties may contract for the care and treatment of tuberculosis patients through their boards of supervisors, after consultation with the state department, with cities, counties, or groups of counties, who maintain a tuberculosis ward or hospital for the treatment of persons suffering from tuberculosis, which conforms to the regulations of, and is approved by, the state department, and may receive from the State the tuberculosis subsidy provided by Section 3300.

Amount of subsidy

3300. The amount of the tuberculosis subsidy provided by the State to cities or counties separately providing care under this chapter for persons suffering from tuberculosis and the amount of the tuberculosis subsidy provided by the State to each county participating jointly with one or more other counties in the establishment and maintenance of a tuberculosis ward, hospital or sanatorium shall be based upon the patient days of care provided to persons whose admission and care have been authorized by that county, as follows:

(a) For the first thirty-six thousand five hundred (36,500) patient days of care during a year, the amount shall be two dollars and sixty cents ($2.60) per patient day.

(b) For the second thirty-six thousand five hundred (36,500) patient days of care during a year, the amount shall be two dollars and thirty cents ($2.30) per patient day.

(c) For all patient days of care in excess of seventy-three thousand (73,000) patient days during a year, the amount shall be one dollar and seventy-five cents ($1.75) per patient day.

(d) In addition to the amounts specified in subsections (a), (b) and (c), there shall be provided any additional amounts specified in any appropriation made therefor.

"Patient day"

As used in this section "patient day" means the period of in-patient service rendered a patient between the census taking hours on two consecutive days, and "a year" means a period of 12 months commencing on the first day of July.

Legislative intent

3301. It is the intention of the Legislature to adjust from time to time state participation in the care of persons suffering from tuberculosis in accordance with changes in the cost of caring for such patients.

Hospital central committee

3302. Each group of counties desiring to establish and maintain a tuberculosis ward or hospital for the treatment of persons suffering from tuberculosis shall appoint, by its board of supervisors, one supervisor as a delegate, who shall attend the general meetings of the delegates of each county in the group. The necessary expense incurred in attending such meetings is a county charge. The body thus formed shall be called the hospital central committee.

Delegates

3303. Each group of counties maintaining a tuberculosis hospital under this chapter may by unanimous agreement provide for a different number of delegates to the hospital central committee than the number provided for in this chapter and may provide for a method of deciding a tie vote of the hospital central committee.

Depository

3304. The hospital central committee shall designate a county within the group maintaining the hospital as the place where the business of the hospital is to be transacted and where funds of the hospital are to be kept and deposited. All county officers selected for the business of the hospital shall render all necessary assistance required by the committee in keeping with the duties of their respective offices.

Cost

3305. The delegates from each county may enter into an agreement with delegates from the other counties, on behalf of the county appointing them, binding the county to the joint enterprise and apportioning the cost of constructing, establishing, and maintaining the hospital. Money due from any county under the agreement may be collected by the hospital central committee or, on its behalf, by the board of supervisors of any county in the group, by action in the county in which the hospital is situated.

Building committee

3306. The hospital central committee may appoint a committee to supervise the construction of the hospital, approve the bills, and do the usual things required of a building committee.

Powers of hospital central committee

The hospital central committee is the governing body of the hospital. It has the same powers and duties in regard to the hospital that a board of supervisors has over a county hospital. It shall adopt rules for its government, which shall include provisions for holding meetings and for the addition of other counties to the group. It may appoint such committees as are necessary, and shall prescribe their duties.

Land

3307. Any land required may be acquired or disposed of by the hospital central committee in such manner as may be determined by a three-fourths vote of its members, if all counties comprising a group shall have had notice of the intention to acquire or dispose of the land Title to land may be held in the name of the entire group or in the name of any county composing the group, as trustee for the use and benefit of all, as may be determined by the hospital central committee.

Expenses

3308. Each county in the group shall pay its proportionate share to the hospital central committee of an amount designated by the committee to constitute a cash revolving fund to carry on the usual work and expense of the hospital. Each month a statement of the expenses of the hospital shall be sent to the board of supervisors of each county, together with a claim for its proportionate share of the expenses. The amounts when collected shall be paid into the cash revolving fund.

Admission of patients

3309. The hospital central committee may determine and pass upon the right of admission to the hospital of applicants, subject to the limitations of this chapter.

Chapter 6. Violations

Violation Misdemeanor

3350. Any person who, after notice, violates, or who, upon the demand of any health officer, refuses or neglects to conform to, any rule, order, or regulation prescribed by the state department respecting a quarantine or disinfection of persons, animals, things, or places, is guilty of a misdemeanor.

Violation of order Confinement and probation

3351. Any person who, after service upon him of an order of a health officer directing his isolation as provided in Section 3285, violates or fails to comply with the same or any provision thereof, is guilty of a misdemeanor, and, upon conviction thereof, in addition to any and all other penalties which may be imposed by law upon such conviction, may be ordered by the court confined until such order of such health officer shall have been fully complied with or terminated by such health officer, but not exceeding six months from the date of passing judgment upon such conviction; further provided, that the court, upon suitable assurances that such order of such health officer will be complied with, may place any person convicted of a violation of such order of such health officer upon probation for a period not to exceed two years, upon condition that the said order of said health officer be fully complied with; and provided further, that upon any subsequent violation of such order of such health officer, such probation shall be terminated and confinement as herein provided ordered by the court.

Subsequent conviction

3352. Upon any subsequent conviction under the provisions of Section 3351, the court may order the person confined for a period not exceeding one year for such subsequent conviction, or such other penalty as provided by said section.

Exposure: Misdemeanor

3353. Except in the case of the removal of an afflicted person in a manner the least dangerous to the public health, any person afflicted with any contagious, infectious, or communicable disease who wilfully exposes himself, and any person who wilfully exposes another person afflicted with such disease, is guilty of a misdemeanor.

Violation: Communicable or infectious disease

3354. Any person who violates any section in Chapter 3 of this division, with the exception of Section 3111, is guilty of a misdemeanor, punishable by a fine of not less than twenty-five dollars ($25) nor more than five hundred dollars ($500), or by imprisonment for a term of not more than 90 days, or by both. He is guilty of a separate offense for each day that the violation continued.

Prosecution by district attorney

3355. The district attorney of the county in which a violation of Sections 3285 and 3351 may be committed, shall prosecute all such violations and, upon the request of a health officer, shall prosecute, as provided in Section 3351, violations of any isolation order of a health officer made and served as provided in Section 3285.

SEC. 21. Section 3701 of said code is amended to read:

Drinking cups: "Common use"

3701. For the purposes of this chapter the term "common use" when applied to a drinking receptacle is defined as its use for drinking purposes by, or for, more than one person without its being thoroughly cleansed and sterilized between consecutive uses thereof by methods prescribed by or acceptable to the State Department of Public Health.

Sterilization

SEC. 22. Section 3702 of said code is amended to read:

Water containers

3702. No cask, water cooler, or other receptacle shall be used for storing or supplying drinking water to the public or to employees unless it is covered and protected so as to prevent persons from dipping the water therefrom or contaminating the water. All such containers shall be provided with a faucet or other suitable device for drawing the water.

SEC. 23. Section 3801 of said code is amended to read:

Towel "Common use"

3801. For the purpose of this chapter the term "common use" when applied to a towel means its use by, or for, more than one person without its being laundered between consecutive uses of such towel by methods prescribed by or acceptable to the State Department of Public Health.

SEC. 24. Section 3901 of said code is amended to read:

Wiping rags

3901. No person shall supply or furnish to his employees for wiping rags, or sell or offer for sale for wiping rags, any soiled wearing apparel, underclothing, bedding, or parts of soiled or used underclothing, wearing apparel, bedclothes, bedding, or soiled rags or cloths unless they have been sterilized by methods prescribed by or acceptable to the State Department of Public Health.

SEC. 25. Section 3954 of said code is amended to read:

3954. No machinery or appliances used for laundering clothing and articles for personal wear or household use shall be used for laundering soiled rags or soiled cloth material for wiping rags. Laundering

SEC. 26. Section 4001 of said code is amended to read:

4001. Unless water from an approved municipal supply is used in the manufacture of ice, the manufacturer shall obtain a bacterial analysis by an approved laboratory of the water used, quarterly. The analysis shall be submitted to the state or local department of public health, indicating whether the water is pure and wholesome. Water analysis

SEC. 27. Section 4002 of said code is amended to read:

4002. All tanks or containers storing water for the manufacture of ice shall be provided with covers which exclude all contamination or pollution of external origin. Tank covers

SEC. 28. Section 25003 of said code is amended to read:

25003. All applications for registration under this chapter shall be filed with the local health officer in the city, town, county, or city and county in which it is desired to carry on the business. The application shall state the name in full, if a partnership then names of each of the partners, the relation of the applicant to the firm or partnership, the place of business and place of residence of the applicant for registration and of each of the partners in the business, if a partnership, and shall state the exact location of the place at which it is proposed to dispose of cleanings. The application shall be signed by the authorized officer of a corporation, if a corporation; or by the managing partner, if a partnership. Application for registration

SEC. 29. Section 26235 of said code is amended to read:

26235. A drug shall be deemed to be adulterated (1) if its container is composed, in whole or in part, of any poisonous or deleterious substance which may render the contents injurious to health; (2) if it bears or contains, for purposes of coloring only, a coal-tar color other than one from a batch certified by the United States Department of Health, Education, and Welfare, Food and Drug Administration; (3) if it is not subject to the provisions of Section 26230 and its strength differs from, or its purity or quality falls below, that which it purports or is represented to possess; or (4) if any substance has been (a) mixed or packed therewith so as to reduce its quality or strength; or (b) substituted wholly or in part therefor. Adulterated drug: Components coloring, etc

SEC. 30. Section 26366.5 of said code is amended to read:

26366.5. If, within 30 days after detention or quarantine of any article under this article, the board has not commenced a proceeding under Section 26366, then the person in possession of such article, or the owner thereof or any claimant thereto, may commence a proceeding in the superior court of the county or city and county in which the article is detained or quarantined, by petitioning said court for a judgment to release said article or for relief under Sections 26368 and Petition

26369. Upon the filing of such petition, the clerk of the court shall fix a time and place for the hearing thereof, and cause notices thereof to be prepared notifying all persons who may claim an interest in the article of the time and place of the hearing. A copy of the petition and notice shall be posted for 14 days in at least three public places in the town, city or city and county where the court is held, and in a conspicuous place where such article is detained or quarantined. A copy of the petition and notice shall also be served upon the board by serving it upon the executive officer of said board. Service may be made by personal service or by registered mail addressed to the board at the office of the executive officer, Berkeley, California.

At the time set for the hearing the court shall commence to hear the proceeding but may, for good cause shown, continue the hearing to a day certain; provided, the court shall finally determine all the issues presented in the proceeding within 60 days after the date when the matter was first set for hearing.

SEC. 31. Section 26472 of said code is amended to read:

Adulterated food

26472. A food shall be deemed to be adulterated:

(a) (1) If any valuable constituent has been in whole or in part omitted or abstracted therefrom; or

(2) If any substance has been substituted wholly or in part therefor; or

(3) If damage or inferiority has been concealed in any manner; or

(4) If any substance has been added thereto or mixed or packed therewith so as to increase its bulk or weight or reduce its quality or strength or make it appear better or of greater value than it is.

(b) If it is confectionery and it bears or contains any alcohol or nonnutritive article or substance except harmless coloring, harmless flavoring, harmless resinous glaze not in excess of four-tenths of 1 per centum, harmless natural gum and pectin. This subsection shall not apply to any confectionery by reason of its containing less than one-half of 1 per centum by volume of alcohol derived solely from the use of flavoring extracts, or to any chewing gum by reason of its containing harmless nonnutritive masticatory substances.

(c) If it bears or contains a coal tar other than one from a batch which has been certified by the United States Department of Health, Education, and Welfare, Food and Drug Administration

(d) If any mineral oil has been added thereto or mixed or packed therewith.

(e) If it be fresh meat and it contains any chemical substance containing sulphites, sulphur dioxide, benzoate of soda or any other chemical preservative, or any substance which is not approved by the United States Department of Agriculture, Agricultural Research Service, or the Division of Animal In-

dustry of the California State Department of Agriculture, or the California State Board of Public Health.

(f) If it be chopped or ground beef, or hamburger containing any substance other than the striated muscle of fresh beef, except those substances approved by the State Department of Public Health, or if the total fat content (determined by ether extract method of analysis) of chopped or ground beef, or hamburger is in excess of 30 percent.

Nothing in this subdivision shall be deemed to prohibit the use of monosodium glutamate in such chopped or ground beef and hamburger.

(g) Notwithstanding the provisions of Section 26461, nothing in this article shall be deemed to prohibit the use of common salt, sugar, wood smoke, a vinegar, pure spices, spice oils, flavorings, saltpeter, nitrate of soda, nitrite of soda and potassium nitrite in meat food products such as sausage, corned, brined or pickled meats, hams, bacon and the like. No such substances shall increase the green or original weight by more than 10 percent of products which are not smoked or cooked, with the exception of fresh uncured beef brisket in which case the finished cured product may exceed the weight of the fresh uncured brisket by 20 percent, nor shall any such substance increase the green or original weight by more than 1 percent of the green or original weight of products which are cooked or smoked. In the case of meat food products such as sausage, 10 percent added water shall be permitted and allowed in smoked or cooked products of such nature and 3 percent in said products which are not cooked or smoked.

(h) If it be alimentary paste and contains any artificial color derived from coal tar or vegetable substances.

(i) If it contains any saccharine or other nonnutritive sweetening agent.

(j) If it be pork sausage or breakfast sausage and the total fat content (determined by the ether extract method of analysis) is in excess of 50 percent.

SEC. 32. Section 26541 of said code is amended to read:

26541. In prescribing a definition and standard of identity for any food or class of food in which optional ingredients are permitted, the board shall, for the purpose of promoting honesty and fair dealing in the interest of consumers, designate the optional ingredients which shall be named on the label. All definitions and standards promulgated pursuant to this chapter shall not in any instance require a higher standard than the standards required pursuant to the definitions currently promulgated by the United States Department of Health, Education, and Welfare, Food and Drug Administration or by the United States Department of Agriculture, Agricultural Research Service Such definitions and standards of identity promulgated by the board for distilled spirits shall not be inconsistent with similar standards promulgated by the United States Internal Revenue Service, Alcohol and Tobacco Tax

Optional ingredients

Exception

Division, or other federal agency; provided, however, that the provisions of this section shall not apply to wine.

SEC. 33. Section 26542 of said code is amended to read:

State and federal regulation

26542. The authority to promulgate regulations for the efficient enforcement of this chapter is vested in the board. The board shall promulgate regulations exempting from the provisions of this chapter food which is in accordance with the normal practice of the trade introduced or offered for introduction into trade and which is being delivered to an establishment where it is to be processed, labeled or packed on condition that such food shall conform with the provisions of this act upon its removal from such processing, labeling or packing establishment. The regulations promulgated and the definitions and standards prescribed pursuant to this chapter shall not require higher standards and shall not be more restrictive than the definitions, standards and regulations which are in force, or promulgated by the United States Department of Health, Education, and Welfare, Food and Drug Administration, under the provisions of the federal act or by the United States Department of Agriculture, Agricultural Research Service, in the event that any such definitions, standards, or regulations

Violations

are in force thereunder. The violation of a regulation promulgated under this chapter shall be deemed to be a violation of this chapter.

SEC. 34. Section 26586.5 of said code is amended to read:

Petition for release

26586.5. If, within 30 days after detention or quarantine of any article under this article, the board has not commenced a proceeding under Section 26586, then the person in possession of such article, or the owner thereof or any claimant thereto, may commence a proceeding in the superior court of the county or city and county in which the article is detained or quarantined, by petitioning said court for a judgment to release said article or for relief under Sections 26588 and 26589. Upon the filing of such petition, the clerk of the court shall fix a time and place for the hearing thereof, and cause notices thereof to be prepared notifying all persons who may claim an interest in the article of the time and place of the hearing. A copy of the petition and notice shall be posted for 14 days in at least three public places in the town, city or city and county where the court is held, and in a conspicuous place where such article is detained or quarantined. A copy of the petition and notice shall also be served upon the board by serving it upon the executive officer of said board. Service may be made by personal service or by registered mail addressed to the board at the office of the executive officer, Berkeley, California.

At the time set for the hearing the court shall commence to hear the proceeding but may, for good cause shown, continue the hearing to a day certain; provided, the court shall finally determine all the issues presented in the proceeding within 60 days after the date when the matter was first set for hearing.

SEC. 35. Section 28224 of said code is amended to read:

28224. No employee or other person who is infected with any contagious, infectious, or communicable disease, which can be transmitted by the food involved, shall work or be permitted to work in any bakery or handle any of the products therein or delivered therefrom. Diseased bakery personnel

Any person knowingly infected with any such contagious, infectious, or communicable disease who engages in the work mentioned, or any employer who knowingly employs such a person, is guilty of violating this section.

SEC. 36. Section 28295 of said code is amended to read:

28295. No employer shall require or permit any person to work, in a food processing establishment or vehicle used for the production, preparation, manufacture, sale, or transportation of food if the person is infected with any contagious, infectious, or communicable disease which can be transmitted by the food involved. Diseased food processing employees

SEC. 37. The provisions of the Health and Safety Code added by this act, insofar as they are substantially the same as the provisions of said code repealed by this act, shall be construed as a restatement and continuation of the existing law and not as a new enactment. No action or proceeding relating to or arising out of the provisions of said code repealed by this act commenced before the effective date of this act, and no right accrued pursuant to said provisions, are affected by the repeal of said provisions by this act, but any step thereafter taken in such action or proceeding shall conform to the provisions added to said code by this act so far as possible. CHAPTER 206

An act to amend Sections 137.3 and 137.5 of the Civil Code, relating to attorneys' fees in civil actions.

[Approved by Governor April 23, 1957. Filed with Secretary of State April 24, 1957.]

In effect September 11, 1957

The people of the State of California do enact as follows:

SECTION 1. Section 137.3 of the Civil Code is amended to read:

137.3. During the pendency of any action for annulment in which costs and attorney's fees are authorized by Section 87 of this code and of any action for divorce or for separate maintenance, or for the custody, support, maintenance or education of children upon an order to show cause or motion, and if such relief is requested in the complaint, cross complaint or answer, the court may order the husband or wife, or father or mother, as the case may be, to pay such amount as may be reasonably necessary for the cost of maintaining or defending the action and for attorney's fees, and from time to time and before entry of judgment upon application as aforesaid, the Divorce, etc., actions Costs and fees

SEC. 35. Section 28224 of said code is amended to read:

28224. No employee or other person who is infected with any contagious, infectious, or communicable disease, which can be transmitted by the food involved, shall work or be permitted to work in any bakery or handle any of the products therein or delivered therefrom. Diseased bakery personnel

Any person knowingly infected with any such contagious, infectious, or communicable disease who engages in the work mentioned, or any employer who knowingly employs such a person, is guilty of violating this section.

SEC. 36. Section 28295 of said code is amended to read:

28295. No employer shall require or permit any person to work, in a food processing establishment or vehicle used for the production, preparation, manufacture, sale, or transportation of food if the person is infected with any contagious, infectious, or communicable disease which can be transmitted by the food involved. Diseased food processing employees

SEC. 37. The provisions of the Health and Safety Code added by this act, insofar as they are substantially the same as the provisions of said code repealed by this act, shall be construed as a restatement and continuation of the existing law and not as a new enactment. No action or proceeding relating to or arising out of the provisions of said code repealed by this act commenced before the effective date of this act, and no right accrued pursuant to said provisions, are affected by the repeal of said provisions by this act, but any step thereafter taken in such action or proceeding shall conform to the provisions added to said code by this act so far as possible. Notes of Decisions

1. Validity of prior law

Stats.1915, p. 1530 (repealed; now, this section) was a valid exercise of the sovereign power and police power of the state to take all the necessary steps for the promotion of the health and comfort of its inhabitants and to make regulations essential to the protection of the state and the people thereof against the prevalence of disease, as the true purpose of county government organizations, is to perform functions which belong to the state itself, and the state may employ them jointly with itself or alone as instrumentalities in aid of the administration or carrying out of its own general governmental functions and policy. Sacramento County v. Chambers (1917) 164 P. 613, 33 C.A. 142.

2. Construction and application

In order to accomplish purpose for which this chapter dealing with tuberculosis was enacted, court should give chapter a broad and liberal construction. Application of Halko (1966) 54 Cal.Rptr. 661, 246 C.A.2d 553.

Legislature is vested with broad discretion in determining what are contagious and infectious diseases and in adopting means for preventing the spread thereof. Id.

§ 3279.1. Election of county to pay its share of health care cost; ineligibility for tuberculosis study or reimbursement

Notwithstanding any other provision of this chapter a county which has elected to come under the provisions of Section 14150.1 of the Welfare and Institutions Code [1] shall not receive any tuberculosis subsidy or reimbursement from the state under the provisions of this chapter.

(Added by Stats.1969, c. 811, p. 1634, § 1, operative July 1, 1970.)

[1] Repealed.

Historical and Statutory Notes

Section 2 of Stats.1969, c. 811, p. 1634, provides:

"This act shall become operative on July 1, 1970."

§ 3280. Legislative declaration

Pulmonary tuberculosis is an infectious and communicable disease, dangerous to the public health, and all proper expenditures that may be made by any county, pursuant to this chapter, are necessary for the preservation of the public health of the county.

(Added by Stats.1957, c. 205, p. 859, § 20.)

Historical and Statutory Notes

Continuation of existing law, see Historical and Statutory Notes under § 410.

Derivation: Former § 3099, added by Stats. 1961, c. 60, p. 546, § 3099.

Stats.1935, c. 20, p. 80, § 6.

§§ 3281 to 3284. [Blank]

§ 3285. Duty of health officers; investigation of reported or suspected cases; powers of inspection, examination, quarantine or isolation

Each health officer is hereby directed to use every available means to ascertain the existence of, and immediately to investigate, all reported or suspected cases of tuberculosis in the infectious stages within his jurisdiction and to ascertain the sources of such infections. In carrying out such investigations, each health officer is hereby invested with full powers of inspection, examination and quarantine or isolation of all persons known to be infected with tuberculosis in an infectious stage and is hereby directed:

(a) To make such examinations as are deemed necessary of persons reasonably suspected of having tuberculosis in an infectious stage and to isolate or isolate and quarantine such persons, whenever deemed necessary for the protection of the public health.

(b) Follow local rules and regulations regarding examinations, quarantine, or isolation, and all general and special rules, regulations, and orders of the state department in carrying out such examination, quarantine or isolation.

(c) Whenever the health officer shall determine on reasonable grounds that an examination of any person is necessary for the preservation and protection of the public health, he shall make an examination order in writing, setting forth the name of the person to be examined, the time and place of the examination, and such other terms and conditions as may be necessary to protect the public health. Nothing contained in this subdivision shall be construed to prevent any person whom the health officer determines should have an examination for infectious tuberculosis from having such an examination made by a physician of his own choice who is licensed to practice medicine under the provisions of Chapter 5 (commencing with Section 2000), Division 2 of the Business and Professions Code under such terms and

conditions as the health officer shall determine on reasonable grounds to be necessary to protect the public health.

(d) Whenever the health officer shall determine that quarantine or isolation in a particular case is necessary for the preservation and protection of the public health, he shall make an isolation or quarantine order in writing, setting forth the name of the person to be isolated, the period of time during which the order shall remain effective, the place of isolation or quarantine, and such other terms and conditions as may be necessary to protect the public health.

(e) Upon the making of an examination, isolation, or quarantine order as provided in this section, a copy of such order shall be served upon the person named in such order.

(f) Upon the receipt of information that any examination, quarantine, or isolation order, made and served as herein provided, has been violated, the health officer shall advise the district attorney of the county in which such violation has occurred, in writing, and shall submit to such district attorney the information in his possession relating to the subject matter of such examination, isolation, or quarantine order, and of such violation or violations thereof.

(g) Any and all orders authorized under this section shall be made by the health officer and his authority to make such orders shall be delegated only pursuant to Section 7. The health officer shall not make any orders incorporating by reference any other rules or regulations.

(Added by Stats.1957, c. 205, p. 859, § 20. Amended by Stats.1961, c. 30, p. 936, § 2; Stats.1965, c. 1344, p. 3230, § 1; Stats.1965, c. 1552, p. 3645, § 1.)

Historical and Statutory Notes

Continuation of existing law, see Historical and Statutory Notes under § 410.

Effect of amendment of section by two or more acts at the same session of the legislature, see Government Code § 9605.

Derivation: Former § 2559.5, added by Stats.1945, c. 21, p. 689, § 1, amended by Stats. 1949, c. 305, p. 592, § 1; Stats.1955, c. 93, p. 558, § 1.

Notes of Decisions

1. Validity

Provision of this section providing that health officer may make isolation or quarantine order of person with tuberculosis whenever health officer shall determine in particular case that quarantine or isolation is necessary for protection of public health, and that isolation or quarantine order shall be in writing, setting forth name of person to be isolated, period of time during which order shall remain effective, place of isolation or quarantine, and such other terms and conditions as may be necessary to protect public health does not deprive person having tuberculosis of his liberty without due process of law. Application of Halko (1966) 54 Cal.Rptr. 661, 246 C.A.2d 553.

2. In general

Provisions of this section dealing with duties of health officers in issuing tuberculosis quarantine orders make those duties discretionary rather than mandatory. Jones v. Czapkay (1960) 6 Cal.Rptr. 182, 182 C.A.2d 192.

This section does not apply to officers of the state department of public health. Id.

3. Quarantine orders

Consecutive orders of health officer for quarantine of person having tuberculosis may issue so long as person continues to be infected with tuberculosis and so long as health officer on reasonable grounds believes such person to be dangerous to public health. Application of Halko (1966) 54 Cal.Rptr. 661, 246 C.A.2d 553.

A health officer may institute an action to compel examination of person suspected of having tuberculosis who refuses to submit to an examination by the health officer or may issue a quarantine order, a violation of which may be prosecuted criminally. 36 Ops.Atty. Gen. 28.

A health officer has the power to quarantine and isolate an individual with active and contagious tuberculosis in any local jail when he finds that it is reasonably necessary to employ security measures to enforce the quarantine and to protect the public from contagion and no more suitable facility is available for such purpose. 30 Ops.Atty.Gen. 229, 11–8–57.

Where a patient quarantined in a sanatorium for the treatment of tuberculosis, demands that he be permitted to leave, reasonable physical force may be employed to prevent him from doing so. 6 Ops.Atty.Gen. 184.

4. Liability of officers

Exposure of plaintiff to known tubercular victim was sole proximate cause of plaintiff's acquiring the disease, and any breach of duty by health officers in failing to conduct proper or adequate investigation to insure strict compliance by patient with quarantine orders could constitute only a remote cause which could not form basis for imposition of liability upon them. Jones v. Czapkay (1960) 6 Cal. Rptr. 182, 182 C.A.2d 192.

5. Habeas corpus

Person, who is confined pursuant to quarantine order issued by health officer under this section is not entitled to relief on habeas corpus, where evidence shows reasonable cause to believe that person is infected, but person quarantined without reasonable grounds is entitled to relief by habeas corpus. Application of Halko (1966) 54 Cal.Rptr. 661, 246 C.A.2d 553.

§ 3286. Religious freedom; exemption from provisions

No examination or inspection shall be required of any person who depends exclusively on prayer for healing in accordance with the teachings of any well recognized religious sect, denomination or organization and claims exemption on such ground, except that the provisions of this code regarding compulsory reporting of communicable diseases and isolation and quarantine shall apply where there is probable cause to suspect that such person is infected with the disease in a communicable stage. Such person shall not be required to submit to any medical treatment, or to go to or be confined in a hospital or other medical institution; provided, he can be safely quarantined and/or isolated in his own home or other suitable place of his choice.

(Added by Stats.1957, c. 205, p. 859, § 20.)

§§ 3289 to 3291. Repealed by Stats.1975, c. 671, p. 1464, §§ 3 to 5, eff. Sept. 10, 1975

Historical and Statutory Notes

The repealed sections, added by Stats.1973, c. 1212, pp. 2750, 2751, §§ 51 to 53, provided for the succession by the department of benefits payments to the duties, purposes, responsibilities, jurisdiction, records, equipment, supplies and officers and employees of the department of health under this chapter.

§§ 3292, 3293. [Blank]

§ 3294. Establishment of wards, hospitals and sanatoriums

Each city, county, or group of counties may establish and maintain a tuberculosis ward, hospital, or sanatorium for the treatment of persons suffering from tuberculosis.

(Added by Stats.1957, c. 205, p. 860, § 20. Amended by Stats.1975, c. 671, p. 1464, § 6, eff. Sept. 10, 1975.)

Historical and Statutory Notes

Notes of Decisions

---

1. In general

Former § 3300 (now this section), which provided that counties might establish and maintain a tuberculosis hospital for treatment of persons suffering from tuberculosis was permissive with respect to county assuming state's burden of caring for indigent persons, but was mandatory in its declaration that for such facility it should receive from state a sum prescribed. Los Angeles County v. State Dept. of Public Health (1958) 322 P.2d 968, 158 C.A.2d 425.

2. Agreement for joint care

A city and county might contract to provide for the care of their tuberculosis patients in a neighboring county sanatorium by proceeding under Stats.1921, p. 542, providing for the joint exercise of powers by counties, cities or both, notwithstanding Stats.1921, p. 1641, providing for the joint construction, ownership and management of tuberculosis hospitals, to be approved by the state bureau of tuberculosis, as a condition precedent to receiving state aid. City and County of San Francisco v. Boyle (1923) 215 P. 549, 191 C. 172.

3. Termination of agreement

Where three counties in 1918 entered into agreement to establish and maintain a tuberculosis hospital, and in 1953, the counties entered into an agreement for the withdrawal by one of the counties from participation in maintenance of the hospital, the counties could terminate the agreement for joint operation by agreement of a majority of each of the boards of supervisors, and without following the procedure for sale of county realty in accordance with Gov.C. 25520 et seq. 28 Ops.Atty.Gen. 349.

§ 3295. State care of persons who violate quarantine or isolation orders; lease of facilities

The state department shall lease any facilities it deems necessary to care for persons afflicted with active contagious tuberculosis who violate the quarantine or isolation orders of the health officer as provided in Section 3351 of the Health and Safety Code.

(Added by Stats.1957, c. 205, p. 860, § 20. Amended by Stats.1975, c. 671, p. 1464, § 7, eff. Sept. 10, 1975.)

Historical and Statutory Notes

Continuation of existing law, see Historical and Statutory Notes under § 410.

Derivation: Former § 3300.4, added by Stats.1949, c. 1091, p. 1990, § 1.

§ 3296. Burial expenses of persons confined in state institutions

Whenever any person confined in any state institution, as provided in Section 3351 of this code, subject to the jurisdiction of the Director of Corrections, dies, and any personal funds or personal property of such person remains in the hands of the Director of Corrections, such funds may be applied in an amount not exceeding three hundred dollars ($300) to the payment of expenses relating to burial; provided, however, that if no such funds are available, the State Department of Health Services shall reimburse the Director of Corrections for such expenses in an amount not exceeding three hundred dollars ($300).

(Added by Stats.1957, c. 205, p. 860, § 20. Amended by Stats.1971, c. 1593, p. 3276, § 174, operative July 1, 1973; Stats.1977, c. 1252, § 272, operative July 1, 1978.)

Historical and Statutory Notes

Continuation of existing law, see Historical and Statutory Notes under § 410.

Operative effect of amendment by Stats.1971, c. 1593, see Historical and Statutory Notes under § 20.

Derivation: Former § 3300.45, added by Stats.1953, c. 28, p. 632, § 1.

§ 3297. Release of person confined in county other than county of conviction

If the place of confinement of a person confined under the provisions of Section 3351 is in a county other than the county in which he was convicted, upon release he shall be released in the custody of the sheriff of the county in which he was convicted, and the sheriff shall forthwith return him to the place where he was convicted without the necessity of a court order or other process. The sheriff shall prior to the return of the person notify the health

officer having jurisdiction of the area to which he will be returned of the date he will reach said area.

(Added by Stats.1957, c. 205, p. 860, § 20. Amended by Stats.1957, c. 1736, p. 3120, § 1.)

Historical and Statutory Notes

Continuation of existing law, see Historical and Statutory Notes under § 410.

This section first took effect in its 1957 amended form since the 1957 addition and the 1957 amendment became effective on the same date.

Derivation: Former § 3300.46, added by Stats.1953, c. 331, p. 1600, § 1.

§§ 3298 to 3300.1. Repealed by Stats.1975, c. 671, p. 1464, §§ 8 to 11, eff. Sept. 10, 1975

Historical and Statutory Notes

Section 3298, added by Stats.1957, c. 205, p. 861, § 20, related to a state subsidy for patients cared for at public expense in private institutions. The section was derived from former § 3300a, added by Stats.1945, c. 601, p. 1132, § 1, renumbered § 3300.5 and amended by Stats.1947, c. 1000, p. 2267, § 4; Stats.1953, c. 550, p. 1810, § 1; Stats.1915, c. 766, p. 1531, § 3; Stats.1919, c. 464, p. 853, § 1; Stats.1921, c. 861, p. 1642, § 2.

Section 3299, added by Stats.1957, c. 205, p. 861, § 20, amended by Stats.1973, c. 1212, p. 2751, § 54, related to hospital reports and exchange of patients and contracts for care by other cities and counties. The section was derived from former § 3301, added by Stats. 1939, c. 60, p. 548, § 3301, amended by Stats. 1945, c. 1447, p. 2724, § 2; Stats.1947, c. 1000, p. 2267, § 5.

Section 3300, added by Stats.1957, c. 205, p. 861, § 20, amended by Stats.1959, c. 1579, p. 3910, § 1; Stats.1961, c. 1243, p. 3004, § 1, related to the amount of the state subsidy and also defined patient day and year. The section was derived from former §§ 3301.5, 3301.6, added by Stats.1947, c. 1000, p. 2268, § 6, amended by Stats.1949, c. 1242, p. 2195, §§ 1, 2; Stats.1953, c. 1513, p. 3175, §§ 1, 2.

Former § 3300, enacted by Stats.1939, c. 60, p. 547, § 3300, amended by Stats.1939, c. 1070, p. 2996; Stats.1945, c. 1447, p. 2724, § 1; Stats. 1947, c. 1000, p. 2266, § 3, and repealed by Stats.1957, c. 205, p. 861, § 1, related to establishment of tuberculosis hospitals by cities and counties, a state subsidy for public patients and admittance of pay patients.

Section 3300a, added by Stats.1945, c. 601, § 1 was renumbered § 3300.5 and amended by Stats.1947, c. 1000, § 4.

Section 3300.1, added by Stats.1961, c. 1243, p. 3005, § 2, amended by Stats.1963, c. 278, p. 1036, § 1, related to a city or county's use of contributions from nonstate sources to offset any state subvention.

§§ 3300.4 to 3300.5. Repealed by Stats.1957, c. 205, p. 848, § 1

Historical and Statutory Notes

Section 3300.4, added by Stats.1949, c. 1091, p. 1990, § 1, related to state care of tubercular persons who violate quarantine or isolation orders. See, now, § 3295.

Section 3300.45, added by Stats.1953, c. 28, p. 632, § 1, provided for burial expenses of persons confined to state tuberculosis treatment institutions. See, now, § 3296.

Section 3300.46, added by Stats.1953, c. 331, p. 1600, § 1, related to release of a person confined in a state tuberculosis treatment institution other than in the county of conviction.

Section 3300.5, added as § 3300a by Stats. 1945, c. 601, p. 1132, § 1, renumbered § 3300.5 and amended by Stats.1947, c. 1000, p. 2267, § 4; Stats.1953, c. 550, p. 1810, § 1, related to the state subsidy for patients cared for at public expense in private institutions.

§ 3301. Repealed by Stats.1975, c. 671, p. 1464, § 12, eff. Sept. 10, 1975

Historical and Statutory Notes

The repealed section, added by Stats.1957, c. 205, p. 862, § 20, derived from former § 3301.7, added by Stats.1953, c. 1513, p. 3176, § 3, related to the legislature's intention to adjust state participation from time to time.

Former § 3301, enacted by Stats.1939, c. 60, p. 548, § 3301, amended by Stats.1945, c. 1447, p. 2724, § 2; Stats.1947, c. 1000, p. 2267, § 5, derived from Stats.1915, c. 766, p. 1531, § 3; Stats.1919, c. 464, p. 853, § 1; Stats.1921, c. 861, p. 1642, § 2, and repealed by Stats.1957, c. 205, p. 848, § 1, related to hospital reports, exchange of patients by counties and cities, and contracts for care of patients by other cities and counties.

§§ 3301.5 to 3301.7. Repealed by Stats.1957, c. 205, p. 848, § 1

Historical and Statutory Notes

The repealed sections, added by Stats.1947, c. 1000, p. 2268, § 6; Stats.1953, c. 1513, p. 3176, § 3, amended by Stats.1949, c. 1242, pp. 2195, 2196, §§ 1, 2; Stats.1953, c. 1513, pp. 3175, 3176, §§ 1, 2, fixed the amount of subsidy for tuberculosis treatment provided by the state to counties, cities, and cities and counties.

§ 3302. Joint establishment of ward or hospital; hospital central committee; appointment of delegates; expenses as county charge

Each group of counties desiring to establish and maintain a tuberculosis ward or hospital for the treatment of persons suffering from tuberculosis shall appoint, by its board of supervisors, one supervisor as a delegate, who shall attend the general meetings of the delegates of each county in the group. The necessary expense incurred in attending such meetings is a county charge. The body thus formed shall be called the hospital central committee.

(Added by Stats.1957, c. 205, p. 862, § 20.)

Historical and Statutory Notes

Continuation of existing law, see Historical and Statutory Notes under § 410.

Former § 3302, enacted by Stats.1939, c. 60, p. 548, § 3302, and derived from Stats.1915, c. 766, p. 1531, § 3; Stats.1919, c. 464, p. 853, § 1; Stats.1921, c. 861, p. 1642, § 2, was repealed by Stats.1957, c. 205, p. 848, § 1. The former section provided for a hospital central committee for each group of counties which established a tuberculosis hospital.

Derivation: Former § 3302, enacted by Stats.1939, c. 60, p. 548, § 3302.

Stats.1915, c. 766, p. 1531, § 3; Stats.1919, c. 464, p. 853, § 1; Stats.1921, c. 861, p. 1642, § 2.

Notes of Decisions

1. In general

Under former §§ 3302 to 3309, authorizing group of counties to join to establish and main-

tain tuberculosis hospital to be supervised by a hospital central committee, the employees of such hospital are employees of hospital's central committee and not employees of various counties maintaining the hospital, and are consequently not local miscellaneous members of state employees' retirement system and are not subject to compulsory retirement at 70, under provisions of Gov.C. § 20983 (repealed; see, now, § 20981) pertaining to such local miscellaneous members. 25 Ops.Atty.Gen. 47.

2. Termination of agreement

Where three counties in 1918 entered into agreement to establish and maintain a tuberculosis hospital, and in 1953 the counties entered into an agreement for the withdrawal by one of the counties from participation in maintenance of the hospital, the counties could terminate the agreement for joint operation of the hospital by agreement of a majority of each of the boards of supervisors, and without following the procedure for the sale of county realty in accordance with the Gov.C. § 25520 et seq. 28 Ops.Atty.Gen. 349.

§ 3303. Change in number of delegates; unanimous agreement

Each group of counties maintaining a tuberculosis hospital under this chapter may by unanimous agreement provide for a different number of delegates to the hospital central committee than the number provided for in this chapter and may provide for a method of deciding a tie vote of the hospital central committee.

(Added by Stats.1957, c. 205, p. 862, § 20.)

Historical and Statutory Notes

Continuation of existing law see Historical and Statutory Notes under § 410.

Former § 3303 enacted by Stats.1939, c. 60, p. 548, § 3303, was repealed by Stats.1957, c. 205, p. 848, § 1. The former section related to a change in the number of delegates to the hospital central committee.

Derivation: Former § 3303, enacted by Stats.1939, c. 60, p. 548, § 3303.

Stats.1915, c. 766, p. 1530, § 3a, added Stats. 1935, c. 366, p. 1319, § 1.

§ 3304. Designation of place of business; assistance of county officers

The hospital central committee shall designate a county within the group maintaining the hospital as the place where the business of the hospital is to be transacted and where funds of the hospital are to be kept and deposited. All county officers selected for the business of the hospital shall render all necessary assistance required by the committee in keeping with the duties of their respective offices.

(Added by Stats.1957, c. 205, p. 862, § 20.)

Historical and Statutory Notes

Continuation of existing law, see Historical and Statutory Notes under § 410.

Former § 3304, enacted by Stats.1939, c. 60, p. 548, § 3304, and derived from Stats.1915, c. 766, p. 1530, § 3a; Stats.1935, c. 366, p. 1319, § 1, was repealed by Stats.1957, c. 205, p. 848, § 1. The former section related to designation of place of business and assistance to be rendered by county officers.

Derivation: Former § 3304, enacted by Stats.1939, c. 60, p. 548, § 3304.

Stats.1915, c. 766, p. 1530, § 3a, added Stats. 1935, c. 366, p. 1319, § 1.

Notes of Decisions

In general 1

1. In general

Weimar Sanatorium, a tuberculosis hospital operated by a number of counties in the Sacramento area, is an entity separate from its constituent counties and the hospital rather than the constituent counties is the employer of those persons who compose the hospital staff. 36 Ops.Atty.Gen. 237, 11-9-60.

§ 3305. Contracts among delegates; effect upon counties; apportionment of costs; collection of money due from counties

The delegates from each county may enter into an agreement with delegates from the other counties, on behalf of the county appointing them, binding the county to the joint enterprise and apportioning the cost of constructing, establishing, and maintaining the hospital. Money due from any county under the agreement may be collected by the hospital central committee or, on its behalf, by the board of supervisors of any county in the group, by action in the county in which the hospital is situated.

(Added by Stats.1957, c. 205, p. 862, § 20.)

Historical and Statutory Notes

Continuation of existing law, see Historical and Statutory Notes under § 410.

Former § 3305, enacted by Stats.1939, c. 60, p. 549, § 3305, and derived from Stats.1915, c. 766, p. 1531, § 3; Stats.1919, c. 464, p. 853, § 1; Stats.1921, c. 861, p. 1642, § 2, was repealed by Stats.1957, c. 205, p. 848, § 1. The former section related to contracts among delegates and collection of money due from counties.

Derivation: Former § 3305, enacted by Stats.1939, c. 60, p. 549, § 3305.

Stats.1915, c. 766, p. 1531, § 3; Stats.1919, c. 464, p. 853, § 1; Stats.1921, c. 861, p. 1642, § 2.

Notes of Decisions

In general 1

1. In general

A city's contract to advance money to a neighboring county for the construction of additional hospital units for the care and treatment of the city's tuberculosis patients, was not invalid because the county retained supervisory control of the entire hospital, including the right to reject or remove patients, there being no presumption that unreasonable rules will be adopted or arbitrary authority exercised. City and County of San Francisco v. Boyle (1923) 215 P. 549, 191 C. 172.

That a gross sum set aside by a city to cover the cost of construction and deterioration of additional hospital units to be constructed by a neighboring county for the care and treatment of the city's tuberculosis patients as provided by a contract between the city and county may be wholly consumed on expiration of the contract term, would not be conclusive proof of a bad bargain and does not invalidate the contract, the presumption being that the city governing body, whose judgment is conclusive in the absence of a showing of want of jurisdiction, bad faith, gross extravagance, or some fact sufficient to vitiate the contract considered the wisdom and policy of the whole plan in the light of the objects to be attained. Id.

§ 3306. Building committee; powers of hospital central committee

The hospital central committee may appoint a committee to supervise the construction of the hospital, approve the bills, and do the usual things required of a building committee.

The hospital central committee is the governing body of the hospital. It has the same powers and duties in regard to the hospital that a board of supervisors has over a county hospital. It shall adopt rules for its govern-

ment, which shall include provisions for holding meetings and for the addition of other counties to the group. It may appoint such committees as are necessary, and shall prescribe their duties.

(Added by Stats.1957, c. 205, p. 862, § 20.)

Notes of Decisions

Termination of agreement 1

---

1. Termination of agreement

Three counties operating a tuberculosis sanitorium might terminate agreement for joint operation by agreement of a majority of each board of supervisors, and the sanitorium may be transferred to two of the counties, eliminating the third, as incident of such agreement, without complying with requirements of Gov.C. § 25520 et seq. for sale of county real property. 28 Ops.Atty.Gen. 349, 12-21-56.

§ 3308. Payment of expenses by counties; deposit in cash revolving fund

Each county in the group shall pay its proportionate share to the hospital central committee of an amount designated by the committee to constitute a cash revolving fund to carry on the usual work and expense of the hospital. Each month a statement of the actual expenses of the hospital shall be sent to the board of supervisors of each county, together with a claim for the county's proportionate share of the expenses. Monthly claims shall be reduced to the extent of any remaining balance of a county's quarterly payments. The amounts when collected shall be paid into the cash revolving fund.

(Added by Stats.1957, c. 205, p. 863, § 20. Amended by Stats.1959, c. 1489, p. 3781, § 1.)

Historical and Statutory Notes

§ 3315. Annual subvention for control program; local health departments; use; additional funds

The State Department of Health Services may distribute for the purpose of tuberculosis control an annual subvention, paid quarterly, to any local health department that maintains a tuberculosis control program consistent with standards and procedures established by the department. This annual subvention shall be used primarily for the strengthening of tuberculosis prevention activities by local health departments. Further, the department may allocate additional funds to selected local health departments based on high disease incidence, or other standards established by the department. These additional funds shall be expended primarily for the cost of diagnosis, treatment, and followup services required for an effective tuberculosis control program. Services rendered under this section may not be made dependent on status of residence.

(Added by Stats.1975, c. 671, p. 1464, § 13, eff. Sept. 10, 1975. Amended by Stats.1977, c. 1252, § 273, operative July 1, 1978.)

§ 3317. Administrative costs; limitation; laboratory services and hospitalization facilities

Of the annual appropriation made to the department for tuberculosis control, the department may expend a sum not to exceed 7.5 percent of the total, for administrative costs. In addition, it may, if it deems necessary, withhold a portion of the appropriation to pay for the cost of regional

laboratory services and regional hospitalization facilities for patients whose care cannot be reasonably accomplished in facilities available within a local health department, or it may contract with physicians to supervise the medical care of tuberculosis patients in areas where such specialized care is not available. Further, the appropriation shall be available to purchase materials or drugs used in tuberculosis control for distribution to local health departments.

Jurisdiction 1

1. Jurisdiction

Municipal courts, have jurisdiction to enforce provisions of this section providing that for a second violation of tuberculosis quarantine, a recalcitrant tuberculosis patient may be confined for a period of one year in facilities provided by the state department of public health, but justice courts do not have jurisdiction to do so. 23 Ops.Atty.Gen. 275.

§ 3353. Wilful exposure to disease; misdemeanor

Except in the case of the removal of an afflicted person in a manner the least dangerous to the public health, any person afflicted with any contagious, infectious, or communicable disease who wilfully exposes himself, and any

person who wilfully exposes another person afflicted with such disease, is guilty of a misdemeanor.

(Added by Stats.1957, c. 205, p. 864, § 20.)

Historical and Statutory Notes

Continuation of existing law, see Historical and Statutory Notes under § 410.

Derivation: Former § 2601, added by Stats. 1939, c. 60, p. 542, § 2601.

Pen.C. former § 394.

C.J.S. Health and Environment §§ 48, 51, 113, 114, 141 to 156.

§ 3354. Violations of chapter 3; misdemeanor; penalty

Any person who violates any section in Chapter 3 of this division, with the exception of Section 3111, is guilty of a misdemeanor, punishable by a fine of not less than fifty dollars ($50) nor more than one thousand dollars ($1,000), or by imprisonment for a term of not more than 90 days, or by both. He is guilty of a separate offense for each day that the violation continued.

(Added by Stats.1957, c. 205, p. 864, § 20. Amended by Stats.1983, c. 1092, § 151, eff. Sept. 27, 1983, operative Jan. 1, 1984.)

Historical and Statutory Notes

Continuation of existing law, see Historical and Statutory Notes under § 410.

The 1983 amendment increased the minimum fine from $25 to $50; and increased the maximum fine from $500 to $1,000.

Derivation: Former § 2602, added by Stats. 1939, c. 60, p. 542, § 2602.

Stats.1907, c. 492, p. 902, § 21; Stats.1911, c. 339, p. 571, § 4.

Notes of Decisions

In general 1

1. In general

If a person suspected of having tuberculosis refused to submit to an examination by the health officer, an action may be instituted to compel such examination or, a quarantine order may be issued, a violation of which may be prosecuted criminally. 36 Ops.Atty.Gen. 28, 7-14-60.

§ 3356. Illegal possession of intoxicating liquor

Every person who possesses any intoxicating liquor in or on any public hospital or sanatorium providing for the treatment of tuberculosis or within the boundaries of the grounds belonging thereto is guilty of a misdemeanor. The provisions of this section shall not prohibit (a) the possession of any intoxicating liquor used for medicinal purposes when issued pursuant to a written order of a physician licensed to practice medicine under the laws of the State of California, (b) the possession of any intoxicating liquor by personnel for his or her own use who resides at such hospital or sanatorium or on the grounds thereof, (c) the possession of any intoxicating liquor used by a minister of the gospel or priest or rabbi in a religious sacrament or ceremony or (d) the service of wine to a patient as part of the hospital's regular menu or bill of fare if the patient is located in a portion of the premises wholly separate and isolated from patients receiving treatment for tuberculosis.

Notes of Decisions

1. Validity of prior law

Stats.1915, p. 1530 (repealed; now, this section) was a valid exercise of the sovereign power and police power of the state to take all the necessary steps for the promotion of the health and comfort of its inhabitants and to make regulations essential to the protection of the state and the people thereof against the prevalence of disease, as the true purpose of county government organizations, is to perform functions which belong to the state itself, and the state may employ them jointly with itself or alone as instrumentalities in aid of the administration or carrying out of its own general governmental functions and policy. Sacramento County v. Chambers (1917) 164 P. 613, 33 C.A. 142.

2. Construction and application

In order to accomplish purpose for which this chapter dealing with tuberculosis was enacted, court should give chapter a broad and liberal construction. Application of Halko (1966) 54 Cal.Rptr. 661, 246 C.A.2d 553.

Legislature is vested with broad discretion in determining what are contagious and infectious diseases and in adopting means for preventing the spread thereof. Id.

§ 3279.1. Election of county to pay its share of health care cost; ineligibility for tuberculosis study or reimbursement

Notwithstanding any other provision of this chapter a county which has elected to come under the provisions of Section 14150.1 of the Welfare and Institutions Code [1] shall not receive any tuberculosis subsidy or reimbursement from the state under the provisions of this chapter.

(Added by Stats.1969, c. 811, p. 1634, § 1, operative July 1, 1970.)

[1] Repealed.

Historical and Statutory Notes

Section 2 of Stats.1969, c. 811, p. 1634, provides: "This act shall become operative on July 1, 1970."

§ 3280. Legislative declaration

Pulmonary tuberculosis is an infectious and communicable disease, dangerous to the public health, and all proper expenditures that may be made by any county, pursuant to this chapter, are necessary for the preservation of the public health of the county.

(Added by Stats.1957, c. 205, p. 859, § 20.)

Historical and Statutory Notes

Continuation of existing law, see Historical and Statutory Notes under § 410.

Derivation: Former § 3099, added by Stats. 1961, c. 60, p. 546, § 3099.

Stats.1935, c. 20, p. 80, § 6.

§§ 3281 to 3284. [Blank]

§ 3285. Duty of health officers; investigation of reported or suspected cases; powers of inspection, examination, quarantine or isolation

Each health officer is hereby directed to use every available means to ascertain the existence of, and immediately to investigate, all reported or suspected cases of tuberculosis in the infectious stages within his jurisdiction and to ascertain the sources of such infections. In carrying out such investigations, each health officer is hereby invested with full powers of inspection, examination and quarantine or isolation of all persons known to be infected with tuberculosis in an infectious stage and is hereby directed:

(a) To make such examinations as are deemed necessary of persons reasonably suspected of having tuberculosis in an infectious stage and to isolate or isolate and quarantine such persons, whenever deemed necessary for the protection of the public health.

(b) Follow local rules and regulations regarding examinations, quarantine, or isolation, and all general and special rules, regulations, and orders of the state department in carrying out such examination, quarantine or isolation.

(c) Whenever the health officer shall determine on reasonable grounds that an examination of any person is necessary for the preservation and protection of the public health, he shall make an examination order in writing, setting forth the name of the person to be examined, the time and place of the examination, and such other terms and conditions as may be necessary to protect the public health. Nothing contained in this subdivision shall be construed to prevent any person whom the health officer determines should have an examination for infectious tuberculosis from having such an examination made by a physician of his own choice who is licensed to practice medicine under the provisions of Chapter 5 (commencing with Section 2000), Division 2 of the Business and Professions Code under such terms and

conditions as the health officer shall determine on reasonable grounds to be necessary to protect the public health.

(d) Whenever the health officer shall determine that quarantine or isolation in a particular case is necessary for the preservation and protection of the public health, he shall make an isolation or quarantine order in writing, setting forth the name of the person to be isolated, the period of time during which the order shall remain effective, the place of isolation or quarantine, and such other terms and conditions as may be necessary to protect the public health.

(e) Upon the making of an examination, isolation, or quarantine order as provided in this section, a copy of such order shall be served upon the person named in such order.

(f) Upon the receipt of information that any examination, quarantine, or isolation order, made and served as herein provided, has been violated, the health officer shall advise the district attorney of the county in which such violation has occurred, in writing, and shall submit to such district attorney the information in his possession relating to the subject matter of such examination, isolation, or quarantine order, and of such violation or violations thereof.

(g) Any and all orders authorized under this section shall be made by the health officer and his authority to make such orders shall be delegated only pursuant to Section 7. The health officer shall not make any orders incorporating by reference any other rules or regulations.

(Added by Stats.1957, c. 205, p. 859, § 20. Amended by Stats.1961, c. 30, p. 936, § 2; Stats.1965, c. 1344, p. 3230, § 1; Stats.1965, c. 1552, p. 3645, § 1.)

Notes of Decisions

In general 2
Habeas corpus 5
Liability of officers 4

1. Validity

Provision of this section providing that health officer may make isolation or quarantine order of person with tuberculosis whenever health officer shall determine in particular case that quarantine or isolation is necessary for protection of public health, and that isolation or quarantine order shall be in writing, setting forth name of person to be isolated, period of time during which order shall remain effective, place of isolation or quarantine, and such other terms and conditions as may be necessary to protect public health does not deprive person having tuberculosis of his liberty without due process of law. Application of Halko (1966) 54 Cal.Rptr. 661, 246 C.A.2d 553.

2. In general

Provisions of this section dealing with duties of health officers in issuing tuberculosis quarantine orders make those duties discretionary rather than mandatory. Jones v. Czapkay (1960) 6 Cal.Rptr. 182, 182 C.A.2d 192.

This section does not apply to officers of the state department of public health. Id.

3. Quarantine orders

Consecutive orders of health officer for quarantine of person having tuberculosis may issue so long as person continues to be infected with tuberculosis and so long as health officer on reasonable grounds believes such person to be dangerous to public health. Application of Halko (1966) 54 Cal.Rptr. 661, 246 C.A.2d 553.

A health officer may institute an action to compel examination of person suspected of having tuberculosis who refuses to submit to an examination by the health officer or may issue a quarantine order, a violation of which may be prosecuted criminally. 36 Ops.Atty. Gen. 28.

A health officer has the power to quarantine and isolate an individual with active and contagious tuberculosis in any local jail when he finds that it is reasonably necessary to employ security measures to enforce the quarantine and to protect the public from contagion and no more suitable facility is available for such purpose. 30 Ops.Atty.Gen. 229, 11-8-57.

Where a patient quarantined in a sanatorium for the treatment of tuberculosis, demands that he be permitted to leave, reasonable physical force may be employed to prevent him from doing so. 6 Ops.Atty.Gen. 184.

4. Liability of officers

Exposure of plaintiff to known tubercular victim was sole proximate cause of plaintiff's acquiring the disease, and any breach of duty by health officers in failing to conduct proper or adequate investigation to insure strict compliance by patient with quarantine orders could constitute only a remote cause which could not form basis for imposition of liability upon them. Jones v. Czapkay (1960) 6 Cal. Rptr. 182, 182 C.A.2d 192.

5. Habeas corpus

Person, who is confined pursuant to quarantine order issued by health officer under this section is not entitled to relief on habeas corpus, where evidence shows reasonable cause to believe that person is infected, but person quarantined without reasonable grounds is entitled to relief by habeas corpus. Application of Halko (1966) 54 Cal.Rptr. 661, 246 C.A.2d 553.

§ 3286. Religious freedom; exemption from provisions

No examination or inspection shall be required of any person who depends exclusively on prayer for healing in accordance with the teachings of any well recognized religious sect, denomination or organization and claims exemption on such ground, except that the provisions of this code regarding compulsory reporting of communicable diseases and isolation and quarantine shall apply where there is probable cause to suspect that such person is infected with the disease in a communicable stage. Such person shall not be required to submit to any medical treatment, or to go to or be confined in a hospital or other medical institution; provided, he can be safely quarantined and/or isolated in his own home or other suitable place of his choice.

(Added by Stats.1957, c. 205, p. 859, § 20.)

§§ 3289 to 3291. Repealed by Stats.1975, c. 671, p. 1464, §§ 3 to 5, eff. Sept. 10, 1975

Historical and Statutory Notes

The repealed sections, added by Stats.1973, c. 1212, pp. 2750, 2751, §§ 51 to 53, provided for the succession by the department of benefits payments to the duties, purposes, responsibilities, jurisdiction, records, equipment, supplies and officers and employees of the department of health under this chapter.

§§ 3292, 3293. [Blank]

§ 3294. Establishment of wards, hospitals and sanatoriums

Each city, county, or group of counties may establish and maintain a tuberculosis ward, hospital, or sanatorium for the treatment of persons suffering from tuberculosis.

(Added by Stats.1957, c. 205, p. 860, § 20. Amended by Stats.1975, c. 671, p. 1464, § 6, eff. Sept. 10, 1975.)

Historical and Statutory Notes

Continuation of existing law, see Historical and Statutory Notes under § 410.

Derivation: Former § 3300, added by Stats. 1939, c. 60, p. 547, § 3300, amended by Stats. 1939, c. 1070, p. 2996; Stats.1945, c. 1447, p. 2724, § 1; Stats.1947, c. 1000, p. 2266, § 3. Stats.1915, c. 766, p. 1531, § 3; Stats.1919, c. 464, p. 853, § 1; Stats.1921, c. 861, p. 1642, § 2.

C.J.S. Hospitals § 4.
C.J.S. Social Security and Public Welfare § 126.

Notes of Decisions

1. In general

Former § 3300 (now this section), which provided that counties might establish and maintain a tuberculosis hospital for treatment of persons suffering from tuberculosis was permissive with respect to county assuming state's burden of caring for indigent persons, but was mandatory in its declaration that for such facility it should receive from state a sum prescribed. Los Angeles County v. State Dept. of Public Health (1958) 322 P.2d 968, 158 C.A.2d 425.

2. Agreement for joint care

A city and county might contract to provide for the care of their tuberculosis patients in a neighboring county sanatorium by proceeding under Stats.1921, p. 542, providing for the joint exercise of powers by counties, cities or both, notwithstanding Stats.1921, p. 1641, providing for the joint construction, ownership and management of tuberculosis hospitals, to be approved by the state bureau of tuberculosis, as a condition precedent to receiving state aid. City and County of San Francisco v. Boyle (1923) 215 P. 549, 191 C. 172.

3. Termination of agreement

Where three counties in 1918 entered into agreement to establish and maintain a tuberculosis hospital, and in 1953, the counties entered into an agreement for the withdrawal by one of the counties from participation in maintenance of the hospital, the counties could terminate the agreement for joint operation by agreement of a majority of each of the boards of supervisors, and without following the procedure for sale of county realty in accordance with Gov.C. 25520 et seq. 28 Ops.Atty.Gen. 349.

§ 3295. State care of persons who violate quarantine or isolation orders; lease of facilities

The state department shall lease any facilities it deems necessary to care for persons afflicted with active contagious tuberculosis who violate the quarantine or isolation orders of the health officer as provided in Section 3351 of the Health and Safety Code.

(Added by Stats.1957, c. 205, p. 860, § 20. Amended by Stats.1975, c. 671, p. 1464, § 7, eff. Sept. 10, 1975.)

Historical and Statutory Notes

Continuation of existing law, see Historical and Statutory Notes under § 410.

Derivation: Former § 3300.4, added by Stats.1949, c. 1091, p. 1990, § 1.

§ 3296. Burial expenses of persons confined in state institutions

Whenever any person confined in any state institution, as provided in Section 3351 of this code, subject to the jurisdiction of the Director of Corrections, dies, and any personal funds or personal property of such person remains in the hands of the Director of Corrections, such funds may be applied in an amount not exceeding three hundred dollars ($300) to the payment of expenses relating to burial; provided, however, that if no such funds are available, the State Department of Health Services shall reimburse the Director of Corrections for such expenses in an amount not exceeding three hundred dollars ($300).

(Added by Stats.1957, c. 205, p. 860, § 20. Amended by Stats.1971, c. 1593, p. 3276, § 174, operative July 1, 1973; Stats.1977, c. 1252, § 272, operative July 1, 1978.)

§ 3297. Release of person confined in county other than county of conviction

If the place of confinement of a person confined under the provisions of Section 3351 is in a county other than the county in which he was convicted, upon release he shall be released in the custody of the sheriff of the county in which he was convicted, and the sheriff shall forthwith return him to the place where he was convicted without the necessity of a court order or other process. The sheriff shall prior to the return of the person notify the health

officer having jurisdiction of the area to which he will be returned of the date he will reach said area.

(Added by Stats.1957, c. 205, p. 860, § 20. Amended by Stats.1957, c. 1736, p. 3120, § 1.)

Historical and Statutory Notes

Continuation of existing law, see Historical and Statutory Notes under § 410.

This section first took effect in its 1957 amended form since the 1957 addition and the 1957 amendment became effective on the same date.

Historical and Statutory Notes

Section 3298, added by Stats.1957, c. 205, p. 861, § 20, related to a state subsidy for patients cared for at public expense in private institutions. The section was derived from former § 3300a, added by Stats.1945, c. 601, p. 1132, § 1, renumbered § 3300.5 and amended by Stats.1947, c. 1000, p. 2267, § 4; Stats.1953, c. 550, p. 1810, § 1; Stats.1915, c. 766, p. 1531, § 3; Stats.1919, c. 464, p. 853, § 1; Stats.1921, c. 861, p. 1642, § 2.

Section 3299, added by Stats.1957, c. 205, p. 861, § 20, amended by Stats.1973, c. 1212, p. 2751, § 54, related to hospital reports and exchange of patients and contracts for care by other cities and counties. The section was derived from former § 3301, added by Stats. 1939, c. 60, p. 548, § 3301, amended by Stats. 1945, c. 1447, p. 2724, § 2; Stats.1947, c. 1000, p. 2267, § 5.

Section 3300, added by Stats.1957, c. 205, p. 861, § 20, amended by Stats.1959, c. 1579, p. 3910, § 1; Stats.1961, c. 1243, p. 3004, § 1, related to the amount of the state subsidy and also defined patient day and year. The section was derived from former §§ 3301.5, 3301.6, added by Stats.1947, c. 1000, p. 2268, § 6, amended by Stats.1949, c. 1242, p. 2195, §§ 1, 2; Stats.1953, c. 1513, p. 3175, §§ 1, 2.

Former § 3300, enacted by Stats.1939, c. 60, p. 547, § 3300, amended by Stats.1939, c. 1070, p. 2996; Stats.1945, c. 1447, p. 2724, § 1; Stats. 1947, c. 1000, p. 2266, § 3, and repealed by Stats.1957, c. 205, p. 861, § 1, related to establishment of tuberculosis hospitals by cities and counties, a state subsidy for public patients and admittance of pay patients.

Section 3300a, added by Stats.1945, c. 601, § 1 was renumbered § 3300.5 and amended by Stats.1947, c. 1000, § 4.

Section 3300.1, added by Stats.1961, c. 1243, p. 3005, § 2, amended by Stats.1963, c. 278, p. 1036, § 1, related to a city or county's use of contributions from nonstate sources to offset any state subvention.

§§ 3300.4 to 3300.5. Repealed by Stats.1957, c. 205, p. 848, § 1

Historical and Statutory Notes

Section 3300.4, added by Stats.1949, c. 1091, p. 1990, § 1, related to state care of tubercular persons who violate quarantine or isolation orders. See, now, § 3295.

Section 3300.45, added by Stats.1953, c. 28, p. 632, § 1, provided for burial expenses of persons confined to state tuberculosis treatment institutions. See, now, § 3296.

Section 3300.46, added by Stats.1953, c. 331, p. 1600, § 1, related to release of a person confined in a state tuberculosis treatment institution other than in the county of conviction.

Section 3300.5, added as § 3300a by Stats. 1945, c. 601, p. 1132, § 1, renumbered § 3300.5 and amended by Stats.1947, c. 1000, p. 2267, § 4; Stats.1953, c. 550, p. 1810, § 1, related to the state subsidy for patients cared for at public expense in private institutions.

§ 3301. Repealed by Stats.1975, c. 671, p. 1464, § 12, eff. Sept. 10, 1975

Historical and Statutory Notes

The repealed section, added by Stats.1957, c. 205, p. 862, § 20, derived from former § 3301.7, added by Stats.1953, c. 1513, p. 3176, § 3, related to the legislature's intention to adjust state participation from time to time.

Former § 3301, enacted by Stats.1939, c. 60, p. 548, § 3301, amended by Stats.1945, c. 1447, p. 2724, § 2; Stats.1947, c. 1000, p. 2267, § 5, derived from Stats.1915, c. 766, p. 1531, § 3; Stats.1919, c. 464, p. 853, § 1; Stats.1921, c. 861, p. 1642, § 2, and repealed by Stats.1957, c. 205, p. 848, § 1, related to hospital reports, exchange of patients by counties and cities, and contracts for care of patients by other cities and counties.

§§ 3301.5 to 3301.7. Repealed by Stats.1957, c. 205, p. 848, § 1

Historical and Statutory Notes

The repealed sections, added by Stats.1947, c. 1000, p. 2268, § 6; Stats.1953, c. 1513, p. 3176, § 3, amended by Stats.1949, c. 1242, pp. 2195, 2196, §§ 1, 2; Stats.1953, c. 1513, pp. 3175, 3176, §§ 1, 2, fixed the amount of subsidy for tuberculosis treatment provided by the state to counties, cities, and cities and counties.

§ 3302. Joint establishment of ward or hospital; hospital central committee; appointment of delegates; expenses as county charge

Each group of counties desiring to establish and maintain a tuberculosis ward or hospital for the treatment of persons suffering from tuberculosis shall appoint, by its board of supervisors, one supervisor as a delegate, who shall attend the general meetings of the delegates of each county in the group. The necessary expense incurred in attending such meetings is a county charge. The body thus formed shall be called the hospital central committee.

(Added by Stats.1957, c. 205, p. 862, § 20.)

Historical and Statutory Notes

Continuation of existing law, see Historical and Statutory Notes under § 410.

Former § 3302, enacted by Stats.1939, c. 60, p. 548, § 3302, and derived from Stats.1915, c. 766, p. 1531, § 3; Stats.1919, c. 464, p. 853, § 1; Stats.1921, c. 861, p. 1642, § 2, was repealed by Stats.1957, c. 205, p. 848, § 1. The former section provided for a hospital central committee for each group of counties which established a tuberculosis hospital.

Derivation: Former § 3302, enacted by Stats.1939, c. 60, p. 548, § 3302.

Stats.1915, c. 766, p. 1531, § 3; Stats.1919, c. 464, p. 853, § 1; Stats.1921, c. 861, p. 1642, § 2.

WESTLAW Topic No. 204.
C.J.S. Hospitals §§ 4, 5 et seq.

Notes of Decisions

1. In general

Under former §§ 3302 to 3309, authorizing group of counties to join to establish and main-

tain tuberculosis hospital to be supervised by a hospital central committee, the employees of such hospital are employees of hospital's central committee and not employees of various counties maintaining the hospital, and are consequently not local miscellaneous members of state employees' retirement system and are not subject to compulsory retirement at 70, under provisions of Gov.C. § 20983 (repealed; see, now, § 20981) pertaining to such local miscellaneous members. 25 Ops.Atty.Gen. 47.

2. Termination of agreement

Where three counties in 1918 entered into agreement to establish and maintain a tuberculosis hospital, and in 1953 the counties entered into an agreement for the withdrawal by one of the counties from participation in maintenance of the hospital, the counties could terminate the agreement for joint operation of the hospital by agreement of a majority of each of the boards of supervisors, and without following the procedure for the sale of county realty in accordance with the Gov.C. § 25520 et seq. 28 Ops.Atty.Gen. 349.

§ 3303. Change in number of delegates; unanimous agreement

Each group of counties maintaining a tuberculosis hospital under this chapter may by unanimous agreement provide for a different number of delegates to the hospital central committee than the number provided for in this chapter and may provide for a method of deciding a tie vote of the hospital central committee.

(Added by Stats.1957, c. 205, p. 862, § 20.)

Historical and Statutory Notes

Continuation of existing law see Historical and Statutory Notes under § 410.

Former § 3303 enacted by Stats.1939, c. 60, p. 548, § 3303, was repealed by Stats.1957, c. 205, p. 848, § 1. The former section related to a change in the number of delegates to the hospital central committee.

Derivation: Former § 3303, enacted by Stats.1939, c. 60, p. 548, § 3303.

Stats.1915, c. 766, p. 1530, § 3a, added Stats. 1935, c. 366, p. 1319, § 1.

§ 3304. Designation of place of business; assistance of county officers

The hospital central committee shall designate a county within the group maintaining the hospital as the place where the business of the hospital is to be transacted and where funds of the hospital are to be kept and deposited. All county officers selected for the business of the hospital shall render all necessary assistance required by the committee in keeping with the duties of their respective offices.

(Added by Stats.1957, c. 205, p. 862, § 20.)

Historical and Statutory Notes

Continuation of existing law, see Historical and Statutory Notes under § 410.

Former § 3304, enacted by Stats.1939, c. 60, p. 548, § 3304, and derived from Stats.1915, c. 766, p. 1530, § 3a; Stats.1935, c. 366, p. 1319, § 1, was repealed by Stats.1957, c. 205, p. 848, § 1. The former section related to designation of place of business and assistance to be rendered by county officers.

Derivation: Former § 3304, enacted by Stats.1939, c. 60, p. 548, § 3304.

Stats.1915, c. 766, p. 1530, § 3a, added Stats. 1935, c. 366, p. 1319, § 1.

Notes of Decisions

In general 1

1. In general

Weimar Sanatorium, a tuberculosis hospital operated by a number of counties in the Sacramento area, is an entity separate from its constituent counties and the hospital rather than the constituent counties is the employer of those persons who compose the hospital staff. 36 Ops.Atty.Gen. 237, 11–9–60.

§ 3305. Contracts among delegates; effect upon counties; apportionment of costs; collection of money due from counties

The delegates from each county may enter into an agreement with delegates from the other counties, on behalf of the county appointing them, binding the county to the joint enterprise and apportioning the cost of constructing, establishing, and maintaining the hospital. Money due from any county under the agreement may be collected by the hospital central committee or, on its behalf, by the board of supervisors of any county in the group, by action in the county in which the hospital is situated.

(Added by Stats.1957, c. 205, p. 862, § 20.)

Historical and Statutory Notes

Continuation of existing law, see Historical and Statutory Notes under § 410.

Former § 3305, enacted by Stats.1939, c. 60, p. 549, § 3305, and derived from Stats.1915, c. 766, p. 1531, § 3; Stats.1919, c. 464, p. 853, § 1; Stats.1921, c. 861, p. 1642, § 2, was repealed by Stats.1957, c. 205, p. 848, § 1. The former section related to contracts among delegates and collection of money due from counties.

Derivation: Former § 3305, enacted by Stats.1939, c. 60, p. 549, § 3305.

Stats.1915, c. 766, p. 1531, § 3; Stats.1919, c. 464, p. 853, § 1; Stats.1921, c. 861, p. 1642, § 2.

Notes of Decisions

In general 1

1. In general

A city's contract to advance money to a neighboring county for the construction of additional hospital units for the care and treatment of the city's tuberculosis patients, was not invalid because the county retained supervisory control of the entire hospital, including the right to reject or remove patients, there being no presumption that unreasonable rules will be adopted or arbitrary authority exercised. City and County of San Francisco v. Boyle (1923) 215 P. 549, 191 C. 172.

That a gross sum set aside by a city to cover the cost of construction and deterioration of additional hospital units to be constructed by a neighboring county for the care and treatment of the city's tuberculosis patients as provided by a contract between the city and county may be wholly consumed on expiration of the contract term, would not be conclusive proof of a bad bargain and does not invalidate the contract, the presumption being that the city governing body, whose judgment is conclusive in the absence of a showing of want of jurisdiction, bad faith, gross extravagance, or some fact sufficient to vitiate the contract considered the wisdom and policy of the whole plan in the light of the objects to be attained. Id.

§ 3306. Building committee; powers of hospital central committee

The hospital central committee may appoint a committee to supervise the construction of the hospital, approve the bills, and do the usual things required of a building committee.

The hospital central committee is the governing body of the hospital. It has the same powers and duties in regard to the hospital that a board of supervisors has over a county hospital. It shall adopt rules for its govern-

ment, which shall include provisions for holding meetings and for the addition of other counties to the group. It may appoint such committees as are necessary, and shall prescribe their duties.

(Added by Stats.1957, c. 205, p. 862, § 20.)

C.J.S. Hospitals § 4.

Notes of Decisions

1. Termination of agreement

Three counties operating a tuberculosis sanitorium might terminate agreement for joint operation by agreement of a majority of each board of supervisors, and the sanitorium may be transferred to two of the counties, eliminating the third, as incident of such agreement, without complying with requirements of Gov.C. § 25520 et seq. for sale of county real property. 28 Ops.Atty.Gen. 349, 12-21-56.

§ 3308. Payment of expenses by counties; deposit in cash revolving fund

Each county in the group shall pay its proportionate share to the hospital central committee of an amount designated by the committee to constitute a cash revolving fund to carry on the usual work and expense of the hospital. Each month a statement of the actual expenses of the hospital shall be sent to the board of supervisors of each county, together with a claim for the county's proportionate share of the expenses. Monthly claims shall be reduced to the extent of any remaining balance of a county's quarterly payments. The amounts when collected shall be paid into the cash revolving fund.

(Added by Stats.1957, c. 205, p. 863, § 20. Amended by Stats.1959, c. 1489, p. 3781, § 1.)

§ 3315. Annual subvention for control program; local health departments; use; additional funds

The State Department of Health Services may distribute for the purpose of tuberculosis control an annual subvention, paid quarterly, to any local health department that maintains a tuberculosis control program consistent with standards and procedures established by the department. This annual subvention shall be used primarily for the strengthening of tuberculosis prevention activities by local health departments. Further, the department may allocate additional funds to selected local health departments based on high disease incidence, or other standards established by the department. These additional funds shall be expended primarily for the cost of diagnosis, treatment, and followup services required for an effective tuberculosis control program. Services rendered under this section may not be made dependent on status of residence.

(Added by Stats.1975, c. 671, p. 1464, § 13, eff. Sept. 10, 1975. Amended by Stats.1977, c. 1252, § 273, operative July 1, 1978.)

§ 3317. Administrative costs; limitation; laboratory services and hospitalization facilities

Of the annual appropriation made to the department for tuberculosis control, the department may expend a sum not to exceed 7.5 percent of the total, for administrative costs. In addition, it may, if it deems necessary, withhold a portion of the appropriation to pay for the cost of regional

laboratory services and regional hospitalization facilities for patients whose care cannot be reasonably accomplished in facilities available within a local health department, or it may contract with physicians to supervise the medical care of tuberculosis patients in areas where such specialized care is not available. Further, the appropriation shall be available to purchase materials or drugs used in tuberculosis control for distribution to local health departments.

Inasmuch as the order provided for by Section 3285 is for the protection of the public health, any person who, after service upon him of an order of a health officer directing his isolation or examination as provided in Section 3285, violates or fails to comply with the same or any provision thereof, is guilty of a misdemeanor, and, upon conviction thereof, in addition to any and all other penalties which may be imposed by law upon such conviction, may be ordered by the court confined until such order of such health officer shall have been fully complied with or terminated by such health officer, but not exceeding six months from the date of passing judgment upon such conviction; further provided, that the court, upon suitable assurances that such order of such health officer will be complied with, may place any person convicted of a violation of such order of such health officer upon probation for a period not to exceed two years, upon condition that the said order of said health officer be fully complied with; and provided further, that upon any subsequent violation of such order of such health officer, such probation shall be terminated and confinement as herein provided ordered by the court.

(Added by Stats.1957, c. 205, p. 863, § 20. Amended by Stats.1961, c. 30, p. 937, § 3; Stats.1965, c. 1552, p. 3646, § 2.)

Historical and Statutory Notes

Continuation of existing law, see Historical and Statutory Notes under § 410.

The 1961 amendment included an examination as provided in § 3285 as subject to the provisions of this section.

The 1965 amendment added the introductory phrase "Inasmuch as the order provided for by § 3285 is for the protection of the public health".

Derivation: Former § 2600.5, added by Stats.1949, c. 305, p. 592, § 1.

Notes of Decisions

In general 1

1. In general

If a person suspected of having tuberculosis refuses to submit to an examination by the health officer, an action may be instituted to compel such examination or a quarantine order may be issued, a violation of which may be prosecuted criminally. 36 Ops.Atty.Gen. 28, 7-14-60.

§ 3352. Subsequent convictions; punishment

Upon any subsequent conviction under the provisions of Section 3351, the court may order the person confined for a period not exceeding one year for such subsequent conviction, or such other penalty as provided by said section.

(Added by Stats.1957, c. 205, p. 864, § 20.)

Historical and Statutory Notes

Continuation of existing law, see Historical and Statutory Notes under § 410.

Derivation: Former § 2600.6, added by Stats.1953, c. 331, p. 1600, § 2.

Notes of Decisions

Jurisdiction 1

1. Jurisdiction

Municipal courts, have jurisdiction to enforce provisions of this section providing that for a second violation of tuberculosis quarantine, a recalcitrant tuberculosis patient may be confined for a period of one year in facilities provided by the state department of public health, but justice courts do not have jurisdiction to do so. 23 Ops.Atty.Gen. 275.

§ 3353. Wilful exposure to disease; misdemeanor

Except in the case of the removal of an afflicted person in a manner the least dangerous to the public health, any person afflicted with any contagious, infectious, or communicable disease who wilfully exposes himself, and any

person who wilfully exposes another person afflicted with such disease, is guilty of a misdemeanor.

(Added by Stats.1957, c. 205, p. 864, § 20.)

Historical and Statutory Notes

Continuation of existing law, see Historical and Statutory Notes under § 410.

BILL NUMBER: AB 803 CHAPTERED 10/04/93
BILL TEXT

CHAPTER 676
FILED WITH SECRETARY OF STATE OCTOBER 4, 1993
APPROVED BY GOVERNOR OCTOBER 1, 1993
PASSED THE ASSEMBLY SEPTEMBER 10, 1993
PASSED THE SENATE SEPTEMBER 9, 1993
AMENDED IN SENATE SEPTEMBER 7, 1993
AMENDED IN SENATE AUGUST 30, 1993
AMENDED IN SENATE AUGUST 18, 1993
AMENDED IN SENATE AUGUST 17, 1993
AMENDED IN SENATE JULY 12, 1993
AMENDED IN ASSEMBLY APRIL 15, 1993

INTRODUCED BY Assembly Member Gotch

FEBRUARY 25, 1993

An act to amend Section 3351 of, to add Sections 3003, 3006, 3054, 3279.3, 3281, 3282, 3283, 3284, 3285.1, 3285.2, 3285.3, and 3285.4 to, and to repeal and add Section 3285 of, the Health and Safety Code, relating to communicable disease.

LEGISLATIVE COUNSEL'S DIGEST

AB 803, Gotch. Communicable disease: tuberculosis.

(1) Existing law requires the State Department of Health Services to maintain a program for the control of tuberculosis.

This bill would authorize the State Director of Health Services and a local health officer to order examinations for tuberculosis infection, as defined, of certain persons.

The bill would require the department to be the lead agency for all tuberculosis control and prevention activities at the state level.

The bill would, with certain exceptions, prohibit a person known to have active tuberculosis disease, as defined, or a person for whom the medical staff has reasonable grounds to believe has active tuberculosis disease from being discharged from a licensed health facility, or penal institution, or transferred, until certain notification and in some situations, treatment plan approval requirements are met.

The bill would require a health care provider who provides treatment to, or a person in charge of a health facility or clinic providing outpatient treatment for, a person with active tuberculosis, to report to the local health officer, as prescribed. The bill would require the health care provider to examine, or cause to be examined all household contacts of the person, as specified.

This bill would require a health officer to notify the medical officer of the parole region when there are reasonable grounds to believe that a parolee under the jurisdiction of the Department of Corrections has active tuberculosis disease. By imposing new duties upon a local entity, this bill would impose a state-mandated local program.

(2) Existing law requires a local health officer to use every available means to ascertain the existence of, and investigate,

all reported or suspected cases of tuberculosis in the infection stages, to make examinations and isolate, or quarantine and isolate certain persons, following local rules and regulations, and to make an examination order and isolation or quarantine order under certain circumstances, as prescribed.

This bill would in addition authorize the local health officer, under prescribed conditions, to issue an order authorizing removal to, or admission into, a health facility or other treatment facility, an order requiring completion of an appropriate prescribed course of medication, an order to follow a course of directly observed therapy, or an order for exclusion from the workplace. The bill would authorize a health officer to issue an order for isolation of persons with infectious tuberculosis in their residence. The order would be required to include certain information, including payer source. The bill would authorize a health officer to issue an order authorizing removal to, or admission into, a health facility or other treatment facility, as prescribed. The bill would exclude persons incarcerated in a state correctional institution from being subject to one of those orders.

The bill would prohibit anything in that provision from being construed to permit or require forcible administration of medication.

This bill would authorize a health officer to remove to, or detain in, a hospital or other place for examination or treatment persons subject to an order under this act, as prescribed.

(3) Existing law provides that any person who violates or fails to comply with an order of a health officer directing his or her isolation or examination is guilty of a misdemeanor.

This bill would instead provide that any person who violates or fails to comply with any order described in (2) is guilty of a misdemeanor. By changing the definition of a crime, the bill would impose a state-mandated local program.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that for certain costs no reimbursement is required by this act for a specified reason.

Moreover, this bill would provide that, if the Commission on State Mandates determines that this bill contains other costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

THE PEOPLE OF THE STATE OF CALIFORNIA DO ENACT AS FOLLOWS:

SECTION 1. Section 3003 is added to the Health and Safety Code, to read:

3003. As used in this division, a person has "active tuberculosis disease" when either one of the following occur:

(a) A smear or culture taken from any source has tested positive for tuberculosis and the person has not completed the appropriate prescribed course of medication for tuberculosis disease.

(b) There is radiographic, current clinical, or laboratory evidence sufficient to establish a medical diagnosis of tuberculosis for which treatment is indicated.

SEC. 2. Section 3006 is added to the Health and Safety Code, to read:

3006. As used in this division the following terms have the following meanings, unless the context indicates otherwise:

(a) "Infectious tuberculosis disease" means active or suspected active tuberculosis disease in an infectious state.

(b) "Tuberculosis infection" means the latent phase of tuberculosis, during which the infected person cannot spread tuberculosis to others.

(c) "Heightened risk of tuberculosis exposure" means likely exposure to persons with infectious tuberculosis disease.

(d) "The appropriate prescribed course of medication for tuberculosis disease" means that course recommended by the most recent guidelines of the department, the most recent guidelines of the Centers for Disease Control and Prevention, or the most recent guidelines of the American Thoracic Society.

(e) "Directly observed therapy" means the appropriately prescribed course of treatment for tuberculosis disease in which the prescribed antituberculosis medications are administered to the person or taken by the person under direct observation.

(f) An "examination" for tuberculosis infection or disease means conducting tuberculosis specific tests, including, but not limited to, Mantoux tuberculin skin tests, laboratory examination, and X-rays, as recommended by the most recent guidelines of any of the following:

(1) The local health officer.

(2) The department.

(3) The Centers for Disease Control and Prevention.

(4) The American Thoracic Society.

(g) "State correctional institution" means a prison, institution, or other facility under the jurisdiction of the Department of Corrections or the Department of the Youth Authority.

(h) "Local detention facility" is defined in Section 6031.4 of the Penal Code.

(i) "Penal institution" means either a state correctional institution or a local detention facility.

(j) "Health facility" means a licensed health facility as defined in Sections 1250, 1250.2, and 1250.3.

SEC. 3. Section 3054 is added to the Health and Safety Code, to read:

3054. (a) The state director may order examinations for tuberculosis infection in the following persons for the purpose of directing preventive measures:

(1) Persons in close contact with persons with infectious tuberculosis disease.

(2) Other persons for whom the state director has reasonable grounds to determine are at heightened risk of tuberculosis exposure.

(b) An order for examination for tuberculosis infection shall be in writing and shall include other terms and conditions as may be necessary to protect the public health.

SEC. 4. Section 3279.3 is added to the Health and Safety Code, to read:

3279.3. The state department shall be the lead agency for all tuberculosis control and prevention activities at the state level.

SEC. 5. Section 3281 is added to the Health and Safety Code, to read:

3281. (a) A health facility, local detention facility, or state correctional institution shall not discharge or release any of the following persons unless subdivision (e) is complied with:

(1) A person known to have active tuberculosis.

(2) A person who the medical staff of the health facility or of the penal institution has reasonable grounds to believe has active tuberculosis.

In addition, persons specified in this subdivision may be discharged from a health facility only after a written treatment plan described in Section 3282 is approved by a health officer.

Persons specified in this subdivision may be discharged from a penal institution only after a written treatment plan described in Section 3282 is received by a health officer. This subdivision shall not apply to transfers within the state correctional system or to interfacility transfers occurring within a local detention facility system.

(b) No health facility shall transfer a person described in paragraph (1) or (2) of subdivision (a) to another health facility unless subdivision (e) is complied with. This subdivision shall not apply to transfers within the state correctional system or to interfacility transfers occurring within a local detention facility system.

(c) No state correctional institution or local detention facility shall transfer a person described in paragraph (1) or (2) of subdivision (a) from a state to a local, or from a local to a state, penal institution unless notification and a written treatment plan are received by the chief medical officer of the penal institution receiving the person.

(d) No local detention facility shall transfer a person described in paragraphs (1) and (2) of subdivision (a) to a local detention facility in another jurisdiction unless subdivision (e) is complied with and notification and a written treatment plan are received by the chief medical officer of the local detention facility receiving the person.

(e) Persons specified in paragraph (1) or (2) of subdivision (a), in subdivision (b), in subdivision (c), or in subdivision (d) may be discharged, released, or transferred, as the case may be, only after notification and a written treatment plan pursuant to Section 3282 has been received by the local health officer. When prior notification is not possible or would jeopardize the public safety or the safety and security of the penal institution, then the notification and treatment plan shall be submitted within 24 hours of discharge, release, or transfer.

SEC. 6. Section 3282 is added to the Health and Safety Code, to read:

3282. Each health care provider who treats a person for active tuberculosis, each person in charge of a health facility, or each person in charge of a clinic providing outpatient treatment for active tuberculosis shall promptly report to the local health officer at the times that the health officer requires, but no less frequently than when there are reasonable grounds to believe that a person has active tuberculosis, and when a person ceases treatment for tuberculosis. Situations in which the provider may conclude that the patient has ceased treatment include times when the patient fails to keep an appointment, relocates without transferring care, or

discontinues care. The report shall include an individual treatment plan that indicates the name of the medical provider who has specifically agreed to provide medical care, the address of the person, and any other pertinent clinical or laboratory information required by the health officer. Each health care provider who treats a person with active tuberculosis disease, and each person in charge of a health facility or a clinic providing outpatient treatment for active tuberculosis disease, shall maintain written documentation of each patient's adherence to his or her individual treatment plans. Nothing in this section shall authorize the disclosure of test results for human immunodeficiency virus (HIV) unless authorized by Chapter 1.11 (commencing with Section 199.20) of, Chapter 1.12 (commencing with Section 199.30) of, and Chapter 1.13 (commencing with Section 199.42) of, Division 1.

In the case of a parolee under the jurisdiction of the Department of Corrections, the health officer shall notify the medical officer of the parole region when there are reasonable grounds to believe that the parolee has active tuberculosis disease and when the parolee ceases treatment for tuberculosis. Situations where the health officer may conclude that the parolee has ceased treatment include times when the parolee fails to keep an appointment, relocates without transferring care, or discontinues care.

SEC. 7. Section 3283 is added to the Health and Safety Code, to read:

3283. Each health care provider who treats a person for active tuberculosis disease shall examine, or cause to be examined, all household contacts or shall refer them to the local health officer for examination. Each health care provider shall promptly notify the health officer of the referral. When required by the health officer, nonhousehold contacts and household contacts not examined by a health care provider shall submit to examination by the health officer or designee. If any abnormality consistent with the symptoms of tuberculosis disease is found, steps satisfactory to the health officer shall be taken to refer the person promptly to a health care provider for further investigation, and if necessary, treatment. Contacts shall be reexamined at times and in a manner as the health officer may require. When requested by the health officer, a health care provider shall report the results of any examination related to tuberculosis of a contact.

SEC. 8. Section 3284 is added to the Health and Safety Code, to read:

3284. (a) Within the territory under his or her jurisdiction, each health officer may order examinations for tuberculosis infection for the purposes of directing preventive measures for persons in the territory, except those incarcerated in a state correctional institution, for whom the health officer has reasonable grounds to determine are at heightened risk of tuberculosis exposure.

(b) An order for examination pursuant to this section shall be in writing and shall include other terms and conditions as may be necessary to protect the public health.

SEC. 9. Section 3285 of the Health and Safety Code is repealed.

SEC. 10. Section 3285 is added to the Health and Safety Code, to read:

3285. Each health officer is hereby directed to use every available means to ascertain the existence of, and immediately

investigate all reported or suspected cases of active tuberculosis disease in the jurisdiction, and to ascertain the sources of those infections. In carrying out the investigations, each health officer shall follow applicable local rules and regulations and all general and special rules, regulations, and orders of the state department. If the health officer determines that the public health in general or the health of a particular person is endangered by exposure to a person who is known to have active tuberculosis disease, or to a person for whom there are reasonable grounds to believe has active tuberculosis disease, the health officer may issue any orders he or she deems necessary to protect the public health or the health of any other person, and may make application to a court for enforcement of the orders. The orders shall be in writing, and shall include the name of the person, the period of time during which the order shall remain effective, the location, payor source, and other terms and conditions as may be necessary to protect the public health. Upon issuing an order, a copy of the order shall be served upon the person named in the order. Upon the receipt of information that any order has been violated, the health officer shall advise the district attorney of the county in which the violation has occurred, in writing, and shall submit to the district attorney the information in his or her possession relating to the subject matter of the order, and of the violation or violations thereof.

Any and all orders authorized under this chapter shall be made by the health officer, and his or her authority to make the orders may be delegated to the person in charge of medical treatment of inmates in penal institutions within the territory, or pursuant to Section 7. The health officer shall not make any orders incorporating by reference any other rules or regulations.

The orders may include, but shall not be limited to, any of the following:

(a) An order authorizing the removal to, or admission into, a health facility or other treatment facility for appropriate examination for tuberculosis of a person who is known to have active tuberculosis, or a person for whom there are reasonable grounds to believe that the person has active tuberculosis and who is unable or unwilling voluntarily to submit to the examination by a physician or by the health officer. Any person whom the health officer determines should have an examination for tuberculosis may have the examination made by a physician of his or her own choice who is licensed to practice medicine under Chapter 5 (commencing with Section 2000) of Division 2 of the Business and Professions Code under terms and conditions as the health officer shall determine on reasonable grounds to be necessary to protect the public health.

(b) An order requiring a person who has active tuberculosis to complete an appropriate prescribed course of medication for tuberculosis and, if necessary, to follow required contagion precautions for tuberculosis. This subdivision does not allow the forceable or involuntary administration of medication. If an order to complete therapy is not complied with, the health officer may issue orders pursuant to subdivision (d), (e), (f), or (g).

(c) An order requiring a person who has active tuberculosis and who is unable or unwilling otherwise to complete an appropriate prescribed course of medication for tuberculosis to

follow a course of directly observed therapy. This subdivision does not allow forceable or involuntary administration of medication. If an order to follow a course of directly observed therapy is not complied with, the health officer may issue orders pursuant to subdivision (d), (e), (f), or (g).

(d) An order for the removal to, or admission into, a health facility or other treatment facility of a person if both of the following occur:

(1) The person has infectious tuberculosis, or who presents a substantial likelihood of having infectious tuberculosis, based upon proven epidemiologic evidence, clinical evidence, X-ray readings, or tuberculosis laboratory test results.

(2) The health officer finds, based on recognized infection control principles, that there is a substantial likelihood the person may transmit tuberculosis to others because of his or her inadequate separation from others.

(e) An order for the removal to, or admission into, a health facility or other treatment facility of a person if both of the following occur:

(1) The person has active tuberculosis disease, or has been reported to the health officer as having active tuberculosis disease with no subsequent report to the health officer of the completion of an appropriate prescribed course of medication for tuberculosis.

(2) There is a substantial likelihood, based on the person's past or present behavior, that he or she cannot be relied upon to participate in or complete an appropriate prescribed course of medication for tuberculosis and, if necessary, follow required contagion precautions for tuberculosis. The behavior may include, but is not limited to, refusal or failure to take medication for tuberculosis, refusal or failure to keep appointments or treatment for tuberculosis, refusal or failure to complete the treatment for tuberculosis, or disregard for contagion precautions for tuberculosis.

(f) An order for exclusion from attendance at the workplace for persons with infectious tuberculosis. The order may, also, exclude the person from any place when the health officer determines that the place cannot be maintained in a manner adequate to protect others against the spread of tuberculosis.

(g) An order for isolation of persons with infectious tuberculosis to their place of residence until the health officer has determined that they no longer have infectious tuberculosis.

(h) This section shall apply to all persons except those incarcerated in a state correctional institution.

(i) This section shall not be construed to require a private hospital or other private treatment facility to accept any patient without a payment source, including county responsibilities under Section 17000 of the Welfare and Institutions Code, except as required by Sections 1317 et seq. or by federal law.

SEC. 11. Section 3285.1 is added to the Health and Safety Code, to read:

3285.1. The health officer may remove to, or detain in, a hospital or other place for examination or treatment a person who is the subject of an order of removal or detention issued pursuant to Section 3285 without a prior court order except that when a person detained pursuant to Section 3285 has requested release, the health officer shall make an application for a court order authorizing the detention within 72 hours after the

request or, if the 72-hour period ends on a Saturday, Sunday, or legal holiday, by the end of the first business day following the Saturday, Sunday, or legal holiday, which application shall include a request for an expedited hearing. After the request for release, detention shall not continue for more than five business days in the absence of a court order authorizing detention. However, in no event shall any person be detained for more than 60 days without a court order authorizing the detention. The health officer shall seek further court review of the detention within 90 days following the initial court order authorizing detention and thereafter within 90 days of each subsequent court review. In any court proceeding to enforce a health officer's order for the removal or detention of a person, the health officer shall prove the particularized circumstances constituting the necessity for the detention by clear and convincing evidence. Any person who is subject to a detention order shall have the right to be represented by counsel and upon the request of the person, counsel shall be provided.

SEC. 12. Section 3285.2 is added to the Health and Safety Code, to read:

3285.2. (a) An order of a health officer pursuant to Section 3285 shall set forth all of the following:

(1) The legal authority under which the order is issued, including the particular sections of state law or regulations.

(2) An individualized assessment of the person's circumstances or behavior constituting the basis for the issuance of the order.

(3) The less restrictive treatment alternatives that were attempted and were unsuccessful, or the less restrictive treatment alternatives that were considered and rejected, and the reasons the alternatives were rejected.

(b) An order for the removal and detention of a person shall do all of the following:

(1) Include the purpose of the detention.

(2) Advise the person being detained that he or she has the right to request release from detention by contacting a person designate on the health officer's order at the telephone number stated on the order and that the detention shall not continue for more than five business days after the request, in the absence of a court order authorizing the detentions.

(3) Advise the person being detained that, whether or not he or she requests release from detention, the health officer is required to obtain a court order authorizing detention within 60 days following the commencement of detention and thereafter shall further seek court review of the detention within 90 days of the court order and within 90 days of each subsequent court review.

(4) Advise the person being detained that he or she has the right to arrange to be represented by counsel or to have counsel provided, and that if he or she chooses to have counsel provided, the counsel will be notified that the person has requested legal representation.

(5) Be accompanied by a separate notice that shall include, but not be limited to, all of the following additional information:

(A) That the person being detained has the right to request release from detention by contacting a person designated on the health officer's order at a telephone number stated on the order, and that the detention shall not continue for more than

five business days after the request in the absence of a court order authorizing the detention.

(B) That he or she has the right to arrange to be advised and represented by counsel or to have counsel provided, and that if he or she chooses to have counsel provided, the counsel will be notified that the person has requested legal representation.

(C) That he or she may supply the addresses or telephone numbers of friends or relatives to receive notification of the person's detention, and that the health officer shall, at the patient's request, provide notice to a reasonable number of those people that the person is being detained.

SEC. 13. Section 3285.3 is added to the Health and Safety Code, to read:

3285.3. Notwithstanding any inconsistent provision of Section 3285, 3285.1 or 3285.2, all of the following shall apply:

(a) A person who is detained solely pursuant to subdivision (a) of Section 3285 shall not continue to be detained beyond the minimum period of time required, with the exercise of all due diligence, to make a medical determination of whether a person who is suspected of having tuberculosis, has active tuberculosis or whether a person who has active tuberculosis has infectious tuberculosis. Further detention of the person shall be authorized only upon the issuance of a health officer's order pursuant to subdivision (d) or (e) of Section 3285.

(b) A person who is detained solely for the reasons described in subdivision (d) of Section 3285 shall not continue to be detained after he or she ceases to be infectious or after the health officer ascertains that changed circumstances exist that permit him or her to be adequately separated from others so as to prevent transmission of tuberculosis after his or her release from detention.

(c) A person who is detained for the reasons described in subdivision (f) of Section 3285 shall not continue to be detained after he or she has completed an appropriate prescribed course of medication.

SEC. 14. Section 3285.4 is added to the Health and Safety Code, to read:

3285.4. For the purposes of Sections 3285, 3285.1, and 3285.2, all of the following shall apply:

(a) If necessary, language interpreters and persons skilled in communicating with vision and hearing impaired individuals shall be provided in accordance with applicable law.

(b) Nothing in those sections shall be construed to permit or require the forcible administration of any medication without a prior court order.

(c) Any and all orders authorized under those sections shall be made by the health officer and his or her authority to make the orders shall be delegated only pursuant to Section 7. The health officer shall not make any orders incorporating by reference any other rules or regulations.

SEC. 15. Section 3351 of the Health and Safety Code is amended to read:

3351. Inasmuch as the orders provided for by Section 3285 are for the protection of the public health, any person who, after service upon him or her of an order of a health officer as provided in Section 3285 violates or fails to comply with the order, is guilty of a misdemeanor. Upon conviction thereof, in addition to any and all other penalties that may be imposed by law upon the conviction, the person may be ordered by the court

confined until the order of the health officer shall have been fully complied with or terminated by the health officer, but not exceeding one year from the date of passing judgment upon the conviction, further, the court, upon suitable assurances that the order of the health officer will be complied with, may place any person convicted of a violation of the order of the health officer upon probation for a period not to exceed two years, upon condition that the order of the health officer be fully complied with, further, upon any subsequent violation of the order of the health officer, the probation shall be terminated and confinement as provided for in this section shall be ordered by the court.

SEC. 16. Section 3355 of the Health and Safety Code is amended to read:

3355. The district attorney of the county in which a violation of Sections 3285 and 3351 may be committed, shall prosecute all such violations and, upon the request of a health officer, shall prosecute, as provided in Section 3351, violations of any order of a health officer made and served as provided in Section 3285 or Section 3002.

SEC. 17. No reimbursement is required by this act pursuant to Section 6 of Article XIIIB of the California Constitution because the only costs which may be incurred by a local agency or school district will be incurred because this act creates a new crime or infraction, changes the definition of a crime or infraction, changes the penalty for a crime or infraction, or eliminates a crime or infraction. Moreover, notwithstanding Section 17610 of the Government Code, if the Commission on State Mandates determines that this act contains other costs mandated by the state, reimbursement to local agencies and school districts for those costs shall be made pursuant to Part 7 (commencing with Section 17500) of Division 4 of Title 2 of the Government Code. If the statewide cost of the claim for reimbursement does not exceed one million dollars ($1,000,000), reimbursement shall be made from the State Mandates Claims Fund.

Also, notwithstanding Section 17580 of the Government Code, unless otherwise specified in this act, the provisions of this act shall become operative on the same date that the act takes effect pursuant to the California Constitution. Section 17580 of the Government Code, unless otherwise specified in this act, the provisions of this act shall become operative on the same date that the act takes effect pursuant to the California Constitution.

BILL ANALYSIS

AB 803

Gotch (D)

9/7/93 in Senate

21

77-0, p. 1614, 5/13/93
(Passed Assembly on Consent)

SUBJECT: Communicable disease: tuberculosis

SOURCE: Health Officer's Association of California

DIGEST: This bill makes various changes to the Health and Safety Code šrelated to the control of tuberculosis (TB).

Senate Floor Amendments of 9/7/93:

1. Specify that the use of the term "health facility" in this bill is the š same as it is currently defined in existing law.

2. Eliminate persons in a local detention facility, as specified, from the š provision requiring that discharge from the facility is contingent on the approval of a written treatment plan.

3. Provide flexibility to penal institutions by permitting, under š specified conditions, the submission of a treatment plan within 24 hours of discharge, release, or transfer of a person with, or who is believed to have, active tuberculosis.

ANALYSIS: Current law:

1. Requires the Department of Health Services (DHS) to maintain a program š for the control of TB, and allows the department to establish standards and procedures for the operation of local tuberculosis control programs.

□

2.Requires local health officers to investigate all reported or suspected
š cases of tuberculosis. A health officer may isolate or quarantine persons with infectious TB.

3.Provides that any violation of an order by a health officer is a
š misdemeanor. In addition to any existing penalties, a person violating such an order may be confined for a period not exceeding six months.

In 1992, DHS, the California Tuberculosis Controllers Association and the šAmerican Lung Association convened a task force on tuberculosis elimination.

This bill seeks to address some of the problems identified by the task force.

This bill:

1. Requires DHS to be the lead agency for all tuberculosis control and
š prevention activities.

2. Allows the state director of DHS to order examinations for TB, in
š writing, of persons in close contact with others infected with TB, and those who are at heightened risk of TB exposure.

3. Prohibits health facilities, local detention facilities or state
š correctional institutions from releasing any person known to have, or is suspected to have, active TB, and prohibits the transfer of such persons between institutions without notification and a specified written treatment plan approved by the local health officer or the chief medical officer of the penal institution or local detention facility. Requires written treatment plan approval by a health officer before discharge from a health facility or penal institution is permitted. Permits the submission of the treatment plan within 24 hours of discharge, release, or transfer by a penal institution under specified conditions.

4. Requires each health care provider who treats a person for active TB,
š each person in charge of a health facility, and each person in charge of a clinic providing outpatient treatment for TB to promptly report to the local health officer at specified times. Requires the report to provide specified information, and that each of the specified health workers maintain documentation of each patient's adherence to treatment plans. Requires, in the case of a parolee, the health officer to notify the medical officer of the parole region when there are reasonable grounds to believe that a parolee under the jurisdiction of the Department of Corrections has active TB disease.

5. Requires each health care provider who treats a person for active TB
š disease to examine all household contacts or refer them to the local health officer for examination. Requires all nonhousehold and household contact to submit to examination, when required by the health officer. Requires health officers to refer a person to a health care provider if problems are found. Requires a health care provider to report the results of any exam related to tuberculosis of a contact, upon request of the health officer.

CONTINUED

6. For the purposes of directing preventive measures, permits health
š officers to order TB exams for persons within their jurisdiction, except for those incarcerated in a state correctional institution, determined to be at heightened risk of TB exposure.

7. Directs all health officers to investigate all reported or suspected
š cases and sources of active TB disease in their jurisdiction, except those in a state correctional institution. If public health is endangered by a person who has or suspected to have active TB disease, the health officer may issue an order to be served upon a person, with specified requirements, as necessary to protect the public health. The health officer order may include, but it not limited to:

a. the authorization to remove to, or admit into a health facility for
š examination, any person who has or is suspected to have active TB, and is unable or unwilling to voluntarily submit to examination;

b. requiring a person with active TB to complete a prescribed course
š of medication and follow required contagion precautions for TB;

c. requiring a person with TB, under specified conditions, to follow a
š course of directly observed therapy;

d. the authorization to remove to, or admit into a health facility of
š a person with infectious TB, under specified conditions, including a person's refusal or failure to keep appointments or treatment for TB;

e. exclusion from attendance at a workplace, or any place when the
š health officer determines the place cannot be maintained to protect others from the spread of TB;

f. isolation of persons with infectious TB to their place of residence
š until they no longer have TB;

8. Requires the health officer to report to the district attorney any
š violation of any order, and specifies misdemeanor penalties for any violation, including confinement for up to one year after conviction.

9. Authorizes the health officer to remove to , or detain in, a hospital
š or other place for examination or treatment a person subject to an order of removal or detention without a prior court order except as specified. No person may be detained for more than 60 days without a court order.

SUPPORT: (Verified 9/7/93)

Health Officer's Association of California (source)
California Conference of Local Health Officers
California State Employees' Association
American Lung Association
California School Employees Association

ARGUMENTS IN SUPPORT: According to the sponsor, this bill seeks to šreduce and control the increasing tuberculosis epidemic and improves the šmanagement of active TB cases through the following means:

1. requiring the development of a treatment plan and notification of the š health officer before a person with active TB is released from a health facility or penal institution;

2. expanding the authority of health officers to direct preventative šmeasures; and

3. establishing a procedure "more in tune with current civil rights š expectations that allow for gradually more restricted measures for recalcitrant patients who threaten to spread infection because they do not respond to specific treatment orders."

Supporters contend that most patients that require isolation in a hospital šfor treatment of TB have a history of demonstrated non-compliance or are šinfected with a drug resistant strain. Isolation of an infectious TB špatient is not an accusation, but rather a tool to be used by medical šprofessionals to treat TB and preserve the public's health.

BILL TEXT

CHAPTER 685
FILED WITH SECRETARY OF STATE SEPTEMBER 21, 1994
APPROVED BY GOVERNOR SEPTEMBER 20, 1994
PASSED THE ASSEMBLY AUGUST 26, 1994
PASSED THE SENATE AUGUST 23, 1994
AMENDED IN SENATE AUGUST 9, 1994
AMENDED IN SENATE JUNE 30, 1994
AMENDED IN ASSEMBLY MAY 6, 1993
AMENDED IN ASSEMBLY APRIL 22, 1993

INTRODUCED BY Assembly Member Gotch

FEBRUARY 25, 1993

An act to amend Sections 3003, 3006, 3281, 3282, 3283, 3284, 3285, 3285.1, 3285.2, 3285.3, 3285.4, and 3351 of the Health and Safety Code, relating to communicable disease.

LEGISLATIVE COUNSEL'S DIGEST

AB 804, Gotch. Communicable disease: tuberculosis.

Existing law requires the State Department of Health Services to maintain a program for the control of tuberculosis and administer the funds made available to it by the state for the care of tuberculosis patients.

Existing law, with certain exceptions, prohibits discharge or release of persons from certain facilities if the person is known to have tuberculosis, or if there are reasonable grounds to believe the person has tuberculosis, unless certain procedures are followed, including providing a notice and report to the local health officer.

This bill would clarify that local health officers may delegate duties and authority relating to the issuance of related orders, and would make conforming and other technical changes. The bill would require review of related treatment plans within 24 hours, and would thereby impose a state-mandated local program.

Existing law requires that related delegations of authority by the local health officer be made pursuant to specified provisions of law relating to delegation of authority to a deputy.

This bill would provide that delegation may also be made to the person in charge of medical treatment of inmates at penal institutions. The bill would specify that in cases of court enforcement of an order, confinement may be accomplished by placement in any appropriate facility, penal institution, or dwelling specifically approved by the local health officer.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State

Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

THE PEOPLE OF THE STATE OF CALIFORNIA DO ENACT AS FOLLOWS:

SECTION 1. Section 3003 of the Health and Safety Code is amended to read:

3003. As used in this division, a person has "active tuberculosis disease" when either one of the following occur:

(a) A smear or culture taken from any source in the person's body has tested positive for tuberculosis and the person has not completed the appropriate prescribed course of medication for active tuberculosis disease.

(b) There is radiographic, current clinical, or laboratory evidence sufficient to support a medical diagnosis of tuberculosis for which treatment is indicated.

SEC. 2. Section 3006 of the Health and Safety Code is amended to read:

3006. As used in this division the following terms have the following meanings, unless the context indicates otherwise:

(a) "Infectious tuberculosis disease" means active or suspected active tuberculosis disease in an infectious state.

(b) "Tuberculosis infection" means the latent phase of tuberculosis, during which the infected person cannot spread tuberculosis to others.

(c) "Heightened risk of tuberculosis exposure" means likely exposure to persons with infectious tuberculosis disease.

(d) "The appropriate prescribed course of medication for tuberculosis disease" means that course recommended by the health officer, the most recent guidelines of the department, the most recent guidelines of the Centers for Disease Control and Prevention, or the most recent guidelines of the American Thoracic Society.

(e) "Directly observed therapy" means the appropriately prescribed course of treatment for tuberculosis disease in which the prescribed antituberculosis medications are administered to the person or taken by the person under direct observation of a health care provider or a designee of the health care provider approved by the local health officer.

(f) An "examination" for tuberculosis infection or disease means conducting tests, including, but not limited to, Mantoux tuberculin skin tests, laboratory examination, and X-rays, as recommended by any of the following:

(1) The local health officer.

(2) The most recent guidelines of the state department.

(3) The most recent guidelines of the Centers for Disease Control and Prevention.

(4) The most recent guidelines of the American Thoracic Society.

(g) "State correctional institution" means a prison, institution, or other facility under the jurisdiction of the Department of Corrections or the Department of the Youth Authority.

(h) "Local detention facility" is defined in Section 6031.4 of the Penal Code.

(i) "Penal institution" means either a state correctional institution or a local detention facility.

(j) "Health facility" means a licensed health facility as defined in Sections 1250, 1250.2, and 1250.3.

(k) "Health officer" or "local health officer" includes his or her designee.

SEC. 3. Section 3281 of the Health and Safety Code is amended to read:

3281. (a) (1) A health facility, local detention facility, or state correctional institution shall not discharge or release any of the following persons unless subdivision (e) is complied with:

(A) A person known to have active tuberculosis disease.

(B) A person who the medical staff of the health facility or of the penal institution has reasonable grounds to believe has active tuberculosis disease.

(2) In addition, persons specified in this subdivision may be discharged from a health facility only after a written treatment plan described in Section 3282 is approved by a local health officer of the jurisdiction in which the health facility is located. Treatment plans submitted for approval pursuant to this paragraph shall be reviewed by the local health officer within 24 hours of receipt of the plans.

(3) The approval requirement of paragraph (2) shall not apply to any transfer to a general acute care hospital when the transfer is due to an immediate need for a higher level of care, nor to any transfer from any health facility to a correctional institution. Transfers or discharges described in this paragraph shall occur only after the notification and treatment plan required by Section 3282 have been received by the local health officer.

(4) This subdivision shall not apply to transfers within the state correctional system or to interfacility transfers occurring within a local detention facility system.

(b) No health facility shall transfer a person described in subparagraph (A) or (B) of paragraph (1) of subdivision (a) to another health facility unless subdivision (e) is complied with. This subdivision shall not apply to transfers within the state correctional system or to interfacility transfers occurring within a local detention facility system.

(c) No state correctional institution or local detention facility shall transfer a person described in subparagraph (A) or (B) of paragraph (1) of subdivision (a) from a state to a local, or from a local to a state, penal institution unless notification and a written treatment plan are received by the chief medical officer of the penal institution receiving the person.

(d) No local detention facility shall transfer a person described in subparagraph (A) or (B) of paragraph (1) of subdivision (a) to a local detention facility in another jurisdiction unless subdivision (e) is complied with and notification and a written treatment plan are received by the chief medical officer of the local detention facility receiving the person.

(e) All discharges, releases, or transfers described in subdivisions (a), (b), (c), and (d) may occur only after notification and a written treatment plan pursuant to Section 3282 has been received by the local health officer. When prior notification would jeopardize the person's health, the public safety, or the safety and security of the penal institution,

then the notification and treatment plan shall be submitted within 24 hours of discharge, release, or transfer.

SEC. 4. Section 3282 of the Health and Safety Code is amended to read:

3282. Each health care provider who treats a person for active tuberculosis disease, each person in charge of a health facility, or each person in charge of a clinic providing outpatient treatment for active tuberculosis disease shall promptly report to the local health officer at the times that the health officer requires, but no less frequently than when there are reasonable grounds to believe that a person has active tuberculosis disease, and when a person ceases treatment for tuberculosis disease. Situations in which the provider may conclude that the patient has ceased treatment include times when the patient fails to keep an appointment, relocates without transferring care, or discontinues care. The initial disease notification report shall include an individual treatment plan that includes the patient name, address, date of birth, tuberculin skin test results, pertinent radiologic, microbiologic, and pathologic reports whether final or pending, and any other information required by the local health officer. Subsequent reports shall provide updated clinical status and laboratory results, assessment of treatment adherence, name of current care provider if patient transfers care, and any other information required by the local health officer. A facility discharge, release, or transfer report shall include all pertinent and updated information required by the local health officer not previously reported on initial or subsequent reports, and shall specifically include verified patient address, the name of the medical provider who has specifically agreed to provide medical care, clinical information used to assess the current infectious state, and any other information required by the local health officer. Each health care provider who treats a person with active tuberculosis disease, and each person in charge of a health facility or a clinic providing outpatient treatment for active tuberculosis disease, shall maintain written documentation of each patient's adherence to his or her individual treatment plans. Nothing in this section shall authorize the disclosure of test results for human immunodeficiency virus (HIV) unless authorized by Chapter 1.11 (commencing with Section 199.20) of, Chapter 1.12 (commencing with Section 199.30) of, and Chapter 1.13 (commencing with Section 199.42) of, Division 1.

In the case of a parolee under the jurisdiction of the Department of Corrections, the local health officer shall notify the medical officer of the parole region or the physician and surgeon designated by the Director of Corrections when there are reasonable grounds to believe that the parolee has active tuberculosis disease and when the parolee ceases treatment for tuberculosis. Situations where the local health officer may conclude that the parolee has ceased treatment include times when the parolee fails to keep an appointment, relocates without transferring care, or discontinues care.

SEC. 5. Section 3283 of the Health and Safety Code is amended to read:

3283. Each health care provider who treats a person for active tuberculosis disease shall examine, or cause to be examined, all household contacts or shall refer them to the local health officer for examination. Each health care provider shall promptly notify the local health officer of the referral.

When required by the local health officer, nonhousehold contacts and household contacts not examined by a health care provider shall submit to examination by the local health officer or designee. If any abnormality consistent with tuberculosis disease is found, steps satisfactory to the local health officer shall be taken to refer the person promptly to a health care provider for further investigation, and if necessary, treatment.

Contacts shall be reexamined at times and in a manner as the local health officer may require. When requested by the local health officer, a health care provider shall report the results of any examination related to tuberculosis of a contact.

SEC. 6. Section 3284 of the Health and Safety Code is amended to read:

3284. (a) Within the territory under his or her jurisdiction, each local health officer may order examinations for tuberculosis infection for the purposes of directing preventive measures for persons in the territory, except those incarcerated in a state correctional institution, for whom the local health officer has reasonable grounds to determine are at heightened risk of tuberculosis exposure.

(b) An order for examination pursuant to this section shall be in writing and shall include other terms and conditions as may be necessary to protect the public health.

SEC. 7. Section 3285 of the Health and Safety Code is amended to read:

3285. Each local health officer is hereby directed to use every available means to ascertain the existence of, and immediately investigate all reported or suspected cases of active tuberculosis disease in the jurisdiction, and to ascertain the sources of those infections. In carrying out the investigations, each local health officer shall follow applicable local rules and regulations and all general and special rules, regulations, and orders of the state department. If the local health officer determines that the public health in general or the health of a particular person is endangered by exposure to a person who is known to have active tuberculosis disease, or to a person for whom there are reasonable grounds to believe has active tuberculosis disease, the local health officer may issue any orders he or she deems necessary to protect the public health or the health of any other person, and may make application to a court for enforcement of the orders. Upon the receipt of information that any order has been violated, the health officer shall advise the district attorney of the county in which the violation has occurred, in writing, and shall submit to the district attorney the information in his or her possession relating to the subject matter of the order, and of the violation or violations thereof.

The orders may include, but shall not be limited to, any of the following:

(a) An order authorizing the removal to, detention in, or admission into, a health facility or other treatment facility for appropriate examination for active tuberculosis disease of a person who is known to have active tuberculosis disease, or a person for whom there are reasonable grounds to believe that the person has active tuberculosis disease and who is unable or unwilling voluntarily to submit to the examination by a physician or by the local health officer. Any person whom the health officer determines should have an examination for tuberculosis disease may have the examination made by a physician and surgeon of his or her own choice who is licensed

to practice medicine under Chapter 5 (commencing with Section 2000) of Division 2 of the Business and Professions Code under terms and conditions as the local health officer shall determine on reasonable grounds to be necessary to protect the public health. This section does not authorize the local health officer to mandate involuntary anergy testing.

(b) An order requiring a person who has active tuberculosis disease to complete an appropriate prescribed course of medication for tuberculosis disease and, if necessary, to follow required infection control precautions for tuberculosis disease. This subdivision does not allow the forceable or involuntary administration of medication.

(c) An order requiring a person who has active tuberculosis disease and who is unable or unwilling otherwise to complete an appropriate prescribed course of medication for tuberculosis disease to follow a course of directly observed therapy. This subdivision does not allow forceable or involuntary administration of medication.

(d) An order for the removal to, detention in, or admission into, a health facility or other treatment facility of a person if both of the following occur:

(1) The person has infectious tuberculosis disease, or who presents a substantial likelihood of having infectious tuberculosis disease, based upon proven epidemiologic evidence, clinical evidence, X-ray readings, or tuberculosis laboratory test results.

(2) The local health officer finds, based on recognized infection control principles, that there is a substantial likelihood the person may transmit tuberculosis to others because of his or her inadequate separation from others.

(e) An order for the removal to, detention in, or admission into, a health facility or other treatment facility of a person if both of the following occur:

(1) The person has active tuberculosis disease, or has been reported to the health officer as having active tuberculosis disease with no subsequent report to the health officer of the completion of an appropriate prescribed course of medication for tuberculosis disease.

(2) There is a substantial likelihood, based on the person's past or present behavior, that he or she cannot be relied upon to participate in or complete an appropriate prescribed course of medication for tuberculosis disease and, if necessary, follow required infection control precautions for tuberculosis disease. The behavior may include, but is not limited to, refusal or failure to take medication for tuberculosis disease, refusal or failure to keep appointments or treatment for tuberculosis disease, refusal or failure to complete the treatment for tuberculosis disease, or disregard for infection control precautions for active tuberculosis disease.

(f) An order for exclusion from attendance at the workplace for persons with infectious tuberculosis disease. The order may, also, exclude the person from any place when the local health officer determines that the place cannot be maintained in a manner adequate to protect others against the spread of tuberculosis disease.

(g) An order for isolation of persons with infectious tuberculosis disease to their place of residence until the local health officer has determined that they no longer have infectious tuberculosis disease.

(h) This section shall apply to all persons except those

incarcerated in a state correctional institution.

(i) This section shall not be construed to require a private hospital or other private treatment facility to accept any patient without a payment source, including county responsibilities under Section 17000 of the Welfare and Institutions Code, except as required by Sections 1317 et seq. or by federal law.

SEC. 8. Section 3285.1 of the Health and Safety Code is amended to read:

3285.1. The local health officer may detain in a hospital or other appropriate place for examination or treatment, a person who is the subject of an order of detention issued pursuant to subdivision (a), (d), or (e) of Section 3285 without a prior court order except that when a person detained pursuant to subdivision (a), (d), or (e) of Section 3285 has requested release, the local health officer shall make an application for a court order authorizing the continued detention within 72 hours after the request or, if the 72-hour period ends on a Saturday, Sunday, or legal holiday, by the end of the first business day following the Saturday, Sunday, or legal holiday, which application shall include a request for an expedited hearing. After the request for release, detention shall not continue for more than five business days in the absence of a court order authorizing detention. However, in no event shall any person be detained for more than 60 days without a court order authorizing the detention. The local health officer shall seek further court review of the detention within 90 days following the initial court order authorizing detention and thereafter within 90 days of each subsequent court review. In any court proceeding to enforce a local health officer's order for the removal or detention of a person, the local health officer shall prove the particularized circumstances constituting the necessity for the detention by clear and convincing evidence. Any person who is subject to a detention order shall have the right to be represented by counsel and upon the request of the person, counsel shall be provided.

SEC. 9. Section 3285.2 of the Health and Safety Code is amended to read:

3285.2. (a) An order of a local health officer pursuant to Section 3285 shall set forth all of the following:

(1) The legal authority under which the order is issued, including the particular sections of state law or regulations.

(2) An individualized assessment of the person's circumstances or behavior constituting the basis for the issuance of the order.

(3) The less restrictive treatment alternatives that were attempted and were unsuccessful, or the less restrictive treatment alternatives that were considered and rejected, and the reasons the alternatives were rejected.

(4) The orders shall be in writing, and shall include the name of the person, the period of time during which the order shall remain effective, the location, payer source if known, and other terms and conditions as may be necessary to protect the public health. Upon issuing an order, a copy of the order shall be served upon the person named in the order.

(b) An order for the detention of a person shall do all of the following:

(1) Include the purpose of the detention.

(2) Advise the person being detained that he or she has the right to request release from detention by contacting a person

designated on the local health officer's order at the telephone number stated on the order and that the detention shall not continue for more than five business days after the request for release, in the absence of a court order authorizing the detention.

(3) Advise the person being detained that, whether or not he or she requests release from detention, the local health officer is required to obtain a court order authorizing detention within 60 days following the commencement of detention and thereafter shall further seek court review of the detention within 90 days of the court order and within 90 days of each subsequent court review.

(4) Advise the person being detained that he or she has the right to arrange to be represented by counsel or to have counsel provided, and that if he or she chooses to have counsel provided, the counsel will be notified that the person has requested legal representation.

(5) Be accompanied by a separate notice that shall include, but not be limited to, all of the following additional information:

(A) That the person being detained has the right to request release from detention by contacting a person designated on the local health officer's order at a telephone number stated on the order, and that the detention shall not continue for more than five business days after the request in the absence of a court order authorizing the detention.

(B) That he or she has the right to arrange to be advised and represented by counsel or to have counsel provided, and that if he or she chooses to have counsel provided, the counsel will be notified that the person has requested legal representation.

(C) That he or she may supply the addresses or telephone numbers of not more than two individuals to receive notification of the person's detention, and that the local health officer shall, at the patient's request, provide notice within the limits of reasonable diligence to those people that the person is being detained.

SEC. 10. Section 3285.3 of the Health and Safety Code is amended to read:

3285.3. Notwithstanding any inconsistent provision of Section 3285, 3285.1 or 3285.2, all of the following shall apply:

(a) A person who is detained solely pursuant to subdivision (a) of Section 3285 shall not continue to be detained beyond the minimum period of time required, with the exercise of all due diligence, to make a medical determination of whether a person who is suspected of having tuberculosis disease, has active tuberculosis or whether a person who has active tuberculosis disease has infectious tuberculosis disease. Further detention of the person shall be authorized only upon the issuance of a local health officer's order pursuant to subdivision (d) or (e) of Section 3285.

(b) A person who is detained solely for the reasons described in subdivision (d) of Section 3285 shall not continue to be detained after he or she ceases to be infectious or after the local health officer ascertains that changed circumstances exist that permit him or her to be adequately separated from others so as to prevent transmission of tuberculosis disease after his or her release from detention.

(c) A person who is detained for the reasons described in subdivision (e) of Section 3285 shall not continue to be

detained after he or she has completed an appropriate prescribed course of medication.

SEC. 11. Section 3285.4 of the Health and Safety Code is amended to read:

3285.4. For the purposes of Sections 3285, 3285.1, and 3285.2, all of the following shall apply:

(a) If necessary, language interpreters and persons skilled in communicating with vision and hearing impaired individuals shall be provided in accordance with applicable law.

(b) Nothing in those sections shall be construed to permit or require the forcible administration of any medication without a prior court order.

(c) Any and all orders authorized under those sections shall be made by the local health officer. His or her authority to make the orders may be delegated to the person in charge of medical treatment of inmates in penal institutions within the local health officer's jurisdiction, or pursuant to Section 7. The local health officer shall not make any orders incorporating by reference any other rules or regulations.

SEC. 12. Section 3351 of the Health and Safety Code is amended to read:

3351. Inasmuch as the orders provided for by Section 3285 are for the protection of the public health, any person who, after service upon him or her of an order of a local health officer as provided in Section 3285 violates or fails to comply with the order, is guilty of a misdemeanor. Upon conviction thereof, in addition to any and all other penalties that may be imposed by law upon the conviction, the person may be ordered by the court confined until the order of the local health officer shall have been fully complied with or terminated by the local health officer, but not exceeding one year from the date of passing judgment upon the conviction, further, the court, upon suitable assurances that the order of the local health officer will be complied with, may place any person convicted of a violation of the order of the local health officer upon probation for a period not to exceed two years, upon condition that the order of the local health officer be fully complied with, further, upon any subsequent violation of the order of the local health officer, the probation shall be terminated and confinement as provided for in this section shall be ordered by the court. Confinement may be accomplished by placement in any appropriate facility, penal institution, or dwelling approved for the specific case by the local health officer.

SEC. 13. Notwithstanding Section 17610 of the Government Code, if the Commission on State Mandates determines that this act contains costs mandated by the state, reimbursement to local agencies and school districts for those costs shall be made pursuant to Part 7 (commencing with Section 17500) of Division 4 of Title 2 of the Government Code. If the statewide cost of the claim for reimbursement does not exceed one million dollars ($1,000,000), reimbursement shall be made from the State Mandates Claims Fund. Notwithstanding Section 17580 of the Government Code, unless otherwise specified in this act, the provisions of this act shall become operative on the same date that the act takes effect pursuant to the California Constitution.

BILL ANALYSIS

AB 804

Gotch (D)

8/9/94 in Senate

21

70-0, p. 2009, 5/27/93
(Passed Assembly on Consent)

SUBJECT: Tuberculosis

SOURCE: Health Officers Association of California

DIGEST: This bill clarifies existing law by (1) allowing the transfer šof tuberculosis (TB) patients, without prior approval of treatment plans, što a general acute care hospital when an immediate need for higher care is šrequired, or from any health facility to a state correctional institution; šand (b) requiring that treatment plans for patients being discharged from a šhealth facility be reviewed by the local health officer within 24 hours šfrom the time of receipt.

ANALYSIS: Existing law requires the Department of Health Services to šbe the lead agency for all TB control and prevention activities. Current šlaw authorizes health officers certain powers in the prevention and control šof TB disease and infection.

This bill:

1. Includes a local health officer's designee in the definition of "health officer" or "local health officer."

2. Clarifies "local health officer" as the health officer of the jurisdiction in which the health facility is located.

3. Requires treatment plans for persons awaiting discharge from health □ facilities to be reviewed by the local health officer within 24 hours of receipt of the plans.

4. Specifies that a person with active TB may be transferred to a general acute care hospital from a health facility due to an immediate need for higher level of care without approval by a local health officer. This exemption also applies to any transfer from any health facility to a correctional facility.

5 Requires a health provider to include the following information in disease notification reports and updates to the local health officer:

A. The patient's name, address, and date of birth;

B. Tuberculin skin test and other pertinent report results;

C. Updated clinical status and laboratory results;

D. Assessment of treatment adherence; and

E. Any other information required by the local health officer.

5. Requires a health provider to provide pertinent and updated report information to the local health officer upon the discharge, release, or transfer of a patient with active TB disease.

6. Specifies that this section does not authorize a local health officer to mandate involuntary anergy testing.

Comment

According to DHS, California reports the highest number of TB cases in any šstate. In 1992, the incidence rate of TB in the California was 17.2 cases šper 100,000 population, compared to the US rate of 10.5 cases per 100,000. šThe frequency of multi-drug-resistant TB (MDR-TB) is also of growing šconcern in the treatment and prevention of TB. Because the treatment of šMDR-TB is more complex, less efficacious, and more costly than standard TB, šMDR-TB markedly worsens the public health hazard of TB.

In 1993, the Legislature passed AB 803 (Gotch, Chapter 676) which:

1. Authorizes a local health director to order examinations for those persons in close contact or with a heightened risk of exposure to a patient with active TB disease.

2. Prohibits the release of persons with active TB disease from inpatient health facilities and penal institutions without notification and treatment plan approved by the local health officer.

3. Requires a health care provider who treats a person for active TB disease to report to the local health officer with specified information about the patient.

4. Directs a local health officer to investigate all reported or suspected cases of active TB disease. A health officer may issue an order upon a

CONTINUED

person with active TB disease if public health is endangered by that person.

5. Requires a local health officer to report to the district attorney any violation of any order, and specifies misdemeanor penalties for any violation.

FISCAL EFFECT: Appropriation: No Fiscal Committee: Yes Local: Yes

According to the Senate Appropriations Committee:

Fiscal Impact (in thousands)

Major Provisions	1994-95	1995-96	1996-97	Fund
Local mandate	---	Unknown costs	---	General

The mandated costs relate to the requirement that local health officers complete their review of treatment plans within 24 hours. This could open the door to local claims for reimbursement of some of the costs of these reviews.

Senate Bill No. 362

CHAPTER 116

An act to amend Section 121361 of the Health and Safety Code, relating to communicable diseases.

[Approved by Governor July 27, 1997. Filed with Secretary of State July 28, 1997.]

LEGISLATIVE COUNSEL'S DIGEST

SB 362, Maddy. Tuberculosis: health facility.

Existing law prohibits a health facility, local detention facility, or state correctional institution from discharging, releasing, or transferring any person known to have or when the facility or institutional medical staff have reasonable grounds to believe the person has active tuberculosis, unless notification and a written treatment plan have been received by the local health officer, except as specified.

This bill would provide that no health facility that declines to discharge, release, or transfer a person pursuant to that provision shall be civilly or criminally liable or subject to administrative sanction as a result, if the health facility complies with that provision and acts in good faith. The bill would also provide that the local health officer under this provision is not relieved of any other duty imposed under state law governing tuberculosis control.

The people of the State of California do enact as follows:

SECTION 1. Section 121361 of the Health and Safety Code is amended to read:

121361. (a) (1) A health facility, local detention facility, or state correctional institution shall not discharge or release any of the following persons unless subdivision (e) is complied with:

(A) A person known to have active tuberculosis disease.

(B) A person who the medical staff of the health facility or of the penal institution has reasonable grounds to believe has active tuberculosis disease.

(2) In addition, persons specified in this subdivision may be discharged from a health facility only after a written treatment plan described in Section 121362 is approved by a local health officer of the jurisdiction in which the health facility is located. Treatment plans submitted for approval pursuant to this paragraph shall be reviewed by the local health officer within 24 hours of receipt of the plans.

(3) The approval requirement of paragraph (2) shall not apply to any transfer to a general acute care hospital when the transfer is due

to an immediate need for a higher level of care, nor to any transfer from any health facility to a correctional institution. Transfers or discharges described in this paragraph shall occur only after the notification and treatment plan required by Section 121362 have been received by the local health officer.

(4) This subdivision shall not apply to transfers within the state correctional system or to interfacility transfers occurring within a local detention facility system.

(b) No health facility shall transfer a person described in subparagraph (A) or (B) of paragraph (1) of subdivision (a) to another health facility unless subdivision (e) is complied with. This subdivision shall not apply to transfers within the state correctional system or to interfacility transfers occurring within a local detention facility system.

(c) No state correctional institution or local detention facility shall transfer a person described in subparagraph (A) or (B) of paragraph (1) of subdivision (a) from a state to a local, or from a local to a state, penal institution unless notification and a written treatment plan are received by the chief medical officer of the penal institution receiving the person.

(d) No local detention facility shall transfer a person described in subparagraph (A) or (B) of paragraph (1) of subdivision (a) to a local detention facility in another jurisdiction unless subdivision (e) is complied with and notification and a written treatment plan are received by the chief medical officer of the local detention facility receiving the person.

(e) All discharges, releases, or transfers described in subdivisions (a), (b), (c), and (d) may occur only after notification and a written treatment plan pursuant to Section 121362 has been received by the local health officer. When prior notification would jeopardize the person's health, the public safety, or the safety and security of the penal institution, then the notification and treatment plan shall be submitted within 24 hours of discharge, release, or transfer.

(f) No health facility that declines to discharge, release, or transfer a person pursuant to this section shall be civilly or criminally liable or subject to administrative sanction therefor. This subdivision shall apply only if the health facility complies with this section and acts in good faith.

(g) Nothing in this section shall relieve a local health officer of any other duty imposed by this chapter.

ASSEMBLY FLOOR : 76-0, 6/30/97 (Passed on Consent)

SUBJECT : Health facilities

SOURCE : California Healthcare Association

DIGEST : This bill provides that a health facility shall not be civilly or criminally liable or subject to administrative sanction if it declines to discharge, release or transfer any person known to have tuberculosis, pursuant to law. The bill conditions the immunity upon the health facility acting in good faith and actually complying with the law.

□

Assembly Amendments provide that nothing in this bill or the section of law it amends shall relieve a local health officer of any other duty imposed by this chapter.

ANALYSIS : Existing law, Health and Safety Code Section 121361, prohibits a health facility from discharging, releasing, or transferring any person known to have or believed to have active tuberculosis, unless notification and a written treatment plan have been received by the local health officer. Once the written treatment plan is approved by the local health officer, the person may be discharged.

This bill provides a qualified immunity from civil or criminal liability, and from administrative sanction, when a health facility, in good faith, and in compliance with law, declines to discharge, release or transfer a person pursuant to the above described law.

Assembly amendments provide that nothing in the above shall relieve a local health officer of any other duty imposed by this chapter.

FISCAL EFFECT : Appropriation: No Fiscal Com.: No Local: No

SUPPORT : (Verified 7/1/97)

California Healthcare Association (source)

ARGUMENTS IN SUPPORT : California Healthcare Association, the sponsor of the bill, contends this bill is necessary in order to protect a health care facility from liability for detaining a person with active tuberculosis, as required by existing law. Although no lawsuit has ever been filed against a health care facility, the sponsor argues that this provision will provide certainty to health facilities who detain TB patients against their will.

The sponsor refers to two statutes that provide health facilities with a similar type of protection. The first statute, Probate Code Section 4753, provides that no health care provider, who honors a request to forego resuscitative measures, shall be subject to criminal prosecution, civil liability, administrative sanction or any other sanction. The second statute, Health & Safety Code Section 7190.5, provides that no physician or health care provider is subject to civil or criminal liability for giving effect to a declaration governing the withholding or withdrawal of

□

life-sustaining treatment.

However, protection for health facilities is granted only if the health facility acts in good faith in complying with the law.

This bill provides that the immunity applies only if the facility acts in good faith and in compliance with the law. For example, a facility's actions may not be "in good faith" where it fails to provide notification and a written treatment plan to local health officers, thereby unreasonably delaying the discharge.

EX. 7

Senate Bill No. 391

CHAPTER 294

An act to repeal Article 6 (commencing with Section 58105) of Chapter 1 of Part 1 of Division 21 of the Food and Agricultural Code, to amend Sections 95004 and 95030 of, and to add Section 95001.5 to, to amend Sections 104380, 106805, 115065, 115080, 120955, 121200, 121260, and 121305 of, to add Sections 110241, 120970, 121358, 123255, and 123279 to, to add Chapter 1.5 (commencing with Section 124450) to Part 4 of Division 106 of, to add and repeal Section 1179.3 of, and to repeal Sections 349.109, 104485, 104550, 104569, 120450, 121205, 121215, 121220, and 124950 of, the Health and Safety Code, to amend Section 12696.05 of, and to repeal Section 12699.50 of, the Insurance Code, and to amend Section 1372 of the Penal Code, to amend Sections 4643.5, 4681.1, 4681.3, 6600.05, 7228, 14094.3, 14105.31, 14105.33, 14132.22, 14154.15, 14163, 16809.5, 16909, 16945, and 16990.5 of, to add Sections 4418.1, 4418.7, 4433, 4596.5, 4639, 7200.06, 7200.07, 7202, 7204, 7229, 7230, 7231, 7232, 7233, 14005.75, 14005.76, 14005.82, 14005.83, 14005.84, 14005.88, 14005.89, 14011.4, 14029, 14067, 14093.07, 14093.09, 14109.6, 14133.14, 14138.5, 14459.5, 14459.7, and 17000.51 to, and to add and repeal Sections 14085.7, 14085.8, 14148.99, and 16997.1 of, the Welfare and Institutions Code, relating to human services, making an appropriation therefor, and declaring the urgency thereof, to take effect immediately.

[Approved by Governor August 18, 1997. Filed with Secretary of State August 18, 1997.]

LEGISLATIVE COUNSEL'S DIGEST

SB 391, Solis. Health.

Existing law authorizes the Department of Food and Agriculture to establish a program designed to provide eligible persons with coupons that may be exchanged for fresh, nutritious foods at farmers' markets pursuant to a program established by federal law, the WIC Farmers' Market Nutrition Act of 1992.

This bill would delete this authority and would instead authorize the State Department of Health Services to establish this program.

Existing law specifies that the provisions requiring the implementation of the Comprehensive Perinatal Outreach Program shall become inoperative July 1, 1997, and shall be repealed on January 1, 1998, unless a later enacted statute revises or repeals that date.

This bill would repeal the provision repealing the program.

Existing law requires the Secretary of the Health and Welfare Agency to establish an Office of Rural Health, or an alternative

This bill would repeal certain provisions of law relating to the creation and implementation of this program.

Existing law requires the department and each county to administer a tuberculosis control, prevention, and detention program.

This bill would prohibit individuals housed under this program, other than criminal offenders, from residing in correctional facilities. It would require the department and local health jurisdiction, by January 1, 1998, to identify a detention site for recalcitrant tuberculosis patients for each local health jurisdiction.

Existing law specifies that the provisions requiring the implementation of the Access for Infants and Mothers (AIM) Program and establishment of the continuously appropriated Perinatal Insurance Fund shall become inoperative July 1, 1997, and shall be repealed on January 1, 1998, unless a later enacted statute revises or repeals that date.

This bill would repeal the provision for the repeal of that program, and would make conforming changes to provisions authorizing the Major Risk Medical Insurance Board to adopt regulations for administration of that program.

Existing law requires the State Department of Health Services to maintain a program of maternal and child health.

This bill would authorize the department to maintain a child health program in each county, and to allocate funds to counties for these purposes that submit plans in compliance with minimum standards established by the department.

Existing law provides for various benefits through the implementation of programs for persons with developmental disabilities (consumers) through the State Department of Developmental Services. Existing law provides for the delivery of services to consumers through regional centers pursuant to contracts with the department.

This bill would require the department to contract with an independent agency or organization for the tracking and monitoring of consumers who are moved from state hospitals to the community to ensure that they are receiving necessary services and supports. The bill would require the department to monitor corrective actions taken by regional centers as a result of this tracking and monitoring and to establish a task force to review the findings of the contractor and make recommendations regarding tracking and monitoring.

The bill would provide for the provision of services on an emergency basis when the community placement of a consumer is at risk of failing and admittance to a state developmental center is likely. The bill would require the department to immediately seek admission to a state developmental center when it determines that admission is necessary to protect the health and welfare of the consumer.

(b) "An HIV-positive individual" means an individual who is infected with the AIDS virus.

(c) "Committee" means the AIDS Vaccine Research and Development Advisory Committee.

(d) "Grant award" means an AIDS Vaccine Clinical Trial Grant Award for the Prevention of Maternal Transmission of HIV Infection.

(e) "AIDS vaccine," for the purposes of this chapter, means a vaccine that has been developed by a manufacturer and is being tested and administered for the purposes of determining whether immunization of HIV-infected pregnant women will protect against maternal transmission of the AIDS virus. Clinical trials must be conducted under an investigational new drug (IND) application on file with the federal Food and Drug Administration (FDA).

(f) "Research subject" means a person who is administered an AIDS vaccine, or a fetus of a woman administered an AIDS vaccine, or a child born to a woman administered an AIDS vaccine during pregnancy.

