Was your facilities parking lot(s) swept and pollutant free since your last inspection?	✓			
Is your facility reasonably clean and free of litter and debris?	✓			
Is landscaped area irrigation contained within the landscaped area?	✓			
Are storm drains stenciled? If no, contact Storm Water Pollution Prevention Division for stencils and paint.	✓			
Are storm drain inlets reasonably clean and free of debris?	✓			
Did the storm drains need cleaning during this inspection period?			✓	**Date cleaned:**
Is area absent of any evidence of a discharge, spill, and or leak?	✓			
If an observed spill entered the storm drain system, was the spill reported to the Storm Water Hotline?			✓	**If no, report to the Storm Water Hotline: (619) 235-1000**
If spill was observed, was spill considered minor?			✓	**If spill, follow chemical release reporting procedures.**
TRASH STORAGE AREAS				
Is area reasonably clean and uncluttered?	✓			
Are trash cans and garbage bins kept covered?	✓			Some covered
Is the number and placement of the trash cans sufficient for your facility?	✓			

***Any boxes checked "NO" must be resolved in the comments and/additional comments section.**
****N/A = Not Applicable**

III. General Site Conditions and Runoff Management Practices Inspection (Continued)

	Yes	No*	N/A**	Comments
FUELING AREAS				
Is a stocked spill kit available at fuel island?			✓	
Is area clean and free of spills?			✓	**If spill is observed, clean up using dry methods.**
VEHICLE AND EQUIPMENT MAINTENANCE AREA				
Is work area reasonably clean?			✓	
Are drip pans readily available for leaking vehicles?			✓	
Are spill containment materials and stocked cleanup kit readily available?			✓	
Are maintenance activities contained within the designed area?			✓	
Are bulk hazardous materials/liquids stored outside in secondary containment?			✓	
MATERIALS LOADING AND UNLOADING STORAGE AREAS				
Is area reasonably clean and free of litter, debris and loose material?	✓			
Is material storage area covered?	✓			
Are materials and stocked cleanup kits readily available?	✓			
If outdoors, is water from surrounding areas prevented from reaching material storage areas?			✓	
Are bulk hazardous material/liquids stored outside in secondary containment?			✓	

IV. Supervisory Responsibilites

	Yes	No*	N/A**	Comments
SUPERVISOR RECORDKEEPING				
Were storm drains inspected after each special event (75 or more people)?	✓			
Were parking lots swept during this inspection period?	✓			**Date swept:** 1/2/08
Were employee storm water training records (tailgate sign in sheets) submitted to the Department Training Office?	✓			
Were the monthly statistics submitted to the Division Analyst for inclusion in the annual report?	✓			

V. Additional Comments

***Any boxes checked "NO" must be resolved in the comments and/additional comments section.**

GENERAL				
Has the employee performing this inspection had activity-specific Storm Water BMP training this year?	✓			
Are activity-specific BMP's in place?	✓			
Are your contractors adhering to the minimum BMP's that were listed in the contract?	✓			
Was your facilities parking lot(s) swept and pollutant-free since your last inspection?	✓			
Is your facility reasonably clean and free of litter and debris?	✓			
Is landscaped area irrigation contained within the landscaped area?	✓			
Are storm drains stenciled?	✓			**If no, contact Storm Water Pollution Prevention Division for stencils and paint.**
Are storm drain inlets reasonably clean and free of debris?	✓			
Did the storm drains need cleaning during this inspection period?			✓	**Date cleaned:**
Is area absent of any evidence of a discharge, spill, and or leak?	✓			
If an observed spill entered the storm drain system, was the spill reported to the Storm Water Hotline?			✓	**If no, report to the Storm Water Hotline: (619) 235-1000**
If spill was observed, was spill considered minor?			✓	**If spill, follow chemical release reporting procedures.**
TRASH STORAGE AREAS				
Is area reasonably clean and uncluttered?	✓			
Are trash cans and garbage bins kept covered?	✓			
Is the number and placement of the trash cans sufficient for your facility?	✓			

***Any boxes checked "NO" must be resolved in the comments and/additional comments section.**
****N/A = Not Applicable**

III. General Site Conditions and Runoff Management Practices Inspection (Continued)

	Yes	No*	N/A**	Comments
FUELING AREAS				
Is a stocked spill kit available at fuel island?			✓	
Is area clean and free of spills?			✓	**If spill is observed, clean up using dry methods.**
VEHICLE AND EQUIPMENT MAINTENANCE AREA				
Is work area reasonably clean?			✓	
Are drip pans readily available for leaking vehicles?			✓	
Are spill containment materials and stocked cleanup kit readily available?			✓	
Are maintenance activities contained within the designed area?			✓	
Are bulk hazardous materials/liquids stored outside in secondary containment?			✓	
MATERIALS LOADING AND UNLOADING STORAGE AREAS				
Is area reasonably clean and free of litter, debris and loose material?	✓			
Is material storage area covered?	✓			
Are materials and stocked cleanup kits readily available?	✓			
If outdoors, is water from surrounding areas prevented from reaching material storage areas?			✓	
Are bulk hazardous material/liquids stored outside in secondary containment?			✓	

IV. Supervisory Responsibilities

	Yes	No*	N/A**	Comments
SUPERVISOR RECORDKEEPING				
Were storm drains inspected after each special event (75 or more people)?	✓			
Were parking lots swept during this inspection period?	✓			**Date swept:** DAILY
Were employee storm water training records (tailgate sign in sheets) submitted to the Department Training Office?	✓			
Were the monthly statistics submitted to the Division Analyst for inclusion in the annual report?	✓

II. General Site Conditions and Runoff Management Practices Inspection

	Yes	No*	N/A**	Comments
GENERAL				
Has the employee performing this inspection had activity-specific Storm Water BMP training this year?	X			
Are activity-specific BMP's in place?	X			
Are your contractors adhering to the minimum BMP's that were listed in the contract?			X	
Was your facilities parking lot(s) swept and pollutant-free since your last inspection?	X			
Is your facility reasonably clean and free of litter and debris?	X			
Is landscaped area irrigation contained within the landscaped area?	X			
Are storm drains stenciled?	X			**If no, contact Storm Water Pollution Prevention Division for stencils and paint.**
Are storm drain inlets reasonably clean and free of debris?	X			
Did the storm drains need cleaning during this inspection period?			✓	**Date cleaned:**
Is area absent of any evidence of a discharge, spill, and or leak?	X			
If an observed spill entered the storm drain system, was the spill reported to the Storm Water Hotline?			X	**If no, report to the Storm Water Hotline: (619) 235-1000**
If spill was observed, was spill considered minor?			X	**If spill, follow chemical release reporting procedures.**
TRASH STORAGE AREAS				
Is area reasonably clean and uncluttered?	X			
Are trash cans and garbage bins kept covered?	X			
Is the number and placement of the trash cans sufficient for your facility?	X			

***Any boxes checked "NO" must be resolved in the comments and/additional comments section.**
****N/A = Not Applicable**

III. General Site Conditions and Runoff Management Practices Inspection (Continued)

	Yes	No*	N/A**	Comments
FUELING AREAS				
Is a stocked spill kit available at fuel island?			X	
Is area clean and free of spills?			X	**If spill is observed, clean up using dry methods.**
VEHICLE AND EQUIPMENT MAINTENANCE AREA				
Is work area reasonably clean?	X			
Are drip pans readily available for leaking vehicles?	X			
Are spill containment materials and stocked cleanup kit readily available?	X			
Are maintenance activities contained within the designed area?			X	
Are bulk hazardous materials/liquids stored outside in secondary containment?			X	
MATERIALS LOADING AND UNLOADING STORAGE AREAS				
Is area reasonably clean and free of litter, debris and loose material?	X			
Is material storage area covered?	X			
Are materials and stocked cleanup kits readily available?	X			
If outdoors, is water from surrounding areas prevented from reaching material storage areas?			X	
Are bulk hazardous material/liquids stored outside in secondary containment?			X	

IV. Supervisory Responsibilities

	Yes	No*	N/A**	Comments
SUPERVISOR RECORDKEEPING				
Were storm drains inspected after each special event (75 or more people)?	X			
Were parking lots swept during this inspection period?	X			**Date swept:**
Were employee storm water training records (tailgate sign in sheets) submitted to the Department Training Office?	X			
Were the monthly statistics submitted to the Division Analyst for inclusion in the annual report?

Submit the completed Municipal Facility Site Compliance Inspection Checklist by **January 31, 2008** (first inspection). and **September 30, 2008** (second inspection) to your District Manager. A total of two (2) inspections must be conducted each year.

District Manager:
Review and submit all your Municipal Facility Site Compliance Inspection Checklist in one package to Michael Ruiz, (MS 30M), by **February 15, 2008** (first inspection), and **October 15, 2008** (second inspection).

City of San Diego - Urban Runoff Management Plan

MUNICIPAL FACILITY SITE COMPLIANCE INSPECTION CHECKLIST

This form has been modified specifically for use by San Diego Park and Recreation Department personnel.

Inspector: Mary Ngai
Site Supervisor: Mary Ngai
District Manager: Cathy Anzuoni
Division: Com. Parks I **District Number:** 44
Site Supervisor Phone Number: (858)581-9716
Inspection Date: January 29, 2008 **Inspection Time:** 3:45 p.m.
Check One Box: ☐ First Inspection (by January 31) ☐ Second Inspection (by September 30)

I. Facility Information

Facility Name and Number Starkey Park	
Street Address **6707 Draper**	**Zip Code** 92037
Park and Recreation Facility Contact Person **Mary Ngai**	**Phone** (858)581-9716

II. General Site Conditions and Runoff Management Practices Inspection

	Yes	No*	N/A**	Comments
GENERAL				
Has the employee performing this inspection had activity-specific Storm Water BMP training this year?	X			
Are activity-specific BMP's in place?	X			
Are your contractors adhering to the minimum BMP's that were listed in the contract?	X			
Was your facilities parking lot(s) swept and pollutant-free since your last inspection?	X			
Is your facility reasonably clean and free of litter and debris?	X			
Is landscaped area irrigation contained within the landscaped area?	X			
Are storm drains stenciled?	✓			**If no, contact Storm Water Pollution Prevention Division for stencils and paint.** Stenciling Pending Availability
Are storm drain inlets reasonably clean and free of debris?	**X**			
Did the storm drains need cleaning during this inspection period?			✓	**Date cleaned:**
Is area absent of any evidence of a discharge, spill, and or leak?	**X**			
If an observed spill entered the storm drain system, was the spill reported to the Storm Water Hotline?			**X**	**If no, report to the Storm Water Hotline: (619) 235-1000**
If spill was observed, was spill considered minor?			**X**	**If spill, follow chemical release reporting procedures.**
TRASH STORAGE AREAS				
Is area reasonably clean and uncluttered?	**X**			
Are trash cans and garbage bins kept covered?	**X**			
Is the number and placement of the trash cans sufficient for your facility?	**X**			

***Any boxes checked "NO" must be resolved in the comments and/additional comments section.**
****N/A = Not Applicable**

III. General Site Conditions and Runoff Management Practices Inspection (Continued)

	Yes	No*	N/A**	Comments
FUELING AREAS				
Is a stocked spill kit available at fuel island?			X	**No fueling area on site**
Is area clean and free of spills?			X	**If spill is observed, clean up using dry methods.**
VEHICLE AND EQUIPMENT MAINTENANCE AREA				
Is work area reasonably clean?			X	**No vehicle or maintenance area on site**
Are drip pans readily available for leaking vehicles?			X	
Are spill containment materials and stocked cleanup kit readily available?	X			**In staff vehicle**
Are maintenance activities contained within the designed area?			X	
Are bulk hazardous materials/liquids stored outside in secondary containment?			X	
MATERIALS LOADING AND UNLOADING STORAGE AREAS				
Is area reasonably clean and free of litter, debris and loose material?			X	**No loading or unloading storage area on site**
Is material storage area covered?			X	
Are materials and stocked cleanup kits readily available?	X			**In staff vehicle**
If outdoors, is water from surrounding areas prevented from reaching material storage areas?			X	
Are bulk hazardous material/liquids stored outside in secondary containment?			X	

IV. Supervisory Responsibilities

	Yes	No*	N/A**	Comments
SUPERVISOR RECORDKEEPING				
Were storm drains inspected after each special event (75 or more people)?	X			
Were parking lots swept during this inspection period?	X			**Date swept: Twice a week – Street Parking**
Were employee storm water training records (tailgate sign in sheets) submitted to the Department Training Office?	X			
Were the monthly statistics submitted to the Division Analyst for inclusion in the annual report?	X

Is a stocked spill kit available at fuel island?			X	No fueling area
Is area clean and free of spills?			X	If spill is observed, clean up using dry methods.
VEHICLE AND EQUIPMENT MAINTENANCE AREA				
Is work area reasonably clean?			X	No vehicle or maintenance area on site
Are drip pans readily available for leaking vehicles?			X	
Are spill containment materials and stocked cleanup kit readily available?	X			In staff vehicle
Are maintenance activities contained within the designed area?			X	
Are bulk hazardous materials/liquids stored outside in secondary containment?			X	
MATERIALS LOADING AND UNLOADING STORAGE AREAS				
Is area reasonably clean and free of litter, debris and loose material?	X			
Is material storage area covered?	X			
Are materials and stocked cleanup kits readily available?	X			
If outdoors, is water from surrounding areas prevented from reaching material storage areas?			X	
Are bulk hazardous material/liquids stored outside in secondary containment?			X	

IV. Supervisory Responsibilities

	Yes	No*	N/A**	Comments
SUPERVISOR RECORDKEEPING				
Were storm drains inspected after each special event (75 or more people)?	X			
Were parking lots swept during this inspection period?	X			Date swept: 3x a week
Were employee storm water training records (tailgate sign in sheets) submitted to the Department Training Office?	X			
Were the monthly statistics submitted to the Division Analyst for inclusion in the annual report?	X			

V. Additional Comments

***Any boxes checked "NO" must be resolved in the comments and/additional comments section.**

Site Supervisor: Mary Ngai
District Manager: Cathy Anzuoni
Division: Com. Parks I **District Number:** 44
Site Supervisor Phone Number: (858)581-9716
Inspection Date: January 10, 2008 **Inspection Time:** 11:00 a.m.
Check One Box: ☑ First Inspection (by January 31) ☐ Second Inspection (by September 30)

I. Facility Information

Facility Name and Number Union Circle	
Street Address **1250 Park Row Circle**	**Zip Code** 92037
Park and Recreation Facility Contact Person **Mary Ngai**	**Phone** (858)581-9716

II. General Site Conditions and Runoff Management Practices Inspection

	Yes	No*	N/A**	Comments
GENERAL				
Has the employee performing this inspection had activity-specific Storm Water BMP training this year?	X			
Are activity-specific BMP's in place?	X			
Are your contractors adhering to the minimum BMP's that were listed in the contract?	X			
Was your facilities parking lot(s) swept and pollutant-free since your last inspection?	X			Street Parking
Is your facility reasonably clean and free of litter and debris?	X			
Is landscaped area irrigation contained within the landscaped area?	X			
Are storm drains stenciled?	✓			**If no, contact Storm Water Pollution Prevention Division for stencils and paint.** Stenciling Pending Availability
Are storm drain inlets reasonably clean and free of debris?	**X**			
Did the storm drains need cleaning during this inspection period?			✓	**Date cleaned:**
Is area absent of any evidence of a discharge, spill, and or leak?	**X**			
If an observed spill entered the storm drain system, was the spill reported to the Storm Water Hotline?			**X**	**If no, report to the Storm Water Hotline: (619) 235-1000**
If spill was observed, was spill considered minor?			**X**	**If spill, follow chemical release reporting procedures.**
TRASH STORAGE AREAS				
Is area reasonably clean and uncluttered?	**X**			
Are trash cans and garbage bins kept covered?	**X**			
Is the number and placement of the trash cans sufficient for your facility?	**X**			

***Any boxes checked "NO" must be resolved in the comments and/additional comments section.**
****N/A = Not Applicable**

III. General Site Conditions and Runoff Management Practices Inspection (Continued)

	Yes	No*	N/A**	Comments
FUELING AREAS				
Is a stocked spill kit available at fuel island?			X	**No fueling area on site**
Is area clean and free of spills?			X	**If spill is observed, clean up using dry methods.**
VEHICLE AND EQUIPMENT MAINTENANCE AREA				
Is work area reasonably clean?			X	**No vehicle or maintenance area on site**
Are drip pans readily available for leaking vehicles?			X	
Are spill containment materials and stocked cleanup kit readily available?	X			**In staff vehicle**
Are maintenance activities contained within the designed area?			X	
Are bulk hazardous materials/liquids stored outside in secondary containment?			X	
MATERIALS LOADING AND UNLOADING STORAGE AREAS				
Is area reasonably clean and free of litter, debris and loose material?			X	**No loading or unloading storage area on site**
Is material storage area covered?			X	
Are materials and stocked cleanup kits readily available?	X			**In staff vehicle**
If outdoors, is water from surrounding areas prevented from reaching material storage areas?			X	
Are bulk hazardous material/liquids stored outside in secondary containment?			X	

IV. Supervisory Responsibilities

	Yes	No*	N/A**	Comments
SUPERVISOR RECORDKEEPING				
Were storm drains inspected after each special event (75 or more people)?	X			
Were parking lots swept during this inspection period?	X			**Date swept: Twice a week**
Were employee storm water training records (tailgate sign in sheets) submitted to the Department Training Office?	X			
Were the monthly statistics submitted to the Division Analyst for inclusion in the annual report?	X			

V. Additional Comments

***Any boxes checked "NO" must be resolved in the comments and/additional comments section.**
**N/A = Not Applicable

Inspector/Onsite Supervisor:
Submit the completed Municipal Facility Site Compliance Inspection Checklist by **January 31, 2008** (first inspection). and **September 30, 2008** (second inspection) to your District Manager. A total of two (2) inspections must be conducted each year.

District Manager:
Review and submit all your Municipal Facility Site Compliance Inspection Checklist in one package to Michael Ruiz, (MS 30M), by **February 15, 2008** (first inspection), and **October 15, 2008** (second inspection).

Facility Name and Number **Alcott Elementary Joint Use Site (8364)**	
Street Address **4680 Hidalgo Ave.**	**Zip Code 92117**
Park and Recreation Facility Contact Person **Steve Palle**	**Phone 858-581-991**

II. General Site Conditions and Runoff Management Practices Inspection

	Yes	No*	N/A**	Comments
GENERAL				
Has the employee performing this inspection had activity-specific Storm Water BMP training this year?	X			
Are activity-specific BMP's in place?	X			
Are your contractors adhering to the minimum BMP's that were listed in the contract?	X			
Was your facilities parking lot(s) swept and pollutant-free since your last inspection?	X			School Parking Lot
Is your facility reasonably clean and free of litter and debris?	X			
Is landscaped area irrigation contained within the landscaped area?	X			
Are storm drains stenciled?	✓			**Pending the purchase or check out of stencils/Most are in the turf areas**
Are storm drain inlets reasonably clean and free of debris?	**X**			
Did the storm drains need cleaning during this inspection period?			✓	**Date cleaned:**
Is area absent of any evidence of a discharge, spill, and or leak?	**X**			
If an observed spill entered the storm drain system, was the spill reported to the Storm Water Hotline?			**X**	**If no, report to the Storm Water Hotline: (619) 235-1000**
If spill was observed, was spill considered minor?			**X**	**If spill, follow chemical release reporting procedures.**
TRASH STORAGE AREAS				
Is area reasonably clean and uncluttered?	**X**			
Are trash cans and garbage bins kept covered?	✓			
Is the number and placement of the trash cans sufficient for your facility?	**X**			

***Any boxes checked "NO" must be resolved in the comments and/additional comments section.**
****N/A = Not Applicable**

III. General Site Conditions and Runoff Management Practices Inspection (Continued)

	Yes	No*	N/A**	Comments
FUELING AREAS				
Is a stocked spill kit available at fuel island?			X	**No Fuel Island**
Is area clean and free of spills?			X	
VEHICLE AND EQUIPMENT MAINTENANCE AREA				
Is work area reasonably clean?			X	
Are drip pans readily available for leaking vehicles?			X	**No vehicle storage areas**
Are spill containment materials and stocked cleanup kit readily available?			X	
Are maintenance activities contained within the designed area?			X	
Are bulk hazardous materials/liquids stored outside in secondary containment?			X	
MATERIALS LOADING AND UNLOADING STORAGE AREAS				
Is area reasonably clean and free of litter, debris and loose material?			X	
Is material storage area covered?			X	
Are materials and stocked cleanup kits readily available?			X	
If outdoors, is water from surrounding areas prevented from reaching material storage areas?			X	
Are bulk hazardous material/liquids stored outside in secondary containment?			X	

IV. Supervisory Responsibilities

	Yes	No*	N/A**	Comments
SUPERVISOR RECORDKEEPING				
Were storm drains inspected after each special event (75 or more people)?			X	
Were parking lots swept during this inspection period?			X	**Date swept:**
Were employee storm water training records (tailgate sign in sheets) submitted to the Department Training Office?	X			
Were the monthly statistics submitted to the Division Analyst for inclusion in the annual report?	X

N/A	N/A	N/A

III. General Site Conditions and Runoff Management Practices Review

		Yes	No	N/A*	Comments
General	Employees trained in storm water pollution prevention practices?	X			
	Common areas of yard reasonably clean and free of litter and debris?	X			
	Are parking areas generally clean and swept as needed?	X			
	Are storm drain inlets reasonably clean and free of debris?	X			
	Is there evidence of discharges, spills, and or leaks in any areas?			✓	
Trash storage areas	Is area reasonably clean and uncluttered?	X			
	Are trash cans and garbage bins kept covered?	X			
Fueling areas**	Is there a roof on fueling area?	X			
	Is there a mechanism in place for spill overflow protection?	X			
Vehicle/equipment maintenance area**	Area reasonably clean and free of spills, leaks, or any other deleterious materials?	X			
	Is area covered overhead?	X			
	Dry clean up methods implemented?	X			
	Are there drip pans readily available for use?			✓	
	Spill containment and cleanup kits readily available?	X			
	Storage areas covered and properly maintained?	X			

*N/A = Not Applicable

** Use N/A if no fueling areas and/or no vehicle/equipment maintenance area.

III. General Site Conditions and Runoff Management Practices Review (Continued)

		Yes	No	N/A*	Comments
Vehicle/equipment washing areas**	Are related activities contained within designated area?			X	
	Hazardous materials/liquids stored above ground?			X	
	Are there containment mechanisms in place?			X	
Materials loading and storage areas	Area reasonably clean and free of litter and debris?	X			
	Designated area covered overhead?	X			
Chemical handling areas	Areas reasonably clean and organized?	X			
	Is area indoors or properly covered?	X			
	Spill containment cleanup kits readily available?	X			
	If outdoors, is water from surrounding areas prevented from reaching chemical handling areas?			X	
	Hazardous materials/liquids stored above ground?	X			
	Dry clean up methods implemented?	X			

IV. Water Quality Management Plan (WQMP) Review

		Yes	No	N/A*	Comments
Facility site map	Identifies drainage areas and direction of flow	X			
	Identifies location of storm water conveyance system including ditches, inlets and storm drains	X			
	Identifies location of any existing storm water controls (e.g., berms, filters, grass swales, etc.)	X			
	Identifies location of building(s) and activity areas (e.g., fueling islands, hazardous materials storage areas, washing areas, etc.)	X			
Materials/activities used on site	List materials stored and handled on site, including storage location and typical quantities	X			
	Includes a narrative description of activities conducted on site which have the potential to result in discharges to storm drain system	X			
Potential Pollutants	Identifies potential pollutants which could be discharged from site given activities conducted at facility	X			
Best Management Practices (BMP's)	Describes BMP's implemented at facility to deal with **each** potential pollutant source identified	X			
	Minimum Department BMP's listed	X			
	Storm water system regularly inspected/monitored	X			
Supervisor Recordkeeping	Employee training records	X			
	Inspection records	X

*N/A = Not Applicable

** Use N/A if no fueling areas and/or no vehicle/equipment maintenance area

III. General Site Conditions and Runoff Management Practices Review (Continued)

		Yes	No	N/A*	Comments
Vehicle/equipment washing areas**	Are related activities contained within designated area?			X	
	Hazardous materials/liquids stored above ground?			X	
	Are there containment mechanisms in place?			X	
Materials loading and storage areas	Area reasonably clean and free of litter and debris?	X			
	Designated area covered overhead?	X			
Chemical handling areas	Areas reasonably clean and organized?	X			
	Is area indoors or properly covered?	X			
	Spill containment cleanup kits readily available?	X			
	If outdoors, is water from surrounding areas prevented from reaching chemical handling areas?			X	
	Hazardous materials/liquids stored above ground?	X			
	Dry clean up methods implemented?	X			

IV. Water Quality Management Plan (WQMP) Review

		Yes	No	N/A*	Comments
Facility site map	Identifies drainage areas and direction of flow	X			
	Identifies location of storm water conveyance system including ditches, inlets and storm drains	X			
	Identifies location of any existing storm water controls (e.g., berms, filters, grass swales, etc.)	X			
	Identifies location of building(s) and activity areas (e.g., fueling islands, hazardous materials storage areas, washing areas, etc.)	X			
Materials/activities used on site	List materials stored and handled on site, including storage location and typical quantities	X			
	Includes a narrative description of activities conducted on site which have the potential to result in discharges to storm drain system	X			
Potential Pollutants	Identifies potential pollutants which could be discharged from site given activities conducted at facility	X			
Best Management Practices (BMP's)	Describes BMP's implemented at facility to deal with each potential pollutant source identified	X			
	Minimum Department BMP's listed	X			
	Storm water system regularly inspected/monitored	X			
Supervisor Recordkeeping	Employee training records	X			
	Inspection records	X

MUNICIPAL FACILITY SITE COMPLIANCE INSPECTION CHECKLIST

This form has been modified specifically for use by San Diego Park and Recreation Department personnel.

Inspector: Jaime Diez
Site Supervisor: Alex Davis
Phone Number: (858)538-8131
Date/Time: February 14, 2008

I. Facility Information

Facility Name	
Torrey Del Mar	
Street Address **7693 McGonigle Trail**	**Zip Code** 92130
Facility Contact Person **Alex Davis**	**Phone** **(858)538-8131**

II. Shared Facility Information

Is there more than one City department and/or division sharing this facility?

___X__ No (skip this section) _____ Yes (complete this section)

Name of City Departments and/or Divisions Sharing Facility	Contact Person and Phone Number	Covered by this Inspection?
N/A	N/A	N/A

III. General Site Conditions and Runoff Management Practices Review

		Yes	No	N/A*	Comments
General	Employees trained in storm water pollution prevention practices?	X			
	Common areas of yard reasonably clean and free of litter and debris?	X			
	Are parking areas generally clean and swept as needed?	X			
	Are storm drain inlets reasonably clean and free of debris?	X			
	Is there evidence of discharges, spills, and or leaks in any areas?			✓	
Trash storage areas	Is area reasonably clean and uncluttered?	X			
	Are trash cans and garbage bins kept covered?	X			
Fueling areas**	Is there a roof on fueling area?	X			
	Is there a mechanism in place for spill overflow protection?	X			
Vehicle/equipment maintenance area**	Area reasonably clean and free of spills, leaks, or any other deleterious materials?	X			
	Is area covered overhead?	X			
	Dry clean up methods implemented?	X			
	Are there drip pans readily available for use?			✓	
	Spill containment and cleanup kits readily available?	X			
	Storage areas covered and properly maintained?	X			

*N/A = Not Applicable

** Use N/A if no fueling areas and/or no vehicle/equipment maintenance area.

III. General Site Conditions and Runoff Management Practices Review (Continued)

		Yes	No	N/A*	Comments
Vehicle/equipment washing areas**	Are related activities contained within designated area?			X	
	Hazardous materials/liquids stored above ground?			X

City of San Diego - Urban Runoff Management Plan

MUNICIPAL FACILITY SITE COMPLIANCE INSPECTION CHECKLIST

This form has been modified specifically for use by San Diego Park and Recreation Department personnel.

Inspector: Steve Palle
Site Supervisor: Brian Anthony
District Manager: Cathy Anzuoni
Division: Community Parks I **District Number:** 44
Site Supervisor Phone Number: 858-581-9919
Inspection Date: Monday, January 28th, 2008 **Inspection Time:** 9 minutes
Check One Box: ☑ First Inspection (by January 31) ☐ Second Inspection (by September 30)

I. Facility Information

Facility Name and Number **Field Elementary Joint Use Site (8364)**	
Street Address **4375 Bannock Ave.**	**Zip Code 92117**
Park and Recreation Facility Contact Person **Steve Palle**	**Phone 858-581-991**

II. General Site Conditions and Runoff Management Practices Inspection

	Yes	No*	N/A**	Comments
GENERAL				
Has the employee performing this inspection had activity-specific Storm Water BMP training this year?	X			
Are activity-specific BMP's in place?	X			
Are your contractors adhering to the minimum BMP's that were listed in the contract?	X			
Was your facilities parking lot(s) swept and pollutant-free since your last inspection?	X			No Parking Lots
Is your facility reasonably clean and free of litter and debris?	X			
Is landscaped area irrigation contained within the landscaped area?	X			
Are storm drains stenciled?	✓			**Pending the purchase or check out of stencils**
Are storm drain inlets reasonably clean and free of debris?	**X**			
Did the storm drains need cleaning during this inspection period?			✓	**Date cleaned:**
Is area absent of any evidence of a discharge, spill, and or leak?	**X**			
If an observed spill entered the storm drain system, was the spill reported to the Storm Water Hotline?			**X**	**If no, report to the Storm Water Hotline: (619) 235-1000**
If spill was observed, was spill considered minor?			**X**	**If spill, follow chemical release reporting procedures.**
TRASH STORAGE AREAS				
Is area reasonably clean and uncluttered?	**X**			
Are trash cans and garbage bins kept covered?	✓			**No Covers on trash cans** .
Is the number and placement of the trash cans sufficient for your facility?	**X**			

***Any boxes checked "NO" must be resolved in the comments and/additional comments section.**
****N/A = Not Applicable**

III. General Site Conditions and Runoff Management Practices Inspection (Continued)

	Yes	No*	N/A**	Comments
FUELING AREAS				
Is a stocked spill kit available at fuel island?			X	**No Fuel Island**
Is area clean and free of spills?			X	
VEHICLE AND EQUIPMENT MAINTENANCE AREA				
Is work area reasonably clean?			X	
Are drip pans readily available for leaking vehicles?			X	**No vehicle storage areas**
Are spill containment materials and stocked cleanup kit readily available?			X	
Are maintenance activities contained within the designed area?			X	
Are bulk hazardous materials/liquids stored outside in secondary containment?			X	
MATERIALS LOADING AND UNLOADING STORAGE AREAS				
Is area reasonably clean and free of litter, debris and loose material?			X	
Is material storage area covered?			X	
Are materials and stocked cleanup kits readily available?			X	
If outdoors, is water from surrounding areas prevented from reaching material storage areas?			X	
Are bulk hazardous material/liquids stored outside in secondary containment?			X	

IV. Supervisory Responsibilities

	Yes	No*	N/A**	Comments
SUPERVISOR RECORDKEEPING				
Were storm drains inspected after each special event (75 or more people)?			X	
Were parking lots swept during this inspection period?			X	**Date swept:**
Were employee storm water training records (tailgate sign in sheets) submitted to the Department Training Office?	X			
Were the monthly statistics submitted to the Division Analyst for inclusion in the annual report?	X

	Yes	No*	N/A**	Comments
GENERAL				
Has the employee performing this inspection had activity-specific Storm Water BMP training this year?	X			
Are activity-specific BMP's in place?	X			
Are your contractors adhering to the minimum BMP's that were listed in the contract?			X	**Park maintained by City staff.**
Was your facilities parking lot(s) swept and pollutant-free since your last inspection?	X			
Is your facility reasonably clean and free of litter and debris?	X			
Is landscaped area irrigation contained within the landscaped area?	X			
Are storm drains stenciled?	✓			**If no, contact Storm Water Pollution Prevention Division for stencils and paint.**
Are storm drain inlets reasonably clean and free of debris?	X			
Did the storm drains need cleaning during this inspection period?			✓	**Date cleaned: 12-27-07**
Is area absent of any evidence of a discharge, spill, and or leak?	X			
If an observed spill entered the storm drain system, was the spill reported to the Storm Water Hotline?	X			**If no, report to the Storm Water Hotline: (619) 235-1000**
If spill was observed, was spill considered minor?	X			**If spill, follow chemical release reporting procedures.**
TRASH STORAGE AREAS				
Is area reasonably clean and uncluttered?	X			
Are trash cans and garbage bins kept covered?	X			
Is the number and placement of the trash cans sufficient for your facility?	X			

***Any boxes checked "NO" must be resolved in the comments and/additional comments section.**
****N/A = Not Applicable**

III. General Site Conditions and Runoff Management Practices Inspection (Continued)

	Yes	No*	N/A**	Comments
FUELING AREAS				
Is a stocked spill kit available at fuel island?			X	**Not a fueling site.**
Is area clean and free of spills?			X	**If spill is observed, clean up using dry methods.**
VEHICLE AND EQUIPMENT MAINTENANCE AREA				
Is work area reasonably clean?			X	**Fleet vehicles stored at yard.**
Are drip pans readily available for leaking vehicles?			X	**Ditto**
Are spill containment materials and stocked cleanup kit readily available?			X	**Ditto**
Are maintenance activities contained within the designed area?			X	**Ditto**
Are bulk hazardous materials/liquids stored outside in secondary containment?			X	**ditto**
MATERIALS LOADING AND UNLOADING STORAGE AREAS				
Is area reasonably clean and free of litter, debris and loose material?			X	
Is material storage area covered?			X	
Are materials and stocked cleanup kits readily available?			X	
If outdoors, is water from surrounding areas prevented from reaching material storage areas?			X	
Are bulk hazardous material/liquids stored outside in secondary containment?			X	

IV. Supervisory Responsibilities

	Yes	No*	N/A**	Comments
SUPERVISOR RECORDKEEPING				
Were storm drains inspected after each special event (75 or more people)?	X			
Were parking lots swept during this inspection period?	X			**Date swept: 12-27-07**
Were employee storm water training records (tailgate sign in sheets) submitted to the Department Training Office?	X			
Were the monthly statistics submitted to the Division Analyst for inclusion in the annual report?	X			

V. Additional Comments

Fleet vehicles stored at Chollas Yard .

***Any boxes checked "NO" must be resolved in the comments and/additional comments section.**
****N/A = Not Applicable**

Inspector/Onsite Supervisor:
Submit the completed Municipal Facility Site Compliance Inspection Checklist by **January 31, 2008** (first inspection), and **September 30, 2008** (second inspection) to your District Manager. A total of two (2) inspections must be conducted each year.

District Manager:
Review and submit all your Municipal Facility Site Compliance Inspection Checklist in one package to Michael Ruiz, (MS 30M), by **February 15, 2008** (first inspection), and **October 15, 2008** (second inspection).

Site Supervisor Phone Number: 858-573-1394
Inspection Date: 12-28-07 **Inspection Time:** 5:30 p.m.
Check One Box: X First Inspection (by January 31) ☐ Second Inspection (by September 30)

I. Facility Information

Facility Name and Number Tierrasanta Recreation Center, (7536)	
Street Address 11220 Clairemont Mesa Blvd	**Zip Code** 92124
Park and Recreation Facility Contact Person Mark Moncey	**Phone** 858-573-1394

II. General Site Conditions and Runoff Management Practices Inspection

	Yes	No*	N/A**	Comments
GENERAL				
Has the employee performing this inspection had activity-specific Storm Water BMP training this year?	X			
Are activity-specific BMP's in place?	X			
Are your contractors adhering to the minimum BMP's that were listed in the contract?			X	**Park maintained by City staff.**
Was your facilities parking lot(s) swept and pollutant-free since your last inspection?	X			
Is your facility reasonably clean and free of litter and debris?	X			
Is landscaped area irrigation contained within the landscaped area?	X			
Are storm drains stenciled?	✓			**If no, contact Storm Water Pollution Prevention Division for stencils and paint.**
Are storm drain inlets reasonably clean and free of debris?	X			
Did the storm drains need cleaning during this inspection period?			✓	**Date cleaned: 12-27-07**
Is area absent of any evidence of a discharge, spill, and or leak?	X			
If an observed spill entered the storm drain system, was the spill reported to the Storm Water Hotline?	X			**If no, report to the Storm Water Hotline: (619) 235-1000**
If spill was observed, was spill considered minor?	X			**If spill, follow chemical release reporting procedures.**
TRASH STORAGE AREAS				
Is area reasonably clean and uncluttered?	X			
Are trash cans and garbage bins kept covered?	X			
Is the number and placement of the trash cans sufficient for your facility?	X			

***Any boxes checked "NO" must be resolved in the comments and/additional comments section.**
****N/A = Not Applicable**

III. General Site Conditions and Runoff Management Practices Inspection (Continued)

	Yes	No*	N/A**	Comments
FUELING AREAS				
Is a stocked spill kit available at fuel island?			X	**Not a fueling site.**
Is area clean and free of spills?			X	**If spill is observed, clean up using dry methods.**
VEHICLE AND EQUIPMENT MAINTENANCE AREA				
Is work area reasonably clean?			X	**Fleet vehicles stored at yard.**
Are drip pans readily available for leaking vehicles?			X	**Ditto**
Are spill containment materials and stocked cleanup kit readily available?			X	**Ditto**
Are maintenance activities contained within the designed area?			X	**Ditto**
Are bulk hazardous materials/liquids stored outside in secondary containment?			X	**ditto**
MATERIALS LOADING AND UNLOADING STORAGE AREAS				
Is area reasonably clean and free of litter, debris and loose material?			X	
Is material storage area covered?			X	
Are materials and stocked cleanup kits readily available?			X	
If outdoors, is water from surrounding areas prevented from reaching material storage areas?			X	
Are bulk hazardous material/liquids stored outside in secondary containment?			X	

IV. Supervisory Responsibilities

	Yes	No*	N/A**	Comments
SUPERVISOR RECORDKEEPING				
Were storm drains inspected after each special event (75 or more people)?	X			
Were parking lots swept during this inspection period?	X			**Date swept: 12-27-07**
Were employee storm water training records (tailgate sign in sheets) submitted to the Department Training Office?	X			
Were the monthly statistics submitted to the Division Analyst for inclusion in the annual report?	X			

V. Additional Comments

Fleet vehicles stored at Chollas Yard .

***Any boxes checked "NO" must be resolved in the comments and/additional comments section.**
****N/A = Not Applicable**

Inspector/Onsite Supervisor:
Submit the completed Municipal Facility Site Compliance Inspection Checklist by **January 31, 2008** (first inspection), and **September 30, 2008** (second inspection) to your District Manager. A total of two (2) inspections must be conducted each year.

District Manager:
Review and submit all your Municipal Facility Site Compliance Inspection Checklist in one package to Michael Ruiz, (MS 30M), by **February 15, 2008** (first inspection), and **October 15, 2008** (second inspection).

District Manager:
Review and submit all your Municipal Facility Site Compliance Inspection Checklist in one package to Michael Ruiz, (MS 30M), by **February 15, 2008** (first inspection), and **October 15, 2008** (second inspection).

City of San Diego - Urban Runoff Management Plan

MUNICIPAL FACILITY SITE COMPLIANCE INSPECTION CHECKLIST

This form has been modified specifically for use by San Diego Park and Recreation Department personnel.

Inspector: Elsa Marquez
Site Supervisor: Elsa Marquez
District Manager: C. Haupt
Division: CP II **District Number: 4**
Site Supervisor Phone Number: 527-3414
Inspection Date: 12-14-07 **Inspection Time: 1:00 PM**
Check One Box: XX First Inspection (by January 31) ☐ **Second Inspection (by September 30)**

I. Facility Information

Facility Name and Number **Dorothy Petway**	
Street Address **1375 Rigel**	**Zip Code** 92113
Park and Recreation Facility Contact Person **Elsa Marquez**	**Phone** **527-3414**

II. General Site Conditions and Runoff Management Practices Inspection

	Yes	No*	N/A**	Comments
GENERAL				
Has the employee performing this inspection had activity-specific Storm Water BMP training this year?	X			
Are activity-specific BMP's in place?	X			
Are your contractors adhering to the minimum BMP's that were listed in the contract?	X			
Was your facilities parking lot(s) swept and pollutant-free since your last inspection?	X			
Is your facility reasonably clean and free of litter and debris?	X			
Is landscaped area irrigation contained within the landscaped area?	X			
Are storm drains stenciled?	✓			**If no, contact Storm Water Pollution Prevention Division for stencils and paint.**
Are storm drain inlets reasonably clean and free of debris?	**X**			
Did the storm drains need cleaning during this inspection period?			✓	**Date cleaned:**
Is area absent of any evidence of a discharge, spill, and or leak?	**X**			
If an observed spill entered the storm drain system, was the spill reported to the Storm Water Hotline?			**X**	**If no, report to the Storm Water Hotline: (619) 235-1000**
If spill was observed, was spill considered minor?			**X**	**If spill, follow chemical release reporting procedures.**
TRASH STORAGE AREAS				
Is area reasonably clean and uncluttered?	**X**			
Are trash cans and garbage bins kept covered?	✓			
Is the number and placement of the trash cans sufficient for your facility?	**X**			

***Any boxes checked "NO" must be resolved in the comments and/additional comments section.**
****N/A = Not Applicable**

III. General Site Conditions and Runoff Management Practices Inspection (Continued)

	Yes	No*	N/A**	Comments
FUELING AREAS				
Is a stocked spill kit available at fuel island?			X	
Is area clean and free of spills?			X	**If spill is observed, clean up using dry methods.**
VEHICLE AND EQUIPMENT MAINTENANCE AREA				
Is work area reasonably clean?			X	
Are drip pans readily available for leaking vehicles?			X	
Are spill containment materials and stocked cleanup kit readily available?			X	
Are maintenance activities contained within the designed area?			X	
Are bulk hazardous materials/liquids stored outside in secondary containment?			X	
MATERIALS LOADING AND UNLOADING STORAGE AREAS				
Is area reasonably clean and free of litter, debris and loose material?			X	
Is material storage area covered?			X	
Are materials and stocked cleanup kits readily available?			X	
If outdoors, is water from surrounding areas prevented from reaching material storage areas?			X	
Are bulk hazardous material/liquids stored outside in secondary containment?	✓			

IV. Supervisory Responsibilities

	Yes	No*	N/A**	Comments
SUPERVISOR RECORDKEEPING				
Were storm drains inspected after each special event (75 or more people)?	X			
Were parking lots swept during this inspection period?	X			
Were employee storm water training records (tailgate sign in sheets) submitted to the Department Training Office?	X			
Were the monthly statistics submitted to the Division Analyst for inclusion in the annual report?	X			

V. Additional Comments

will contact Storm Water Pollution Prevention Division for stencils and paint.

***Any boxes checked "NO" must be resolved in the comments and/additional comments section.**
****N/A = Not Applicable**

Inspector/Onsite Supervisor:
Submit the completed Municipal Facility Site Compliance Inspection Checklist by **January 31, 2008** (first inspection), and **September 30, 2008** (second inspection) to your District Manager. A total of two (2) inspections must be conducted each year.

District Manager:
Review and submit all your Municipal Facility Site Compliance Inspection Checklist in one package to Michael Ruiz, (MS 30M), by **February 15, 2008** (first inspection), and **October 15, 2008** (second inspection).

MUNICIPAL FACILITY SITE COMPLIANCE INSPECTION CHECKLIST

This form has been modified specifically for use by San Diego Park and Recreation Department personnel.

Inspector: Mack Shelby, Area Manager
Site Supervisor: John Kleine
District Manager: Marilyn Stern
Phone Number: (619) 527-3419
Date/Time: January 31, 2008
Department #: 444

I. Facility Information

Facility Name **Paradise Hills Community Park**	
Street Address **6610 Potomac**	**Zip Code 92114**
Facility Contact Person **John Kleine**	**Phone (619) 527-3419**

II. Shared Facility Information

Is there more than one City department and/or division sharing this facility?

__X__ No (skip this section) _____ Yes (complete this section)

Name of City Departments and/or Divisions Sharing Facility	Contact Person and Phone Number	Covered by this Inspection?

III. General Site Conditions and Runoff Management Practices Review

		Yes	No*	N/A**	Comments
General	Employees trained in storm water pollution prevention practices?	x			
	Common areas of yard reasonably clean and free of litter and debris?	x			
	Are parking areas generally clean and swept as needed?	x			
	Are storm drain inlets reasonably clean and free of debris?	x			
	Is there evidence of discharges, spills, and or leaks in any areas?			✓	No spills
Trash storage areas	Is area reasonably clean and uncluttered?			x	
	Are trash cans and garbage bins kept covered?	x			
Fueling areas**	Is there a roof on fueling area?			x	
	Is there a mechanism in place for spill overflow protection?			x	
Vehicle/equipment maintenance area**	Area reasonably clean and free of spills, leaks, or any other deleterious materials?			x	
	Is area covered overhead?			x	
	Dry clean up methods implemented?			x	
	Are there drip pans readily available for use?			x	
	Spill containment and cleanup kits readily available?			x	
	Storage areas covered and properly maintained?			x	

*If the answer is "No." then record the corrective action or "not required at this time" under "Comments"
**N/A = Not Applicable
*** Use N/A if no vehicle/equipment washing areas.

III. General Site Conditions and Runoff Management Practices Review (Continued)

		Yes	No	N/A*	Comments
Vehicle/equipment washing areas**	Are related activities contained within designated area?			x	
	Hazardous materials/liquids stored above ground?			x	
	Are there containment mechanisms in place?			x	
Materials loading and storage areas	Area reasonably clean and free of litter and debris?			x	
	Designated area covered overhead?			x	
Chemical handling areas	Areas reasonably clean and organized?			x	
	Is area indoors or properly covered?			x	
	Spill containment cleanup kits readily available?			x	
	If outdoors, is water from surrounding areas prevented from reaching chemical handling areas?			x	
	Hazardous materials/liquids stored above ground?			x	
	Dry clean up methods implemented?			x	

IV. Water Quality Management Plan (WQMP) Review

		Yes	No	N/A*	Comments
Facility site map	Identifies drainage areas and direction of flow	X			
	Identifies location of storm water conveyance system including ditches, inlets and storm drains	X			
	Identifies location of any existing storm water controls (e.g., berms, filters, grass swales, etc.)	X			
	Identifies location of building(s) and activity areas (e.g., fueling islands, hazardous materials storage areas, washing areas, etc.)			X	
Materials/activities used on site	List materials stored and handled on site, including storage location and typical quantities			X	
	Includes a narrative description of activities conducted on site which have the potential to result in discharges to storm drain system	x			
Potential Pollutants	Identifies potential pollutants which could be discharged from site given activities conducted at facility	X			
Best Management Practices (BMP's)	Describes BMP's implemented at facility to deal with **each** potential pollutant source identified	X			
	Minimum Department BMP's listed	X			
	Storm water system regularly inspected/monitored	x			
Supervisor Recordkeeping	Employee training records	X			
	Inspection records	X

Name of City Departments and/or Divisions Sharing Facility	Contact Person and Phone Number	Covered by this Inspection?

III. General Site Conditions and Runoff Management Practices Review

		Yes	No*	N/A**	Comments
General	Employees trained in storm water pollution prevention practices?	x			
	Common areas of yard reasonably clean and free of litter and debris?	x			
	Are parking areas generally clean and swept as needed?	x			
	Are storm drain inlets reasonably clean and free of debris?	x			
	Is there evidence of discharges, spills, and or leaks in any areas?			✓	No spills
Trash storage areas	Is area reasonably clean and uncluttered?			x	
	Are trash cans and garbage bins kept covered?	x			
Fueling areas**	Is there a roof on fueling area?			x	
	Is there a mechanism in place for spill overflow protection?			x	
Vehicle/equipment maintenance area**	Area reasonably clean and free of spills, leaks, or any other deleterious materials?			x	
	Is area covered overhead?			x	
	Dry clean up methods implemented?			x	
	Are there drip pans readily available for use?			x	
	Spill containment and cleanup kits readily available?			x	
	Storage areas covered and properly maintained?			x	

*If the answer is "No." then record the corrective action or "not required at this time" under "Comments"
**N/A = Not Applicable
*** Use N/A if no vehicle/equipment washing areas.

III. General Site Conditions and Runoff Management Practices Review (Continued)

		Yes	No	N/A*	Comments
Vehicle/equipment washing areas**	Are related activities contained within designated area?			x	
	Hazardous materials/liquids stored above ground?			x	
	Are there containment mechanisms in place?			x	
Materials loading and storage areas	Area reasonably clean and free of litter and debris?			x	
	Designated area covered overhead?			x	
Chemical handling areas	Areas reasonably clean and organized?			x	
	Is area indoors or properly covered?			x	
	Spill containment cleanup kits readily available?			x	
	If outdoors, is water from surrounding areas prevented from reaching chemical handling areas?			x	
	Hazardous materials/liquids stored above ground?			x	
	Dry clean up methods implemented?			x	

IV. Water Quality Management Plan (WQMP) Review

		Yes	No	N/A*	Comments
Facility site map	Identifies drainage areas and direction of flow	X			
	Identifies location of storm water conveyance system including ditches, inlets and storm drains	X			
	Identifies location of any existing storm water controls (e.g., berms, filters, grass swales, etc.)	X			
	Identifies location of building(s) and activity areas (e.g., fueling islands, hazardous materials storage areas, washing areas, etc.)			X	
Materials/activities used on site	List materials stored and handled on site, including storage location and typical quantities			X	
	Includes a narrative description of activities conducted on site which have the potential to result in discharges to storm drain system	x			
Potential Pollutants	Identifies potential pollutants which could be discharged from site given activities conducted at facility	X			
Best Management Practices (BMP's)	Describes BMP's implemented at facility to deal with **each** potential pollutant source identified	X			
	Minimum Department BMP's listed	X			
	Storm water system regularly inspected/monitored	x			
Supervisor Recordkeeping	Employee training records	X			
	Inspection records	X

City of San Diego - Urban Runoff Management Plan

MUNICIPAL FACILITY SITE COMPLIANCE INSPECTION CHECKLIST

This form has been modified specifically for use by San Diego Park and Recreation Department personnel.

Inspector: Elsa Marquez
Site Supervisor: Elsa Marquez
District Manager: C. Haupt
Division: CP II District Number: 4
Site Supervisor Phone Number: 527-3414
Inspection Date: 12-14-07 Inspection Time: 1:00 PM
Check One Box: XX First Inspection (by January 31) ☐ Second Inspection (by September 30)

I. Facility Information

Facility Name and Number	
Dorothy Petway	
Street Address	**Zip Code**
1375 Rigel	92113
Park and Recreation Facility Contact Person	**Phone**
Elsa Marquez	527-3414

II. General Site Conditions and Runoff Management Practices Inspection

	Yes	No*	N/A**	Comments
GENERAL				
Has the employee performing this inspection had activity-specific Storm Water BMP training this year?	X			
Are activity-specific BMP's in place?	X			
Are your contractors adhering to the minimum BMP's that were listed in the contract?	X			
Was your facilities parking lot(s) swept and pollutant-free since your last inspection?	X			
Is your facility reasonably clean and free of litter and debris?	X			
Is landscaped area irrigation contained within the landscaped area?	X			
Are storm drains stenciled?	✓			**If no, contact Storm Water Pollution Prevention Division for stencils and paint.**
Are storm drain inlets reasonably clean and free of debris?	X			
Did the storm drains need cleaning during this inspection period?			✓	**Date cleaned:**
Is area absent of any evidence of a discharge, spill, and or leak?	X			
If an observed spill entered the storm drain system, was the spill reported to the Storm Water Hotline?			X	**If no, report to the Storm Water Hotline: (619) 235-1000**
If spill was observed, was spill considered minor?			X	**If spill, follow chemical release reporting procedures.**
TRASH STORAGE AREAS				
Is area reasonably clean and uncluttered?	X			
Are trash cans and garbage bins kept covered?	✓			
Is the number and placement of the trash cans sufficient for your facility?	X			

***Any boxes checked "NO" must be resolved in the comments and/additional comments section.**
****N/A = Not Applicable**

III. General Site Conditions and Runoff Management Practices Inspection (Continued)

	Yes	No*	N/A**	Comments
FUELING AREAS				
Is a stocked spill kit available at fuel island?			X	
Is area clean and free of spills?			X	If spill is observed, clean up using dry methods.
VEHICLE AND EQUIPMENT MAINTENANCE AREA				
Is work area reasonably clean?			X	
Are drip pans readily available for leaking vehicles?			X	
Are spill containment materials and stocked cleanup kit readily available?			X	
Are maintenance activities contained within the designed area?			X	
Are bulk hazardous materials/liquids stored outside in secondary containment?			X	
MATERIALS LOADING AND UNLOADING STORAGE AREAS				
Is area reasonably clean and free of litter, debris and loose material?			X	
Is material storage area covered?			X	
Are materials and stocked cleanup kits readily available?			X	
If outdoors, is water from surrounding areas prevented from reaching material storage areas?			X	
Are bulk hazardous material/liquids stored outside in secondary containment?	✓			

IV. Supervisory Responsibilities

	Yes	No*	N/A**	Comments
SUPERVISOR RECORDKEEPING				
Were storm drains inspected after each special event (75 or more people)?	X			
Were parking lots swept during this inspection period?	X			
Were employee storm water training records (tailgate sign in sheets) submitted to the Department Training Office?	X			
Were the monthly statistics submitted to the Division Analyst for inclusion in the annual report?	X			

V. Additional Comments

will contact Storm Water Pollution Prevention Division for stencils and paint.

*Any boxes checked "NO" must be resolved in the comments and/additional comments section.
**N/A = Not Applicable

Inspector/Onsite Supervisor:
Submit the completed Municipal Facility Site Compliance Inspection Checklist by **January 31, 2008** (first inspection), and **September 30, 2008** (second inspection) to your District Manager. A total of two (2) inspections must be conducted each year.

District Manager:
Review and submit all your Municipal Facility Site Compliance Inspection Checklist in one package to Michael Ruiz, (MS 30M), by **February 15, 2008** (first inspection), and **October 15, 2008** (second inspection).