(g) "Researcher" means a person employed by or affiliated with a manufacturer or a research institution, who participates in the development or testing or administration of an AIDS vaccine, or who is involved in the diagnosis and treatment of a research subject.

SEC. 24. Section 121358 is added to the Health and Safety Code, to read:

121358. (a) Notwithstanding any other provision of law, individuals housed or detained through the tuberculosis control, housing, and detention program shall not reside in correctional facilities, and the funds available under that program with regard to those individuals shall not be disbursed to, or used by, correctional facilities. This section shall not be interpreted to prohibit the institutionalization of criminals with tuberculosis in correctional facilities.

(b) The department shall work with local health jurisdictions to identify a detention site for recalcitrant tuberculosis patients appropriate for each local health jurisdiction in the state. The department shall notify all counties of their designated site by January 1, 1998.

SEC. 25. Section 123255 is added to the Health and Safety Code, to read:

123255. (a) The department may maintain a maternal and child health program in each county.

(b) Notwithstanding any other provision of law, the department may allocate, for the purposes of maintaining a maternal and child health program, to a county an amount determined in a manner as the director shall provide. The total of all county allocations shall not exceed the annual appropriation for this purpose.

(c) To be considered for an allocation, the county's governing board shall submit a plan and budget for the county's program in

Amended: 8/11/97
Vote: 27 - Urgency

All Prior Votes Not Relevant

ASSEMBLY FLOOR : 73-1, 8/11/97 - See last page for vote

SUBJECT : Health

SOURCE : The author

DIGEST : Assembly Amendments delete the prior version of the bill, which would have required every health service plan that uses financial bonuses or incentives to provide a written summary to any person who requests it that includes a general description of the bonus or incentive arrangements used by the plan and how they may relate to a provider's use of referred services.

This bill is now the 1997-98 omnibus health budget trailer bill.

ANALYSIS : This bill would:

1. Transfer the administration of the Farmer's Market Nutrition Program from the Department of Food and Agriculture to the Department of Health Services (DHS), thereby allowing the program to continue to draw down federal funds matched through existing state resources.

□

2. Eliminate various extraneous special funds without any

significant fiscal impact.

3. Establish DHS's authority to recover regulatory costs for x-ray equipment inspections from public agencies through fees.

4. Conform the existing AIDS Drug Assistance Program's rebate policy with federal law, as specified, for the purpose of enhancing the collection of existing statutory rebates.

5. Provide specified patient protections for AIDS Drug Assistance Program beneficiaries.

6. Stipulate that individuals housed through a specified tuberculosis control program shall not reside in correctional facilities, while not precluding the incarceration of criminals under law.

7. Allow DHS to allocate funds to local Maternal and Child Health programs pursuant to specified public accountability conditions.

8. Reiterate existing law stating that specified clinics receiving public funds shall provide a sliding-scale fee based on income, including a zero payment option, and enhances enforcement opportunities and penalty options for noncompliance.

9. Modify the existing transitional Medi-Cal program, which sustains health benefits as individuals move from welfare to work, to include notification requirements for eligible participants, allow particular retroactive eligibility, require the Director of Health Services to seek a waiver, establish an outreach campaign, and contract for an evaluation, as specified. These provisions would be implemented only in the event that federal financial participation is available. Lastly, the bill would require the director to monitor participation rates.

10. Require DHS to develop a simplified Medi-Cal eligibility form for newborns and provide outreach on eligibility.

11. Require consultation with a child's case manager for transfer to in-home care, as specified.

12. Establish a discretionary program to support medical education costs for eligible participants through the

□

use of intergovernmental transfers. Approximately $57,000,000 in federal funds is anticipated to be obtained through the program.

13. Provide for voluntary enrollment of foster children in managed care.

14. Extend the existing carve-out of California Children Services beneficiaries from managed care until pilot projects are provided, as specified.

15. Modify the existing Medi-Cal drug rebate statute to clarify procedures and enhance revenue collections, as specified.

16. Reaffirm existing state law for conformity with the federal budget agreement and stipulates that reimbursement rates for specified inpatient services shall be no greater than Medicare for similar services. Savings of $94 million are reflected in the budget from this Medi-Cal crossover issue.

17. Remove the sunset on existing law for transitional inpatient care provisions.

18. Add criteria that the department shall use to identify providers placed on prior authorization for noninvasive testing procedures, as specified. Savings of $8.4 million from the implementation of this administrative change are reflected in the budget.

19. Add particular reporting requirements for several programs, as stipulated.

20. Authorize the use of out-stationed Medi-Cal workers to draw down available enhanced federal funding for eligibility services.

21. Implement the $75 million in local government relief reflected in the budget through disproportionate share hospital program.

22. Authorize the department to negotiate in good faith and repay costs for county claims from areas adversely affected by delays in the implementation of the local initiative under managed care, as specified. Costs under this provision would be funded through a deficiency and may likely be over $10 million subject to determination.

□

23. Intend to overturn the court ruling in Caulk v Superior Court , C015355, June 27, 1997, by confirming and declaring existing law, as provided for in Chapter 6 of the Statutes of 1996, which was intended only to provide local government with the discretion to reduce its general assistance grant level by up to $40 per month. The section also would only become effective if it does not create a mandate.

24. Allow, but not require, DHS to extend the term of contracts with clinics providing HIV testing services in

FY 1996-97.

2. Reenact the current health education, indigent health care, and tobacco-related disease research programs supported by ongoing funds and which implemented the Tobacco Tax and Health Protection Act of 1988 (Proposition 99). Specifically, the reauthorization would eliminate the sunset date for the programs, which are funded through the annual budget act and subject to program review through the budget process. Further, the reauthorization would continue support for Rural Health Grants and provide specified increases and extended resource availability for designated programs (consistent with existing authority), and allow the Department of Finance to modify program allocations pursuant to specified reporting provisions. The budget bill includes over $400 million in tobacco tax allocations for these programs.

26. Make a variety of changes to the statutes governing the Early Intervention Infant and Toddler Program's Interagency Coordinating Council, including the addition of a conflict of interest provision, Family Resource Centers as a defined service to be offered under the program, and extension of the sunset on the program from January 1, 1998 to January 1, 2000.

27. Make technical changes to the Penal Code relating to people with mental illness being returned to state hospitals and includes specified reporting requirements.

28. Establish statutory requirement and guidance for the Department of Developmental Services (DDS) to contract for tracking and monitoring the well-being of individuals with developmental services who move from Developmental Centers into the community.

29. Require DDS to contract with a nonprofit organization to provide client rights advocacy services.

□

30. Require DDS to contract on a multi-year basis for quality of life assessments of individuals with developmental disabilities living in the community.

31. Require each regional center to contract annually with an independent auditing firm for an audited financial statement.

Senate Bill No. 843

CHAPTER 763

An act to amend Sections 121361 and 121362 of, and to add and repeal Section 121360.5 of, the Health and Safety Code, relating to communicable diseases.

[Approved by Governor September 20, 2002. Filed with Secretary of State September 21, 2002.]

LEGISLATIVE COUNSEL'S DIGEST

SB 843, Perata. Omnibus Tuberculosis Control and Prevention Act of 2002.

Existing law establishes various communicable disease prevention and control programs, including one for tuberculosis. That program provides for testing of various persons for tuberculosis by prescribed licensed health professionals.

This bill would enact the Omnibus Tuberculosis Control and Prevention Act of 2002.

This bill would until January 1, 2006, permit any local health department to provide for certification, by the local health officer, of tuberculin skin test technicians, as defined, in accordance with specified requirements.

Existing law requires each health care provider who treats a person for active tuberculosis disease, each person in charge of a health facility, or each person in charge of a clinic providing outpatient treatment for active tuberculosis disease to promptly provide a disease notification report and written treatment plan to the local health officer at the times that the health officer requires, but no less frequently than when there are reasonable grounds to believe that a person has active tuberculosis disease, and when a person ceases treatment for tuberculosis disease.

Existing law prohibits a health facility, local detention facility, or state correctional institution from discharging or releasing a person known to have active tuberculosis disease or a person the medical staff of the health facility or of the penal institution has reasonable grounds to believe has active tuberculosis disease, unless the notification report and individual treatment plan requirements specified above have been met.

This bill would provide that when a person described above is released on parole from a state correctional institution, the notification and written treatment plan shall be provided to both the local health officer for the county in which the parolee intends to reside and the local health officer for the county in which the state correctional institution is

located. It would require the Department of Corrections to inform the parole agent, and other parole officials as necessary, that the person has active or suspected active tuberculosis disease and provide information regarding the need for evaluation or treatment. In addition, the bill would require the parole agent and other parole officials to coordinate with the local health officer in supervising the person's compliance with medical evaluation or treatment related to tuberculosis, and to notify the local health officer if the person's parole is suspended as a result of having absconded from supervision. The imposition of new duties on local health officers in connection with these provisions would create a state-mandated local program.

Existing law provides that in the case of a parolee under the jurisdiction of the Department of Corrections, the local health officer shall notify the medical officer of the parole region or the physician and surgeon designated by the Director of Corrections when there are reasonable grounds to believe that the parolee has active tuberculosis disease and when the parolee ceases treatment for tuberculosis.

This bill would instead require the local health officer to notify the assigned parole agent, when known, or the regional parole administrator.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

The people of the State of California do enact as follows:

SECTION 1. (a) The Legislature finds and declares all of the following:

(1) Each year, approximately 3,000 Californians develop tuberculosis (TB). Tuberculosis is a contagious disease transmitted through the air by bacteria when a person with active tuberculosis disease coughs or sneezes, and another person breathes in the tuberculosis bacteria.

(2) For each reported case of active tuberculosis disease, public health officials identify 10 or more individuals who have been directly exposed to the disease and are at risk of developing latent tuberculosis infection. These individuals who have been exposed to the disease are

at the highest risk of developing active tuberculosis disease soon after exposure. Finding and screening individuals who have been recently exposed to active tuberculosis disease, referred to as "contact investigation," is essential in preventing outbreaks of tuberculosis in communities.

(3) Public health officials estimate that as many as 3.4 million Californians may now be infected (latent tuberculosis infection) with the bacteria that can cause active tuberculosis disease. If undetected and untreated, an estimated 5 to 10 percent of persons in California, or 170,000 to 340,000 people, with latent tuberculosis infection will, throughout the course of their lives, develop active tuberculosis disease, thus continuing the cycle of transmission.

(4) Because persons with latent tuberculosis infection have no symptoms, the only way to detect their infection is by a tuberculin skin test.

(5) Tuberculin skin tests may now be placed and measured only by certain licensed health professionals, which do not include public health tuberculosis workers who are not licensed health professionals, but who are employed by, or under contract with, a city or county health department.

(6) The National Institute of Medicine's report on tuberculosis clearly recommends increased efforts at contact investigation, targeted skin testing, and bringing under treatment those individuals with latent tuberculosis infection in order to prevent the progression to active, transmissible, tuberculosis disease.

(b) It is the intent of the Legislature to enact legislation to permit any city or county health department to provide for certification, by the local health officer, of tuberculin skin test technicians, who are public health tuberculosis workers, and to authorize tuberculin skin test technicians to place and measure skin tests for tuberculosis for the local health department, in order to increase the number of persons qualified to administer tests and to thereby more effectively, and more cost-effectively, control the spread and contagion of this communicable disease.

SEC. 2. This act shall be known, and may be cited, as the Omnibus Tuberculosis Control and Prevention Act of 2002.

SEC. 3. Section 121360.5 is added to the Health and Safety Code, to read:

121360.5. (a) Any city or county health department may provide for one-year certification of tuberculin skin test technicians by local health officers.

(b) For purposes of this section, a "certified tuberculin skin test technician" is an unlicensed public health tuberculosis worker

employed by, or under contract with, a local public health department, and who is certified by a local health officer to place and measure skin tests in the local health department's jurisdiction.

(c) A certified tuberculin skin test technician may perform the functions for which he or she is certified only if he or she meets all of the following requirements:

(1) The certified tuberculin skin test technician is working under the direction of the local health officer or the tuberculosis controller.

(2) The certified tuberculin skin test technician is working under the supervision of a licensed health professional.

(d) A certified tuberculin skin test technician may perform intradermal injections only for the purpose of placing a tuberculin skin test and measuring the test result.

(e) A certified tuberculin skin test technician may not be certified to interpret, and may not interpret, the results of a tuberculin skin test.

(f) In order to be certified as a tuberculin skin test technician by a local health officer, a person shall meet all of the following requirements, and provide to the local health officer appropriate documentation establishing that he or she has met those requirements:

(1) The person has a high school diploma, or its equivalent.

(2) The person has completed a standardized course approved by the California Tuberculosis Controllers Association (CTCA), which shall include at least 24 hours of instruction in all of the following areas: Didactic instruction on tuberculosis control principles and instruction on the proper placement and measurement of tuberculin skin tests, equipment usage, basic infection control, universal precautions, and appropriate disposal of sharps, needles, and medical waste, client preparation and education, safety, communication, professional behavior, and the importance of confidentiality.

A certification of satisfactory completion of this CTCA-approved course shall be dated and signed by the local health officer, and shall contain the name and social security number of the tuberculin skin test technician, and the printed name, the jurisdiction, and the telephone number of the certifying local health officer.

(3) The person has completed practical instruction including placing at least 30 successful intradermal tuberculin skin tests, supervised by a licensed physician or registered nurse at the local health department, and 30 correct measurements of intradermal tuberculin skin tests, at least 15 of which are deemed positive by the licensed physician or registered nurse supervising the practical instruction. A certification of the satisfactory completion of this practical instruction shall be dated and signed by the licensed physician or registered nurse supervising the practical instruction.

(g) The certification may be renewed, and the local health department shall provide a certificate of renewal, if the certificate holder has completed inservice training, including all of the following:

(1) At least three hours of a CTCA-approved standardized training course to assure continued competency. This training shall include, but not be limited to, fundamental principles of tuberculin skin testing.

(2) Practical instruction, under the supervision of a licensed physician or registered nurse at the local health department, including the successful placement and correct measurement of 10 tuberculin skin tests, at least five of which are deemed positive by the licensed physician or registered nurse supervising the practical instruction.

(h) The local health officer or the tuberculosis controller may deny or revoke the certification of a tuberculin skin test technician if the local health officer or the tuberculosis controller finds that the technician is not in compliance with this section.

(i) This section shall remain in effect only until January 1, 2006, and as of that date is repealed, unless a later enacted statute, that is enacted before January 1, 2006, deletes or extends that date.

SEC. 4. Section 121361 of the Health and Safety Code is amended to read:

121361. (a) (1) A health facility, local detention facility, or state correctional institution shall not discharge or release any of the following persons unless subdivision (e) is complied with:

(A) A person known to have active tuberculosis disease.

(B) A person who the medical staff of the health facility or of the penal institution has reasonable grounds to believe has active tuberculosis disease.

(2) In addition, persons specified in this subdivision may be discharged from a health facility only after a written treatment plan described in Section 121362 is approved by a local health officer of the jurisdiction in which the health facility is located. Any treatment plan submitted for approval pursuant to this paragraph shall be reviewed by the local health officer within 24 hours of receipt of that plan.

(3) The approval requirement of paragraph (2) shall not apply to any transfer to a general acute care hospital when the transfer is due to an immediate need for a higher level of care, nor to any transfer from any health facility to a correctional institution. Transfers or discharges described in this paragraph shall occur only after the notification and treatment plan required by Section 121362 have been received by the local health officer.

(4) This subdivision shall not apply to any transfer within the state correctional system or to any interfacility transfer occurring within a local detention facility system.

(b) No health facility shall, without first complying with subdivision (e), transfer a person described in subparagraph (A) or (B) of paragraph (1) of subdivision (a) to another health facility. This subdivision shall not apply to any transfer within the state correctional system or to any interfacility transfer occurring within a local detention facility system.

(c) No state correctional institution or local detention facility shall transfer a person described in subparagraph (A) or (B) of paragraph (1) of subdivision (a) from a state to a local, or from a local to a state, penal institution unless notification and a written treatment plan are received by the chief medical officer of the penal institution receiving the person.

(d) No local detention facility shall transfer a person described in subparagraph (A) or (B) of paragraph (1) of subdivision (a) to a local detention facility in another jurisdiction unless subdivision (e) is complied with and notification and a written treatment plan are received by the chief medical officer of the local detention facility receiving the person.

(e) (1) Any discharge, release, or transfer described in subdivisions (a), (b), (c), and (d) may occur only after notification and a written treatment plan pursuant to Section 121362 has been received by the local health officer. When prior notification would jeopardize the person's health, the public safety, or the safety and security of the penal institution, the notification and treatment plan shall be submitted within 24 hours of discharge, release, or transfer.

(2) When a person described in paragraph (1) of subdivision (a) is released on parole from a state correctional institution, the notification and written treatment plan specified in this subdivision shall be provided to both the local health officer for the county in which the parolee intends to reside and the local health officer for the county in which the state correctional institution is located.

(3) Notwithstanding any other provision of law, the Department of Corrections shall inform the parole agent, and other parole officials as necessary, that the person described in paragraph (1) of subdivision (a) has active or suspected active tuberculosis disease and provide information regarding the need for evaluation or treatment. The parole agent and other parole officials shall coordinate with the local health officer in supervising the person's compliance with medical evaluation or treatment related to tuberculosis, and shall notify the local health officer if the person's parole is suspended as a result of having absconded from supervision.

(f) No health facility that declines to discharge, release, or transfer a person pursuant to this section shall be civilly or criminally liable or subject to administrative sanction therefor. This subdivision shall apply

only if the health facility complies with this section and acts in good faith.

(g) Nothing in this section shall relieve a local health officer of any other duty imposed by this chapter.

SEC. 5. Section 121362 of the Health and Safety Code is amended to read:

121362. Each health care provider who treats a person for active tuberculosis disease, each person in charge of a health facility, or each person in charge of a clinic providing outpatient treatment for active tuberculosis disease shall promptly report to the local health officer at the times that the health officer requires, but no less frequently than when there are reasonable grounds to believe that a person has active tuberculosis disease, and when a person ceases treatment for tuberculosis disease. Situations in which the provider may conclude that the patient has ceased treatment include times when the patient fails to keep an appointment, relocates without transferring care, or discontinues care. The initial disease notification report shall include an individual treatment plan that includes the patient's name, address, date of birth, tuberculin skin test results, pertinent radiologic, microbiologic, and pathologic reports, whether final or pending, and any other information required by the local health officer. Subsequent reports shall provide updated clinical status and laboratory results, assessment of treatment adherence, name of current care provider if the patient transfers care, and any other information required by the local health officer. A facility discharge, release, or transfer report shall include all pertinent and updated information required by the local health officer not previously reported on any initial or subsequent report, and shall specifically include a verified patient address, the name of the medical provider who has specifically agreed to provide medical care, clinical information used to assess the current infectious state, and any other information required by the local health officer. Each health care provider who treats a person with active tuberculosis disease, and each person in charge of a health facility or a clinic providing outpatient treatment for active tuberculosis disease, shall maintain written documentation of each patient's adherence to his or her individual treatment plan. Nothing in this section shall authorize the disclosure of test results for human immunodeficiency virus (HIV) unless authorized by Chapter 7 (commencing with Section 120975) of, Chapter 8 (commencing with Section 121025) of, and Chapter 10 (commencing with Section 121075) of Part 4 of Division 105.

In the case of a parolee under the jurisdiction of the Department of Corrections, the local health officer shall notify the assigned parole agent, when known, or the regional parole administrator, when there are

reasonable grounds to believe that the parolee has active tuberculosis disease and when the parolee ceases treatment for tuberculosis. Situations where the local health officer may conclude that the parolee has ceased treatment include times when the parolee fails to keep an appointment, relocates without transferring care, or discontinues care.

SEC. 6. Notwithstanding Section 17610 of the Government Code, if the Commission on State Mandates determines that this act contains costs mandated by the state, reimbursement to local agencies and school districts for those costs shall be made pursuant to Part 7 (commencing with Section 17500) of Division 4 of Title 2 of the Government Code. If the statewide cost of the claim for reimbursement does not exceed one million dollars ($1,000,000), reimbursement shall be made from the State Mandates Claims Fund.

SUBJECT : Omnibus Tuberculosis Control and Prevention Act of 2002

SOURCE : Health Officers Association of California

DIGEST : This bill, as it left the Senate, required the

CONTINUED

State Department of Health Services, State Department of Corrections, and the State Board of Corrections to develop plans to control and prevent tuberculosis. This bill now authorizes local health officers to certify tuberculin skin test technicians and requires parole agents to be notified when an inmate with tuberculosis is released from prison.

ANALYSIS : This bill:

1. Authorizes a city or county health department to permit its local health officer (LHO) to certify tuberculin skin test technicians, as defined, and to place and measure TB skin tests for one year within the local department's jurisdiction.

2. Requires the technicians to work under the direction of the LHO or tuberculosis controller, be supervised by a licensed health professional, and perform, but not interpret, TB skin tests.

3. Requires the technicians to meet specified educational and experience requirements for initial and ongoing certification.

4. Sunsets the above on January 1, 2006.

5. Requires the State Department of Corrections (CDC) to do the following upon release of an inmate with active or suspected active TB from a state prison:

   A. Provide notification and a written treatment plan to the LHO in the county where the inmate intends to reside, as well as the county in which the prison is located.

   B. Inform the assigned parole agent that the parolee has TB and requires the parole agent to coordinate with the LHO in supervising the person's compliance with medical evaluation or treatment for TB, and to notify the LHO if the person absconds from supervision.

6. Requires the LHO to notify the assigned parole agent or the regional parole administrator, instead of the medical

officer for the parole region or a physician designated by CDC, when a parolee with active TB ceases treatment.

Comments

This bill, sponsored by the Health Officers Association of California, is intended to help combat the spread of TB in California in two ways: (a) increasing the number of persons qualified to perform TB skin tests; and (b) authorizing direct notification to parole agents when a recent parolee under their supervision has TB.

FISCAL EFFECT : Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee:

1. Negligible fiscal impact on CDC, as many of the activities required by the bill are already being performed.

2. State-reimbursable costs -- likely minor -- for an LHO to coordinate with a parole agent on a parolee's medical evaluation or treatment for TB.

San Francisco Mayor's Office
Santa Clara County Board of Supervisors

OPPOSITION : (Verified 8/16/02)

American Nurses Association of California
California Nurses Association

ARGUMENTS IN SUPPORT : Proponents assert that public health and nursing shortages in many areas have prevented TB control programs form expanding contact investigation

and elimination efforts. Allowing local health officers to certify skin test technicians, they contend, would allow local health departments to maximize the effectiveness of existing staff and allow for more TB testing.

CDC, writing in support of the parole agent provisions, states this bill makes statutory notification for parole agents consistent for HIV and TB. Although a recent parolee has the most contact with his parole agent in the initial period after release, current law authorizes release of this information for parolees with HIV, but not TB. Instead of waiting for an LHO to notify the parole agent, this bill authorizes CDC to directly notify the agent upon the parolee's release from prison.

ARGUMENTS IN OPPOSITION : The California Nurses Association (CAN) opposes this bill because it feels public health nurses, rather than unlicensed technicians, should perform TB skin tests. CAN argues the bill would "fragment the public health system and create a second class tier of public health services" by using technicians who lack the requisite education and training to properly place, measure, and interpret the tests. The technicians would not be able to provide the comprehensive case management and other related services that persons infected with TB need.

CIVIL ORDER OF DETENTION FOR TUBERCULOSIS: MODEL FORMS FOR CALIFORNIA HEALTH OFFICERS

Table of Contents

The purpose of these documents is to provide general guidance on executing tuberculosis-related civil detention orders. The guidance is based on the opinions of the attorneys at the Public Health Law Program of the Public Health Institute and is not intended or offered as legal advice. Health officials should consult with their legal counsel before using these documents.

PUBLIC HEALTH INSTITUTE

TB and the Law Project

CIVIL ORDER OF DETENTION FOR TUBERCULOSIS: MODEL FORMS FOR CALIFORNIA HEALTH OFFICERS

INTRODUCTION AND OVERVIEW

This packet is designed to assist California Health Officers, Tuberculosis Controllers, and their staff in executing tuberculosis-control-related civil detention orders. It was developed by attorneys at the Public Health Law Program of the Public Health Institute in consultation with representatives of the California Tuberculosis Controllers Association and the California Department of Health Services, Tuberculosis Control Branch. This packet is not intended or offered as legal advice. Health officials should consult with their legal counsel before using the enclosed forms.

The following overview describes each of the forms included in this packet, indicating which components are required by the California tuberculosis control statute (California Health and Safety Code §§ 121350-121555), and which components are recommended but optional from a statutory perspective. It is important to read this overview before adapting any of the forms for a health official's use. Otherwise, legally essential material could be left out.

Civil Order of Detention for Tuberculosis

The model Civil Order of Detention for Tuberculosis form tracks the requirements set forth in the tuberculosis control statute. These requirements codify procedures for civil detention that reflect constitutional standards. Because the model order form incorporates the statutory and constitutional obligations of health departments with respect to the patient being detained, it is essential to complete the form as thoroughly and precisely as possible.

The ***heading*** (e.g., "This order issued to," "This order issued by," etc.) contains important information regarding the parties involved, much of which must be included in the order pursuant to the tuberculosis control statute.

Part 1 of the order states that the recipient must comply with detention in a specified facility. This part also meets the statutory mandate that the recipient be informed of the purpose of the order.

Part 2 enumerates certain due process rights to which the recipient is entitled under the tuberculosis control statute. These rights are repeated in the Notice and Restatement of Rights that must be given to the recipient along with the order itself.

Note that the TB control statute requires that the detainee be notified of certain rights in two places: the order itself and a separate notice. In the order, the detainee must be notified at least of his/her (1) right to request release, (2) right to counsel, and (3) right to 60-day court review. In the separate notice, the detainee must be notified at least of his/her (1) right to request release, (2) right to counsel, and (3) right to supply the contact information of two people to be notified of the detention. The right to request release and the right to counsel must be included both places, but the right to 60-day court review need only be included in the order itself, while the right to supply the contact information of two people need only be included in the separate notice. The model order form includes the same comprehensive list of rights in the order and the separate notice. The list includes all of the rights that must be listed in the order and/or the separate notice as well as the right to an interpreter.

Part 3 specifies the legal basis for the detention. It is essential that the health officer identify whether the recipient is being detained for isolation or completion of treatment, since the legal basis for detention bears upon the individualized assessment that the health officer must provide (see ***part 4***) and the maximum duration of detention (see ***part 6***).

With respect to ***parts 4 and 5*** of the order, it is particularly important to provide comprehensive lists documenting the behaviors of the individual requiring detention and the less restrictive alternatives that were attempted and failed and that were considered and rejected. The level of detail contained in these lists is not only legally mandated but also reflects good medical practice.

In asking for a list of the specific patient behaviors that support the need for detention, ***part 4*** captures the statutory requirement that the health officer provide an "individualized assessment of the person's circumstances or behavior constituting the basis for the issuance of the order." (§ 121367(a)(2).) This individualized assessment should give a chronological description of every incident leading up to the issuance of the detention order. While completing the individualized assessment, it is advisable to refer to the *Guidelines for the Civil Detention of Persistently Nonadherent Tuberculosis Patients in California*. Specifically, sections II(A) and II(B) of the *Plan for the Civil Detention of Persistently NonAdherent Tuberculosis Patients* (*Civil Detention Plan*) enumerate the types of patient behaviors which support a civil detention order for the purposes of isolation pursuant to section 121365(d) or for the purposes of completing treatment pursuant to section 121365(e).

Part 5 asks for two lists: the less restrictive alternatives that were attempted and failed, and the less restrictive alternatives that were considered and rejected. Again, it is important to provide detailed information, because it is the health officer's statutory and constitutional responsibility to consider and/or attempt less restrictive alternatives to detention before engaging in this serious deprivation of the patient's liberty. Less restrictive alternatives that might be included on the lists are set forth in sections II(A) and II(B) of the *Civil Detention Plan*.

Part 6 fulfills the statutory requirement that the recipient be informed of the duration of detention. It is important to remember that if a patient is being detained solely to be isolated from other people, then the patient must be released once he or she ceases to be infectious or once the health officer has determined that circumstances have changed, permitting the patient to be adequately separated from others upon release. (§ 121368(b).) If the patient is being detained solely to make sure he or she completes a course of treatment, then the patient must be released upon completing the prescribed course of medication. (§ 121368(c).)

Notice and Restatement of Rights

The tuberculosis control statute states that the civil detention order must be accompanied by a separate notice that includes specified information about the recipient's rights. This form serves that purpose.

Acknowledgment of Receipt/Choice of Action

This form is an optional addendum to the civil detention order. The tuberculosis control statute does not require the information in this form to be communicated in this format. However, the form serves as powerful documentation of the health officer's compliance with the statute. The written acknowledgment of receipt provides supplementary evidence that the order and Notice and Restatement of Rights actually made it into the hands of the recipient. The choice of action portion of the form reflects the health department's efforts to facilitate the recipient's ability to exercise his or her statutory rights to request release, free legal representation, and the notification of up to two designees about the detention.

Proof of Personal Service

Technically, a civil detention order may be served by registered or certified mail. (§ 120105.) Practically, however, civil detention orders are served in person by health department personnel. This generic form can be used by anyone serving a tuberculosis patient with a civil detention order. Since the tuberculosis control statute does not specify who may serve an order, it is fine for someone from a health department to serve the order, regardless of whether the server is a "party" to the action.

Termination of Civil Order of Detention for Tuberculosis

The tuberculosis control statute does not contain any guidance regarding the procedures for terminating a civil detention order. Nonetheless, it is worthwhile to verify in writing the termination date of a civil detention order. This form not only informs the interested parties of the termination but also serves an important record-keeping function by documenting the end date of the civil detention.

1. Order and Purpose of Detention

This is a *legal order* issued by the Health Officer of (City/County) _____. You must comply with this order. Failure to comply with this order is a criminal misdemeanor and may result in imprisonment for up to one year.

YOU ARE ORDERED TO COMPLY WITH YOUR DETENTION IN THE FOLLOWING FACILITY: _____. The *purpose* of your detention is to protect the public health.

2. Detained Patient's Rights

- You have the right to request release from detention by indicating your request on the attached Acknowledgment of Receipt/Choice of Action form or by contacting the health department contact person listed above.
- If you request release from detention, your detention will not continue for more than five (5) business days after your request unless a court issues an order authorizing your continued detention.
- Whether or not you request release from detention, the Health Officer is required to obtain a court order authorizing your detention within 60 days of the beginning of your detention if your detention continues through that time. After obtaining the first court order authorizing your detention, the Health Officer is required to obtain another court review of your detention at least once every 90 days so long as your detention continues.

- You have the right to hire a lawyer to represent you or to have a lawyer provided to you free of charge. If you would like to have a lawyer provided to you free of charge, indicate your request on the attached Acknowledgment of Receipt/Choice of Action form or contact the health department contact person listed above. The health department will notify a lawyer that you have requested legal representation.
- You may give the health department contact person listed above the addresses or telephone numbers of two people who you want to be told of your detention. At your request, the Health Officer shall take reasonable steps to notify those people that you are being detained.
- If necessary, you shall be provided with a language interpreter or a person skilled in communicating with vision or hearing impaired individuals in accordance with applicable law.

3. Legal Basis for Detention
(Check applicable box(es))

☐ Detention for isolation: You *have infectious* tuberculosis and there is a substantial likelihood that you may transmit tuberculosis because of your inadequate separation from others. (Health and Safety Code section 121365(d).)

☐ Detention for isolation: There *is a substantial likelihood that you have infectious* tuberculosis and that you may transmit tuberculosis because of your inadequate separation from others. (Health and Safety Code section 121365(d).)

☐ Detention for completion of treatment: You *have active* tuberculosis and there is a substantial likelihood based on your past or present behavior that you cannot be relied upon to participate in or complete an appropriate course of medication or to follow required infection control precautions. (Health and Safety Code section 121365(e).)

☐ Detention for completion of treatment: You *have been reported to the health officer as having active* tuberculosis with no subsequent report to the health officer that you have completed an appropriate prescribed course of medication, and there is a substantial likelihood based on your past or present behavior that you cannot be relied upon to participate in or complete an appropriate course of medication or to follow required infection control precautions. (Health and Safety Code section 121365(e).)

4. Circumstances and Behavior of Patient Causing the Need for Detention
(In an attachment labeled "Attachment A," list in chronological order the specific patient behaviors that support the need for detention, including dates, times, and names of relevant health department personnel. Attach as many pages as needed.)

See *Attachment A* for the specific circumstances and/or behaviors that support the need for your detention.

5. Lack of Alternatives that Are Less Restrictive than Detention
(In an attachment labeled "Attachment B," list the less restrictive alternatives that were attempted but unsuccessful. This list may cross-reference Attachment A. In an attachment labeled "Attachment C," list the less restrictive alternatives that were considered and rejected, and explain the reason for the rejection of each alternative. Attach as many pages as needed.)

The health department attempted the alternatives to detention listed in *Attachment B*, but those alternatives were unsuccessful. In addition, the health department considered and rejected the alternatives to detention listed in *Attachment C* for the reasons stated therein.

6. Duration of Detention

This order shall remain in effect until it is terminated by the Health Officer. You may only be detained for the amount of time necessary to fulfill the legal basis of your detention as set forth under number 3 above. To ensure the order remains effective, the Health Officer must obtain court authorization within 60 days of the beginning of your detention and at least once every 90 days thereafter.

NOTICE AND RESTATEMENT OF RIGHTS

You, _____, have been detained pursuant to a Civil Order of Detention for Tuberculosis in accordance with Health and Safety Code sections 120175 and 121365(d) or (e). You are hereby advised of the following rights:

- You have the right to request release from detention by indicating your request on the attached Acknowledgment of Receipt/Choice of Action form or by contacting the health department contact person listed above.
- If you request release from detention, your detention will not continue for more than five (5) business days after your request unless a court issues an order authorizing your continued detention.
- Whether or not you request release from detention, the Health Officer is required to obtain a court order authorizing your detention within 60 days of the beginning of your detention if your detention continues through that time. After obtaining the first court order authorizing your detention, the Health Officer is required to obtain another court review of your detention at least once every 90 days so long as your detention continues.
- You have the right to hire a lawyer to represent you or to have a lawyer provided to you free of charge. If you would like to have a lawyer provided to you free of charge, indicate your request on the attached Acknowledgment of Receipt/Choice of Action form or contact the health department contact person listed above. The health department will notify a lawyer that you have requested legal representation.
- You may give the health department contact person listed above the addresses or telephone numbers of two people who you want to be told of your detention. At your request, the Health Officer shall take reasonable steps to notify those people that you are being detained.
- If necessary, you shall be provided with a language interpreter or a person skilled in communicating with vision or hearing impaired individuals in accordance with applicable law.

ACKNOWLEDGMENT OF RECEIPT/CHOICE OF ACTION

I, _____ (printed name of patient), acknowledge that I have received the Civil Order of Detention for Tuberculosis and the Notice and Restatement of Rights.

Patient Signature: _____ Date: _____

At this time, I choose to do the following (*place initials in the space(s) provided*):

Request for Release

____ I request release from detention.

____ I do not request release from detention. If I decide to request release at any time during the duration of my detention, I will contact the health department contact person listed on the first page of the Civil Order of Detention for Tuberculosis.

Request for a Free Lawyer

____ I request that I be provided a lawyer free of charge.

____ I do not request free legal representation. If I decide to request free legal representation at any time during the duration of my detention, I will contact the health department contact person listed on the first page of the Civil Order of Detention for Tuberculosis.

Request for Notification of Friends, Family, or Others

____ I request that the health department tell the following person or people about my detention:

Person # 1: Name: _____

Address: _____

Telephone number: _____

Person # 2: Name: _____

Address: _____

Telephone number: _____

____ I do not request that the health department tell someone about my detention. If I decide I want one or two people told about my detention, I will contact the health department contact person listed on the first page of the Civil Order of Detention for Tuberculosis

* * * * *

For the person delivering the order if the patient refuses to sign or complete this form:

I, _____(printed name), explained this form to the patient and asked the patient to sign and complete this form, but the patient refused to sign or complete the form.

Signature: _____ Date: _____

PROOF OF PERSONAL SERVICE

State of California, City/County of _____

_____, the undersigned, states:

I am an agent of the City/County of _____, in which the within-mentioned personal service occurred. My business address is:

_____

_____

I delivered the attached CIVIL ORDER OF DETENTION FOR TUBERCULOSIS and NOTICE AND RESTATEMENT OF RIGHTS by hand to the following person at the following address, date, and time:

Name of person served: _____

Address where service took place: _____

_____

Date of service: _____

Time of service: _____

I declare under penalty of perjury under the laws of the State of California that the above is true and correct.

Executed at _____, California, on _____, 20___.

_____

Signature

Date: _____

TERMINATION OF CIVIL ORDER OF DETENTION FOR TUBERCULOSIS

This termination issued by: _____ (Signature of Health Officer or Designee)

_____ (Printed name and title)

This termination issued to: Name: _____

Address: _____

Telephone number: _____ Date of Birth: _____

Medical record number: _____

Termination

On _____, you were issued a Civil Order of Detention for Tuberculosis. That order is hereby terminated, and you are hereby released from detention.

This termination distributed to:

Types of Health Orders Related to Tuberculosis Control

A health officer may issue the following health orders.[1] Health orders are legally enforceable if proper procedures are followed.

- Detention for purposes of examination.
- Completion of a prescribed course of medication.
- Compliance with infection control precautions.
- Compliance with DOT plan (if an active TB patient is unable or unwilling to complete a prescribed course of medication).
- Detention in a health or other treatment facility if a person is substantially likely to have infectious TB and to transmit the disease.
- Detention in a health or other treatment facility if (1) a person has active TB and shows no evidence of having completed treatment and (2) there is a substantial likelihood, based on past or present behavior, that the patient cannot be relied upon to complete treatment and follow infection control precautions.
- Exclusion from attendance at the workplace.
- Home isolation.
- Other orders the health officer deems necessary and appropriate.

Contents of Health Orders: Check List for Compliance

A health order must include all of the following information:[1]

- The legal authority and particular sections of state law or regulations under which the order is issued;
- An individualized assessment of the person's circumstances or behavior constituting the basis for the issuance of the order.
- The less restrictive treatment alternatives that were attempted and were unsuccessful, or that were considered and rejected with the reasons the alternatives were rejected.
- The orders must be in writing and include the person's name, the time period the order will be in effect, the location, the payer source if known, and other terms and conditions necessary to protect the public health. A copy of the order must be served upon the person.
- Language, visual, or hearing interpreters must be provided when necessary to ensure the person's understanding of the health order.

Legal Rights of Detainees: Civil Detention Check List

A person who is detained for violating a health order related to TB control has the following legal rights:[1]

- Upon a detainee's request, the local health officer must apply for a court order authorizing continued detention within 72 hours of the request.
- Whether or not a detainee makes a request, a court order is required for detentions of more than 60 days.
- The health officer must seek further court review of a detention within 90 days of the initial court order and within 90 days of each subsequent court review.
- The health officer must prove the necessity of the detention by "clear and convincing" evidence.
- A person subject to detention has the right to counsel and to have counsel provided.
- Each health order must advise the detainee of his or her rights regarding release requests, court orders, court review, and legal representation.
- Each health order must be accompanied by a separate notice that explains the detainee's right to request release; that lists the phone number the detainee may call to request release; that explains the detainee's right to counsel; and that informs the detainee that, at the detainee's request, the health officer will notify two individuals of the detention.
- A detainee may only be detained for the amount of time necessary to fulfill the purpose of the detention.

Souvannarath Case Study

The story of Hongkham Souvannarath has quickly become well known in the California TB control community.[1] From July 1998 through May 1999, Souvannarath was illegally detained in the Fresno county jail due to her alleged defiance of California's TB laws. Her incarceration involved a series of missteps by county officials, so upon her release, Souvannarath filed two court cases. The first case cost the county $1.2 million in settlement funds,[2] and the second resulted in an appeals court opinion ordering the Fresno Human Services System ("HSS") to cease using the county jail as a civil detention site for noncompliant TB patients.[3] The Souvannarath story serves as a sharp reminder that the law is implicated in the every-day actions of the public health community.

Background

Souvannarath and her six children fled their homeland of Laos in 1984 along with a wave of refugees who were caught up in the political aftermath of the Vietnam War. Souvannarath ultimately settled in California's Central Valley, which is home to a large number of Southeast Asian immigrants. Souvannarath lives with her four daughters, two of whom were minors as of 1998. She speaks very little English.

TB Diagnosis and DOT

In February 1998, Souvannarath was diagnosed with MDR TB. She received medical care from the county health department which operates a chest clinic to treat TB patients. The TB Controller, a physician, oversees the clinic. Health orders requested by the TB Controller are issued and enforced by the local health officer.

The TB Controller prescribed Souvannarath a combination of intravenous drugs and oral medications that caused severe side effects. Souvannarath had a dim understanding of her disease and course of treatment because the chest clinic provided a Hmong translator who spoke broken Laotian. Despite the serious side effects she was suffering and despite her lack of

comprehension about her medical situation, Souvannarath cooperated with the health care workers who administered the intravenous drugs and who gave her oral medications under DOT.

Ohio Plans

After several months of complying with a treatment regimen that was causing her to feel increasingly ill, Souvannarath made plans to move to Ohio to live with one of her sons. In her culture, sons are considered better equipped than daughters to advocate and care for their parents, so Souvannarath hoped that she would improve if she lived with a son for awhile. She informed the chest clinic of her intentions, so a nurse removed her PICC line, the TB Controller gave her a supply of medications to take with her, and the chest clinic alerted its counterpart in Ohio to Souvannarath's impending arrival. The son who was planning to pick up Souvannarath was delayed by problems at work, and Souvannarath ran out of medications while she was waiting for him. As soon as she stopped taking the medications, she felt perfectly well. She thus decided to avoid the chest clinic until she left town. Souvannarath instructed her daughters not to disclose her whereabouts to any local authority.

In early July 1998, the chest clinic got word from Ohio that Souvannarath had not shown up at her son's house. The clinic staff was worried that Souvannarath could infect her family members (including a five-year-old granddaughter), so health workers quickly tried to track her down. Souvannarath's daughters denied knowing where she was, but they suggested that the health workers call Souvannarath's sons, who had more influence over their mother. The chest clinic did not contact the sons.

Order for Examination

A field nurse finally located Souvannarath approximately two weeks later, on July 23. The next day, an HSS communicable disease specialist visited Souvannarath with a translator. The specialist served Souvannarath with an English-language order for examination instructing her to appear at the chest clinic. He explained the meaning of the order, and he warned her that a failure to appear could result in detention. Souvannarath and her daughters had trouble understanding the translator. Souvannarath did not keep her appointment at the chest clinic on July 28.

Detention Order

Upon Souvannarath's failure to appear, the TB Controller requested that the health officer sign and issue a detention order. The health officer did so, directing that Souvannarath be detained in the county jail until she completed the prescribed course of treatment (which had the potential to extend for two years). The order did not state any reasons for the detention, and it contained no reference to Souvannarath's rights under the state TB control statute to a request for release, to a hearing, and to court appointed counsel.

Incarceration

On July 30, an HSS communicable disease specialist and two police officers arrested Souvannarath at her home. They took her at gun point to the county jail after promising her that that she was only going to the hospital. When she reluctantly agreed to proceed into the jail, she was strip searched. She was then confined in a cold and dark safety cell for three days because she cried that she was afraid she would die, and a Hmong translator interpreted her cry as a suicide threat.

Once she was released from the safety cell, Souvannarath was housed in the jail's infirmary for the six months that it took to complete the intravenous portion of her therapy. According to Souvannarath, the other inmates in the infirmary were allowed to exercise and go to church, but because she could not communicate with the jail personnel, she was unable to enjoy such privileges. The few times she was taken to the county chest clinic, she was forced to walk down a major thoroughfare shackled at her wrists, ankles, and waist.

Souvannarath was ultimately placed in the general population of the county jail, where she was subject to the same treatment as the other inmates. She was allowed one-half hour visits with her daughters twice a week through a glass security barrier. She was often too weak to climb to her assigned top bunk, and she had trouble obtaining her nausea medications. One guard was able to provide occasional translation services, but most of the time, Souvannarath could not communicate her problems to the prison staff.

Release

Ten months after her arrest, Souvannarath was served with a revised detention order and was given an attorney and a hearing date. The order was drawn from a new set of forms that the county had developed for use in civil detention cases in order to ensure that the county was complying with state TB control laws. At a May 27, 1999 hearing, Souvannarath was released from jail and placed on electronic monitoring, and at a July 19, 1999 review hearing, Souvannarath was unconditionally released from detention.

Litigation

Souvannarath ultimately filed two lawsuits, one in federal and one in state court. In the federal case, Souvannarath claimed that several HSS employees had violated provisions of the U.S. Constitution and of California state law, and that she was entitled to damages in light of what she had suffered. That case settled for $1.2 million. In the state case, Souvannarath asked the court to order HSS to cease using the county jail as a civil detention site for noncompliant TB patients. The trial court granted her request, and a court of appeals affirmed this decision.

In a hearing relating to the state case, a county health official stated, "I did not dwell into [the] individual lives nor [the] legal issues" of the patients served by HSS. The official furthered, "We're not attorneys, we're just medical providers." Moreover, the official "could not say whether any patients detained in the jail were afforded due process protections as this is a legal matter and [the official] would be unaware of that."

Questions

- What statutory provisions were implicated by the county's use of translators who were hard for Souvannarath to understand?
- What statutory provisions and constitutional principles did the health officer fail to follow when issuing the order of detention?
- What statutory provisions and constitutional principles were implicated in Souvannarath's arrest and incarceration?
- How could the health department have handled Souvannarath's case differently?

TB Control and the Law
Frequently Asked Questions on Criminal Commitment

Is failure to comply with a health order a crime?	§120275:* After notice or upon demand, the failure to comply with a health order of the California Department of Health Services is a misdemeanor which is a crime. See below for the definition of a misdemeanor. §120280: Failure to comply with a health order issued by a local health officer pursuant to §121365 is a misdemeanor. *Comment*: §121365 states that a local health officer may issue any orders he or she deems necessary to protect the public health, and may make an application to a court to enforce those orders.
Is any other behavior by a person with TB a crime?	§120290: A person who has TB and who willfully exposes him or herself to another person is guilty of a misdemeanor. *Comment*: A "willful"act is an action that proceeds from a conscious motion of the will. It is voluntary, conscious, and purposeful, not accidental.
What is a misdemeanor and what punishment can be imposed?	California Penal Code §§ 17 and 19 state that a misdemeanor is a non-felony crime. Penalties for a misdemeanor are a fine and/or imprisonment for up to 6 months, unless otherwise specified by a particular statute. *Comment*: The TB control statute specifies that violations of TB-related health orders may result in imprisonment for up to one year.
Where can confinement occur?	§120280: Confinement may occur in any appropriate facility, penal institution, or dwelling approved by the local health officer.
For how long can a person be confined?	§120280: Confinement can last as long as indicated in the order of the health officer or until terminated by the local health officer. Under no circumstance may confinement last more than 1 year.

LEGAL MEMORANDUM

To: CDHS TB Control Branch
CTCA Workgroup

From: Samantha Graff
Marice Ashe

Re: Legal Analysis Regarding Procedural Due Process Safeguards for Recipients of Tuberculosis-Control-Related Work Exclusion and Home Isolation Orders

Date: July 1, 2004

This memo entails a legal analysis of the procedural due process protections that should be afforded to TB patients who receive legal health orders for work exclusion or home isolation. At a minimum, constitutional procedural due process principles guarantee that a TB patient is entitled to receive (1) *adequate notice* of the health officer's decision to exclude the patient from work or to isolate the patient, and (2) a *meaningful opportunity to object* to the health officer's decision (i.e., a meaningful hearing).[1]

Specifically, this memo explores what might constitute *adequate* notice and a *meaningful* opportunity to object in the context of a TB-control-related work exclusion or home isolation order. There is little case law addressing notice and hearings in this unique context, but the California TB control statute[2] does offer some guidance. In order to safeguard the constitutional rights of TB patients, the TB control statute extends certain due process protections to all recipients of TB-control-related health orders. These protections mainly relate to notice.[3] The statute gives recipients of civil detention orders special additional due process protections, most of which have to do with a hearing procedure that applies only to civil detainees.[4] The statute does not indicate what type of hearing is available to recipients of other TB-control-related health orders. Since a work exclusion or home isolation order can involve a significant

---

[2] Cal. Health & Safety Code §§ 121350-121555.
[3] *See id.* § 121367(a).
[4] *See id.* §§ 121366, 121367(b).

deprivation of a patient's liberty and property interests, it is important to determine what type of hearing should be offered to patients subject to work exclusion or home isolation.

I. Adequate Notice

The U.S. Supreme Court has ruled that "[a]dequate notice under the Due Process Clause has two components. It must inform affected parties of the *action about to be taken* against them as well as of *procedures available for challenging that action*."[5] Each of these requirements serves a discrete purpose: "[A]dequate notice of the action itself permits the individual to evaluate its accuracy or propriety and to determine whether or not to contest it; notice of how to appeal ensures that available error-correction procedures will be effective."[6]

When a health officer orders a TB patient to stay out of work or to remain isolated at home, notice is embodied in the work exclusion or home isolation order. For the order to contain *adequate* notice, it must fulfill the two constitutional components articulated by the Supreme Court.

A. Notice of the Action About to Be Taken

First, the order must give the patient notice of the *action about to be taken* against him or her. This notice must provide enough information to allow the patient to evaluate the accuracy or propriety of the order and to determine whether or not to contest the order. The TB control statute sets forth clear requirements regarding how a health officer should notify a patient of the action about to be taken against him or her. Section 121367(a) states that any TB-control-related health order must be in writing and must set forth:

- the legal authority upon which the order is issued
- an individualized assessment of the patient's circumstances or behavior constituting the basis for the issuance of the order
- the less restrictive alternatives that were attempted and unsuccessful or were considered and rejected
- the name of the recipient
- the period of time during which the order shall remain effective
- the location
- the payor source
- other terms and conditions as may be necessary to protect the public health.

Moreover, section 121367(a) requires a copy of the order to be served upon the recipient, and section 121369(a) mandates that, if necessary, language interpreters and persons skilled in

[5] *Atkins v. Parker*, 472 U.S. 115, 152 (1985) (*citing Memphis Light, Gas and Water Division v. Craft*, 436 U.S. 1, 13 (1978) and *Mullane v. Central Hanover Trust Co.*, 339 U.S. 306, 314 (1950)).
[6] *Id.*

communicating with vision and hearing impaired individuals be provided in accordance with applicable law.[7]

Note that if a health officer is issuing a home isolation order, he or she must comply with additional notice-related requirements set forth in the California Code of Regulations.[8] These requirements include:

- giving detailed instructions to household members regarding precautionary measures to be taken to prevent the spread of disease
- issuing instructions to the patient and household members prescribing the isolation technique to be followed[9]

If a health officer adheres closely to the TB control statute (and, if applicable, the regulations pertinent to home isolation) in drafting and delivering a TB-control-related health order, the health officer will almost certainly be providing sufficient notice of the action about to be taken against the patient. The statutory and regulatory requirements are specially designed to ensure that the patient understands the order, receives ample information to evaluate the accuracy or propriety of the order, and is able to determine whether or not to contest the order.

B. Notice of the Procedures Available for Challenging the Action

The second constitutional component that a health order must fulfill to contain adequate notice is information about the *procedures available for challenging the action* about to be taken against the patient. The TB control statute is silent regarding the health officer's duty to inform the patient about the procedures that are available for contesting a work exclusion or home isolation order. This is where the statute delineates between civil detention orders and all other types of TB-control-related health orders. The statute requires health officers to notify recipients of civil detention orders that they are entitled to a court hearing characterized by various safeguards, including the right to free legal representation, optional judicial review within five days of a request for release, and mandatory judicial review within 60 days of the detention and every 90 days thereafter.[10] Meanwhile, the statute does not require health officers to notify recipients of other types of TB-control-related health orders about any procedures that might be available for challenging those orders. However, to be constitutionally valid, any TB-control-related health order should contain information about how the recipient may go about contesting the order.

II. Meaningful Opportunity to Object via a Hearing

The U.S. Supreme Court has consistently interpreted the Due Process Clause to require some sort of hearing when an individual is deprived of a liberty or property interest. The Court

---

[7] Although not required by statute, it would be sensible to provide written translations to non-English speakers both to assure the patient's comprehension and to have solid evidence that the patient was duly notified of the contents of the order.

[8] *See* Cal. Code Regs. §§2514-2524.

[9] Section 2516 sets forth specific measures that must be taken in the instance of "strict isolation." Section 2518 permits the health officer to issue whatever instructions might be appropriate in the instance of "modified isolation."

[10] *See* Cal. Health & Safety Code §§ 121367, 121368.

has pronounced that the "right to be heard before being condemned to suffer grievous loss of any kind, even though it may not involve the stigma and hardships of a criminal conviction, is a principle basic to our society."[11]

A work exclusion or home isolation order has a clear impact on the recipient's liberty interests and may also implicate the recipient's property interests. The U.S. Supreme Court has recognized that "one of man's most precious liberties is his right to work,"[12] and that "the basic liberty from physical confinement l[ies] at the heart of due process."[13] If a work exclusion or home isolation order causes an individual to lose wages, the person's property interests may also be affected. Therefore, whenever the government takes an action that denies an individual his or her strong liberty interest and potential property interest in attending work or moving about freely, it must provide some mechanism for the individual to contest the action "at a meaningful time and in a meaningful manner."[14] What constitutes a *meaningful time* and *meaningful manner* varies from situation to situation.

A. Hearing at a Meaningful Time

As to *timing*, the government generally must provide a hearing before it deprives an individual of his or her liberty or property. However, in the context of communicable disease orders, post-deprivation hearings may be constitutional if the individual is considered an immediate danger to self or others and if the hearing takes place within a reasonable time after the deprivation.[15] So, if a health officer wants a TB-control-related work exclusion or home isolation order to be effective instantaneously, the health officer should be able to show that the patient embodies an imminent threat to the population that the order is intended to protect (i.e., the people at the patient's place of work or the general public) and should ensure that the patient has an opportunity to contest the order within a reasonable time after the order is issue.

In order to determine what constitutes a reasonable time, it is worth looking to two statutory schemes that address somewhat comparable situations. Under the TB control statute, if the recipient of a civil detention order requests release, the health officer must seek court review within 72 hours of the request, and a court must authorize the detention with five days of the request in order for the detention to continue.[16] Under the California Welfare and Institutions Code, a "mentally disordered person" who is taken into custody for evaluation must be certified for treatment by two medical professionals within 72 hours in order for the detainee to remain in custody. Following certification, the person is entitled to an administrative certification review hearing within four days, or, in the alternative, is entitled to a court hearing by writ of habeas

---

[11] *Mathews v. Eldridge,* 424 U.S. 319, 333 (1976) (*quoting Joint Anti- Fascist Comm. v. McGrath,* 341 U.S. 123, 168, 71 S.Ct. 624, 646, 95 L.Ed. 817 (1951) (Frankfurter, J., concurring)).

[12] *Peters v. Hobby*, 349 U.S. 331, 352 (1955).

[13] *Demore v. Hyung Joon Kim*, 538 U.S. 510, 541 (2003).

[14] *Id.* (*quoting Armstrong v. Manzo*, 380 U.S. 545, 552 (1965)).

[15] *Cf. Menefee & Son v. Dep't of Food and Agric.*, 199 Cal. App. 3d 774, 781 (1988) ("[I]n some emergency situations the legitimate and overriding interests of the government may permit summary action. In such circumstances the opportunity for a hearing may be postponed but not eliminated." (internal citation omitted)); 7 Witkin, Summary of California Law, Constitutional Law § 537 (9th ed. 1990).

corpus within two working days after a petition is filed.[17] In both of these statutes, the custodial agency must take some action within 72 hours, and the outside time frame within which a detainee is entitled to a hearing is seven days from the date of the initial detention.

Drawing analogies to these two statutory schemes makes sense even though a TB-control-related work exclusion or home isolation order involves a distinct factual scenario. If the hearing will be before a court, it would be prudent for the health officer to seek judicial review within 72 hours of the patient's request for a hearing and to ask the court to hold a hearing within five days of the patient's request. If the hearing will be administrative, the health officer should probably offer a hearing within a week of the issuance of the order.

B. Hearing in a Meaningful Manner

There is no universal rule about the *manner* of hearing that the government must provide an individual who is being deprived of liberty or property. For instance, some hearings can consist solely of an opportunity to mail in a written objection, while other hearings require full-fledged judicial or judicial-like proceedings in which the individual is entitled to an oral hearing, a government lawyer, a translator, an impartial adjudicator, the ability to confront adverse witnesses, the ability to present witnesses and other evidence, a heightened standard of proof, and a verbatim transcript of the proceedings for purposes of appeal.

Considerable legal uncertainty surrounds the type of hearing that should be afforded to the recipient of a work exclusion or home isolation order. Nonetheless, health officers should make a serious effort to respect basic due process principles by providing some sort of hearing to these patients.

1. Legal Uncertainties Around Determining the Appropriate Manner of Hearing

There are at least two reasons why it is difficult to identify exactly what manner of hearing should be afforded to a recipient of a TB-control-related work exclusion or home isolation order: one relating to the TB control statute, and the other relating to the constitutional standard used to determine the adequacy of a hearing.

a. Uncertainties Relating to the TB Control Statute

The TB control statute contains no guidance as to the type of hearing that should be offered to the recipient of a work exclusion or home isolation order. This silence is problematic for both practical and legal reasons. Practically, it places the burden on local health departments to build a hearing procedure from scratch out of a wide-open field of possibilities.

Legally, health departments could face a catch-22 because the TB control statute under which they are forced to operate may be unconstitutional. There is an argument to be made that the TB control statute violates the Due Process Clause of the California Constitution because it fails to provide for any type of hearing in the instance of a TB-control-related work exclusion or home isolation order. This argument arises from a line of California cases (the "seizure cases")

[17] *See* Cal. Welf. & Inst. Code §§ 5250, 5251, 5256, 5276.

reviewing state statutes or local ordinances that allowed an administrative agency to seize property in an emergency situation without providing for a pre- or post-deprivation hearing.[18]

In the seizure cases, the courts held that the statutes/ordinances authorizing the seizures were constitutionally deficient because they did not provide for a hearing. The failure was not cured by an administrative hearing granted by an agency as a matter of discretion: "[W]here a statute authorizes the taking of private property but makes no provision for hearing or notice, either actual or constructive, such defect is not supplied by the voluntary adoption by public officers of rules covering the situation. . . . [T]o constitute due process, the statute itself must provide for notice of the time and place of hearing . . . ."[19] Nor was the failure cured by the availability of a "collateral" judicial action (i.e., a court action for a writ of mandate, injunction, or other remedy not included in the statute/ordinance for the express purpose of contesting the seizure): "The California Supreme Court has held emphatically and unanimously 'the availability of a collateral judicial remedy [cannot] sustain a seizure procedure which provides absolutely no hearing whatsoever, either before or after the taking.'"[20]

Although the seizure cases addressed the taking of property and not the deprivation of liberty, well settled law dictates that minimum procedural due process standards apply equally to a property seizure as to a liberty deprivation.[21] It therefore is conceivable that the TB control statute is unconstitutional because of its failure to include a hearing procedure for non-civil-detention orders. If the statute is unconstitutional, then health departments technically could not remedy the statutory deficiency even if they designed an administrative hearing procedure for, or offered judicial recourse to, the recipient of a work exclusion or home isolation order.

While the TB control statute may be unconstitutional, it is important to note that a court could well find the TB control statute to be constitutional – especially in light of the precept articulated by the California Supreme Court that "courts will presume a statute is constitutional unless its unconstitutionality clearly, positively, and unmistakably appears; all presumptions and intendments favor its validity."[22] A court would uphold the TB control statute if the court identified language in the statute implying that the recipient of a work exclusion or home isolation order is entitled to a hearing.[23]

[22] *People v. Falsetta*, 21 Cal. 4th 903, 912-13 (1999).

[23] *See Phillips*, 183 Cal. App. 3d at 379; *Merco Constr.*, 274 Cal. App. 2d at 168. *See also Newark v. J.S.*, 652 A.2d 265, 277 (N.J. Super. Ct. Law Div. 1993) (upholding the constitutionality of the New Jersey TB control statute by construing it to include modern due process standards).

The availability of a hearing arguably could be inferred from certain statutory provisions. For example, section 121365 allows health officers to "make application to a court for enforcement" of TB-control-related health orders. It is possible to read this clause as implying that a health officer should offer to initiate a court hearing if the patient requests it. Section 121367 requires health officers to include in every TB-control-related health order an individualized assessment of the circumstances or behavior constituting the basis for the order and the less restrictive alternatives that were attempted and unsuccessful or considered and rejected. This section could be interpreted as implicitly laying the groundwork for an administrative hearing in which the recipient of the order would have a chance to respond to the health officer's diagnosis of the patient and the situation.

In addition, it is possible that the availability of a habeas corpus petition rescues the statute from unconstitutionality, at least with respect to isolation orders. Under the California Penal Code, habeas corpus is applicable to any individual who believes he or she has been "unlawfully imprisoned or restrained of his liberty."[24] A person may seek a writ of habeas corpus from a state court "to inquire into the cause of such imprisonment or restraint."[25] If the court finds that the imprisonment or restraint is unlawful, the court can order that the individual be released or that the terms of imprisonment or restraint be modified. Historically, courts have recognized habeas corpus to be a valid route to contesting isolation and quarantine orders even in the absence of statutory language identifying habeas corpus as the appropriate hearing procedure.[26] Habeas corpus could be distinguished from the "collateral" judicial procedures that proved to be inadequate in the seizure cases because habeas corpus is part of the overall California statutory framework and is universally available for the express purpose of challenging an allegedly unlawful restraint.

Whether or not the TB control statute is constitutional, health officers must act under the presumption that the statute is constitutionally valid.[27] They must bear the burden of implementing a hearing procedure that attempts to fill the gaps left open by the statute under which they must operate.

b. Uncertainties Relating to the Constitutional Due Process Standard

In trying to construe the manner of hearing that should be guaranteed in a work exclusion or home isolation order, the silence of the TB control statute is not the only hurdle. An added challenge is the constitutional standard used to assess the adequacy of a hearing. The U.S. and California Supreme Courts have set forth a number of factors that must be weighed in determining whether the form of hearing in a particular instance satisfies due process:

---

[24] Cal. Penal Code § 1473(a).

[25] *Id.*

[26] *See, e.g., In re Fisher*, 74 Cal. App. 225 (1925); *In re Halko*, 246 Cal. App. 2d 553 (1966). Note that habeas corpus most likely is not available to recipients of work exclusion orders, since they are not being physically restrained in the manner apparently contemplated by the habeas corpus statute.

[27] *See* Cal. Const. Art. III § 3.5(a) ("An administrative agency . . . has no power . . . to declare a statute unenforceable, or to refuse to enforce a statute, on the basis of its being unconstitutional unless an appellate court has made a determination that such statute is unconstitutional.).

1. The private interest at stake
2. The fairness and reliability of the procedures leading up to the deprivation and the probable value, if any, of additional or substitute procedural safeguards
3. The government's interest in taking the challenged action and in shouldering the fiscal and administrative burdens that the additional or substitute procedural requirement would entail[28]
4. The dignitary interest in informing individuals of the nature, grounds, and consequences of the action and in enabling them to present their side of the story before a responsible governmental official[29]

The weighing of these four factors entails a very situation-specific analysis. In the words of the U.S. Supreme Court, "Due process, unlike some legal rules, is not a technical conception with a fixed content unrelated to time, place, and circumstances. Due process is flexible and calls for such procedural protections as the particular situation demands."[30] Since the constitutional procedural due process standard is so situation-specific, there is no way to know for sure whether a given hearing model is constitutionally sound until it is challenged by a recipient and reviewed by a court.

Drawing analogies to hearing procedures that courts have upheld in different circumstances will be of limited use. A hearing model that is appropriate in the instance of TB-control-related work exclusion or home isolation order will be unique, even as compared to hearing models for health orders issued in the context of other diseases. It will be designed in light of a disease-specific statute that already contains multiple due process provisions, so it will be specially crafted to suit the pathology of TB, the profile of the typical TB patient, and the structure of the TB control statute.

2. Possible Courses of Action Given the Legal Uncertainties Around Determining the Appropriate Manner of Hearing

In the face of these legal uncertainties, health officers should consider taking two simultaneous courses of action. They should explore various avenues of clarifying the law and should assess the risks and benefits of gaining clarity. Meanwhile, they should offer some sort of hearing procedure that reflects basic due process principles.

a. Seeking Clarity

There are several ways that health officers might try to obtain clarity about the type of hearing they are obligated to provide to the recipient of a TB-control-related work exclusion or home isolation order. One approach could involve advocating for legislative reform. Since the hearing question is not the only component of the TB control statute that could use

[28] *See Goldberg v. Kelly*, 397 U.S. 254, 263-71 (1970); *Mathews v. Eldridge,* 424 U.S. 319, 335 (1976) (articulating the first three factors).
[29] *See People v. Ramirez*, 25 Cal. 3d 260, 269 (1979) (adding the dignitary interest to the list of three factors set forth by the U.S. Supreme Court in *Goldberg* and *Matthews*).
[30] *Mathews,* 424 U.S. at 334 (internal citations omitted).

clarification,[31] the question could be resolved as part of a general clean-up bill targeted at tightening up the TB control statute. An alternative approach toward legislative reform could involve taking up the hearing question in the larger context of the communicable disease statute. After all, the entire communicable disease statute suffers from the same deficiency as the TB control statute in that it is silent as to the type of hearing that should be afforded to the recipients of most types of health orders.

Another avenue toward gaining clarity could entail asking the Office of the Attorney General of California for an official legal opinion. The Attorney General's Office provides legal opinions upon request to local public officials and agencies on issues arising in the course of their duties. These opinions are accorded "great weight" by the courts.[32] Thus, if the Attorney General's Office were willing to provide an opinion, health officers could comfortably rely on it.

In very limited circumstances, a health officer could request "declaratory relief" in court regarding the hearing procedures that should be afforded to the recipient of a TB-control-related work exclusion or home isolation order.[33] A "declaratory relief" action would basically involve asking a court for a declaration regarding the duties owed by the health officer to the recipient. The disadvantage of using a declaratory relief action to achieve clarity is that it is only available if there is an actual, present controversy pending.[34] This means that a health officer cannot bring a declaratory relief action in the absence of a current conflict with the recipient of a work exclusion or home isolation order.

Before deciding to seek clarity about the hearing issue, health officers should weigh the benefits and risks of achieving clarity. A major benefit would be the sense of security that comes with an assurance that they are following the law and respecting the constitutional rights of TB patients. Moreover, if health officers knew what hearing procedures to offer, they would diminish their chances of being held liable for a constitutional violation.

Seeking clarity could involve some risk. The hearing issue could be plunged into the spotlight. Generally, the issuance of TB-control-related orders runs fairly smoothly, and health officers might be wary of opening up the process to public scrutiny. Also, if health officers obtained a clear answer to the question of what hearing procedures to follow, they would face a mandate for action. They would be obliged to follow the given procedures even if those procedures turned out to be unduly burdensome from a monetary or bureaucratic perspective.

b. Establishment of Simple Hearing Procedures

Regardless of whether health officers try to clear up the legal uncertainties around the hearing issue, they should make a good faith effort to respect basic due process principles by offering some sort of hearing to each recipient of a TB-control-related work exclusion and home

---

[32] *California Assn. of Psychology Providers v. Rank*, 51 Cal.3d 1, 17 (1990).

[33] *See* Cal. Code of Civ. Pro. § 1060.

[34] *See Alameda County Land Use Assn. v. Hayward*, 38 Cal. App. 4th 1716, 1723 (1995) ("An action for declaratory relief lies when the parties are in fundamental disagreement over the construction of particular legislation, or they dispute whether a public entity has engaged in conduct or established policies in violation of applicable law.").

isolation order. Moreover, to ensure that they are abiding by the constitutional doctrine of equal protection, they should establish hearing procedures that are used with consistency when dealing with every recipient of a particular type of order.

In the face of legal uncertainty, there are several reasons why it is prudent for a health officer to develop a hearing procedure. By institutionalizing a hearing procedure, a health department can shield itself from engaging in the type of serious constitutional violations that led Fresno County officials to sign a $1.2 million settlement with Hongkham Souvannarath. Moreover, in the event of litigation, a court is likely to be sympathetic to a health department that made a concerted effort to abide by constitutional principles. Further, by adopting a hearing approach, a health department can set itself up to make the legal argument that the TB control statute is constitutional because it implies that the recipient of a work exclusion or home isolation order is entitled to a hearing.

There are at least three general types of hearing that a health officer might provide, two of a judicial nature and one of an administrative nature. First, a health officer might simply inform the recipient that he or she may file a law suit to contest the order. The order might even alert the recipient as to the various causes of action that he or she might bring in court. This course of action is appealing because it would put the onus on the recipient to exercise his or her right to object to the order. However, it is legally suspect when viewed in light of the seizure cases discussed above. These cases suggest that the ability of an individual to challenge a health order via a "collateral" judicial action is no substitute for the availability of a hearing specifically provided to address the merits of the order.[35] The one situation in which this approach may be legally valid would entail informing the recipient of a home isolation order that he or she may file a petition for habeas corpus. As discussed above, the California statutory framework makes habeas corpus available to anyone who believes he or she has been unlawfully imprisoned or restrained. Moreover, courts historically have recognized habeas corpus to be a valid route to contesting isolation and quarantine orders.[36] So, it may be acceptable to alert the recipient of a home isolation order that he or she may object to the order by filing a habeas corpus petition in court.

Second, a health officer might offer to bring a court action so the recipient can have a chance to contest the order before a judge. The TB control statute gives health officers the option to "make application to a court for enforcement" of TB-control-related health orders.[37] This provision arguably implies that a health officer should offer to initiate a court hearing if the patient requests it.[38] So, a health officer could write in each work exclusion or home isolation order that upon the recipient's request, the health officer will initiate a civil court action for enforcement of the order. As a party to the action, the patient would have an opportunity to contest the validity of the order in some sort of court hearing.

In many counties, judges do not have experience reviewing health orders, so a health officer who uses the court hearing route should ensure that his or her lawyers educate the judge

[36] *See supra* text accompanying note 26.
[37] Cal. Health & Safety Code § 121365.
[38] *See supra* text following note 23.

about how to handle an application for enforcement of a TB-control-related health order. A good place for the lawyers to start is the portion of the TB control statute regarding hearings for patients subject to civil detention orders. Under the TB control statute, the recipient of a civil detention order is entitled to a court hearing characterized by several strong due process safeguards, including the right to be represented by counsel and have counsel provided, and the right to court review within five days of a request for release.[39] The lawyers can recommend that a judge extend similar safeguards to the recipient of a work exclusion or home isolation order.[40]

Finally, as an alternative to initiating a judicial proceeding, a health department could provide some sort of administrative hearing to the recipient of a TB-control-related work exclusion or home isolation order. An administrative hearing has the advantage that it does not have to be as formal and rule-based as a court hearing, so long as basic procedural due process requirements are met.[41] Moreover, an administrative hearing is generally less expensive and time consuming than a court hearing and is more likely to yield predictable results.

As discussed above, it is hard to know exactly what type of hearing meets minimal due process standards in a given situation. However, there is a reasonable argument to be made that a simple administrative hearing process resembling the following would be constitutionally sufficient:[42]

- A TB-control-related work exclusion or home isolation order contains instructions about who to contact to request an administrative hearing and summarizes how that hearing will proceed.
- The administrative hearing is held as soon as possible, but in no instance is held more than five business days after the request is made.
- The patient is entitled to an in-person hearing unless personal appearance is contraindicated or impractical. In that case, the patient is entitled to a telephonic hearing. The patient may also be offered the option to have a hearing in writing.
- The health department provides the patient an interpreter if necessary.
- The health department provides the patient an attorney or patient advocate upon request. (Note that in many administrative hearings, due process does not require the government to provide counsel to the individual contesting the government action.[43] However, given that important liberty and property interests are probably at stake and that the typical patient may lack the capacity to navigate even the most simple hearing, it may be advisable to supply legal representation. If finding a government lawyer is too expensive or difficult, an alternative is to provide a patient advocate similar to the advocate that can

[39] Cal. Health & Safety Code §§ 121366, 121367.
[40] Note that the health department cannot guarantee that a judge will extend such safeguards to the recipient of a work exclusion or home isolation order. Under the separation of powers doctrine, the executive branch does not have the power to create statutory rights or to interpret the law. *See* Cal. Const. Art. III, § 3.
[41] *See Anderson Nat. Bank v. Luckett,* 321 U.S. 233, 246 (1944).
[42] Note that this is a rough sketch of what a hearing process might look like. It is essential for health officials to consult with their attorneys before adopting a particular approach.
[43] *See* California Administrative Hearing Practice §4.3 (Continuing Education of the Bar ed., 2004).

represent a "mentally disordered person" at a certification review hearing under California Welfare and Institutions Code section 5256.4.[44])

- The hearing officer is an unbiased adjudicator who did not issue the health order. (Since the communicable disease statute defines "health officer" to include his or her designee,[45] a designee could issue TB-control-related health orders, leaving a health officer available to serve as a hearing officer. Alternatively, health officers from neighboring counties could enter into memoranda of understanding agreeing to serve as hearing officers for one another.)
- The patient is entitled to present evidence that he or she does not meet the legal basis for the order or that the order is not necessary to protect the public health or the health of any individual.
- The issuing health official presents evidence supporting his or her position that the patient meets the legal basis for the order and that order is necessary to protect the public health or the health of any individual person. (It is an open question whether the patient should have the chance to confront the issuing health official at a hearing or whether the official could direct the hearing officer to rely solely on the written health order. One hallmark of due process is the ability of a party to confront the witnesses against that party, but given that a proper health order is based on solid medical evidence and is comprehensive in its diagnosis of the patient and the circumstances giving rise to the order, there is an argument to be made that the health official need not appear at the hearing to defend the order.[46])
- The hearing is conducted in an informal manner, and the judicial rules of evidence do not apply.
- An oral hearing is recorded in some manner (e.g., steno-typed, taped, or videotaped).
- The hearing officer issues a final written decision within one day of the hearing. The decision makes a determination about whether the order will be upheld, annulled, or modified and explains the basis for that determination.
- Give the decision to the patient right away.

As enumerated above, a court would assess four factors to determine whether this simple type of administrative hearing would meet minimal due process standards when applied to the recipient of a TB-control-related work exclusion or home isolation order. The first factor weighs in favor of an administrative hearing with maximal due process protections, but the health department could use the latter three factors to justify a less rigorous administrative hearing.

The private interest at stake: The right to work and the right to be free from physical confinement implicate precious liberty rights and may affect important property rights as well. In order to deprive an individual of these rights, the government should afford a hearing characterized by significant due process protections. That said, in the context of most TB-control-related health orders, the recipient has had an opportunity to comply with less restrictive

[44] Under the Welfare and Institutions Code, a "mentally disordered person" who is certified for 14 days of intensive treatment is entitled to an administrative certification review hearing within four days of certification. *See* § 5256. At the hearing, the person has a right to be assisted by an attorney or by a patient advocate who has no clinical or administrative responsibility for the person receiving mental health services. *See* §§ 5256.4, 5325.

[45] Cal. Health & Safety Code § 120115(k).

[46] *See infra* text accompanying note 48 (discussing the reliability of written medical records).

alternatives and has failed to so. So, the private interest at stake is likely to be diminished by a patient's unwillingness to abide by a protocol that would involve a lesser deprivation.

The fairness and reliability of the procedures leading up to the deprivation and the probable value, if any, of additional or substitute procedural safeguards: The U.S. Supreme Court gives great deference to "the reliability and probative worth of written medical records."[47] In *Mathews v. Eldridge*,[48] the Court examined the federal administrative hearing procedures that accompanied the termination of social security disability benefits. The Court upheld the procedures against a claim that there should have been greater due process safeguards. The Court stated that the "decision whether to discontinue disability benefits will turn, in most cases, upon routine, standard, and unbiased medical reports by physician specialists concerning a subject whom they have personally examined."[49] The Court found that this type of decision involved a low likelihood of error, especially when viewed in comparison to a decision to deny welfare benefits, where issues of witness credibility and veracity tend to be critical. The low likelihood of error in turn reduced the probable value of additional or substitute procedural safeguards. Just as in the *Mathews* scenario, health officers issuing TB-control-related health orders generally base their actions on "routine, standard, and unbiased" medical determinations. Health departments often have a long history dealing with the recipient of a health order and have compiled extensive documentation of the need for the order. Therefore, the second factor counsels against an administrative hearing that involves maximal due process protections (including the right to confront witnesses).

The government's interest in taking the challenged action and in shouldering the fiscal and administrative burdens that the additional or substitute procedural requirement would entail: Courts are readily persuaded that health officers have a compelling interest in controlling disease.[50] And a court may be sympathetic to the reality that local health departments are financially strapped and are not set up to provide judicial-like administrative hearings to recipients of health orders. Moreover, in the instance of a patient who has had repeat encounters with the health department, a court is likely to recognize that the health department has already shouldered a significant fiscal and administrative burden in providing pre-hearing due process to the patient.

The dignitary interest in informing individuals of the nature, grounds, and consequences of the action and in enabling them to present their side of the story before a responsible governmental official: If the issuing official takes the mandate of the TB control statute seriously, a health order will give the patient extensive information about the nature, grounds, and consequences of the order. A simple administrative hearing would certainly offer the patient a chance to present his or her side of the story before a responsible governmental official.

---

[47] *Mathews v. Eldridge*, 424 U.S. 319, 344 (1976).
[48] *Id.*
[49] *Id.* at 344.
[50] *See, e.g., Newark v. J.S.*, 652 A.2d 265, 271 (N.J. Super. Ct. Law Div. 1993) ("Hardly any state interest is higher than protecting its citizenry from disease.")

III. Conclusion

Health officers should always keep in mind that work exclusion and home isolation orders deprive the recipients of some of their most basic freedoms. Whether or not health officers attempt to fix the legal ambiguities in the TB control statute, they should abide by fundamental procedural due process principles when issuing a work exclusion or home isolation order. They almost certainly will meet the standard of *adequate notice* if they make a firm practice of following sections 121367(a) and 121369(a) and if they inform each recipient about how to contest the given order. And by working with their attorneys to design and implement a fair judicial or administrative hearing process, health officers can give recipients the opportunity to object in a *meaningful time* and *meaningful manner*.

County of Santa Clara, Claimant

Dear Vinod Sharma and Lehoa Nguyen:

After reviewing the *Tuberculosis Control* test claim (03-TC-14), staff with the Commission on State Mandates (Commission) finds that additional information is needed for analysis of whether costs have been mandated by the state.

Specifically, Health and Safety Code Sections 121350, 121355, 121357, 121360, 121375, 121380, 121390, 121450, 121455, and 121460 authorize the tuberculosis (TB) subvention program and charge the California Department of Public Health (CDPH) with establishing standards and procedures with which to condition the awarding of funds. It appears that the state has been providing funding to local governments to fund the costs of the TB control program on an annual basis. In particular state funding is currently being provided for requirements imposed by the test claim statutes including "food, shelter, incentives and enablers funds reimbursement for civil detention."[1] However, it is unclear whether this funding is sufficient to fund the costs of any newly required activities (i.e. those activities that were not already required before the adoption of the test claim legislation), resulting in no state mandated costs or whether it only partially covers the costs of any new program or higher level of service that may have been

[1] http://www.cdph.ca.gov/programs/tb/Documents/TBCB-LHJFunding-%20RFA-PPM-Final.pdf

imposed by the test claim statutes and so should be considered as an offset to any costs found to be mandated by the state.

Additionally, it is unclear whether the Health Officer's Association of California (HOAC) was formally authorized by the Santa Clara County Board of Supervisors or any other county board of supervisors to request the test claim legislation or to lobby on behalf of the county. Please comment on the scope of the authority granted by the counties including Santa Clara County to HOAC to act on their behalf in legislative matters and in particular, how that authority was granted in 1993 and 1994 (i.e. by resolution of the board, contract, or in some other way).

Finally, please provide information regarding any authority to impose fees or charges for costs of TB control activities. For example, do counties charge those who have the ability to pay for TB-related medical testing and treatment? Also, do counties provide attorneys for all TB patients that request them free of charge? Or is the provision of counsel by the county based on the ability of the patient to pay?

In light of Government Code section 17556(a), (d), and (e), the Commission requests comments from the claimants, interested parties, and affected state agencies, on cost required to be incurred, if any, by the above referenced test claim statutes in *Tuberculosis Control* (03-TC-14). Please submit comments as soon as possible, but **not later than Monday, May 2, 2011**.

You are advised that comments filed with the Commission are required to be simultaneously served on the other interested parties on the mailing list, and to be accompanied by a proof of service. However, this requirement may also be satisfied by electronically filing your documents on the Commission's website. Please see the Commission's website at http://www.csm.ca.gov/dropbox_procedures.shtml for instructions on electronic filing. (Cal. Code Regs., tit. 2, § 1181.2.) If you would like to request an extension of time to file comments, please refer to section 1183.01, subdivision (c)(1), of the Commission's regulations.

Please contact Heather Halsey at (916) 323-3562 if you have any questions or concerns regarding this matter.

Sincerely,

Drew Bohan
Executive Director

Re: REQUEST FOR ADDITIONAL INFORMATION
Tuberculosis Control. 03-TC-14

Dear Mr. Bohan:

The California Department of Public Health (Department) hereby submits this response to the Commission on State Mandates (Commission) request for additional information, dated April 18, 2011. The majority of this request appears to be directed at the claimant, County of Santa Clara who is in the position to provide additional information regarding net costs incurred by any claimed "newly required activity," claimant's authority to impose fees, and authority granted by claimant to the Health Officer's Association of California (HOAC). However, in response to the Commission's inquiry regarding present state funding, the Department can provide a description of the present distribution of funds by the Department to local health departments.

The Commission correctly noted that, "the state has been providing funding to local governments to fund the costs of the TB program on an annual basis. In particular, state funding is currently being provided for requirements imposed by the test claim statutes including food, shelter, incentives and enablers funds reimbursement [*and reimbursement]* for civil detention." While the state does provide an annual award of funds to jurisdictions reporting an average of 6 or greater cases of tuberculosis, these funds are intended to be used to strengthen the tuberculosis prevention activities by local health officers, augmenting, but not supplanting local government funding for tuberculosis prevention and control, activities the locals have historically been responsible for. The Department stands by the position that the tuberculosis control activities described by the test claim statutes predate January 1, 1975.

As outlined below, the state provides reimbursement to counties on an as-needed basis for all allowable costs associated with the civil detention of tuberculosis patients who are at risk for elopement and defaulting on their treatment regimen.

Tuberculosis Local Assistance Funding for Local Health Jurisdictions

Eligible local health jurisdictions receive one or more types of local assistance funding. Base Awards and Housing Award funds are issued as annual awards on the state fiscal year cycle (July through June). Civil detention expenses are invoiced and reimbursed throughout the fiscal year on a flow basis. Subject to availability of funds, invoices submitted for designated allowable detention expenses are reimbursed in full.

Base Award: Funds are to be used to support staff and expenses associated with completion of therapy and contact investigation [Centers for Disease Control and Prevention's (CDC's) Priorities I and II]. Under special circumstances, funds may be used for CDC Priority III, targeted testing in high risk populations in order to detect and treat latent tuberculosis (TB) infection. Eligible Base Award expenditures include salaries, benefits, equipment, supplies, training materials, local mileage, and expenses for in-state travel to TB–related trainings.

Base Award allocation: Base Awards are provided annually to local health jurisdictions that report six or more cases of TB. To minimize fluctuations in funding over time, Base Award amounts are held constant for two years. Jurisdictions reporting on average 20 or more cases receive an award determined by a multi-variable funding allocation formula. The funding allocation formula uses a five-year average number of reported cases and case characteristics (e.g. homelessness, disease site, infectiousness, drug resistance). Jurisdictions reporting an average 6 to 19 cases annually receive a fixed award amount. Every two years, the formula is re-calculated using the most recent five-year surveillance data.

Housing Allocation (two components): State general funds are provided to promote treatment adherence and ensure completion of therapy in TB patients who are homeless, at risk for homelessness, or at risk for civil detention because they are persistently non-adherent with their treatment regimen. Jurisdictions with sizeable TB patient populations are provided an annual award allotment based on historic costs of housing and related expenses for homeless and at-risk for homeless persons undergoing TB treatment.

- Food, Shelter, Incentives and Enablers (FSIE) allotment: FSIE funds are used to provide services that include measures to enhance adherence, prevent homelessness and allow the use of less restrictive alternatives to decrease or obviate the need for detention. Eligible expenditures include: food, shelter, other 'incentives and enablers' as well as personnel and personnel-related costs for conducting designated activities.

Received
May 2, 2011
Commission on
State Mandates

- Housing Personnel: supports personnel salaries and benefits for staff working directly with patients that are homeless, at risk of homelessness, or at risk for civil detention (e.g., outreach worker, social worker, public health nurse staff who work with the specified population to attain the desired outcomes).

Jurisdictions without an allotment may submit requests for reimbursement; those receiving allotments may submit supplemental invoices for expenses that exceed their allotment.

Civil Detention: A regional facility (in San Mateo County) receives an annual award of state TB funds to support unlimited use by jurisdictions that need a site to detain persistently non-adherent patients for the duration of their treatment. TB Civil Detention funds are available for reimbursement to jurisdictions that use local facilities for civil detention of recalcitrant patients. Reimbursement is available for costs of detentions for isolation (Health and Safety Code section 121365(d)) and completion of therapy (Health and Safety Code section 121365(e)). Jurisdictions seeking reimbursement for detention and detention-related expenses follow the state guidance and reimbursement procedure. Jurisdictions have the option to civilly detain recalcitrant TB patients, and will be reimbursed for all eligible expenses that conform to the state civil detention policy. Consideration for reimbursement for detention of persistently non-adherent tuberculosis patients is made on a case-by-case basis. Health and Safety Code 121358(a) prohibits the use of these funds to support costs of detention carried out in correctional facilities.

Additionally, the Department reasserts all of the arguments presented in the Department's hearing brief submitted on August 24, 2004 in opposition to claimant's test claim: 1) these claims do not meet the definition of "costs mandated by the state" because the statutory requirements of the tuberculosis program predate January 1, 1974 with much of the program in place in 1957; 2) the counties' sponsorship of this legislation through HOAC bars them from seeking reimbursement for costs mandated by the state, finding otherwise would permit a circumvention of Government Code section 17556(a); 3) provision of due process rights existed in law prior to these statutes; 4) non-criminal detention proceedings are discretionary and thus not a "new program or higher level of service"; and, 5) offsetting savings result in no net costs to the local agency. Accordingly, the Department requests the denial of this test claim.

Sincerely,

Lehoa Nguyen

Staff Counsel

RESPONSE TO REQUEST FOR ADDITIONAL INFORMATION

On Original Test Claim
Chapter 676, Statutes of 1993, Chapter 685, Statutes of 1994, Chapter 294, Statutes of 1997, and Chapter 763, Statutes of 2002

Claim no. CSM-03-TC-14

Tuberculosis Control

Test claimant, County of Santa Clara, submits the following in response to the Request for Additional Information, dated April 18, 2011, as issued by the Commission Staff.

1. Whether the funding provided by the California Department of Public Health is sufficient to fund the costs of any newly acquired activities?

While the California Department of Public Health does provide some much needed assistance, the funding is insufficient to cover the expenses for the County of Santa Clara. For example, in 2010, the County had $5,144,431 in expenses for TB control and the TB Clinic (which excludes Public Health Nursing and Lab costs). The funding from all sources for 2010 was $4,579,366 leaving the County to carry $565,066 in expenses. The declaration of Martha Paine is attached hereto and incorporated herein by reference as though fully set forth.

2. Whether the Health Officers' Association of California (HOAC) was formally authorized by the Santa Clara Board of Supervisors or any other county board of supervisors to request the test claim legislation or lobby on behalf of the county?

After diligent search of the County of Santa Clara's Board agenda items, no item could be found that addressed the test claim legislation, the HOAC, or any contract between the HOAC and the County. The declaration of Jenny Yelin is attached hereto and incorporated herein by reference as though fully set forth.

Moreover, the HOAC executive director, Bruce Pomer, explained that the HOAC is a non-profit whose members are the Health Officers for the 58 counties and three cities. It seeks to improve the practice of public health, responds to requests for technical information from the legislature, engages in extensive research projects and may sponsor legislation. The HOAC has close ties to the California Conference of Local Health Officers (CCLHO) which is an intergovernmental, statutory body which includes

members of the state in addition to the members of the HOAC. Although he could not comment on the test claim legislation without benefit of his file, he related that generally the CCLHO is the body that initiates new legislation. The declaration of Juliana F Gmur is attached hereto and incorporated herein by reference as though fully set forth.

3. Whether the County has granted authority to impose fees or charges for TB-related costs?

The County makes every effort to obtain fees for its services wherever possible. The County charges a fee for TB skin tests from members of the public requesting the test. If the exposure occurs at the workplace, the employer is charged for the costs of blood tests. The County has a pre-negotiated rate for billing Medi-Cal or Medicare for the provision of Directly Observed Therapy (DOT). The declaration of Julie Higashi is attached hereto and incorporated herein by reference as though fully set forth.

4. Whether counsel is provided for TB patients free of charge or as based on an ability to pay?

The County, in reliance on the plain language of Health and Safety Code section 121366, provides a deputy Public Defender free of charge for any person subject to a detention order who requests counsel.

CERTIFICATION

The foregoing facts are known to me personally and if so required, I could and would testify to the statements made herein. I declare under penalty of perjury under the laws of the State of California that the statements made in this document are true and complete to the best of my personal knowledge and as to all matters, I believe them to be true.

Executed this 16 day of May, 2011, at San Jose, California, by:

Martha Paine

Chapter 676, Statutes of 1993, Chapter 685, Statutes of 1994, Chapter 294, Statutes of 1997, and Chapter 763, Statutes of 2002

Claim no. CSM-03-TC-14

Tuberculosis Control

Declaration of Juliana F Gmur

I, Juliana F Gmur, state as follows:

1. I am an attorney duly licensed by the State of California and have been so for 19 years. I have personal knowledge of the facts stated herein, and if called upon to testify, I could do so competently.

2. On May 13, I had an extended conversation with Bruce Pomer, executive director of the Health Officers Association of California (HOAC), a non-profit organization comprised of the Health Officers of the 58 counties and three cities, governed by a board of directors, fourteen in number, chosen from among the members. The HOAC seeks to improve the practice of public health, responds to requests for technical information from the legislature, engages in extensive research projects and may sponsor legislation.

3. Mr. Pomer explained that his organization is closely related to the California Conference of Local Health Officers (CCLHO) which is an intergovernmental, statutory body which includes members of the state in addition to the members of the HOAC. He noted that the two organizations are so close that when the president of the CCLHO steps down, he becomes the president of the HOAC for the next year.

4. Upon my prior request, Mr. Pomer had searched for their file relating to the mandate legislation. He related to me that he was unable to locate it and did not

want to rely on his memory as to any specifics regarding HOAC and the test claim legislation; save one specific recollection: that he worked extensively with the state TB controller at the time and they had had many back-and-forths over the wording of the legislation.

5. Mr. Pomer did provide an overview of how the HOAC is generally involved with legislation. He said that the generation of legislation is a collective effort. Usually the idea comes from a committee within CCLHO which identifies a public health problem. The CCLHO then takes a position on the matter and the HOAC implements it by drafting legislation.

I declare under penalty of perjury that the foregoing is true and correct as based upon my personal knowledge, information or belief, and that this declaration is executed this 16 day of May, 2011, at Clovis, California.

Tuberculosis Control

Declaration of Jenny Yelin

I, Jenny Yelin, state as follows:

1. I am an attorney, duly licensed by the State of California, and an attorney in the Office of the County Counsel for the County of Santa Clara. I have been in the employ of the County for nine months. I have personal knowledge of the facts stated herein, and if called upon to testify, I could do so competently.

2. On May 3, 2011, I reviewed the agendas for all meeting of the Santa Clara County Board of Supervisors ("Board") from January 1993 to December 1994.

3. None of the agendas I reviewed had any mention of the Health Officer's Association of California (HOAC) or the test claim legislation. According to the agendas I examined, the Board did not vote on any resolutions relating to the HOAC or the test claim legislation, and did not authorize any County entity to enter into a contract with the HOAC.

4. I have reviewed California Health and Safety Code section 121366, which states that "any person" subject to an order by a public health officer requiring the individual's detention to a health facility for tuberculosis treatment has the right to be represented by counsel. Based on information and belief, the County provides a Deputy Public Defender to represent any person subject to such a detention order who requests counsel.

I declare under penalty of perjury that the foregoing is true and correct as based upon my personal knowledge, information or belief, and that this declaration is executed this 13th day of May, 2011, at San Jose, California.

Jenny Yelin

County of Santa Clara

DECLARATION IN SUPPORT OF
RESPONSE TO REQUEST FOR ADDITIONAL INFORMATION

On Original Test Claim

Claim no. CSM-03-TC-14

Tuberculosis Control

Declaration of Julie Higashi

I, Julie Higashi, state as follows:

1. I am currently employed by the Santa Clara County ("County") Public Health Department, as a Deputy Health Officer. I am the Tuberculosis Controller for the County and I oversee the County's tuberculosis control program. I have been in the employ of the County for 3 years. I have personal knowledge of the facts stated herein, and if called upon to testify, I could do so competently.

2. The County charges fees for limited services it provides as part of its tuberculosis control program.

3. When members of the public request tuberculosis screening at one the clinics operated by the County's public health department, the County charges a $20 fee for a skin test.

4. For patients with suspected or confirmed cases of tuberculosis, the County does not charge any fee for skin tests or blood tests to screen for the presence of tuberculosis, nor does the County charge any fee for follow-up evaluations. If the exposure occurs at a worksite, and the County performs a blood test, we bill the employer for the cost of the test. However, if a skin test is performed, the County absorbs that cost.

5. The County also provides Directly Observed Therapy (DOT) to patients with active tuberculosis. DOT consists of monitoring patients to ensure they are taking prescribed medications and otherwise complying with their treatment recommendations. The County provides DOT to patients in the County's public health clinics, in patients' homes, or through video-conferencing. DOT can require patient visits as many as five times per week.

6. When tuberculosis patients receiving DOT are Medi-Cal or Medicare eligible, the County bills Medi-Cal or Medicare for DOT services, at a pre-negotiated daily rate. For all other patients receiving DOT (uninsured and privately insured patients), the County fully absorbs the cost of providing DOT. The County does not receive reimbursement from any private insurance providers for providing DOT.

7. The County also incurs substantial costs when a TB patient is subject to a civil detention for failure to comply with a prior order of the TB Officer.

I declare under penalty of perjury that the foregoing is true and correct as based upon my personal knowledge, information or belief, and that this declaration is executed this13th day of May, 2011, at San Jose, California.

TUBERCULOSIS CONTROL

03-TC-14

County of Santa Clara, Claimant

EXECUTIVE SUMMARY

Overview

This test claim addresses the activities required of local detention facilities and local health officers (LHOs) relating to tuberculosis (TB) control. Eligible claimants for state-mandated costs imposed on LHOs include counties and the following specified cities: Berkeley, Long Beach, and Pasadena. Eligible claimants for state-mandated costs imposed on local detention facilities include all cities and counties with local detention facilities as defined by Penal Code section 6031.4. Although the test claim statutes also impose duties on health care providers, health facilities, and outpatient clinics, those activities will not be discussed in this analysis because the claimant has not requested reimbursement for those activities. [1]

Procedural History

This test claim was filed with the Commission on State Mandates (Commission) on September 26, 2003. Between 2003 and 2004, the Department of Health Services (DHS)[1] requested and received multiple extensions to file comments on the test claim. The Commission received comments on the test claim from the claimant, DHS, and Department of Finance (DOF). Commission staff requested additional information from the claimant, the Department of Public Health (DPH), and other parties and interested parties on April 18, 2011. On May 2, 2011, the Department of Public Health (DPH), which is now the state agency with responsibility for the TB control program, submitted a response to the request for additional information. On May 16, 2011, claimant submitted a response to the request for additional information.

[1] At the time this claim was filed, DHS was the department with responsibility for TB control. Under current law, the Department of Public Health (DPH) is tasked with TB control.

Positions of the Parties and Interested Parties

Claimant's Position

Claimant alleges that the test claim statutes impose the following activities which are new and reimbursable under article XIII B, section 6 of the California Constitution and which can generally be categorized as follows:

- Increased paperwork for the LHO and staff that must be reviewed, created, drafted, transmitted, maintained, and in the case of an LHO order to detain, served by the LHO and staff;
- LHO and staff preparation and appearance at hearings to obtain court orders and detain;
- Increased paperwork that must be reviewed, created, drafted, transmitted, and maintained by local detention facilities for purposes of releasing or transferring TB patients;
- Housing, detaining, transporting, and following up on TB patients;
- Counsel's review of legal forms, service of documents, and preparation for and appearance at hearings for court orders for detention and representation of detainees; and
- Drafting, reviewing, and establishing policies, procedures, forms, and protocols, and the training to comply with the above-stated requirements.

Department of Finance's Position

DOF states that the claimant has identified a number of new activities related to the manner in which LHOs manage and control the spread and treatment of TB which it asserts are new and reimbursable mandates. If the Commission reaches the same conclusion, the nature and extent of the specific activities required can be addressed in the parameters and guidelines. DOF notes that it expects the county to be very specific regarding the activities necessary to comply with the test claim statutes since they were effective nearly ten years prior to the test claim filing.

Department of Health Services' Position

DHS was the state agency responsible for TB control when this test claim was filed. DHS contends that this test claim should be denied because:

- Many of the statutory requirements predate January 1, 1975;
- Claimant, through the Health Officer's Association of California (HOAC), requested the test claim legislation. HOAC was the sponsor of AB 803, Statutes 1993, chapter 676 and also sponsored three of the subsequent amendments of the test claim legislation. HOAC's request should be imputed to its member counties under Government Code section 17556;
- The due process rights required by the test claim statutes were declared existing state law (Art. 1 §7(a) of the California Constitution) and federal law (Fifth and Fourteenth Amendments of the United States Constitution) by action of the courts;

- The non-criminal detention proceedings are discretionary and thus the hearing costs for such proceedings do not impose a state-mandated new program or higher level of service; and
- Offsetting savings may result in no net cost, for example: the option of outpatient treatment instead of confinement in a facility, as required under prior law; the reduction in the number of TB examinations required to be performed by the LHO; Medi-Cal or Medicare subsidized examinations for eligible beneficiaries; reduced exposure to monetary damages resulting from violation of due process rights.

DHS further argues that if the Commission does find there is a "new program or higher level of service," costs to the local agency are reduced because the State has provided instructions, model documents, and materials both in hard copy and on-line.

Department of Public Health's Position

DPH has replaced DHS as the state agency responsible for the TB control program. DPH reasserts the arguments made by DHS discussed above including the argument that the "activities described in the test claim statutes predate January 1, 1975" and adds a description of the state funding provided to the counties and specified cities for TB control activities.

Commission Responsibilities

Under article XIII B, section 6 of the California Constitution, local governments and school districts are entitled to reimbursement for the costs of state-mandated new programs or higher levels of service. In order for local governments or school districts to be eligible for reimbursement, one or more similarly situated local governments or school districts must file a test claim with the Commission. "Test claim" means the first claim filed with the Commission alleging that a particular statute or executive order imposes costs mandated by the state. Test claims function similarly to class actions and all members of the class have the opportunity to participate in the test claim process and all are bound by the final decision of the Commission for purposes of that test claim.

The Commission is the quasi-judicial body vested with exclusive authority to adjudicate disputes over the existence of state-mandated programs within the meaning of article XIII B, section 6. In making its decisions, the Commission cannot apply article XIII B as an equitable remedy to cure the perceived unfairness resulting from political decisions on funding priorities.[2]

Claims

The following chart provides a brief summary of the claims and issues raised by the claimant and staff's recommendation.

[2] *City of San Jose v. State of California* (1996) 45 Cal.App.4th 1802.

Claim	Description	Issues	Staff Recommendation
Health and Safety Code sections 121361 and 121362	Require: (1) local detention facilities to submit notice and other information to the LHO; and (2) LHOs to review written treatment plans submitted by health facilities and coordinate with parole agents and officials.	Claimant alleges these code sections impose state-mandated costs.	*Approved*: The requirements imposed on local detention facilities and LHOs by the plain language of these sections impose reimbursable state-mandated costs on counties and specified cities.[3]
Health and Safety Code section 121363	Imposes requirements on public and private health care providers who treat TB patients.	Claimant alleges this code section imposes state-mandated costs.	*Denied*: The plain language of section 121363 does not impose any requirements on the LHO.
Health and Safety Code section 121364	Authorizes LHOs to issue written orders for examination.	Claimant alleges this code section imposes state-mandated costs.	*Denied*: Prior law required the LHO to issue orders for examination in writing and serve them on the person named in the order.
Health and Safety Code section 121365	Authorizes the LHO to issue *any* order necessary to protect the public health including several specified orders.	Claimant alleges this code section imposes state-mandated costs.	*Denied*: Much of the authority granted by this section is not new and the new authority does not mandate a new program or higher level of service.
Health and Safety Code sections, 121366, 121367, 121368, and 121369	Impose numerous federal due process and federal statutory protections upon orders issued under section 121364 or 121365	Claimant alleges these code sections impose state-mandated costs.	*Partially Approved*: The requirement to provide counsel to non-indigent persons subject to orders of detention issued under section 121365 imposes reimbursable state-mandated costs.

Analysis

Staff finds that Health and Safety Code sections 121361 and 121362 impose a new program or higher level of service on counties and specified cities for the following activities only:

- For local detention facilities to:
    - Submit notification and a written treatment plan that includes the information required by Health and Safety Code section 121362 to the LHO when a person with active TB or reasonably believed to have active TB is discharged or released from the detention facility; and

[3] The activities imposed by section 121361 and 121362 on health care providers, health facilities, and outpatient clinics (which were not claimed) are not unique to government but apply generally to all health facilities, public and private. This issue will not be included in this analysis because it was not pled in the test claim.

- When a person with active TB or reasonably believed to have active TB is transferred to a local detention facility in another jurisdiction, submit notification and a written treatment plan that includes the information required by Health and Safety Code section 121362 to the LHO and the medical officer of the local detention facility receiving the person.

- For LHOs to:
  - Review for approval within 24 hours of receipt only those treatment plans submitted by a health facility; and
  - Notify the medical officer of a parole region or a physician or surgeon designated by the Department of Corrections when there are reasonable grounds to believe that a parolee has active TB and ceases treatment for TB.[4]

Staff finds that the alleged activity to "prepare a written treatment plan" does not impose a new program or higher level of service because the law in effect immediately prior to the enactment of the test claim statutes required local detention facilities to prepare written treatment plans for inmates. However, staff finds that the mandated activities, bulleted above, when compared with the legal requirements in effect immediately before the enactment of the test claim statutes, are new and were first enacted by Statutes 1993, chapter 676, Statutes 1994, chapter 685 and Statutes 2002, chapter 763. In addition, these bulleted activities are unique to government because, by definition, only local governments have LHOs and local detention facilities which imprison inmates and these requirements are imposed on those entities.[5] Moreover, the activities provide a governmental service to the public by preventing the spread of TB.

However staff finds that the plain language of section 121363[6] does not require LHOs to perform any activities. In addition, the requirements of Health and Safety Code section 121364[7] were required under pre-1975 law and so are not new. Similarly, Health and Safety Code section

---

[4] With the exception of preparing the written treatment plans, the other activities requested by the claimant pursuant to sections 121361 and 121362 may be considered during the adoption of the parameters and guidelines. The Commission's regulations allow the Commission to consider and include activities in the parameters and guidelines that are reasonably necessary to comply with the mandated activities if there is substantial evidence in the record to support the finding. (Cal. Code Regs., tit. 2, § 1183.1(a)(4).)

[5] This case is distinguishable from *County of Los Angeles v. State of California*, *supra*, 43 Cal.3d 46, since even though health care providers have similar requirements they do not have the responsibility to house and provide medical care to inmates.

[6] (Originally section 3283) as added by Statutes 1993, chapter 676, amended by Statutes, 1994, chapter 65, repealed, renumbered, and reenacted as current section 121363 by Statutes 1995, chapter 415.

[7] (Originally former section 3284) as added by Statutes 1993, chapter 676; amended by Statutes 1994, chapter 685; and repealed, renumbered and reenacted as 121364 by Statutes 1995, section 415.

121365[8] requires LHOs to investigate cases of TB; prevent the spread of the disease; issue orders for exams, detention, and isolation in writing; and serve the person named in the order. However, these activities have been required since at least 1957 and are not new. In addition, the new orders authorized by section 121365 implement the requirements of federal law and thus do not mandate a new program or higher level of service.

Staff finds that the Health and Safety Code section 121366 requirement to provide counsel to non-indigent people subject to orders of detention imposes a new program or higher level of service since it is new and is not required by federal due process or other federal laws. However, with the exception of that requirement, staff finds that Health and Safety Code sections 121366-121369,[9] implement the due process and other procedural protections of the 14th Amendment to the Constitution of the United States; article 1, section 14 of the California Constitution; and the federal Rehabilitation Act, and Americans with Disabilities Act (ADA). Therefore, the remaining requirements of sections 121366-121369 are federal mandates and requirements of existing law and do not mandate a new program or higher level of service within the meaning of article XIII B, section 6 of the California Constitution.

Staff also finds that there are costs mandated by the state within the meaning of article XIII B, section 6 and Government Code section 17514 for the activities that mandate a new program or higher level of service, which may be partially offset by revenues generated through fee authority. With respect to the issue of costs mandated by the state, staff finds that:

1. There is no evidence in the record to support a finding that the claimant requested the test claim legislation within the meaning of Government Code section 17556(a), as argued by the Departments of Health Services and Public Health.
2. The State provides substantial funding for TB control, but it is not authorized for use for the state-mandated activities.
3. Claimant has fee authority for the test claim activities, but the fee authority is subject to the voter approval limitations of Proposition 218. Thus, the fee authority cannot be used to deny the claim pursuant to Government Code section 17556(d), but may be identified as offsetting revenue in the parameters and guidelines.

Conclusion and Staff Recommendation

Staff concludes that Health and Safety Code sections 121361 and 121362 and 121366 as added or amended by Statutes 1993, chapter 676, Statutes 1994, chapter 685, Statutes 1997, chapter 116, and Statutes 2002, chapter 763 mandate a new program or higher level of service for counties and cities and within the meaning of article XIII B, section 6 of the California Constitution, and impose costs mandated by the state pursuant to Government Code section

[8] (Originally former section 3285) as amended by Statutes 1993, chapter 676 and Statutes 1994, chapter 685 and repealed, renumbered and reenacted as 121365 by Statutes 1995, section 415.

[9] (Originally sections 3285.1-3285.4) as added by Statutes 1993, chapter 676 and amended by Statutes 1994, chapter 685, and repealed, renumbered, and reenacted as sections 121366-121369 by Statutes 1995, chapter 415.

17514, subject to the offsetting revenues described in the analysis below, only for the following activities:

- For local detention facilities to:
    - Submit notification and a written treatment plan that includes the information required by Health and Safety Code section 121362 to the LHO when a person with active TB or reasonably believed to have active TB is discharged or released from the detention facility; and
    - When a person with active TB or reasonably believed to have active TB is transferred to a local detention facility in another jurisdiction, submit notification and a written treatment plan that includes the information required by Health and Safety Code section 121362 to the LHO and the medical officer of the local detention facility receiving the person.
- For LHOs to:
    - Review for approval within 24 hours of receipt only those treatment plans submitted by a health facility; and
    - Notify the medical officer of a parole region or a physician or surgeon designated by the Department of Corrections when there are reasonable grounds to believe that a parolee has active TB and ceases treatment for TB.[10]
- For counties or specified cities to provide counsel to non-indigent TB patients who are subject to an order of detention.[11]

Staff further concludes that all other statutes pled in this claim do not constitute reimbursable state-mandated programs.

Staff Recommendation

Staff recommends the Commission adopt this staff analysis and partially approve this test claim.

[10] With the exception of preparing the written treatment plans, the other activities requested by the claimant pursuant to sections 121361 and 121362 may be considered during the adoption of the parameters and guidelines. The Commission's regulations allow the Commission to consider and include activities in the parameters and guidelines that are reasonably necessary to comply with the mandated activities if there is substantial evidence in the record to support the finding. (Cal. Code Regs., tit. 2, § 1183.1(a)(4).)

STAFF ANALYSIS

Claimant

County of Santa Clara

Chronology

9/26/2003	Claimant, County of Santa Clara, filed the test claim with the Commission on State Mandates ("Commission")[12]
10/07/2003	Commission staff issued a completeness review letter for the test claim and requested comments from state agencies
11/03/2003	Department of Finance (DOF) submitted comments on the test claim
2/05/2004	Claimant submitted a response to DOF's comments on test claim
2/22/2004	Department of Health Services (DHS) requested an extension to file comments on test claim
2/25/2004	The Commission granted DHS an extension to March 26, 2004
3/26/2004	DHS requested an extension to file comments on test claim
4/08/2004	The Commission granted DHS an extension to May 25, 2004
5/21/2004	DHS requested an extension to file comments on test claim
5/26/2004	The Commission granted DHS an extension to June 24, 2004
6/14/2004	DHS requested an extension to file comments on test claim
6/29/2004	The Commission granted DHS an extension to July 26, 2004
7/26/2004	DHS requested a 60-day extension to file comments on test claim
7/27/2004	The Commission granted DHS an extension to August 25, 2004
8/25/2004	DHS submitted comments on the test claim
4/18/2011	Commission staff issued a request to parties, interested parties and affected state agencies for additional information
5/02/2011	Department of Public Health (DPH) submitted a response to the request for additional information
5/03/2011	Claimant requested an extension to submit a response to the request for additional information
5/04/2011	The Commission granted claimant an extension to May 16, 2011
5/16/2011	Claimant submitted a response to the request for additional information

[12] Based on the filing date of September 23, 2003, the period of reimbursement for this test claim begins on July 1, 2002.

I. Introduction

This test claim addresses the activities required of local detention facilities[13] and local health officers[14] (LHOs) relating to tuberculosis (TB) control. Eligible claimants for state-mandated costs imposed on LHOs include counties and the following specified cities: Berkeley, Long Beach, and Pasadena.[15] Eligible claimants for state-mandated costs imposed on local detention facilities include all cities and counties with local detention facilities as defined by Penal Code section 6031.4. Although the test claim statutes also impose duties on health care providers, health facilities,[16] and outpatient clinics, those activities will not be discussed in this analysis because the claimant has not requested reimbursement for those activities.[17] Finally, duties are imposed on state correctional facilities and state parole agents and officials, but those duties are not imposed on local government and will not be addressed.

Tuberculosis (TB) is a contagious disease that is transmitted through the air from one person to another by tiny infectious airborne particles expelled when a person with active TB coughs, sneezes, or talks.[18] Anyone inhaling the air containing these particles may become infected. In most people, the immune system keeps the TB bacteria in check, so the person infected does not

---

[13] A "local detention facility" is a jail or other local penal institution and is defined by Penal Code section 6031.4. Private penal institutions are excluded from the definition of "local detention facility."

[14] A local "health officer," as used in the Communicable Disease Prevention and Control Act includes county, city, and district health officers, and city and district health boards, but does not include advisory health boards. (Health & Saf. Code § 120100.)

[15] References in this analysis to "specified cities" mean the cities of Berkeley, Long Beach, and Pasadena. Fifty-eight counties have LHOs as do the three cities of Berkeley, Long Beach, and Pasadena. Note that cities are required to appoint a LHO except when the city has conferred the powers and duties of the City LHO on the County LHO. (Health & Saf. Code § 101460.) The three cities of Berkeley, Long Beach, and Pasadena are currently the only cities which have not conferred the powers and duties on the county LHO.

[16] A "health facility" is "any facility, place or building that is organized, maintained, and operated for the diagnosis, care, prevention, and treatment of human illness, physical or mental, including convalescence and rehabilitation and including care during and after pregnancy, or for any one or more of these purposes, for one or more persons, to which the persons are admitted for a 24-hour stay or longer . . ." (Health & Saf. Code § 1250.) Both public and private facilities are included in this definition.

[17] The activities imposed on public and private health care providers, health facilities and outpatient clinics arguably do not impose a program subject to reimbursement under article XIII B, section 6 of the California Constitution because they are not unique to government. See *County of Los Angeles v. Department of Industrial Relations* (1989) 214 Cal. App.3d 1538, 1545 (holding "[p]roviding elevators equipped with fire and earthquake safety features simply is not 'a governmental function of providing services to the public' and 'does not impose a unique requirement on local government'").

[18] California Department of Public Health (DPH), Fact Sheet, Tuberculosis Control Branch, March 2008, p. 1.

feel sick and cannot spread TB to others. This is known as latent TB infection. If untreated, the latent TB bacteria can become active and cause TB disease. If active TB develops, TB bacteria attack the lungs or other parts of the body. It usually takes six months of treatment to cure the disease, which helps to ensure that the patient does not die or remain infectious and spread TB to others. Multi drug-resistant TB, active TB caused by bacteria resistant to our most powerful drugs, is much more difficult and costly to treat and can be incurable. Extensively drug-resistant TB is from strains of TB resistant to most, if not all, available treatment, may be impossible to treat, and has a high mortality rate.[19]

California reports the most TB cases of any state, 21 percent of the nation's total.[20] A total of 2,472 new cases of TB were reported in California in 2009.[21] Roughly nine percent of California TB patients have died with TB each year over the past decade.[22] California also reports the most multi-drug resistant TB cases of any state, and one or two cases of virtually untreatable, extensively drug resistant strains of TB have been reported each year in California since 2000.[23]

A. Overview of California Tuberculosis Control Law

California has had TB control laws since the early 1900s. In 1957, the law was amended to give local health departments lead responsibility for TB control.[24]

1. Powers and Duties of Department of Public Health (DPH)

DPH has a range of responsibilities for communicable disease, including TB control. Mandatory duties include examining the causes of communicable diseases, establishing a list of reportable diseases (of which TB is one), acting as the lead agency for TB response, working with local health departments to identify detention sites, and maintaining a program for the control of TB.[25] DPH also has discretion to advise LHOs; adopt regulations about isolation and quarantine; and require inspection, disinfection, isolation, or quarantine when necessary to protect the public health.[26] The TB control statutes place DPH in an administrative, supervisory, and support role, leaving the bulk of the on-the-ground work to local health departments. Specifically, the statutes require DPH to maintain a TB control program and state that DPH is the "lead agency" for all TB control and prevention activities at the state level.[27]

[25] Health and Safety Code sections 120125, 120130, 121357, 121358(b), and 121350.

[26] Health and Safety Code sections 131080, 120130, and 120145.

[27] Health and Safety Code sections 121350 and 121357.

2. Powers and Duties of Local Health Officers

LHOs bear primary responsibility for TB control in California. An LHO is a city or county physician required by California law to oversee public health.[28] LHO duties vary by city and county, according to local ordinance; some act as the head of the county health department, others work within the department. However, all LHOs are ultimately responsible for ensuring that California's public health laws are implemented locally. Each county is required to have an LHO, and cities are required to appoint an LHO except when the city has conferred the powers and duties of the city LHO on the county LHO.[29] The three cities of Berkeley, Long Beach, and Pasadena are currently the only cities which have not conferred the powers and duties on the county LHO.

With regard to prevention of the spread of disease, including TB, California law has long provided:

> Each [LHO] knowing or having reason to believe that any case . . . exists, or has recently existed, within the territory under his or her jurisdiction, shall take such measures as may be necessary to prevent the spread of the disease or occurrence of additional cases.[30]

Thus, while LHOs are charged with mandatory duties, they are also granted substantial discretionary authority to protect the public health. Health and Safety Code section 121365 requires LHOs to use every available means to investigate reported or suspected cases of active TB in their jurisdiction. Under Health and Safety Code section 121364, LHOs have discretion to perform compulsory examinations of persons they have reasonable grounds to believe are at heightened risk of TB exposure. Moreover, under section 121365 they have broad discretionary authority to issue *any order* deemed necessary to protect the public health or the health of any individual, including but not limited to the following specified orders:

- Of detention for purposes of examination;
- To complete a prescribed course of medication and if necessary, to follow infection control precautions;
- To follow a course of directly observed therapy (DOT) (if an active TB patient is unable or unwilling to complete a prescribed course of medication);
- Of detention in a health or other treatment facility if a person is substantially likely to have infectious TB and to transmit the disease;
- Of detention in a health or other treatment facility if (1) a person has active TB and shows no evidence of having completed treatment and (2) there is a substantial likelihood, based on past or present behavior, that the patient cannot be relied upon to complete treatment and follow infection control precautions;

[29] See Health and Safety Code section 101460.

[30] See Health and Safety Code section 120175 (Former Health and Safety Code section 3110 added by Statutes 1957, chapter 205 and repealed, renumbered and reenacted as section 120175 by Statutes 1995, chapter 415).

- For the exclusion from attendance at the workplace; and
- For home isolation.

3. Powers and Duties of Health Care Providers and Health Facilities

For purposes of background only, public and private health care providers and health facilities also have TB control related duties under the TB control statutes. Health care providers have a mandatory duty to report to the LHO (1) when they encounter a suspected or actual active TB patient and (2) when the patient ceases treatment for TB.[31] They have a mandatory duty to maintain written documentation of an active TB patient's adherence to an individual treatment plan.[32] In addition, a health care provider who treats an active TB patient is required either to examine all household contacts or refer them to the LHO for examination.[33] Finally, health facilities have a duty not to discharge or release a suspected or actual active TB patient until a written treatment plan has been approved by the LHO.[34]

4. Constitutional and Statutory Limits on the Powers and Duties of TB Control Professionals

The powers and duties of TB control professionals in California have the potential to infringe on a patient's constitutional rights. For example, an isolation or detention order may interfere with a TB patient's liberty interests. Liberty is a fundamental right under the United States and California Constitutions. The United State Supreme Court has held that a civil commitment for any purpose constitutes a significant deprivation of liberty that requires due process protection.[35] The analysis discusses these issues, as well as other federal statutory protections, with respect to the test claim requirements.

a. Contents of Health Orders

The test claim statutes require that any TB control related health order must state the legal authority on which the order was based.[36] In addition, it must include an individualized assessment of the person's situation or behavior that justifies the order and either (1) the less restrictive alternatives that were attempted and were unsuccessful or (2) the less restrictive alternatives that were considered and rejected, and why they were rejected.[37]

[31] Health and Safety Code section 121362.

[32] *Ibid*.

[33] Health and Safety Code section 121363.

[34] Health and Safety Code section 121361.

[35] *Addington v. Texas* (1979) 441 U.S. 418, 425. Note that there are hundreds of state and federal cases holding that the liberty interest is a fundamental right and is protected by the due process requirements of the fifth and fourteenth amendments to the United State Constitution. *Addington* is but one example and others will be discussed in the analysis below.

[36] Health and Safety Code section 121367(a).

[37] Health and Safety Code section 121367.

b. Special Civil Detention Procedures

An LHO has the authority to detain a TB patient without prior court authorization under Health and Safety Code section 121365, but sections 121366, 121367, and 121368 codify the following rights of detainees:

- Upon a detainee's request, the LHO must apply for a court order authorizing continued detention within 72 hours of the request.
- Whether or not a detainee makes a request, a court order is required for detentions of more than 60 days.
- The LHO must seek further court review of a detention within 90 days of the initial court order and within 90 days of each subsequent court review.
- Where a court order is required, the LHO must prove the necessity of the detention by "clear and convincing" evidence.
- A person subject to detention has the right to counsel and to have counsel provided upon request.
- Orders must advise detainees of their rights regarding release requests, court orders, court review, and legal representation.
- Orders must be in writing and contain: the purpose of the detention; the legal authority under which the order is issued; an individualized assessment of the detainee's circumstances or behavior that is the basis for the order; and the less restrictive treatment alternatives that were unsuccessfully attempted or considered and rejected, and the reasons the alternatives were rejected.
- Orders must be accompanied by a separate notice that explains the detainee's right to request release; lists the phone number the detainee may call to request release; explains the detainee's right to counsel; and informs the detainee that, at the detainee's request, the LHO will notify two individuals of the detention.
- A detainee may only be detained for the amount of time necessary to fulfill the purpose of the detention.

c. Location of detention

Health and Safety code section 121358(a) provides that "individuals detained through the tuberculosis control, housing, and detention program shall not reside in correctional facilities."

d. Interpreters

Health and Safety Code section 121369(a) specifies that "language interpreters and persons skilled in communicating with vision and hearing impaired individuals shall be provided" for the purposes of executing TB related investigations and orders. Though the law does not specifically require health orders to be translated in writing, the translation of health orders (either orally or in writing) for non-English speakers is required.

e. Involuntary Treatment

With regard to compulsory testing and treatment, Health and Safety Code Section 121369(b) provides that nothing in sections 121365, 121366, or 121367 "shall be construed to permit or

require the forcible administration of any medication without a prior court order." Sections 121365(b) and (c) authorize orders requiring active TB patients to complete a course of medication or undergo directly observed therapy, with the caveat that the section "does not allow the forcible or involuntary administration of medication." Section 121365(a) authorizes LHOs to order the detention of patients for examination, but the section explicitly "does not authorize the [LHO] to mandate involuntary anergy testing."[38]

f. Religious Exemption

Since 1957, the law has provided, with limited exception, "no examination or inspection shall be required of any person who depends exclusively on prayer for healing in accordance with the teachings of any well recognized religious sect, denomination, or organization and claims exemption on that ground."[39] [40] Moreover, such person "shall not be required to submit to any medical treatment, or to go to or be confined in a hospital or other medical institution; provided, he or she can be safely quarantined and/or isolated in his or her own home or other suitable place of his or her choice."[41]

g. Criminal Sanctions for Failure to Comply With TB Health Orders

Failure to comply with a TB health order is a misdemeanor under Health and Safety Code section 120280 punishable by a fine and/or imprisonment in the county jail for a period of up to one year. Civil and criminal detainees are subject to different standards of due process and different types of confinement.

Health and Safety Code section 121365 specifies what must be done in response to noncompliance with TB control related orders. The LHO is required to report violations of section 121365 orders to the district attorney.[42] Upon receipt of a report, the district attorney is required to prosecute violations of section 121365 and is required to prosecute violations of other orders, if requested by the LHO.[43] If a persistently nonadherent active TB patient is convicted of a misdemeanor for failing to comply with a section 121365 order, the court may order the

---

[38] "Anergy testing" is an additional test performed on HIV-infected or otherwise immune-compromised patients who test negative for TB, but are at high risk for infection with TB. Because the TB test relies upon the patient's immune response, it can result in false negatives for immune-compromised patients.

[39] Health and Safety Code section 121370.

[40] See Health and Safety Code section 3286, Statutes 1957, chapter 205, repealed, renumbered as Health and Safety Code section 121370, and reenacted by Statutes 1995, chapter 415.

[41] *Id.* Courts have ruled that states are not constitutionally obliged to offer religious exemptions under the United States Constitution. See, e.g., *Prince v. Massachusetts* (1944) 321 U.S. 158, p.p. 166-167; *Boone v. Boozman* (E.D. Ark. 2002) 217 F. Supp. 2d 938. Staff found no case law regarding whether such an exemption is required under the California Constitution. Nonetheless, the California Legislature has provided the exemption to those belonging to "well recognized" religions since before 1957 and so those exemptions are not new.

[42] Health and Safety Code section 121365.

[43] Health and Safety Code section 120300.

offender to be confined for up to one year.[44] Section 120280 states that the confinement may take place in "any appropriate facility, penal institution, or dwelling approved for the specific case by the [LHO]." As an alternative to confinement, the court may place the offender on probation for up to two years upon condition that the offender complies with the 121365 order.[45] The court can terminate probation and order the confinement of an offender who violates the terms of probation.[46]

5. Funding for TB Control

California law has long authorized state funding to counties for treatment of TB patients.[47] The 1994 Budget Act contained $17,418,000 to fund the Governor's Initiative to implement the Strategic Plan for Control and Elimination of Tuberculosis in California, portions of which were implemented through AB 803 and AB 804.[48] The state appears to have continued to appropriate funds in various amounts for tuberculosis control activities since that time. Health and Safety Code Sections 121350, 121355, 121357, 121380, 121390, 121450, 121455, and 121460 authorize the TB "subvention program" and charge DPH with establishing standards and procedures with which to condition the awarding of funds. In 2009, a new multi-variable funding formula modeled after the national TB allocation formula was developed by DPH in collaboration with the California Tuberculosis Controllers Association.[49] Based on information received from claimant, claimant received $4,579,366 from the state for TB control related activities for 2010 and claimant absorbed the remaining $565,066 of its TB control related costs.[50] This funding is discussed in greater detail in the analysis below under the issue of whether the new program or higher level of service imposes costs mandated by the state.

B. The Legislative History of California Tuberculosis Control Law

1. Early TB Control Laws

California has had TB control laws since the early 1900s. In 1957, the law was amended to give local health departments lead responsibility for TB control.[51] It required LHOs to investigate suspected TB cases[52] and directed them to examine persons reasonably suspected of active TB

and isolate or quarantine active cases when necessary to protect public health.[53] The required procedure for doing so was to serve a written examination, quarantine, or isolation order on the person containing: "the name of the person to be isolated, the period of time during which the order would remain effective, the place of isolation or quarantine, and such other terms as may be necessary to protect the public health."[54] As under current law, there was no statutory requirement for the LHO to apply to court for civil enforcement of an order.[55] However, if a person violated a quarantine or isolation order, the LHO was required to notify the district attorney.[56] The district attorney was required to prosecute the alleged violation.[57] Violation of an examination or isolation order was a misdemeanor, punishable by confinement until compliance with the order but for no longer than six months.[58] California law has authorized state funding to counties for treatment of TB patients since at least 1915.[59] The 1957 law required the state health department to lease "any facilities it deems necessary to care for persons afflicted with active contagious tuberculosis who violate the quarantine or isolation orders of the [LHO]," with the cost of care in state leased facilities deducted from the county subsidy.[60]

2. 1993 Amendments: AB 803 (Gotch)

In 1992, a California TB Elimination Task Force was convened by DHS, the California Conference of Local Health Officers[61] (CCLHO), the California Tuberculosis Controllers Association, and the American Lung Association of California. TB incidence had increased significantly in the United States in the 1980s, and there was a prevailing sense that California needed to redouble its TB control efforts. Additionally, the courts required that TB patients receive procedural due process protections not unlike those afforded mentally ill persons.[62] In 1994, the task force released a Strategic Plan for Tuberculosis Control and Elimination with a

[53] Health and Safety Code section 3285 (Statutes 1957, chapter 205).

[54] Health and Safety Code section 3285 (Statutes 1957, chapter 205 and Statutes 1993, chapter 676).

[55] Compare Health and Safety Code section 3285(f) (Stats. 1957, ch. 205 and Stats. 1993, chapter 676) with section 121365 (Stats.1995, ch. 415).

[56] Health and Safety Code section 3285 (1957).

[57] Health and Safety Code section 3355 (1957 & 1993).

[58] Health and Safety Code section 3351 (1957 & 1993).

[59] See *County of Sacramento v. Chambers* (1917) 33 Cal.App. 142 (finding that a state subsidy to counties for TB treatment was not an unconstitutional transfer of a state function to a local government or a gift of public funds).

[60] Health and Safety Code section 3295 (1957). Current law, Health and Safety Code section 121390 requires DPH to lease the facilities it deems necessary for persons convicted of a section 120280 misdemeanor (3295 was repealed, renumbered and reenacted by Statutes 1995, chapter 415).

[61] The membership of CCLHO includes the 61 California LHOs: one from each of the 58 counties and one each from the three cities of Berkeley, Long Beach, and Pasadena.

[62] See, e.g., *Newark v. J.S.* (N.J. Super. Ct. Law Div. 1993) 652 A.2d 265.

number of recommendations for improving TB control in California. AB 803 and AB 804 (collectively referred to as the Gotch legislation) implement the plan and were sponsored by the Health Officers Association of California (HOAC) and supported by CCLHO and the American Lung Association of California.[63]

AB 803 added the due process and other federal law protections relating to TB orders and detention that, with minor modifications, are a key feature of the current statute. While authorizing LHOs to detain persons without a court order, the bill also included a provision, new to California law, authorizing LHOs to apply to court for civil enforcement of TB orders.

Thus, AB 803 provided LHOs a range of enforcement options. The Assembly Committee on Health analysis of AB 803 indicated that the intent was to establish a procedure "more in tune with current civil rights expectations that allow for gradually more restrictive measures for persistently nonadherent patients who threaten to spread infection because they do not respond to specific treatment orders. . . ."[64] The Assembly Ways and Means Committee analysis stated that the new procedures for enforcement would generate savings by "preventing the use of misdemeanor penalties and incarceration in jail." The bill also amended the reporting obligations of local detention facilities and the authority and responsibility of DHS (now DPH) and LHOs with respect to prisoners with TB.

3. 1994 Clean-up Legislation: AB 804 (Gotch)

AB 804 was introduced at the same time as AB 803 and was enacted in September 1994. HOAC sponsored and CCLHO supported it. AB 804 clarified the law enacted by AB 803 by: (1) allowing the transfer of TB patients without prior approval of treatment plans, to a general acute care hospital when an immediate need for higher care is required, or from any health facility to a state correctional institution; and (2) requiring that treatment plans for patients being discharged from a health facility be reviewed by the LHO within 24 hours from the time of receipt.

4. 1995 Reorganization of the Health and Safety Code

SB 1360, Statutes 1995, chapter 415 repealed, reorganized, renumbered, and reenacted the Health and Safety Code including the pre-1975 Health and Safety Code sections included in this test claim.

5. 1997 Amendments Shielding Health Care Providers From Civil and Criminal Liability; Prohibiting Housing TB Patients, Other Than Criminal Offenders, in Correctional Facilities; and Requiring Identification of a Site in Each Jurisdiction to House Recalcitrant TB Patients

Senate Bill 362, Statutes 1997, chapter 116, added a provision to Health and Safety Code section 121361 specifying that no health facility that declines to discharge, release, or transfer a person pursuant to section 121361 shall be civilly or criminally liable or subject to administrative sanction as a result if the health facility complies with section 121361 and acts in good faith.

Senate Bill 391, Statutes 1997, chapter 294 added section 121358 to the Health and Safety Code prohibiting housing TB Patients, other than criminal offenders, in correctional facilities and

[64] Assembly Committee on Health, Committee Analysis of AB 803, p. 3.

requiring identification of a site in each jurisdiction to house recalcitrant TB patients by January 1, 1998.

6. 2002 Amendment Permitting an LHO to Certify Unlicensed Public Health TB Workers as TB Skin Test Technicians and Requiring LHOs to Notify The Parole Agent Or Regional Parole Administrator When the LHO Has Reasonable Grounds to Believe The Parolee Has Active TB and the Parolee Ceases Treatment

Senate Bill 843, Statutes 2002, chapter 763 amended Health and Safety Code sections 121361 and 121362 and repealed and reenacted section 121360.5 to:

- Provide for certification of unlicensed TB skin test technicians as a cost-saving measure;
- Require that, in addition to the requirement in prior law to submit notice and a written treatment plan to the LHO in the county to which a parolee is being released upon discharge, a state correctional facility must submit notice to the LHO in the county that the parolee is being released from;
- Require Department of Corrections (DOC) to inform the parole agent, and other parole officials as necessary that the parolee has active or suspected active TB;
- Require the parole agent and other parole officials to coordinate with the LHO in supervising compliance with the treatment plan and notify the LHO if the parole is suspended because the parolee absconded from supervision; and
- Change the requirement that the LHO notify the medical officer of a parole region or the physician and surgeon designated by DOC when there are reasonable grounds to believe that the parolee has active TB and the parolee ceases treatment to a requirement that the LHO notify the parole agent or regional parole administrator.

II. Positions of the Parties and Interested Parties

A. Claimant's Position

Claimant alleges that the following activities are new and reimbursable under article XIII B, section 6 of the California Constitution:

Health and Safety Code sections 121361 and 121362

- Communication between LHOs, their staff, detention facility staff, and others; [65]
- Preparation of a treatment plan by medical staff of the detention facility prior to discharge, release or transfer of a TB patient; [66]
- Transmission of the treatment plan to the LHO;[67]
- LHO review of the treatment plan; [68] and

[65] Claimant, test claim, p. 5.

[66] *Ibid.*

[67] *Ibid.*

- Drafting, reviewing, and establishing policies, procedures, forms, and protocols and training to implement them for LHOs, their staff, detention facility staff, and others.[69]

Health and Safety Code section 121363

- Examination of the contacts of a TB patient by the LHO when a health care provider will not do so;[70] and
- LHO oversight of the case to ensure the contacts are reexamined properly which means increased communication between the LHO and health care providers.[71]

Health and Safety Code section 121364

- LHO preparation of written orders for examination.[72]

Health and Safety Code section 121365

- Drafting, reviewing, and establishing policies, procedures, forms, and protocols regarding LHO orders and the training to implement them for LHOs, their staff, and others; [73]
- Staff time to: locate and detain TB patients; transport them to and from places of examination and housing; ensure that TB patients remain at home or are excluded from the workplace; [74] and
- Costs of detention including but not limited to housing and use of security or law enforcement personnel.[75]

Health and Safety Code section 121366

- LHO application for court order for continued detention upon TB patient's request for release or if detention will be more than 60 days; [76]
- LHO application to the court for further review within 90 days of initial order; [77]
- Counsel for LHO and detainee;[78]

[78] *Ibid*.

- Drafting, reviewing, and establishing policies, procedures, forms, and protocols regarding this court process and training to implement them for LHOs, their staff, their counsel, counsel's staff, and counsel for the detainee such as the public defender and the public defender's staff and others;[79]
- The following activities on an expedited calendar: preparation of declarations; review of records; preparation of witnesses; assembling evidence; exchanging discovery; drafting pleadings; and, any other procedures necessary to ensure the matter is well prepared, placed on calendar, and timely heard; [80]
- Attendance of counsel for both sides at hearing and witnesses from the LHO's staff and the detainee; [81] and
- Transportation of detainee to and from court, security costs, copy costs, witness fees, and filing fees.[82]

Health and Safety Code section 121367

- Ensuring that LHO orders are in writing and include the following information: reasons for the detention, right to counsel, and right to request release from detention;[83]
- Preparing the following additional separate notices: right to counsel; right to request release; and right to have up to two individuals notified of the detention;[84]
- Reasonable efforts of the LHO to contact the individuals designated by the detainee;[85] and
- Drafting, reviewing, and establishing policies, procedures, forms, and protocols regarding LHO orders and notices and training to implement them, especially training on the proper service of legal documents, for LHOs, their staff, their counsel, counsel's staff, and others.[86]

Health and Safety Code section 121368

- Drafting, reviewing, and establishing policies, procedures, forms, and protocols regarding the situations that trigger release from detention and the training to implement them,

especially training on the proper service of legal documents, for LHOs, their staff, their counsel, counsel's staff, and others.[87]

Health and Safety Code section 121369

- Use of interpreters, when necessary;[88]
- Delegation of LHO duties to the head of medical treatment in penal institutions;[89] and
- Drafting, reviewing, and establishing policies, procedures, forms, and protocols regarding the use of interpreters and delegation of LHO duties and the training to implement them for LHOs, their staff, detention facility staff, and others.[90]

B. Department of Finance's Position

DOF states that the claimant has identified a number of new activities related to the manner in which local health officials manage and control the spread and treatment of TB which it asserts are new and reimbursable mandates.[91] If the Commission reaches the same conclusion, the nature and extent of the specific activities required can be addressed in the parameters and guidelines.[92] DOF notes that it expects the county to be very specific regarding the activities necessary to comply with the test claim statutes since the they were effective nearly ten years prior to the test claim filing.[93]

C. Department of Health Services' Position

DHS contends that this test claim should be denied because:

- Many of the statutory requirements predate January 1, 1975 and thus do not meet Government Code section 17514's definition of costs mandated by the state.[94]
- Claimant, through the Health Officer's Association of California (HOAC), requested the test claim statutes. HOAC is the separate non-profit body of the statutorily established California Conference of Local Health Officers (CCLHO). HOAC was the sponsor of AB 803, Statutes 1993, chapter 676 and also sponsored all three of the subsequent amendments of the test claim statutes that are at issue in this test claim. HOAC could not have sponsored those bills without the consent of the member counties. Therefore, HOAC's request should be imputed to its member counties under Government Code section 17556(a).[95]

[92] *Ibid*.

[93] *Ibid*.

[94] DHS, comments on the test claim, *supra*, p.1.

[95] DHS, comments on the test claim, *supra*, p.1-2.

- The due process rights required by the test claim statutes were declared existing state law (Art. 1 §7(a) of the California Constitution) and federal law (Fifth and Fourteenth Amendments to the United States Constitution) by action of the courts.[96]
- The non-criminal detention proceedings are discretionary and thus the hearing costs for such proceedings do not impose a state-mandated "new program or higher level of service" which would trigger the right to reimbursement.[97]
- Offsetting savings may result in no net cost, for example: the option of outpatient treatment instead of confinement in a facility, as required under prior law; the reduction in the number of TB examinations required to be performed by the LHO; Medi-Cal or Medicare subsidized examinations for eligible beneficiaries; reduced exposure to monetary damages resulting from violation of due process rights.[98]

If the Commission finds there is a "new program or higher level of service," costs to the local agency are reduced because the State has provided instructions, model documents, and materials both in hard copy and on-line.[99]

D. Department of Public Health's Position

DPH has replaced DHS as the state agency responsible for TB control. DPH reasserts the arguments made by DHS discussed above, including the argument that the "activities described in the test claim statutes predate January 1, 1975," and adds the following:

- The State provides an annual award of funds to jurisdictions reporting an average of six or greater cases of TB which are intended to augment, not supplant, the funding for TB control that the locals have been historically responsible for.[100]
- State funding is currently being provided by the state for requirements imposed by the test claim statutes including: "food, shelter, incentives and enabler funds reimbursement," and reimbursement for civil detention.[101]
- Eligible local jurisdictions receive one or more of the following three types of local assistance funding: base awards and housing awards which are both issued as annual awards; and civil detention awards, which are invoiced and reimbursed throughout the year on a flow basis:

[101] *Ibid*.

a. Base awards to fund staff and expenses related to completion of treatment and contact investigation are awarded annually to jurisdictions that report six or more TB cases using five-year surveillance data and are held constant for two years. Under some circumstances, they may be used for targeted testing in high risk populations in order to detect and treat latent TB. Eligible expenditures include salaries, benefits, equipment, supplies, training materials, local mileage and in state travel to TB related trainings. Jurisdictions reporting 6-19 cases receive a fixed award amount. Jurisdictions reporting 20 or more cases receive an award based on a formula that uses a five-year average of reported cases and case characteristics (e.g. homelessness, disease site, infectiousness, drug resistance).

b. Housing allocations are provided to jurisdictions with sizable TB patient populations based on historic costs of housing and related expenses for TB patients who are homeless or at-risk of homelessness. Housing allocations have two components:

   - Food, Shelter, Incentives and Enablers (FSIE) funds are used to provide services to enhance adherence, prevent homelessness, and allow the use of less restrictive alternatives to decrease or eliminate the need for detention. Eligible expenses include food, shelter, other "incentives and enablers," and personnel and costs for conducting designated activities.
   - Housing Personnel supports salaries and benefits for staff working directly with patients that are homeless, at risk of homelessness, or at risk for civil detention (e.g. outreach workers, social workers, public health nurses). Jurisdictions that do not receive a regular Housing Personnel allotment may submit requests for reimbursement. Those that do receive an allotment may submit supplemental invoices for expenses that exceed their allotment.[102]

c. Civil Detention awards from the state are provided through a regional facility in San Mateo County for unlimited use by jurisdictions that need a site to detain persistently non-adherent patients. Civil detention funds are also available to reimburse for the use of local facilities for civil detention of recalcitrant patients. Jurisdictions that opt to civilly detain recalcitrant TB patients are reimbursed for all eligible expenses submitted in accordance with the state guidance and reimbursement procedure. Consideration for reimbursement for detention is made on a case-by-case basis. Health and Safety Code section 121358(a) prohibits the use of these funds for costs of detention in correctional facilities.[103]

III. Discussion

Article XIII B, section 6 of the California Constitution provides in relevant part the following:

> Whenever the Legislature or any state agency mandates a new program or higher level of service on any local government, the state shall provide a subvention of funds to reimburse such local government for the costs of such programs or increased level of service.

[102] DPH, comments on the test claim, May 2, 2011, p. 2.

[103] DPH, comments on the test claim, May 2, 2011, p. 3.