II. General Site Conditions and Runoff Management Practices Inspection

	Yes	No*	N/A**	Comments
GENERAL				
Has the employee performing this inspection had activity-specific Storm Water BMP training this year?	X			
Are activity-specific BMP's in place?	X			
Are your contractors adhering to the minimum BMP's that were listed in the contract?			X	
Was your facilities parking lot(s) swept and pollutant-free since your last inspection?			X	
Is your facility reasonably clean and free of litter and debris?	X			
Is landscaped area irrigation contained within the landscaped area?	X			
Are storm drains stenciled?			X	**If no, contact Storm Water Pollution Prevention Division for stencils and paint.**
Are storm drain inlets reasonably clean and free of debris?			**X**	
Did the storm drains need cleaning during this inspection period?			**X**	**Date cleaned:**
Is area absent of any evidence of a discharge, spill, and or leak?	**X**			
If an observed spill entered the storm drain system, was the spill reported to the Storm Water Hotline?			**X**	**If no, report to the Storm Water Hotline: (619) 235-1000**
If spill was observed, was spill considered minor?			**X**	**If spill, follow chemical release reporting procedures.**
TRASH STORAGE AREAS				
Is area reasonably clean and uncluttered?	**X**			
Are trash cans and garbage bins kept covered?	✓			**Trash can at this site are open**
Is the number and placement of the trash cans sufficient for your facility?	**X**			

***Any boxes checked "NO" must be resolved in the comments and/additional comments section.**
****N/A = Not Applicable**

III. General Site Conditions and Runoff Management Practices Inspection (Continued)

	Yes	No*	N/A**	Comments
FUELING AREAS				
Is a stocked spill kit available at fuel island?			X	
Is area clean and free of spills?			X	**If spill is observed, clean up using dry methods.**
VEHICLE AND EQUIPMENT MAINTENANCE AREA				
Is work area reasonably clean?			X	
Are drip pans readily available for leaking vehicles?			X	
Are spill containment materials and stocked cleanup kit readily available?			X	
Are maintenance activities contained within the designed area?			X	
Are bulk hazardous materials/liquids stored outside in secondary containment?			X	
MATERIALS LOADING AND UNLOADING STORAGE AREAS				
Is area reasonably clean and free of litter, debris and loose material?			X	
Is material storage area covered?			X	
Are materials and stocked cleanup kits readily available?			X	
If outdoors, is water from surrounding areas prevented from reaching material storage areas?			X	
Are bulk hazardous material/liquids stored outside in secondary containment?			X	

IV. Supervisory Responsibilities

	Yes	No*	N/A**	Comments
SUPERVISOR RECORDKEEPING				
Were storm drains inspected after each special event (75 or more people)?			X	
Were parking lots swept during this inspection period?			X	**Date swept:**
Were employee storm water training records (tailgate sign in sheets) submitted to the Department Training Office?	X			
Were the monthly statistics submitted to the Division Analyst for inclusion in the annual report?	X

Inspection Date: December 6, 2007 **Inspection Time:** 10:00 AM
Check One Box: ◆ First Inspection (by January 31) ☐ Second Inspection (by September 30)

I. Facility Information

Facility Name and Number Chicano Park -	
Street Address **1982 National Avenue**	**Zip Code** 92114
Park and Recreation Facility Contact Person **Moises Perez**	**Phone** **619-235-1127**

II. General Site Conditions and Runoff Management Practices Inspection

	Yes	No*	N/A**	Comments
GENERAL				
Has the employee performing this inspection had activity-specific Storm Water BMP training this year?	X			
Are activity-specific BMP's in place?	X			
Are your contractors adhering to the minimum BMP's that were listed in the contract?	X			
Was your facilities parking lot(s) swept and pollutant-free since your last inspection?	X			
Is your facility reasonably clean and free of litter and debris?	X			
Is landscaped area irrigation contained within the landscaped area?	X			
Are storm drains stenciled?	X			**If no, contact Storm Water Pollution Prevention Division for stencils and paint.**
Are storm drain inlets reasonably clean and free of debris?	X			
Did the storm drains need cleaning during this inspection period?			✓	**Date cleaned:**
Is area absent of any evidence of a discharge, spill, and or leak?	X			
If an observed spill entered the storm drain system, was the spill reported to the Storm Water Hotline?			X	**If no, report to the Storm Water Hotline: (619) 235-1000**
If spill was observed, was spill considered minor?			X	**If spill, follow chemical release reporting procedures.**
TRASH STORAGE AREAS				
Is area reasonably clean and uncluttered?	X			
Are trash cans and garbage bins kept covered?	✓			
Is the number and placement of the trash cans sufficient for your facility?	X			

***Any boxes checked "NO" must be resolved in the comments and/additional comments section.**
****N/A = Not Applicable**

III. General Site Conditions and Runoff Management Practices Inspection (Continued)

	Yes	No*	N/A**	Comments
FUELING AREAS				
Is a stocked spill kit available at fuel island?			x	
Is area clean and free of spills?			x	**If spill is observed, clean up using dry methods.**
VEHICLE AND EQUIPMENT MAINTENANCE AREA				
Is work area reasonably clean?			x	
Are drip pans readily available for leaking vehicles?			x	
Are spill containment materials and stocked cleanup kit readily available?			x	
Are maintenance activities contained within the designed area?				
Are bulk hazardous materials/liquids stored outside in secondary containment?			x	
MATERIALS LOADING AND UNLOADING STORAGE AREAS				
Is area reasonably clean and free of litter, debris and loose material?			x	
Is material storage area covered?			x	
Are materials and stocked cleanup kits readily available?			x	
If outdoors, is water from surrounding areas prevented from reaching material storage areas?			x	
Are bulk hazardous material/liquids stored outside in secondary containment?			x	

IV. Supervisory Responsibilities

	Yes	No*	N/A**	Comments
SUPERVISOR RECORDKEEPING				
Were storm drains inspected after each special event (75 or more people)?	x			
Were parking lots swept during this inspection period?	x			**Date swept:**
Were employee storm water training records (tailgate sign in sheets) submitted to the Department Training Office?	x			
Were the monthly statistics submitted to the Division Analyst for inclusion in the annual report?	x

II. General Site Conditions and Runoff Management Practices Inspection

	Yes	No*	N/A**	Comments
GENERAL				
Has the employee performing this inspection had activity-specific Storm Water BMP training this year?	X			
Are activity-specific BMP's in place?	X			
Are your contractors adhering to the minimum BMP's that were listed in the contract?	X			
Was your facilities parking lot(s) swept and pollutant-free since your last inspection?				
Is your facility reasonably clean and free of litter and debris?	X			
Is landscaped area irrigation contained within the landscaped area?	X			
Are storm drains stenciled?			X	**If no, contact Storm Water Pollution Prevention Division for stencils and paint.** "NO STORM DRAINS" IN IMMEDIATE VACINITY
Are storm drain inlets reasonably clean and free of debris?			X	
Did the storm drains need cleaning during this inspection period?			X	**Date cleaned:** " " "
Is area absent of any evidence of a discharge, spill, and or leak?			X	
If an observed spill entered the storm drain system, was the spill reported to the Storm Water Hotline?			X	**If no, report to the Storm Water Hotline: (619) 235-1000**
If spill was observed, was spill considered minor?			X	**If spill, follow chemical release reporting procedures.**
TRASH STORAGE AREAS				
Is area reasonably clean and uncluttered?	X			
Are trash cans and garbage bins kept covered?		X		
Is the number and placement of the trash cans sufficient for your facility?	X			

***Any boxes checked "NO" must be resolved in the comments and/additional comments section.**
****N/A = Not Applicable**

III. General Site Conditions and Runoff Management Practices Inspection (Continued)

	Yes	No*	N/A**	Comments
FUELING AREAS				
Is a stocked spill kit available at fuel island?			X	
Is area clean and free of spills?			X	**If spill is observed, clean up using dry methods.**
VEHICLE AND EQUIPMENT MAINTENANCE AREA				
Is work area reasonably clean?			X	
Are drip pans readily available for leaking vehicles?			X	
Are spill containment materials and stocked cleanup kit readily available?			X	
Are maintenance activities contained within the designed area?			X	
Are bulk hazardous materials/liquids stored outside in secondary containment?			X	
MATERIALS LOADING AND UNLOADING STORAGE AREAS				
Is area reasonably clean and free of litter, debris and loose material?	X			
Is material storage area covered?	X			
Are materials and stocked cleanup kits readily available?				
If outdoors, is water from surrounding areas prevented from reaching material storage areas?	X			
Are bulk hazardous material/liquids stored outside in secondary containment?	X			

IV. Supervisory Responsibilities

	Yes	No*	N/A**	Comments
SUPERVISOR RECORDKEEPING				
Were storm drains inspected after each special event (75 or more people)?	X			
Were parking lots swept during this inspection period?			✓	**Date swept:**
Were employee storm water training records (tailgate sign in sheets) submitted to the Department Training Office?	X			
Were the monthly statistics submitted to the Division Analyst for inclusion in the annual report?	X			

V. Additional Comments

***Any boxes checked "NO" must be resolved in the comments and/additional comments section.**
****N/A = Not Applicable**

Inspector/Onsite Supervisor:
Submit the completed Municipal Facility Site Compliance Inspection Checklist by **January 31, 2008** (first inspection), and **September 30, 2008** (second inspection) to your District Manager. A total of two (2) inspections must be conducted each year.

District Manager:
Review and submit all your Municipal Facility Site Compliance Inspection Checklist in one package to Michael Ruiz, (MS 30M), by **February 15, 2008** (first inspection), and **October 15, 2008** (second inspection).

City of San Diego - Urban Runoff Management Plan

MUNICIPAL FACILITY SITE COMPLIANCE INSPECTION CHECKLIST

This form has been modified specifically for use by San Diego Park and Recreation Department personnel.

Inspector: _____
Site Supervisor: Julie Jones
District Manager: Jarbel Dorgos
Phone Number: 619-235-1143
Date/Time: Jan 10 - 2008
Department #: 444

I. Facility Information

Facility Name & Number	
Allied Gardens Pool #0381	
Street Address	**Zip Code**
6707 Glenroy Ave.	92120
Facility Contact Person	**Phone**
Julie Jones	(619) 235-1143

II. Shared Facility Information

Is there more than one City department and/or division sharing this facility?

X No (skip this section) _____ Yes (complete this section)

Name of City Departments and/or Divisions Sharing Facility	Contact Person and Phone Number	Covered by this Inspection?

III. General Site Conditions and Runoff Management Practices Review

		Yes	No*	N/A**	Comments
General	Employees trained in storm water pollution prevention practices?	✓			
	Common areas of yard reasonably clean and free of litter and debris?	✓			
	Are parking areas generally clean and swept as needed?	✓			
	Are storm drain inlets reasonably clean and free of debris?	✓			
	Is there evidence of discharges, spills, and or leaks in any areas?			✓	
Trash storage areas	Is area reasonably clean and uncluttered?	✓			
	Are trash cans and garbage bins kept covered?	✓			Lids
Fueling areas* **	Is there a roof on fueling area?			✓	
	Is there a mechanism in place for spill overflow protection?			✓	
Vehicle/equipment maintenance area* **	Area reasonably clean and free of spills, leaks, or any other deleterious materials?			✓	
	Is area covered overhead?			✓	
	Dry clean up methods implemented?			✓	
	Are there drip pans readily available for use?			✓	
	Spill containment and cleanup kits readily available?			✓	
	Storage areas covered and properly maintained?			✓	

*If the answer is "No," then record the corrective action or "not required at this time" under "Comments"

**N/A = Not Applicable

***Use N/A if no fueling areas and/or no vehicle/equipment maintenance area

III. General Site Conditions and Runoff Management Practices Review (Continued)

		Yes	No*	N/A**	Comments
Vehicle/equipment washing areas**	Are related activities contained within designated area?			✓	
	Hazardous materials/liquids stored above ground?			✓	
	Are there containment mechanisms in place?			✓	
Materials loading and storage areas	Area reasonably clean and free of litter and debris?	✓			
	Designated area covered overhead?	✓			
Chemical handling areas	Areas reasonably clean and organized?	✓			
	Is area indoors or properly covered?	✓			
	Spill containment cleanup kits readily available?	✓			
	If outdoors, is water from surrounding areas prevented from reaching chemical handling areas?			✓	
	Hazardous materials/liquids stored above ground?	✓			
	Dry clean up methods implemented?			✓	

IV. Water Quality Management Plan (WQMP) Review

		Yes	No*	N/A**	Comments
Facility site map	Identifies drainage areas and direction of flow	✓			
	Identifies location of storm water conveyance system including ditches, inlets and storm drains	✓			
	Identifies location of any existing storm water controls (e.g., berms, filters, grass swales, etc.)	✓			
	Identifies location of building(s) and activity areas (e.g., fueling islands, hazardous materials storage areas, washing areas, etc.)	✓			
Materials/activities used on site	List materials stored and handled on site, including storage location and typical quantities	✓			
	Includes a narrative description of activities conducted on site which have the potential to result in discharges to storm drain system	✓			
Potential Pollutants	Identifies potential pollutants which could be discharged from site given activities conducted at facility	✓			
Best Management Practices (BMP's)	Describes BMP's implemented at facility to deal with each potential pollutant source identified	✓			
	Minimum Department BMP's listed	✓			
	Storm water system regularly inspected/monitored	✓			
Supervisor Recordkeeping	Employee training records	✓			
	Inspection records	✓			

V. Additional Comments

*If the answer is "No," then record the corrective action or "not required at this time" under "Comments"

**N/A = Not Applicable

***Use N/A if no fueling areas and/or no vehicle/equipment maintenance area

Inspectors: Submit this completed checklist by June 1, 2007 to your District Manager.
District Managers: Submit all your checklists in one package to Michael Ruiz, MS 30M, by June 15, 2007.

Check One Box: ☐ First Inspection (by January 31) ☐ Second Inspection (by September 30)

I. Facility Information

Facility Name and Number: MARTIN LUTHER KING JR. POOL # 000568
Street Address: 6401 Skyline Dr
Zip Code: 92115
Park and Recreation Facility Contact Person:
Phone: 619-527-3451

II. General Site Conditions and Runoff Management Practices Inspection

	Yes	No*	N/A**	Comments
GENERAL				
Has the employee performing this inspection had activity-specific Storm Water BMP training this year?	X			
Are activity-specific BMP's in place?	X			
Are your contractors adhering to the minimum BMP's that were listed in the contract?			X	
Was your facilities parking lot(s) swept to remove pollutants since your last inspection?	X			SHARE WITH REC CENTER. SLURRY SEALED ON 1/26/08
Is your facility reasonably clean and free of litter and debris?	X			
Is landscape area irrigation contained on the landscape areas?	X			
Are storm drains stenciled? If no, contact Storm Water Pollution Prevention Division for stencils and paint.		X		
Are storm drain inlets reasonably free of debris?	X			
Did the storm drains need cleaning since your last inspection period?		X		Date cleaned: 10/14/07
Is area free of any evidence of illicit discharges and or illegal dumping?	X			
If an observed spill entered the storm drain system, was the spill reported to the Storm Water Hotline?			X	If no, report to the Storm Water Hotline: (619) 235-1000
If spill was observed, was spill cleaned up?			X	If spill, follow chemical release reporting procedures.
TRASH STORAGE AREAS				
Is area reasonably clean and uncluttered?	X			
Are trash cans and garbage bins covered?			✓	TRASH CANS DO NOT HAVE LIDS
Is the number and placement of trash cans sufficient for your facility?	X			

*Any box checked "NO" must be explained in the comments and/additional comments section
**N/A = Not Applicable

III. Gen[illegible] Site Conditions and [illegible] Management Practices Inspection (Continued)

	Yes	No*	N/A**	Comments
FUEL[illegible] AREAS				
Is a stock[illegible]ill kit available at fu[illegible]			X	
Is area c[illegible]nd free of spills?			X	If spill is observed, clean up using dry methods.
VEHIC[illegible] AND EQUIPMENT MAINTENANCE AREA				
Is work a[illegible]easonably clean?			X	
Are drip [illegible]readily available for [illegible] vehicles?			X	
Are spill [illegible]ironment materials and st[illegible] cleanup k[illegible]adily available?	X			
Are main[illegible]ce activities contain[illegible] designed [illegible]	X			
Are bulk [illegible]dous materials/liqu[illegible]s stor[illegible]ainer in secon[illegible]ontainment?			X	
MATER[illegible]S LOADING AND UN[illegible]ADING STORAGE AREAS				
Is area re[illegible]bly clean and free o[illegible] and loose [illegible]erial?			X	
Is materi[illegible]age area covered?			X	
Are mater[illegible] and stocked cleanup [illegible] availabl[illegible]			X	
If outdoor[illegible] water from surrounding [illegible] prevented [illegible] reaching material [illegible]			X	
Are bulk [illegible]dous material/liquids stor[illegible]ainer in secon[illegible]ontainment?			X	

IV. Supervisory Responsibilites

	Yes	No*	N/A**	Comments
SUPER[illegible]OR RECORDKEEPING				
Were sto[illegible]rms inspected after [illegible] event (75 [illegible]more people)?			X	
Were par[illegible]ots swept during th[illegible] period?			✓	Date swept: SLURRY SEALED 1/26/08
Were emp[illegible]ee storm water trainin[illegible] (tailgate [illegible]e sheets) submitted [illegible] Departm[illegible]raining Office?	X			
Were the [illegible]nly statistics submit[illegible] Division [illegible]st for inclusion in the [illegible]eport?	X			

V. Additional Comments

*Any box[illegible]ecked "NO" must be [illegible] in the comments and/additional comments section.
**N/A = N[illegible]pplicable

Inspector/Onsite Supervisor:
Submit the completed Municipal Facility Site Compliance Inspection Checklist by **January 31, 2008** (first inspection) and **September 30, 2008** (second inspection) to your District Manager. A total of two (2) inspections must be conducted each year.

District Manager:
Review and submit all your Municipal Facility Site Compliance Inspection Checklist in one package to Michael Ruiz, (M[illegible]0M), by **February [illegible], 2008** (first inspection), and **October 15, 2008** (second inspection).

Were the monthly statistics submitted to the Division Analyst for inclusion in the annual report?	X			

V. Additional Comments

***Any boxes checked "NO" must be resolved in the comments and/additional comments section.**
****N/A = Not Applicable**

Inspector/Onsite Supervisor:
Submit the completed Municipal Facility Site Compliance Inspection Checklist by **January 31, 2008** (first inspection), and **September 30, 2008** (second inspection) to your District Manager. A total of two (2) inspections must be conducted each year.

District Manager:
Review and submit all your Municipal Facility Site Compliance Inspection Checklist in one package to Michael Ruiz, (MS 30M), by **February 15, 2008** (first inspection), and **October 15, 2008** (second inspection).

City of San Diego - Urban Runoff Management Plan

MUNICIPAL FACILITY SITE COMPLIANCE INSPECTION CHECKLIST

This form has been modified specifically for use by San Diego Park and Recreation Department personnel.

Inspector: Albert Hara

Site Supervisor: Albert Hara

District Manager: Marilyn Stern

Division: Community Parks II **District Number:** 42

Site Supervisor Phone Number: 424-0472

Inspection Date: 12/27/07 **Inspection Time:** 1:00 p.m.

Check One Box: ■ First Inspection (by January 31) ☐ Second Inspection (by September 30)

I. Facility Information

Facility Name and Number	
San Ysidro Community Activity Center	
Street Address 179 Diza Road	**Zip Code** 92173
Park and Recreation Facility Contact Person Albert Hara	**Phone** (619)424-0459

II. General Site Conditions and Runoff Management Practices Inspection

	Yes	No*	N/A**	Comments
GENERAL				
Has the employee performing this inspection had activity-specific Storm Water BMP training this year?	X			
Are activity-specific BMP's in place?	X			
Are your contractors adhering to the minimum BMP's that were listed in the contract?	X			
Was your facilities parking lot(s) swept and pollutant-free since your last inspection?	X			
Is your facility reasonably clean and free of litter and debris?	X			
Is landscaped area irrigation contained within the landscaped area?	X			
Are storm drains stenciled?	✓			**If no, contact Storm Water Pollution Prevention Division for stencils and paint.**
Are storm drain inlets reasonably clean and free of debris?	X			
Did the storm drains need cleaning during this inspection period?			✓	**Date cleaned:**
Is area absent of any evidence of a discharge, spill, and or leak?	✓			
If an observed spill entered the storm drain system, was the spill reported to the Storm Water Hotline?			X	**If no, report to the Storm Water Hotline: (619) 235-1000**
If spill was observed, was spill considered minor?			X	**If spill, follow chemical release reporting procedures.**
TRASH STORAGE AREAS				
Is area reasonably clean and uncluttered?	X			
Are trash cans and garbage bins kept covered?			✓	
Is the number and placement of the trash cans sufficient for your facility?	X			

***Any boxes checked "NO" must be resolved in the comments and/additional comments section.**

****N/A = Not Applicable**

III. General Site Conditions and Runoff Management Practices Inspection (Continued)

	Yes	No*	N/A**	Comments
FUELING AREAS				
Is a stocked spill kit available at fuel island?			X	
Is area clean and free of spills?			X	**If spill is observed, clean up using dry methods.**
VEHICLE AND EQUIPMENT MAINTENANCE AREA				
Is work area reasonably clean?	X			
Are drip pans readily available for leaking vehicles?			X	
Are spill containment materials and stocked cleanup kit readily available?	X			
Are maintenance activities contained within the designed area?	X			
Are bulk hazardous materials/liquids stored outside in secondary containment?	X			
MATERIALS LOADING AND UNLOADING STORAGE AREAS				
Is area reasonably clean and free of litter, debris and loose material?			X	
Is material storage area covered?			X	
Are materials and stocked cleanup kits readily available?			X	
If outdoors, is water from surrounding areas prevented from reaching material storage areas?			X	
Are bulk hazardous material/liquids stored outside in secondary containment?			X	

IV. Supervisory Responsibilities

	Yes	No*	N/A**	Comments
SUPERVISOR RECORDKEEPING				
Were storm drains inspected after each special event (75 or more people)?	X			
Were parking lots swept during this inspection period?	X			**Date swept: 12/21/07**
Were employee storm water training records (tailgate sign in sheets) submitted to the Department Training Office?	X			
Were the monthly statistics submitted to the Division Analyst for inclusion in the annual report?	X

Facility Name **Skyview Neighborhood Park**	
Street Address **7726 Skyline Drive**	**Zip Code 92114**
Facility Contact Person **Angelina Allen**	**Phone (619) 527-3486**

II. Shared Facility Information

Is there more than one City department and/or division sharing this facility?

__X__ No (skip this section) _____ Yes (complete this section)

Name of City Departments and/or Divisions Sharing Facility	Contact Person and Phone Number	Covered by this Inspection?

III. General Site Conditions and Runoff Management Practices Review

		Yes	No*	N/A**	Comments
General	Employees trained in storm water pollution prevention practices?	x			
	Common areas of yard reasonably clean and free of litter and debris?	x			
	Are parking areas generally clean and swept as needed?	x			
	Are storm drain inlets reasonably clean and free of debris?	x			
	Is there evidence of discharges, spills, and or leaks in any areas?			✓	No spills
Trash storage areas	Is area reasonably clean and uncluttered?			x	
	Are trash cans and garbage bins kept covered?	x			
Fueling areas**	Is there a roof on fueling area?			x	
	Is there a mechanism in place for spill overflow protection?			x	
Vehicle/equipment maintenance area**	Area reasonably clean and free of spills, leaks, or any other deleterious materials?			x	
	Is area covered overhead?			x	
	Dry clean up methods implemented?			x	
	Are there drip pans readily available for use?			x	
	Spill containment and cleanup kits readily available?			x	
	Storage areas covered and properly maintained?			x	

*If the answer is "No." then record the corrective action or "not required at this time" under "Comments"

**N/A = Not Applicable
*** Use N/A if no vehicle/equipment washing areas.

III. General Site Conditions and Runoff Management Practices Review (Continued)

		Yes	No	N/A*	Comments
Vehicle/equipment washing areas**	Are related activities contained within designated area?			x	
	Hazardous materials/liquids stored above ground?			x	
	Are there containment mechanisms in place?			x	
Materials loading and storage areas	Area reasonably clean and free of litter and debris?			x	
	Designated area covered overhead?			x	
Chemical handling areas	Areas reasonably clean and organized?			x	
	Is area indoors or properly covered?			x	
	Spill containment cleanup kits readily available?			x	
	If outdoors, is water from surrounding areas prevented from reaching chemical handling areas?			x	
	Hazardous materials/liquids stored above ground?			x	
	Dry clean up methods implemented?			x	

IV. Water Quality Management Plan (WQMP) Review

		Yes	No	N/A*	Comments
Facility site map	Identifies drainage areas and direction of flow	X			
	Identifies location of storm water conveyance system including ditches, inlets and storm drains	X			
	Identifies location of any existing storm water controls (e.g., berms, filters, grass swales, etc.)	X			
	Identifies location of building(s) and activity areas (e.g., fueling islands, hazardous materials storage areas, washing areas, etc.)			X	
Materials/activities used on site	List materials stored and handled on site, including storage location and typical quantities			X	
	Includes a narrative description of activities conducted on site which have the potential to result in discharges to storm drain system	x			
Potential Pollutants	Identifies potential pollutants which could be discharged from site given activities conducted at facility	X			
Best Management Practices (BMP's)	Describes BMP's implemented at facility to deal with **each** potential pollutant source identified	X			
	Minimum Department BMP's listed	X			
	Storm water system regularly inspected/monitored	x			
Supervisor Recordkeeping	Employee training records	X			
	Inspection records	X			

V. Additional Comments

*If the answer is "No." then record the corrective action or "not required at this time" under "Comments"
**N/A = Not Applicable
*** Use N/A if no vehicle/equipment washing areas.

Inspector: Submit this completed checklist by June 1, 2007 to your District Manager.
District Manager: Submit all your checklists in one package to Michael Ruiz, MS 30M by June 15, 2007.

Is work area reasonably clean?			✓	
Are drip pans readily available for leaking vehicles?			✓	
Are spill containment materials and stocked cleanup kit readily available?			✓	
Are maintenance activities contained within the designed area?			✓	
Are bulk hazardous materials/liquids stored outside in secondary containment?			✓	
MATERIALS LOADING AND UNLOADING STORAGE AREAS				
Is area reasonably clean and free of litter, debris and loose material?	✓			
Is material storage area covered?	✓			
Are materials and stocked cleanup kits readily available?			✓	
If outdoors, is water from surrounding areas prevented from reaching material storage areas?	✓			
Are bulk hazardous material/liquids stored outside in secondary containment?			✓	

IV. Supervisory Responsibilities

	Yes	No*	N/A**	Comments
SUPERVISOR RECORDKEEPING				
Were storm drains inspected after each special event (75 or more people)?			✓	
Were parking lots swept during this inspection period?			✓	**Date swept:**
Were employee storm water training records (tailgate sign in sheets) submitted to the Department Training Office?			✓	
Were the monthly statistics submitted to the Division Analyst for inclusion in the annual report?	✓			Not yet in 2008

V. Additional Comments

Cat IV: Recreation staff issues Permits & GDP/Storm water BMPs
Permitting Party should follow up.

***Any boxes checked "NO" must be resolved in the comments and/additional comments section.**

II. General Site Conditions and Runoff Management Practices Inspection

	Yes	No*	N/A**	Comments
GENERAL				
Has the employee performing this inspection had activity-specific Storm Water BMP training this year?	✓			
Are activity-specific BMP's in place?	✓			
Are your contractors adhering to the minimum BMP's that were listed in the contract?	✓			
Was your facilities parking lot(s) swept and pollutant-free since your last inspection?	✓			
Is your facility reasonably clean and free of litter and debris?	✓			
Is landscaped area irrigation contained within the landscaped area?	✓			
Are storm drains stenciled?			✓	**If no, contact Storm Water Pollution Prevention Division for stencils and paint.**
Are storm drain inlets reasonably clean and free of debris?	✓			
Did the storm drains need cleaning during this inspection period?			✓	**Date cleaned:**
Is area absent of any evidence of a discharge, spill, and or leak?	✓			
If an observed spill entered the storm drain system, was the spill reported to the Storm Water Hotline?				**If no, report to the Storm Water Hotline: (619) 235-1000**
If spill was observed, was spill considered minor?				**If spill, follow chemical release reporting procedures.**
TRASH STORAGE AREAS				
Is area reasonably clean and uncluttered?	✓			
Are trash cans and garbage bins kept covered?	✓			
Is the number and placement of the trash cans sufficient for your facility?	✓			

***Any boxes checked "NO" must be resolved in the comments and/additional comments section.**
****N/A = Not Applicable**

MUNICIPAL FACILITY SITE COMPLIANCE INSPECTION CHECKLIST

Updated June 2003

This form has been modified specifically for use by San Diego Park and Recreation Department personnel.

Inspector: CORY PETERSON
Site Supervisor: Richard Goldkamp
Phone Number: 858-566-2852
Date/Time: 1-31-09

Directions: Complete a site inspection checklist for every facility; each maintenance assessment district; each joint use site; and open space areas (that have a facility or where maintenance activity has occurred). If not certain if an area needs to be inspected, contact Div Brasted at 619/23-51124. Note: regional parks require only one site inspection checklist.

I. Facility Information

Facility Name	
PENASQUITOS EAST MAINTENANCE ASSESSMENT DISTRICT	
Street Address	**Zip Code** 92128-92129
Facility Contact Person CORY PETERSON / G.M.M.	**Phone** 619685-1356

II. Shared Facility Information

Is there more than one City department and/or division sharing this facility?
__X__ No (skip this section) _____ Yes (complete this section)

Name of City Departments and/or Divisions Sharing Facility	Contact Person and Phone Number	Covered by this Inspection?

III. General Site Conditions and Runoff Management Practices Review

		Yes	No	N/A*	Comments
General	Employees trained in storm water pollution prevention practices?	X			
	Common areas of yard reasonably clean and free of litter and debris?	X			
	Are parking areas generally clean and swept as needed?			X	
	Are storm drain inlets reasonably clean and free of debris?	X			
	Is there evidence of discharges, spills, and or leaks in any areas?			✓	
Trash storage areas	Is area reasonably clean and uncluttered?	X			
	Are trash cans and garbage bins kept covered?			X	
Fueling areas**	Is there a roof on fueling area?			X	
	Is there a mechanism in place for spill overflow protection?			X	
Vehicle/equipment maintenance area**	Area reasonably clean and free of spills, leaks, or any other deleterious materials?			X	
	Is area covered overhead?			X	
	Dry clean up methods implemented?			X	
	Are there drip pans readily available for use?			X	
	Spill containment and cleanup kits readily available?	✓			
	Storage areas covered and properly maintained?			X	

*N/A = Not Applicable; ** Use N/A if no fueling areas and/or no vehicle/equipment maintenance area.

III. General Site Conditions and Runoff Management Practices Review (Continued)

		Yes	No	N/A*	Comments
Vehicle/equipment washing areas**	Are related activities contained within designated area?			X	
	Hazardous materials/liquids stored above ground?			X	
	Are there containment mechanisms in place?			X	
Materials loading and storage areas	Area reasonably clean and free of litter and debris?			X	
	Designated area covered overhead?			X	
Chemical handling areas	Areas reasonably clean and organized?			X	
	Is area indoors or properly covered?			X	
	Spill containment cleanup kits readily available?	X			SPILL KIT IN CAR
	If outdoors, is water from surrounding areas prevented from reaching chemical handling areas?			X	
	Hazardous materials/liquids stored above ground?			X	
	Dry clean up methods implemented?			X	

IV. Water Quality Management Plan (WQMP) Review

		Yes	No	N/A*	Comments
Facility site map	Identifies drainage areas and direction of flow	X			
	Identifies location of storm water conveyance system including ditches, inlets and storm drains	X			
	Identifies location of any existing storm water controls (e.g., berms, filters, grass swales, etc.)	X			
	Identifies location of building(s) and activity areas (e.g., fueling islands, hazardous materials storage areas, washing areas, etc.)			X	
Materials/activities used on site	List materials stored and handled on site, including storage location and typical quantities			X	NO STORAGE
	Includes a narrative description of activities conducted on site which have the potential to result in discharges to storm drain system	X			
Potential Pollutants	Identifies potential pollutants which could be discharged from site given activities conducted at facility	X			
Best Management Practices (BMP's)	Describes BMP's implemented at facility to deal with **each** potential pollutant source identified	X			
	Minimum Department BMP's listed	X			
	Storm water system regularly inspected/monitored	X			
Supervisor Recordkeeping	Employee training records	X			
	Inspection records	X			

*N/A = Not Applicable; ** Use N/A if no vehicle/equipment washing areas.

V. Additional Comments

RIGHT OF WAY and MEDIAN MAINTENANCE ONLY / NO STORAGE OR FUELING ON SITE. SPILL KIT IN VEHICLE.

Site Supervisor: Submit this checklist to your District Manager by **September 2, 2003.**
District Managers: Forward this checklist to Div Brasted at MS 39 by **September 8, 2003.**

NOTE: Div Brasted is the Park and Recreation Department Liaison to the Citywide Storm Water Pollution Prevention Program. Div will submit all Park & Recreation site compliance checklists to the Storm Water Division in September. If you have any questions, contact Div at 619/23-51124 or the Training Office.

MUNICIPAL FACILITY SITE COMPLIANCE INSPECTION CHECKLIST

Updated June 2003

This form has been modified specifically for use by San Diego Park and Recreation Department personnel.

Inspector: CORY PETERSON
Site Supervisor: Richard Goldkamp
Phone Number: 858-566-2852
Date/Time: 1-31-08

Directions: Complete a site inspection checklist for every facility; each maintenance assessment district; each joint use site; and open space areas (that have a facility or where maintenance activity has occurred). If not certain if an area needs to be inspected, contact Div Brasted at 619/23-51124. Note: regional parks require only one site inspection checklist.

I. Facility Information

Facility Name RANCHO BERNARDO MAINTENANCE ASSESSMENT DISTRICT	
Street Address	**Zip Code** 92127-92128
Facility Contact Person CORY PETERSON / G.M.M.	**Phone** 619685-1356

II. Shared Facility Information

Is there more than one City department and/or division sharing this facility?

X No (skip this section) _____ Yes (complete this section)

Name of City Departments and/or Divisions Sharing Facility	Contact Person and Phone Number	Covered by this Inspection?

III. General Site Conditions and Runoff Management Practices Review

		Yes	No	N/A*	Comments
General	Employees trained in storm water pollution prevention practices?	X			
	Common areas of yard reasonably clean and free of litter and debris?	X			
	Are parking areas generally clean and swept as needed?			X	
	Are storm drain inlets reasonably clean and free of debris?	X			
	Is there evidence of discharges, spills, and or leaks in any areas?			✓	
Trash storage areas	Is area reasonably clean and uncluttered?	X			
	Are trash cans and garbage bins kept covered?			X	
Fueling areas**	Is there a roof on fueling area?			X	
	Is there a mechanism in place for spill overflow protection?			X	
Vehicle/equipment maintenance area**	Area reasonably clean and free of spills, leaks, or any other deleterious materials?			X	
	Is area covered overhead?			X	
	Dry clean up methods implemented?			X	
	Are there drip pans readily available for use?			X	
	Spill containment and cleanup kits readily available?	X			
	Storage areas covered and properly maintained?			X	

*N/A = Not Applicable; ** Use N/A if no fueling areas and/or no vehicle/equipment maintenance area.

III. General Site Conditions and Runoff Management Practices Review (Continued)

		Yes	No	N/A*	Comments
Vehicle/equipment washing areas**	Are related activities contained within designated area?			X	
	Hazardous materials/liquids stored above ground?			X	
	Are there containment mechanisms in place?			X	
Materials loading and storage areas	Area reasonably clean and free of litter and debris?			X	
	Designated area covered overhead?			X	
Chemical handling areas	Areas reasonably clean and organized?			X	
	Is area indoors or properly covered?			X	
	Spill containment cleanup kits readily available?	X			SPILL KIT IN CAR
	If outdoors, is water from surrounding areas prevented from reaching chemical handling areas?			X	
	Hazardous materials/liquids stored above ground?			X	
	Dry clean up methods implemented?			X	

IV. Water Quality Management Plan (WQMP) Review

		Yes	No	N/A*	Comments
Facility site map	Identifies drainage areas and direction of flow	X			
	Identifies location of storm water conveyance system including ditches, inlets and storm drains	X			
	Identifies location of any existing storm water controls (e.g., berms, filters, grass swales, etc.)	X			
	Identifies location of building(s) and activity areas (e.g., fueling islands, hazardous materials storage areas, washing areas, etc.)			X	
Materials/activities used on site	List materials stored and handled on site, including storage location and typical quantities			X	NO STORAGE
	Includes a narrative description of activities conducted on site which have the potential to result in discharges to storm drain system	X			
Potential Pollutants	Identifies potential pollutants which could be discharged from site given activities conducted at facility	X			
Best Management Practices (BMP's)	Describes BMP's implemented at facility to deal with **each** potential pollutant source identified	X			
	Minimum Department BMP's listed	X			
	Storm water system regularly inspected/monitored	X			
Supervisor Recordkeeping	Employee training records	X			
	Inspection records	X			

*N/A = Not Applicable; ** Use N/A if no vehicle/equipment washing areas.

V. Additional Comments

RIGHT OF WAY and MEDIAN MAINTENANCE ONLY / NO STORAGE OR FUELING ON SITE. SPILL KIT IN VEHICLE.

Site Supervisor: Submit this checklist to your District Manager by **September 2, 2003.**
District Managers: Forward this checklist to Div Brasted at MS 39 by **September 8, 2003.**

NOTE: Div Brasted is the Park and Recreation Department Liaison to the Citywide Storm Water Pollution Prevention Program. Div will submit all Park & Recreation site compliance checklists to the Storm Water Division in September. If you have any questions, contact Div at 619/23-51124 or the Training Office.

II. General Site Conditions and Runoff Management Practices Inspection

	Yes	No*	N/A**	Comments
GENERAL				
Has the employee performing this inspection had activity-specific Storm Water BMP training this year?	X			
Are activity-specific BMP's in place?	X			
Are your contractors adhering to the minimum BMP's that were listed in the contract?	X			
Was your facilities parking lot(s) swept and pollutant-free since your last inspection?			X	
Is your facility reasonably clean and free of litter and debris?	X			
Is landscaped area irrigation contained within the landscaped area?	X			
Are storm drains stenciled?			X	**If no, contact Storm Water Pollution Prevention Division for stencils and paint.**
Are storm drain inlets reasonably clean and free of debris?	**X**			
Did the storm drains need cleaning during this inspection period?			✓	**Date cleaned:**
Is area absent of any evidence of a discharge, spill, and or leak?			✓	
If an observed spill entered the storm drain system, was the spill reported to the Storm Water Hotline?			**X**	**If no, report to the Storm Water Hotline: (619) 235-1000**
If spill was observed, was spill considered minor?			**X**	**If spill, follow chemical release reporting procedures.**
TRASH STORAGE AREAS				
Is area reasonably clean and uncluttered?			**X**	
Are trash cans and garbage bins kept covered?			**X**	
Is the number and placement of the trash cans sufficient for your facility?			**X**	

***Any boxes checked "NO" must be resolved in the comments and/additional comments section.**
****N/A = Not Applicable**

III. General Site Conditions and Runoff Management Practices Inspection (Continued)

	Yes	No*	N/A**	Comments
FUELING AREAS				
Is a stocked spill kit available at fuel island?			X	
Is area clean and free of spills?			X	**If spill is observed, clean up using dry methods.**
VEHICLE AND EQUIPMENT MAINTENANCE AREA				
Is work area reasonably clean?			X	
Are drip pans readily available for leaking vehicles?			X	
Are spill containment materials and stocked cleanup kit readily available?			X	
Are maintenance activities contained within the designed area?			X	
Are bulk hazardous materials/liquids stored outside in secondary containment?			X	
MATERIALS LOADING AND UNLOADING STORAGE AREAS				
Is area reasonably clean and free of litter, debris and loose material?			X	
Is material storage area covered?			X	
Are materials and stocked cleanup kits readily available?			X	
If outdoors, is water from surrounding areas prevented from reaching material storage areas?			X	
Are bulk hazardous material/liquids stored outside in secondary containment?			X	

IV. Supervisory Responsibilities

	Yes	No*	N/A**	Comments
SUPERVISOR RECORDKEEPING				
Were storm drains inspected after each special event (75 or more people)?			X	
Were parking lots swept during this inspection period?			X	**Date swept:**
Were employee storm water training records (tailgate sign in sheets) submitted to the Department Training Office?			X	
Were the monthly statistics submitted to the Division Analyst for inclusion in the annual report?			X

Has the employee performing this inspection had activity-specific Storm Water BMP training this year?	✓			
Are activity-specific BMP's in place?	✓			
Are your contractors adhering to the minimum BMP's that were listed in the contract?	✓			
Was your facilities parking lot(s) swept and pollutant-free since your last inspection?			✓	No Parking lots
Is your facility reasonably clean and free of litter and debris?	✓			
Is landscaped area irrigation contained within the landscaped area?	✓			
Are storm drains stenciled?	✓			**If no, contact Storm Water Pollution Prevention Division for stencils and paint.**
Are storm drain inlets reasonably clean and free of debris?	✓			
Did the storm drains need cleaning during this inspection period?			✓	**Date cleaned:**
Is area absent of any evidence of a discharge, spill, and or leak?	✓			
If an observed spill entered the storm drain system, was the spill reported to the Storm Water Hotline?			✓	**If no, report to the Storm Water Hotline: (619) 235-1000**
If spill was observed, was spill considered minor?			✓	**If spill, follow chemical release reporting procedures.**
TRASH STORAGE AREAS				
Is area reasonably clean and uncluttered?			✓	
Are trash cans and garbage bins kept covered?			✓	
Is the number and placement of the trash cans sufficient for your facility?			✓	

*Any boxes checked "NO" must be resolved in the comments and/additional comments section.
**N/A = Not Applicable

III. General Site Conditions and Runoff Management Practices Inspection (Continued)

	Yes	No*	N/A**	Comments
FUELING AREAS				
Is a stocked spill kit available at fuel island?			✓	
Is area clean and free of spills?			✓	If spill is observed, clean up using dry methods.
VEHICLE AND EQUIPMENT MAINTENANCE AREA				
Is work area reasonably clean?			✓	
Are drip pans readily available for leaking vehicles?			✓	
Are spill containment materials and stocked cleanup kit readily available?			✓	
Are maintenance activities contained within the designed area?			✓	
Are bulk hazardous materials/liquids stored outside in secondary containment?			✓	
MATERIALS LOADING AND UNLOADING STORAGE AREAS				
Is area reasonably clean and free of litter, debris and loose material?			✓	
Is material storage area covered?			✓	
Are materials and stocked cleanup kits readily available?			✓	
If outdoors, is water from surrounding areas prevented from reaching material storage areas?			✓	
Are bulk hazardous material/liquids stored outside in secondary containment?			✓	

IV. Supervisory Responsibilities

	Yes	No*	N/A**	Comments
SUPERVISOR RECORDKEEPING				
Were storm drains inspected after each special event (75 or more people)?			✓	
Were parking lots swept during this inspection period?			✓	Date swept:
Were employee storm water training records (tailgate sign in sheets) submitted to the Department Training Office?	✓			
Were the monthly statistics submitted to the Division Analyst for inclusion in the annual report?			✓	

V. Additional Comments

Is landscaped area irrigation contained within the landscaped area?	X			
Are storm drains stenciled? If no, contact Storm Water Pollution Prevention Division for stencils and paint.	✓			Storm water is trying to locate stencils. Pending
Are storm drain inlets reasonably clean and free of debris?	X			
Did the storm drains need cleaning during this inspection period?	X			Date cleaned: Inlets only, dates are as needed
Is area absent of any evidence of a discharge, spill, and or leak?	X			
If an observed spill entered the storm drain system, was the spill reported to the Storm Water Hotline?			X	If no, report to the Storm Water Hotline: (619) 235-1000
If spill was observed, was spill considered minor?			X	If spill, follow chemical release reporting procedures.
TRASH STORAGE AREAS				
Is area reasonably clean and uncluttered?	X			
Are trash cans and garbage bins kept covered?	X			
Is the number and placement of the trash cans sufficient for your facility?	X			

**Any boxes checked "NO" must be resolved in the comments and/additional comments section.
**N/A = Not Applicable

III. General Site Conditions and Runoff Management Practices Inspection (Continued)

	Yes	No*	N/A**	Comments
FUELING AREAS				
Is a stocked spill kit available at fuel island?			X	
Is area clean and free of spills?			X	If spill is observed, clean up using dry methods.
VEHICLE AND EQUIPMENT MAINTENANCE AREA				
Is work area reasonably clean?	X			
Are drip pans readily available for leaking vehicles?			X	
Are spill containment materials and stocked cleanup kit readily available?	X			
Are maintenance activities contained within the designed area?	X			
Are bulk hazardous materials/liquids stored outside in secondary containment?			X	
MATERIALS LOADING AND UNLOADING STORAGE AREAS				
Is area reasonably clean and free of litter, debris and loose material?			X	
Is material storage area covered?			X	
Are materials and stocked cleanup kits readily available?			X	
If outdoors, is water from surrounding areas prevented from reaching material storage areas?			X	
Are bulk hazardous material/liquids stored outside in secondary containment?			X	

IV. Supervisory Responsibilites

	Yes	No*	N/A**	Comments
SUPERVISOR RECORDKEEPING				
Were storm drains inspected after each special event (75 or more people)?	X			
Were parking lots swept during this inspection period?	X			Date swept: AFTER MAJOR Special Events & Weekly
Were employee storm water training records (tailgate sign in sheets) submitted to the Department Training Office?	X			
Were the monthly statistics submitted to the Division Analyst for inclusion in the annual report?	X			

V. Additional Comments

MOST Areas are swept weekly. Major Special Events MUST PROVIDE SWEEPING PER PERMIT

***Any boxes checked "NO" must be resolved in the comments and/additional comments section.**

Are storm drains stenciled?	X			**If no, contact Storm Water Pollution Prevention Division for stencils and paint.**
Are storm drain inlets reasonably clean and free of debris?	X			
Did the storm drains need cleaning during this inspection period?			✓	**Date cleaned:**
Is area absent of any evidence of a discharge, spill, and or leak?	X			
If an observed spill entered the storm drain system, was the spill reported to the Storm Water Hotline?			X	**If no, report to the Storm Water Hotline: (619) 235-1000**
If spill was observed, was spill considered minor?			X	**If spill, follow chemical release reporting procedures.**
TRASH STORAGE AREAS				
Is area reasonably clean and uncluttered?	X			
Are trash cans and garbage bins kept covered?	X			
Is the number and placement of the trash cans sufficient for your facility?	X			

***Any boxes checked "NO" must be resolved in the comments and/additional comments section.**
****N/A = Not Applicable**

III. General Site Conditions and Runoff Management Practices Inspection (Continued)

	Yes	No*	N/A**	Comments
FUELING AREAS				
Is a stocked spill kit available at fuel island?			X	
Is area clean and free of spills?			X	**If spill is observed, clean up using dry methods.**
VEHICLE AND EQUIPMENT MAINTENANCE AREA				
Is work area reasonably clean?	X			
Are drip pans readily available for leaking vehicles?	X			
Are spill containment materials and stocked cleanup kit readily available?	X			
Are maintenance activities contained within the designed area?			X	
Are bulk hazardous materials/liquids stored outside in secondary containment?			X	
MATERIALS LOADING AND UNLOADING STORAGE AREAS				
Is area reasonably clean and free of litter, debris and loose material?	X			
Is material storage area covered?	X			
Are materials and stocked cleanup kits readily available?	X			
If outdoors, is water from surrounding areas prevented from reaching material storage areas?			X	
Are bulk hazardous material/liquids stored outside in secondary containment?			X	

IV. Supervisory Responsibilities

	Yes	No*	N/A**	Comments
SUPERVISOR RECORDKEEPING				
Were storm drains inspected after each special event (75 or more people)?	X			
Were parking lots swept during this inspection period?	X			**Date swept:**
Were employee storm water training records (tailgate sign in sheets) submitted to the Department Training Office?	X			
Were the monthly statistics submitted to the Division Analyst for inclusion in the annual report?				

V. Additional Comments

*Any boxes checked "NO" must be resolved in the comments and/additional comments section.

2	Are activity-specific BMPs in place?	X			
3	Are your contractors adhering to the minimum BMPs that were listed in the contract?	X			
4	Is your facility reasonably clean and free of litter and debris?	X			
5	Are parking lots reasonably clean and free of debris? If sweeping the lot, note estimated substance and weight of debris in tons.	X			
6	Is landscaped area irrigation contained within the landscaped area?	X			
7	Are pesticides/herbicides/fertilizers minimized where feasible?	X			
8	Are storm drains stenciled? If no, contact Storm Water Pollution Prevention Division for stencils and paint.	X			
9	Are storm drain inlets clean and free of debris?	X			
10	If cleaning of the storm drain was needed, note estimated substance and weight of debris (in tons) since last inspection.	X			
11	Is area absent of any evidence of a discharge, spill, and or leak?	X			
12	If a minor spill is observed entering the storm drain system during the inspection, have you reported it to the Storm Water hotline (619-235-1000)? (For significant spills also fill out a 24-hour discharge form).			X	NO SPILLS TO REPORT
Trash storage areas					
13	Is area reasonably clean and uncluttered?	X			
14	Are trash cans and garbage bins kept covered?	**X**			
15	Is the number and placement of the trash cans sufficient for your facility?	X			

	Question	Y	N	N / A	(If "NO") Resolution
Fueling areas					
16	Is a stocked spill kit available at fuel island?	X			
17	Is area clean and free of spills? If spill is observed, clean up using dry methods.	X			
Vehicle/equipment maintenance area					
18	Is work area reasonably clean?			X	
19	Are drip pans readily available for leaking vehicles?			X	
20	Are spill containment materials and stocked cleanup kits readily available?			X	
21	Are maintenance activities contained within the designated area?			X	
22	Are bulk hazardous materials/liquids stored outside in secondary containment?			X	
Materials loading/unloading and storage areas					
23	Is area reasonably clean and free of litter, debris and loose material?			X	
24	Is materials storage area covered?			X	
25	Are materials and stocked cleanup kits readily available?			X	
26	If outdoors, is water from surrounding areas prevented from reaching material storage areas?			X	
27	Are bulk hazardous materials/liquids stored outside in secondary containment?			**X**	
Other Important Areas for inspection					
28	Are the BMPs installed properly?	X			
29	Are BMPs in good working condition? If no, they need to be replaced.	**X**			

30. For any ineffective BMPs (i.e., the wrong BMP is used), describe an effective replacement BMP and update your URMP section.

City of San Diego - Urban Runoff Management Plan

ANNUAL MUNICIPAL FACILITY SITE COMPLIANCE INSPECTION CHECKLIST

Inspector: S. A. Ramirez
Phone Number: 858-492-5017
Date/Time: January 15, 2008 11:00AM

I. Facility Information

Facility Name		
City of San Diego Environmental Services Department Administrative Headquarters		
Street Address 9601 Ridgehaven Ct.		Zip Code 92123
Facility Contact Person Steven A. Ramirez		Phone 858-492-5017
Standard Industrial Classification Code	Waste Discharge Identification Number	APN No.

II. Shared Facility Information

Is there more than one City department and/or division sharing this facility?

_____ No (skip this section) ___X___ Yes (complete this section)

Name of City Departments and/or Divisions Sharing Facility	Contact Person and Phone Number	Covered by this Inspection?
Energy, Sustainability & Environmental Protection Division	Tom Blair – 858-492-6001	Yes
Waste Reduction & Disposal Division	Kip Sturdevan – 858-573-1214	Yes
Office of the Director	Rochelle Monroe – 858-573-1298	Yes
Development Services Department – Inspection Services Division	Joe Harris – 858-492-5070	Yes

III. General Site Conditions and Runoff Management Practices Review

		Y*	N*	N/A	Comments
General	Employees trained in storm water pollution prevention practices?	X			
	Common areas of yard reasonably clean and free of litter and debris?	X			
	Are parking areas generally clean and swept as needed?	X			
	Are storm drain inlets reasonably clean and free of debris?	X			
	Is there evidence of discharges, spills, and or leaks in any areas?		X		
Trash storage areas	Is area reasonably clean and uncluttered?	X			
	Are trash cans and garbage bins kept covered?	X			
Fueling areas	Is there a roof on fueling area?			X	
	Is there a mechanism in place for spill overflow protection?			X	
Vehicle/equipment maintenance area	Area reasonably clean and free of spills, leaks, or any other materials?			X	
	Is area covered overhead?			X	
	Dry clean up methods implemented?			X	
	Are there drip pans readily available for use?			X	
	Spill containment and cleanup kits readily available?			X	
	Storage areas covered and properly maintained?			X	

* Y = Satisfactory, N = Unsatisfactory

III. General Site Conditions and Runoff Management Practices Review (Cont.)

		Y	N	N/A	Comments
Vehicle/equipment washing areas (cont)	Are related activities contained within designated area?			X	
	Hazardous materials/liquids stored in secondary containment?			X	
	Are there containment mechanisms in place?			X	
Materials loading and storage areas	Area reasonably clean and free of litter and debris?			X	
	Designated area covered overhead?			X	
Chemical handling areas	Areas reasonably clean and organized?			X	
	Is area indoors or properly covered?			X	
	Spill containment cleanup kits readily available?			X	
	If outdoors, is water from surrounding areas prevented from reaching chemical handling areas?			X	
	Hazardous materials/liquids stored within secondary containment?			X	
	Dry clean up methods implemented?			X	

IV. Water Quality Management Plan (WQMP)** Review

Has a WQMP (or SWPPP) been developed for this yard? __X____ Yes (complete this section and skip section V)
_____ No (skip this section and complete section V)

		S	U	N/A	Comments
Facility site map	Identifies drainage areas and direction of flow	X			
	Identifies location of storm water conveyance system including ditches, inlets and storm drains	X			
	Identifies location of any existing storm water controls (e.g., berms, filters, grass swales, etc.)	X			
	Identifies location of building(s) and activity areas (e.g., fueling islands, hazardous materials storage areas, washing areas, etc.)	X			
Materials/activities used on site	List materials stored and handled on site, including storage location and typical quantities	X			
	Includes a narrative description of activities conducted on site which have the potential to result in discharges to storm drain system			X	
Potential Pollutants	Identifies potential pollutants which could be discharged from site given activities conducted at facility			X	
Best Management Practices (BMPs)	Describes BMPs implemented at facility to deal with **each** potential pollutant source identified	X			
	Minimum City wide BMPs listed	X			
	Storm water system regularly inspected/monitored	X			
Record keeping	Employee training records	X			
	Quarterly inspections records, if any	X			
	Storm water conveyance system monitoring (2/yr)[1]			X	

**The term Water Quality Management Plan (WQMP) is replacing the term Storm Water Pollution Prevention Plan (or SWPPP) for municipal facilities.