The purpose of article XIII B, section 6 is to "preclude the state from shifting financial responsibility for carrying out governmental functions to local agencies, which are 'ill equipped' to assume increased financial responsibilities because of the taxing and spending limitations that articles XIII A and XIII B impose."[104] Thus, the subvention requirement of section 6 is "directed to state-mandated increases in the services provided by [local government] …"[105]

Reimbursement under article XIII B, section 6 is required when the following elements are met:

1. A state statute or executive order requires or "mandates" local agencies or school districts to perform an activity.[106]
2. The mandated activity either:
    a. Carries out the governmental function of providing a service to the public; or
    b. Imposes unique requirements on local agencies or school districts and does not apply generally to all residents and entities in the state.[107]
3. The mandated activity is new when compared with the legal requirements in effect immediately before the enactment of the test claim statute or executive order and it increases the level of service provided to the public.[108]
4. The mandated activity results in the local agency or school district incurring increased costs. Increased costs, however, are not reimbursable if an exception identified in Government Code section 17556 applies to the activity. [109]

The Commission is vested with exclusive authority to adjudicate disputes over the existence of state-mandated programs within the meaning of article XIII B, section 6.[110] The determination whether a statute or executive order imposes a reimbursable state-mandated program is a question of law.[111] In making its decisions, the Commission must strictly construe article XIII B,

section 6, and not apply it as an "equitable remedy to cure the perceived unfairness resulting from political decisions on funding priorities."[112]

This analysis addresses the following issues:

- Do the test claim statutes mandate a new program or higher level of service?
- Do the activities that mandate a new program or higher level of service result in increased cost mandated by the state?

A. Do the Test Claim Statutes Mandate a New Program or Higher Level of Service?

The TB control program has been in existence since shortly after the beginning of California statehood.[113] Many of the activities required by the test claim statutes are not new, since they have been constantly required since before January 1, 1975 under former Health and Safety Code sections 3000-3355.[114] These pre-1975 requirements include the requirements for LHOs to:

- "Take such measures as may be necessary to prevent the spread of any communicable disease or occurrence of additional cases;"[115]
- "Enforce orders, ordinances and statutes related to public health;[116]
- "Use every available means to ascertain the existence of, and immediately to investigate, all reported or suspected cases of [TB] in the infectious stages within his jurisdiction and to ascertain the sources of such infections;"[117]
- Make any order to examine in writing;[118]
- Make any order to isolate or quarantine in writing;[119]

[114] References to former sections 3000-3355 refer to those sections from 1957 to 1993 and not to versions that postdate the 1993 test claim legislation. Note that many of these former Health and Safety Code sections are actually renumbered and reenacted code sections that pre-dated 1957, but there is no need to trace them to their origins for purposes of mandate analysis. Many of these former Health and Safety Code sections were constantly in effect since before 1975 and were repealed, renumbered, and reenacted by Statutes 1995, chapter 415 and thus are not new.

[115] Former 3110 (Stats. 1957, ch. 205)/current section 120165.

[116] See former Health and Safety Code section 452, repealed and renumbered as 101030 by Statutes 1995, chapter 415.

[117] Compare former section 3285 (Stats. 1957, ch. 205) to current section 121365 which only changes the word "his" to "the."

[118] Former 3285(a) (Stats. 1957, ch. 205)/current section 121364.

[119] Former 3285(c) (Stats. 1957, ch. 205)/current section 121367(a)(4).

- Serve the isolation or quarantine order upon the TB patient;[120] and
- Report violations of orders issued to the district attorney in writing and include information in the LHOs possession relating to the isolation or quarantine order.[121]

Prior law also required the district attorney to prosecute all violations of former Health and Safety Code sections 3285 and 3351.[122]

1. **Requirements imposed on local detention facilities[123] and LHOs relating to notice and written treatment plans prior to the discharge, release, or transfer, or upon the discontinuance of treatment of a person known or reasonably believed to have active TB. (Health and Safety Code sections 121361 and 121362)[124]**

Health and Safety Code section 121361(a) and (e) prohibit local detention facilities from discharging or releasing from the facility a person with active TB or reasonably believed to have active TB unless notification and a written treatment plan have been received by the LHO. Section 121361(d) and (e) also prohibit a local detention facility from transferring a person with active TB or reasonably believed to have active TB to a local detention facility in another jurisdiction unless notification and a written treatment plan are received by the LHO and the chief medical officer of the detention facility receiving the person. When prior notification would jeopardize the person's health, the public safety, or the safety and security of the penal institution, then the notification and treatment plan "*shall be submitted"* within 24 hours of discharge, release, or transfer. (Emphasis added.)

Section 121361(a)(2) further requires the LHO to review for approval, within 24 hours of receipt, treatment plans submitted by a health facility.

Health and Safety Code section 121362 describes the contents of the written treatment plan to include the following information: patient name; address; date of birth; tuberculin skin test results; pertinent radiologic, microbiologic, and pathologic reports that are final or pending; updated clinical status and laboratory results at the time of discharge, release, or transfer; and any other information required by the LHO.

Section 121362 further requires the LHO to notify the medical officer of a parole region or a physician or surgeon designated by the Department of Corrections when there are reasonable grounds to believe that a parolee has active TB and ceases treatment for TB. A parolee may be

[121] Former 3285(e) (Stats. 1957, ch. 205)/current section 121365.

[122] Health and Safety Code section 3355 (as amended by Stats. 1963, ch. 278)/current section 120300.

[123] A "local detention facility" as defined by Penal Code section 6031.4 is a jail or other local penal institution. Private penal institutions are excluded from the definition of "local detention facility."

[124] Originally sections 3281 and 3282, as added by Statutes 1993, chapter 676, amended by Statutes, 1994, chapter 65, repealed, renumbered and reenacted as current section 121361 by Statutes 1995, chapter 415, amended by Statutes 1997, chapter 116, and Statutes 2002, chapter 763.

presumed to have ceased TB treatment when the parolee fails to keep an appointment, relocates without transferring care, or discontinues care.

Claimant alleges the following activities are required by Health and Safety Code sections 121361and 121362 and are new, reimbursable activities:

- "Communication between [LHOs], their staff, [local] detention facility staff and/or detention facility medical staff, and others";
- Preparation of "a treatment plan…by medical staff of the [local] detention facility prior to discharge, release or transfer of a [TB patient]";
- Transmission of the treatment plan to the LHO;
- LHO review of the treatment plan; and
- "Drafting, reviewing, and establishing policies, procedures, forms, and protocols and training to implement them for [LHOs], their staff, local detention facility staff and/or detention facility medical staff, and others."

The plain language of sections 121361 and 121362 mandate the following activities on local detention facilities and LHOs:

- Local detention facilities are mandated to:
    - Submit notification and a written treatment plan that includes the information required by Health and Safety Code section 121362 to the LHO when a person with active TB or reasonably believed to have active TB is discharged or released from the detention facility; and
    - Submit notification and a written treatment plan that includes the information required by Health and Safety Code section 121362 to the LHO and the medical officer of the local detention facility receiving the person when a person with active TB or reasonably believed to have active TB is transferred to a local detention facility in another jurisdiction,
- LHOs are mandated to:
    - Review for approval within 24 hours of receipt only those treatment plans submitted by a health facility; and
    - Notify the medical officer of a parole region or a physician or surgeon designated by the Department of Corrections when there are reasonable grounds to believe that a parolee has active TB and ceases treatment for TB.

Immediately before the enactment of sections 121361 and 121362, local detention facilities were required to prepare written treatment plans for the medical care of any inmate in need of medical care pursuant to the minimum standards for state and local correctional facilities. Title 15 of the California Code of Regulations provided the following:

> According to the procedures established by the responsible physician and the facility administrator, a pre-screen is performed on all inmates prior to housing in the living area. The pre-screening shall be performed by a medically licensed

person or trained non-medical staff per the order of the written order of the physician responsible for health care at the facility.

There shall be a written plan to provide medical care for any inmate who appears at pre-screening to be in need of medical treatment or who requests medical treatment.[125]

Therefore, staff finds that the preparation of a written treatment plan for the person with TB, as requested by the claimant, does not constitute a new program or higher level of service.

However, submitting notification and the written treatment plan upon release, discharge, or transfer to the LHO and to the medical officer of the receiving facility are new requirements. In addition, the requirements imposed on the LHO to review for approval, within 24 hours of receipt, treatment plans submitted by a health facility and to notify the medical officer of a parole region or a physician or surgeon designated by the Department of Corrections when there are reasonable grounds to believe that a parolee has active TB and ceases treatment for TB are new. These requirements are unique to local government and are intended to increase the communication between public officials to prevent the further spread of the disease.[126]

Accordingly, staff finds that Health and Safety Code sections 121361 and 121362 mandate a new program or higher level of service for following activities:

- For local detention facilities to:
    - Submit notification and a written treatment plan that includes the information required by Health and Safety Code section 121362 to the LHO when a person with active TB or reasonably believed to have active TB is discharged or released from the detention facility; and
    - Submit notification and a written treatment plan that includes the information required by Health and Safety Code section 121362 to the LHO and the medical officer of the local detention facility receiving the person when a person with active TB or reasonably believed to have active TB is transferred to a local detention facility in another jurisdiction.
- For LHOs to:
    - Review for approval within 24 hours of receipt only those treatment plans submitted by a health facility; and
    - Notify the medical officer of a parole region or a physician or surgeon designated by the Department of Corrections when there are reasonable

[125] Title 15, California Code of Regulations, section 1207 (Register 82 No. 40).

[126] See generally the Assembly and Senate Committee and Floor analyses for AB 803 Stats. 1993, ch. 676), AB 804 (Stats. 1994, ch. 685) and SB 843 (Stats. 2002, ch. 763).

grounds to believe that a parolee has active TB and ceases treatment for TB.[127]

2. The requirements for health care providers who treat a TB patient to examine the contacts of the TB patient or to refer those contacts to the LHO (Health and Safety Code section 121363)[128]

Section 121363 generally requires public and private health care providers who treat a TB patient to examine the contacts of the TB patient or to refer those contacts to the LHO. As mentioned in the Introduction, this analysis does not address requirements imposed on public and private health care providers. However, claimant alleges that Health and Safety Code section 121363 imposes the following new, reimbursable activities:

- Examination of the contacts of a TB patient by the LHO when a health care provider will not do so.
- LHO oversight of the case to ensure the contacts are reexamined properly which means increased communication between the LHO and health care providers.

The test claim statutes added the provisions of Health and Safety Code section 121363 which provides:

> Each health care provider who treats a person for active tuberculosis disease shall examine, or cause to be examined, all household contacts or shall refer them to the local health officer for examination. Each health care provider shall promptly notify the local health officer of the referral. When required by the local health officer, nonhousehold contacts and household contacts not examined by a health care provider shall submit to examination by the local health officer or designee. If any abnormality consistent with tuberculosis disease is found, steps satisfactory to the local health officer shall be taken to refer the person promptly to a health care provider for further investigation, and if necessary, treatment. Contacts shall be reexamined at times and in a manner as the local health officer may require. When requested by the local health officer, a health care provider shall report the results of any examination related to tuberculosis of a contact.

The plain language of Health and Safety Code section 121363 does not impose *any* requirements on LHOs. Rather, it imposes requirements on public and private health care providers to examine contacts or to refer them to the LHO for examination. Nor is there a specific requirement in any other state law that LHOs perform such examinations. Moreover, even if one

---

[127] With the exception of preparing the written treatment plans, the other activities requested by the claimant pursuant to sections 121361 and 121362 may be considered during the adoption of the parameters and guidelines. The Commission's regulations allow the Commission to consider and include activities in the parameters and guidelines that are reasonably necessary to comply with the mandated activities if there is substantial evidence in the record to support the finding. (Cal. Code Regs., tit. 2, § 1183.1(a)(4).)

[128] (Originally section 3283) as added by Statutes 1993, chapter 676, amended by Statutes, 1994, chapter 65, repealed, renumbered and reenacted as current section 121363 by Statutes 1995, chapter 415.

were to infer the alleged activities from the LHOs general duties in sections 121075 and 121365 to prevent the spread of contagious, infectious, or communicable diseases and to investigate reported or suspected cases of TB, those duties have continuously been the law since 1957 and are not new.[129] LHOs have had the following duties since at least 1957 and they remain in law today:

> Each [LHO] knowing or having reason to believe that any case . . . exists, or has recently existed, within the territory under his or her jurisdiction, shall take such measures as may be necessary to prevent the spread of the disease or occurrence of additional cases.[130]

This statutory provision alone authorizes all manner of measures taken by LHOs, provided that the measures are necessary to prevent the spread of disease.

> Each [LHO] is hereby directed to use every available means to ascertain the existence of, and immediately to investigate, all reported or suspected cases of tuberculosis in the infectious stages in the jurisdiction, and to ascertain the sources of those infections.[131]

LHOs have long had the duties to investigate cases of TB, take measures to prevent the spread of TB and have been authorized, if not required, to examine suspected TB patients when necessary for the preservation and protection of the public health (as discussed below under section 121364).

Therefore, staff finds that the plain language of section 121363 (originally section 3283), as added by Statutes 1993, chapter 676, amended by Statutes, 1994, chapter 65, and repealed, renumbered and reenacted as current section 121363 by Statutes 1995, chapter 415, does not mandate a new program or higher level of service on the LHO.

3. The authority of LHOs to order TB examinations (Health and Safety Code section 121364)[132]

Health and Safety Code section 121364 generally authorizes the LHO to order TB examinations and requires such orders to be in writing. Claimant alleges the activity of "LHO preparation of written orders for examination" is a new, reimbursable activity imposed by Health and Safety Code section 121364.

---

[129] Former section 3285(c) (Stats. 1957, ch. 205) as amended by statutes 1961, chapter 30, statutes 1966, chapter 1344, statutes 1965, chapter 1552.

[130] See Health and Safety Code section 3110 Statutes 1957, chapter 205; repealed, renumbered and reenacted as Health and Safety Code section 120175 by Statutes 1995, chapter 415.

[131] See former Health and Safety Code section 3285 added by Statutes 1957, chapter 205, amended by Statutes 1961, chapter 30; Statutes 1965, chapter 1344, Statutes 1965, chapter 1552, Statutes 1993, chapter 676(non-substantively to modernize and eliminate sexist usage), Statutes 1994, chapter 685 (but did not amend language quoted here), repealed, renumbered and reenacted as 121365 by Statutes 1995, chapter 415.

[132] (Originally Section 3284) as added by Statutes 1993, chapter 676; amended by Statutes 1994, chapter 685; and repealed, renumbered and reenacted as 121364 by Statutes 1995, section 415.

Since January 1, 1995, Health and Safety Code section 121364 has stated the following:

> (a) Within the territory under his or her jurisdiction, each [LHO] *may* order examinations for tuberculosis infection for the purposes of directing preventive measures for persons in the territory, except those incarcerated in a state correctional institution, for whom the [LHO] has reasonable grounds to determine are at heightened risk of tuberculosis exposure.
>
> (b) An order for examination pursuant to this section *shall* be in writing and shall include other terms and conditions as may be necessary to protect the public health. [133]

(Emphasis added.)

Staff finds that the requirements imposed by section 121364, as amended by the test claim statutes, are not new. Prior law, former Health and Safety Code section 3285(c) (which was last amended by Statutes1965, chapter 1552) stated in pertinent part:

> Whenever the [LHO] *shall* determine on reasonable grounds that an examination of any person is necessary for the preservation and protection of the public health, he *shall* make an examination order in writing, setting forth the name of the person to be examined, the time and place of the examination, and such other terms and conditions as may be necessary to protect the public health. [134]

(Emphasis added.)

Thus, under prior law, whenever the LHO "determined on reasonable grounds that an examination of any person [was] necessary" for the preservation and protection of public health, the LHO was required to make an examination order in writing, setting forth the name of the person to be examined, the time and place of the examination, and such other terms as may be necessary to protect the public health. Although the language in the test claim statutes is slightly different now (e.g. saying "may" instead of the former "shall" which arguably makes it discretionary), the authority to issue an order for examination is not new; it still must be on reasonable grounds that there is a heightened risk of TB exposure. Additionally, the requirement that the order be in writing and include terms and conditions necessary to protect the public health is the same.

---

[133] Health and Safety Code section 121364. Former 3285(c) added by Statutes 1957, chapter 205, repealed and reenacted as 3284 by Statutes 1993, chapter 676; amended by Statutes 1994, chapter 685; and repealed, renumbered as 121364 and reenacted by Statutes 1995, chapter 415.

[134] Former section 3285(c) as amended by Statutes 1965, chapter 1552. This language was deleted from section 3285(c) and amended into a new section 3284 by Statutes 1993, chapter 676 and was non-substantively amended by Statutes 1994, chapter 685; and repealed, renumbered as 121364, and reenacted by Statutes 1995, chapter 415.

Staff finds that Health and Safety Code section 121364[135] is not new and, thus, does not mandate a new program or higher level of service.

4. Authority of an LHO to issue various orders to protect the public health or the health of a particular person (Health and Safety Code section 121365)[136]

Health and Safety Code section 121365 requires the LHO to:

- "Use every available means to ascertain the existence of, and immediately investigate, all reported or suspected cases of active tuberculosis disease in the jurisdiction, and to ascertain the sources of those infections."
- "Follow applicable local rules and regulations and all general and special rules, regulations, and orders of the state department."

If the LHO determines that the public health in general or the health of a particular person is endangered by exposure to a person who is known to have active tuberculosis disease, or to a person for whom there are reasonable grounds to believe has active tuberculosis disease, the LHO is authorized by section 121365 to issue any orders deemed necessary to protect the public health or the health of any other person. These orders include but are not limited to the following specific orders:

- Of detention for purposes of examination;
- To complete a prescribed course of medication and if necessary, to follow infection control precautions;
- To follow a course of directly observed therapy (DOT) (if an active TB patient is unable or unwilling to complete a prescribed course of medication);
- Of detention in a health or other treatment facility if a person is substantially likely to have infectious TB and to transmit the disease;
- Of detention in a health or other treatment facility if (1) a person has active TB and shows no evidence of having completed treatment and (2) there is a substantial likelihood, based on past or present behavior, that the patient cannot be relied upon to complete treatment and follow infection control precautions;
- For the exclusion from attendance at the workplace; and
- For home isolation.

If the TB patient fails to comply with an order issued by the LHO, the LHO is authorized to request the court to enforce the order. In addition, if the order is violated, the LHO is required to

---

[135] (Former section 3285(c)) repealed, renumbered and reenacted as 3284 by Statutes 1993, chapter 676; amended by Statutes 1994, chapter 685; and repealed, renumbered as 121364 and reenacted by Statutes 1995, chapter 415.)

[136] Originally codified in former section 3285 as amended by Statutes 1993, chapter 676 and Statutes 1994, chapter 685 and repealed, renumbered and reenacted as 121365 by Statutes 1995, section 415.

"advise the district attorney of the county in which the violation has occurred, in writing, and shall submit to the district attorney the information in his or her possession relating to the subject matter of the order, and of the violation or violations thereof."

Claimant alleges that Health and Safety Code section 121365 imposes a reimbursable state-mandated program and also requests reimbursement for the following activities and costs:

- "Drafting, reviewing, and establishing policies, procedures, forms, and protocols regarding LHO orders and training to implement them for LHOs, their staff and others;"
- "Staff time to locate and detain TB patients; transport them to and from places of examination and housing; ensure that TB patients remain at home or are excluded from the workplace;" and
- "Costs of detention itself including but not limited to housing and use of security or law enforcement personnel."

For the reasons below, staff finds that Health and Safety Code section 121365, as added and amended by the test claim statutes, does not mandate a new program or higher level of service.

a. Authority given to the LHO to issue "less restrictive" orders to protect public health implements federal law and does not mandate a new program or higher level of service.

Before the enactment of the test claim statutes, former Health and Safety Code section 3285 (as last amended in 1965) required the LHO to issue orders of examination, quarantine, or isolation when necessary to protect public health. Section 3285 stated in relevant part the following:

> (c) Whenever the health officer shall determine on reasonable grounds that an examination of any person is necessary for the preservation and protection of public health, he shall make an examination order in writing, setting forth the name of the person to be examined, the time and place of the examination, and such other terms and conditions as may be necessary to the protect the public health. Nothing contained in this subdivision shall be construed to prevent any person whom the health officer determines should have an examination for infectious tuberculosis from having such an examination made by a physician of his own choice who is licensed to practice medicine under the provisions of Chapter 5 (commencing with Section 2000), Division 2 of the Business and Professions Code under such terms and conditions as the health officer shall determine on reasonable grounds to be necessary to protect the public health.
>
> (d) Whenever the health officer shall determine that quarantine or isolation in a particular case is necessary for the preservation and protection of the public health, he shall make an isolation or quarantine order in writing, setting forth the name of the person to be examined, the period of time during which the order shall remain effective, the place of the isolation or quarantine, and such other terms and conditions as may be necessary to the protect the public health.

Prior law also gave the LHO broad authority to take "such measures as may be necessary to prevent the spread of the disease or occurrence of additional cases" when the LHO had reason to

believe that any case exists, or has recently existed, within the territory under his or her jurisdiction.[137]

The test claim statutes amended the provisions now found Health and Safety Code section 121365 to add language authorizing the LHO to issue the following additional orders when necessary to protect the public health or the health of any other person: to complete a prescribed course of medication, to follow a course of directly observed therapy, to be detained in a health or treatment facility, to be excluded from work, and any other "orders [the LHO] deems necessary to protect the public health or the health of any other person."

These additional orders were added "for the purpose of establishing a procedure 'more in tune with current civil rights expectations that allows for gradually more restricted measures for recalcitrant patients who threaten to spread infection because they do not respond to specific treatment orders'"[138] Health and Safety Code section 1213167, which is discussed later in this analysis, clarifies that the written orders issued by the LHO pursuant to section 121365 must set forth the "the less restrictive alternatives that were attempted and were unsuccessful, or the less restrictive treatment alternatives that were considered and rejected, and the reasons the alternatives were rejected."

The plain language of the statute gives the discretion to the LHO to issue the orders when necessary to protect the public health. In addition, the LHO's authority to issue the orders identified in section 121365 has been deemed "discretionary" by the court in a case alleging the negligence of a health officer in performing his duties.[139] Although it is recognized that there may be circumstances where the LHO has no true choice but to issue an order identified in section 121365 to protect public health, and those circumstances may reach the level of practical compulsion for purposes of mandates law, the Commission does not need to address that issue.[140]

As discussed below, the additional orders specified in section 121365 implement existing state and federal requirements under the Due Process Clause of the United States Constitution and the American with Disabilities Act (ADA) to achieve public health goals by using the least restrictive means to protect the public and the health of the person with TB. "When the federal government imposes costs on local agencies those costs are not mandated by the state and thus would not require a state subvention. Instead, such costs are exempt from local agencies' taxing

and spending limitations" under article XIII B.[141] Thus, staff finds that Health and Safety Code section 121365 does not mandate a new program or higher level of service.

i. Existing State and Federal Due Process Law

When government takes an action against an individual that directly deprives that individual of a life, liberty, or property interest, government must comply with substantive due process protections afforded under the U.S. Constitution.[142] Substantive due process protects the individual against arbitrary action by government and, thus, requires government to have an appropriate justification for the deprivation.[143]

Civil commitment for any purpose constitutes a significant deprivation of liberty that requires due process protection.[144,145] Courts, including those in California, have long held that placing someone under quarantine restrictions for infectious or contagious diseases like tuberculosis infringes upon the individual's right of liberty. In such cases, personal restraint can only be imposed where, under the facts of each case, reasonable grounds exist to justify the action taken.[146] In addition, due process requires that the restriction imposed on the individual be the least restrictive alternative available under the circumstances.[147]

> Even though the governmental purpose be legitimate and substantial, that purpose cannot be pursued by means that broadly stifle fundamental personal liberties when the end can be more narrowly achieved. The breadth of legislative

---

[142] *Addington v. Texas* (1979) 441 U.S. 418, 425; United States Constitution, 5th and 14th amendments; see also, due process provisions of the California Constitution, article 1, sections 7 and 15.

[143] *County of Sacramento v. Lewis* (1998) 523 U.S. 823, 845.

[144] *Addington v. Texas* (1979) 441 U.S. 418, 425.

[145] See also, *Meyer v. Nebraska* (1923) 262 U.S. 390, 398 (liberty "denotes not merely freedom from bodily restraint but also the right of the individual to contract [and] . . . engage in any of the common occupations of life"); *Smith v. Texas* (1914) 233 U.S. 630, 636 ("In so far as a man is deprived of the right to labor, his liberty is restricted [and] his capacity to earn wages and acquire property is lessened.").

[146] *Jacobson v. Massachusetts* (1905) 197 U.S. 11, which upheld a compulsory vaccination program, finding that "the rights of the individual in respect of his liberty may at times, under the pressure of great dangers, be subjected to such restraint . . . as the safety of the general public may demand."; *In re Halko* (1966) 246 Cal.App.2d 553, 558, which addressed a challenge by a individual who had TB and was served with a quarantine order of isolation confining him to a hospital pursuant to former Health and Safety Code section 3285.

[147] *Covington v. Harris* (1969) 419 F.2d 617, 623.

> abridgement must be viewed in the light of less drastic means for achieving the same basic purpose.[148]

Thus, under existing federal due process law, local government is required to impose the least restrictive alternative available under the circumstances. The authority granted in Health and Safety Code section 121365 to issue less restrictive orders complies with, and implements this due process requirement.

ii. Existing Requirements under the Rehabilitation Act and the ADA

The least restrictive alternative requirement is also found in section 504 of the Rehabilitation Act and the Americans with Disabilities Act (ADA). In 1973, Congress enacted the section 504 of the Rehabilitation Act of 1973 to extend the protections of the Civil Rights Act of 1964 to the disabled.[149] The Rehabilitation Act prohibits discrimination on the basis of physical or mental disability with respect to "any program or activity receiving federal financial assistance."

In 1990, Congress enacted the ADA, which extended the requirements of the Rehabilitation Act to all services, programs, and activities of all public entities, including those that do not receive federal financial assistance.[150] A "public entity" under the ADA is defined to include "any State or local government," and "any department, agency, [or] special purpose district."[151] "There is no significant difference in the analysis of the rights and obligations created by the ADA and the Rehabilitation Act."[152]

The Rehabilitation Act and the ADA commonly protect against discrimination in employment, housing, education, transportation, and public accommodations. These federal laws, however, also broadly prohibit a public entity from discriminating against "a qualified individual with a disability" on account of the individual's disability when providing a service. Title II of the ADA states the following:

> [N]o qualified individual with a disability shall, by reason of such disability, be excluded from participation in or be denied the benefits of the services, programs, or activities of a public entity, *or be subjected to discrimination by any such entity*. (Emphasis added.)[153]

In 1987, the United States Supreme Court determined that a person suffering from TB is a "qualified individual with a disability" under the Rehabilitation Act, and in 1993, the Code of

[149] 29 U.S.C. section 794; 34 Code of Federal Regulations, sections 104 et seq.; *Lloyd v. Regional Transp. Authority* (1977) 548 F.2d 1277, 1285.

[150] 42 U.S.C. section 12101, 28 C.F.R. sections 35.101 et seq.

[151] 42 U.S.C. section 12132(1)(A)(B).

[152] *Zuckle v. University of California* (1999) 166 F.3d 1041, 1045, fn. 11.

[153] 42 U.S.C. section 12132.

Federal Regulations that implement the ADA explicitly mandated that TB be deemed a disability under the ADA.[154]

In 1999, the U.S. Supreme Court decided the *Olmstead* case, which addressed the least restrictive alternative requirement in Title II of the ADA regarding the confinement of mentally disabled patients in Georgia. The court held that the unjustified placement or retention of persons in institutions, severely limiting their exposure to the outside community, constitutes a form of discrimination prohibited by Title II of the ADA.[155] The court noted Congress' findings when enacting the ADA that "unjustified segregation" of persons with disabilities is a form of discrimination.[156]

The court also noted two regulations that implement the ADA that: (1) require each public entity to administer services and programs in the most integrated setting appropriate to the needs of qualified individuals with disabilities, and (2) require each public entity to make reasonable accommodations in policies, practices, or procedures when the modifications are necessary to avoid discrimination on the basis of disability, unless the public entity can demonstrate that making the modifications would fundamentally alter the nature of the service, program, or activity.[157] The court held that the reasonable accommodations standard can be met when the state "demonstrates that it had a comprehensive, effectively working plan for placing qualified persons with mental disabilities in *less restrictive settings*." (Emphasis added.)[158] The court further held that Georgia law expressed a preference for treatment in the most integrated setting appropriate by providing that "[i]t is the policy of the state that the *least restrictive alternative placement* be secured for every client at every state of his habilitation." (Emphasis added.)[159] The court remanded the case to the lower courts for consideration of the facts to these standards.

The due process and ADA requirement to consider the least restrictive alternatives available was addressed in *City of Newark v. J.S.*, a case involving the involuntary civil commitment of a homeless person with active TB.[160] Hospital authorities requested the city to intervene and issue an order of hospital confinement when J.S., a noncompliant patient with active TB, tried to leave the hospital against medical advice. J.S. had a prior history of disappearances and of releases against medical advice, and would return to the emergency room only when his health deteriorated. J.S. also failed to follow proper infection control guidelines or take proper medication when in the hospital and failed to complete treatment regimens following his prior releases.[161] The court, after summarizing the due process and ADA requirements, determined

that a health officer seeking to infringe upon a person's liberty by imposing detention, confinement, isolation, or quarantine, must first establish by clear and convincing evidence that the person poses a significant risk of transmitting disease to others with serious consequences. The court explained that courts must guard against the risk that governmental action may be grounded in popular myths or irrational fears and, thus, the court must demand an individualized, fact-specific determination as to the person under consideration, which is "the key to all decision-making under the ADA."[162]

In addition, the least restrictive means should be used to achieve the clearly defined public health goal.[163] With respect to TB control, the court noted that compulsory directly observed therapy (which assures that the patient takes medication while being directly observed by a health care worker) should be used "only as a last resort; conceptually, it should be used as a less restrictive alternative to isolation or commitment."[164] After considering the evidence in the case, and based on the individual circumstances of the homeless, noncompliant TB patient, the court found that hospital confinement was the least restrictive mode of isolation.[165]

Accordingly, the test claim statute, Health and Safety Code section 121365, which authorizes the LHO to issue orders less restrictive than quarantine, isolation, or detention (e.g. orders for exclusion from the workplace, completion of medication, or directly observed therapy) to meet the public health goals of treating the TB patient and protecting the public from exposure to TB simply codifies the existing ADA requirement to consider the less restrictive alternatives available. Thus, staff finds that the authority in Health and Safety Code section 121365 to issue these orders does not mandate a new program or higher level of service.

b. <u>The requirements in section 121365 to use every available means to ascertain and investigate cases, to follow state and local rules, and to advise and report to the district attorney when orders are violated are not new.</u>

During the period of reimbursement, the first paragraph of Health and Safety Code section 121365 has stated the following:

> Each local health officer is hereby directed to use every available means to ascertain the existence of, and immediately investigate all reported or suspected cases of active tuberculosis disease in the jurisdiction, and to ascertain the sources of those infections. In carrying out the investigations, each local health officer shall follow applicable local rules and regulations and all general and special rules, regulations, and orders of the state department. If the local health officer determines that the public health in general or the health of a particular person is endangered by exposure to a person who is known to have active tuberculosis disease, or to a person for whom there are reasonable grounds to believe has active tuberculosis disease, the local health officer *may* issue any orders he or she deems necessary to protect the public health or the health of any other person, and

[162] *Id*. at pages 274-275.

[163] *Id.* at page 275.

[164] *Id*. at page 276.

[165] *Id.* at page 278.

may make application to a court for enforcement of the orders. Upon the receipt of information that any order has been violated, the health officer shall advise the district attorney of the county in which the violation has occurred, in writing, and shall submit to the district attorney the information in his or her possession relating to the subject matter of the order, and of the violation or violations thereof. (Emphasis added.)

The requirements to use every available means to ascertain and investigate cases of TB in the jurisdiction, to follow state and local rules, and to advise and report violations of orders to the district attorney are not new. Since at least 1965, state law has continuously imposed the same requirements on the LHO. Former Health and Safety Code section 3285, as amended in 1965, stated the following:

Each local health officer is hereby directed to use every available means to ascertain the existence of, and immediately investigate, all reported or suspected cases of tuberculosis in the infectious stages within his jurisdiction, and to ascertain the sources of such infections. In carrying out the investigations, each health officer is invested with full powers of inspection, examination and quarantine or isolation of all persons known to be infected with tuberculosis in an infectious stage and is hereby directed:

(a) To make examinations as are deemed necessary of persons reasonably suspected of having tuberculosis in an infectious stage and to isolate or isolate and quarantine such persons, whenever deemed necessary for the protection of public health.

(b) *Follow local rules and regulations regarding examinations, quarantine, or isolation, and all general and special rules, regulations, and orders of the state department* in carrying out such examination, quarantine or isolation.

(c) Whenever the health officer shall determine on reasonable grounds that an examination of any person is necessary for the preservation and protection of public health, he shall make an examination order in writing, setting forth the name of the person to be examined, the time and place of the examination, and such other terms and conditions as may be necessary to the protect the public health. Nothing contained in this subdivision shall be construed to prevent any person whom the health officer determines should have an examination for infectious tuberculosis from having such an examination made by a physician of his own choice who is licensed to practice medicine under the provisions of Chapter 5 (commencing with Section 2000), Division 2 of the Business and Professions Code under such terms and conditions as the health officer shall determine on reasonable grounds to be necessary to protect the public health.

(d) Whenever the health officer shall determine that quarantine or isolation in a particular case is necessary for the preservation and protection of the public health, he shall make an isolation or quarantine order in writing, setting forth the name of the person to be examined, the period of time during which the order shall remain effective, the place of the isolation or quarantine, and such other terms and conditions as may be necessary to the protect the public health.

(e) Upon the making of an examination, isolation or quarantine order as provided in this section, a copy of such order shall be served upon the person named in such order.

(f) *Upon the receipt of information that any examination, quarantine or isolation order, made and served as herein provided, has been violated, the health officer shall advise the district attorney of the county in which the violation occurred, in writing, and shall submit to such district attorney the information in his possession relating to the subject matter of the examination, isolation, or quarantine order, and of such violation or violations thereof. . . .* (Emphasis added.) [166]

Accordingly, staff finds that the requirements to use every available means to ascertain and investigate cases of TB in the jurisdiction, to follow state and local rules, and to advise and report violations of orders to the district attorney do not mandate a new program or higher level of service.

c. <u>The authority in section 121365 to make application to a court for enforcement of orders does not mandate a new program or higher level of service.</u>

Health and Safety Code section 121365 authorizes the LHO to apply to the court for the enforcement of any orders issued under the TB control statutes as follows:

> If the local health officer determines that the public health in general or the health of a particular person is endangered by exposure to a person who is known to have active tuberculosis disease, or to a person for whom there are reasonable grounds to believe has active tuberculosis disease, the local health officer *may* issue any orders he or she deems necessary to protect the public health or the health of any other person, and *may* make application to a court for enforcement of the orders. (Emphasis added.)

The authority to "make application to a court for enforcement of the orders" is not a mandated activity. Health and Safety Code section 16 states: "'shall' is mandatory and 'may' is permissive." Thus, the fact that section 121365 says the LHO "may" make application to the court does not require performance of any activities mandated by the state. Rather the plain language of section 121365 authorizes, but does not require, the LHO to make such an application. Though LHOs have long been required to "enforce orders, ordinances, and statutes related to public health,"[167] they can do so by reporting the violation to the district attorney as they have been required to do since 1965.[168] This new statutory authority to make application to a court merely provides an additional means of enforcement. In fact, this authority is arguably not even new since an LHO could always file a civil complaint seeking a court order to compel compliance with any LHO order and requesting the imposition of civil penalties. Civil actions also can be used to obtain an injunction to prohibit an action that is contrary to the public health.

---

[166] Former Health and Safety Code section 3285 as amended by Statutes 1965, chapter 1552.

[167] See former Health and Safety Code section 452, repealed and renumbered as 101030 by Statutes 1995, chapter 415.

[168] Health and Safety Code section 3285(f), as amended by statutes 1965, chapter 1552, repealed and renumbered as 121365(f) by Statutes 1995, chapter 415.

Therefore, staff finds that the authority to "make application to a court for enforcement of the orders" does not impose a new program or higher level of service.

5. Requirements imposed to protect the rights of the TB patient when an order is issued pursuant to Health and Safety Code section 121365 (Health and Safety Code sections 121366-121369)[169]

When an LHO issues an order under the authority provided by section 121365, sections 121366 through 121369 impose various requirements to protect the rights of the TB patient. The following requirements are imposed by sections 121367 and 121369 when the LHO issues any order under section 121365:

- That the orders be in writing and contain the following:
  - The legal authority under which the order is issued, including the particular sections of state law or regulations;[170]
  - An individualized assessment of the person's circumstances or behavior constituting the basis for the issuance of the order; [171]
  - The less restrictive treatment alternatives that were attempted and were unsuccessful, or the less restrictive treatment alternatives that were considered and rejected, and the reasons the alternatives were rejected; [172]
  - The name of the person, the period of time during which the order shall remain effective, the location, payer source if known, and other terms and conditions as may be necessary to protect the public health; [173]
- That a copy of the order shall be served upon the person named in the order; and[174]
- "If necessary, language interpreters and persons skilled in communicating with vision and hearing impaired individuals shall be provided in accordance with applicable law."[175]

In addition, sections 121366-121368 impose the following requirements when the LHO issues an order of detention pursuant to section 121365:

- Upon a detainee's request, the LHO must apply for a court order authorizing continued detention within 72 hours of the request.[176]

---

[169] (Originally sections 3285.1-3285.4) as added by Statutes 1993, chapter 676 and amended by Statutes 1994, chapter 685, and repealed, renumbered, and reenacted as sections 121366-121369 by Statutes 1995, chapter 415.

[170] Health and Safety Code section 121367(a)(1).

[171] Health and Safety Code section 121367(a)(2).

[172] Health and Safety Code section 121367(a)(3).

[173] Health and Safety Code section 121367(a)(4).

[174] *Ibid*.

[175] Health and Safety Code section 121369(a).

[176] Health and Safety Code section 121366.

- Whether or not a detainee makes a request, a court order is required for detentions of more than 60 days.[177]
- The LHO must seek further court review of a detention within 90 days of the initial court order and within 90 days of each subsequent court review. [178]
- The LHO must prove the necessity of the detention by "clear and convincing" evidence.[179]
- A person subject to detention has the right to counsel and to have counsel provided. [180]
- Each health order must advise the detainee of the purpose of the detention and of his or her rights regarding release requests, court orders, court review, and legal representation.[181]
- Each health order must be accompanied by a separate notice that: explains the detainee's right to request release; lists the phone number the detainee may call to request release; explains the detainee's right to counsel; and informs the detainee that the LHO will notify two individuals specified by the detainee of the detention.[182]
- A detainee may only be detained for the amount of time necessary to fulfill the purpose of the detention. [183]

These bulleted requirements were added to the Health and Safety Code for the first time by the test claim statutes. However, except for the requirement to provide counsel to non-indigent persons, these requirements are mandated by federal law, under the ADA and the procedural due process requirements, and, thus, do not mandate a new program or higher level of service within the meaning of article XIII B, section 6.[184]

a. <u>The ADA requires the provision of language interpreters and persons skilled in communicating with vision and hearing impaired individuals.</u>

Health and Safety Code section 121369(a) requires that when an order is issued under the TB control statutes and "if necessary," language interpreters and persons skilled in communicating with vision and hearing impaired individuals shall be provided "in accordance with applicable law." Federal law, under the ADA, requires a public entity to provide reasonable accommodations, including interpreters, when necessary to avoid discrimination.

[177] *Ibid*.

[178] *Ibid*.

[179] *Ibid*.

[180] *Ibid*.

[181] Health and Safety Code section 121367(b)(1)-(4).

[182] Health and Safety Code section 121367(b)(5).

[183] Health and Safety Code section 121368.

[184] *Hayes, supra,* 1 Cal.App.4th 1564, 1593, citing *City of Sacramento, supra,* 50 Cal.3d 51, 76; see also, Government Code sections 17513, 17556 (b) and (c).

Title II of the ADA prohibits a "public entity" from discriminating against "a qualified individual with a disability" on account of the individual's disability:

> [N]o qualified individual with a disability shall, by reason of such disability, be excluded from participation in or be denied the benefits of the services, programs, or activities of a public entity, or be subjected to discrimination by any such entity.[185]

The courts have explained that the final clause of the quoted language "protects qualified individuals with a disability from being 'subjected to discrimination by any such entity,' and is not tied directly to the 'services, programs, or activities' of the public entity."[186] Thus, in instances of detention or arrest, the courts have found that the person detained may state a claim for discrimination under the ADA, even though no service was provided to the individual.[187]

Federal regulations adopted to implement the ADA require a public entity to make reasonable modifications in policies, practices, and procedures when the modifications are necessary to avoid discrimination.[188] The ADA regulations further provide that "[a] public entity shall take appropriate steps to ensure that communications with ... members of the public with disabilities are as effective as communications with others."[189] These steps include furnishing "appropriate auxiliary aids and services" to afford a disabled individual equal opportunity to participate in an activity of the public entity, as follows:

> A public entity shall furnish appropriate auxiliary aids and services where necessary to afford an individual with a disability an equal opportunity to participate in, and enjoy the benefits of, a service, program, or activity conducted by a public entity.[190]

The ADA defines "auxiliary aids and services" to include "qualified interpreters or other effective methods of making aurally delivered materials available to individuals with hearing impairments."[191] The ADA regulations further provide that "auxiliary aids and services" include, among other things, "[q]ualified interpreters" and "telecommunications devices for deaf persons (TDD's)."[192]

Accordingly, the requirement in Health and Safety Code section 121369(a) to provide language interpreters and persons skilled in communicating with vision and hearing impaired individuals when issuing an order for TB control does not mandate a new program or higher level of service.

b. Except for providing counsel to non-indigent persons when an order of detention is issued, the remaining requirements are mandated by existing state and federal procedural due process requirements.

Except for the requirement to provide counsel to non-indigent persons, the remaining requirements in sections 121366 through 121369 are mandated by the procedural due process requirements of state and federal law.

Under mandates law, when the federal government imposes costs on local agencies those costs are not mandated by the state and do not require state subvention.[193] Moreover, reimbursement is not required for state rules or procedures that are intended to implement federal due process law, and whose costs are in context de minimis. Such rules enacted by the state, even if they allegedly exceed the minimum due process requirements of federal law, are considered part and parcel of the underlying federal mandate and are not reimbursable.[194] The California Supreme Court in *San Diego Unified School Dist*., a case addressing a request for reimbursement of due process hearing costs following a discretionary expulsion order, explained the rationale as follows:

> The record reveals that in the extended proceedings before the Commission, the parties spent numerous hours producing voluminous pages of analysis directed toward determining whether various provisions of Education Code section 48918 exceeded federal due process requirements. That task below was complicated by the circumstances that this area of federal due process law is not well developed. The Commission, which is not a judicial body, did as best it could and concluded that in certain respects the various provisions (as observed ante, footnote 11, predominately concerning notice, right of inspection, and recording requirements) "exceeded" the requirements of federal due process.
>
> Even for an appellate court, it would be difficult and problematic in this setting to categorize the various notice, right of inspection, and recording requirements here at issue as falling either within or without the general federal due process mandate. The difficulty results not from the circumstances that, as noted, the case law in the area of due process procedures concerning expulsion matters is relatively undeveloped, but also from the circumstance that when such an issue is raised in an action for reimbursement, as opposed to its being raised in litigation challenging an actual expulsion on the ground of allegedly inadequate hearing procedures, the issue inevitably is presented in the abstract, without any factual context that might help frame the legal issue. In such circumstances, courts are – and should be – wary of venturing pronouncements (especially concerning matters of constitutional law).
>
> In light of those considerations, . . . challenged state rules or procedures that are intended to implement an applicable federal law- and whose costs are , in context,

[193] *Hayes, supra,* 1 Cal.App.4th 1564, 1593, citing *City of Sacramento, supra,* 50 Cal.3d 51, 76; see also, Government Code sections 17513, 17556(b) and (c).

[194] *San Diego Unified School Dist., supra,* 33 Cal.4th 859, 889.

> de minimis- should be treated as part and parcel of the underlying federal mandate.
>
> Applying that approach to the case now before us, we conclude there can be no doubt that the assertedly "excessive due process" aspects of Education Code section 48918 for which the District seeks reimbursement in connection with hearings triggered by discretionary expulsions . . . fall within the category of matters that are merely incidental to the underlying federal mandate, and that produce at most a de minimis cost. Accordingly, for purposes of the District's reimbursement claim, all hearing costs incurred under Education Code section 48918, triggered by the District's exercise of discretion to seek expulsion, should be treated as having been incurred pursuant to a mandate of federal law, and hence all such costs are nonreimbursable under Government Code section 17556, subdivision (c).[195]

Similarly here, the requirements imposed by sections 121366 through 131369 are intended to implement federal due process law.

The due process clause provides that the state shall not "deprive any person of life, liberty, or property without due process of law."[196] When an individual's liberty or property interest is affected by governmental action, due process applies and requires that certain procedural safeguards be provided to the individual. The United States Supreme Court has not yet addressed the due process requirements required in TB control cases. However, in cases involving the involuntary detention for medical treatment, the United States Supreme Court held that due process requires the individual be given written notice; an opportunity to be heard before a neutral decision maker; the ability to review and challenge the evidence supporting the action; a written statement of reasons for the decision; the availability of legal counsel, furnished by the state if the individual is indigent; and timely notice of these rights.[197]

Adequate notice under the due process clause has two components. It must inform affected parties of the action about to be taken against them and the procedures available for challenging that action.[198] In addition, government is generally required by the due process clause to provide an opportunity to object to the action before it deprives an individual of his or her liberty or property interest. However, in the context of communicable disease orders, "post-deprivation" objections are constitutional if the individual is considered an immediate danger to self or others and if the opportunity to object takes place within a reasonable time after the deprivation.[199] In addition, the United States Supreme Court determined that in cases dealing with the indefinite civil detention of mentally ill persons, due process requires the state to justify confinement by

---

clear and convincing evidence – "a middle level of burden of proof that strikes a fair balance between the rights of the individual and the legitimate concern of the state."[200]

All of the orders an LHO is authorized to issue under Health and Safety Code section 121365 for purposes of TB control implicate an individual's liberty or property interest. As indicated above, civil commitments of any kind, including those for detention, isolation, or quarantine, infringe upon the individual's right of liberty.[201] The right to liberty extends to the right of the individual to contract and to engage in any of the common occupations of life.[202] Thus, by directing a patient to stay at home, a home isolation order implicates the patient's basic liberty interest in being free from physical confinement.[203] By ordering a patient to stay away from his or her workplace, a work exclusion order could have an impact on liberty and property interests associated with being free to fulfill contractual obligations, engage in an occupation, and earn a living. It is well-settled law that even temporary deprivations of an individual's liberty or property interest triggers due process protections. The length or severity of the deprivation must be weighed in determining what kind of process is due -- not *whether* process is due.[204]

In 2007, the Second District Court of Appeal in *Levin v. Adalberto M.* addressed a case challenging a civil order of detention issued by an LHO to a TB patient. Following an analysis of the cases summarized above, the court held that the "procedures mandated by [Health and Safety Code] sections 121365 through 121369 satisfy federal and state due process requirements."[205,206] Thus, under the Supreme Court's decision in *San Diego Unified School*

[206] See also, "Menu of Suggested Provisions for State Tuberculosis Prevention and Control Laws," issued by the Centers for Disease Control and Prevention (CDC), which summarizes the constitutional due process requirements involved when issuing TB orders and identified the due process requirements codified by other state's statutes and regulations that comply with the due process clause that are the same or similar to those codified in the test claim statutes. Differences occur in the number of days that the LHO must seek a court order to continue the detention of a TB patient. (Exhibit __.) See also, "TB Control and the Law, Frequently Asked

Dist., the requirements identified in sections 121366 through 121369 following the issuance of an order by the LHO pursuant to section 121365 are mandated by federal law and are not reimbursable under article XIII B, section 6.

However, the requirement in Health and Safety Code section 121366 to provide counsel to *non-indigent* TB patients subject to a detention order goes beyond the requirements of federal due process law and is not considered "part and parcel" of the federal due process requirements. Section 121366 states that "any person who is subject to detention order shall have the right to be represented by counsel *and upon the request of the person, counsel shall be provided*." (Emphasis added.)

In *Vitek*, the United States Supreme Court held that the right to be represented by counsel is a requirement of due process law, but only must be furnished at no cost to the individual if the individual is indigent.[207] The plain language of section 121366 provides the right to counsel in the first part of the sentence – "any person who is subject to detention order shall have the right to be represented by counsel." The first part tracks federal due process. Section 121366 further provides, without limitation regarding the ability of the person to pay for counsel, that upon the request of "any" person, "counsel shall be provided." Thus, the plain language f section 121366 requires that counsel be provided at no cost to any individual, including non-indigent individuals subject to a detention order. Absent the requirement in section 121366, counties would not be required to provide counsel to non-indigent patients in TB control cases. The cost of providing counsel to appear in court to argue that the detention is not reasonable under the circumstances of the case and to represent the individual subject to a TB detention order, is not the same as the extra notice requirements following an expulsion order that were deemed "part and parcel" in the *San Diego Unified School Dist.* case, whose costs were considered "de minimis."

Thus, staff finds that the requirement in Health and Safety Code section 121366 to provide counsel to *non-indigent* TB patients subject to a detention order mandates a new program or higher level of service within the meaning of article XIII B, section 6.

B. There Are Costs Mandated by the State Within the Meaning of Article XIII B, Section 6 and Government Code Section 17514 Which May Be Partially Offset by Local Fee Authority.

The final issue is whether the state-mandated activities impose costs mandated by the state,[208] and whether any statutory exceptions listed in Government Code section 17556 apply to the test claim. Government Code section 17514 defines "costs mandated by the state" as any increased cost a local agency is required to incur as a result of a statute that mandates a new program or higher level of service." Government Code section 17564 requires reimbursement claims to exceed $1,000 to be eligible for reimbursement. Claimant asserts that it has costs exceeding one-thousand dollars per year.[209] In 2010, claimant had $5,144,431 in TB control related expenses.

Questions on Civil Commitment" issued by the Public Health Institute, describing the procedures in sections 121366 through 121269 as the "hallmark of procedural due process." (Exhibit ___.)

[207] *Vitek v. Jones* (1980) 445 U.S. 480, 495.

[208] *Lucia Mar, supra*, 44 Cal.3d 830, 835; Government Code section 17514.

[209] Claimant, test claim, *supra*, p. 14.

The state provided claimant with $4,579,366 for TB control related activities for 2010 and the claimant absorbed the remaining $565,066 of the costs.[210] The Commission, however, cannot find "costs mandated by the state" within the meaning of Government Code section 17514 if any exceptions in Government Code section 17556 apply, as discussed below. Claimant asserts that none of the exceptions to finding a reimbursable state-mandated program under Government Code section 17556 apply here.[211]

1. There is No Evidence in the Record to Support a Finding That Claimant Requested the Test Claim Statutes Within the Meaning of Government Code Section 17556(a).

DHS asserts that if the Commission finds that there is a state-mandated program or higher level of service that it should deny the claim because the exception under Government Code section 17556(a) should apply in this case.[212] Government Code section 17556(a) prohibits the Commission from finding costs mandated by the state if the test claim is submitted by a local entity that requested the test claim statutes. Government Code section 17556(a) requires a specific request for the test claim legislation in the form of a resolution of the governing body of the city, county or school district claimant or a letter from the delegated representative of the governing body. However, there is no evidence in the record to support a finding that Government Code section 17556(a) applies in this case.

Government Code section 17556(a) defines a "request by the local agency" and prohibits reimbursement if a claim:

> …is submitted by a local agency or school district which requested legislative authority for that local agency …to implement the program specified in the statute, and that statute imposes costs upon that local agency… requesting the legislative authority. A resolution from the governing body or a letter from a delegated representative of the governing body of a local agency… which requests authorization for that local agency …to implement a given program shall constitute a request within the meaning of this paragraph.

In support of its contention that Government Code section 17556(a) precludes reimbursement for counties that expressed support for the test claim statutes, DHS points to the fact that the legislation was specifically requested by the Health Officer's Association of California (HOAC). DHS argues that because claimant is a member of HOAC, HOAC's request of the legislation should be imputed to claimant.

Staff reviewed the author's bill file and the committee files and found evidence that the test claim legislation was sponsored by HOAC and supported by the claimant and numerous other counties.[213] In fact, the legislation was drafted by the Santa Cruz County LHO at the time, Ira Lubell, MD, who was also the chair of the California Medical Association's (CMA's) Advisory

[212] DHS, comments on the test claim, *supra*, p.p. 1-2.

[213] See letter from HOAC sponsoring the legislation and letters of support from various counties, including claimant.

Panel on Preventative Medicine at that time. However, a search of the County of Santa Clara Board of Supervisors Resolutions for the period of January 1993 to December 1994 showed no evidence of a specific request for this legislation or a delegation of authority to HOAC to advocate on its behalf.[214]

A local agency or school district must "request" legislative authority. The verb request means, "to make a request to or of; to ask for."[215] The resolutions and letters from counties make no request, but merely support the bill or the concepts therein. The word "support" is not synonymous with "request," and the statute is clear: making a "request" is the governing standard to trigger the exception to reimbursement. Staff finds that DHS's argument is incorrect and not supported by the plain meaning of Government Code section 17556(a); and that the letters submitted in support of the test claim legislation do not constitute a "request" within the meaning of section 17556(a).

If a statute cannot be understood based on its plain meaning, only then is it correct to refer to its legislative history.[216] For Government Code section 17556, even if the meaning were ambiguous regarding whether local government resolutions that support a bill constitute a request to implement a program, its legislative history emphasizes the distinction between requesting and supporting legislation.

Government Code section 17556 originated in Statutes 1977, chapter 1135, also known as Senate Bill No. 90 (1977-1978 Reg. Sess.), in former Revenue and Taxation Code section 2253.2.[217] The original bill precluded reimbursement for a "chaptered bill … requested by or on behalf of the local agency … which desired legislative authority to implement the program specified in the bill." The following year, section 2253.2 was amended by Statutes 1978, chapter 794 (Sen. Bill No. 1490 (1977-1978 Reg. Sess.)). The May 8, 1978 version of Senate Bill 1490 added the definition of request as follows:

> "*For purposes of this paragraph, a resolution from the governing body or a letter from a member or delegated representative of the governing body of a local agency …which expresses a desire for and support of legislation to authorize that local agency …to implement a given program shall constitute a "request"…*"

(Emphasis added). However, the June 21, 1978 version amended the sentence to be nearly identical[218] to its current form, as follows:

---

[214] Claimant, response to request for additional information, *supra*, declaration of Jenny Yelin, May 13, 2011.

[215] The Merriam-Webster Dictionary (1997) page 627. Even though the plain meaning should be clear, a dictionary definition will sometimes emphasize that clarity.

[216] *In re York, supra*, 9 Cal.4th at p. 1142.

[217] The provisions of Senate Bill No. 90 (1977-1978 Reg. Sess.) governed the mandates process for the Board of Control, the Commission on State Mandate's predecessor. This former Revenue and Taxation Code section was repealed by Statutes 1988, chapter 160, a code maintenance bill.

[218] The word "legislative" was later amended out of the provision.

> "For purposes of this paragraph, a resolution from the governing body or a letter from a ~~member or~~ delegated representative of the governing body of a local agency …which ~~expresses a desire for and support of legislation to authorize~~ *requests legislative authorization for* that local agency …to implement a given program shall constitute a "request"..." (added italicized text in original).

Rejection of a specific provision contained in an act as originally introduced is persuasive that the act should not be interpreted to include what was left out.[219] Here, deleting the phrase "expresses a desire for and support of legislation," means that a "request of legislative authorization" should not be interpreted to include an expression of "desire for and support of legislation" because this phrase was left out of the final bill. In other words, the Legislature did not intend to preclude reimbursement for counties or other local entities that support legislation.

Though many local governments, including the claimant, supported the test claim legislation, support of a bill does not constitute a specific request for legislation under Government Code section 17556(a). Therefore, staff finds that the exception in Government Code section 17556(a) does not apply here.

2. Claimant Has Fee Authority For the Test Claim Activities Requiring Voter Approval Under Proposition 218 Which May Offset Some of Claimant's Costs But Which Does Not Eliminate the Mandate.

Government Code section 17556(d), states:

> The commission shall not find costs mandated by the state, as defined in Section 17514, in any claim submitted by a local agency … if, after a hearing, the commission finds any one of the following: [¶]…[¶] (d) The local agency … has the authority to levy service charges, fees, or assessments sufficient to pay for the mandated program or increased level of service.

Health and Safety Code section 101325 authorizes the imposition of a fee to pay the reasonable expenses of the LHO or other officers or employees incurred in the enforcement of any statute, order, quarantine, or regulation prescribed by a state officer or department relating to public health. Health and Safety Code section 101325 provides:

> Whenever the governing body of any city or county determines that the expenses of the [LHO] or other officers or employees in the enforcement of any statute, order, quarantine, or regulation prescribed by a state officer or department relating to public health, requires or authorizes its [LHO] or other officers or employees to perform specified acts that are not met by fees prescribed by the state, the governing body may adopt an ordinance or resolution prescribing fees to pay the reasonable expenses of the [LHO] or other officers or employees incurred in the enforcement. . . . The schedule of fees prescribed by ordinance or resolution of the governing body shall be applicable in the area in which the [LHO] or other officers and employees enforce any statutes, order, quarantine, or regulation prescribed by a state officer or department relating to public health.

[219] *Bollinger v. San Diego Civil Service Comm.* (1999) 71 Cal. App. 4th 568, 575.

The plain language of Health and Safety Code section 101325 authorizes the imposition of a fee to pay the reasonable expenses of the LHO or other officers or employees incurred in the enforcement of any statute, order, quarantine, or regulation prescribed by a state officer or department relating to public health. "Any statutes" by definition includes the test claim statutes. However, this fee authority is limited to situations where the LHO or other officers or employees are required or authorized to perform specified acts that are not met by other fees prescribed by the state.[220] Therefore, any fee imposed pursuant to Health and Safety Code section 101325 cannot exceed a city or county's reasonable expenses for the required activities in excess of other fees prescribed by the state. However, this fee is subject to voter approval under Proposition 218 because it is imposed on a parcel and does not directly benefit the parcel. Thus, as explained below, Government Code section 17556(d) does not apply to deny the claim. Any fees recovered through section 101330, would be identified as offsetting revenue.

Health and Safety Code section 101330 specifies that the officer designated "to collect fees authorized by Section 101325, shall prepare a list of *parcels of real property subject to these fees*." Further, although it is called a "fee" in section 101325 but an "assessment" under section 101335 (which addresses the duties of the tax collector with regard to the fee), it does not meet the "special benefit" and "proportionality" requirements in Article XIII D, section 4 (a) for a special assessment and thus is a fee for purposes of Proposition 218 analysis. With some exceptions, local government fees or assessments that are incident to property ownership are subject to voter approval under article XIII D of the California Constitution, as added by Proposition 218 in 1996. Article XIII D defines a fee as "any levy other than an ad valorem tax, a special tax, or an assessment, imposed by an agency on a parcel or a person as an incident of property ownership, including a user fee or charge for a property-related service." It defines an assessment as "any levy or charge upon real property by an agency for a special benefit conferred upon the real property [and] includes, but is not limited to, 'special assessment,' 'benefit assessment,' 'maintenance assessment,' and 'special assessment tax.'"

However, it also imposes "special benefit" and "proportionality" requirements on special assessments. These requirements are set forth in Article XIII D, section 4(a):

> An agency which proposes to levy an assessment shall identify all parcels which will have a special benefit conferred upon them and upon which an assessment will be imposed. The proportionate special benefit derived by each identified parcel shall be determined in relationship to the entirety of the capital cost of a public improvement, the maintenance and operation expenses of a public improvement, or the cost of the property related service being provided. No assessment shall be imposed on any parcel which exceeds the reasonable cost of the proportional special benefit conferred on that parcel. Only special benefits are assessable, and an agency shall separate the general benefits from the special benefits conferred on a parcel....

---

[220] See 55 Op.Atty.Gen.174 (1961) (Specific fees authorized to be collected from licensees and registrants prevailed over authority granted to local governmental units to charge fees from health services under this section).

Because the health fee authorized by section 101325 would arguably provide a general benefit to all people in the jurisdiction by preventing the spread of TB, but not provide any special benefit to a parcel, it does not meet the special assessment requirements of article XIII D, section 4(a) of the California Constitution. Therefore, for purposes of Proposition 218, it would be treated as a property-related fee. Among other procedures, new or increased property-related fees require a majority-vote of the affected property owners, or two-thirds registered voter approval, or weighted ballot approval by the affected property owners.[221] Assessments must also be approved by owners of the affected parcels.[222]

The plain language of Government Code section 17556(d) prohibits the Commission from finding that the permit imposes "costs mandated by the state" if "[t]he local agency … has the *authority* to levy service charges, fees, or assessments sufficient to pay for the mandated program or increased level of service." [Emphasis added.] Under Proposition 218, the local agency has no authority to impose the fee without the consent of the voters or property owners.

Additionally, it is possible that the local agency's voters or property owners may never adopt the proposed fee or assessment, but the local agency would still be required to comply with the state mandate. Denying reimbursement under these circumstances would violate the purpose of article XIII B, section 6, which is to "to preclude the state from shifting financial responsibility for carrying out governmental functions to local agencies, which are 'ill equipped' to assume increased financial responsibilities because of the taxing and spending limitations that articles XIII A and XIII B impose."[223] Though some of the eligible claimants may have passed a fee under this provision which may be used to fund the costs of the TB program, the amount of the fee may not be sufficient to fund the program or they may not be able to increase the fee as the costs of the program increase.

In *Connell v. Superior Court*,[224] water districts argued that they lacked "sufficient" fee authority because it was not economically feasible for them to levy fees that were sufficient to pay the mandated costs. The court rejected the districts' argument that "authority" as used in the statute should be construed as a "practical ability in light of surrounding economic circumstances" because that construction cannot be reconciled with the plain language of section 17556, and would create a vague standard not capable of reasonable adjudication. The court also said that nothing in the fee authority statute in that case (Wat. Code, § 35470) limited the authority of the districts to levy fees "sufficient" to cover their costs. Thus, the court concluded that the plain language of section 17556 made the fee authority issue solely a question of law, and that the water districts could not be reimbursed due to that fee authority.[225] The *Connell* court determined that "the plain language of the statute [Gov. Code, § 17556, subd. (d)] precludes reimbursement where the local agency has the authority, i.e., the right or the power, to levy fees sufficient to cover the costs of the state-mandated program."[226] However, the Proposition 218

---

[224] *Connell v. Superior Court, supra,* 59 Cal.App.4th 382.

[225] *Connell v. Superior Court, supra,* 59 Cal.App.4th 382, 398-402.

[226] *Id.* at page 401.

election requirement is not like the economic hurdle to fees in *Connell*. Absent compliance with the Proposition 218 election and other procedures, there is no legal authority to impose or raise fees within the meaning of Government Code section 17556(d). The voting requirement of Proposition 218 does not impose a mere practical or economic hurdle, as in *Connell*, but a legal and constitutional one. Without voter or property owner approval, the local agency lacks the "authority, i.e., the right or power, to levy fees sufficient to cover the costs of the state-mandated program."[227]

For these reasons, staff finds that local agencies do not have fee authority that is sufficient within the meaning of Government Code section 17556(d) to deny the test claim since the fee or assessment is conditioned on voter or property-owner approval under Proposition 218 (article XIII D). This conclusion is consistent with other recent test claim decisions.[228] However, the parameters and guidelines should identify a fee or assessment imposed pursuant to Health and Safety Code section 101325, at any time during the reimbursement period, as revenue that may offset the claimant's costs in performing the mandated activities.

3. Current State Funding For TB Control Activities Is Not Authorized for Use to Fund the Costs of the State Mandated New Program or Higher Level of Service.

State funding is currently being provided by the state for activities relating to TB control including "food, shelter, incentives and enabler funds reimbursement" and reimbursement for civil detention. Claimant provided information indicating that, at least for 2010, the state provided about 89 percent of the county's TB control costs.[229] Reimbursement is available for

---

[227] *Connell v. Superior Court, supra,* 59 Cal.App.4th 382, 401.

[228] The issue of whether a local agency has sufficient fee authority for the mandated activities under Government Code section 17556(d), in light of the voter approval requirement for fees under article XIII D (Proposition 218) was decided by the Commission in *Municipal Storm Water and Urban Runoff Discharges* (03-TC-04, 03-TC-19, 03-TC-20, 03-TC-21) on July 30, 2009, and in *Discharge of Stormwater Runoff - Order No. R9-2007-0001*(07-TC-09) on March 26, 2010. In those test claim decisions, the Commission found that a local agency does not have sufficient fee authority within the meaning of Government Code section 17556 if the fee or assessment is contingent on the outcome of an election by voters or property owners. These decisions are being challenged on the issue of fee authority sufficiency in light of Proposition 218, among other issues, and are set for hearing later this summer. (*State of California Department of Finance, State Water Resources Control Board, et al v. Commission on State Mandates*, *County of Los Angeles, et al. Los Angeles County Superior Court*, Case No. BS130730 [Municipal Storm Water and Urban Runoff Discharges (03-TC-04, 03-TC-19, 03-TC-20, and 03-TC-21)], *State of California Department of Finance, State Water Resources Control Board, et al. v. Commission on State Mandates and County of San Diego, et al.,* Sacramento County Superior Court, Case No. 34-2010-80000604 [Discharge of Stormwater Runoff (07-TC-09)].)

[229] In 2010 claimant had $5,144,431 in unspecified TB control related expenses. The state provided $4, 579, 366 and the claimant absorbed $565,066 of the costs. (See Claimant, response to request for additional information, May 16, 2011, p.1.)

the cost of detentions for isolation (Health and Safety Code section 121365(d)) and completion of therapy (Health and Safety Code section 121365(e)).

However, these funds are specifically prohibited from being "dispersed to, or used by, correctional facilities" (Health and Safety Code section 121368). In addition, based on the comments submitted to the Commission by DPH, the costs of the LHO notification of and coordination with parole agents and parole officers, the activities imposed on local detention facilities, or the provision of counsel for non-indigent persons subject to an order to detain, do not appear to be authorized uses of the funds currently distributed by the state. These are the activities that staff finds to be new and subject to reimbursement pursuant to article XIII B, section 6 of the California Constitution.

CONCLUSION

Staff finds that Health and Safety Code sections 121361 and 121362 and 121366 as added or amended by Statutes 1993, chapter 676, Statutes 1994, chapter 685, Statutes 1997, chapter 116, and Statutes 2002, chapter 763 mandate a new program or higher level of service for counties and cities and within the meaning of article XIII B, section 6 of the California Constitution, and impose costs mandated by the state pursuant to Government Code section 17514, subject to offsetting revenues described in the analysis above, only for the following activities:

- For local detention facilities to:
    - Submit notification and a written treatment plan that includes the information required by Health and Safety Code section 121362 to the LHO when a person with active TB or reasonably believed to have active TB is discharged or released from the detention facility; and
    - Submit notification and a written treatment plan that includes the information required by Health and Safety Code section 121362 to the LHO and the medical officer of the local detention facility receiving the person when a person with active TB or reasonably believed to have active TB is transferred to a local detention facility in another jurisdiction.
- For LHOs to:
    - Review for approval within 24 hours of receipt only those treatment plans submitted by a health facility; and
    - Notify the medical officer of a parole region or a physician or surgeon designated by the Department of Corrections when there are reasonable grounds to believe that a parolee has active TB and ceases treatment for TB.[230]

[230] With the exception of preparing the written treatment plans, the other activities requested by the claimant pursuant to sections 121361 and 121362 may be considered during the adoption of the parameters and guidelines. The Commission's regulations allow the Commission to consider and include activities in the parameters and guidelines that are reasonably necessary to comply with the mandated activities if there is substantial evidence in the record to support the finding. (Cal. Code Regs., tit. 2, § 1183.1(a)(4).)

- For counties or specified cities to provide counsel to non-indigent TB patients who are subject to an order of detention.[231]

Staff further concludes that all other statutes pled in this claim do not constitute reimbursable state-mandated programs.

Recommendation

Staff recommends the Commission adopt this staff analysis and partially approve this test claim.

[231] Health and Safety Code section 121366.

COMMENTS ON DRAFT STAFF ANALYSIS

Chapter 676, Statutes of 1993, Chapter 685, Statutes of 1994, Chapter 294, Statutes of 1997, and Chapter 763, Statutes of 2002

Claim no. CSM-03-TC-14

Tuberculosis Control

County of Santa Clara, Claimant

Test claimant County of Santa Clara (hereinafter "County") concurs with the Draft Staff Analysis ("DSA") issued by Commission staff on August 16, 2011. We urge the Commission to find in accordance with the DSA regarding which aspects of the Tuberculosis Control program are a reimbursable state mandate under Article XIII B, section 6 of the California Constitution.

CERTIFICATION

I declare under penalty of perjury under the laws of the State of California that the statements made in this document are true and correct, except as to those matters stated upon information and belief and as to those matters, I believe them to be true.

Executed this 12th day of September, 2011, at San Jose, California, by:

Juniper Downs, Lead Deputy County Counsel
County of Santa Clara

99 S.Ct. 1804
441 U.S. 418, 99 S.Ct. 1804, 60 L.Ed.2d 323
(Cite as: 441 U.S. 418, 99 S.Ct. 1804)

Supreme Court of the United States
Frank O'Neal ADDINGTON, Appellant,
v.
State of TEXAS.

No. 77-5992.
Argued Nov. 28, 1978.
Decided April 30, 1979.

In an indefinite commitment case, a probate court in Texas found that defendant was mentally ill and required hospitalization for his own welfare and protection as well as for the protection of others. The Beaumont Court of Civil Appeals, Ninth Supreme Judicial District, 546 S.W.2d 105, reversed, holding that the proper standard of proof was "beyond a reasonable doubt." The State was granted a writ of error by the Supreme Court of Texas, 557 S.W.2d 511. On grant of certiorari, the Supreme Court, Mr. Chief Justice Burger, held that to meet due process demands, the standard for use in commitment for mental illness must inform the fact finder that proof must be greater than the preponderance of evidence standard applicable to other categories of civil cases, but the reasonable-doubt standard is not constitutionally required.

Vacated and remanded.

Opinion after remand, 588 S.W.2d 569.

****1805 *418** *Syllabus* [FN*]

FN* The syllabus constitutes no part of the opinion of the Court but has been prepared by the Reporter of Decisions for the convenience of the reader. See *United States v. Detroit Timber & Lumber Co.*, 200 U.S. 321, 337, 26 S.Ct. 282, 287, 50 L.Ed. 499.

Appellant's mother filed a petition for his indefinite commitment to a state mental hospital in accordance with Texas law governing involuntary commitments. Appellant had a long history of confinements for mental and emotional disorders. The state trial court instructed the jury to determine whether, based on "clear, unequivocal and convincing evidence," appellant was mentally ill and required hospitalization for his own welfare and protection or the protection of others. Appellant contended that the trial court should have employed the "beyond a reasonable doubt" standard of proof. The jury found that appellant was mentally ill and that he required hospitalization, and the trial court ordered his commitment for an indefinite period. The Texas Court of Appeals reversed, agreeing with appellant on the standard of proof issue. The Texas Supreme Court reversed the Court of Appeals' decision and reinstated the trial court's judgment, concluding that a "preponderance of the evidence" standard of proof in a civil commitment proceeding satisfied due process and that since the trial court's improper instructions in the instant case had benefited appellant, the error was harmless.

Held : A "clear and convincing" standard of proof is required by the Fourteenth Amendment in a civil proceeding brought under state law to commit an individual involuntarily for an indefinite period to a state mental hospital. Pp. 1809-1813.

(a) The individual's liberty interest in the outcome of a civil commitment proceeding is of such weight and gravity, compared with the state's interests in providing care to its citizens who are unable, be-

cause of emotional disorders, to care for themselves and in protecting the community from the dangerous tendencies of some who are mentally ill, that due process requires the state to justify confinement by proof more substantial than a mere preponderance of the evidence. Pp. 1809-1810.

(b) Due process does not require states to use the "beyond a reasonable doubt" standard of proof applicable in criminal prosecutions and delinquency proceedings. *In re Winship*, 397 U.S. 358, 90 S.Ct. 1068, 25 L.Ed.2d 368, distinguished. The reasonable-doubt standard is inappropriate in civil commitment proceedings because, given the uncertainties of psychiatric diagnosis, it ****1806** may impose a burden the state cannot meet and thereby erect an unreasonable barrier to needed medical treatment. The state should ***419** not be required to employ a standard of proof that may completely undercut its efforts to further the legitimate interests of both the state and the patient that are served by civil commitments. Pp. 1810-1812.

(c) To meet due process demands in commitment proceedings, the standard of proof has to inform the factfinder that the proof must be greater than the preponderance-of-the-evidence standard applicable to other categories of civil cases. However, use of the term "unequivocal" in conjunction with the term "clear and convincing" in jury instructions (as included in the instructions given by the Texas state court in this case) is not constitutionally required, although states are free to use that standard. Pp. 1812-1813.

Appeal dismissed and certiorari granted; 557 S.W.2d 511, vacated and remanded.

Martha L. Boston, Austin, Tex., for appellant.

James F. Hury, Jr., Galveston, Tex., for appellee.

Joel I. Klein, Washington, D. C., for the American Psychiatric Ass'n, as amicus curiae, by special leave of Court.

Mr. Chief Justice BURGER delivered the opinion of the Court.

The question in this case is what standard of proof is required by the Fourteenth Amendment to the Constitution in a civil proceeding brought under state law to commit an ***420** individual involuntarily for an indefinite period to a state mental hospital.

I

On seven occasions between 1969 and 1975, appellant was committed temporarily, Tex.Rev.Civ.Stat.Ann., Arts. 5547-31 to 5547-39 (Vernon 1958 and Supp. 1978-1979), to various Texas state mental hospitals and was committed for indefinite periods, Arts. 5547-40 to 5547-57, to Austin State Hospital on three different occasions. On December 18, 1975, when appellant was arrested on a misdemeanor charge of "assault by threat" against his mother, the county and state mental health authorities therefore were well aware of his history of mental and emotional difficulties.

Appellant's mother filed a petition for his indefinite commitment in accordance with Texas law. The county psychiatric examiner interviewed appellant while in custody and after the interview issued a Certificate of Medical Examination for Mental Illness. In the certificate, the examiner stated his opinion that appellant was "mentally ill and require[d] hospitalization in a mental hospital." Art. 5547-42 (Vernon 1958).

Appellant retained counsel and a trial was held before a jury to determine in accord with the statute:

"(1) whether the proposed patient is mentally ill, and if so

"(2) whether he requires hospitalization in a mental hospital for his own welfare and protection or the protection of others, and if so

"(3) whether he is mentally incompetent." Art. 5547-51 (Vernon 1958).

The trial on these issues extended over six days.

The State offered evidence that appellant suffered from serious delusions, that he often had threatened to injure both of his parents and others, that he had been involved in several ***421** assaultive episodes while hospitalized and that he had caused substantial property damage both at his own apartment and at his parents' home. From these undisputed facts, two psychiatrists, who qualified as experts, expressed opinions that appellant suffered from psychotic schi-

zophrenia and that he had paranoid tendencies. They also expressed medical opinions that appellant was probably dangerous both to himself and to others. They explained that appellant required hospitalization in a closed area to treat his condition because in the past he had refused to attend ****1807** outpatient treatment programs and had escaped several times from mental hospitals.

Appellant did not contest the factual assertions made by the State's witnesses; indeed, he conceded that he suffered from a mental illness. What appellant attempted to show was that there was no substantial basis for concluding that he was probably dangerous to himself or others.

The trial judge submitted the case to the jury with the instructions in the form of two questions:

"1. Based on clear, unequivocal and convincing evidence, is Frank O'Neal Addington mentally ill?

"2. Based on clear, unequivocal and convincing evidence, does Frank O'Neal Addington require hospitalization in a mental hospital for his own welfare and protection or the protection of others?"

Appellant objected to these instructions on several grounds, including the trial court's refusal to employ the "beyond a reasonable doubt" standard of proof.

The jury found that appellant was mentally ill and that he required hospitalization for his own or others' welfare. The trial court then entered an order committing appellant as a patient to Austin State Hospital for an indefinite period.

Appellant appealed that order to the Texas Court of Civil Appeals, arguing, among other things, that the standards for commitment violated his substantive due process rights and that any standard of proof for commitment less than that ***422** required for criminal convictions, *i. e.,* beyond a reasonable doubt, violated his procedural due process rights. The Court of Civil Appeals agreed with appellant on the standard-of-proof issue and reversed the judgment of the trial court. Because of its treatment of the standard of proof that court did not consider any of the other issues raised in the appeal.

On appeal, the Texas Supreme Court reversed the Court of Civil Appeals' decision. 557 S.W.2d 511. In so holding, the Supreme Court relied primarily upon its previous decision in *State v. Turner*, 556 S.W.2d 563 (1977), cert. denied, 435 U.S. 929, 98 S.Ct. 1499, 55 L.Ed.2d 525 (1978).

In *Turner*, the Texas Supreme Court held that a "preponderance of the evidence" standard of proof in a civil commitment proceeding satisfied due process. The court declined to adopt the criminal law standard of "beyond a reasonable doubt" primarily because it questioned whether the State could prove by that exacting standard that a particular person would or would not be dangerous in the future. It also distinguished a civil commitment from a criminal conviction by noting that under Texas law the mentally ill patient has the right to treatment, periodic review of his condition, and immediate release when no longer deemed to be a danger to himself or others. Finally, the *Turner* court rejected the "clear and convincing" evidence standard because under Texas rules of procedure juries could be instructed only under a beyond-a-reasonable-doubt or a preponderance standard of proof.

Reaffirming *Turner*, the Texas Supreme Court in this case concluded that the trial court's instruction to the jury, although not in conformity with the legal requirements, had benefited appellant, and hence the error was harmless. Accordingly, the court reinstated the judgment of the trial court.

[1] We noted probable jurisdiction. 435 U.S. 967, 98 S.Ct. 1604, 56 L.Ed.2d 58. After oral argument it became clear that no challenge to the constitutionality of any Texas statute was presented. Under 28 U.S.C. § 1257(2) no appeal is authorized; accordingly, construing***423** the papers filed as a petition for a writ of certiorari, we now grant the petition. [FN1]

FN1. See *Kulko v. California Superior Court*, 436 U.S. 84, 98 S.Ct. 1690, 56 L.Ed.2d 132 (1978); *Hanson v. Denckla*, 357 U.S. 235, 78 S.Ct. 1228, 2 L.Ed.2d 1283 (1958); *May v. Anderson*, 345 U.S. 528, 72 S.Ct. 840, 97 L.Ed. 1221 (1953). As in those cases, we continue to refer to the parties as appellant and appellee. See *Kulko v. California Superior Court, supra*, 436 U.S., at 90

n. 4, 98 S.Ct., at 1696.

****1808** II

[2] The function of a standard of proof, as that concept is embodied in the Due Process Clause and in the realm of factfinding, is to "instruct the factfinder concerning the degree of confidence our society thinks he should have in the correctness of factual conclusions for a particular type of adjudication." *In re Winship*, 397 U.S. 358, 370, 90 S.Ct. 1068, 1076, 25 L.Ed.2d 368 (1970) (Harlan, J., concurring). The standard serves to allocate the risk of error between the litigants and to indicate the relative importance attached to the ultimate decision.

Generally speaking, the evolution of this area of the law has produced across a continuum three standards or levels of proof for different types of cases. At one end of the spectrum is the typical civil case involving a monetary dispute between private parties. Since society has a minimal concern with the outcome of such private suits, plaintiff's burden of proof is a mere preponderance of the evidence. The litigants thus share the risk of error in roughly equal fashion.

In a criminal case, on the other hand, the interests of the defendant are of such magnitude that historically and without any explicit constitutional requirement they have been protected by standards of proof designed to exclude as nearly as possible the likelihood of an erroneous judgment.[FN2] In the ***424** administration of criminal justice, our society imposes almost the entire risk of error upon itself. This is accomplished by requiring under the Due Process Clause that the state prove the guilt of an accused beyond a reasonable doubt. *In re Winship, supra*.

FN2. Compare Morano, A Reexamination of the Development of the Reasonable Doubt Rule, 55 B.U.L.Rev. 507 (1975) (reasonable doubt represented a less strict standard than previous common-law rules), with May, Some Rules of Evidence, 10 Am.L.Rev. 642 (1875) (reasonable doubt constituted a stricter rule than previous ones). See generally Underwood, The Thumb on the Scales of Justice: Burdens of Persuasion in Criminal Cases, 86 Yale L.J. 1299 (1977).

The intermediate standard, which usually employs some combination of the words "clear," "cogent," "unequivocal," and "convincing," is less commonly used, but nonetheless "is no stranger to the civil law." *Woodby v. INS*, 385 U.S. 276, 285, 87 S.Ct. 483, 488, 17 L.Ed.2d 362 (1966). See also McCormick, Evidence § 320 (1954); 9 J. Wigmore, Evidence § 2498 (3d ed. 1940). One typical use of the standard is in civil cases involving allegations of fraud or some other quasi-criminal wrongdoing by the defendant. The interests at stake in those cases are deemed to be more substantial than mere loss of money and some jurisdictions accordingly reduce the risk to the defendant of having his reputation tarnished erroneously by increasing the plaintiff's burden of proof. Similarly, this Court has used the "clear, unequivocal and convincing" standard of proof to protect particularly important individual interests in various civil cases. See, *e. g., Woodby v. INS, supra*, at 285, 87 S.Ct., at 487 (deportation); *Chaunt v. United States*, 364 U.S. 350, 353, 81 S.Ct. 147, 149, 5 L.Ed.2d 120 (1960) (denaturalization); *Schneiderman v. United States*, 320 U.S. 118, 125, 159, 63 S.Ct. 1333, 1336, 1353, 87 L.Ed. 1796 (1943) (denaturalization).

Candor suggests that, to a degree, efforts to analyze what lay jurors understand concerning the differences among these three tests or the nuances of a judge's instructions on the law may well be largely an academic exercise; there are no directly relevant empirical studies.[FN3] Indeed, the ultimate truth as to how the standards of proof affect decisionmaking may well be ***425** unknowable, given that factfinding is a process shared by countless thousands of ****1809** individuals throughout the country. We probably can assume no more than that the difference between a preponderance of the evidence and proof beyond a reasonable doubt probably is better understood than either of them in relation to the intermediate standard of clear and convincing evidence. Nonetheless, even if the particular standard-of-proof catchwords do not always make a great difference in a particular case, adopting a "standard of proof is more than an empty semantic exercise." *Tippett v. Maryland*, 436 F.2d 1153, 1166 (CA4 1971) (Sobeloff, J., concurring in part and dissenting in part), cert. dismissed *sub nom. Murel v. Baltimore City Criminal Court*, 407 U.S. 355, 92 S.Ct. 2091, 32 L.Ed.2d 791 (1972). In cases involving individual rights, whether criminal or civil, "[t]he standard of proof [at a minimum] reflects the value society places on individual liberty." 436 F.2d, at 1166.

FN3. There have been some efforts to evaluate the effect of varying standards of proof on jury factfinding, see, *e. g.*, L. S. E. Jury Project, Juries and the Rules of Evidence, 1973 Crim.L.Rev. 208, but we have found no study comparing all three standards of proof to determine how juries, real or mock, apply them.

III

[3] In considering what standard should govern in a civil commitment proceeding, we must assess both the extent of the individual's interest in not being involuntarily confined indefinitely and the state's interest in committing the emotionally disturbed under a particular standard of proof. Moreover, we must be mindful that the function of legal process is to minimize the risk of erroneous decisions. See *Mathews v. Eldridge*, 424 U.S. 319, 335, 96 S.Ct. 893, 903, 47 L.Ed.2d 18 (1976); *Speiser v. Randall*, 357 U.S. 513, 525-526, 78 S.Ct. 1332, 1341-1342, 2 L.Ed.2d 1460 (1958).

A

This Court repeatedly has recognized that civil commitment for any purpose constitutes a significant deprivation of liberty that requires due process protection. See, *e. g., Jackson v. Indiana*, 406 U.S. 715, 92 S.Ct. 1845, 32 L.Ed.2d 435 (1972); *Humphrey v. Cady*, 405 U.S. 504, 92 S.Ct. 1048, 31 L.Ed.2d 394 (1972); *In re Gault*, 387 U.S. 1, 87 S.Ct. 1428, 18 L.Ed.2d 527 (1967); *Specht v. Patterson*, 386 U.S. 605, 87 S.Ct. 1209, 18 L.Ed.2d 326 (1967). Moreover, it is indisputable that involuntary commitment to a mental hospital after a finding ***426** of probable dangerousness to self or others can engender adverse social consequences to the individual. Whether we label this phenomena "stigma" or choose to call it something else is less important than that we recognize that it can occur and that it can have a very significant impact on the individual.

[4][5] The state has a legitimate interest under its *parens patriae* powers in providing care to its citizens who are unable because of emotional disorders to care for themselves; the state also has authority under its police power to protect the community from the dangerous tendencies of some who are mentally ill. Under the Texas Mental Health Code, however, the State has no interest in confining individuals involuntarily if they are not mentally ill or if they do not pose some danger to themselves or others. Since the preponderance standard creates the risk of increasing the number of individuals erroneously committed, it is at least unclear to what extent, if any, the state's interests are furthered by using a preponderance standard in such commitment proceedings.

The expanding concern of society with problems of mental disorders is reflected in the fact that in recent years many states have enacted statutes designed to protect the rights of the mentally ill. However, only one state by statute permits involuntary commitment by a mere preponderance of the evidence, Miss.Code Ann. § 41-21-75 (1978 Supp.), and Texas is the only state where a court has concluded that the preponderance-of-the-evidence standard satisfies due process. We attribute this not to any lack of concern in those states, but rather to a belief that the varying standards tend to produce comparable results. As we noted earlier, however, standards of proof are important for their symbolic meaning as well as for their practical effect.

****1810** [6] At one time or another every person exhibits some abnormal behavior which might be perceived by some as symptomatic of a mental or emotional disorder, but which is in fact within ***427** a range of conduct that is generally acceptable. Obviously, such behavior is no basis for compelled treatment and surely none for confinement. However, there is the possible risk that a factfinder might decide to commit an individual based solely on a few isolated instances of unusual conduct. Loss of liberty calls for a showing that the individual suffers from something more serious than is demonstrated by idiosyncratic behavior. Increasing the burden of proof is one way to impress the factfinder with the importance of the decision and thereby perhaps to reduce the chances that inappropriate commitments will be ordered.

The individual should not be asked to share equally with society the risk of error when the possible injury to the individual is significantly greater than any possible harm to the state. We conclude that the individual's interest in the outcome of a civil commitment proceeding is of such weight and gravity that due process requires the state to justify confinement by proof more substantial than a mere preponderance of the evidence.

B

Appellant urges the Court to hold that due process requires use of the criminal law's standard of proof-"beyond a reasonable doubt." He argues that the rationale of the *Winship* holding that the criminal law standard of proof was required in a delinquency proceeding applies with equal force to a civil commitment proceeding.

In *Winship*, against the background of a gradual assimilation of juvenile proceedings into traditional criminal prosecutions, we declined to allow the state's "civil labels and good intentions" to "obviate the need for criminal due process safeguards in juvenile courts." 397 U.S., at 365-366, 90 S.Ct., at 1073. The Court saw no controlling difference in loss of liberty and stigma between a conviction for an adult and a delinquency adjudication for a juvenile. *Winship* recognized that the basic issue-whether the individual in fact committed a criminal act-was ***428** the same in both proceedings. There being no meaningful distinctions between the two proceedings, we required the state to prove the juvenile's act and intent beyond a reasonable doubt.

There are significant reasons why different standards of proof are called for in civil commitment proceedings as opposed to criminal prosecutions. In a civil commitment state power is not exercised in a punitive sense.[FN4] Unlike the delinquency proceeding in *Winship*, a civil commitment proceeding can in no sense be equated to a criminal prosecution. Cf. *Woodby v. INS*, 385 U.S., at 284-285, 87 S.Ct., at 487-488.

> FN4. The State of Texas confines only for the purpose of providing care designed to treat the individual. As the Texas Supreme Court said in *State v. Turner*, 556 S.W.2d 563, 566 (1977):
>
> "The involuntary mental patient is entitled to treatment, to periodic and recurrent review of his mental condition, and to release at such time as he no longer presents a danger to himself or others."

In addition, the "beyond a reasonable doubt" standard historically has been reserved for criminal cases. This unique standard of proof, not prescribed or defined in the Constitution, is regarded as a critical part of the "moral force of the criminal law," *In re Winship*, 397 U.S., at 364, 90 S.Ct., at 1072, and we should hesitate to apply it too broadly or casually in noncriminal cases. Cf. *ibid.*

The heavy standard applied in criminal cases manifests our concern that the risk of error to the individual must be minimized even at the risk that some who are guilty might go free. *Patterson v. New York*, 432 U.S. 197, 208, 97 S.Ct. 2319, 2326, 53 L.Ed.2d 281 (1977). The full force of that idea does not apply to a civil commitment. It may be true that an erroneous commitment is sometimes as undesirable as an erroneous conviction, 5 J. Wigmore, Evidence § 1400 ****1811** (Chadbourn rev. 1974). However, even though an erroneous confinement should be avoided in the first instance, the layers of professional review and observation of the patient's condition, and the concern of family and ***429** friends generally will provide continuous opportunities for an erroneous commitment to be corrected. Moreover, it is not true that the release of a genuinely mentally ill person is no worse for the individual than the failure to convict the guilty. One who is suffering from a debilitating mental illness and in need of treatment is neither wholly at liberty nor free of stigma. See Chodoff, The Case for Involuntary Hospitalization of the Mentally Ill, 133 Am.J.Psychiatry 496, 498 (1976); Schwartz, Myers & Astrachan, Psychiatric Labeling and the Rehabilitation of the Mental Patient, 31 Arch.Gen.Psychiatry 329, 334 (1974). It cannot be said, therefore, that it is much better for a mentally ill person to "go free" than for a mentally normal person to be committed.

Finally, the initial inquiry in a civil commitment proceeding is very different from the central issue in either a delinquency proceeding or a criminal prosecution. In the latter cases the basic issue is a straightforward factual question-did the accused commit the act alleged? There may be factual issues to resolve in a commitment proceeding, but the factual aspects represent only the beginning of the inquiry. Whether the individual is mentally ill and dangerous to either himself or others and is in need of confined therapy turns on the *meaning* of the facts which must be interpreted by expert psychiatrists and psychologists. Given the lack of certainty and the fallibility of psychiatric diagnosis, there is a serious question as to whether a state could ever prove beyond a reasonable doubt that an individual is both mentally ill and likely to be dangerous. See *O'Connor v. Donaldson*, 422 U.S. 563, 584, 95 S.Ct. 2486, 2498, 45 L.Ed.2d 396

(1975) (concurring opinion); *Blocker v. United States*, 110 U.S.App.D.C. 41, 48-49, 288 F.2d 853, 860-861 (1961) (opinion concurring in result). See also *Tippett v. Maryland*, 436 F.2d, at 1165 (Sobeloff, J., concurring in part and dissenting in part); Note, Civil Commitment of the Mentally Ill: Theories and Procedures, 79 Harv.L.Rev. 1288, 1291 (1966); Note, Due Proces and the Development of "Criminal" Safeguards ***430** in Civil Commitment Adjudications, 42 Ford.L.Rev. 611, 624 (1974).

The subtleties and nuances of psychiatric diagnosis render certainties virtually beyond reach in most situations. The reasonable-doubt standard of criminal law functions in its realm because there the standard is addressed to specific, knowable facts. Psychiatric diagnosis, in contrast, is to a large extent based on medical "impressions" drawn from subjective analysis and filtered through the experience of the diagnostician. This process often makes it very difficult for the expert physician to offer definite conclusions about any particular patient. Within the medical discipline, the traditional standard for "factfinding" is a "reasonable medical certainty." If a trained psychiatrist has difficulty with the categorical "beyond a reasonable doubt" standard, the untrained lay juror-or indeed even a trained judge-who is required to rely upon expert opinion could be forced by the criminal law standard of proof to reject commitment for many patients desperately in need of institutionalized psychiatric care. See *ibid.* Such "freedom" for a mentally ill person would be purchased at a high price.

That practical considerations may limit a constitutionally based burden of proof is demonstrated by the reasonable doubt standard, which is a compromise between what is possible to prove and what protects the rights of the individual. If the state was required to guarantee error-free convictions, it would be required to prove guilt beyond all doubt. However, "[d]ue process does not require that every conceivable step be taken, at whatever cost, to eliminate the possibility of convicting an innocent person." *Patterson v. New York, supra*, 432 U.S., at 208, 97 S.Ct., at 2326. Nor should the state be required to employ a standard of proof that may completely undercut its ****1812** efforts to further the legitimate interests of both the state and the patient that are served by civil commitments.

[7][8] That some states have chosen-either legislatively or judicially***431** -to adopt the criminal law standard [FN5] gives no assurance that the more stringent standard of proof is needed or is even adaptable to the needs of all states. The essence of federalism is that states must be free to develop a variety of solutions to problems and not be forced into a common, uniform mold. As the substantive standards for civil commitment may vary from state to state, procedures must be allowed to vary so long as they meet the constitutional minimum. See Monahan & Wexler, A Definite Maybe: Proof and Probability in Civil Commitment, 2 Law & Human Behavior 37, 41-42 (1978); Share, The Standard of Proof in Involuntary Civil Commitment Proceedings, 1977 Detroit College L.Rev. 209, 210. We conclude that it is unnecessary to require states to apply the strict, criminal standard.

FN5. Haw.Rev.Stat. § 334-60(b)(4)(I) (Supp. 1978); Idaho Code § 66-329(i) (Supp. 1978); Kan.Stat.Ann. § 59-2917 (1976); Mont.Rev.Codes Ann. § 38-1305(7) (1977 Supp.); Okla.Stat., Tit. 43A, § 54.1(C) (1978 Supp.); Ore.Rev.Stat. § 426.130 (1977); Utah Code Ann. § 64-7-36(6) (1953); Wis.Stat. § 51.20(14)(e) (Supp.1978-1979); *Superintendent of Worcester State Hospital v. Hagberg*, 374 Mass. 271, 372 N.E.2d 242 (1978); *Proctor v. Butler*, 117 N.H. 927, 380 A.2d 673 (1977); *In re Hodges*, 325 A.2d 605 (D.C.App.1974); *Lausche v. Commissioner of Public Welfare*, 302 Minn. 65, 225 N.W.2d 366 (1974), cert. denied, 420 U.S. 993, 95 S.Ct. 1430, 43 L.Ed.2d 674 (1975). See also *In re J. W.*, 44 N.J.Super. 216, 130 A.2d 64 (App.Div.), cert. denied, 24 N.J. 465, 132 A.2d 558 (1957); *Denton v. Commonwealth*, 383 S.W.2d 681 (Ky.App.1964) (dicta).

C

Having concluded that the preponderance standard falls short of meeting the demands of due process and that the reasonable-doubt standard is not required, we turn to a middle level of burden of proof that strikes a fair balance between the rights of the individual and the legitimate concerns of the state. We note that 20 states, most by statute, employ the standard of "clear and convincing" evidence; [FN6] 3 states use ***432** "clear, *cogent*, and convincing" evidence; [FN7] and 2 states require "clear, *unequivocal* and convincing" evidence.[FN8]

FN6. FN8. Ala.Code § 22-52-10(a) (Supp.1978); Tenn.Code Ann. § 33-604(d) (Supp.1978).

In *Woodby v. INS*, 385 U.S. 276, 87 S.Ct. 483, 17 L.Ed.2d 362 (1966), dealing with deportation, and *Schneiderman v. United States*, 320 U.S. 118, 125, 159, 63 S.Ct. 1333, 1336, 1353, 87 L.Ed. 1796, dealing with denaturalization, the Court held that "clear, unequivocal, and convincing" evidence was the appropriate standard of proof. The term "unequivocal," taken by itself, means proof that admits of no doubt,[FN9] a burden approximating, if not exceeding, that used in criminal cases. The issues in *Schneiderman* and *Woodby* were basically factual and therefore susceptible of objective proof and the consequences to the individual were unusually drastic-loss of citizenship and expulsion from the United States.

FN9. See Webster's Third New International Dictionary 2494 (1961).

[9][10][11] We have concluded that the reasonable-doubt standard is inappropriate in civil commitment proceedings because, given****1813** the uncertainties of psychiatric diagnosis, it may impose a burden the state cannot meet and thereby erect an unreasonable barrier to needed medical treatment. Similarly, we conclude that use of the term "unequivocal" is not constitutionally required, although the states are free to use that standard. To meet due process demands, the standard has to ***433** inform the factfinder that the proof must be greater than the preponderance-of-the-evidence standard applicable to other categories of civil cases.

We noted earlier that the trial court employed the standard of "clear, unequivocal and convincing" evidence in appellant's commitment hearing before a jury. That instruction was constitutionally adequate. However, determination of the precise burden equal to or greater than the "clear and convincing" standard which we hold is required to meet due process guarantees is a matter of state law which we leave to the Texas Supreme Court.[FN10] Accordingly, we remand the case for further proceedings not inconsistent with this opinion.

FN10. We noted earlier the court's holding on harmless error. See *supra*, at 1087.

Vacated and remanded.

Mr. Justice POWELL took no part in the consideration or decision of this case.

END OF DOCUMENT

Supreme Court of the United States
Charles M. ATKINS, Commissioner of the Massachusetts Department of Public Welfare, Petitioner
v.
Gill PARKER et al.
Gill PARKER, et al., Petitioners
v.
John R. BLOCK, Secretary, Department of Agriculture, et al.

Nos. 83-1660, 83-6381.
Argued Nov. 27, 1984.
Decided June 4, 1985.

The United States Secretary of Agriculture and the Massachusetts Commissioner of Public Welfare appealed from a judgment entered by the United States District Court for the District of Massachusetts, Frank H. Freedman, J., holding that they had deprived food-stamp recipients of due process of law when they reduced food stamp benefits without first providing recipients with constitutionally adequate notice. The Court of Appeals, 722 F.2d 933, affirmed in part, reversed in part, and remanded. Recipients who had petitioned for relief sought review of the Court of Appeals' modification of the District Court's remedy, and the Massachusetts Commissioner of Public Welfare cross-petitioned for writ of certiorari seeking review of holding on liability. Both the petition and cross petition were granted. The Supreme Court, Justice Stevens, held that (1) notice mailed by Massachusetts Department of Public Welfare describing in general terms effect of Congress' amendment of Food Stamp Act to reduce earned-income disregard using computing eligibility for food stamps complied with applicable statute and regulations and did not violate the due process clause.

Reversed.

Justice Brennan, dissented and filed an opinion in which Justice Marshall partially joined.

Justice Marshall dissented and filed an opinion.

Even if it was assumed that mass change in computing eligibility for food stamps arising from Congress' amendment of Food Stamp Act [7 U.S.C.A. § 2014(e)] increased risk of erroneous reductions in benefits, that assumption would not support claim that notice mailed by Massachusetts Department of Public Welfare to all food stamp recipients in Massachusetts, plainly informing each household of opportunity to request a fair hearing and of right to have its benefit level frozen if a hearing was requested, was inadequate in view of fact that every affected recipient who contacted Department of Public Welfare had his or her benefit level frozen, and received a fair hearing before any loss of benefit occurred; thus, Department's procedures provided adequate protection against any deprivation based on an unintended mistake. Food Stamp Act of 1964, § 5(e), 7 U.S.C.A. § 2014(e).

Participants in food-stamp program had no greater right to advance notice of legislative amendment to Food Stamp Act [7 U.S.C.A. § 2014(e)] reducing earned-income disregard used in computing eligibility for food stamps than did any other voters; thus, because substantive reduction in level of recipients' benefits was direct consequence of statutory amendment, recipients had no basis for challenging procedure that caused them to receive a different, less valuable property interest after amendment became effective. Food Stamp Act of 1964, § 5(e), 7 U.S.C.A. § 2014(e).

Notice mailed by Massachusetts Department of Public Welfare to all food-stamp recipients in Massachusetts after Congress had amended the Food Stamp Act [7 U.S.C.A. § 2014(e)] to reduce earned-income disregard used in computing eligibility for food stamps advising recipients that reduction in earned-income disregard might result in either a reduction or termination of their benefits, that they had a right to request a hearing, and that their benefits would be reinstated if a hearing was requested within ten days of notice satisfied due process, since Congress could presume that such a notice relative to a matter as important as a change in household's food-stamp allotment would prompt an appropriate inquiry if it was not fully understood. U.S.C.A. Const.Amends. 5, 14; Food Stamp Act of 1964, § 5(e), 7 U.S.C.A. § 2014(e).

****2521 *115** *Syllabus* [FN*]

FN* The syllabus constitutes no part of the opinion of the Court but has been prepared by the Reporter of Decisions for the convenience of the reader. See *United States v. Detroit Lumber Co.*, 200 U.S. 321, 337, 26 S.Ct. 282, 287, 50 L.Ed. 499.

In 1981, Congress amended the Food Stamp Act to reduce from 20 percent to 18 percent the earned-income disregard used in computing eligibility for food stamps. Thereafter, the Massachusetts Department of Public Welfare (Department) mailed a notice to all food-stamp recipients in the State with earned income advising them that the reduction in the earned-income disregard might result in either a reduction or termination of their benefits, that they had a right to request a hearing, and that their benefits would be reinstated if a hearing was requested within 10 days of the notice. Petitioners in No. 83-6381 (hereafter petitioners), recipients of the notice, brought a class action in Federal District Court, alleging that the notice was inadequate and seeking injunctive relief. After the court issued a temporary injunction, the Department sent a second notice similar to but somewhat more extensive than the first ****2522** notice. Petitioners also attacked the adequacy of this notice. The court again ruled in petitioners' favor and held that the notice violated the Due Process Clause of the Fourteenth Amendment. The Court of Appeals agreed.

Held:

1. The second notice complied with the statute and regulations. The relevant language of 7 U.S.C. § 2020(e)(10)-which does not itself mandate any notice at all but merely assumes that a hearing request by a household aggrieved by a state agency's action will be preceded by "individual notice of agency action"-cannot be fairly construed as a command to give notice of a general change in the law. The legislative history does not suggest that Congress intended to eliminate the distinction between requiring advance notice of an "adverse action" based on the particular facts of an individual case and the absence of any requirement of individual notice of a "mass change" in the law. And the notice in question complied with the applicable regulation requiring individual ***116** notices of a "mass change" but not an adverse action notice when benefits are reduced or terminated as a result of a "mass change." Pp. 2526-2528.

2. The second notice did not violate the Due Process Clause. Pp. 2528-2531.

(a) Even if it is assumed that the mass change increased the risk of erroneous reductions in benefits, that assumption does not support the claim that the notice was inadequate. The notice plainly informed each household of the opportunity to request a fair hearing and the right to have its benefit level frozen if a hearing was requested. Pp. 2529-2530.

(b) This case does not concern the procedural fairness of individual eligibility determinations, but rather involves a legislatively mandated substantive change in the scope of the entire food-stamp program. The procedural component of the Due Process Clause does not impose a constitutional limitation on Congress' power to make such a change. A welfare recipient is not deprived of due process when Congress adjusts benefit levels; the legislative process provides all the process that is due. Here, the participants in the food-stamp program had no greater right to advance notice of the change in the law than did any other

voters. Because the substantive reduction in the level of petitioners' benefits was the direct result of the statutory amendment, they have no basis for challenging the procedure that caused them to receive a different, less valuable property interest after the amendment became effective. As a matter of constitutional law, there can be no doubt concerning the sufficiency of the notice describing the effect of the amendment in general terms. Pp. 2530-2531.

722 F.2d 933 (CA 1 1983), reversed.

Samuel A. Alito argued the cause for the federal respondent in No. 83-6381 in support of petitioner in No. 83-1660. With him on the briefs were *Solicitor General Lee, Acting Assistant Attorney General Willard, Deputy Solicitor General Geller, Leonard Schaitman,* and *Bruce G. Forrest. Ellen L. Janos,* Assistant Attorney General of Massachusetts, argued the cause for petitioner in No. 83-1660. With her on the briefs were *Francis X. Bellotti,* Attorney General, ***117** and *E. Michael Sloman* and *Carl Valvo,* Assistant Attorneys General.

Steven A. Hitov argued the cause for Parker et al. in both cases. With him on the briefs was *J. Paterson Rae.*†

† *Neil Hartigan,* Attorney General of Illinois, *Linley E. Pearson,* Attorney General of Indiana, *LeRoy S. Zimmerman,* Attorney General of Pennsylvania, *Bronson C. La Follette,* Attorney General of Wisconsin, and *F. Thomas Creeron III,* Assistant Attorney General, filed a brief for the State of Illinois et al. as *amici curiae* urging reversal.

Cynthia G. Schneider filed a brief for the National Anti-Hunger Coalition as *amicus curiae* urging affirmance.

Kenneth O. Eikenberry, Attorney General, and *Charles F. Murphy,* Assistant Attorney General, filed a brief for the State of Washington as *amicus curiae.*

Justice STEVENS delivered the opinion of the Court.

In November, and again in December 1981, the Massachusetts Department of Public Welfare mailed a written notice to over 16,000 recipients advising them that a recent change in federal law might result in either a reduction or a termination of their food-stamp benefits. The notice did not purport to explain the precise impact of the change on each individual recipient. The question this case presents is whether that notice violated any federal statute or regulation, or the Due Process Clause of the Fourteenth Amendment. Unlike the District Court and the Court of Appeals, we conclude that there was no violation.

In an attempt to "permit low-income households to obtain a more nutritious diet ****2523** through normal channels of trade," [FN1] Congress created a federally subsidized food-stamp program. The Secretary of Agriculture prescribes the standards for eligibility for food stamps,[FN2] but state agencies are authorized to make individual eligibility determinations and to distribute the food stamps to eligible households, which may use them to purchase food from approved, retail food stores.[FN3] The eligibility of an individual household, and the amount of its food-stamp***118** allotment, are based on several factors, including the size of the household and its income.[FN4] Certifications of eligibility expire periodically and are renewed on the basis of applications submitted by the households.[FN5]

FN1. 7 U.S.C. § 2011.

FN2. § 2014.

FN3. §§ 2013(a), 2020(a).

FN4. § 2014.

FN5. §§ 2012(c), 2014(f), 2015(c).

Prior to 1981, federal law provided that 20 percent of the household's earned income should be deducted, or disregarded, in computing eligibility.[FN6] The purpose of the earned-income disregard was to maintain the recipients' incentive to earn and to report income. In 1981 Congress amended the Food Stamp Act to reduce this deduction from 20 percent to 18 percent.[FN7] That amendment had no effect on households with no income or with extremely low income, but caused a reduction of benefits in varying amounts, or a complete termination of benefits, for families whose income placed them close to the border between eligibility and ineligibility.[FN8]

FN6. § 2014(e) (1976 ed., Supp. II).

FN7. See 95 Stat. 360, 7 U.S.C. § 2014(e).

FN8. The Government states that it is "advised that the reductions involved did not exceed $6 per month for a four-member household if the household remained eligible for benefits." Brief for Federal Respondent 7. It does not indicate where in the record this information is located; nor does it indicate the source of the "advice."

On September 4, 1981, the Department of Agriculture issued regulations providing for the implementation of the change in the earned-income disregard and directing the States to provide notice to food-stamp recipients.[FN9] That directive indicated that the form of the notice might comply with the regulations dealing with so-called "mass changes," [FN10] ***119** rather than with the regulations dealing with individual "adverse actions." [FN11]

FN9. 46 Fed.Reg. 44722 (1981). The regulation provided that the change should begin no later than 90 days from the date of implementation, with October 1, 1981, as the last date for state agencies to begin implementation (absent a waiver).

FN10. *Ibid.* The portion of 7 CFR § 273.12(e) (1985), which discusses the notice required for mass changes, provides in relevant part:

"(e) *Mass changes.* Certain changes are initiated by the State or Federal government which may affect the entire caseload or significant portions of the caseload. These changes include adjustments to the income eligibility standards, the shelter and dependent care deductions, the Thrifty Food Plan, and the standard deduction; annual and seasonal adjustments to Social Security, SSI, and other Federal benefits, periodic adjustments to AFDC or GA payments; and other changes in the eligibility criteria based on legislative or regulatory actions.

"(2) ... (ii) A notice of adverse action is not required when a household's food stamp benefits are reduced or terminated as a result of a mass change in the public assistance grant. However, State agencies shall send individual notices to households to inform them of the change. If a household requests a fair hearing, benefits shall be continued at the former level only if the issue being appealed is that food stamp eligibility or benefits were improperly computed."

FN11. The section on adverse actions, 7 CFR § 273.13 (1985), provides in relevant part:

"(a) *Use of notice.* Prior to any action to reduce or terminate a household's benefits within the certification period, the State agency shall, except as provided in paragraph (b) of this section, provide the household timely and adequate advance notice before the adverse action is taken."

"(b) *Exemptions from notice.* Individual notices of adverse action are not required when:

"(1) The State initiates a mass change as described in § 273.12(e)."

In November, the Massachusetts Department of Public Welfare (Department) ****2524** mailed a brief, ambiguously dated notice to all food-stamp recipients with earned income advising them that the earned-income deduction had been lowered from 20 percent to 18 percent and that the change would result in either a reduction or a termination of their benefits. The notice was printed on a card, in English on one side and Spanish on the other. The notice stated that the recipient had a right to request a hearing "if you disagree with this action," and that benefits would be reinstated if a hearing was requested within 10 days of the notice.[FN12]

FN12. App. to Pet. for Cert. in No. 83-1660, pp. A. 44-A. 45; App. 3.

On December 10, 1981, petitioners in No. 83-6381 commenced this action on behalf of all Massachusetts households ***120** that had received the notice. They alleged that the notice was inadequate as a matter of law and moved for a temporary restraining order. On December 16, 1981, after certifying the

action as a class action, and after commenting that the "notice was deficient in that it failed to provide recipients with a date to determine the time in which they could appeal," the District Court enjoined the Department from reducing or terminating any benefits on the basis of that notice.[FN13]

FN13. App. to Pet. for Cert. in No. 83-1660, pp. A. 45-A. 46.

The Department, in compliance with the District Court's order, mailed supplemental benefits for the month of December to each of the 16,640 class members. It then sent out a second notice, in English and Spanish versions, dated December 26, which stated in part:

" * * * *IMPORTANT NOTICE-READ CAREFULLY* * * *

"RECENT CHANGES IN THE FOOD STAMP PROGRAM HAVE BEEN MADE IN ACCORDANCE WITH 1981 FEDERAL LAW. UNDER THIS LAW, THE EARNED INCOME DEDUCTION FOR FOOD STAMP BENEFITS HAS BEEN LOWERED FROM 20 TO 18 PERCENT. THIS REDUCTION MEANS THAT A HIGHER PORTION OF YOUR HOUSEHOLD'S EARNED INCOME WILL BE COUNTED IN DETERMINING YOUR ELIGIBILITY AND BENEFIT AMOUNT FOR FOOD STAMPS. AS A RESULT OF THIS FEDERAL CHANGE, YOUR BENEFITS WILL EITHER BE REDUCED IF YOU REMAIN ELIGIBLE OR YOUR BENEFITS WILL BE TERMINATED. (FOOD STAMP MANUAL CITATION: 106 CMR:364.400).

"*YOUR RIGHT TO A FAIR HEARING:*
"YOU HAVE THE RIGHT TO REQUEST A FAIR HEARING IF YOU DISAGREE WITH THIS ACTION.***121** IF YOU ARE REQUESTING A HEARING, YOUR FOOD STAMP BENEFITS WILL BE REINSTATED ... IF YOU HAVE QUESTIONS CONCERNING THE CORRECTNESS OF YOUR BENEFITS COMPUTATION OR THE FAIR HEARING PROCESS, CONTACT YOUR LOCAL WELFARE OFFICE. YOU MAY FILE AN APPEAL AT ANY TIME IF YOU FEEL THAT YOU ARE NOT RECEIVING THE CORRECT AMOUNT OF FOOD STAMPS." [FN14]

FN14. App. 5. Each recipient was provided with a card that he could mail to obtain a hearing; a recipient could also obtain a hearing by placing a telephone call or by asking for a hearing in person. App. to Pet. for Cert. in No. 83-1660, p. A. 48.

Petitioners filed a supplemental complaint attacking the adequacy of this notice, and again moved for a preliminary injunction. In October 1982, the District Court consolidated the hearing on that motion with the trial on the merits and again ruled in petitioners' favor. The District Court found that there was a significant risk of error in the administration of the food-stamp program, particularly with the implementation of the change in the earned-income disregard, and that the failure to provide each recipient with an adequate notice increased the risk of error. In essence, the District Court concluded that ****2525** the December notice was defective because it did not advise each household of the precise change in its benefits, or with the information necessary to enable the recipient to calculate the correct change; because it did not tell recipients whether their benefits were being reduced or terminated; and because the reading level and format of the notice made it difficult to comprehend.[FN15] Based on the ***122** premise that the statutorily mandated reduction or termination of benefits was a deprivation of property subject to the full protection of the Fourteenth Amendment,[FN16] the court held that the Due Process Clause had been violated.[FN17]

FN15. *Id.*, at A. 100. The District Court wrote:

"The risk of erroneous deprivation of benefits is increased in this case by the lack of adequate notice. The December notice did not inform the affected food stamp households of the exact action being taken, that is, whether their food stamp allotment was being reduced or terminated. There was no mention of the amount by which the benefits were being reduced. And finally, the December notice lacked the information necessary to enable the household to determine if an error had been made. Therefore, without the relevant information to determine whether an error had been made, the risk of an erroneous

deprivation is increased." *Id.*, at A. 90-A. 91.

FN16. The District Court concluded:

"It is clear that the entitlement to food stamps benefits is a property interest subject to the full protection of the Fourteenth Amendment. *Goldberg v. Kelly*, 397 U.S. 254, 90 S.Ct. 1011, 25 L.Ed.2d 287 (1970). Therefore, given the existence of a constitutionally protected property interest, the question is what process is due." *Id.*, at A. 86.

FN17. The District Court also held that the December notice violated the timely notice requirements of 7 U.S.C. § 2020(e)(10) and 7 CFR § 273.12(e)(2)(ii) (1985), App.Pet. for Cert. in No. 83-1660, p. A. 98; that the notice required to implement the earned-income disregard had to comport with 7 CFR § 273.13(a) (1985), App. to Pet. for Cert. in No. 83-1660, p. A. 98, and that the notice violated multilingual notice requirements, *id.*, at A. 104-A. 105.

As a remedy, the District Court ordered the Department "to return forthwith to each and every household in the plaintiff class all food stamp benefits lost as a result of the action taken pursuant to the December notice" between January 1, 1981, and the date the household received adequate notice, had its benefits terminated for a reason unrelated to the change in the earned-income disregard, or had its file recertified.[FN18] The District Court also ordered that all future food-stamp notices issued by the Department contain various data, including the old and new benefit amounts, and that the Department issue regulations, subject to court approval, governing the form of future food-stamp notices.[FN19]

FN18. *Id.*, at A. 101.

FN19. *Id.*, at A. 102-104.

The United States Court of Appeals for the First Circuit agreed with the District Court's constitutional holding, indicated***123** its belief that Congress could not have "intended a constitutionally deficient notice to satisfy the statutory notice requirement," and thus affirmed the District Court's holding that "the December notice failed to satisfy the notice requirements of 7 U.S.C. § 2020(e)(10) and 7 CFR § 273.12(e)(2)(ii)." *Foggs v. Block*, 722 F.2d 933, 939-940 (1983).[FN20] The Court of Appeals held, however, that the District Court had erred in ordering a reinstatement of benefits and in specifying the form of future notices. [FN21]

FN20. However, the Court of Appeals disagreed that the December notice failed to satisfy the notice requirements of 7 CFR § 273.13(a) (1985). *Foggs v. Block*, 722 F.2d, at 940.

FN21. *Id.*, at 941.

Petitioners in No. 83-6381 sought review of the Court of Appeals' modification of the District Court's remedy, and the Department, in No. 83-1660, cross-petitioned for a writ of certiorari seeking review of the holding on liability. We granted both the petition and the cross-petition, and invited the Solicitor General to participate in the argument. 467 U.S. 1250, 104 S.Ct. 3532, 82 L.Ed.2d 838 (1984). We conclude that the notice was lawful, and therefore have no occasion to discuss the remedy issue that the petition in No. 83-6381 presents. ****2526** Because there would be no need to decide the constitutional question if we found a violation of either the statute or the regulations,[FN22] we first consider the statutory issue.

FN22. *Escambia County, Florida v. McMillan*, 466 U.S. 48, 51, 104 S.Ct. 1577, 1579, 80 L.Ed.2d 36 (1984) (*per curiam*) ("normally the Court will not decide a constitutional question if there is some other ground upon which to dispose of the case"); *Ashwander v. TVA*, 297 U.S. 288, 347, 56 S.Ct. 466, 483, 80 L.Ed. 688 (1936) (Brandeis, J., concurring).

I

The only reference in the Food Stamp Act to a notice is contained in § 2020(e), which outlines the requirements of a state plan of operation. Subsection (10) of that section provides that a state plan must grant a fair hearing, and a prompt determination, to any household that is aggrieved by ***124** the action of a state agency. A proviso to that subsection states that

any household "which timely requests such a fair hearing after receiving individual notice of agency action reducing or terminating its benefits" shall continue to receive the same level of benefits until the hearing is completed. FN23

FN23. 7 U.S.C. § 2020(e)(10) provides, in relevant part:

> "The State plan of operation ... shall provide ...
>
> "(10) for the granting of a fair hearing and a prompt determination thereafter to any household aggrieved by the action of the State agency under any provision of its plan of operation as it affects the participation of such household in the food stamp program or by a claim against the household for an overissuance: *Provided*, That any household which timely requests such a fair hearing after receiving individual notice of agency action reducing or terminating its benefits within the household's certification period shall continue to participate and receive benefits on the basis authorized immediately prior to the notice of adverse action until such time as the fair hearing is completed and an adverse decision rendered or until such time as the household's certification period terminates, whichever occurs earlier...."

The language of the proviso does not itself command that any notice be given, but it does indicate that Congress assumed that individual notice would be an element of the fair-hearing requirement. Thus, whenever a household is entitled to a fair hearing, it is appropriate to read the statute as imposing a requirement of individual notice that would enable the household to request such a hearing. The hearing requirement, and the incidental reference to "individual notice", however, are by their terms applicable only to "agency action reducing or terminating" a household's benefits. Therefore, it seems unlikely that Congress contemplated individual hearings for every household affected by a general change in the law.

[1] The legislative history of § 2020(e)(10) sheds light on its meaning. As originally enacted in 1964, the Food Stamp Act contained no fair-hearing requirement. See 78 Stat. 703-709. In 1971, however, in response to this Court's decision***125** in *Goldberg v. Kelly*, 397 U.S. 254, 90 S.Ct. 1011, 25 L.Ed.2d 287 (1970), Congress amended the Act to include a fair-hearing provision,FN24 and in the Food Stamp Act of 1977, § 2020(e)(10) was enacted in its present form.FN25 The legislative history of the Food Stamp Act of 1977 contains a description of the then-existing regulations, which were promulgated after the 1971 amendment, and which drew a distinction between the requirement of notice in advance of an "adverse action" based on the particular facts of an individual case, on the one hand, and the absence of any requirement of individual notice of a "mass change," on the other. FN26 That history contains no suggestion that Congress intended to eliminate that distinction; to ****2527** the contrary, Congress expressly recognized during the period leading to the enactment of the Food Stamp Act of 1977 the distinction between the regulatory requirement regarding notice in the case of an adverse action and the lack of such a requirement in the case of a mass change.FN27 Read against this background, the relevant statutory language-which does not ***126** itself mandate any notice at all but merely assumes that a request for a hearing will be preceded by "individual notice of agency action"-cannot fairly be construed as a command to give notice of a general change in the law.FN28

FN24. 84 Stat. 2051; see H.R.Rep. No. 95-464, pp. 285-286 (1977), U.S.Code Cong. & Admin.News 1977, p. 1704; 7 U.S.C. § 2019(e)(8) (1976 ed.) (state agency must provide "for the granting of a fair hearing and a prompt determination thereafter to any household aggrieved by the action of a State agency").

FN25. 91 Stat. 972.

FN26. See H.R.Rep. No. 95-464, at 285-289 (summarizing the existing rules governing fair hearings).

FN27. *Id.*, at 289 ("The Committee bill would retain the fair hearings provision of the law intact and would encourage the Department to enforce its excellent regulations and instructions on the subject.... The Department should also be certain that, although its regulations do not require individual no-

tice of adverse action when mass changes in program benefits are proposed, they should require the states to send precisely such notices well in advance when the massive changes mandated by this bill are about to be implemented so that the individuals affected are fully aware of precisely why their benefits are being adversely affected. Hearings would, of course, be unnecessary in the absence of claims of factual error in individual benefit computation and calculation. All states should be overseen to be certain that their individual notices in non-mass change adverse action contexts recite the household's fair hearing request rights").

FN28. Prior to the enactment of the Food Stamp Act of 1977, although individual notices of adverse action were not required by the regulations when mass changes in benefits were instituted because of changes in the law affecting, among other items, income standards or other eligibility criteria, see 7 CFR § 271.1(n)(2)(i) (1975), the States were required to "publicize the possibility of a change in benefits through the various news media or through a general notice mailed out with [food stamp allotment] cards and with notices placed in food stamp and welfare offices." § 271.1(n)(3); see also 39 Fed.Reg. 25996 (1974).

[2] Nor can we find any basis for concluding that the December notice failed to comply with the applicable regulations. Title 7 CFR § 273.12(e)(2)(ii) (1984) provides:

"(ii) A notice of adverse action is not required when a household's food stamp benefits are reduced or terminated as a result of a mass change in the public assistance grant. However, State agencies shall send individual notices to households to inform them of the change. If a household requests a fair hearing, benefits shall be continued at the former level only if the issue being appealed is that food stamp eligibility or benefits were improperly computed."

This regulation reflects the familiar distinction between an individual adverse action and a mass change. The statement that a notice of adverse action is not required when a change of benefits results from a mass change surely implies that individual computations are not required in such cases. The two requirements that are imposed when a mass change occurs are: (1) that "individual" notice be sent and (2) that it "inform them of the change." In this case, a separate individual notice was sent to each individual household and it did "inform them of the change" in the program that Congress had mandated. Since the word "change" in the regulation ***127** plainly refers to the "mass change," the notice complied with the regulation.[FN29]

FN29. It may well be true, as petitioners argue, that the computerized data in the Department's possession made it feasible for the agency to send an individualized computation to each recipient, and that such a particularized notice would have served the Commonwealth's interest in minimizing or correcting predictable error. What judges may consider common sense, sound policy, or good administration, however, is not the standard by which we must evaluate the claim that the notice violated the applicable regulations.

Moreover, present regulations protect the food-stamp household by providing, upon request, the ongoing right to access to information and materials in its case file. 7 CFR § 272.1(c)(2) (1985). Further, upon request, specific materials are made available for determining whether a hearing should be requested, § 273.15(i)(1). If a hearing is requested, access to information and materials concerning the case must be made available prior to the hearing and during the hearing, § 273.15(p)(1).

II

Since the notice of the change in the earned-income disregard was sufficient under****2528** the statute and under the regulations, we must consider petitioners' claim that they had a constitutional right to advance notice of the amendment's specific impact on their entitlement to food stamps before the statutory change could be implemented by reducing or terminating their benefits. They argue that an individualized calculation of the new benefit was necessary in order to avoid the risk of an erroneous reduction or termi-

nation.

[3] The record in this case indicates that members of petitioners' class had their benefits reduced or terminated for either or both of two reasons: (1) because Congress reduced the earned-income disregard from 20 percent to 18 percent; or (2) because inadvertent errors were made in calculating benefits. These inadvertent errors, however, did not necessarily result from the statutory change, but rather may have been attributable to a variety of factors that can occur in the administration of any large welfare program.[FN30] For example,***128** each of the named petitioners, presumably representative of the class, see Fed.Rule Civ.Proc. 23(a), appealed a reduction in benefits. None identified an error resulting from the legislative decision to change the earned-income disregard. But even if it is assumed that the mass change increased the risk of erroneous reductions in benefits, that assumption does not support the claim that the actual notice used in this case was inadequate. For that notice plainly informed each household of the opportunity to request a fair hearing and the right to have its benefit level frozen if a hearing was requested. As the testimony of the class representatives indicates, every class member who contacted the Department had his or her benefit level frozen, and received a fair hearing, before any loss of benefit occurred. Thus, the Department's procedures provided adequate protection against any deprivation based on an unintended mistake. To determine whether the Constitution required a more detailed notice of the mass change, we therefore put the miscellaneous errors to one side and confine our attention to the reductions attributable to the statutory change.

> FN30. See App. to Pet. for Cert. in No. 83-1660, pp. A. 50-A. 52 (Cecelia Johnson), A. 53 (Gill Parker), A. 55 (Stephanie Zades), A. 55-A. 56 (Madeline Jones). By hypothesis, an inadvertent error is one that the Department did not anticipate; for that reason, the Department could not give notice of a reduction that was simply the consequence of an unintended mistake.

[4] Food-stamp benefits, like the welfare benefits at issue in *Goldberg v. Kelly*, 397 U.S. 254, 90 S.Ct. 1011, 25 L.Ed.2d 287 (1970), "are a matter of statutory entitlement for persons qualified to receive them." *Id.*, at 262, 90 S.Ct., at 1017 (footnote omitted). Such entitlements are appropriately treated as a form of "property" protected by the Due Process Clause; accordingly, the procedures that are employed in determining whether an individual may continue to participate in the statutory program must comply with the commands of the Constitution. *Id.*, at 262-263, 90 S.Ct., at 1017-1018.[FN31]

> FN31. Thus, in *Mathews v. Eldridge*, 424 U.S. 319, 332, 96 S.Ct. 893, 901, 47 L.Ed.2d 18 (1976), this Court wrote:
>
> > "Procedural due process imposes constraints on governmental decisions which deprive individuals of 'liberty' or 'property' interests within the meaning of the Due Process Clause of the Fifth or Fourteenth Amendment. The Secretary does not contend that procedural due process is inapplicable to terminations of Social Security disability benefits. He recognizes, as has been implicit in our prior decisions, *e.g.*, *Richardson v. Belcher*, 404 U.S. 78, 80-81, 92 S.Ct. 254, 256-257, 30 L.Ed.2d 231 (1971); *Richardson v. Perales*, 402 U.S. 389, 401-402, 91 S.Ct. 1420, 1427, 28 L.Ed.2d 842 (1971); *Flemming v. Nestor*, 363 U.S. 603, 611, 80 S.Ct. 1367, 1372, 4 L.Ed.2d 1435 (1960), that the interest of an individual in continued receipt of these benefits is a statutorily created 'property' interest protected by the Fifth Amendment."

***129** [5] This case, however, does not concern the procedural fairness of individual eligibility determinations. Rather, it involves a legislatively mandated substantive change in the scope of the entire program. Such a change must, of course, comply with the substantive limitations on the power ****2529** of Congress, but there is no suggestion in this case that the amendment at issue violated any such constraint. Thus, it must be assumed that Congress had plenary power to define the scope and the duration of the entitlement to food-stamp benefits, and to increase, to decrease, or to terminate those benefits based on its appraisal of the relative importance of the recipients' needs and the resources available to fund the program. The procedural component of the Due Process Clause does not "impose a constitutional limitation on the power of Congress to make substantive changes in the

law of entitlement to public benefits." *Richardson v. Belcher*, 404 U.S. 78, 81, 92 S.Ct. 254, 257, 30 L.Ed.2d 231 (1971).

[6] The congressional decision to lower the earned-income deduction from 20 percent to 18 percent gave many food-stamp households a less valuable entitlement in 1982 than they had received in 1981. But the 1981 entitlement did not include any right to have the program continue indefinitely at the same level, or to phrase it another way, did not include any right to the maintenance of the same level of property entitlement. Before the statutory change became effective, the existing property entitlement did not qualify the legislature's power to substitute a different, less valuable entitlement at a later date. As we have frequently noted: "[A] welfare recipient is not deprived of due process when the legislature ***130** adjusts benefit levels.... [T]he legislative determination provides all the process that is due." FN32

> FN32. *Logan v. Zimmerman Brush Co.*, 455 U.S. 422, 432-433, 102 S.Ct. 1148, 1156, 71 L.Ed.2d 265 (1982); see also *United States Railroad Retirement Board v. Fritz*, 449 U.S. 166, 174, 101 S.Ct. 453, 459, 66 L.Ed.2d 368 (1980); *Hisquierdo v. Hisquierdo*, 439 U.S. 572, 575, 99 S.Ct. 802, 805, 59 L.Ed.2d 1 (1979); *Flemming v. Nestor*, 363 U.S. 603, 608-611, 80 S.Ct. 1367, 1371-1372, 4 L.Ed.2d 1435 (1960).

[7] The participants in the food-stamp program had no greater right to advance notice of the legislative change-in this case, the decision to change the earned-income disregard level-than did any other voters.FN33 They do not claim that there was any defect in the legislative process. Because the substantive reduction in the level of petitioners' benefits was the direct consequence of the statutory amendment, they have no basis for challenging the procedure that caused them to receive a different, less valuable property interest after the amendment became effective.

> FN33. Cf. *Bi-Metallic Investment Co. v. State Bd. of Equalization*, 239 U.S. 441, 445, 36 S.Ct. 141, 142, 60 L.Ed. 372 (1915) ("Where a rule of conduct applies to more than a few people it is impracticable that every one should have a direct voice in its adoption. The Constitution does not require all public acts to be done in town meeting or an assembly of the whole. General statutes within the state power are passed that affect the person or property of individuals, sometimes to the point of ruin, without giving them a chance to be heard. Their rights are protected in the only way that they can be in a complex society, by their power, immediate or remote, over those who make the rule").

The claim that petitioners had a constitutional right to better notice of the consequences of the statutory amendment is without merit. All citizens are presumptively charged with knowledge of the law, see, *e.g.*, *North Laramie Land Co. v. Hoffman*, 268 U.S. 276, 283, 45 S.Ct. 491, 494, 69 L.Ed. 953 (1925). Arguably that presumption may be overcome in cases in which the statute does not allow a sufficient "grace period" to provide the persons affected by a change in the law with an adequate opportunity to become familiar with their obligations under it. See *Texaco, Inc. v. Short*, 454 U.S. 516, 532, 102 S.Ct. 781, 793, 70 L.Ed.2d 738 (1982). In this case, however, not only was there a grace period of over 90 ***131** days before the amendment became effective, but in addition, every person affected by the change was given individual notice of the substance of the amendment.FN34

> FN34. Thus, even under the position espoused in dissent in *Texaco*, there would be no merit to the claim in this case. As Justice BRENNAN wrote:
>
> > "As a practical matter, a State cannot afford notice to every person who is or may be affected by a change in the law. But an unfair and irrational exercise of state power cannot be transformed into a rational exercise merely by invoking a legal maxim or presumption. If it is to survive the scrutiny that the Constitution requires us to afford laws that deprive persons of substantial interests in property, an enactment that relies on that presumption of knowledge must evidence some rational accommodation between the interests of the State and fairness to those against whom the law is applied." 454 U.S., at 544, 102 S.Ct., at 800.

****2530** [8] As a matter of constitutional law there can be no doubt concerning the sufficiency of the notice describing the effect of the amendment in general terms. Surely Congress can presume that such a notice relative to a matter as important as a change in a household's food-stamp allotment would prompt an appropriate inquiry if it is not fully understood. The entire structure of our democratic government rests on the premise that the individual citizen is capable of informing himself about the particular policies that affect his destiny. To contend that this notice was constitutionally insufficient is to reject that premise.[FN35]

> FN35. In the case before us, the constitutional claim is particularly weak because the relevant regulations provided that any recipient who claimed that his benefit had been improperly computed as a result of the change in the income deduction was entitled to a reinstatement of the earlier benefit level pending a full individual hearing. 7 CFR § 273.12(e)(2)(ii) (1985). Petitioners do not contend that there was a failure to comply with this regulation. This, of course, would be a different case if the reductions were based on changes in individual circumstances, or if the reductions were based on individual factual determinations, and notice and an opportunity to be heard had been denied.

The judgment of the Court of Appeals is reversed.

It is so ordered.

***132** Justice BRENNAN, with whom Justice MARSHALL joins as to Part I, dissenting.

When the Massachusetts Department of Public Welfare (Department) implemented the 1981 statutory reduction in food stamp benefits for persons with earned income, it sent out form notices telling over 16,000 recipients that their benefits would be "reduced ... or ... terminated" without specifying which. App. 5. The notices contained no information about any particular recipient's case. The District Court declared the notices unlawful under the Due Process Clause as well as the relevant regulation and statute "because ... [they] did not contain the individual recipient's old food stamp benefit amount, new benefit amount, or the amount of earned income that was being used to compute the change." [FN1] The Court of Appeals agreed, finding the notices statutorily and "constitutionally deficient" because they "failed to inform." *Foggs v. Block*, 722 F.2d 933, 940 (CA1 1983). The Court today reverses, finding that "individual computations" are not required by regulation, statute, or Constitution. *Ante*,at 2528. I disagree with the Court's interpretation of all three authorities. Accordingly, I dissent.

> FN1. Order, *Foggs v. Block*, No. 81-0365-F, p. 2 (Mass., Mar. 24, 1982), reprinted in App. to Pet. for Cert. in No. 83-1660, p. 100 (hereinafter Pet. App.).

I

Title 7 CFR § 273.12(e)(2)(ii) (1985) requires that "when a household's food stamp benefits are reduced or terminated as a result of a mass change ... [s]tate agencies shall send individual notices to households to inform them of the change." [FN2] ***133** When Congress reduced the statutory earned-income deduction in 1981, the Secretary of Agriculture ordered state agencies implementing the change to provide the "individual notices" required by ****2531** this regulation. 46 Fed.Reg. 44722 (1981). Both courts below held, however, that the vague form notices in this case failed to fulfill the "individual notice" requirement. 722 F.2d, at 940; Pet.App. 98. Although the phrase apparently has never been administratively defined,[FN3] I believe the logic of the regulation, as well as its history and evident function in the administrative scheme requires inclusion of precisely the sort of individualized information found necessary by the District Court.

> FN2. The regulation provides in full:
>
> "A notice of adverse action is not required when a household's food stamp benefits are reduced or terminated as a result of a mass change in the public assistance grant. However, State agencies shall send individual notices to households to inform them of the change. If a household requests a fair hearing, benefits shall be continued at the former level only if the issue being appealed is that food stamp eligibility or benefits were improperly computed."

> FN3. The record contains no evidence that

food stamp program authorities have ever advanced a particular construction of the phrase prior to this litigation. Indeed, in his opening brief to this Court, the Secretary did not address the regulatory argument, but contended instead that "any argument, independent of the constitutional argument, that the Massachusetts notice was in violation of the Food Stamp Act or the 'mass change' regulations" should be left open to the recipients on remand. Brief for Federal Respondent 44, n. 38. Thus the Secretary's position on the meaning of the "individual notice" regulation was not presented until his reply brief was filed. Because this interpretation apparently has been developed *pendente lite*, the normal canon requiring deference to regulatory interpretations made by an agency that administers a statute, *e.g.*, *Jewett v. Commissioner*, 455 U.S. 305, 318, 102 S.Ct. 1082, 1090, 71 L.Ed.2d 170 (1982), has no application here. See *Motor Vehicle Mfrs. Assn. v. State Farm Mutual Automobile Ins. Co.*, 463 U.S. 29, 50, 103 S.Ct. 2856, 2870, 77 L.Ed.2d 443 (1983) ("[C]ourts may not accept appellate counsel's *post hoc* rationalizations for agency action"); *Citizens to Preserve Overton Park, Inc. v. Volpe*, 401 U.S. 402, 422, 91 S.Ct. 814, 826, 28 L.Ed.2d 136 (1971) (opinion of Black, J.) (rejecting "too-late formulations, apparently coming from the Solicitor General's office").

First, the sentence in § 273.12(e)(2)(ii) that requires "individual notices" of mass changes is immediately followed by a second requirement:

> "If a household requests a fair hearing [after receiving a mass change notice], benefits shall be continued at the former level *only if the issue being appealed is that food stamp eligibility or benefits were improperly computed*." 7 CFR § 273.12(e)(2)(ii) (1985) (emphasis added).

***134** The Court quotes this language, *ante*, at 2528, and then ignores it. It seems apparent, however, that an aggrieved food stamp recipient cannot possibly contend in good faith, let alone demonstrate, that his request for a hearing is based on a claim that his benefits have been "improperly computed" if the only notice he receives tells him nothing at all about the computation or new amount of the benefit.[FN4] Moreover, state agencies cannot possibly exercise their discretion under this regulation to decide not to continue benefits if the requestor cannot rationally specify his appeal grounds.[FN5] Unless this final provision of the mass change regulation at issue is to be rendered effectively meaningless, the individual notices mandated for a mass change must include the minimum of individualized data necessary for a recipient to surmise, at least, that his benefits have been miscalculated. That minimum amount of data is all that the District Court required in these cases.[FN6]

FN4. As the Court of Appeals noted, "[t]hese recipients may have been well informed about their right to appeal, but they did not have enough information to know whether or not to exercise that right." *Foggs v. Block*, 722 F.2d 933, 939 (CA1 1983).

FN5. Similar delegations of authority elsewhere in the food stamp regulations are likewise called into question by the Court's ruling today. See 7 CFR § 273.15(k)(1) (1985) ("When benefits are reduced or terminated due to a mass change, participation on the prior basis shall be reinstated only if the issue being contested is that food stamp ... benefits were improperly computed or that Federal law or regulation is being misapplied or misinterpreted by the State agency"); § 271.7(f) ("State agencies shall not be required to hold fair hearings unless the request for a fair hearing is based on a household's belief that its benefit level was computed incorrectly ... or that the rules were misapplied or misinterpreted").

FN6. Apart from its discussion of the regulation, the Court emphasizes the fact that the form notice mailed by the Department in these cases informed recipients that "[y]ou have the right to request a fair hearing if you disagree with this action." *Ante*, at 2529. It seems relatively clear, however, that under 7 CFR § 273.15(k)(2)(ii) (1985) and, perhaps, § 271.7(f), aggrieved households have no "right" to a hearing based merely on disagreement with a change in the law. Perhaps the Court intends either to limit its approval of form notices to circumstances in which a

state agency allows appeals and fair hearings no matter what the reason, or to require that appeals must always be permitted if mass change notices are vague. Otherwise, nothing in the Court's opinion would appear to prohibit state agencies from omitting such appeal rights in the future while still providing no more than the uninformative notice approved by the Court today.

***135 **2532** A careful examination of the history of § 273.12(e)(2)(ii) also suggests that "individual notices" mean notices containing some individualized information. The Secretary's food stamp regulations originally required that, "[p]rior to *any* action to terminate or reduce a household's program benefits," state agencies had to give each household "in detail the reasons for the proposed action." 7 CFR § 271.1(n) (1972) (emphasis added). This notice requirement made no exception for "mass changes" in the law. In 1974, however, the Secretary granted state agencies the option of providing "general notice" of mass changes, either by a notice "mailed to all recipients," 39 Fed.Reg. 25996 (1974), or by pervasive publicity.[FN7] The form notice used in these cases presumably would have met this "general notice" requirement if general notice had been all that was required in 1981. In 1978, however, the Secretary subdivided the mass change regulation to address different types of changes. 43 Fed.Reg. 47915-47916 (1978). Subsection (e)(1) paralleled the 1974 mass change regulation, permitting notice of certain state and federal adjustments by pervasive publicity, "general notice mailed to households," or "individual notice." Subsection (e)(2) was new, however, and required "individual notices to households to inform them of the change."[FN8] Although the ***136** difference between "general notices mailed to households" and "individual notices" was never defined by the Secretary, he directed that notice of the 1981 earned-income deduction change be given pursuant to subsection (e)(2), thereby requiring "individual" as opposed to "general" notice.

FN7. "When [a notice of adverse action] is not required ..., the State agency shall publicize the possibility of a change in benefits through the various news media or through a general notice mailed out with ATP cards and with notices placed in food stamp and welfare offices." 7 CFR § 271.1(n)(3) (1975).

FN8. The relevant provisions stated:

"(e) *Mass changes*....

"(1) *Federal adjustments to eligibility standards, allotments, and deductions, State adjustments to utility standards*....

"(ii) Although a notice of adverse action is not required, State agencies may send an individual notice to households of these changes. State agencies shall publicize these mass changes through the news media; posters in certification offices, issuance locations, or other sites frequented by certified households; or general notices mailed to households.....

"(2) *Mass changes in public assistance* ....

"(ii) A notice of adverse action is not required when a household's food stamp benefits are reduced or terminated as a result of a mass change in the public assistance grant. However, State agencies shall send individual notices to households to inform them of the change...." 7 CFR § 273.12(e) (1979).

In the absence of some contrary indication, normal construction of language requires the conclusion that the Secretary employed different terms in the same regulation to mean different things. See *Crawford v. Burke*, 195 U.S. 176, 190, 25 S.Ct. 9, 12, 49 L.Ed. 147 (1904); R. Dickerson, The Interpretation and Application of Statutes 224-225 (1975). And it is clear that the difference between the two types of notice must lie in their informational content, "general" versus "individual," because *both* types of notice must be mailed to individual households.[FN9] "General notices mailed to households" required no more than a form letter of identical content mailed to each of a large number of affected households; in contrast, "individual notice" going to many households must imply some more particularized, "individual" content.