V. Water Quality Management Plan Status

Is facility in the process of developing a WQMP?
_____ Yes, expected completion date: _____
__X____ No, this facility does not need a WQMP because ___it already has one in effect_____

VI. Additional Comments (attach additional pages if necessary)

[1] Only required for NDPES General Storm Water Permit holders

City of San Diego - Urban Runoff Management Plan
MUNICIPAL FACILITY SITE COMPLIANCE INSPECTION CHECKLIST

Department: ESD – HHWTF
Inspector: KIRK GALARNEAU
First Inspection_X_Second Inspection_____
Phone Number: 858-573-1338
Date 6/20/2008

Facility Name

Address | Zip Code

	Question	Y	N	N/A	(If "NO") Resolution
General					
1	Has the employee performing this inspection had activity-specific storm water BMP training this year?	X			
2	Are activity-specific BMPs in place?	X			
3	Are your contractors adhering to the minimum BMPs that were listed in the contract?	X			
4	Is your facility reasonably clean and free of litter and debris?	X			
5	Are parking lots reasonably clean and free of debris? If sweeping the lot, note estimated substance and weight of debris in tons.	X			SWEEPING DONE BY LANDFILL OPERATIONS
6	Is landscaped area irrigation contained within the landscaped area?			X	
7	Are pesticides/herbicides/fertilizers minimized where feasible?			X	
8	Are storm drains stenciled? If no, contact Storm Water Pollution Prevention Division for stencils and paint.		X		SITE ACCESS IS RESTRICTED. DRAIN VALVE IS CLOSED DURING FACILITY OPERATIONS
9	Are storm drain inlets clean and free of debris?	X			
10	If cleaning of the storm drain was needed, note estimated substance and weight of debris (in tons) since last inspection.	X			APPROXIMATELY 30 POUNDS OF SEDIMENT WAS REMOVED FROM THE HHWTF FRENCH DRAIN
11	Is area absent of any evidence of a discharge, spill, and or leak?		X		VISIBLE STAINING FROM PREVIOUS SMALL SPILLS WHICH WERE IMMEDIATELY CONTAINED AND CLEANED UP
12	If a minor spill is observed entering the storm drain system during the inspection, have you reported it to the Storm Water hotline (619-235-1000)? (For significant spills also fill out a 24-hour discharge form).			X	
Trash storage areas					
13	Is area reasonably clean and uncluttered?	X			
14	Are trash cans and garbage bins kept covered?	X			
15	Is the number and placement of the trash cans sufficient for your facility?	X			

	Question	Y	N	N / A	(If "NO") Resolution
Fueling areas					
16	Is a stocked spill kit available at fuel island?			X	
17	Is area clean and free of spills? If spill is observed, clean up using dry methods.			X	
Vehicle/equipment maintenance area					
18	Is work area reasonably clean?			X	
19	Are drip pans readily available for leaking vehicles?			X	
20	Are spill containment materials and stocked cleanup kits readily available?			X	
21	Are maintenance activities contained within the designated area?			X	
22	Are bulk hazardous materials/liquids stored outside in secondary containment?			X	
Materials loading/unloading and storage areas					
23	Is area reasonably clean and free of litter, debris and loose material?	X			
24	Is materials storage area covered?	X			
25	Are materials and stocked cleanup kits readily available?	X			
26	If outdoors, is water from surrounding areas prevented from reaching material storage areas?	X			
27	Are bulk hazardous materials/liquids stored outside in secondary containment?	X			
Other Important Areas for inspection					
28	Are the BMPs installed properly?	X			
29	Are BMPs in good working condition? If no, they need to be replaced.	X			

30. For any ineffective BMPs (i.e., the wrong BMP is used), describe an effective replacement BMP and update your URMP section.

Leachate Disposed (Gallons) 16,000

ON-SITE OBSERVATIONS (Trace of rain this month)

Diversion and Drainage Facilities:
Diversion and drainage facilities have been designed, constructed and maintained to accommodate a 100 year, 24 hour storm and to divert surface and subsurface drainage away from the waste management unit.

Seepage:
No seepage into or from the waste management unit was discovered.

Landfill surfaces:
No areas of slope failure, differential settlement, fissuring were identified.
No erosion and ponding were noted for repair.
Unit Standard Observations:
No evidence of ponded water and erosion were noted for correction.
No offensive odors was noted.
Perimeter of the Unit Standard Observations:
No evidence of liquid leaving or entering the unit.
refuse was noted.

I, the undersigned, do hereby certify that to my knowledge the above information is true, complete and correct, and that all wastes discharged were in compliance with Board requirements and there were no requirement violations, except as noted.

Signature Title Associate Eng-Civil Date 4-10-08

ANNUAL REPORT
FORM 3-QUARTERLY VISUAL OBSERVATIONS OF UNAUTHORIZED NON-STORM WATER DISCHARGES (NSWDs)

- Unauthorized NSWDs are discharges (such as wash or rinse waters) that do not meet the conditions provided in Section D (pages 5-6) of the General Permit.
- Quarterly visual observations are required to observe current and detect prior unauthorized NSWDs.
- Quarterly visual observations are required during dry weather and at all facility drainage areas.
- Each unauthorized NSWD source, impacted drainage area, and discharge location must be identified and observed.
- Unauthorized NSWDs that can not be eliminated within 90 days of observation must be reported to the Regional Board in accordance with Section A.10.e of the General Permit.
- Make additional copies of this form as necessary.

CITY OF SAN DIEGO
ENVIRONMENTAL SERVICES/REFUSE DISPOSAL
QUARTERLY SITE INSPECTION

SITE: Arizona Landfill **DATE:** 5-20-2008

STAFF & VISITORS: Hani Anthony **TIME:** 10:10 AM

GENERAL CONDITION: Good Condition

Maintenance Activities:

Surface cracks have occurred near condensate trap # 10. Operational staff were contacted and the problem was corrected by regarding the entire area around condensate trap # 10. No landfill gases were measured before or during the repairs. In addition, the drainage structure at the south entrance of the Arizona Landfill has been cleared of sediments and the pipe outlet has been regraded to promote drainage and prevent ponding. A small illegal dump left near the dumpster west of the police corral has been cleared.

Observation (Seepage):
A leaky sprinkler head north of the ball field was noticed and caused minor ponding on the landfill. This problem was reported to Park and Rec staff and was corrected. No major problem observed.

Surface Cover and Slope:
No major problem observed.

Drainage Facilities:
One of the three grates on the storm drain cover by the entrance of the landfill collapsed. This was reported to Chollas Operations Public Works Superintendent. Park and Rec removed and repaired the grate. The drainage structure at the entrance to landfill was cleared of sediments and debris.

Groundwater & Vadose Monitoring Network:
No unusual observation.

Landfill Gas Control system:

No unusual observation of system.

Signature: H. Anthony **Title:** *Assistant Engineer-Civil* **Date:** 5/27/2008

CITY OF SAN DIEGO
ENVIRONMENTAL SERVICES DEPARTMENT
QUARTERLY SITE INSPECTION SHEET

WASTE REDUCTION & DISPOSAL DIVISION

SITE: North Miramar Landfill DATE: March 3,2008

STAFF & VISITORS: Hani Anthony

GENERAL CONDITION: Sunny and hot

Maintenance Activities:

Minor problems that have been noted during routine site inspection and are being addressed or scheduled for repairs.

1) Ponding adjacent to condensate trap # 6

2) Tire tracks were noticed along the access road.

3) Low surface depression on the northeast area of the extraction well #48

4) Surface near drain # 5 needed to be regraded to prevent future ponding.

Observation (Seepage):

No problem observed.

Surface Cover and Slope:

In general the surface cover is in good condition. However, some areas have shown settlement depressions and are scheduled for repairs.

Drainage Facilities:

All channels have been cleared of rocks and debris. No major problem observed at this location.

Groundwater & Vadose Monitoring Network:

No unusual observation.

Landfill Gas Control System:

No unusual observation of system

Additional LFG monitoring data is available at the Environmental Services Department Office

Signature: H. Anthony Title: Assistant Eng.-civil Date: 3-6-2008

CITY OF SAN DIEGO
ENVIRONMENTAL SERVICES DEPARTMENT
QUARTERLY SITE INSPECTION SHEET

WASTE REDUCTION & DISPOSAL DIVISION

SITE: South Miramar Landfill DATE: March 26,2008

STAFF & VISITORS: Hani Anthony

GENERAL CONDITION: Sunny

Maintenance Activities:
A low spot has occured near extraction well # 26 and surface erosion near extraction well # 20. Both areas are scheduled for repairs.
The transportation of dirt from Kinder Morgan construction site to the stockpile area is continuing. The stockpile grading is expected to be completed by next month.

Observation (Seepage):
No major problem observed.

Surface Cover and Slope:
The area west of the fee booth used by Kinder Morgan as a dirt stockpile area has slope erosion and surface ponding. Kinder Morgan management has been contacted to correct this problem.

Drainage Facilities:
All channels have been cleared of rocks and debris. Channel Rip Rap (Blue Rocks) in the drainage channel near extraction well # 1,2 and 3 has been replaced. Palm trees that were blocking the drainage channel were removed.

Groundwater & Vadose Monitoring Network:
No unusual observation.

Landfill Gas Control System:
No unusual observation of system.

Additional LFG monitoring data is available at the Environmental Services Department Office

Signature: H. Anthony Title: Assistant Eng.-civil Date: 3-28-2008

WASTE REDUCTION & DISPOSAL DIVISION

CITY OF SAN DIEGO
ENVIRONMENTAL SERVICES DEPARTMENT
QUARTERLY SITE INSPECTION SHEET

SITE: Mission Bay Landfill DATE: March 12,2008

STAFF & VISITORS: Hani Anthony

GENERAL CONDITION: Clear and Sunny

Maintenance Activities:
No major problem observed. The ponding along Sea world Dr. adjacent to south shores boat ramp sign and east of the Marina has been corrected. The construction of the Mission Bay Promenade is underway near the landfill. During the construction activities, the Bicycle and Pedestrian path will be closed to the public till May 2008.

Observation (Seepage):
The site is in good condition.

Surface Cover and Slope:
No major problem observed. However, the site will continue to be monitored closely to ensure protection of the existing drainage, structures, slope and surface cover.

Drainage Facilities:
Free and clear

Groundwater & Vadose Monitoring Network:
No unusual observation.

Landfill Gas Control System:
None at this site

Additional LFG monitoring data is available at the Environmental Services Department Office

Signature: H. Anthony Title: Assistant Eng.-civil Date: 3-13-2008

WASTE REDUCTION & DISPOSAL DIVISION

CITY OF SAN DIEGO
ENVIRONMENTAL SERVICES DEPARTMENT
QUARTERLY SITE INSPECTION SHEET

SITE: Paradise Hills Landfill DATE: March 11, 2008

STAFF & VISITORS: Hani Anthony

GENERAL CONDITION: Sunny And Clear

Maintenance Activities:
The low area near cricket field has been filled with clean dirt and regraded. New mulch is needed to protect the cover for the new area that has been repaired. Park and Rec. staff is planning to spray to control weed growth. This task is scheduled for next month.

Observation (Seepage):
No major problem observed.

Surface Cover and Slope:
In good condition

Drainage Facilities:
All channels have been cleared of rocks and debris. No major problem observed at this location.

Groundwater & Vadose Monitoring Network:
No unusual observation.

Landfill Gas Control System:
None at this site

Additional LFG monitoring data is available at the Environmental Services Department Office

Signature: H. Anthony Title: Assist. Eng.- Civil Date: 3-12-2008

WASTE REDUCTION & DISPOSAL DIVISION

CITY OF SAN DIEGO
ENVIRONMENTAL SERVICES DEPARTMENT
QUARTERLY SITE INSPECTION SHEET

SITE: South Chollas Landfill DATE: March 26,2008

STAFF & VISITORS: Hani Anthony

GENERAL CONDITION: Sunny and Clear

Maintenance Activities:
The contractor 3-D enterprise is working on punch list items for the Slope Modification Project. ESD staff is currently working on hydroseeding the small slope area where newly corrugated metal pipes are installed. Sediment buildup in the brow ditch needs to be cleared and freed. This task is scheduled.

Observation (Seepage): No major problem observed

Surface Cover and Slope:
The cover is holding as designed. No major problem observed.

Drainage Facilities:
All drainage structures are free and clear and are operating as designed. The area near drain #S2 has sunk. It is being regraded to promote drainage and prevent future ponding.

Groundwater & Vadose Monitoring Network:
No unusual observation.

Landfill Gas Control System:
No unusual observation of system

Additional LFG monitoring data is available at the Environmental Services Department Office

Facility Name: San Ysidro CSC

Address: 663 E. San Ysidro Blvd
Zip Code: 92173

	Question	Y	N	N/A	(If "NO") Resolution
General					
1	Has the employee performing this inspection had activity-specific storm water BMP training this year?			✓	
2	Are activity-specific BMPs in place?			✓	
3	Are your contractors adhering to the minimum BMPs that were listed in the contract?			✓	
4	Is your facility reasonably clean and free of litter and debris?	✓			
5	Are parking lots reasonably clean and free of debris? If sweeping the lot, note estimated substance and weight of debris in tons.	✓			
6	Is landscaped area irrigation contained within the landscaped area?	✓			
7	Are pesticides/herbicides/fertilizers minimized where feasible?	✓			
8	Are storm drains stenciled? If no, contact Storm Water Pollution Prevention Division for stencils and paint.	✓			
9	Are storm drain inlets clean and free of debris?	✓			
10	If cleaning of the storm drain was needed, note estimated substance and weight of debris (in tons) since last inspection.			✓	Cleaing of storm drain has been scheduled w/ Streets Division but has not yet occurred
11	Is area absent of any evidence of a discharge, spill, and or leak?	✓			
12	If a minor spill is observed entering the storm drain system during the inspection, have you reported it to the Storm Water hotline (619-235-1000)? (For significant spills also fill out a 24-hour discharge form).			✓	
Trash storage areas					
13	Is area reasonably clean and uncluttered?	✓			
14	Are trash cans and garbage bins kept covered?	✓			
15	Is the number and placement of the trash cans sufficient for your facility?	✓			

	Question	Y	N	N / A	(If "NO") Resolution
Fueling areas					
16	Is a stocked spill kit available at fuel island?			✓	
17	Is area clean and free of spills? If spill is observed, clean up using dry methods.			✓	
Vehicle/equipment maintenance area					
18	Is work area reasonably clean?			✓	
19	Are drip pans readily available for leaking vehicles?			✓	
20	Are spill containment materials and stocked cleanup kits readily available?			✓	
21	Are maintenance activities contained within the designated area?			✓	
22	Are bulk hazardous materials/liquids stored outside in secondary containment?			✓	
Materials loading/unloading and storage areas					
23	Is area reasonably clean and free of litter, debris and loose material?			✓	
24	Is materials storage area covered?			✓	
25	Are materials and stocked cleanup kits readily available?			✓	
26	If outdoors, is water from surrounding areas prevented from reaching material storage areas?			✓	
27	Are bulk hazardous materials/liquids stored outside in secondary containment?			✓	
Other Important Areas for inspection					
28	Are the BMPs installed properly?			✓	
29	Are BMPs in good working condition? If no, they need to be replaced.			✓	

30. For any ineffective BMPs (i.e., the wrong BMP is used), describe an effective replacement BMP and update your URMP section.

29	Are BMPs in good working condition? If no, they need to be replaced.			✓	

30. For any ineffective BMPs (i.e., the wrong BMP is used), describe an effective replacement BMP and update your URMP section.

Fire Rescue Department Municipal Inspection Forms

City of San Diego - Urban Runoff Management Plan

ANNUAL MUNICIPAL FACILITY SITE COMPLIANCE INSPECTION CHECKLIST

Inspector: Brent Lindberg
Phone Number: 858-573-1362
Date/Time: March 3, 2008

I. Facility Information

Facility Name	**Facility Name:** Fire Station 1	**Zip Code:** 92101	
Street Address	**Street Address:** 1222 First Ave	**Phone:** 619-236-6823	Zip Code
Facility Contact Person	**Facility Contact Person** Fire Station Capt.	**APN No.** NA	Phone

Standard Industrial Classification Code	Waste Discharge Identification Number	APN No.
NA	NA	NA

II. Shared Facility Information

Is there more than one City department and/or division sharing this facility?

__X__ No (skip this section) _____ Yes (complete this section)

Name of City Departments and/or Divisions Sharing Facility	Contact Person and Phone Number	Covered by this Inspection?
NA		

III. General Site Conditions and Runoff Management Practices Review

		S*	U*	N/A	Comments
General	Employees trained in storm water pollution prevention practices?	✓			
	Common areas of yard reasonably clean and free of litter and debris?	✓			
	Are parking areas generally clean and swept as needed?	✓			
	Are storm drain inlets reasonably clean and free of debris?	✓			
	Is there evidence of discharges, spills, and or leaks in any areas?	✓			
Trash storage areas	Is area reasonably clean and uncluttered?	✓			
	Are trash cans and garbage bins kept covered?	✓			
Fueling areas	Is there a roof on fueling area?	✓			
	Is there a mechanism in place for spill overflow protection?	✓			spill kit
Vehicle/equipment maintenance area	Area reasonably clean and free of spills, leaks, or any other deleterious materials?	✓			
	Is area covered overhead?	✓			
	Dry clean up methods implemented?	✓			
	Are there drip pans readily available for use?	✓			
	Spill containment and cleanup kits readily available?	✓			
	Storage areas covered and properly maintained?	✓			

* S = Satisfactory, U = Unsatisfactory

III. General Site Conditions and Runoff Management Practices Review (Cont.)

		S	U	N/A	Comments
Vehicle/equipment washing areas (cont)	Are related activities contained within designated area?	✓			
	Hazardous materials/liquids stored above ground?			✓	
	Are there containment mechanisms in place?			✓	
Materials loading and storage areas	Area reasonably clean and free of litter and debris?	✓			
	Designated area covered overhead?	✓			
Chemical handling areas	Areas reasonably clean and organized?			✓	
	Is area indoors or properly covered?			✓	
	Spill containment cleanup kits readily available?			✓	
	If outdoors, is water from surrounding areas prevented from reaching chemical handling areas?			✓	
	Hazardous materials/liquids stored above ground?			✓	
	Dry clean up methods implemented?			✓	

IV. Water Quality Management Plan (WQMP)** Review

Has a WQMP (or SWPPP) been developed for this yard? ✓ Yes (complete this section and skip section V)
____ No (skip this section and complete section V)

		S	U	N/A	Comments
Facility site map	Identifies drainage areas and direction of flow	✓			
	Identifies location of storm water conveyance system including ditches, inlets and storm drains	✓			
	Identifies location of any existing storm water controls (e.g., berms, filters, grass swales, etc.)	✓			
	Identifies location of building(s) and activity areas (e.g., fueling islands, hazardous materials storage areas, washing areas, etc.)	✓			
Materials/activities used on site	List materials stored and handled on site, including storage location and typical quantities	✓			
	Includes a narrative description of activities conducted on site which have the potential to result in discharges to storm drain system	✓			
Potential Pollutants	Identifies potential pollutants which could be discharged from site given activities conducted at facility	✓			
Best Management Practices (BMPs)	Describes BMPs implemented at facility to deal with **each** potential pollutant source identified	✓			
	Minimum City wide BMPs listed	✓			
	Storm water system regularly inspected/monitored	✓			
Record keeping	Employee training records			✓	
	Quarterly inspections records, if any			✓	
	Storm water conveyance system monitoring (2/yr)[1]			✓	

**The term Water Quality Management Plan (WQMP) is replacing the term Storm Water Pollution Prevention Plan (or SWPPP) for municipal facilities.

V. Water Quality Management Plan Status

Is facility in the process of developing a WQMP?
____ Yes, expected completion date: ____
✓ No, this facility does not need a WQMP because Small station covering less than one acre

VI. Additional Comments (attach additional pages if necessary)

[1] Only required for NDPES General Storm Water Permit holders

_____ Yes (complete this section and skip section V)

_____ No (skip this section and complete section V)

		S	U	N/A	Comments
Facility site map	Identifies drainage areas and direction of flow	✓			
	Identifies location of storm water conveyance system including ditches, inlets and storm drains	✓			
	Identifies location of any existing storm water controls (e.g., berms, filters, grass swales, etc.)	✓			
	Identifies location of building(s) and activity areas (e.g., fueling islands, hazardous materials storage areas, washing areas, etc.)	✓			
Materials/activities used on site	List materials stored and handled on site, including storage location and typical quantities	✓			
	Includes a narrative description of activities conducted on site which have the potential to result in discharges to storm drain system	✓			
Potential Pollutants	Identifies potential pollutants which could be discharged from site given activities conducted at facility	✓			
Best Management Practices (BMPs)	Describes BMPs implemented at facility to deal with **each** potential pollutant source identified	✓			
	Minimum City wide BMPs listed	✓			
	Storm water system regularly inspected/monitored	✓			
Record keeping	Employee training records			✓	
	Quarterly inspections records, if any			✓	
	Storm water conveyance system monitoring (2/yr)[1]			✓	

**The term Water Quality Management Plan (WQMP) is replacing the term Storm Water Pollution Prevention Plan (or SWPPP) for municipal facilities.

V. Water Quality Management Plan Status

Is facility in the process of developing a WQMP?

_____ Yes, expected completion date: _____

✓ No, this facility does not need a WQMP because small station covering less than one acre, minimally Hardscape

VI. Additional Comments (attach additional pages if necessary)

City of San Diego - Urban Runoff Management Plan

ANNUAL MUNICIPAL FACILITY SITE COMPLIANCE INSPECTION CHECKLIST

Inspector: Brent Lindberg
Phone Number: 858-573-1362
Date/Time: March 3, 2008

I. Facility Information

Facility Name	**Facility Name:** Fire Station 9	**Zip Code:** 92037		
Street Address	**Street Address:** 7870 Ardath Lane	**Phone:** 858-552-1762		Zip Code
Facility Contact Person	**Facility Contact Person** Fire Station Capt.	**APN No.** NA		Phone
Standard Industrial Classification Code: NA	Waste Discharge Identification Number: NA		APN No.: NA	

II. Shared Facility Information

Is there more than one City department and/or division sharing this facility?

__X__ No (skip this section) _____ Yes (complete this section)

Name of City Departments and/or Divisions Sharing Facility	Contact Person and Phone Number	Covered by this Inspection?
NA		

III. General Site Conditions and Runoff Management Practices Review

		S*	U*	N/A	Comments
General	Employees trained in storm water pollution prevention practices?	✓			
	Common areas of yard reasonably clean and free of litter and debris?	✓			
	Are parking areas generally clean and swept as needed?	✓			
	Are storm drain inlets reasonably clean and free of debris?	✓			
	Is there evidence of discharges, spills, and or leaks in any areas?	✓			
Trash storage areas	Is area reasonably clean and uncluttered?	✓			
	Are trash cans and garbage bins kept covered?	✓			
Fueling areas	Is there a roof on fueling area?		✓		
	Is there a mechanism in place for spill overflow protection?	✓			spill kit
Vehicle/equipment maintenance area	Area reasonably clean and free of spills, leaks, or any other deleterious materials?	✓			
	Is area covered overhead?	✓			
	Dry clean up methods implemented?	✓			
	Are there drip pans readily available for use?	✓			
	Spill containment and cleanup kits readily available?	✓			
	Storage areas covered and properly maintained?	✓			

* S = Satisfactory, U = Unsatisfactory

III. General Site Conditions and Runoff Management Practices Review (Cont.)

		S	U	N/A	Comments
Vehicle/equipment washing areas (cont)	Are related activities contained within designated area?			✓	
	Hazardous materials/liquids stored above ground?			✓	
	Are there containment mechanisms in place?			✓	
Materials loading and storage areas	Area reasonably clean and free of litter and debris?	✓			
	Designated area covered overhead?	✓			
Chemical handling areas	Areas reasonably clean and organized?			✓	
	Is area indoors or properly covered?			✓	
	Spill containment cleanup kits readily available?			✓	
	If outdoors, is water from surrounding areas prevented from reaching chemical handling areas?			✓	
	Hazardous materials/liquids stored above ground?			✓	
	Dry clean up methods implemented?			✓	

IV. Water Quality Management Plan (WQMP)** Review

Has a WQMP (or SWPPP) been developed for this yard? ✓ Yes (complete this section and skip section V)
_____ No (skip this section and complete section V)

		S	U	N/A	Comments

Trash storage areas	Is area reasonably clean and uncluttered?	✓			
	Are trash cans and garbage bins kept covered?	✓			
Fueling areas	Is there a roof on fueling area?		✓		
	Is there a mechanism in place for spill overflow protection?	✓			spill kit
Vehicle/equipment maintenance area	Area reasonably clean and free of spills, leaks, or any other deleterious materials?	✓			
	Is area covered overhead?	✓			
	Dry clean up methods implemented?	✓			
	Are there drip pans readily available for use?	✓			
	Spill containment and cleanup kits readily available?	✓			
	Storage areas covered and properly maintained?	✓			

* S = Satisfactory, U = Unsatisfactory

III. General Site Conditions and Runoff Management Practices Review (Cont.)

		S	U	N/A	Comments
Vehicle/equipment washing areas (cont)	Are related activities contained within designated area?			✓	
	Hazardous materials/liquids stored above ground?			✓	
	Are there containment mechanisms in place?			✓	
Materials loading and storage areas	Area reasonably clean and free of litter and debris?	✓			
	Designated area covered overhead?	✓			
Chemical handling areas	Areas reasonably clean and organized?			✓	
	Is area indoors or properly covered?			✓	
	Spill containment cleanup kits readily available?			✓	
	If outdoors, is water from surrounding areas prevented from reaching chemical handling areas?			✓	
	Hazardous materials/liquids stored above ground?			✓	
	Dry clean up methods implemented?			✓	

IV. Water Quality Management Plan (WQMP)** Review

Has a WQMP (or SWPPP) been developed for this yard? ✓ Yes (complete this section and skip section V)
____ No (skip this section and complete section V)

		S	U	N/A	Comments
Facility site map	Identifies drainage areas and direction of flow	✓			
	Identifies location of storm water conveyance system including ditches, inlets and storm drains	✓			
	Identifies location of any existing storm water controls (e.g., berms, filters, grass swales, etc.)	✓			
	Identifies location of building(s) and activity areas (e.g., fueling islands, hazardous materials storage areas, washing areas, etc.)	✓			
Materials/activities used on site	List materials stored and handled on site, including storage location and typical quantities	✓			
	Includes a narrative description of activities conducted on site which have the potential to result in discharges to storm drain system	✓			
Potential Pollutants	Identifies potential pollutants which could be discharged from site given activities conducted at facility	✓			
Best Management Practices (BMPs)	Describes BMPs implemented at facility to deal with **each** potential pollutant source identified	✓			
	Minimum City wide BMPs listed	✓			
	Storm water system regularly inspected/monitored	✓			
Record keeping	Employee training records			✓	
	Quarterly inspections records, if any			✓	
	Storm water conveyance system monitoring (2/yr)[1]			✓	

**The term Water Quality Management Plan (WQMP) is replacing the term Storm Water Pollution Prevention Plan (or SWPPP) for municipal facilities.

V. Water Quality Management Plan Status

Is facility in the process of developing a WQMP?
____ Yes, expected completion date: _____
✓ No, this facility does not need a WQMP because small station covering less than one acre, & minimally hardscaped.

VI. Additional Comments (attach additional pages if necessary)

[1] Only required for NDPES General Storm Water Permit holders

City of San Diego - Urban Runoff Management Plan

ANNUAL MUNICIPAL FACILITY SITE COMPLIANCE INSPECTION CHECKLIST

Inspector: Brent Lindberg
Phone Number: 858-573-1362
Date/Time: March 3, 2008

I. Facility Information

Facility Name	**Facility Name:** Fire Station 22	**Zip Code:** 92107	
Street Address	**Street Address:** 1055 Catalina Blvd	**Phone:** 619-531-1552	Zip Code
Facility Contact Person	**Facility Contact Person** Fire Station Capt.	**APN No.** NA	Phone

Standard Industrial Classification Code	Waste Discharge Identification Number	APN No.
NA	NA	NA

II. Shared Facility Information

Is there more than one City department and/or division sharing this facility?