FN9. Thus the fact that "a separate individual notice was sent to each individual household," *ante*, at 2528, proves nothing.

****2533** Finally, the Court argues that the regulatory decision not to require a "notice of adverse action" for mass changes "surely implies" a decision to forgo "individual computations" as well. *Ante*, at 2528. No such implication is logically required, however. The Court apparently fails to understand that "notice of adverse action" is a technical term of art used in the food stamp regulations to describe a special type of ***137** notice containing other information besides "the reason for the proposed action." [FN10] Thus when the Secretary proposed § 273.12(e)(2)(ii) in 1978, he distinguished "individual" mass change notice from a "notice of adverse action" by noting the information that a mass change notice need not contain:

> FN10. In 1981, when the Department acted in this case, a "notice of adverse action" was required to contain
>
> > "in easily understandable language ... [t]he proposed action; the reason for the proposed action; the household's right to request a fair hearing; the telephone number and, if possible, the name of the person to contact for additional information; the availability of continued benefits; and the liability of the household for any overissuances received while awaiting a fair hearing.... If there is an individual or organization available that provides free legal representation, the notice shall also advise the household of the availability of the service." 7 CFR § 273.13(a)(2) (1981).

"Although households are not entitled to a notice of adverse action for mass changes[,] the regulations propose that States send households an individual notice which informs the household of the change but does not grant the household continuation rights if the household appeals the State agency action. In this way, households are advised of the change and can adjust household budgets accordingly." 43 Fed.Reg. 18896 (1978).[FN11]

> FN11. The Secretary erred in stating that households affected by mass changes had no right to continued benefits, since the regulations proposed on the same day clearly specified a right to continued benefits "if the issue being appealed is the computation of benefits." 43 Fed.Reg. 18931 (1978). But unlike a notice of adverse action, the proposed mass change notice was not required to inform recipients of that right.

Nothing was said to suggest that individual computations were not required in either type of notice. Indeed, by stating a purpose of providing affected households sufficient information so that they could adjust their budgets, the plain implication is to the contrary: each household was to be notified of mass changes in individual terms. It is difficult ***138** to imagine how one could otherwise adjust one's household budget "accordingly." [FN12]

> FN12. To the extent that the Court suggests that there is a difference between types of action ("adverse" as opposed to "mass") rather than in types of notice, *ante*, at 2528, or that notice is required of "individual adverse action[s]" but not of mass changes, *ante*, at 2527, it is apparent that the Court misapprehends the "familiar distinction between the individual adverse action and a mass change." *Ante*, at 2528. In terms of effect on the individual, there is no difference under either label. The "action"-a reduction in benefits-is exactly the same. Moreover, households affected in either case must receive "individual notice" and have some right to a fair hearing. The only difference is in the number of recipients affected and the amount of additional information their notices must contain.

As far as I can tell, there has been no contemporaneous or consistent administrative interpretation of the regulation at issue; indeed, there has been no interpretation at all. Based on the language, function, and history of the regulation itself, however, any logical implication to be drawn is that the "individual notice" required by § 273.12(e)(2)(ii) comprehends some amount of individualized benefit data.[FN13] Conscious as well of the constitutional****2534** questions otherwise raised, I would affirm the judgment below on this ground alone.[FN14]

> FN13. It should not go unnoted that just as the concept of "individual notice" silently appeared in the 1978 mass change regula-

tions, the concept of "general" notice has now *disappeared* from the regulations without explanation. See 46 Fed.Reg. 44712, 44726 (1981) (proposing new § 273.12(12)(e)); 7 CFR § 273.12(e) (1985). It is ironic that although the concept of "general notice mailed to households" has thus passed from the regulatory scheme without a murmur, the majority today reincarnates it under the label of "individual notice," by approving the vague form notices that were used in these cases.

FN14. The recipients' petition for certiorari in No. 83-6381, questioning the Court of Appeals' vacation of the District Court's injunctive relief, is not considered by the Court today. See *ante*, at 2526. I need say only that on this record, I do not find that the Court of Appeals exceeded its remedial discretion.

II

I can agree with the Court that the relevant statutory section, 7 U.S.C. § 2020(e)(10), may not of itself require "individual***139** computations." The Court goes beyond this holding, however, to suggest that § 2020(e)(10) permits no notice at all of reductions based on legislated changes in benefit levels. *Ante*, at 2528. Because all parties concede that some form of notice was required, the Court's broader statutory discussion is unnecessary to its decision. I find the Court's suggestion to be an erroneous reading that will cause needless confusion for food stamp administrators and recipients alike.

Although the Food Stamp Act of 1964, 78 Stat. 703, as amended, 7 U.S.C. §§ 2011-2029, is federally supervised, it is administered largely by separate agencies of the States.[FN15] Thus reductions in food stamp benefit levels, even if federally mandated, can be implemented only by state agencies. Section 2020(e)(10) requires that when a state agency acts, it must provide "for the granting of a fair hearing and a prompt determination thereafter to *any* household aggrieved by the action of the state agency under *any* provision of its plan of operation ..." (emphasis added). It further mandates continuation of the prior level of food stamp benefits pending decision for "any household which timely requests such a fair hearing *after receiving individual notice of agency action reducing or terminating its benefits*" (emphasis added). As the Secretary acknowledges, the plain language of § 2020(e)(10) "*presupposes* the existence of notice." Reply Brief for Federal Respondent 11. The Court's conclusion that § 2020(e)(10) "does not itself mandate any notice at all," *ante*, at 2528, is thus true only in the formalistic sense that words of command are not used. A congressional presupposition that notice will be sent, expressed in a statute directed to state agencies, can have no different legal effect than would a straightforward command.

FN15. Title 7 U.S.C. § 2020(d) directs that each "State agency ... shall submit for approval" by the Secretary of Agriculture a "plan of operation specifying the manner in which [the food stamp] program will be conducted within the State in every political subdivision." State agencies are directly "responsible for the administration of the program within [each] State." 7 CFR § 271.4(a) (1985).

***140** No distinction between types of "agency action"-mass or individual-appears in the language of § 2020(e)(10), and the statute's legislative history demonstrates that no distinction was intended. The controlling House Report explained that after *Goldberg v. Kelly*, 397 U.S. 254, 90 S.Ct. 1011, 25 L.Ed.2d 287 (1970), fair hearings would be required in all cases where a food stamp claimant will be "aggrieved" by *any* agency action, "whether it be a termination or reduction of benefits, a denial of an application for benefits, or other negative action...." H.R.Rep. No. 95-464, p. 285 (1977). The Report went on to recite Congress' understanding that notice of all such "negative actions" was normally provided in all cases,[FN16] and indeed, such was the administrative practice in 1977. Although "notices of adverse action" were not always required, the 1977 regulations required *some* form of notice even for "mass changes." ****2535**7 CFR §§ 271.1(n)(2) and (3) (1977). Congress was thus well aware of, and legislated on the basis of, the contemporaneous administrative practice of providing notice of mass changes, and must be presumed to have intended to maintain that practice absent some clear indication to the contrary. *Haig v. Agee*, 453 U.S. 280, 297-298, 101 S.Ct. 2766, 2776-2777, 69 L.Ed.2d 640 (1981).[FN17]

FN16. "Each household must be notified in a timely manner usually ten days prior to the

time the agency's decision will take effect." H.R.Rep. No. 95-464, p. 285 (1977), U.S.Code Cong. & Admin.News 1977, p. 2221; accord, S.Conf.Rep. No. 95-418, p. 197 (1977) (adopting House bill which requires "State agency notice of reduction or termination of [a household's] benefits").

FN17. The Court rests its statutory argument on its view of the regulatory "background," which allegedly included a "distinction between the regulatory requirement regarding notice in the case of an adverse action and the *lack of such a requirement* in the case of a mass change." *Ante,* at 2527 (emphasis supplied). No such distinction existed, however. The regulations in effect in 1977 plainly stated a requirement of notice of mass changes, 7 CFR § 271.1(n)(3) (1977), as the Court itself notes, *ante,* at 2528, n. 28. Congress' approval of the 1977 administrative practice, therefore, cannot support the Court's suggestion that Congress thereby approved of no notice at all in the mass change context.

Aside from language and legislative history, the logic of the statutory scheme is distorted by the Court's suggestion ***141** that notice is not required when mass reductions result from legislation. Notice is, of course, "an element of the fair hearing requirement" of § 2020(e)(10), *ante,* at 2527, because it allows recipients whose benefits will be reduced or terminated to determine whether or not to request a fair hearing. Cf. *Joint Anti-Fascist Refugee Committee v. McGrath,* 341 U.S. 123, 171-172, 71 S.Ct. 624, 648-649, 95 L.Ed. 817 (1951) (Frankfurter, J., concurring) ("No better instrument has been devised for arriving at truth than to give a person in jeopardy of serious loss notice"). Congress expressed its view in 1977 that there would be little occasion to claim a fair hearing when legislative changes in benefit levels were implemented: "Hearings would, of course, be unnecessary *in the absence of claims of factual error in individual benefit computation and calculation.*" H.R.Rep. No. 95-464, at 289 (emphasis added).[FN18] Similarly, Congress directed that if in the course of a fair hearing "a determination is made that the sole issue being appealed is ... *not a matter of fact or judgment relating to an individual case,*" then benefits need not be continued under the proviso of § 2020(e)(10). *Id.,* at 286 (emphasis added). These very statements, however, demonstrate Congress' understanding that households affected by mass changes could request a fair hearing, and were *entitled* to a hearing if their claim was, among other things, miscalculation of benefits.[FN19] The Court does not discuss these legislative remarks. But congressionaldiscussion ***142** of guidelines for winnowing appeals simply makes no sense if no notice at all of mass reductions was intended.

FN18. We previously have affirmed the view that because the distinction between factual and policy-based appeals is often difficult to identify, the Due Process Clause constrains state agencies to err on the side of allowing hearings in doubtful or ambiguous cases. *Carleson v. Yee-Litt,* 412 U.S. 924, 93 S.Ct. 2753, 37 L.Ed.2d 152 (1973) (summarily aff'g *Yee-Litt v. Richardson,* 353 F.Supp. 996 (ND Cal.)).

FN19. The Court's statement that "it seems unlikely that Congress contemplated individual hearings for every household affected by a general change in the law," *ante,* at 2527, is thus unobjectionable, but it has no apparent bearing on whether Congress contemplated *notice* of mass reductions so that fair hearings could be requested in appropriate cases before benefits are cut off.

Notice of reductions in benefit levels is thus the necessary predicate to implementation of the statutory fair hearing requirement. Indeed, the Court apparently accepts this view, stating that "whenever a household is entitled to a fair hearing, it is appropriate to read the statute as imposing a requirement of individual notice that would enable the household to request such a hearing." *Ante,* at 2527. It is clear, however, that Congress intended and the regulations guarantee that mass reductions rightfully may be appealed if the claim is miscalculation. Yet the Court concludes there is no statutory "command to give ****2536** notice of a general change in the law." *Ante,* at 2528. This conclusion may generally be correct with regard to *enactment* of changes in the law, see *Texaco, Inc. v. Short,* 454 U.S. 516, 102 S.Ct. 781, 70 L.Ed.2d 738 (1982), but the plain terms of § 2020(e)(10) require notice of "agency action" taken to *implement* the law, if that action will result in "reduc[tion] or terminat[ion] of ... benefits." Because legislated mass

changes, like any other changes, can be implemented only by the action of state agencies, the notice requirement of § 2020(e)(10) is fully implicated in the mass change context.

The unambiguous purpose of the fair hearing and benefit continuation requirements of § 2020(e)(10) is to prevent erroneous reductions in benefits until a claim of error can be resolved. General changes in the law, no less than individual exercises of caseworker discretion, are likely to result in error when implemented, as the facts of these cases indicate and the Court acknowledges. *Ante,* at 2529 ("[E]rrors ... can occur in the administration of any large welfare program"). Timely and adequate notice permits the affected recipient to surmise whether an error has been made; if the recipient invokes the statutory right to a fair hearing, the agency then determines whether the recipient is correct. That reductions are implemented massively rather than on a case-by-case basis alters not at all this sensible administrative ***143** scheme, operating as intended under § 2020(e)(10). By reading the statute not to require any notice at all when reductions or terminations of benefits are the result of agency implementation of a "general change in the law," the Court finds an exception not indicated by the statute, its legislative history, or relevant regulations, and not supported by any logical view of the food stamp administrative process. Federal administrators have required state agencies to give some form of notice of mass changes since before § 2020(e)(10)'s enactment until today. The Court's contrary suggestion, offered in cases where the discussion is unnecessary to the result, will disrupt an administrative scheme that appears to work smoothly without the Court's help.

III

Because food stamp benefits are a matter of statutory entitlement, recipients may claim a property interest only in the level of benefits to which they are entitled under the law, as calculated under whatever statutory formula is provided. Congress may reduce the entitlement level or alter the formula through the normal legislative process, and that process pretermits any claim that Congress' action constitutes unconstitutional deprivation of property. See *Logan v. Zimmerman Brush Co.*, 455 U.S. 422, 432-433, 102 S.Ct. 1148, 1155-1156, 71 L.Ed.2d 265 (1982).

Arguing from similar premises, the Court concludes that the food stamp recipients in these cases had no special right to "advance notice of the legislative change" in the earned-income deduction in 1981. *Ante,* at 2529-2530. The recipients, however, have never contended that they had a right to "advance notice" of the enactment of congressional legislation,[FN20] and I do not intend to argue for that proposition here. "It is ***144** plain that sheer impracticality makes it implausible to expect the State *itself* to apprise its citizenry of the enactment of a statute of general applicability." *Texaco, Inc. v. Short, supra,* 454 U.S., at 550, 102 S.Ct., at 803 (BRENNAN, J., dissenting) (emphasis in original).

FN20. See, *e.g.,* Brief for Respondents Parker et al. 47, and n. 26 ("This is not a case in which the plaintiffs have challenged the authority of Congress to decrease the amount of [food stamp benefits]." "[T]he plaintiffs seek only to have the admittedly valid change in the program applied correctly to their individual cases"); see also Reply Brief for Respondents Parker et al. 9; Record, Amended Supplemental Complaint ¶ 1 (Jan. 6, 1982).

****2537** Instead, these cases involve the *implementation* of Congress' decision by its agents, the various state agencies that administer food stamp programs across the country. Owing to factors unique to the state agency and having nothing to do with Congress, implementation of the change in Massachusetts resulted in the *erroneous* reduction of food stamp benefits for a number of households. *Ante,* at 2528-2529; see *infra,* at 2541, and n. 27. Because recipients have a constitutionally cognizable property interest in their proper statutory entitlement levels, it is deprivation of those interests by the state agency, and not the passage of legislation by Congress, that requires our constitutional attention in this case.[FN21]

FN21. Unlike the statute analyzed in *Texaco, Inc. v. Short,* 454 U.S. 516, 102 S.Ct. 781, 70 L.Ed.2d 738 (1982), the 1981 earned-income deduction change was not "self-executing," and as *Texaco* held, it is "essential" to distinguish "self-executing feature[s] of [a] statute" from actions taken subsequently to implement the legislative command. *Id.,* at 533, 102 S.Ct., at 794. *Texaco* examined a challenge to a state law providing that min-

eral interests unused for 20 years *automatically* would revert to the surface owner unless a "statement of claim" was filed. *Id.*, at 518, 102 S.Ct., at 786. Appellants claimed this law would effect an unconstitutional taking of their interests without due process unless they were notified when "their 20-year period of nonuse was about to expire." *Id.*, at 533, 102 S.Ct., at 794. While upholding the statute, the Court repeatedly emphasized its "self-executing" character, and carefully noted that the Constitution would govern any action taken later to terminate finally appellants' property interests: "It is undisputed that, before judgment could be entered in a quiet title action that would determine conclusively that a mineral interest has reverted, ... the *full procedural protections of the Due Process Clause ... including notice ... must be provided.*" *Id.*, at 534, 102 S.Ct., at 794 (emphasis supplied); see also *id.*, at 535, 102 S.Ct., at 795 ("The reasoning in *Mullane* is applicable to a judicial proceeding brought to determine whether a lapse of a mineral estate did or did not occur, but not to the self-executing feature of" the law); *id.*, at 537, 102 S.Ct., at 796 (distinguishing precedents on the ground that "the property interest was taken only after a specific determination that the deprivation was proper"). *Texaco* thus plainly acknowledged that due process protections were required to prevent *erroneous applications* of the statute. As I also noted in *Texaco*, if "[t]he State may ... feasibly provide notice when it asserts an interest directly adverse to particular persons, [it] may in that circumstance be constitutionally compelled to do so." *Id.*, at 550, 102 S.Ct., at 803 (BRENNAN, J., dissenting).

***145** By focusing primarily on the "red herring" notice-of-legislative-change issue, the Court avoids explicit application of the multifactored interest-balancing test normally applied in our due process precedents. I understand the Court to make two basic arguments, however, in dismissing the recipients' constitutional claim to individualized notice of the Department's action. The first is to suggest that no notice at all is required when "inadvertent errors" are involved; such errors simply may be "put ... to one side." At 2529. The second is that the form notice employed here sufficed to "adequately protect" the recipients' interests in any case, because recipients can be presumed to know the law regarding the earned-income deduction change and the notice told them how to appeal. *Ante*, at 2530-2531.

My consideration of these arguments is informed by two unchallenged facts. First, although not mentioned by the Court, when the Department sent its form notice and implemented the earned-income deduction change in December 1981, its officials knew that a substantial data entry backlog in its computerized record system meant that its food stamp files contained inaccurate earned-income information for a number of recipients. App. 85-89 (testimony of the Department's Systems Director); *id.*, at 214 (testimony of the Deputy Director of the Department's computerized file system); see also 722 F.2d, at 938-939; Pet. App. 77-80. Thus the Department knew full well that when it took action to implement the legislative change, the food stamp benefits of a number of recipients were likely to be erroneously reduced or terminated. While the absence of such clear foreknowledge ***146** might not make a constitutional****2538** difference, its presence here surely sharpens the constitutional analysis.

Second, the officials in charge of the Department's computer systems testified without contradiction that it was "not a problem" to generate a notice containing the individualized information ordered by the District Court, since that information was already contained in the computers, and that the necessary programming might have taken "a few hours." App. 224; see *id.*, at 80-84, 217-227. Thus the District Court's finding, unquestioned by the Court today, was that it was likely that individualized notices could have been provided in December 1981 "without causing any delay" or any "real hardship" to the Department. Pet.App. 74-75, 94.

A

In my view, the Court's offhand discussion of "inadvertent errors" is fogged by an unspoken conceptual confusion in identifying the constitutional deprivation claimed in these cases. In traditional cases arising under the Due Process Clause, a governmental deprivation of property is not difficult to identify: an individual possesses a set amount of property and the government's action either does, or does not, deprive the individual of some or all of it. Where "new" property interests-that is, statutory entitlements-are

involved, however, claimants have an interest only in their benefit level as correctly determined under the law, rather than in any particular preordained amount. Thus, while *any* deprivation of tangible property by the State implicates the Due Process Clause, only an *erroneous* governmental reduction of benefits, one resulting in less than the statutorily specified amount, effects a deprivation subject to constitutional constraint. It is the error, and not the reduction *per se*, that is the deprivation.

Keeping this point in mind, it is readily apparent that this Court's application of the Due Process Clause to governmental administrative action has not only encompassed, but ***147** indeed has been premised upon, the need for protection of individual property interests against "inadvertent" errors of the State. *Goldberg v. Kelly*, 397 U.S. 254, 90 S.Ct. 1011, 25 L.Ed.2d 287 (1970), *Mathews v. Eldridge*, 424 U.S. 319, 96 S.Ct. 893, 47 L.Ed.2d 18 (1976), and *Memphis Light, Gas & Water Division v. Craft*, 436 U.S. 1, 98 S.Ct. 1554, 56 L.Ed.2d 30 (1978), to name but a few examples, all involved administrative decisionmaking presumed to operate in good faith yet subject to normal and foreseeable, albeit unintentional, error.[FN22] Properly applied, regulations****2539** that govern administrative decisions ***148** in such cases cannot deprive recipients of property, because a welfare or utility service recipient whose entitlement *should* be reduced or terminated under relevant statutes can claim no valid interest in continuation. Administrative decisions that affect statutory entitlements may often be correct. But when administrative error-that is, the deprivation-is foreseeable as a general matter and certain to occur in particular cases, constitutional procedures are interposed to ensure correctness insofar as feasible.[FN23]

> FN22. Although the Court does not define "inadvertent errors," its opinion and the facts of these cases indicate that the phrase describes errors made in good faith or unintentionally, rather than errors that could not possibly have been expected. Thus the Court acknowledges that such errors are well known to "occur in the administration of any large welfare program." *Ante*, at 2529; see also *Memphis Light, Gas & Water Division v. Craft*, 436 U.S., at 18, 98 S.Ct., at 1564 ("[T]he risk of erroneous deprivation, given the necessary reliance on computers, is not insubstantial") (footnote omitted). Indeed, the testimony indicating that the Department knew that the stale data in its computer system would be used to determine new benefit levels suggests that the Court's characterization of the resulting errors as "inadvertent" is a charitable one.
>
> In a footnote, the Court states that "[b]y hypothesis, an inadvertent error is one that the Department did not anticipate; for that reason, the Department could not give notice of a reduction that was simply the consequence of an unintended mistake." *Ante*, at 2529, n. 30. In light of the Department's testimony and the Court's recognition that administrative errors are well known to occur in welfare programs, I can surmise only that the Court means that the Department did not anticipate which particular individuals would be erroneously affected, for the foreseeability of error against some portion of the class is clear and undisputed. See Brief for State Petitioner 60-61. The Court's further assertion that the Department "could not give notice of a reduction that was simply the consequence of an unintended mistake," is simply misguided. The reductions *per se* were the consequence of *Congress'* action, not the Department's, and they were certainly intended. The amount of the reductions was easily calculated, and notice could have been given. Only the Department's miscalculations were in any sense "unintended mistakes." While notice that a particular error would be made was, perhaps, impossible, notice of the reduction was both possible and required, for the very reason that only the recipients could identify particular errors before they took effect.

FN23. One need not indisputably prove error before constitutional protections may be invoked; only a foreseeable probability of error need be shown. See, *e.g.*, *Board of Regents v. Roth*, 408 U.S. 564, 577, 92 S.Ct. 2701, 2709, 33 L.Ed.2d 548 (1972) (requiring a "legitimate *claim* of entitlement") (emphasis added); *Fuentes v. Shevin*, 407 U.S. 67, 86,

92 S.Ct. 1983, 1997, 32 L.Ed.2d 556 (1972) ("Fourteenth Amendment's protection of 'property' ... has never been interpreted to safeguard only the rights of *undisputed* ownership") (emphasis added).

"[A] primary function of legal process is to minimize the risk of erroneous decisions," *Mackey v. Montrym*, 443 U.S. 1, 13, 99 S.Ct. 2612, 2618, 61 L.Ed.2d 321 (1979). Consequently, a foreseeable action that may cause deprivation of property must be "*preceded* by notice." *Mullane v. Central Hanover Bank & Trust Co.*, 339 U.S. 306, 313, 70 S.Ct. 652, 656, 94 L.Ed. 865 (1950) (emphasis added).[FN24] As we made clear in *Goldberg*, 397 U.S., at 267, 90 S.Ct., at 1020, in statutory entitlement cases the Due Process Clause normally requires "timely and adequate notice detailing the reasons" for proposed adverse administrative action. Such process is constitutionally required whenever the action may be "challenged ... as resting on incorrect or misleading factual premises or on misapplication of rules or policies to the facts of particular cases." *Id.*, at 268, 90 S.Ct., at 1020.

FN24. See also *Roller v. Holly*, 176 U.S. 398, 409, 20 S.Ct. 410, 413, 44 L.Ed. 520 (1900) ("That a man is entitled to some notice before he can be deprived of his liberty or property, is an axiom of law to which no citation of authority would give additional weight"); *Baldwin v. Hale*, 1 Wall. 223, 233, 17 L.Ed. 531 (1864) ("Parties whose rights are to be affected are entitled to be heard; and in order that they may enjoy that right they must first be notified").

***149** Thus, in my view, it is a novel and ill-considered suggestion to "put ... to one side" unintended but foreseeable administrative errors that concededly had adverse effects on valid property interests. Such errors are at the *heart* of due process analysis. If the Constitution provides no protection against the visiting of such errors on statutory entitlement claimants, then the development of this Court's "new property" jurisprudence over the past 15 years represents a somewhat hollow victory. The fact that errors inevitably occur in the administration of any bureaucracy requires the conclusion that when the State administers a property entitlement program, it has a constitutional obligation to provide *some* type of notice to recipients before it implements adverse changes in the entitlement level, for the very reason that "inadvertent" erroneous reductions or terminations of benefits-that is, deprivations of property-are otherwise effected without any due process of law.[FN25]

FN25. The Secretary argues that such errors "would likely be detected" after they occurred, "with corrective payments to all." Brief for Federal Respondent 25-26. Since the Department contends that the particular errors committed were unknown to it, however, it is not clear how they would be detected absent specific notice to the recipients. See *Vargas v. Trainor*, 508 F.2d 485, 490 (CA7 1974), cert. denied, 420 U.S. 1008 (1975). Because the Department notably does not contend that every error that occurred in this case has in fact been detected, the Court of Appeals' order directing the Department "to check its files to ensure that [it] properly calculated the benefit reduction of each recipient," 722 F.2d at 941, a remedy suggested by the Department itself, *ibid.*, was appropriate.

More importantly, however, the likelihood of postdeprivation correction is largely irrelevant to the constitutional inquiry regarding *notice*. Cf. *Mathews v. Eldridge*, 424 U.S. 319, 340, 96 S.Ct. 893, 905, 47 L.Ed.2d 18 (1976) (postdeprivation process relevant to whether predeprivation evidentiary hearing is required); but see *Cleveland Board of Education v. Loudermill*, 470 U.S. 532, 542, 105 S.Ct. 1487, 1494, 84 L.Ed.2d 494 (1985) ("some form of pretermination hearing" is generally required). To paraphrase *Memphis Light, Gas & Water Division v. Craft*, 436 U.S., at 20, 98 S.Ct., at 1566, "[a]lthough [food stamp benefits] may be restored ultimately, the cessation of essential [benefits] for any appreciable time works uniquely final deprivation," and adequate notice therefore must precede the adverse action.

***150 **2540** B

Because the errors in these cases cannot merely be ignored, I turn to the central constitutional inquiry: what process was due in light of "the practicalities and peculiarities of the case"? *Mullane v. Central Hanover*

Bank & Trust Co., supra, at 314, 70 S.Ct., at 657. Experience demonstrates that balanced consideration of a number of factors is required: the importance of the private interest affected, the risk of erroneous deprivation under the system challenged, the protective value of the different procedures proposed, and the government's interests, including any "fiscal and administrative burdens" created by different procedures. *Logan v. Zimmerman Brush Co.*, 455 U.S., at 434, 102 S.Ct., at 1156; *Mathews v. Eldridge*, 424 U.S., at 334-335, 96 S.Ct., at 902-903. These interests are relevant to determining the "content of the notice" as well as its timing and other procedural claims. *Goss v. Lopez*, 419 U.S. 565, 579, 95 S.Ct. 729, 738, 42 L.Ed.2d 725 (1975). Although the interests normally relevant to the constitutional due process inquiry are often characterized as "competing," *e.g.*, *Cleveland Board of Education v. Loudermill*, 470 U.S. 532, 542, 105 S.Ct. 1487, 1494, 84 L.Ed.2d 494 (1985), the record makes clear that the Department failed to demonstrate any countervailing interest in not providing individualized notices in these cases.

1. *Importance of the Interest.* The importance of the correct level of food stamp benefits to eligible households cannot be overstated. Designed "[t]o alleviate ... hunger and malnutrition" and allow poverty level families "to purchase a nutritionally adequate diet," Pub.L. 91-671, § 2, 84 Stat. 2048, the food stamp program by definition provides benefits only to those persons who are unable to afford even a minimally adequate diet on their own. An erroneous reduction or break in benefits, therefore, may literally deprive a recipient "of the very means by which to live." *Goldberg*, 397 U.S., at 264, 90 S.Ct., at 1018.[FN26]

FN26. Census statistics indicate that the median annual income of all households receiving food stamps was less than $6,000 in 1982. Bureau of the Census, Characteristics of Households and Persons Receiving Selected Noncash Benefits: 1982, p. 19 (1984). "The 1984 poverty threshold is $8,280 for a family of three and $10,610 for a family of four." House Committee on Ways and Means, Children in Poverty, 99th Cong., 1st Sess., 196 (Comm.Print 1985). See also *Mathews v. Eldridge, supra*, 424 U.S., at 340, 96 S.Ct., at 905 ("[W]elfare assistance is given to persons on the very margin of subsistence").

151** 2. *Risk of Error.* Both courts below found that the likelihood of error by the Department in implementing the earned-income deduction change was substantial. 722 F.2d, at 939; Pet. App. 88-95. The Court does not challenge that evaluation, and it is amply supported by the record. The existence of implementation errors was unchallenged at trial.[FN27] Because of a severe*2541** data entry backlog in the Department's computers during the fall of 1981, an undetermined number of food stamp recipients' files contained erroneous earned income figures.[FN28] Thus, although the mathematical operation necessary to implement the statutory change was theoretically simple, its actual performance in Massachusetts necessarily carried with it a high risk of error.

FN27. For example, a random sample of less than one-third of the 16,000 households that received the Department's December 1981 notice showed that 585 households listed as having *no* earned income nevertheless received the notice. Of these, 211 households experienced a change in their benefit level, although by statutory definition no change should have occurred. Pet.App. 81-82. Thus the Court's statement that Congress' "amendment had no effect on households with no income," *ante*, at 2523, is simply wrong with regard to implementation of the law in Massachusetts.

FN28. Data for over 9,000 of the households that received the notice at issue in these cases were contained in the affected computer system. Pet.App. 78. Over two-thirds of the data entries scheduled for this system had not been processed during the relevant period, and the District Court concluded that "it was more likely than not" that the correct earned-income information "for any of the [affected] households ... was not entered ... prior to implementation of the change in the earned income disregard." *Id.*, at 79.

The Department did not challenge the recipient's proof regarding the risk of error at trial, but instead argued as it ***152** does here that any such risk was caused not by the statutory change but by its ministerial implementation based on pre-existing data in the

files. As indicated above, however, it is precisely that implementation, and not the statutory change, that the recipients have challenged throughout. The foreseeable risk of the Department's errors stands unrefuted.

3. *Value of Additional Procedures.* Adequate notice under the Due Process Clause has two components. It must inform affected parties of the action about to be taken against them as well as of procedures available for challenging that action. *Memphis Light*, 436 U.S., at 13, 98 S.Ct., at 1562; *Mullane*, 339 U.S., at 314, 70 S.Ct., at 657. These requirements serve discrete purposes: adequate notice of the action itself permits the individual to evaluate its accuracy or propriety and to determine whether or not to contest it; notice of how to appeal ensures that available error-correction procedures will be effective. In *Memphis Light, supra,* the second component was examined, and I have no doubt that the Court today correctly concludes that recipients of the mass change notice here were adequately informed of the "procedure for protesting." 436 U.S., at 15, 98 S.Ct., at 1563; see *ante,* at 2529.

These cases are the converse of *Memphis Light,* however, and the subtle yet vital failure of the notice here is that it completely failed to inform recipients of the particular action proposed to be taken against them *by the Department.*[FN29] The ***153** notice included only a single vague statement about some impending impact on food stamp benefits: due to *Congress'* action, recipient's benefits would "either be reduced ... or ... terminated." App. 5. The defendant in this lawsuit, however, is the Massachusetts Department of Public Welfare, not Congress, and the action of which notice was required was, it bears repeating, *not* Congress' decision to change the law but rather the Department's application of that changed law to individual recipients.[FN30] "Central to the evaluation of ****2542** any administrative process is the nature of the relevant inquiry." *Mathews*, 424 U.S., at 343, 96 S.Ct., at 907. In these cases the administrative inquiry was uncomplicated: what was the current earned income of each recipient, and what should his reduced food stamp benefit be after Congress' change was applied to that figure? The obvious value of notice of those simple factual determinations [FN31] is that they ***154** were the *only* data that would have enabled each recipient to "choose for himself whether to ... acquiesce or contest," *Mullane, supra,* 339 U.S., at 314, 70 S.Ct., at 657, by filing a benefit-preserving appeal.[FN32]

FN29. The Court finds that the form notice here was adequate simply because it explained how to appeal and, if a recipient contacted the Department, their benefits were not reduced until a hearing was held. *Ante,* at 2529. This rationale ignores the first component of notice that our cases recognize: notice of the proposed action. This notice told recipients only of Congress' change, and did not even identify the Department's action ("reduced *or* terminated," App. 5), let alone provide sufficient information to evaluate it. See n. 4, *supra*. By approving a form of notice that encourages recipients to appeal whether they have a reason or not, the Court likely adds to the costs of welfare administration. Moreover, as noted above, n. 6, no regulation required the Department to continue a recipient's benefits absent some claim of factual error. Unless the Court intends to impose such a requirement under the Constitution by its decision today, its ground for decision fails to support its constitutional conclusion.

FN30. The Secretary was a party in the District Court only on the theory that the mass change regulation was unconstitutional. The District Court did not so hold, however, and its order ran solely against the state agency. The Department's authorities wrote and designed the particular form notice at issue, and only the errors caused by the Department's actions were the subject of challenge. In evaluating the adequacy of the notices, therefore, the value of additional information in preventing the Department's errors is the appropriate focus of analysis.

FN31. It is conceded that implementation of the 1981 law required the Department to make these determinations in each individual case. See, *e.g.*, Brief for State Petitioner 65 (implementation "required a computer recalculation of each household's benefits"). I thus fail to understand the Court's suggestion that "[t]his, of course, would be a different case if the reductions were based on ... individual factual determinations." *Ante,* at 2531, n. 35. The Court might intend to distinguish

actions requiring simple mathematical determinations from application of laws requiring greater judgment or discretion on the part of administrators. But we have never before suggested that such a distinction might make a difference, nor does the Court provide any analytical justification for such a conclusion today. *Goldberg v. Kelly*, 397 U.S. 254, 90 S.Ct. 1011, 25 L.Ed.2d 287 (1970), clearly stated that the procedural protections of the Due Process Clause apply whenever the potential for erroneous decision based on "incorrect or misleading factual premises or ... misapplication of rules or policies to the facts of particular cases" exists. *Id.*, at 268, 90 S.Ct., at 1020. See also *Yee-Litt v. Richardson*, 353 F.Supp. 996 (ND Cal.1973).

FN32. The Secretary reports that households normally receive their first reduced benefit allotment "a few weeks after the notice." Brief for Federal Respondent 37. The form notice here, however, provided that recipients had a right to continued benefits pending a fair hearing only if their request were *received* within 10 days from the date of the notice. App. 5; see 7 CFR §§ 273.15(k)(1), 273.13(a)(1) (1981). Otherwise, a recipient had only a right to reimbursement for erroneously reduced benefits "as soon as administratively feasible" after prevailing in a fair hearing. 7 CFR § 273.15(r)(2) (1981).

The Court ultimately brushes aside any value that individualized notice may have had, stating that "citizens are presumptively charged with knowledge of the law," and asserting that "[s]urely Congress can presume that [a form] notice relative to a matter as important as a change in a food-stamp allotment would prompt an appropriate inquiry if not fully understood." *Ante*, at 2531. This reasoning is wholly unpersuasive. First, I am unwilling to agree that "[t]he entire structure of our democratic government," *ante*, at 2531, rests on a presumption that food stamp recipients know and comprehend the arcane intricacies of an entitlement program that requires over 350 pages in the Code of Federal Regulations to explain and voluminous state manuals to administer. I am more certain that the premises of our polity include minimal protections for the property interests of the poor.

Moreover, in *Memphis Light*, the Court flatly rejected the argument that the poor can protect themselves without ***155** process. The dissent there argued that "a homeowner surely need not be told how to complain about an error in a utility bill." 436 U.S., at 26, 98 S.Ct., at 1569 (STEVENS, J., dissenting). The Court ruled, however, that "skeletal notice" was constitutionally insufficient because utility customers are "of various levels of education, experience and resources," and "the uninterrupted continuity of [utility service] is essential to health and safety." *Id.*, at 14-15, n. 15, 98 S.Ct., at 1563, n. 15. See also *Mathews v. Eldridge*, *supra*, 424 U.S., at 349, 96 S.Ct., at 909 ("[P]rocedures [must be] tailored ... to 'the capacities and circumstances of those who are to be heard' ") (citation omitted).****2543** In this case, over 45% of affected food stamp recipients in Massachusetts had not completed high school. App. 127. In such circumstances recipients must be "informed clearly." *Memphis Light*, 436 U.S., at 14-15, n. 15, 98 S.Ct., at 1563, n. 15.

Additionally, this record reveals that the Court's reliance on the protective value of an "appropriate inquiry" is misplaced. The notice here did indeed state that recipients should call their local welfare office if they had "questions concerning the correctness of [their] benefits computation." App. 5. Putting aside the fact that the notice did not *inform* any recipient of his "benefits computation," the testimony of the representative named plaintiffs at trial was uniformly that the local welfare workers they called about the notice were either unaware of it or could not explain it. *Id.*, at 131 (Zades), 139 (Parker), 149 (Johnson). With no help forthcoming at the local level, the 10-day appeal period was virtually certain to expire before even those recipients who called would receive a specific explanation enabling them intelligently to decide whether or not to appeal.

Finally, the *Mathews* inquiry simply does not countenance rejection of procedural alternatives because a court finds existing procedures "adequate" in some ad hoc sense, without evaluation of whether additional procedures might have been more protective at little or no cost to the government. Yet the Court discusses neither the protective value of individualized***156** notice in this context nor the burden, if any, that it would impose on the Department.

4. *Governmental Interests.* The District Court concluded that only four simple facts were necessary to transform this vague notice into one that adequately informed affected individuals about the Department's action in their particular cases: "whether [their benefits] were being reduced or terminated" and "the individual recipient's old food stamp benefit amount, new benefit amount, [and] the amount of earned income that was being used to compute the change." Pet.App. 100. These data were already contained in the Department's computerized files, and the computers could have been programmed to print the individualized information on the form notices with little additional time or effort.[FN33] The District Court's finding, not questioned by the Court today, was that programming the computer to provide such individual information is "neither a difficult nor burdensome procedure," *id.*, at 75-76, and that had the Department requested that such individualized data be printed on the December 1981 notices, it was likely that it could have been accomplished "without causing any delay...." *Id.*, at 74, 75. This record, therefore, can support no argument that individualized notice would have been a burden for the Department.[FN34]

FN33. App. 80-84, 217-227. Indeed, prior to trial below the same computer system generated a list of recipients containing precisely the information found necessary by the District Court. Pet.App. 80. In light of this evidence, it is unsurprising that, as the District Court stated, "the Commonwealth [did] not argue the conservation of scarce fiscal resources." *Id.*, at 92-93. See also *Philadelphia Welfare Rights Organization v. O'Bannon*, 525 F.Supp. 1055, 1060 (ED Pa.1981) (administrative burden in providing individualized notice of state implementation of the 1981 earned-income deduction change was "negligible").

FN34. The District Court also found that individualized notice would "operat[e] to benefit the agency because such a notice should reduce the amount of client visits and phone calls to the agency seeking clarification, reduce the amount of unnecessary appeals, and free up the time of the caseworkers for other tasks." Pet.App. 76-77; see App. 95-96 (expert testimony that vague mass change notice throws agency into "administrative chaos"). This finding is due deference in this Court. Although the Court properly rejects such evidence in its discussion of the regulations and statute, *ante*, at 2528, n. 29, our constitutional precedents require that the "fiscal and administrative burdens" of process enter the analysis once it is determined that notice of some kind is required under the Due Process Clause. *Mathews*, 424 U.S., at 335, 96 S.Ct., at 903; see *Mullane*, 339 U.S., at 317, 70 S.Ct., at 658 (considering "practical difficulties and costs" of types of notice).

***157 **2544** IV

The Court's regulatory conclusion is unconvincing, and its statutory dictum is unfortunate. But I am most troubled by the Court's casual suggestion that foreseeable "inadvertent" errors in the administration of entitlement programs may be ignored in determining what protection the Constitution provides. Such administrative error all too often plagues governmental programs designed to aid the poor.[FN35] If well-meaning mistakes that might be prevented inexpensively lie entirely outside the compass of the Due Process Clause, then the convenience of the administrative state comes at the expense of those least able to confront the bureaucracy. I respectfully dissent.

FN35. See, *e.g.*, Hearing on Children, Youth, and Families in the Northeast before the House Select Committee on Children, Youth and Families, 98th Cong., 1st Sess., 51, 53 (1983); Hearings on HEW Efforts to Reduce Errors in Welfare Programs (AFDC and SSI) before the Subcommittee on Oversight of the House Committee on Ways and Means, 94th Cong., 2d Sess. (1976).

Justice MARSHALL, dissenting.

I share Justice BRENNAN's view that the logic of the relevant regulation, 7 CFR § 273.12(e)(2)(ii) (1985) requires the sort of notice that the lower courts ordered here. The regulation contemplates a notice that allows families to "adjust household budgets" according to changes in benefit levels, ***158** 43 Fed.Reg. 18896 (1978), and I fail to see how a notice that does not inform recipients of their new benefit levels can serve this purpose. Given that this interpretation of the regulation disposes of the cases, I find

no need to reach the other issues addressed by the Court or by the dissent. I therefore join Part I of Justice BRENNAN's dissent.

U.S.Mass.,1985.
Atkins v. Parker
472 U.S. 115, 105 S.Ct. 2520, 86 L.Ed.2d 81, 53 USLW 4686

END OF DOCUMENT

480 F.3d 1072, 34 NDLR P 107, 20 Fla. L. Weekly Fed. C 371
(Cite as: 480 F.3d 1072)

United States Court of Appeals,
Eleventh Circuit.
Steven M. BIRCOLL, Plaintiff-Appellant,
v.
MIAMI-DADE COUNTY, a political subdivision of the State of Florida, Defendant-Appellee.

No. 06-11098.
March 7, 2007.

Background: Deaf motorist brought cause of action against county, alleging that his arrest for driving under the influence (DUI) and subsequent detention violated the Americans with Disabilities Act (ADA) and the Rehabilitation Act (RA). County moved for summary judgment. The United States District Court for the Southern District of Florida, No. 05-20954-CV-FAM,Federico A. Moreno, J., 410 F.Supp.2d 1280, granted county's motion for summary judgment, and motorist appealed.

Holdings: The Court of Appeals, Hull, Circuit Judge, held that:
(1) waiting for oral interpreter before taking field sobriety tests was not reasonable modification of police procedures, in which officer who stopped motorist on suspicion of driving under the influence (DUI) had to engage to accommodate motorist's profound deafness;
(2) arresting officer took steps reasonably necessary to establish effective communication at police station; and
(3) even assuming that corrections officers failed to accommodate motorist's disability, by requiring him to use ordinary telephone to attempt to communicate his arrest to his girlfriend, this lack of accommodation did not injure motorist or support cause of action under the ADA.

Affirmed.

Words "eligibility" and "participation," as used in section of the Americans with Disabilities Act (ADA) defining a "qualified individual with a disability," to whom provisions of the ADA apply, as individual with disability who, with or without reasonable modifications or provision of auxiliary aids and services, meets essential eligibility requirements for receipt of services or for participation in programs or activities provided by public entity, do not imply voluntariness on part of applicant who seeks benefits from the public entity, so as to preclude application of the ADA to prisoners, arrestees or other persons being detained against their will. Americans with Disabilities Act of 1990, § 201(2), 42 U.S.C.A. § 12131(2).

Arresting officer took steps reasonably necessary to establish effective communication at police station with the profoundly deaf motorist whom he arrested for driving under the influence (DUI), and did not discriminate against motorist in violation of provision of the Americans with Disabilities Act (ADA), where officer not only read consent form aloud to motorist twice in lighted room to afford him an opportunity to lip read, but provide him with written copy of form, and where motorist acknowledged that he could read English; motorist's own failure to read what officer provided him did not constitute discrimination. Americans with Disabilities Act of 1990, § 202, 42 U.S.C.A. § 12132.

Even assuming that corrections officers failed to accommodate hearing-impaired arrestee's disability by allegedly denying him access to a teletypewriter, a telecommunications device for the deaf, following his arrest, and in requiring him to use ordinary telephone to attempt to communicate his arrest to his girlfriend, this lack of accommodation did not injure arrestee or support cause of action under the Americans with Disabilities Act (ADA), where arresting officer had agreed to place phone call on arrestee's behalf to his girlfriend, and where girlfriend successfully received the message that he had been arrested and picked him up when he was released. Americans with Disabilities Act of 1990, § 202, 42 U.S.C.A. § 12132.

***1075** Jay M. Levy, Jay M. Levy, P.A., Miami, FL, for Plaintiff-Appellant.

Eric Alexander Hernandez, Miami, FL, for Defendant-Appellee.

Appeal from the United States District Court for the Southern District of Florida.

Before TJOFLAT, HULL and BOWMAN,[FN*] Circuit Judges.

FN* Honorable Pasco M. Bowman II, United States Circuit Judge for the Eighth Circuit,

sitting by designation.

HULL, Circuit Judge:

This case arises out of Plaintiff-Appellant Steven M. Bircoll's DUI arrest. Bircoll, who is deaf, sued Defendant-Appellee Miami-Dade County, Florida ("Miami-Dade"), alleging that its law enforcement officers violated Title II of the Americans with Disabilities Act ("ADA") and the Rehabilitation Act by discriminating against him because of his disability. Specifically, Bircoll claims that the officers failed to reasonably modify their procedures in order to ensure effective communication with Bircoll. This case presents an issue of first impression in this circuit as to the applicability of the ADA and the Rehabilitation Act to police conduct during arrests.

I. FACTUAL BACKGROUND

We first discuss Bircoll's disability and the events during his arrest. [FN1]

FN1. We recite the facts in the light most favorable to Bircoll. *See Vinyard v. Wilson*, 311 F.3d 1340, 1343 n. 1 (11th Cir.2002).

A. Bircoll's Disability

Bircoll is a profoundly deaf individual with no hearing in his left ear and ten percent hearing in his right ear. When wearing his hearing aid, Bircoll has a twenty percent hearing capacity.

Bircoll, who has been deaf for most of his life, was raised in the hearing world. Bircoll graduated from a mainstream high school and attended two years of community college. Bircoll reads, writes, and speaks English. Although Bircoll sometimes relies on other people to speak for him and uses his friends and relatives for help, Bircoll's primary form of communication is lipreading. Bircoll has been lipreading for over thirty years. Bircoll does not know or use sign language.

Bircoll is more effective in reading lips if he is facing the speaker with good light and little background noise. Bircoll has greater success in communicating with speakers who do not have facial hair, make few facial expressions, and keep their hands away from their faces. When reading lips, Bircoll usually understands about fifty percent of what is said. Bircoll speaks with a speech impediment.

As for telephone communication, Bircoll usually communicates with an amplified telephone (one that is louder than a normal phone) and a teletypewriter, a telecommunication***1076** device for the deaf ("TDD phone"). Bircoll also has a cell phone that he uses primarily for emergencies, such as calling someone to say he will be late. Bircoll cannot hear on the cell phone, but he will make the phone call, do the talking, and hang up.[FN2]

FN2. Bircoll as a teenager had a snowmobile accident that injured his legs. Because of that accident, one leg is shorter than the other. Bircoll has trouble balancing and standing for prolonged periods of time, cannot run, and sometimes limps when he walks. Bircoll's hearing impairment also affects his balance and causes dizziness.

B. Traffic Stop

On April 6, 2001, Bircoll went to dinner around 9:00 p.m. with his then-girlfriend. He was wearing his hearing aid that evening. Bircoll testified that he had less than one drink, a 7-Up with whiskey. Bircoll did not finish his drink because his stomach was bothering him. Around midnight or 1:00 a.m. on April 7th, Bircoll argued with his girlfriend and drove her back to their shared home. Bircoll went into their house, argued with his girlfriend, and then left in his car.

After about an hour of driving south on I-75, Bircoll exited the interstate. He stopped at a gas station to ask for directions back to I-75. As he was leaving the gas station, Bircoll stopped and made a right turn out of a parking lot and arrived at an intersection with a flashing red light where he stopped again. Because trees and bushes were obstructing his view, Bircoll pulled into the intersection to see if there were any oncoming cars. When Bircoll saw that it was clear, he turned left. As Bircoll was trying to determine which ramp to take for I-75, he saw lights flashing in his mirror. Bircoll realized a police officer was pulling him over and stopped.

Sergeant Charles Trask, a police officer with the Miami-Dade County Police Department, was in his patrol car and observed Bircoll's car pull forward into the intersection, reverse because of an oncoming car, and then turn left. Trask pulled Bircoll over at approximately 3:00 a.m. on April 7, 2001. Trask stated

that Bircoll failed to stop at both the right turn from the parking lot and at the flashing red light where Bircoll turned left. Trask noted that Bircoll delayed in pulling his vehicle over after Trask activated the overhead lights of his police car.

C. Field Sobriety Tests

As Trask approached Bircoll's car, Bircoll rolled down his window. When Trask tried to speak to him, Bircoll informed Trask that he was deaf and had a speech impediment. Either by virtue of his lipreading or hearing aid, or a combination of both, Bircoll was able to respond to Trask during the traffic stop.

Trask asked Bircoll how many drinks he had consumed that night. Bircoll responded that he had not been drinking. When Bircoll spoke, Trask realized that Bircoll had a speech impediment but also noticed that Bircoll responded to sound.

Trask told Bircoll to step out of his car, and Bircoll did. Trask asked Bircoll for his driver's license and registration, which Bircoll provided. Once Bircoll was out of the car, Trask realized that Bircoll smelled of alcohol and had red and watery eyes. Trask offered to communicate by fingerspelling in American Sign Language, but Bircoll responded that he did not understand sign language.[FN3]

> FN3. According to his depositions and affidavit, Trask knows the American Sign Language alphabet because he learned to use it fingerspelling with his developmentally delayed son. Bircoll's brief alleges that Trask spoke a made-up sign language, but Bircoll submitted no evidence to support this claim.

***1077** Trask contends that he established face-to-face communication with Bircoll, that he spoke loudly, and that Bircoll spoke back in understandable English. Bircoll, however, states that he had difficulty understanding Trask, that there was "little lighting" and it was "almost dark,"[FN4] that Trask was standing five or six feet away, that Trask's heavy moustache obscured his mouth, and that Trask had to repeat himself "a lot of times."

> FN4. Trask claims that he left his headlights on, and utility poles with lights were in the area.

Bircoll testified that Trask told him if Bircoll would do what Trask told him, Bircoll would be free to go. Trask began to administer field sobriety tests. According to Bircoll, when Trask began instructing him, Bircoll asked if Trask could "call somebody to help me out with this."[FN5] Trask did not do so, but instructed Bircoll to perform the tests. In his deposition, Bircoll admitted that he understood Trask was asking him to perform sobriety tests, but he did not understand why.

> FN5. In his deposition, Bircoll was asked:
>
> > Q: Did you ask for an interpreter at that time?
> >
> > A: As a matter of fact, I asked him to call somebody to help me out with this.

As to the first sobriety test, Trask instructed Bircoll on the Romberg balance exercise. In that test, the individual must keep his feet together, hold his arms by his side, tilt his head back, close his eyes, and count silently for thirty seconds. Trask gave Bircoll verbal instructions and a physical demonstration of the exercise. Trask testified that Bircoll passed this test.

Bircoll admits that he tried the Romberg balance test but contends that he did not complete this test. After he closed his eyes, Trask continued talking. Bircoll opened his eyes in order to read Trask's lips. When Trask ordered him to close his eyes, Bircoll stated that he needed to be able to see to read Trask's lips. Bircoll testified that he again suggested that they should get "a lawyer or somebody."[FN6] Bircoll also stated that Trask shined the flashlight in his eyes, that Trask had heavy facial hair, and that he had a hard time understanding Trask. Bircoll told Trask several times that he was deaf and could not hear.

> FN6. In his deposition, Bircoll described this sobriety test as follows:
>
> > He told me close my eyes, put my head back, and then he was saying something, and I opened my eyes trying to listen to him. He said no, no, close your eyes, put your head back. I said, sir, I need to look at your face. I can't hear you when you are

> talking to me.
>
> We did that a couple of times. He got animated and frustrated, and I knew there was a problem here. And then I told him maybe we should get a lawyer or somebody or at least call somebody because he was getting frustrated.

As to the second test, Bircoll performed the one-leg stand exercise, standing on one leg for thirty seconds. Trask gave Bircoll verbal instructions and a physical demonstration of the exercise. Bircoll testified that he had no problems performing this test. Trask contends that Bircoll failed the test because he waved and raised his arms and shuffled his feet to maintain his balance.

As to the third test, Trask gave verbal instructions and demonstrated the walk-and-turn test. In that test, the individual must walk in a straight line, turn, and walk back in the same line. Bircoll understood the instructions and attempted to perform the test, but asked if he could remove his boots. Bircoll had trouble balancing because of his knee injury and his boots. According to Bircoll, after removing his ***1078** shoes, he had no trouble walking straight. Trask contends that Bircoll did not maintain his balance and failed the exercise.

As to the fourth test, Bircoll does not remember performing the finger-to-nose test, where the individual must tilt his head back, close his eyes, and touch his index finger to the tip of his nose. Bircoll denied that Trask ever asked him to do this, and testified that he did not complete any test that required him to close his eyes. Trask contends that he verbally instructed and demonstrated the test for Bircoll and that Bircoll failed the finger-to-nose test because he did not keep his eyes closed, missed the tip of his nose, and did not use the correct hand.

Around 3:30 a.m., or thirty minutes after the stop, Trask concluded that Bircoll was too impaired to drive and arrested him for driving under the influence. Trask told Bircoll he was under arrest for DUI, handcuffed Bircoll, and put him in the police car. According to Bircoll, Trask did not inform Bircoll that he was under arrest or read him his rights. After waiting for the tow truck for Bircoll's car, Trask and Bircoll arrived at the police station at 4:10 a.m.

D. Intoxilyzer Consent Form

Once Bircoll arrived at the police station, another police officer, Officer Everett Townsend, tried to communicate with him and obtain his consent to take an Intoxilyzer test. Bircoll told Townsend that he was deaf. Townsend sat down on Bircoll's left side about a foot away. Townsend had two copies of the Intoxilyzer consent form. Townsend read from one form and handed the other form to Bircoll to read. Bircoll acknowledges that Townsend handed him "a piece of paper" but denies that Townsend asked him to read it.[FN7]

> FN7. Miami-Dade filed the deposition of Bircoll taken in a malpractice case that Bircoll filed against the attorney who represented him in his DUI case (the "malpractice deposition"). When questioned about the consent form (identified as Exhibit B) in the malpractice deposition, Bircoll admitted that the officer "handed me the piece of paper and I was trying to read it and he was trying to talk to me." When asked when the piece of paper was given to him, Bircoll said it was "[a]fter I was arrested" and "[a]t the police station."
>
> In his deposition in this case, Bircoll stated that "I remember him handing me a piece of paper," but Bircoll denied that he was asked to read it.

The consent form advises a DUI arrestee that he will be offered a breath and/or urine test, and that if he refuses to take the test, his driver's license will be suspended, as follows:

> You are under arrest for driving under the influence of alcohol and/or a chemical substance and/or a controlled substance. You will be offered a Breath Test for determining the alcohol content of you[r] breath and/or a Urine Test for detecting the presence of a chemical and/or controlled substance. Should you refuse to take either of the tests, the Department of Highway Safety and Motor Vehicles will suspend your privilege to operate a motor vehicle for a period of twelve (12) months.... Your refusal to submit to a breath and/or urine test upon request of a law enforcement official shall be admissible into evidence in any criminal proceeding. You may, at your

> own expense, have other Chemical or Physical Tests performed to determine the alcohol content of your blood or breath, or to detect the presence of a chemical and/or controlled substance.

Bircoll does not deny that Townsend read aloud the consent form twice. In fact, Bircoll states that he did not read the form himself because Townsend continued talking to Bircoll and Bircoll did not look away from Townsend's face and down at the ***1079** form he was given. However, Bircoll also states that because they were side by side and not facing each other, Bircoll had trouble understanding Townsend. Bircoll testified that Townsend "was talking towards the other way."

As Townsend read aloud the consent form for the first time, Bircoll asked if he could get his wallet, which contained a "Driver's Rights Card." This card states that any consent to a test is not voluntary, as follows:

> In compliance with the requirements of Florida's Implied Consent Law *I will* consent to submit to tests of my breath, urine, blood or other bodily substances which you may designate, provided the test I am offered is properly done.... However, since I maintain that you do not have probable cause to make this request for a chemical test, my consent is given under protest and is no way voluntary.

Townsend stopped reading, photocopied the card, and wrote on the photocopy that Bircoll, upon being shown the consent language on the card, advised that his consent was not voluntary and he was "not consenting to anything." After copying the card, Townsend finished reading the consent form once and then read the form aloud a second time.

Bircoll claims that he requested an interpreter "many times" while he was at the police station. However, Townsend in his affidavit stated that "Bircoll never asked for an interpreter in my presence." Officer James Dooner was also there and stated that Bircoll never asked for an interpreter in his presence.

In addition, Townsend made notes on the two consent forms. On the first form, Townsend wrote "my copy I read from" and recorded that Bircoll said, "I hear you, but I don't understand the law. I understand what you said but I don't understand the law. I['m] not going to consent to anything." The notes on the back say that the consent form was read to Bircoll, that Bircoll was asked if he read English, and that Bircoll was given a consent form to read as well.

On the second form, Townsend wrote, "handed to defendant to read" and noted that he advised Bircoll that he would read aloud so that Bircoll could read his lips. The second form notes that Bircoll stated he would not sign anything.

Bircoll's version of the events differs materially. Bircoll denies that he ever said he understood what the police were saying but did not understand the law. Instead, Bircoll claims he told the officer that he did not understand what the officer was saying. Bircoll also denies saying that he would not consent to anything. Bircoll testified that he never refused to take the Intoxilyzer test and that the police never asked him to take it.

Townsend testified that "[a]lthough it is not usually the practice to give arrestees telephone calls at the Substation," he called Bircoll's girlfriend and informed her of Bircoll's situation. Bircoll's girlfriend stated in her deposition that she found out Bircoll had been arrested for DUI because "[t]he cops called me."

E. Jail

Around 9:15 a.m., Bircoll was transferred from the station to Turner Guilford Knight Correctional Facility ("TGK"). Pursuant to TGK's intake procedures, Bircoll's jail card, which contains information about Bircoll and his arrest, was affixed with an ADA stamp.

After he was fingerprinted and photographed, Bircoll was allowed to make phone calls. Bircoll pointed out to an officer that the phone was a pay phone and told him that he could not hear on a pay ***1080** phone. According to Bircoll, the officer replied that the pay phone was all that was available and that Bircoll could choose to use it or not. Bircoll then used a regular telephone by dialing his home number three or four times and screaming into it. He hoped that someone would listen to the messages on the answering machine and come get him.

Captain Greg Bennett of the Miami-Dade County Department of Corrections and Rehabilitation explained that under the standard operating procedures

governing intake at TGK, a disabled arrestee who is unable to communicate will be provided with appropriate auxiliary aids, such as a TDD phone. Miami-Dade submitted evidence that three TDD phones were delivered to TGK on December 29, 2000. Bircoll testified, however, that he was never offered a TDD phone.

Bircoll was placed in a cell alone and separate from the other inmates. Bircoll was released at 2:16 p.m. the same day.[FN8] Bircoll's DUI charge was later *nolle prossed*.

> FN8. In Florida, a person arrested for DUI may not be released from custody:
>
> (a) Until the person is no longer under the influence of alcoholic beverages ... and affected to the extent that his or her normal faculties are impaired;
>
> (b) Until the person's blood-alcohol level or breath-alcohol level is less than 0.05; or
>
> (c) Until 8 hours have elapsed from the time the person was arrested.
>
> Fla. Stat. § 316.193(9).

II. PROCEDURAL HISTORY

On April 7, 2005, Bircoll filed this lawsuit alleging that: (1) Miami-Dade violated Title II of the ADA, 42 U.S.C. §§ 12131-12134, when it failed to provide him with an interpreter to assist him in communicating with police officers and denied him access to a TDD phone at the jail; and (2) Miami-Dade violated the Rehabilitation Act of 1973, 29 U.S.C. § 794, by discriminating against him when it denied him an interpreter, denied him a TDD phone, and placed him in solitary confinement.[FN9] Miami-Dade moved for summary judgment on these claims.[FN10]

> FN9. Bircoll's complaint also contained a 42 U.S.C. § 1983 claim, but the district court granted Miami-Dade judgment on this count, and it is not involved in this appeal.
>
> FN10. Bircoll's complaint initially included the Miami-Dade County Police Department and the Miami-Dade County Department of Corrections and Rehabilitation as defendants. The complaint against the departments was dismissed because they are not legal entities subject to suit. The case proceeded against only Miami-Dade County.

As to the ADA claim, the district court noted that this Court has yet to address whether the ADA applies to a DUI arrest. *See* *Bircoll v. Miami-Dade County*, 410 F.Supp.2d 1280, 1283 (S.D.Fla.2006). The district court adopted the Fourth Circuit's approach in *Rosen v. Montgomery County*, 121 F.3d 154 (4th Cir.1997), and concluded that the ADA did not apply to police conduct during Bircoll's DUI arrest or at the station. *Bircoll*, 410 F.Supp.2d at 1283-84. The district court reasoned that the officers at the station "merely communicated the Breath Test consent form to Plaintiff and Plaintiff refused," and that "no 'police investigative activities' ever took place." *Id.* at 1284-85. As to the Rehabilitation Act claim, the district court determined that a plaintiff who proceeds under a theory of inequal treatment must prove intentional discrimination or bad faith. *Id.* at 1286. The district court also noted that this Court has not addressed whether intentional discrimination in Rehabilitation Act claims can be proven by "deliberate indifference," but found that in any event Defendant's actions did not rise to the ***1081** level of intentional discrimination or deliberate indifference. *Id.*[FN11]

> FN11. The district court also concluded that the police had probable cause to arrest Bircoll for DUI based on his erratic driving, red and watery eyes, and smell of alcohol; that the arrest was not based on Bircoll's disability; and that there was no causal connection between Bircoll's disability and the arrest made during the traffic stop. *Bircoll*, 410 F.Supp.2d at 1286.
>
> In his brief on appeal, Bircoll does not advance a wrongful-arrest claim under the ADA but argues only a failure to accommodate his disability. At oral argument, Bircoll's lawyer acknowledged that Trask had probable cause to arrest Bircoll. Thus, we have no occasion to address whether a wrongful-arrest claim would be cognizable under the ADA.

[1] On appeal, Bircoll argues that the district court

erred in concluding that Title II of the ADA did not apply to law enforcement activity during his DUI arrest on the roadside, at the police station, and at the jail. We first review the statutory language of Title II and relevant case law.[FN12]

FN12. This Court reviews *de novo* the district court's grant of summary judgment, drawing all facts and inferences in the light most favorable to Bircoll. *See Giddens v. Equitable Life Assurance Soc'y of the U.S.*, 445 F.3d 1286, 1292 n. 4 (11th Cir.2006). Summary judgment is appropriate when there is no genuine issue of material fact and the moving party is entitled to a judgment as a matter of law. *Id.*

III. TITLE II OF THE ADA

A. Statutory Language and Regulations

[2] Congress enacted the ADA "to provide a clear and comprehensive national mandate for the elimination of discrimination against individuals with disabilities." 42 U.S.C. § 12101(b)(1). Title II of the ADA prohibits a "public entity" from discriminating against "a qualified individual with a disability" on account of the individual's disability, as follows:

> [N]o qualified individual with a disability shall, by reason of such disability, be excluded from participation in or be denied the benefits of the services, programs, or activities of a public entity, or be subjected to discrimination by any such entity.

42 U.S.C. § 12132. Title II defines a "qualified individual with a disability" as "an individual with a disability who, with or without reasonable modifications ... or the provision of auxiliary aids and services, meets the essential eligibility requirements for the receipt of services or the participation in programs or activities provided by a public entity." 42 U.S.C. § 12131(2). The Supreme Court has instructed that a disabled prisoner can state a Title II-ADA claim if he is denied participation in an activity provided in state prison by reason of his disability. *See Pa. Dep't of Corr. v. Yeskey*, 524 U.S. 206, 211, 118 S.Ct. 1952, 1955, 141 L.Ed.2d 215 (1998). The words "eligibility" and "participation" in the statutory definition of a qualified individual with a disability "do not connote voluntariness" and do not require voluntariness on the part of an applicant who seeks a benefit from the state. *Id.*

Title II of the ADA also provides that "the Attorney General shall promulgate regulations" that implement Title II, Part A. 42 U.S.C. § 12134(a). The Department of Justice ("DOJ") has promulgated regulations implementing Title II's prohibition against discrimination. The DOJ's regulations provide that "[a] public entity shall make reasonable modifications in policies, practices, or procedures when the modifications are necessary to avoid discrimination on the basis of disability, unless the public entity can demonstrate that making the modifications would fundamentally alter the nature of the service, program,***1082** or activity." 28 C.F.R. § 35.130(b)(7).[FN13]

FN13. Title I, in its statutory text, notes that discrimination includes "not making reasonable accommodations to the known physical or mental limitations of an otherwise qualified individual with a disability." 42 U.S.C. § 12112(b)(5)(A). Title III, in its statutory text, notes that discrimination includes "a failure to make reasonable modifications in policies, practices, or procedures." 42 U.S.C. § 12182(b)(2)(A)(ii). There is no similar statutory language in Title II.

> However, the DOJ regulations for Title II impose the requirement of "reasonable modifications" to procedures to avoid the discrimination prohibited by Title II. *Compare* 42 U.S.C. §§ 12111, 12112, *and* 42 U.S.C. § 12182, *with* 28 C.F.R. pt. 35. There is no claim in this case that the DOJ's Title II regulations go beyond the statutory authority of the ADA. In *Olmstead v. L.C. ex rel. Zimring*, the Supreme Court cited these same DOJ-Title II regulations, stating that "[w]e recite these regulations with the caveat that we do not here determine their validity." 527 U.S. 581, 592 119 S.Ct. 2176, 2183, 144 L.Ed.2d 540 (1999). The Supreme Court added, "we do not understand petitioners to challenge the regulatory formulations themselves as outside the congressional authorization." *Id.* Because Miami-Dade has not challenged the validity of the DOJ's regulations for Title II, we likewise interpret and apply the

> regulations but with the caveat that we do not here determine their validity.

These same DOJ regulations also contain Subpart E, entitled "Communications," which provides that "[a] public entity shall take appropriate steps to ensure that communications with ... members of the public with disabilities are as effective as communications with others." 28 C.F.R. § 35.160(a). These steps include furnishing "appropriate auxiliary aids and services" to afford a disabled individual equal opportunity to participate in an activity of the public entity, as follows:

> A public entity shall furnish appropriate auxiliary aids and services where necessary to afford an individual with a disability an equal opportunity to participate in, and enjoy the benefits of, a service, program, or activity conducted by a public entity.

28 C.F.R. § 35.160(b)(1). The ADA defines "auxiliary aids and services" to include "qualified interpreters or other effective methods of making aurally delivered materials available to individuals with hearing impairments." 42 U.S.C. § 12102(1)(A). The DOJ regulations provide that "auxiliary aids and services" include, among other things, "[q]ualified interpreters" and "telecommunications devices for deaf persons (TDD's)." 28 C.F.R. § 35.104(1). Further, the Appendix to DOJ Regulation § 35.160 states that "[t]he public entity shall honor the [disabled individual's] choice [of auxiliary aid] unless it can demonstrate another effective means of communication exists or that use of the means chosen would not be required under § 35.164." 28 C.F.R. pt. 35, app. A; *see also id.* § 35.160(b)(2) ("In determining what type of auxiliary aid and service is necessary, a public entity shall give primary consideration to the requests of the individual with disabilities.").

[3] The ADA's "reasonable modification" principle, however, does not require a public entity to employ any and all means to make auxiliary aids and services accessible to persons with disabilities, but only to make "reasonable modifications" that would not fundamentally alter the nature of the service or activity of the public entity or impose an undue burden. *See Tennessee v. Lane*, 541 U.S. 509, 531-32, 124 S.Ct. 1978, 1993-94, 158 L.Ed.2d 820 (2004) ("Title II does not require States to employ any and all means to make judicial services accessible to persons with disabilities.... It requires only 'reasonable modifications' that would not fundamentally alter***1083** the nature of the service provided .... [or] impose an undue financial or administrative burden.").

B. Circuit Law on Arrestees under the ADA

[4] In order to state a Title II claim, a plaintiff generally must prove (1) that he is a qualified individual with a disability; (2) that he was either excluded from participation in or denied the benefits of a public entity's services, programs, or activities, or was otherwise discriminated against by the public entity; and (3) that the exclusion, denial of benefit, or discrimination was by reason of the plaintiff's disability. *See Shotz v. Cates*, 256 F.3d 1077, 1079 (11th Cir.2001) (citing 42 U.S.C. § 12132).

The parties do not contest that Bircoll is a "qualified individual with a disability" under the first prong, or that Miami-Dade is a "public entity" under the second prong.[FN14] Rather, the dispute in this case is over whether Bircoll was excluded from participation in, or denied the benefit of, some "services, programs, or activities" of Miami-Dade by reason of his disability, *or* was "subjected to discrimination" by Miami-Dade by reason of his disability. 42 U.S.C. § 12132.

> FN14. *See Yeskey*, 524 U.S. at 209-10, 118 S.Ct. at 1954-55 (quoting § 12131(1)(B) and concluding that state prisons "fall squarely within the statutory definition of 'public entity,' which includes 'any department, agency, special purpose district, or other instrumentality of a State or States or local government' ").

Relying heavily on the Fourth Circuit's decision in *Rosen*, in which a deaf person was arrested for DUI, Miami-Dade argues that arrests of deaf persons are not "services, programs, or activities" that fall within the parameters of the ADA. *See Rosen*, 121 F.3d at 157 ("[C]alling a drunk driving arrest a 'program or activity' of the County, the 'essential eligibility requirements' of which (in this case) are weaving in traffic and being intoxicated, strikes us as a stretch of the statutory language and of the underlying legislative intent."). In *Rosen*, the Fourth Circuit concluded that even "[i]f we assume, however, that the police were required [under the ADA] to provide auxiliary aids at some point in the process, that point certainly

cannot be placed before the arrival at the stationhouse. The police do not have to get an interpreter before they can stop and shackle a fleeing bank robber, and they do not have to do so to stop a suspected drunk driver, conduct a field sobriety test, and make an arrest." *Id.* at 158.

In reply, Bircoll emphasizes that *Rosen* was decided before the Supreme Court's *Yeskey* decision, which concluded that a state prisoner has a cognizable ADA claim if he is denied participation in a required activity in prison by reason of his disability. Additionally, Bircoll relies on three other circuits' decisions indicating that arrestees may state cognizable ADA claims under Title II. *See Hainze v. Richards*, 207 F.3d 795 (5th Cir.2000); *Gohier v. Enright*, 186 F.3d 1216 (10th Cir.1999); *Gorman v. Bartch*, 152 F.3d 907 (8th Cir.1998). However, none of these cases extends the ADA as far as Bircoll claims.

For example, in *Hainze*, the Fifth Circuit concluded that "Title II does not apply to an officer's on-the-street responses to reported disturbances or other similar incidents ... *prior to* the officer's securing the scene and ensuring that there is no threat to human life." 207 F.3d at 801 (emphasis added). The police officers responded to a request to take a mentally ill individual, Hainze, to a hospital. *Id.* at 797. When they arrived at the scene, Hainze, with a knife in his hand, began to walk toward one of the officers. *Id.* In concluding that the ADA did not govern ***1084** the police officers' actions, the Fifth Circuit pointed out that officers "already face the onerous task of frequently having to instantaneously identify, assess, and react to potentially life-threatening situations." *Id.* at 801. The Fifth Circuit reasoned that requiring police officers called to the scene of a reported disturbance "to factor in whether their actions are going to comply with the ADA, in the presence of exigent circumstances and prior to securing the safety of themselves, other officers, and any nearby civilians, would pose an unnecessary risk to innocents." *Id.*

Nonetheless, the Fifth Circuit indicated that "[o]nce the area was secure and there was no threat to human safety ... deputies would have been under a duty to reasonably accommodate Hainze's disability in *handling and transporting him to a mental health facility*." *Id.* at 802 (emphasis added).[FN15]

FN15. Hainze was shot in the chest at the scene and transported by EMS, not the police. The Fifth Circuit's ultimate holding was that Hainze did not state a Title II claim against the police. *See Hainze*, 207 F.3d at 801.

Likewise, the Eighth Circuit concluded that the ADA applies to *police transportation of the arrestee* from the scene to the police station. *See Gorman*, 152 F.3d at 912-13. In that case, the Eighth Circuit reasoned that "[t]ransportation of an arrestee to the station house is ... a service of the police within the meaning of the ADA." *Id.* at 912. The Eighth Circuit decided that "the 'benefit' [arrestee] Gorman sought ... was to be handled and transported in a safe and appropriate manner consistent with his disability." *Id.* at 913 (citing 28 C.F.R. § 35.130(b)(1)). The Eighth Circuit ruled that "Gorman's allegations pass[ed] the threshold required to bring a case under the ADA and the Rehabilitation Act" and reversed the judgment for the defendants.[FN16] *Id.*

FN16. The Eighth Circuit remanded the case for development of the factual record, stating:

> It remains to be determined whether Gorman can prove he was discriminated against or denied a benefit or service because of his disability or whether the defendants can show they made reasonable accommodations of his disability or if further accommodation would have been an undue burden. 29 U.S.C. § 794a(a)(1); 42 U.S.C. § 12133.
>
> *Gorman*, 152 F.3d at 913.

The Tenth Circuit also recognized the possibility that arrestees may be able to state an ADA claim based on police conduct during an arrest. *Gohier*, 186 F.3d at 1220-21. However, the Tenth Circuit ultimately left the theory of such a claim "an open question" in the circuit because the facts did not show a wrongful arrest based on a disability and the plaintiff made no claim that the police had failed to accommodate his disability during the arrest. *Id.* at 1221.[FN17]

FN17. The Tenth Circuit described two potential theories of ADA-Title II liability: (1) "wrongful-arrest," where the police

> "wrongly arrested someone with a disability because they misperceived the effects of that disability as criminal activity"; and (2) "reasonable-accommodation-during-arrest," where the police properly investigate and arrest a person with a disability for a crime unrelated to that disability, but fail "to reasonably accommodate the person's disability in the course of investigation or arrest." *Gohier*, 186 F.3d at 1220-21; *see supra* note 11.

[5] We need not enter the circuits' debate about whether police conduct during an arrest is a program, service, or activity covered by the ADA. This is because Bircoll, in any event, could still attempt to show an ADA claim under the final clause in the Title II statute: that he was "subjected to discrimination" by a public entity, the police, by reason of his disability. *See* 42 U.S.C. § 12132. Indeed, this Court ***1085** already has explained that the final clause of § 12132 "protects qualified individuals with a disability from being 'subjected to discrimination by any such entity,' and is not tied directly to the 'services, programs, or activities' of the public entity." *Bledsoe v. Palm Beach County Soil & Water Conservation Dist.*, 133 F.3d 816, 821-22 (11th Cir.1998) (quoting 42 U.S.C. § 12132). We said in *Bledsoe* that this final clause in Title II " 'is a catch-all phrase that prohibits all discrimination by a public entity, regardless of the context.' " *Id.* at 822 (quoting *Innovative Health Sys., Inc. v. City of White Plains*, 117 F.3d 37, 44-45 (2d Cir.1997), *overruled on other grounds by Zervos v. Verizon N.Y., Inc.*, 252 F.3d 163 (2d Cir.2001)); *see also Gohier*, 186 F.3d at 1220 (noting that the magistrate judge "ignored the second basis for a Title II claim" and emphasizing the disjunctive language "*or* be subjected to discrimination" in the final clause of § 12132).

In this case, Bircoll identifies three separate points at which he contends Miami-Dade subjected him to discrimination by reason of his hearing disability: (1) the field sobriety tests on the roadside; (2) the consent warning and Intoxilyzer test at the police station; and (3) his incarceration at TGK. Specifically, Bircoll argues that he was entitled to effective communication with the police throughout his arrest; that he needed auxiliary aids, such as an oral interpreter, for effective communication during these tests; and that the police failed to make reasonable modifications to their procedures to ensure effective communication, thereby subjecting him to discrimination in violation of the ADA.

Bircoll claims that if he had been provided with auxiliary aids, he would have understood what the police were asking him to do, would have consented to and passed the Intoxilyzer test, and would not have lost his license or gone to jail. Even if he would have failed the Intoxilyzer test, Bircoll argues that he still was injured because with effective communication he would have consented to the Intoxilyzer test and would not have had his license automatically suspended. We examine each point at which Bircoll claims that he was denied effective communication and discriminated against because of his disability.

IV. FIELD SOBRIETY TESTS

We turn first to the field sobriety tests. As noted earlier, the Fifth Circuit in *Hainze* concluded that "Title II *does not apply* to an officer's on-the-street responses to reported disturbances or other similar incidents ... *prior to* the officer's securing the scene and ensuring that there is no threat to human life." *Hainze*, 207 F.3d at 801 (emphasis added). In our view, the question is not so much one of the applicability of the ADA because Title II prohibits discrimination by a public entity by reason of Bircoll's disability. The exigent circumstances presented by criminal activity and the already onerous tasks of police on the scene go more to the reasonableness of the requested ADA modification than whether the ADA applies in the first instance.

[6] In other words, the question is whether, given criminal activity and safety concerns, any modification of police procedures is reasonable before the police physically arrest a criminal suspect, secure the scene, and ensure that there is no threat to the public or officer's safety. The reasonable-modification inquiry in Title II-ADA cases is "a highly fact-specific inquiry." *See Holbrook v. City of Alpharetta*, 112 F.3d 1522, 1527 (11th Cir.1997) (stating, in a Title I-ADA reasonable accommodation case, that "what is reasonable for each individual employer is a highly fact-specific inquiry that will vary depending on the ***1086** circumstances and necessities of each employment situation"). We emphasize that terms like reasonable are relative to the particular circumstances of the case and the circumstances of a DUI arrest on the roadside are different from those of an office or

school or even a police station. What is reasonable must be decided case-by-case based on numerous factors.

[7] Here, Bircoll claims that he requested an interpreter, which Trask denies. Even assuming Bircoll asked for an oral interpreter,[FN18] we conclude that waiting for an oral interpreter before taking field sobriety tests is not a reasonable modification of police procedures given the exigent circumstances of a DUI stop on the side of a highway, the on-the-spot judgment required of police, and the serious public safety concerns in DUI criminal activity. In DUI stops, as opposed to minor traffic offenses, the danger to human life is high. To protect public safety, Trask had to determine quickly, on the roadside at 3:00 a.m., whether Bircoll was sober enough to drive his car further or whether to impound his car and arrest him. DUI stops involve a situation where time is of the essence. Forestalling all police activity at a roadside DUI stop until an oral interpreter arrives is not only impractical but also would jeopardize the police's ability to act in time to obtain an accurate measure of the driver's inebriation. Moreover, field sobriety exercises are short tests that can be physically and visually demonstrated. DUI stops do not involve lengthy communications and the suspect is not asked to give a written statement. In sum, field sobriety tests in DUI arrests involve exigencies that necessitate prompt action for the protection of the public and make the provision of an oral interpreter to a driver who speaks English and can read lips per se not reasonable.

> FN18. Because Bircoll does not know sign language, we assume Bircoll wanted an oral interpreter trained to mouth words so that Bircoll could lip read accurately and to verbalize accurately Bircoll's messages based on his speech and mouth movements.

[8] We also reject Bircoll's alternative argument that once he told Trask of his deafness, Trask was required to accommodate his deafness by not asking him to perform any field sobriety tests and by immediately arresting him and taking him to the police station for the Intoxilyzer breath test. Bircoll's proposal, if anything, would force police to arrest deaf DUI suspects before even ascertaining if the suspect could communicate in some other way and understand the field sobriety tests. This would penalize deaf DUI suspects and not afford them the opportunity to perform the field tests and show their sobriety.

[9] In any event, the actual communication between Trask and Bircoll was not so ineffective that an oral interpreter was necessary to guarantee that Bircoll was on equal footing with hearing individuals. *See Kornblau v. Dade County*, 86 F.3d 193, 194 (11th Cir.1996) ("The purpose of the [ADA] is to place those with disabilities on an equal footing, not to give them an unfair advantage."). Bircoll admits that he reads lips and usually understands fifty percent of what is said. In addition to verbal instructions, Trask gave physical demonstrations. During the traffic stop, Bircoll was able to respond to Trask's directions about getting out of the car and providing his driver's license and insurance. While the communication may not have been perfect, Bircoll, by his own admission, understood that he was being asked to perform field sobriety tests. Bircoll also admits he actually tried to perform at least three of those tests. For all of the foregoing reasons, we conclude that ***1087** Bircoll has failed to state an ADA claim regarding the field sobriety tests during his DUI arrest.

V. POLICE STATION

[10] Once Bircoll was arrested and arrived at the police station at 4:10 a.m., the exigencies of the situation were greatly reduced. Nonetheless, time remained a factor in obtaining an Intoxilyzer test that accurately measured Bircoll's impairment, or lack thereof, while driving at 3:00 a.m. Townsend read the consent warning to Bircoll. Hearing individuals, even if impaired by alcohol, at least hear the consent warning, and Bircoll is entitled to be placed on equal footing with other arrestees at the police station. Thus, we conclude that at the police station, Townsend was required to take appropriate steps to ensure that his communication with Bircoll was as effective as with other individuals arrested for DUI.

[11][12] What steps are reasonably necessary to establish effective communication with a hearing-impaired person after a DUI arrest and at a police station will depend on all the factual circumstances of the case, including, but not limited to:

(1) the abilities of, and the usual and preferred method of communication used by, the hearing-impaired arrestee;

(2) the nature of the criminal activity involved

and the importance, complexity, context, and duration of the police communication at issue;

(3) the location of the communication and whether it is a one-on-one communication; and

(4) whether the arrestee's requested method of communication imposes an undue burden or fundamental change and whether another effective, but non-burdensome, method of communication exists.

In many circumstances, oral communication plus gestures and visual aids or note writing will achieve effective communication. In other circumstances, an interpreter will be needed. There is no bright-line rule, and the inquiry is highly fact-specific. Thus, we examine all factual circumstances to ascertain whether Townsend achieved effective communication with Bircoll.

[13] As to his abilities and usual communication mode, Bircoll has a twenty percent hearing capacity when using his hearing aid and relies on lipreading to communicate. Bircoll can understand about half of what is said when he is lipreading. He can also read, write, and speak in English.

The police communication at issue-the consent warning-although important, is short and not complex. Moreover, even before that night, Bircoll already had some knowledge of what Townsend sought to communicate to him. In a deposition, when questioned about the Intoxilyzer test, Bircoll testified that "I know that if you fail the sobriety test, you have to do the breathalyzer test, yes." Bircoll also already knew that if he refused the Intoxilyzer, he would lose his license for a year.[FN19]

FN19. In the malpractice deposition, Bircoll testified:

Q: You knew when you got a Florida driver's license, if you're stopped and suspected of drinking alcohol, that the officers will give you a breathalyzer test, and if you refuse it, you'll lose your license for a year?

A: I know that but, I don't take the test. I'll lose it.

Q: You were aware of that before you were stopped?

A: Yes.

***1088** The communication at issue was one-on-one, with Townsend sitting next to Bircoll on a bench. Townsend read the consent form aloud to Bircoll twice. Townsend spoke to Bircoll in lighted conditions. Moreover, an effective, non-burdensome method of communication existed as to this short implied consent warning. Bircoll can read English, and Townsend gave him a copy of the form to read. Townsend thus accommodated Bircoll by giving him written material. Bircoll's own failure to read what Townsend provided him does not constitute discrimination.

We recognize that there are factual issues about whether Bircoll requested an interpreter "many times" at the station and whether Townsend was facing, or turning away from, Bircoll. Nonetheless, Bircoll admits that Townsend read the form aloud twice and gave him a copy. Even assuming the facts most favorable to Bircoll, we conclude that, under all the circumstances here and especially given Bircoll's admitted prior knowledge, Townsend established effective communication with Bircoll regarding the consent warning and Intoxilyzer test. Accordingly, Miami-Dade did not violate the ADA at the police station.

VI. TGK DETENTION

[14] The corrections officers at TGK recognized Bircoll's hearing disability and affixed an ADA stamp to Bircoll's jail card. Miami-Dade does not deny that TGK has TDD phones available for disabled arrestees to use and that, under the ADA, it should accommodate Bircoll's hearing loss by making a TDD phone accessible at the jail. Instead, Miami-Dade asserts that even if Bircoll was denied access to a TDD phone, he cannot show he suffered any injury as a result.[FN20]

FN20. Bircoll's complaint also alleged a violation of the Rehabilitation Act for being placed in a cell alone and being held for "an inordinate and excessive amount of time." Miami-Dade responded that it provided preliminary protection to Bircoll by placing him in a cell separate from other inmates until it could be determined whether he could be

held in an appropriate classification of the inmate general population. Because Bircoll did not argue these claims on appeal, we do not address them. *See* *Sepulveda v. U.S. Att'y Gen.*, 401 F.3d 1226, 1228 n. 2 (11th Cir.2005); *Greenbriar, Ltd. v. City of Alabaster*, 881 F.2d 1570, 1573 n. 6 (11th Cir.1989).

At the police station, Townsend agreed to place a phone call on Bircoll's behalf to his girlfriend. Townsend essentially acted as a relay operator for Bircoll and conveyed to Bircoll's girlfriend that Bircoll had been arrested and needed to be picked up.

Once at TGK, Bircoll used the regular phones to place several calls to his own home-where his girlfriend lived-and leave messages on his answering machine. Bircoll used the regular phones at TGK in the same way he regularly uses his cell phone: by making a phone call and doing the talking in hopes that his message will be received. When Bircoll was discharged, he was picked up by his girlfriend and another friend. His girlfriend successfully received the message that Bircoll had been arrested and picked him up when he was released.

Moreover, Bircoll does not identify whom he would have called from a TDD phone. Bircoll cites no adverse effects associated with his having to rely on the police at the station to make a phone call for him, or his own use of a regular phone at the jail. Because Bircoll has shown no injury, we affirm the grant of summary judgment for Miami-Dade on Bircoll's TDD claim.[FN21]

FN21. This Court may affirm on any ground supported by the record. *See* *United States v. Mejia*, 82 F.3d 1032, 1035 (11th Cir.1996). For the same reasons we affirm the district court's grant of summary judgment to Miami-Dade on Bircoll's ADA claims, we also affirm the summary judgment granted to Miami-Dade on Bircoll's Rehabilitation Act claims. *See* *Cash v. Smith*, 231 F.3d 1301, 1305 & n. 2 (11th Cir.2000) (stating that "[d]iscrimination claims under the Rehabilitation Act are governed by the same standards used in ADA cases," and "[c]ases decided under the Rehabilitation Act are precedent for cases under the ADA, and vice-versa").

***1089** VII. CONCLUSION

For all of the foregoing reasons, we affirm the district court's order of January 17, 2006.

AFFIRMED.

C.A.11 (Fla.),2007.
Bircoll v. Miami-Dade County
480 F.3d 1072, 34 NDLR P 107, 20 Fla. L. Weekly Fed. C 371

United States District Court,
E.D. Arkansas,
Western Division.
Cynthia BOONE, Individually and as Next Friend of Ashley Boone, Plaintiff,
v.
Fay BOOZMAN, Director of the Arkansas Department of Health, in his Official Capacity; John Doe 1 through John Doe 20, in their Official Capacities as Agents, Servants, Employees or Officials of the State of Arkansas, Department of Health; and Cabot School District, Defendants.

No. 4:01CV006585 SWW.
Aug. 12, 2002.

Parent brought § 1983 action, challenging constitutionality of Arkansas' student immunization statute. On cross-motions for summary judgment, the District Court, Susan Webber Wright, Chief Judge, held that: (1) statute's religious exemption provision, which only recognized objections based on tenets or practices of "recognized church or religious denomination," violated mother's Free Exercise and Establishment Clause rights, but (2) severed remainder of statute, requiring immunization without religious exemption, was constitutional.

Motions granted in part and denied in part.

To properly determine whether asserted right is fundamental right subject to heightened protection under Due Process Clause, and to limit subjectivity inherent in analysis of substantive due process claim, court must: (1) consider whether asserted right is deeply rooted in nation's history and traditions, and implicit in concept of ordered liberty; and (2) require careful description of asserted fundamental right at stake. U.S.C.A. Const.Amend. 14.

MEMORANDUM OPINION AND ORDER

SUSAN WEBBER WRIGHT, Chief Judge.

Section 6–18–702 of the Arkansas Code Annotated requires that children be immunized from certain diseases before they may attend public or private school in the State of Arkansas. In enacting subsection (d) of that statute, the General Assembly conferred a religious exemption from the immunization requirements on individuals for whom "immunization conflicts with the religious tenets and practices of a recognized church or religious denomination of which [they are] an adherent or member." Plaintiff Cynthia Boone, on behalf of her daughter Ashley Boone, filed this 42 U.S.C. § 1983 action challenging the constitutionality of the immunization statute after her daughter was suspended from school because she had not received the required Hepatitis B immunization.[FN1]

FN1. Two other cases were filed in federal court challenging the constitutionality of the immunization statute: *Brock v. Boozman*, No. 4:01CV00760 SWW, 2002 WL 1972086, in the Eastern District of Arkansas, and *McCarthy v. Boozman*, 212 F.Supp.2d 945 (W.D.Ark.2002), in the Western District of Arkansas. On July 25, 2002, United States District Judge Robert T. Dawson of the Western District of Arkansas filed a Memorandum Opinion and Order in the *McCarthy* case declaring the religious exemption to the immunization statute unconstitutional. Although different facts and arguments presented in this case have dictated the analysis to be followed in this case, to the extent the legal analysis and conclusions present in Judge Dawson's Memorandum Opinion and Order are applicable to this case, the Court adopts them fully.

Now before the Court is separate defendant Fay Boozman's motion for summary judgment [docket no. 47], separate defendant Cabot School District's adoption of that motion [docket no. 50], and plaintiff's response in opposition [docket no. 51]. Also before the Court are plaintiff's motions for summary judgment

under the Fourteenth Amendment [docket no. 53] and First Amendment [docket no. 56] to the United States Constitution, separate defendant Fay Boozman's responses in opposition [docket nos. 59, 63], and separate defendant Cabot School District's response [docket no. 65]. After careful consideration, and for the reasons stated below, the Court determines that defendant's motion for summary judgment must be granted in part and denied in part, plaintiff's motion for summary judgment under the Fourteenth Amendment must be denied, and plaintiff's motion for summary judgment under the First Amendment must be granted in part and denied in part.

I. Background

Unless otherwise attributed, the following undisputed facts are taken directly ***942** from the parties' statements of undisputed facts [docket nos. 49, 55, 58, 61, 64].[FN2]

> FN2. Plaintiff did not file a separate statement of disputed facts in response to separate defendant Fay Boozman's statement of undisputed material facts [docket no. 49], and those facts are thus deemed admitted. *See* Local Rule 56.1(b) & (c). Additionally, in her brief in response [docket no. 52] to Boozman's motion for summary judgment [docket no. 48], plaintiff indicates agreement with the facts as stated by Boozman; the Court thus considers those facts undisputed and includes them in the above rendition.

Section 6–18–702(a) of the Arkansas Code Annotated provides that no child shall be admitted to school without proof of immunization from certain diseases.[FN3] The Arkansas Department of Health is charged by Arkansas statute and federal regulations with auditing the immunization status of Arkansas school children which includes notifying schools and/or citizens of any lack of "full immunization" status. Hepatitis B has been designated as one of those diseases from which school children must be immunized.[FN4] As a transfer student, Ashley Boone was required to submit proof that she had received the Hepatitis B vaccine. Cynthia Boone brought the present action after the Cabot School District, on or about October 1, 2001, informed her that her daughter, Ashley Boone, could no longer attend Cabot Senior High School because she did not have a Hepatitis B vaccination.[FN5]

FN3. The immunization statute states: "Except as otherwise provided by law, no infant or child shall be admitted to a public or private school or child care facility of this state who has not been age appropriately immunized from poliomyelitis, diphtheria, tetanus, pertussis, red (rubeola) measles, rubella, and other diseases as designated by the State Board of Health, as evidenced by a certificate of a licensed physician or a public health department acknowledging the immunization." ArkCode Ann. § 6–18–702(a) (Repl.1999).

FN4. Specifically, the Rules and Regulations promulgated July 27, 2000 by the Arkansas Department of Health pursuant to the immunization statute provide the following: "The requirements[ ] for entry into school, irrespective of grade, are at least three doses of Acellular Diphtheria/Tetanus/Pertussis (DtaP), Diptheria/Tetanus/Pertussis (DTP), Diphtheria/Tetanus (DT pediatric), or Tetanus/Diphtheria (Td Adult), at least three doses of polio vaccine; two doses of Rubeola (measles) vaccine, one dose of Rubella (German measles) vaccine and one dose of Mumps vaccine. Additionally, three doses of Hepatitis B vaccine and one dose of Varicella (chickenpox) vaccine are required before entering Kindergarten. Three doses of Hepatitis B are required for Transfer students (students not in your school district last school year) and students entering the seventh grade." *See* docket no. 56, health department exhibit 8.

FN5. On October 15, 2001, after holding a hearing on plaintiff's motion for preliminary injunction, the Court entered an Order [docket no. 13] enjoining defendants from preventing Ashley Boone from attending school because she had not received a Hepatitis B vaccination. The injunction was effective until the end of the school semester in December, 2001, and by Order entered December 14, 2001 [docket no. 30], was extended until the conclusion of the 2001–2002 school year.

Cynthia Boone sincerely objects to the administration of Hepatitis B vaccine to her daughter for religious reasons and on conscientious grounds which include traditional parenting concerns. The immunization statute does provide a religious exemption; however, the General Assembly limited the exemption as follows:

> The provisions of this section shall not apply if the parents or legal guardian of that child object thereto on the grounds that immunization conflicts with the religious tenets and practices of a *recognized church or religious denomination* of which the parent or guardian is an adherent or member.

Ark.Code Ann. § 6–18–702(d)(2) (Repl.1999) (emphasis supplied).[FN6]

> FN6. The immunization statute also provides for a medical exemption, for which Ashley Boone does not qualify. Ark.Code Ann. § 6–18–702(d)(1) & (3). Plaintiff does not argue that the medical exemption to the immunization requirement constitutes the type of secular "individualized exemption" which might trigger strict scrutiny of a refusal to make religious exemptions. *See, e.g.*, *Fraternal Order of Police v. Newark*, 170 F.3d 359, 364–66 (3rd Cir.1999) (Police department's decision to provide medical exemptions to its no-beard requirement, while refusing religious exemptions to the no-beard requirement, was subject to strict scrutiny and violated Free Exercise Clause.).

***943** The Department of Health employs persons who, pursuant to the immunization statute and under defendant Fay Boozman's direction, "screen" religious exemption applications to determine whether the applicants satisfy the "recognized religion" requirement, and if so, whether the "tenets and practices" of said religion "conflict" with the immunization program. Overall, the percentage of school age children in Arkansas whose parents seek religious exemption is only a small fraction of one percent of the total school age population. Although Cynthia Boone has never formally filed the application for a religious exemption, the Department of Health has evaluated Cynthia Boone's claim to exemption and determined that, because Cynthia Boone is not a member of a recognized religion with tenets against vaccination, she is not eligible for the religious exemption.[FN7]

> FN7. *See* docket no. 56, plaintiff exhibits C & D. Cynthia Boone claims no affiliation with any particular church, although she states she attends Methodist church or occasionally Lutheran church, and was baptized Lutheran. *See id.*, exhibit A (transcript), page 52. Cynthia Boone discussed her concerns about immunization with a Methodist minister who advised her that immunizations were not against the tenets of the Methodist faith. *See* docket no. 2, exhibit B. Cynthia Boone's religious convictions are further described in the "Discussion" section of this Order, *infra*.

Accordingly, the Cabot Schools, which Ashley attends, have been directed not to "admit" Ashley to school until she is "age appropriately immunized" with the recommended immunizations, including the Hepatitis B vaccination. [FN8] No evidence exists to show that Ashley Boone is at significant risk for contracting Hepatitis B, and Ashley Boone is of the age where, even if she were to contract Hepatitis B, she would have a 90% likelihood of full recovery. There is no evidence that even a single case of Hepatitis B is present in the schools of Cabot, Arkansas, and there is no declaration of public health emergency in Arkansas with regard to Hepatitis B.

> FN8. Separate defendant Fay Boozman both admits and denies this fact. *See* docket no. 55, paragraph 7; docket no. 64, paragraph 7; docket no. 58, paragraph 9; docket no. 61, paragraph 9. The necessity of the Court's injunction permitting Ashley Boone to attend school suggests that this fact is true.

Although there is no evidence that any prosecution has been threatened in this case, the Court notes that immunization statute carries with it a criminal penalty for non-compliance. Ark.Code Ann. § 6–18–702(e).

II. Standard of Review

Summary judgment is appropriate when "the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to judgment

as a matter of law." Fed.R.Civ.P. 56(c). As a prerequisite to summary judgment, a moving party must demonstrate "an absence of evidence to support the non-moving party's case." *Celotex Corp. v. Catrett*, 477 U.S. 317, 325, 106 S.Ct. 2548, 91 L.Ed.2d 265 (1986). Once the moving party has properly supported its motion for summary judgment, the non-moving party must "do more than simply show there is some metaphysical doubt as to the material facts." ***944***Matsushita Elec. Indus. Co. v. Zenith Radio Corp.*, 475 U.S. 574, 586, 106 S.Ct. 1348, 89 L.Ed.2d 538 (1986). The non-moving party may not rest on mere allegations or denials of his pleading but must "come forward with 'specific facts showing that there is a genuine issue for trial.' " *Id.* at 587, 106 S.Ct. 1348 (quoting Fed.R.Civ.P. 56(e)).

"[A] genuine issue of material fact exists if: (1) there is a dispute of fact; (2) the disputed fact is material to the outcome of the case; and (3) the dispute is genuine, that is, a reasonable jury could return a verdict for either party." *RSBI Aerospace, Inc. v. Affiliated FM Ins. Co.*, 49 F.3d 399, 401 (8th Cir.1995). The inferences to be drawn from the underlying facts must be viewed in the light most favorable to the party opposing the motion. *Matsushita*, 475 U.S. at 587, 106 S.Ct. 1348 (citations omitted). Further, summary judgment is particularly appropriate where an unresolved issue is primarily legal, rather than factual. *Mansker v. TMG Life Ins. Co.*, 54 F.3d 1322, 1326 (8th Cir.1995).

III. Discussion

Defendant Fay Boozman, joined by defendant Cabot School District, seeks summary judgment asserting: (1) compulsory immunization laws are constitutional; (2) Arkansas's statutory religious exemption is constitutional; and (3) Cynthia Boone, on behalf of Ashley Boone, is not entitled to a religious exemption from the immunization statute. Plaintiff Cynthia Boone, in turn, seeks summary judgment asserting the following arguments in various permutations: (1) the immunization statute lacks religious neutrality; (2) mandatory immunization would violate her religious beliefs, abridge her parental rights, and impinge upon her medical freedom and Ashley Boone's personal autonomy rights; (3) individuals with conscientious objection to immunization and who have not been prophylactically immunized may not be excluded from school in the absence of a clear and present danger to public health; and (4) the state's "police power" to immunize does not outweigh a parent's fundamental right to informed consent to medical procedures performed on a child. Because the parties' arguments overlap, the Court will address them by substantive category.

A. Sincerely Held Religious Beliefs

[1][2] A belief must be rooted in religion to be protected by the religion clauses of the First Amendment. *Thomas v. Review Board*, 450 U.S. 707, 713, 101 S.Ct. 1425, 1430, 67 L.Ed.2d 624 (1981). However, "religious beliefs need not be acceptable, logical, consistent, or comprehensible to others in order to merit First Amendment protection." *Id.* at 714, 101 S.Ct. at 1430. The Court's review of Cynthia Boone's belief about immunization is therefore restricted to considering whether the belief is religious in nature and sincerely held.[FN9]

> FN9. Defendants do not directly challenge Cynthia Boone's particular religious beliefs, but they do not affirmatively acquiesce to their sincerity or basis in religion, either.

In an affidavit filed at the inception of this case, Cynthia Boone explained that although she was not a member of any church, she was a deeply religious person and felt strongly that Ashley Boone should not have to "defile" her body by injecting it with the Hepatitis B vaccine.[FN10] She stated that her beliefs came from revelations she received on a regular basis from God, and what she perceived to be her personal relationship with God.[FN11] In her testimony at the preliminary injunction hearing, Cynthia Boone indicated that her ***945** belief that immunization defiles the body was also based on her reading of the bible.[FN12] She explained that she prays to God, and that he speaks to her through angels.[FN13] An angel told her that she "needed to be very careful, as to what is going around in the world and to be very careful what [she does] to her children." [FN14] Because Cynthia Boone initially did not understand, and was afraid to accept, what her angel told her, her children were immunized earlier in their lives.[FN15] Cynthia Boone came to understand the angel's revelation about immunization over a period of years, and that revelation was cemented when Ashley Boone was faced with having to take the Hepatitis B vaccine.[FN16] Cynthia Boone further believes that vaccinations are "part of the devil's plan," and that vaccinating Ashley Boone against Hepatitis B, which can be transmitted by unprotected sex and intravenous

drug use, supports the devil in his effort to encourage Ashley Boone to engage in unprotected sex and intravenous drug use. [FN17]

FN10. *See* docket no. 2, exhibit B.

FN11. *See id.*

FN12. *See* docket no. 56, exhibit A (transcript), pages 51–52, 55–56, 60–61, 78.

FN13. *See id.*, pages 71–73.

FN14. *See id.*, page 73.

FN15. *See id.*, pages 73, 90–94. Cynthia Boone has four children total, who, at the time this lawsuit began, ranged in age from 12 to 23. *See id.*, page 49.

FN16. *See id.*, pages 74–75.

FN17. *See id.*, pages 97–98.

[3] The Court finds that Cynthia Boone's belief concerning immunization, as divined from her reading of the bible and through God's revelations to her through angels, is rooted in religion and sincere. Although she has at times doubted the revelations and had some difficulty articulating her beliefs at the hearing, such difficulties do not alter this Court's opinion. Accordingly, the Court proceeds with its First Amendment analysis.

B. Establishment Clause—Statutory Exemption

[4] The Establishment Clause of the First Amendment, which has been applied to the States through the Fourteenth Amendment, *see Everson v. Board of Educ.*, 330 U.S. 1, 8, 67 S.Ct. 504, 508, 91 L.Ed. 711 (1947), provides that "Congress shall make no law respecting an establishment of religion...." U.S. Const. amend. I. The standard by which a court reviews the constitutionality of a statute under the Establishment Clause depends upon whether that statute facially discriminates among religious sects. *Children's Healthcare Is a Legal Duty, Inc. v. Min De Parle*, 212 F.3d 1084, 1090 (8th Cir.2000). If the statute discriminates among religious sects, the court applies strict scrutiny review as prescribed by *Larson v. Valente*, 456 U.S. 228, 102 S.Ct. 1673, 72 L.Ed.2d 33 (1982). *Id.* If the statute does not discriminate among religious sects, the court applies the less-stringent, familiar three-pronged test announced in *Lemon v. Kurtzman*, 403 U.S. 602, 91 S.Ct. 2105, 29 L.Ed.2d 745 (1971). *Id. See also Corporation of the Presiding Bishop v. Amos*, 483 U.S. 327, 339, 107 S.Ct. 2862, 2870, 97 L.Ed.2d 273 (1987) ("*Larson* indicates that laws discriminating *among* religions are subject to strict scrutiny, and that laws affording a uniform benefit to *all* religions should be analyzed under *Lemon*.") (emphasis in original; internal quotation omitted).

Despite the facial discrimination between religions evinced in the statute, *see infra*, the parties in this case have argued the immunization statute's constitutionality under the Establishment Clause using the *Lemon* test. [FN18] In any event, the Court's ***946** application of the *Lemon* test at the parties behest will not disadvantage plaintiff, as plaintiff prevails even when the constitutionality of the immunization statute is evaluated under the less-stringent *Lemon* test.

FN18. The *Larson* strict scrutiny standard is utilized when law facially differentiates among religious sects because "[t]he clearest command of the Establishment Clause is that one religious denomination cannot be officially preferred over another." *Larson*, 456 U.S. at 244, 246, 102 S.Ct. at 1683, 1684. In *Larson*, plaintiffs brought a First Amendment challenge to a Minnesota statute which restricted exemptions from the registration and reporting requirements of the Minnesota Charitable Solicitation Act to "those religious organizations that received more than half of their total contributions from members or affiliated organizations." *Id.* at 231–32, 102 S.Ct. at 1677. Because the Minnesota statute advantaged well-established churches with correspondingly strong financial support from their members over newly-established churches with potentially greater dependence on the public for financial support, the Court utilized strict scrutiny review, ultimately invalidating the statute. *Id.* at 246 n. 23, 102 S.Ct. at 1684 n. 23.

To survive an Establishment Clause challenge under the *Lemon* test, a statute must: (1) have a secular

legislative purpose; (2) have a primary effect that neither advances nor inhibits religion; and (3) avoid excessive government entanglement with religion. *See Lemon*, 403 U.S. at 612–13, 91 S.Ct. at 2111; *cf. Zelman v. Simmons–Harris*, —— U.S. ——, 122 S.Ct. 2460, 2465, 153 L.Ed.2d 604 (2002) (The Establishment Clause "prevents a State from enacting laws that have the 'purpose' or 'effect' of advancing or inhibiting religion."). A challenged statute is valid only if it satisfies all three parts of the *Lemon* test. *Edwards v. Aguillard*, 482 U.S. 578, 583, 107 S.Ct. 2573, 2577, 96 L.Ed.2d 510 (1987).

1. Secular Legislative Purpose

[5] Defendant asserts that the religious exemption provided for in the immunization statute satisfies the first prong of the *Lemon* test, a secular legislative purpose, because it constitutes a "permissive accommodation." *See Children's Healthcare*, 212 F.3d at 1093 ("[T]he alleviation of a special, government-created burden on religious belief and practice constitutes a valid secular purpose under *Lemon*."). The requirement that a law serve a secular legislative purpose does not mean that the law's purpose must be wholly unrelated to religion. *Amos*, 483 U.S. at 335, 107 S.Ct. at 2868. "Rather, *Lemon's* 'purpose' requirement aims at preventing the relevant governmental decisionmaker ... from abandoning neutrality and acting with the intent of promoting a particular point of view in religious matters. Under the *Lemon* analysis, it is a permissible legislative purpose to alleviate significant governmental interference with the ability of religious organizations to define and carry out their religious missions." *Id.*

In *Children's Healthcare*, for example, the Eighth Circuit rejected an Establishment Clause challenge to a portion of the Medicare and Medicaid Acts drafted to permit individuals with religious objections to medical care to receive government assistance for care received at "religious nonmedical health care institutions." *Children's Healthcare*, 212 F.3d at 1089–91. The Eighth Circuit recognized that health care is a "widely available public benefit [ ] that [is] of great importance to personal well-being," and determined that the burden imposed by the Medicare and Medicaid Acts on those individuals who for religious reasons object to medical treatment was sufficient to warrant a permissive accommodation; Congress's effort at alleviating this burden reflected a valid secular purpose. 212 F.3d at 1094. The Eighth Circuit *also* found, however, that the exception at issue in *Children's Healthcare* was denominationally neutral. *Id.* at 1091. An individual could elect to receive Medicare- and Medicaid-funded services in a religious nonmedical health care institution ***947** "by simply stating that he or she is 'conscientiously opposed' to medical treatment and that such treatment is 'inconsistent with his or her religious beliefs.' " *Id.* (quoting 42 U.S.C. § 1395i–5(b)(2)(A)). In fact, the portion of the statute at issue in *Children's Healthcare* was drafted with the goal of sect-neutrality in mind after a federal district court declared a predecessor provision unconstitutional as facially discriminating among religious sects. *Id.* at 1088–89.

Defendant asserts that the religious exemption in this case reflects a valid secular purpose because it alleviates the pressure imposed upon individuals with religious objections to immunization to become immunized so that they may attend school. In principle, this theory is correct; however the "permissive accommodation" theory cannot carry defendant past the first part of the *Lemon* test because the immunization statute on its face speaks in terms of "the religious tenets and practices of a recognized church or religious denomination." Ark.Code Ann. § 6–18–702(d)(2).

The statute singles out "recognized churches" for preferential treatment. The fact that the statute does not single out particular churches or denominations *by name* is of no consequence here. The Eighth Circuit has recognized that a law need not expressly distinguish between religions by sect name; rather discrimination can be evinced by objective factors such as the law's legislative history and its practical effect while in operation. *Children's Healthcare*, 212 F.3d at 1090. Further, personal religious beliefs are not a basis for an exemption under the immunization statute. [FN19] Yet the First Amendment's protections are not limited to those who are responding to the commands of a particular religious organization. *See, e.g., Frazee v. Illinois Dep't of Employment Sec.*, 489 U.S. 829, 830–34, 109 S.Ct. 1514, 1516–18, 103 L.Ed.2d 914 (1989) (the denial of unemployment compensation benefits to an individual who "as a Christian ... could not work on the Lord's day" on the ground that his refusal to work was not based on the "tenet or dogma of an established religious sect" violates the Free Exercise Clause).

FN19. *See* docket no. 56, exhibit A (transcript), at page 34 (finding of the Court upon stipulation of the parties).

Under the statutory exemption and the Department of Health's corresponding review, it is not sufficient that an objection to immunization flows from an individual's interpretation of her church's tenets or her sincere, personal religious beliefs. The effect is to discriminate against a nondenominational, nonsectarian individual with a sincerely held individual religious belief, or churches and religious denominations that do not have explicit policies on immunization but may leave such matters to individual religious conscience. [FN20] Permissive accommodation, whatever its limits,***948** still requires neutrality among religions. *Board of Educ. of Kiryas Joel Village Sch. Dist. v. Grumet*, 512 U.S. 687, 707, 114 S.Ct. 2481, 2493, 129 L.Ed.2d 546 (1994). *See also, e.g., Turner v. Liverpool Central Sch.*, 186 F.Supp.2d 187, 192 (N.D.N.Y.2002) (finding statutory exemption for those who "hold genuine and sincere religious beliefs" contrary to the practice of immunization sufficiently neutral to satisfy the secular purpose test).

FN20. For example, adherents of particular religions or denominations known by the Department of Health to categorically oppose the practice of immunization, such as the Christian Science religion, are granted exemptions, while adherents of other religions or denominations, such as the Catholic faith, are denied exemptions based on their unofficial, personal interpretation of what their religion or faith requires. *See id.* at pages 18–20. Plaintiff gives the example of the Catholic who, in keeping with the official dictates of the Catholic Church, opposes abortion, and takes that opposition a step beyond the official dictates of the Catholic Church, opposing the administration of a vaccine manufactured from a fetal cell line because of a belief that the acceptance of the vaccine would imply complicity with abortion. Likewise, plaintiff, who attends (but is not a member of) and adheres to some of the beliefs of the Methodist church, and who bases her objection to immunization on her personal reading of scripture and revelations from God, cannot obtain an exemption under the statute. *See id.*, plaintiff exhibits C & D.

2. Primary Effect

The second part of the *Lemon* test requires that the primary effect of the challenged portion of the statute be neither to advance nor inhibit religion. *See Lemon*, 403 U.S. at 612, 91 S.Ct. at 2111. Legislation does not violate the second part of the *Lemon* test simply because it provides special consideration to a religious group or better enables a religion to advance its cause. *Children's Healthcare*, 212 F.3d at 1095. Rather, "a religious accommodation impermissibly advances or inhibits religion only if it imposes a substantial burden on nonbeneficiaries, or provides a benefit to religious believers without providing a corresponding benefit to a large number of nonreligious groups or individuals." *Id.* (internal citations omitted).

Plaintiff's briefs do not directly address the burden/benefit aspect of the *Lemon* test, other than to state, in conclusory fashion, that the statutory exemption fails the second part of the *Lemon* test. Thus, this Court is left to its own devices to determine whether and how the statutory exemption imposes a substantial burden on those individuals who are *not* exempted from the immunization requirements as members or adherents of a recognized church or religious denomination with religious tenets and practices against vaccination, or confers a special benefit upon its beneficiaries—namely, members or adherents of a recognized church or religious denomination.

Defendant suggests that the only potential burden on non-beneficiaries is the increased health risk to those individuals who either have not been immunized due to medical contraindications or were immunized but did not gain the benefit of the vaccine, and that this burden is too minimal to violate the second part of the *Lemon* test. This may be true, where religious beliefs are excluded from consideration. It is possible, too, that nonbeneficiaries are "burdened" due to the State's expenditure of funds in maintaining the Religious Exemption Program. The Court finds troubling, however, that certain non-beneficiaries, namely individuals who oppose immunization on religious grounds but are not members of a religious organization that the State recognizes, are "burdened" by facing vaccination in contravention of their convictions, while other religious individuals belonging to certain churches recognized by the State are excused from vaccination and thus permitted to indulge their religious convictions.

In this sense, the "burden" derives from the statutory exemption's suggestion, whether facially or as applied, that the sovereign endorses or favors certain religious interpretations of a particular issue (here, the propriety of immunization) over others. *Cf.* *Clayton v. Place*, 884 F.2d 376 (8th Cir.1989) ("To the extent plaintiffs contend the rule impermissibly endorses or conveys a message of governmental preference for a particular religious viewpoint concerning social dancing, we find nothing in the rule ['School dances are not authorized and school premises shall not be used for purposes of conducting a dance'] to suggest the District has taken a position on questions of religious belief or made adherence to religion relevant in any way to a person's standing in the political community." (internal citation and quotation omitted)). In other words, the State ***949** is "sending a message of approval or disapproval of individual religious choices." *Stark v. Independent Sch. Dist.*, 123 F.3d 1068, 1074 (8th Cir.1997). The primary effect of the statutory exemption is that the State, by exempting some religious individuals and not others, acts to influence the public perception of different religions and religious beliefs disparately and without neutrality, as well as to inhibit the religious beliefs and practices of those individuals who oppose immunization but are not members of a religious organization the State recognizes. The Court notes, further, that simply because the State may permissibly burden a person's exercise of his or her religion does not mean that that burden is then *de minimis* —indeed, the General Assembly's provision of a religious exemption from immunization recognizes the burden immunization may place on the religiously-opposed individual.

The Court next considers whether the statutory exemption confers a benefit on religious believers without providing a corresponding benefit to a large number of nonreligious groups or individuals. Defendant defines the benefit in question broadly as the ability or opportunity to attend school. In this sense, the statute does not confer a benefit on non-immunized, exempted individuals that is not available to immunized individuals. A benefit *is* conferred, however, on those two groups over individuals who refuse immunization on religious grounds but are not members of a religious church or denomination which the State recognizes. This case is ill-suited for the "benefit" prong of the second part of the *Lemon* test, and more properly reviewed under the *Larson* standard, because this statute distinguishes between types of religious beliefs. Determining, for example, that the statute permits non-immunized Christian Scientist children to attend school, just as immunized children of any or no faith may attend school, does not assist in determining whether the Establishment Clause is violated by excluding someone like Ashley Boone from school.

3. Entanglement

The Court now turns to the third part of the *Lemon* test: that the law not foster excessive government entanglement with religion. *See* *Lemon*, 403 U.S. at 613, 91 S.Ct. at 2111. The Supreme Court has said that a law violates the Establishment Clause when it requires a "comprehensive, discriminating, and continuing state surveillance." *Lemon*, 403 U.S. at 619, 91 S.Ct. at 2114.

On the entanglement question, defendant points the Court to a non-First Amendment, tax case wherein the Eighth Circuit accepted fourteen factual criteria, provided by the IRS, as a guide in deciding what constitutes a church. *See* *Spiritual Outreach Soc. v. Commissioner of IRS*, 927 F.2d 335, 338 (8th Cir.1991). In *Spiritual Outreach*, a religious organization appealed the tax court's denial of its claim for status as a church under the tax code. The Eighth Circuit, determining the organization was not a church for tax purposes and thus not entitled to preferential tax treatment, focused on the core factual requirements of the fourteen criteria: the existence of an established congregation served by an organized ministry, the provision of regular religious services and religious education for the young, and the dissemination of doctrinal code. *Id.* at 339.

Defendant argues that the Department of Health's use of similar routine and factual criteria to determine what constitutes a "recognized church" likewise is permissible. The Arkansas Department of Health's Religious Exemption Application addresses the "Definition of a 'Recognized' Church" as follows:

> Parents or guardians, to claim a religious exemption, must demonstrate that ***950** the "religious tenets and practices" on which they base their objections to immunizations are those of a "recognized" religion. The Department will consider such evidence as a permanent address, number of members, times and places of regular meetings, existence of

written constitution or plan of organization, and a written theology or statement of beliefs, and copies of legal documents filed with any local, state or national governmental agency.[FN21]

FN21. *See* docket no. 56, plaintiff exhibit B.

The Application itself asks questions such as "How many members does your church have (worldwide) (Arkansas)?" and "Where are your meetings customarily held?" [FN22] A parent or guardian must also submit a notarized letter from an official of the church or denomination certifying that the parent or guardian "is currently a member in good standing of the church or denomination." [FN23] The parent or guardian must submit "an explicit and specific statement of the church's or denomination's condemnation or disapproval of immunizations, demonstrating why immunization is not allowed or approved." [FN24]

FN22. *See id.; see also id.*, exhibit A (transcript), at pages 43–45.

FN23. *See id.*, plaintiff exhibit B.

FN24. *See id.*

The entanglement question is a difficult and close one. Defendant states that the Department of Health is ill-equipped to understand or interpret church teachings and to surmise church doctrine, and that it merely accepts or denies the exemption based upon whether the requested information is provided. Yet requiring the Department to evaluate whether the church or denomination's statement against immunization, for example, (1) is sufficiently explicit and specific, or (2) sufficiently demonstrates why immunization is not allowed or approved, could invite excessive entanglement. The Court also notes that the Department is not simply charged with determining what constitutes a church; rather, the Department is required to determine what constitutes a "recognized" church. Regardless, in cases where courts have determined that religious exemptions do not beg excessive entanglement, an oft-mentioned factor is the exemption's neutrality. *See, e.g.*, *Children's Healthcare*, 212 F.3d at 1090–91 (noting exemption granted upon statement that individual is conscientiously opposed to medical treatment and that such treatment is inconsistent with individual's religious beliefs); *Stark*, 123 F.3d at 1075 (noting school district avoided considering parents' religious motivations for requesting exemptions from use of technology); *Turner*, 186 F.Supp.2d at 192–93 (noting immunization exemption extended to anyone with a genuine or sincere religious belief). *See also Texas Monthly v. Bullock*, 489 U.S. 1, 20 n. 9, 109 S.Ct. 890, 902 n. 9, 103 L.Ed.2d 1 (1989); *Good News/Good Sports Club v. City of Ladue*, 28 F.3d 1501, 1510 n. 19 (8th Cir.1994). Finally, the Court notes that, in practice, there is room in the Department of Health's inquiry for state officials' personal biases about what constitutes a religion.[FN25] On the balance, the Court must find that the statutory exemption fosters excessive government entanglement with religion.

FN25. *See id.*, exhibit A (transcript), at page 43–46 (indicating coordinator of religious exemption program's belief that regular meetings alone constitute a prerequisite to recognition of a religion, and that some doctrinal questions must be referred to legal staff).

In conclusion, the Court finds that the immunization statute's religious exemption provision, as written and as applied, fails the *Lemon* test, and thus violates the Establishment Clause.

***951 C. Free Exercise Clause—Statutory Exemption**

[6] The Free Exercise Clause of the First Amendment, which has been applied to the States through the Fourteenth Amendment, *see Cantwell v. Connecticut*, 310 U.S. 296, 303, 60 S.Ct. 900, 903, 84 L.Ed. 1213 (1940), provides that "Congress shall make no law respecting an establishment of religion, or *prohibiting the free exercise thereof.... "* U.S. Const. amend. I (emphasis supplied). Plaintiff argues that the that the limitation of the statutory exemption to a "recognized church or religious denomination" violates her rights under the Free Exercise Clause and is unconstitutional.

After *Larson*, a law that on its face grants a denominational preference may be upheld only if it is supported by a compelling state interest. *Larson*, 456 U.S. at 246–47, 102 S.Ct. at 1684–85; *Hernandez v. C.I.R.*, 490 U.S. 680, 695, 109 S.Ct. 2136, 2146, 104 L.Ed.2d 766 (1989). As the Supreme Court has explained:

The constitutional prohibition of denominational

> preferences is inextricably connected with the continuing vitality of the Free Exercise Clause. Madison once noted [in The Federalist No. 51]: "Security for civil rights must be the same as that for religious rights. It consists in the one case in the multiplicity of interests and in the other in the multiplicity of sects." Madison's vision—freedom for all religion being guaranteed by free competition between religions—naturally assumed that every denomination would be equally at liberty to exercise and propagate its beliefs. But such equality would be impossible in an atmosphere of official denominational preference. Free exercise thus can be guaranteed only when legislators—and voters—are required to accord to their own religions the very same treatment given to small, new, or unpopular denominations.

Larson, 456 U.S. at 244–45, 102 S.Ct. at 1683–84.

It is difficult to imagine how the State would have a compelling interest in limiting the religious exemption to some religious sects and individuals over others, and in its briefs, the State advances none. No doubt it may be necessary to have quick means of identifying those children who have not been immunized against a disease in the event of an outbreak; [FN26] however, there is no reason the State would need to notify these children through their "recognized churches" rather than through their schools; indeed, the State can identify the non-immunized children through an already-existing database. [FN27] Where the State elects to accommodate religion on a particular issue like immunization, it is simply not constitutionally permissible for it to indulge the free exercise rights of some individuals and inhibit the free exercise rights of others on an arbitrary basis. *See Sherr v. Northport–East Northport Union Free Sch. Dist.*, 672 F.Supp. 81, 90–91 (E.D.N.Y.1987) ("While the state may be quite genuinely concerned with limiting the improper evasion of immunization, minimizing the total number of people exempt from the mandatory vaccination program, or devising a legally and logically coherent definition of religion, there surely exist less restrictive alternative means of achieving the state's aims than the blatantly discriminatory restriction of [the] religious exemption....").

FN26. *See* docket no. 56, exhibit A (transcript), pages 137–39.

FN27. *See id.*, pages 146–47.

D. Severability of Religious Exemption

[7] Having determined that the statutory exemption violates the First Amendment,***952** plaintiff asks this Court to re-write the statutory exemption to "effectuate the intent of the statute." [FN28] This Court does not lightly declare statutes unconstitutional, and seeks to preserve the constitutionality of the law whenever possible. While it was perhaps enlightened of the General Assembly to attempt to provide a religious exemption where one was not constitutionally required, this Court is disinclined to re-write the immunization statute to fashion a broader exemption that the General Assembly may not have contemplated or intended. Rather, under Arkansas law, the proper remedy is for this Court to "sever" the religious exemption from the remainder of the statute. Specifically, Arkansas Code Annotated § 1–2–117 provides:

FN28. In effect, plaintiff would have the Court edit the statute as follows: "The provisions of this section shall not apply if the parents or legal guardian of that child object thereto on the grounds that immunization conflicts with the religious tenets and practices of the parent or guardian."

> Except as otherwise specifically provided in this Code, in the event any title, subtitle, chapter, subchapter, section, subsection, subdivision, paragraph, item, sentence, clause, phrase, or word of this Code is declared or adjudged to be invalid or unconstitutional, such declaration or adjudication shall not affect the remaining portions of this Code which shall remain in full force and effect as if the portion so declared or adjudged invalid or unconstitutional was not originally a part of this Code.
> *See also Hutton v. Savage*, 298 Ark. 256, 769 S.W.2d 394, 399 (1989) ("[I]t is well settled that where a statute or code provision is unconstitutional in part, the valid portion of the act will be sustained if complete in itself and capable of execution in accordance with apparent legislative intent.").

In this case, that the statutory exemption has been declared unconstitutional does not dismantle the entire immunization statute. Rather, the statute's language indicates that the General Assembly sought to establish a comprehensive immunization program for

school children, and the statute is complete in itself and capable of execution in accordance with that intent without the provision providing for religious exemption. Subsection (d)(2) of Arkansas Code Annotated § 6–18–702 must be stricken as unconstitutional, but the remaining portions of the statute remain in full force and effect. In other words, there now exists no statutory religious exemption to immunization in the State of Arkansas.[FN29]

FN29. The Court recognizes that, beyond disappointing plaintiff, this conclusion may distress those individuals who previously benefitted from the religious exemption to the immunization statute; however, recourse lies in the political process. As Judge Dawson recognized, it is certainly within the General Assembly's province to enact a new religious exemption that comes within constitutional boundaries.

E. Free Exercise Clause—Compulsory Immunization

[8][9] Plaintiff challenges the constitutionality of compulsory immunization, as required by Arkansas Code Annotated § 6–18–702(a), under the Free Exercise Clause. The standard by which a court reviews a claim under the Free Exercise Clause depends upon the nature of the law or the precise characterization of the right at issue. "A law that is neutral and of general applicability need not be justified by a compelling government interest even if the law has the incidental effect of burdening a particular religious practice .... ***953** a law failing to satisfy [the neutrality and general applicability] requirements must be justified by a compelling governmental interest and must be narrowly tailored to advance that interest." *Church of the Lukumi Babalu Aye, Inc. v. Hialeah*, 508 U.S. 520, 531, 113 S.Ct. 2217, 2226, 124 L.Ed.2d 472 (1993). In certain cases, however, which have come to be known as "hybrid rights" cases, the Court may apply strict scrutiny to neutral laws of general applicability because a Free Exercise claim is conjoined with other constitutional protections such as freedom of speech and of the press, or the right of parents to direct the education of their children. *See Employment Div. v. Smith*, 494 U.S. 872, 881–82, 110 S.Ct. 1595, 1601–02, 108 L.Ed.2d 876 (1990). The Supreme Court has frowned upon extending strict scrutiny to compulsory immunization laws, albeit in *dictum*. *Smith*, 494 U.S. at 888–89, 110 S.Ct. at 1605–06.

[10] Plaintiff asserts strict scrutiny of the immunization statute is required because, as demonstrated by the religious exemption, is not a neutral law of general applicability. Alternately, plaintiff argues that her Free Exercise and parental rights combine to make this a "hybrid rights" case in which strict scrutiny review should apply. At the outset, the Court finds that plaintiff's Free Exercise challenge to compulsory immunization is a challenge to a neutral law of general applicability. This Court has already determined that the statutory religious exemption of Arkansas Code Annotated § 6–18–702(d)(2) is unconstitutional, and severed it from the remainder of the immunization statute. Plaintiff cannot now rely on an invalidated statutory exemption to determine the standard of review for her general challenge to the power of the State under Arkansas Code Annotated § 6–18–702(a) to immunize religious individuals. Rather, plaintiff must direct her challenge at the remainder of the statute that is in effect.

Subsection (a) of the immunization statute does not target religious beliefs or seek to infringe upon or restrict certain practices because of their religious motivation, *see Lukumi*, 508 U.S. at 542, 113 S.Ct. at 2231; its "object" is to protect school children against the spread of disease through mandatory immunization.[FN30] It applies to all school children, save those for whom immunization would endanger their health.[FN31] *See* Ark.Code Ann. § 6–18–702(d)(1) & (3); *Jacobson v. Massachusetts*, 197 U.S. 11, 38–39, 25 S.Ct. 358, 366, 49 L.Ed. 643 (1905) ("[S]uppose the case of an adult who is embraced by the mere words of the act, but yet to subject whom to vaccination in a particular condition of his health or body would be cruel and inhuman in the last degree. We are not to be understood as holding that the [vaccination] statute was intended to be applied to such a case...."). Because the immunization statute is a neutral law of general applicability, heightened scrutiny is not required even though compulsory immunization may burden plaintiff's right to free exercise.

FN30. The Court notes that the portion of the immunization statute challenged in this section was enacted wholly apart from the religious exemption, which was added sixteen years later. *See* 1983 Ark.Acts 150 ("An Act to Amend Section 3 of Act 244 of 1967 to Exempt from the Mandatory Pertussis Im-

munization Requirements for School Children, with Siblings, Either Whole Blood or Half Blood, Who Have Had Serious Adverse Reactions to Such Immunizations Which Reaction Resulted in a Total Permanent Disability; and for Other Purposes.")

FN31. For example, individuals who have had a life-threatening allergic reaction to baker's yeast or to a previous dose of the Hepatitis B vaccine (it is administered in three doses) are advised not to take the Hepatitis B vaccine. *See* docket no. 56, health department exhibit 5.

***954** [11] It is well established that the State may enact reasonable regulations to protect the public health and the public safety, and it cannot be questioned that compulsory immunization is a permissible exercise of the State's police power. *See Zucht v. King*, 260 U.S. 174, 176, 43 S.Ct. 24, 25, 67 L.Ed. 194 (1922); *Jacobson*, 197 U.S. at 24–25, 25 S.Ct. at 360–61. The Supreme Court has long recognized that a state may require public and private school children to be immunized. *See id.* The constitutionally-protected free exercise of religion does not excuse an individual from compulsory immunization; in this instance, the right to free exercise of religion and parental rights are subordinated to society's interest in protecting against the spread of disease. *See Prince v. Massachusetts*, 321 U.S. 158, 166–67, 64 S.Ct. 438, 442, 88 L.Ed. 645 (1944) (The state's authority "is not nullified merely because the parent grounds his claim to control the child's course of conduct on religion...."); *Wright v. DeWitt Sch. Dist.*, 238 Ark. 906, 385 S.W.2d 644, 647–48 (1965); *Cude v. Arkansas*, 237 Ark. 927, 377 S.W.2d 816, 819–20 (1964).

Plaintiff seeks to distinguish her case from what she refers to as "this draconian vaccine jurisprudence" by asserting that those cases were decided on the basis of a declared health emergency involving smallpox, while in this case Hepatitis B presents no "clear and present danger." The Court is not persuaded by this argument. The Supreme Court did not limit its holding in *Jacobson* to diseases presenting a clear and present danger.[FN32] Even if such a distinction could be made, the Court cannot say that Hepatitis B presents no such clear and present danger. Hepatitis B may not be airborne like smallpox; however, this is not the only factor by which a disease could be judged dangerous. Hepatitis B is spread by bodily fluids; the virus is "fairly hearty and can survive on surfaces, door knobs, et cetera, for up to a month." [FN33] Hepatitis B can lead to sclerosis, scarring and fibrosis of the liver, or liver cancer after chronic infection. [FN34] Globally, Hepatitis B is second only to tobacco as a leading cause of cancer.[FN35] Approximately 1.25 million people in the United States have chronic Hepatitis B infection; each year it is estimated that 80,000 people, mostly young adults, become infected with the Hepatitis B virus.[FN36]

FN32. *See also* the Court's discussion of plaintiff's separate due process claim, *infra* Section III.F.

FN33. *See* docket no. 56, exhibit A (transcript), pages 133–34.

FN34. *See id.*, pages 134–35.

FN35. *See id.*, page 136.

FN36. *See id.*, health department exhibit 5.

Because the groups at highest risk for Hepatitis B are unlikely to self-identify and pursue the vaccine, immunizing those individuals as children is the recommended strategy to stern the spread of Hepatitis B.[FN37] Immunization of school children against Hepatitis B has a real and substantial relation to the protection of the public health and the public safety. The Court therefore finds that requiring schoolchildren to be immunized against Hepatitis B is a reasonable exercise of the State's police power and is constitutionally permissible even though it affects plaintiff's religious practice.

FN37. *See id.*, page 136–37.

[12][13] The Court now turns to plaintiff's argument that this is a hybrid rights case requiring strict scrutiny review.[FN38] In ***955** addition to her Free Exercise right, plaintiff invokes her constitutional right to direct the education of her child. A parent's constitutional right to direct the education and upbringing of her child is grounded in the Due Process Clause of the Fourteenth Amendment. *See Washington v. Glucksberg*, 521 U.S. 702, 720, 117 S.Ct. 2258, 2267, 138 L.Ed.2d 772 (1997). Courts have indicated that this parental right is limited in scope, however, determin-

ing, for example, that a parent has no right to: (1) exempt her child from certain reading programs the parent finds objectionable; (2) exempt her child from a school's community-service requirement; (3) exempt her child from an assembly program that included sexually explicit topics; (4) refuse standardized testing used to determine the quality of education her home-schooled child is receiving; and (5) send her child to public school on a part-time basis in order to pick and choose which courses her child will take from the public school. *Swanson v. Guthrie Indep. Sch. Dist.*, 135 F.3d 694, 698 (10th Cir.1998) (collecting cases). In contrast, a parent does have the right to: (1) send her child to private school, whether that school is religious or secular; (2) have her child attend school in a state where the teaching of foreign languages is not prohibited; and (3) withdraw her child from public education where her religion requires it as part of a way of life. *Pierce v. Society of Sisters*, 268 U.S. 510, 45 S.Ct. 571, 69 L.Ed. 1070 (1925); *Meyer v. Nebraska*, 262 U.S. 390, 43 S.Ct. 625, 67 L.Ed. 1042 (1923); *Wisconsin v. Yoder*, 406 U.S. 205, 92 S.Ct. 1526, 32 L.Ed.2d 15 (1972). The key characteristic of these cases is that they relate to educational instruction. Plaintiff's desire that her daughter not be immunized has no relation to her directing her daughter's education, other than it may limit where and how she receives that education. A parent's constitutional right to direct the education of her child is not implicated under the facts of this case, and thus plaintiff cannot proceed under a "hybrid rights" theory.

> FN38. Although it is not dispositive, the Court notes that the Supreme Court in *Smith* included compulsory vaccination laws in its "parade of horribles" to which the compelling interest test should probably not be applied. *See Smith*, 494 U.S. at 888–89, 110 S.Ct. at 1605–06 (citing an Arkansas Supreme Court case which upheld the State's power to require compulsory immunization of school children over religious objections, *see Cude*, 377 S.W.2d at 818–820).

In keeping with longstanding Supreme Court precedent, the Court finds that, as it relates to compulsory immunization of school children, the statutory religious exemption having previously been stricken, Arkansas's immunization law does not violate plaintiff's Free Exercise rights and is constitutional.

F. Substantive Due Process

[14][15] Although some aspects of plaintiff's due process argument are implicated in her First Amendment arguments, as discussed above, plaintiff has separately filed a motion for summary judgment under the Fourteenth Amendment. The Fourteenth Amendment provides that no State shall "deprive any person of life, liberty, or property, without due process of law." U.S. Const. amend XIV. As plaintiff points out, the right to refuse medical treatment is assumed to be a part of liberty protected under the Due Process Clause.[FN39] *See Cruzan v. Director*, 497 U.S. 261, 278–79, 110 S.Ct. 2841, 2851–52, 111 L.Ed.2d 224 (1990). This right is not absolute, however, and can be regulated by the State. *See, e.g.*, *Jacobson*, 197 U.S. at 24–30, 25 S.Ct. at 360–61. "[D]etermining that a person has a 'liberty interest' under ***956** the Due Process Clause does not end the inquiry; whether [an individual's] constitutional rights have been violated must be determined by balancing his liberty interests against the relevant state interests." *Cruzan*, 497 U.S. at 279, 110 S.Ct. at 2851–52 (internal quotation omitted). Where the State infringes on a *fundamental* constitutional right, strict scrutiny applies; otherwise, the state need only have a legitimate purpose. *Washington v. Glucksberg*, 521 U.S. 702, 728, 117 S.Ct. 2258, 2271, 138 L.Ed.2d 772 (1997). *Cruzan* does not make clear whether the right to refuse medical treatment is a fundamental right requiring proof that the state's infringement is necessary and compelling, but the Supreme Court has recently indicated that there is no fundamental right to assisted suicide. *Id.*

> FN39. "Although many state courts have held that a right to refuse treatment is encompassed by a generalized constitutional right of privacy, we have never so held. We believe this issue is more properly analyzed in terms of a Fourteenth Amendment liberty interest." *Cruzan*, 497 U.S. at 279 n. 7, 110 S.Ct. at 2851 n. 7.

Plaintiff complains that "*Jacobson* and *Zucht* are utterly archaic in 14th Amendment substantive due process terms, and worthless as precedent in light of the extensive jurisprudence of the 20th Century." [FN40] It is the responsibility of this Court, however, until the Supreme Court says otherwise, to give effect to immunization cases like *Jacobson* and *Zucht*. *See Agostini v. Felton*, 521 U.S. 203, 207, 117 S.Ct. 1997,

2002, 138 L.Ed.2d 391 (1997) ("The Court neither acknowledges nor holds that other courts should ever conclude that its more recent cases have, by implication, overruled an earlier precedent. Rather, lower courts should follow the case which directly controls, leaving to this Court the prerogative of overruling its own decisions."). Even if this Court were to review plaintiff's argument against immunization in light of the Court's most recent substantive due process cases, plaintiff would not prevail.

FN40. *See* docket no. 54, page 10, footnote 17.

[16][17][18] To properly determine whether an asserted right is a fundamental right subject to heightened protection under the Due Process Clause, and to limit the subjectivity inherent in the analysis of a substantive due process claim, a court must: (1) consider whether the asserted right is deeply rooted in the nation's history and traditions, and implicit in the concept of ordered liberty; and (2) require a careful description of the asserted fundamental right at stake. *Glucksberg*, 521 U.S. at 720–21, 117 S.Ct. at 2267–68. The question presented in this case is not, as plaintiff suggests, simply whether a parent has a fundamental right to decide whether her child should undergo a medical procedure such as immunization. Carefully formulated, the question presented by the facts of this case is whether the special protection of the Due Process Clause includes a parent's right to refuse to have her child immunized before attending public or private school where immunization is a precondition to attending school.[FN41] The Nation's history, legal traditions, and practices answer with a resounding "no."

FN41. The Court notes that plaintiff's argument against subjecting her daughter to a medical procedure is not based on any concern that the vaccine is specifically medically contra-indicated for Ashley Boone; this would be an entirely different matter.

[19] Since the early twentieth century the Supreme Court has acknowledged that a state may require school children to be immunized. *See Zucht*, 260 U.S. at 176, 43 S.Ct. at 25; *see also Jacobson* and *Prince*, *supra*. Compulsory immunization has long been practiced in Arkansas and other states. *See, e.g.*, *Wright*, 385 S.W.2d at 647–48; *Cude*, 377 S.W.2d at 819–20 (cited in *Smith*, 494 U.S. at 888–89, 110 S.Ct. at 1605–06); *Board of Educ. v. Maas*, 56 N.J.Super. 245, 152 A.2d 394 (App.Div.1959); ***957***Ohio ex rel Dunham v. Board of Educ.*, 154 Ohio St. 469, 96 N.E.2d 413 (1951); *Mosier v. Barren County Board of Health*, 308 Ky. 829, 215 S.W.2d 967 (1948); *City of New Braunfels v. Waldschmidt*, 109 Tex. 302, 207 S.W. 303 (1918). What is "implicit in the concept of ordered liberty" is an understanding that:

> [T]he liberty secured by the Constitution of the United States to every person within its jurisdiction does not import an absolute right in each person to be, at all times and in all circumstances, wholly freed from restraint. There are manifold restraints to which every person is necessarily subject for the common good. On any other basis organized society could not exist with safety to its members.

Jacobson, 197 U.S. at 26, 25 S.Ct. at 361. It is apparent from these cases, and from a century of the nation's experience, that requiring school children to be immunized rationally furthers the public health and safety. Finally, to the extent plaintiff asserts that Ashley Boone has a fundamental constitutional right to a free and appropriate public education which outweighs the State's interest in immunizing school children, plaintiff is incorrect. While the Court does not minimize the importance of education, it is firmly established that the right to an education is not provided explicit or implicit protection under the Constitution and is not a fundamental right or liberty. *San Antonio Indep. Sch. Dist. v. Rodriguez*, 411 U.S. 1, 35, 93 S.Ct. 1278, 1297, 36 L.Ed.2d 16 (1973).

Plaintiff also raises the issue of informed consent. The State apparently provides informed consent forms to parents and guardians before a child is immunized;[FN42] plaintiff makes no allegation that she did not give, or was not provided information sufficient for, informed consent. "Informed consent" is not implicated by the facts in this case; this case is about "no consent." Plaintiff's informed consent argument is unavailing.

FN42. *See* docket no. 56, exhibit A (transcript), pages 149–50.

IV. Conclusion

THEREFORE, plaintiff's motion for summary judgment under the Fourteenth Amendment [docket

no. 53] is hereby DENIED; plaintiff's motion for summary judgment under the First Amendment [docket no. 56] is hereby GRANTED to the extent that Subsection 6–18–702(d)(2) of the Arkansas Code Annotated is stricken as violating the Establishment Clause and Free Exercise Clause of the First Amendment, and DENIED as to all other grounds.[FN43]

> FN43. In Count IV of her second amended complaint [docket no. 44], plaintiff asserts that her right to equal protection has been violated. Plaintiff does not make this a focus of her motions for summary judgment, but states in a footnote: "Clearly, a law which exempts the adherents of 'recognized' religions, yet denies exemption on the basis of personal, sincere religious belief, is predisposed to deny Equal Protection of law, as well." *See* docket no. 57, page 19, footnote 26. The Court agrees.

FURTHER, separate defendant Fay Boozman's motion for summary judgment [docket no. 47], in which separate defendant Cabot School District joins [docket no. 50], is hereby DENIED to the extent subsection (d)(2) is declared unconstitutional, but GRANTED to the extent that the remaining portions of the statute are found to be constitutional and valid.

FURTHER, because the preliminary injunction entered by the Court expired at the conclusion of the 2001–2002 school year, there is no need to dissolve that injunction.

Judgment shall be entered accordingly.[FN44]

> FN44. On the issue of attorney's fees and costs, the parties are referred to Local Rule 54.1.

***958 JUDGMENT**

In accordance with the Memorandum Opinion and Order entered this date, this case is hereby dismissed; all relief requested by plaintiff is denied with one exception: subsection (d)(2) of Arkansas Code Annotated § 6–18–702 is stricken as unconstitutional.

E.D.Ark.,2002.
Boone v. Boozman
217 F.Supp.2d 938, 169 Ed. Law Rep. 247

END OF DOCUMENT

Supreme Court of the United States
COUNTY OF SACRAMENTO, et al., Petitioners,
v.
Teri LEWIS and Thomas Lewis, personal representative of the Estate of Philip Lewis, Deceased.

No. 96–1337.
Argued Dec. 9, 1997.
Decided May 26, 1998.

Parents of motorcycle passenger killed in high-speed police chase of motorcyclist brought § 1983 claim against county, sheriff's department, and deputy, alleging deprivation of passenger's substantive due process right to life. The United States District Court for the Eastern District of California, Garland E. Burrell, Jr., J., granted summary judgment for defendants, and the Court of Appeals, Pregerson, J., 98 F.3d 434, reversed as to deputy. On writ of certiorari, the Supreme Court, Justice Souter, held that: (1) Fourth Amendment reasonableness standard did not apply; (2) high-speed police chases with no intent to harm suspects physically do not give rise to liability under Fourteenth Amendment; and (3) allegation that pursuit was undertaken with deliberate indifference to passenger's survival was insufficient to state substantive due process claim.

Judgment of Court of Appeals reversed.

Chief Justice Rehnquist, filed a concurring opinion.

Justice Kennedy, filed a concurring opinion in which Justice O'Connor, joined.

Justice Breyer, filed a concurring opinion.

Justice Stevens, filed an opinion concurring in the judgment.

Justice Scalia, filed an opinion concurring in the judgment in which Justice Thomas, joined.

Better approach to resolving cases in which defense of qualified immunity is raised is to determine first whether plaintiff has alleged deprivation of constitutional right at all; normally, it is only then that court should ask whether right allegedly implicated was clearly established at time of events in question.

Allegation that high-speed pursuit of motorcyclist by sheriff's deputy, which resulted in death of motorcycle passenger, was undertaken with deliberate indifference to passenger's survival did not meet shocks-the-conscience test and thus was insufficient to state substantive due process claim under § 1983; while prudence would have suppressed deputy's reaction to motorcyclist's behavior, deputy's instinct was to do his job as law enforcement officer, not to induce motorcyclist's lawlessness, or to terrorize, cause harm, or kill. U.S.C.A. Const.Amend. 14; 42 U.S.C.A. § 1983.

*****1710 *833** *Syllabus* [FN*]

FN* The syllabus constitutes no part of the opinion of the Court but has been prepared by the Reporter of Decisions for the convenience of the reader. See *United States v. Detroit Timber & Lumber Co.*, 200 U.S. 321, 337, 26 S.Ct. 282, 287, 50 L.Ed. 499.

After petitioner James Smith, a county sheriff's deputy, responded to a call along with another officer, Murray Stapp, the latter returned to his patrol car and saw a motorcycle approaching at high speed, driven by Brian Willard, and carrying Philip Lewis, respondents' decedent, as a passenger. Stapp turned on his rotating lights, yelled for the cycle to stop, and pulled his car closer to Smith's in an attempt to pen the cycle in, but Willard maneuvered between the two cars and sped off. Smith immediately switched on his own emergency lights and siren and began high-speed pursuit. The chase ended after the cycle tipped over. Smith slammed on his brakes, but his car skidded into Lewis, causing massive injuries and death. Respondents brought this action under 42 U.S.C. § 1983, alleging a deprivation of Lewis's Fourteenth Amendment substantive due process right to life. The District Court granted summary judgment for Smith, but the Ninth Circuit reversed, holding, *inter alia*, that the appropriate degree of fault for substantive due process liability for high-speed police pursuits is deliberate indifference to, or reckless disregard for, a person's right to life and personal security.

Held: A police officer does not violate substantive due process by causing death through deliberate or reckless indifference to life in a high-speed automobile chase aimed at apprehending a suspected offender. Pp. 1713–1721.

(a) The "more-specific-provision" rule of *Graham v. Connor*, 490 U.S. 386, 395, 109 S.Ct. 1865, 1871, 104 L.Ed.2d 443, does not bar respondents' suit. *Graham* simply requires that if a constitutional claim is covered by a specific constitutional provision, the claim must be analyzed under the standard appropriate to that specific provision, not under substantive due process. *E.g.*, *Lanier v. United States*, 520 U.S. 259, 272, n. 7, 117 S.Ct. 1219, 1228, n. 7, 137 L.Ed.2d 432 (1997). Substantive due process analysis is therefore inappropriate here only if, as *amici* argue, respondents' claim is "covered by" the Fourth Amendment. It is not. That Amendment covers only "searches and seizures," neither of which took place here. No one suggests that there was a search, and this Court's cases foreclose finding a seizure, since Smith did not terminate Lewis's freedom ***834** of movement through means intentionally applied. *E.g.*, *Brower v. County of Inyo*, 489 U.S. 593, 597, 109 S.Ct. 1378, 1381, 103 L.Ed.2d 628. Pp. 1714–1716.

(b) Respondents' allegations are insufficient to state a substantive due process violation. Protection against governmental arbitrariness is the core of due process, *e.g.*, *Hurtado v. California*, 110 U.S. 516, 527, 4 S.Ct. 111, 116–117, 28 L.Ed. 232, including substantive due process, see, *e.g.*, *Daniels v. Williams*, 474 U.S. 327, 331, 106 S.Ct. 662, 665, 88 L.Ed.2d 662, but only the most egregious executive action can be said to be "arbitrary" in the constitutional sense, *e.g.*, *Collins v. Harker Heights*, 503 U.S. 115, 129, 112 S.Ct. 1061, 1071, 117 L.Ed.2d 261; the cogniza-

ble level of executive abuse of power is that which shocks the conscience, *e.g.*, *id.*, at 128, 112 S.Ct., at 1070; *Rochin v. California*, 342 U.S. 165, 172–173, 72 S.Ct. 205, 209–210, 96 L.Ed. 183. The conscience-shocking concept points clearly away from liability, or clearly toward it, only at the ends of the tort law's culpability spectrum: Liability for negligently inflicted harm is categorically beneath the ****1711** constitutional due process threshold, see, *e.g.*, *Daniels v. Williams*, 474 U.S., at 328, 106 S.Ct., at 663, while conduct deliberately intended to injure in some way unjustifiable by any government interest is the sort of official action most likely to rise to the conscience-shocking level, see *id.*, at 331, 106 S.Ct., at 665. Whether that level is reached when culpability falls between negligence and intentional conduct is a matter for closer calls. The Court has recognized that deliberate indifference is egregious enough to state a substantive due process claim in one context, that of deliberate indifference to the medical needs of pretrial detainees, see *City of Revere v. Massachusetts Gen. Hospital*, 463 U.S. 239, 244, 103 S.Ct. 2979, 2983, 77 L.Ed.2d 605; cf. *Estelle v. Gamble*, 429 U.S. 97, 104, 97 S.Ct. 285, 291, 50 L.Ed.2d 251, but rules of due process are not subject to mechanical application in unfamiliar territory, and the need to preserve the constitutional proportions of substantive due process demands an exact analysis of context and circumstances before deliberate indifference is condemned as conscience shocking, cf. *Betts v. Brady*, 316 U.S. 455, 462, 62 S.Ct. 1252, 1256, 86 L.Ed. 1595. Attention to the markedly different circumstances of normal pretrial custody and high-speed law enforcement chases shows why the deliberate indifference that shocks in the one context is less egregious in the other. In the circumstances of a high-speed chase aimed at apprehending a suspected offender, where unforeseen circumstances demand an instant judgment on the part of an officer who feels the pulls of competing obligations, only a purpose to cause harm unrelated to the legitimate object of arrest will satisfy the shocks-the-conscience test. Such chases with no intent to harm suspects physically or to worsen their legal plight do not give rise to substantive due process liability. Cf. *Whitley v. Albers*, 475 U.S. 312, 320–321, 106 S.Ct. 1078, 1084–1085, 89 L.Ed.2d 251. The fault claimed on Smith's part fails to meet this test. Smith was faced with a course of lawless behavior for which the police were not to blame. They had done nothing to cause Willard's high-speed driving in the first place, nothing to excuse his flouting of the commonly understood police ***835** authority to control traffic, and nothing (beyond a refusal to call off the chase) to encourage him to race through traffic at breakneck speed. Willard's outrageous behavior was practically instantaneous, and so was Smith's instinctive response. While prudence would have repressed the reaction, Smith's instinct was to do his job, not to induce Willard's lawlessness, or to terrorize, cause harm, or kill. Prudence, that is, was subject to countervailing enforcement considerations, and while Smith exaggerated their demands, there is no reason to believe that they were tainted by an improper or malicious motive. Pp. 1716–1721.

98 F.3d 434, reversed.

SOUTER, J., delivered the opinion of the Court, in which REHNQUIST, C. J., and O'CONNOR, KENNEDY, GINSBURG, and BREYER, JJ., joined. REHNQUIST, C. J., filed a concurring opinion, *post*, p. 1721. KENNEDY, J., filed a concurring opinion, in which O'CONNOR, J., joined, *post*, p. 1721. BREYER, J., filed a concurring opinion, *post*, p. 1722. STEVENS, J., filed an opinion concurring in the judgment, *post*, p. 1723. SCALIA, J., filed an opinion concurring in the judgment, in which THOMAS, J., joined, *post*, p. 1723.

Terence J. Cassidy, Sacramento, CA, for petitioners.

Paul J. Hedlund, Los Angeles, CA, for respondents.

For U.S. Supreme Court briefs, see:1997 WL 453655 (Pet.Brief)1997 WL 615765 (Resp.Brief)1997 WL 695462 (Reply.Brief)

***836** Justice SOUTER delivered the opinion of the Court.

The issue in this case is whether a police officer violates the Fourteenth Amendment's guarantee of substantive due process by causing death through deliberate or reckless indifference to life in a high-speed automobile chase aimed at apprehending a suspected offender. We answer no, and hold that in such circumstances only a purpose to cause harm unrelated to the legitimate object of arrest will satisfy the element of arbitrary ****1712** conduct shocking to the conscience, necessary for a due process violation.

I

On May 22, 1990, at approximately 8:30 p.m., petitioner James Everett Smith, a Sacramento County sheriff's deputy, along with another officer, Murray

Stapp, responded to a call to break up a fight. Upon returning to his patrol car, Stapp saw a motorcycle approaching at high speed. It was operated by 18-year-old Brian Willard and carried Philip Lewis, respondents' 16-year-old decedent, as a passenger. Neither boy had anything to do with the fight that prompted the call to the police.

Stapp turned on his overhead rotating lights, yelled to the boys to stop, and pulled his patrol car closer to Smith's, attempting to pen the motorcycle in. Instead of pulling over in response to Stapp's warning lights and commands, Willard ***837** slowly maneuvered the motorcycle between the two police cars and sped off. Smith immediately switched on his own emergency lights and siren, made a quick turn, and began pursuit at high speed. For 75 seconds over a course of 1.3 miles in a residential neighborhood, the motorcycle wove in and out of oncoming traffic, forcing two cars and a bicycle to swerve off the road. The motorcycle and patrol car reached speeds up to 100 miles an hour, with Smith following at a distance as short as 100 feet; at that speed, his car would have required 650 feet to stop.

The chase ended after the motorcycle tipped over as Willard tried a sharp left turn. By the time Smith slammed on his brakes, Willard was out of the way, but Lewis was not. The patrol car skidded into him at 40 miles an hour, propelling him some 70 feet down the road and inflicting massive injuries. Lewis was pronounced dead at the scene.

Respondents, Philip Lewis's parents and the representatives of his estate, brought this action under Rev. Stat. § 1979, 42 U.S.C. § 1983, against petitioners Sacramento County, the Sacramento County Sheriff's Department, and Deputy Smith, alleging a deprivation of Philip Lewis's Fourteenth Amendment substantive due process right to life.[FN1] The District Court granted summary judgment for Smith, reasoning that even if he violated the Constitution, he was entitled to qualified immunity, because respondents could point to no "state or federal opinion published before May, 1990, when the alleged misconduct took place, that supports ***838** [their] view that [the decedent had] a Fourteenth Amendment substantive due process right in the context of high speed police pursuits." App. to Pet. for Cert. 52.[FN2]

FN1. Respondents also brought claims under state law. The District Court found that Smith was immune from state tort liability by operation of California Vehicle Code § 17004, which provides that "[a] public employee is not liable for civil damages on account of personal injury to or death of any person or damage to property resulting from the operation, in the line of duty, of an authorized emergency vehicle ... when in the immediate pursuit of an actual or suspected violator of the law." Cal. Veh.Code Ann. § 17004 (West 1971). The court declined to rule on the potential liability of the county under state law, instead dismissing the tort claims against the county without prejudice to refiling in state court.

FN2. The District Court also granted summary judgment in favor of the county and the Sheriff's Department on the § 1983 claim, concluding that municipal liability would not lie under *Monell v. New York City Dept. of Social Servs.*, 436 U.S. 658, 98 S.Ct. 2018, 56 L.Ed.2d 611 (1978), after finding no genuine factual dispute as to whether the county adequately trains its officers in the conduct of vehicular pursuits or whether the pursuit policy of the Sheriff's Department evinces deliberate indifference to the constitutional rights of the public. The Ninth Circuit affirmed the District Court on these points, 98 F.3d 434, 446–447 (1996), and the issue of municipal liability is not before us.

The Court of Appeals for the Ninth Circuit reversed, holding that "the appropriate degree of fault to be applied to high-speed police pursuits is deliberate indifference to, or reckless disregard for, a person's right to life and personal security," 98 F.3d 434, 441 (1996), and concluding that "the law regarding police liability for death or injury caused by an officer during the course of a high-speed chase was clearly established" at the time of Philip Lewis's death, *id.*, at 445. Since Smith apparently disregarded the Sacramento County Sheriff's Department's General Order on police pursuits, the Ninth Circuit****1713** found a genuine issue of material fact that might be resolved by a finding that Smith's conduct amounted to deliberate indifference:

"The General Order requires an officer to com-

municate his intention to pursue a vehicle to the sheriff's department dispatch center. But defendants concede that Smith did not contact the dispatch center. The General Order requires an officer to consider whether the seriousness of the offense warrants a chase at speeds in excess of the posted limit. But here, the only apparent 'offense' was the boys' refusal to stop when another officer told them to do so. The General Order requires an officer to consider whether the need for apprehension***839** justifies the pursuit under existing conditions. Yet Smith apparently only 'needed' to apprehend the boys because they refused to stop. The General Order requires an officer to consider whether the pursuit presents unreasonable hazards to life and property. But taking the facts here in the light most favorable to plaintiffs, there existed an unreasonable hazard to Lewis's and Willard's lives. The General Order also directs an officer to discontinue a pursuit when the hazards of continuing outweigh the benefits of immediate apprehension. But here, there was no apparent danger involved in permitting the boys to escape. There certainly was risk of harm to others in continuing the pursuit." *Id.*, at 442.

Accordingly, the Court of Appeals reversed the summary judgment in favor of Smith and remanded for trial.

We granted certiorari, 520 U.S. 1250, 117 S.Ct. 2406, 138 L.Ed.2d 173 (1997), to resolve a conflict among the Circuits over the standard of culpability on the part of a law enforcement officer for violating substantive due process in a pursuit case. Compare 98 F.3d, at 441 ("deliberate indifference" or "reckless disregard"),[FN3] with *Evans v. Avery*, 100 F.3d 1033, 1038 (C.A.1 1996) ("shocks the conscience"), cert. denied, 520 U.S. 1210, 117 S.Ct. 1693, 137 L.Ed.2d 820 (1997); *Williams* v. *Denver City*, 99 F.3d 1009, 1014–1015 (C.A.10 1996) (same); *Fagan v. Vineland*, 22 F.3d 1296, 1306–1307 (C.A.3 1994) (en banc) (same); ***840***Temkin v. Frederick County Commissioners*, 945 F.2d 716, 720 (C.A.4 1991) (same), cert. denied, 502 U.S. 1095, 112 S.Ct. 1172, 117 L.Ed.2d 417 (1992); and *Checki v. Webb*, 785 F.2d 534, 538 (C.A.5 1986) (same). We now reverse.

FN3. In *Jones v. Sherrill*, 827 F.2d 1102, 1106 (1987), the Sixth Circuit adopted a "gross negligence" standard for imposing liability for harm caused by police pursuit. Subsequently, in *Foy v. Berea*, 58 F.3d 227, 230 (1995), the Sixth Circuit, without specifically mentioning *Jones*, disavowed the notion that "gross negligence is sufficient to support a substantive due process claim." Although *Foy* involved police inaction, rather than police pursuit, it seems likely that the Sixth Circuit would now apply the "deliberate indifference" standard utilized in that case, see 58 F.3d, at 232–233, rather than the "gross negligence" standard adopted in *Jones*, in a police pursuit situation.

II

Our prior cases have held the provision that "[n]o State shall ... deprive any person of life, liberty, or property, without due process of law," U.S. Const., Amdt. 14, § 1, to "guarante[e] more than fair process," *Washington v. Glucksberg*, 521 U.S. 702, 719, 117 S.Ct. 2258, 2267, 138 L.Ed.2d 772 (1997), and to cover a substantive sphere as well, "barring certain government actions regardless of the fairness of the procedures used to implement them," *Daniels v. Williams*, 474 U.S. 327, 331, 106 S.Ct., at 665 (1986); see also *Zinermon v. Burch*, 494 U.S. 113, 125, 110 S.Ct. 975, 983, 108 L.Ed.2d 100 (1990) (noting that substantive due process violations are actionable under § 1983). The allegation here that Lewis was deprived of his right to life in violation of substantive due process amounts to such a claim, that under the circumstances described earlier, Smith's actions in causing Lewis's death were an abuse of executive power so clearly unjustified by any legitimate objective of law enforcement as to be barred by the Fourteenth Amendment. Cf. *Collins v. Harker Heights*, 503 U.S. 115, 126, 112 S.Ct. 1061, 1069, 117 L.Ed.2d 261 (1992) (noting that the Due Process Clause was intended to prevent government officials " ' "from abusing [their] power, or employing it as an instrument of oppression"****1714** ' ") (quoting *DeShaney v. Winnebago County Dept. of Social Servs.*, 489 U.S. 189, 196, 109 S.Ct. 998, 1003, 103 L.Ed.2d 249 (1989), in turn quoting *Davidson v. Cannon*, 474 U.S. 344, 348, 106 S.Ct. 668, 670–671, 88 L.Ed.2d 677 (1986)).[FN4]

FN4. Respondents do not argue that they were denied due process of law by virtue of the fact that California's postdeprivation procedures and rules of immunity have effectively denied them an adequate opportunity to seek compensation for the

state-occasioned deprivation of their son's life. We express no opinion here on the merits of such a claim, cf. *Albright v. Oliver*, 510 U.S. 266, 281–286, 114 S.Ct. 807, 816–820, 127 L.Ed.2d 114 (1994) (KENNEDY, J., concurring in judgment); *Parratt v. Taylor*, 451 U.S. 527, 101 S.Ct. 1908, 68 L.Ed.2d 420 (1981), or on the adequacy of California's postdeprivation compensation scheme.

[1] ***841** Leaving aside the question of qualified immunity, which formed the basis for the District Court's dismissal of their case,[FN5] respondents face two principal objections to their ***842** claim. The first is that its subject is necessarily governed by a more definite provision of the Constitution (to the exclusion of any possible application of substantive due process); the second, that in any event the allegations are insufficient to state a substantive due process violation through executive abuse of power. Respondents can meet the first objection, but not the second.

FN5. As in any action under § 1983, the first step is to identify the exact contours of the underlying right said to have been violated. See *Graham v. Connor*, 490 U.S. 386, 394, 109 S.Ct. 1865, 1870–1871, 104 L.Ed.2d 443 (1989). The District Court granted summary judgment to Smith on the basis of qualified immunity, assuming without deciding that a substantive due process violation took place but holding that the law was not clearly established in 1990 so as to justify imposition of § 1983 liability. We do not analyze this case in a similar fashion because, as we have held, the better approach to resolving cases in which the defense of qualified immunity is raised is to determine first whether the plaintiff has alleged a deprivation of a constitutional right at all. Normally, it is only then that a court should ask whether the right allegedly implicated was clearly established at the time of the events in question. See *Siegert v. Gilley*, 500 U.S. 226, 232, 111 S.Ct. 1789, 1793, 114 L.Ed.2d 277 (1991) ("A necessary concomitant to the determination of whether the constitutional right asserted by a plaintiff is 'clearly established' at the time the defendant acted is the determination of whether the plaintiff has asserted a violation of a constitutional right at all," and courts should not "assum[e], without deciding, this preliminary issue").

Justice STEVENS suggests that the rule of *Siegert* should not apply where, as here, the constitutional question presented "is both difficult and unresolved." *Post*, at 1723. But the generally sound rule of avoiding determination of constitutional issues does not readily fit the situation presented here; when liability is claimed on the basis of a constitutional violation, even a finding of qualified immunity requires some determination about the state of constitutional law at the time the officer acted. What is more significant is that if the policy of avoidance were always followed in favor of ruling on qualified immunity whenever there was no clearly settled constitutional rule of primary conduct, standards of official conduct would tend to remain uncertain, to the detriment both of officials and individuals. An immunity determination, with nothing more, provides no clear standard, constitutional or nonconstitutional. In practical terms, escape from uncertainty would require the issue to arise in a suit to enjoin future conduct, in an action against a municipality, or in litigating a suppression motion in a criminal proceeding; in none of these instances would qualified immunity be available to block a determination of law. See Shapiro, Public Officials' Qualified Immunity in Section 1983 Actions Under *Harlow v. Fitzgerald* and its Progeny, 22 U. Mich. J.L. Ref. 249, 265, n. 109 (1989). But these avenues would not necessarily be open, and therefore the better approach is to determine the right before determining whether it was previously established with clarity.

A

[2] Because we have "always been reluctant to expand the concept of substantive due process," *Collins v. Harker Heights*, *supra*, at 125, 112 S.Ct., at 1068, we held in *Graham v. Connor*, 490 U.S. 386, 109 S.Ct. 1865, 104 L.Ed.2d 443 (1989), that "[w]here a particular Amendment provides an explicit textual

source of constitutional protection against a particular sort of government behavior, that Amendment, not the more generalized notion of substantive due process, must be the guide for analyzing these claims." *Albright v. Oliver*, 510 U.S. 266, 273, 114 S.Ct. 807, 813, 127 L.Ed.2d 114 (1994) (plurality opinion of REHNQUIST, C.J.) (quoting *Graham v. Connor, supra*, at 395, 109 S.Ct., at 1871) (internal quotation marks omitted). Given the rule in *Graham*, we were presented at oral argument with the threshold issue raised ****1715** in several *amicus* briefs,[FN6] whether facts involving a police chase aimed at apprehending suspects can ever support a due process claim. The argument runs that in chasing the motorcycle, Smith was attempting to make a seizure within the meaning of the Fourth Amendment, and, perhaps, even that he succeeded when Lewis was stopped by the fatal collision. Hence, any liability must turn on an application of the reasonableness standard***843** governing searches and seizures, not the due process standard of liability for constitutionally arbitrary executive action. See *Graham v. Connor, supra*, at 395, 109 S.Ct., at 1871 ("*All* claims that law enforcement officers have used excessive force—deadly or not—in the course of an arrest, investigatory stop, or other 'seizure' of a free citizen should be analyzed under the Fourth Amendment and its 'reasonableness' standard, rather than under a 'substantive due process' approach" (emphases in original)). *Albright v. Oliver*, 510 U.S., at 276, 114 S.Ct., at 814 (GINSBURG, J., concurring); *id.*, at 288, n. 2, 114 S.Ct., at 820 (SOUTER, J., concurring in judgment). One Court of Appeals has indeed applied the rule of *Graham* to preclude the application of principles of generalized substantive due process to a motor vehicle passenger's claims for injury resulting from reckless police pursuit. See *Mays v. East St. Louis*, 123 F.3d 999, 1002–1003 (C.A.7 1997).

> FN6. See Brief for National Association of Counties et al. as *Amici Curiae* 8–13; Brief for Grand Lodge of the Fraternal Order of Police as *Amicus Curiae* 4–9; Brief for City and County of Denver, Colorado, as *Amici Curiae* 2–7; Brief for County of Riverside et al. as *Amici Curiae* 6–18; Brief for Gabriel Torres et al. as *Amici Curiae* 3–11.

The argument is unsound. Just last Term, we explained that *Graham*

> "does not hold that all constitutional claims relating to physically abusive government conduct must arise under either the Fourth or Eighth Amendments; rather, *Graham* simply requires that if a constitutional claim is covered by a specific constitutional provision, such as the Fourth or Eighth Amendment, the claim must be analyzed under the standard appropriate to that specific provision, not under the rubric of substantive due process." *United States v. Lanier*, 520 U.S. 259, 272, n. 7, 117 S.Ct. 1219, 1228, n. 7, 137 L.Ed.2d 432 (1997).

Substantive due process analysis is therefore inappropriate in this case only if respondents' claim is "covered by" the Fourth Amendment. It is not.

[3] The Fourth Amendment covers only "searches and seizures," neither of which took place here. No one suggests that there was a search, and our cases foreclose finding a seizure. We held in ***844***California v. Hodari D.*, 499 U.S. 621, 626, 111 S.Ct. 1547, 1550–1551, 113 L.Ed.2d 690 (1991), that a police pursuit in attempting to seize a person does not amount to a "seizure" within the meaning of the Fourth Amendment. And in *Brower v. County of Inyo*, 489 U.S. 593, 596–597, 109 S.Ct. 1378, 1381, 103 L.Ed.2d 628 (1989), we explained that "a Fourth Amendment seizure does not occur whenever there is a governmentally caused termination of an individual's freedom of movement (the innocent passerby), nor even whenever there is a governmentally caused and governmentally *desired* termination of an individual's freedom of movement (the fleeing felon), but only when there is a governmental termination of freedom of movement *through means intentionally applied*." We illustrated the point by saying that no Fourth Amendment seizure would take place where a "pursuing police car sought to stop the suspect only by the show of authority represented by flashing lights and continuing pursuit," but accidentally stopped the suspect by crashing into him. *Id.*, at 597, 109 S.Ct., at 1381–1382. That is exactly this case. See, *e.g.*, *Campbell v. White*, 916 F.2d 421, 423 (C.A.7 1990) (following *Brower* and finding no seizure where a police officer accidentally struck and killed a fleeing motorcyclist during a high-speed pursuit), cert. denied, 499 U.S. 922, 111 S.Ct. 1314, 113 L.Ed.2d 248 (1991). *Graham* 's more-specific-provision rule is therefore no bar to respondents' suit. See, *e.g.*, *Frye v. Akron*, 759 F.Supp. 1320, 1324 (N.D.Ind.1991) (parents of a motorcyclist who was struck and killed by a

police car during a high-speed pursuit could sue under substantive due process because no Fourth ****1716** Amendment seizure took place); *Evans v. Avery*, 100 F.3d, at 1036 (noting that "outside the context of a seizure, ... a person injured as a result of police misconduct may prosecute a substantive due process claim under section 1983"); *Pleasant v. Zamieski*, 895 F.2d 272, 276, n. 2(CA6) (noting that *Graham* "preserve[s] fourteenth amendment substantive due process analysis for those instances in which a free citizen is denied his or her constitutional right to life through means other than a law enforcement official's arrest, investigatory***845** stop or other seizure"), cert. denied, 498 U.S. 851, 111 S.Ct. 144, 112 L.Ed.2d 110 (1990).[FN7]

FN7. Several *amici* suggest that, for the purposes of *Graham*, the Fourth Amendment should cover not only seizures, but also failed attempts to make a seizure. See, *e.g.*, Brief for National Association of Counties et al. as *Amici Curiae* 10–11. This argument is foreclosed by *California v. Hodari D.*, 499 U.S. 621, 111 S.Ct. 1547, 113 L.Ed.2d 690 (1991), in which we explained that "neither usage nor common-law tradition makes an *attempted* seizure a seizure. The common law may have made an attempted seizure unlawful in certain circumstances; but it made many things unlawful, very few of which were elevated to constitutional proscriptions." *Id.*, at 626, n. 2, 111 S.Ct., at 1550, n. 2. Attempted seizures of a person are beyond the scope of the Fourth Amendment. See *id.*, at 646, 111 S.Ct., at 1561 (STEVENS, J., dissenting) (disagreeing with the Court's position that "an attempt to make [a] ... seizure is beyond the coverage of the Fourth Amendment").

B

[4] Since the time of our early explanations of due process, we have understood the core of the concept to be protection against arbitrary action:

> "The principal and true meaning of the phrase has never been more tersely or accurately stated than by Mr. Justice Johnson, in *Bank of Columbia v. Okely*, 17 U.S. 235, 4 Wheat. 235–244, 4 L.Ed. 559 [(1819)]: 'As to the words from Magna Charta, incorporated into the Constitution of Maryland, after volumes spoken and written with a view to their exposition, the good sense of mankind has at last settled down to this: that they were intended to secure the individual from the arbitrary exercise of the powers of government, unrestrained by the established principles of private right and distributive justice.' " *Hurtado v. California*, 110 U.S. 516, 527, 4 S.Ct., at 117 (1884).

We have emphasized time and again that "[t]he touchstone of due process is protection of the individual against arbitrary action of government," *Wolff v. McDonnell*, 418 U.S. 539, 558, 94 S.Ct. 2963, 2976, 41 L.Ed.2d 935 (1974), whether the fault lies in a denial of fundamental***846** procedural fairness, see, *e.g.*, *Fuentes v. Shevin*, 407 U.S. 67, 82, 92 S.Ct. 1983, 1995, 32 L.Ed.2d 556 (1972) (the procedural due process guarantee protects against "arbitrary takings"), or in the exercise of power without any reasonable justification in the service of a legitimate governmental objective, see, *e.g.*, *Daniels v. Williams*, 474 U.S., at 331, 106 S.Ct., at 664 (the substantive due process guarantee protects against government power arbitrarily and oppressively exercised). While due process protection in the substantive sense limits what the government may do in both its legislative, see, *e.g.*, *Griswold v. Connecticut*, 381 U.S. 479, 85 S.Ct. 1678, 14 L.Ed.2d 510 (1965), and its executive capacities, see, *e.g.*, *Rochin v. California*, 342 U.S. 165, 72 S.Ct. 205, 96 L.Ed. 183 (1952), criteria to identify what is fatally arbitrary differ depending on whether it is legislation or a specific act of a governmental officer that is at issue.

Our cases dealing with abusive executive action have repeatedly emphasized that only the most egregious official conduct can be said to be "arbitrary in the constitutional sense," *Collins v. Harker Heights*, 503 U.S., at 129, 112 S.Ct., at 1071, thereby recognizing the point made in different circumstances by Chief Justice Marshall, " 'that it is *a constitution* we are expounding,' " *Daniels v. Williams*, *supra*, at 332, 106 S.Ct., at 665 (quoting *M'Culloch v. Maryland*, 17 U.S. 316, 4 Wheat. 316, 407, 4 L.Ed. 579 (1819)) (emphasis in original)). Thus, in *Collins v. Harker Heights*, for example, we said that the Due Process Clause was intended to prevent government officials " ' "from abusing [their] power, or employing it as an instrument of oppression." ' " 503 U.S., at 126, 112 S.Ct., at 1069 (quoting *DeShaney v. Winnebago County Dept. of Social Servs.*, 489 U.S., at 196, 109

S.Ct., at 1003 (in turn ****1717** quoting *Davidson v. Cannon*, 474 U.S., at 348, 106 S.Ct., at 670–671).

[5] To this end, for half a century now we have spoken of the cognizable level of executive abuse of power as that which shocks the conscience. We first put the test this way in *Rochin v. California*, *supra*, at 172–173, 72 S.Ct., at 209–210, where we found the forced pumping of a suspect's stomach enough to offend due process as conduct "that shocks the conscience" and violates the "decencies of civilized conduct." In the intervening ***847** years we have repeatedly adhered to *Rochin 's* benchmark. See, *e.g.*, *Breithaupt v. Abram*, 352 U.S. 432, 435, 77 S.Ct. 408, 410, 1 L.Ed.2d 448 (1957) (reiterating that conduct that " 'shocked the conscience' and was so 'brutal' and 'offensive' that it did not comport with traditional ideas of fair play and decency" would violate substantive due process); *Whitley v. Albers*, 475 U.S. 312, 327, 106 S.Ct. 1078, 1088, 89 L.Ed.2d 251 (1986) (same); *United States v. Salerno*, 481 U.S. 739, 746, 107 S.Ct. 2095, 2101, 95 L.Ed.2d 697 (1987) ("So-called 'substantive due process' prevents the government from engaging in conduct that 'shocks the conscience,' ... or interferes with rights 'implicit in the concept of ordered liberty' ") (quoting *Rochin v. California*, *supra*, at 172, 72 S.Ct., at 209–210, and *Palko v. Connecticut*, 302 U.S. 319, 325–326, 58 S.Ct. 149, 151–152, 82 L.Ed. 288 (1937)). Most recently, in *Collins v. Harker Heights*, *supra*, at 128, 112 S.Ct., at 1070, we said again that the substantive component of the Due Process Clause is violated by executive action only when it "can properly be characterized as arbitrary, or conscience shocking, in a constitutional sense." While the measure of what is conscience shocking is no calibrated yard stick, it does, as Judge Friendly put it, "poin[t] the way." *Johnson v. Glick*, 481 F.2d 1028, 1033 (C.A.2), cert. denied, 414 U.S. 1033, 94 S.Ct. 462, 38 L.Ed.2d 324 (1973).[FN8]

FN8. As Justice SCALIA has explained before, he fails to see "the usefulness of 'conscience shocking' as a legal test," *Herrera v. Collins*, 506 U.S. 390, 428, 113 S.Ct. 853, 875, 122 L.Ed.2d 203 (1993), and his independent analysis of this case is therefore understandable. He is, however, simply mistaken in seeing our insistence on the shocks-the-conscience standard as an atavistic return to a scheme of due process analysis rejected by the Court in *Washington v. Glucksberg*, 521 U.S. 702, 117 S.Ct. 2258, 138 L.Ed.2d 772 (1997).

Glucksberg presented a disagreement about the significance of historical examples of protected liberty in determining whether a given statute could be judged to contravene the Fourteenth Amendment. The differences of opinion turned on the issues of how much history indicating recognition of the asserted right, viewed at what level of specificity, is necessary to support the finding of a substantive due process right entitled to prevail over state legislation.

As we explain in the text, a case challenging executive action on substantive due process grounds, like this one, presents an issue antecedent to any question about the need for historical examples of enforcing a liberty interest of the sort claimed. For executive action challenges raise a particular need to preserve the constitutional proportions of constitutional claims, lest the Constitution be demoted to what we have called a font of tort law. Thus, in a due process challenge to executive action, the threshold question is whether the behavior of the governmental officer is so egregious, so outrageous, that it may fairly be said to shock the contemporary conscience. That judgment may be informed by a history of liberty protection, but it necessarily reflects an understanding of traditional executive behavior, of contemporary practice, and of the standards of blame generally applied to them. Only if the necessary condition of egregious behavior were satisfied would there be a possibility of recognizing a substantive due process right to be free of such executive action, and only then might there be a debate about the sufficiency of historical examples of enforcement of the right claimed, or its recognition in other ways. In none of our prior cases have we considered the necessity for such examples, and no such question is raised in this case.

In sum, the difference of opinion in

Glucksberg was about the need for historical examples of recognition of the claimed liberty protection at some appropriate level of specificity. In an executive action case, no such issue can arise if the conduct does not reach the degree of the egregious.

[6] ***848** It should not be surprising that the constitutional concept of conscience shocking duplicates no traditional category of common-law fault, but rather points clearly away from liability, or clearly toward it, only at the ends of the tort law's spectrum of culpability. Thus, we have made it clear that the due process guarantee does not entail a body of constitutional law imposing liability whenever someone cloaked with state authority causes harm. In ****1718***Paul v. Davis*, 424 U.S. 693, 701, 96 S.Ct. 1155, 1160–1161, 47 L.Ed.2d 405 (1976), for example, we explained that the Fourteenth Amendment is not a "font of tort law to be superimposed upon whatever systems may already be administered by the States," and in *Daniels v. Williams*, 474 U.S., at 332, 106 S.Ct., at 665, we reaffirmed the point that "[o]ur Constitution deals with the large concerns of the governors and the governed, but it does not purport to supplant traditional tort law in laying down rules of conduct to regulate liability for injuries that attend living together in society." We have accordingly rejected the lowest common denominator of customary tort liability***849** as any mark of sufficiently shocking conduct, and have held that the Constitution does not guarantee due care on the part of state officials; liability for negligently inflicted harm is categorically beneath the threshold of constitutional due process. See *id.*, at 328, 106 S.Ct., at 663; see also *Davidson v. Cannon*, 474 U.S., at 348, 106 S.Ct., at 670–671 (clarifying that *Daniels* applies to substantive, as well as procedural, due process). It is, on the contrary, behavior at the other end of the culpability spectrum that would most probably support a substantive due process claim; conduct intended to injure in some way unjustifiable by any government interest is the sort of official action most likely to rise to the conscience-shocking level. See *Daniels v. Williams*, 474 U.S., at 331, 106 S.Ct., at 665 ("Historically, this guarantee of due process has been applied to *deliberate* decisions of government officials to deprive a person of life, liberty, or property" (emphasis in original)).

Whether the point of the conscience shocking is reached when injuries are produced with culpability falling within the middle range, following from something more than negligence but "less than intentional conduct, such as recklessness or 'gross negligence,' " *id.*, at 334, n. 3, 106 S.Ct., at 666, n. 3, is a matter for closer calls.[FN9] To be sure, we have expressly recognized the possibility that some official acts in this range may be actionable under the Fourteenth Amendment, *ibid.*, and our cases have compelled recognition that such conduct is egregious enough to state a substantive due process claim in at least one instance. We held in *City of Revere v. Massachusetts Gen. Hospital*, 463 U.S. 239, 103 S.Ct. 2979, 77 L.Ed.2d 605 (1983), that "the due process rights of a [pretrial detainee] are at least as great as the ***850** Eighth Amendment protections available to a convicted prisoner." *Id.*, at 244, 103 S.Ct., at 2983 (citing *Bell v. Wolfish*, 441 U.S. 520, 535, n. 16, 545, 99 S.Ct. 1861, 1872, n. 16, 60 L.Ed.2d 447 (1979)). Since it may suffice for Eighth Amendment liability that prison officials were deliberately indifferent to the medical needs of their prisoners, see *Estelle v. Gamble*, 429 U.S. 97, 104, 97 S.Ct. 285, 291, 50 L.Ed.2d 251 (1976), it follows that such deliberately indifferent conduct must also be enough to satisfy the fault requirement for due process claims based on the medical needs of someone jailed while awaiting trial, see, *e.g.*, *Barrie v. Grand County, Utah*, 119 F.3d 862, 867 (C.A.10 1997); *Weyant v. Okst*, 101 F.3d 845, 856 (C.A.2 1996).[FN10]

FN9. In *Rochin v. California*, 342 U.S. 165, 72 S.Ct. 205, 96 L.Ed. 183 (1952), the case in which we formulated and first applied the shocks-the-conscience test, it was not the ultimate purpose of the government actors to harm the plaintiff, but they apparently acted with full appreciation of what the Court described as the brutality of their acts. *Rochin*, of course, was decided long before *Graham v. Connor* (and *Mapp v. Ohio*, 367 U.S. 643, 81 S.Ct. 1684, 6 L.Ed.2d 1081 (1961)), and today would be treated under the Fourth Amendment, albeit with the same result.

FN10. We have also employed deliberate indifference as a standard of culpability sufficient to identify a dereliction as reflective of municipal policy and to sustain a claim of municipal liability for failure to train an employee who causes harm by unconstitutional

conduct for which he would be individually liable. See *Canton v. Harris*, 489 U.S. 378, 388–389, 109 S.Ct. 1197, 1204–1205, 103 L.Ed.2d 412 (1989).

[7] Rules of due process are not, however, subject to mechanical application in unfamiliar territory. Deliberate indifference that shocks in one environment may not be so patently egregious in another, and our concern with preserving the constitutional proportions of substantive due process demands an exact analysis of circumstances before any abuse of power is condemned as conscience ****1719** shocking. What we have said of due process in the procedural sense is just as true here:

> "The phrase [due process of law] formulates a concept less rigid and more fluid than those envisaged in other specific and particular provisions of the Bill of Rights. Its application is less a matter of rule. Asserted denial is to be tested by an appraisal of the totality of facts in a given case. That which may, in one setting, constitute a denial of fundamental fairness, shocking to the universal sense of justice, may, in other circumstances, and in the light of other considerations, fall short of such denial." *Betts v. Brady*, 316 U.S. 455, 462, 62 S.Ct. 1252, 1256, 86 L.Ed. 1595 (1942).

***851** Thus, attention to the markedly different circumstances of normal pretrial custody and high-speed law enforcement chases shows why the deliberate indifference that shocks in the one case is less egregious in the other (even assuming that it makes sense to speak of indifference as deliberate in the case of sudden pursuit). As the very term "deliberate indifference" implies, the standard is sensibly employed only when actual deliberation is practical, see *Whitley v. Albers*, 475 U.S., at 320, 106 S.Ct., at 1084–1085,[FN11] and in the custodial situation of a prison, forethought about an inmate's welfare is not only feasible but obligatory under a regime that incapacitates a prisoner to exercise ordinary responsibility for his own welfare.

> FN11. By "actual deliberation," we do not mean "deliberation" in the narrow, technical sense in which it has sometimes been used in traditional homicide law. See, *e.g.*, *Caldwell v. State*, 203 Ala. 412, 84 So. 272, 276 (1919) (noting that " 'deliberation here does not mean that the man slayer must ponder over the killing for a long time' "; rather, "it may exist and may be entertained while the man slayer is pressing the trigger of the pistol that fired the fatal shot[,] even if it be only for a moment or instant of time").

"[W]hen the State takes a person into its custody and holds him there against his will, the Constitution imposes upon it a corresponding duty to assume some responsibility for his safety and general well-being. The rationale for this principle is simple enough: when the State by the affirmative exercise of its power so restrains an individual's liberty that it renders him unable to care for himself, and at the same time fails to provide for his basic human needs—*e.g.*, food, clothing, shelter, medical care, and reasonable safety—it transgresses the substantive limits on state action set by the ... Due Process Clause." *DeShaney v. Winnebago County Dept. of Social Servs.*, 489 U.S., at 199–200, 109 S.Ct., at 1005 (citation and footnote omitted).

Nor does any substantial countervailing interest excuse the State from making provision for the decent care and protection of those it locks up; "the State's responsibility to attend ***852** to the medical needs of prisoners [or detainees] does not ordinarily clash with other equally important governmental responsibilities." *Whitley v. Albers*, *supra*, at 320, 106 S.Ct., at 1084.[FN12]

> FN12. *Youngberg v. Romeo*, 457 U.S. 307, 102 S.Ct. 2452, 73 L.Ed.2d 28 (1982), can be categorized on much the same terms. There, we held that a severely retarded person could state a claim under § 1983 for a violation of substantive due process if the personnel at the mental institution where he was confined failed to exercise professional judgment when denying him training and habilitation. *Id.*, at 319–325, 102 S.Ct., at 2459–2463. The combination of a patient's involuntary commitment and his total dependence on his custodians obliges the government to take thought and make reasonable provision for the patient's welfare.

But just as the description of the custodial prison situation shows how deliberate indifference can rise to a constitutionally shocking level, so too does it suggest why indifference may well not be enough for

liability in the different circumstances of a case like this one. We have, indeed, found that deliberate indifference does not suffice for constitutional liability (albeit under the Eighth Amendment) even in prison circumstances when a prisoner's claim arises not from normal custody but from response to a violent disturbance. Our analysis is instructive here:

> "[I]n making and carrying out decisions involving the use of force to restore order in the face of a prison disturbance, prison officials undoubtedly must take into account the very real threats the unrest ****1720** presents to inmates and prison officials alike, in addition to the possible harms to inmates against whom force might be used.... In this setting, a deliberate indifference standard does not adequately capture the importance of such competing obligations, or convey the appropriate hesitancy to critique in hindsight decisions necessarily made in haste, under pressure, and frequently without the luxury of a second chance." *Whitley v. Albers*, 475 U.S., at 320, 106 S.Ct., at 1084.

We accordingly held that a much higher standard of fault than deliberate indifference has to be shown for officer liability***853** in a prison riot. In those circumstances, liability should turn on "whether force was applied in a good faith effort to maintain or restore discipline or maliciously and sadistically for the very purpose of causing harm." *Id.*, at 320–321, 106 S.Ct., at 1085 (internal quotation marks omitted). The analogy to sudden police chases (under the Due Process Clause) would be hard to avoid.

[8] Like prison officials facing a riot, the police on an occasion calling for fast action have obligations that tend to tug against each other. Their duty is to restore and maintain lawful order, while not exacerbating disorder more than necessary to do their jobs. They are supposed to act decisively and to show restraint at the same moment, and their decisions have to be made "in haste, under pressure, and frequently without the luxury of a second chance." *Id.*, at 320, 106 S.Ct., at 1084; cf. *Graham v. Connor*, 490 U.S., at 397, 109 S.Ct., at 1872 ("[P]olice officers are often forced to make split-second judgments—in circumstances that are tense, uncertain, and rapidly evolving"). A police officer deciding whether to give chase must balance on one hand the need to stop a suspect and show that flight from the law is no way to freedom, and, on the other, the high-speed threat to all those within stopping range, be they suspects, their passengers, other drivers, or bystanders.

To recognize a substantive due process violation in these circumstances when only midlevel fault has been shown would be to forget that liability for deliberate indifference to inmate welfare rests upon the luxury enjoyed by prison officials of having time to make unhurried judgments, upon the chance for repeated reflection, largely uncomplicated by the pulls of competing obligations. When such extended opportunities to do better are teamed with protracted failure even to care, indifference is truly shocking. But when unforeseen circumstances demand an officer's instant judgment, even precipitate recklessness fails to inch close enough to harmful purpose to spark the shock that implicates "the large concerns of the governors and the governed." *Daniels v. Williams*, 474 U.S., at 332, 106 S.Ct., at 665. ***854** Just as a purpose to cause harm is needed for Eighth Amendment liability in a riot case, so it ought to be needed for due process liability in a pursuit case. Accordingly, we hold that high-speed chases with no intent to harm suspects physically or to worsen their legal plight do not give rise to liability under the Fourteenth Amendment, redressible by an action under § 1983.[FN13]

> FN13. Cf. *Checki v. Webb*, 785 F.2d 534, 538 (C.A.5 1986) ("Where a citizen suffers physical injury due to a police officer's *negligent use* of his vehicle, no section 1983 claim is stated. It is a different story when a citizen suffers or is seriously threatened with physical injury due to a police officer's *intentional misuse* of his vehicle" (citation omitted)).

[9] The fault claimed on Smith's part in this case accordingly fails to meet the shocks-the-conscience test. In the count charging him with liability under § 1983, respondents' complaint alleges a variety of culpable states of mind: "negligently responsible in some manner," App. 11, Count one, ¶ 8, "reckless and careless,' *id.*, at 12, ¶ 15, "recklessness, gross negligence and conscious disregard for [Lewis's] safety,' *id.*, at 13, ¶ 18, and "oppression, fraud and malice,' *ibid.* The subsequent summary judgment proceedings revealed that the height of the fault actually claimed was "conscious disregard," the malice allegation having been made in aid of a request for punitive

damages, but unsupported either in allegations of specific conduct or in any affidavit of fact offered on the motions for summary judgment. The Court of Appeals understood the claim to be one of ****1721** deliberate indifference to Lewis's survival, which it treated as equivalent to one of reckless disregard for life. We agree with this reading of respondents' allegations, but consequently part company from the Court of Appeals, which found them sufficient to state a substantive due process claim, and from the District Court, which made the same assumption *arguendo*.[FN14]

FN14. To say that due process is not offended by the police conduct described here is not, of course, to imply anything about its appropriate treatment under state law. See *Collins v. Harker Heights*, 503 U.S. 115, 129, 112 S.Ct. 1061, 1070, 117 L.Ed.2d 261 (1992) (decisions about civil liability standards that "involve a host of policy choices ... must be made by locally elected representatives [or by courts enforcing the common law of torts], rather than by federal judges interpreting the basic charter of Government for the entire country"). Cf. *Thomas v. City of Richmond*, 9 Cal.4th 1154, 40 Cal.Rptr.2d 442, 892 P.2d 1185 (1995) (en banc) (discussing municipal liability under California law for injuries caused by police pursuits).

***855** Smith was faced with a course of lawless behavior for which the police were not to blame. They had done nothing to cause Willard's high-speed driving in the first place, nothing to excuse his flouting of the commonly understood law enforcement authority to control traffic, and nothing (beyond a refusal to call off the chase) to encourage him to race through traffic at breakneck speed forcing other drivers out of their travel lanes. Willard's outrageous behavior was practically instantaneous, and so was Smith's instinctive response. While prudence would have repressed the reaction, the officer's instinct was to do his job as a law enforcement officer, not to induce Willard's lawlessness, or to terrorize, cause harm, or kill. Prudence, that is, was subject to countervailing enforcement considerations, and while Smith exaggerated their demands, there is no reason to believe that they were tainted by an improper or malicious motive on his part.

Regardless whether Smith's behavior offended the reasonableness held up by tort law or the balance struck in law enforcement's own codes of sound practice, it does not shock the conscience, and petitioners are not called upon to answer for it under § 1983. The judgment below is accordingly reversed.

It is so ordered.

Chief Justice REHNQUIST, concurring.

I join the opinion of the Court in this case. The first question presented in the county's petition for certiorari is:

> "Whether, in a police pursuit case, the legal standard of conduct necessary to establish a violation of substantive***856** due process under the Fourteenth Amendment is 'shocks the conscience'... or is 'deliberate indifference' or 'reckless disregard.' " Pet. for Cert. i.

The county's petition assumed that the constitutional question was one of substantive due process, and the parties briefed the question on that assumption. The assumption was surely not without foundation in our case law, as the Court makes clear. *Ante*, at 1717. The Court is correct in concluding that "shocks the conscience" is the right choice among the alternatives posed in the question presented, and correct in concluding that this demanding standard has not been met here.

Justice KENNEDY, with whom Justice O'CONNOR joins, concurring.

I join the opinion of the Court, and write this explanation of the objective character of our substantive due process analysis.

The Court is correct, of course, in repeating that the prohibition against deprivations of life, liberty, or property contained in the Due Process Clause of the Fourteenth Amendment extends beyond the command of fair procedures. It can no longer be controverted that due process has a substantive component as well. See, *e.g.*, *Washington v. Glucksberg*, 521 U.S. 702, 117 S.Ct. 2258, 138 L.Ed.2d 772 (1997); *Planned Parenthood of Southeastern Pa. v. Casey*, 505 U.S. 833, 112 S.Ct. 2791, 120 L.Ed.2d 674 (1992); *Collins v. Harker Heights*, 503 U.S. 115, 125–128, 112 S.Ct. 1061, 1068–1070, 117 L.Ed.2d 261 (1992); *Michael H. v. Gerald D.*, 491 U.S. 110, 109 S.Ct. 2333, 105 L.Ed.2d 91 (1989). As a consequence, certain actions are prohibited no matter what procedures attend them.

In the case before us, there can be no question****1722** that an interest protected by the text of the Constitution is implicated: The actions of the State were part of a causal chain resulting in the undoubted loss of life. We have no definitional problem, then, in determining whether there is an interest sufficient to invoke due process. Cf. *Ohio Adult Parole Authority v. Woodard*, 523 U.S. 272, 118 S.Ct. 1244, 140 L.Ed.2d 387 (1998).

***857** What we do confront is the question of the standard of conduct the Constitution requires the State, in this case the local police, to follow to protect against the unintentional taking of life in the circumstances of a police pursuit. Unlike the separate question whether or not, given the fact of a constitutional violation, the state entity is liable for damages, see *Monell v. New York City Dept. of Social Servs.*, 436 U.S. 658, 694–695, 98 S.Ct. 2018, 2037–2038, 56 L.Ed.2d 611 (1978); *Canton v. Harris*, 489 U.S. 378, 109 S.Ct. 1197, 103 L.Ed.2d 412 (1989), which is a matter of statutory interpretation or elaboration, the question here is the distinct, anterior issue whether or not a constitutional violation occurred at all. See *Collins v. Harker Heights*, *supra*, at 120, 124, 112 S.Ct., at 1065–1066, 1068.

The Court decides this case by applying the "shocks the conscience" test first recognized in *Rochin v. California*, 342 U.S. 165, 172–173, 72 S.Ct. 205, 209–210, 96 L.Ed. 183 (1952), and reiterated in subsequent decisions. The phrase has the unfortunate connotation of a standard laden with subjective assessments. In that respect, it must be viewed with considerable skepticism. As our opinion in *Collins v. Harker Heights* illustrates, however, the test can be used to mark the beginning point in asking whether or not the objective character of certain conduct is consistent with our traditions, precedents, and historical understanding of the Constitution and its meaning. 503 U.S., at 126–128, 112 S.Ct., at 1069–1070. As Justice SCALIA is correct to point out, we so interpreted the test in *Glucksberg*. *Post*, at 1723–1724 (opinion concurring in judgment). In the instant case, the authorities cited by Justice SCALIA are persuasive, indicating that we would contradict our traditions were we to sustain the claims of the respondents.

That said, it must be added that history and tradition are the starting point, but not in all cases the ending point of the substantive due process inquiry. There is room as well for an objective assessment of the necessities of law enforcement, in which the police must be given substantial latitude and discretion, acknowledging, of course, the primacy of the interest in life which the State, by the Fourteenth Amendment,***858** is bound to respect. I agree with the Court's assessment of the State's interests in this regard. Absent intent to injure, the police, in circumstances such as these, may conduct a dangerous chase of a suspect who disobeys a lawful command to stop when they determine it is appropriate to do so. There is a real danger in announcing a rule, or suggesting a principle, that in some cases a suspect is free to ignore a lawful police command to stop. No matter how narrow its formulation, any suggestion that suspects may ignore a lawful command to stop and then sue for damages sustained in an ensuing chase might cause suspects to flee more often, increasing accidents of the kind which occurred here.

Though I share Justice SCALIA's concerns about using the phrase "shocks the conscience" in a manner suggesting that it is a self-defining test, the reasons the Court gives in support of its judgment go far toward establishing that objective considerations, including history and precedent, are the controlling principle, regardless of whether the State's action is legislative or executive in character. To decide this case, we need not attempt a comprehensive definition of the level of causal participation which renders a State or its officers liable for violating the substantive commands of the Fourteenth Amendment. It suffices to conclude that neither our legal traditions nor the present needs of law enforcement justify finding a due process violation when unintended injuries occur after the police pursue a suspect who disobeys their lawful order to stop.

Justice BREYER, concurring.

I join the Court's judgment and opinion. I write separately only to point out my agreement with Justice STEVENS, *post*, at 1723, that ****1723***Siegert v. Gilley*, 500 U.S. 226, 111 S.Ct. 1789, 114 L.Ed.2d 277 (1991), should not be read to deny lower courts the flexibility, in appropriate cases, to decide 42 U.S.C. § 1983 claims on the basis of qualified immunity, and thereby avoid wrestling with ***859** constitutional issues that are either difficult or poorly presented. See *Siegert*, *supra*, at 235, 111 S.Ct., at 1794–1795 (KENNEDY, J., concurring) (Lower court "adopted the altogether normal procedure of deciding the case before it on the ground that appeared to offer the most direct and appropriate resolution, and one argued by

the parties").

Justice STEVENS, concurring in the judgment.

When defendants in a 42 U.S.C. § 1983 action argue in the alternative (a) that they did not violate the Constitution, and (b) that in any event they are entitled to qualified immunity because the constitutional right was not clearly established, the opinion in *Siegert v. Gilley*, 500 U.S. 226, 111 S.Ct. 1789, 114 L.Ed.2d 277 (1991), tells us that we should address the constitutional question at the outset. That is sound advice when the answer to the constitutional question is clear. When, however, the question is both difficult and unresolved, I believe it wiser to adhere to the policy of avoiding the unnecessary adjudication of constitutional questions. Because I consider this such a case, I would reinstate the judgment of the District Court on the ground that the relevant law was not clearly defined in 1990.

The Court expresses concern that deciding the immunity issue without resolving the underlying constitutional question would perpetuate a state of uncertainty in the law. *Ante*, at 1714, n. 5. Yet the Court acknowledges, as it must, that a qualified immunity defense is unavailable in an action against the municipality itself. *Id.* Sound reasons exist for encouraging the development of new constitutional doctrines in adversarial suits against municipalities, which have a substantial stake in the outcome and a risk of exposure to damages liability even when individual officers are plainly protected by qualified immunity.

In sum, I would hold that Officer Smith is entitled to qualified immunity. Accordingly, I concur in the Court's judgment, but I do not join its opinion.

***860** Justice SCALIA, with whom Justice THOMAS joins, concurring in the judgment.

Today's opinion gives the lie to those cynics who claim that changes in this Court's jurisprudence are attributable to changes in the Court's membership. It proves that the changes are attributable to nothing but the passage of time (not much time, at that), plus application of the ancient maxim, "That was then, this is now."

Just last Term, in *Washington v. Glucksberg*, 521 U.S. 702, 720–722, 117 S.Ct. 2258, 2267–2269, 138 L.Ed.2d 772 (1997), the Court specifically rejected the method of substantive-due-process analysis employed by Justice SOUTER in his concurrence in that case, which is the very same method employed by Justice SOUTER in his opinion for the Court today. To quote the opinion in *Glucksberg:*

> "Our established method of substantive-due-process analysis has two primary features: First, we have regularly observed that the Due Process Clause specially protects those fundamental rights and liberties which are, objectively, 'deeply rooted in this Nation's history and tradition,'... and 'implicit in the concept of ordered liberty'.... Second, we have required in substantive-due-process cases a 'careful description' of the asserted fundamental liberty interest.... Our Nation's history, legal traditions, and practices thus provide the crucial 'guideposts for responsible decision-making,'... that direct and restrain our exposition of the Due Process Clause....
>
> "Justice SOUTER ... would largely abandon this restrained methodology, and instead ask 'whether [Washington's] statute sets up one of those "arbitrary impositions" or "purposeless restraints" at odds with the Due Process Clause ...' [citations and footnote omitted]. In our view, however, the development of this Court's substantive-due-process jurisprudence ... has been a process whereby the outlines of the 'liberty' specially protected by the Fourteenth****1724** Amendment ... have at ***861** least been carefully refined by concrete examples involving fundamental rights found to be deeply rooted in our legal tradition. This approach tends to rein in the subjective elements that are necessarily present in due process judicial review." *Id.*, at 720–722, 117 S.Ct., at 2268.

Today, so to speak, the stone that the builders had rejected has become the foundation stone of our substantive-due-process jurisprudence. The atavistic methodology that Justice SOUTER announces for the Court is the very same methodology that the Court called atavistic when it was proffered by Justice SOUTER in *Glucksberg.* In fact, if anything, today's opinion is even more of a throw back to highly subjective substantive-due-process methodologies than the concurrence in *Glucksberg* was. Whereas the latter said merely that substantive due process prevents "arbitrary impositions" and "purposeless restraints" (without any objective criterion as to what is arbitrary or purposeless), today's opinion resuscitates the *ne plus ultra*, the Napoleon Brandy, the Mahatma

Gandhi, the Cellophane [FN1] of subjectivity, th' ol' "shocks-the-conscience" test. According to today's opinion, this is the *measure* of arbitrariness when what is at issue is executive, rather than legislative, action. *Ante*, at 1717.[FN2] ***862** *Glucksberg*, of course, rejected "shocks-the-conscience," just as it rejected the less subjective "arbitrary action" test. A 1992 executive-action case, *Collins v. Harker Heights*, 503 U.S. 115, 112 S.Ct. 1061, 117 L.Ed.2d 261, which had paid lipservice to "shocks-the-conscience," see *id.*, at 128, 112 S.Ct., at 1070, was cited in *Glucksberg* for the proposition that "[o]ur Nation's history, legal traditions, and practices ... provide the crucial 'guideposts for responsible decisionmaking.' " 521 U.S., at 721, 117 S.Ct., at 2268, quoting *Collins*, *supra*, at 125, 112 S.Ct., at 1068. In fact, even before *Glucksberg* we had characterized the last "shocks-the-conscience" claim to come before us as "nothing more than [a] bald assertio[n]," and had rejected it on the objective ground that the petitioner "failed to proffer any historical, textual, or controlling precedential support for [his alleged due process right], and we decline to fashion a new due process right out of thin air." *Carlisle v. United States*, 517 U.S. 416, 429, 116 S.Ct. 1460, 1468, 134 L.Ed.2d 613 (1996).

FN1. For those unfamiliar with classical music, I note that the exemplars of excellence in the text are borrowed from Cole Porter's "You're the Top," copyright 1934.

FN2. The proposition that "shocks-the-conscience" is a test applicable only to executive action is original with today's opinion. That has never been suggested in any of our cases, and in fact "shocks-the-conscience" was recited in at least one opinion involving legislative action. See *United States v. Salerno*, 481 U.S. 739, 746, 107 S.Ct. 2095, 2101, 95 L.Ed.2d 697 (1987) (in considering whether the Bail Reform Act of 1984 violated the Due Process Clause, we said that "[s]o-called 'substantive due process' prevents the government from engaging in conduct that 'shocks the conscience' "). I am of course happy to accept whatever limitations the Court today is willing to impose upon the "shocks-the-conscience" test, though it is a puzzlement why substantive due process protects some liberties against executive officers but not against legislatures.

Adhering to our decision in *Glucksberg*, rather than ask whether the police conduct here at issue shocks my unelected conscience, I would ask whether our Nation has traditionally protected the right respondents assert. The first step of our analysis, of course, must be a "careful description" of the right asserted, *Glucksberg*, *supra*, at 721, 117 S.Ct., at 2268. Here the complaint alleges that the police officer deprived Lewis "of his Fourteenth Amendment right to life, liberty and property without due process of law when he operated his vehicle with recklessness, gross negligence and conscious disregard for his safety." App. 13. I agree with the Court's conclusion that this asserts a substantive right to be free from "deliberate or reckless indifference to life in a high-speed automobile chase aimed at apprehending a suspected offender." *Ante*, at 1711; see also *ante*, at 1720.

Respondents provide no textual or historical support for this alleged due process right, and, as in *Carlisle*, I would "decline to fashion a new due process right out of thin air." 517 U.S., at 429, 116 S.Ct., at 1468. Nor have respondents identified any precedential support. Indeed, precedent is to the contrary:****1725 *863** "Historically, th[e] guarantee of due process has been applied to *deliberate* decisions of government officials to deprive a person of life, liberty, or property." *Daniels v. Williams*, 474 U.S. 327, 331, 106 S.Ct. 662, 664–665, 88 L.Ed.2d 662 (1986) (citations omitted); *Collins*, *supra*, at 127, n. 10, 112 S.Ct., at 1069, n. 10 (same). Though it is true, as the Court explains, that "deliberate indifference" to the medical needs of pretrial detainees, *City of Revere v. Massachusetts Gen. Hospital*, 463 U.S. 239, 244–245, 103 S.Ct. 2979, 2983–2984, 77 L.Ed.2d 605 (1983), or of involuntarily committed mental patients, *Youngberg v. Romeo*, 457 U.S. 307, 314–325, 102 S.Ct. 2452, 2457–2463, 73 L.Ed.2d 28 (1982), may violate substantive due process, it is not the deliberate indifference alone that is the "deprivation." Rather, it is that combined with "the State's affirmative act of restraining the individual's freedom to act on his own behalf—through incarceration, institutionalization, or other similar restraint of personal liberty," *DeShaney v. Winnebago County Dept. of Social Servs.*, 489 U.S. 189, 200, 109 S.Ct. 998, 1006, 103 L.Ed.2d 249 (1989). "[W]hen the State by the affirmative exercise of its power so restrains an individual's liberty that it

renders him unable to care for himself, and *at the same time* fails to provide for his basic human needs[,] ... it transgresses the substantive limits on state action set by the ... Due Process Clause." *Ibid.* (emphasis added). We have expressly left open whether, in a context in which the individual has *not* been deprived of the ability to care for himself in the relevant respect, "something less than intentional conduct, such as recklessness or 'gross negligence,' " can ever constitute a "deprivation" under the Due Process Clause. *Daniels*, 474 U.S., at 334, n. 3, 106 S.Ct., at 666, n. 3. Needless to say, if it is an open question whether recklessness can *ever* trigger due process protections, there is no precedential support for a substantive-due-process right to be free from reckless police conduct during a car chase.

To hold, as respondents urge, that all government conduct deliberately indifferent to life, liberty, or property violates the Due Process Clause would make " 'the Fourteenth Amendment a font of tort law to be superimposed upon whatever ***864** systems may already be administered by the States.' " *Id.*, at 332, 106 S.Ct., at 665, quoting *Paul v. Davis*, 424 U.S. 693, 701, 96 S.Ct. 1155, 1160, 47 L.Ed.2d 405 (1976) (other citation omitted). Here, for instance, it is not fair to say that it was the police officer alone who "deprived" Lewis of his life. Though the police car did run Lewis over, it was the driver of the motorcycle, Willard, who dumped Lewis in the car's path by recklessly making a sharp left turn at high speed. (Willard had the option of rolling to a gentle stop and showing the officer his license and registration.) Surely Willard "deprived" Lewis of his life in every sense that the police officer did. And if Lewis encouraged Willard to make the reckless turn, Lewis himself would be responsible, at least in part, for his own death. Was there contributory fault on the part of Willard or Lewis? Did the police officer have the "last clear chance" to avoid the accident? Did Willard and Lewis, by fleeing from the police, "assume the risk" of the accident? These are interesting questions of tort law, not of constitutional governance. "Our Constitution deals with the large concerns of the governors and the governed, but it does not purport to supplant traditional tort law in laying down rules of conduct to regulate liability for injuries that attend living together in society." *Daniels, supra*, at 332, 106 S.Ct., at 665. As we have said many times, "the Due Process Clause of the Fourteenth Amendment ... does not transform every tort committed by a state actor into a constitutional violation." *DeShaney, supra*, at 202, 109 S.Ct., at 1006 (citations omitted).

If the people of the State of California would prefer a system that renders police officers liable for reckless driving during high-speed pursuits, "[t]hey may create such a system ... by changing the tort law of the State in accordance with the regular lawmaking process." 489 U.S., at 203, 109 S.Ct., at 1007. For now, they prefer not to hold public employees "liable for civil damages on account of personal injury to or death of any person or damage to property resulting from the operation, in the line of duty, of an ****1726** authorized emergency vehicle ... when in the immediate pursuit of an actual or suspected violator***865** of the law." Cal. Veh.Code Ann. § 17004 (West 1971). It is the prerogative of a self-governing people to make that legislative choice. "Political society," as the Seventh Circuit has observed, "must consider not only the risks to passengers, pedestrians, and other drivers that high-speed chases engender, but also the fact that if police are forbidden to pursue, then many more suspects will flee—and successful flights not only reduce the number of crimes solved but also create their own risks for passengers and bystanders." *Mays v. City of East St. Louis*, 123 F.3d 999, 1003 (C.A.7 1997). In allocating such risks, the people of California and their elected representatives may vote their consciences. But for judges to overrule that democratically adopted policy judgment on the ground that it shocks *their* consciences is not judicial review but judicial governance.

I would reverse the judgment of the Ninth Circuit, not on the ground that petitioners have failed to shock my still, soft voice within, but on the ground that respondents offer no textual or historical support for their alleged due process right. Accordingly, I concur in the judgment of the Court.

U.S.Cal.,1998.
County of Sacramento v. Lewis

(Cite as: 419 F.2d 617, 136 U.S.App.D.C. 35)

United States Court of Appeals District of Columbia Circuit.
James COVINGTON, Appellant,
v.
David W. HARRIS, Appellee.

No. 21935.
Argued Dec. 5, 1968.
Decided March 14, 1969.

Habeas corpus petition by person civilly committed to Saint Elizabeths Hospital in District of Columbia, seeking transfer from the John Howard (maximum security) Pavilion to some less restricted ward. The United States District Court for the District of Columbia, George L. Hart, Jr., J., dismissed the petition, and petitioner appealed. The Court of Appeals, Bazelon, Chief Judge, held that where record did not indicate that decision of Saint Elizabeths Hospital that petitioner be confined in John Howard (maximum security) Pavilion was made in view of the relevant information, case was remanded to district court for further proceedings to expand the record and to make findings of fact.

Remanded.

Orderly judicial procedure normally precludes raising on appeal issues not reasonably within scope of question presented by petition for habeas corpus.

***619 **37** Mr. Thomas C. Green, Asst. U.S. Atty., with whom Messrs. David G. Bress, U.S. Atty., and Frank Q. Nebeker, Asst. U.S. Atty., were on the motion, for appellee.

Mr. Charles R. Halpern, with whom Mr. Stephen B. Rosenberg was on the opposition to the motion, for appellant.

Before BAZELON, Chief Judge, FAHY, Senior Circuit Judge, and McGOWAN, Circuit Judge.[FNa1]

FNa1. Circuit Judge McGowan did not participate in the decision to remand this case.

BAZELON, Chief Judge:

The District Court heard and dismissed appellant's habeas corpus petition seeking transfer from the maximum security pavilion of Saint Elizabeths Hospital to some less restrictive ward. On this appeal appellant not only contests this order, but also asserts that he is entitled to be released from Saint Elizabeths altogether because of numerous alleged defects in the proceedings leading to his civil commitment. Appellee promptly moved for summary affirmance on the grounds that the record adequately

supports the order denying transfer and that none of the other issues appellant now raises was presented below. Thereupon, appellant requested summary reversal on the transfer issue and further argument on the others. Because of deficiencies in the record, we think a remand, rather than any final disposition, would best serve the interests of justice.

I

Appellant was convicted of second degree murder in 1942 and served a 14-year prison sentence. In 1957, soon after his release, he was again charged with murder. This time he was found incompetent to stand trial because of 'mental deficiency (38 I.Q.) with psychotic reaction,' and was confined in Saint Elizabeths. In 1964, he was civilly committed to the hospital, and the pending murder charge was dismissed. Ever since his original confinement he has been continuously lodged in the John Howard (maximum security) Pavilion. Though his I.Q. has risen to 52, the hospital says he is still suffering from the same syndrome.

Generally, during his ten years in John Howard, appellant has by all accounts been a model patient, cooperating with the staff and staying out of trouble. Under the influence of medication he has shown no overt signs of violence. In December, 1966, while under an experimentally reduced dosage of medication, he confessed to having 'murderous thoughts' towards some of his fellow patients, but these thoughts were stilled by restoring his full dosage. Considering this record and the improvement he had shown during confinement, his supervising physician, Dr. Weickhardt, recommended in September, 1967, that he be transferred out of the maximum security division. The recommendation was disapproved by Acting Superintendent Harris, whereupon appellant brought this habeas corpus action in the District Court pro se, explaining that he 'would like to get out on the grounds where I have ground privileges and catch a little fresh air.'

In a hearing before Judge Sirica, Dr. Weickhardt stood by his recommendation, stating that while appellant would never achieve normal intelligence,

> as long as he takes medicine such as he is getting now- a tranquilizer- and as long as he refrains from the use of alcohol, I think that he can get along well under supervision.

The doctor had been unable, however, to convince the Superintendent that appellant, if permitted more freedom, might not begin to use alcohol, with 'unpredictable consequences.' The hospital thought it more prudent to wait a full year after the 'murderous thoughts' episode before risking a less restrictive regime. Judge Sirica complained that he ***620 **38** couldn't see 'why the Superintendent doesn't accept the advice of the doctor that sees this man all the time,' but decided to continue the case until the hospital had reconsidered the transfer recommendation in December as scheduled, at the end of the year of 'murderous thoughts.'

The hospital did not reconsider its decision; indeed, it may not have even formally reconsidered appellant's request.[FN1] Accordingly, appellant was back in court in February, 1968, before Judge Hart. But Dr. Weickhardt now reversed his field and refused to recommend a transfer. In the unkindest cut of all, the doctor said the reason for his change of heart was an incident in which appellant reported that another patient had stolen money from him. The authorities searched the accused patient and found five dollars and some contraband drugs, including pills and a pink liquid. This discovery set in motion a train of inferences which, according to Dr. Weickhardt, were cumulatively fatal to appellant's hopes. Appellant's medication was a pink liquid. And though other medicinal liquids administered in the pavilion were also pink, though no analysis was performed on the confiscated drug to determine if it could have been appellant's, though appellant testified that he was never given any pills and that he was always obliged to swallow his pink liquid in the presence of an attendant- nonetheless Dr. Weickhardt concluded from the discovery of pills and pink liquid on the thief that 'there was reason to think there had been some dealings between (appellant) * * * and the other patient about money and drugs.' Moreover, it appears that, while not uncommon, money itself is formally contraband in John Howard Pavilion. Appellant said he had found the money in the courtyard where others had been gambling, but that he had inadvertently neglected to turn it in, though he knew he should have done so. Despite the fact that, if he had willfully violated the rules, he was of course only incriminating himself by reporting the theft, Dr. Weickhardt concluded that

> FN1. Appellant's hospital records, lodged with this court on appeal (but not presented to the District Court) make no mention of appellant's request for transfer after the September 1967 decision to wait until December. It may be, however, that the records are not a complete set since, though they were not filed until December 4,

1968, the last entry is dated December 31, 1967.

if Mr. Covington cannot follow the regulations about contraband in the Maximum Security Building * * *, he would be even less inclined to follow them where there is less supervision.

Finally, the doctor noted that appellant had in 1942 committed murder after an altercation over a small sum of money. He conceded that appellant's behavior in calmly reporting the instant money incident was, in contrast, 'much to his credit,' but he surmised that the Superintendent 'felt there might be a possibility that things like this would happen again between him and another patient. * * *'

On this evidence, the court dismissed the petition, relying on the Superintendent's initial decision to deny transfer, a decision now unopposed by any medical authority.

II

[1] On its motion for summary affirmance, appellee does not deny that appellant may seek transfer out of John Howard Pavilion via habeas corpus. It is well settled that habeas corpus challenges the place as well as the fact of confinement,[FN2] even if the challenged place is a particular hospital ward, [FN3] and ***621 **39** specifically if the particular ward is the John Howard Pavilion.[FN4]

FN2. In re Bonner, 151 U.S. 242, 14 S.Ct. 323, 38 L.Ed. 149 (1894); Lake v. Cameron, 124 U.S.App.D.C. 264, 364 F.2d 657 (1966) (en banc), cert. denied, 382 U.S. 863, 86 S.Ct. 126, 15 L.Ed.2d 100; Miller v. Overholser, 92 U.S.App.D.C. 110, 206 F.2d 415 (1953).

FN3. Miller v. Overholser, supra note 2.

FN4. Stultz v. Cameron, 127 U.S.App.D.C. 324, 383 F.2d 519, 520-521 (1967) (en banc).

[2] Rather, appellee says that under the standard governing judicial review of hospital decisions concerning internal administration articulated in Tribby v. Cameron,[FN5] the question is not whether the hospital has made the best decision, but only whether

FN5. 126 U.S.App.D.C. 327, 379 F.2d 104 (1967).

it has made a permissible and reasonable decision in view of the relevant information and within a broad range of discretion.[FN6]

FN6. Id. at 328, 379 F.2d at 105.

Appellee submits that since the District Court implicitly found the hospital's decision 'permissible and reasonable,' and since this finding is not 'clearly erroneous,' there is no substantial issue for appellate determination. Appellant, on the other hand, asserts that the hospital manifestly failed to carry its burden of proof and that he is therefore entitled to summary reversal.

[3] We agree with appellee that Tribby states the applicable standard of judicial review. But the predicate for the hospital's 'wide range of discretion' under Tribby is a record which gives assurance that its decision has been made 'in view of the relevant information.' We cannot tell from the present record whether such information was considered or not. Accordingly, since neither of the parties objects to clarification of the record,[FN7] we remand to the District Court for further proceedings to expand the record and to make findings of fact. The scope of the proceedings on remand required by this opinion are accurately delineated by Judge Fahy at page 630.[FN8]

FN7. In the alternative, appellant urges us to remand for a supplemental record on the transfer question, and during oral argument the Government stated that it 'would have no objection if the court felt that a remand would be in order to take more evidence on this issue.'

FN8. Cf. Stultz v. Cameron, supra note 4; Rouse v. Cameron, 125 U.S.App.D.C. 366, 374, 373 F.2d 451, 458 (1966); Miller v. Overholser, supra note 2. In Miller, we remanded a similar assertion of a right to transfer within Saint Elizabeths

with instructions that it make a finding as to the conditions of appellant's confinement, receiving, if necessary, additional pleadings and evidence in that regard * * *. Id. at 116, 206 F.2d at 420.

III

[4] A 'permissible * * * decision' under Tribby v.

Cameron[FN9] is one which demonstrably takes account of 'the relevant information.' The principal purpose of limited judicial review of administrative action is to insure that the decision-makers have (1) reached a reasoned and not unreasonable decision, (2) by employing the proper criteria, and (3) without overlooking anything of substantial relevance. More than this the courts do not pretend to do, and probably are not competent to do. To do less would abandon the interests affected to the absolute power of administrative officials.

FN9. Supra note 5.

[5] Not only the principle of judicial review, but the whole scheme of American government, reflects an institutionalized mistrust of any such unchecked and unbalanced power over essential liberties. That mistrust does not depend on an assumption of inveterate venality or incompetence on the part of men in power, be they Presidents, legislators, administrators, judges, or doctors. It is not doctors' nature, but human nature, which benefits from the prospect and the fact of supervision. Indeed, the limited scope of judicial review of hospital decisions necessarily assumes the good faith and professional expertise of the hospital staff. Judicial review is only a safety catch against the fallibility of the best of men; and not the least of ***622 **40** its services is to spur them to double-check their own performance and provide them with a checklist by which they may readily do so.

The hearing below dealt almost exclusively with the single issue of appellant's potential dangerousness to others. The question, however, was not whether appellant was dangerous enough to require continued confinement, but whether he could properly be confined under conditions of maximum security detention. That question appears to involve other considerations besides his abstract potential dangerousness.

A. Consequences of Confinement in John Howard Pavilion.

[6] A mere request for a change of dormitories or for transfer between substantially similar wards could not support a petition for habeas corpus. A patient seeking review of his placement within the hospital must show at least that there are substantial differences in the conditions of confinement between where he is and where he wants to be. We need not decide whether or when such a showing could be made on a request for transfer from a service other than John Howard. Appellant's petition alleges in substance only that he has a right to be kept anywhere but in John Howard, and the necessary premise of such a petition is that John Howard is a unique service at Saint Elizabeths.

It appears that John Howard houses principally the so-called 'criminally insane.'[FN10] Such facilities have, in the past, notoriously rivalled maximum security prisons in the pervasiveness of their restraint upon liberty and the totality of their impositions upon dignity. The predecessor to John Howard Pavilion at Saint Elizabeths was described to this court as

> FN10. This designation refers to persons who have not been civilly committed but are rather confined as a result of criminal proceedings, either because they are incompetent to stand trial for pending charges or because they have been found not guilty by reason of insanity of a criminal offense. In 1963, John Howard's population was comprised of 'essentially all prisoner patients.' Hearings on the Administration and Operation of Saint Elizabeths Hospital before a Subcommittee of the House Committee on Education and Labor, (hereinafter '1964 Hearings') 88th Cong., 1st Sess. 65 (1964) (testimony of Dr. Dale C. Cameron, Superintendent of Saint Elizabeths Hospital). Of the 380 patients then in John Howard, only thirty were 'civil' patients (of which the hospital then housed some 6000), and those few were there because they were 'difficult and assaultive.' Id., 48.
>
> A more recent description of John Howard, with recommendations for its improvement, is contained in the report of an ad hoc committee of the National Institute of Mental Health ('The Evaluation of Security Programs and Facilities at Saint Elizabeths Hospital,' November 1968), portions of which are attached as an Appendix to this opinion.

a place for the confinement of the violent, criminal, hopeless insane, instead of * * * a place designed and operated for the treatment of the mentally ill. * * *[FN11]

> FN11. Miller v. Overholser, supra note 2, 92 U.S.App.D.C. at 116, 206 F.2d at 419. In Baxstrom v. Herold, 383 U.S. 107, 113, 86 S.Ct. 760, 15 L.Ed.2d 620 (1964), the Supreme Court took note of the 'striking' dissimilarities between Dannemora- the New York hospital for the 'cri-

minally insane'- and New York's 'civil' hospitals.

Of the present John Howard, appellant says in his brief:

John Howard is physically a prison. Its inmates are locked in; they have no ground privileges, their outdoor activities are conducted in a walled-in yard identical to a prison yard; their visitors may be received only for a few minutes, and then in a prison-like visiting room; and they are denied access to many of the recreational and educational facilities available to other patients at the hospital.

Thus, there is reason to believe that confinement in John Howard is not normally contemplated for civilly committed patients***623 **41** and entails extraordinary deprivations of liberty and dignity which make it, in effect, more penitentiary than mental hospital, even if it also provides some treatment.

[7] In entertaining appellant's petition, the District Court evidently proceeded on the reasonable assumption that, as the designation 'maximum security service' implies, confinement in John Howard does in fact impose substantially greater deprivations than confinement anywhere else in the hospital. However, appellant made no record on this matter except to note that he was denied ground privileges. We do not dispute the District Court's assumption concerning the nature of John Howard. Indeed, our further observations concerning the inadequacy of the record rest on the same assumption. However, since Congress and the courts are only beginning to examine the operations of Saint Elizabeths,[FN12] it is desirable that the courts be fully informed by the parties. A court is better equipped to review a hospital decision that exceptional restrictions on liberty are justified if it knows with reasonable precision what those restrictions are.

FN12. See, e.g., Hearings before the Subcommittee on Constitutional Rights of the Senate Committee on the Judiciary on a Bill to Protect the Constitutional Rights of the Mentally Ill, 88th Cong., 1st Sess. 12 (1963); 1964 Hearings, supra note 10.

[8] The facts about the nature of John Howard Pavilion are not peculiarly within the knowledge of the hospital, and were properly part of appellant's case below. On remand, he may now develop those facts for the record. If they are as he now says, then before denying appellant's request for transfer the hospital was obliged both to canvass less restrictive alternatives and, finding none, to consider the effect of such extreme deprivations on his treatment.

B. The Availability of Less Restrictive Alternatives.

[9][10][11][12] In Lake v. Cameron,[FN13] we held that in reviewing on habeas corpus a civilly committed patient's confinement in a mental hospital, the court should satisfy itself that no less onerous disposition would serve the purpose of the commitment. We thought this principle was implicit in the provisions of the District of Columbia Hospitalization of the Mentally Ill Act[FN14] authorizing the committing court to consider alternatives to hospitalization[FN15] and evincing a profound congressional concern for the liberties of the mentally ill. The new legislation apart, however, the principle of the least restrictive alternative consistent with the legitimate purposes of a commitment inheres in the very nature of civil commitment, which entails an extraordinary deprivation of liberty justifiable only when the respondent is 'mentally ill to the extent that he is likely to injure himself or other persons if allowed to remain at liberty.'[FN16] A statute sanctioning such a drastic curtailment of the rights of citizens must be narrowly, even grudgingly, construed in order to avoid deprivations of liberty without due process of law.[FN17]

FN13. 124 U.S.App.D.C. 264, 364 F.2d 657 (1966).

FN14. D.C.Code §§ 21-501 to 21-591 (1967).

FN15. D.C.Code § 21-545(b)(1967).

FN16. D.C.Code § 21-544 (1967).

FN17. Cf. Aptheker v. Secretary of State, 378 U.S. 500, 514, 84 S.Ct. 1659, 12 L.Ed.2d 992 (1964). It is an axiom of due process that

> even though the governmental purpose be legitimate and substantial, that purpose cannot be pursued by means that broadly stifle fundamental personal liberties when the end can be more narrowly achieved. The breadth of legislative abridgment must be viewed in the light of less drastic means for achieving the same basic purpose.

Shelton v. Tucker, 364 U.S. 479, 488, 81 S.Ct.

247, 252, 5 L.Ed.2d 231 (1960).

[13] The principle of the least restrictive alternative is equally applicable to alternate dispositions within a mental hospital. It makes little sense to guard ***624 **42** zealously against the possibility of unwarranted deprivations prior to hospitalization, only to abandon the watch once the patient disappears behind hospital doors. The range of possible dispositions of a mentally ill person within a hospital, from maximum security to outpatient status, is almost as wide as that of dispositions without. The commitment statute no more authorizes unnecessary restrictions within the former range than it does within the latter.

[14] The only distinctive feature of intra-hospital dispositions suggesting that they might be subject to a different rule is the fact that they involve considerations of hospital administration which are entrusted, in the first instance, to hospital authorities. Efficient hospital administration does require the courts to accord the administrators much broader discretion in determining the appropriateness of an intra-hospital disposition than in assaying the need for hospitalization ab initio. But this recognition of the hospital's primary responsibility, reflected in the narrow scope of judicial review under Tribby v. Cameron,[FN18] does not detract from the principle that additional restrictions beyond those necessarily entailed by hospitalization are as much in need of justification as any other deprivations of liberty; nor does it preclude all judicial review of internal decisions.

FN18. Supra note 5.

In the 1964 Act,[FN19] Congress scotched any notion that a public mental hospital is a temple into which mere mortals are not allowed to gaze. It marched rudely into the very sanctum sanctorum, where purely medical decisions are made, and established a judicially cognizable right to treatment. [FN20] It instructed the hospital to keep detailed records of all treatment administered, and to make them available to the patient's personal physician or attorney upon his request.[FN21] It provided for periodic reconsideration-by the hospital, by outside physicians, and by the courts- of the need for hospitalization itself.[FN22] It even prescribed in detail when and how the hospital might control incoming mail and other communications to a patient,[FN23] and it felt compelled to affirm expressly that the hospital still retains the right to make 'reasonable rules regarding visitation hours and the use of telephone and telegraph facilities.'[FN24] These pervasive limitations on the hospital's discretion to run its own shop negate any intent to repeal in the same statutory breath the ordinary presumption in favor of liberty or to insulate the hospital from all accountability for its protection of that right.

FN19. Supra note 14.

FN20. D.C.Code § 21-562 (1967); Rouse v. Cameron, supra note 8.

FN21. Id.

FN22. D.C.Code §§ 21-546, 21-547, 21-548 (1967).

FN23. D.C.Code § 21-561(a) and (b) (1967).

FN24. D.C.Code § 21-561(c) (1967).

[15] Thus, before a court can determine that the hospital's decision to confine a patient in a maximum security ward is, within its broad discretion, 'permissible and reasonable * * * in view of the relevant information,' [FN25] it must be able to conclude that the hospital has considered and found inadequate all relevant alternative dispositions within the hospital. Moreover, as we noted in Lake v. Cameron, the state has the obligation

FN25. Tribby v. Cameron, supra note 6.

to bear the burden of exploration of possible alternatives an indigent cannot bear * * *. Appellant may not be required to carry the burden of showing the availability of alternatives. Proceedings involving the care and treatment of the mentally ill are not strictly adversary proceedings. Moreover, appellant plainly does not know and lacks the means to ascertain what alternatives, if any, are available, but the government knows or has the means of knowing and ***625 **43** should therefore assist the court in acquiring such information. [FN26]

FN26. Supra, note 13, 124 U.S.App.D.C. at 267-268, 364 F.2d at 660-661.

The duty to explore intra-hospital alternatives to maximum security confinement can hardly be assailed as an intolerable burden on the administrators. Professionally, a doctor owes even a voluntary patient a careful canvass of alternatives to drastic treatment. He owes at least as much to a patient confined for treatment against his will.

The instant record is devoid of evidence that an evaluation of alternatives was made. At most it shows that the hospital thought appellant should be closely supervised for the protection of others. In ten years, he has never been violent or unruly.[FN27] Under full medication, he has not even expressed 'murderous thoughts,' and medication may of course be administered outside a maximum security ward. Appellant asserts that the hospital has other security wards, not imposing the extreme deprivations of the John Howard Pavilion, in which supervision can be provided. These wards may not be suitable for appellant, but the record does not disclose a reasoned hospital conclusion that they are not. On remand, the hospital will have an opportunity to show that it has considered alternative security accommodations for appellant and to explain why it finds them inadequate.

FN27. Indeed, appellant's hospital records show that he has regularly been permitted to work with large knives and other sharp instruments in the hospital broom shop.

C. Relation of Confinement to Treatment.

[16] Under present law, the principal justification for involuntary hospitalization is the prospect of treatment, and a failure to provide treatment would present 'serious constitutional questions.'[FN28] Accordingly, Congress has provided that

FN28. Rouse v. Cameron, 125 U.S.App.D.C. 366, 370, 373 F.2d 451, 455 (1967).

A person hospitalized in a public hospital for a mental illness shall, during his hospitalization, be entitled to medical and psychiatric care and treatment. [FN29]

FN29. D.C.Code § 21-562 (1967).

Under that provision, the hospital may be required to show that it is making 'a bona fide effort' to cure or improve the patient, and that the treatment provided 'is suited to his particular needs.'[FN30]

FN30. Rouse v. Cameron, supra note 28, 125 U.S.App.D.C. at 371, 373 F.2d at 456.

[17] Appellant does not contend that he has been denied his statutory right to treatment. But since treatment is an essential justifying purpose of any civil commitment, a 'permissible * * * decision' to confine a patient under maximal restrictions cannot be made without consideration of its therapeutic consequences. That the conditions of confinement may significantly enhance or retard a given patient's recovery is not open to doubt.

The milieu of the hospital, if properly structured, is * * * a constructive force for getting well; if improperly constructed it is a force for remaining sick.[FN31]

FN31. 1964 Hearings, supra note 10, 23-24 (Testimony of Superintendent Dr. Dale C. Cameron).

It may not 'be assumed that confinement in a hospital (or in its maximum security ward) is beneficial 'environmental therapy' for all.'[FN32] Even if in some cases maximum security confinement is positively therapeutic, such cases may be exceptional. Whatever the method of treatment applied, the ultimate goal of therapy for persons involuntarily hospitalized must be to shore up their capacity to function satisfactorily in the unrestricted environment of the outside world. It appears that this goal is unlikely to be achieved if the patient has little or no opportunity for controlled ***626 **44** experiments with freedom. Accordingly, civilly committed patients are rarely sent to John Howard Pavilion at all,[FN33] and the typical treatment program at Saint Elizabeths for those few who are housed there envisages transfer into a progressively less restrictive regime. [FN34]

FN32. Rouse v. Cameron, supra note 28, 125 U.S.App.D.C. at 371, 373 F.2d at 456.

FN33. See note 10, supra.

FN34. 1964 Hearings, supra note 10, 22, 49 (Testimony of Superintendent Dr. Dale C. Cameron).

It may be that appellant benefits therapeutically from maximum security confinement, or that in his case such confinement is therapeutically neutral, or that, though an obstacle to the most rapid progress, its detrimental effects on his treatment are outweighed by the need to protect other patients or to prevent his escape. Any of these possibilities could adequately explain the hospital's decision, but the record contains no hint as to which one, if any, explains it in fact. For all that appears, the hospital may

have considered only appellant's dangerousness and ignored his treatment needs. Such a one-sided balance would inevitably resolve all doubts against greater freedom. Moreover, since a proper balance often involves comparative evaluation of unquantifiable variables, intelligent judicial review requires at least a reasoned hospital analysis of any conflict among them. Because the record contains no such analysis, it provides no assurance that the hospital considered 'the relevant information.'

For the same reasons that he cannot be required to establish the availability of less restrictive alternatives, appellant cannot reasonably be obliged to bear the burden of attacking the hospital decision on medical grounds in vacuo. On remand, the hospital should explain either why maximum security confinement does not impair appellant's prospects for the promptest rehabilitation, or that he is so dangerous as to require such impairment.

D. Appellant's Hospital Records.

Appellant has sought leave to file his hospital records with this court. In D.C.Code § 21-562, Congress expressly provided that

The administrator of each public hospital shall keep records detailing all medical and psychiatric care and treatment received by a person hospitalized for a mental illness and the records shall be made available, upon that person's written authorization, to his attorney or personal physician. The records shall be preserved by the administrator until the person has been discharged from the hospital.

Plainly, appellant's attorney could have introduced these records into evidence. His failure to do so might not be cause for a remand if the record were otherwise adequate, but the fact that the District Court had to conduct its review without benefit of them is an additional reason for requiring further consideration.

[18] Even if appellant had deliberately chosen not to introduce his records, however, the hospital could have used them to explain its decision. That it may not disclose them to outside parties without the patient's consent does not imply that it is forbidden to introduce them in court where they are relevant to the patient's contentions on habeas corpus. One plain purpose of the statutory records requirement is to facilitate judicial review of the care and treatment accorded the patient.[FN35] A petitioner may not use the confidentiality of his records as a sword to deprive the court of the enlightenment the records requirement was designed to give it. The records submitted on this appeal are not notably informative, but there may well be other records, and even the limited material now available throws some light on the hospital's thinking.

FN35. See Rouse v. Cameron, supra note 28, 125 U.S.App.D.C. at 370-371, 373 F.2d at 455-456.

In view of its prerogative to introduce such records, the hospital's obligation to show that a challenged decision ***627 **45** reflects a reasoned consideration of the relevant information should not ordinarily be burdensome for either the hospital or the courts. Even if the records are inadequate in the present case, full records kept in the spirit of the statutory requirement would usually be sufficient in themselves to fulfill the hospital's evidentiary obligation. By articulating a plan of treatment and by explaining the basis for important decisions affecting the patient, they would fully inform the court at a glance. Incidentally, they would also enhance the integrity, reliability, and thoroughness of the hospital's own decision-making procedures. The bothersome incidental paperwork is a small price to pay for so many blessings. Besides, such paperwork is often bothersome precisely because the process of formal articulation forces busy administrators to confront problems and considerations their intuitive reactions might have overlooked.

As we suggested in Rouse v. Cameron,[FN36] if the hospital established internal procedures for reviewing its own decisions and redressing grievances it could largely eliminate any occasion for judicial challenges, and any residual litigation could be readily disposed of on summary judgment. Expert administrative agencies of the federal government which deal primarily with property, not with lives and liberties, follow such procedures as a matter of course, in order to maintain consistent policies and to correct their own errors. Largely because they do so, the courts rarely disturb their decisions for other than procedural infirmities.

FN36. Id. at 371 n. 22, 373 F.2d at 456 n. 22.

IV

In these respects, then, the record is inadequate to show whether the hospital made a 'permissible decision' to keep appellant in John Howard Pavilion 'in view of the relevant information.'[FN37] Accordingly, we do not consider whether that decision is, on the present record, 'reasonable

* * * within a broad range of discretion.' However, it may be useful to the parties and the court on remand to flag several troublesome issues raised by the record and by appellant's hospital dossier, which was not introduced below.

FN37. Tribby v. Cameron, supra note 6.

First, the considerations passed by in silence at the hearing below are all possible counterweights to the consideration of appellant's potential dangerousness. The danger feared in this case is not one lightly to be dismissed, and we do not suggest that it could never outweigh all other considerations. But as we recently made clear in Millard v. Harris,[FN38] 'dangerousness' is a many splendored thing. Unless muzzled by discriminating analysis, it is likely to weigh against nominally competing considerations the way a wolf weighs against a sheep in the same scales: even if the sheep is heavier when weighed separately, somehow the wolf always prevails when the two are weighed together. Keeping dangerousness on a taut leash is especially difficult where there is danger of murder, since the danger is admittedly grave and since its improbability, which theoretically discounts its gravity, is exceedingly difficult to quantify.

FN38. 132 U.S.App.D.C. 146, pp. 151-153, 406 F.2d 964, 969, 971 (1968).

Moreover, once a man has shown himself to be dangerous, it is all but impossible for him to prove the negative that he is no longer a menace. The specters of the murder appellant committed 35 years ago (expiated by a long jail sentence) and the murder he may have committed more than 10 years ago obviously haunt the hospital at the very thought of granting him the least measure of freedom within Saint Elizabeths. He asks for ground privileges after ten docile years under a regime consisting, according to the hospital files, of maximum security confinement, pink liquids, and a dozen brief psychiatric interviews; and the hospital worries about those ***628 **46** murders and the 'unpredictable consequences' which would ensue if he should ever have access to alcohol. Their concern is understandable and may well be fully justified. But for all that appears, the murders and the unpredictable consequences will still be there after twenty years or after fifty. Appellant was not convicted of the second murder, and his hospitalization is not to be tacitly converted into a life sentence to John Howard.

In these circumstances it is fair to ask the hospital how appellant can ever demonstrate his readiness for a less pervasive confinement: What evidence of improvement are they looking for? What is the prospect that they will ever find it? If, as may be, the hospital administrators think he will likely never be sufficiently purged of his dangerousness, then the reviewing court should at least have an opportunity to scrutinize the basis for such a counsel of despair. For the very reason that he is unlikely soon, if ever, to be released from the hospital, it is crucial to provide some check against his becoming a non-person, deprived of any rights to minimally rational treatment within the hospital because he murdered once and may have murdered again.

Second, there is some indication that the hospital denied transfer for reasons other than simple dangerousness. The hospital records suggest that appellant's request may have been initially deferred, not because he was inherently a bad risk, but because no space was available in other wards where he could be adequately supervised.[FN39] The hospital cannot, of course, create space it does not have, but if appellant is in John Howard merely faute de mieux, serious questions arise as to hospital priorities and constitutional and statutory rights.[FN40] Moreover, the hospital may have seized upon Dr. Weickhardt's change of heart as a sufficient reason not even to reconsider its postponed decision.[FN41] If so, Dr. Weickhardt's analysis of the episode involving the theft of appellant's money assumes disturbing importance. His explanation does not convincingly lay to rest the possibility either that appellant's request for transfer was denied as a disciplinary measure to enforce minor hospital rules, or else that the money episode served as a pretext under which other undisclosed interests could be served. The public, the court, the hospital, and not least the appellant, would profit greatly from a thorough ventilation of these matters and a careful attention to the legitimacy of the considerations which prove to have been crucial.

FN39. In deferring action on the original recommendation that appellant should be transferred, Acting Superintendent Harris wrote:

> All agree that his initial supervision (outside John Howard) must be very dependable for the first few months of his security reduction. At this moment there is no service available for his placement that can provide the needed close attention.

No mention of this consideration was made at

either of the court hearings, however.

FN40. See Rouse v. Cameron, supra note 28, 125 U.S.App.D.C. at 372-373, 373 F.2d at 457-458; Sas v. Maryland, 334 F.2d 506, 517 (4 Cir. 1964).

FN41. See note 1, supra.

V

Quite apart from the transfer issue, appellant now contends for the first time that his civil commitment in 1964 was fatally defective in numerous respects. He says he was denied his statutory right to an independent judicial evaluation of his mental condition and need for commitment, since the committing court had before it no information on which to predicate such an evaluation. He also says this defect amounts to a denial of due process. Furthermore, he alleges deprivations of the statutory right to a jury trial, the alleged right to a transcript of his pre-commitment hearing before the Mental Health Commission, and the constitutional right to effective representation of counsel.

***629 **47** [19] On their face, these contentions appear neither remote nor insubstantial. But at least some of them may turn on questions of fact which cannot be resolved in an appellate court. Moreover, orderly judicial procedure normally precludes raising on appeal issues not reasonably within the scope of the question presented by a petition for habeas corpus. There is no reason to consider an exception to this rule in the instant case.

The usual procedure would be simply to dismiss this aspect of the appeal, leaving appellant free to bring a new habeas corpus petition if he wishes. However, petitioner is an indigent with an I.Q. of 52. To place upon him the burden of preparing a new petition and obtaining appointment of a new attorney by the District Court seems an unwarranted hardship which would serve no ascertainable interest of judicial administration.[FN42] At oral argument in this court, it clearly appeared that the attorneys appointed for him on this appeal would be willing to continue to represent him on any remand. Accordingly, since there is to be a remand in any event, I would direct the District Court to consider these issues on an amended petition, as well as the transfer question.[FN43] But see Judge Fahy's position as to this in his opinion concurring specially.

FN42. Cf. Caplan v. Cameron, 125 U.S.App.D.C. 150, 369 F.2d 195 (1966); Dobson v. Cameron and Stultz v. Cameron, 127 U.S.App.D.C. 324, 383 F.2d 519 (1967).

FN43. If appellant decides to pursue these matters below, I think the District Court may permit him to amend his petition. If it declines to do so, he will of course be free to raise them by a new petition.

Remanded.

FAHY, Senior Circuit Judge (concurring specially):

I agree with Judge Bazelon that the case should be remanded for a fuller hearing, but I wish to state as now set forth my approach to the problem, albeit on the background of the more detailed discussion in the opinion of Judge Bazelon.

Deprivation of liberty by the government is authorized when consonant with due process of law and applicable statutory provisions; and when ordered the deprivation is subject to examination as to its validity by proceedings other than those by which the deprivation initially occurred. Usually this is by appeal from the judgment or order requiring the deprivation; but judicial inquiry in many instances is available also by habeas corpus proceedings. This is so where there has been a previous civil commitment to St. Elizabeths, as here. The validity of continued confinement of the committed person in the maximum security ward there, rather than in a less restrictive facility, may be questioned and decided. Miller v. Overholser, 92 U.S.App.D.C. 110, 115, 206 F.2d 415, 419; and see Lake v. Cameron, 124 U.S.App.D.C. 264, 364 F.2d 657 (en banc). When, however, the deprivation of liberty is based on the person's dangerousness to himself or others due to his mental condition, the degree of deprivation is not for the judiciary to pass upon except under a restraint consistent with the deep involvement of the medical discipline, that is, the discipline of those charged under the law with the administration of the institution. While the individual may bring the matter to court as a case or controversy under the Constitution, the court, in passing upon the validity of the deprivation of liberty, a judicial function, recognizes the responsibility the law places also upon those in charge of the institution. Thus, in Tribby v. Cameron, 126 U.S.App.D.C. 327, 379 F.2d 104, as pointed out by Judge Bazelon, the question was stated to be whether the administrator,

has made a permissible and reasonable decision in

view of the relevant information and within a broad range of discretion.

It was appropriate, therefore, on the pleadings in this case, appellant having been confined in the maximum security ***630 **48** ward for ten years, for the District Court to inquire whether appellant was being excessively deprived of liberty. The government does not contest this, as I understand, taking the position that the record supports appellant's continued detention in John Howard Pavilion or, if not, that a fuller hearing would so disclose. Our question, then, is whether the hearing in the District Court did explore the problem fully enough to enable the court to decide, not whether appellant's detention at St. Elizabeths is valid, which was not questioned in the District Court, but whether it should continue as at present in the John Howard Pavilion. As to this I agree to a remand for a fuller hearing, particularly with respect to possible alternative facilities with less restrictive deprivation of liberty. The hearing on the remand I think should bring the following into the record:

1. The reports regarding appellant required by law to be kept by the hospital;

2. The history of appellant and of his illness, including his present condition, the treatment he is receiving at the hospital, and the efficacy of the treatment;

3. A comparison of the John Howard Pavilion and the treatment there available with possible alternative facilities at St. Elizabeths and the treatment there available,[FN1] with an exploration of the differences in supervision and restrictions and the comparative therapeutic results likely to ensue;

> FN1. Though appellant makes no issue as to his treatment, intertwined with the evaluation of his present confinement is the consideration of appellant's general right to treatment. See Rouse v. Cameron, 125 U.S.App.D.C. 366, 373 F.2d 451; Ragsdale v. Overholser, 108 U.S.App.D.C. 308, 315, 281 F.2d 943, 950 (concurring opinion).

4. The conclusion or conclusions of the hospital authorities as to the nature of the confinement appellant should have, with the reasons therefor, reached in recognition that no greater deprivation of liberty should be had than is reasonably required for his safety and the safety of others, in determining which consideration should be given to the desirability of seeking improvement in appellant's condition.

The foregoing should not be considered as limiting the scope of the hearing if the parties or the court advance other data which the court in the exercise of a sound discretion deems admissible.[FN2]

> FN2. I hope the hospital itself will find itself able to establish internal procedures such as suggested in Rouse v. Cameron, supra note 1, repeated in Judge Bazelon's present opinion.

As to the burden of proof, my view is that when the appropriateness of a particular deprivation of liberty has been drawn in question by supporting evidence, its continued validity depends upon a showing, in the circumstances of appellant's confinement,[FN3] that within a broad range of discretion of the hospital authorities, exercised upon the basis of the relevant information, the deprivation is supported by substantial evidence and is reasonable.

> FN3. Compare Ragsdale v. Overholser, supra note 1 (concurring opinion).

As to the validity of appellant's original commitment, questioned for the first time on the appeal in this court, it is possible that on further consideration neither appellant nor counsel would desire to pursue this. I think our court should refrain from seeming to encourage its pursuit. It is a matter which I think should be left for the parties and the District Court in the light of such circumstances as might develop.

***631 **49** APPENDIX

Excerpts from

“THE EVALUATION OF SECURITY PROGRAMS AND FACILITIES AT SAINT ELIZABETHS HOSPITAL”

419 F.2d 617, 136 U.S.App.D.C. 35
(Cite as: 419 F.2d 617, 136 U.S.App.D.C. 35)

Report

by

AD HOC COMMITTEE FOR THE EVALUATION OF SECURITY PROGRAMS AND FACILITIES AT SAINT ELIZABETHS HOSPITAL

Committee Members:

Hege, John H., Sr., M.D., Chairman
Kenefick, Donald P., M.D.
McGarry, A. Louis, M.D.
Settle, Russell O., Sr., M.D.
Smith, Harvey L., PH.D.
Watson, Andrew S., M.D.
Weihofen, Henry, J.S.D.
Zubowicz, George, M.D.

Louis Jacobs, M.D.
Executive Secretary

National Institute of Mental Health
Chevy Chase, Maryland

November 1, 1968

(Emphasis in original.)

RECOMMENDATIONS AND FINDINGS

A. Recommendations

1. The practical aspects of the treatment of the so-called security patients in separate facilities and the need for it. * * * Few professionals count these people in their problems or among their concerns. Efforts should be made to bring all patients requiring security services under an administrative officer who shall have four assistants responsible for recruitment and training, research, treatment services and legal matters.

2. Modification of John Howard Pavilion. The Committee study would indicate that approximately one-half of the patients confined in the JHP could be adequately cared for in the less secure units within the Security section or in other parts of Saint Elizabeths Hospital.

5. Decentralization of Security Decisions. The Committee views the decision-making of the Security section, particularly as it relates to security issues, to be too centralized. Security (degree of restrictions) is an integral part of the treatment process. Therefore, it is recommended that these decisions be made as closely as possible to the area (wards) where the treatment process takes place, by the personnel responsible for the care of the patient.

6. Reduction of Inpatient Pretrial Examinations. Much staff time and bed space seems to be utilized unnecessarily in the performance of psychiatric examinations for the courts. To greatly reduce the number of patients admitted to the Security section for psychiatric examination the Committee recommends that:

a. A service be developed to conduct screening examinations on an outpatient***632 **50** basis by the comprehensive community mental health centers.

b. Admission to the Security service of Saint Elizabeths Hospital of only those patients requiring more comprehensive psychiatric evaluations or who are actually psychotic.

c. Place those admitted to the Hospital in the appropriate custody level of housing.

d. Develop a jail-located psychiatric service to screen misdemeanants (optional for civil commitment whenever possible).

7. Improved Aftercare Service. * * * The Committee recommends that an effective aftercare service be developed through clinics and mental health services, and social workers on the staff of the Hospital itself.

10. Use of All Hospital Services. Integration of clinical services should be accomplished to the end that all treatment modalities within Saint Elizabeths Hospital will be available for the patients requiring security services.

11. Program Goal. The Committee recommends that the long range goal should be the transition of patients committed upon acquittal of criminal charges by reason of insanity to the same status and treatment as other patients in the general hospital wards. So far as possible the same should be true of persons committed because they are mentally incompetent to stand trial.

B. Findings of the Committee

The National Institute of Mental Health is responsible for the implementation of the treatment program at Saint Elizabeths Hospital. This is a 7,000 bed federal mental hospital of which 700 beds are currently designated as a Security section. The study of this Committee concerns evaluation and programming as these relate to this section of the Hospital.

1. Security Facilities. The section designated for Security currently consists of three divisions: the John Howard Division, in a maximum security building with 395 beds; the West Side Division (in the Center Building), with 422 beds; and the Cruvant Division with 123 beds.

a. John Howard Division is occupied by criminal proceedings patients which include those committed for pretrial examinations, not guilty by reason of insanity, prisoners from the D. C. Department of Corrections and the Federal Bureau of Prisons, those found to be incompetent to stand trial and those committed under the sexual psychopath laws. As a general practice those male criminal proceedings patients involved in felonies are treated in the John Howard Division. There are a number of potentially dangerous civil patients treated here also.

b. Of the 422 patients of the West Side Division approximately 150 are civil commitments transferred from other sections of Saint Elizabeths Hospital to this area because of peculiar management problems and the need for more security. The remaining 275 patients in this building are misdemeanant criminal proceedings patients committed for pretrial examination, not guilty by reason of insanity, incompetent to stand trial and sexual ‘psychopaths.’ * * *

c. The Cruvant Division is composed of four wards, three of which are occupied almost exclusively by female criminal proceedings patients. * * * and there are some sexual psychopaths as well as potentially dangerous civil patients. One ward is occupied by a small group of male patients who have been transferred from John Howard Division into the terminal phases of treatment involving minimal security prior to release into the community.

2. Major Issues for Staff. * * * The values of the court-prison system and those of the Hospital conflict in an uneasy balance. There is a confused definition of the patients as either ‘prisoners' or ‘patients.’ The contingencies of each value system trammel up the tasks of the others. The Hospital staff does not seem to have optimal communication with the courts it serves or a sufficiently***633 **51** knowledgeable and critical understanding of the legal principles it helps to administer. * *

A second major concern of the staff is the lack of space and facilities to implement treatment involving the concept of the therapeutic milieu or therapeutic community at a satisfactory level. The Committee saw evidence which validated this opinion; for example, the space in John Howard Division is largely occupied by patients, leaving inadequate space for adjunctive therapy.

A third major concern of the staff is an insufficient number of hospital personnel in all categories. For example, as related to professional personnel, the Security sec-

tion finds it most difficult to have psychiatric residents from the training program of Saint Elizabeths Hospital rotated through the Security sections.

3. Semiautonomy of Security Section. The security facilities seem to be islands of autonomy, hardly linked to each other and markedly shielded from the rest of the Hospital. They hardly share each other's resources and seem deprived from sharing those from the Hospital at large. * * * A semiautonomous status of security services would facilitate implementation of those matters largely peculiar to the section, e.g., relationships to law enforcement agencies and the courts. Integration of clinical services should be accomplished to the end that all treatment modalities within Saint Elizabeths Hospital will likewise be available for the security patients.

The Committee believes that the criminal behavior of the mentally ill is simply another form (out of many forms) of deviant behavior characteristic of severe mental illness.

As certain forms of mental illness can best be treated in the hospital setting the Committee recommends that the long range direction of the Saint Elizabeths Hospital program should be towards development of a modern psychiatric hospital program in which all patients can freely participate regardless of the type of deviant behavior they have manifested.

In other words, the separation of so-called ‘criminally insane,’ in a special unit separate and apart from the rest of the patient population at Saint Elizabeths Hospital, should be considered as a temporary and transitional measure which eventually will lead towards complete integration of both groups of patients within a uniform and therapeutic hospital program.

4. Staff Organization. A more integrated continuum of care and record keeping is necessary for the security units. It is recommended that all Security services be placed under a chief administrative officer charged with the responsibility of coordinating administrative and clinical functions within the section. He should have at least four professional assistants, one devoted to recruitment and training, one to research, one an attorney devoted to relationships with the courts and consultation for the professional staff of the three units, and one concerned with treatment services.

5. Legal Rights of Patients. A special assistant to the chief administrative officer should be a legal officer who would have the function of protecting the legal rights of patients, informing them what their legal rights are, and checking as to whether these rights are being observed; and to act as their spokesman in making complaints. To carry out these functions without constraint, this legal officer should not be a part of the Hospital staff but should be autonomous. These services could be obtained by contract with private law firms or with the law departments of the academic community.

6. Treatment. The present treatment program in the Security sections is better than the treatment provided in many such institutions. This is due to the dedication of a limited number of professional***634 **52** staff laboring under many disadvantageous circumstances. The John Howard Pavilion needs to make its environment more ‘livable’ and less prison-like. There is too much ‘sitting around’ on the wards at the present time. Adjunctive therapy should be greatly expanded including academic education, vocational training and rehabilitation, religious instruction, recreation, arts, music, etc. All adjunctive treatment must be related to therapeutic goals and not be merely time fillers. While it is amply clear that individuals in the maximum Security unit now suffer from massive social deprivations of all sorts, merely supplying them with socializing experience is no substitute for interpreted experience which will modify personality operations. Extensive development of these resources should only be carried out in the context of their explicit utilization for treatment.

Too often, the law and the legal professional seem to focus their concern on the number of escapes, the quality and quantity of controls, sufficient length of confinement, etc., to the exclusion of therapeutic considerations.

Recent opinions from the Court of Appeals have explicitly stated that a person committed for treatment must receive treatment or be discharged. Medically adequate treatment is that which at least does not worsen the condition and which either limits the extension of the disease process, or, ideally, eliminates the pathologicial situation. It is carried out with skill and competency commensurate with the standards of the community, and in concurrence with the implied or explicit contractual agreement between the parties. * * * The balance between dangerousness and treatability is now demanded by the law of the District of Columbia. It is a dynamic type of question and it may not be met by any absolute and categorical criteria. To make the balanced judgments regarding these two questions which have both medical and legal implications, is a task

for persons highly trained in both the medical and legal issues involved.

The Committee is not cognizant of the data which would establish the minimal number of clinical and other personnel which would qualify as adequate at the security facilities at Saint Elizabeths Hospital. We would stress that quality is a more important consideration than quantity with respect to the adequacy of treatment. We would observe, however, that in comparison to similar institutions the number of personnel attached to the Security division, particularly in the social work and attendant categories, ranks low.

Medically adequate treatment itself is probably going to have to be reassessed in the mental hospital. Programming should proceed on the assumption that the institution will be a hospital and will treat mentally ill persons. It is true that criminally committed patients are more likely to be dangerous than most of those civilly committed; and special precautions and procedures will continue to be required for patients who are dangerous to others or to themselves. Suffice it to say that in addition to the modalities used in the care of the mentally ill in general psychiatric hospitals, there are available special methods and techniques which have proved effective in security settings. There should be combined the best features of a quality ‘corrections' approach and mental hospital program.

7. Individual Treatment Plan. While we have not presumed to establish generalized clinical positions which might or might not be appropriate for a particular patient, we would affirm that:

a. There should be a recorded assessment of the pathology and assets of the individual.

b. There should be a recorded treatment plan.

c. The treatment plan should be implemented in good faith within the limits of available resources.

***635 **53** d. There should be a periodic recorded assessment of treatment progress or the lack of it.

e. Significant modifications to the treatment plan and their rationale should be recorded.

f. Where available resources fall below the standards acceptable to the individual clinician, he should communicate the realistic needs of the situation to proper authorities.

8. Degrees of Security. As has been observed in other mental hospitals, in the practice concerning the housing of patients committed by the criminal courts, it seems to be assumed that a court order committing a person for criminal purposes (pretrial examination, hospitalization of those found incompetent to stand trial, and of those found not guilty by reason of insanity) necessarily means that such patients be kept under maximum security. The court order does not in fact say this. It merely orders the person ‘* * * committed to * * * the mental hospital designated by the court * * *’ nor is there any reason to read a special security requirement into the order. Patients so committed are as fully subject to the Hospital's administrative discretion as to where to house them as are civilly committed persons. As with the civilly committed, the Hospital has the duty of determining whether the individual person is in fact dangerous and in need of greater restraint than others, but there is no reason for the assumption that, merely because the patient comes to the Hospital by way of commitment from the criminal courts, as distinguished from the civil, he must ipso facto be placed in maximum security, without the diagnosis or prognosis of actual dangerousness. At the present time it is primarily the Registrar who makes the decision that a person should go to maximum security. The determination is in fact a mechanical one: new admissions from the U.S. District Court are assigned to the John Howard Division; misdemeanants from the Court of General Sessions are committed to the West Side Division. The clinical directors, however, of these two divisions may, and do, exchange patients, if after a period of observation these are determined to be in need of either greater or lesser security.

It appears that security is both overused and underused at the Hospital. It is estimated that one half of the men at JHP do not require maximum security. On the other hand, the escapes from Cruvant Division and the West Side Division are astonishingly high (President's Commission on Crime in the District of Columbia). It seems clear that there is excessive security at one end of the spectrum and little or no security elsewhere- an all or none situation. It would seem clear that medium security facilities are called for- an intermediate and graduated step system. * * *

Reevaluation of the current ‘patient load’ in the Howard unit would permit a sizable number of these people to be treated in a less secure or even in an open

setting. The security of those remaining should be transferred from the inside to the periphery. With few exceptions, whatever controls are needed on the inside should be incorporated in therapeutic measures inherent in the total treatment program.

Any rational approach to the problem must pay cognizance to the history of this institution and its current physical plant. The JHP, built to provide security which could not be surpassed even by most prisons, automatically forces upon the staff a form of treatment that is less than desirable. However, it represents such a large number of beds it will probably have to be used in the immediate future. Extensive modification of the physical structure will be required to make it optimally effective within its current character.

10. Decisions Decentralized. At the present time the decision-making, particularly as it relates to security issues (transfers, releases, ground privileges, etc.), is too centralized. In a mental ***636 **54** hospital, security (degree of restrictions) is an integral part of the treatment process. Therefore, decisions about restrictions should be made by the personnel who regulate the area (wards) where treatment processes (milieu therapy) take place. Milieu therapy should provide the opportunity of training the emotionally disturbed through planned management of the structure and processes of the situation in which they live.

11. Care for Conditionally Released. A certain number of the criminally committed patients is conditionally released. There is no very effective follow-up or aftercare, either of the conditionally released or of those finally discharged. * * * The effective way is to bring the aftercare service into the neighborhood through the clinics and mental health services, or through social workers on the staff of the Hospital itself who can go to the patient's home and into the neighborhood. This means an extensive development and enlargement of social services.

15. Hospital-Court Relationships. * * * As legal personnel begin to learn about mental health concepts, they can build more effective legal procedures to cope with obedience, prevent the preventable, and at least carry out their activities with people in more effective ways. Similarly, the ‘legal education’ of Hospital personnel should be developed so that they know exactly what social values are built into legal concepts with which they deal. Such relevant roles as ‘expert witness' should be clearly understandable by mental health persons. Psychiatrists and other behavioral staff should be able to go into court understanding completely what their function is to be so that they may carry it out without inappropriate anxieties and with a sense of appropriate participation.

18. Community Tolerance. Every mental hospital, but particularly one with a security unit, must be aware of and sensitive to the community level of tolerance for its programs and patients. As the community's tolerance greatly influences formulation of treatment programs, the Hospital, through a public education program, must endeavor to improve the degree of its acceptance by the community. Development of as many as possible hospital-community contacts will help not only the intramural programs but also open doors to a much more extensive and effective posthospitalization program for discharged patients.

Covington v. Harris
419 F.2d 617, 136 U.S.App.D.C. 35

END OF DOCUMENT

Supreme Court of the United States
Charles DEMORE, District Director, San Francisco District of Immigration and Naturalization Service, et al., Petitioners,
v.
Hyung Joon KIM.

No. 01-1491.
Argued Jan. 15, 2003.
Decided April 29, 2003.

Lawful permanent resident alien filed habeas petition challenging no-bail provision of Immigration and Nationality Act (INA), pursuant to which he had been held for six months during pendency of removal proceedings against him. The United States District Court for the Northern District of California, Susan Y. Illston, J., entered order holding statute unconstitutional on its face and directing the Immigration and Naturalization Service (INS) to hold bail hearing. Government appealed. The United States Court of Appeals for the Ninth Circuit, 276 F.3d 523, affirmed. Certiorari was granted. The Supreme Court, Chief Justice Rehnquist, held that: (1) provision of INA limiting judicial review of Attorney General's discretionary judgments regarding detention or release of any alien did not deprive Supreme Court of jurisdiction to grant habeas relief to alien, and (2) Congress, justifiably concerned that deportable criminal aliens who were not detained would continue to engage in crime and would fail to appear for their removal hearings in large numbers, could require that such aliens be detained for brief period necessary for their removal proceedings, without providing individualized determination as to whether aliens presented flight risks, and thus detention of alien, pursuant to no-bail provision of INA, did not violate his due process rights under the Fifth Amendment; abrogating *Patel v. Zemski*, 275 F.3d 299, *Welch v. Ashcroft*, 293 F.3d 213, *Hoang v. Comfort*, 282 F.3d 1247.

Reversed.

Justice Kennedy filed concurring opinion.

Justice O'Connor filed opinion concurring in part, and concurring in judgment, in which Justice Scalia and Justice Thomas joined.

Justice Souter filed opinion concurring in part, and dissenting in part, in which Justice Stevens and Justice Ginsburg joined.

Justice Breyer filed opinion concurring in part, and dissenting in part.

West Codenotes
Negative Treatment Reconsidered 8 U.S.C.A. § 1226(c)

*****1710** Syllabus* FN*

FN* The syllabus constitutes no part of the opinion of the Court but has been prepared by the Reporter of Decisions for the convenience of the reader. See *United States v. Detroit Timber & Lumber Co.*, 200 U.S. 321, 337, 26 S.Ct. 282, 50 L.Ed. 499.

Under the Immigration and Nationality Act, 8 U.S.C. § 1226(c), "[t]he Attorney General shall take into custody any alien who" is removable from this country because he has been convicted of one of a specified set of crimes, including an "aggravated felony." After respondent, a lawful permanent resident alien, was convicted in state court of first-degree burglary and, later, of "petty theft with priors," the Immigration and Naturalization Service (INS) charged him with being deportable from the United States in light of these convictions, and detained him pending his removal hearing. Without disputing the validity of his convictions or the INS' conclusion that he is deportable and therefore subject to mandatory detention under § 1226(c), respondent filed a habeas corpus action challenging § 1226(c) on the ground that his detention thereunder violated due process because the INS had made no determination that he posed either a danger to society or a flight risk. The District Court agreed and granted respondent's petition subject to the INS' prompt undertaking of an individualized bond hearing, after which respondent was released on bond. In affirming, the Ninth Circuit held that § 1226(c) violates substantive due process as applied to respondent because he is a lawful permanent resident, the most favored category of aliens. The court rejected the Government's two principal justifications for mandatory detention under § 1226(c), discounting the

first-ensuring the presence of criminal aliens at their removal proceedings-upon finding that not all aliens detained pursuant to § 1226(c) would ultimately be deported, and discounting the second-protecting the public from dangerous criminal aliens-on the grounds that the aggravated felony classification triggering respondent's detention included crimes (such as respondent's) that the court did not consider "egregious" or otherwise sufficiently dangerous to the public to necessitate mandatory detention. Relying on *Zadvydas v. Davis*, 533 U.S. 678, 121 S.Ct. 2491, 150 L.Ed.2d 653, the court concluded that the INS had not provided a justification for no-bail civil detention sufficient to overcome a permanent resident alien's liberty interest.

***511** *Held:*

1. Section 1226(e)-which states that "[t]he Attorney General's discretionary judgment regarding the application of this section shall not be subject to review" and that "[n]o court may set aside any action or decision by the Attorney General under this section regarding the detention or release of any alien"-does not deprive the federal courts of jurisdiction to grant habeas relief to aliens challenging their detention under § 1226(c). Respondent does not challenge a "discretionary judgment" by the Attorney General or a "decision" that the Attorney General has made regarding his detention or release. Rather, respondent challenges the statutory framework that permits his detention without bail. Where Congress intends to preclude judicial review of constitutional claims its intent to do so must be clear. *E.g.*, *Webster v. Doe*, 486 U.S. 592, 603, 108 S.Ct. 2047, 100 L.Ed.2d 632. And, where a provision precluding review is claimed to bar habeas review, the Court requires a particularly clear statement that such is Congress' intent. See ****1711***INS v. St. Cyr*, 533 U.S. 289, 308-309, 298, 327, 121 S.Ct. 2271, 150 L.Ed.2d 347. Section 1226(e) contains no explicit provision barring habeas review. Pp. 1713-1714.

2. Congress, justifiably concerned with evidence that deportable criminal aliens who are not detained continue to engage in crime and fail to appear for their removal hearings in large numbers, may require that persons such as respondent be detained for the brief period necessary for their removal proceedings. In the exercise of its broad power over naturalization and immigration, Congress regularly makes rules that would be unacceptable if applied to citizens. *Mathews v. Diaz*, 426 U.S. 67, 79-80, 96 S.Ct. 1883, 48 L.Ed.2d 478. Although the Fifth Amendment entitles aliens to due process in deportation proceedings, *Reno v. Flores*, 507 U.S. 292, 306, 113 S.Ct. 1439, 123 L.Ed.2d 1, detention during such proceedings is a constitutionally valid aspect of the process, *e.g.*, *Wong Wing v. United States*, 163 U.S. 228, 235, 16 S.Ct. 977, 41 L.Ed. 140, even where, as here, aliens challenge their detention on the grounds that there has been no finding that they are unlikely to appear for their deportation proceedings, *Carlson v. Landon*, 342 U.S. 524, 538, 72 S.Ct. 525, 96 L.Ed. 547. The INS detention of respondent, a criminal alien who has conceded that he is deportable, for the limited period of his removal proceedings, is governed by these cases. Respondent argues unpersuasively that the § 1226(c) detention policy violates due process under *Zadvydas*, 533 U.S., at 699, 121 S.Ct. 2491, in which the Court held that § 1231(a)(6) authorizes continued detention of an alien subject to a final removal order beyond that section's 90-day removal period for only such time as is reasonably necessary to secure the removal. *Zadvydas* is materially different from the present case in two respects. First, the aliens there challenging their detention following final deportation orders were ones for whom removal was "no longer practically attainable," such that their detention ***512** did not serve its purported immigration purpose. *Id.*, at 690, 121 S.Ct. 2491. In contrast, because the statutory provision at issue in this case governs detention of deportable criminal aliens *pending their removal proceedings*, the detention necessarily serves the purpose of preventing the aliens from fleeing prior to or during such proceedings. Second, while the period of detention at issue in *Zadvydas* was "indefinite" and "potentially permanent," *id.*, at 690-691, 121 S.Ct. 2491, the record shows that § 1226(c) detention not only has a definite termination point, but lasts, in the majority of cases, for less than the 90 days the Court considered presumptively valid in *Zadvydas*. Pp. 1714-1722.

***513** Chief Justice REHNQUIST delivered the opinion of the Court.

Section 236(c) of the Immigration and Nationality Act, 66 Stat. 200, as amended, 110 Stat. 3009-585, 8 U.S.C. § 1226(c), provides that "[t]he Attorney General shall take into custody any alien who" is removable from this country because he has been convicted of one of a specified set of crimes. Respondent is a citizen of the Republic of South Korea. He entered the United States in 1984, at the age of six, and became a lawful permanent resident of the United States two years later. In July 1996, he was convicted of first-degree burglary in state court in California and, in April 1997, he was convicted of a second crime, "petty theft with priors." The Immigration and Naturalization Service (INS) charged respondent with being deportable from the United States in light of these convictions, and detained him pending his removal hearing.[FN1] We hold that Congress, justifiably concerned that deportable criminal aliens who are not detained continue to engage in crime and fail to appear for their removal hearings in large numbers, may require that persons such as respondent be detained for the brief period necessary for their removal proceedings.

FN1. App. to Pet. for Cert. 32a; see 8 U.S.C. §§ 1101(a)(43)(G), 1227(a)(2)(A)(iii). Section 1226(c) authorizes detention of aliens who have committed certain crimes including, *inter alia*, any "aggravated felony," §§ 1226(c)(1)(B), 1227(a)(2)(A)(iii), and any two "crimes involving moral turpitude," §§ 1226(c)(1)(B), 1227(a)(2)(A)(ii). Although the INS initially included only respondent's 1997 conviction in the charging document, it subsequently amended the immigration charges against him to include his 1996 conviction for first-degree burglary as another basis for mandatory detention and deportation. Brief for Petitioners 3, n. 2 (alleging that respondent's convictions reflected two " 'crimes involving moral turpitude' ").

Respondent does not dispute the validity of his prior convictions, which were obtained following the full procedural protections our criminal justice system offers. Respondent also did not dispute the INS' conclusion that he is subject to ***514** mandatory detention under § 1226(c). See Brief in Opposition 1-2; App. 8-9.[FN2] In conceding that he was deportable, respondent forwent a hearing at which he would have been entitled to raise any nonfrivolous argument available to demonstrate that he was not properly included in a mandatory detention category. See 8 CFR § 3.19(h)(2)(ii) (2002); *Matter of Joseph*, 22 I. & N. Dec. 799, 1999 WL 339053 (BIA 1999).[FN3] Respondent instead filed a ****1713** habeas corpus action pursuant to 28 U.S.C. § 2241 in the United States District Court for the Northern District of California challenging the constitutionality of § 1226(c) itself. App. to Pet. for Cert. 2a. He argued that his detention under § 1226(c) violated due process because the INS had made no determination that he posed either a danger to society or a flight risk. *Id.*, at 31a, 33a.

FN2. As respondent explained: "The statute requires the [INS] to take into custody any alien who 'is deportable' from the United States based on having been convicted of any of a wide range of crimes.... [Respondent]

does not challenge INS's authority to take him into custody after he finished serving his criminal sentence. His challenge is solely to Section 1226(c)'s absolute prohibition on his release from detention, even where, as here, the INS never asserted that he posed a danger or significant flight risk." Brief in Opposition 1-2.

FN3. This "*Joseph* hearing" is immediately provided to a detainee who claims that he is not covered by § 1226(c). Tr. of Oral Arg. 22. At the hearing, the detainee may avoid mandatory detention by demonstrating that he is not an alien, was not convicted of the predicate crime, or that the INS is otherwise substantially unlikely to establish that he is in fact subject to mandatory detention. See 8 CFR § 3.19(h)(2)(ii) (2002); *Matter of Joseph*, 22 I. & N. Dec. 799, 1999 WL 339053 (BIA 1999). Because respondent conceded that he was deportable because of a conviction that triggers § 1226(c) and thus sought no *Joseph* hearing, we have no occasion to review the adequacy of *Joseph* hearings generally in screening out those who are improperly detained pursuant to § 1226(c). Such individualized review is available, however, and Justice SOUTER is mistaken if he means to suggest otherwise. See *post*, at 1735, 1736 (opinion concurring in part and dissenting in part) (hereinafter dissent).

The District Court agreed with respondent that § 1226(c)'s requirement of mandatory detention for certain criminal aliens was unconstitutional. *Kim v. Schiltgen*, No. C 99-2257***515** SI (Aug. 11, 1999), App. to Pet. for Cert. 31a-51a. The District Court therefore granted respondent's petition subject to the INS' prompt undertaking of an individualized bond hearing to determine whether respondent posed either a flight risk or a danger to the community. *Id.*, at 50a. Following that decision, the District Director of the INS released respondent on $5,000 bond.

The Court of Appeals for the Ninth Circuit affirmed. *Kim v. Ziglar*, 276 F.3d 523 (C.A.9 2002). That court held that § 1226(c) violates substantive due process as applied to respondent because he is a permanent resident alien. *Id.*, at 528. It noted that permanent resident aliens constitute the most favored category of aliens and that they have the right to reside permanently in the United States, to work here, and to apply for citizenship. *Ibid.* The court recognized and rejected the Government's two principal justifications for mandatory detention under § 1226(c): (1) ensuring the presence of criminal aliens at their removal proceedings; and (2) protecting the public from dangerous criminal aliens. The Court of Appeals discounted the first justification because it found that not all aliens detained pursuant to § 1226(c) would ultimately be deported. *Id.*, at 531-532. And it discounted the second justification on the grounds that the aggravated felony classification triggering respondent's detention included crimes that the court did not consider "egregious" or otherwise sufficiently dangerous to the public to necessitate mandatory detention. *Id.*, at 532-533. Respondent's crimes of first-degree burglary (burglary of an inhabited dwelling) and petty theft, for instance, the Ninth Circuit dismissed as "rather ordinary crimes." *Id.*, at 538. Relying upon our recent decision in *Zadvydas v. Davis*, 533 U.S. 678, 121 S.Ct. 2491, 150 L.Ed.2d 653 (2001), the Court of Appeals concluded that the INS had not provided a justification "for no-bail civil detention sufficient to overcome a lawful permanent resident alien's liberty interest." 276 F.3d, at 535.

***516** Three other Courts of Appeals have reached the same conclusion. See *Patel v. Zemski*, 275 F.3d 299 (C.A.3 2001); *Welch v. Ashcroft*, 293 F.3d 213 (C.A.4 2002); *Hoang v. Comfort*, 282 F.3d 1247 (C.A.10 2002). The Seventh Circuit, however, rejected a constitutional challenge to § 1226(c) by a permanent resident alien. *Parra v. Perryman*, 172 F.3d 954 (C.A.7 1999). We granted certiorari to resolve this conflict, see 536 U.S. 956, 122 S.Ct. 2696, 153 L.Ed.2d 833 (2002), and now reverse.

I

[1] We address first the argument that 8 U.S.C. § 1226(e) deprives us of jurisdiction to hear this case. See *Florida v. Thomas*, 532 U.S. 774, 777, 121 S.Ct. 1905, 150 L.Ed.2d 1 (2001) ("Although the parties did not raise the issue in their briefs on the merits, we must first consider whether we have jurisdiction to decide this case"). An *amicus* argues, and the concurring opinion agrees, that § 1226(e) deprives the federal courts of jurisdiction to ****1714** grant habeas relief to aliens challenging their detention under § 1226(c). See Brief for Washington Legal Foundation et al. as *Amici Curiae*. Section 1226(e) states:

"(e) Judicial review

"The Attorney General's discretionary judgment regarding the application of this section shall not be subject to review. No court may set aside any action or decision by the Attorney General under this section regarding the detention or release of any alien or the grant, revocation, or denial of bond or parole."

The *amicus* argues that respondent is contesting a "decision by the Attorney General" to detain him under § 1226(c), and that, accordingly, no court may set aside that action. Brief for Washington Legal Foundation et al. as *Amici Curiae* 7-8.

But respondent does not challenge a "discretionary judgment" by the Attorney General or a "decision" that the Attorney General has made regarding his detention or release. ***517** Rather, respondent challenges the statutory framework that permits his detention without bail. *Parra v. Perryman*, *supra*, at 957 ("Section 1226(e) likewise deals with challenges to operational decisions, rather than to the legislation establishing the framework for those decisions").

[2][3] This Court has held that "where Congress intends to preclude judicial review of constitutional claims its intent to do so must be clear." *Webster v. Doe*, 486 U.S. 592, 603, 108 S.Ct. 2047, 100 L.Ed.2d 632 (1988); see also *Johnson v. Robison*, 415 U.S. 361, 367, 94 S.Ct. 1160, 39 L.Ed.2d 389 (1974) (holding that provision barring review of " 'decisions of the Administrator on any question of law or fact under any law administered by the Veterans' Administration providing benefits for veterans' " did not bar constitutional challenge (emphasis deleted)). And, where a provision precluding review is claimed to bar habeas review, the Court has required a particularly clear statement that such is Congress' intent. See *INS v. St. Cyr*, 533 U.S. 289, 308-309, 121 S.Ct. 2271, 150 L.Ed.2d 347 (2001) (holding that title of provision, "Elimination of Custody Review by Habeas Corpus," along with broad statement of intent to preclude review, was not sufficient to bar review of habeas corpus petitions); see also *id.*, at 298, 121 S.Ct. 2271 (citing cases refusing to find bar to habeas review where there was no specific mention of the Court's authority to hear habeas petitions); *id.*, at 327, 121 S.Ct. 2271 (SCALIA, J., dissenting) (arguing that opinion established "a superclear statement, 'magic words' requirement for the congressional expression of" an intent to preclude habeas review).

Section 1226(e) contains no explicit provision barring habeas review, and we think that its clear text does not bar respondent's constitutional challenge to the legislation authorizing his detention without bail.

II

[4] Having determined that the federal courts have jurisdiction to review a constitutional challenge to § 1226(c), we proceed to review respondent's claim. Section 1226(c) mandates***518** detention during removal proceedings for a limited class of deportable aliens-including those convicted of an aggravated felony. Congress adopted this provision against a backdrop of wholesale failure by the INS to deal with increasing rates of criminal activity by aliens. See, *e.g.*, Criminal Aliens in the United States: Hearings before the Permanent Subcommittee on Investigations of the Senate Committee on Governmental Affairs, 103d Cong., 1st Sess. (1993); S.Rep. No. 104-48, p. 1 (1995) (hereinafter S. Rep. 104-48) (confinement of criminal aliens alone cost $724 million in 1990). Criminal aliens were the fastest growing segment of the federal prison population, already constituting roughly 25% of all federal prisoners, and they formed a rapidly rising share of state prison populations as well. *Id.*, at 6-9. Congress' investigations****1715** showed, however, that the INS could not even *identify* most deportable aliens, much less locate them and remove them from the country. *Id.*, at 1. One study showed that, at the then-current rate of deportation, it would take 23 years to remove every criminal alien already subject to deportation. *Id.*, at 5. Making matters worse, criminal aliens who were deported swiftly reentered the country illegally in great numbers. *Id.*, at 3.

The INS' near-total inability to remove deportable criminal aliens imposed more than a monetary cost on the Nation. First, as Congress explained, "[a]liens who enter or remain in the United States in violation of our law are effectively taking immigration opportunities that might otherwise be extended to others." S.Rep. No. 104-249, p. 7 (1996). Second, deportable criminal aliens who remained in the United States often committed more crimes before being removed. One 1986 study showed that, after criminal aliens were identified as deportable, 77% were arrested at least once

more and 45%-nearly half-were arrested multiple times before their deportation proceedings even began. Hearing on H.R. 3333 before the Subcommittee on Immigration, Refugees, and International Law of the House Committee on the ***519** Judiciary, 101st Cong., 1st Sess., 54, 52 (1989) (hereinafter 1989 House Hearing); see also *Zadvydas*, 533 U.S., at 713-714, 121 S.Ct. 2491 (KENNEDY, J., dissenting) (discussing high rates of recidivism for released criminal aliens).

Congress also had before it evidence that one of the major causes of the INS' failure to remove deportable criminal aliens was the agency's failure to detain those aliens during their deportation proceedings. See Department of Justice, Office of the Inspector General, Immigration and Naturalization Service, Deportation of Aliens After Final Orders Have Been Issued, Rep. No. I-96-03 (Mar.1996), App. 46 (hereinafter Inspection Report) ("Detention is key to effective deportation"); see also H.R.Rep. No. 104-469, p. 123 (1995). The Attorney General at the time had broad discretion to conduct individualized bond hearings and to release criminal aliens from custody during their removal proceedings when those aliens were determined not to present an excessive flight risk or threat to society. See 8 U.S.C. § 1252(a) (1982 ed.). Despite this discretion to conduct bond hearings, however, in practice the INS faced severe limitations on funding and detention space, which considerations affected its release determinations. S. Rep. 104-48, at 23 ("[R]elease determinations are made by the INS in large part, according to the number of beds available in a particular region"); see also Reply Brief for Petitioners 9.

Once released, more than 20% of deportable criminal aliens failed to appear for their removal hearings. See S. Rep. 104-48, at 2; see also Brief for Petitioners 19.[FN4] The ***520** dissent disputes that statistic, *post*, at 1738-1739 (opinion of SOUTER, J.), but goes on to praise a subsequent study conducted by the Vera Institute of Justice that more than confirms it. *Post*, at 1740-1741. As the dissent explains, the Vera study found that "77% of those [deportable criminal aliens] released on bond" showed up for their removal proceedings. *Post*, at 1740. This finding-that one out of four criminal aliens released on bond absconded prior to the completion of his removal proceedings-is even more striking than the one-in-five flight rate reflected in the evidence before Congress when it adopted ****1716** § 1226(c).[FN5] The Vera Institute study strongly supports Congress' concern that, even with individualized screening, releasing deportable criminal aliens on bond would lead to an unacceptable rate of flight.