__X__ No (skip this section) _____ Yes (complete this section)

Name of City Departments and/or Divisions Sharing Facility	Contact Person and Phone Number	Covered by this Inspection?
NA		

III. General Site Conditions and Runoff Management Practices Review

		S*	U*	N/A	Comments
General	Employees trained in storm water pollution prevention practices?	✓			
	Common areas of yard reasonably clean and free of litter and debris?	✓			
	Are parking areas generally clean and swept as needed?	✓			
	Are storm drain inlets reasonably clean and free of debris?	✓			
	Is there evidence of discharges, spills, and or leaks in any areas?	✓			
Trash storage areas	Is area reasonably clean and uncluttered?	✓			
	Are trash cans and garbage bins kept covered?	✓			
Fueling areas	Is there a roof on fueling area?			✓	NO FUEL
	Is there a mechanism in place for spill overflow protection?	✓			SPILL Kit
Vehicle/equipment maintenance area	Area reasonably clean and free of spills, leaks, or any other deleterious materials?	✓			
	Is area covered overhead?	✓			
	Dry clean up methods implemented?	✓			
	Are there drip pans readily available for use?	✓			
	Spill containment and cleanup kits readily available?	✓			
	Storage areas covered and properly maintained?	✓			

* S = Satisfactory, U = Unsatisfactory

III. General Site Conditions and Runoff Management Practices Review (Cont.)

		S	U	N/A	Comments
Vehicle/equipment washing areas (cont)	Are related activities contained within designated area?			✓	
	Hazardous materials/liquids stored above ground?			✓	
	Are there containment mechanisms in place?			✓	
Materials loading and storage areas	Area reasonably clean and free of litter and debris?	✓			
	Designated area covered overhead?	✓			
Chemical handling areas	Areas reasonably clean and organized?			✓	
	Is area indoors or properly covered?			✓	
	Spill containment cleanup kits readily available?			✓	
	If outdoors, is water from surrounding areas prevented from reaching chemical handling areas?			✓	
	Hazardous materials/liquids stored above ground?			✓	
	Dry clean up methods implemented?			✓	

IV. Water Quality Management Plan (WQMP)** Review

Has a WQMP (or SWPPP) been developed for this yard? ✓ Yes (complete this section and skip section V)
_____ No (skip this section and complete section V)

		S	U	N/A	Comments
Facility site map	Identifies drainage areas and direction of flow	✓			
	Identifies location of storm water conveyance system including ditches, inlets and storm drains	✓			
	Identifies location of any existing storm water controls (e.g., berms, filters, grass swales, etc.)	✓			
	Identifies location of building(s) and activity areas (e.g., fueling islands, hazardous materials storage areas, washing areas, etc.)	✓			
Materials/activities used on site	List materials stored and handled on site, including storage location and typical quantities	✓			
	Includes a narrative description of activities conducted on site which have the potential to result in discharges to storm drain system	✓			
Potential Pollutants	Identifies potential pollutants which could be discharged from site given activities conducted at facility	✓			
Best Management Practices (BMPs)	Describes BMPs implemented at facility to deal with **each** potential pollutant source identified	✓			
	Minimum City wide BMPs listed	✓			
	Storm water system regularly inspected/monitored	✓			
Record keeping	Employee training records			✓	
	Quarterly inspections records, if any			✓	
	Storm water conveyance system monitoring (2/yr)[1]			✓	

**The term Water Quality Management Plan (WQMP) is replacing the term Storm Water Pollution Prevention Plan (or SWPPP) for municipal facilities.

V. Water Quality Management Plan Status

Is facility in the process of developing a WQMP?
_____ Yes, expected completion date: _____
✓ No, this facility does not need a WQMP because small station covering less than one acre, & minimally hardscaped.

VI. Additional Comments (attach additional pages if necessary)

Has a WQMP (or SWPPP) been developed for this yard? ✓ Yes (complete this section and skip section V)
____ No (skip this section and complete section V)

		S	U	N/A	Comments
Facility site map	Identifies drainage areas and direction of flow	✓			
	Identifies location of storm water conveyance system including ditches, inlets and storm drains	✓			
	Identifies location of any existing storm water controls (e.g., berms, filters, grass swales, etc.)	✓			
	Identifies location of building(s) and activity areas (e.g., fueling islands, hazardous materials storage areas, washing areas, etc.)	✓			
Materials/activities used on site	List materials stored and handled on site, including storage location and typical quantities	✓			
	Includes a narrative description of activities conducted on site which have the potential to result in discharges to storm drain system	✓			
Potential Pollutants	Identifies potential pollutants which could be discharged from site given activities conducted at facility	✓			
Best Management Practices (BMPs)	Describes BMPs implemented at facility to deal with **each** potential pollutant source identified	✓			
	Minimum City wide BMPs listed	✓			
	Storm water system regularly inspected/monitored	✓			
Record keeping	Employee training records			✓	
	Quarterly inspections records, if any			✓	
	Storm water conveyance system monitoring (2/yr)[1]			✓	

**The term Water Quality Management Plan (WQMP) is replacing the term Storm Water Pollution Prevention Plan (or SWPPP) for municipal facilities.

V. Water Quality Management Plan Status

Is facility in the process of developing a WQMP?
____ Yes, expected completion date: ____
✓ No, this facility does not need a WQMP because small station covering less than one acre.

VI. Additional Comments (attach additional pages if necessary)

[1] Only required for NDPES General Storm Water Permit holders

City of San Diego - Urban Runoff Management Plan

ANNUAL MUNICIPAL FACILITY SITE COMPLIANCE INSPECTION CHECKLIST

Inspector: Brent Lindberg
Phone Number: 858-573-1362
Date/Time: March 3, 2008

I. Facility Information

Facility Name	**Facility Name:** Fire Station 29	**Zip Code:** 92173	
Street Address	**Street Address:** 198 W. San Ysidro Blvd	**Phone:** 619-424-0483	Zip Code
Facility Contact Person	**Facility Contact Person** Fire Station Capt.	**APN No.** NA	Phone

Standard Industrial Classification Code	Waste Discharge Identification Number	APN No.
NA	NA	NA

II. Shared Facility Information

Is there more than one City department and/or division sharing this facility?

__X__ No (skip this section) _____ Yes (complete this section)

Name of City Departments and/or Divisions Sharing Facility	Contact Person and Phone Number	Covered by this Inspection?
NA		

III. General Site Conditions and Runoff Management Practices Review

		S*	U*	N/A	Comments
General	Employees trained in storm water pollution prevention practices?	✓			
	Common areas of yard reasonably clean and free of litter and debris?	✓			
	Are parking areas generally clean and swept as needed?	✓			
	Are storm drain inlets reasonably clean and free of debris?	✓			
	Is there evidence of discharges, spills, and or leaks in any areas?	✓			60 gal w/ Lids
Trash storage areas	Is area reasonably clean and uncluttered?	✓			
	Are trash cans and garbage bins kept covered?	✓			
Fueling areas	Is there a roof on fueling area?		✓		
	Is there a mechanism in place for spill overflow protection?	✓			
Vehicle/equipment maintenance area	Area reasonably clean and free of spills, leaks, or any other deleterious materials?	✓			
	Is area covered overhead?	✓			
	Dry clean up methods implemented?	✓			
	Are there drip pans readily available for use?	✓			
	Spill containment and cleanup kits readily available?	✓			
	Storage areas covered and properly maintained?	✓			

* S = Satisfactory, U = Unsatisfactory

III. General Site Conditions and Runoff Management Practices Review (Cont.)

		S	U	N/A	Comments
Vehicle/equipment washing areas (cont)	Are related activities contained within designated area?			✓	
	Hazardous materials/liquids stored above ground?			✓	
	Are there containment mechanisms in place?			✓	
Materials loading and storage areas	Area reasonably clean and free of litter and debris?	✓			
	Designated area covered overhead?	✓			
Chemical handling areas	Areas reasonably clean and organized?			✓	
	Is area indoors or properly covered?			✓	
	Spill containment cleanup kits readily available?			✓	
	If outdoors, is water from surrounding areas prevented from reaching chemical handling areas?			✓	
	Hazardous materials/liquids stored above ground?			✓	
	Dry clean up methods implemented?			✓	

IV. Water Quality Management Plan (WQMP)** Review

Has a WQMP (or SWPPP) been developed for this yard? ✓ Yes (complete this section and skip section V)

Trash storage areas	Is area reasonably clean and uncluttered?	✓			side agst
	Are trash cans and garbage bins kept covered?	✓			spill containment.
Fueling areas	Is there a roof on fueling area?		✓		
	Is there a mechanism in place for spill overflow protection?	✓			
Vehicle/equipment maintenance area	Area reasonably clean and free of spills, leaks, or any other deleterious materials?	✓			
	Is area covered overhead?	✓			
	Dry clean up methods implemented?	✓			
	Are there drip pans readily available for use?	✓			
	Spill containment and cleanup kits readily available?	✓			
	Storage areas covered and properly maintained?	✓			

* S = Satisfactory, U = Unsatisfactory

III. General Site Conditions and Runoff Management Practices Review (Cont.)

		S	U	N/A	Comments
Vehicle/equipment washing areas (cont)	Are related activities contained within designated area?			✓	
	Hazardous materials/liquids stored above ground?			✓	
	Are there containment mechanisms in place?			✓	
Materials loading and storage areas	Area reasonably clean and free of litter and debris?	✓			
	Designated area covered overhead?	✓			
Chemical handling areas	Areas reasonably clean and organized?			✓	
	Is area indoors or properly covered?			✓	
	Spill containment cleanup kits readily available?			✓	
	If outdoors, is water from surrounding areas prevented from reaching chemical handling areas?			✓	
	Hazardous materials/liquids stored above ground?			✓	
	Dry clean up methods implemented?			✓	

IV. Water Quality Management Plan (WQMP)** Review ? see police contract

Has a WQMP (or SWPPP) been developed for this yard? ____ Yes (complete this section and skip section V)
____ No (skip this section and complete section V)

Primary user/occupant is SDPD.

		S	U	N/A	Comments
Facility site map	Identifies drainage areas and direction of flow	✓			
	Identifies location of storm water conveyance system including ditches, inlets and storm drains	✓			
	Identifies location of any existing storm water controls (e.g., berms, filters, grass swales, etc.)	✓			
	Identifies location of building(s) and activity areas (e.g., fueling islands, hazardous materials storage areas, washing areas, etc.)	✓			
Materials/activities used on site	List materials stored and handled on site, including storage location and typical quantities	✓			
	Includes a narrative description of activities conducted on site which have the potential to result in discharges to storm drain system	✓			
Potential Pollutants	Identifies potential pollutants which could be discharged from site given activities conducted at facility	✓			
Best Management Practices (BMPs)	Describes BMPs implemented at facility to deal with **each** potential pollutant source identified	✓			
	Minimum City wide BMPs listed	✓			
	Storm water system regularly inspected/monitored	✓			
Record keeping	Employee training records			✓	
	Quarterly inspections records, if any			✓	
	Storm water conveyance system monitoring (2/yr)[1]			✓	

**The term Water Quality Management Plan (WQMP) is replacing the term Storm Water Pollution Prevention Plan (or SWPPP) for municipal facilities.

V. Water Quality Management Plan Status

Is facility in the process of developing a WQMP?
____ Yes, expected completion date: _____
____ No, this facility does not need a WQMP because SDPD is primary occupant.

VI. Additional Comments (attach additional pages if necessary)

Is facility in the process of developing a WQMP?

____ Yes, expected completion date: _____

____ No, this facility does not need a WQMP because _____

VI. Additional Comments (attach additional pages if necessary)

_____

_____

_____

_____

[1] Only required for NDPES General Storm Water Permit holders

City of San Diego - Urban Runoff Management Plan

ANNUAL MUNICIPAL FACILITY SITE COMPLIANCE INSPECTION CHECKLIST

Inspector: Brent Lindberg
Phone Number: 858-573-1362
Date/Time: March 3, 2008

I. Facility Information

Facility Name	**Facility Name:** Fire Station 42	**Zip Code:** 92128	
Street Address	**Street Address:** 12119 World Trade Dr	**Phone:** 858-538-8142	Zip Code
Facility Contact Person	**Facility Contact Person** Fire Station Capt.	**APN No.** NA	Phone

Standard Industrial Classification Code	Waste Discharge Identification Number	APN No.
NA	NA	NA

II. Shared Facility Information

Is there more than one City department and/or division sharing this facility?

__X__ No (skip this section) _____ Yes (complete this section)

Name of City Departments and/or Divisions Sharing Facility	Contact Person and Phone Number	Covered by this Inspection?
NA		

III. General Site Conditions and Runoff Management Practices Review

		S*	U	NA	Comments
General	Employees trained in storm water pollution prevention practices?	✓			
	Common areas of yard reasonably clean and free of litter and debris?	✓			
	Are parking areas generally clean and swept as needed?	✓			
	Are storm drain inlets reasonably clean and free of debris?	✓			
	Is there evidence of discharges, spills, and or leaks in any areas?	✓			
Trash storage areas	Is area reasonably clean and uncluttered?	✓			
	Are trash cans and garbage bins kept covered?	✓			
Fueling areas	Is there a roof on fueling area?		✓		
	Is there a mechanism in place for spill overflow protection?	✓			Spill kit
Vehicle/equipment maintenance area	Area reasonably clean and free of spills, leaks, or any other deleterious materials?	✓			
	Is area covered overhead?	✓			
	Dry clean up methods implemented?	✓			
	Are there drip pans readily available for use?	✓			
	Spill containment and cleanup kits readily available?	✓			
	Storage areas covered and properly maintained?	✓			

* S = Satisfactory, U = Unsatisfactory

III. General Site Conditions and Runoff Management Practices Review (Cont.)

		S	U	N/A	Comments
Vehicle/equipment washing areas (cont)	Are related activities contained within designated area?			✓	
	Hazardous materials/liquids stored above ground?			✓	
	Are there containment mechanisms in place?			✓	
Materials loading and storage areas	Area reasonably clean and free of litter and debris?	✓			
	Designated area covered overhead?	✓			
Chemical handling areas	Areas reasonably clean and organized?			✓	
	Is area indoors or properly covered?			✓	
	Spill containment cleanup kits readily available?			✓	
	If outdoors, is water from surrounding areas prevented from reaching chemical handling areas?			✓	
	Hazardous materials/liquids stored above ground?			✓	
	Dry clean up methods implemented?			✓	

IV. Water Quality Management Plan (WQMP)** Review

Has a WQMP (or SWPPP) been developed for this yard? ✓ Yes (complete this section and skip section V)
____ No (skip this section and complete section V)

		S	U	N/A	Comments
Facility site map	Identifies drainage areas and direction of flow	✓			
	Identifies location of storm water conveyance system including ditches, inlets and storm drains	✓			
	Identifies location of any existing storm water controls (e.g., berms, filters, grass swales, etc.)	✓			
	Identifies location of building(s) and activity areas (e.g., fueling islands, hazardous materials storage areas, washing areas, etc.)	✓			
Materials/activities used on site	List materials stored and handled on site, including storage location and typical quantities	✓			
	Includes a narrative description of activities conducted on site which have the potential to result in discharges to storm drain system	✓			
Potential Pollutants	Identifies potential pollutants which could be discharged from site given activities conducted at facility	✓			
Best Management Practices (BMPs)	Describes BMPs implemented at facility to deal with **each** potential pollutant source identified	✓			
	Minimum City wide BMPs listed	✓			
	Storm water system regularly inspected/monitored	✓			
Record keeping	Employee training records			✓	
	Quarterly inspections records, if any			✓	
	Storm water conveyance system monitoring (2/yr)[1]			✓	

**The term Water Quality Management Plan (WQMP) is replacing the term Storm Water Pollution Prevention Plan (or SWPPP) for municipal facilities.

V. Water Quality Management Plan Status

Is facility in the process of developing a WQMP?
____ Yes, expected completion date: _____
____ No, this facility does not need a WQMP because _____

IV. Water Quality Management Plan (WQMP)** Review

Has a WQMP (or SWPPP) been developed for this yard? ✓ Yes (complete this section and skip section V)
_____ No (skip this section and complete section V)

		S	U	N/A	Comments
Facility site map	Identifies drainage areas and direction of flow	✓			
	Identifies location of storm water conveyance system including ditches, inlets and storm drains			✓	
	Identifies location of any existing storm water controls (e.g., berms, filters, grass swales, etc.)			✓	
	Identifies location of building(s) and activity areas (e.g., fueling islands, hazardous materials storage areas, washing areas, etc.)	✓			
Materials/activities used on site	List materials stored and handled on site, including storage location and typical quantities			✓	
	Includes a narrative description of activities conducted on site which have the potential to result in discharges to storm drain system	✓			
Potential Pollutants	Identifies potential pollutants which could be discharged from site given activities conducted at facility	✓			
Best Management Practices (BMPs)	Describes BMPs implemented at facility to deal with **each** potential pollutant source identified	✓			
	Minimum City wide BMPs listed	✓			
	Storm water system regularly inspected/monitored	✓			
Record keeping	Employee training records			✓	
	Quarterly inspections records, if any			✓	
	Storm water conveyance system monitoring (2/yr)[1]			✓	

**The term Water Quality Management Plan (WQMP) is replacing the term Storm Water Pollution Prevention Plan (or SWPPP) for municipal facilities.

V. Water Quality Management Plan Status

Is facility in the process of developing a WQMP?
_____ Yes, expected completion date: _____
_____ No, this facility does not need a WQMP because _____

VI. Additional Comments (attach additional pages if necessary)

[1] Only required for NDPES General Storm Water Permit holders

City of San Diego - Urban Runoff Management Plan

ANNUAL MUNICIPAL FACILITY SITE COMPLIANCE INSPECTION CHECKLIST

Inspector: Brent Lindberg
Phone Number: 858-573-1362
Date/Time: March 3, 2008

I. Facility Information

Facility Name	**Facility Name:** Fire Communications Ctr	**Zip Code:** 92123	
Street Address	**Street Address:** 3750 Kearny Villa Rd	**Phone:** 858-573-1300	Zip Code
Facility Contact Person	**Facility Contact Person** Shift Supervisor	**APN No.** NA	Phone
Standard Industrial Classification Code: NA	Waste Discharge Identification Number: NA		APN No.: NA

II. Shared Facility Information

Is there more than one City department and/or division sharing this facility?

__X__ No (skip this section) _____ Yes (complete this section)

Name of City Departments and/or Divisions Sharing Facility	Contact Person and Phone Number	Covered by this Inspection?
NA		

III. General Site Conditions and Runoff Management Practices Review

		S*	U*	N/A	Comments
General	Employees trained in storm water pollution prevention practices?	✓			
	Common areas of yard reasonably clean and free of litter and debris?	✓			
	Are parking areas generally clean and swept as needed?	✓			
	Are storm drain inlets reasonably clean and free of debris?	✓			
	Is there evidence of discharges, spills, and or leaks in any areas?	✓			
Trash storage areas	Is area reasonably clean and uncluttered?	✓			
	Are trash cans and garbage bins kept covered?	✓			
Fueling areas	Is there a roof on fueling area?		✓		
	Is there a mechanism in place for spill overflow protection?	✓			spill kit
Vehicle/equipment maintenance area	Area reasonably clean and free of spills, leaks, or any other deleterious materials?			✓	
	Is area covered overhead?			✓	
	Dry clean up methods implemented?			✓	
	Are there drip pans readily available for use?			✓	
	Spill containment and cleanup kits readily available?			✓	
	Storage areas covered and properly maintained?	✓			

* S = Satisfactory, U = Unsatisfactory

III. General Site Conditions and Runoff Management Practices Review (Cont.)

		S	U	N/A	Comments
Vehicle/equipment washing areas (cont)	Are related activities contained within designated area?			✓	
	Hazardous materials/liquids stored above ground?			✓	
	Are there containment mechanisms in place?			✓	
Materials loading and storage areas	Area reasonably clean and free of litter and debris?	✓			
	Designated area covered overhead?	✓			
Chemical handling areas	Areas reasonably clean and organized?			✓	
	Is area indoors or properly covered?			✓	
	Spill containment cleanup kits readily available?			✓	
	If outdoors, is water from surrounding areas prevented from reaching chemical handling areas?			✓	
	Hazardous materials/liquids stored above ground?			✓	
	Dry clean up methods implemented?			✓	

IV. Water Quality Management Plan (WQMP)** Review

Has a WQMP (or SWPPP) been developed for this yard? ✓ Yes (complete this section and skip section V)

City of San Diego - Urban Runoff Management Plan
MUNICIPAL FACILITY SITE COMPLIANCE INSPECTION CHECKLIST

Department: FIRE RESCUE / LIFEGUARD SERVICES First Inspection X Second Inspection
Inspector: Sgt. Rick Strobel Phone Number: 619.221.8834
Date 6/30/08

Facility Name **PACIFIC BEACH MAIN LIFEGUARD STATION**

Address **700 GRAND AVE** Zip Code **92109**

	Question	Y	N	N / A	(If "NO") Resolution
General					
1	Has the employee performing this inspection had activity-specific storm water BMP training this year?	Y			
2	Are activity-specific BMPs in place?	Y			
3	Are your contractors adhering to the minimum BMPs that were listed in the contract?	Y			
4	Is your facility reasonably clean and free of litter and debris?	Y			
5	Are parking lots reasonably clean and free of debris? If sweeping the lot, note estimated substance and weight of debris in tons.			N / A	
6	Is landscaped area irrigation contained within the landscaped area?	Y			
7	Are pesticides/herbicides/fertilizers minimized where feasible?	Y			
8	Are storm drains stenciled? If no, contact Storm Water Pollution Prevention Division for stencils and paint.		N		NEED TO CALL STROMWATER
9	Are storm drain inlets clean and free of debris?	Y			
10	If cleaning of the storm drain was needed, note estimated substance and weight of debris (in tons) since last inspection.			N / A	
11	Is area absent of any evidence of a discharge, spill, and or leak?	Y			
12	If a minor spill is observed entering the storm drain system during the inspection, have you reported it to the Storm Water hotline (619-235-1000)? (For significant spills also fill out a 24-hour discharge form).			N / A	
Trash storage areas					
13	Is area reasonably clean and uncluttered?	Y			
14	Are trash cans and garbage bins kept covered?	Y			
15	Is the number and placement of the trash cans sufficient for your facility?	Y			

	Question	Y	N	N / A	(If "NO") Resolution
Fueling areas					
16	Is a stocked spill kit available at fuel island?		N		NEED TO ORDER FROM STOREROOM
17	Is area clean and free of spills? If spill is observed, clean up using dry methods.	Y			
Vehicle/equipment maintenance area					
18	Is work area reasonably clean?	Y			
19	Are drip pans readily available for leaking vehicles?		N		NEED TO ORDER FROM STOREROOM
20	Are spill containment materials and stocked cleanup kits readily available?		N		NEED TO ORDER FROM STOREROOM
21	Are maintenance activities contained within the designated area?	Y			
22	Are bulk hazardous materials/liquids stored outside in secondary containment?		N		
Materials loading/unloading and storage areas					
23	Is area reasonably clean and free of litter, debris and loose material?	Y			
24	Is materials storage area covered?	Y			
25	Are materials and stocked cleanup kits readily available?		N		NEED TO ORDER FROM STOREROOM
26	If outdoors, is water from surrounding areas prevented from reaching material storage areas?			N / A	
27	Are bulk hazardous materials/liquids stored outside in secondary containment?		N		
Other Important Areas for inspection					
28	Are the BMPs installed properly?	Y			
29	Are BMPs in good working condition? If no, they need to be replaced.	Y			

30. For any ineffective BMPs (i.e., the wrong BMP is used), describe an effective replacement BMP and update your URMP section.

City of San Diego - Urban Runoff Management Plan
MUNICIPAL FACILITY SITE COMPLIANCE INSPECTION CHECKLIST

Department: FIRE / TRAINING
Inspector: MIKE NELSON
First Inspection ___ Second Inspection
Phone Number: 619 700-5284
Date 7/17/08

Facility Name: FIRE TRAINING — CAPTAIN MICHAEL NELSON
Address: 2590 KENCAID ROAD
Zip Code: 92101

	Question	Y	N	N/A	(If "NO") Resolution
General					
1	Has the employee performing this inspection had activity-specific storm water BMP training this year?	✓			
2	Are activity-specific BMPs in place?	✓			
3	Are your contractors adhering to the minimum BMPs that were listed in the contract?	✓			
4	Is your facility reasonably clean and free of litter and debris?	✓			
5	Are parking lots reasonably clean and free of debris? If sweeping the lot, note estimated substance and weight of debris in tons.	✓			
6	Is landscaped area irrigation contained within the landscaped area?	✓			
7	Are pesticides/herbicides/fertilizers minimized where feasible?	✓			
8	Are storm drains stenciled? If no, contact Storm Water Pollution Prevention Division for stencils and paint.	✓			
9	Are storm drain inlets clean and free of debris?	✓			
10	If cleaning of the storm drain was needed, note estimated substance and weight of debris (in tons) since last inspection.			✓	
11	Is area absent of any evidence of a discharge, spill, and or leak?	✓			
12	If a minor spill is observed entering the storm drain system during the inspection, have you reported it to the Storm Water hotline (619-235-1000)? (For significant spills also fill out a 24-hour discharge form).			✓	
Trash storage areas					
13	Is area reasonably clean and uncluttered?	✓			
14	Are trash cans and garbage bins kept covered?	✓			
15	Is the number and placement of the trash cans sufficient for your facility?	✓			

	Question	Y	N	N/A	(If "NO") Resolution
Fueling areas					
16	Is a stocked spill kit available at fuel island?	✓			
17	Is area clean and free of spills? If spill is observed, clean up using dry methods.	✓			
Vehicle/equipment maintenance area					
18	Is work area reasonably clean?	✓			
19	Are drip pans readily available for leaking vehicles?	✓			
20	Are spill containment materials and stocked cleanup kits readily available?	✓			
21	Are maintenance activities contained within the designated area?	✓			
22	Are bulk hazardous materials/liquids stored outside in secondary containment?			✓	
Materials loading/unloading and storage areas					
23	Is area reasonably clean and free of litter, debris and loose material?	✓			
24	Is materials storage area covered?	✓			
25	Are materials and stocked cleanup kits readily available?	✓			
26	If outdoors, is water from surrounding areas prevented from reaching material storage areas?	✓			
27	Are bulk hazardous materials/liquids stored outside in secondary containment?			✓	
Other Important Areas for inspection					
28	Are the BMPs installed properly?	✓			
29	Are BMPs in good working condition? If no, they need to be replaced.	✓			

30. For any ineffective BMPs (i.e., the wrong BMP is used), describe an effective replacement BMP and update your URMP section.

SAN DIEGO FIRE-RESCUE DEPARTMENT

Storm Water Pollution Prevention Program

Routine Activities Best Management Practices (BMPs)

VEHICLE / EQUIPMENT WASHING

- Prior to washing any vehicles or equipment, the area will be swept and the debris disposed of in the trash can.
- Vehicles or equipment will be washed inside the facility, when feasible.
- If vehicles or equipment cannot be washed inside, then vehicles or equipment will be washed where runoff is directed to either: a) a separator system, b) where water will pool and evaporate, or c) a landscaped area.
- Use of a cleaning solution will be minimized or eliminated and excess solution will be disposed of in a utility sink.
- ***AT NO TIME SHALL WASH / RINSE WATER LEAVE FIRE-RESCUE PROPERTY AND / OR ENTER A STORM DRAIN. (EMERGENCY DECON AT INCIDENTS EXCEPTED)***

LEAKING VEHICLES / SPILLS

- Leaking vehicle fluids will be cleaned up with absorbent material or a drip pan will be placed under the vehicle. Absorbent materials will be disposed of properly.
- Vehicles that leak will be turned into Fleet and Facilities Division for repairs.
- Spills which require a cleanup beyond the ability of on-site employees shall be reported to the Fire Communications.

WASHING OF VESSELS

- When vessels are washed, use minimum amounts of biodegradable soap and discharged to sewers when feasible.
- Keep all bilges clean of oil and other contaminants using spill containers and dispose of as required.

PARKING LOTS / LANDSCAPING DEBRIS / APPARATUS FLOORS

- Trash and debris will be picked up weekly by personnel.
- Apparatus floors and parking lots will be dry swept to remove debris. Debris will be disposed of in the trash.
- If floors are mopped, all water will be disposed of in the utility sink.
- Irrigation systems will be monitored and maintained to eliminate irrigation water entering the storm drain system.

TRAINING ACTIVITIES

- Prior to starting training activities, the affected areas will be swept and dispose of the debris in the trash cans.
- Ensure storm drains are protected and maintained.
- Water flows from training activities will be directed to landscaped areas whenever possible.
- Ensure outside agencies using our facilities are aware of the BMPs.

STRUCTURAL BMPs

- Maintenance and repair of structures will be done using methods that do not contribute to discharges to the storm water conveyance system.

7/16/2008

CITY OF SAN DIEGO

MEMORANDUM

DATE: April 29, 2008

TO: Lori Vereker, Deputy Director, WWT&D Division

FROM: Skyla Wallmann, Air Quality Coordinator, EMTS Division

SUBJECT: April 2008 Internal Compliance Audits – MBC, PS #1 & PS #2

This electronic memo combines the results of the internal compliance audits performed at three Treatment & Disposal (T&D) facilities in April 2008 for the reporting period from October 2007 thru March 2008. The facilities addressed in this memo include **MBC, PS #1 and PS #2.**

These facilities are in compliance with the majority of the permit conditions mandated by the Air Pollution Control District (APCD), Regional Water Quality Control Board (RWQCB) and State Water Resources Control Board (SWRCB).

City of SD Urban Runoff Management Plan (URMP)

The City of San Diego adopted a new ordinance addressing storm water pollution; its details are outlined in the URMP which is overseen by the City's Storm Water Pollution Prevention Division in the General Services Department. The ordinance is driven by an NPDES permit issued by the RWQCB to address urban runoff from incorporated cities within San Diego County; it is referred to as the municipal storm water permit.

The URMP requires all MWWD sites comply with minimum Best Management Practices or BMPs for storm water. The T&D sites already comply with the majority of the minimum BMPs via their site specific Storm Water Pollution Prevention Plans (SWPPPs) which are driven by the SWRCB's general industrial permit.

The minimum storm water BMPs listed in the URMP for **all sites** are as follows:

1. locate storm drains and prevent pollution from entering
2. only clean rainwater should be discharged into the storm drain
3. sweep up areas after activities and/or spills; sweep parking lots on a routine basis
4. annually clean/clear all storm drain system facilities (catch basins, storm drain inlets, open channels, etc.) of debris
5. keep lids closed on trash cans and dumpsters and ensure all trash is picked up around the cans and dumpsters at all times; ensure dumpsters are not leaking
6. keep materials and waste piles covered and, if possible, off the ground

a. Two storm drains need to be stenciled: one at the south side of the plant and one at the north end adjacent to the drainage ditch.
b. One storm drain catch basin needs to be cleaned on an annual basis prior to Oct. 1 of every year. It appears that the drainage ditch is outside of the City of SD property.

2. **APCD** – no deficiencies were noted.

Pump Station #2

This audit occurred on 4/10/08 with the assistance of Barik DeMasi.

1. **Storm Water** – the following items were noted:
   a. No stenciling is currently needed at this site
   b. Two storm drain catch basins (one in the parking lot and one at the west exit) need to be cleaned on an annual basis prior to Oct. 1 of every year

2. **APCD** – no deficiencies were noted.

The Permits and Compliance staff appreciates the efforts the T&D staff directs towards maintaining compliance with the environmental permits at these three sites. Please contact me at (619) 758-2371 should you desire any further information or clarification.

CITY OF SAN DIEGO

MEMORANDUM

DATE: May 7, 2008

TO: Lori Vereker, Deputy Director, WWTD Division

FROM: Neil Tran, EMTS Division

SUBJECT: Operating Permit Internal Compliance Audit – April 2008

Below are the results from the recent internal audits at the following facilities: PLWWTP, NCWRP, SBWRP, PS 64, PS 65, Penasquitos PS, East Mission Gorge PS, Grove Avenue PS, and Otay River PS. The facilities were in compliance with the majority of the permit conditions mandated by the Air Pollution Control District, Regional Water Quality Control Board, State Air Resources Board, and State Water Resources Control Board.

Note: The Air Pollution Control District implemented a couple of new rules which require all existing parts washers be switching to either the aqueous solution or a low VOC (50 g/l or less) solvent by May 23, 2008. Most of the units at MWWD facilities have made the switch or in the process of switching to aqueous parts washers. The one at MBC and CSF have switched to zero/low VOC solvent. The aqueous parts washers do not require permit to operate. However, they still generate hazardous waste materials. Therefore, requiring licensed hauler to dispose of the hazardous waste materials properly.

I. City of San Diego Jurisdictional Urban Runoff Management Plan (URMP)

The City of San Diego has implemented the Jurisdictional Urban Runoff Management Plan (URMP) that was adopted by the Mayor and City Council earlier this year. The URMP was developed by the Storm Water Pollution Prevention Division in the General Services Department, with the assistance of other City departments, to address the pollutants from urban runoff and storm water discharge to local bodies of waters. For more details on the URMP, please visit the Think Blue website at www.sandiego.gov/thinkblue.

Below is a list of additional minimum Best Management Practices (BMPs) derived from the URMP that have been incorporated into the Storm Water Pollution Prevention Plan (SWPPP) at each WWT&D site:

1. *locate storm drains and prevent pollution from entering*

G. **Dewatering Pumps (Registration Nos. 102580 and 102581)**
The run time and fuel usages were up to date.

H. **Title V (Permit No. 961008)**
No deficiencies were reported.

I. **Parts Washers**
Parts washers were clean and lids were closed.

G. **SWPPP**
There were no monthly inspections for the months of November 2007 thru February 2008. The storm drain inlets need to be stenciled per new BMP. Trash cans and dumpsters shall be covered to prevent leaks from them during rain events.

III. **North City Water Reclamation Plant**
Rob Relph assisted with the audit/inspection on April 21, 2008

A. **Odor Control (Permit No. 911469)**
There were no compliance issues reported.

B. **SWPPP**
All inspections and observations were up to date. However, there were some authorized non-storm water runoffs from the broken irrigation sprinkler heads at Secondary St (landscaper was replacing them at time of inspection) and at the entrance to the visitor parking lot. Roll off bins and trash cans need covers per new BMPs.

C. **Parts Washer**
There were no compliance issues with this unit.

IV. **South Bay Water Reclamation Plant**
Linda Ruiz-Lopez assisted with the audit/inspection on April 23, 2008.

A. **Odor Control (Permit No. 974161)**
There were no compliance issues at this facility.

B. **Emergency Generator (Registration No. 975524)**
There were no deficiencies reported.

C. **Parts Washer**
There were no compliance issues with this unit.

C. **SWPPP**
Storm water observations and monitoring were up to date.

VIII. **East Mission Gorge Pump Station (Permit No. 901227)**
Ray Burns assisted with the audit/inspection on April 25, 2008.

A. **Odor Control**
There were no deficiencies reported.

B. **SWPPP**
Storm water observations and monitoring were up to date.
There is no storm drain inlet at this facility.

IX. **Grove Avenue Pump Station**
Barik Demasi assisted with the audit on April 22, 2008.

A. **Odor Control (Permit No. 971642)**
There were no compliance issues at this facility.

B. **Emergency Generator (Registration No. 975523)**
There were no compliance issues with the emergency engine.

C. **SWPPP**
Storm water observations and monitoring were up to date.
Storm drain inlets need stenciling.

X. **Otay River Pump Station**
Barik Demasi assisted with the audit on April 22, 2008.

A. **Odor Control (Permit No. 978829)**
Instantaneous displays of H2S were offline at time of inspection. Barik reset them and displays were normal.

B. **Emergency Generator (Registration No. 977816)**
No deficiencies were reported.

C. **SWPPP**
Storm water inspections were up to date.
There is no storm drain inlet at this facility.

CITY OF SAN DIEGO

MEMORANDUM

DATE: April 29, 2008

TO: Lori Vereker, Deputy Director, WWT&D Division
Alan Langworthy, Deputy Director, EMTS Division
Chris Toth, Deputy Director, WWC Division

FROM: Skyla Wallmann, Permits & Compliance, EMTS Division

SUBJECT: April 2008 Compliance Audits - MOC Complex & EMTS Laboratory

---

This electronic memo combines the results of the internal compliance audits performed at two MWWD facilities in April 2008 for the reporting period from October 2007 thru March 2008. The facilities addressed in this memo include the **MOC Complex and EMTS Laboratory.**

These facilities are in compliance with the permit conditions mandated by the Air Pollution Control District (APCD). Due to the newly adopted Urban Runoff Management Plant or URMP, **both sites need to address storm water regulations** associated with requirements mandated by the Regional Water Quality Control Board (RWQCB) and State Water Resources Control Board (SWRCB).

City of SD Urban Runoff Management Plan (URMP)

The City of San Diego adopted a new ordinance addressing storm water pollution; its details are outlined in the URMP which is overseen by the City's Storm Water Pollution Prevention Division in the General Services Department. The ordinance is driven by an NPDES permit issued by the RWQCB to address urban runoff from incorporated cities within San Diego County; it is referred to as the municipal storm water permit.

The URMP requires all MWWD sites comply with minimum Best Management Practices or BMPs for storm water pollution prevention. Per Chapter 6.9 of the URMP, the MOC Complex and EMTS Laboratory are subject to the new requirements.

Beginning immediately, these sites must comply with the municipal storm water minimum BMPs as follows:

1. locate storm drains and prevent pollution from entering
2. only clean rainwater should be discharged into the storm drain
3. sweep up areas after activities and/or spills; sweep parking lots on a routine basis

b. **MOC III** – both lids to the dumpster in the southwest corner were open
c. **MOC V –**
    i. Two channels on the west side of street need to be swept and stenciled
    ii. The parking lot needs general sweeping
    iii. Swaddles at both storm drain channels need to be replaced
    iv. A large, fresh oil puddle in the parking lots needs attention
    v. South side of the parking lot needs general housekeeping attention
d. **MOC VI –**
    i. Both dumpster lids were open; it was over-flowing with household trash
    ii. Trash and debris (uncovered sand piles, broken pallets, etc) are surrounding the dumpster. This area needs general housekeeping attention
    iii. Storm drain channel needs to be swept and stenciled
    iv. The parking lot needs general sweeping
e. **MOC VII –**
    i. The entire yard needs considerable general house keeping attention. It has significant litter, junk, abandoned chemicals, spray paint cans, metal parts, gas can, ropes, etc.
    ii. Numerous pools of hydraulic fluid and oil leaks need to be cleaned
    iii. An oily dirt pile under the portable wenches needs to be removed
    iv. The entire lot needs sweeping and cleaning
f. **MOC VIII** – the parking lot needs sweeping
g. **MOC IX** – uncovered, broken sand bags are on a pallet on the side of the building need to be covered or removed

EMTS Laboratory

This audit occurred on 4/22/08 with the assistance of Nico Guerra and Gilbert Ibarra.

1. **APCD** – No APCD permit deficiencies were noted for the emergency generator.

2. **Storm Water URMP**
    a. MWWD staff is responsible for storm water compliance for the entire parcel of land.
    b. The parking lot and gutters need sweeping.
    c. Most of the seven storm drains and three catch basins are stenciled; one storm drain on the SE side of the building needs stenciling. All storm drains and catch basins need to be clean on an annual basis prior to Oct. 1 of every year.
    d. All seven storm drains need metal grates or felt to prevent debris from entering the storm drain.
    e. It appears that EMTS lab staff washes equipment behind the dumpsters and allows the water to enter the storm drain. This activity violates the URMP requirements. This small drain needs cleaning.

Description

Step	Crew	Craft	Schedule Date
1.	8772	ET	

NOTE: DUE TO THE UNIQUENESS OF EACH SITE, NOT ALL OF THE FOLLOWING STEPS ARE APPLICABLE. PERFORM ONLY THE STEPS THAT APPLY AND MAKE THE APPROPRIATE NOTATIONS ON THE WORK ORDER.

THESE PROCEDURES ONLY APPLY TO THE GROUNDS OF THE ACTUAL SITE. FOR INSTANCE: INSIDE THE FENCE.

A. CALL COMC UPON ARRIVAL AT THE STATION TO NOTIFY THEM OF THE VISIT.

B. CHECK THE STATION LOG SHEET TO DETERMINE RECENT WORK CONDUCTED IN THE STATION.

C. FOR STATIONS WITH ATMOSPHERIC MONITORS, VERIFY THAT THE ATMOSPHERIC MONITORS ARE FUNCTIONING AND SHOW NO ALARMS.

1. PRIOR TO STARTING THESE PROCEDURES, LOCATE ALL STORM DRAINS AT THE STE AND PREVENT POLLUTANTS FROM ENTERING STORM DRAINS.

2. SWEEP UP SITE TO PREVENT POLLUTANTS FROM ENTERING STORM DRAINS. NOTE: HOSING DOWN POLLUTANTS INTO THE STORM DRAIN IS PROHIBITED. USE A BROOM, SHOVEL OR OTHER MECHANICAL MEANS TO COLLECT SOLIDS FOR REUSE OR DISPOSAL. USE ABSORBANTS TO REDUCE THE SPREAD OF LIQUIDS AND ABSORB OR PUMP UP LIQUIDS FOR REUSE OR DISPOSAL

3. INSPECT AND CLEAR ALL STORM DRAIN SYSTEM CATCH BASINS AND DROP INLETS AT THE SITE OF DEBRIS OR OTHER FOREIGN MATERIALS.

4. AS APPLICAPLE, KEEP LIDS CLOSED ON OUTSIDE TRASH CANS AND DUMPSTERS TO PREVENT RAINWATER FROM ENTERING AND ENSURE THAT ALL TRASH IS PICKED UP AROUND TRASH CANS AND DUMPSTERS AT ALL TIMES. IF APPLICABLE, ENSURE THAT ENOUGH TRASH CANS AND OR DUMPSTERS ARE PROVIDED FOR THE SITE.

NOTES: Indicate any remarks or comments on the reverse side.

Asset Description	: STATION, SEWER PUMP, SPS-86, CITY FACILITY NO 10003, FIELD BOOK F10S, THOMAS BROS 1228J7, 5890		
Location	: ABOVE GROUND CONCRETE STRUCTURE	**Last Reading Date**	:

Description

Step	Crew	Craft	Schedule Date
1.	8772	ET	

NOTE: DUE TO THE UNIQUENESS OF EACH SITE, NOT ALL OF THE FOLLOWING STEPS ARE APPLICABLE. PERFORM ONLY THE STEPS THAT APPLY AND MAKE THE APPROPRIATE NOTATIONS ON THE WORK ORDER.

THESE PROCEDURES ONLY APPLY TO THE GROUNDS OF THE ACTUAL SITE. FOR INSTANCE: INSIDE THE FENCE.

A. CALL COMC UPON ARRIVAL AT THE STATION TO NOTIFY THEM OF THE VISIT.

B. CHECK THE STATION LOG SHEET TO DETERMINE RECENT WORK CONDUCTED IN THE STATION.

C. FOR STATIONS WITH ATMOSPHERIC MONITORS, VERIFY THAT THE ATMOSPHERIC MONITORS ARE FUNCTIONING AND SHOW NO ALARMS.

1. PRIOR TO STARTING THESE PROCEDURES, LOCATE ALL STORM DRAINS AT THE STE AND PREVENT POLLUTANTS FROM ENTERING STORM DRAINS.

2. SWEEP UP SITE TO PREVENT POLLUTANTS FROM ENTERING STORM DRAINS. NOTE: HOSING DOWN POLLUTANTS INTO THE STORM DRAIN IS PROHIBITED. USE A BROOM, SHOVEL OR OTHER MECHANICAL MEANS TO COLLECT SOLIDS FOR REUSE OR DISPOSAL. USE ABSORBANTS TO REDUCE THE SPREAD OF LIQUIDS AND ABSORB OR PUMP UP LIQUIDS FOR REUSE OR DISPOSAL

3. INSPECT AND CLEAR ALL STORM DRAIN SYSTEM CATCH BASINS AND DROP INLETS AT THE SITE OF DEBRIS OR OTHER FOREIGN MATERIALS.

4. AS APPLICAPLE, KEEP LIDS CLOSED ON OUTSIDE TRASH CANS AND DUMPSTERS TO PREVENT RAINWATER FROM ENTERING AND ENSURE THAT ALL TRASH IS PICKED UP AROUND TRASH CANS AND DUMPSTERS AT ALL TIMES. IF APPLICABLE, ENSURE THAT ENOUGH TRASH CANS AND OR DUMPSTERS ARE PROVIDED FOR THE SITE.

NOTES: Indicate any remarks or comments on the reverse side.

Description

Step Crew Craft Schedule Date

5. IF APPLICABLE, KEEP MATERIALS AND WASTE PILES COVERED AND IF POSSIBLE, OFF THE GROUND. MATERIALS AND WASTE STOCKPILES MUST BE PROTECTEDTO PREVET CONTACT WITH RAINWATER AND ANY RUNNOFF. ENSURE ALL COVERINGS, SILT FENCES, TARPS, AND PALLETS ARE IN GOOD CONDITION.

6. IF SITE HAS STORM DRAINS, ENSURE THEY ARE PROPERLY STENCILED WITH "NO DUMPING-GOES DIRECTLY TO OCEAN/THINK BLUE".

7. IF SITE HAS LANSCAPING IRRIGATION, INSPECT FOR EXCESSIVE RUNNOFF. IF EXCESSIVE RUNOFF IS DISCOVERED, MAKE ALL NECESSARY CORRECTIONS.

8. FILL OUT WORK ORDER AND TURN IN COMPLETED WORK ORDER TO THE MAINTENANCE SUPERVISOR. RECORD ANY OBSERVED IRREGULARITIES AND DEFICIENCIES NOTED DURING THIS INSPECTION. ANY IRREGULARITIES AND DEFICIENCIES THAT REQUIRE WORK BEYOND THE SCOPE OF THIS WORK ORDER, REQUIRES THAT ADDITIONAL WORK ORDERS TO BE INITIATED BY THE PERSON COMPLETING THIS WORK.

TOOLS NEEDED:
BROOM
SHOVEL
TRASH BAGS
RAGS
STENCILS
PAINT

Police Department Municipal Inspection Forms

City of San Diego - Urban Runoff Management Plan
MUNICIPAL FACILITY SITE COMPLIANCE INSPECTION CHECKLIST

Department: Police
Inspector: Roy Kirby
First Inspection ✓ Second Inspection ____
Phone Number: 531-2966
Date 5-19-08

Facility Name NORTHWESTERN

Address 12592 El Camino Real
Zip Code 92130

	Question	Y	N	N/A	(If "NO") Resolution
General					
1	Has the employee performing this inspection had activity-specific storm water BMP training this year?	X			
2	Are activity-specific BMPs in place?	X			
3	Are your contractors adhering to the minimum BMPs that were listed in the contract?	X			
4	Is your facility reasonably clean and free of litter and debris?	X			
5	Are parking lots reasonably clean and free of debris? If sweeping the lot, note estimated substance and weight of debris in tons.	X			
6	Is landscaped area irrigation contained within the landscaped area?	X			
7	Are pesticides/herbicides/fertilizers minimized where feasible?	X			
8	Are storm drains stenciled? If no, contact Storm Water Pollution Prevention Division for stencils and paint.	X			
9	Are storm drain inlets clean and free of debris?	X			
10	If cleaning of the storm drain was needed, note estimated substance and weight of debris (in tons) since last inspection.			X	
11	Is area absent of any evidence of a discharge, spill, and or leak?	X			
12	If a minor spill is observed entering the storm drain system during the inspection, have you reported it to the Storm Water hotline (619-235-1000)? (For significant spills also fill out a 24-hour discharge form).			X	
Trash storage areas					
13	Is area reasonably clean and uncluttered?	X			
14	Are trash cans and garbage bins kept covered?	X			
15	Is the number and placement of the trash cans sufficient for your facility?	X			

	Question	Y	N	N / A	(If "NO") Resolution
Fueling areas					
16	Is a stocked spill kit available at fuel island?	X			
17	Is area clean and free of spills? If spill is observed, clean up using dry methods.	X			
Vehicle/equipment maintenance area					
18	Is work area reasonably clean?	X			
19	Are drip pans readily available for leaking vehicles?	X			
20	Are spill containment materials and stocked cleanup kits readily available?	X			
21	Are maintenance activities contained within the designated area?	X			
22	Are bulk hazardous materials/liquids stored outside in secondary containment?	X			
Materials loading/unloading and storage areas					
23	Is area reasonably clean and free of litter, debris and loose material?	X			
24	Is materials storage area covered?	X			
25	Are materials and stocked cleanup kits readily available?	X			
26	If outdoors, is water from surrounding areas prevented from reaching material storage areas?	X			
27	Are bulk hazardous materials/liquids stored outside in secondary containment?				
Other Important Areas for inspection					
28	Are the BMPs installed properly?	X			
29	Are BMPs in good working condition? If no, they need to be replaced.	X			

30. For any ineffective BMPs (i.e., the wrong BMP is used), describe an effective replacement BMP and update your URMP section.

14	Are trash cans and garbage bins kept covered?	X			
15	Is the number and placement of the trash cans sufficient for your facility?	X			

City of San Diego - Urban Runoff Management Plan
MUNICIPAL FACILITY SITE COMPLIANCE INSPECTION CHECKLIST

Department: Library
Inspector: Pam Whitfield
First Inspection X Second Inspection ____
Phone Number: 238-6644
Date 6/30/08

Facility Name: Skyline Hills Library
Address: 480 S. Meadowbrook Dr
Zip Code: 92114

	Question	Y	N	N/A	(If "NO") Resolution
General					
1	Has the employee performing this inspection had activity-specific storm water BMP training this year?	X			
2	Are activity-specific BMPs in place?	X			
3	Are your contractors adhering to the minimum BMPs that were listed in the contract?	X			
4	Is your facility reasonably clean and free of litter and debris?	X			
5	Are parking lots reasonably clean and free of debris? If sweeping the lot, note estimated substance and weight of debris in tons.	X			Leaves, dirt, misc. trash approx weight 15 LBS.
6	Is landscaped area irrigation contained within the landscaped area?			X	Not on site when watering
7	Are pesticides/herbicides/fertilizers minimized where feasible?	X			
8	Are storm drains stenciled? If no, contact Storm Water Pollution Prevention Division for stencils and paint.			X	
9	Are storm drain inlets clean and free of debris?			X	
10	If cleaning of the storm drain was needed, note estimated substance and weight of debris (in tons) since last inspection.			X	
11	Is area absent of any evidence of a discharge, spill, and or leak?	X			
12	If a minor spill is observed entering the storm drain system during the inspection, have you reported it to the Storm Water hotline (619-235-1000)? (For significant spills also fill out a 24-hour discharge form).			X	
Trash storage areas					
13	Is area reasonably clean and uncluttered?	X			
14	Are trash cans and garbage bins kept covered?	X

General					
1	Has the employee performing this inspection had activity-specific storm water BMP training this year?	Y			
2	Are activity-specific BMPs in place?	Y			
3	Are your contractors adhering to the minimum BMPs that were listed in the contract?	Y			
4	Is your facility reasonably clean and free of litter and debris?	Y			
5	Are parking lots reasonably clean and free of debris? If sweeping the lot, note estimated substance and weight of debris in tons.	Y			
6	Is landscaped area irrigation contained within the landscaped area?	Y			
7	Are pesticides/herbicides/fertilizers minimized where feasible?	Y			
8	Are storm drains stenciled? If no, contact Storm Water Pollution Prevention Division for stencils and paint.	Y			
9	Are storm drain inlets clean and free of debris?	Y			
10	If cleaning of the storm drain was needed, note estimated substance and weight of debris (in tons) since last inspection.	Y			
11	Is area absent of any evidence of a discharge, spill, and or leak?	Y			
12	If a minor spill is observed entering the storm drain system during the inspection, have you reported it to the Storm Water hotline (619-235-1000)? (For significant spills also fill out a 24-hour discharge form).			N/A	
Trash storage areas					
13	Is area reasonably clean and uncluttered?	Y			
14	Are trash cans and garbage bins kept covered?	Y			
15	Is the number and placement of the trash cans sufficient for your facility?	Y			

	Question	Y	N	N / A	(If "NO") Resolution
Fueling areas					
16	Is a stocked spill kit available at fuel island?	Y			
17	Is area clean and free of spills? If spill is observed, clean up using dry methods.	Y			
Vehicle/equipment maintenance area					
18	Is work area reasonably clean?	Y			
19	Are drip pans readily available for leaking vehicles?	Y			
20	Are spill containment materials and stocked cleanup kits readily available?	Y			
21	Are maintenance activities contained within the designated area?	Y			
22	Are bulk hazardous materials/liquids stored outside in secondary containment?	Y			
Materials loading/unloading and storage areas					
23	Is area reasonably clean and free of litter, debris and loose material?	Y			
24	Is materials storage area covered?	Y			
25	Are materials and stocked cleanup kits readily available?	Y			
26	If outdoors, is water from surrounding areas prevented from reaching material storage areas?	Y			
27	Are bulk hazardous materials/liquids stored outside in secondary containment?	Y			
Other Important Areas for inspection					
28	Are the BMPs installed properly?	Y			
29	Are BMPs in good working condition? If no, they need to be replaced.	Y			

30. For any ineffective BMPs (i.e., the wrong BMP is used), describe an effective replacement BMP and update your URMP section.