FN4. Although the Attorney General had authority to release these aliens on bond, it is not clear that *all* of the aliens released were in fact given individualized bond hearings. See Brief for Petitioners 19 ("[M]ore than 20% of criminal aliens who were released on bond *or otherwise not kept in custody* throughout their deportation proceedings failed to appear for those proceedings" (emphasis added)), citing S. Rep. 104-48, at 2. The evidence does suggest, however, that *many* deportable criminal aliens in this "released criminal aliens" sample received such determinations. See Brief for Petitioners 19 (noting that, for aliens not evaluated for flight risk at a bond hearing, the prehearing skip rate doubled to 40%).

FN5. The dissent also claims that the study demonstrated that "92% of criminal aliens ... who were released under supervisory conditions attended all of their hearings." *Post*, at 1740 (opinion of SOUTER, J.). The study did manage to raise the appearance rate for criminal aliens through a supervision program known as the Appearance Assistance Program (AAP). But the AAP study is of limited value. First, the study included only 16 aliens who, like respondent, were released from prison and charged with being deportable on the basis of an aggravated felony. 1 Vera Institute of Justice, Testing Community Supervision for the INS: An Evaluation of the Appearance Assistance Program, pp. 33-34, 36 (Aug. 1, 2000). In addition, all 127 aliens in the AAP study were admitted into the study group only after being screened for "strength of family and community ties, appearance rates in prior legal proceedings, and eligibility to apply for a legal remedy." *Id.*, at 13; see also *id.*, at 37. Following this selection process, "supervision staff were in frequent, ongoing communication with participants," *id.*, at 14, through, among other things, required reporting sessions, periodic

home visits, and assistance in retaining legal representation, *id.*, at 41-42. And, in any event, respondent seeks an individualized bond hearing, not "community supervision." The dissent's claim that criminal aliens released under supervisory conditions are likely to attend their hearings, *post*, at 1740, therefore, is totally beside the point.

Congress amended the immigration laws several times toward the end of the 1980's. In 1988, Congress limited ***521** the Attorney General's discretion over custody determinations with respect to deportable aliens who had been convicted of aggravated felonies. See Pub.L. 100-690, Tit. VII, § 7343(a), 102 Stat. 4470. Then, in 1990, Congress broadened the definition of "aggravated felony," subjecting more criminal aliens to mandatory detention. See Pub.L. 101-649, Tit. V, § 501(a), 104 Stat. 5048. At the same time, however, Congress added a new provision, 8 U.S.C. § 1252(a)(2)(B) (1988 ed., Supp. II), authorizing the Attorney General to release permanent resident aliens during their deportation proceedings where such aliens were found not to constitute a flight risk or threat to the community. See Pub.L. 101-649, Tit. V, § 504(a)(5), 104 Stat. 5049.

During the same period in which Congress was making incremental changes to the immigration laws, it was also considering wholesale reform of those laws. Some studies presented to Congress suggested that detention of criminal aliens during their removal proceedings might be the best way to ensure their successful removal from this country. See, *e.g.*, 1989 House Hearing 75; Inspection Report, App. 46; S. Rep. 104-48, at 32 ("Congress should consider requiring that all aggravated felons be detained pending deportation. Such a step may be necessary because of the high rate of no-shows for those criminal aliens released on bond"). It was following those Reports that Congress enacted 8 U.S.C. § 1226, requiring the Attorney General to detain a subset of deportable criminal aliens pending a determination of their removability.

[5] "In the exercise of its broad power over naturalization and immigration, Congress regularly makes rules that would be unacceptable if applied to citizens." *Mathews v. Diaz*, 426 U.S. 67, 79-80, 96 S.Ct. 1883, 48 L.Ed.2d 478 (1976). The dissent seeks to avoid this fundamental premise of immigration law by repeatedly referring to it as "dictum." *Post*, at 1730-1731, n. 9 (opinion of SOUTER, J.). The Court in *Mathews*, however, made the statement the dissent now seeks to avoid in reliance on clear ***522** precedent establishing that " 'any policy toward aliens is vitally and intricately interwoven with contemporaneous policies in regard to the conduct of foreign relations, the war power, and the maintenance of a republican form of government.' " 426 U.S., at 81, n. 17, 96 S.Ct. 1883 (quoting *Harisiades v. Shaughnessy*, 342 U.S. 580, 588-589, 72 S.Ct. 512, 96 L.Ed. 586 (1952)). And, since *Mathews*, ****1717** this Court has firmly and repeatedly endorsed the proposition that Congress may make rules as to aliens that would be unacceptable if applied to citizens. See, *e.g.*, *Zadvydas*, 533 U.S., at 718, 121 S.Ct. 2491 (KENNEDY, J., dissenting) ("The liberty rights of the aliens before us here are subject to limitations and conditions not applicable to citizens"); *Reno v. Flores*, 507 U.S. 292, 305-306, 113 S.Ct. 1439, 123 L.Ed.2d 1 (1993) ("Thus, 'in the exercise of its broad power over immigration and naturalization, "Congress regularly makes rules that would be unacceptable if applied to citizens" ' ") (quoting *Fiallo v. Bell*, 430 U.S. 787, 792, 97 S.Ct. 1473, 52 L.Ed.2d 50 (1977), in turn quoting *Mathews, supra*, at 79-80, 96 S.Ct. 1883)); *United States v. Verdugo-Urquidez*, 494 U.S. 259, 273, 110 S.Ct. 1056, 108 L.Ed.2d 222 (1990).

[6] In his habeas corpus challenge, respondent did not contest Congress' general authority to remove criminal aliens from the United States. Nor did he argue that he himself was not "deportable" within the meaning of § 1226(c). [FN6] Rather, ***523** respondent argued that the Government may not, consistent with the Due Process Clause of the Fifth Amendment, detain him for the brief period necessary for his removal proceedings. The dissent, after an initial detour on the issue of respondent's concession, see *post*, at 1727-1728 (opinion of SOUTER, J.), ultimately acknowledges the real issue in this case. *Post*, at 1735, n. 11; see also Brief in Opposition 1-2 (explaining that respondent's "challenge is solely to Section 1226(c)'s absolute prohibition on his release from detention").

FN6. Respondent's concession on this score is relevant for two reasons: First, because of the concession, respondent by his own choice did not receive one of the procedural protections otherwise provided to aliens detained under § 1226(c). And, second, because of the

concession we do not reach a contrary argument raised by respondent for the first time in his brief on the merits in this Court. Specifically, in his brief on the merits, respondent suggests that he might not be subject to detention under § 1226(c) after all because his 1997 conviction for petty theft with priors might not qualify as an aggravated felony under recent Ninth Circuit precedent. Respondent now states that he intends to argue at his next removal hearing that "his 1997 conviction does not constitute an aggravated felony ... and his 1996 conviction [for first-degree burglary] does not constitute either an aggravated felony or a crime involving moral turpitude." Brief for Respondent 11-12. As respondent has conceded that he is deportable for purposes of his habeas corpus challenge to § 1226(c) at all previous stages of this proceeding, see n. 3, *supra*, we decide the case on that basis. Lest there be any confusion, we emphasize that by conceding he is "*deportable*" and, hence, subject to mandatory detention under § 1226(c), respondent did not concede that he *will ultimately be deported.* As the dissent notes, respondent has applied for withholding of removal. *Post*, at 1727 (opinion of SOUTER, J.).

[7] "It is well established that the Fifth Amendment entitles aliens to due process of law in deportation proceedings." *Flores, supra*, at 306, 113 S.Ct. 1439. At the same time, however, this Court has recognized detention during deportation proceedings as a constitutionally valid aspect of the deportation process. As we said more than a century ago, deportation proceedings "would be vain if those accused could not be held in custody pending the inquiry into their true character." *Wong Wing v. United States*, 163 U.S. 228, 235, 16 S.Ct. 977, 41 L.Ed. 140 (1896); see also *Flores, supra*, at 305-306, 113 S.Ct. 1439; *Zadvydas*, 533 U.S., at 697, 121 S.Ct. 2491 (distinguishing constitutionally questioned detention there at issue from "detention pending a determination of removability"); *id.*, at 711, 121 S.Ct. 2491 (KENNEDY, J., dissenting) ("Congress' power to detain aliens in connection with removal or exclusion ... is part of the Legislature's considerable authority over immigration matters").[FN7]

FN7. In fact, prior to 1907 there was no provision permitting bail for *any* aliens during the pendency of their deportation proceedings. See § 20, 34 Stat. 905.

****1718** In *Carlson v. Landon*, 342 U.S. 524, 72 S.Ct. 525, 96 L.Ed. 547 (1952), the Court considered a challenge to the detention of aliens who were deportable because of their participation in Communist activities.***524** The detained aliens did not deny that they were members of the Communist Party or that they were therefore deportable. *Id.*, at 530, 72 S.Ct. 525. Instead, like respondent in the present case, they challenged their detention on the grounds that there had been no finding that they were unlikely to appear for their deportation proceedings when ordered to do so. *Id.*, at 531-532, 72 S.Ct. 525; see also Brief for Petitioner in *Carlson v. Landon*, O.T.1951, No. 35, p. 12 (arguing that legislative determinations could not justify "depriving [an alien] of his liberty without facts personal to the individual"). Although the Attorney General ostensibly had discretion to release detained Communist aliens on bond, the INS had adopted a policy of refusing to grant bail to those aliens in light of what Justice Frankfurter viewed as the mistaken "conception that Congress had made [alien Communists] in effect unbailable." 342 U.S., at 559, 568, 72 S.Ct. 525 (dissenting opinion).

The Court rejected the aliens' claims that they were entitled to be released from detention if they did not pose a flight risk, explaining "[d]etention is necessarily a part of this deportation procedure." *Id.*, at 538, 72 S.Ct. 525; see also *id.*, at 535, 72 S.Ct. 525. The Court noted that Congress had chosen to make such aliens deportable based on its "understanding of [Communists'] attitude toward the use of force and violence ... to accomplish their political aims." *Id.*, at 541, 72 S.Ct. 525. And it concluded that the INS could deny bail to the detainees "by reference to the legislative scheme" even without any finding of flight risk. *Id.*, at 543, 72 S.Ct. 525; see also *id.*, at 550, 72 S.Ct. 525 (Black, J., dissenting) ("Denial [of bail] was not on the ground that if released [the aliens] might try to evade obedience to possible deportation orders"); *id.*, at 551, and n. 6, 72 S.Ct. 525.

The dissent argues that, even though the aliens in *Carlson* were not flight risks, "individualized findings of dangerousness were made" as to each of the aliens. *Post*, at 1744 (opinion of SOUTER, J.). The dissent,

again, is mistaken. The aliens in *Carlson* had *not* been found individually dangerous. ***525** The only evidence against them was their membership in the Communist Party and "a degree ... of participation in Communist activities." 342 U.S., at 541, 72 S.Ct. 525. There was no "individualized findin[g]" of likely future dangerousness as to any of the aliens and, in at least one case, there was a specific finding of nondangerousness.[FN8] The Court nonetheless concluded that the denial of bail was permissible "by reference to the legislative scheme to eradicate the evils of Communist activity." *Id.*, at 543, 72 S.Ct. 525.[FN9]

FN8. See *Carlson v. Landon*, 342 U.S., at 549, 72 S.Ct. 525 (Black, J., dissenting) (noting that, in at least one case, the alien involved had been found " '*not* likely to engage in any subversive activities' " (emphasis added)); see also *id.*, at 550, n. 5, 72 S.Ct. 525 (quoting the District Judge's finding in case No. 35 that " 'I don't know whether it is true ... that their release is dangerous to the security of the United States' "); *id.*, at 552, 72 S.Ct. 525 ("[T]he bureau agent is *not* required to prove that a person he throws in jail is ... 'dangerous' " (emphasis added)); see also *id.*, at 567, 72 S.Ct. 525 (Frankfurter, J., dissenting) ("[T]he Attorney General ... did *not* deny bail from an individualized estimate of 'the danger to the public safety of [each person's] presence within the community' " (emphasis added)).

FN9. Apart from its error with respect to the dangerousness determination, the dissent attempts to distinguish *Carlson* from the present case by arguing that the aliens in *Carlson* had engaged in " 'personal activity' " in support of a political party Congress considered " 'a menace to the public.' " *Post*, at 1742 (opinion of SOUTER, J.). In suggesting that this is a distinction, the dissent ignores the "personal activity" that aliens like respondent have undertaken in committing the crimes that subject them to detention in the first instance-personal activity that has been determined with far greater procedural protections than any finding of "active membership" in the Communist Party involved in *Carlson*. See 342 U.S., at 530, 72 S.Ct. 525 ("[T]he Director made allegation[s], supported by affidavits, that the Service's dossier of each petitioner contained evidence indicating to him that each was at the time of arrest a member of the Communist Party of the United States and had since 1930 participated ... in the Party's indoctrination of others"). In the present case, respondent became "deportable" under § 1226(c) only following criminal convictions that were secured following full procedural protections. These convictions, moreover, reflect "personal activity" that Congress considered relevant to future dangerousness. Cf. *Zadvydas v. Davis*, 533 U.S. 678, 714, 121 S.Ct. 2491, 150 L.Ed.2d 653 (2001) (KENNEDY, J., dissenting) (noting that "a criminal record accumulated by an admitted alien" is a good indicator of future danger, and that "[a]ny suggestion that aliens who have completed prison terms no longer present a danger simply does not accord with the reality that a significant risk may still exist").

****1719 *526** In *Reno v. Flores*, 507 U.S. 292, 113 S.Ct. 1439, 123 L.Ed.2d 1 (1993), the Court considered another due process challenge to detention during deportation proceedings. The due process challenge there was brought by a class of alien juveniles. The INS had arrested them and was holding them in custody pending their deportation hearings. The aliens challenged the INS' policy of releasing detained alien juveniles only into the care of their parents, legal guardians, or certain other adult relatives. See, *e.g.*, *id.*, at 297, 113 S.Ct. 1439 (citing Detention and Release of Juveniles, 53 Fed.Reg. 17449 (1988) (codified as to deportation at 8 CFR § 242.24 (1992))). The aliens argued that the policy improperly relied "upon a 'blanket' presumption of the unsuitability of custodians other than parents, close relatives, and guardians" to care for the detained juvenile aliens. 507 U.S., at 313, 113 S.Ct. 1439. In rejecting this argument, the Court emphasized that "reasonable presumptions and generic rules," even when made by the INS rather than Congress, are not necessarily impermissible exercises of Congress' traditional power to legislate with respect to aliens. *Ibid.*; see also *id.*, at 313-314, 113 S.Ct. 1439 ("In the case of each detained alien juvenile, the INS makes those determinations that are specific to the individual and necessary to accurate application of the regulation .... The particularization and individuation need go no

further than this"). Thus, as with the prior challenges to detention during deportation proceedings, the Court in *Flores* rejected the due process challenge and upheld the constitutionality of the detention.

Despite this Court's longstanding view that the Government may constitutionally detain deportable aliens during the limited period necessary for their removal proceedings, respondent argues that the narrow detention policy reflected in 8 U.S.C. § 1226(c) violates due process. Respondent, like ***527** the four Courts of Appeals that have held § 1226(c) to be unconstitutional, relies heavily upon our recent opinion in *Zadvydas v. Davis*, 533 U.S. 678, 121 S.Ct. 2491, 150 L.Ed.2d 653 (2001).

In *Zadvydas*, the Court considered a due process challenge to detention of aliens under 8 U.S.C. § 1231 (1994 ed., Supp. V), which governs detention following a final order of removal. Section 1231(a)(6) provides, among other things, that when an alien who has been ordered removed is not in fact removed during the 90-day statutory "removal period," that alien "may be detained beyond the removal period" in the discretion of the Attorney General. The Court in *Zadvydas* read § 1231 to authorize continued detention of an alien following the 90-day removal period for only such time as is reasonably necessary to secure the alien's removal. 533 U.S., at 699, 121 S.Ct. 2491.

But *Zadvydas* is materially different from the present case in two respects.

First, in *Zadvydas*, the aliens challenging their detention following final orders of deportation were ones for whom removal was "no longer practically attainable." *Id.*, at 690, 121 S.Ct. 2491. The Court thus held that the detention there did not serve its purported immigration purpose. *Ibid.* ****1720** In so holding, the Court rejected the Government's claim that, by detaining the aliens involved, it could prevent them from fleeing prior to their removal. The Court observed that where, as there, "detention's goal is no longer practically attainable, detention no longer bears a reasonable relation to the purpose for which the individual was committed." *Ibid.* (internal quotation marks and citation omitted).[FN10]

FN10. The dissent denies this point, insisting that the detention at issue in *Zadvydas* actually did bear a reasonable relation to its immigration purpose. *Post*, at 1738 (opinion of SOUTER, J.) ("[T]he statute in *Zadvydas* ... served the purpose of preventing aliens ... from fleeing prior to actual deportation").

In the present case, the statutory provision at issue governs detention of deportable criminal aliens *pending their* ****528*** *removal proceedings.* Such detention necessarily serves the purpose of preventing deportable criminal aliens from fleeing prior to or during their removal proceedings, thus increasing the chance that, if ordered removed, the aliens will be successfully removed. Respondent disagrees, arguing that there is no evidence that mandatory detention is necessary because the Government has never shown that individualized bond hearings would be ineffective. See Brief for Respondent 14. But as discussed above, see *supra*, at 1715-1716, in adopting § 1226(c), Congress had before it evidence suggesting that permitting discretionary release of aliens pending their removal hearings would lead to large numbers of deportable criminal aliens skipping their hearings and remaining at large in the United States unlawfully.

[8] Respondent argues that these statistics are irrelevant and do not demonstrate that individualized bond hearings "are ineffective or burdensome." Brief for Respondent 33-40. It is of course true that when Congress enacted § 1226, individualized bail determinations had not been tested under optimal conditions, or tested in all their possible permutations. But when the Government deals with deportable aliens, the Due Process Clause does not require it to employ the least burdensome means to accomplish its goal. The evidence Congress had before it certainly supports the approach it selected even if other, hypothetical studies might have suggested different courses of action. Cf., *e.g.*, *Los Angeles v. Alameda Books, Inc.*, 535 U.S. 425, 436-437, 122 S.Ct. 1728, 152 L.Ed.2d 670 (2002); *Flores*, *supra*, at 315, 113 S.Ct. 1439 ("It may well be that other policies would be even better, but 'we are [not] a legislature charged with formulating public policy' " (quoting *Schall v. Martin*, 467 U.S. 253, 281, 104 S.Ct. 2403, 81 L.Ed.2d 207 (1984))).

Zadvydas is materially different from the present case in a second respect as well. While the period of detention at issue in *Zadvydas* was "indefinite" and "potentially permanent," 533 U.S., at 690-691, 121 S.Ct. 2491, the detention here is of a much shorter

duration.

529** *Zadvydas* distinguished the statutory provision it was there considering from § 1226 on these very grounds, noting that "post-removal-period detention, *unlike detention pending a determination of removability* (3)27, has no obvious termination point." *Id.*, at 697, 121 S.Ct. 2491 (emphasis added). Under § 1226(c), not only does detention have a definite termination point, in the majority of cases it lasts for less than the 90 days we considered presumptively valid in *Zadvydas*. [FN11] The Executive*1721** Office for Immigration Review has calculated that, in 85% of the cases in which aliens are detained pursuant to § 1226(c), removal proceedings are completed in an average time of 47 days and a median of 30 days. Brief for Petitioners 39-40. In the remaining 15% of cases, in which the alien appeals the decision of the Immigration Judge to the Board of Immigration Appeals, appeal takes an average of four months, with a median time that is slightly shorter. *Id.*, at 40. [FN12]

FN11. The dissent concedes that "[t]he scheme considered in *Zadvydas* did not provide review immediately .... [C]ustody review hearings usually occurred within three months of a transfer to a postorder detention unit." *Post*, at 1735, n. 11 (opinion of SOUTER, J.). Yet, in discussing the present case, the dissent insists that "the due process requirement of an individualized finding of necessity applies to detention periods shorter than" respondent's. *Post*, at 1742, n. 24 (citing *Schall v. Martin*, 467 U.S. 253, 270, 276-277, 104 S.Ct. 2403, 81 L.Ed.2d 207 (1984), in which "the detainee was entitled to a hearing" when threatened with "a maximum detention period of 17 days"). The dissent makes no attempt to reconcile its suggestion that aliens are entitled to an immediate hearing with the holding in *Zadvydas* permitting aliens to be detained for several months prior to such a hearing.

FN12. The very limited time of the detention at stake under § 1226(c) is not missed by the dissent. See *post*, at 1741 (opinion of SOUTER, J.) ("Successful challenges often require several months"); *post*, at 1742 (considering "[t]he potential for several months [worth] of confinement"); but see *post*, at 1731 ("potentially lengthy detention").

[9] These statistics do not include the many cases in which removal proceedings are completed while the alien is still serving time for the underlying conviction. *Id.*, at 40, ***530** n. 17.[FN13] In those cases, the aliens involved are never subjected to mandatory detention at all. In sum, the detention at stake under § 1226(c) lasts roughly a month and a half in the vast majority of cases in which it is invoked, and about five months in the minority of cases in which the alien chooses to appeal. [FN14] Respondent was detained for somewhat***531** longer than the average-spending six months in INS custody prior to the District Court's order granting habeas relief, but respondent himself had requested a continuance of his removal hearing.[FN15]

FN13. Congress has directed the INS to identify and track deportable criminal aliens while they are still in the criminal justice system, and to complete removal proceedings against them as promptly as possible. See Antiterrorism and Effective Death Penalty Act of 1996, Pub.L. 104-132, §§ 432, 438(a), 110 Stat. 1273-1276; Illegal Immigration Reform and Immigrant Responsibility Act of 1996, Pub.L. 104-208, §§ 326, 329, 110 Stat. 3009-630 to 3009-631 (codified at 8 U.S.C. § 1228). The INS therefore established the Institutional Hearing Program (IHP) (subsequently subsumed under the "Institutional Removal Program"). By 1997, the General Accounting Office found that nearly half of all deportable criminal aliens' cases were completed through the IHP prior to the aliens' release from prison. See General Accounting Office, Report to the Chairman, Subcommittee on Immigration and Claims of the House Committee on the Judiciary, INS' Efforts to Remove Imprisoned Aliens Continue to Need Improvement 10, Fig. 1 (Oct.1998). The report urged, however, that the INS needed to improve its operations in order to complete removal proceedings against all deportable criminal aliens before their release. *Id.*, at 13. Should this come to pass, of course, § 1226(c) and the temporary detention it mandates would be rendered obsolete.

FN14. Prior to the enactment of § 1226(c), when the vast majority of deportable criminal aliens were not detained during their deportation proceedings, many filed frivolous appeals in order to delay their deportation. See S. Rep. 104-48, at 2 ("Delays can earn criminal aliens more than work permits and wages-if they delay long enough they may even obtain U.S. citizenship"). Cf. *Zadvydas*, 533 U.S., at 713, 121 S.Ct. 2491 (KENNEDY, J., dissenting) ("[C]ourt ordered release cannot help but encourage dilatory and obstructive tactics by aliens"). Respondent contends that the length of detention required to appeal may deter aliens from exercising their right to do so. Brief for Respondent 32. As we have explained before, however, "the legal system ... is replete with situations requiring the making of difficult judgments as to which course to follow," and, even in the criminal context, there is no constitutional prohibition against requiring parties to make such choices. *McGautha v. California*, 402 U.S. 183, 213, 91 S.Ct. 1454, 28 L.Ed.2d 711 (1971) (internal quotation marks omitted); accord, *Chaffin v. Stynchcombe*, 412 U.S. 17, 30-31, 93 S.Ct. 1977, 36 L.Ed.2d 714 (1973).

FN15. Respondent was held in custody for three months before filing his habeas petition. His removal hearing was scheduled to occur two months later, but respondent requested and received a continuance to obtain documents relevant to his withholding application. See Brief for Respondent 9, n. 12.

For the reasons set forth above, respondent's claim must fail. Detention during removal proceedings is a constitutionally ****1722** permissible part of that process. See, *e.g.*, *Wong Wing*, 163 U.S., at 235, 16 S.Ct. 977 ("We think it clear that detention, or temporary confinement, as part of the means necessary to give effect to the provisions for the exclusion or expulsion of aliens would be valid"); *Carlson v. Landon*, 342 U.S. 524, 72 S.Ct. 525, 96 L.Ed. 547 (1952); *Reno v. Flores*, 507 U.S. 292, 113 S.Ct. 1439, 123 L.Ed.2d 1 (1993). The INS detention of respondent, a criminal alien who has conceded that he is deportable, for the limited period of his removal proceedings, is governed by these cases. The judgment of the Court of Appeals is

Reversed.

Justice KENNEDY, concurring.

While the justification for 8 U.S.C. § 1226(c) is based upon the Government's concerns over the risks of flight and danger to the community, *ante*, at 1715-1716, the ultimate purpose behind the detention is premised upon the alien's deportability. As a consequence, due process requires individualized procedures to ensure there is at least some merit to the Immigration and Naturalization Service's (INS) charge and, therefore, sufficient justification to detain a lawful permanent resident alien pending a more formal hearing. See *Zadvydas v. Davis*, 533 U.S. 678, 690, 121 S.Ct. 2491, 150 L.Ed.2d 653 (2001) ("[W]here detention's goal is no longer practically attainable, detention no longer bears a reasonable relation to the purpose for which ***532** the individual was committed" (internal quotation marks and brackets omitted)); *id.*, at 718, 121 S.Ct. 2491 (KENNEDY, J., dissenting) ("Liberty under the Due Process Clause includes protection against unlawful or arbitrary personal restraint or detention"). If the Government cannot satisfy this minimal, threshold burden, then the permissibility of continued detention pending deportation proceedings turns solely upon the alien's ability to satisfy the ordinary bond procedures-namely, whether if released the alien would pose a risk of flight or a danger to the community. *Id.*, at 721, 121 S.Ct. 2491 (KENNEDY, J., dissenting).

As the Court notes, these procedures were apparently available to respondent in this case. Respondent was entitled to a hearing in which he could have "raise[d] any nonfrivolous argument available to demonstrate that he was not properly included in a mandatory detention category." *Ante*, at 1712-1713, and n. 3 (citing 8 CFR § 3.19(h)(2)(ii) (2002); *Matter of Joseph*, 22 I. & N. Dec. 799, 1999 WL 339053 (BIA 1999)). Had he prevailed in such a proceeding, the Immigration Judge then would have had to determine if respondent "could be considered ... for release under the general bond provisions" of § 1226(a). *Id.*, at 809. Respondent, however, did not seek relief under these procedures, and the Court had no occasion here to determine their adequacy. *Ante*, at 1712-1713, n. 3.

For similar reasons, since the Due Process Clause prohibits arbitrary deprivations of liberty, a lawful permanent resident alien such as respondent could be

entitled to an individualized determination as to his risk of flight and dangerousness if the continued detention became unreasonable or unjustified. *Zadvydas*, 533 U.S., at 684-686, 121 S.Ct. 2491; *id.*, at 721, 121 S.Ct. 2491 (KENNEDY, J., dissenting) ("[A]liens are entitled to be free from detention that is arbitrary or capricious"). Were there to be an unreasonable delay by the INS in pursuing and completing deportation proceedings, it could become necessary then to inquire whether the detention is not to facilitate deportation, or to protect against risk of flight or dangerousness,***533** but to incarcerate for other reasons. That is not a proper inference, however, either from the statutory scheme itself or from the circumstances of this case. The Court's careful opinion is consistent with these premises, and I join it in full.

Justice O'CONNOR, with whom Justice SCALIA and Justice THOMAS join, concurring in part and concurring in the judgment.

I join all but Part I of the Court's opinion because, a majority having determined****1723** there is jurisdiction, I agree with the Court's resolution of respondent's challenge on the merits. I cannot join Part I because I believe that 8 U.S.C. § 1226(e) unequivocally deprives federal courts of jurisdiction to set aside "any action or decision" by the Attorney General in detaining criminal aliens under § 1226(c) while removal proceedings are ongoing. That is precisely the nature of the action before us.

I

I begin with the text of the statute:

> "The Attorney General's discretionary judgment regarding the application of this section shall not be subject to review. No court may set aside *any action or decision* by the Attorney General under this section regarding the detention or release of any alien or the grant, revocation, or denial of bond or parole." § 1226(e) (emphasis added).

There is no dispute that after respondent's release from prison in 1999, the Attorney General detained him "under this section," *i.e.*, under § 1226. And, the action of which respondent complains is one "regarding the detention or release of a[n] alien or the grant, revocation, or denial of bond or parole." § 1226(e). In my view, the only plausible reading of § 1226(e) is that Congress intended to prohibit federal courts from "set[ting] aside" the Attorney General's decision ***534** to deem a criminal alien such as respondent ineligible for release during the limited duration of his or her removal proceedings.

I recognize both the "strong presumption in favor of judicial review of administrative action" and our "longstanding rule requiring a clear statement of congressional intent to repeal habeas jurisdiction." *INS v. St. Cyr*, 533 U.S. 289, 298, 121 S.Ct. 2271, 150 L.Ed.2d 347 (2001). I also acknowledge that Congress will not be deemed to have repealed habeas jurisdiction in the absence of a specific and unambiguous statutory directive to that effect. See *id.*, at 312-313, 121 S.Ct. 2271; *Ex parte Yerger*, 8 Wall. 85, 105, 19 L.Ed. 332 (1869). Here, however, the signal sent by Congress in enacting § 1226(e) could not be clearer: "*No court* may set aside *any action or decision* ... regarding the detention or release of any alien." (Emphasis added.) There is simply no reasonable way to read this language other than as precluding all review, including habeas review, of the Attorney General's actions or decisions to detain criminal aliens pursuant to § 1226(c).

In *St. Cyr*, the Court held that certain provisions of the Antiterrorism and Effective Death Penalty Act of 1996 (AEDPA) and the Illegal Immigration Reform and Immigrant Responsibility Act of 1996 (IIRIRA) do not strip federal courts of their jurisdiction to review an alien's habeas claim that he or she is eligible for a waiver of deportation. 533 U.S., at 312, 121 S.Ct. 2271. I dissented in that case, and continue to believe it was wrongly decided. Nothing in *St. Cyr*, however, requires that we ignore the plain language and clear meaning of § 1226(e).

In *St. Cyr*, the Court stressed the significance of Congress' use of the term "judicial review" in each of the jurisdictional-limiting provisions at issue. In concluding that Congress had not intended to limit habeas jurisdiction by limiting "judicial review," the Court reasoned as follows:

> "The term 'judicial review' or 'jurisdiction to review' is the focus of each of these three provisions. In the immigration***535** context, 'judicial review' and 'habeas corpus' have historically distinct meanings. See *Heikkila v. Barber*, 345 U.S. 229[, 73 S.Ct. 603, 97 L.Ed. 972] (1953). In *Heikkila*, the Court concluded that the finality provisions at issue 'preclud [ed] judicial review' to the maximum extent possible under the Constitution, and thus con-

cluded that the [Administrative Procedure Act] was inapplicable. *Id.*, at 235[, 73 S.Ct. 603]. Nevertheless, the Court reaffirmed the right to habeas corpus. *Ibid.* Noting ****1724** that the limited role played by the courts in habeas corpus proceedings was far narrower than the judicial review authorized by the APA, the Court concluded that 'it is the scope of inquiry on habeas corpus that differentiates' habeas review from 'judicial review.' " *Id.*, at 311-312, 121 S.Ct. 2271.

In this case, however, § 1226(e) does not mention any limitations on "judicial review." To be sure, the first sentence of § 1226(e) precludes "review" of the Attorney General's "discretionary judgment[s]" to detain aliens under § 1226(c). But the second sentence is not so limited, and states unequivocally that "[n]o court may set aside any action or decision" to detain an alien under § 1226(c). It cannot seriously be maintained that the second sentence employs a term of art such that "no court" does not really mean "no court," or that a decision of the Attorney General may not be "set aside" in actions filed under the Immigration and Naturalization Act but may be set aside on habeas review.

Congress' use of the term "Judicial review" as the title of § 1226(e) does not compel a different conclusion. As the Court stated in *St. Cyr*, "a title alone is not controlling," *id.*, at 308, 121 S.Ct. 2271, because the title of a statute has no power to give what the text of the statute takes away. Where as here the statutory text is clear, " 'the title of a statute ... cannot limit the plain meaning of the text.' " *Pennsylvania Dept. of Corrections v. Yeskey*, 524 U.S. 206, 212, 118 S.Ct. 1952, 141 L.Ed.2d 215 (1998) (quoting *Trainmen v. Baltimore & Ohio R. Co.*, 331 U.S. 519, 528-529, 67 S.Ct. 1387, 91 L.Ed. 1646 (1947)).

***536** The Court also focused in *St. Cyr* on the absence of any language in the relevant statutory provisions making explicit reference to habeas review under 28 U.S.C. § 2241. See 533 U.S., at 313, n. 36, 121 S.Ct. 2271. This statutory silence spoke volumes, the Court reasoned, in light of the "historic use of § 2241 jurisdiction as a means of reviewing deportation and exclusion orders," *ibid.* In contrast, there is no analogous history of routine reliance on habeas jurisdiction to challenge the detention of aliens without bail pending the conclusion of removal proceedings. We have entertained such challenges only twice, and neither was successful on the merits. See *Reno v. Flores*, 507 U.S. 292, 113 S.Ct. 1439, 123 L.Ed.2d 1 (1993); *Carlson v. Landon*, 342 U.S. 524, 72 S.Ct. 525, 96 L.Ed. 547 (1952). See also Neuman, Habeas Corpus, Executive Detention, and the Removal of Aliens, 98 Colum. L.Rev. 961, 1067, n. 120 (1998) (distinguishing detention pursuant to a final order of removal from the interlocutory detention at issue here). Congress' failure to mention § 2241 in this context therefore lacks the significance that the Court accorded Congress' silence on the issue in *St. Cyr*. In sum, nothing in *St. Cyr* requires us to interpret 8 U.S.C. § 1226(e) to mean anything other than what its plain language says.

I recognize that the two Courts of Appeals that have considered the issue have held that § 1226(e) does not preclude habeas claims such as respondent's. See *Patel v. Zemski*, 275 F.3d 299 (C.A.3 2001); *Parra v. Perryman*, 172 F.3d 954 (C.A.7 1999). In *Parra*, the Seventh Circuit held that § 1226(e) does not bar "challenges to § 1226(c) itself, as opposed to decisions implementing that subsection." *Id.*, at 957. Though the Court's opinion today relies heavily on this distinction, I see no basis for importing it into the plain language of the statute.

The Seventh Circuit sought support from our decision in *Reno v. American-Arab Anti-Discrimination Comm.*, 525 U.S. 471, 119 S.Ct. 936, 142 L.Ed.2d 940 (1999) *(AADC)*, but our holding there supports my reading of § 1226(e). In *AADC*, the Court construed a statute that sharply limits review of claims "arising from the ***537** decision or action by the Attorney General to commence proceedings, adjudicate cases, or execute removal orders against ****1725** any alien under this [Act]." 8 U.S.C. § 1252(g) (1994 ed., Supp. III). The Court concluded that this provision imposes jurisdictional limits only on claims addressing one of the three " 'decision[s] or action[s]' " specifically enumerated in the statute. *AADC, supra*, at 482, 119 S.Ct. 936. Nowhere in *AADC* did the Court suggest, however, that the statute's jurisdictional limits might not apply depending on the particular grounds raised by an alien for challenging the Attorney General's decisions or actions in these three areas. *AADC* therefore provides no support for imposing artificial limitations on the broad scope of 8 U.S.C. § 1226(e).

II

Because § 1226(e) plainly deprives courts of

federal habeas jurisdiction over claims that mandatory detention under § 1226(c) is unconstitutional, one could conceivably argue that such a repeal violates the Suspension Clause, which provides as follows: "The Privilege of the Writ of Habeas Corpus shall not be suspended, unless when in Cases of Rebellion or Invasion the public Safety may require it." U.S. Const., Art. I, § 9, cl. 2. The clarity of § 1226(e)'s text makes such a question unavoidable, unlike in *St. Cyr*, where the Court invoked the doctrine of constitutional doubt and interpreted the relevant provisions of AEDPA and IIRIRA not to repeal habeas jurisdiction. *St. Cyr*, *supra*, at 314, 121 S.Ct. 2271; see also *Seminole Tribe of Fla. v. Florida*, 517 U.S. 44, 57, n. 9, 116 S.Ct. 1114, 134 L.Ed.2d 252 (1996) (where the text of a statute is clear, the "preference for avoiding a constitutional question" cannot be invoked to defeat the plainly expressed intent of Congress).

In my view, any argument that § 1226(e) violates the Suspension Clause is likely unavailing. *St. Cyr* held that "at the absolute minimum, the Suspension Clause protects the writ 'as it existed in 1789.' " 533 U.S., at 301, 121 S.Ct. 2271 (quoting *Felker v. Turpin*, 518 U.S. 651, 663-664, 116 S.Ct. 2333, 135 L.Ed.2d 827 (1996)). The constitutionality***538** of § 1226(e)'s limitation on habeas review therefore turns on whether the writ was generally available to those in respondent's position in 1789 (or, possibly, thereafter) to challenge detention during removal proceedings.

Admittedly, discerning the relevant habeas corpus law for purposes of Suspension Clause analysis is a complex task. Nonetheless, historical evidence suggests that respondent would not have been permitted to challenge his temporary detention pending removal until very recently. Because colonial America imposed few restrictions on immigration, there is little case law prior to that time about the availability of habeas review to challenge temporary detention pending exclusion or deportation. See *St. Cyr*, *supra*, at 305, 121 S.Ct. 2271. The English experience, however, suggests that such review was not available:

> "In England, the only question that has ever been made in regard to the power to expel aliens has been whether it could be exercised by the King without the consent of Parliament. It was formerly exercised by the King, but in later times by Parliament, which passed several acts on the subject between 1793 and 1848. Eminent English judges, sitting in the Judicial Committee of the Privy Council, have gone very far in supporting the exclusion or expulsion, by the executive authority of a colony, of aliens having no absolute right to enter its territory or to remain therein." *Fong Yue Ting v. United States*, 149 U.S. 698, 709, 13 S.Ct. 1016, 37 L.Ed. 905 (1893) (citations omitted).

In this country, Congress did not pass the first law regulating immigration until 1875. See 18 Stat. (pt. 3) 477. In the late 19th century, as statutory controls on immigration tightened, the number of challenges brought by aliens to Government deportation or exclusion decisions also increased. See ****1726***St. Cyr*, *supra*, at 305-306, 121 S.Ct. 2271. Because federal immigration laws from 1891 until 1952 made no express provision for judicial review, what limited review existed took the form of petitions***539** for writs of habeas corpus. See, *e.g.*, *Ekiu v. United States*, 142 U.S. 651, 12 S.Ct. 336, 35 L.Ed. 1146 (1892); *Fong Yue Ting v. United States*, *supra*; *The Japanese Immigrant Case*, 189 U.S. 86, 23 S.Ct. 611, 47 L.Ed. 721 (1903); *Chin Yow v. United States*, 208 U.S. 8, 28 S.Ct. 201, 52 L.Ed. 369 (1908); *Kwock Jan Fat v. White*, 253 U.S. 454, 40 S.Ct. 566, 64 L.Ed. 1010 (1920); *Ng Fung Ho v. White*, 259 U.S. 276, 42 S.Ct. 492, 66 L.Ed. 938 (1922). Though the Court was willing to entertain these habeas challenges to Government exclusion and deportation decisions, in no case did the Court question the right of immigration officials to temporarily detain aliens while exclusion or deportation proceedings were ongoing.

By the mid-20th century, the number of aliens in deportation proceedings being released on parole rose considerably. See, *e.g.*, *Carlson v. Landon*, 342 U.S., at 538, n. 31, 72 S.Ct. 525. Nonetheless, until 1952 habeas corpus petitions remained the only means by which deportation orders could be challenged. *Heikkila v. Barber*, 345 U.S. 229, 236-237, 73 S.Ct. 603, 97 L.Ed. 972 (1953). Under this regime, an alien who had been paroled but wished to challenge a final deportation order had to place himself in Government custody before filing a habeas petition challenging the order. *Bridges v. Wixon*, 326 U.S. 135, 140, 65 S.Ct. 1443, 89 L.Ed. 2103 (1945). Given this, it is not surprising that the Court was not faced with numerous habeas claims brought by aliens seeking release from detention pending deportation.

So far as I am aware, not until 1952 did we en-

tertain such a challenge. See *Carlson v. Landon, supra.* And there, we reaffirmed the power of Congress to order the temporary detention of aliens during removal proceedings. *Id.*, at 538, 72 S.Ct. 525. In *Reno v. Flores,* we likewise rejected a similar challenge to such detention. And, *Flores* was a wide-ranging class action in which 28 U.S.C. § 2241 was but one of several statutes invoked as the basis for federal jurisdiction. 507 U.S., at 296, 113 S.Ct. 1439. All in all, it appears that in 1789, and thereafter until very recently, the writ was not generally available to aliens to challenge their detention while removal proceedings were ongoing.

***540** Because a majority of the Court has determined that jurisdiction exists over respondent's claims, I need not conclusively decide the thorny question whether 8 U.S.C. § 1226(e) violates the Suspension Clause. For present purposes, it is enough to say that in my view, § 1226(e) unambiguously bars habeas challenges to the Attorney General's decisions regarding the temporary detention of criminal aliens under § 1226(c) pending removal. That said, because a majority of the Court has determined that there is jurisdiction, and because I agree with the majority's resolution of the merits of respondent's challenge, I join in all but Part I of the Court's opinion.

Justice SOUTER, with whom Justice STEVENS and Justice GINSBURG join, concurring in part and dissenting in part.

Respondent Kim is an alien lawfully admitted to permanent residence in the United States. He claims that the Constitution forbids the Immigration and Naturalization Service (INS) from detaining him under 8 U.S.C. § 1226(c) unless his detention serves a government interest, such as preventing flight or danger to the community. He contends that due process affords him a right to a hearing before an impartial official,[FN1] giving him a chance to show that ****1727** he poses no risk that would justify confining him between the moment the Government claims he is removable and the adjudication of the Government's claim.

FN1. Kim does not claim a hearing before any specific official. The generality of his claim may reflect the fact, noted just below, that the INS released him on bond without any hearing whatsoever after the District Court entered its judgment in this case. App. 11-13. Accordingly, there is no occasion to enquire whether due process requires access to any particular arbiter, such as one unaffiliated with the INS. I therefore use the neutral term "impartial" in describing the hearing Kim claims.

I join Part I of the Court's opinion, which upholds federal jurisdiction in this case, but I dissent from the Court's disposition***541** on the merits. The Court's holding that the Constitution permits the Government to lock up a lawful permanent resident of this country when there is concededly no reason to do so forgets over a century of precedent acknowledging the rights of permanent residents, including the basic liberty from physical confinement lying at the heart of due process. The INS has never argued that detaining Kim is necessary to guarantee his appearance for removal [FN2] proceedings or to protect anyone from danger in the meantime. Instead, shortly after the District Court issued its order in this case, the INS, *sua sponte* and without even holding a custody hearing, concluded that Kim "would not be considered a threat" and that any risk of flight could be met by a bond of $5,000. App. 11-13. He was released soon thereafter, and there is no indication that he is not complying with the terms of his release.

FN2. In 1996, Congress combined "deportation" and "exclusion" proceedings into a single "removal" proceeding. Illegal Immigration Reform and Immigrant Responsibility Act of 1996, Pub.L. 104-208, § 304(a), 110 Stat. 3009-587, adding 8 U.S.C. § 1229a. Because this case requires consideration of cases decided both before and after 1996, this opinion refers to "removal" generally but, where the context requires, distinguishes between "deportation" of aliens who have entered the United States and "exclusion" of aliens who seek entry.

The Court's approval of lengthy mandatory detention can therefore claim no justification in national emergency or any risk posed by Kim particularly. The Court's judgment is unjustified by past cases or current facts, and I respectfully dissent.

I

At the outset, there is the Court's mistaken suggestion that Kim "conceded" his removability, *ante,* at

1712, 1717, and n. 6, 1722. The Court cites no statement before any court conceding removability, and I can find none. At the first opportunity, Kim applied to the Immigration Court for withholding of removal, Brief for Respondent 9, n. 12, and he ***542** represents that he intends to assert that his criminal convictions are not for removable offenses and that he is independently eligible for statutory relief from removal, *id.*, at 11-12; see also *ante*, at 1717, n. 6. In his brief before the Ninth Circuit, Kim stated that his removability was "an open question," that he was "still fighting [his] removal administratively," and that the Immigration Court had yet to hold a merits hearing. Brief of Petitioner-Appellee in No. 99-17373(CA9), pp. 4, 13-14, 24, 33-34, and n. 28, 48-49. At oral argument here, his counsel stated that Kim was challenging his removability. See Tr. of Oral Arg. 36-38, 44.

The suggestion that Kim should have contested his removability in this habeas corpus petition, *ante*, at 1717, and n. 6, misses the point that all he claims, or could now claim, is that his detention pending removal proceedings violates the Constitution. Challenges to removability itself, and applications for relief from removal, are usually submitted in the first instance to an immigration judge. See 8 U.S.C. § 1229a(a)(3). The Immigration Judge had not yet held an initial hearing on the substantive issue of removability when Kim filed his habeas petition in the District Court, even though Kim had been detained for over three months under § 1226(c). If Kim's habeas corpus petition had claimed "that he himself was not 'deportable,' " as the Court suggests it should have, *ante*, at 1717, the District Court ****1728** would probably have dismissed the claim as unexhausted. *E.g.*, *Espinal v. Filion*, No. 00-CIV-2647-HB-JCF, 2001 WL 395196 (S.D.N.Y., Apr.17, 2001). Kim did not, therefore, "conced[e] that he is deportable," *ante*, at 1722, by challenging removability before the Immigration Judge and challenging detention in a federal court.[FN3]

FN3. The Court's effort to explain its reference to a nonexistent concession, *ante*, at 1717, n. 6, seeks to gain an advantage from the fact that the Immigration and Nationality Act uses the word "deportable" in various ways, one being to describe classes of aliens who may be removed if the necessary facts are proven, *e. g.*, § 1227(a), and another to describe aliens who have actually been adjudged as being in the United States unlawfully, *e. g.*, § 1229b. An alien is not adjudged "deportable" until an order enters "concluding that the alien is deportable or ordering deportation," and such an order is not final until affirmed by the Board of Immigration Appeals or until the time expires for seeking review. §§ 1101(a)(47)(A)-(B). To suggest, as the Court seems to do, that an alien has conceded removability simply because he does not dispute that he has been charged with facts that will render him removable if those facts are later proven is like saying that a civil defendant has conceded liability by failing to move to dismiss the complaint under Federal Rule of Civil Procedure 12(b)(6) or that a criminal defendant has conceded guilt by failing to dispute the validity of the indictment. But even if the Court's reasoning were sound, it would not cover Kim's situation, for he has stated (and the Court acknowledges) his intent to contest the sufficiency of his criminal convictions as a basis for removal. *Ante*, at 1717, n. 6. This discussion, which the Court calls a "detour," *ante*, at 1717, is necessary only because of the Court's insistence in stating that Kim conceded that he is "deportable." *Ante*, at 1712, 1717, 1722.

***543** Kim may continue to claim the benefit of his current status unless and until it is terminated by a final order of removal. 8 CFR § 1.1(p) (2002). He may therefore claim the due process to which a lawful permanent resident is entitled.

II

A

It has been settled for over a century that all aliens within our territory are "persons" entitled to the protection of the Due Process Clause. Aliens "residing in the United States for a shorter or longer time, are entitled, so long as they are permitted by the government of the United States to remain in the country, to the safeguards of the Constitution, and to the protection of the laws, in regard to their rights of person and of property, and to their civil and criminal responsibility." *Fong Yue Ting v. United States*, 149 U.S. 698, 724, 13 S.Ct. 1016, 37 L.Ed. 905 (1893). *The Japanese Immigrant Case*, 189 U.S. 86, 100-101, 23 S.Ct. 611, 47 L.Ed. 721 (1903), settled any lin-

gering doubt that the Fifth Amendment's Due Process Clause gives aliens a right to challenge mistreatment of their person or property.

The constitutional protection of an alien's person and property is particularly strong in the case of aliens lawfully ***544** admitted to permanent residence (LPRs). The immigration laws give LPRs the opportunity to establish a life permanently in this country by developing economic, familial, and social ties indistinguishable from those of a citizen. In fact, the law of the United States goes out of its way to encourage just such attachments by creating immigration preferences for those with a citizen as a close relation, 8 U.S.C. §§ 1153(a)(1), (3)-(4), and those with valuable professional skills or other assets promising benefits to the United States, §§ 1153(b)(1)-(5).

Once they are admitted to permanent residence, LPRs share in the economic freedom enjoyed by citizens: they may compete for most jobs in the private and public sectors without obtaining job-specific authorization, and apart from the franchise, jury duty, and certain forms of public assistance, their lives are generally indistinguishable from those of United States citizens. That goes for obligations as well as opportunities. Unlike temporary, nonimmigrant aliens, who are generally****1729** taxed only on income from domestic sources or connected with a domestic business, 26 U.S.C. § 872, LPRs, like citizens, are taxed on their worldwide income, 26 CFR §§ 1.1-1(b), 1.871-1(a), 1.871-2(b) (2002). Male LPRs between the ages of 18 and 26 must register under the Selective Service Act of 1948, ch. 625, Tit. I, § 3, 62 Stat. 605. [FN4] "Resident aliens, like citizens, pay taxes, support the economy, serve in the Armed Forces, and contribute in myriad other ways to our society." *In re Griffiths*, 413 U.S. 717, 722, 93 S.Ct. 2851, 37 L.Ed.2d 910 (1973). And if they choose, they may apply for full membership in the national polity through naturalization.

FN4. Although an LPR may seek exemption or discharge from registration on the grounds of alienage, such an action permanently bars the LPR from seeking United States citizenship. 8 U.S.C. § 1426(a).

The attachments fostered through these legal mechanisms are all the more intense for LPRs brought to the United States as children. They grow up here as members of the society around them, probably without much touch with their country of citizenship, probably considering the United ***545** States as home just as much as a native-born, younger brother or sister entitled to United States citizenship. "[M]any resident aliens have lived in this country longer and established stronger family, social, and economic ties here than some who have become naturalized citizens." *Woodby v. INS*, 385 U.S. 276, 286, 87 S.Ct. 483, 17 L.Ed.2d 362 (1966). Kim is an example. He moved to the United States at the age of six and was lawfully admitted to permanent residence when he was eight. His mother is a citizen, and his father and brother are LPRs. LPRs in Kim's situation have little or no reason to feel or to establish firm ties with any place besides the United States.[FN5]

FN5. See also *Welch v. Ashcroft*, 293 F.3d 213, 215 (C.A.4 2002) (detainee obtained LPR status at age 10); *Hoang v. Comfort*, 282 F.3d 1247, 1252-1253 (C.A.10 2002) (ages 3 and 15), cert. pending, No. 01-1616 [Reporter's Note: See *post*, p. 1963].

Our decisions have reflected these realities. As early as 1892, we addressed an issue of statutory construction with the realization that "foreigners who have become domiciled in a country other than their own, acquire rights and must discharge duties in many respects the same as possessed by and imposed upon the citizens of that country, and no restriction on the footing upon which such persons stand by reason of their domicil of choice ... is to be presumed." *Lau Ow Bew v. United States*, 144 U.S. 47, 61-62, 12 S.Ct. 517, 36 L.Ed. 340.[FN6] Fifty years later in dealing with a question of evidentiary competence in *Bridges v. Wixon*, 326 U.S. 135, 65 S.Ct. 1443, 89 L.Ed. 2103 (1945), we said that "the notions of fairness on which our legal system is founded" applied with full force to "aliens whose roots may have become, as ***546** they are in the present case, deeply fixed in this land," *id.*, at 154, 65 S.Ct. 1443. And in *Kwong Hai Chew v. Colding*, 344 U.S. 590, 73 S.Ct. 472, 97 L.Ed. 576 (1953), we read the word "excludable" in a regulation as having no application to LPRs, since such a reading would have been questionable given "a resident alien's constitutional right to due process." *Id.*, at 598-599, 73 S.Ct. 472. [FN7] ****1730** Kwong Hai Chew adopted the statement of Justice Murphy, concurring in Bridges, that " 'once an alien lawfully enters and resides in this country he becomes invested with the rights guaran-

teed by the Constitution to all people within our borders. Such rights include those protected by the First and the Fifth Amendments and by the due process clause of the Fourteenth Amendment. None of these provisions acknowledges any distinction between citizens and resident aliens. They extend their inalienable privileges to all "persons" and guard against any encroachment on those rights by federal or state authority.' " 344 U.S., at 596-597, n. 5, 73 S.Ct. 472 (quoting *Bridges, supra,* at 161, 65 S.Ct. 1443). See also *United States v. Verdugo-Urquidez,* 494 U.S. 259, 271, 110 S.Ct. 1056, 108 L.Ed.2d 222 (1990) ("[A]liens receive constitutional protections when they have come within the territory of the United States and developed substantial connections with this country"); *Woodby, supra,* at 285, 87 S.Ct. 483 (holding that deportation orders must be supported by clear, unequivocal, and convincing evidence owing to the "drastic deprivations that may follow when a resident of this country is compelled by our Government to forsake all the bonds formed here and go to a foreign land where he often has no contemporary identification"); *Johnson v. Eisentrager,* 339 U.S. 763, 770-771, 70 S.Ct. 936, 94 L.Ed. 1255 (1950) ("The alien, to whom the United States has been traditionally***547** hospitable, has been accorded a generous and ascending scale of rights as he increases his identity with our society. ... [A]t least since 1886, we have extended to the person and property of resident aliens important constitutional guaranties-such as the due process of law of the Fourteenth Amendment").

FN6. In *The Venus,* 8 Cranch 253, 3 L.Ed. 553 (1814), we held that property belonging to American citizens who were resident in England during the War of 1812 was to be treated as belonging to English proprietors for purposes of prize law. We stated that, as permanent residents of England, the American citizens were "bound, by such residence, to the society of which they are members, subject to the laws of the state, and owing a qualified allegiance thereto; they are obliged to defend it, (with an exception in favor of such a subject, in relation to his native country) in return for the protection it affords them, and the privileges which the laws bestow upon them as subjects," *id.,* at 282.

FN7. "Although the holding [in *Kwong Hai Chew*] was one of regulatory interpretation, the rationale was one of constitutional law. Any doubts that *Chew* recognized constitutional rights in the resident alien returning from a brief trip abroad were dispelled by *Rosenberg v. Fleuti,* [374 U.S. 449, 83 S.Ct. 1804, 10 L.Ed.2d 1000 (1963),] where we described *Chew* as holding 'that the returning resident alien is entitled as a matter of due process to a hearing on the charges underlying any attempt to exclude him.' 374 U.S., at 460[, 83 S.Ct. 1804]." *Landon v. Plasencia,* 459 U.S. 21, 33, 103 S.Ct. 321, 74 L.Ed.2d 21 (1982).

The law therefore considers an LPR to be at home in the United States, and even when the Government seeks removal, we have accorded LPRs greater protections than other aliens under the Due Process Clause. In *Landon v. Plasencia,* 459 U.S. 21, 103 S.Ct. 321, 74 L.Ed.2d 21 (1982), we held that a long-term resident who left the country for a brief period and was placed in exclusion proceedings upon return was entitled to claim greater procedural protections under that Clause than aliens seeking initial entry. The LPR's interest in remaining in the United States is, we said, "without question, a weighty one." *Id.,* at 34, 103 S.Ct. 321. See also *Rosenberg v. Fleuti,* 374 U.S. 449, 83 S.Ct. 1804, 10 L.Ed.2d 1000 (1963); *Kwong Hai Chew, supra.*

Although LPRs remain subject to the federal removal power, that power may not be exercised without due process, and any decision about the requirements of due process for an LPR must account for the difficulty of distinguishing in practical as well as doctrinal terms between the liberty interest of an LPR and that of a citizen.[FN8] In evaluating Kim's challenge to his mandatory detention under 8 U.S.C. § 1226(c), the only reasonable starting point is the traditional doctrine concerning the Government's physical confinement of individuals.[FN9]

FN8. This case provides no occasion to determine the constitutionality of mandatory detention of aliens other than LPRs.

FN9. The statement that "[i]n the exercise of its broad power over naturalization and immigration, Congress regularly makes rules that would be unacceptable if applied to citizens," *Mathews v. Diaz,* 426 U.S. 67, 79-80,

96 S.Ct. 1883, 48 L.Ed.2d 478 (1976), cannot be read to leave limitations on the liberty of aliens unreviewable. *Ante*, at 1716. *Diaz* involved a federal statute that limited eligibility for a federal medical insurance program to United States citizens and LPRs who had been continuously resident in the United States for five years. 426 U.S., at 69-70, 96 S.Ct. 1883. Reversing a lower court judgment that this statute violated equal protection, we said this:

> "In the exercise of its broad power over naturalization and immigration, Congress regularly makes rules that would be unacceptable if applied to citizens. The exclusion of aliens and the reservation of the power to deport have no permissible counterpart in the Federal Government's power to regulate the conduct of its own citizenry. The fact that an Act of Congress treats aliens differently from citizens does not in itself imply that such disparate treatment is 'invidious.' " *Id.*, at 79-80, 96 S.Ct. 1883 (footnotes omitted).

Taken in full, the meaning of this paragraph is plain: through the exercise of the deportation and exclusion power, Congress exposes aliens to a treatment (expulsion) that cannot be imposed on citizens. The cases cited in the footnotes to this paragraph accordingly all concern Congress's power to enact grounds of exclusion or deportation. *Id.*, at 80, nn. 14-15, 96 S.Ct. 1883 (citing *Kleindienst v. Mandel*, 408 U.S. 753, 92 S.Ct. 2576, 33 L.Ed.2d 683 (1972); *Galvan v. Press*, 347 U.S. 522, 74 S.Ct. 737, 98 L.Ed. 911 (1954); and *Harisiades v. Shaughnessy*, 342 U.S. 580, 72 S.Ct. 512, 96 L.Ed. 586 (1952)); cf. *ante*, at 1716 (quoting *Diaz*, *supra*, at 81, n. 17, 96 S.Ct. 1883, in turn quoting *Harisiades*). Nothing in *Diaz* addresses due process protection of liberty or purports to sanction any particular limitation on the liberty of LPRs under circumstances comparable to those here.

Even on its terms, the *Diaz* statement is dictum. We acknowledged immediately that "[t]he real question presented by *[Diaz]* is not whether discrimination between citizens and aliens is permissible; rather, it is whether the statutory discrimination *within* the class of aliens-allowing benefits to some aliens but not to others-is permissible." 426 U.S., at 80, 96 S.Ct. 1883. Our holding that Congress could consider length of residence and immigration status in allocating medical insurance in no way suggests the existence of a federal power to imprison a long-term resident alien when the Government concedes that there is no need to do so.

The Court does not explain why it believes the *Diaz* dictum to be relevant to this case, other than to repeat it and identify prior instances of its quotation. *Ante*, at 1716. The Court resists calling the statement " 'dictum,' " *ibid.*, but it does not deny that *Diaz* involved "discrimination *within* the class of aliens" rather than "discrimination between citizens and aliens," 426 U.S., at 80, 96 S.Ct. 1883, thus making any suggestion about Congress's power to treat citizens and aliens differently unnecessary to the holding. Nor does the Court deny that *Diaz* dealt with an equal protection challenge to the allocation of medical insurance and had nothing to say on the subject of the right of LPRs to protection of their liberty under the Due Process Clause. See *supra*, at 1728-1730.

****1731 *548** B

Kim's claim is a limited one: not that the Government may not detain LPRs to ensure their appearance at removal hearings,***549** but that due process under the Fifth Amendment conditions a potentially lengthy detention on a hearing and an impartial decisionmaker's finding that detention is necessary to a governmental purpose. He thus invokes our repeated decisions that the claim of liberty protected by the Fifth Amendment is at its strongest when government seeks to detain an individual. THE CHIEF JUSTICE wrote in 1987 that "[i]n our society liberty is the norm, and detention prior to trial or without trial is the carefully limited exception." *United States v. Salerno*, 481 U.S. 739, 755, 107 S.Ct. 2095, 95 L.Ed.2d 697. See also *Reno v. Flores*, 507 U.S. 292, 316, 113 S.Ct.

1439, 123 L.Ed.2d 1 (1993) (O'CONNOR, J., concurring) ("The institutionalization of an adult by the government triggers heightened, substantive due process scrutiny"); *Foucha v. Louisiana*, 504 U.S. 71, 80, 112 S.Ct. 1780, 118 L.Ed.2d 437 (1992) ("Freedom from bodily restraint has always been at the core of the liberty protected by the Due Process Clause from arbitrary governmental action"); *id.*, at 90, 112 S.Ct. 1780 (KENNEDY, J., dissenting) ("As incarceration of persons is the most common and one of the most feared instruments of state oppression and state indifference, we ought to acknowledge at the outset that freedom from this restraint is essential to the basic definition of liberty in the Fifth and Fourteenth Amendments of the Constitution").

Accordingly, the Fifth Amendment permits detention only where "heightened, substantive due process scrutiny" finds a " 'sufficiently compelling' " governmental ****1732** need. *Flores, supra*, at 316, 113 S.Ct. 1439 (O'CONNOR, J., concurring) (quoting *Salerno*, 481 U.S., at 748, 107 S.Ct. 2095). In deciding in *Salerno* that this principle did not categorically bar pretrial detention of criminal defendants without bail under the Bail Reform Act of 1984, it was crucial that the statute provided that, "[i]n a full-blown adversary hearing, the Government must convince a neutral decisionmaker by clear and convincing evidence that no conditions of release can reasonably assure the safety of the community or any person." *Id.*, at 750, 107 S.Ct. 2095 (citing ***550**18 U.S.C. § 3142(f)). We stressed that the Act was not a "scattershot attempt to incapacitate those who are merely suspected of" serious offenses, 481 U.S., at 750, 107 S.Ct. 2095, and held that due process allowed some pretrial detention because the Act confined it to a sphere of real need: "[w]hen the Government proves by clear and convincing evidence that an arrestee presents an identified and articulable threat to an individual or the community." *Id.*, at 751, 107 S.Ct. 2095; see also *Foucha, supra*, at 81, 112 S.Ct. 1780 (calling the pretrial detention statute in *Salerno* a "sharply focused scheme").

We have reviewed involuntary civil commitment statutes the same way. In *Addington v. Texas*, 441 U.S. 418, 99 S.Ct. 1804, 60 L.Ed.2d 323 (1979), we held that a State could not civilly commit the mentally ill without showing by "clear and convincing evidence" that the person was dangerous to others, *id.*, at 433, 99 S.Ct. 1804. The elevated burden of proof was demanded because "[l]oss of liberty calls for a showing that the individual suffers from something more serious than is demonstrated by idiosyncratic behavior." *Id.*, at 427, 99 S.Ct. 1804. The statutory deficiency was the same in *Foucha*, where we held that Louisiana's civil commitment statute failed due process because the individual was denied an "adversary hearing at which the State must prove by clear and convincing evidence that he is demonstrably dangerous to the community." 504 U.S., at 81, 112 S.Ct. 1780. See also *id.*, at 88, 112 S.Ct. 1780 (opinion of O'CONNOR, J.) (civil commitment depends on a "necessary connection between the nature and purposes of confinement").

In addition to requiring a compelling reason for detention, we held that the class of persons affected must be narrow and, in pretrial-type lockup, the time must be no more than what is reasonably necessary before the merits can be resolved. In the case of the Bail Reform Act, we placed weight on the fact that the statute applied only to defendants suspected of "the most serious of crimes," *Salerno, supra*, at 747, 107 S.Ct. 2095; see also *Foucha, supra*, at 81, 112 S.Ct. 1780, while the statute in *Kansas v. Hendricks*, 521 U.S. 346, 117 S.Ct. 2072, 138 L.Ed.2d 501 (1997), likewise provided ***551** only for confinement of "a limited subclass of dangerous persons" who had committed " 'a sexually violent offense' " and who suffered from " 'a mental abnormality or personality disorder' " portending " 'predatory acts of sexual violence,' " *id.*, at 357, 117 S.Ct. 2072 (quoting Kan. Stat. Ann. § 59-29a02(a) (1994)). *Salerno* relied on the restriction of detention "by the stringent time limitations of the Speedy Trial Act," 481 U.S., at 747, 107 S.Ct. 2095, whereas in *Foucha*, it was a fault that the statute did not impose any comparable limitation, 504 U.S., at 82, 112 S.Ct. 1780 (citing *Salerno*). See also *Jackson v. Indiana*, 406 U.S. 715, 738, 92 S.Ct. 1845, 32 L.Ed.2d 435 (1972) ("At the least, due process requires that the nature and duration of commitment bear some reasonable relation to the purpose for which the individual is committed").

The substantive demands of due process necessarily go hand in hand with the procedural, and the cases insist at the least on an opportunity for a detainee to challenge the reason claimed for committing him. *E.g.*, *Hendricks, supra*, at 357, 117 S.Ct. 2072 (stating that civil commitment was permitted where "the confinement takes place pursuant to proper procedures

and evidentiary standards"); ****1733***Foucha, supra,* at 81-82, 112 S.Ct. 1780 (invalidating a statute under which "the State need prove nothing to justify continued detention"); *Salerno, supra,* at 751, 107 S.Ct. 2095 ("[T]he procedures by which a judicial officer evaluates the likelihood of future dangerousness are specifically designed to further the accuracy of that determination"); *Addington, supra,* at 427, 99 S.Ct. 1804 (requiring a heightened burden of proof "to impress the factfinder with the importance of the decision and thereby perhaps to reduce the chances that inappropriate commitments will be ordered").

These cases yield a simple distillate that should govern the result here. Due process calls for an individual determination before someone is locked away. In none of the cases cited did we ever suggest that the government could avoid the Due Process Clause by doing what § 1226(c) does, by selecting a class of people for confinement on a categorical basis and denying members of that class any chance to dispute the ***552** necessity of putting them away. The cases, of course, would mean nothing if citizens and comparable residents could be shorn of due process by this sort of categorical sleight of hand. Without any "full-blown adversary hearing" before detention, *Salerno, supra,* at 750, 107 S.Ct. 2095, or heightened burden of proof, *Addington, supra,* or other procedures to show the government's interest in committing an individual, *Foucha, supra; Jackson, supra,* procedural rights would amount to nothing but mechanisms for testing group membership. Cf. *Foucha, supra,* at 88, 112 S.Ct. 1780 (opinion of O'CONNOR, J.) ("Nor would it be permissible to treat all acquittees alike, without regard for their particular crimes"). And if procedure could be dispensed with so expediently, so presumably could the substantive requirements that the class of detainees be narrow and the detention period strictly limited. *Salerno, supra; Hendricks, supra.*

C

We held as much just two Terms ago in *Zadvydas v. Davis,* 533 U.S. 678, 121 S.Ct. 2491, 150 L.Ed.2d 653 (2001), which stands for the proposition that detaining an alien requires more than the rationality of a general detention statute; any justification must go to the alien himself. *Zadvydas* considered detention of two aliens, Zadvydas and Ma, who had already been ordered removed and therefore enjoyed no lawful immigration status. Their cases arose because actual removal appeared unlikely owing to the refusal of their native countries to accept them, with the result that they had been detained not only for the standard 90-day removal period, during which time most removal orders are executed, but beyond that period because the INS considered them to be a " 'risk to the community' " and " 'unlikely to comply with the order of removal.' " *Id.,* at 682, 121 S.Ct. 2491 (quoting 8 U.S.C. § 1231(a)(6) (1994 ed., Supp. V)). Zadvydas and Ma challenged their continued and potentially indefinite detention under the Due Process Clause of the Fifth Amendment.

***553** The *Zadvydas* opinion opened by noting the clear applicability of general due process standards: physical detention requires both a "special justification" that "outweighs the 'individual's constitutionally protected interest in avoiding physical restraint' " and "adequate procedural protections." 533 U.S., at 690, 121 S.Ct. 2491 (quoting *Hendricks,* 521 U.S., at 356, 117 S.Ct. 2072). Nowhere did we suggest that the "constitutionally protected liberty interest" in avoiding physical confinement, even for aliens already ordered removed, was conceptually different from the liberty interest of citizens considered in *Jackson, Salerno, Foucha,* and *Hendricks.* On the contrary, we cited those cases and expressly adopted their reasoning, even as applied to aliens whose right to remain in the United States had already been declared forfeited. *Zadvydas,* 533 U.S., at 690, 121 S.Ct. 2491.

****1734** Thus, we began by positing commonly accepted substantive standards and proceeded to enquire into any "special justification" that might outweigh the aliens' powerful interest in avoiding physical confinement "under [individually ordered] release conditions that may not be violated." *Id.,* at 696, 121 S.Ct. 2491. We found nothing to justify the Government's position. The statute was not narrowed to a particularly dangerous class of aliens, but rather affected "aliens ordered removed for many and various reasons, including tourist visa violations." *Id.,* at 691, 121 S.Ct. 2491. The detention itself was not subject to "stringent time limitations," *Salerno, supra,* at 747, 107 S.Ct. 2095, but was potentially indefinite or even permanent, *Zadvydas,* 533 U.S., at 691, 121 S.Ct. 2491. Finally, although both Zadvydas and Ma appeared to be dangerous, this conclusion was undermined by defects in the procedures resulting in the finding of dangerousness. *Id.,* at 692, 121 S.Ct. 2491. The upshot was such serious doubt about the consti-

tutionality of the detention statute that we construed it as authorizing continuing detention only when an alien's removal was "reasonably foreseeable." *Id.*, at 699, 121 S.Ct. 2491. In the cases of Zadvydas and Ma, the fact that their countries of citizenship were not willing to accept their return weighed ***554** against the Government's interest in keeping them at hand for instant removal, even though both were serious flight risks, *id.*, at 684-686, 690, 121 S.Ct. 2491, and we remanded the cases to the Courts of Appeals for a determination of the sufficiency of the Government's interests in Zadvydas's and Ma's individual detention, *id.*, at 702, 121 S.Ct. 2491.

Our individualized analysis and disposition in *Zadvydas* support Kim's claim for an individualized review of his challenge to the reasons that are supposed to justify confining him prior to any determination of removability. In fact, aliens in removal proceedings have an additional interest in avoiding confinement, beyond anything considered in *Zadvydas:* detention prior to entry of a removal order may well impede the alien's ability to develop and present his case on the very issue of removability. See Brief for Citizens and Immigrants for Equal Justice et al. as *Amici Curiae* 20-23. After all, our recognition that the serious penalty of removal must be justified on a heightened standard of proof, *Woodby v. INS*, 385 U.S. 276, 87 S.Ct. 483, 17 L.Ed.2d 362 (1966), will not mean all that much when the INS can detain, transfer, and isolate aliens away from their lawyers, witnesses, and evidence. Cf. *Stack v. Boyle*, 342 U.S. 1, 4, 72 S.Ct. 1, 96 L.Ed. 3 (1951). Kim's right to defend against removal gives him an even stronger claim than the aliens in *Zadvydas* could raise.

In fact, the principal dissenters in *Zadvydas,* as well as the majority, accepted a theory that would compel success for Kim in this case. The dissent relied on the fact that Zadvydas and Ma were subject to a "final order of removal" and had "no right under the basic immigration laws to remain in this country," 533 U.S., at 720, 121 S.Ct. 2491 (opinion of KENNEDY, J.), in distinguishing them "from aliens with a lawful right to remain here," *ibid.*, which is Kim's position. The dissent recognized the right of all aliens, even "removable and inadmissible" ones, to be "free from detention that is arbitrary or capricious," *id.*, at 721, 121 S.Ct. 2491, and the opinion explained that detention would pass the "arbitrary or capricious" test "when ***555** necessary to avoid the risk of flight or danger to the community," *ibid.* [FN10]

FN10. In support of its standard, the dissent relied on a report by the United Nations High Commissioner for Refugees, which likewise countenanced detention only "in cases of *necessity*" and stated, under a heading entitled "Guideline 3: Exceptional Grounds for Detention":

> "There should be a presumption against detention. Where there are monitoring mechanisms which can be employed as viable alternatives to detention, (such as reporting obligations or guarantor requirements ...), these should be applied *first* unless there is evidence to suggest that such an alternative will not be effective in the individual case. Detention should therefore only take place after a full consideration of all possible alternatives, or when monitoring mechanisms have been demonstrated not to have achieved the lawful and legitimate purpose." United Nations High Commissioner for Refugees, Revised Guidelines on Applicable Criteria and Standards Relating to the Detention of Asylum Seekers (Feb.1999) (hereinafter Detention Guidelines) (emphasis in original), cited in *Zadvydas*, 533 U.S., at 721, 121 S.Ct. 2491 (opinion of KENNEDY, J.).
>
> The High Commissioner also referred to the "minimum procedural guarante[e]" for a detainee "either personally or through a representative, to challenge the necessity of the deprivation of liberty at the review hearing, and to rebut any findings made." Detention Guidelines, Guideline 5: Procedural Safeguards.

****1735** Hence the *Zadvydas* dissent's focus on "whether there are adequate procedures" allowing "persons once subject to detention to show that through rehabilitation, new appreciation of their responsibilities, or under other standards, they no longer present special risks or danger if put at large." *Ibid.;* see also *id.*, at 722-723, 121 S.Ct. 2491. Indeed, there is further support for Kim's claim in the dissent's view that the process afforded to removable aliens like

Zadvydas and Ma "[went] far toward th[e] objective" of satisfying procedural due process, *id.*, at 722, 121 S.Ct. 2491; [FN11] that process stands in stark contrast to the total absence***556** of custody review available in response to Kim's claim that he is neither dangerous nor a flight risk.[FN12] The removable aliens in *Zadvydas* had the right to a hearing, to representation, and to consideration of facts bearing on risk of flight, including criminal history, evidence of rehabilitation, and ties to the United States. *Ibid.* The references to the "necessity" of an individual's detention and the discussion of the procedural requirements show that the principal *Zadvydas* dissenters envisioned due process as individualized review, and the Court of Appeals in this case correctly held that Kim's mandatory detention without benefit of individualized enquiry violated due process as understood by both the *Zadvydas* majority and Justice KENNEDY in dissent. *Kim v. Ziglar*, 276 F.3d 523, 535-537 (C.A.9 2002). Every Court of Appeals to consider the detention of ***557** an LPR under § 1226(c) after *Zadvydas* reached the ****1736** same conclusion. [FN13]

FN11. The scheme considered in *Zadvydas* did not provide review immediately after the removability determination; the dissent noted that custody review hearings usually occurred within three months of a transfer to a postorder detention unit, with further reviews annually or more frequently if the alien requested them. 533 U.S., at 722-723, 121 S.Ct. 2491. But the lag was fitted to the circumstances. In the usual case, removal in fact would come promptly; it is only when it did not that interim custody raised a substantial issue. The issue here, of course, is not timing but the right to individualized review at all.

FN12. The hearing recognized in *Matter of Joseph*, 22 I. & N. Dec. 799, 1999 WL 339053 (BIA 1999), is no response to this deficiency. As the Court notes, the " '*Joseph* hearing' " only permits an alien to show that he does not meet the statutory criteria for mandatory detention under § 1226(c). *Ante*, at 1712-1713, and n. 3. Kim argues that, even assuming that he fits under the statute, the statute's application to LPRs like him does not fit under the Due Process Clause.

Justice KENNEDY recognizes that the Due Process Clause requires "an individualized determination as to [an LPR's] risk of flight and dangerousness if the continued detention [becomes] unreasonable or unjustified." *Ante*, at 1722 (concurring opinion). It is difficult to see how Kim's detention in this case is anything but unreasonable and unjustified, since the Government concedes that detention is not necessary to completion of his removal proceedings or to the community's protection. Certainly the fact that "there is at least some merit to the [INS's] charge" that Kim should be held to be removable, *ibid.*, does not establish a compelling reason for detention. The INS releases many noncriminal aliens on bond or on conditional parole under § 1226(a)(2) pending removal proceedings, and the fact that Kim has been convicted of criminal offenses does not on its own justify his detention, see *supra*, at 1732-1733.

FN13. *Welch v. Ashcroft*, 293 F.3d 213 (C.A.4 2002); *Hoang v. Comfort*, 282 F.3d 1247 (C.A.10 2002), cert. pending, No. 01-1616 [Reporter's Note: See *post*, p. 1963]; *Patel v. Zemski*, 275 F.3d 299 (C.A.3 2001). The Seventh Circuit's decision in *Parra v. Perryman*, 172 F.3d 954 (1999), preceded our decision in *Zadvydas*.

D

In sum, due process requires a "special justification" for physical detention that "outweighs the individual's constitutionally protected interest in avoiding physical restraint" as well as "adequate procedural protections." *Zadvydas*, 533 U.S., at 690-691, 121 S.Ct. 2491 (internal quotation marks omitted). "There must be a 'sufficiently compelling' governmental interest to justify such [an] action, usually a punitive interest in imprisoning the convicted criminal or a regulatory interest in forestalling danger to the community." *Flores*, 507 U.S., at 316, 113 S.Ct. 1439 (O'CONNOR, J., concurring) (quoting *Salerno*, 481 U.S., at 748, 107 S.Ct. 2095). The class of persons subject to confinement must be commensurately narrow and the duration of confinement limited accordingly. *Zadvydas*, *supra*, at 691, 121 S.Ct. 2491; *Hendricks*, 521 U.S., at 368, 117 S.Ct. 2072; *Foucha*, 504 U.S., at 81-82, 112 S.Ct. 1780; *Salerno*, *supra*, at

747, 750, 107 S.Ct. 2095. Justice KENNEDY's dissenting view in *Zadvydas*, like that of the majority, disapproved detention that is not "necessary" to counter a risk of flight or danger; it is "arbitrary or capricious" and violates the substantive component of the Due Process Clause. 533 U.S., at 721, 121 S.Ct. 2491. Finally, procedural due process requires, at a minimum, that a detainee have the benefit of an impartial decisionmaker able to consider particular circumstances on the issue of necessity. *Id.*, at 691-692, 121 S.Ct. 2491; *id.*, at 722, 121 S.Ct. 2491 (KENNEDY, J., dissenting); *Foucha*, *supra*, at 81, 112 S.Ct. 1780; *Salerno*, *supra*, at 750, 107 S.Ct. 2095. See also *Kenyeres v. Ashcroft*, *ante*, 538 U.S., at 1305, 123 S.Ct. 1386 (KENNEDY, J., in chambers) ("An opportunity to present one's meritorious grievances to a court supports the legitimacy and public acceptance of a statutory regime").

***558** By these standards, Kim's case is an easy one. "[H]eightened, substantive due process scrutiny," *Flores*, *supra*, at 316, 113 S.Ct. 1439 (O'CONNOR, J., concurring), uncovers serious infirmities in § 1226(c). Detention is not limited to dangerous criminal aliens or those found likely to flee, but applies to all aliens claimed to be deportable for criminal convictions, even where the underlying offenses are minor. *E.g.*, *Michel v. INS*, 206 F.3d 253, 256 (C.A.2 2000) (possession of stolen bus transfers); *Matter of Bart*, 20 I. & N. Dec. 436, 1992 WL 195800 (BIA 1992) (issuance of a bad check). Detention under § 1226(c) is not limited by the kind of time limit imposed by the Speedy Trial Act, and while it lasts only as long as the removal proceedings, those proceedings have no deadline and may last over a year. See Brief for Citizens and Immigrants for Equal Justice et al. as *Amici Curiae* 23-26; see also *id.*, at 10-20 (citing examples). Section 1226(c) neither requires nor permits an official to determine whether Kim's detention was necessary to prevent flight or danger.

Kim's detention without particular justification in these respects, or the opportunity to enquire into it, violates both components of due process, and I would accordingly affirm the judgment of the Court of Appeals requiring the INS to hold a bail hearing to see whether detention is needed to avoid a risk of flight or a danger to the community.[FN14] This is surely little enough, given the fact that 8 U.S.C. § 1536 gives an LPR charged with ****1737** being a foreign terrorist the right to a release hearing pending a determination that he be removed.

FN14. Although Kim is a convicted criminal, we are not concerned here with a State's interest in punishing those who violate its criminal laws. Kim completed the criminal sentence imposed by the California courts on February 1, 1999, and California no longer has any interest in incarcerating him.

III

The Court proceeds to the contrary conclusion on the premise that "the Government may constitutionally detain ***559** deportable aliens during the limited period necessary for their removal proceedings." *Ante*, at 1719. Sometimes, maybe often, it may, but that is not the point in contention. Kim has never challenged the INS's general power to detain aliens in removal proceedings or even its power to detain him in particular, if it affords him a chance to participate in an enquiry whether he poses a flight risk or a danger to society.

The question, rather, is whether Congress has chosen " 'a constitutionally permissible means of implementing' [its immigration] power." *Zadvydas*, *supra*, at 695, 121 S.Ct. 2491 (quoting *INS v. Chadha*, 462 U.S. 919, 941-942, 103 S.Ct. 2764, 77 L.Ed.2d 317 (1983)); see also *Carlson v. Landon*, 342 U.S. 524, 537, 72 S.Ct. 525, 96 L.Ed. 547 (1952) (stating that the deportation power "is, of course, subject to judicial intervention under the 'paramount law of the Constitution' "). As in *Zadvydas*, we are here concerned not with the power to remove aliens but with the "important constitutional limitations" on that power's exercise. *Zadvydas*, *supra*, at 695, 121 S.Ct. 2491.[FN15]

FN15. The Court's citations to *Wong Wing v. United States*, 163 U.S. 228, 16 S.Ct. 977, 41 L.Ed. 140 (1896), are therefore inapposite. *Ante*, at 1717, 1722. In *Wong Wing*, we hypothesized that detention "necessary to give effect" to the removal of an alien "would be valid"; the use of the subjunctive mood makes plain that the issue was not before the Court. 163 U.S., at 235, 16 S.Ct. 977. *Wong Wing* certainly did not hold that detention in aid of removal was exempt from the Due Process Clause.

Moreover, the *Wong Wing* dictum must be understood in light of the common contemporary practice in the federal courts of releasing aliens on bail pending deportation proceedings. While the Court is correct that the first statutory provision permitting Executive officials to release aliens on bond was enacted in 1907, *ante*, at 1717, n. 7, the Court ignores the numerous judicial grants of bail prior to that year. See, *e. g.*, *United States ex rel. Turner v. Williams*, 194 U.S. 279, 283, 24 S.Ct. 719, 48 L.Ed. 979 (1904) (stating that the lower court admitted the appellant to bail pending appeal to this Court); *Fong Yue Ting v. United States*, 149 U.S. 698, 704, 13 S.Ct. 1016, 37 L.Ed. 905 (1893) (same); *United States v. Moy Yee Tai*, 109 F. 1 (C.A.2 1901) *(per curiam)*; *In re Lum Poy*, 128 F. 974, 975 (CC Mont.1904) (noting that "the practice in California, Idaho, and Oregon has been and is to admit Chinese persons to bail pending an investigation into the lawfulness of their residence within the United States, and before any order for deportation has been made"); *In re Ah Tai*, 125 F. 795, 796-797 (Mass.1903) (identifying a practice in several federal districts admitting aliens to bail, both before an initial finding of deportability and during the appeal therefrom); *In re Chow Goo Pooi*, 25 F. 77, 78 (CC Cal. 1884). The breadth of this practice is evident from one court's statement that "[t]o hold bail altogether inadmissible ... would invalidate hundreds of existing recognizances." *Ah Tai, supra*, at 797.

As Judge Augustus Hand later noted, the only change in 1907 was that bail decisions were committed to the discretion of Executive officials, rather than judges:

"Prior to the passage by Congress in 1907 of the act empowering the administrative official to fix bail, various courts made it a practice to grant bail to aliens during deportation hearings.... In our opinion that act was intended to place the general determination of granting bail in the hands of the authorities charged with the enforcement of the deportation laws as persons ordinarily best qualified to perform such a function...." *United States ex rel. Potash v. District Director of Immigration and Naturalization*, 169 F.2d 747, 751 (C.A.2 1948) (citations omitted).

Thus, while *Wong Wing* stated in passing that detention may be used where it was "part of the means necessary" to the removal of aliens, 163 U.S., at 235, 16 S.Ct. 977, that statement was written against the background of the general availability of judicial relief from detention pending deportation proceedings.

The judicial grants of bail prior to 1907 arose in federal habeas proceedings. Contrary to Justice O'CONNOR's objection to federal jurisdiction in this matter, there is indeed a "history of routine reliance on habeas jurisdiction to challenge the detention of aliens without bail pending the conclusion of removal proceedings." *Ante*, at 1724 (opinion concurring in part and concurring in judgment).

****1738 *560** A

The Court spends much effort trying to distinguish *Zadvydas*, but even if the Court succeeded, success would not avail it much. *Zadvydas* was an application of principles developed in over a century of cases on the rights of aliens and the limits on the government's power to confine individuals. While there are differences between detention pending removal proceedings (this case) and detention after entry of a removal order *(Zadvydas)*, the differences merely point up ***561** that Kim's is the stronger claim, see *supra*, at 1734-1735. In any case, the analytical framework set forth in *Salerno*, *Foucha*, *Hendricks*, *Jackson*, and other physical confinement cases applies to both, and the two differences the Court relies upon fail to remove Kim's challenge from the ambit of either the earlier cases or *Zadvydas* itself.[FN16]

FN16. The Court tellingly does not even mention *Salerno*, *Foucha*, *Hendricks*, or *Jackson*.

First, the Court says that § 1226(c) "serves the purpose of preventing deportable criminal aliens from

fleeing prior to or during their removal proceedings." *Ante*, at 1720. Yes it does, and the statute in *Zadvydas*, viewed outside the context of any individual alien's detention, served the purpose of preventing aliens ordered to be deported from fleeing prior to actual deportation. In each case, the fact that a statute serves its purpose in general fails to justify the detention of an individual in particular. Some individual aliens covered by § 1226(c) have meritorious challenges to removability or claims for relief from removal. See Brief for Citizens and Immigrants for Equal Justice et al. as *Amici Curiae* 10-20. As to such aliens, as with Zadvydas and Ma, the Government has only a weak reason under the immigration laws for detaining them.

The Court appears to respond that Congress may require detention of removable aliens based on a general conclusion that detention is needed for effective removal of criminal aliens on a class-wide basis. But on that logic *Zadvydas* should have come out the other way, for detention of the entire class of aliens who have actually been ordered removed will in general "serv[e] the purpose" of their effective removal, *ante*, at 1720. Yet neither the Court nor Justice KENNEDY in dissent suggested that scrutiny under the Due Process Clause could be satisfied at such a general level. Rather, we remanded the individual cases of Zadvydas and Ma for determinations of the strength of the Government's ***562** reasons for detaining them in particular. 533 U.S., at 702, 121 S.Ct. 2491.[FN17] We can insist on nothing less here, since the Government's justification for detaining individuals like Zadvydas and Ma, who had no right to remain in this country and were proven flight risks and dangers to society, *id.*, at 684-686, 121 S.Ct. 2491, is certainly stronger (and at least no weaker) than its interest in detaining a lawful permanent resident who has not been ****1739** shown (or even claimed) to be either a flight risk or a threat to the community.[FN18]

FN17. The Court is therefore mistaken in suggesting that I view the detention of the individual aliens in *Zadvydas* as serving a governmental purpose. *Ante*, at 1720, n. 10. The Court confuses the "statute in *Zadvydas*, viewed outside the context of any individual alien's detention," *supra*, at 1738, with the "detention at issue in *Zadvydas*," *ante*, at 1720, n. 10, namely, the detention of Zadvydas and Ma as individuals. The due process analysis in *Zadvydas* concentrated on the latter, holding that the detention of Zadvydas and Ma would not serve a legitimate immigration purpose if there were no "significant likelihood of removal in the reasonably foreseeable future." 533 U.S., at 701, 121 S.Ct. 2491. Thus, the Court's suggestion in this case that "the statutory provision" authorizes "detention" that prevents deportable aliens from fleeing as a general matter, *ante*, at 1720, is no sufficient basis for claiming *Zadvydas* as support for the Court's methodology or result. Rather, the Court should consider whether the detention of Kim as an individual is necessary to a compelling Government interest, just as it did for the detention of Zadvydas and Ma as individuals. As the Government concedes, Kim's individual detention serves no Government purpose at all.

FN18. Nor can the general risk of recidivism, *ante*, at 1715, justify this measure. The interest in preventing recidivism may be vindicated "by the ordinary criminal processes involving charge and conviction, the use of enhanced sentences for recidivists, and other permissible ways of dealing with patterns of criminal conduct." *Foucha v. Louisiana*, 504 U.S. 71, 82, 112 S.Ct. 1780, 118 L.Ed.2d 437 (1992). The ability to detain aliens in removal proceedings who pose threats to the community also satisfies this interest. Cf. *United States v. Salerno*, 481 U.S. 739, 107 S.Ct. 2095, 95 L.Ed.2d 697 (1987). The alternative to detention, of course, is not unrestricted liberty, but supervised release, which also addresses the risk of recidivism. *Zadvydas*, 533 U.S., at 696, 121 S.Ct. 2491.

The Court's closest approach to a reason justifying class-wide detention without exception here is a Senate Report stating that over 20% of nondetained criminal aliens failed ***563** to appear for removal hearings. *Ante*, at 1715 (citing S.Rep. No. 104-48 (1995) (hereinafter Senate Report)). To begin with, the Senate Report's statistic treats all criminal aliens alike and does not distinguish between LPRs like Kim, who are likely to have developed strong ties within the United States, see *supra*, at 1728-1730, and temporary visitors or illegal entrants. Even more importantly, the statistic tells us nothing about flight risk at all because,

as both the Court and the Senate Report recognize, the INS was making its custody determinations not on the ground of likelihood of flight or dangerousness, but "in large part, according to the number of beds available in a particular region." Senate Report 23, cited *ante*, at 1715; see also H.R.Rep. No. 104-469, p. 124 (1995) (hereinafter House Report) ("[I]n deciding to release a deportable alien, the INS is making a decision that the alien cannot be detained given its limited resources"); App. 26-27. This meant that the INS often could not detain even the aliens who posed serious flight risks. Senate Report 23 (noting that the INS had only 3,500 detention beds for criminal aliens in the entire country and the INS district comprising Pennsylvania, Delaware, and West Virginia had only 15). The desperate lack of detention space likewise had led the INS to set bonds too low, because "if the alien is not able to pay, the alien cannot be released, and a needed bed space is lost." House Report 124. The Senate Report also recognized that, even when the INS identifies a criminal alien, the INS "often refuses to take action because of insufficient agents to transport prisoners, or because of limited detention space." Senate Report, at 2. Four former high-ranking INS officials explained the Court's statistics as follows: "Flight rates were so high in the early 1990s not as a result of chronic discretionary judgment failures by [the] INS in assessing which aliens might pose a flight risk. Rather, the rates were alarmingly high because decisions to release aliens in proceedings were driven overwhelmingly***564** by a lack of detention facilities." Brief for T. Alexander Aleinikoff et al. as *Amici Curiae* 19.

The Court's recognition that, at the time of the enactment of § 1226(c), "individualized bail determinations had not been tested under optimal conditions" is thus rather an understatement. *Ante*, at 1720. The Court does not explain how the INS's resource-driven decisions to release individuals who pose serious flight risks, and their predictable failure to attend removal hearings, could justify a systemwide denial of any opportunity for release to individuals like Kim who are neither flight risks nor threats to the public.

The Court also cites a report by the Department of Justice relied upon by the Government. Department of Justice, Office of the Inspector General, Immigration and Naturalization Service, Deportation of Aliens After Final Orders Have Been Issued, Rep. No. I-96-03 (Mar.1996) (hereinafter Post-Order Report), cited *ante*, at 1715, 1716. But that report does not even address the issue of detention before a ****1740** determination has been made that an alien is removable. As its title indicates, the Post-Order Report analyzed removal rates only for aliens who had already received final orders of removability.[FN19] See also Post-Order Report, App. 25 ("This current review was limited to actions taken by INS to remove aliens after [immigration judges or the Board of Immigration Appeals] had issued final orders"). [FN20]

FN19. Detention of such aliens is governed by the statute at issue in *Zadvydas*, § 1231(a), not by § 1226(c).

FN20. A prior study by the same body noted that nonappearance rates by aliens in deportation proceedings before issuance of orders to deport (aliens, that is, like Kim) were approximately 23% for the first half of 1993 and 21% for all of 1992. Department of Justice, Office of the Inspector General, Case Hearing Process in the Executive Office for Immigration Review, Rep. No. I-93-03, p. 5 (May 1994) (hereinafter Case Hearing Report). Congress appears to have considered these relevant figures, Senate Report 2 ("Over 20 percent of nondetained criminal aliens fail to appear for deportation proceedings"), without referring to irrelevant postorder numbers. The Government relied on the Post-Order Report in its brief and at oral argument. Brief for Petitioners 7, 19-20, and n. 7; Tr. of Oral Arg. 23. The Government did not cite the Case Hearing Report.

***565** More relevant to this case, and largely ignored by the Court, is a recent study conducted at the INS's request concluding that 92% of criminal aliens (most of whom were LPRs) who were released under supervisory conditions attended all of their hearings. 1 Vera Institute of Justice, Testing Community Supervision for the INS: An Evaluation of the Appearance Assistance Program, pp. ii, 33, 36 (Aug. 1, 2000) (hereinafter Vera Institute Study). Even without supervision, 82% of criminal aliens released on recognizance showed up, as did 77% of those released on bond, leading the reporters to conclude that "supervision was especially effective for criminal aliens" and that "mandatory detention of virtually all criminal

aliens is not necessary." *Id.*, at ii, 36, 42.[FN21]

FN21. The Court throws in minor criticisms of the Vera Institute Study that have no bearing on its relevance here. The institute's supervised release program included 127 criminal aliens who would be subject to mandatory detention under § 1226(c) because of their criminal histories. Vera Institute Study 33. Since the INS seeks Kim's removal on the grounds of either crimes of moral turpitude or an aggravated felony, see *ante*, at 1712, n. 1, the fact that most of the Vera Institute Study's subjects were convicted of crimes of moral turpitude but not an aggravated felony, *ante*, at 1716, n. 5, is of no moment. Nor were all of the aliens studied subject to intensive supervision, *ibid.;* most were subject to "regular supervision," which involved no mandatory reporting sessions beyond an initial orientation session with supervision staff and required only that the alien keep the staff apprised of a current mailing address, appear in court, and comply with the orders of the immigration judge, Vera Institute Study 17-18. That the institute considered various screening criteria before authorizing supervised release, *ante*, at 1716, n. 5, does not undermine the value of the study, since any program adopted by the INS in lieu of mandatory detention could do the same. Cf. *Zadvydas*, 533 U.S., at 696, 121 S.Ct. 2491. Finally, the fact that Kim sought and was granted release on bond rather than supervised release, *ante*, at 1716, n. 5, does not detract from the relevance of the Vera Institute Study. Regardless of what methods the INS decides to employ to prevent flight, the study supports the conclusion that mandatory detention under § 1226(c) is "not necessary" to prevent flight, Vera Institute Study 42, and therefore violates the Due Process Clause.

***566** The Court nowhere addresses the Vera Institute's conclusion that criminal aliens released under supervisory conditions are overwhelmingly likely to attend their hearings. Instead, the Court fixes on the fact that 23% of the comparison group of aliens released on bond failed to attend all of their hearings. *Ante*, at 1715. Since the bond determinations were made by the INS, the fact remains that resource-driven concerns may well have led the INS to release individuals who were evident flight risks on bonds too low to ensure their attendance. See *supra*, at 1739. The Court's assumption that the INS's bond determinations involved "individualized screening" for flight risk, *ante*, ****1741** at 1716, finds no support in the Vera Institute Study. Thus the Court's reliance on the failure rate of aliens released by the INS on bond, whether it comes from the Senate Report or the Vera Institute Study, *ante*, at 1715-1716, does not support its conclusion.

In sum, the Court's inapposite statistics do not show that detention of criminal LPRs pending removal proceedings, even on a general level, is necessary to ensure attendance at removal hearings, and the Vera Institute Study reinforces the point by establishing the effectiveness of release under supervisory conditions, just as we did in *Zadvydas*, 533 U.S., at 696, 121 S.Ct. 2491 (noting that imprisonment was constitutionally suspect given the possibility of "supervision under release conditions that may not be violated").[FN22] The Court's first attempt to distinguish *Zadvydas* accordingly fails.

FN22. This case accordingly presents no issue of " 'court ordered release,' " *ante*, at 1721, n. 14 (quoting *Zadvydas*, *supra*, at 713, 121 S.Ct. 2491 (KENNEDY, J., dissenting)); in this case, for example, the INS reached its own determination to release Kim on bond. This case concerns only the uncontroversial requirement that detention serve a compelling governmental interest and that detainees be afforded adequate procedures ensuring against erroneous confinement. *E. g.*, *Salerno*, 481 U.S., at 751, 107 S.Ct. 2095 ("[T]he procedures by which a judicial officer evaluates the likelihood of future dangerousness are specifically designed to further the accuracy of that determination"); see also *Zadvydas*, *supra*, at 721, 121 S.Ct. 2491 (KENNEDY, J., dissenting) (stating that due process requires "adequate procedures" permitting detained aliens to show that "they no longer present special risks or danger" warranting confinement).

***567** The Court's second effort is its claim that mandatory detention under § 1226(c) is generally of a

"much shorter duration" than the incarceration at issue in *Zadvydas. Ante*, at 1720. While it is true that removal proceedings are unlikely to prove "indefinite and potentially permanent," 533 U.S., at 696, 121 S.Ct. 2491, they are not formally limited to any period, and often extend beyond the time suggested by the Court, that is, " an average time of 47 days" or, for aliens who exercise their right of appeal, "an average of four months," *ante*, at 1721; see also Case Hearing Report 12 (finding that the average time from receipt of charging documents by a detained alien to a final decision by the immigration judge was 54 days). Even taking these averages on their face, however, they are no legitimate answer to the due process claim to individualized treatment and hearing.

In the first place, the average time from receipt of charging documents to decision obscures the fact that the alien may receive charging documents only after being detained for a substantial period. Kim, for example, was not charged until five weeks after the INS detained him. Brief for Respondent 9.

Even more revealing is an explanation of the raw numbers that are averaged out. As the Solicitor General conceded, the length of the average detention period in great part reflects the fact that the vast majority of cases involve aliens who raise no challenge to removability at all. Tr. of Oral Arg. 57. LPRs like Kim, however, will hardly fit that pattern. Unlike many illegal entrants and temporary nonimmigrants, LPRs are the aliens most likely to press substantial ***568** challenges to removability requiring lengthy proceedings. [FN23] See Vera Institute Study 33, 37 (stating that many of the criminal aliens studied were "lawful permanent residents who have spent much or all of their adult lives in the United States" and that 40% of those released on supervision "were allowed to stay in the United States"). Successful challenges often require several months of proceedings, see Brief for Citizens****1742** and Immigrants for Equal Justice et al. as *Amici Curiae* 10-20; detention for an open-ended period like this falls far short of the "stringent time limitations" held to be significant in *Salerno*, 481 U.S., at 747, 107 S.Ct. 2095. The potential for several months of confinement requires an individualized finding of necessity under *Zadvydas*. [FN24]

FN23. Criminal aliens whose "removal proceedings are completed while [they are] still serving time for the underlying conviction," *ante*, at 1721, are irrelevant to this case, since they are never detained pending removal proceedings under § 1226(c).

FN24. The Court calls several months of unnecessary imprisonment a "very limited time," *ante*, at 1721, n. 12. But the due process requirement of an individualized finding of necessity applies to detention periods shorter than Kim's. *Schall v. Martin*, 467 U.S. 253, 104 S.Ct. 2403, 81 L.Ed.2d 207 (1984), involved a maximum detention period of 17 days, *id.*, at 270, 104 S.Ct. 2403, yet our due process analysis noted that the detainee was entitled to a hearing in which he could challenge the necessity of his confinement before an impartial decisionmaker required to state the facts and reasons underlying any decision to detain, *id.*, at 276-277, 104 S.Ct. 2403. The 90-day removal period in § 1231(a)(1) not only has a fixed endpoint, but also applies only after the alien has been adjudged removable, § 1231(a)(1)(B). The discussion of that provision in *Zadvydas* cannot be read to indicate any standard of permissible treatment of an LPR who has not yet been found removable.

B

The Court has failed to distinguish *Zadvydas* in any way that matters. It does no better in its effort to portray its result in this case as controlled by *Carlson v. Landon*, 342 U.S. 524, 72 S.Ct. 525, 96 L.Ed. 547 (1952), and *Reno v. Flores*, 507 U.S. 292, 113 S.Ct. 1439, 123 L.Ed.2d 1 (1993).

***569** 1

Carlson did not involve mandatory detention. It involved a system similar to the one Kim contends for here. The aliens' detention pending deportation proceedings in *Carlson* followed a decision on behalf of the Attorney General that custody was preferable to release on bond or on conditional parole. 342 U.S., at 528, n. 5, 72 S.Ct. 525 (citing Internal Security Act of 1950, § 23, 64 Stat. 1011). We sustained that decision because we found that the District Director of the INS, to whom the Attorney General had delegated the authority, did not abuse his discretion in concluding that "evidence of membership [in the Communist Party] plus personal activity in supporting and extending the

Party's philosophy concerning violence" made the aliens "a menace to the public interest." 342 U.S., at 541, 72 S.Ct. 525. The significance of looking to "personal activity" in our analysis was complemented by our express recognition that there was "no evidence or contention that all persons arrested as deportable ... for Communist membership are denied bail," *id.*, at 541-542, 72 S.Ct. 525, and by a Government report showing that in fact "the large majority" of aliens arrested on charges comparable to the *Carlson* petitioners' were allowed bail. *Id.*, at 542, 72 S.Ct. 525; see also *id.*, at 538, n. 31, 72 S.Ct. 525 (noting that it was "quite clear" that "detention without bond has been the exception").

Indeed, the *Carlson* Court's constitutional analysis relying on the opportunity for individualized bond determinations simply followed the argument in the brief for the United States in that case. In response to the aliens' argument that the statute made it "mandatory on the Attorney General to deny bail to alien communists," the Government stated, "[w]e need not consider the constitutionality of such a law for that is not what the present law provides." Brief for Respondent in *Carlson v. Landon*, O.T.1951, No. 35, p. 19; see also *id.*, at 20 ("[T]he act itself, by its terms, leaves no doubt that the power to detain is discretionary, not mandatory"). The ***570** Government also presented the following excerpt of a statement of the chairman of the House Judiciary Committee:

> " 'No particular hardship is going to be worked on anyone because, bear this fact in mind, *it is not mandatory on the Attorney General to hold people in detention. He is given discretionary power.******1743*** If in his judgment one of the class of people I have just mentioned ought to be held for paramount national reasons, he may detain him, but he is not obliged to hold anybody, *although I trust that in every case of a subversive or a hardened criminal he will.' " Id.*, at 19 (quoting 96 Cong. Rec. 10449-10450 (1950) (statement of Rep. Walter) (emphasis added in Brief for Respondent in *Carlson v. Landon, supra*)).

In short, *Carlson* addressed a very different scheme from the one here.

It is also beside the point for the Court to suggest that "like respondent in the present case," the *Carlson* petitioners challenged their detention because "there had been no finding that they were unlikely to appear for their deportation proceedings." *Ante*, at 1718. Each of them was detained after being found to be "a menace to the public interest," 342 U.S., at 541, 72 S.Ct. 525, and their challenge, unlike Kim's, was that the INS had locked them up for an impermissible reason (danger to society) whereas only a finding of risk of flight would have justified detention. *Id.*, at 533-534, 72 S.Ct. 525 ("It is urged ... that where there is no evidence to justify a fear of unavailability for the hearings or for the carrying out of a possible judgment of deportation, denial of bail under the circumstances of these cases is an abuse of discretion"); see also *id.*, at 551, 72 S.Ct. 525 (Black, J., dissenting) ("A power to put in jail because dangerous cannot be derived from a power to deport").[FN25] ***571** We rejected that contention, leaving the petitioners in detention because they were dangerous to the public interest, and on that issue, an official had determined that the *Carlson* petitioners ought to be detained. Here, however, no impartial decisionmaker has determined that detaining Kim is required for any purpose at all, and neither the Government nor the Court even claims such a need.

> FN25. Similarly, the question presented in *Butterfield v. Zydok*, argued and decided together with *Carlson*, was "[w]hether, in exercising his discretion to grant or withhold bail pending final determination of the deportability of an alien, the Attorney General is justified in denying bail on the ground that the alien is an active participant in Communist Party affairs, or whether he is bound also to consider other circumstances, particularly the likelihood that the alien will report as ordered." Pet. for Cert. in *Butterfield v. Zydok*, O.T.1951, No. 136, p. 2.

For the same reason it is beside the point to note that the unsuccessful *Carlson* petitioners' brief raised a claim that detention without reference to facts personal to their individual cases would violate the Due Process Clause. *Ante*, at 1718. As the United States pointed out in its own *Carlson* brief, that issue was never presented, since the District Director's exercise of discretion was based on individualized determinations that the petitioners were dangerous to society. See *supra*, at 1742-1743.[FN26] Nor is the Court entitled to invoke *Carlson* by saying that the INS "had adopted a policy of refusing to grant bail" to alien Commun-

ists, which made the Attorney General's discretion to release aliens on bond merely "ostensibl [e]." *Ante*, at 1718. The *Carlson* Court found that "[t]here is no evidence or contention that all persons***572** arrested as deportable ... for Communist membership are denied****1744** bail." 342 U.S., at 541-542, 72 S.Ct. 525.

> FN26. While a prior conviction may sometimes evidence a risk of future danger, it is not conclusive in all cases, and Kim is a good example, given that the Government found that he "would not be considered a threat." App. 13. Indeed, the Court acknowledges that convictions are only "relevant to" dangerousness, *ante*, at 1719, n. 9; it does not state that they compel a finding of danger in all cases. As even the *Zadvydas* dissent recognized, due process requires that detained criminal aliens be given an opportunity to rebut the necessity of detention by showing "that through rehabilitation, new appreciation of their responsibilities, or under other standards, they no longer present special risks or danger if put at large." 533 U.S., at 721, 121 S.Ct. 2491 (opinion of KENNEDY, J.).

The Court refuses to accept the opinion of the *Carlson* Court and the representations made in the successful brief for the Government in that case. The Court not only fails to acknowledge the actual holding of *Carlson;* it improperly adopts as authority statements made in dissent. The Court's emphatic assertion that "[t]here was no 'individualized findin[g]' of likely future dangerousness as to any of the aliens," *ante*, at 1718, rests entirely on opinions voiced in dissent, although the Court only mentions this fact in a footnote, *ante*, at 1718, n. 8 (citing 342 U.S., at 549, 550, n. 5, 552, 72 S.Ct. 525 (Black, J., dissenting), and *id.*, at 567, 72 S.Ct. 525 (Frankfurter, J., dissenting)). Statements made in dissent do not override the *Carlson* Court's express finding that the petitioners in that case were found to be not only members of the Communist Party, but "active in Communist work" and to "a degree, minor perhaps in [one] case, [participants] in Communist activities." *Id.*, at 541, 72 S.Ct. 525.[FN27]

> FN27. In the footnote immediately following its citation of dissenting opinions, the Court cites a passage from the *Carlson* majority opinion confirming that the *Carlson* petitioners' detention rested on the "allegation, supported by affidavits, that the [INS's] dossier of each petitioner contained evidence" of Communist Party membership and activities "to the prejudice of the public interest." 342 U.S., at 530, 72 S.Ct. 525 (quoted *ante*, at 1718, n. 9).

Moreover, the *Carlson* dissenters did not suggest that no individualized determinations had occurred; rather, they contended that the District Director's individual findings of dangerousness were unsupported by sufficient reliable evidence. See *id.*, at 549-550, 72 S.Ct. 525 (Black, J., dissenting) (arguing that the aliens were not in fact " 'dangerous' " at all); *id.*, at 552, 72 S.Ct. 525 (arguing that danger findings were based on "the rankest hearsay evidence" instead of the INS being "required to prove" that the detainee was dangerous); *id.*, at 555-556, 72 S.Ct. 525 (arguing that activity within the Communist movement did not make the aliens "dangerous"); ***573***id.*, at 566-567, 72 S.Ct. 525 (Frankfurter, J., dissenting) (arguing that evidence of Communist party membership was "insufficient to show danger"; that evidence of some aliens' activities was stale; and that the history of treatment of the aliens involved forced him to conclude that the Attorney General was not actually exercising discretion on an individual basis).[FN28] And even if the *Carlson* dissenters were factually correct, all that would show is that the *Carlson* Court was misled (by the Government, no less) into deciding the case on the basis that individualized findings of dangerousness were made. Given that the *Carlson* Court clearly believed that it was deciding a case in which individualized determinations occurred, it is serious error for this Court to treat *Carlson* as deciding a case in which they did not.

> FN28. Justice Black's dissenting statement that one of the aliens was " 'not likely to engage in any subversive activities,' " 342 U.S., at 549, 72 S.Ct. 525, does not amount to a "specific finding of nondangerousness," *ante*, at 1718. On the contrary, the Court expressly stated that the Government could prove dangerousness based on "personal activity" in the Communist Party; it simply was not required to go so far as to show "specific acts of sabotage or incitement to subversive action." *Carlson, supra*, at 541, 72 S.Ct. 525.

> Thus while there was no finding of "subversive action," there certainly was a finding of "danger," albeit one that Justice Black found unconvincing.
>
> > Likewise, Justice Frankfurter's statement in dissent that the Solicitor General of the United States had "advised" that "it has been the Government's policy ... to terminate bail" for aliens awaiting deportation who were "present active Communists," 342 U.S., at 568, 72 S.Ct. 525, is difficult to reconcile with the contrary statements in both the majority opinion and the United States's brief in *Carlson*, see *supra*, at 1742-1743. Whatever its basis, Justice Frankfurter's reference to a "policy" of bail denials does not bear the weight that the Court places upon it today.

Finally, the Court gets no help from the isolated passages of the *Carlson* opinion that it quotes. Although the *Carlson* ****1745** Court stated that detention was " 'a part' " of deportation procedure, *ante*, at 1718 (quoting *Carlson*, 342 U.S., at 538, 72 S.Ct. 525), it nowhere said that detention was part of every deportation proceeding. Instead, it acknowledged that "the far larger part" of aliens deportable on "subversive charges" were released***574** on "modest bonds or personal recognizances" pending their deportation proceedings. *Id.*, at 538, n. 31, 72 S.Ct. 525. Contrary to the Court's holding today, the *Carlson* Court understood that discretion to admit to bail was necessary, since "[o]f course [a] purpose to injure [the United States] could not be imputed generally to all aliens subject to deportation." *Id.*, at 538, 72 S.Ct. 525. It was only in this light that the Court said that the INS could "justify [its] refusal of bail by reference to the legislative scheme to eradicate the evils of Communist activity"; the Court was referring to the INS's power to detain on a finding that a given alien was engaged in Communist activity that threatened society. *Id.*, at 543, 72 S.Ct. 525. The Court nowhere addressed, much less approved, the notion that the INS could justify, or that Congress could compel, an individual's detention without any determination at all that his detention was necessary to some Government purpose. And if there was ever any doubt on this point, it failed to survive our subsequent, unanimous recognition that the detention scheme in *Carlson* required "some level of individualized determination" as a precondition to detention. *INS v. National Center for Immigrants' Rights, Inc.*, 502 U.S. 183, 194-195, 112 S.Ct. 551, 116 L.Ed.2d 546 (1991); see also *Flores*, 507 U.S., at 313, 113 S.Ct. 1439. *Carlson* stands at odds with the Court's outcome in this case.

2

The Court's paragraph on *Flores*, *supra*, is no more help to it. Like *Carlson*, *Flores* did not involve mandatory detention, and the INS regulation at issue in *Flores* actually required that alien juveniles be released pending removal proceedings unless the INS determined that detention was required " 'to secure [the juvenile's] timely appearance before the [INS] or the immigration court or to ensure the juvenile's safety or that of others.' " 507 U.S., at 297, 113 S.Ct. 1439 (quoting 8 CFR § 242.24(b)(1) (1992)). Again, Kim agrees that such a system is constitutional and contends for it here. *Flores* turned not on the necessity of detention, but on the regulation's restriction***575** that alien juveniles could only be released to the custody of the juvenile's parent, legal guardian, or another specified adult relative. Even this limitation, however, was subject to exception for releasing a juvenile to another person in " 'unusual and compelling circumstances and in the discretion of the [INS] district director or chief patrol agent.' " 507 U.S., at 297, 113 S.Ct. 1439 (quoting 8 CFR § 242.24(b)(4) (1992)).

Thus, the substantive due process issue in *Flores* was not whether the aliens' detention was necessary to a governmental purpose: " 'freedom from physical restraint' " was "not at issue" at all because, as juveniles, the aliens were " 'always in some form of custody.' " 507 U.S., at 302, 113 S.Ct. 1439 (quoting *Schall v. Martin*, 467 U.S. 253, 265, 104 S.Ct. 2403, 81 L.Ed.2d 207 (1984)). Since " '[l]egal custody' rather than 'detention' more accurately describes the reality of the arrangement" in *Flores*, 507 U.S., at 298, 113 S.Ct. 1439, that case has no bearing on this one, which concerns the detention of an adult.[FN29]

> FN29. Nor is it to the point for the Court to quote *Flores* as rejecting the aliens' challenge to a " ' "blanket" presumption of the unsuitability of custodians other than parents, close relatives, and guardians.' " *Ante*, at 1719 (quoting 507 U.S., at 313, 113 S.Ct. 1439). *Flores* expressly stated that the regulation did not implicate the core liberty interest in avoiding physical confinement. *Id.*,

at 302, 113 S.Ct. 1439 ("The 'freedom from physical restraint' ... is not at issue in this case").

****1746** *Flores* is equally distinguishable at the procedural level. We held that the procedures for the custody decision sufficed constitutionally because any determination to keep the alien "in the custody of the [INS], released on recognizance, or released under bond" was open to review by the immigration court, the Board of Immigration Appeals, and the federal courts. *Id.*, at 308, 113 S.Ct. 1439. Like the aliens in *Carlson*, the juveniles in *Flores* were subject to a different system and raised a different complaint from Kim's.

While *Flores* holds that the INS may use "reasonable presumptions and generic rules" in carrying out its statutory discretion, 507 U.S., at 313, 113 S.Ct. 1439, it gave no *carte blanche* to general***576** legislation depriving an entire class of aliens of liberty during removal proceedings. *Flores* did not disturb established standards that detention of an adult must be justified in each individual instance.[FN30]

FN30. Indeed, the passages the Court quotes from *Flores* did not concern the regulation's constitutionality at all, but rather its validity as an implementation of the authorizing statute. *Id.*, at 313, 113 S.Ct. 1439 ("Respondents also contend that the INS regulation violates the statute because it relies upon a 'blanket' presumption"). *Flores* clearly separated its analysis of the regulation under the Due Process Clause from its analysis of the regulation under the statute. See *id.*, at 300, 113 S.Ct. 1439; see also *id.*, at 318-319, 113 S.Ct. 1439 (O'CONNOR, J., concurring) (pointing out the substantive due process analysis at *id.*, at 301-306, 113 S.Ct. 1439, and the procedural due process analysis at *id.*, at 306-309, 113 S.Ct. 1439).

IV

This case is not about the National Government's undisputed power to detain aliens in order to avoid flight or prevent danger to the community. The issue is whether that power may be exercised by detaining a still lawful permanent resident alien when there is no reason for it and no way to challenge it. The Court's holding that the Due Process Clause allows this under a blanket rule is devoid of even ostensible justification in fact and at odds with the settled standard of liberty. I respectfully dissent.

Justice BREYER, concurring in part and dissenting in part.

I agree with the majority that the courts have jurisdiction, and I join Part I of its opinion. If I believed (as the majority apparently believes, see *ante*, at 1712-1713, and n. 3) that Kim had conceded that he is deportable, then I would conclude that the Government could detain him without bail for the few weeks ordinarily necessary for formal entry of a removal order. Brief for Petitioners 39-40; see *ante*, at 1720-1722. Time limits of the kind set forth in *Zadvydas v. Davis*, 533 U.S. 678, 121 S.Ct. 2491, 150 L.Ed.2d 653 (2001), should govern these and longer periods of detention, for an alien's concession that he is deportable ***577** seems to me the rough equivalent of the entry of an order of removal. See *id.*, at 699-701, 121 S.Ct. 2491 (reading the statute, under constitutional compulsion, as commonly imposing a presumption of a 6-month "reasonable" time limit for post-removal-order detention).

This case, however, is not one in which an alien concedes deportability. As Justice SOUTER points out, Kim argues to the contrary. See *ante*, at 1727-1728 (opinion concurring in part and dissenting in part). Kim claims that his earlier convictions were neither for an " 'aggravated felony' " nor for two crimes of " 'moral turpitude.' " Brief for Respondent 3, 11-12, 31-32, and n. 29. And given shifting lower court views on such matters, I cannot say that his arguments are insubstantial or interposed solely for purposes of delay. See, *e.g.*, *United States v. Corona-Sanchez*, 291 F.3d 1201, 1213 (C.A.9 2002) (petty theft with a prior not an "aggravated felony"). Compare *Omagah v. Ashcroft*, 288 F.3d 254, 259 (C.A.5 2002) (" 'Moral turpitude refers generally to conduct that shocks the public conscience as ****1747** being inherently base, vile, or depraved' "), with *Guarneri v. Kessler*, 98 F.2d 580, 580-581 (C.A.5 1938) ("Moral turpitude" involves " '[a]nything done contrary to justice, honesty, principle or good morals' "), and *Quilodran-Brau v. Holland*, 232 F.2d 183, 184 (C.A.3 1956) ("The borderline of 'moral turpitude' is not an easy one to locate").

That being so-as long as Kim's legal arguments are neither insubstantial nor interposed solely for

purposes of delay-then the immigration statutes, interpreted in light of the Constitution, permit Kim (if neither dangerous nor a flight risk) to obtain bail. For one thing, Kim's constitutional claims to bail in these circumstances are strong. See *ante*, at 1731-1733, 1736 (SOUTER, J., concurring in part and dissenting in part). Indeed, they are strong enough to require us to "ascertain whether a construction of the statute is fairly possible by which the [constitutional] question may ***578** be avoided." *Crowell v. Benson*, 285 U.S. 22, 62, 52 S.Ct. 285, 76 L.Ed. 598 (1932); accord, *Zadvydas*, *supra*, at 689, 121 S.Ct. 2491.

For another, the relevant statutes literally say nothing about an individual who, armed with a strong argument against deportability, might, or might not, fall within their terms. Title 8 U.S.C. § 1226(c) tells the Attorney General to "take into custody any alien who ... *is* deportable" (emphasis added), not one who may, or may not, fall into that category. Indeed, the Government now permits such an alien to obtain bail if his argument against deportability is significantly *stronger* than substantial, *i.e.*, strong enough to make it "substantially unlikely" that the Government will win. *Matter of Joseph*, 22 I. & N. Dec. 799 (BIA 1999). Cf. 8 CFR § 3.19(h)(2)(ii) (2002).

Finally, bail standards drawn from the criminal justice system are available to fill this statutory gap. Federal law makes bail available to a criminal defendant after conviction and pending appeal provided (1) the appeal is "not for the purpose of delay," (2) the appeal "raises a substantial question of law or fact," and (3) the defendant shows by "clear and convincing evidence" that, if released, he "is not likely to flee or pose a danger to the safety" of the community. 18 U.S.C. § 3143(b). These standards give considerable weight to any special governmental interest in detention (*e.g.*, process-related concerns or class-related flight risks, see *ante*, at 1720). The standards are more protective of a detained alien's liberty interest than those currently administered in the Immigration and Naturalization Service's *Joseph* hearings. And they have proved workable in practice in the criminal justice system. Nothing in the statute forbids their use when § 1226(c) deportability is in doubt.

I would interpret the (silent) statute as imposing these bail standards. Cf. *Zadvydas*, *supra*, at 698, 121 S.Ct. 2491; *United States v. Witkovich*, 353 U.S. 194, 201-202, 77 S.Ct. 779, 1 L.Ed.2d 765 (1957); *Kent v. Dulles*, 357 U.S. 116, 129, 78 S.Ct. 1113, 2 L.Ed.2d 1204 (1958). So interpreted, the statute would require the Government to permit a detained alien to seek ***579** an individualized assessment of flight risk and dangerousness as long as the alien's claim that he is not deportable is (1) not interposed solely for purposes of delay and (2) raises a question of "law or fact" that is not insubstantial. And that interpretation, in my view, is consistent with what the Constitution demands. I would remand this case to the Ninth Circuit to determine whether Kim has raised such a claim.

With respect, I dissent from the Court's contrary disposition.

END OF DOCUMENT

Supreme Court of the United States
Margarita FUENTES, Appellant,
v.
Robert L. SHEVIN, Attorney General of Florida, et al.
Paul PARHAM et al., Appellants,
v.
Americo V. CORTESE et al.

Nos. 70-5039, 70-5138.
Argued Nov. 9, 1971.
Decided June 12, 1972.
Rehearing Denied Oct. 10, 1972.

See 93 S.Ct. 177, 180.

Actions challenging constitutionality of Florida and Pennsylvania prejudgment replevin statutes. A three-judge United States District Court for the Southern District of Florida, 317 F.Supp. 954, and a three-judge United States District Court for the Eastern District of Pennsylvania, 326 F.Supp. 127, upheld constitutionality of the statutes, and the Supreme Court noted probable jurisdiction. Mr. Justice Stewart delivered the opinion of the Supreme Court that the prejudgment replevin statutes worked a deprivation of property without procedural due process of law insofar as they denied the right to prior opportunity to be heard before chattels were taken from their possessor.

Judgments of District Courts vacated and cases remanded for further proceedings.

Mr. Justice White filed a dissenting opinion in which Mr. Chief Justice Burger and Mr. Justice Blackmun joined.

Mr. Justice Powell and Mr. Justice Rehnquist took no part in the consideration or decision of the cases.

92k4460 k. In General. Most Cited Cases
(Formerly 92k278(1.1), 92k278(1))

Constitutional right to be heard is basic aspect of duty of government to follow a fair process of decision making when it acts to deprive a person of his possessions; purpose of requirement is not only to ensure abstract fair play to the individual but to protect his

use and possession of property from arbitrary encroachment-to minimize substantively unfair or mistaken deprivations of property, a danger that is especially great when the state seizes goods simply upon application of and for benefit of private party. U.S.C.A.Const. Amend. 14.

Essential reason for requirement of prior hearing before depriving person of property interest is to prevent unfair and mistaken deprivations of property; the hearing must provide a real test and due process is afforded only by the kinds of notice and hearing that are aimed at establishing the validity, or at least the probable validity, of the underlying claim against the alleged debtor. U.S.C.A.Const. Amend. 14.

****1987 *67** Syllabus[FN*]

FN* The syllabus constitutes no part of the opinion of the Court but has been prepared by the Reporter of Decisions for the convenience of the reader. See United States v. Detroit Timber & Lumber Co., 200 U.S. 321, 337, 26 S.Ct. 282, 287, 50 L.Ed. 499.

Appellants, most of whom were purchasers of household goods under conditional sales contracts, challenge the constitutionality of prejudgment replevin provisions of Florida law (in No. 70-5039) and Pennsylvania law (in No. 70-5138). These provisions permit a private party, without a hearing or prior notice to the other party, to obtain a prejudgment writ of replevin through a summary process of ex parte application to a court clerk, upon the posting of a bond for double the value of the property to be seized. The sheriff is then required to execute the writ by seizing the property. Under the Florida statute the officer seizing the property must keep it for three days. During that period the defendant may reclaim possession by posting his own security bond for double the

property's value, in default of which the property is transferred to the applicant for the writ, pending a final judgment in the underlying repossession action. In Pennsylvania the applicant need not initiate a repossession action or allege (as Florida requires) legal entitlement to the property, it being sufficient that he file an 'affidavit of the value of the property'; and to secure a ****1988** post-seizure hearing the party losing the property through replevin must himself initiate a suit to recover the property. He may also post his own counterbond within three days of the seizure to regain possession. Included in the printed-form sales contracts that appellants signed were provisions for the sellers' repossession of the merchandise on the buyers' default. Three-judge District Courts in both cases upheld the constitutionality of the challenged replevin provisions. Held:

1. The Florida and Pennsylvania replevin provisions are invalid under the Fourteenth Amendment since they work a deprivation of property without due process of law by denying the right to a ***68** prior opportunity to be heard before chattels are taken from the possessor. Pp. 1994-2001.

(a) Procedural due process in the context of these cases requires an opportunity for a hearing before the State authorizes its agents to seize property in the possession of a person upon the application of another, and the minimal deterrent effect of the bond requirement against unfounded applications for a writ constitutes no substitute for a presiezure hearing. Pp. 1994-1996.

(b) From the standpoint of the application of the Due Process Clause it is immaterial that the deprivation may be temporary and nonfinal during the three-day post-seizure period. Pp. 1996-1997.

(c) The possessory interest of appellants, who had made substantial installment payments, was sufficient for them to invoke procedural due process safeguards notwithstanding their lack of full title to the replevied goods. Pp. 1997-1998.

(d) The District Courts erred in rejecting appellants' constitutional claim on the ground that the household goods seized were not items of 'necessity' and therefore did not require due process protection, as the Fourteenth Amendment imposes no such limitation. Pp. 1998-1999.

(e) The broadly drawn provisions here involved serve no such important a state interest as might justify summary seizure. Pp. 1999-2001.

2. The contract provisions for repossession by the seller on the buyer's default did not amount to a waiver of the appellants' procedural due process rights, those provisions neither dispensing with a prior hearing nor indicating the procedure by which repossession was to be achieved. D. H. Overmyer Co. v. Frick Co., 405 U.S. 174, 92 S.Ct. 775, 31 L.Ed.2d 124, distinguished. Pp. 2001-2002.

No. 70-5039, 317 F.Supp. 954, and No. 70-5138, 326 F.Supp. 127, vacated and remanded.
C. Michael Abbott, Atlanta, Ga., for appellants Margarita Fuentes and others, pro hac vice, by special leave of Court.

***69** Herbert T. Schwartz, Deputy Atty. Gen., Tallahassee, Fla., for appellee Robert L. Shevin, Atty. Gen., of the State of Fla.

George W. Wright, Jr., Miami, Fla., for appellee Firestone Tire and Rubber Co.

David A. Scholl, Philadelphia, Pa., for the appellants Paul Parham and others, pro hac vice, by special leave of Court.

Robert F. Maxwell, Philadelphia, Pa., for appellees, Americo V. Cortese and others.

Mr. Justice STEWART delivered the opinion of the Court.

We here review the decisions of two three-judge federal District Courts that upheld the constitutionality of Florida and Pennsylvania laws authorizing the summary seizure of goods or chattels in a person's possession under a writ of replevin. Both statutes provide for the issuance of writs ordering state agents to seize a person's possessions, simply upon ****1989** the ex parte application of any other person who claims a right to them and posts a ***70** security bond. Neither statute provides for notice to be given to the possessor of the property, and neither statute gives the possessor an opportunity to challenge the seizure at any kind of prior hearing. The question is whether these statutory procedures violate the Fourteenth

Amendment's guarantee that no State shall deprive any person of property without due process of law.

I

The appellant in No. 5039, Margarita Fuentes, is a resident of Florida. She purchased a gas stove and service policy from the Firestone Tire and Rubber Co. (Firestone) under a conditional sales contract calling for monthly payments over a period of time. A few months later, she purchased a stereophonic phonograph from the same company under the same sort of contract. The total cost of the stove and stereo was about $500, plus an additional financing charge of over $100. Under the contracts, Firestone retained title to the merchandise, but Mrs. Fuentes was entitled to possession unless and until she should default on her installment payments.

For more than a year, Mrs. Fuentes made her installment payments. But then, with only about $200 remaining to be paid, a dispute developed between her and Firestone over the servicing of the stove. Firestone instituted an action in a small-claims court for repossession of both the stove and the stero, claiming that Mrs. Fuentes had refused to make her remaining payments. Simultaneously with the filing of that action and before Mrs. Fuentes had even received a summons to answer its complaint, Firestone obtained a writ of replevin ordering a sheriff to seize the disputed goods at once.

In conformance with Florida procedure,[FN1] Firestone ***71** had only to fill in the blanks on the appropriate form documents and submit them to the clerk of the small-claims court. The clerk signed and stamped the documents and issued a writ of replevin. Later the same day, a local deputy sheriff and an agent of Firestone went to Mrs. Fuentes' home and seized the stove and stereo.

FN1. See Infra, at 1990-1991.

Shortly thereafter, Mrs. Fuentes instituted the present action in a federal district court, challenging the constitutionality of the Florida prejudgment replevin procedures under the Due Process Clause of the Fourteenth Amendment. [FN2] She sought declaratory and injunctive relief against continued enforcement of the procedural provisions of the state statutes that authorize prejudgment replevin.[FN3]

FN2. Both Mrs. Fuentes and the appellants in No. 5138 also challenged the prejudgment replevin procedures under the Fourth Amendment, made applicable to the States by the Fourteenth. We do not, however, reach that issue. See n. 32, infra.

FN3. Neither Mrs. Fuentes nor the appellants in No. 5138 sought an injunction against any pending or future court proceedings as such. Compare Younger v. Harris, 401 U.S. 37, 91 S.Ct. 746, 27 L.Ed.2d 669. Rather, they challenged only the summary extra-judicial process of prejudgment seizure of property to which they had already been subjected. They invoked the jurisdiction of the federal district courts under 42 U.S.C. s 1983 and 28 U.S.C. s 1343(3).

The appellants in No. 5138 filed a very similar action in a federal district court in Pennsylvania, challenging the constitutionality of that State's prejudgment replevin process. Like Mrs. Fuentes, they had had possessions seized under writs of replevin. Three of the appellants had purchased personal property-a bed, a table, and other household goods-under installment sales contracts like the one signed by Mrs. Fuentes; and the sellers of the property had obtained and executed summary writs of replevin, claiming that the appellants had fallen behind in their installment payments. ***72** The experience of the fourth ****1990** appellant, Rosa Washington, had been more bizarre. She had been divorced from a local deputy sheriff and was engaged in a dispute with him over the custody of their son. Her former husband, being familiar with the routine forms used in the replevin process, had obtained a writ that ordered the seizure of the boy's clothes, furniture, and toys. [FN4]

FN4. Unlike Mrs. Fuentes in No. 5039, none of the appellants in No. 5138 was ever sued in any court by the party who initiated seizure of the property. See infra, at 1992-1993.

In both No. 5039 and No. 5138, three-judge District Courts were convened to consider the appellants' challenges to the constitutional validity of the Florida and Pennsylvania statutes. The courts in both cases upheld the constitutionality of the statutes. Fuentes v. Faircloth, 317 F.Supp. 954 (S.D.Fla.); Epps v. Cortese, 326 F.Supp. 127 (E.D.Pa.).[FN5] We noted probable

jurisdiction of both appeals. 401 U.S. 906, 91 S.Ct. 893, 27 L.Ed.2d 804; 402 U.S. 994, 91 S.Ct. 2185, 29 L.Ed.2d 159.

FN5. Since the announcement of this Court's decision in Sniadach v. Family Finance Corp., 395 U.S. 337, 89 S.Ct. 1820, 23 L.Ed.2d 349 summary prejudgment remedies have come under constitutional challenge throughout the country. The summary deprivation of property under statutes very similar to the Florida and Pennsylvania statutes at issue here has been held unconstitutional by at least two courts. Laprease v. Raymours Furniture Co., 315 F.Supp. 716 (N.D.N.Y.); Blair v. Pitchess, 5 Cal.3d 258, 96 Cal.Rptr. 42, 486 P.2d 1242. But see Brunswick Corp. v. J. & P., Inc., 424 F.2d 100 (CA10); Wheeler v. Adams Co., 322 F.Supp. 645 (D.Md.); Almor Furniture & Appliances, Inc. v. MacMillan, 116 N.J.Super. 65, 280 A.2d 862. Applying Sniadach to other closely related forms of summary prejudgment remedies, some courts have construed that decision as setting forth general principles of procedural due process and have struck down such remedies. E.g., Adams v. Egley, 338 F.Supp. 614 (S.D.Cal., 1972); Collins v. Viceroy Hotel Corp., 338 F.Supp. 390 (N.D.Ill.1972); Santiago v. McElroy, 319 F.Supp. 284 (E.D.Pa.); Klim v. Jones, 315 F.Supp. 109 (N.D.Cal.); Randone v. Appellate Dept., 5 Cal.3d 536, 96 Cal.Rptr. 709, 488 P.2d 13; Larson v. Fetherston, 44 Wis.2d 712, 172 N.W.2d 20; Jones Press, Inc. v. Motor Travel Services, Inc., 286 Minn. 205, 176 N.W.2d 87. See Lebowitz v. Forbes Leasing & Finance Corp., 326 F.Supp. 1335, 1341-1348 (E.D.Pa.). Other courts, however, have construed Sniadach as closely confined to its own facts and have upheld such summary prejudgment remedies. E.g., Reeves v. Motor Contract Co., 324 F.Supp. 1011 (N.D.Ga.); Black Watch Farms v. Dick, 323 F.Supp. 100 (D.Conn.); Ameican Olean Tile Co. v. Zimmerman, 317 F.Supp. 150 (D.Hawaii); Young v. Ridley, 309 F.Supp. 1308 (D.C.); Termplan, Inc. v. Superior Court of Maricopa County, 105 Ariz. 270, 463 P.2d 68; 300 West 154th Street Realty Co. v. Department of Buildings, 26 N.Y.2d 538, 311 N.Y.S.2d 899, 260 N.E.2d 534.

***73** II

Under the Florida statute challenged here,[FN6] '(a)ny person whose goods or ****1991** chattels are wrongfully detained by any other person . . . may have a writ of replevin to recover them . . ..' Fla.Stat.Ann. s 78.01 (Supp.1972-1973). There is no requirement that the applicant make a convincing showing before the seizure***74** that the goods are, in fact, 'wrongfully detained.' Rather, Florida law automatically relies on the bare assertion of the party seeking the writ that he is entitled to one and allows a court clerk to issue the writ summarily. It requires only that the applicant file a complaint, initiating a court action for repossession and reciting in conclusory fashion that he is 'lawfully entitled to the possession' of the property, and that he file a security bond

FN6. The relevant Florida statutory provisions are the following:

Fla.Stat.Ann. s 78.01 (Supp.1972-1973):

'Right to replevin.-Any person whose goods or chattels are wrongfully detained by any other person or officer may have a writ of replevin to recover them and any damages sustained by reason of the wrongful caption or detention as herein provided. Or such person may seek like relief, but with summons to defendant instead of replevy writ in which event no bond is required and the property shall be seized only after judgment, such judgment to be in like form as that provided when defendant has retaken the property on a forthcoming bond.'

Fla.Stat.Ann. s 78.07 (Supp.1972-1973):

'Bond; requisites.-Before a replevy writ issues, plaintiff shall file a bond with surety payable to defendant to be approved by the clerk in at least double the value of the property to be replevied conditioned that plaintiff will prosecute his action to effect and without delay and that if defendant recovers judgment against him in the action, he will return the property, if return thereof is adjudged, and will pay defendant all sums of money recovered against plaintiff by defen-

dant in the action.'

Fla.Stat.Ann. s 78.08 (Supp.1972-1973):

'Writ; form; return.-The writ shall command the officer to whom it may be directed to replevy the goods and chattels in possession of defendant, describing them, and to summon the defendant to answer the complaint.'

Fla.Stat.Ann. s 78.10 (Supp.1972-1973):

'Writ; execution on property in buildings, ect.-In executing the writ of replevin, if the property or any part thereof is secreted or concealed in any dwelling house or other building or enclosure, the officer shall publicly demand delivery thereof and if it is not delivered by the defendant or some other person, he shall cause such house, building or enclosure to be broken open and shall make replevin according to the writ; and if necessary, he shall take to his assistance the power of the county.'

Fla.Stat.Ann. s 78.13 (Supp.1972-1973):

'Writ; disposition of property levied on.-The officer executing the writ shall deliver the property to plaintiff after the lapse of three (3) days from the time the property was taken unless within the three (3) days defendant gives bond with surety to be approved by the officer in double the value of the property as appraised by the officer, conditioned to have the property forthcoming to abide the result of the action, in which event the property shall be redelivered to defendant.'

'in at least double the value of the property to be replevied conditioned that plaintiff will prosecute his action to effect and without delay and that if defendant recovers judgment against him in the action, he will return the property, if return thereof is adjudged, and will pay defendant all sums of money recovered against plaintiff by defendant in the action.' Fla.Stat.Ann. s 78.07 (Supp.1972-1973).

***75** On the sole basis of the complaint and bond, a writ is issued 'command(ing) the officer to whom it may be directed to replevy the goods and chattels in possession of defendant . . . and to summon the defendant to answer the complaint.' Fla.Stat.Ann. s 78.08 (Supp.1972-1973). If the goods are 'in any dwelling house or other building or enclosure,' the officer is required to demand their delivery; but if they are not delivered, 'he shall cause such house, building or enclosure to be broken open and shall make replevin according to the writ . . ..' Fla.Stat.Ann. s 78.10 (Supp.1972-1973).

Thus, at the same moment that the defendant receives the complaint seeking repossession of property through court action, the property is seized from him. He is provided no prior notice and allowed no opportunity whatever to challenge the issuance of the writ. After the property has been seized, he will eventually have an opportunity for a hearing, as the defendant in the trial of the court action for repossession, which the plaintiff is required to pursue. And he is also not wholly without recourse in the meantime. For under the Florida statute, the officer who seizes the property must keep it for three days, and during that period the defendant may reclaim possession of the property by posting his own security bond in double its value. But if he does not post such a bond, the property is transferred to the party who sought the writ, pending a final judgment in the underlying action for repossession. Fla.Stat.Ann. s 78.13 (Supp.1972-1973).

The Pennsylvania law[FN7] differs, though not in its essential nature, from ****1992** that of Florida. As in Florida, ***76** a private party may obtain a prejudgment writ of replevin through a summary process of ex part application to a prothonotary. As in Florida, the party seeking ***77** the writ may simply post with his application a bond in double the value of the property to be seized. Pa.Rule Civ.Proc. 1073(a). There is no opportunity for a prior hearing and no prior notice to the other party. On this basis, a sheriff is requried to execute the writ by seizing the specified property. Unlike the Florida statute, however, the Pennsylvania law does not require that there ever be opportunity for a hearing on the merits of the conflicting claims to possession of the replevied ****1993** property. The party seeking the writ is not obliged to initiate a court action for repossession.[FN8] Indeed,***78** he need not even formally allege that he is lawfully entitled to the property. The most that is required is that he file an 'affidavit of the value of the property to be replevied.' Pa.Rule Civ.Proc. 1073(a). If the party who loses

property through replevin seizure is to get even a post-seizure hearing, he must initiate a lawsuit himself.[FN9] He may also, as under Florida law, post his own counterbond within three days after the seizure to regain possession. Pa.Rule Civ.Proc. 1076.

FN7. The basic Pennsylvania statutory provision regarding the issuance of writs of replevin is the following:

Pa.Stat.Ann., Tit. 12, s 1821. Writs of replevin authorized

'It shall and may be lawfull for the justices of each county in this province to grant writs of replevin, in all cases whatsoever, where replevins may be granted by the laws of England, taking security as the said law directs, and make them returnable to the respective courts of common pleas, in the proper county, there to be determined according to law.'

The procedural prerequisites to issuance of a prejudgment writ are, however, set forth in the Pennsylvania Rules of Civil Procedure, 12 P.S. Appendix. The relevant rules are the following:

'Rule 1073. Commencement of Action

'(a) An action of replevin with bond shall be commenced by filing with the prothonotary a praecipe for a writ of replevin with bond, together with

'(1) the plaintiff's affidavit of the value of the property to be replevied, and

'(2) the plaintiff's bond in double the value of the property, with security approved by the prothonotary, naming the Commonwealth of Pennsylvania as obligee, conditioned that if the plaintiff fails to maintain his right of possession of the property, he shall pay to the party entitled thereto the value of the property and all legal costs, fees and damages sustained by reason of the issuance of the writ.

'(b) An action of replevin without bond shall be commenced by filing with the prothonotary

'(1) a praecipe for a writ of replevin without bond or

'(2) a complaint.

'If the action is commenced without bond, the sheriff shall not replevy the property but at any time before the entry of judgment the plaintiff, upon filing the affidavit and bond prescribed by subsidivision (a) of this rule, may obtain a writ of replevin with bond, issued in the original action, and have the sheriff replevy the property.

'Rule 1076. Counterbond

'(a) A counterbond may be filed with the prothonotary by a defendant or intervenor claiming the right to the possession of the property, except a party claiming only a lien thereon, within seventy-two (72) hours after the property has been replevied, or within seventy-two (72) hours after service upon the defendant when the taking of possession of the property by the sheriff has been waived by the plaintiff as provided by Rule 1077(a), or within such extension of time as may be granted by the court upon cause shown.