Water Department Municipal Inspection Forms

○ CONSTRUCTION SITE OR ● FACILITY (PUMP STATION, DISTRIBUTION RESERVOIR, WATER TREATMENT PLANT, OTHER): Rancho Mills Standpipe ~~Pump~~ OOS Res

INSPECTOR AND DATE Cross 9-28-07

VISUAL INSPECTION CHECKLIST	YES/NO	IF YES, ACTION TAKEN
CLEANING: Are there signs of poor housekeeping (walkways cluttered, floors not swept, etc.) in any facility areas?	NO	
STORM DRAIN: Have the BMPs at storm drain inlets, catch basins and curb inlets been neglected? Do they need replacing?	NO	
STORM DRAIN: Are there obstructions or debris in the catch basins or curb inlets?	YES	LOW PT OF PROPERTY, CMP PIPE w/ STRAW WADDLE IN FRONT, REMOVE, CLEAN & RE LOCATE WADDLES UP OUT OF DEPRESSION.
SITE WORK: Do unpaved areas of the facility produce excessive dust and dirt on windy days?	N	
SITE WORK: Inspect the site prior to a forecast storm event. Site work: Should plastic sheet covers or tarps be placed on slopes not vegetated to avoid sediment flow or soil erosion?	N	
SITE WORK: Are unpaved areas of the facility subject to scour or erosion during rainfall?	N	
SITE WORK: To avoid erosion at the discharge end, should the rooftop runoff be made to spill into a pervious area (e.g. grass yard)?	N/A	
SITE WORK/STORAGE: Are there spots, pools puddles or other traces of oil on any hard surfaces?	N	
SITE WORK/STORAGE: Is standing water found in inappropriate areas long after the rain has stopped?	N	
STORAGE: Is there evidence of drips or leaks from any equipment?	N	
STORAGE: Mechanical equipment stored outside should be covered with tarp or plastic. Does any equipment need this type of weather protection?	N	
STORAGE: Does any equipment stored outdoors capture/collect rainwater that could lead to rusting or contamination by grease, oil, gas, etc.?	N	
STORAGE: Does the dry chemical storage area need protection from the wind or rain?	N/A	
STORAGE: Have the secondary containment structures (berms, dikes, walls, etc.) developed cracks or other issues that will keep them from working as designed to capture spills?	N/A	
STORAGE: Does the inspection of storage containers reveal signs of cracks, corrosion or leaks?	N/A	
STORAGE: Has this site inspection revealed any indications of poor or improper storage practices?	NO	

SITE ASSESSMENT CHECKLIST		
STORAGE: Keep storage areas clean, well organized, and equipped with ample clean-up supplies as appropriate for the materials stored.	OK	
CLEANING: Is onsite cleaning limited to washing with water and soap? If not, provide a dedicated wash-down area and utilize appropriate BMPs to contain hazard/runoff.	N/A	
PARKING: Make a dedicated parking space available for vehicles or motive equipment that leak and place drip pans at each location.	N/A	
WASTE MANAGEMENT: Plan timely service and removal to prevent dumpsters from overflowing.	N/A	
LOADING DOCKS: Cover large deliveries with a canopy or awning if they will be stored outside for any period.	N/A	
SLOPES: Use plastic sheet cover or other BMPs on unprotected slopes during storm events. Implement temporary soil stabilization measures until permanent stabilization is achieved.		ON AREAS WHERE ICE PLANT HAS DIED AND EXPOSED THE SOIL, SPREAD WOOD CHIPS TO PREVENT EROSION
SEDIMENT REMOVAL: After a rain event, clean and dispose of the sediment and debris that has collected at the storm inlets and catch basins as soon as weather conditions permit.	OK	
SLOPE REPAIR: Repair any slope/vegetation damage that has occurred during a storm event as soon as weather conditions permit.	OK	
STORM DRAIN: Direct connections to storm drains from depressed loading docks (truck wells) must use protective BMPs. Filter fabric and oil/water separators should be used in these areas.	N/A	

NOTES/REMARKS:

ITEMS TO REVIEW:

- Onsite waste management and disposal practices
- Outdoor maintenance or processing activities

○ CONSTRUCTION SITE OR ● FACILITY (PUMP STATION, DISTRIBUTION RESERVOIR, WATER TREATMENT PLANT, OTHER): San Carlos Reservoir 8005 Rue Tommy Drive & Wing Span Drive, San Diego, CA
INSPECTOR AND DATE P. Schlitt / September 7, 2007

VISUAL INSPECTION CHECKLIST	(YES/NO)	EXPLANATION/ACTION
CLEANING: Are there signs of poor housekeeping (walkways cluttered, floors not swept, etc.) in any facility areas?	No	minor leaf debris in curb & gutter
STORM DRAIN: Have the BMPs at storm drain inlets, catch basins and curb inlets been neglected? Do they need replacing?	yes	New weighted fiber roll should be installed around surface inlet grate on northside and southside of reservoir
STORM DRAIN: Are there obstructions or debris in the catch basins or curb inlets?	yes	Minor leaf debris collected in bottom of storm drains
SITE WORK: Do unpaved areas of the facility produce excessive dust and dirt on windy days?	No	Perimeter of reservoir surrounded by asphalt pavement
SITE WORK: Inspect the site prior to a forecast storm event. Site work: Should plastic sheet covers or tarps be placed on slopes not vegetated to avoid sediment flow or soil erosion?	No	
SITE WORK: Are unpaved areas of the facility subject to scour or erosion during rainfall?	N/A	Reservoir entirely surrounded by asphalt pavement
SITE WORK: To avoid erosion at the discharge end, should the rooftop runoff be made to spill into a pervious area (e.g. grass yard)?	N/A	
SITE WORK/STORAGE: Are there spots, pools puddles or other traces of oil on any hard surfaces?	No	
SITE WORK/STORAGE: Is standing water found in inappropriate areas long after the rain has stopped?	No	
STORAGE: Is there evidence of drips or leaks from any equipment?	N/A	No equipment stored at facility
STORAGE: Mechanical equipment stored outside should be covered with tarp or plastic. Does any equipment need this type of weather protection?	N/A	No mechanical equipment stored at facility
STORAGE: Does any equipment stored outdoors capture/collect rainwater that could lead to rusting or contamination by grease, oil, gas, etc.?	N/A	
STORAGE: Does the dry chemical storage area need protection from the wind or rain?	N/A	No chemical storage identified onsite
STORAGE: Have the secondary containment structures (berms, dikes, walls, etc.) developed cracks or other issues that will keep them from working as designed to capture spills?	N/A	
STORAGE: Does the inspection of storage containers reveal signs of cracks, corrosion or leaks?	N/A	No storage containers onsite
STORAGE: Has this site inspection revealed any indications of poor or improper storage practices?	No	

SITE ASSESSMENT CHECKLIST		
STORAGE: Keep storage areas clean, well organized, and equipped with ample clean-up supplies as appropriate for the materials stored.	N/A	No exterior storage area at facility
CLEANING: Is onsite cleaning limited to washing with water and soap? If not, provide a dedicated wash-down area and utilize appropriate BMPs to contain hazard/runoff.	yes	
PARKING: Make a dedicated parking space available for vehicles or motive equipment that leak and place drip pans at each location.	N/A	No long-term parking required at facility
WASTE MANAGEMENT: Plan timely service and removal to prevent dumpsters from overflowing.	N/A	No trash bins located at facility
LOADING DOCKS: Cover large deliveries with a canopy or awning if they will be stored outside for any period.	N/A	No loading docks associated with facility
SLOPES: Use plastic sheet cover or other BMPs on unprotected slopes during storm events. Implement temporary soil stabilization measures until permanent stabilization is achieved.	N/A	No slope protection required - entire perimeter adequately vegetated
SEDIMENT REMOVAL: After a rain event, clean and dispose of the sediment and debris that has collected at the storm inlets and catch basins as soon as weather conditions permit.	Yes	Minor amount of leaf debris required to be removed from curb gutter on south side of facility
SLOPE REPAIR: Repair any slope/vegetation damage that has occurred during a storm event as soon as weather conditions permit.	N/A	No evidence of any damaged slopes surrounding facility
STORM DRAIN: Direct connections to storm drains from depressed loading docks (truck wells) must use protective BMPs. Filter fabric and oil/water separators should be used in these areas.	N/A	

NOTES/REMARKS: Minor water leakage visible at base of reservoir along south side of structure. Leakage draining to existing curb and gutter and then emptying into overflow vault (photo taken)
Areas around both storm drain inlet grates should be sweeped and new weighted fiber rolls installed around the perimeter of each grate prior to rainy season.

INSPECTOR AND DATE SAID MAHDAVI 9-4-07

MINIMUM INSPECTION CHECKLIST	(YES/NO)	IF YES, EXPLANATION REQUIRED
CLEANING: Are there signs of poor housekeeping (walkways cluttered, floors not swept, etc.) in any facility areas?	NO	
STORM DRAIN: Have the BMPs at storm drain inlets, catch basins and curb inlets been neglected? Do they need replacing?	NO	
STORM DRAIN: Are there obstructions or debris in the catch basins or curb inlets?	YES	cross Gutter needs to be cleaned,
SITE WORK: Do unpaved areas of the facility produce excessive dust and dirt on windy days?	NO	Remove all Gravel
SITE WORK: Inspect the site prior to a forecast storm event. Site work: Should plastic sheet covers or tarps be placed on slopes not vegetated to avoid sediment flow or soil erosion?	N/A	
SITE WORK: Are unpaved areas of the facility subject to scour or erosion during rainfall?	NO	
SITE WORK: To avoid erosion at the discharge end, should the rooftop runoff be made to spill into a pervious area (e.g. grass yard)?	NO	
SITE WORK/STORAGE: Are there spots, pools puddles or other traces of oil on any hard surfaces?	NO	
SITE WORK/STORAGE: Is standing water found in inappropriate areas long after the rain has stopped?	NO	
STORAGE: Is there evidence of drips or leaks from any equipment?	NO	
STORAGE: Mechanical equipment stored outside should be covered with tarp or plastic. Does any equipment need this type of weather protection?	N/A	
STORAGE: Does any equipment stored outdoors capture/collect rainwater that could lead to rusting or contamination by grease, oil, gas, etc.?	N/A	
STORAGE: Does the dry chemical storage area need protection from the wind or rain?	N/A	
STORAGE: Have the secondary containment structures (berms, dikes, walls, etc.) developed cracks or other issues that will keep them from working as designed to capture spills?	N/A	
STORAGE: Does the inspection of storage containers reveal signs of cracks, corrosion or leaks?	N/A	
STORAGE: Has this site inspection revealed any indications of poor or improper storage practices?	No	

[illegible]		
STORAGE: Keep storage areas clean, well organized, and equipped with ample clean-up supplies as appropriate for the materials stored.	N/A	
CLEANING: Is onsite cleaning limited to washing with water and soap? If not, provide a dedicated wash-down area and utilize appropriate BMPs to contain hazard/runoff.	N/A	
PARKING: Make a dedicated parking space available for vehicles or motive equipment that leak and place drip pans at each location.	YES	
WASTE MANAGEMENT: Plan timely service and removal to prevent dumpsters from overflowing.	N/A	
LOADING DOCKS: Cover large deliveries with a canopy or awning if they will be stored outside for any period.	N/A	
SLOPES: Use plastic sheet cover or other BMPs on unprotected slopes during storm events. Implement temporary soil stabilization measures until permanent stabilization is achieved.	N/A	
SEDIMENT REMOVAL: After a rain event, clean and dispose of the sediment and debris that has collected at the storm inlets and catch basins as soon as weather conditions permit.	N/A	
SLOPE REPAIR: Repair any slope/vegetation damage that has occurred during a storm event as soon as weather conditions permit.	N/A	
STORM DRAIN: Direct connections to storm drains from depressed loading docks (truck wells) must use protective BMPs. Filter fabric and oil/water separators should be used in these areas.	N/A	

NOTES/REMARKS:

ITEMS TO REVIEW:

- Outdoor storage activities
- Significant dust or particulate generating activities
- Onsite waste management and disposal practices
- Outdoor maintenance or processing activities

FACILITY (PUMP STATION, DISTRIBUTION RESERVOIR, WATER TREATMENT PLANT, OTHER): 5510 KIOWA DRIVE/WATER/TRAINING/EMPLOYEE TRAINING AND DEVELOPMENT CENTER
INSPECTED BY: JENNIFER ELLIS
DATE: MAY 9, 2008

VISUAL INSPECTION CHECKLIST	(YES/NO)	IF YES, ACTION TAKEN:
CLEANING: Are there signs of poor housekeeping (walkways cluttered, floors not swept, etc.) in any facility areas?	NO	
STORM DRAIN: Have the BMPs at storm drain inlets, catch basins and curb inlets been neglected? Do they need replacing?	NO	
STORM DRAIN: Are there obstructions or debris in the catch basins or curb inlets?	NO	
SITE WORK: Do unpaved areas of the facility produce excessive dust and dirt on windy days?	NO	
SITE WORK: Inspect the site prior to a forecast storm event. Site work: Should plastic sheet covers or tarps be placed on slopes not vegetated to avoid sediment flow or soil erosion?	NO	
SITE WORK: Are unpaved areas of the facility subject to scour or erosion during rainfall?	NO	
SITE WORK: To avoid erosion at the discharge end, should the rooftop runoff be made to spill into a pervious area (e.g. grass yard)?	NO	
SITE WORK/STORAGE: Are there spots, pools puddles or other traces of oil on any hard surfaces?	NO	
SITE WORK/STORAGE: Is standing water found in inappropriate areas long after the rain has stopped?	NO	
STORAGE: Is there evidence of drips or leaks from any equipment?	NO	
STORAGE: Mechanical equipment stored outside should be covered with tarp or plastic. Does any equipment need this type of weather protection?	NO	
STORAGE: Does any equipment stored outdoors capture/collect rainwater that could lead to rusting or contamination by grease, oil, gas, etc.?	NO	
STORAGE: Does the dry chemical storage area need protection from the wind or rain?	NO	
STORAGE: Have the secondary containment structures (berms, dikes, walls, etc.) developed cracks or other issues that will keep them from working as designed to capture spills?	NO	
STORAGE: Does the inspection of storage containers reveal signs of cracks, corrosion or leaks?	NO	
STORAGE: Has this site inspection revealed any indications of poor or improper storage practices?	NO	

SITE ASSESSMENT CHECKLIST	NEED TO TAKE ACTION? (YES/NO)	IF YES, ACTION TAKEN:
STORAGE: Keep storage areas clean, well organized, and equipped with ample clean-up supplies as appropriate for the materials stored.	NO	
CLEANING: Is onsite cleaning limited to washing with water and soap? If not, provide a dedicated wash-down area and utilize appropriate BMPs to contain hazard/runoff.	NO	
PARKING: Make a dedicated parking space available for vehicles or motive equipment that leak and place drip pans at each location.	NO	
WASTE MANAGEMENT: Plan timely service and removal to prevent dumpsters from overflowing.	NO	
LOADING DOCKS: Cover large deliveries with a canopy or awning if they will be stored outside for any period.	NO	
SLOPES: Use plastic sheet cover or other BMPs on unprotected slopes during storm events. Implement temporary soil stabilization measures until permanent stabilization is achieved.	NO	
SEDIMENT REMOVAL: After a rain event, clean and dispose of the sediment and debris that has collected at the storm inlets and catch basins as soon as weather conditions permit.	NO	
SLOPE REPAIR: Repair any slope/vegetation damage that has occurred during a storm event as soon as weather conditions permit.	NO	
STORM DRAIN: Direct connections to storm drains from depressed loading docks (truck wells) must use protective BMPs. Filter fabric and oil/water separators should be used in these areas.	NO

- Bare, unprotected soil conditions

Storm Water Pollution Prevention Visual Inspection Checklist

Inspected by: R CASTILLO Facility: ALV. TREATMENT Date: [illegible]

Items to Review:

- Outdoor Storage Activities
- Significant Dust or Particulate Generating Activities
- Onsite Waste Management and Disposal Practices
- Outdoor Maintenance or Processing Activities
- Bare, Unprotected Soil Conditions

BMP options:

- Place filter fabric and gravel bags as necessary at storm water inlets and catch basins
- Cleaning materials should be readily available in all maintenance areas
- Spill clean up kits should be readily available in all chemical storage areas
- Straw rolls should be used to provide slope and soil stabilization
- Driveway and parking lot maintenance: Clean surfaces produce cleaner runoff

Visual Inspection Checklist	(Yes/No)	If yes, action taken:
Are there signs of poor housekeeping (cluttered walkways, unswept floors, etc.) in any areas of the facility?	NO	
Have the BMPs at storm drain inlets, catch basins and curb inlets been neglected? Do they need replacing?	NO	
Are there obstructions or debris in the catch basins or curb inlets?	NO	
Are unpaved areas of the facility subject to scour or erosion during rainfall?	NO	
Is there evidence of drips or leaks from any equipment or machinery kept onsite?	NO	
Mechanical equipment stored outside should be covered with tarp or plastic. Does any equipment need this type of weather protection?	NO	
Does any equipment stored outdoors capture/collect rainwater that could lead to rusting or contamination by grease, oil, gas, etc.?	NO	
Does the dry chemical storage area need protection from the wind or rain?	NO	
Inspect the secondary containment structures (berms, dikes, walls, etc.). Have they developed cracks or other issues that will keep them from working as designed to capture spills?	NO	
Is standing water found in inappropriate areas long after the rain has stopped?	NO	

Storm Water Pollution Prevention Visual Inspection Checklist

Visual Inspection Checklist	(Yes/No)	If yes, action taken:
Does the inspection of storage containers reveal signs of cracks, corrosion or leaks?	NO	
Has this site inspection revealed any indications of poor or improper storage practices?	NO	
All hard surfaces: Are there spots, pools, puddles or other traces of oil, grease, or chemicals on the ground?	NO	
Do unpaved areas of the facility produce excessive dust and dirt on windy days?	NO	
Inspect the site prior to a forecast storm event. Should plastic sheet covers or tarps be placed on unvegetated slopes to avoid sediment flow or soil erosion?	NO	
To avoid erosion at the discharge end, should the rooftop runoff be made to spill into a pervious area (e.g. grass yard) or filter fabric first?	NO	
Site Assessment Checklist	**Need to take Action? (Yes/No)**	**If yes, action taken:**
Keep storage areas clean, well organized, and equipped with ample clean-up supplies as appropriate for the materials stored.	Yes	
Is onsite cleaning limited to washing with water and soap? If not, provide a dedicated wash-down area and utilize appropriate BMPs.	YES	
Make a dedicated parking space available for vehicles or motive equipment that leak and place drip pans at each location.	YES	
Plan timely service and removal to prevent dumpsters from overflowing.	YES	
Loading docks: Cover large deliveries with a canopy or awning if they will be stored outside for any amount of time.	YES	
Use plastic sheet cover or other BMPs on unprotected slopes during storm events. Implement temporary soil stabilization measures until permanent stabilization is achieved.	YES	
After a rain event, clean and dispose of the sediment and debris that has collected at the storm inlets and catch basins as soon as weather conditions permit.	YES	
Repair any slope/vegetation damage that has occurred during a storm event as soon as weather conditions permit.	YES	
Direct connections to storm drains from depressed loading docks (truck wells) must use protective BMPs. Filter fabric and oil/water separators should be used in these areas.	YES

○ CONSTRUCTION SITE OR ◉ FACILITY (PUMP STATION, DISTRIBUTION RESERVOIR, WATER TREATMENT PLANT, OTHER): Miramar Water Treatment Plant 10710 Scripps Lake Drive, San Diego, CA

INSPECTOR AND DATE P. Schlitt September 6, 2007

VISUAL INSPECTION CHECKLIST	(YES/NO)	IF YES, ACTION TAKEN
CLEANING: Are there signs of poor housekeeping (walkways cluttered, floors not swept, etc.) in any facility areas?	No	Site currently under construction for upgrades
STORM DRAIN: Have the BMPs at storm drain inlets, catch basins and curb inlets been neglected? Do they need replacing?	Yes	Surface inlet drains are either in disrepair or entirely missing BMPs (gravel bags, etc.) around each drain inlet
STORM DRAIN: Are there obstructions or debris in the catch basins or curb inlets?	Yes	Numerous surface drain inlets have gravel that has dropped down in outlet pipe
SITE WORK: Do unpaved areas of the facility produce excessive dust and dirt on windy days?	yes	Northeast end of facility parking lot entirely unpaved (approx 1 acre)
SITE WORK: Inspect the site prior to a forecast storm event. Site work: Should plastic sheet covers or tarps be placed on slopes not vegetated to avoid sediment flow or soil erosion?	yes	slope along the east side of the bulk chemical storage areas lacks BMP for barren slope
SITE WORK: Are unpaved areas of the facility subject to scour or erosion during rainfall?	yes	visible signs of rill erosion around all unpaved road surfaces surrounding facility
SITE WORK: To avoid erosion at the discharge end, should the rooftop runoff be made to spill into a pervious area (e.g. grass yard)?	N/A	80% of the site currently under construction
SITE WORK/STORAGE: Are there spots, pools puddles or other traces of oil on any hard surfaces?	N/A	area entirely unpaved - gravel road surface unable to determine
SITE WORK/STORAGE: Is standing water found in inappropriate areas long after the rain has stopped?	No	Dry season inspection
STORAGE: Is there evidence of drips or leaks from any equipment?	No	
STORAGE: Mechanical equipment stored outside should be covered with tarp or plastic. Does any equipment need this type of weather protection?	No	Mechanical equipment limited to a fork-lift Other outside contractor has materials stored in holding bins.
STORAGE: Does any equipment stored outdoors capture/collect rainwater that could lead to rusting or contamination by grease, oil, gas, etc.?	No	
STORAGE: Does the dry chemical storage area need protection from the wind or rain?	No	Chemical storage in designated areas
STORAGE: Have the secondary containment structures (berms, dikes, walls, etc.) developed cracks or other issues that will keep them from working as designed to capture spills?	No	Adsorptive fiber booms used as secondary containment measure for fenced enclosure used to store flammable liquids
STORAGE: Does the inspection of storage containers reveal signs of cracks, corrosion or leaks?	No	
STORAGE: Has this site inspection revealed any indications of poor or improper storage practices?	No	One stored truck being used to hold oils and gas — adjacent to loading dock

SITE ASSESSMENT CHECKLIST		
STORAGE: Keep storage areas clean, well organized, and equipped with ample clean-up supplies as appropriate for the materials stored.	yes	
CLEANING: Is onsite cleaning limited to washing with water and soap? If not, provide a dedicated wash-down area and utilize appropriate BMPs to contain hazard/runoff.	yes	
PARKING: Make a dedicated parking space available for vehicles or motive equipment that leak and place drip pans at each location.	N/A	Not installed at this time due to facility still being under construction
WASTE MANAGEMENT: Plan timely service and removal to prevent dumpsters from overflowing.	yes	
LOADING DOCKS: Cover large deliveries with a canopy or awning if they will be stored outside for any period.	yes	
SLOPES: Use plastic sheet cover or other BMPs on unprotected slopes during storm events. Implement temporary soil stabilization measures until permanent stabilization is achieved.	No	Far eastern side of WTP (next to chemical storage tanks) the existing 2:1 slope is lacking slope BMP's
SEDIMENT REMOVAL: After a rain event, clean and dispose of the sediment and debris that has collected at the storm inlets and catch basins as soon as weather conditions permit.	yes	Drain inlets should have accumulated gravel removed from inside surface storm drains
SLOPE REPAIR: Repair any slope/vegetation damage that has occurred during a storm event as soon as weather conditions permit.	No	No vegetation of existing slopes, however no evidence of excessive erosion
STORM DRAIN: Direct connections to storm drains from depressed loading docks (truck wells) must use protective BMPs. Filter fabric and oil/water separators should be used in these areas.	No	No signs of surface drains in these areas

NOTES/REMARKS: 3x3 storm drain grate (across from the chemical storage facility) needs broken gravel bags replaced around the perimeter of the storm drain grate.

1,3 x 2.5 storm drain grate located along the south west side of #1 clearwell needs to have new gravel bags or weighted fiber rolls installed around the perimeter of the drain grate

2 x 3.5 storm drain grate that is located along the south east side of the facility (across from the Filters and Ozone Building) needs to have new gravel bags and filter fabric installed over drain grate.

SITE ASSESSMENT CHECKLIST		
STORAGE: Keep storage areas clean, well organized, and equipped with ample clean-up supplies as appropriate for the materials stored.	NO	
CLEANING: Is onsite cleaning limited to washing with water and soap? If not, provide a dedicated wash-down area and utilize appropriate BMPs to contain hazard/runoff.	NO	
PARKING: Make a dedicated parking space available for vehicles or motive equipment that leak and place drip pans at each location.	NO	
WASTE MANAGEMENT: Plan timely service and removal to prevent dumpsters from overflowing.	NO	
LOADING DOCKS: Cover large deliveries with a canopy or awning if they will be stored outside for any period.	NO	
SLOPES: Use plastic sheet cover or other BMPs on unprotected slopes during storm events. Implement temporary soil stabilization measures until permanent stabilization is achieved.	NO	
SEDIMENT REMOVAL: After a rain event, clean and dispose of the sediment and debris that has collected at the storm inlets and catch basins as soon as weather conditions permit.	NO	
SLOPE REPAIR: Repair any slope/vegetation damage that has occurred during a storm event as soon as weather conditions permit.	NO	
STORM DRAIN: Direct connections to storm drains from depressed loading docks (truck wells) must use protective BMPs. Filter fabric and oil/water separators should be used in these areas.	NO	

NOTES/REMARKS:

ITEMS TO REVIEW:

- Outdoor storage activities
- Significant dust or particulate generating activities
- Onsite waste management and disposal practices
- Outdoor maintenance or processing activities

STORAGE: Mechanical equipment stored outside should be covered with tarp or plastic. Does any equipment need this type of weather protection?	No	
STORAGE: Does any equipment stored outdoors capture/collect rainwater that could lead to rusting or contamination by grease, oil, gas, etc.?	No	
STORAGE: Does the dry chemical storage area need protection from the wind or rain?	No	
STORAGE: Have the secondary containment structures (berms, dikes, walls, etc.) developed cracks or other issues that will keep them from working as designed to capture spills?	No	
STORAGE: Does the inspection of storage containers reveal signs of cracks, corrosion or leaks?	No	
STORAGE: Has this site inspection revealed any indications of poor or improper storage practices?	No	

SITE ASSESSMENT CHECKLIST		
STORAGE: Keep storage areas clean, well organized, and equipped with ample clean-up supplies as appropriate for the materials stored.	No	
CLEANING: Is onsite cleaning limited to washing with water and soap? If not, provide a dedicated wash-down area and utilize appropriate BMPs to contain hazard/runoff.	Yes	
PARKING: Make a dedicated parking space available for vehicles or motive equipment that leak and place drip pans at each location.	No	
WASTE MANAGEMENT: Plan timely service and removal to prevent dumpsters from overflowing.	Yes	
LOADING DOCKS: Cover large deliveries with a canopy or awning if they will be stored outside for any period.	NA	
SLOPES: Use plastic sheet cover or other BMPs on unprotected slopes during storm events. Implement temporary soil stabilization measures until permanent stabilization is achieved.	NA	
SEDIMENT REMOVAL: After a rain event, clean and dispose of the sediment and debris that has collected at the storm inlets and catch basins as soon as weather conditions permit.	NA	
SLOPE REPAIR: Repair any slope/vegetation damage that has occurred during a storm event as soon as weather conditions permit.	NA	
STORM DRAIN: Direct connections to storm drains from depressed loading docks (truck wells) must use protective BMPs. Filter fabric and oil/water separators should be used in these areas.	NA	

NOTES/REMARKS:

ITEMS TO REVIEW:

- Outdoor storage activities
- Significant dust or particulate generating activities
- Onsite waste management and disposal practices
- Outdoor maintenance or processing activities

SITE WORK: Are unpaved areas of the facility subject to scour or erosion during rainfall?	No	
SITE WORK: To avoid erosion at the discharge end, should the rooftop runoff be made to spill into a pervious area (e.g. grass yard)?	N/A	
SITE WORK/STORAGE: Are there spots, pools puddles or other traces of oil on any hard surfaces?	No	
SITE WORK/STORAGE: Is standing water found in inappropriate areas long after the rain has stopped?	No	
STORAGE: Is there evidence of drips or leaks from any equipment?	No	
STORAGE: Mechanical equipment stored outside should be covered with tarp or plastic. Does any equipment need this type of weather protection?	No	
STORAGE: Does any equipment stored outdoors capture/collect rainwater that could lead to rusting or contamination by grease, oil, gas, etc.?	No	
STORAGE: Does the dry chemical storage area need protection from the wind or rain?	N/A	
STORAGE: Have the secondary containment structures (berms, dikes, walls, etc.) developed cracks or other issues that will keep them from working as designed to capture spills?	N/A	
STORAGE: Does the inspection of storage containers reveal signs of cracks, corrosion or leaks?	N/A	
STORAGE: Has this site inspection revealed any indications of poor or improper storage practices?	No	

○ CONSTRUCTION SITE OR ○ FACILITY (PUMP STATION, DISTRIBUTION RESERVOIR, WATER TREATMENT PLANT, OTHER): Miramar Ranch North Res

INSPECTOR AND DATE Zahra Alexander

VISUAL INSPECTION CHECKLIST	(YES/NO)	IF YES, ACTION TAKEN:
CLEANING: Are there signs of poor housekeeping (walkways cluttered, floors not swept, etc.) in any facility areas?	No	
STORM DRAIN: Have the BMPs at storm drain inlets, catch basins and curb inlets been neglected? Do they need replacing?	yes See remarks	
STORM DRAIN: Are there obstructions or debris in the catch basins or curb inlets?	See remarks	
SITE WORK: Do unpaved areas of the facility produce excessive dust and dirt on windy days?	No	
SITE WORK: Inspect the site prior to a forecast storm event. Site work: Should plastic sheet covers or tarps be placed on slopes not vegetated to avoid sediment flow or soil erosion?		
SITE WORK: Are unpaved areas of the facility subject to scour or erosion during rainfall?	No