'(b) The counterbond shall be in the same amount as the original bond, with security approved by the prothonotary, naming the Commonwealth of Pennsylvania as obligee, conditioned that if the party filing it fails to maintain his right to possession of the property he shall pay to the party entitled thereto the value of the property, and all legal costs, fees and damages sustained by reason of the delivery of the replevied property to the party filing the counterbond.

'Rule 1077. Disposition of Replevied Property. Sheriff's Return

'(a) When a writ of replevin with bond is issued, the sheriff shall leave the property

during the time allowed for the filing of a counterbond in the possession of the defendant or of any other person if the plaintiff so authorizes him in writing.

'(b) Property taken into possession by the sheriff shall be held by him until the expiration of the time for filing a counterbond. If the property is not ordered to be impounded and if no counterbond is filed, the sheriff shall deliver the property to the plaintiff.

'(c) If the property is not ordered to be impounded and the person in possession files a counterbond, the property shall be delivered to him, but if he does not file a counterbond, the property shall be delivered to the party first filing a counterbond.

'(d) When perishable property is replevied the court may make such order relating to its sale or disposition as shall be proper.

'(e) The return of the sheriff to the writ of replevin with bond shall state the disposition made by him of the property and the name and address of any person found in possession of the property.'

FN8. Pa.Rule Civ.Proc. 1073(b) does establish a procedure whereby an applicant may obtain a writ by filing a complaint, initiating a later court action. See n. 7, supra. In the case of every appellant in No. 70-5138, the applicant proceeded under Rule 1073(a) rather than 1073(b), seizing property under no more than a security bond and initiating no court action.

FN9. Pa.Rule Civ.Proc. 1037(a) establishes the procedure for initiating such a suit:

'If an action is not commenced by a complaint (under Rule 1073(b)), the prothonotary, upon praecipe of the defendant, shall enter a rule upon the plaintiff to file a complaint. If a complaint is not filed within twenty (20) days after service of the rule, the prothonotary, upon praecipe of the defendant, shall enter a judgment of non pros.'

None of the appellants in No. 70-5138 attempted to initiate the process to require the filing of a post-seizure complaint under Rule 1037(a).

III

Although these prejudgment replevin statutes are descended from the common-law replevin action of six centureis ago, they bear very little resemblance to it. Replevin at common law was an action for the return of specific goods wrongfully taken or 'distrained.' Typically, it was used after a landlord (the 'distrainor') had seized possessions from a tenant (the 'distrainee') to satisfy a debt allegedly owed. If the tenant then instituted a replevin action and posted security, the landlord could be ordered to return the property at ***79** once, pending a final judgment in the underlying action.[FN10] However, this prejudgment replevin of goods at common law did not follow from an entirely ex parte process of pleading by the distrainee. For '(t)he distrainor could always stop the action of replevin by claiming to be the owner of the goods; and as this claim was often made merely to delay the proceedings, the writ de proprietate probanda was devised early in the fourteenth century, which enabled the sheriff to determine summarily the question of ownership. If the question of ownership was determined against the distrainor the goods were delivered back to the distrainee (pending final judgment).' 3 W. Holdsworth, History of English Law 284 (1927).

FN10. See T. Plucknett, A Concise History of the Common Law 367-369 (1956); 3 W. Holdsworth, History of English Law 284-285 (1927); 2 F. Pollock & F. Maitland, History of English Law 577 (1909); J. Cobbey, Replevin 19-29 (1890).

Prejudgment replevin statutes like those of Florida and Pennsylvania are derived from this ancient possessory action in that they authorize the seizure of property before a final judgment. But the similarity ends there. As in the present cases, such statutes are most commonly used by creditors to seize goods allegedly wrongfully detained-not wrongfully taken-by debtors. At common law, if a creditor wished to invoke state power to recover goods wrongfully detained, he had to proceed through the action of debt or detinue.[FN11] These actions, however, did not provide

for a return of property before final judgment.[FN12] And, more importantly, on the **1994 occasions when the common law did allow prejudgment seizure by state power, it provided some kind *80 of notice and opportunity to be heard to the party then in possession of the property, and a state official made at least a summary determination of the relative rights of the disputing parties before stepping into the dispute and taking goods from one of them.

FN11. See Plucknett, supra, n. 10, at 362-365; Pollock & Maitland, supra, n. 10, at 173-175, 203-211.

FN12. The creditor could, of course, proceed without the use of state power, through self-help, by 'distraining' the property before a judgment. See n. 10, supra.

IV

[1][2] For more than a century the central meaning of procedural due process has been clear: 'Parties whose rights are to be affected are entitled to be heard; and in order that they may enjoy that right they must first be notified.' Baldwin v. Hale, 1 Wall. 223, 233, 17 L.Ed. 531. See Windsor v. McVeigh, 93 U.S. 274, 23 L.Ed. 914; Hovey v. Elliott, 167 U.S. 409, 17 S.Ct. 841, 42 L.Ed. 215; Grannis v. Oredean, 234 U.S. 385, 34 S.Ct. 779, 58 L.Ed. 1363. It is equally fundamental that the right to notice and an opportunity to be heard 'must be granted at a meaningful time and in a meaningful manner.' Armstrong v. Manzo, 380 U.S. 545, 552, 85 S.Ct. 1187, 1191, 14 L.Ed.2d 62.

The primary question in the present cases is whether these state statutes are constitutionally defective in failing to provide for hearings 'at a meaningful time.' The Florida replevin process guarantees an opportunity for a hearing after the seizure of goods, and the Pennsylvania process allows a post-seizure hearing if the aggrieved party shoulders the burden of initiating one. But neither the Florida nor the Pennsylvania statute provides for notice or an opportunity to be heard before the seizure. The issue is whether procedural due process in the context of these cases requires an opportunity for a hearing before the State authorizes its agents to seize property in the possession of a person upon the application of another.

[3][4] The constitutional right to be heard is a basic aspect of the duty of government to follow a fair process of decisionmaking when it acts to deprive a person of his possessions. The purpose of this requirement is not *81 only to ensure abstract fair play to the individual. Its purpose, more particularly, is to protect his use and possession of property from arbitrary encroachment-to minimize substantively unfair or mistaken deprivations of property, a danger that is especially great when the State seizes goods simply upon the application of and for the benefit of a private party. So viewed, the prohibition against the deprivation of property without due process of law reflects the high value, embedded in our constitutional and political history, that we place on a person's right to enjoy what is his, free of governmental interference. See Lynch v. Household Finance Corp., 405 U.S. 538, 552, 92 S.Ct. 1113, 1122, 31 L.Ed.2d 424.

The requirement of notice and an opportunity to be heard raises no impenetrable barrier to the taking of a person's possessions. But the fair process of decision making that it guarantees works, by itself, to protect against arbitrary deprivation of property. For when a person has an opportunity to speak up in his own defense, and when the State must listen to what he has to say, substantively unfair and simply mistaken deprivations of property interests can be prevented. It has long been recognized that 'fairness can rarely be obtained by secret, one-sided determination of facts decisive of rights. . . . (And n)o better instrument has been devised for arriving at truth than to give a person in jeopardy of serious loss notice of the case against him and opportunity to meet it.' Joint Anti-Fascist Refugee Committee v. McGrath, 341 U.S. 123, 170-172, 71 S.Ct. 624, 647, 95 L.Ed. 817 Frankfurter, J., concurring).

[5] If the right to notice and a hearing is to serve its full purpose, then, it is clear that it must be granted at a time when the deprivation can still be prevented. At a later hearing, an individual's possessions can be returned to him if they were unfairly or mistakenly **1995 taken in the first place. Damages may even be *82 awarded to him for the wrongful deprivation. But no later hearing and no damage award can undo the fact that the arbitrary taking that was subject to the right of procedural due process has already occurred. 'This Court has not . . . embraced the general proposition that a wrong may be done if it can be undone.' Stanley v. Illinois, 405 U.S. 645, 647, 92 S.Ct 1208, 1210, 31 L.Ed.2d 551.

[6] This is no new principle of constitutional law. The right to a prior hearing has long been recognized by this Court under the Fourteenth and Fifth Amendments. Although the Court has held that due process tolerates variances in the form of a hearing 'appropriate to the nature of the case,' Mullane v. Central Hanover Tr. Co., 339 U.S. 306, 313, 70 S.Ct. 652, 657, 94 L.Ed. 865, and 'depending upon the importance of the interests involved and the nature of the subsequent proceedings (if any),' Boddie v. Connecticut, 401 U.S. 371, 378, 91 S.Ct. 780, 786, 28 L.Ed.2d 113, the Court has traditionally insisted that, whatever its form, opportunity for that hearing must be provided before the deprivation at issue takes effect. E.g., Bell v. Burson, 402 U.S. 535, 542, 91 S.Ct. 1586, 1591, 29 L.Ed.2d 90; Wisconsin v. Constantineau, 400 U.S. 433, 437, 91 S.Ct. 507, 510, 27 L.Ed.2d 515; Goldberg v. Kelly, 397 U.S. 254, 90 S.Ct. 1011, 25 L.Ed.2d 287; Armstrong v. Manzo, 380 U.S., at 551, 85 S.Ct., at 1191; Mullane v. Central Hanover Tr. Co., supra, 339 U.S. at 313, 70 S.Ct. at 656; Opp Cotton Mills v. Administrator, 312 U.S. 126, 152-153, 61 S.Ct. 524, 535-536, 85 L.Ed. 624; United States v. Illnois Central R. Co., 291 U.S. 457, 463, 54 S.Ct. 471, 473, 78 L.Ed. 909; Londoner v. City & County of Denver, 210 U.S. 373, 385-386, 28 S.Ct. 708, 713-714, 52 L.Ed. 1103. See In re Ruffalo, 390 U.S. 544, 550-551, 88 S.Ct. 1222, 1225-1226, 20 L.Ed.2d 117. 'That the hearing required by due process is subject to waiver, and is not fixed in form does not affect its root requirement that an individual be given an opportunity for a hearing before he is deprived of any significant property interest, except for extraordinary situations where some valid governmental interest is at stake that justifies postponing the hearing until after the event.' Boddie v. Connecticut, supra, 401 U.S., at 378-379, 91 S.Ct., at 783 (emphasis in original).

***83** The Florida and Pennsylvania prejudgment replevin statutes fly in the face of this principle. To be sure, the requirements that a party seeking a writ must first post a bond, allege conclusorily that he is entitled to specific goods, and open himself to possible liability in damages if he is wrong, serve to deter wholly unfounded applications for a writ. But those requirements are hardly a substitute for a prior hearing, for they test no more than the strength of the applicant's own belief in his rights.[FN13] Since his private gain is at stake, the danger is all too great that his confidence in his cause will be misplaced. Lawyers and judges are familiar with the phenomenon of a party mistakenly but firmly convinced that his view of the facts and law will prevail, and therefore quite willing to risk the costs of litigation. Because of the understandable, self-interested fallibility of litigants, a court does not decide a dispute until it has had an opportunity to hear both sides-and does not generally take even tentative action until it has itself examined the support for the plaintiff's position. The Florida and Pennsylvania statutes do not even require the official issuing a writ of replevin to do that much.

> FN13. They may not even test that much. For if an applicant for the writ knows that he is dealing with an uneducated, uniformed consumer with little access to legal help and little familiarity with legal procedures, there may be a substantial possibility that a summary seizure of property-however unwarranted-may go unchallenged, and the applicant may feel that he can act with impunity.

[7] The minimal deterrent effect of a bond requirement is, in a practical ****1996** sense, no substitute for an informed evaluation by a neutral official. More specifically, as a matter of constitutional principle, it is no replacement for the right to a prior hearing that is the only truly effective safeguard against arbitrary deprivation of property. While the existence of these other, less ***84** effective, safeguards may be among the considerations that affect the form of hearing demanded by due process, they are far from enough by themselves to obviate the right to a prior hearing of some kind.

V

[8] The right to a prior hearing, of course, attaches only to the deprivation of an interest encompassed within the Fourteenth Amendment's protection. In the present cases, the Florida and Pennsylvania statutes were applied to replevy chattels in the appellants' possession. The replevin was not cast as a final judgment; most, if not all, of the appellants lacked full title to the chattels; and their claim even to continued possession was a matter in dispute. Moreover, the chattels at stake were nothing more than an assortment of household goods. Nonetheless, it is clear that the appellants were deprived of possessory interests in those chattels that were within the protection of the Fourteenth Amendment.

A

[9] A deprivation of a person's possessions under a prejudgment writ of replevin, at least in theory, may be only temporary. The Florida and Pennsylvania statutes do not require a person to wait until a post-seizure hearing and final judgment to recover what has been replevied. Within three days after the seizure, the statutes allowing him to recover the goods if he, in return, surrenders other property-a payment necessary to secure a bond in double the value of the goods seized from him.[FN14] But it is now ***85** well settled that a temporary, nonfinal deprivation of property is nonetheless a 'deprivation' in the terms of the Fourteenth Amendment. Sniadach v. Family Finance Corp., 395 U.S. 337, 89 S.Ct. 1820, 23 L.Ed.2d 349; Bell v. Burson, 402 U.S. 535, 91 S.Ct. 1586, 29 L.Ed.2d 90. Both Sniadach and Bell involved takings of property pending a final judgment in an underlying dispute. In both cases, the challenged statutes included recovery provisions, allowing the defendants to post security to quickly regain the property taken from them.[FN15] Yet the Court firmly held that these ****1997** were deprivations of property that had to be preceded by a fair hearing.

FN14. The appellants argue that this opportunity for quick recovery exists only in theory. They allege that very few people in their position are able to obtain a recovery bond, even if they know of the possibility. Appellant Fuentes says that in her case she was never told that she could recover the stove and stereo and that the deputy sheriff seizing them gave them at once to the Firestone agent, rather than holding them for three days. She further asserts that of 442 cases of prejudgment replevin in small-claims courts in Dade County, Florida, in 1969, there was not one case in which the defendant took advantage of the recovery provision.

FN15. Bell v. Burson, 402 U.S. 535, 536, 91 S.Ct. 1586, 1587, 29 L.Ed.2d 90. Although not mentioned in the Sniadach opinion, there clearly was a quick recovery provision in the Wisconsin prejudgment garnishment statute at issue. Wis.Stat.Ann. s 267.21(1) (Supp.1970-1971). Family Finance Corp. v. Sniadach, 37 Wis.2d 163, 173-174, 154 N.W.2d 259, 265. Mr. Justice Harlan adverted to the recovery provision in his concurring opinion. 395 U.S. 337, at 343, 89 S.Ct. 1820, at 1823, 23 L.Ed.2d 349.

These sorts of provisions for recovery of property by posting security are, of course, entirely different from the security requirement upheld in Lindsey v. Normet, 405 U.S. 56, 65, 92 S.Ct. 862, 870, 31 L.Ed.2d 36. There, the Court upheld a requirement that a tenant wanting a continuance of an eviction hearing must post security for accruing rent during the continuance. The tenant did not have to post security in order to remain in possession before a hearing; rather, he had to post security only in order to obtain a continuance of the hearing. Moreover, the security requirement in Lindsey was not a recovery provision. For the tenant was not deprived of his possessory interest even for one day without opportunity for a hearing.

[10][11] The present cases are no different. When officials of Florida or Pennsylvania seize one piece of property from a person's possession and then agree to return it if he surrenders another, they deprive him of property whether or not he has the funds, the knowledge, and the time needed to take advantage of the recovery provision. ***86** The Fourteenth Amendment draws no bright lines around three-day, 10-day or 50-day deprivations of property. Any significant taking of property by the State is within the purview of the Due Process Clause. While the length and consequent severity of a deprivation may be another factor to weigh in determining the appropriate form of hearing, it is not decisive of the basic right to a prior hearing of some kind.

B

[12] The appellants who signed conditional sales contracts lacked full legal title to the replevied goods. The Fourteenth Amendment's protection of 'property,' however, has never been interpreted to safeguard only the rights of undisputed ownership. Rather, it has been read broadly to extend protection to 'any significant property interest,' Boddie v. Connecticut, 401 U.S., at 379, 91 S.Ct., at 786, including statutory entitlements. See Bell v. Burson, 402 U.S., at 539, 91 S.Ct., at 1589; Goldberg v. Kelly, 397 U.S., at 262, 90 S.Ct., at 1017.

[13][14] The appellants were deprived of such an interest in the replevied goods-the interest in contin-

ued possession and use of the goods. See Sniadach v. Family Finance Corp., 395 U.S., at 342, 89 S.Ct., at 1823 (Harlan, J., concurring). They had acquired this interest under the conditional sales contracts that entitled them to possession and use of the chattels before transfer of title. In exchange for immediate possession, the appellants had agreed to pay a major financing charge beyond the basic price of the merchandise. Moreover, by the time the goods were summarily repossessed, they had made substantial installment payments. Clearly, their possessory interest in the goods, dearly bought and protected by contract,[FN16] ***87** was sufficient to invoke the protection of the Due Process Clause.

FN16. The possessory interest of Rosa Washington, an appellant in No. 5138, in her son's clothes, furniture, and toys was no less sufficient to invoke due process safeguards. Her interest was not protected by contract. Rather, it was protected by ordinary property law, there being a dispute between her and her estranged husband over which of them had a legal right not only to custody of the child but also to possession of the chattels.

[15][16][17][18] Their ultimate right to continued possession was, of course, in dispute. If it were shown at a hearing that the appellants had defaulted on their contractual obligations, it might well be that the sellers of the goods would be entitled to repossession. But even assuming that the appellants had fallen behind in their installment payments, and that they had no other valid defenses,[FN17] that is immaterial here. The right to be heard does not depend upon an advance showing that one will surely prevail at the hearing. 'To one who protests against the taking of his property without due process of law, it is no answer to say that in his particular case due process of law would have led to the same result because he had no adequate defense upon the merit.' Coe v. Armour Fertilizer Works, 237 U.S. 413, 424, 35 S.Ct. 625, 629, 59 L.Ed. 1027. It is enough to invoke the procedural safeguards of the Fourteenth Amendment that a significant property interest is at ****1998** stake, whatever the ultimate outcome of a hearing on the contractual right to continued possession and use of the goods.[FN18]

FN17. Mrs. Fuentes argues that Florida law allows her to defend on the ground that Firestone breached its obligations under the sales contract by failing to repair serious defects in the stove it sold her. We need not consider this issue here. It is enough that the right to continued possession of the goods was open to some dispute at a hearing since the sellers of the goods had to show, at the least, that the appellants had defaulted in their payments.

FN18. The issues decisive of the ultimate right to continued possession, of course, may be quite simple. The simplicity of the issues might be relevant to the formality or scheduling of a prior hearing. See Lindsey v. Normet, 405 U.S. 56, 65, 92 S.Ct. 862, 869, 31 L.Ed.2d 36. But it certainly cannot undercut the right to a prior hearing of some kind.

***88** C

Nevertheless, the District Courts rejected the appellants' constitutional claim on the ground that the goods seized from them-a stove, a stereo, a table, a bed, and so forth-were not deserving of due process protection, since they were not absolute necessities of life. The courts based this holding on a very narrow reading of Sniadach v. Family Finance Corp., supra, and Goldberg v. Kelly, supra, in which this Court held that the Constitution requires a hearing before prejudgment wage garnishment and before the termination of certain welfare benefits. They reasoned that Sniadach and Goldberg, as a matter of constitutional principle, established no more than that a prior hearing is required with respect to the deprivation of such basically 'necessary' items as wages and welfare benefits.

[19] This reading of Sniadach and Goldberg reflects the premise that those cases marked a radical departure from established principles of procedural due process. They did not. Both decisions were in the mainstream of past cases, having little or nothing to do with the absolute 'necessities' of life but establishing that due process requires an opportunity for a hearing before a deprivation of property takes effect.[FN19] E.g., Opp Cotton Mills v. Administrator, 312 U.S., at 152-153, 61 S.Ct., at 535-536; United States v. Illinois Central R. Co., 291 U.S., at 463, 54 S.Ct., at 473; Southern R. Co. v. Virginia ex rel. Shirley, 290 U.S. 190, 54 S.Ct. 148, 78 L.Ed. 260; Londoner v. City & County of Denver, 210 U.S. 373, 28 S.Ct. 708, 52

L.Ed. 1103; Central of Georgia R. Co. v. Wright, 207 U.S. 127, 28 S.Ct. 47, 52 L.Ed. 134; ***89**Security Trust & Safety Vault Co. v. Lexington, 203 U.S. 323, 27 S.Ct. 87, 51 L.Ed. 204; Hibben v. Smith, 191 U.S. 310, 24 S.Ct. 88, 48 L.Ed. 195; Glidden v Harrington, 189 U.S. 255, 23 S.Ct. 574, 47 L.Ed. 798. In none of those cases did the court hold that this most basic due process requirement is limited to the protection of only a few types of property interests. While Sniadach and Goldberg emphasized the special importance of wages and welfare benefits, they did not convert that emphasis into a new and more limited constitutional doctrine. FN20

FN19. The Supreme Court of California recently put the matter accurately: 'sniadach put the matter accurately: 'Sniadach in constitutional adjudication. It is not a rivulet of wage garnishment but part of the mainstream of the past procedural due process decisions of the United States Supreme Court.' Randone v. Appellate Dept., 5 Cal.3d 536, 550, 96 Cal.Rptr. 709, 718, 488 P.2d 13, 22.

FN20. Sniadach v. Family Finance Corp., supra, 395 U.S., at 340, 89 S.Ct., at 1822; Goldberg v. Kelly, 397 U.S. 254, 264, 90 S.Ct. 1011, 1018, 25 L.Ed.2d 287. Of course, the primary issue in Goldberg was the form of hearing demanded by due process before termination of welfare benefits; the importance of welfare was directly relevant to that question.

Nor did they carve out a rule of 'necessity' for the sort of nonfinal deprivations of property that they involved. That was made clear in Bell v. Burson, 402 U.S. 535, 91 S.Ct. 1586, 29 L.Ed.2d 90, holding that there must be an opportunity for a fair hearing before mere suspension of a driver's license. A driver's license clearly does not rise to the level of 'necessity' exemplified by wages and welfare benefits. Rather, as the Court accurately stated, it is an 'important interest,' id., at 539, 91 S.Ct., at 1589, entitled to the protection of procedural due process of law.

****1999** [20] The household goods, for which the appellants contracted and paid substantial sums, are deserving of similar protection. While a driver's license, for example, 'may become (indirectly) essential in the pursuit of a livelihood,' ibid., a stove or a bed may be equally essential to provide a minimally decent environment for human beings in their day-to-day lives. It is, after all, such consumer goods that people work and earn a livelihood in order to acquire.

[21][22] No doubt, there may be many gradations in the 'importance' or 'necessity' of various consumer goods. Stoves could be compared to television sets, or bedscould***90** be compared to tables. But if the root principle of procedural due process is to be applied with objectivity, it cannot rest on such distinctions. The Fourteenth Amendment speaks of 'property' generally. And, under our free-enterprise system, an individual's choices in the marketplace are respected, however unwise they may seem to someone else. It is not the business of a court adjudicating due process rights to make its own critical evaluation of those choices and protect only the ones that, by its own lights, are 'necessary.'FN21

FN21. The relative weight of liberty or property interests is relevant, of course, to the form of notice and hearing required by due process. See, e.g., Boddie v. Connecticut, 401 U.S. 371, 378, 91 S.Ct. 780, 786, 28 L.Ed.2d 113 and cases cited therein. But some form of notice and hearing-formal or informal-is required before deprivation of a property interest that 'cannot be characterized as de minimis.' Sniadach v. Family Finance Corp., supra, 395 U.S., at 342, 89 S.Ct., at 1823 (Harlan, J., concurring).

VI

[23][24][25][26][27] There are 'extraordinary situations' that justify postponing notice and opportunity for a hearing. Boddie v. Connecticut, 401 U.S., at 379, 91 S.Ct., at 786. These situations, however, must be truly unusual.FN22 Only in a few limited situations***91** has this Court allowed outright seizureFN23 without ****2000** opportunity for a prior hearing. First, in each case, the seizure has been directly necessary to secure an important governmental or general public interest. Second, there has been a special need for very prompt action. Third, the State has kept strict control over its monopoly of legitimate force; the person initiating the seizure has been a government official responsible for determining, under the standards of a narrowly drawn statute, that it was necessary and justified in the particular instance. Thus, the Court has allowed summary seizure of property ***92** to collect

the internal revenue of the United States,[FN24] to meet the needs of a national war effort,[FN25] to protect against the economic disaster of a bank failure,[FN26] and to protect the public from misbranded drugs[FN27] and contaminated food.[FN28]

FN22. A prior hearing always imposes some costs in time, effort, and expense, and it is often more efficient to dispense with the opportunity for such a hearing. But these rather ordinary costs cannot outweigh the constitutional right. See Bell v. Burson, supra, 402 U.S., at 540-541, 91 S.Ct., at 1589-1590; Goldberg v. Kelly, supra, 397 U.S., at 261, 90 S.Ct., at 1016. Procedural due process is not intended to promote efficiency or accommodate all possible interests: it is intended to protect the particular interests of the person whose possessions are about to be taken.

'The establishment of prompt efficacious procedures to achieve legitimate state ends is a proper state interest worthy of cognizance in constitutional adjudication. But the Constitution recognizes higher values than speed and efficiency. Indeed, one might fairly say of the Bill of Rights in general, and the Due Process Clause in particular, that they were designed to protect the fragile values of a vulnerable citizenry from the overbearing concern for efficiency and efficacy that may characterize praiseworthy government officials no less, and perhaps more, than mediocre ones.' Stanley v. Illinois, 405 U.S. 645, 656, 92 S.Ct. 1208, 1215, 31 L.Ed.2d 551.

FN23. Of course, outright seizure of property is not the only kind of deprivation that must be preceded by a prior hearing. See, e.g., Sniadach v. Family Finance Corp., supra. In three cases, the Court has allowed the attachment of property without a prior hearing. In one, the attachment was necessary to protect the public against the same sort of immediate harm involved in the seizure cases-a bank failure. Coffin Bros. & Co. v. Bennett, 277 U.S. 29, 48 S.Ct. 422, 72 L.Ed. 768. Another case involved attachment necessary to secure jurisdiction in state court-clearly a most basic and important public interest. Ownbey v. Morgan, 256 U.S. 94, 41 S.Ct. 433, 65 L.Ed. 837. It is much less clear what interests were involved in the third case, decided with an unexplicated per curiam opinion simply citing Coffin Bros. and Ownbey. McKay v. McInnes, 279 U.S. 820, 49 S.Ct. 344, 73 L.Ed. 975. As far as essential procedural due process doctrine goes, McKay cannot stand for any more than was established in the Coffin Bros. and Ownbey cases on which it relied completely. See Sniadach v. Family Finance Corp., supra, 395 U.S., at 340, 89 S.Ct., at 1822; id., at 344, 89 S.Ct. 1823 (Harlan, J., concurring).

In cases involving deprivation of other interests, such as government employment, the Court similarly has required an unusually important governmental need to outweigh to right to a prior hearing. See, e.g., Cafeteria and Restaurant Workers v. McElroy, 367 U.S. 886, 895-896, 81 S.Ct. 1743, 1748-1749, 6 L.Ed.2d 1230.

Seizure under a search warrant is quite a different matter, see n. 30, infra.

FN24. Phillips v. Commissioner of Internal Revenue, 283 U.S. 589, 51 S.Ct. 608, 75 L.Ed. 1289. The Court stated that '(d)elay in the judicial determination of property rights is not uncommon where it is essential that governmental needs be immediately satisfied.' Id., at 597, 51 S.Ct., at 611 (emphasis supplied). The Court, then relied on 'the need of the government promptly to secure its revenues.' Id., at 596, 51 S.Ct., at 611.

FN25. Central Union Trust Co. v. Garvan, 254 U.S. 554, 566, 41 S.Ct. 214, 215, 65 L.Ed. 403; Stoehr v. Wallace, 255 U.S. 239, 245, 41 S.Ct. 293, 296, 65 L.Ed. 604; United States v. Pfitsch, 256 U.S. 547, 553, 41 S.Ct. 569, 571, 65 L.Ed. 1084.

FN26. Fahey v. Mallonee, 332 U.S. 245, 67 S.Ct. 1552, 91 L.Ed. 2030.

FN27. Ewing v. Mytinger & Casselberry, Inc., 339 U.S. 594, 70 S.Ct. 870, 94 L.Ed. 1088.

FN28. North American Cold Storage Co. v. Chicago, 211 U.S. 306, 29 S.Ct. 101, 53 L.Ed. 195.

[28] The Florida and Pennsylvania prejudgment replevin statutes serve no such important governmental or general public interest. They allow summary seizure of a person's possessions when no more than private gain is directly at stake. FN29 The replevin of chattels, as in the ***93** present cases, may satisfy a debt or settle a score. But state intervention in a private dispute hardly compares to state action furthering a war effort or protecting the public health.

FN29. By allowing repossession without an opportunity for a prior hearing, the Florida and Pennsylvania statutes may be intended specifically to reduce the costs for the private party seeking to seize goods in another party's possession. Even if the private gain at stake in repossession actions were equal to the great public interests recognized in this Court's past decisions, see nn. 24-28, supra, the Court has made clear that the avoidance of the ordinary costs imposed by the opportunity for a hearing is not sufficient to override the constitutional right. See n. 22, supra. The appellees argue that the cost of holding hearings may be especially onerous in the context of the creditor-debtor relationship. But the Court's holding in Sniadach v. Family Finance Corp., supra, indisputably demonstrates that ordinary hearing costs are no more able to override due process rights in the creditordebtor context than in other contexts.

In any event, the aggregate cost of an opportunity to be heard before repossession should not be exaggerated. For we deal here only with the right to an opportunity to be heard. Since the issues and facts decisive of rights in repossession suits may very often be quite simple, there is a likelihood that many defendants would forgo their opportunity, sensing the futility of the exercise in the particular case. And, of course, no hearing need be held unless the defendant, having received notice of his opportunity, takes advantage of it.

Nor do the broadly drawn Florida and Pennsylvania statutes limit the summary seizure of goods to special situations demanding prompt action. There may be ****2001** cases in which a creditor could make a showing of immediate danger that a debtor will destroy or conceal disputed goods. But the statutes before us are not 'narrowly drawn to meet any such unusual condition.' Sniadach v. Family Finance Corp., supra, 395 U.S. at 339, 89 S.Ct. at 1821. And no such unusual situation is presented by the facts of these cases.

The statutes, moreover, abdicate effective state control over state power. Private parties, serving their own private advantage, may unilaterally invoke state power to replevy goods from another. No state official participates in the decision to seek a writ; no state official reviews the basis for the claim to repossession; and no state official evaluates the need for immediate seizure. There is not even a requirement that the plaintiff provide any information to the court on these matters. The State acts largely in the dark. FN30

FN30. The seizure of possessions under a writ of replevin is entirely different from the seizure of possessions under a search warrant. First, a search warrant is generally issued to serve a highly important governmental need-e.g., the apprehension and conviction of criminals-rather than the mere private advantage of a private party in an economic transaction. Second, a search warrant is generally issued in situations demanding prompt action. The danger is all too obvious that a criminal will destroy or hide evidence or fruits of his crime if given any prior notice. Third, the Fourth Amendment guarantees that the State will not issue search warrants merely upon the conclusory application of a private party. It guarantees that the State will not abdicate control over the issuance of warrants and that no warrant will be issued without a prior showing of probable cause. Thus, our decision today in no way implies that there must be opportunity for an adversary hearing before a search warrant is issued. But cf. Quantity of Books v. Kansas, 378 U.S. 205, 84 S.Ct. 1723, 12 L.Ed.2d 809.

***94** VII

Finally, we must consider the contention that the appellants who signed conditional sales contracts thereby waived their basic procedural due process rights. The contract signed by Mrs. Fuentes provided that 'in the event of default of any payment or payments, Seller at its option may take back the merchandise . . ..' The contracts signed by the Pennsylvania appellants similarly provided that the seller 'may retake' or 'repossess' the merchandise in the event of a 'default in any payment.' These terms were parts of printed form contracts, appearing in relatively small type and unaccompanied by any explanations clarifying their meaning.

[29] In D. H. Overmyer Co. v. Frick Co., 405 U.S. 174, 92 S.Ct. 775, 31 L.Ed.2d 124, the Court recently outlined the considerations relevant to determination of a contractual waiver of due process rights. Applying the standards governing waiver of constitutional rights in a criminal proceeding [FN31] -although not holding that such standards must necessarily apply-the Court held that, on the particular facts of that case, the contractual waiver of due process ***95** rights was 'voluntarily, intelligently, and knowingly' made. Id., at 187, 92 S.Ct., at 783. The contract in Overmyer was negotiated between two corporations; the waiver provision was specifically bargained for and drafted by their lawyers in the process of these negotiations. As the Court noted, it was 'not a case of unequal bargaining power or overreaching. The Overmyer-Frick agreement, from the start, was not a contract of adhesion.' ****2002**Id., at 186, 92 S.Ct., at 782. Both parties were 'aware of the significance' of the waiver provision. Ibid.

> FN31. See Brady v. United States, 397 U.S. 742, 748, 90 S.Ct. 1463, 1468, 25 L.Ed.2d 747; Johnson v. Zerbst, 304 U.S. 458, 464, 58 S.Ct. 1019, 1023, 82 L.Ed. 1461. In the civil area, the Court has said that '(w)e do not presume acquiescence in the loss of fundamental rights,' Ohio Bell Tel. Co. v. Public Utilities Comm'n, 301 U.S. 292, 307, 57 S.Ct. 724, 731, 81 L.Ed. 1093. Indeed, in the civil no less than the criminal area, 'courts indulge every reasonable presumption against waiver.' Aetna Ins. Co. v. Kennedy, 301 U.S. 389, 393, 57 S.Ct. 809, 812, 81 L.Ed. 1177.

The facts of the present cases are a far cry from those of Overmyer. There was no bargaining over contractual terms between the parties who, in any event, were far from equal in bargaining power. The purported waiver provision was a printed part of a form sales contract and a necessary condition of the sale. The appellees made no showing whatever that the appellants were actually aware or made aware of the significance of the fine print now relied upon as a waiver of constitutional rights.

[30] The Court in Overmyer observed that 'where the contract is one of adhesion, where there is great disparity in bargaining power, and where the debtor receives nothing for the (waiver) provision, other legal consequences may ensue.' Id., at 188, 92 S.Ct., at 783. Yet, as in Overmyer, there is no need in the present cases to canvass those consequences fully. For a waiver of constitutional rights in any context must, at the very least, be clear. We need not concern ourselves with the involuntariness or unintelligence of a waiver when the contractual language relied upon does not, on its face, even amount to a waiver.

[31] The conditional sales contracts here simply provided that upon a default the seller 'may take back,' 'may retake' or 'may repossess' merchandise. The contracts ***96** included nothing about the waiver of a prior hearing. They did not indicate how or through what process-a final judgment, self-help, prejudgment replevin with a prior hearing, or prejudgment replevin without a prior hearing-the seller could take back the goods. Rather, the purported waiver provisions here are no more than a statement of the seller's right to repossession upon occurrence of certain events. The appellees do not suggest that these provisions waived the appellants' right to a full post-seizure hearing to determine whether those events had, in fact, occurred and to consider any other available defenses. By the same token, the language of the purported waiver provisions did not waive the appellants' constitutional right to a preseizure hearing of some kind.

VIII

[32][33][34] We hold that the Florida and Pennsylvania prejudgment replevin provisions work a deprivation of property without due process of law insofar as they deny the right to a prior opportunity to be heard before chattels are taken from their possessor.[FN32] Our holding, however, is a narrow one. We do not question the power of a State to seize goods before

a final judgment in order to protect the security interests of creditors so long as those creditors have tested their claim to the goods through the process of a fair prior hearing. The nature and form of such prior hearings, moreover, are legitimately open to many potential variations and are a ***97** subject, at this point, for legislation-not adjudication.[FN33] Since the essential reason for the requirement of a prior hearing is to prevent unfair and mistaken deprivations of property, however, it is axiomatic that the hearing must provide a real test. '(D)ue process is afforded only by the kinds of 'notice' and 'hearing'****2003** that are aimed at establishing the validity, or at least the probable validity, of the underlying claim against the alleged debtor before he can be deprived of his property . . ..' Sniadach v. Family Finance Corp., supra, 395 U.S. at 343, 89 S.Ct. at 1823 (Harlan, J., concurring). See Bell v. Burson, supra, 402 U.S. at 540, 91 S.Ct. at 1589; Goldberg v. Kelly, supra, 397 U.S. at 267, 90 S.Ct. at 1020.

FN32. We do not reach the appellants' argument that the Florida and Pennsylvania statutory procedures violate the Fourth Amendment, made applicable to the States by the Fourteenth. See n. 2, supra. For once a prior hearing is required, at which the applicant for a writ must establish the probable validity of his claim for repossession, the Fourth Amendment problem may well be obviated. There is no need for us to decide that question at this point.

FN33. Leeway remains to develop a form of hearing that will minimize unnecessary cost and delay while preserving the fairness and effectiveness of the hearing in preventing seizures of goods where the party seeking the writ has little probability of succeeding on the merits of the dispute.

For the foregoing reasons, the judgments of the District Courts are vacated and these cases are remanded for further proceedings consistent with this opinion.

It is so ordered.

Vacated and remanded.

Mr. Justice POWELL and Mr. Justice REHNQUIST did not participate in the consideration or decision of these cases.

Mr. Justice WHITE, with whom THE CHIEF JUSTICE and Mr. Justice BLACKMUN join, dissenting.

Because the Court's opinion and judgment improvidently, in my view, call into question important aspects of the statutes of almost all the States governing secured transactions and the procedure for repossessing personal property, I must dissent for the reasons that follow.

First: It is my view that when the federal actions were filed in these cases and the respective District ***98** Courts proceeded to judgment there were state court proceedings in progress. It seems apparent to me that the judgments should be vacated and the District Courts instructed to reconsider these cases in the light of the principles announced in Younger v. Harris, 401 U.S. 37, 91 S.Ct. 746, 27 L.Ed.2d 669 (1971); Samuels v. Mackell, 401 U.S. 66, 91 S.Ct. 764, 27 L.Ed.2d 688; Boyle v. Landry, 401 U.S. 77, 91 S.Ct. 758, 27 L.Ed.2d 696; and Perez v. Ledesma, 401 U.S. 82, 91 S.Ct. 674, 27 L.Ed.2d 701.

In No. 70-5039, the Florida statutes provide for the commencement of an action of replevin, with bond, by serving a writ summoning the defendant to answer the complaint. Thereupon the sheriff may seize the property, subject to repossession by defendant within three days upon filing of a counterbond, failing which the property is delivered to plaintiff to await final judgment in the replevin action. Fla.Stat.Ann. s 78.01 et seq. (Supp.1972-1973). This procedure was attacked in a complaint filed by appellant Fuentes in the federal court, alleging that an affidavit in replevin had been filed by Firestone Tire & Rubber Co. in the Small Claims Court of Dade County; that a writ of replevin had been issued pursuant thereto and duly served, together with the affidavit and complaint; and that a trial date had been set in the Small Claims Court. Firestone's answer admitted that the replevin action was pending in the Small Claims Court and asserted that Mrs. Fuentes, plaintiff in the federal court and appellant here, had not denied her default or alleged that she had the right to possession of the property. Clearly, state court proceedings were pending, no bad faith or harassment was alleged, and no irreparable injury appeared that could not have been averted by raising constitutional objections in the pending state court proceeding. In this posture, it would appear that

the case should be reconsidered under Younger v. Harris and companion cases, which were announced after the District Court's judgment.

***99** In No. 70-5138, Pennsylvania Rule of Civil Procedure 1073 expressly provides that an '(a)ction of replevin with bond shall be commended by filing with the prothonotary a praecipe for a writ of replevin with bond . . ..' When the writ issues and is served, the defendant has three days to file a counterbond and should he care to have a hearing he may file his own praecipe, in which event the plaintiff must proceed further in the action by filing and serving his complaint.

In the cases before us, actions in replevin were commenced in accordance ****2004** with the rules, and appellee Sears, Roebuck & Co. urged in the District Court that plaintiffs had 'adequate remedies at law which they could pursue in the state court proceedings which are still pending in accordance with the statutes and rules of Pennsylvania.' App. 60. Under Younger v. Harris and companion cases, the District Court's judgment should be vacated and the case reconsidered.

Second: It goes without saying that in the typical installment sale of personal property both seller and buyer have interests in the property until the purchase price is fully paid, the seller early in the transaction often having more at stake than the buyer. Nor is it disputed that the buyer's right to possession is conditioned upon his making the stipulated payments and that upon default the seller is entitled to possession. Finally, there is no question in these cases that if default is disputed by the buyer he has the opportunity for a full hearing, and that if he prevails he may have the property or its full value as damages.

The narrow issue, as the Court notes, is whether it comports with due process to permit the seller, pending final judgment, to take possession of the property through a writ of replevin served by the sheriff without affording the buyer opportunity to insist that the seller establish at a hearing that there is reasonable ***100** basis for his claim of default. The interests of the buyer and seller are obviously antagonistic during this interim period: the buyer wants the use of the property pending final judgment; the seller's interest is to prevent further use and deterioration of his security. By the Florida and Pennsylvania laws the property is to all intents and purposes placed in custody and immobilized during this time. The buyer loses use of the property temporarily but is protected against loss; the seller is protected against deterioration of the property but must undertake by bond to make the buyer whole in the event the latter prevails.

In considering whether this resolution of conflicting interests is unconstitutional, much depends on one's perceptions of the practical considerations involved. The Court holds it constitutionally essential to afford opportunity for a probable-cause hearing prior to repossession. Its stated purpose is 'to prevent unfair and mistaken deprivations of property.' But in these typical situations, the buyer-debtor has either defaulted or he has not. If there is a default, it would seem not only 'fair,' but essential, that the creditor be allowed to repossess; and I cannot say that the likelihood of a mistaken claim of default is sufficiently real or recurring to justify a broad constitutional requirement that a creditor do more than the typical state law requires and permits him to do. Sellers are normally in the business of selling and collecting the price for their merchandise. I could be quite wrong, but it would not seem in the creditor's interest for a default occasioning repossession to occur; as a practical matter it would much better serve his interests if the transaction goes forward and is completed as planned. Dollar-and-cents considerations weigh heavily against false claims of default as well as against precipitate action that would allow no opportunity for mistakes to surface and be ***101** corrected.[FN*] Nor does it ****2005** seem to me that creditors would lightly undertake the expense of instituting replevin actions and putting up bonds.

FN* Appellants Paul and Ellen Parham admitted in their complaints that they were delinquent in their payments. They stipulated to this effect as well as to receipt of notices of delinquency prior to institution of the replevin action, and the District Court so found.

Appellant Epps alleged in his complaint that he was not in default. The defendant, Government Employees Exchange Corp., answered that Epps was in default in the amount of $311.25 as of August 9, 1970, that the entire sum due had been demanded in accordance with the relevant documents, and that Epps had failed and refused to pay that sum. The District Court did not resolve this factual

dispute. It did find that Epps earned in excess of $10,000 per year and that the agreements Epps and Parham entered into complied with the provisions of Pennsylvania's Uniform Commercial Code and its Services and Installment Sales Act.

As for appellant Rosa Washington, the District Court, based on the allegations of her complaint, entered a temporary restraining order requiring that the property seized from her be returned forthwith. At a subsequent hearing the order was dissolved, the court finding 'that the representations upon which the temporary restraining order of September 18, 1970, issued were incorrect, both as to allegations contained in the complaint and representations made by counsel.' (App. 29.)

It was stipulated between appellant Fuentes and defendants in the District Court that Mrs. Fuentes was in default at the time the replevin action was filed and that notices to this effect were sent to her over several months prior to institution of the suit. (App. 25-26.)

The Court relies on prior cases, particularly Goldberg v. Kelly, 397 U.S. 254, 90 S.Ct. 1011, 25 L.Ed.2d 287 (1970); Bell v. Burson, 402 U.S. 535, 91 S.Ct. 1586, 29 L.Ed.2d 90 (1971); an Stanley v. Illinois, 405 U.S. 645, 92 S.Ct. 1208, 31 L.Ed.2d 551 (1972). But these cases provide no automatic test for determining whether and when due process of law requires adversary proceedings. Indeed, '(t)he very nature of due process negates any concept of inflexible procedures universally applicable to every imaginable situation. . . .' '(W)hat procedures due process may require under any given set of circumstances must begin ***102** with a determination of the precise nature of the government function involved as well as of the private interest that has been affected by governmental action.' Cafeteria and Restaurant Workers v. McElroy, 367 U.S. 886, 895, 81 S.Ct. 1743, 1748, 6 L.Ed.2d 1230 (1961). See also Stanley v. Illinois, supra, 405 U.S., at 650, 92 S.Ct., at 1212; Goldberg v. Kelly, supra, 397 U.S., at 263, 90 S.Ct., at 1018. Viewing the issue before us in this light, I would not construe the Due Process Clause to require the creditors to do more than they have done in these cases to secure possession pending final hearing. Certainly, I would not ignore, as the Court does, the creditor's interest in preventing further use and deterioration of the property in which he has substantial interest. Surely under the Court's own definition, the creditor has a 'property' interest as deserving of protection as that of the debtor. At least the debtor, who is very likely uninterested in a speedy resolution that could terminate his use of the property, should be required to make those payments, into court or otherwise, upon which his right to possession is conditioned. Cf. Lindsey v. Normet, 405 U.S. 56, 92 S.Ct. 862, 31 L.Ed.2d 36 (1972).

Third: The Court's rhetoric is seductive, but in end analysis, the result it reaches will have little impact and represents no more than ideological tinkering with state law. It would appear that creditors could withstand attack under today's opinion simply by making clear in the controlling credit instruments that they may retake possession without a hearing, or, for that matter, without resort to judicial process at all. Alternatively, they need only give a few days' notice of a hearing, take possession if hearing is waived or if there is default; and if hearing is necessary merely establish probable cause for asserting that default has occurred. It is very doubtful in my mind that such a hearing would in fact result in protections for the debtor substantially different from those the present laws provide.***103** On the contrary, the availability of credit may well be diminished or, in any event, the expense of securing it increased.

None of this seems worth the candle to me. The procedure that the Court strikes down is not some barbaric hangover from bygone days. The respective rights of the parties in secured transactions have undergone the most intensive analysis in recent years. The Uniform Commercial Code, which now so pervasively governs the subject matter with ****2006** which it deals, provides in Art. 9, s 9-503, that:

'Unless otherwise agreed a secured party has on default the right to take possession of the collateral. In taking possession a secured party may proceed without judicial process if this can be done without breach of the peace or may proceed by action. . . .'

Recent studies have suggested no changes in Art. 9 in this respect. See Permanent Editorial Board for the Uniform Commercial Code, Review Committee for Article 9 of the Uniform Commercial Code, Final Report, s 9-503 (April 25, 1971). I am content to rest

on the judgment of those who have wrestled with these problems so long and often and upon the judgment of the legislatures that have considered and so recently adopted provisions that contemplate precisely what has happened in these cases.

In re ERIC HALKO on Habeas Corpus.

Crim. No. 12263.

Court of Appeal, Second District, Division 4, California.
Nov. 18, 1966.

HEADNOTES

(1a, 1b) Health § 17--Communicable Diseases--Quarantine.

Health & Saf. Code, § 3285, providing, *inter alia*, that a health officer may make an isolation or quarantine order whenever he shall determine in a particular tuberculosis case that quarantine or isolation is necessary for the protection of the public health, is a law for the suppression of a contagious disease and promotion of the public health, the provisions of which seem reasonable and necessary for the protection and preservation of the public health, and the statute is constitutional.

See **Cal.Jur.2d,** Health, § 22; **Am.Jur.,** Health (1st ed § 32).

(2) Health § 17--Communicable Diseases--Quarantine.

The Legislature is vested with broad discretion in determining what are contagious and infectious diseases and in adopting means for preventing the spread thereof.

(3) Health § 17--Communicable Diseases--Quarantine.

Consecutive orders for quarantine under Health & Saf. Code, § 3285, may issue so long as any person continues to be infected with tuberculosis and on reasonable grounds is believed by the health officer to be dangerous to the public health.

SUMMARY

PROCEEDING in habeas corpus to secure release from the security side of a hospital. Writ denied.

COUNSEL

Bertram H. Ross, under appointment by the Court of Appeal, for Petitioner. ***554**

Harold W. Kennedy, County Counsel, and Gordon W. Treharne, Deputy County Counsel, for Respondent.

CHANTRY, J. pro tem. [FN*]

FN* Assigned by the Chairman of the Judicial Council.

This is an application for a writ of habeas corpus by which petitioner, Eric Halko, seeks release from the Mira Loma Hospital, security side.

Petitioner has a diagnosis of pulmonary tuberculosis, minimal active. On July 1, 1964, he was served with a quarantine order of isolation confining him to Mira Loma Hospital. He deserted that institution on August 1, 1964, and was subsequently arrested, tried, and convicted of violating section 3351 [FN1] of the Health and Safety Code of California. [FN2] On August 20, 1964, he was sentenced to 180 days in jail by the judge of the municipal court, Antelope Judicial District. The sentence was suspended, and the petitioner was placed on probation for three years on condition he serve the first 179 days in jail. Prior to serving the jail sentence the petitioner was served with an order of isolation because of his tubercular condition and returned to the Mira Loma Hospital, security side. Thereafter, except for one interlude not pertinent to a determination of this case, a public health officer of this county served Halko with successive orders of isolation at Mira Loma Hospital for periods of approximately six months each. These orders are dated January, June, and December of 1965 and March 1966. The petitioner on May 5, 1966, sought a writ of habeas corpus from department 70 of the Superior Court of Los Angeles County. At the conclusion of the hearing in that court the application for writ of habeas corpus was denied.

FN1 "Inasmuch as the order provided for by Section 3285 is for the protection of the public health, any person who, after service upon him of an order of a health officer directing his isolation or examination as provided in Section 3285, violates or fails to comply with the same or any provision the-

reof, is guilty of a misdemeanor. ..."

FN2 All references are to the Health and Safety Code unless otherwise indicated.

(1a) Petitioner contends the right of the health officer to issue consecutive certificates of quarantine and isolation for periods of six months each, "without means of questioning and judicially determining" the conclusion of the health officer, results in "continually depriving one of his liberty." Therefore, section 3285 "is unconstitutional in that it deprives this petitioner of his liberty without due process of law." ***555**

We disagree with the petitioner's interpretation of the law and his assertion that section 3285 is unconstitutional.

Chapter 5 of the Health and Safety Code (sections 3279-3310) deals extensively with tuberculosis. Pulmonary tuberculosis is declared to be an infectious and communicable disease, dangerous to public health. Each city, county, or group of counties may establish and maintain tuberculosis wards, hospitals and sanitariums for the treatment of persons suffering from tuberculosis. Each person being cared for at public expense in a public or private hospital or sanitarium is subsidized by an allocation from state funds to the city, county or group of counties affected.

Section 3285 of the Health and Safety Code sets forth with some particularity the duties and powers of the public health officer in treating with the control of tuberculosis by inspection, examination, quarantine, or isolation. Each health officer is directed to use every available means to ascertain the existence of, and immediately to investigate, all reported or suspected cases of tuberculosis in the infectious stage within his jurisdiction and to ascertain the sources of such infection. In carrying out such investigations each health officer is invested with full powers of inspection, examination, and quarantine or isolation of all persons known to be infected with tuberculosis in an infectious stage.

The section also contains the following provisions:

(1) Whenever the health officer shall determine on reasonable grounds that an examination of any person is necessary for the preservation and protection of the public health, he shall make an examination order in writing, setting forth the name of the person to be examined, the time and place of the examination, and such other terms and conditions as may be necessary to protect the public health. Any person served with an examination order may have such examination made by a physician of his own choice under such terms and conditions as the health officer shall determine on reasonable grounds to be necessary to protect the public health. (3285, subd. (c).)

(2) The health officer may make an isolation or quarantine order whenever he shall determine in a particular case that quarantine or isolation is necessary for the protection of the public health. The isolation or quarantine order shall be in writing, setting forth the name of the person to be isolated, *the period of time during which the order shall remain effective*, the place of isolation or quarantine, and such other terms and ***556** conditions as may be necessary to protect the public health. (3285, subd. (d).)

Any person who, after service upon him of an order of a health officer directing his isolation or examination as provided in 3285, violates or fails to comply with said order is guilty of a misdemeanor. (3351.) The violator shall be prosecuted by the district attorney of the county in which the violation was committed upon the request of a health officer as provided in section 3355.

The duty of the state to protect the public from the danger of tuberculosis is prescribed by the Supreme Court of this state in the following statement: "It is a well-recognized principle that it is one of the first duties of a state to take all necessary steps for the promotion and protection of the health and comfort of its inhabitants. The preservation of the public health is universally conceded to be one of the duties devolving upon the state as a sovereignty, and whatever reasonably tends to preserve the public health is a subject upon which the legislature, within its police power, may take action. That tuberculosis is a dangerous and infectious disease which attacks both human beings and domestic animals; that it is prevalent throughout the state among both human beings and domestic animals; and that it is communicated to human beings, especially to children, by milk and other food products from infected animals, stand undisputed. ... In other words, health regulations enacted by the state under its

police power and providing even drastic measures for the elimination of disease, whether in human beings, crops or cattle, in a general way are not affected by constitutional provisions, either of the state or national government. (*Lausen v. Board of Supervisors*, 204 Iowa 30, 33 [214 N.W. 682, 684].)

".... In construing such an act, the courts must presume that the legislature has carefully investigated and has properly determined that the interests of the public require legislation that will insure the public safety and the public health against threatened danger from diseased animals ..." and human beings. "The determination of that fact is the province of the legislature, and not of the courts. It is also the province of the legislature, in the exercise of a sound discretion, to determine what measures are necessary for the protection of such interests. [Citations.]" (*Patrick v. Riley*, 209 Cal. 350, 354, 356 [287 P. 455].)

"The determination by the legislative body that a particular regulation is necessary for the protection or preservation of ***557** health is conclusive on the courts except only to the limitation that it must be a reasonable determination, not an abuse of discretion, and must not infringe rights secured by the Constitution. [Citations.]" (*DeAryan v. Butler*, 119 Cal.App.2d 674, 682 [260 P.2d 98].)

(2) The Legislature is vested with broad discretion in determining what are contagious and infectious diseases and in adopting means for preventing the spread thereof. (*In re Johnson*, 40 Cal.App. 242 [180 P. 644]; *Abeel v. Clark*, 84 Cal. 226 [24 P. 383].) In order to accomplish the purpose for which this law was enacted, the court should give it a broad and liberal construction. (39 C.J.S., p. 811, § 2.)

(1b) The act here in question was obviously passed by the Legislature for a public purpose. It is a law for the suppression of a contagious disease and the promotion of the public health. The provisions of section 3285 of the Health and Safety Code seem reasonable and necessary for the protection and preservation of the public health. It does not appear to us that the Legislature has abused its discretion or violated the terms of the federal or state Constitution by enactment of section 3285.

We now turn to the question of the public health officer's right to restrict the liberty of petitioner to the Mira Loma Hospital by successive isolation or quarantine orders. Petitioner does not dispute the finding of the health officer that he was, when subjected to quarantine regulations, and is now afflicted and suffering from pulmonary tuberculosis which is declared by section 3285 to be an infectious and communicable disease and dangerous to the public health. The petition filed here does not allege that he is free of the disease.

Subdivision (d) of section 3285 directs the health officer to make an isolation or quarantine order in writing, specifying the place of quarantine and other appropriate terms. *In re Culver*, 187 Cal. 437, 442 [202 P. 661], states that the verb "quarantine" means ' "to keep persons, when suspected of having contracted or been exposed to an infectious disease, out of a community, or to confine them to a given place therein, and to prevent intercourse between them and the people generally of such community." '

Under former Political Code section 2979a and former Health and Safety Code section 2554 [FN3] health officers were given the power to quarantine persons found to have a venereal disease. ***558**

FN3 See present sections 3053, 3194, 3195.

Persons who were confined in county hospitals or jails pursuant to quarantine orders issued by health officers under those statutes have been denied release on habeas corpus, where the evidence showed reasonable cause to believe that the person was infected. (*In re Martin*, 83 Cal.App.2d 164 [188 P.2d 287]; *In re King*, 128 Cal.App. 27 [16 P.2d 694]; *In re Fisher*, 74 Cal.App. 225 [239 P. 1100]; *In re Travers*, 48 Cal.App. 764 [192 P. 454].)

On the other hand, a person quarantined without reasonable grounds is entitled to relief by habeas corpus. (*In re Arata*, 52 Cal.App. 380 [198 P. 814].) But in that case the court was careful to point out that the issue is a factual one. The opinion states at page 383: "That the health authorities possess the power to place under quarantine restrictions persons whom they have reasonable cause to believe are afflicted with infectious or contagious diseases coming within the definition set forth in Political Code, section 2979a, as a general right, may not be questioned. It is equally true that in the exercise of this unusual power, which infringes upon the right of liberty of the individual,

personal restraint can only be imposed where, under the facts as brought within the knowledge of the health authorities, *reasonable ground exists to support the belief* that the person is afflicted as claimed; and as to whether such order is justified will depend upon the facts of each individual case."

Section 3285 does not contain any limitation or prohibition respecting the period of quarantine or the power of the health officer to issue consecutive certificates of isolation. (3) The law reasonably assumes that consecutive orders for quarantine may issue so long as any person continues to be infected with tuberculosis and on reasonable grounds is believed by the health officer to be dangerous to the public health. (*In re King,* 128 Cal.App. 27 [16 P.2d 694].)

There is nothing in this record to indicate the health officer issued any of the respective quarantine orders without probable cause or that petitioner does not at this time have an infectious and communicable disease which is dangerous to the public health.

The writ is denied.

Files, P. J., and Jefferson, J., concurred. ***559**

Rev.Laws, c. 75, § 137, authorizes the board of health of a city or town, if, in its discretion, it is necessary for the public health, to require the vaccination and revaccination of all of the inhabitants thereof, and requires them to provide means of free vaccination, and declares that whoever, being over 21 years of age, and not under guardianship, refuses or neglects to comply with such requirement, shall forfeit $5. Held, that such act was a valid exercise of police power as defined by M.G.L.A. Const. c. 1, § 1, art. 4, providing that the general court shall have power to establish all manner of wholesome orders, laws, statutes, etc., not repugnant to the Constitution, which they shall judge to be for the welfare of the commonwealth.

A state Legislature, in enacting a statute purporting to be for the protection of local communities against the spread of smallpox, is entitled to choose between the theory of those of the medical profession who think vaccination worthless for this purpose, and believe its effect to be injurious and dangerous, and the opposite theory, which is in accord with common belief and is maintained by high medical authority, and is not compelled to commit a matter of this character, involving the public health and safety, to the final decision of a court or jury.

****358 *14** *Messrs.* **George Fred Williams** and *James A. Halloran* for plaintiff in error.

****18** *Messrs.* **Frederick H. Nash** and *Herbert Parker* for defendant in error.

***22** Mr. Justice **Harlan** delivered the opinion of the court:

***12** This case involves the validity, under the Constitution of the United States, of certain provisions in the statutes of Massachusetts relating to vaccination.

The Revised Laws of that commonwealth, chap. 75, § 137, provide that 'the board of health of a city or town, if, in its opinion, it is necessary for the public health or safety, shall require and enforce the vaccination and revaccination of all the inhabitants thereof, and shall provide them with the means of free vaccination. Whoever, being over twenty-one years of age and not under guardianship, refuses or neglects to comply with such requirement shall forfeit $5.'

An exception is made in favor of 'children who present a certificate, signed by a ****359** registered physician, that they are unfit subjects for vaccination.' § 139.

Proceeding under the above statutes, the board of health of the city of Cambridge, Massachusetts, on the 27th day of February, 1902, adopted the following regulation: 'Whereas, smallpox has been prevalent to some extent in the city of Cambridge, and still continues to increase; and whereas, it is necessary for the speedy extermination of the disease that all persons not protected by vaccination should be vaccinated; and whereas, in the opinion of the board, the public health and safety require the vaccination or revaccination of all the inhabitants of Cambridge; be it ordered, that ***13** all the inhabitants habitants of the city who have not been successfully vaccinated since March 1st, 1897, be vaccinated or revaccinated.'

Subsequently, the board adopted an additional regulation empowering a named physician to enforce the vaccination of persons as directed by the board at its special meeting of February 27th.

The above regulations being in force, the plaintiff in error, Jacobson, was proceeded against by a criminal complaint in one of the inferior courts of Massachusetts. The complaint charged that on the 17th day of July, 1902, the board of health of Cambridge, being of the opinion that it was necessary for the public health and safety, required the vaccination and revaccination of all the inhabitants thereof who had not been successfully vaccinated since the 1st day of March, 1897, and provided them with the means of free vaccination; and that the defendant, being over twenty-one years of age and not under guardianship, refused and neglected to comply with such requirement.

The defendant, having been arraigned, pleaded not guilty. The government put in evidence the above regulations adopted by the board of health, and made proof tending to show that its chairman informed the defendant that, by refusing to be vaccinated, he would incur the penalty provided by the statute, and would be prosecuted therefor; that he offered to vaccinate the defendant without expense to him; and that the offer was declined, and defendant refused to be vaccinated.

The prosecution having introduced no other evidence, the defendant made numerous offers of proof. But the trial court ruled that each and all of the facts offered to be proved by the defendant were immaterial, and excluded all proof of them.

The defendant, standing upon his offers of proof, and introducing no evidence, asked numerous instructions to the jury, among which were the following:

That § 137 of chapter 75 of the Revised Laws of Massachusetts was in derogation of the rights secured to the defendant by the preamble to the Constitution of the United States, and tended to subvert and defeat the purposes of the Constitution as declared in its preamble;

That the section referred to was in derogation of the rights secured to the defendant by the 14th Amendment of the Constitution of the United States, and especially of the clauses of that amendment providing that no state shall make or enforce any law abridging the privileges or immunities of citizens of the United States, nor deprive any person of life, liberty, or property without due process of law, nor deny to any person within its jurisdiction the equal protection of the laws; and

That said section was opposed to the spirit of the Constitution.

Each of defendant's prayers for instructions was rejected, and he duly excepted. The defendant re-

quested the court, but the court refused, to instruct the jury to return a verdict of not guilty. And the court instructed structed the jury, in substance, that, if they believed the evidence introduced by the commonwealth, and were satisfied beyond a reasonable doubt that the defendant was guilty of the offense charged in the complaint, they would be warranted in finding a verdict of guilty. A verdict of guilty was thereupon returned.

The case was then continued for the opinion of the supreme judicial court of Massachusetts. Santa Fé Pacific Railroad Company, the exceptions, sustained the action of the trial court, and thereafter, pursuant to the verdict of the jury, he was sentenced by the court to pay a fine of $5. And the court ordered that he stand committed until the fine was paid.

We pass without extended discussion the suggestion that the particular section of the statute of Massachusetts now in question (§ 137, chap. 75) is in derogation of rights secured by the preamble of the Constitution of the United States. Although that preamble indicates the general purposes for which the people ordained and established the Constitution, it has never been regarded as the source of any substantive power conferred on the government of the United States, or on any of its departments. Such powers embrace only those expressly granted in the body of the Constitution, and such as may be implied from those so granted. Although, therefore, one of the declared objects of the Constitution was to secure the blessings of liberty to all under the sovereign jurisdiction and authority of the United States, no power can be exerted to that end by the United States, unless, apart from the preamble, it be found in some express delegation of power, or in some power ****360** to be properly implied therefrom. 1 Story, Const. § 462.

We also pass without discussion the suggestion that the above section of the statute is opposed to the spirit of the Constitution. Undoubtedly, as observed by Chief Justice Marshall, speaking for the court in *Sturges* v. *Crowninshield*, 4 Wheat. 122, 202, 4 L. ed. 529, 550, 'the spirit of an instrument, especially of a constitution, is to be respected not less than its letter; yet the spirit is to be collected chiefly from its words.' We have no need in this case to go beyond the plain, obvious meaning of the words in those provisions of the Constitution which, it is contended, must control our decision.

What, according to the judgment of the state court, are the ***23** scope and effect of the statute? What results were intended to be accomplished by it? These questions must be answered.

The supreme judicial court of Massachusetts said in the present case: 'Let us consider the offer of evidence which was made by the defendant Jacobson. The ninth of the propositions which he offered to prove, as to what vaccination consists of, is nothing more than a fact of common knowledge, upon which the statute is founded, and proof of it was unnecessary and immaterial. The thirteenth and fourteenth involved matters depending upon his personal opinion, which could not be taken as correct, or given effect, merely because he made it a ground of refusal to comply with the requirement. Moreover, his views could not affect the validity of the statute, nor entitle him to be excepted from its provisions. *Com.* v. *Connolly*, 163 Mass. 539, 40 N. E. 862; *Com.* v. *Has*, 122 Mass. 40; *Reynolds* v. *United States*, 98 U. S. 145, 25 L. ed. 244; *Reg.* v. *Downes*, 13 Cox, C. C. 111. The other eleven propositions all relate to alleged injurious or dangerous effects of vaccination. The defendant 'offered to prove and show be competent evidence' these socalled facts. Each of them, in its nature, is such that it cannot be stated as a truth, otherwise than as a matter of opinion. The only 'competent evidence' that could be presented to the court to prove these propositions was the testimony of experts, giving their opinions. It would not have been competent to introduce the medical history of individual cases. Assuming that medical experts could have been found who would have testified in support of these propositions, and that it had become the duty of the judge, in accordance with the law as stated in *Com.* v. *Anthes*, 5 Gray, 185, to instruct the jury as to whether or not the statute is constitutional, he would have been obliged to consider the evidence in connection with facts of common knowledge, which the court will always regard in passing upon the constitutionality of a statute. He would have considered this testimony of experts in connection with the facts that for nearly a century most of the members of the medical profession ***24** have regarded vaccination, repeated after intervals, as a preventive of smallpox; that, while they have recognized the possibility of injury to an individual from carelessness in the performance of it, or even in a conceivable case without carelessness, they generally have considered the risk of such an injury too small to

be seriously weighed as against the benefits coming from the discreet and proper use of the preventive; and that not only the medical profession and the people generally have for a long time entertained these opinions, but legislatures and courts have acted upon them with general unanimity. If the defendant had been permitted to introduce such expert testimony as he had in support of these several propositions, it could not have changed the result. It would not have justified the court in holding that the legislature had transcended its power in enacting this statute on their judgment of what the welfare of the people demands.' *Com.* v. *Jacobson*, 183 Mass. 242, 66 N. E. 719.

While the mere rejection of defendant's offers of proof does not strictly present a Federal question, we may properly regard the exclusion of evidence upon the ground of its incompetency or immateriality under the statute as showing what, in the opinion of the state court, are the scope and meaning of the statute. Taking the above observations of the state court as indicating the scope of the statute,-and such is our duty. *Leffingwell* v. *Warren*, 2 Black, 599, 603, 17 L. ed. 261. 262; *Morley* v. *Lake Shore & M. S. R. Co.* 146 U. S. 162, 167, 36 L. ed. 925, 928, 13 Sup. Ct. Rep. 54; *Tullis* v. *Lake Erie & W. R. Co.* 175 U. S. 348, 44 L. ed. 192, 20 Sup. Ct. Rep. 136; *W. W. Cargill Co.* v. *Minnesota*, 180 U. S. 452, 466, 45 L. ed. 619, 625, 21 Sup. Ct. Rep. 423,-we assume, for the purposes of the present inquiry, that its provisions require, at least as a general rule, that adults not under the guardianship and remaining within the limits of the city of Cambridge must submit to the regulation adopted by the board of health. Is the statute, so construed, therefore, inconsistent with the liberty which the Constitution of the United States secures to every person against deprivation by the state?

The authority of the state to enact this statute is to be ***25** referred to what is commonly called the police power,-a power which the state did not surrender when becoming a member of the Union under the Constitution. Although this court has refrained frained ****361** from any attempt to define the limits of that power, yet it has distinctly recognized the authority of a state to enact quarantine laws and 'health laws of every description;' indeed, all laws that relate to matters completely within its territory and which do not by their necessary operation affect the people of other states. According to settled principles, the police power of a state must be held to embrace, at least, such reasonable regulations established directly by legislative enactment as will protect the public health and the public safety. *Gibbons* v. *Ogden*, 9 Wheat. 1, 203, 6 L. ed. 23, 71; *Hannibal & St. J. R. Co.* v. *Husen*, 95 U. S. 465, 470, 24 L. ed. 527, 530; *Boston Beer Co.* v. *Massachusetts*, 97 U. S. 25, 24 L. ed. 989; *New Orleans Gaslight Co.* v. *Louisiana Light & H. P. & Mfg. Co.* 115 U. S. 650, 661, 29 L. ed. 516, 520, 6 Sup. Ct. Rep. 252; *Lawson* v. *Stecle*, 152 U. S. 133, 38 L. ed. 385, 14 Sup. Ct. Rep. 499. It is equally true that the state may invest local bodies called into existence for purposes of local administration with authority in some appropriate way to safeguard the public health and the public safety. The mode or manner in which those results are to be accomplished is within the discretion of the state, subject, of course, so far as Federal power is concerned, only to the condition that no rule prescribed by a state, nor any regulation adopted by a local governmental agency acting under the sanction of state legislation, shall contravene the Constitution of the United States, nor infringe any right granted or secured by that instrument. A local enactment or regulation, even if based on the acknowledged police powers of a state, must always yield in case of conflict with the exercise by the general government of any power it possesses under the Constitution, or with any right which that instrument gives or secures. *Gibbons* v. *Ogden*, 9 Wheat. 1, 210, 6 L. ed. 23, 73; *Sinnot* v. *Davenport*, 22 How. 227, 243, 16 L. ed. 243, 247; *Missouri, K. & T. R. Co.* v. *Haber*, 169 U. S. 613, 626, 42 L. ed. 878, 882, 18 Sup. Ct. Rep. 488.

We come, then, to inquire whether any right given or secured by the Constitution is invaded by the statute as ***26** interpreted by the state court. The defendant insists that his liberty is invaded when the state subjects him to fine or imprisonment for neglecting or refusing to submit to vaccination; that a compulsory vaccination law is unreasonable, arbitrary, and oppressive, and, therefore, hostile to the inherent right of every freeman to care for his own body and health in such way as to him seems best; and that the execution of such a law against one who objects to vaccination, no matter for what reason, is nothing short of an assault upon his person. But the liberty secured by the Constitution of the United States to every person within its jurisdiction does not import an absolute right in each person to be, at all times and in all circumstances, wholly freed from restraint. There are manifold restraints to which every person is neces-

sarily subject for the common good. On any other basis organized society could not exist with safety to its members. Society based on the rule that each one is a law unto himself would soon be confronted with disorder and anarchy. Real liberty for all could not exist under the operation of a principle which recognizes the right of each individual person to use his own, whether in respect of his person or his property, regardless of the injury that may be done to others. This court has more than once recognized it as a fundamental principle that 'persons and property are subjected to all kinds of restraints and burdens in order to secure the general comfort, health, and prosperity of the state; of the perfect right of the legislature to do which no question ever was, or upon acknowledged general principles ever can be, made, so far as natural persons are concerned.' *Hannibal & St. J. R. Co.* v. *Husen*, 95 U. S. 465, 471, 24 L. ed. 527, 530; *Missouri, K. & T. R. Co.* v. *Haber*, 169 U. S. 613, 628, 629, 42 L. ed. 878-883, 18 Sup. Ct. Rep. 488; *Thorpe* v. *Rutland & B. R. Co.* 27 Vt. 148, 62 Am. Dec. 625. In *Crowley* v. *Christensen*, 137 U. S. 86, 89, 34 L. ed. 620, 621, 11 Sup. Ct. Rep. 13, we said: 'The possession and enjoyment of all rights are subject to such reasonable conditions as may be deemed by the governing authority of the country essential to the safety, health, peace, good order, and morals of the community. Even liberty ***27** itself, the greatest of all rights, is not unrestricted license to act according to one's own will. It is only freedom from restraint under conditions essential to the equal enjoyment of the same right by others. It is, then, liberty regulated by law.' In the Constitution of Massachusetts adopted in 1780 it was laid down as a fundamental principle of the social compact that the whole people covenants with each citizen, and each citizen with the whole people, that all shall be governed by certain laws for 'the common good,' and that government is instituted 'for the common good, for the protection, safety, prosperity, and happiness of the people, and not for the profit, honor, or private interests of any one man, family, or class of men.' The good and welfare of the commonwealth, of which the legislature is primarily the judge, is the basis on which the police power rests in Massachusetts. *Com.* v. *Alger*, 7 Cush. 84.

Applying these principles to the present case, it is to be observed that the legislature ****362** of Massachusetts required the inhabitants of a city or town to be vaccinated only when, in the opinion of the board of health, that was necessary for the public health or the public safety. The authority to determine for all what ought to be done in such an emergency must have been lodged somewhere or in some body; and surely it was appropriate for the legislature to refer that question, in the first instance, to a board of health composed of persons residing in the locality affected, and appointed, presumably, because of their fitness to determine such questions. To invest such a body with authority over such matters was not an unusual, nor an unreasonable or arbitrary, requirement. Upon the principle of self-defense, of paramount necessity, a community has the right to protect itself against an epidemic of disease which threatens the safety of its members. It is to be observed that when the regulation in question was adopted smallpox, according to the recitals in the regulation adopted by the board of health, was prevalent to some extent in the city of Cambridge, and the disease was increasing. If such was ***28** the situation,-and nothing is asserted or appears in the record to the contrary,-if we are to attach, any value whatever to the knowledge which, it is safe to affirm, in common to all civilized peoples touching smallpox and the methods most usually employed to eradicate that disease, it cannot be adjudged that the present regulation of the board of health was not necessary in order to protect the public health and secure the public safety. Smallpox being prevalent and increasing at Cambridge, the court would usurp the functions of another branch of government if it adjudged, as matter of law, that the mode adopted under the sanction of the state, to protect the people at large was arbitrary, and not justified by the necessities of the case. We say necessities of the case, because it might be that an acknowledged power of a local community to protect itself against an epidemic threatening the safety of all might be exercised in particular circumstances and in reference to particular persons in such an arbitrary, unreasonable manner, or might go so far beyond what was reasonably required for the safety of the public, as to authorize or compel the courts to interfere for the protection of such persons. *Wisconsin, M. & P. R. Co.* v. *Jacobson*, 179 U. S. 287, 301, 45 L. ed. 194, 201, 21 Sup. Ct. Rep. 115; 1 Dill. Mun. Corp. 4th ed. §§ 319-325, and authorities in notes; Freurid, Police Power, §§ 63 *et seq.* In *Hannibal & St. J. R. Co.* v. *Husen*, 95 U. S. 465, 471-473, 24 L. ed. 527, 530, 531, this court recognized the right of a state to pass sanitary laws, laws for the protection of life, liberty, health, or property within its limits, laws to prevent persons and animals suffering under contagious or infectious diseases, or convicts, from coming within its borders. But, as the laws there involved went beyond the necessity of the case, and,

under the guise of exerting a police power, invaded the domain of Federal authority, and violated rights secured by the Constitution, this court deemed it to be its duty to hold such laws invalid. If the mode adopted by the commonwealth of Massachusetts for the protection of its local communities against smallpox proved to be distressing, inconvenient, or objectionable to some,-if nothing more could be reasonably ***29** affirmed of the statute in question,-the answer is that it was the duty of the constituted authorities primarily to keep in view the welfare, comfort, and safety of the many, and not permit the interests of the many to be subordinated to the wishes or convenience of the few. There is, of course, a sphere within which the individual may assert the supremacy of his own will, and rightfully dispute the authority of any human government,-especially of any free government existing under a written constitution, to interfere with the exercise of that will. But it is equally true that in every well-ordered society charged with the duty of conserving the safety of its members the rights of the individual in respect of his liberty may at times, under the pressure of great dangers, be subjected to such restraint, to be enforced by reasonable regulations, as the safety of the general public may demand. An American citizen arriving at an American port on a vessel in which, during the voyage, there had been cases of yellow fever or Asiatic cholera, he, although apparently free from disease himself, may yet, in some circumstances, be held in quarantine against his will on board of such vessel or in a quarantine station, until it be ascertained by inspection, conducted with due diligence, that the danger of the spread of the disease among the community at large has disappeared. The liberty secured by the 14th Amendment, this court has said, consists, in part, in the right of a person 'to live and work where he will' (*Allgeyer* v. *Louisiana*, 165 U. S. 578, 41 L. ed. 832, 17 Sup. Ct. Rep. 427); and yet he may be compelled, by force if need be, against his will and without regard to his personal wishes or his pecuniary interests, or even his religious or political convictions, to take his place in the ranks of the army of his country, and risk the chance of being shot down in its defense. It is not, therefore, true that the power of the public to guard itself against imminent danger depends in every case involving the control of one's body upon his willingness ****363** to submit to reasonable regulations established by the constituted authorities, under the ***30** sanction of the state, for the purpose of protecting the public collectively against such danger.

It is said, however, that the statute, as interpreted by the state court, although making an exception in favor of children certified by a registered physician to be unfit subjects for vaccination, makes no exception in case of adults in like condition. But this cannot be deemed a denial of the equal protection of the laws to adults; for the statute is applicable equally to all in like condition, and there are obviously reasons why regulations may be appropriate for adults which could not be safely applied to persons of tender years.

Looking at the propositions embodied in the defendant's rejected offers of proof, it is clear that they are more formidable by their number than by their inherent value. Those offers in the main seem to have had no purpose except to state the general theory of those of the medical profession who attach little or no value to vaccination as a means of preventing the spread of smallpox, or who think that vaccination causes other diseases of the body. What everybody knows the court must know, and therefore the state court judicially knew, as this court knows, that an opposite theory accords with the common belief, and is maintained by high medical authority. We must assume that, when the statute in question was passed, the legislature of Massachusetts was not unaware of these opposing theories, and was compelled, of necessity, to choose between them. It was not compelled to commit a matter involving the public health and safety to the final decision of a court or jury. It is no part of the function of a court or a jury to determine which one of two modes was likely to be the most effective for the protection of the public against disease. That was for the legislative department to determine in the light of all the information it had or could obtain. It could not properly abdicate its function to guard the public health and safety. The state legislature proceeded upon the theory which recognized vaccination as at least an effective, if not the best-known, way in which to meet and suppress the ***31** evils of a smallpox epidemic that imperiled an entire population. Upon what sound principles as to the relations existing between the different departments of government can the court review this action of the legislature? If there is any such power in the judiciary to review legislative action in respect of a matter affecting the general welfare, it can only be when that which the legislature has done comes within the rule that, if a statute purporting to have been enacted to protect the public health, the public morals, or the public safety, has no real or substantial relation to those objects, or is, beyond all question, a plain,

palpable invasion of rights secured by the fundamental law, it is the duty of the courts to so adjudge, and thereby give effect to the Constitution. *Mugler* v. *Kansas*, 123 U. S. 623, 661, 31 L. ed. 205, 210, 8 Sup. Ct. Rep. 273; *Minnesota* v. *Barber*, 136 U. S. 313, 320, 34 L. ed. 455, 458, 3 Inters. Com. Rep. 185, 10 Sup. Ct. Rep. 862; *Atkin* v. *Kansas*, 191 U. S. 207, 223, 48 L. ed. 148, 158, 24 Sup. Ct. Rep. 124.

Whatever may be thought of the expediency of this statute, it cannot be affirmed to be, beyond question, in palpable conflict with the Constitution. Nor, in view of the methods employed to stamp out the disease of smallpox, can anyone confidently assert that the means prescribed by the state to that end has no real or substantial relation to the protection of the public health and the public safety. Such an assertion would not be consistent with the experience of this and other countries whose authorities have dealt with the disease of smallpox.[FN†] And the principle of vaccination ****364** as a means to ***32** prevent the spread of smallpox has been enforced in many states by statutes making the vaccination of children a condition of their right to enter or remain in public schools. *Blue* v. *Beach*, 155 Ind. 121, 50 L. R. A. 64, 80 Am. St. Rep. 195, 56 N. E. 89; ***33***Morris* v. *Columbus*, 102 Ga. 792, 42 L. R. A. 175, 66 Am. St. Rep. 243, 30 S. E. 850; *State* v. *Hay*, 126 N. C. 999, 49 L. R. A. 588, 78 Am. St. Rep. 691, 35 S. E. 459; *Abeel* v. *Clark*, 84 Cal. 226, 24 Pac. 383; *Bissell* v. *Davison*, 65 Conn. 183, 29 L. R. A. 251, 32 Atl. 348; *Hazen* v. *Strong*, 2 Vt. 427; *Duffield* v. *Williamsport School District*, 162 Pa. 476, 25 L. R. A. 152, 29 Atl. 742.

FN† 'State-supported facilities for vaccination began in England in 1808 with the National Vaccine Establishment. In 1840 vaccination fees were made payable out of the rates. The first compulsory act was passed in 1853, the guardians of the poor being intrusted with the carrying out of the law; in 1854 the public vacinations under one year of age were 408,824 as against an average of 180,960 for several years before. In 1867 a new act was passed, rather to remove some technical difficulties than to enlarge the scope of the former act; and in 1871 the act was passed which compelled the boards of guardians to appoint vaccination officers. The guardians also appoint a public vaccinator, who must be duly qualified to practise medicine, and whose duty it is to vaccinate (for a fee of one shilling and sixpence) any child resident within his district brought to him for that purpose, to examine the same a week after, to give a certificate, and to certify to the vaccination officer the fact of vaccination or of insusceptibility. . . . Vaccination was made compulsory in Bavarla in 1807, and subsequently in the following countries: Denmark (1810), Sweden (1814), Württemberg, Hesse, and other German states (1818), Prussia (1835), Roumania (1874), Hungary (1876), and Servia (1881). It is compulsory by cantonal law in 10 out of the 22 Swiss cantons; an attempt to pass a Federal compulsory law was defeated by a plebiscite in 1881. In the following countries there is no compulsory law, but governmental facilities and compulsion on various classes more or less directly under governmental control, such as soldiers, state employees, apprentices, school pupils, etc.: France, Italy, Spain, Portugal, Belgium. Norway, Austria, Turkey. . . . Vaccination has been compulsory in South Australia since 1872, in Victoria since 1874, and in Western Australia since 1878. In Tasmania a compulsory act was passed in 1882. In New South Wales there is no compulsion, but free facilities for vaccination. Compulsion was adopted at Calcutta in 1880, and since then at 80 other towns of Bengal, at Madras in 1884, and at Bombay and elsewhere in the presidency a few years earlier. Revaccination was made compulsory in Denmark in 1871, and in Roumania in 1874; in Holland it was enacted for all school pupils in 1872. The various laws and administrative orders which had been for many years in force as to vaccination and revaccination in the several German states were consolidated in an imperial statute of 1874.' 24 Encyclopaedia Britannica (1894), *Vaccination*.

'In 1857 the British Parliament received answers from 552 physicians to questions which were asked them in reference to the utility of vaccination, and only two of these spoke against it. Nothing proves this utility more clearly than the statistics obtained. Especially instructive are those which Flinzer compiled respecting the epidemic in Chemnitz which prevailed in 1870-71. At this time

in the town there were 64,255 inhabitants, of whom 53,891, or 83.87 per cent, were vaccinated, 5,712, or 8.89 per cent were unvaccinated, and 4,652, or 7.24 per cent, had had the smallpox before. Of those vaccinated 953, or 1.77 per cent, became affected with smallpox, and of the uninocculated 2,643, or 46.3 per cent, had the disease. In the vaccinated the mortality from the disease was 0.73 per cent, and in the unprotected it was 9.16 per cent. In general, the danger of infection is six times as great, and the mortality 68 times as great, in the unvaccinated, as in the vaccinated. Statistics derived from the civil population are in general not so instructive as those derived from armies, where vaccination is usually more carefully performed, and where statistics can be more accurately collected. During the Franco-German war (1870-71) there was in France a widespread epidemic of smallpox, but the German army lost during the campaign only 450 cases, or 58 men to the 100,000; in the French army, however, where vaccination was not carefully carried out, the number of deaths from smallpox was 23,400.' , Johnson's Universal Cyclopaedia (1897), *Vaccination*.

'The degree of protection afforded by vaccination thus became a question of great interest. Its extreme value was easily demonstrated by statistical researches. In England, in the last half of the eighteenth century, out of every 1,000 deaths, 96 occurred from smallpox; in the first half of the present century, out of every 1,000 deaths, but 35 were caused by that disease. The amount of mortality in a country by smallpox seems to bear a fixed relation to the extent to which vaccination is carried out In all England and Wales, for some years previous to 1853, the proportional mortality by smallpox was 21.9 to 1,000 deaths from all causes; in London it was but 16 to 1,000; in Ireland, where vaccination was much less general, it was 49 to 1,000, while in Connaught it was 60 to 1,000. On the other hand, in a number of European countries where vaccination was more or less compulsory, the proportionate number of deaths from smallpox about the same time varied from 2 per 1,000 of all causes in Bohemia, Lombardy, Venice, and Sweden, to 8.33 per 1,000 in Saxony. Although in many instances persons who had been vaccinated were attacked with smallpox in a more or less modified form, it was noticed that the persons so attacked had been commonly vaccinated many years previously. 16 American Cyclopedia, *Vaccination* (1883).

'Dr Buchanan, the medical officer of the London Government Board, reported [1881] as the result of statistics that the smallpox death rate among adult persons vaccinated was 90 to a million; whereas among those unvaccinated it was 3,350 to a million; whereas among vaccinated children under five years of age, 42 1/2 per million; whereas among unvaccinated children of the same age it was 5,950 per million.' Hardway, Essentials of Vaccination (1882). The same author reports that, among other conclusions reached by the Académie de Médicine of France, was one that, 'without vaccination, hygienic measures (isolation, disinfection, etc.) are of themselves insufficient for preservation from smallpox.' *Ibid*.

The Belgian Academy of Medicine appointed a committee to make an exhaustive examination of the whole subject, and among the conclusions reported by them were: 1. 'Without vaccination, hygienic measures and means, whether public or private, are powerless in preserving mankind from smallpox. . . . 3. Vaccination is always an inoffensive operation when practised with proper care on healthy subjects. . . . 4. It is highly desirable, in the interests of the health and lives of our countrymen, that vaccination should be rendered compulsory.' Edwards, *Vaccination* (1882.)

The English Royal Commission, appointed with Lord Herschell, the Lord Chancellor of England, at its head, to inquire, among other things, as to the effect of vaccination in reducing the prevalence of, and mortality from, smallpox, reported, after several years of investigation: 'We think that it diminishes the liability to be attacked by the disease; that it modifies the character of the disease and renders it less fatal,-of a milder and less se-

> vere type; that the protection it affords against attacks of the disease is greatest during the years immediately succeeding the operation of vaccination.'

***34** The latest case upon the subject of which we are aware is *Viemester* v. *White*, decided very recently by the court of appeals of New York. That case involved the validity of a statute excluding from the public schools all children who had not been vaccinated. One contention was that the statute and the regulation adopted in exercise ****365** of its provisions was inconsistent with the rights, privileges, and liberties of the citizen. The contention was overruled, the court saying, among other things: 'Smallpox is known of all to be a dangerous and contagious disease. If vaccination strongly tends to prevent the transmission or spread of this disease, it logically follows that children may be refused admission to the public schools until they have been vaccinated. The appellant claims that vaccination does not tend to prevent smallpox, but tends to bring about other diseases, and that it does much harm, with no good. It must be conceded that some laymen, both learned and unlearned, and some physicians of great skill and repute, do not believe that vaccination is a preventive of smallpox. The common belief, however, is that it has a decided tendency to prevent the spread of this fearful disease, and to render it less dangerous to those who contract it. While not accepted by all, it is accepted by the mass of the people, as well as by most members of the medical profession. It has been general in our state, and in most civilized nations for generations. It is ***35** generally accepted in theory, and generally applied in practice, both by the voluntary action of the people, and in obedience to the command of law. Nearly every state in the Union has statutes to encourage, or directly or indirectly to require, vaccination; and this is true of most nations of Europe. . . . A common belief, like common knowledge, does not require evidence to establish its existence, but may be acted upon without proof by the legislature and the courts.. . . The fact that the belief is not universal is not controlling, for there is scarcely any belief that is accepted by everyone. The possibility that the belief may be wrong, and that science may yet show it to be wrong, is not conclusive; for the legislature has the right to pass laws which, according to the common belief of the people, are adapted to prevent the spread of contagious diseases. In a free country, where the government is by the people, through their chosen representatives, practical legislation admits of no other standard of action, for what the people believe is for the common welfare must be accepted as tending to promote the common welfare, whether it does in fact or not. Any other basis would conflict with the spirit of the Constitution, and would sanction measures opposed to a Republican form of government. While we do not decide, and cannot decide, that vaccination is a preventive of smallpox, we take judicial notice of the fact that this is the common belief of the people of the state, and, with this fact as a foundation, we hold that the statute in question is a health law, enacted in a reasonable and proper exercise of the police power.' 179 N. Y. 235, 72 N. E. 97.

Since, then, vaccination, as a means of protecting a community against smallpox, finds strong support in the experience of this and other countries, no court, much less a jury, is justified in disregarding the action of the legislature simply because in its or their opinion that particular method was-perhaps, or possibly-not the best either for children or adults.

Did the offers of proof made by the defendant present a case which entitled him, while remaining in Cambridge, to ***36** claim exemption from the operation of the statute and of the regulation adopted by the board of health? We have already said that his rejected offers, in the main, only set forth the theory of those who had no faith in vaccination as a means of preventing the spread of smallpox, or who thought that vaccination, without benefiting the public, put in peril the health of the person vaccinated. But there were some offers which it is contended embodied distinct facts that might properly have been considered. Let us see how this is.

The defendant offered to prove that vaccination 'quite often' caused serious and permanent injury to the health of the person vaccinated; that the operation 'occasionally' resulted in death; that it was 'impossible' to tell 'in any particular case' what the results of vaccination would be, or whether it would injure the health or result in death; that 'quite often' one's blood is in a certain condition of impurity when it is not prudent or safe to vaccinate him; that there is no practical test by which to determine 'with any degree of certainty' whether one's blood is in such condition of impurity as to render vaccination necessarily unsafe or dangerous; that vaccine matter is 'quite often' impure and dangerous to be used, but whether impure or not cannot be ascertained by any known practical test;

that the defendant refused to submit to vaccination for the reason that he had, 'when a child,' been caused great and extreme suffering for a long period by a disease produced by vaccination; and that he had witnessed a similar result of vaccination, not only in the case of his son, but in the cases of others.

These offers, in effect, invited the court and jury to go over the whole ground gone over by the legislature when it enacted the statute in question. The legislature assumed that some children, by reason of their condition at the time, might not be fit subjects of vaccination; and it is suggested-and we will not say without reason-that such is the case with some adults. But the defendant did not offer to prove that, by ****366** reason of his then condition, he was in fact not a fit subject of vaccination ***37** at the time he was informed of the requirement of the regulation adopted by the board of health. It is entirely consistent with his offer of proof that, after reaching full age, he had become, so far as medical skill could discover, and when informed of the regulation of the board of health was, a fit subject of vaccination, and that the vaccine matter to be used in his case was such as any medical practitioner of good standing would regard as proper to be used. The matured opinions of medical men everywhere, and the experience of mankind, as all must know, negative the suggestion that it is not possible in any case to determine whether vaccination is safe. Was defendant exempted from the operation of the statute simply because of his dread of the same evil results experienced by him when a child, and which he had observed in the cases of his son and other children? Could he reasonably claim such an exemption because 'quite often,' or 'occasionally,' injury had resulted from vaccination, or because it was impossible, in the opinion of some, by any practical test, to determine with absolute certainty whether a particular person could be safely vaccinated?

It seems to the court that an affirmative answer to these questions would practically strip the legislative department of its function to care for the public health and the public safety when endangered by epidemics of disease. Such an answer would mean that compulsory vaccination could not, in any conceivable case, be legally enforced in a community, even at the command of the legislature, however widespread the epidemic of smallpox, and however deep and universal was the belief of the community and of its medical advisers that a system of general vaccination was vital to the safety of all.

We are not prepared to hold that a minority, residing or remaining in any city or town where smallpox is prevalent, and enjoying the general protection afforded by an organized local government, may thus defy the will of its constituted authorities, acting in good faith for all, under the legislative sanction of the state. If such be the privilege of a minority, ***38** then a like privilege would belong to each individual of the community, and the spectacle would be presented of the welfare and safety of an entire population being subordinated to the notions of a single individual who chooses to remain a part of that population. We are unwilling to hold it to be an element in the liberty secured by the Constitution of the United States that one person, or a minority of persons, residing in any community and enjoying the benefits of its local government, should have the power thus to dominate the majority when supported in their action by the authority of the state. While this court should guard with firmness every right appertaining to life, liberty, or property as secured to the individual by the supreme law of the land, it is of the last importance that it should not invade the domain of local authority except when it is plainly necessary to do so in order to enforce that law. The safety and the health of the people of Massachusetts are, in the first instance, for that commonwealth to guard and protect. They are matters that do not ordinarily concern the national government. So far as they can be reached by any government, they depend, primarily, upon such action as the state, in its wisdom, may take; and we do not perceive that this legislation has invaded any right secured by the Federal Constitution.

Before closing this opinion we deem it appropriate, in order to prevent misapprehension as to our views, to observe-perhaps to repeat a thought already sufficiently expressed, namely-that the police power of a state, whether exercised directly by the legislature, or by a local body acting under its authority, may be exerted in such circumstances, or by regulations so arbitrary and oppressive in particular cases, as to justify the interference of the courts to prevent wrong and oppression. Extreme cases can be readily suggested. Ordinarily such cases are not safe guides in the administration of the law. It is easy, for instance, to suppose the case of an adult who is embraced by the mere words of the act, but yet to subject whom to vaccination in a particular condition of his health ***39**

or body would be cruel and inhuman in the last degree. We are not to be understood as holding that the statute was intended to be applied to such a case, or, if it was so intended, that the judiciary would not be competent to interfere and protect the health and life of the individual concerned. 'All laws,' this court has said, 'should receive a sensible construction. General terms should be so limited in their application as not to lead to injustice, oppression, or an absurd consequence. It will always, therefore, be presumed that the legislature intended exceptions to its language which would avoid results of this character. The reason of the law in such cases should prevail over its letter.' *United States* v. *Kirby*, 7 Wall. 482, 19 L. ed. 278; *Lau Ow Bew* v. *United States*, 144 U. S. 47, 58, 36 L. ed. 340, 344, 12 Sup. Ct. Rep. 517. Until otherwise informed by the highest court of Massachusetts, we are not inclined to hold that the statute establishes the absolute rule that an adult must be vaccinated if it be apparent or can be shown with reasonable ****367** certainty that he is not at the time a fit subject of vaccination, or that vaccination, by reason of his then condition, would seriously impair his health, or probably cause his death. No such case is here presented. It is the cause of an adult who, for aught that appears, was himself in perfect health and a fit subject of vaccination, and yet, while remaining in the community, refused to obey the statute and the regulation adopted in execution of its provisions for the protection of the public health and the public safety, confessedly endangered by the presence of a dangerous disease.

We now decide only that the statute covers the present case, and that nothing clearly appears that would justify this court in holding it to be unconstitutional and inoperative in its application to the plaintiff in error.

The judgment of the court below must be affirmed.

It is so ordered.

Mr. Justice **Brewer** and Mr. Justice **Peckham** dissent.

U.S. 1905
Jacobson v. Commonwealth of Massachusetts
197 U.S. 11, 25 S.Ct. 358, 49 L.Ed. 643, 3 Am.Ann.Cas. 765

END OF DOCUMENT

548 F.2d 1277, 44 A.L.R. Fed. 131
(Cite as: 548 F.2d 1277)

United States Court of Appeals,
Seventh Circuit.
George A. LLOYD and Janet B. Wolfe, etc., Plaintiffs-Appellants,
v.
The REGIONAL TRANSPORTATION AUTHORITY and the Chicago Transit Authority, Defendants-Appellees.

No. 76-1524.
Argued Dec. 1, 1976.
Decided Jan. 18, 1977.

Class action was brought on behalf of the class of all mobility-disabled persons in the northeastern region of Illinois, alleging that the plaintiff class was unable to use public transportation system operated by the two municipal defendants because of physical disabilities. Defendants were alleged to have violated the Urban Mass Transportation Act of 1964, the Rehabilitation Act of 1973, the Architectural Barriers Act of 1968 and the equal protection clause of the Fourteenth Amendment. The United States District Court for the Northern District of Illinois, Eastern Division, Joel M. Flaum, J., granted defendants' motion to dismiss on the ground that none of the three statutes conferred a private right of action and that the equal protection clause did not apply. Plaintiffs appealed, and the Court of Appeals, Cummings, Circuit Judge, held that the section of the Rehabilitation Act of 1973 which forbids discrimination against otherwise qualified handicapped individuals in programs or activities receiving federal financial assistance established affirmative rights; that a private cause of action could be implied to vindicate those rights; and that because no administrative remedy was open to plaintiffs, neither the exhaustion of remedies doctrine nor the primary jurisdiction doctrine applied.

Vacated and remanded.

Four factors relevant to determining whether a private remedy is implicit in statute which does not expressly provide such remedy are: whether plaintiff is one of the class for whose special benefit the statute was enacted; whether there is any indication of legislative intent, explicit or implicit, either to create or to deny such a remedy; whether such remedy is consistent with the underlying purposes of the legislative scheme; and whether it would be inappropriate to infer a cause of action based solely on federal law because such cause of action would be within an area traditionally relegated to state law.

Until effective enforcement regulations are promulgated, section of the Rehabilitation Act of 1973 which establishes an implied private cause of action to vindicate affirmative right of otherwise qualified handicapped individuals to nondiscrimination in programs or activities receiving federal financial assistance should not be subjugated to the doctrine of exhaustion of remedies; however, assuming a meaningful administrative enforcement mechanism, the private cause of action implied under the section should be limited to a posteriori judicial review. Rehabilitation Act of 1973, § 504, 29 U.S.C.A. § 794.

Before CUMMINGS and TONE, Circuit Judges, and GRANT, Senior District Judge. [FN*]

FN* Senior District Judge Robert A. Grant of the Northern District of Indiana is sitting by designation.

CUMMINGS, Circuit Judge.

[1] This class action was filed under the Civil Rights Act of 1871 (42 U.S.C. s 1983),[FN1] the Rehabilitation Act of 1973 (29 U.S.C. ss 701 et seq.), the Architectural Barriers Act of 1968 (42 U.S.C. ss 4151 and 4152). and unspecified regulations promulgated under the statutes.[FN2] Plaintiffs also relied on various sections of the Constitution but now rest their constitutional argument only on the Equal Protection Clause of the Fourteenth Amendment.

FN1. Plaintiffs no longer rely on 42 U.S.C. s 1983 (see reply br. 7), apparently because municipal corporations like defendants are outside its ambit. City of Kenosha v. Bruno, 412 U.S. 507, 513, 93 S.Ct. 2222, 37 L.Ed.2d 109.

FN2. In their appellate brief (at 11-13) plaintiffs also rely on a 1975 amendment to Section 165 of the Federal-Aid Highway Act of 1973, providing that the Secretary of Transportation "shall not approve any program or project * * * (not) requiring access to public mass transportation facilities, equipment and services for elderly or handicapped persons" which is funded under certain specified sections of Title 23 of the United States Code (23 U.S.C.A. s 142 note; 88 Stat. 2283). The 1975 amendment defined the handicapped to "includ(e) those who are nonambulatory wheelchair-bound and those with semiambulatory capabilities." Id. However, since this provision was not cited in the complaint and barely mentioned in the district court's opinion, we will not consider it.

***1279** [2] The named plaintiffs are George A. Lloyd, a quadriplegic who has been confined to a wheelchair since 1953, and Janet B. Wolfe, who is "mobility-disabled" because of a chronic pulmonary dysfunction. They sued on behalf of a class of all mobility-disabled persons in the northeastern region of Illinois. The two defendants are the Regional Transportation Authority (RTA),[FN3] which provides public transportation and assists in the public mass transportation system in that region, and the Chicago Transit Authority (CTA), [FN4] which operates a mass transportation system in the Chicago metropolitan area. The complaint alleges that the suing class is unable to use defendants' public transportation system because of physical disabilities. Plaintiffs aver on information and belief that defendants are in the process of planning for the purchase of new transportation equipment utilizing federal funds [FN5] and that, unless defendants are compelled to take affirmative action, the transportation system will continue to be inaccessible to the mobility-disabled.

FN3. The RTA is a municipal corporation established pursuant to Ill.Rev.Stat.1975, ch. 111 2/3, ss 701.01 et seq.

FN4. The CTA is a municipal corporation established pursuant to Ill.Rev.Stat.1975, ch. 111 2/3, ss 301 et seq.

FN5. Reading the complaint liberally as we must on a motion to dismiss, we deem it possible that plans for the purchase of new equipment on June 5, 1975, the date of the complaint, were not all consummated at the level of final approval of federal funding

before the effective date of the Urban Mass Transportation Administrator's regulations on May 31, 1976. See also note 30 infra.

The complaint sets out four causes of action. First, plaintiffs assert that defendants have violated Section 16 of the Urban Mass Transportation Act of 1964 (49 U.S.C. s 1612) because they have not met the transportation needs of handicapped persons. Secondly, plaintiffs charge that defendants have violated Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. s 794) because, by reason of their handicaps, plaintiffs have been denied the meaningful usage of defendants' federally financed mass transportation facilities. Thirdly, plaintiffs claim that defendants have not complied with Sections 1 and 2 of the Architectural Barriers Act of 1968 (42 U.S.C. ss 4151 and 4152) because they have not designed vehicular facilities permitting ready access to physically handicapped persons. Finally, defendants' denial of public transportation system access to plaintiffs and their class is said to violate the Fourteenth Amendment's Equal Protection Clause.

The plaintiffs sought a preliminary injunction to prevent the defendants from designing or placing into operation any new federally funded facilities unless the facilities were accessible to all mobility-disabled persons. Plaintiffs also prayed for a mandatory injunction compelling the defendants to make the existing transportation system accessible to the mobility-disabled.

The district court filed a memorandum opinion granting the defendants' motions to dismiss on the ground that the three statutes in question do not confer a private right of action. The opinion stated that the only substantial constitutional claim of plaintiffs was founded on the Equal Protection Clause but that it was inapplicable because

"(d)efendants have not created any inequalities of treatment. They are not alleged to be providing handicapped persons with any lesser facilities than other persons." [FN6]

FN6. The district judge found it unnecessary to decide whether the Secretary of Transportation or his delegates were indispensable parties. Similarly, he did not pass on whether the Secretary of Health, Education and Welfare and the Urban Mass Transportation Administrator had to be named as defendants, as urged by the Urban Mass Transportation Administrator (who filed an amicus curiae brief with us) and by the CTA.

***1280** We vacate and remand.

SECTION 504 CONFERS AFFIRMATIVE RIGHTS

[3] Plaintiffs and two amici curiae [FN7] rely on Section 504 of the Rehabilitation Act of 1973 as giving plaintiffs the right to file a private action to enforce compliance with the statutes relied upon in the complaint and the recent regulations of the Urban Mass Transportation Administration.[FN8] Section 504 provides:

FN7. They are the National Center for Law and the Handicapped, Inc. of South Bend, Indiana, and a group of eight organizations representing disabled persons, whose counsel was the Public Interest Law Center of Philadelphia.

FN8. Those regulations were issued on April 27, 1976, and made effective May 31, 1976. They appear in 49 C.F.R. ss 609.1-609.25 and 613.204 and in 41 F.R. 18239-18241 and 18234 (April 30, 1976). Two appendices were also added. 49 C.F.R. ss 609.15(a), (b) and (c) were revised effective October 12, 1976. 41 F.R. 45842 (October 18, 1976).

"No otherwise qualified handicapped individual in the United States, as defined in section 7(6), shall, solely by reason of his handicap, be excluded from the participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance" (29 U.S.C. s 794).

This provision closely tracks [FN9] Section 601 of the Civil Rights Act of 1964,[FN10] which was construed in Lau v. Nichols, 414 U.S. 563, 94 S.Ct. 786, 39 L.Ed.2d 1. There a unanimous Supreme Court held that Section 601 provided a private cause of action. See also Bossier Parish School Board v. Lemon, 370 F.2d 847, 852 (5th Cir. 1969), certiorari denied, 388 U.S. 911, 87 S.Ct. 2116, 18 L.Ed.2d 1350. While adverting to regulations and guidelines issued by the Department of Health, Education and Welfare (HEW) pursuant to Section 602 of the Act [FN11] and the

respondent school district's contractual agreement to comply with Title VI of the Civil Rights Act of 1964 and the regulations thereunder,[FN12] Justice Douglas (speaking for himself and Justices Brennan, Marshall, Powell and Rehnquist) stated, in reversing the court of appeals, that "(w)e do not reach the Equal Protection Clause argument which has been advanced but rely solely on s 601." 414 U.S. at 566, 94 S.Ct. at 788. The concurring opinion of Justice Stewart (with whom the Chief Justice and Justice Blackmun joined) relied on Section 601 and the HEW regulations and guidelines and mentioned that plaintiffs there could concededly sue as third-party beneficiaries of said contract. Finally, Justice Blackmun (with whom the Chief Justice joined) stated that because the plaintiff class involved 2800 school children, he concurred in the holding that the San Francisco School District could not continue to teach students in English without teaching English to Chinese-speaking children or giving their classes in the Chinese language. [FN13] ***1281** Because of the near identity of language in Section 504 of the Rehabilitation Act of 1973 and Section 601 of the Civil Rights Act of 1964, Lau is dispositive. Therefore, we hold that Section 504 of the Rehabilitation Act, at least when considered with the regulations which now implement it, establishes affirmative rights and permits this action to proceed.[FN14]

FN9. Indeed, Section 504 had its genesis in an abortive attempt by Congressman Vanik to include the handicapped within the strictures of the Civil Rights Act of 1964 itself. In floor debate on the Rehabilitation Act of 1973, he expressed pleasure that his language was included in what was to become Section 504. 119 Cong. Rec. 7114 (1973).

FN10. Section 601 of the Civil Rights Act of 1964 provides:

"No person in the United States shall, on the ground of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance" (42 U.S.C. s 2000d).

FN11. Section 602 provides:

"Each Federal department and agency which is empowered to extend Federal financial assistance to any program or activity, by way of grant, loan, or contract other than a contract of insurance or guaranty, is authorized and directed to effectuate the provisions of section 2000d of this title with respect to such program or activity by issuing rules, regulations, or orders of general applicability which shall be consistent with achievement of the objectives of the statute authorizing the financial assistance in connection with which the action is taken * * * " (42 U.S.C. s 2000d-1).

FN12. 45 C.F.R. pt. 80.

FN13. A perceived importance in the number of discriminatees seeking relief has caused one court to consider the numerosity of the plaintiff class as a limitation of Lau. Serna v. Portakes Municipal Schools, 499 F.2d 1147, 1154 (10th Cir. 1974).

FN14. Accord: Gurmankin v. Costanzo, 411 F.Supp. 982 (E.D.Pa.1976); Hairston v. Drosick, 423 F.Supp. 180 (S.D.W.Va.1976); Rhode Island Society for Autistic Children v. Board of Regents, Civil Action No. 5081 (D.R.I. August 1, 1975); Cherry v. Mathews, 419 F.Supp. 922 (D.D.C.1976); Sites v. McKenzie, 423 F.Supp. 1190, (N.D.W.Va.1976). See also Bartels v. Biernat, 405 F.Supp. 1012 (E.D.Wis.1975). To the extent that Young v. Coleman, Civil Action No. H-76-201 (D.Conn. Dec. 17, 1976), may be contra, we disagree therewith. The district judge did not realize that the Urban Mass Transportation Administrator's regulations had been issued in part under Section 504 (mem. op. 9), which was his reason for distinguishing Lau v. Nichols, supra. He left open the question whether Section 504 authorizes a private right of action in circumstances like these (mem. op. 9, 10). Also, the defendants there satisfied him that they were making good faith efforts to comply with the Urban Mass Transportation Act (mem. op. 8), and the State of Connecticut Department of Transportation represented that it would comply with the April and October require-

ments of the Urban Mass Transportation Administrator (n. 5).

Judge Flaum held that Lau was not controlling because this case was devoid of analogs to the HEW guidelines there involved. In the district court's view, the "obligation to provide special programs did not flow from the cited statutory language (Section 601 of the Civil Rights Act of 1964), but rather from Health, Education and Welfare guidelines which were enacted pursuant to the additional statutory section, s 2000d-1 (Section 602 of the Civil Rights Act of 1964)." Even though the opinion of the Court in Lau can be read as authority for allowing this action to proceed under Section 504 of the Rehabilitation Act alone, developments subsequent to the district court's opinion have provided a virtual one-to-one correspondence between the conceptual props supporting the concurring opinions in Lau and the elements of the instant case.

Here the conceptual analog of Section 602 of the Civil Rights Act of 1964 came into being on April 28, 1976, in the form of Executive Order 11914, 41 F.R. 17871 (April 29, 1976). The Executive Order authorizes HEW and other federal agencies dispensing financial assistance to adopt rules, regulations and orders to ensure that recipients of federal aid are in compliance with Section 504. If compliance cannot be secured voluntarily, it may be compelled by suspension or termination of federal assistance after a hearing or by "other appropriate means authorized by law." HEW is given the responsibility of establishing standards for who are "handicapped individuals" and for determining what are "discriminatory practices" as well as coordinating the implementation of Section 504 by all federal agencies. While the Rehabilitation Act itself contains no express directive to issue regulations,[FN15] ***1282** the 1974 Amendments to the Act generated a legislative history which indicates that Congress contemplated speedy implementation of Section 504 through regulations. See S.Rep. No. 93-1139, 93d Cong., 2d Sess. 24-25 (1974); H.R.Rep. No. 32-1457, 93d Cong., 2d Sess. 27-28 (1974); S.Rep. No. 32-1297, 93d Cong., 2d Sess. 39-40 (1974). "In review of the foregoing, (it can be concluded) that the (HEW) Secretary is required to promulgate regulations effectuating s 504." Cherry v. Mathews, 419 F.Supp. 922 (D.D.C., 1976). [FN16]

FN15. However, the legislative history of the 1974 Rehabilitation Act Amendments explicitly contemplates an Executive Order such as 11914 which would consolidate in HEW the government-wide responsibility of issuing regulations to implement Section 504:

"It is intended that sections 503 and 504 be administered in such a manner that a consistent, uniform, and effective Federal approach to discrimination against handicapped persons would result. Thus, Federal agencies and departments should cooperate in developing standards and policies so that there is a uniform, consistent Federal approach to these sections. The Secretary of the Department of Health, Education and Welfare, because of that Department's experience in dealing with handicapped persons and with the elimination of discrimination in other areas, should assume responsibility for coordinating the section 504 enforcement effort and for establishing a coordinating mechanism with the Secretary of the Department of Labor to ensure a consistent approach to the implementation of sections 503 and 504. The conferees fully expect that H.E.W.'s section 504 regulations should be completed by the close of this year. Delay beyond this point would be most unfortunate since the Act (P.L. 93-112) was enacted over one year ago September 26, 1973.

"The conferees noted, and the Committee reiterates, that Executive Order No. 11758, section 2, delegates to the Secretary of Labor the responsibility for carrying out the responsibilities embodied in section 503 of the Rehabilitation Act of 1973, and a similar delegation of responsibility to the Secretary of HEW is urged to carry out on a Government-wide basis those responsibilities embodied in section 504." 4 U.S.Code Cong. & Admin.News, p. 6391 (1974).

FN16. The district court in Cherry chose not to set a date when the final 504 regulations must issue but did retain jurisdiction to ensure that "no further unreasonable delays affect the promulgation of regulations under s 504." No appeal was taken from the July 19 memorandum opinion.

Forty days after the district court's opinion was issued, the Urban Mass Transportation Administrator promulgated final regulations, in part under the authority of Section 504. These regulations and various accompanying guidelines are squarely couched in affirmative language. Thus new regulation 49 CFR s 613.204 provides:

"Additional criteria for Urban Mass Transportation Administrator's approvals under 23 CFR 450.320.

"The Urban Mass Transportation Administrator will grant project approvals pursuant to 23 CFR 450.320(a)(3) only if:

"(a) The urban transportation planning process exhibits satisfactory special efforts in planning public mass transportation facilities and services that can be utilized by elderly and handicapped persons ; and

"(b) The annual element of the transportation improvement program developed pursuant to 23 CFR 450.118 and submitted after September 30, 1976, contains projects or project elements designed to benefit elderly and handicapped persons, specifically including wheelchair users and those with semi-ambulatory capabilities ; and

(c) After September 30, 1977, reasonable progress has been demonstrated in implementing previously programmed projects." (Emphasis supplied.)

Advisory information issued simultaneously, to be added to the appendix to 23 CFR Part 450, Subpart A, sets forth general guidance on the meaning of "special efforts" in planning:

"The urban transportation planning process must include special efforts to plan public mass transportation facilities and service that can effectively be utilized by elderly and handicapped persons. As used in this guidance, the term 'special efforts' refers both to service for elderly and handicapped persons in general and specifically to service for wheelchair users and semiambulatory persons. With regard to transportation for wheelchair users and others who cannot negotiate steps, 'special efforts' in planning means genuine, good-faith progress in planning service for wheelchair users and semiambulatory handicapped persons that is reasonable by comparison with the service provided to the general public and that meets a significant fraction of the actual transportation needs of such persons within a reasonable time period." (Emphasis supplied.)

Further advisory information published as an appendix to 49 CFR Part 613, Subpart B, gives several examples of a level of effort that will be deemed to satisfy the special efforts requirement.[FN17] While the guidelines ***1283** do not purport to be regulatory standards or minimums,[FN18] they do suggest a commitment to an affirmative remedial program of substantial scope. The most recently issued Urban Mass Transportation Administrator's regulation (49 CFR s 609.15(b), 41 F.R. 45842 (October 18, 1976)) provides in pertinent part that:

FN17. The examples given are the following:

"1. A program for wheelchair users and semiambulatory handicapped persons that will involve the expenditure of an average annual dollar amount equivalent to a minimum of five percent of the section 5 (49 U.S.C. s 1604) apportionment to the urbanized area. These 'five percent funds' may be derived from sources other than section 5. The term 'average' permits lower expenditure years to be balanced by higher expenditure years but does not permit an initial delay in implementing projects. The term 'section 5 apportionment' refers to UMTA's formula apportionment for areas with a population of 200,000 or more and to the Governor's apportionment for areas with a population of 200,000 or more and to the Governor's apportionment for areas with a population under 200,000. Projects that qualify as local 'special efforts' for wheelchair users and other semiambulatory persons under the initial paragraphs of this advisory information would be counted in computing the five percent.

"2. Purchase of only wheelchair-accessible new fixed route equipment until one-half of the fleet is accessible, or in the alternative, provision of a substitute service that would provide comparable coverage and service levels.

"3. A system, of any design, that would as-

sure that every wheelchair user or semiambulatory person in the urbanized area would have public transportation available is requested for 10 round-trips per week at fares comparable to those which are charged on standard transit buses for trips of similar length, within the service area of the public transportation authority. The system could, for example, provide trip coupons to individuals who would then purchase the needed service." 41 F.R. 18234 (April 30, 1976).

FN18. 41 F.R. 18234 (April 30, 1976). However, the same appended material does describe some qualitative boundaries to the special efforts concept:

"Projects funded by UMTA under section 16(b)(2) (49 U.S.C. s 1612(b)(2)) may be identified as deriving from local special efforts to meet the needs of wheelchair users and semiambulatory persons only to the extent that the following four conditions are met: (1) the service and vehicles serve wheelchair users and semiambulatory persons; (2) the service meets a priority need identified in this planning process; (3) the service is not restricted to a particularized organizational or institutional clientele; and (4) any fares charged are comparable to those which are charged on standard transit buses for trips of similar length." Id.

"procurement solicitations shall provide for a bus design which permits the addition of a wheelchair accessibility option and shall require an assurance from each bidder that it offers a wheelchair accessibility option for its buses. The term 'wheelchair accessibility option' means a level change mechanism (e. g., lift or ramp), sufficient clearances to permit a wheelchair user to reach a securement location, and at least one wheelchair securement device."

Indeed, in oral argument the CTA conceded that the regulations created an affirmative duty on federal grant recipients.

Four months after the district judge's opinion, HEW issued proposed regulations implementing Section 504.[FN19] Paralleling 45 CFR s 80.3(b)(1) (ii) and (iv), the provisions explicitly mentioned by eight Justices in Lau, proposed regulations 49 CFR ss 84.4(b)(1)(ii) and (iv) specify that recipients of federal financial assistance may not

FN19. HEW's proposed regulations appear at 41 F.R. 29560-29567 (July 16, 1976) and are intended to become 45 CFR ss 84.1-84.54. Notice of Proposed Rulemaking was published at 41 F.R. 20296 (May 17, 1976). Even this early in the rulemaking process, the HEW Secretary conceded that Section 504 created individual rights:

"Thus, while we recognize that the statute creates individual rights, the statute is ambiguous as to the specific scope of these rights." Id.

"(ii) Provide a qualified handicapped person with aid, benefit, or service which is not as effective as that provided to others ;

"(iv) Otherwise limit a qualified handicapped person in the enjoyment of any right, privilege, advantage or opportunity enjoyed by others receiving an aid, benefit or service." (Emphasis supplied.)

Moreover s 84.4(b)(2) establishes that

"A recipient may not provide different or separate aid, benefits or services to handicapped persons unless such action is necessary to provide qualified handicapped persons with aid, benefits, or services which are as effective as those provided to others." (Emphasis supplied.) [FN20]

FN20. Sections 84.4(b)(i) and (b)(2) were redrafted from the language appearing in the Nature of Intent of Proposed Rulemaking of May 17, 1976, because the commentators objected to the draft regulations' emphasis on different treatment. Thus "as effective as" was substituted for "comparable" in the May 17 draft. The accompanying advisory information outlined the intent of this change:

"(The new terminology) is intended to encompass the concept of equivalent as opposed to identical, services and to acknowledge the fact that in order to meet the individual needs of handicapped persons to the same extent that the corresponding needs of

> nonhandicapped persons are met, adjustments to regular programs or the provision of different programs may sometimes be necessary. For example, a welfare office that uses the telephone for communicating with its clients must provide alternative modes of communicating with its deaf clients. This standard parallels the one established under title VI of Civil Rights Act of 1964 with respect to the provision of educational services to students whose primary language is not English. See ' Lau v. Nichols ', 414 U.S. 563, 94 S.Ct. 786, 39 L.Ed.2d 1 (1974). The rewording of this provision is intended to emphasize that, although separate services may be required in some instances, the provision of unnecessarily separate or different services is discriminatory." 41 F.R. 29551 (July 16, 1976).

***1284** Finally, pending the adoption of a new procedural regulation consolidating all of the enforcement procedures implementing the civil rights statutes for which HEW has enforcement responsibilities,[FN21] the "procedural provisions of the title VI regulation, which may be found at 45 CFR Part 80, will be incorporated by reference into the section 504 regulations for use during the interim." 41 F.R. 29548 (July 16, 1976). The regulations thus reduce to concrete terms the abstract words of section 504.

> FN21. On April 22, 1976, HEW released an Intent to Issue Notice of Proposed Rulemaking styled "Consolidated Procedural Rules for Administration and Enforcement of Certain Civil Rights Laws and Authorities." 41 F.R. 18394 (May 3, 1976).

Taken together with the numerosity of the class,[FN22] every element of the two [FN23] concurring opinions in Lau is also satisfied under the statutory and administrative framework of the instant case. The existence of affirmative rights under Section 504 necessarily follows, for, to paraphrase Justice Douglas in Lau :

> FN22. The complaint alleges that there may be hundreds of thousands of mobility-disabled persons in the northeastern region of Illinois.

> FN23. Justice White concurred without comment in the Lau result without joining either in the opinion of the Court or in the concurring opinions authored by Justices Stewart and Blackmun.

"Under these (federal) standards there is no equality of treatment merely by providing (the handicapped) with the same facilities (as ambulatory persons) * * *; for (handicapped persons) who (can) not (gain access to such facilities) are effectively foreclosed from any meaningful (public transportation)." 414 U.S. at 566, 94 S.Ct. at 788.[FN24]

> FN24. HEW's May 17, 1976, statement of policy on interpreting Section 504 acknowledges as much:
>
> "Handicapped persons may require different treatment in order to be afforded equal access to federally assisted programs and activities, and identical treatment may, in fact, constitute discrimination." 41 F.R. 20296 (May 17, 1976).

Cf. Griggs v. Duke Power Co., 401 U.S. 424, 431, 91 S.Ct. 849, 28 L.Ed.2d 158.

PRIVATE RIGHT OF ACTION

[4][5] Having demonstrated that Lau v. Nichols is conclusive on the question of the existence of affirmative rights under Section 504 and the regulations, we now turn to a consideration whether a private cause of action may be implied to vindicate these rights. As the parties have acknowledged, Cort v. Ash, 422 U.S. 66, 78, 95 S.Ct. 2080, 2087, 45 L.Ed.2d 26, sets out the four factors relevant to determining whether a private remedy is implicit in a statute not expressly providing one. They are:

"First, is the plaintiff 'one of the class for whose especial benefit the statute was enacted,' (emphasis supplied) that is, does the statute create a federal right in favor of the plaintiff? Second, is there any indication of legislative intent, explicit or implicit, either to create such a remedy or to deny one? Third, is it consistent with the underlying purposes of the legislative scheme to imply such a remedy for the plaintiff? And finally, is the cause of action one traditionally relegated to state law, in an area basically the concern of the States, so that it would ***1285** be inappropriate to

infer a cause of action based solely on federal law?" (Citations omitted.)

Applying the Cort factors here leads to the conclusion that a private cause of action must be implied from Section 504.

(1) Plaintiffs of course are among the class specifically benefited by the enactment of the statute. As demonstrated above, Section 504 establishes affirmative private rights. In particular, these rights apply to transportation barriers impeding handicapped individuals.[FN25] 29 U.S.C. s 701(11).

> FN25. Indeed, one of the principal purposes of the 1974 Rehabilitation Act Amendments was to include within Section 504 individuals who may have been unintentionally excluded from its protection by the original definition of handicapped individuals which over-emphasized employability. In the Senate Report, it was made plain that inter alia :
>
> "Section 504 was enacted to prevent discrimination against all handicapped individuals, regardless of their need for, or ability to benefit from vocational rehabilitation services, in relation to Federal assistance in * * * transportation * * * programs." 4 U.S.Code Cong. & Admin.News, p. 6388 (1974).

[6][7] (2) While the 1973 legislative history of Section 504 is bereft of much explanation,[FN26] the legislative history of the Rehabilitation Act Amendments of 1974 [FN27] casts light on the original Congressional intent. These amendments, inter alia, redefined the term "handicapped individual" as used in Section 504 and, as clarifying amendments, have cogent significance in construing Section 504. See Red Lion Broadcasting Co., Inc. v. Federal Trade Commission, 395 U.S. 367, 380-381, 89 S.Ct. 1794, 23 L.Ed.2d 371. It is noteworthy that the Senate Report was submitted on November 26, 1974, and the Lau opinion construing Section 601 of the Civil Rights Act of 1964 was handed down on January 21 of that year and certainly known by the Senate Committee. [FN28] Indeed, the report of the Senate Labor and Public Welfare Committee notes that the

> FN26. The 1973 legislative history leaves ambiguous whether or not Section 504 is a mandatory provision. See 2 U.S.Code Cong. & Admin.News, pp. 2123, 2143 (1973).
>
> FN27. Pub.L. 93-516, 88 Stat. 1617.
>
> FN28. Lau is also referred to in the introduction to HEW's proposed regulations (41 F.R. 29551, July 16, 1976). See note 20 supra. The third-party beneficiary theory advanced by Justice Stewart in Lau (414 U.S. at 571 n. 2, 94 S.Ct. 786) and by the Fifth Circuit in Bossier Parish School Board, supra, 370 F.2d at 852, is likewise mentioned there (41 F.R. 29552, July 16, 1976).

"new definition applies to section 503, as well as to section 504, in order to avoid limiting the affirmative action obligation of a Federal contractor to only that class of persons who are eligible for vocational rehabilitation services. * * * Where applicable, section 504 is intended to include a requirement of affirmative action as well as a prohibition against discrimination." 4 U.S.Code Cong. & Admin.News, p. 6390 (1974).

The Committee continues by stating that Section 504's similarity to Section 601 of the Civil Rights Act of 1964 was not accidental:

"Section 504 was patterned after, and is almost identical to, the antidiscrimination language of section 601 of the Civil Rights Act of 1964, 42 U.S.C. 2000d-1 (relating to race, color, or national origin), and section 901 of the Education Amendments of 1972, 42 U.S.C. 1683 (relating to sex). The section therefore constitutes the establishment of a broad government policy that programs receiving Federal financial assistance shall be operated without discrimination on the basis of handicap. It does not specifically require the issuance of regulations or expressly provide for enforcement procedures, but it is clearly mandatory in form, and such regulations and enforcement are intended." (4 U.S.Code Cong. & Admin.News, p. 6390 (1974)).

Further, the scope of the enforcement mechanism to result from such conscious parallelism did not escape comment:

"The language of section 504, in followig (sic) the above-cited Acts, further envisions the implementation of a compliance program which is similar to those Acts, including promulgation of regulations providing for investigation and review of ***1286** recipients of

Federal financial assistance, attempts to bring non-complying recipients into voluntary compliance through informal efforts such as negotiation, and the imposition of sanctions against recipients who continue to discriminate against otherwise qualified handicapped persons on the basis of handicap. Such sanctions would include, where appropriate, the termination of Federal financial assistance to the recipient or other means otherwise authorized by law. Implementation of section 504 would also include pre-grant analysis of recipients to ensure that Federal funds are not initially provided to those who discriminate against handicapped individuals. Such analysis would include pre-grant review procedures and a requirement for assurances of compliance with section 504. This approach to implementation of section 504, which closely follows the models of the above-cited anti-discrimination provisions, would ensure administrative due process (right to hearing, right to review), provide for administrative consistency within the Federal government as well as relative ease of implementation, and permit a judicial remedy through a private action." Id. at pp. 6390-6391. (Emphasis supplied.)

While the above language contemplates judicial review of an administrative proceeding as contradistinct from an independent cause of action in federal court, still it is plain that the rights of the handicapped were meant to be enforced at some point through the vehicle of a private cause of action. When administrative remedial machinery does not exist to vindicate an affirmative right, there can be no objection to an independent cause of action in the federal courts.[FN29] See Steele v. Louisville & N. R. Co., 323 U.S. 192, 206-207, 65 S.Ct. 226, 89 L.Ed. 173. In any event, under the second prong of the Cort test, there is surely an indication of legislative intent to create such a remedy and none to deny it.

> FN29. We expressly leave open as premature the question whether, after consolidated procedural enforcement regulations are issued to implement Section 504, the judicial remedy available must be limited to post-administrative remedy judicial review. In any event, the private cause of action we imply today must continue at least in the form of judicial review of administrative action. And until effective enforcement regulations are promulgated, Section 504 in its present incarnation as an independent cause of action should not be subjugated to the doctrine of exhaustion. Cf. Hardy v. Leonard, 377 F.Supp. 831 (N.D.Cal.1974); Southern Christian Leadership Conference, Inc. v. Connolly, 331 F.Supp. 940 (E.D.Mich.1971). See also Albert, Standing to Challenge Administrative Action: An Inadequate Surrogate for Claims for Relief, 83 Yale L.J. 425, 451-456 (1974). But assuming a meaningful administrative enforcement mechanism, the private cause of action under Section 504 should be limited to a posteriori judicial review.

[8] (3) It is certainly consistent with the underlying purposes of the legislative scheme to imply such a remedy. Indeed, one of the explicitly detailed purposes of the Rehabilitation Act of 1973 was to "enforce statutory and regulatory standards and requirements regarding barrier-free construction of public facilities and study and develop solutions to existing architectural and transportation barriers impeding handicapped individuals." 29 U.S.C. s 701(11). Moreover, since a private cause of action in this case serves to enforce the uniform substantive standards laid down by the UMTA and HEW regulations, the unseemly vista of a spotty application of ad hoc remedies in lawsuits in various regions of the country is not presented here. And no objection to local implementation of these substantive standards can prevail since the nationwide Urban Mass Transportation Administrator's regulations which set out standards for meeting the needs of the handicapped in transportation only serve as a guide for the local implementation of transportation opportunities for the mobility-disabled. 41 F.R. 18234 (April 30, 1976).

(4) Affording a private remedy under Section 504 of the Rehabilitation Act of 1973 would not be the kind of suit traditionally relegated to state law in an area basically the concern of the States. In fact, both the RTA and CTA conceded below that it was the intent of Congress to deal ***1287** with the transportation needs of the handicapped on a national basis.

Because all four Cort tests are satisfied, we are reinforced in our holding that Section 504 implicitly provides a private remedy. Therefore, we need not and do not consider whether the Equal Protection Clause (together with 28 U.S.C. s 1343) and the other statutes

cited in the complaint also confer jurisdiction on the district court.

Defendants rely principally on Cannon v. University of Chicago Nos. 76-1238 and 1239, decided August 27, (7th Cir. 1976), in arguing that Section 504 does not provide for a private right of action. There a panel of this Court held that Title IX of the Education Amendments of 1972 (20 U.S.C. s 1681) does not permit a private cause of action. However, the Court noted that in contradistinction to Lau, Cannon involved only an individual plaintiff who had not exhausted her administrative remedies (slip op. 11 - 16). Here we have a huge class, and plaintiffs and amicus Urban Mass Transportation Administrator have not persuaded us that any administrative remedy is yet available to plaintiffs and their class, nor has Congress provided other means of enforcement. Furthermore, it should be noted that the Cannon opinion is not final, for the panel granted the petition for rehearing in part on November 30, 1976, and now again has the case sub judice. There HEW's most recent brief quotes legislative history of Section 504 to show that a private right of action should be inferred (Br. 15-16).

[9] Defendants and the amicus Urban Mass Transportation Administrator also rely on Bradford School Bus Transit, Inc. v. Chicago Transit Authority, 537 F.2d 943, 948 (7th Cir. 1976), in claiming that here plaintiffs must exhaust their administrative remedies before seeking judicial relief. There we applied the primary jurisdiction doctrine because the regulations specifically provided "for judicial review of administrative actions regarding school bus operations after certain procedures have been exhausted." No comparable regulations presently exist with respect to the problem at hand. There being no administrative remedy open to these plaintiffs, neither the exhaustion nor primary jurisdiction doctrine applies. Rosado v. Wyman, 397 U.S. 397, 405-406, 90 S.Ct. 1207, 25 L.Ed.2d 442.

Upon remand, defendants may of course be able to show that they are in compliance with the statutes on which plaintiffs rely and the regulations thereunder.[FN30] The affidavit filed in the district court by defendant CTA's general operations manager tends in that direction although it may already be partly obsolete in view of the Transbus developments (41 F.R. 15735, 32286-32287, 45842 (April 14, 1976; August 2, 1976; October 18, 1976)). See also notes 17-18 and accompanying text supra. Our opinion expresses no view on the ultimate merits of plaintiffs' case because the undeveloped record does not show whether RTA and CTA are following the statutes and regulations. [FN31]

FN30. Since the Urban Mass Transportation Administrator's regulations became effective on May 31, 1976, plaintiffs now challenge only projects whose funding was approved after that date. On remand, leave should be granted to plaintiffs to make post-May 31 allegations. Cf. note 5 supra.

FN31. In Lau, the opinion of the Court adverted to a contract between HEW and the San Francisco Unified School District compelling it to comply with Title VI of the Civil Rights Act of 1964 and HEW's regulations thereunder and to take any necessary measures to effectuate the contract (414 U.S. at 568-569, 94 S.Ct. 786). Through discovery on remand, plaintiffs will be able to ascertain whether any agreements between defendants and federal agencies contain equivalent terms.

In concluding, we cannot fault the district court for its dismissal order. Without the benefit of any regulations, it is difficult to perceive what relief could have been afforded at that stage. However, the Urban Mass Transportation Administrator's regulations were issued before this appeal was briefed and argued and of course apply to our deliberations. Thorpe v. Housing Authority, 393 U.S. 268, 281-282, 89 S.Ct. 518, 21 L.Ed.2d 474; United States v. Fitzgerald, 545 F.2d 578, 581 (7th Cir. 1976). Since the plaintiffs may now be able to ***1288** show that they are entitled to remedial action, the case must be returned to the district court for appropriate further proceedings. If effective by then, consideration will also have to be given to HEW's proposed regulations (note 19 supra).

Vacated and remanded.[FN32]

FN32. On remand, leave should be granted to amend the complaint to add the HEW Secretary, the Secretary of Transportation and the Urban Mass Transportation Administrator as defendants and Section 165 of the Federal-Aid Highway Act of 1973, as

> amended (88 Stat. 2283) as one of the statutes relied upon, as prayed in plaintiffs' briefs (Br. 12 and Reply Br. 6) Such amendments will not unfairly surprise the litigants, for the CTA below and the district court discussed the federal official point, as did the amicus Urban Mass Transportation Administrator, and the Federal-Aid Highway Act was first discussed in RTA's briefs below and again in the district court's opinion.

Supreme Court of the United States.
MEYER
v.
STATE OF NEBRASKA.

No. 325.
Argued Feb. 23, 1923.
Decided June 4, 1923.

In Error to the Supreme Court of the State of Nebraska.

Robert T. Meyer was convicted of an offense, and his conviction was affirmed by the Supreme Court of Nebraska (107 Neb. 657, 187 N. W. 100), and he brings error. Reversed and remanded.

Under U.S.C.A. Const.Amend. 14, providing that no state shall deprive any person of liberty without due process of law, "liberty" denotes, not merely freedom from bodily restraint, but also the right of the individual to contract to engage in any of the common occupations of life, to acquire useful knowledge, to marry, establish a home, and bring up children, to worship God according to the dictates of his own conscience, and generally to enjoy those privileges long recognized at common law as essential to the orderly pursuit of happiness by free men.

Act Neb. April 9, 1919, Laws 1919, c. 249, prohibiting the teaching of any subject in any language other than the English language in any school, or the teaching of languages other than the English language below the eighth grade, is unconstitutional.

****625 *391** Messrs. A. F. Mullen, of Omaha, Neb., C. E. Sandall, of York, Neb., and I. L. Albert, of Columbus, Neb., for plaintiff in error.

***393** Messrs. Mason Wheeler, of Lincoln, Neb., and O. S. Spillman, of Pierce, Neb., for the State of Nebraska.

****626 *396** Mr. Justice McREYNOLDS delivered the opinion of the Court.

Plaintiff in error was tried and convicted in the district court for Hamilton county, Nebraska, under an information which charged that on May 25, 1920, while an instructor in Zion Parochial School he unlawfully taught the subject of reading in the German language to Raymond Parpart, a child of 10 years, who had not attained ***397** and successfully passed the eighth grade. The information is based upon 'An act relating to the teaching of foreign languages in the state of Nebraska,' approved April 9, 1919 (Laws 1919, c. 249), which follows:

'Section 1. No person, individually or as a teacher, shall, in any private, denominational, parochial or public school, teach any subject to any person in any language than the English language.

'Sec. 2. Languages, other than the English lan-

guage, may be taught as languages only after a pupil shall have attained and successfully passed the eighth grade as evidenced by a certificate of graduation issued by the county superintendent of the county in which the child resides.

'Sec. 3. Any person who violates any of the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction, shall be subject to a fine of not less than twenty-five dollars ($25), nor more than one hundred dollars ($100), or be confined in the county jail for any period not exceeding thirty days for each offense.

'Sec. 4. Whereas, an emergency exists, this act shall be in force from and after its passage and approval.'

The Supreme Court of the state affirmed the judgment of conviction. 107 Neb. 657, 187 N. W. 100. It declared the offense charged and established was 'the direct and intentional teaching of the German language as a distinct subject to a child who had not passed the eighth grade,' in the parochial school maintained by Zion Evangelical Lutheran Congregation, a collection of Biblical stories being used therefore. And it held that the statute forbidding this did not conflict with the Fourteenth Amendment, but was a valid exercise of the police power. The following excerpts from the opinion sufficiently indicate the reasons advanced to support the conclusion:

'The salutary purpose of the statute is clear. The Legislature had seen the baneful effects of permitting for ***398** eigners, who had taken residence in this country, to rear and educate their children in the language of their native land. The result of that condition was found to be inimical to our own safety. To allow the children of foreigners, who had emigrated here, to be taught from early childhood the language of the country of their parents was to rear them with that language as their mother tongue. It was to educate them so that they must always think in that language, and, as a consequence, naturally inculcate in them the ideas and sentiments foreign to the best interests of this country. The statute, therefore, was intended not only to require that the education of all children be conducted in the English language, but that, until they had grown into that language and until it had become a part of them, they should not in the schools be taught any other language. The obvious purpose of this statute was that the English language should be and become the mother tongue of all children reared in this state. The enactment of such a statute comes reasonably within the police power of the state. Pohl v. State, 102 Ohio St. 474, 132 N. E. 20; State v. Bartels, 191 Iowa, 1060, 181 N. W. 508.

'It is suggested that the law is an unwarranted restriction, in that it applies to all citizens of the state and arbitrarily interferes with the rights of citizens who are not of foreign ancestry, and prevents them, without reason, from having their children taught foreign languages in school. That argument is not well taken, for it assumes that every citizen finds himself restrained by the statute. The hours which a child is able to devote to study in the confinement of school are limited. It must have ample time for exercise or play. Its daily capacity for learning is comparatively small. A selection of subjects for its education, therefore, from among the many that might be taught, is obviously necessary. The Legislature no doubt had in mind the practical operation of the law. The law affects few citizens, except those of foreign lineage. ***399** Other citizens, in their selection of studies, except perhaps in rare instances, have never deemed it of importance to teach their children foreign languages before such children have reached the eighth grade. In the legislative mind, the salutary effect of the statute no doubt outweighed the restriction upon the citizens generally, which, it appears, was a restriction of no real consequence.'

The problem for our determination is whether the statute as construed and applied unreasonably infringes the liberty guaranteed to the plaintiff in error by the Fourteenth Amendment:

'No state * * * shall deprive any person of life, liberty or property without due process of law.'

[1][2][3] While this court has not attempted to define with exactness the liberty thus guaranteed, the term has received much consideration and some of the included things have been definitely stated. Without doubt, it denotes not merely freedom from bodily restraint but also the right of the individual to contract, to engage in any of the common occupations of life, to acquire useful knowledge, to marry, establish a home and bring up children, to worship God according to the dictates of his own conscience, and generally to enjoy those privileges long recognized at common law as

essential to the orderly pursuit of happiness by free men. Slaughter-House Cases, 16 Wall. 36, 21 L. Ed. 394; Butchers' Union Co. v. Crescent City Co., 111 U. S. 746, 4 Sup. Ct. 652, 28 L. Ed. 585; ****627**Yick Wo v. Hopkins, 118 U. S. 356, 6 Sup. Ct. 1064, 30 L. Ed. 220; Minnesota v. Barber, 136 U. S. 313, 10 Sup. Ct. 862, 34 L. Ed. 455; Allegeyer v. Louisiana, 165 U. S. 578, 17 Sup. Ct. 427, 41 L. Ed. 832; Lochner v. New York, 198 U. S. 45, 25 Sup. Ct. 539, 49 L. Ed. 937, 3 Ann. Cas. 1133; Twining v. New Jersey 211 U. S. 78, 29 Sup. Ct. 14, 53 L. Ed. 97; Chicago, B. & Q. R. R. v. McGuire, 219 U. S. 549, 31 Sup. Ct. 259, 55 L. Ed. 328; Truax v. Raich, 239 U. S. 33, 36 Sup. Ct. 7, 60 L. Ed. 131, L. R. A. 1916D, 545, Ann. Cas. 1917B, 283; Adams v. Tanner, 244 U. S. 590, 37 Sup. Ct. 662, 61 L. Ed. 1336, L. R. A. 1917F, 1163, Ann. Cas. 1917D, 973; New York Life Ins. Co. v. Dodge, 246 U. S. 357, 38 Sup. Ct. 337, 62 L. Ed. 772, Ann. Cas. 1918E, 593; Truax v. Corrigan, 257 U. S. 312, 42 Sup. Ct. 124, 66 L. Ed. 254; Adkins v. Children's Hospital (April 9, 1923), 261 U. S. 525, 43 Sup. Ct. 394, 67 L. Ed. 785; Wyeth v. Cambridge Board of Health, 200 Mass. 474, 86 N. E. 925, 128 Am. St. Rep. 439, 23 L. R. A. (N. S.) 147. The established doctrine is that this liberty may not be interfered ***400** with, under the guise of protecting the public interest, by legislative action which is arbitrary or without reasonable relation to some purpose within the competency of the state to effect. Determination by the Legislature of what constitutes proper exercise of police power is not final or conclusive but is subject to supervision by the courts. Lawton v. Steele, 152 U. S. 133, 137, 14 Sup. Ct. 499, 38 L. Ed. 385.

[4] The American people have always regarded education and acquisition of knowledge as matters of supreme importance which should be diligently promoted. The Ordinance of 1787 declares:

'Religion, morality and knowledge being necessary to good government and the happiness of mankind, schools and the means of education shall forever be encouraged.'

Corresponding to the right of control, it is the natural duty of the parent to give his children education suitable to their station in life; and nearly all the states, including Nebraska, enforce this obligation by compulsory laws.

Practically, education of the young is only possible in schools conducted by especially qualified persons who devote themselves thereto. The calling always has been regarded as useful and honorable, essential, indeed, to the public welfare. Mere knowledge of the German language cannot reasonably be regarded as harmful. Heretofore it has been commonly looked upon as helpful and desirable. Plaintiff in error taught this language in school as part of his occupation. His right thus to teach and the right of parents to engage him so to instruct their children, we think, are within the liberty of the amendment.

The challenged statute forbids the teaching in school of any subject except in English; also the teaching of any other language until the pupil has attained and successfully passed the eighth grade, which is not usually accomplished before the age of twelve. The Supreme Court of the state has held that 'the so-called ancient or dead languages' are not 'within the spirit or the purpose of ***401** the act.' Nebraska District of Evangelical Lutheran Synod, etc., v. McKelvie et al. (Neb.) 187 N. W. 927 (April 19, 1922). Latin, Greek, Hebrew are not proscribed; but German, French, Spanish, Italian, and every other alien speech are within the ban. Evidently the Legislature has attempted materially to interfere with the calling of modern language teachers, with the opportunities of pupils to acquire knowledge, and with the power of parents to control the education of their own.

It is said the purpose of the legislation was to promote civic development by inhibiting training and education of the immature in foreign tongues and ideals before they could learn English and acquire American ideals, and 'that the English language should be and become the mother tongue of all children reared in this state.' It is also affirmed that the foreign born population is very large, that certain communities commonly use foreign words, follow foreign leaders, move in a foreign atmosphere, and that the children are thereby hindered from becoming citizens of the most useful type and the public safety is imperiled.

That the state may do much, go very far, indeed, in order to improve the quality of its citizens, physically, mentally and morally, is clear; but the individual has certain fundamental rights which must be respected. The protection of the Constitution extends to all, to those who speak other languages as well as to those born with English on the tongue. Perhaps it

would be highly advantageous if all had ready understanding of our ordinary speech, but this cannot be coerced by methods which conflict with the Constitution-a desirable end cannot be promoted by prohibited means.

For the welfare of his Ideal Commonwealth, Plato suggested a law which should provide:

'That the wives of our guardians are to be common, and their children are to be common, and no parent is to know his own child, ***402** nor any child his parent. * * * The proper officers will take the offspring of the good parents to the pen or fold, and there they will deposit them with certain nurses who dwell in a separate quarter; but the offspring of the inferior, or of the better when they chance to be deformed, will be put away in some mysterious, unknown place, as they should be.'

In order to submerge the individual and develop ideal citizens, Sparta assembled the ****628** males at seven into barracks and intrusted their subsequent education and training to official guardians. Although such measures have been deliberately approved by men of great genius their ideas touching the relation between individual and state were wholly different from those upon which our institutions rest; and it hardly will be affirmed that any Legislature could impose such restrictions upon the people of a state without doing violence to both letter and spirit of the Constitution.

The desire of the Legislature to foster a homogeneous people with American ideals prepared readily to understand current discussions of civic matters is easy to appreciate. Unfortunate experiences during the late war and aversion toward every character of truculent adversaries were certainly enough to quicken that aspiration. But the means adopted, we think, exceed the limitations upon the power of the state and conflict with rights assured to plaintiff in error. The interference is plain enough and no adequate reason therefor in time of peace and domestic tranquility has been shown.

The power of the state to compel attendance at some school and to make reasonable regulations for all schools, including a requirement that they shall give instructions in English, is not questioned. Nor has challenge been made of the state's power to prescribe a curriculum for institutions which it supports. Those matters are not within the present controversy. Our concern is with the prohibition approved by the Supreme Court. ***403**Adams v. Tanner, 244 U. S. 590, 37 Sup. Ct. 662, 61 L. Ed. 1336, L. R. A. 1917F, 1163, Ann. Cas. 1917D, 973, pointed out that mere abuse incident to an occupation ordinarily useful is not enough to justify its abolition, although regulation may be entirely proper. No emergency has arisen which renders knowledge by a child of some language other than English so clearly harmful as to justify its inhibition with the consequent infringement of rights long freely enjoyed. We are constrained to conclude that the statute as applied is arbitrary and without reasonable relation to any end within the competency of the state.

[5] As the statute undertakes to interfere only with teaching which involves a modern language, leaving complete freedom as to other matters, there seems no adequate foundation for the suggestion that the purpose was to protect the child's health by limiting his mental activities. It is well known that proficiency in a foreign language seldom comes to one not instructed at an early age, and experience shows that this is not injurious to the health, morals or understanding of the ordinary child.

The judgment of the court below must be reversed and the cause remanded for further proceedings not inconsistent with this opinion.

Reversed.

Mr. Justice Holmes and Mr. Justice Sutherland, dissent.

U.S. 1923
Meyer v. Nebraska
262 U.S. 390, 43 S.Ct. 625, 29 A.L.R. 1446, 67 L.Ed. 1042

END OF DOCUMENT

Supreme Court of the United States
Tommy OLMSTEAD, Commissioner, Georgia Department of Human Resources, et al., Petitioners,
v.
L.C., by Jonathan ZIMRING, Guardian Ad Litem and Next Friend, et al.

No. 98-536.
Argued April 21, 1999.
Decided June 22, 1999.

Mentally disabled patients brought suit against state, challenging their confinement in segregated environment. The United States District Court for the Northern District of Georgia, Marvin H. Shoob, J., 1997 WL 148674, granted partial summary judgment to patients. State appealed. The United States Court of Appeals for the Eleventh Circuit, 138 F.3d 893, affirmed and remanded. Certiorari was granted. The Supreme Court, Justice Ginsburg, held that: (1) patients were qualified for community-based treatment, but (2) state could take into account the available resources in determining whether patients were entitled to immediate community placement.

Affirmed in part, vacated in part, and remanded.

Justice Stevens filed opinion concurring in part and concurring in the judgment.

Justice Kennedy filed opinion concurring in the judgment in which Justice Breyer joined in part.

Justice Thomas filed dissenting opinion in which Chief Justice Rehnquist and Justice Scalia joined.

If state were to demonstrate that it had a comprehensive, effectively working plan for placing qualified persons with mental disabilities in less restrictive settings, and a waiting list that moved at a reasonable pace not controlled by state's endeavors to keep its institutions fully populated, state would meet the reasonable-modifications standard of regulations promulgated under public services portion of ADA. (Per Justice Ginsburg, with three Justices concurring and two Justices concurring in the judgment.) Americans with Disabilities Act of 1990, § 202, 42 U.S.C.A. § 12132; 28 C.F.R. § 35.130(b)(7).

FN* The syllabus constitutes no part of the opinion of the Court but has been prepared by the Reporter of Decisions for the convenience of the reader. See *United States v. Detroit Timber & Lumber Co.*, 200 U.S. 321, 337, 26 S.Ct. 282, 50 L.Ed. 499.

In the Americans with Disabilities Act of 1990(ADA), Congress described the isolation and segregation of individuals with disabilities as a serious and pervasive form of discrimination. 42 U.S.C. §§ 12101(a)(2), (5). Title II of the ADA, which proscribes discrimination in the provision of public services, specifies, *inter alia*, that no qualified individual with a disability shall, "by reason of such disability," be excluded from participation in, or be denied the benefits of, a public entity's services, programs, or activities. § 12132. Congress instructed the Attorney General to issue regulations implementing Title II's discrimination proscription. See § 12134(a). One such regulation, known as the "integration regulation," requires a "public entity [to] administer ... programs ... in the most integrated setting appropriate to the needs of qualified individuals with disabilities." 28 CFR § 35.130(d). A further prescription, here called the "reasonable-modifications regulation," requires public entities to "make reasonable modifications" to avoid "discrimination on the basis of disability," but does not require measures that would "fundamentally alter" the nature of the entity's programs. § 35.130(b)(7).

Respondents L.C. and E.W. are mentally retarded women; L.C. has also been diagnosed with schizophrenia, and E. W., with a personality disorder. Both women were voluntarily admitted to Georgia Regional Hospital at Atlanta (GRH), where they were confined for treatment in a psychiatric unit. Although their treatment professionals eventually concluded that each of the women could be cared for appropriately in a community-based****2178** program, the women remained institutionalized at GRH. Seeking placement in community care, L.C. filed this suit against petitioner state officials (collectively, the State) under 42 U.S.C. § 1983 and Title II. She alleged that the State violated Title II in failing to place her in a community-based program once her treating professionals determined that such placement was appropriate. E.W. intervened, stating an identical claim. The District Court granted partial summary judgment for the women, ordering their ***582** placement in an appropriate community-based treatment program. The court rejected the State's argument that inadequate funding, not discrimination against L.C. and E.W. "by reason of [their] disabilit[ies]," accounted for their retention at GRH. Under Title II, the court concluded, unnecessary institutional segregation constitutes discrimination *per se*, which cannot be justified by a lack of funding. The court also rejected the State's defense that requiring immediate transfers in such cases would "fundamentally alter" the State's programs. The Eleventh Circuit affirmed the District Court's judgment, but remanded for reassessment of the State's cost-based defense. The District Court had left virtually no room for such a defense. The appeals court read the statute and regulations to allow the defense, but only in tightly limited circumstances. Accordingly, the Eleventh Circuit instructed the District Court to consider, as a key factor, whether the additional cost for treatment of L.C. and E.W. in community-based care would be unreasonable given the demands of the State's mental health budget.

Held: The judgment is affirmed in part and vacated in part, and the case is remanded.

138 F.3d 893, affirmed in part, vacated in part, and remanded.

Justice GINSBURG delivered the opinion of the Court with respect to Parts I, II, and III-A, concluding that, under Title II of the ADA, States are required to place persons with mental disabilities in community settings rather than in institutions when the State's treatment professionals have determined that community placement is appropriate, the transfer from institutional care to a less restrictive setting is not opposed by the affected individual, and the placement can be reasonably accommodated, taking into account the resources available to the State and the needs of others with mental disabilities. Pp. 2185-2188.

(a) The integration and reasonable-modifications regulations issued by the Attorney General rest on two key determinations: (1) Unjustified placement or retention of persons in institutions severely limits their exposure to the outside community, and therefore constitutes a form of discrimination based on disability prohibited by Title II, and (2) qualifying their obligation to avoid unjustified isolation of individuals with disabilities, States can resist modifications that would fundamentally alter the nature of their services and programs. The Eleventh Circuit essentially upheld the Attorney General's construction of the ADA. This Court affirms the Court of Appeals decision in substantial part. P. 2185.

(b) Undue institutionalization qualifies as dis-

crimination "by reason of ... disability." The Department of Justice has consistently advocated that it does. Because the Department is the agency directed ***583** by Congress to issue Title II regulations, its views warrant respect. This Court need not inquire whether the degree of deference described in *Chevron U.S.A. Inc. v. Natural Resources Defense Council, Inc.*, 467 U.S. 837, 844, 104 S.Ct. 2778, 81 L.Ed.2d 694, is in order; the well-reasoned views of the agencies implementing a statute constitute a body of experience and informed judgment to which courts and litigants may properly resort for guidance. *E.g.*, *Bragdon v. Abbott*, 524 U.S. 624, 642, 118 S.Ct. 2196, 141 L.Ed.2d 540. According to the State, L.C. and E.W. encountered no discrimination "by reason of" their disabilities because they were not denied community placement on account of those disabilities, nor were they subjected to "discrimination," for they identified no comparison class of similarly situated individuals given preferential treatment. In rejecting these positions, the Court recognizes that Congress had a more comprehensive view of the concept of discrimination advanced in the ADA. The ADA stepped up ****2179** earlier efforts in the Developmentally Disabled Assistance and Bill of Rights Act and the Rehabilitation Act of 1973 to secure opportunities for people with developmental disabilities to enjoy the benefits of community living. The ADA both requires all public entities to refrain from discrimination, see § 12132, and specifically identifies unjustified "segregation" of persons with disabilities as a "for[m] of discrimination," see §§ 12101(a)(2), 12101(a)(5). The identification of unjustified segregation as discrimination reflects two evident judgments: Institutional placement of persons who can handle and benefit from community settings perpetuates unwarranted assumptions that persons so isolated are incapable or unworthy of participating in community life, cf., *e.g.*, *Allen v. Wright*, 468 U.S. 737, 755, 104 S.Ct. 3315, 82 L.Ed.2d 556; and institutional confinement severely diminishes individuals' everyday life activities. Dissimilar treatment correspondingly exists in this key respect: In order to receive needed medical services, persons with mental disabilities must, because of those disabilities, relinquish participation in community life they could enjoy given reasonable accommodations, while persons without mental disabilities can receive the medical services they need without similar sacrifice. The State correctly uses the past tense to frame its argument that, despite Congress' ADA findings, the Medicaid statute "reflected" a congressional policy preference for institutional treatment over treatment in the community. Since 1981, Medicaid has in fact provided funding for state-run home and community-based care through a waiver program. This Court emphasizes that nothing in the ADA or its implementing regulations condones termination of institutional settings for persons unable to handle or benefit from community settings. Nor is there any federal requirement that community-based treatment be imposed on patients who do not desire it. In this case, however, it is not genuinely disputed that L.C. and E.W. are individuals "qualified" ***584** for noninstitutional care: The State's own professionals determined that community-based treatment would be appropriate for L.C. and E. W., and neither woman opposed such treatment. Pp. 2185-2188.

Justice GINSBURG, joined by Justice O'CONNOR, Justice SOUTER, and Justice BREYER, concluded in Part III-B that the State's responsibility, once it provides community-based treatment to qualified persons with disabilities, is not boundless. The reasonable-modifications regulation speaks of "reasonable modifications" to avoid discrimination, and allows States to resist modifications that entail a "fundamenta[l] alter[ation]" of the States' services and programs. If, as the Eleventh Circuit indicated, the expense entailed in placing one or two people in a community-based treatment program is properly measured for reasonableness against the State's entire mental health budget, it is unlikely that a State, relying on the fundamental-alteration defense, could ever prevail. Sensibly construed, the fundamental-alteration component of the reasonable-modifications regulation would allow the State to show that, in the allocation of available resources, immediate relief for the plaintiffs would be inequitable, given the responsibility the State has undertaken for the care and treatment of a large and diverse population of persons with mental disabilities. The ADA is not reasonably read to impel States to phase out institutions, placing patients in need of close care at risk. Nor is it the ADA's mission to drive States to move institutionalized patients into an inappropriate setting, such as a homeless shelter, a placement the State proposed, then retracted, for E.W. Some individuals, like L.C. and E.W. in prior years, may need institutional care from time to time to stabilize acute psychiatric symptoms. For others, no placement outside the institution may ever be appropriate. To maintain a range of facilities and to administer services with an even hand, the State must have more leeway than the courts below understood the funda-

mental-alteration defense to allow. If, for example, the State were to demonstrate that it had a comprehensive, effectively working plan for placing qualified persons with mental disabilities in less restrictive settings, and a waiting list that moved at a reasonable pace not controlled by the State's endeavors to keep its institutions fully populated, the reasonable-modifications ****2180** standard would be met. In such circumstances, a court would have no warrant effectively to order displacement of persons at the top of the community-based treatment waiting list by individuals lower down who commenced civil actions. The case is remanded for further consideration of the appropriate relief, given the range of the State's facilities for the care of persons with diverse mental disabilities, and its obligation to administer services with an even hand. Pp. 2188-2190.

***585** Justice STEVENS would affirm the judgment of the Court of Appeals, but because there are not five votes for that disposition, joined the Court's judgment and Parts I, II, and III-A of its opinion. P. 2190.

Justice KENNEDY concluded that the case must be remanded for a determination of the questions the Court poses and for a determination whether respondents can show a violation of 42 U.S.C. § 12132's ban on discrimination based on the summary judgment materials on file or any further pleadings and materials properly allowed. On the ordinary interpretation and meaning of the term, one who alleges discrimination must show that she received differential treatment vis-à-vis members of a different group on the basis of a statutorily described characteristic. Thus, respondents could demonstrate discrimination by showing that Georgia (i) provides treatment to individuals suffering from medical problems of comparable seriousness, (ii) as a general matter, does so in the most integrated setting appropriate for the treatment of those problems (taking medical and other practical considerations into account), but (iii) without adequate justification, fails to do so for a group of mentally disabled persons (treating them instead in separate, locked institutional facilities). This inquiry would not be simple. Comparisons of different medical conditions and the corresponding treatment regimens might be difficult, as would be assessments of the degree of integration of various settings in which medical treatment is offered. Thus far, respondents have identified no class of similarly situated individuals, let alone shown them to have been given preferential treatment. Without additional information, the Court cannot address the issue in the way the statute demands. As a consequence, the partial summary judgment granted respondents ought not to be sustained. In addition, it was error in the earlier proceedings to restrict the relevance and force of the State's evidence regarding the comparative costs of treatment. The State is entitled to wide discretion in adopting its own systems of cost analysis, and, if it chooses, to allocate health care resources based on fixed and overhead costs for whole institutions and programs. The lower courts should determine in the first instance whether a statutory violation is sufficiently alleged and supported in respondents' summary judgment materials and, if not, whether they should be given leave to replead and to introduce evidence and argument along the lines suggested. Pp. 2192-2194.

GINSBURG, J., announced the judgment of the Court and delivered the opinion of the Court with respect to Parts I, II, and III-A, in which STEVENS, O'CONNOR, SOUTER, and BREYER, JJ., joined, and an opinion***586** with respect to Part III-B, in which O'CONNOR, SOUTER, and BREYER, JJ., joined. STEVENS, J., filed an opinion concurring in part and concurring in the judgment, *post,* p. 2190. KENNEDY, J., filed an opinion concurring in the judgment, in which BREYER, J., joined as to Part I, *post,* p. 2190. THOMAS, J., filed a dissenting opinion, in which REHNQUIST, C. J., and SCALIA, J., joined, *post,* p. 2194.
Beverly P. Downing, for petitioners.

Michael Gottesman, for respondent.

Irving L. Gornstein, Washington, DC, for United States as *amicus curiae,* by special leave of the Court.

For U.S. Supreme Court briefs, see:1999 WL 54623 (Pet.Brief)1999 WL 144128 (Resp.Brief)1999 WL 220130 (Reply.Brief)

****2181 *587** Justice GINSBURG announced the judgment of the Court and delivered the opinion of the Court with respect to Parts I, II, and III-A, and an opinion with respect to Part III-B, in which Justice O'CONNOR, Justice SOUTER, and Justice BREYER join.

This case concerns the proper construction of the

anti-discrimination provision contained in the public services portion (Title II) of the Americans with Disabilities Act of 1990 (ADA), 104 Stat. 337, 42 U.S.C. § 12132. Specifically, we confront the question whether the proscription of discrimination may require placement of persons with mental disabilities in community settings rather than in institutions. The answer, we hold, is a qualified yes. Such action is in order when the State's treatment professionals have determined that community placement is appropriate, the transfer from institutional care to a less restrictive setting is not opposed by the affected individual, and the placement can be reasonably accommodated, taking into account the resources available to the State and the needs of others with mental disabilities. In so ruling, we affirm the decision of the Eleventh Circuit in substantial part. We remand the case, however, for further consideration of the appropriate relief, given the range of facilities the State maintains for the care and treatment of persons with diverse mental disabilities, and its obligation to administer services with an even hand.

***588** I

This case, as it comes to us, presents no constitutional question. The complaints filed by plaintiffs-respondents L.C. and E.W. did include such an issue; L.C. and E.W. alleged that defendants-petitioners, Georgia health care officials, failed to afford them minimally adequate care and freedom from undue restraint, in violation of their rights under the Due Process Clause of the Fourteenth Amendment. See Complaint ¶¶ 87-91; Intervenor's Complaint ¶¶ 30-34. But neither the District Court nor the Court of Appeals reached those Fourteenth Amendment claims. See Civ. No. 1:95-cv-1210-MHS (ND Ga., Mar. 26, 1997), pp. 5-6, 11-13, App. to Pet. for Cert. 34a-35a, 40a-41a; 138 F.3d 893, 895, and n. 3 (C.A.11 1998). Instead, the courts below resolved the case solely on statutory grounds. Our review is similarly confined. Cf. *Cleburne v. Cleburne Living Center, Inc.*, 473 U.S. 432, 450, 105 S.Ct. 3249, 87 L.Ed.2d 313 (1985) (Texas city's requirement of special use permit for operation of group home for mentally retarded, when other care and multiple-dwelling facilities were freely permitted, lacked rational basis and therefore violated Equal Protection Clause of Fourteenth Amendment). Mindful that it is a statute we are construing, we set out first the legislative and regulatory prescriptions on which the case turns.

In the opening provisions of the ADA, Congress stated findings applicable to the statute in all its parts. Most relevant to this case, Congress determined that

> "(2) historically, society has tended to isolate and segregate individuals with disabilities, and, despite some improvements, such forms of discrimination against individuals with disabilities continue to be a serious and pervasive social problem;
>
> "(3) discrimination against individuals with disabilities persists in such critical areas as ... institutionalization ...;
>
> . . . . .
>
> ***589** "(5) individuals with disabilities continually encounter various forms of discrimination, including outright intentional exclusion, ... failure to make modifications to existing facilities and practices, ... [and] segregation...." 42 U.S.C. §§ 12101(a)(2), (3), (5).[FN1]

FN1. The ADA, enacted in 1990, is the Federal Government's most recent and extensive endeavor to address discrimination against persons with disabilities. Earlier legislative efforts included the Rehabilitation Act of 1973, 87 Stat. 355, 29 U.S.C. § 701 *et seq.* (1976 ed.), and the Developmentally Disabled Assistance and Bill of Rights Act, 89 Stat. 486, 42 U.S.C. § 6001 *et seq.* (1976 ed.), enacted in 1975. In the ADA, Congress for the first time referred expressly to "segregation" of persons with disabilities as a "for[m] of discrimination," and to discrimination that persists in the area of "institutionalization." §§ 12101(a)(2), (3), (5).

Congress then set forth prohibitions against discrimination in employment (Title I, §§ 12111-12117), public services furnished by governmental entities (Title II, §§ 12131-****2182** 12165), and public accommodations provided by private entities (Title III, §§ 12181-12189). The statute as a whole is intended "to provide a clear and comprehensive national mandate for the elimination of discrimination against individuals with disabilities." § 12101(b)(1).[FN2]

FN2. The ADA defines "disability," "with

respect to an individual," as

> "(A) a physical or mental impairment that substantially limits one or more of the major life activities of such individual;
>
> "(B) a record of such an impairment; or
>
> "(C) being regarded as having such an impairment." § 12102(2).

There is no dispute that L.C. and E.W. are disabled within the meaning of the ADA.

This case concerns Title II, the public services portion of the ADA.[FN3] The provision of Title II centrally at issue reads:

> FN3. In addition to the provisions set out in Part A governing public services generally, see §§ 12131-12134, Title II contains in Part B a host of provisions governing public transportation services, see §§ 12141-12165.

"Subject to the provisions of this subchapter, no qualified individual with a disability shall, by reason of such ***590** disability, be excluded from participation in or be denied the benefits of the services, programs, or activities of a public entity, or be subjected to discrimination by any such entity." § 201, as set forth in 42 U.S.C. § 12132.

Title II's definition section states that "public entity" includes "any State or local government," and "any department, agency, [or] special purpose district." §§ 12131(1)(A), (B). The same section defines "qualified individual with a disability" as

"an individual with a disability who, with or without reasonable modifications to rules, policies, or practices, the removal of architectural, communication, or transportation barriers, or the provision of auxiliary aids and services, meets the essential eligibility requirements for the receipt of services or the participation in programs or activities provided by a public entity." § 12131(2).

On redress for violations of § 12132's discrimination prohibition, Congress referred to remedies available under § 505 of the Rehabilitation Act of 1973, 92 Stat. 2982, 29 U.S.C. § 794a. See § 203, as set forth in 42 U.S.C. § 12133 ("The remedies, procedures, and rights set forth in [§ 505 of the Rehabilitation Act] shall be the remedies, procedures, and rights this subchapter provides to any person alleging discrimination on the basis of disability in violation of section 12132 of this title.").[FN4]

> FN4. Section 505 of the Rehabilitation Act incorporates the remedies, rights, and procedures set forth in Title VI of the Civil Rights Act of 1964 for violations of § 504 of the Rehabilitation Act. See 29 U.S.C. § 794a(a)(2). Title VI, in turn, directs each federal department authorized to extend financial assistance to any department or agency of a State to issue rules and regulations consistent with achievement of the objectives of the statute authorizing financial assistance. See 78 Stat. 252, 42 U.S.C. § 2000d-1. Compliance with such requirements may be effected by the termination or denial of federal funds, or "by any other means authorized by law." *Ibid.* Remedies both at law and in equity are available for violations of the statute. See § 2000d-7(a)(2).

591** Congress instructed the Attorney General to issue regulations implementing provisions of Title II, including § 12132's discrimination proscription. See § 204, as set forth in § 12134(a) ("[T]he Attorney General shall promulgate regulations in an accessible format that implement this part.").[FN5] The Attorney*2183** General's regulations, Congress further directed, "shall be consistent with this chapter and with the coordination regulations ... applicable to recipients of Federal financial assistance under [§ 504 of the Rehabilitation Act]." § 204, as set forth in 42 U.S.C. § 12134(b). One of the § 504 regulations requires recipients of federal funds to "administer programs and activities in the most integrated ***592** setting appropriate to the needs of qualified handicapped persons." 28 CFR § 41.51(d) (1998).

> FN5. Congress directed the Secretary of Transportation to issue regulations implementing the portion of Title II concerning public transportation. See 42 U.S.C. §§ 12143(b), 12149, 12164. As stated in the regulations, a person alleging discrimination on the basis of disability in violation of Title II may seek to enforce its provisions by

commencing a private lawsuit, or by filing a complaint with (a) a federal agency that provides funding to the public entity that is the subject of the complaint, (b) the Department of Justice for referral to an appropriate agency, or (c) one of eight federal agencies responsible for investigating complaints arising under Title II: the Department of Agriculture, the Department of Education, the Department of Health and Human Services, the Department of Housing and Urban Development, the Department of the Interior, the Department of Justice, the Department of Labor, and the Department of Transportation. See 28 CFR §§ 35.170(c), 35.172(b), 35.190(b) (1998).

The ADA contains several other provisions allocating regulatory and enforcement responsibility. Congress instructed the Equal Employment Opportunity Commission (EEOC) to issue regulations implementing Title I, see 42 U.S.C. § 12116; the EEOC, the Attorney General, and persons alleging discrimination on the basis of disability in violation of Title I may enforce its provisions, see § 12117(a). Congress similarly instructed the Secretary of Transportation and the Attorney General to issue regulations implementing provisions of Title III, see §§ 12186(a)(1), (b); the Attorney General and persons alleging discrimination on the basis of disability in violation of Title III may enforce its provisions, see §§ 12188(a)(1), (b). Each federal agency responsible for ADA implementation may render technical assistance to affected individuals and institutions with respect to provisions of the ADA for which the agency has responsibility. See § 12206(c)(1).

As Congress instructed, the Attorney General issued Title II regulations, see 28 CFR pt. 35 (1998), including one modeled on the § 504 regulation just quoted; called the "integration regulation," it reads:

"A public entity shall administer services, programs, and activities in the most integrated setting appropriate to the needs of qualified individuals with disabilities." 28 CFR § 35.130(d) (1998).

The preamble to the Attorney General's Title II regulations defines "the most integrated setting appropriate to the needs of qualified individuals with disabilities" to mean "a setting that enables individuals with disabilities to interact with non-disabled persons to the fullest extent possible." 28 CFR pt. 35, App. A, p. 450 (1998). Another regulation requires public entities to "make reasonable modifications" to avoid "discrimination on the basis of disability," unless those modifications would entail a "fundamenta[l] alter [ation]"; called here the "reasonable-modifications regulation," it provides:

"A public entity shall make reasonable modifications in policies, practices, or procedures when the modifications are necessary to avoid discrimination on the basis of disability, unless the public entity can demonstrate that making the modifications would fundamentally alter the nature of the service, program, or activity." 28 CFR § 35.130(b)(7) (1998).

We recite these regulations with the caveat that we do not here determine their validity. While the parties differ on the proper construction and enforcement of the regulations, we do not understand petitioners to challenge the regulatory formulations themselves as outside the congressional authorization. See Brief for Petitioners 16-17, 36, 40-41; ***593** Reply Brief 15-16 (challenging the Attorney General's interpretation of the integration regulation).

II

With the key legislative provisions in full view, we summarize the facts underlying this dispute. Respondents L.C. and E.W. are mentally retarded women; L.C. has also been diagnosed with schizophrenia, and E.W. with a personality disorder. Both women have a history of treatment in institutional settings. In May 1992, L.C. was voluntarily admitted to Georgia Regional Hospital at Atlanta (GRH), where she was confined for treatment in a psychiatric unit. By May 1993, her psychiatric condition had stabilized, and L. C.'s treatment team at GRH agreed that her needs could be met appropriately in one of the community-based programs the State supported. Despite this evaluation, L.C. remained institutionalized until February 1996, when the State placed her in a community-based treatment program.

E.W. was voluntarily admitted to GRH in Feb-

ruary 1995; like L.C., E.W. was confined for treatment in a psychiatric unit. In March 1995, GRH sought to discharge E.W. to a homeless shelter, but abandoned that plan after her attorney filed an administrative complaint. By 1996, E.W.'s treating psychiatrist concluded that she could be treated appropriately in a community-based setting. She nonetheless remained institutionalized until a few months after the District Court issued its judgment in this case in 1997.

[1] In May 1995, when she was still institutionalized at GRH, L.C. filed suit in the United States District Court for the Northern District of Georgia, challenging her continued confinement in a segregated environment.****2184** Her complaint invoked 42 U.S.C. § 1983 and provisions of the ADA, §§ 12131-12134, and named as defendants, now petitioners, the Commissioner of the Georgia Department of Human Resources, the Superintendent of GRH, and the Executive Director of the Fulton County Regional Board (collectively, ***594** the State). L.C. alleged that the State's failure to place her in a community-based program, once her treating professionals determined that such placement was appropriate, violated, *inter alia*, Title II of the ADA. L. C.'s pleading requested, among other things, that the State place her in a community care residential program, and that she receive treatment with the ultimate goal of integrating her into the mainstream of society. E.W. intervened in the action, stating an identical claim. [FN6]

> FN6. L.C. and E.W. are currently receiving treatment in community-based programs. Nevertheless, the case is not moot. As the District Court and Court of Appeals explained, in view of the multiple institutional placements L.C. and E.W. have experienced, the controversy they brought to court is "capable of repetition, yet evading review." No. 1:95-cv-1210-MHS (ND Ga., Mar. 26, 1997), p. 6, App. to Pet. for Cert. 35a (internal quotation marks omitted); see 138 F.3d 893, 895, n. 2 (C.A.11 1998) (citing *Honig v. Doe*, 484 U.S. 305, 318-323, 108 S.Ct. 592, 98 L.Ed.2d 686 (1988), and *Vitek v. Jones*, 445 U.S. 480, 486-487, 100 S.Ct. 1254, 63 L.Ed.2d 552 (1980)).

The District Court granted partial summary judgment in favor of L.C. and E.W. See App. to Pet. for Cert. 31a-42a. The court held that the State's failure to place L.C. and E.W. in an appropriate community-based treatment program violated Title II of the ADA. See *id.*, at 39a, 41a. In so ruling, the court rejected the State's argument that inadequate funding, not discrimination against L.C. and E.W. "by reason of" their disabilities, accounted for their retention at GRH. Under Title II, the court concluded, "unnecessary institutional segregation of the disabled constitutes discrimination *per se*, which cannot be justified by a lack of funding." *Id.*, at 37a.

In addition to contending that L.C. and E.W. had not shown discrimination "by reason of [their] disabilit[ies]," the State resisted court intervention on the ground that requiring immediate transfers in cases of this order would "fundamentally alter" the State's activity. The State reasserted that it was already using all available funds to provide services to other persons with disabilities. See *id.*, at 38a. Rejecting***595** the State's "fundamental alteration" defense, the court observed that existing state programs provided community-based treatment of the kind for which L.C. and E.W. qualified, and that the State could "provide services to plaintiffs in the community at considerably *less* cost than is required to maintain them in an institution." *Id.*, at 39a.

The Court of Appeals for the Eleventh Circuit affirmed the judgment of the District Court, but remanded for reassessment of the State's cost-based defense. See 138 F.3d, at 905. As the appeals court read the statute and regulations: When "a disabled individual's treating professionals find that a community-based placement is appropriate for that individual, the ADA imposes a duty to provide treatment in a community setting-the most integrated setting appropriate to that patient's needs"; "[w]here there is no such finding [by the treating professionals], nothing in the ADA requires the deinstitutionalization of th[e] patient." *Id.*, at 902.

The Court of Appeals recognized that the State's duty to provide integrated services "is not absolute"; under the Attorney General's Title II regulation, "reasonable modifications" were required of the State, but fundamental alterations were not demanded. *Id.*, at 904. The appeals court thought it clear, however, that "Congress wanted to permit a cost defense only in the most limited of circumstances." *Id.*, at 902. In conclusion, the court stated that a cost justification would fail "[u]nless the State can prove that requiring it to

[expend additional funds in order to provide L.C. and E.W. with integrated services] would be so unreasonable given the demands of the State's mental health budget that it would fundamentally alter the service [the State] provides." *Id.*, at 905. Because it appeared that the District Court had entirely ruled out a "lack of funding" justification, see App. to Pet. for Cert. 37a, the appeals court remanded, repeating that the District Court should consider, among other ****2185** things, "whether the additional expenditures necessary to treat L.C. and E.W. in community-based care would be unreasonable***596** given the demands of the State's mental health budget." 138 F.3d, at 905.[FN7]

FN7. After this Court granted certiorari, the District Court issued a decision on remand rejecting the State's fundamental-alteration defense. See 1:95-cv-1210-MHS (ND Ga., Jan. 29, 1999), p. 1. The court concluded that the annual cost to the State of providing community-based treatment to L.C. and E.W. was not unreasonable in relation to the State's overall mental health budget. See *id.*, at 5. In reaching that judgment, the District Court first declared "irrelevant" the potential impact of its decision beyond L.C. and E.W. 1:95-cv-1210-MHS (ND Ga., Oct. 20, 1998), p. 3, App. 177. The District Court's decision on remand is now pending appeal before the Eleventh Circuit.

We granted certiorari in view of the importance of the question presented to the States and affected individuals. See 525 U.S. 1054, 119 S.Ct. 617, 142 L.Ed.2d 556 (1998).[FN8]

FN8. Twenty-two States and the Territory of Guam joined a brief urging that certiorari be granted. Ten of those States joined a brief in support of petitioners on the merits.

III

Endeavoring to carry out Congress' instruction to issue regulations implementing Title II, the Attorney General, in the integration and reasonable-modifications regulations, see *supra*, at 2182-2183, made two key determinations. The first concerned the scope of the ADA's discrimination proscription, 42 U.S.C. § 12132; the second concerned the obligation of the States to counter discrimination. As to the first, the Attorney General concluded that unjustified placement or retention of persons in institutions, severely limiting their exposure to the outside community, constitutes a form of discrimination based on disability prohibited by Title II. See 28 CFR § 35.130(d) (1998) ("A public entity shall administer services ... in the most integrated setting appropriate to the needs of qualified individuals with disabilities."); Brief for United States as *Amicus Curiae* in *Helen L. v. DiDario*, No. 94-1243 (C.A.3 1994), pp. 8, 15-16 (unnecessary segregation of persons with disabilities constitutes a form of discrimination prohibited by the ADA and the integration ***597** regulation). Regarding the States' obligation to avoid unjustified isolation of individuals with disabilities, the Attorney General provided that States could resist modifications that "would fundamentally alter the nature of the service, program, or activity." 28 CFR § 35.130(b)(7) (1998).

The Court of Appeals essentially upheld the Attorney General's construction of the ADA. As just recounted, see *supra*, at 2184-2185, the appeals court ruled that the unjustified institutionalization of persons with mental disabilities violated Title II; the court then remanded with instructions to measure the cost of caring for L.C. and E.W. in a community-based facility against the State's mental health budget.

[2] We affirm the Court of Appeals' decision in substantial part. Unjustified isolation, we hold, is properly regarded as discrimination based on disability. But we recognize, as well, the States' need to maintain a range of facilities for the care and treatment of persons with diverse mental disabilities, and the States' obligation to administer services with an even hand. Accordingly, we further hold that the Court of Appeals' remand instruction was unduly restrictive. In evaluating a State's fundamental-alteration defense, the District Court must consider, in view of the resources available to the State, not only the cost of providing community-based care to the litigants, but also the range of services the State provides others with mental disabilities, and the State's obligation to mete out those services equitably.

A

[3][4] We examine first whether, as the Eleventh Circuit held, undue institutionalization qualifies as discrimination "by reason of ... disability." The Department of Justice has consistently advocated that it does.[FN9] Because****2186** the Department ***598** is the agency directed by Congress to issue regulations im-

plementing Title II, see *supra,* at 2182-2183, its views warrant respect. We need not inquire whether the degree of deference described in *Chevron U.S.A. Inc. v. Natural Resources Defense Council, Inc.*, 467 U.S. 837, 844, 104 S.Ct. 2778, 81 L.Ed.2d 694 (1984), is in order; "[i]t is enough to observe that the well-reasoned views of the agencies implementing a statute 'constitute a body of experience and informed judgment to which courts and litigants may properly resort for guidance.' " *Bragdon v. Abbott*, 524 U.S. 624, 642, 118 S.Ct. 2196, 141 L.Ed.2d 540 (1998) (quoting *Skidmore v. Swift & Co.*, 323 U.S. 134, 139-140, 65 S.Ct. 161, 89 L.Ed. 124 (1944)).

> FN9. See Brief for United States in *Halderman v. Pennhurst State School and Hospital*, Nos. 78-1490, 78-1564, 78-1602 (CA3 1978), p. 45 ("[I]nstitutionalization result[ing] in separation of mentally retarded persons for no permissible reason ... is 'discrimination,' and a violation of Section 504 [of the Rehabilitation Act] if it is supported by federal funds."); Brief for United States in *Halderman v. Pennhurst State School and Hospital*, Nos. 78-1490, 78-1564, 78-1602 (CA3 1981), p. 27 ("Pennsylvania violates Section 504 by indiscriminately subjecting handicapped persons to [an institution] without first making an individual reasoned professional judgment as to the appropriate placement for each such person among all available alternatives."); Brief for United States as *Amicus Curiae* in *Helen L. v. DiDario*, 46 F.3d 325, 335 (C.A.3 1994), ("Both the Section 504 coordination regulations and the rest of the ADA make clear that the unnecessary segregation of individuals with disabilities in the provision of public services is itself a form of discrimination within the meaning of those statutes."); *id.*, at 337-339.

The State argues that L.C. and E.W. encountered no discrimination "by reason of" their disabilities because they were not denied community placement on account of those disabilities. See Brief for Petitioners 20. Nor were they subjected to "discrimination," the State contends, because " 'discrimination' necessarily requires uneven treatment of similarly situated individuals," and L.C. and E.W. had identified no comparison class, *i.e.*, no similarly situated individuals given preferential treatment. *Id.*, at 21. We are satisfied that Congress had a more comprehensive view of the concept of discrimination advanced in the ADA.[FN10]

> FN10. The dissent is driven by the notion that "this Court has never endorsed an interpretation of the term 'discrimination' that encompassed disparate treatment among members of the *same* protected class," *post,* at 2194 (opinion of THOMAS, J.), that "[o]ur decisions construing various statutory prohibitions against 'discrimination' have not wavered from this path," *post,* at 2194, and that "a plaintiff cannot prove 'discrimination' by demonstrating that one member of a particular protected group has been favored over another member of that same group," *post,* at 2195. The dissent is incorrect as a matter of precedent and logic. See *O'Connor v. Consolidated Coin Caterers Corp.*, 517 U.S. 308, 312, 116 S.Ct. 1307, 134 L.Ed.2d 433 (1996) (The Age Discrimination in Employment Act of 1967 "does not ban discrimination against employees because they are aged 40 or older; it bans discrimination against employees because of their age, but limits the protected class to those who are 40 or older. The fact that one person in the protected class has lost out to another person in the protected class is thus irrelevant, so long as he has lost out *because of his age*."); cf. *Oncale v. Sundowner Offshore Services, Inc.*, 523 U.S. 75, 76, 118 S.Ct. 998, 140 L.Ed.2d 201 (1998) ("[W]orkplace harassment can violate Title VII's prohibition against 'discriminat[ion] ... because of ... sex,' 42 U.S.C. § 2000e-2(a)(1), when the harasser and the harassed employee are of the same sex."); *Jefferies v. Harris County Community Action Assn.*, 615 F.2d 1025, 1032 (C.A.5 1980) ("[D]iscrimination against black females can exist even in the absence of discrimination against black men or white women.").

***599** The ADA stepped up earlier measures to secure opportunities for people with developmental disabilities to enjoy the benefits of community living. The Developmentally Disabled Assistance and Bill of Rights Act, a 1975 measure, stated in aspirational terms that "[t]he treatment, services, and habilitation

for a person with developmental disabilities ... *should be* provided in the setting that is least restrictive of the person's personal liberty." 89 Stat. 502, 42 U.S.C. § 6010(2) (1976 ed.) (emphasis added); see also *Pennhurst State School and Hospital v. Halderman*, 451 U.S. 1, 24, 101 S.Ct. 1531, 67 L.Ed.2d 694 (1981) (concluding that the § 6010 provisions "were intended to be hortatory, not mandatory"). In a related legislative endeavor, the Rehabilitation Act of 1973, Congress used mandatory language to proscribe discrimination against persons with disabilities. See 87 Stat. 394, as amended, 29 U.S.C. § 794 (1976 ed.) ("No otherwise qualified individual with a disability in the United States ... *shall*, solely by reason of her or his disability, be excluded from the participation in, be denied the benefits of, or ****2187** be subjected to discrimination under any program or activity receiving Federal financial***600** assistance." (Emphasis added.)) Ultimately, in the ADA, enacted in 1990, Congress not only required all public entities to refrain from discrimination, see 42 U.S.C. § 12132; additionally, in findings applicable to the entire statute, Congress explicitly identified unjustified "segregation" of persons with disabilities as a "for[m] of discrimination." See § 12101(a)(2) ("historically, society has tended to isolate and segregate individuals with disabilities, and, despite some improvements, such forms of discrimination against individuals with disabilities continue to be a serious and pervasive social problem"); § 12101(a)(5) ("individuals with disabilities continually encounter various forms of discrimination, including ... segregation").[FN11]

FN11. Unlike the ADA, § 504 of the Rehabilitation Act contains no express recognition that isolation or segregation of persons with disabilities is a form of discrimination. Section 504's discrimination proscription, a single sentence attached to vocational rehabilitation legislation, has yielded divergent court interpretations. See Brief for United States as *Amicus Curiae* 23-25.

Recognition that unjustified institutional isolation of persons with disabilities is a form of discrimination reflects two evident judgments. First, institutional placement of persons who can handle and benefit from community settings perpetuates unwarranted assumptions that persons so isolated are incapable or unworthy of participating in community life. Cf. *Allen v. Wright*, 468 U.S. 737, 755, 104 S.Ct. 3315, 82 L.Ed.2d 556 (1984) ("There can be no doubt that [stigmatizing injury often caused by racial discrimination] is one of the most serious consequences of discriminatory government action."); *Los Angeles Dept. of Water and Power v. Manhart*, 435 U.S. 702, 707, n. 13, 98 S.Ct. 1370, 55 L.Ed.2d 657 (1978) (" 'In forbidding employers to discriminate against individuals because of their sex, Congress intended to strike at the entire spectrum of disparate treatment of men and women resulting from sex stereotypes.' ") (quoting ***601***Sprogis v. United Air Lines, Inc.*, 444 F.2d 1194, 1198 (C.A.7 1971)). Second, confinement in an institution severely diminishes the everyday life activities of individuals, including family relations, social contacts, work options, economic independence, educational advancement, and cultural enrichment. See Brief for American Psychiatric Association et al. as *Amici Curiae* 20-22. Dissimilar treatment correspondingly exists in this key respect: In order to receive needed medical services, persons with mental disabilities must, because of those disabilities, relinquish participation in community life they could enjoy given reasonable accommodations, while persons without mental disabilities can receive the medical services they need without similar sacrifice. See Brief for United States as *Amicus Curiae* 6-7, 17.

The State urges that, whatever Congress may have stated as its findings in the ADA, the Medicaid statute "reflected a congressional policy preference for treatment in the institution over treatment in the community." Brief for Petitioners 31. The State correctly used the past tense. Since 1981, Medicaid has provided funding for state-run home and community-based care through a waiver program. See 95 Stat. 812-813, as amended, 42 U.S.C. § 1396n(c); Brief for United States as *Amicus Curiae* 20-21.[FN12] Indeed, the United States points out that the Department of Health and Human Services (HHS) "has a policy of encouraging States to take advantage of the waiver program, and often approves more waiver slots than a State ultimately uses." *Id.*, at 25-26 (further observing that, by 1996, "HHS approved up to 2109 waiver slots for Georgia, but Georgia used only 700").

FN12. The waiver program provides Medicaid reimbursement to States for the provision of community-based services to individuals who would otherwise require institutional care, upon a showing that the average annual cost of such services is not more than

the annual cost of institutional services. See § 1396n(c).

We emphasize that nothing in the ADA or its implementing regulations condones termination of institutional settings for persons unable to handle or benefit from community ***602** settings. Title II provides only that "qualified individual[s] with a disability" may ****2188** not "be subjected to discrimination." 42 U.S.C. § 12132. "Qualified individuals," the ADA further explains, are persons with disabilities who, "with or without reasonable modifications to rules, policies, or practices, ... mee[t] the essential eligibility requirements for the receipt of services or the participation in programs or activities provided by a public entity." § 12131(2).

[5][6][7] Consistent with these provisions, the State generally may rely on the reasonable assessments of its own professionals in determining whether an individual "meets the essential eligibility requirements" for habilitation in a community-based program. Absent such qualification, it would be inappropriate to remove a patient from the more restrictive setting. See 28 CFR § 35.130(d) (1998) (public entity shall administer services and programs in "the most integrated setting *appropriate* to the needs of qualified individuals with disabilities" (emphasis added)); cf. *School Bd. of Nassau Cty. v. Arline*, 480 U.S. 273, 288, 107 S.Ct. 1123, 94 L.Ed.2d 307 (1987) ("[C]ourts normally should defer to the reasonable medical judgments of public health officials.").[FN13] Nor is there any federal requirement that community-based treatment be imposed on patients who do not desire it. See 28 CFR § 35.130(e)(1) (1998) ("Nothing in this part shall be construed to require an individual with a disability to accept an accommodation ... which such individual chooses not to accept."); 28 CFR pt. 35, App. A, p. 450 (1998) ("[P]ersons with disabilities must be provided the option of declining to accept a particular accommodation."). In this case, however, there is no genuine dispute concerning the status of L.C. and E.W. as individuals "qualified"***603** for noninstitutional care: The State's own professionals determined that community-based treatment would be appropriate for L.C. and E.W., and neither woman opposed such treatment. See *supra,* at 2183. [FN14]

FN13. Georgia law also expresses a preference for treatment in the most integrated setting appropriate. See Ga.Code Ann. § 37-4-121 (1995) ("It is the policy of the state that the least restrictive alternative placement be secured for every client at every stage of his habilitation. It shall be the duty of the facility to assist the client in securing placement in noninstitutional community facilities and programs.").

FN14. We do not in this opinion hold that the ADA imposes on the States a "standard of care" for whatever medical services they render, or that the ADA requires States to "provide a certain level of benefits to individuals with disabilities." Cf. *post,* at 2198 (THOMAS, J., dissenting). We do hold, however, that States must adhere to the ADA's nondiscrimination requirement with regard to the services they in fact provide.

B

The State's responsibility, once it provides community-based treatment to qualified persons with disabilities, is not boundless. The reasonable-modifications regulation speaks of "reasonable modifications" to avoid discrimination, and allows States to resist modifications that entail a "fundamenta[l] alter[ation]" of the States' services and programs. 28 CFR § 35.130(b)(7) (1998). The Court of Appeals construed this regulation to permit a cost-based defense "only in the most limited of circumstances," 138 F.3d, at 902, and remanded to the District Court to consider, among other things, "whether the additional expenditures necessary to treat L.C. and E.W. in community-based care would be unreasonable given the demands of the State's mental health budget," *id.*, at 905.

[8] The Court of Appeals' construction of the reasonable-modifications regulation is unacceptable for it would leave the State virtually defenseless once it is shown that the plaintiff is qualified for the service or program she seeks. If the expense entailed in placing one or two people in a community-based treatment program is properly measured for reasonableness against the State's entire mental health budget, it is unlikely that a State, relying on the fundamental-alteration defense, could ever prevail. See Tr. of Oral Arg. 27 (State's attorney argues that Court of Appeals' understanding of the ***604** fundamental-alteration defense, as expressed in its order to the District Court, "will always preclude the State from a

meaningful defense"); cf. Brief for Petitioners 37-38 (Court of Appeals' remand order "mistakenly****2189** asks the district court to examine [the fundamental-alteration] defense based on the cost of providing community care to just two individuals, not all Georgia citizens who desire community care"); 1:95-cv-1210-MHS (ND Ga., Oct. 20, 1998), p. 3, App. 177 (District Court, on remand, declares the impact of its decision beyond L.C. and E.W. "irrelevant"). Sensibly construed, the fundamental-alteration component of the reasonable-modifications regulation would allow the State to show that, in the allocation of available resources, immediate relief for the plaintiffs would be inequitable, given the responsibility the State has undertaken for the care and treatment of a large and diverse population of persons with mental disabilities.

When it granted summary judgment for plaintiffs in this case, the District Court compared the cost of caring for the plaintiffs in a community-based setting with the cost of caring for them in an institution. That simple comparison showed that community placements cost less than institutional confinements. See App. to Pet. for Cert. 39a. As the United States recognizes, however, a comparison so simple overlooks costs the State cannot avoid; most notably, a "State ... may experience increased overall expenses by funding community placements without being able to take advantage of the savings associated with the closure of institutions." Brief for United States as *Amicus Curiae* 21.[FN15]

> FN15. Even if States eventually were able to close some institutions in response to an increase in the number of community placements, the States would still incur the cost of running partially full institutions in the interim. See Brief for United States as *Amicus Curiae* 21.

As already observed, see *supra*, at 2187-2188, the ADA is not reasonably read to impel States to phase out institutions, placing patients in need of close care at risk. Cf. *post*, at ***605** 2191-2192 (KENNEDY, J., concurring in judgment). Nor is it the ADA's mission to drive States to move institutionalized patients into an inappropriate setting, such as a homeless shelter, a placement the State proposed, then retracted, for E.W. See *supra*, at 2183. Some individuals, like L.C. and E.W. in prior years, may need institutional care from time to time "to stabilize acute psychiatric symptoms." App. 98 (affidavit of Dr. Richard L. Elliott); see 138 F.3d, at 903 ("[T]here may be times [when] a patient can be treated in the community, and others whe[n] an institutional placement is necessary."); Reply Brief 19 (placement in a community-based treatment program does not mean the State will no longer need to retain hospital accommodations for the person so placed). For other individuals, no placement outside the institution may ever be appropriate. See Brief for American Psychiatric Association et al. as *Amici Curiae* 22-23 ("Some individuals, whether mentally retarded or mentally ill, are not prepared at particular times-perhaps in the short run, perhaps in the long run-for the risks and exposure of the less protective environment of community settings"; for these persons, "institutional settings are needed and must remain available."); Brief for Voice of the Retarded et al. as *Amici Curiae* 11 ("Each disabled person is entitled to treatment in the most integrated setting possible for that person-recognizing that, on a case-by-case basis, that setting may be in an institution."); *Youngberg v. Romeo*, 457 U.S. 307, 327, 102 S.Ct. 2452, 73 L.Ed.2d 28 (1982) (Blackmun, J., concurring) ("For many mentally retarded people, the difference between the capacity to do things for themselves within an institution and total dependence on the institution for all of their needs is as much liberty as they ever will know.").

[9] To maintain a range of facilities and to administer services with an even hand, the State must have more leeway than the courts below understood the fundamental-alteration defense to allow. If, for example, the State were to demonstrate that it had a comprehensive, effectively working plan ***606** for placing qualified persons with mental disabilities in less restrictive settings, and a waiting list that moved at a reasonable pace not controlled by the State's endeavors to keep its institutions fully populated, the reasonable-modifications standard would be met. See Tr. of Oral Arg. 5 (State's attorney urges that, "by asking [a] person to wait a short time until a community bed is available, Georgia does not exclude [that] person by ****2190** reason of disability, neither does Georgia discriminate against her by reason of disability"); see also *id.*, at 25 ("[I]t is reasonable for the State to ask someone to wait until a community placement is available."). In such circumstances, a court would have no warrant effectively to order displacement of persons at the top of the community-based treatment waiting list by individuals lower down who com-

menced civil actions.[FN16]

FN16. We reject the Court of Appeals' construction of the reasonable-modifications regulation for another reason. The Attorney General's Title II regulations, Congress ordered, "shall be consistent with" the regulations in part 41 of Title 28 of the Code of Federal Regulations implementing § 504 of the Rehabilitation Act. 42 U.S.C. § 12134(b). The § 504 regulation upon which the reasonable-modifications regulation is based provides now, as it did at the time the ADA was enacted:

> "A recipient shall make reasonable accommodation to the known physical or mental limitations of an otherwise qualified handicapped applicant or employee unless the recipient can demonstrate that the accommodation would impose an undue hardship on the operation of its program." 28 CFR § 41.53 (1990 and 1998 eds.).

While the part 41 regulations do not define "undue hardship," other § 504 regulations make clear that the "undue hardship" inquiry requires not simply an assessment of the cost of the accommodation in relation to the recipient's overall budget, but a "case-by-case analysis weighing factors that include: (1)[t]he overall size of the recipient's program with respect to number of employees, number and type of facilities, and size of budget; (2)[t]he type of the recipient's operation, including the composition and structure of the recipient's workforce; and (3)[t]he nature and cost of the accommodation needed." 28 CFR § 42.511(c) (1998); see 45 CFR § 84.12(c) (1998) (same).

Under the Court of Appeals' restrictive reading, the reasonable-modifications regulation would impose a standard substantially more difficult for the State to meet than the "undue burden" standard imposed by the corresponding § 504 regulation.

***607** * * *

For the reasons stated, we conclude that, under Title II of the ADA, States are required to provide community-based treatment for persons with mental disabilities when the State's treatment professionals determine that such placement is appropriate, the affected persons do not oppose such treatment, and the placement can be reasonably accommodated, taking into account the resources available to the State and the needs of others with mental disabilities. The judgment of the Eleventh Circuit is therefore affirmed in part and vacated in part, and the case is remanded for further proceedings.

It is so ordered.

Justice STEVENS, concurring in part and concurring in the judgment.

Unjustified disparate treatment, in this case, "unjustified institutional isolation," constitutes discrimination under the Americans with Disabilities Act of 1990. See *ante,* at 2187. If a plaintiff requests relief that requires modification of a State's services or programs, the State may assert, as an affirmative defense, that the requested modification would cause a fundamental alteration of a State's services and programs. In this case, the Court of Appeals appropriately remanded for consideration of the State's affirmative defense. On remand, the District Court rejected the State's "fundamental-alteration defense." See *ante,* at 2185, n. 7. If the District Court was wrong in concluding that costs unrelated to the treatment of L.C. and E.W. do not support such a defense in this case, that arguable error should be corrected either by the Court of Appeals or by this Court in review of that decision. In my opinion, therefore, we should simply affirm the judgment of the Court of Appeals. ***608** But because there are not five votes for that disposition, I join the Court's judgment and Parts I, II, and III-A of its opinion. Cf. *Bragdon v. Abbott,* 524 U.S. 624, 655-656, 118 S.Ct. 2196, 141 L.Ed.2d 540 (1998) (STEVENS, J., concurring); *Screws v. United States,* 325 U.S. 91, 134, 65 S.Ct. 1031, 89 L.Ed. 1495 (1945) (Rutledge, J., concurring in result).

Justice KENNEDY, with whom Justice BREYER joins as to Part I, concurring in the judgment.

I

Despite remarkable advances and achievements by medical science, and agreement ****2191** among many professionals that even severe mental illness is often treatable, the extent of public resources to devote

to this cause remains controversial. Knowledgeable professionals tell us that our society, and the governments which reflect its attitudes and preferences, have yet to grasp the potential for treating mental disorders, especially severe mental illness. As a result, necessary resources for the endeavor often are not forthcoming. During the course of a year, about 5.6 million Americans will suffer from severe mental illness. E. Torrey, Out of the Shadows 4 (1997). Some 2.2 million of these persons receive no treatment. *Id.*, at 6. Millions of other Americans suffer from mental disabilities of less serious degree, such as mild depression. These facts are part of the background against which this case arises. In addition, of course, persons with mental disabilities have been subject to historic mistreatment, indifference, and hostility. See, *e.g.*, *Cleburne v. Cleburne Living Center, Inc.*, 473 U.S. 432, 461-464, 105 S.Ct. 3249, 87 L.Ed.2d 313 (1985) (Marshall, J., concurring in judgment in part and dissenting in part) (discussing treatment of the mentally retarded).

Despite these obstacles, the States have acknowledged that the care of the mentally disabled is their special obligation. They operate and support facilities and programs, sometimes elaborate ones, to provide care. It is a continuing***609** challenge, though, to provide the care in an effective and humane way, particularly because societal attitudes and the responses of public authorities have changed from time to time.

Beginning in the 1950's, many victims of severe mental illness were moved out of state-run hospitals, often with benign objectives. According to one estimate, when adjusted for population growth, "the actual decrease in the numbers of people with severe mental illnesses in public psychiatric hospitals between 1955 and 1994 was 92 percent." Brief for American Psychiatric Association et al. as *Amici Curiae* 21, n. 5 (citing Torrey, *supra*, at 8-9). This was not without benefit or justification. The so-called "deinstitutionalization" has permitted a substantial number of mentally disabled persons to receive needed treatment with greater freedom and dignity. It may be, moreover, that those who remain institutionalized are indeed the most severe cases. With reference to this case, as the Court points out, *ante*, at 2183-2184, 2187-2188, it is undisputed that the State's own treating professionals determined that community-based care was medically appropriate for respondents. Nevertheless, the depopulation of state mental hospitals has its dark side. According to one expert:

> "For a substantial minority ... deinstitutionalization has been a psychiatric *Titanic*. Their lives are virtually devoid of 'dignity' or 'integrity of body, mind, and spirit.' 'Self-determination' often means merely that the person has a choice of soup kitchens. The 'least restrictive setting' frequently turns out to be a cardboard box, a jail cell, or a terror-filled existence plagued by both real and imaginary enemies." Torrey, *supra*, at 11.

It must be remembered that for the person with severe mental illness who has no treatment the most dreaded of confinements can be the imprisonment inflicted by his own mind, ***610** which shuts reality out and subjects him to the torment of voices and images beyond our own powers to describe.

It would be unreasonable, it would be a tragic event, then, were the Americans with Disabilities Act of 1990 (ADA) to be interpreted so that States had some incentive, for fear of litigation, to drive those in need of medical care and treatment out of appropriate care and into settings with too little assistance and supervision. The opinion of a responsible treating physician in determining the appropriate conditions for treatment ought to be given the greatest of deference. It is a common phenomenon that a patient functions well with medication, yet, because of the mental illness itself, lacks the discipline or capacity to follow the regime the medication requires. This is illustrative of the factors a responsible physician will consider in recommending the appropriate setting or facility for treatment. Justice GINSBURG's opinion takes account of this background. It is careful, and quite correct, to say that it is not "the ADA's mission to drive States to move institutionalized patients****2192** into an inappropriate setting, such as a homeless shelter...." *Ante*, at 2189.

In light of these concerns, if the principle of liability announced by the Court is not applied with caution and circumspection, States may be pressured into attempting compliance on the cheap, placing marginal patients into integrated settings devoid of the services and attention necessary for their condition. This danger is in addition to the federalism costs inherent in referring state decisions regarding the ad-

ministration of treatment programs and the allocation of resources to the reviewing authority of the federal courts. It is of central importance, then, that courts apply today's decision with great deference to the medical decisions of the responsible, treating physicians and, as the Court makes clear, with appropriate deference to the program funding decisions of state policymakers.

***611** II

With these reservations made explicit, in my view we must remand the case for a determination of the questions the Court poses and for a determination whether respondents can show a violation of 42 U.S.C. § 12132's ban on discrimination based on the summary judgment materials on file or any further pleadings and materials properly allowed.

At the outset it should be noted there is no allegation that Georgia officials acted on the basis of animus or unfair stereotypes regarding the disabled. Underlying much discrimination law is the notion that animus can lead to false and unjustified stereotypes, and vice versa. Of course, the line between animus and stereotype is often indistinct, and it is not always necessary to distinguish between them. Section 12132 can be understood to deem as irrational, and so to prohibit, distinctions by which a class of disabled persons, or some within that class, are, by reason of their disability and without adequate justification, exposed by a state entity to more onerous treatment than a comparison group in the provision of services or the administration of existing programs, or indeed entirely excluded from state programs or facilities. Discrimination under this statute might in principle be shown in the case before us, though further proceedings should be required.

Putting aside issues of animus or unfair stereotype, I agree with Justice THOMAS that on the ordinary interpretation and meaning of the term, one who alleges discrimination must show that she "received differential treatment vis-à-vis members of a different group on the basis of a statutorily described characteristic." *Post,* at 2194 (dissenting opinion). In my view, however, discrimination so defined might be shown here. Although the Court seems to reject Justice THOMAS' definition of discrimination, *ante,* at 2186, it asserts that unnecessary institutional care does lead to "[d]issimilar treatment," *ante,* at 2187. According to the Court, "[i]n order to receive needed medical services, persons with mental disabilities612 must, because of those disabilities, relinquish participation in community life they could enjoy given reasonable accommodations, while persons without mental disabilities can receive the medical services they need without similar sacrifice." *Ibid.*

Although this point is not discussed at length by the Court, it does serve to suggest the theory under which respondents might be subject to discrimination in violation of § 12132. If they could show that persons needing psychiatric or other medical services to treat a mental disability are subject to a more onerous condition than are persons eligible for other existing state medical services, and if removal of the condition would not be a fundamental alteration of a program or require the creation of a new one, then the beginnings of a discrimination case would be established. In terms more specific to this case, if respondents could show that Georgia (i) provides treatment to individuals suffering from medical problems of comparable seriousness, (ii) as a general matter, does so in the most integrated setting appropriate for the treatment of those problems (taking medical and other practical considerations into account), but (iii) without adequate justification, fails to do so for a group of mentally disabled persons (treating them instead in separate, locked institutional facilities), I believe****2193** it would demonstrate discrimination on the basis of mental disability.

Of course, it is a quite different matter to say that a State without a program in place is required to create one. No State has unlimited resources, and each must make hard decisions on how much to allocate to treatment of diseases and disabilities. If, for example, funds for care and treatment of the mentally ill, including the severely mentally ill, are reduced in order to support programs directed to the treatment and care of other disabilities, the decision may be unfortunate. The judgment, however, is a political one and not within the reach of the statute. Grave constitutional concerns are raised when a federal court is given the authority***613** to review the State's choices in basic matters such as establishing or declining to establish new programs. It is not reasonable to read the ADA to permit court intervention in these decisions. In addition, as the Court notes, *ante,* at 2183, by regulation a public entity is required only to make "reasonable modifications in policies, practices, or procedures" when necessary to avoid discrimination and is not

even required to make those if "the modifications would fundamentally alter the nature of the service, program, or activity." 28 CFR § 35.130(b)(7) (1998). It follows that a State may not be forced to create a community-treatment program where none exists. See Brief for United States as *Amicus Curiae* 19-20, and n. 3. Whether a different statutory scheme would exceed constitutional limits need not be addressed.

Discrimination, of course, tends to be an expansive concept and, as legal category, it must be applied with care and prudence. On any reasonable reading of the statute, § 12132 cannot cover all types of differential treatment of disabled and nondisabled persons, no matter how minimal or innocuous. To establish discrimination in the context of this case, and absent a showing of policies motivated by improper animus or stereotypes, it would be necessary to show that a comparable or similarly situated group received differential treatment. Regulations are an important tool in identifying the kinds of contexts, policies, and practices that raise concerns under the ADA. The congressional findings in 42 U.S.C. § 12101 also serve as a useful aid for courts to discern the sorts of discrimination with which Congress was concerned. Indeed, those findings have clear bearing on the issues raised in this case, and support the conclusion that unnecessary institutionalization may be the evidence or the result of the discrimination the ADA prohibits.

Unlike Justice THOMAS, I deem it relevant and instructive that Congress in express terms identified the "isolat[ion] and segregat[ion]" of disabled persons by society as a "for[m] ***614** of discrimination," §§ 12101(a)(2), (5), and noted that discrimination against the disabled "persists in such critical areas as ... institutionalization," § 12101(a)(3). These findings do not show that segregation and institutionalization are always discriminatory or that segregation or institutionalization are, by their nature, forms of prohibited discrimination. Nor do they necessitate a regime in which individual treatment plans are required, as distinguished from broad and reasonable classifications for the provision of health care services. Instead, they underscore Congress' concern that discrimination has been a frequent and pervasive problem in institutional settings and policies and its concern that segregating disabled persons from others can be discriminatory. Both of those concerns are consistent with the normal definition of discrimination-differential treatment of similarly situated groups. The findings inform application of that definition in specific cases, but absent guidance to the contrary, there is no reason to think they displace it. The issue whether respondents have been discriminated against under § 12132 by institutionalized treatment cannot be decided in the abstract, divorced from the facts surrounding treatment programs in their State.

The possibility therefore remains that, on the facts of this case, respondents would be able to support a claim under § 12132 by showing that they have been subject to discrimination by Georgia officials on the basis ****2194** of their disability. This inquiry would not be simple. Comparisons of different medical conditions and the corresponding treatment regimens might be difficult, as would be assessments of the degree of integration of various settings in which medical treatment is offered. For example, the evidence might show that, apart from services for the mentally disabled, medical treatment is rarely offered in a community setting but also is rarely offered in facilities comparable to state mental hospitals. Determining the relevance of that type of evidence would require considerable judgment and analysis.***615** However, as petitioners observe, "[i]n this case, no class of similarly situated individuals was even identified, let alone shown to be given preferential treatment." Brief for Petitioners 21. Without additional information regarding the details of state-provided medical services in Georgia, we cannot address the issue in the way the statute demands. As a consequence, the judgment of the courts below, granting partial summary judgment to respondents, ought not to be sustained. In addition, as Justice GINSBURG's opinion is careful to note, *ante*, at 2189, it was error in the earlier proceedings to restrict the relevance and force of the State's evidence regarding the comparative costs of treatment. The State is entitled to wide discretion in adopting its own systems of cost analysis, and, if it chooses, to allocate health care resources based on fixed and overhead costs for whole institutions and programs. We must be cautious when we seek to infer specific rules limiting States' choices when Congress has used only general language in the controlling statute.

I would remand the case to the Court of Appeals or the District Court for it to determine in the first instance whether a statutory violation is sufficiently alleged and supported in respondents' summary judgment materials and, if not, whether they should be

given leave to replead and to introduce evidence and argument along the lines suggested above.

For these reasons, I concur in the judgment of the Court.

Justice THOMAS, with whom THE CHIEF JUSTICE and Justice SCALIA join, dissenting.

Title II of the Americans with Disabilities Act of 1990 (ADA), 104 Stat. 337, as set forth in 42 U.S.C. § 12132, provides:

> "Subject to the provisions of this subchapter, no qualified individual with a disability shall, *by reason of such disability*, be excluded from participation in or be denied the benefits of the services, programs, or activities ***616** of a public entity, *or be subjected to discrimination* by any such entity." (Emphasis added.)

The majority concludes that petitioners "discriminated" against respondents-as a matter of law-by continuing to treat them in an institutional setting after they became eligible for community placement. I disagree. Temporary exclusion from community placement does not amount to "discrimination" in the traditional sense of the word, nor have respondents shown that petitioners "discriminated" against them "by reason of" their disabilities.

Until today, this Court has never endorsed an interpretation of the term "discrimination" that encompassed disparate treatment among members of the *same* protected class. Discrimination, as typically understood, requires a showing that a claimant received differential treatment vis-à-vis members of a different group on the basis of a statutorily described characteristic. This interpretation comports with dictionary definitions of the term discrimination, which means to "distinguish," to "differentiate," or to make a "distinction in favor of or against, a person or thing based on the group, class, or category to which that person or thing belongs rather than on individual merit." Random House Dictionary 564 (2d ed.1987); see also Webster's Third New International Dictionary 648 (1981) (defining "discrimination" as "the making or perceiving of a distinction or difference" or as "the act, practice, or an instance of discriminating categorically rather than individually").

Our decisions construing various statutory prohibitions against "discrimination" have not wavered from this path. The best place to begin is with Title VII of the Civil Rights Act of 1964, 78 Stat. 253, as amended, the ****2195** paradigmatic anti-discrimination law.[FN1] Title VII makes it "an unlawful employment***617** practice for an employer ... to *discriminate* against any individual with respect to his compensation, terms, conditions, or privileges of employment, because of such individual's race, color, religion, sex, or national origin." 42 U.S.C. § 2000e-2(a)(1) (emphasis added). We have explained that this language is designed "to achieve equality of employment opportunities and remove barriers that have operated in the past to favor an identifiable group of white employees over other employees." *Griggs v. Duke Power Co.*, 401 U.S. 424, 429-430, 91 S.Ct. 849, 28 L.Ed.2d 158 (1971).[FN2]

FN1. We have incorporated Title VII standards of discrimination when interpreting statutes prohibiting other forms of discrimination. For example, Rev. Stat. § 1977, as amended, 42 U.S.C. § 1981, has been interpreted to forbid all racial discrimination in the making of private and public contracts. See *Saint Francis College v. Al-Khazraji*, 481 U.S. 604, 609, 107 S.Ct. 2022, 95 L.Ed.2d 582 (1987). This Court has applied the "framework" developed in Title VII cases to claims brought under this statute. *Patterson v. McLean Credit Union*, 491 U.S. 164, 186, 109 S.Ct. 2363, 105 L.Ed.2d 132 (1989). Also, the Age Discrimination in Employment Act of 1967, 81 Stat. 602, as amended, 29 U.S.C. § 623(a)(1), prohibits discrimination on the basis of an employee's age. This Court has noted that its "interpretation of Title VII ... applies with equal force in the context of age discrimination, for the substantive provisions of the ADEA 'were derived *in haec verba* from Title VII.' " *Trans World Airlines, Inc. v. Thurston*, 469 U.S. 111, 121, 105 S.Ct. 613, 83 L.Ed.2d 523 (1985) (quoting *Lorillard v. Pons*, 434 U.S. 575, 584, 98 S.Ct. 866, 55 L.Ed.2d 40 (1978)). This Court has also looked to its Title VII interpretations of discrimination in illuminating Title IX of the Education Amendments of 1972, 86 Stat. 373, as amended, 20 U.S.C. § 1681 *et seq.*, which prohibits discrimination under any federally funded education program or activity. See

Franklin v. Gwinnett County Public Schools, 503 U.S. 60, 75, 112 S.Ct. 1028, 117 L.Ed.2d 208 (1992) (relying on *Meritor Savings Bank, FSB v. Vinson*, 477 U.S. 57, 106 S.Ct. 2399, 91 L.Ed.2d 49 (1986), a Title VII case, in determining that sexual harassment constitutes discrimination).

FN2. This Court has recognized that two forms of discrimination are prohibited under Title VII: disparate treatment and disparate impact. See *Griggs*, 401 U.S., at 431, 91 S.Ct. 849 ("The Act proscribes not only overt discrimination but also practices that are fair in form, but discriminatory in operation"). Both forms of "discrimination" require a comparison among classes of employees.

Under Title VII, a finding of discrimination requires a comparison of otherwise similarly situated persons who are in different groups by reason of certain characteristics provided by statute. See, *e.g.*, *Newport News Shipbuilding & Dry Dock Co. v. EEOC*, 462 U.S. 669, 683, 103 S.Ct. 2622, 77 L.Ed.2d 89 (1983) (explaining***618** that Title VII discrimination occurs when an employee is treated " 'in a manner which but for that person's sex would be different' ") (quoting *Los Angeles Dept. of Water and Power v. Manhart*, 435 U.S. 702, 711, 98 S.Ct. 1370, 55 L.Ed.2d 657 (1978)). For this reason, we have described as "nonsensical" the comparison of the racial composition of different classes of job categories in determining whether there existed disparate impact discrimination with respect to a particular job category. *Wards Cove Packing Co. v. Atonio*, 490 U.S. 642, 651, 109 S.Ct. 2115, 104 L.Ed.2d 733 (1989).[FN3] Courts interpreting Title VII have held that a plaintiff cannot prove "discrimination" by demonstrating that one member of a particular protected group has been favored over another member of that same group. See, *e.g.*, *Bush v. Commonwealth Edison Co.*, 990 F.2d 928, 931 (C.A.7 1993), cert. denied, 511 U.S. 1071, 114 S.Ct. 1648, 128 L.Ed.2d 367 (1994) (explaining that under Title VII, a fired black employee "had to show that although he was not a good employee, equally bad employees were treated more leniently by [his employer] if they happened not to be black").

FN3. Following *Wards Cove*, Congress enacted the Civil Rights Act of 1991, Pub.L. 102-166, 105 Stat. 1071, as amended, which, *inter alia*, altered the burden of proof with respect to a disparate impact discrimination claim. See *id.*, § 105 (codified at 42 U.S.C. § 2000e-2(k)). This change highlights the principle that a departure from the traditional understanding of discrimination requires congressional action. Cf. *Field v. Mans*, 516 U.S. 59, 69-70, 116 S.Ct. 437, 133 L.Ed.2d 351 (1995) (Congress legislates against the background rule of the common law and traditional notions of lawful conduct).

Our cases interpreting § 504 of the Rehabilitation Act of 1973, 87 Stat. 394, as amended, which prohibits "discrimination" against ****2196** certain individuals with disabilities, have applied this commonly understood meaning of discrimination. Section 504 provides:

> "No otherwise qualified handicapped individual ... shall, solely by reason of his handicap, be excluded from the participation in, be denied the benefits of, or be subjected***619** to discrimination under any program or activity receiving Federal financial assistance."

In keeping with the traditional paradigm, we have always limited the application of the term "discrimination" in the Rehabilitation Act to a person who is a member of a protected group and faces discrimination "by reason of his handicap." Indeed, we previously rejected the argument that § 504 requires the type of "affirmative efforts to overcome the disabilities caused by handicaps," *Southeastern Community College v. Davis*, 442 U.S. 397, 410, 99 S.Ct. 2361, 60 L.Ed.2d 980 (1979), that the majority appears to endorse today. Instead, we found that § 504 required merely "the evenhanded treatment of handicapped persons" relative to those persons who do not have disabilities. *Ibid.* Our conclusion was informed by the fact that some provisions of the Rehabilitation Act envision "affirmative action" on behalf of those individuals with disabilities, but § 504 itself "does not refer at all" to such action. *Ibid.* Therefore, "[a] comparison of these provisions demonstrates that Congress understood accommodation of the needs of handicapped individuals may require affirmative action and knew how to provide for it in those instances where it wished to do so." *Id.*, at 411, 99 S.Ct. 2361.

Similarly, in *Alexander v. Choate*, 469 U.S. 287,

302, 105 S.Ct. 712, 83 L.Ed.2d 661 (1985), we found no discrimination under § 504 with respect to a limit on inpatient hospital care that was "neutral on its face" and did not "distinguish between those whose coverage will be reduced and those whose coverage will not on the basis of any test, judgment, or trait that the handicapped as a class are less capable of meeting or less likely of having," *id.*, at 302, 105 S.Ct. 712. We said that § 504 does "not ... guarantee the handicapped equal results from the provision of state Medicaid, even assuming some measure of equality of health could be constructed." *Id.*, at 304, 105 S.Ct. 712.

Likewise, in *Traynor v. Turnage*, 485 U.S. 535, 548, 108 S.Ct. 1372, 99 L.Ed.2d 618 (1988), we reiterated that the purpose of § 504 is to guarantee that individuals with disabilities receive "evenhanded treatment" ***620** relative to those persons without disabilities. In *Traynor*, the Court upheld a Veterans' Administration regulation that excluded "primary alcoholics" from a benefit that was extended to persons disabled by alcoholism related to a mental disorder. *Id.*, at 551, 108 S.Ct. 1372. In so doing, the Court noted that "[t]his litigation does not involve a program or activity that is alleged to treat handicapped persons less favorably than nonhandicapped persons." *Id.*, at 548, 108 S.Ct. 1372. Given the theory of the case, the Court explicitly held: "There is nothing in the Rehabilitation Act that requires that any benefit extended to one category of handicapped persons also be extended to all other categories of handicapped persons." *Id.*, at 549, 108 S.Ct. 1372.

This same understanding of discrimination also informs this Court's constitutional interpretation of the term. See *General Motors Corp. v. Tracy*, 519 U.S. 278, 298, 117 S.Ct. 811, 136 L.Ed.2d 761 (1997) (noting with respect to interpreting the Commerce Clause, "[c]onceptually, of course, any notion of discrimination assumes a comparison of substantially similar entities"); *Yick Wo v. Hopkins*, 118 U.S. 356, 374, 6 S.Ct. 1064, 30 L.Ed. 220 (1886) (condemning under the Fourteenth Amendment "illegal discriminations between persons in similar circumstances"); see also *Adarand Constructors, Inc. v. Peña*, 515 U.S. 200, 223-224, 115 S.Ct. 2097, 132 L.Ed.2d 158 (1995); *Richmond v. J.A. Croson Co.*, 488 U.S. 469, 493-494, 109 S.Ct. 706, 102 L.Ed.2d 854 (1989) (plurality opinion).

Despite this traditional understanding, the majority derives a more "comprehensive" definition of "discrimination," as that term is used in Title II of the ADA, one that includes "institutional isolation of persons with disabilities." *Ante*, at 2187. It chiefly relies on certain congressional findings contained ****2197** within the ADA. To be sure, those findings appear to equate institutional isolation with segregation, and thereby discrimination. See *ibid.* (quoting §§ 12101(a)(2) and 12101(a)(5), both of which explicitly identify "segregation" of persons with disabilities as a form of "discrimination"); see also *ante*, at 2181-2182. The congressional findings, however, are written in general, hortatory terms and provide***621** little guidance to the interpretation of the specific language of § 12132. See *National Organization for Women, Inc. v. Scheidler*, 510 U.S. 249, 260, 114 S.Ct. 798, 127 L.Ed.2d 99 (1994) ("We also think that the quoted statement of congressional findings is a rather thin reed upon which to base a requirement"). In my view, the vague congressional findings upon which the majority relies simply do not suffice to show that Congress sought to overturn a well-established understanding of a statutory term (here, "discrimination").[FN4] Moreover, the majority fails to explain why terms in the findings should be given a medical content, pertaining to the place where a mentally retarded person is treated. When read in context, the findings instead suggest that terms such as "segregation" were used in a more general sense, pertaining to matters such as access to employment, facilities, and transportation. Absent a clear directive to the contrary, we must read "discrimination" in light of the common understanding of the term. We cannot expand the meaning of the term "discrimination" in order to invalidate policies we may find unfortunate. Cf. *NLRB v. Highland Park Mfg. Co.*, 341 U.S. 322, 325, 71 S.Ct. 758, 95 L.Ed. 969 (1951) (explaining that if Congress intended statutory terms "to have other than their ordinarily accepted meaning, ***622** it would and should have given them a special meaning by definition"). [FN5]

FN4. If such general hortatory language is sufficient, it is puzzling that this or any other court did not reach the same conclusion long ago by reference to the general purpose language of the Rehabilitation Act itself. See 29 U.S.C. § 701 (1988 ed.) (describing the statute's purpose as "to develop and implement, through research, training, services, and the guarantee of equal opportunity, comprehensive and coordinated programs of vocational

rehabilitation and independent living, for individuals with handicaps *in order to maximize their employability, independence, and integration* into the workplace and the community" (emphasis added)). Further, this section has since been amended to proclaim in even more aspirational terms that the policy under the statute is driven by, *inter alia*, "respect for individual dignity, personal responsibility, self-determination, and pursuit of meaningful careers, based on informed choice, of individuals with disabilities," "respect for the privacy, rights, and equal access," and "inclusion, integration, and full participation of the individuals." 29 U.S.C. §§ 701(c)(1)-(3).

FN5. Given my conclusion, the Court need not review the integration regulation promulgated by the Attorney General. See 28 CFR § 35.130(d) (1998). Deference to a regulation is appropriate only " 'if Congress has not expressed its intent with respect to the question, and then only if the administrative interpretation is reasonable.' " *Reno v. Bossier Parish School Bd.*, 520 U.S. 471, 483, 117 S.Ct. 1491, 137 L.Ed.2d 730 (1997) (quoting *Presley v. Etowah County Comm'n*, 502 U.S. 491, 508, 112 S.Ct. 820, 117 L.Ed.2d 51 (1992)). Here, Congress has expressed its intent in § 12132, and the Attorney General's regulation-insofar as it contradicts the settled meaning of the statutory term-cannot prevail against it. See *NLRB v. Town & Country Elec., Inc.*, 516 U.S. 85, 94, 116 S.Ct. 450, 133 L.Ed.2d 371 (1995) (explaining that courts interpreting a term within a statute "must infer, unless the statute otherwise dictates, that Congress means to incorporate the established meaning of that term" (internal quotation marks omitted).

Elsewhere in the ADA, Congress chose to alter the traditional definition of discrimination. Title I of the ADA, § 12112(b)(1), defines discrimination to include "limiting, segregating, or classifying a job applicant or employee in a way that adversely affects the opportunities or status of such applicant or employee." Notably, however, Congress did not provide that this definition of discrimination, unlike other aspects of the ADA, applies to Title II. Ordinary canons of construction require that we respect the limited applicability of this definition of "discrimination" and not import it into other parts of the law where Congress did not see fit. See, *e.g.*, *Bates v. United States*, 522 U.S. 23, 29-30, 118 S.Ct. 285, 139 L.Ed.2d 215 (1997) (" 'Where Congress includes particular language in one section of a statute but omits it in another section of the same Act, it is generally presumed that Congress acts intentionally and purposely in the disparate inclusion or exclusion' ") (quoting ****2198***Russello v. United States*, 464 U.S. 16, 23, 104 S.Ct. 296, 78 L.Ed.2d 17 (1983)). The majority's definition of discrimination-although not specifically delineated-substantially imports the definition of Title I into Title II by necessarily assuming that it is sufficient to focus exclusively on members of one particular ***623** group. Under this view, discrimination occurs when some members of a protected group are treated differently from other members of that same group. As the preceding discussion emphasizes, absent a special definition supplied by Congress, this conclusion is a remarkable and novel proposition that finds no support in our decisions in analogous areas. For example, the majority's conclusion that petitioners "discriminated" against respondents is the equivalent to finding discrimination under Title VII where a black employee with deficient management skills is denied in-house training by his employer (allegedly because of lack of funding) because other similarly situated black employees are given the in-house training. Such a claim would fly in the face of our prior case law, which requires more than the assertion that a person belongs to a protected group and did not receive some benefit. See, *e.g.*, *Griggs*, 401 U.S., at 430-431, 91 S.Ct. 849 ("Congress did not intend by Title VII, however, to guarantee a job to every person regardless of qualifications. In short, the Act does not command that any person be hired simply because he was formerly the subject of discrimination, or because he is a member of a minority group").

At bottom, the type of claim approved of by the majority does not concern a prohibition against certain conduct (the traditional understanding of discrimination), but rather concerns imposition of a standard of care. FN6 As such, the majority***624** can offer no principle limiting this new species of "discrimination" claim apart from an affirmative defense because it looks merely to an individual in isolation, without comparing him to otherwise similarly situated persons, and determines that discrimination occurs

merely because that individual does not receive the treatment he wishes to receive. By adopting such a broad view of discrimination, the majority drains the term of any meaning other than as a proxy for decisions disapproved of by this Court.

> FN6. In mandating that government agencies minimize the institutional isolation of disabled individuals, the majority appears to appropriate the concept of "mainstreaming" from the Individuals with Disabilities Education Act (IDEA), 84 Stat. 175, as amended, 20 U.S.C. § 1400 *et seq.* But IDEA is not an antidiscrimination law. It is a grant program that affirmatively requires States accepting federal funds to provide disabled children with a "free appropriate public education" and to establish "procedures to assure that, to the maximum extent appropriate, children with disabilities ... are educated with children who are not disabled." §§ 1412(1), (5). Ironically, even under this broad affirmative mandate, we previously rejected a claim that IDEA required the "standard of care" analysis adopted by the majority today. See *Board of Ed. of Hendrick Hudson Central School Dist., Westchester Cty. v. Rowley*, 458 U.S. 176, 198, 102 S.Ct. 3034, 73 L.Ed.2d 690 (1982) ("We think ... that the requirement that a State provide specialized educational services to handicapped children generates no additional requirement that the services so provided be sufficient to maximize each child's potential commensurate with the opportunity provided other children" (internal quotation marks omitted)).

Further, I fear that the majority's approach imposes significant federalism costs, directing States how to make decisions about their delivery of public services. We previously have recognized that constitutional principles of federalism erect limits on the Federal Government's ability to direct state officers or to interfere with the functions of state governments. See, *e.g.*, *Printz v. United States*, 521 U.S. 898, 117 S.Ct. 2365, 138 L.Ed.2d 914 (1997); *New York v. United States*, 505 U.S. 144, 112 S.Ct. 2408, 120 L.Ed.2d 120 (1992). We have suggested that these principles specifically apply to whether States are required to provide a certain level of benefits to individuals with disabilities. As noted in *Alexander*, in rejecting a similar theory under § 504 of the Rehabilitation Act: "[N]othing ... suggests that Congress desired to make major inroads on the States' longstanding discretion to choose the proper mix of amount, scope, and duration limitations on services ...." 469 U.S., at 307, 105 S.Ct. 712. See also *Bowen v. American Hospital Assn.*, 476 U.S. 610, 642, 106 S.Ct. 2101, 90 L.Ed.2d 584 (1986) (plurality opinion) ("[N]othing in [§ 504] authorizes [the Secretary****2199** of Health and Human Services (HHS)] to commandeer state agencies .... [These] agencies are ***625** not field offices of the HHS bureaucracy, and they may not be conscripted against their will as the foot soldiers in a federal crusade"). The majority's affirmative defense will likely come as cold comfort to the States that will now be forced to defend themselves in federal court every time resources prevent the immediate placement of a qualified individual. In keeping with our traditional deference in this area, see *Alexander*, *supra*, the appropriate course would be to respect the States' historical role as the dominant authority responsible for providing services to individuals with disabilities.

The majority may remark that it actually does properly compare members of different groups. Indeed, the majority mentions in passing the "[d]issimilar treatment" of persons with and without disabilities. *Ante*, at 2187. It does so in the context of supporting its conclusion that institutional isolation is a form of discrimination. It cites two cases as standing for the unremarkable proposition that discrimination leads to deleterious stereotyping, *ibid.* (citing *Allen v. Wright*, 468 U.S. 737, 755, 104 S.Ct. 3315, 82 L.Ed.2d 556 (1984); *Manhart*, 435 U.S., at 707, n. 13, 98 S.Ct. 1370), and an *amicus* brief which indicates that confinement diminishes certain everyday life activities, *ante*, at 2187 (citing Brief for American Psychiatric Association et al. as *Amici Curiae* 20-22). The majority then observes that persons without disabilities "can receive the services they need without" institutionalization and thereby avoid these twin deleterious effects. *Ante*, at 2187. I do not quarrel with the two general propositions, but I fail to see how they assist in resolving the issue before the Court. Further, the majority neither specifies what services persons with disabilities might need nor contends that persons without disabilities need the same services as those with disabilities, leading to the inference that the dissimilar treatment the majority observes results merely from the fact that different classes of persons receive different services-not from "discrimination" as tradi-

tionally defined.

***626** Finally, it is also clear petitioners did not "discriminate" against respondents "by reason of [their] disabili[ties]," as § 12132 requires. We have previously interpreted the phrase "by reason of" as requiring proximate causation. See, *e.g.*, *Holmes v. Securities Investor Protection Corporation*, 503 U.S. 258, 265-266, 112 S.Ct. 1311, 117 L.Ed.2d 532 (1992); see also *id.*, at 266, n. 11, 112 S.Ct. 1311 (citation of cases). Such an interpretation is in keeping with the vernacular understanding of the phrase. See American Heritage Dictionary 1506 (3d ed.1992) (defining "by reason of" as "because of"). This statute should be read as requiring proximate causation as well. Respondents do not contend that their disabilities constituted the proximate cause for their exclusion. Nor could they-community placement simply is not available to those without disabilities. Continued institutional treatment of persons who, though now deemed treatable in a community placement, must wait their turn for placement does not establish that the denial of community placement occurred "by reason of" their disability. Rather, it establishes no more than the fact that petitioners have limited resources.

* * *

For the foregoing reasons, I respectfully dissent.

Supreme Court of the United States
PRINCE
v.
COMMONWEALTH OF MASSACHUSETTS.

No. 98.
Argued Dec. 14, 1943.
Decided Jan. 31, 1944.
Rehearing Denied Mar. 27, 1944. See 321 U.S. 804, 64 S.Ct. 784.

Sarah Prince was convicted of furnishing an infant with magazines knowing she would sell them unlawfully on the street and of permitting such infant to work contrary to law, 313 Mass. 223, 46 N.E.2d 755, and she appeals.

Affirmed.

Mr. Justice JACKSON, Mr. Justice ROBERTS, Mr. Justice FRANKFURTER, and Mr. Justice MURPHY, dissenting.

A state statute forbidding boys under 12 and girls under 18 to sell magazines, etc., in street or public places and penalizing the furnishing of such minors magazines, etc., with knowledge of minor's intent to sell them in street or public place, and penalizing parent, custodian, etc., who permits such minors to sell magazines, etc., in street or public place, is not unconstitutional as denying or abridging "freedom of religion" or denying "equal protection of the laws" as applied to member of a religious sect who furnished religious periodicals to minor girl who was under custody of member, and permitted girl to sell and distribute periodicals on the streets. G.L.(Ter.Ed.) Mass. c. 149, § 69 as amended by St.1939, c. 461, § 7; §§ 80, 81; U.S.C.A.Const. Amends. 1, 14.

****438 *159** Appeal from the Superior Court of Massachusetts, Plymouth County.****439** Mr. Hayden C. Covington, of Brooklyn, N.Y., for appellant.

Mr. R. T. Bushnell, of Boston, Mass., for appellee.

Mr. Justice RUTLEDGE delivered the opinion of the Court.

The case brings for review another episode in the conflict between Jehovah's Witnesses and state authority. This time Sarah Prince appeals from convictions for violating Massachusetts' child labor laws, by acts said to be a rightful exercise of her religious convictions.

When the offenses were committed she was the aunt and custodian of Betty M. Simmons, a girl nine years of age. Originally there were three separate complaints. They ***160** were, shortly, for (1) refusal to

disclose Betty's identity and age to a public officer whose duty was to enforce the statutes; (2) furnishing her with magazines, knowing she was to sell them unlawfully, that is, on the street; and (3) as Betty's custodian, permitting her to work contrary to law. The complaints were made, respectively, pursuant to Sections 79, 80 and 81 of Chapter 149, Gen.Laws of Mass. (Ter.Ed.). The Supreme Judicial Court reversed the conviction under the first complaint on state grounds;[FN1] but sustained the judgments founded on the other two. [FN2] 313 Mass. 223, 46 N.E.2d 755. They present the only questions for our decision. These are whether Sections 80 and 81, as applied, contravene the Fourteenth Amendment by denying or abridging appellant's freedom of religion and by denying to her the equal protection of the laws.

FN1 The court found there was no evidence that appellant was asked Betty's age. It then held that conviction for refusal to disclose the child's name, based on the charge under Section 79, would violate Article 12 of the Declaration of Rights of the Commonwealth, which provides in part: 'No subject shall be held to answer for any crimes or offence, until the same is fully and plainly, substantially and formally, described to him; or be compelled to accuse, or furnish evidence against himself.'

FN2 Appellant received moderate fines on each complaint, first in the District Court of Brockton, then on pleas of not guilty by trial de novo without a jury in the Superior Court for Plymouth County. Motions to dismiss and quash the complaints, for directed findings, and for rulings, were made seasonably and denied by the Superior Court.

Sections 80 and 81 form parts of Massachusetts' comprehensive child labor law. [FN3] They provide methods for enforcing the prohibitions of Section 69, which is as follows:

FN3 Mass.Gen. Laws, Ter.Ed., c. 149, as amended by Acts and Resolves of 1939, c. 461.

'No boy under twelve and no girl under eighteen shall sell, expose or offer for sale any newspapers, magazines, periodicals or any other articles of merchandise of any ***161** description, or exercise the trade of bootblack or scavenger, or any other trade, in any street or public place.'

Section 80 and 81, so far as pertinent, read:

'Whoever furnishes or sells to any minor any article of any description with the knowledge that the minor intends to sell such article in violation of any provision of sections sixty-nine to seventy-three, inclusive, or after having received written notice to this effect from any officer charged with the enforcement thereof, or knowingly procures or encourages any minor to violate any provisions of said sections, shall be punished by a fine of not less than ten nor more than two hundred dollars or by imprisonment for not more than two months, or both.' (Section 80)

'Any parent, guardian or custodian having a minor under his control who compels or permits such minor to work in violation of any provision of sections sixty to seventy-four, inclusive, * * * shall for a first offence be punished by a fine of not less than two nor more than ten dollars or by imprisonment for not more than ****440** five days, or both; * * *.' (Section 81)

The story told by the evidence has become familiar. It hardly needs repeating, except to give setting to the variations introduced through the part played by a child of tender years. Mrs. Prince, living in Brockton, is the mother of two young sons. She also has legal custody of Betty Simmons who lives with them. The children too are Jehovah's Witnesses and both Mrs. Prince and Betty testified they were ordained ministers. The former was accustomed to go each week on the streets of Brockton to distribute 'Watchtower' and 'Consolation,' according to the usual plan.[FN4] She had permitted the children to ***162** engage in this activity previously, and had been warned against doing so by the school attendance officer, Mr. Perkins. But, until December 18, 1941, she generally did not take them with her at night.

FN4 Cf. the facts as set forth in Jamison v. Texas, 318 U.S. 413, 63 S.Ct. 669; Largent v. Texas, 318 U.S. 418, 63 S.Ct. 667; Murdock v. Pennsylvania, 319 U.S. 105, 63 S.Ct. 870, 87 L.Ed. 1292, 146 A.L.R. 82; Busey v. District of Columbia, 75 U.S.App.D.C. 352, 129 F.2d 24. A common feature is that specified small sums are generally asked and

received but the publications may be had without the payment if so desired.

That evening, as Mrs. Prince was preparing to leave her home, the children asked to go. She at first refused. Childlike, they resorted to tears and, motherlike, she yielded. Arriving downtown, Mrs. Prince permitted the children 'to engage in the preaching work with her upon the sidewalks.' That is, with specific reference to Betty, she and Mrs. Prince took positions about twenty feet apart near a street intersection. Betty held up in her hand, for passersby to see, copies of 'Watch Tower' and 'Consolation.' From her shoulder hung the usual canvas magazine bag, on which was printed 'Watchtower and Consolation 5¢ per copy.' No one accepted a copy from Betty that evening and she received no money. Nor did her aunt. But on other occasions, Betty had received funds and given out copies.

Mrs. Prince and Betty remained until 8:45 p.m. A few minutes before this Mr. Perkins approached Mrs. Prince. A discussion ensued. He inquired and she refused to give Betty's name. However, she stated the child attended the Shaw School. Mr. Perkins referred to his previous warnings and said he would allow five minutes for them to get off the street. Mrs. Prince admitted she supplied Betty with the magazines and said, '(N)either you nor anybody else can stop me * * *. This child is exercising her God-given right and her constitutional right to preach the gospel, and no creature has a right to interfere with God's commands.' However, Mrs. Prince and Betty departed. She remarked as she went, 'I'm not going through this any more. We've been through it time and time again. I'm going home and put the little girl to bed.' It may be added that testimony, by Betty, her aunt and others, was offered at the trials, and was excluded,***163** to show that Betty believed it was her religious duty to perform this work and failure would bring condemnation 'to everlasting destruction at Armageddon.'

[1] As the case reaches us, the questions are no longer open whether what the child did was a 'sale' or an 'offer to sell' within Section 69[FN5] or was 'work' within Section 81. The state court's decision has foreclosed them adversely to appellant as a matter of state law.[FN6] The only question ****441** remaining therefore is whether, as construed and applied, the statute is valid. Upon this the court said: 'We think that freedom of the press and of religion is subject to incidental regulation to the slight degree involved in the prohibition of the selling of religious literature in streets and public places by boys under twelve and girls under eighteen and in the further statutory provisions herein considered, which have been adopted as a means of enforcing ***164** that prohibition.' 313 Mass. 223, 229, 46 N.E.2d 755, 758.

FN5 In this respect the Massachusetts decision is contrary to the trend in other states. Compare State v. Mead, 230 Iowa 1217, 300 N.W. 523; State v. Meredith, 197 S.C. 351, 15 S.E.2d 678; State ex rel. Semansky v. Stark, 196 La. 307, 199 So. 129; City of Shreveport v. Teague, 200 La. 679, 8 So.2d 640; People v. Barber, 289 N.Y. 378, 46 N.E.2d 329; Thomas v. City of Atlanta, 59 Ga.App. 520, 1 S.E.2d 598; City of Cincinnati v. Mosier, 61 Ohio App. 81, 22 N.E.2d 418. Contra: McSparran v. City of Portland (Circuit Court, Multnomah County, Oregon, June 8, 1942), appeal dismissed, 169 Or. 377, 129 P.2d 65, certiorari denied, 318 U.S. 768, 63 S.Ct. 759.

FN6 The court's opinion said: 'The judge could find that if a passerby should hand over five cents in accordance with the sign on the bag and should receive a magazine in return, a sale would be effected. The judge was not required to accept the defendant's characterization of that transaction as a 'contribution.' He could believe that selling the literature played a more prominent part in the enterprise than giving it way. He could find that the defendant furnished the magazines to Betty, knowing that the latter intended to sell them, if she could, in violation of section 69. * * * The judge could find that the defendant permitted Betty to 'work' in violation of section 81. * * * (W)e cannot say that the evils at which the statutes were directed attendant upon the selling by children of newspapers, magazines, periodicals, and other merchandise in streets and public places do not exist where the publications are of a religious nature.' 313 Mass. 223, 227, 228, 46 N.E.2d 755, 757.

Appellant does not stand on freedom of the press. Regarding it as secular, she concedes it may be re-

stricted as Massachusetts has done.[FN7] Hence, she rests squarely on freedom of religion under the First Amendment, applied by the Fourteenth to the states. She buttresses this foundation, however, with a claim of parental right as secured by the due process clause of the latter Amendment.[FN8] Cf. Meyer v. Nebraska, 262 U.S. 390, 43 S.Ct. 625, 67 L.Ed. 1042, 29 A.L.R. 1446. These guaranties, she thinks, guard alike herself and the child in what they have done. Thus, two claimed liberties are at stake. One is the parent's, to bring up the child in the way he should go, which for appellant means to teach him the tenets and the practices of their faith. The other freedom is the child's, to observe these; and among them is 'to preach the gospel * * * by public distribution' of 'Watchtower' and 'Consolation,' in conformity with the scripture: 'A little child shall lead them.'

FN7 Appellant's brief says: 'The purpose of the legislation is to protect children from economic exploitation and keep them from the evils of such enterprises that contribute to the degradation of children.' And at the argument counsel stated the prohibition would be valid as against a claim of freedom of the press as a nonreligious activity.

FN8 The due process claim, as made and perhaps necessarily, extends no further than that to freedom of religion, since in the circumstances all that is comprehended in the former is included in the latter.

If by this position appellant seeks for freedom of conscience a broader protection than for freedom of the mind, it may be doubted that any of the great liberties insured by the First Article can be given higher place than the others. All have preferred position in our basic scheme. Schneider v. State, 308 U.S. 147, 60 S.Ct. 146, 84 L.Ed. 155; Cantwell v. Connecticut, 310 U.S. 296, 60 S.Ct. 900, 84 L.Ed. 1213, 128 A.L.R. 1352. All are interwoven there together. Differences there are, in them and in the modes appropriate for their exercise. But they have unity in the charter's prime place because they have unity in their human sources and ***165** functionings. Heart and mind are not identical. Intuitive faith and reasoned judgment are not the same. Spirit is not always thought. But in the everyday business of living, secular or otherwise, these variant aspects of personality find inseparable expression in a thousand ways. They cannot be altogether parted in law more than in life.

To make accommodation between these freedoms and an exercise of state authority always is delicate. It hardly could be more so than in such a clash as this case presents. On one side is the obviously earnest claim for freedom of conscience and religious practice. With it is allied the parent's claim to authority in her own household and in the rearing of her children. The parent's conflict with the state over control of the child and his training is serious enough when only secular matters are concerned. It becomes the more so when an element of religious conviction enters. Against these sacred private interests, basic in a democracy, stand the interests of society to protect the welfare of children, and the state's assertion of authority to that end, made here in a manner ****442** conceded valid if only secular things were involved. The last is no mere corporate concern of official authority. It is the interest of youth itself, and of the whole community, that children be both safeguarded from abuses and given opportunities for growth into free and independent well-developed men and citizens. Between contrary pulls of such weight, the safest and most objective recourse is to the lines already marked out, not precisely but for guides, in narrowing the no man's land where this battle has gone on.

[2] The rights of children to exercise their religion, and of parents to give them religious training and to encourage them in the practice of religious belief, as against preponderant sentiment and assertion of state power voicing it, have had recognition here, most recently in ***166**West Virginia State Board of Education v. Barnette, 319 U.S. 624, 63 S.Ct. 1178. Previously in Pierce v. Society of Sisters, 268 U.S. 510, 45 S.Ct. 571, 69 L.Ed. 1070, 39 A.L.R. 468, this Court had sustained the parent's authority to provide religious with secular schooling, and the child's right to receive it, as against the state's requirement of attendance at public schools. And in Meyer v. Nebraska, 262 U.S. 390, 43 S.Ct. 625, 67 L.Ed. 1042, 29 A.L.R. 1446, children's rights to receive teaching in languages other than the nation's common tongue were guarded against the state's encroachment. It is cardinal with us that the custody, care and nurture of the child reside first in the parents, whose primary function and freedom include preparation for obligations the state can neither supply nor hinder. Pierce v. Society of Sisters, supra. And it is in recognition of this that these decisions have respected the private realm of family

life which the state cannot enter.

[3][4][5][6][7] But the family itself is not beyond regulation in the public interest, as against a claim of religious liberty. Reynolds v. United States, 98 U.S. 145, 25 L.Ed. 244; Davis v. Beason, 133 U.S. 333, 10 S.Ct. 299, 33 L.Ed. 637. And neither rights of religion nor rights of parenthood are beyond limitation. Acting to guard the general interest in youth's well being, the state as parens patriae may restrict the parent's control by requiring school attendance,[FN9] regulating or prohibiting the child's labor,[FN10] and in many other ways.[FN11] Its authority is not nullified merely because the parent grounds his claim to control the child's course of conduct on religion or conscience. Thus, he cannot claim freedom from compulsory vaccination for the child more than for himself on religious grounds.[FN12] The right to practice religion freely does not include liberty to expose the community or the child ***167** to communicable disease or the latter to ill health or death. People v. Pierson, 176 N.Y. 201, 68 N.E. 243, 63 L.R.A. 187, 98 Am.St.Rep. 666.[FN13] The catalogue need not be lengthened. It is sufficient to show what indeed appellant hardly disputes, that the state has a wide range of power for limiting parental freedom and authority in things affecting the child's welfare; and that this includes, to some extent, matters of conscience and religious conviction.

FN9 State v. Bailey, 157 Ind. 324, 61 N.E. 730, 59 L.R.A. 435; compare Meyer v. Nebraska, 262 U.S. 390, 43 S.Ct. 625, 67 L.Ed. 1042, 29 A.L.R. 1446; Pierce v. FN10 Sturges & Burn Mfg. Co. v. Beauchamp, 231 U.S. 320, 34 S.Ct. 60, 58 L.Ed. 245, L.R.A.1915A, 1196; compare Muller v. Oregon, 208 U.S. 412, 28 S.Ct. 324, 52 L.Ed. 551, 13 Ann.Cas. 957.

FN11 Cf. People v. Ewer, 141 N.Y. 129, 36 N.E. 4, 25 L.R.A. 794, 38 Am.St.Rep. 788.

FN12 Jacobson v. Massachusetts, 197 U.S. 11, 25 S.Ct. 358, 49 L.Ed. 643, 3 Ann.Cas. 765.

FN13 See also State v. Chenoweth, 163 Ind. 94, 71 N.E. 197; Owens v. State, 6 Okl.Cr. 110, 116 P. 345, 36 L.R.A.,N.S., 633, Ann.Cas.1913B, 1218.

But it is said the state cannot do so here. This, first, because when state action impinges upon a claimed religious freedom, it must fall unless shown to be necessary for or conducive to the child's protection against some clear and present danger, cf. Schenck v. United States, 249 U.S. 47, 39 S.Ct. 247, 63 L.Ed. 470; and, it is added, there was no such showing here. The child's presence on the street, with her ****443** guardian, distributing or offering to distribute the magazines, it is urged, was in no way harmful to her, nor in any event more so than the presence of many other children at the same time and place, engaged in shopping and other activities not prohibited. Accordingly, in view of the preferred position the freedoms of the First Article occupy, the statute in its present application must fall. It cannot be sustained by any presumption of validity. Cf. Schneider v. State, 308 U.S. 147, 60 S.Ct. 146, 84 L.Ed. 155. And, finally, it is said, the statute is, as to children, an absolute prohibition, not merely a reasonable regulation, of the denounced activity.

Concededly a statute or ordinance identical in terms with Section 69, except that it is applicable to adults or all persons generally, would be invalid. Young v. California, 308 U.S. 147, 60 S.Ct. 146, 84 L.Ed. 155; Nichols v. Massachusetts, 308 U.S. 147, 60 S.Ct. 146, 84 L.Ed. 155; Jamison v. Texas, 318 U.S. 413, 63 S.Ct. 669; Murdock v. Pennsylvania, 319 U.S. 105, 63 S.Ct. 870, 87 L.Ed. 1292, 146 A.L.R. 82; Martin v. City of Struthers, 319 U.S. 141, 63 S.Ct. 862, 87 L.Ed. 1313.[FN14] ***168** But the mere fact a state could not wholly prohibit this form of adult activity, whether characterized locally as a ‘sale’ or otherwise, does not mean it cannot do so for children. Such a conclusion granted would mean that a state could impose no greater limitation upon child labor than upon adult labor. Or, if an adult were free to enter dance halls, saloons, and disreputable places generally, in order to discharge his conceived religious duty to admonish or dissuade persons from frequenting such places, so would be a child with similar convictions and objectives, if not alone then in the parent's company, against the state's command.

FN14 Pertinent also are the decisions in-

volving license features: Lovell v. City of Griffin, 303 U.S. 444, 58 S.Ct. 666, 82 L.Ed. 949; Schneider v. State, 308 U.S. 147, 60 S.Ct. 146, 84 L.Ed. 155; Hague v. Committee for Industrial Organization, 307 U.S. 496, 59 S.Ct. 954, 83 L.Ed. 1423.

[8][9] The state's authority over children's activities is broader than over like actions of adults. This is peculiarly true of public activities and an matters of employment. A democratic society rests, for its continuance, upon the healthy, well-rounded growth of young people into full maturity as citizens, with all that implies. It may secure this against impeding restraints and dangers, within a broad range of selection. Among evils most appropriate for such action are the crippling effects of child employment,[FN15] more especially in public places, and the possible harms arising from other activities subject to all the diverse influences of the street.[FN16] It is too late now to doubt ***169** that legislation appropriately designed to reach such evils is within the state's police power, whether against the parents claim to control of the child or one that religious scruples dictate contrary action.

FN15 See, e.g., Volumes 1-4, 6-8, 14, 18, Report on Condition of Woman and Child Wage Earners in the United States, Sen. Doc. No. 645, 61st Cong., 2d Sess.; The Working Children of Boston, U.S. Dept. of Labor, Children's Bureau Publication No. 89 (1922); Fuller, The Meaning of Child Labor (1922); Fuller and Strong, Child Labor in Massachusetts (1926).

FN16 See, e.g., Clopper, Child Labor in City Streets (1912); Children in Street Work, U.S. Dept. of Labor, Children's Bureau Publication No. 183 (1928); Children Engaged in Newspaper and Magazine Selling and Delivering, U.S. Dept. of Labor, Children's Bureau Publication No. 227 (1935).

[10] It is true children have rights, in common with older people, in the primary use of highways. But even in such use streets afford dangers for them not affecting adults. And in other uses, whether in work or in other things, this difference may be magnified. This is so not only when children are unaccompanied but certainly to some extent when they are with their parents. What may be wholly permissible for adults therefore may not be so for children, either with or without their parents' presence.

[11][12] Street preaching, whether oral or by handing out literature, is not the primary use of the highway, even for adults. ****444** While for them it cannot be wholly prohibited, it can be regulated within reasonable limits in accommodation to the primary and other incidental uses.[FN17] But, for obvious reasons, notwithstanding appellant's contrary view,[FN18] the validity of such a prohibition applied to children not accompanied by an older person hardly would seem open to question. The case reduces itself therefore to the question whether the presence of the child's guardian puts a limit to the state's power. That fact may lessen the likelihood that some evils the legislation seeks to avert will occur. But it cannot forestall all of them. The zealous though lawful exercise of the right to engage in propagandizing the community, whether in religious, political or other matters, may and at times does create situations***170** difficult enough for adults to cope with and wholly inappropriate for children, especially of tender years, to face. Other harmful possibilities could be stated, of emotional excitement and psychological or physical injury. Parents may be free to become martyrs themselves. But it does not follow they are free, in identical circumstances, to make martyrs of their children before they have reached the age of full and legal discretion when they can make that choice for themselves. Massachusetts has determined that an absolute prohibition, though one limited to streets and public places and to the incidental uses proscribed, is necessary to accomplish its legitimate objectives. Its power to attain them is broad enough to reach these peripheral instances in which the parent's supervision may reduce but cannot eliminate entirely the ill effects of the prohibited conduct. We think that with reference to the public proclaiming of religion, upon the streets and in other similar public places, the power of the state to control the conduct of children reaches beyond the scope of its authority over adults, as is true in the case of other freedoms, and the rightful boundary of its power has not been crossed in this case.

FN17 Cox v. New Hampshire, 312 U.S. 569, 61 S.Ct. 762, 85 L.Ed. 1049, 133 A.L.R. 1396; Chaplinsky v. New Hampshire, 315 U.S. 568, 62 S.Ct. 766, 86 L.Ed. 1031.

FN18 Although the argument points to the

> guardian's presence as showing the child's activities here were not harmful, it is nowhere conceded in the briefs that the statute could be applied, consistently with the guaranty of religious freedom, if the facts had been altered only by the guardian's absence.

In so ruling we dispose also of appellant's argument founded upon denial of equal protection. It falls with that based on denial of religious freedom, since in this instance the one is but another phrasing of the other. Shortly, the contention is that the street, for Jehovah's Witnesses and their children, is their church, since their conviction makes it so; and to deny them access to it for religious purposes as was done here has the same effect as excluding altar boys, youthful choristers, and other children from the edifices in which they practice their religious beliefs and worship. The argument hardly needs more than statement, after what has been said, to refute it. However Jehovah's Witnesses may conceive them, the public highways have not become their religious property***171** merely by their assertion. And there is no denial of equal protection in excluding their children from doing there what no other children may do.

Our ruling does not extend beyond the facts the case presents. We neither lay the foundation 'for any (that is, every) state intervention in the indoctrination and participation of children in religion' which may be done 'in the name of their health and welfare' nor give warrant for 'every limitation on their religious training and activities.' The religious training and indoctrination of children may be accomplished in many ways, some of which, as we have noted, have received constitutional protection through decisions of this Court. These and all others except the public proclaiming of religion on the streets, if this may be taken as either training or indoctrination of the proclaimer, remain unaffected by the decision.

The judgment is affirmed.

Affirmed.

Mr. Justice JACKSON.

***176** The novel feature of this decision is this: the Court holds that a state may apply child ****445** labor laws to restrict or prohibit an activity of which, as recently as last term, it held: 'This form of religious activity occupies the same high estate under the First Amendment as do worship in the churches and preaching from the pulpits. It has the same claim to protection as the more orthodox and conventional exercises of religion.' '* * * the mere fact that the religious literature is 'sold' by itinerant preachers rather than 'donated' does not transform evangelism into a commercial enterprise. If it did, then the passing of the collection plate in church would make the church service a commercial project. The constitutional rights of those spreading their religious beliefs through the spoken ***177** and printed word are not to be gauged by standards governing retailers or wholesalers of books.' Murdock v. Pennsylvania, 319 U.S. 105, 109, 111, 63 S.Ct. 870, 873, 874, 87 L.Ed. 1292, 146 A.L.R. 82.

It is difficult for me to believe that going upon the streets to accost the public is the same thing for application of public law as withdrawing to a private structure for religious worship. But if worship in the churches and the activity of Jehovah's Witnesses on the streets 'occupy the same high estate' and have the 'same claim to protection' it would seem that child labor laws may be applied to both if to either. If the Murdock doctrine stands along with today's decision, a foundation is laid for any state intervention in the indoctrination and participation of children in religion, provided it is done in the name of their health or welfare.

This case brings to the surface the real basis of disagreement among members of this Court in previous Jehovah's Witness cases. Murdock v. Pennsylvania, 319 U.S. 105, 63 S.Ct. 870, 87 L.Ed. 1292, 146 A.L.R. 82; Martin v. Struthers, 319 U.S. 141, 63 S.Ct. 862, 87 L.Ed. 1313; Jones v. Opelika, 316 U.S. 584, 86 L.Ed. 1691, 141 A.L.R. 514; Id., 319 U.S. 103, 63 S.Ct. 890, 87 L.Ed. 1290; Douglas v. Jeannette, 319 U.S. 157, 63 S.Ct. 877, 882, 87 L.Ed. 1324. Our basic difference seems to be as to the method of establishing limitations which of necessity bound religious freedom.

My own view may be shortly put: I think the limits begin to operate whenever activities begin to affect or collide with liberties of others or of the public. Religious activities which concern only members of the faith are and ought to be free-as nearly absolutely free as anything can be. But beyond these, many religious denominations or sects engage in collateral

and secular activities intended to obtain means from unbelievers to sustain the worshippers and their leaders. They raise money, not merely by passing the plate to those who voluntarily attend services or by contributions by their own people, but by solicitations and drives addressed to the public by holding public dinners and entertainments, by various kinds ***178** of sales and Bingo games and lotteries. All such money-raising activities on a public scale are, I think, Caesar's affairs and may be regulated by the state so long as it does not discriminate against one because he is doing them for a religious purpose, and the regulation is not arbitrary and capricious, in violation of other provisions of the Constitution.

The Court in the Murdock case rejected this principle of separating immune religious activities from secular ones in declaring the disabilities which the Constitution imposed on local authorities. Instead, the Court now draws a line based on age that cuts across both true exercise of religion and auxiliary secular activities. I think this is not a correct principle for defining the activities immune from regulation on grounds of religion, and Murdock overrules the grounds on which I think affirmance should rest. I have no alternative but to dissent from the grounds of affirmance of a judgment which I think was rightly decided, and upon right grounds, by the Supreme Judicial Court of Massachusetts. 313 Mass. 223, 46 N.E.2d 755.

Mr. Justice ROBERTS and Mr. Justice FRANKFURTER join in this opinion.

Mr. Justice MURPHY, dissenting.

This attempt by the state of Massachusetts to prohibit a child from exercising her constitutional right to practice her religion on the public streets cannot, in my opinion, be sustained.

The record makes clear the basic fact that Betty Simmons, the nine-year old child in question, was engaged in a genuine religious, rather than commercial, activity. ****446** She was a member of Jehovah's Witnesses and had been taught the tenets of that sect by her guardian, the appellant. Such tenets included the duty of publicly distributing religious tracts on the street and from door to door. Pursuant to this religious duty and in the company of the appellant, Betty Simmons on the night of December 18, 1941, was standing on a public street corner and offering to distribute Jehovah's Witness literature to passersby. There was no expectation of pecuniary profit to ***172** herself or to appellant. It is undisputed, furthermore, that she did this of her own desire and with appellant's consent. She testified that she was motivated by her love of the Lord and that He commanded her to distribute this literature; this was, she declared, her way of worshipping God. She was occupied, in other words, in 'an age-old form of missionary evangelism' with a purpose 'as evangelical as the revival meeting.' Murdock v. Pennsylvania, 319 U.S. 105, 108, 109, 63 S.Ct. 870, 872, 873, 87 L.Ed. 1292, 146 A.L.R. 82.

Religious training and activity, whether performed by adult or child, are protected by the Fourteenth Amendment against interference by state action, except insofar as they violate reasonable regulations adopted for the protection of the public health, morals and welfare. Our problem here is whether a state, under the guise of enforcing its child labor laws, can lawfully prohibit girls under the age of eighteen and boys under the age of twelve from practicing their religious faith insofar as it involves the distribution or sale of religious tracts on the public streets. No question of freedom of speech or freedom of press is present and we are not called upon to determine the permissible restraints on those rights. Nor are any truancy or curfew restrictions in issue. The statutes in question prohibit all children within the specified age limits from selling or offering to sell 'any newspapers, magazines, periodicals or any other articles of merchandise of any description * * * in any street or public place.' Criminal sanctions are imposed on the parents and guardians who compel or permit minors in their control to engage in the prohibited transactions. The state court has construed these statutes to cover the activities here involved, cf. State v. Richardson, 92 N.H. 178, 27 A.2d 94, thereby imposing an indirect restraint through the parents and guardians on the free exercise by minors of their religious beliefs. This indirect restraint is no less effective than a direct one. A square conflict between the constitutional***173** guarantee of religious freedom and the state's legitimate interest in protecting the welfare of its children is thus presented.

As the opinion of the Court demonstrates, the power of the state lawfully to control the religious and other activities of children is greater than its power over similar activities of adults. But that fact is no

more decisive of the issue posed by this case than is the obvious fact that the family itself is subject to reasonable regulation in the public interest. We are concerned solely with the reasonableness of this particular prohibition of religious activity by children.

In dealing with the validity of statutes which directly or indirectly infringe religious freedom and the right of parents to encourage their children in the practice of a religious belief, we are not aided by any strong presumption of the constitutionality of such legislation. United States v. Carolene Products Co., 304 U.S. 144, 152, 58 S.Ct. 778, 783, 82 L.Ed. 1234, note 4. On the contrary, the human freedoms enumerated in the First Amendment and carried over into the Fourteenth Amendment are to be presumed to be invulnerable and any attempt to sweep away those freedoms is prima facie invalid. It follows that any restriction or prohibition must be justified by those who deny that the freedoms have been unlawfully invaded. The burden was therefore on the state of Massachusetts to prove the reasonableness and necessity of prohibiting children from engaging in religious activity of the type involved in this case.

The burden in this instance, however, is not met by vague references to the reasonableness underlying child labor legislation in general. The great interest of the state in shielding minors from the evil vicissitudes of early life does not warrant every limitation on their religious training and activities. The reasonableness that justifies the prohibition of the ordinary distribution of literature in the public streets by children is not necessarily the rea***174** sonableness****447** that justifies such a drastic restriction when the distribution is part of their religious faith. Murdock v. Pennsylvania, supra, 319 U.S. 111, 63 S.Ct. 874, 87 L.Ed. 1292, 146 A.L.R. 82. If the right of a child to practice its religion in that manner is to be forbidden by constitutional means, there must be convincing proof that such a practice constitutes a grave and immediate danger to the state or to the health, morals or welfare of the child. West Virginia State Board of Education v. Barnette, 319 U.S. 624, 639, 63 S.Ct. 1178, 1186. The vital freedom of religion, which is 'of the very essence of a scheme of ordered liberty,' Palko v. Connecticut, 302 U.S. 319, 325, 58 S.Ct. 149, 152, 82 L.Ed. 288, cannot be erased by slender references to the state's power to restrict the more secular activities of children.

The state, in my opinion, has completely failed to sustain its burden of proving the existence of any grave or immediate danger to any interest which it may lawfully protect. There is no proof that Betty Simmons' mode of worship constituted a serious menace to the public. It was carried on in an orderly, lawful manner at a public street corner. And 'one who is rightfully on a street which the state has left open to the public carries with him there as elsewhere the constitutional right to express his views in an orderly fashion. This right extends to the communication of ideas by handbills and literature as well as by the spoken word.' Jamison v. Texas, 318 U.S. 413, 416, 63 S.Ct. 669, 672. The sidewalk, no less than the cathedral or the evangelist's tent, is a proper place, under the Constitution, for the orderly worship of God. Such use of the streets is as necessary to the Jehovah's Witnesses, the Salvation Army and others who practice religion without benefit of conventional shelters as is the use of the streets for purposes of passage.

It is claimed, however, that such activity was likely to affect adversely the health, morals and welfare of the child. Reference is made in the majority opinion to 'the crippling effects of child employment, more especially in public***175** places, and the possible harms arising from other activities subject to all the diverse influences of the street.' To the extent that they flow from participation in ordinary commercial activities, these harms are irrelevant to this case. And the bare possibility that such harms might emanate from distribution of religious literature is not, standing alone, sufficient justification for restricting freedom of conscience and religion. Nor can parents or guardians be subjected to criminal liability because of vague possibilities that their religious teachings might cause injury to the child. The evils must be grave, immediate, substantial. Cf. Bridges v. California, 314 U.S. 252, 262, 62 S.Ct. 190, 193, 86 L.Ed. 192. Yet there is not the slightest indication in this record, or in sources subject to judicial notice, that children engaged in distributing literature pursuant to their religious beliefs have been or are likely to be subject to any of the harmful 'diverse influences of the street.' Indeed, if probabilities are to be indulged in, the likelihood is that children engaged in serious religious endeavor are immune from such influences. Gambling, truancy, irregular eating and sleeping habits, and the more serious vices are not consistent with the high moral character ordinarily displayed by children fulfilling religious obligations. Moreover, Jehovah's Witness

children invariably make their distributions in groups subject at all times to adult or parental control, as was done in this case. The dangers are thus exceedingly remote, to say the least. And the fact that the zealous exercise of the right to propagandize the community may result in violent or disorderly situations difficult for children to face is no excuse for prohibiting the exercise of that right.

No chapter in human history has been so largely written in terms of persecution and intolerance as the one dealing with religious freedom. From ancient times to the present day, the ingenuity of man has known no limits in its ability to forge weapons of oppression for use against those who dare to express or practice unorthodox religious beliefs. And the Jehovah's Witnesses are living proof of the fact that even in this nation, conceived as it was in the ideals of freedom, the right to practice religion in unconventional ways is still far from secure. Theirs is a militant and unpopular faith, pursued with a fanatical zeal. They have suffered brutal beatings; their property has been destroyed; they have been harassed at every turn by the resurrection and enforcement ****448** of little used ordinances and statutes. See Mulder and Comisky, 'Jehovah's Witnesses Mold Constitutional Law,' 2 Bill of Rights Review, No. 4, p. 262. To them, along with other present-day religious minorities, befalls the burden of testing our devotion to the ideals and constitutional guarantees of religious freedom. We should therefore hesitate before approving the application of a statute that might be used as another instrument of oppression. Religious freedom is too sacred a right to be restricted or prohibited in any degree without convincing proof that a legitimate interest of the state is in grave danger.

U.S. 1944.
Prince v. Massachusetts
321 U.S. 158, 64 S.Ct. 438, 88 L.Ed. 645

END OF DOCUMENT

Supreme Court of the United States
SCHOOL BOARD OF NASSAU COUNTY, FLORIDA and Craig Marsh, Individually and as Superintendent of Schools of Nassau County, Florida
v.
Gene H. ARLINE.

No. 85-1277.
Argued Dec. 3, 1986.
Decided March 3, 1987.
Rehearing Denied April 20, 1987.
See 481 U.S. 1024, 107 S.Ct. 1913.

A school teacher, who was fired from her job solely because of her susceptibility to tuberculosis, brought an action alleging that her dismissal violated the Rehabilitation Act. The United States District Court for the Middle District of Florida, John H. Moore, II, J., entered judgment for the school board and superintendent. The teacher appealed. The Court of Appeals, Eleventh Circuit, 772 F.2d 759, reversed and remanded. Certiorari was granted. The Supreme Court, Justice Brennan, J., held that school teacher afflicted with contagious disease of tuberculosis was a "handicapped individual" within meaning of Rehabilitation Act section prohibiting federally funded state program from discriminating against handicapped individual solely by reason of handicap.

Affirmed.

Chief Justice Rehnquist filed a dissenting opinion in which Justice Scalia joined.

A person suffering from contagious disease of tuberculosis can be a handicapped person within meaning of Rehabilitation Act. Rehabilitation Act of 1973, § 504, as amended, 29 U.S.C.A. § 794.

*****1123 *273** *Syllabus* [FN*]

FN* The syllabus constitutes no part of the opinion of the Court but has been prepared by the Reporter of Decisions for the convenience of the reader. See *United States v. Detroit Lumber Co.*, 200 U.S. 321, 337, 26 S.Ct. 282, 287, 50 L.Ed. 499.

Section 504 of the Rehabilitation Act of 1973, 29 U.S.C. § 794 (Act), provides, *inter alia*, that no "otherwise qualified handicapped individual," as defined in 29 U.S.C. § 706(7), shall, solely by reason of his handicap, be excluded from participation in any program receiving federal financial assistance. Section 706(7)(B) defines "handicapped individual" to mean any person who "(i) has a physical ... impairment which substantially limits one or more of [his] major life activities, (ii) has a record of such an impairment, or (iii) is regarded as ****1124** having such an impairment." Department of Health and Human Services (HHS) regulations define "physical impairment" to mean, *inter alia*, any physiological disorder affecting the respiratory system, and define "major life activities" to include working. Respondent was hospitalized for tuberculosis in 1957. The disease went into remission for the next 20 years, during which time respondent began teaching elementary school in Florida. In 1977, March 1978, and November 1978, respondent had relapses, after the latter two of which she was suspended with pay for the rest of the school year. At the end of the 1978-1979 school year, petitioners discharged her after a hearing because of the continued recurrence of tuberculosis. After she was denied relief in state administrative proceedings, she brought suit in Federal District Court, alleging a violation of § 504. The District Court held that she was not a "handicapped person" under the Act, but that, even assuming she were, she was not "qualified" to teach elementary school. The Court of Appeals reversed, holding that persons with contagious diseases are within § 504's coverage, and remanded for further findings as to whether respondent was "otherwise qualified" for her job.

Held:

1. A person afflicted with the contagious disease of tuberculosis may be a "handicapped individual" within the meaning of § 504. Pp. 1127-1130.

(a) Respondent is a "handicapped individual" as defined in § 706(7)(B) and the HHS regulations. Her hospitalization in 1957, for a disease that affected her respiratory system, and that substantially limited "one or more of [her] major life activities," establishes that she has a "record of ... impairment." Pp. 1127-1128.

***274** (b) The fact that a person with a record of impairment is also contagious does not remove that person from § 504's coverage. To allow an employer to justify discrimination by distinguishing between a disease's contagious effects on others and its physical effects on a patient would be unfair, would be contrary to § 706(7)(B)(iii) and the legislative history, which demonstrate Congress' concern about an impairment's effect on others, and would be inconsistent with § 504's basic purpose to ensure that handicapped individuals are not denied jobs because of the prejudice or ignorance of others. The Act replaces such fearful, reflexive reactions with actions based on reasoned and medically sound judgments as to whether contagious handicapped persons are "otherwise qualified" to do the job. Pp. 1127-1130.

2. In most cases, in order to determine whether a person handicapped by contagious disease is "otherwise qualified" under § 504, the district court must conduct an individualized inquiry and make appropriate findings of fact, based on reasonable medical judgments given the state of medical knowledge, about (a) the nature of the risk (*e.g.*, how the disease is transmitted), (b) the duration of the risk (how long is the carrier infectious), (c) the severity of the risk (what is the potential harm to third parties), and (d) the probabilities the disease will be transmitted and will cause varying degrees of harm. In making these findings, courts normally should defer to the reason-

able medical judgments of public health officials. Courts must then determine, in light of these findings, whether any "reasonable accommodation" can be made by the employer under the established standards for that inquiry. Pp. 1130-1132.

3. Because the District Court did not make appropriate findings, it is impossible for this Court to determine whether respondent is "otherwise qualified" for the job of elementary school teacher, and the case is remanded for additional findings of fact. Pp. 1131-1134.

772 F.2d 759 (CA 11 1985), affirmed.

BRENNAN, J., delivered the opinion of the Court, in which WHITE, MARSHALL, BLACKMUN, POWELL, STEVENS, and O'CONNOR, JJ., joined. REHNQUIST, C.J., filed a dissenting opinion, in which SCALIA, J., joined, *post*, p. ----.
Brian T. Hayes argued the cause for petitioners. With him on the briefs was *John D. Carlson.*

Solicitor General Fried argued the cause for the United States as *amicus curiae* urging reversal. With him on the brief were *Assistant Attorney General Reynolds, Deputy* ****275*** *Solicitor General Ayer, Deputy Assistant Attorney General Carvin, Richard J. Lazarus,* and *Mark L. Gross.*

George K. Rahdert argued the cause for respondent. With him on the brief was *Steven H. Malone*.*

* Briefs of *amici curiae* urging reversal were filed for the Equal Employment Advisory Council by *Robert E. Williams, Douglas S. McDowell,* and *Thomas R. Bagby;* and for Congressman William E. Dannemeyer et al. by *William E. Dannemeyer, pro se.*

Briefs of *amici curiae* urging affirmance were filed for the Association for Retarded Citizens of the United States et al. by *Thomas K. Gilhool, Michael Churchill, Frank J. Laski, Timothy M. Cook, Stanley S. Herr,* and *Donald S. Goldman;* and for the Employment Law Center et al. by *Robert E. Borton.*

Briefs of *amici curiae* were filed for the State of California et al. by *John K. Van de Kamp,* Attorney General, *Andrea Sheridan Ordin,* Chief Assistant Attorney General, and *Marian M. Johnston* and *Anne Jennings,* Deputy Attorneys General, and by the Attorneys General for their respective States as follows: *Steven H. Sachs* of Maryland, *Frank J. Kelley* of Michigan, *Hubert H. Humphrey III* of Minnesota, *W. Cary Edwards* of New Jersey, *Robert Abrams* of New York, and *Bronson C. La Follette* of Wisconsin; for the American Medical Association by *Benjamin W. Heineman, Jr.*, and *Carter G. Phillips;* for the American Public Health Association et al. by *Nan D. Hunter* and *Herbert Semmel;* for Doctors for AIDS Research and Education by *Stanley Fleish;man, Joseph Lawrence, Susan D. McGreivy,* and *Paul Hoffman;* for the Epilepsy Foundation of America by *Alexandra K. Finucane;* for the National School Boards Association by *Gwendolyn H. Gregory, August W. Steinhilber,* and *Thomas A. Shannon;* and for Senator Cranston et al. by *Arlene Mayerson.*

****1125** Justice BRENNAN delivered the opinion of the Court.

Section 504 of the Rehabilitation Act of 1973, 87 Stat. 394, as amended, 29 U.S.C. § 794 (Act), prohibits a federally funded state program from discriminating against a handicapped individual solely by reason of his or her handicap. This case presents the questions whether a person afflicted with tuberculosis, a contagious disease, may be considered a "handicapped individual" within the meaning of § 504 of the Act, and, if so, whether such an individual is "otherwise qualified" to teach elementary school.

***276** I

From 1966 until 1979, respondent Gene Arline taught elementary school in Nassau County, Florida. She was discharged in 1979 after suffering a third relapse of tuberculosis within two years. After she was denied relief in state administrative proceedings, she brought suit in federal court, alleging that the school board's decision to dismiss her because of her tuberculosis violated § 504 of the Act.[FN1]

FN1. Respondent also sought relief under 42 U.S.C. § 1983, alleging that the board denied her due process of law. Both the District Court and the Court of Appeals rejected this argument, and respondent did not present the issue to this Court.

A trial was held in the District Court, at which the principal medical evidence was provided by Marianne McEuen, M.D., an assistant director of the Commu-

nity Tuberculosis Control Service of the Florida Department of Health and Rehabilitative Services. According to the medical records reviewed by Dr. McEuen, Arline was hospitalized for tuberculosis in 1957. App. 11-12. For the next 20 years, Arline's disease was in remission. *Id.*, at 32. Then, in 1977, a culture revealed that tuberculosis was again active in her system; cultures taken in March 1978 and in November 1978 were also positive. *Id.*, at 12.

The superintendent of schools for Nassau County, Craig Marsh, then testified as to the school board's response to Arline's medical reports. After both her second relapse, in the spring of 1978, and her third relapse in November 1978, the school board suspended Arline with pay for the remainder of the school year. *Id.*, at 49-51. At the end of the 1978-1979 school year, the school board held a hearing, after which it discharged Arline, "not because she had done anything wrong," but because of the "continued reoccurence [*sic*] of tuberculosis." *Id.*, at 49-52.

In her trial memorandum, Arline argued that it was "not disputed that the [school board dismissed her] solely on the basis of her illness. Since the illness in this case qualifies the ***277** Plaintiff as a 'handicapped person' it is clear that she was dismissed solely as a result of her handicap in violation of Section 504." Record 119. The District Court held, however, that although there was "[n]o question that she suffers a handicap," Arline was nevertheless not "a handicapped person under the terms of that statute." App. to Pet. for Cert. C-2. The court found it "difficult ... to conceive that Congress intended contagious diseases to be included within the definition of a handicapped person." The court then went on to state that, "even assuming" that a person with a contagious disease could be deemed a handicapped person, Arline was not "qualified" to teach elementary school. *Id.*, at C-2-C-3.

The Court of Appeals reversed, holding that "persons with contagious diseases are within the coverage of section 504," and that Arline's condition "falls ... neatly within the statutory and regulatory framework" of the Act. 772 F.2d 759, 764 (CA11 1985). The court remanded the case "for further findings as to whether the risks of ****1126** infection precluded Mrs. Arline from being 'otherwise qualified' for her job and, if so, whether it was possible to make some reasonable accommodation for her in that teaching position" or in some other position. *Id.*, at 765 (footnote omitted). We granted certiorari, 475 U.S. 1118, 106 S.Ct. 1633, 90 L.Ed.2d 179 (1986), and now affirm.

II

In enacting and amending the Act, Congress enlisted all programs receiving federal funds in an effort "to share with handicapped Americans the opportunities for an education, transportation, housing, health care, and jobs that other Americans take for granted." 123 Cong.Rec. 13515 (1977) (statement of Sen. Humphrey). To that end, Congress not only increased federal support for vocational rehabilitation, but also addressed the broader problem of discrimination against the handicapped by including § 504, an anti-discrimination provision patterned after Title VI of the Civil Rights ***278** Act of 1964.[FN2] Section 504 of the Rehabilitation Act reads in pertinent part:

> FN2. Congress' decision to pattern § 504 after Title VI is evident in the language of the statute, compare 29 U.S.C. § 794 with 42 U.S.C. § 2000d, and in the legislative history of § 504, see, *e.g.*, S.Rep. No. 93-1297, pp. 39-40 (1974), U.S.Code Cong. & Admin.News 1974, p. 6373; S.Rep. No. 95-890, p. 19 (1978). Cf. TenBroek & Matson, The Disabled and the Law of Welfare, 54 Cal.L.Rev. 809, 814-815, and nn. 21-22 (1966) (discussing theory and evidence that "negative attitudes and practices toward the disabled resemble those commonly attached to "underprivileged ethnic and religious minority groups' "). The range of programs subject to § 504's prohibition is broader, however, than that covered by Title VI, because § 504 covers employment discrimination even in programs that receive federal aid with a primary objective other than the promotion of employment. See *Consolidated Rail Corporation v. Darrone*, 465 U.S. 624, 104 S.Ct. 1248, 79 L.Ed.2d 568 (1984); Note, Accommodating the Handicapped: Rehabilitating Section 504 after *Southeastern*, 80 Colum.L.Rev. 171, 174-175, and n. 21 (1980).

"No otherwise qualified handicapped individual in the United States, as defined in section 706(7) of this title, shall, solely by reason of his handicap, be

excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance...." 29 U.S.C. § 794.

In 1974 Congress expanded the definition of "handicapped individual" for use in § 504 to read as follows: [FN3]

> FN3. The primary focus of the 1973 Act was to increase federal support for vocational rehabilitation; the Act's original definition of the term "handicapped individual" reflected this focus by including only those whose disability limited their employability, and those who could be expected to benefit from vocational rehabilitation. After reviewing the Department of Health, Education, and Welfare's subsequent attempt to devise regulations to implement the Act, however, Congress concluded that the definition of "handicapped individual," while appropriate for the vocational rehabilitation provisions in Titles I and III of the Act, was too narrow to deal with the range of discriminatory practices in housing, education, and health care programs which stemmed from stereotypical attitudes and ignorance about the handicapped. S.Rep. No. 93-1297, at 16, 37-38, 50.

***279** "[A]ny person who (i) has a physical or mental impairment which substantially limits one or more of such person's major life activities, (ii) has a record of such an impairment, or (iii) is regarded as having such an impairment." 29 U.S.C. § 706(7)(B). The amended definition reflected Congress' concern with protecting the handicapped against discrimination stemming not only from simple prejudice, but also from "archaic attitudes and laws" and from "the fact that the American people are simply unfamiliar with and insensitive to the difficulties confront [ing] individuals with handicaps." S.Rep. No. 93-1297, p. 50 (1974), U.S.Code Cong. & Admin.News 1974, p. 6400. To combat the effects of erroneous but nevertheless prevalent perceptions about the handicapped, Congress expanded the definition of "handicapped individual" so as to preclude discrimination against "[a] person who has a record of, or is regarded as having, an impairment [but who] may at present have no actual incapacity at all." ****1127** *Southeastern Community College v. Davis*, 442 U.S. 397, 405-406, n. 6, 99 S.Ct. 2361, 2366-2367, n. 6, 60 L.Ed.2d 980 (1979).[FN4]

> FN4. See *id.*, at 39 ("This subsection includes within the protection of sections 503 and 504 those persons who do not in fact have the condition which they are perceived as having, as well as those persons whose mental or physical condition does not substantially limit their life activities and who thus are not technically within clause (A) in the new definition. Members of both of these groups may be subjected to discrimination on the basis of their being regarded as handicapped"); *id.*, at 37-39, 63-64; see also 120 Cong.Rec. 30531 (1974) (statement of Sen. Cranston).

In determining whether a particular individual is handicapped as defined by the Act, the regulations promulgated by the Department of Health and Human Services are of significant assistance. As we have previously recognized, these regulations were drafted with the oversight and approval of Congress, see *Consolidated Rail Corporation v. Darrone*, 465 U.S. 624, 634-635, and nn. 14-16, 104 S.Ct. 1248, 1254-1255, and nn. 14-16, 79 L.Ed.2d 568 (1984); they provide "an important source of guidance on the meaning of § 504." *Alexander v. Choate*, 469 U.S. 287, 304, n. 24, 105 S.Ct. 712, 722, n. 24, 83 L.Ed.2d 661 (1985). The ***280** regulations are particularly significant here because they define two critical terms used in the statutory definition of handicapped individual.[FN5] "Physical impairment" is defined as follows:

> FN5. In an appendix to these regulations, the Department of Health and Human Services explained that it chose not to attempt to "set forth a list of specific diseases and conditions that constitute physical or mental impairments because of the difficulty of ensuring the comprehensiveness of any such list." 45 CFR pt. 84, Appendix A, p. 310 (1985). Nevertheless, the Department went on to state that "such diseases and conditions as orthopedic, visual, speech, and hearing impairments, cerebral palsy, epilepsy, muscular dystrophy, multiple sclerosis, cancer, heart disease, diabetes, mental retardation, [and] emotional illness" would be covered. *Ibid.*

> The Department also reinforced what a careful reading of the statute makes plain, "that a physical or mental impairment does not constitute a handicap for purposes of section 504 unless its severity is such that it results in a substantial limitation of one or more major life activities." *Ibid.* Although many of the comments on the regulations when first proposed suggested that the definition was unreasonably broad, the Department found that a broad definition, one not limited to so-called "traditional handicaps," is inherent in the statutory definition. *Ibid.*

"[A]ny physiological disorder or condition, cosmetic disfigurement, or anatomical loss affecting one or more of the following body systems: neurological; musculoskeletal; special sense organs; respiratory, including speech organs; cardiovascular; reproductive, digestive, genito-urinary; hemic and lymphatic; skin; and endocrine." 45 CFR § 84.3(j)(2)(i) (1985).
In addition, the regulations define "major life activities" as
